

Welcome to CS106A!

- Four Handouts
- Today:
 - Course Overview
 - Why Learn to Program?
 - Meet Karel the Robot

Who's Here Today?

- Aeronautical Engineering
- Anthropology
- Art
- Biochemistry
- Biology
- Biophysics
- Business Administration
- Chemical Engineering
- Chemistry
- Civil Engineering
- Classics
- Communication
- Comparative Literature
- Computational and Mathematical Science
- Computer Science
- Drama
- Earth Systems
- Economics
- Education
- Electrical Engineering
- Energy Resources Engineering
- English
- Environmental Engineering
- Film Studies
- Genetics
- Geological Science
- Human Biology
- International Relations
- Law
- Materials Science
- Mathematics
- Mechanical Engineering
- Medicine
- Management Science and Engineering
- Music
- Physics
- Political Science
- Psychology
- Race and Ethnicity
- Religious Studies
- Science, Technology, and Society
- Statistics
- Symbolic Systems
- Urban Studies

Course Staff

Instructor: Keith Schwarz
(htiek@cs.stanford.edu)

Head TA: Jeremy Keeshin

Grading Policies

■ 55% Assignments

■ 15% Midterm

Midterm Exam:
Monday, February 13
7:00PM - 9:00PM

Grading Policies

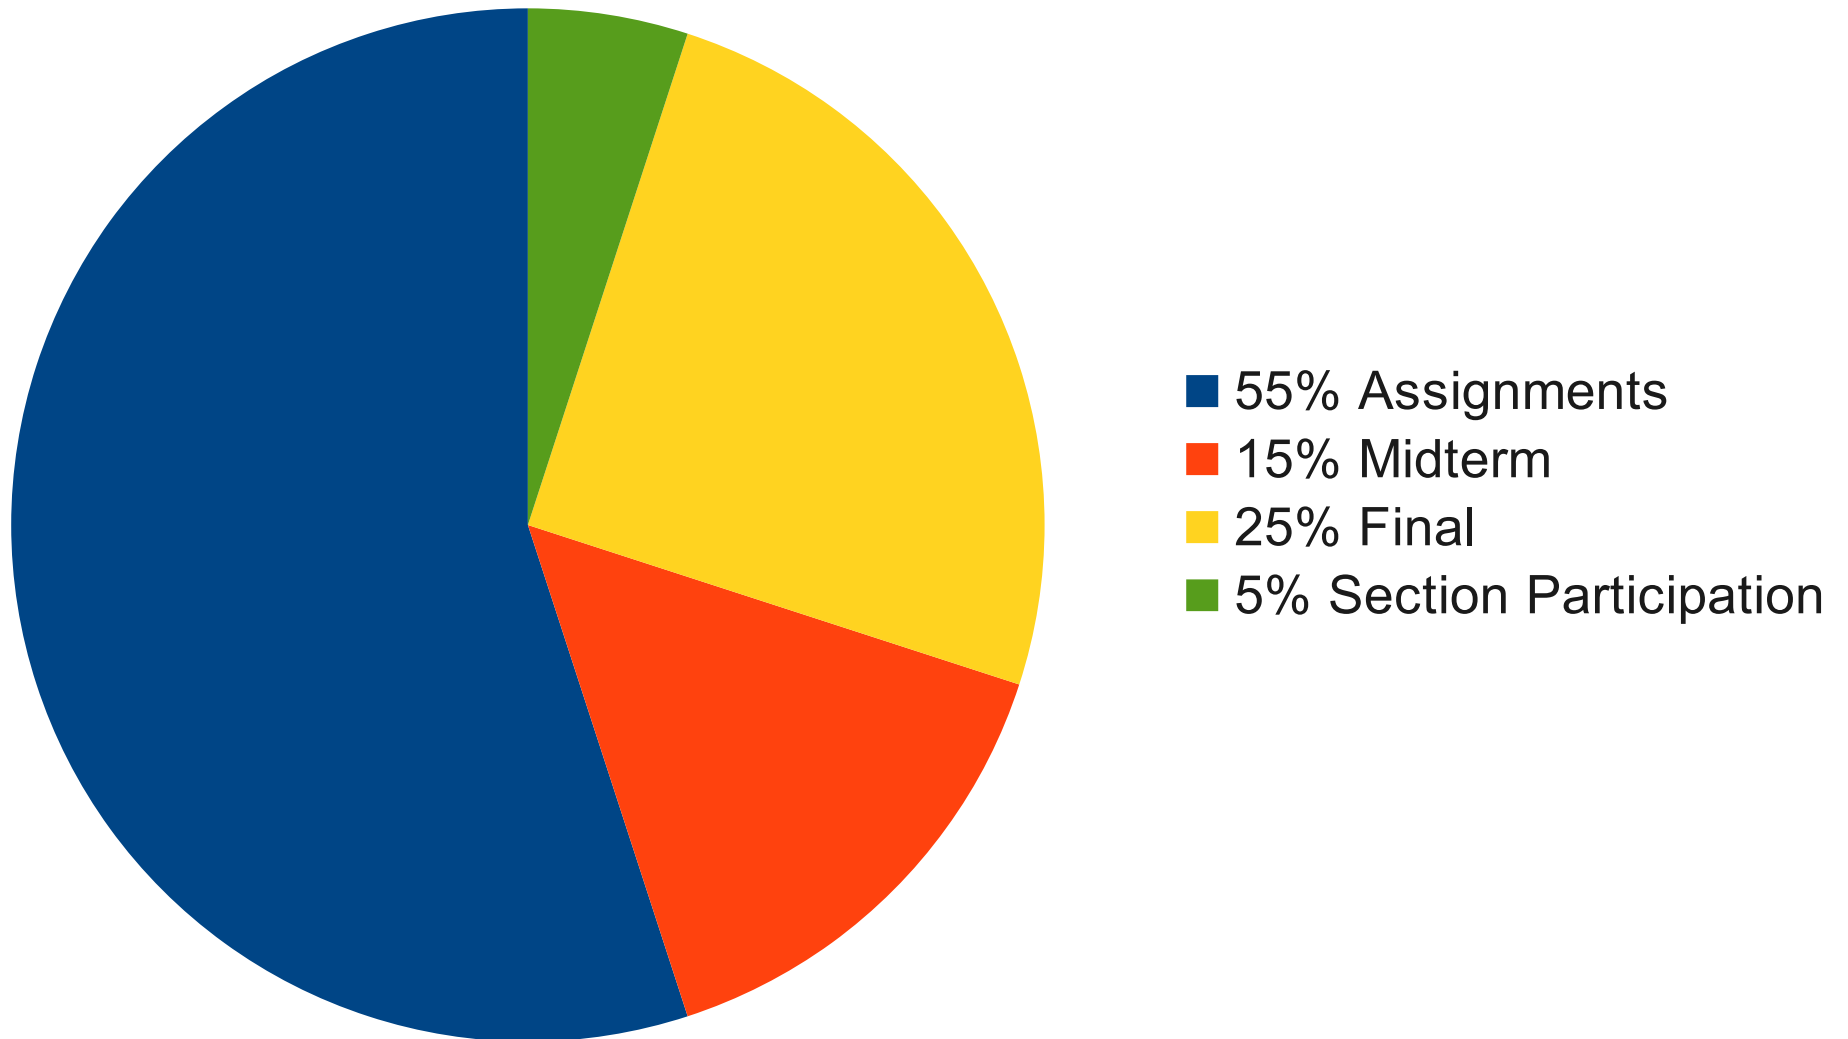

Grading Policies

- 55% Assignments
- 15% Midterm
- 25% Final

Final Exam:
Wednesday, March 21
12:15PM - 3:15PM

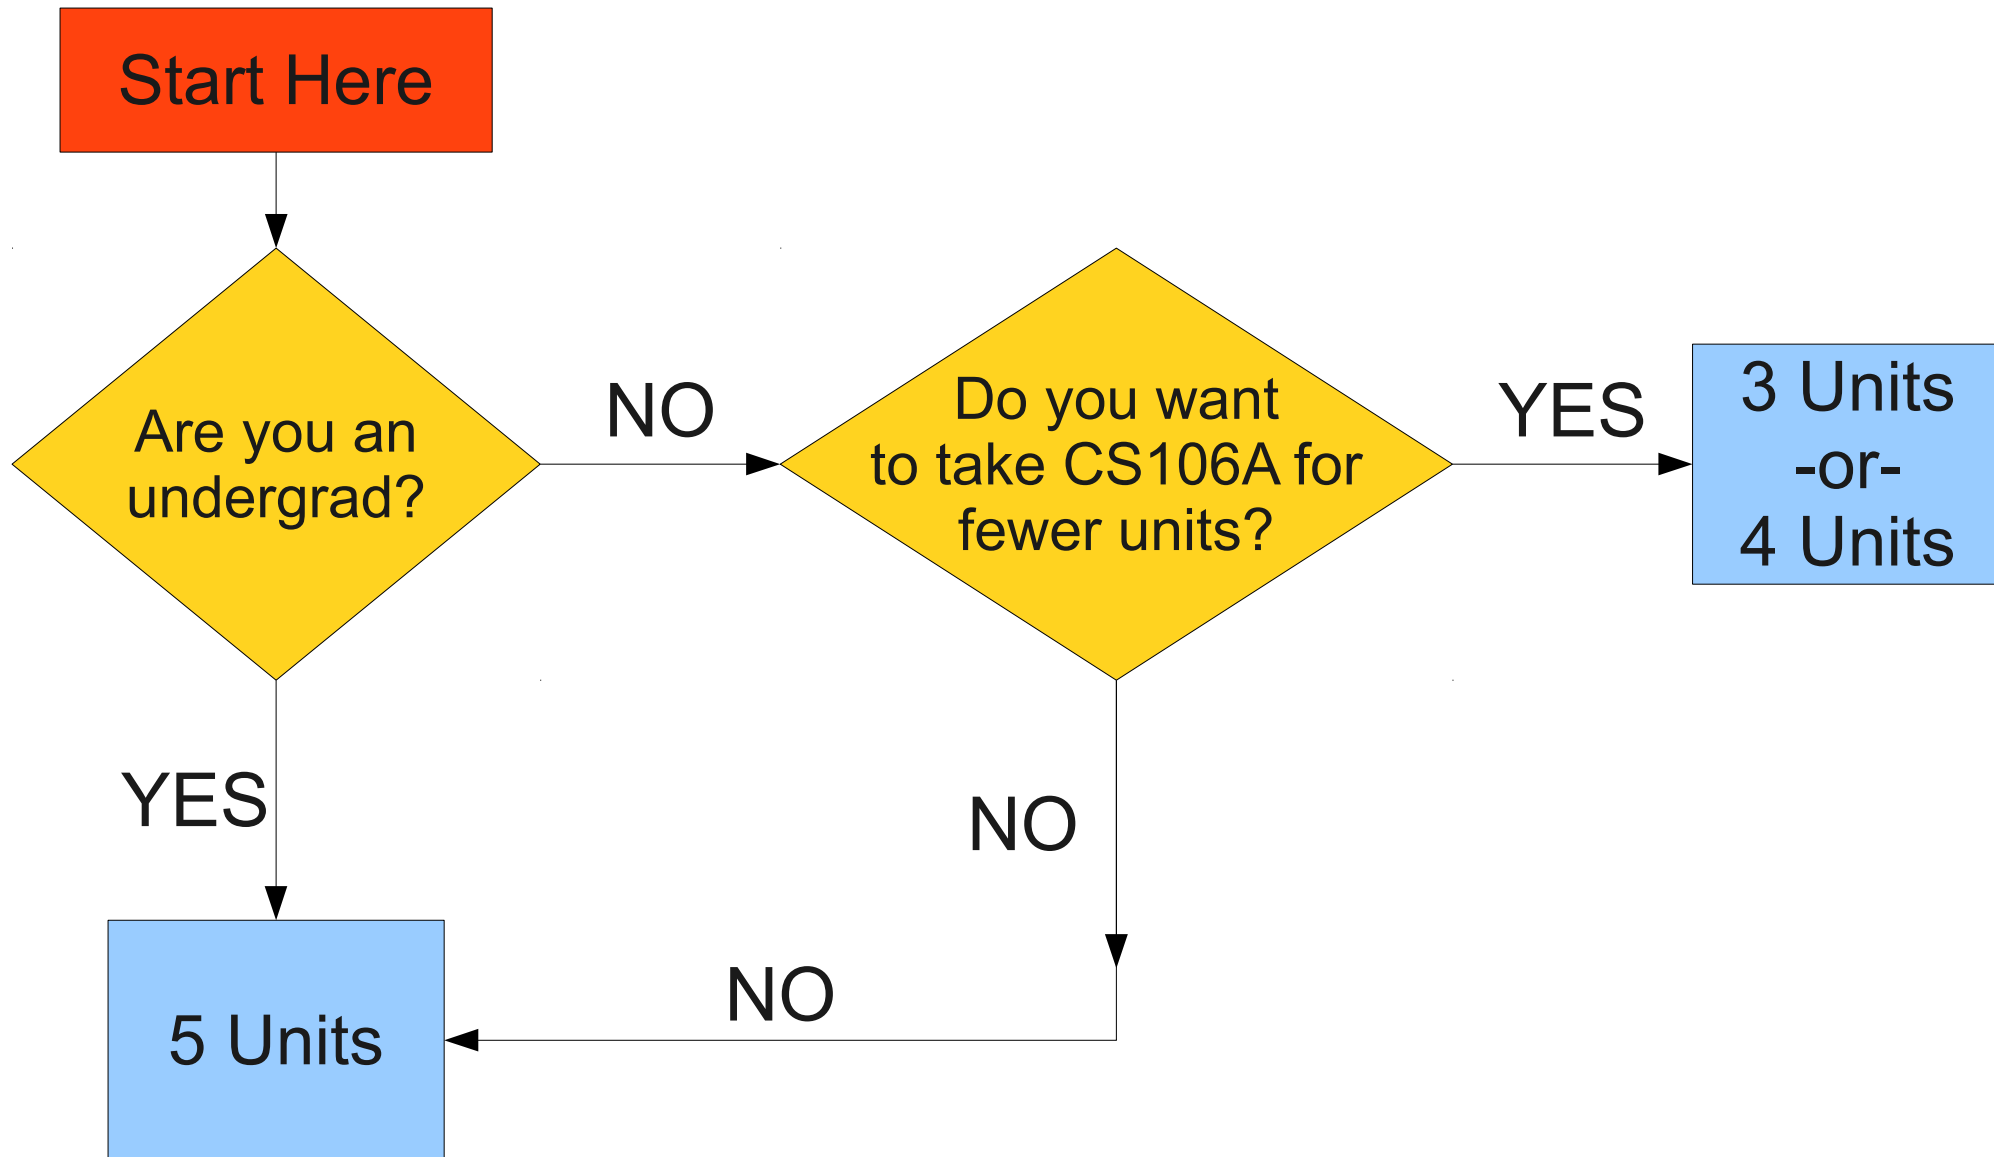

Grading Policies

Discussion Sections

- Weekly discussion sections.
- Section attendance is **required** in CS106A.
- Sign up between Thursday, January 12 at 5:00PM and Sunday, January 15 at 5:00PM at **<http://cs198.stanford.edu/section>**
- Do not enroll through Axxess; everything will be handled through the above link.

The CS106A Units Flowchart

