FINAL PROJECT REFERENCE IMAGE

CS 148 Autumn 2018-2019

Due Date: Monday, 26 November 2018 by 7pm

For the final class engagement grade of the course, each student must submit a reference image that serves as motivation/inspiration for their final project. These images will be compiled into a slideshow and shown all together as part of class on November 27, in order to give you an idea of what your classmates are considering for their projects.

Logistics

• **What:** The reference image can be an image you capture/create or one that you find online. It should serve as some inspiration or reference for the scene you are tentatively planning to model for your final project.

• **Submission:** Please email your reference image to any of the CAs or to the course staff list, cs148.staff@gmail.com.

• **Due date:** November 26 by 7pm. This deadline is strict, since the CAs will need time to compile the images into a slideshow before class the next day.

• **Grading:** Images are graded out of three points, based on the quality of the image and the feasibility of creating something similar as a final project.

• Note that each student needs to submit an image. If you are working with a partner on your final project you and your partner must each submit your own image.

• These images are not binding! You may submit a reference image, then see another student’s image in class that inspires you to change the subject of your final project.

Additional Notes

We encourage you to iterate with the CAs on your image. The grading metric described above is unavoidably subjective. Thus we encourage you to get feedback from a CA before the due date—if your image doesn’t look very good or looks like something that would be infeasible, the CAs can give you advice and you can keep searching for different images.

The two primary takeaways are: you should be looking for images to motivate your own project, and these will be shown to the entire class as part of a community effort to help pollinate ideas for the ray traced images.