A Word on the Honor Code...

A Word on the Honor Code...

- Feel free to discuss general ideas with other students, but **do not** share any programs or code (text of the programs).
- **Cite all sources** you use and everyone you collaborated with.
- This is **not** an exhaustive list; please see Handout #03 for a full discussion of the Honor Code.

On a Happier Note...

- There are 38 hours a week where we're available to help you!
- Section leaders and course helpers staff the Tresidder LaIR Sunday - Thursday, 6PM - Midnight.
 - Starts next Tuesday.
- Keith and Jeremy hold office hours each week.
 - See Handout #00 for details.

Why Learn to Program Computers?

Computer science is no more about computers than astronomy is about telescopes, biology is about microscopes or chemistry is about beakers and test tubes. Science is not about tools, it is about how we use them and what we find out when we do.

- Michael Fellows and Ian Parberry,
“SIGACT trying to get children excited about CS”

Computer science is no more about computers than astronomy is about telescopes, biology is about microscopes or chemistry is about beakers and test tubes.

Science is not about tools, it is about how we use them and what we find out when we do.

- Psychology
- Race and Ethnicity
- Religious Studies
- Science, Technology, and Society
- Statistics
- Symbolic Systems
- Urban Studies

Goals for this Course

- **Learn how to harness computing power to solve problems.**
- To that end:
 - Explore fundamental techniques in computer programming.
 - Develop good software engineering techniques.
 - Gain familiarity with the Java programming language.

Meet Karel the Robot
