Neural Prosthetics Translational Laboratory

Brain Computer Interfaces for Communication

Erin M. Kunz, MS

Department of Electrical Engineering
Stanford University

About me

Software/Controls Engineering
Autonomous Vehicle Development

Joined NPTL w/ advisors:
Krishna Shenoy,
Jaimie Henderson,
Shaul Druckmann

Hayward, CA

B.S. MechE,
Minor: EECS

2020
Admitted to PhD in EE

2018
Admitted to MS in EE

2024:
PhD Defense(!)
&
Start PostDoc

The need to restore movement and communication

Christopher Reeve at MIT, 2003

The need to restore movement and communication

ALS: ~15,000 individuals in the U.S. (CDC, 2016)

Hundreds of thousands of individuals with tetraplegia (NSCISC, 2018)

Today: essentially no treatments

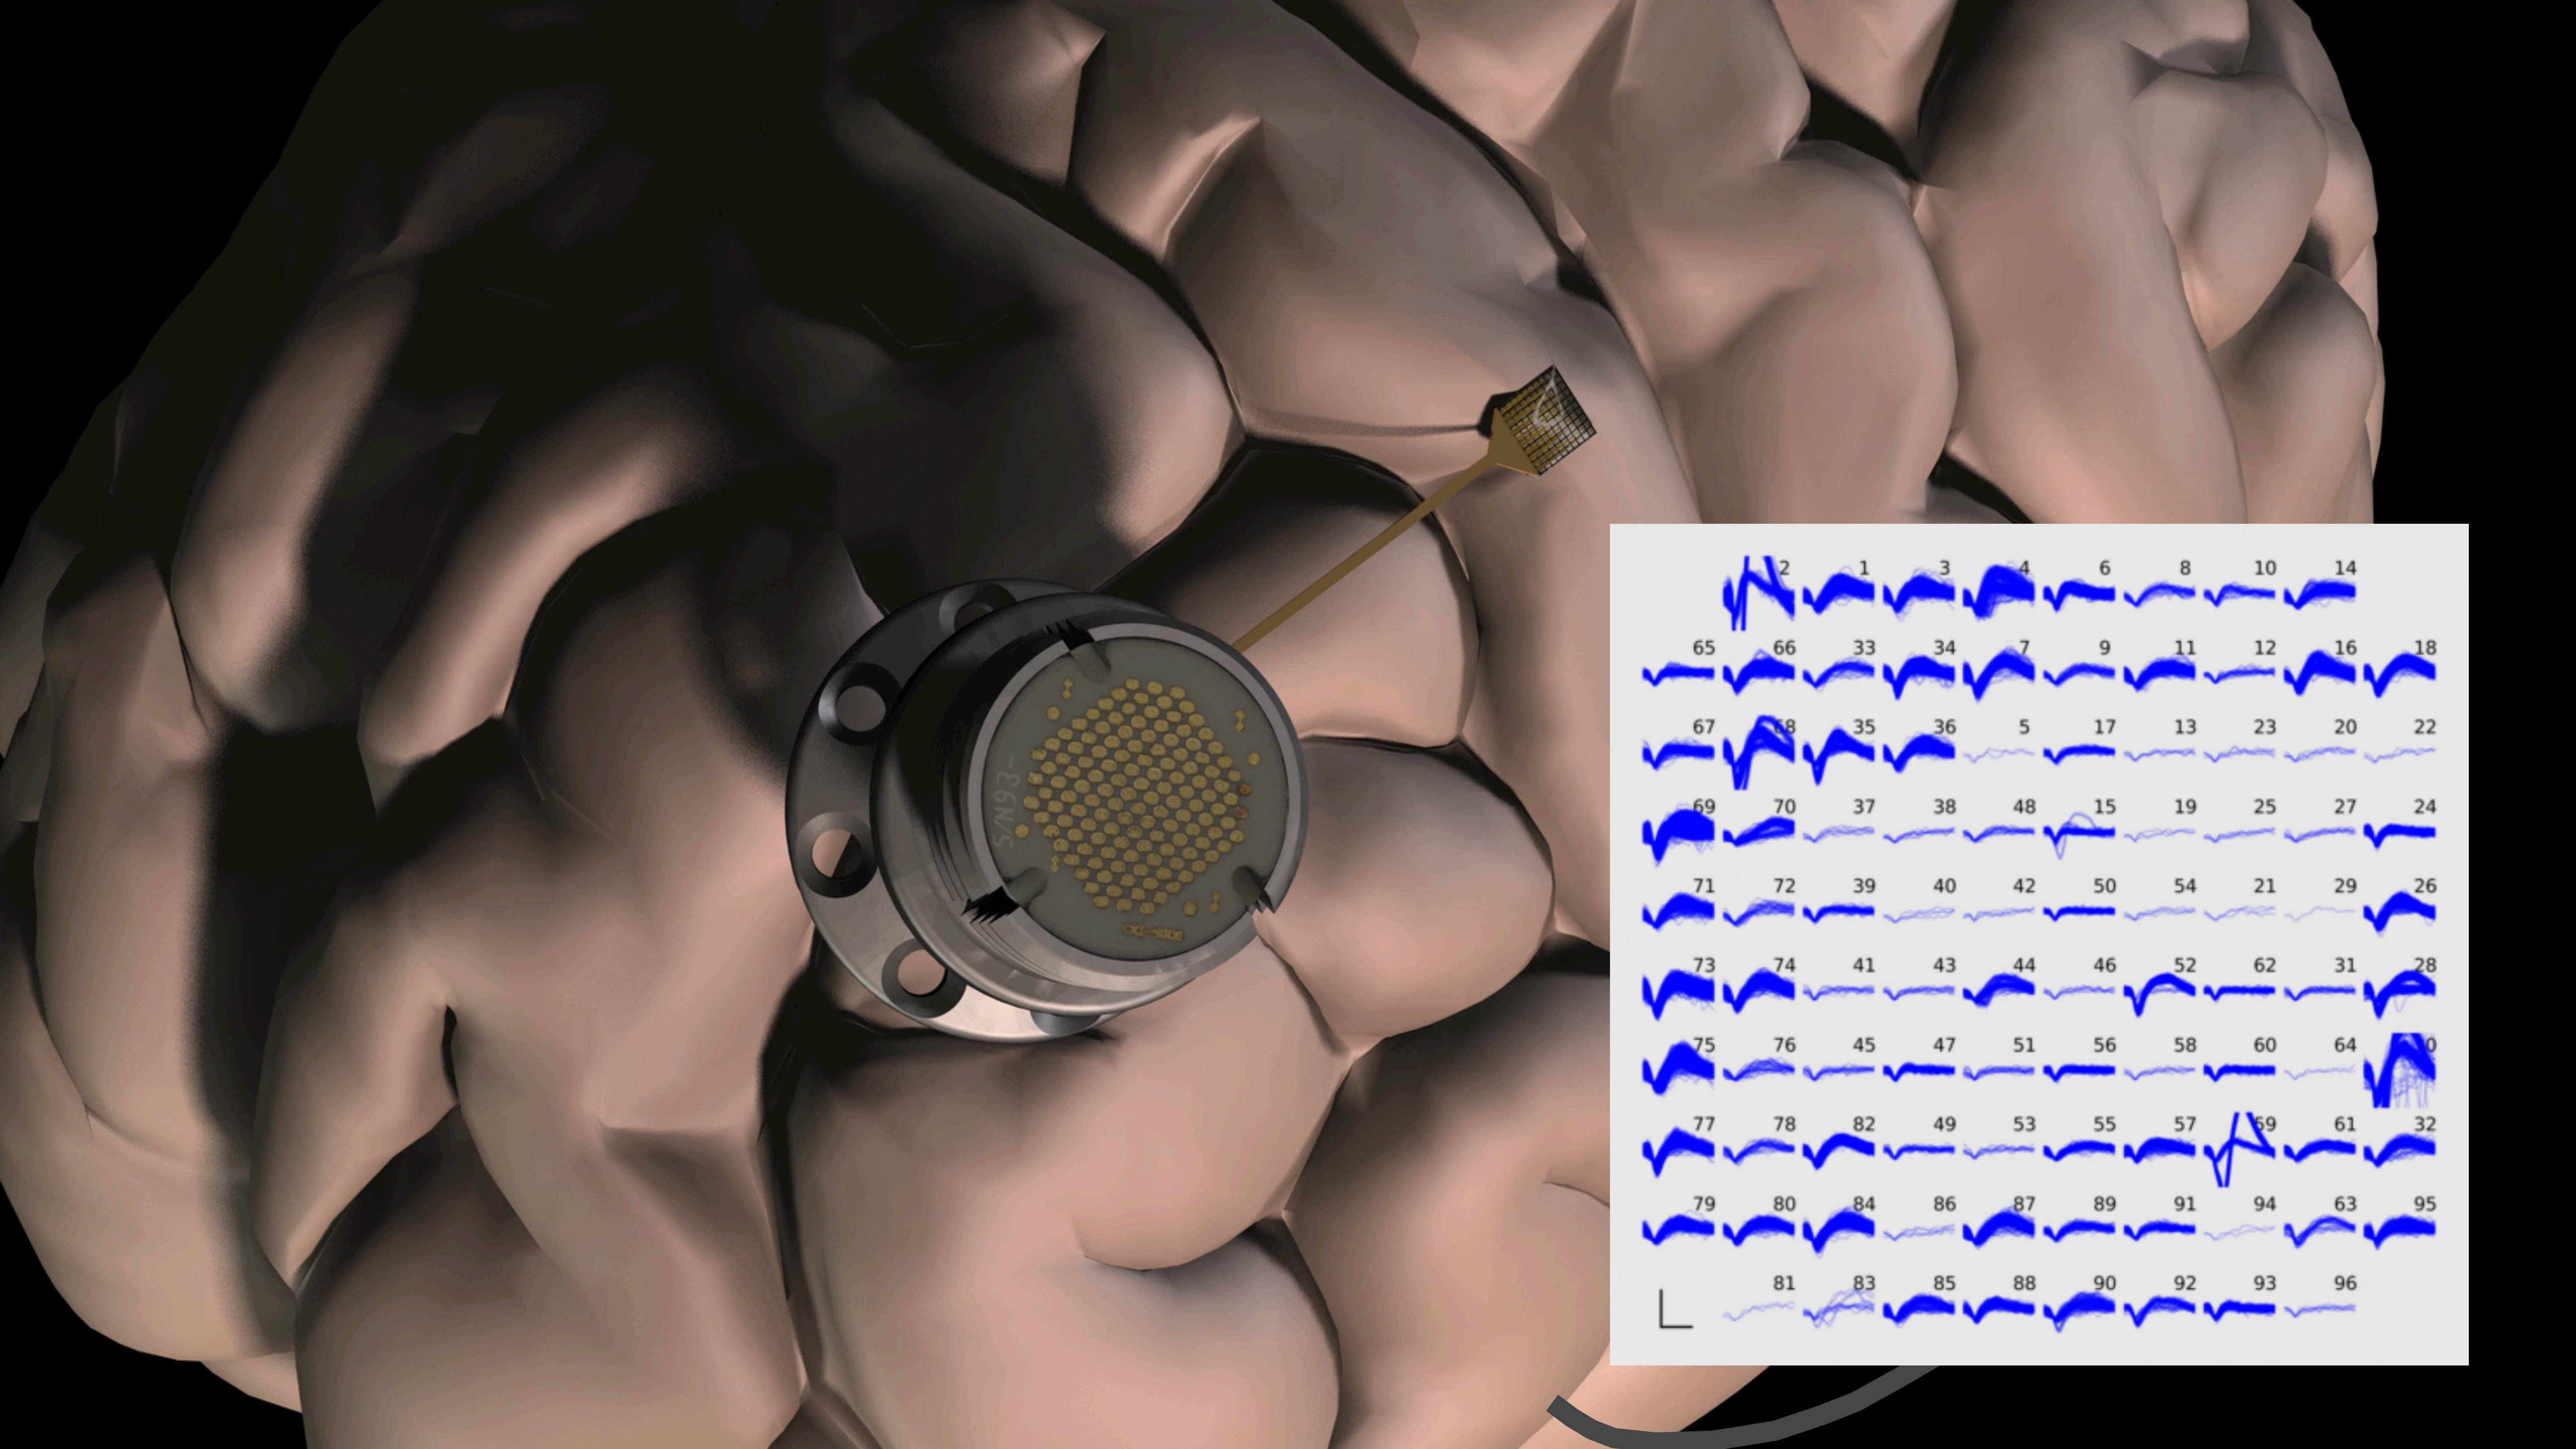

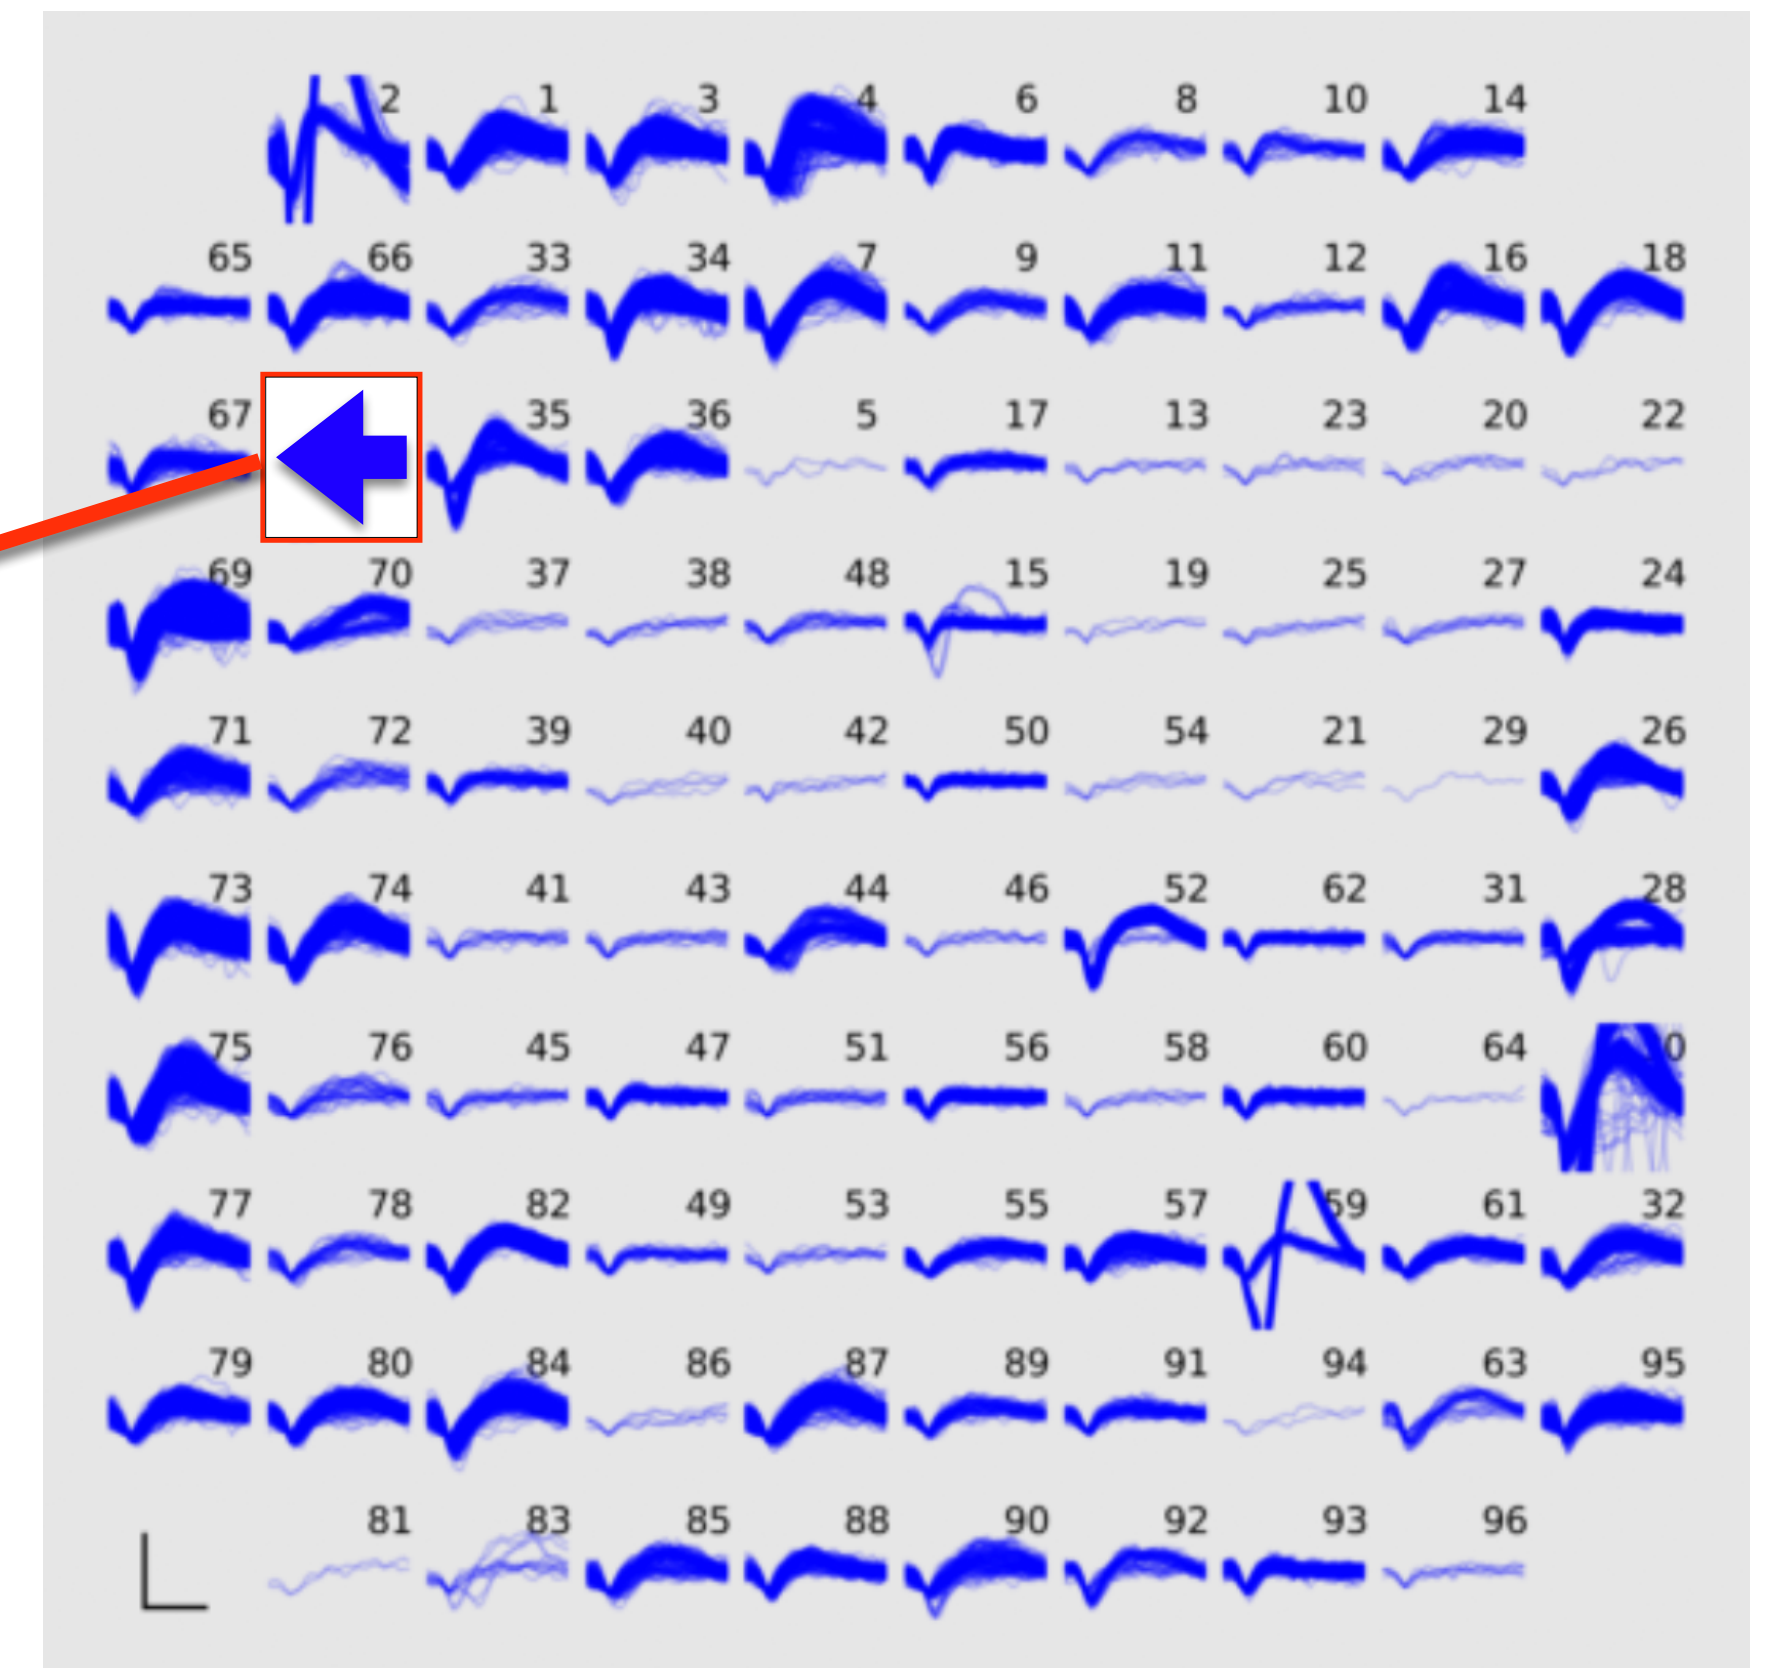

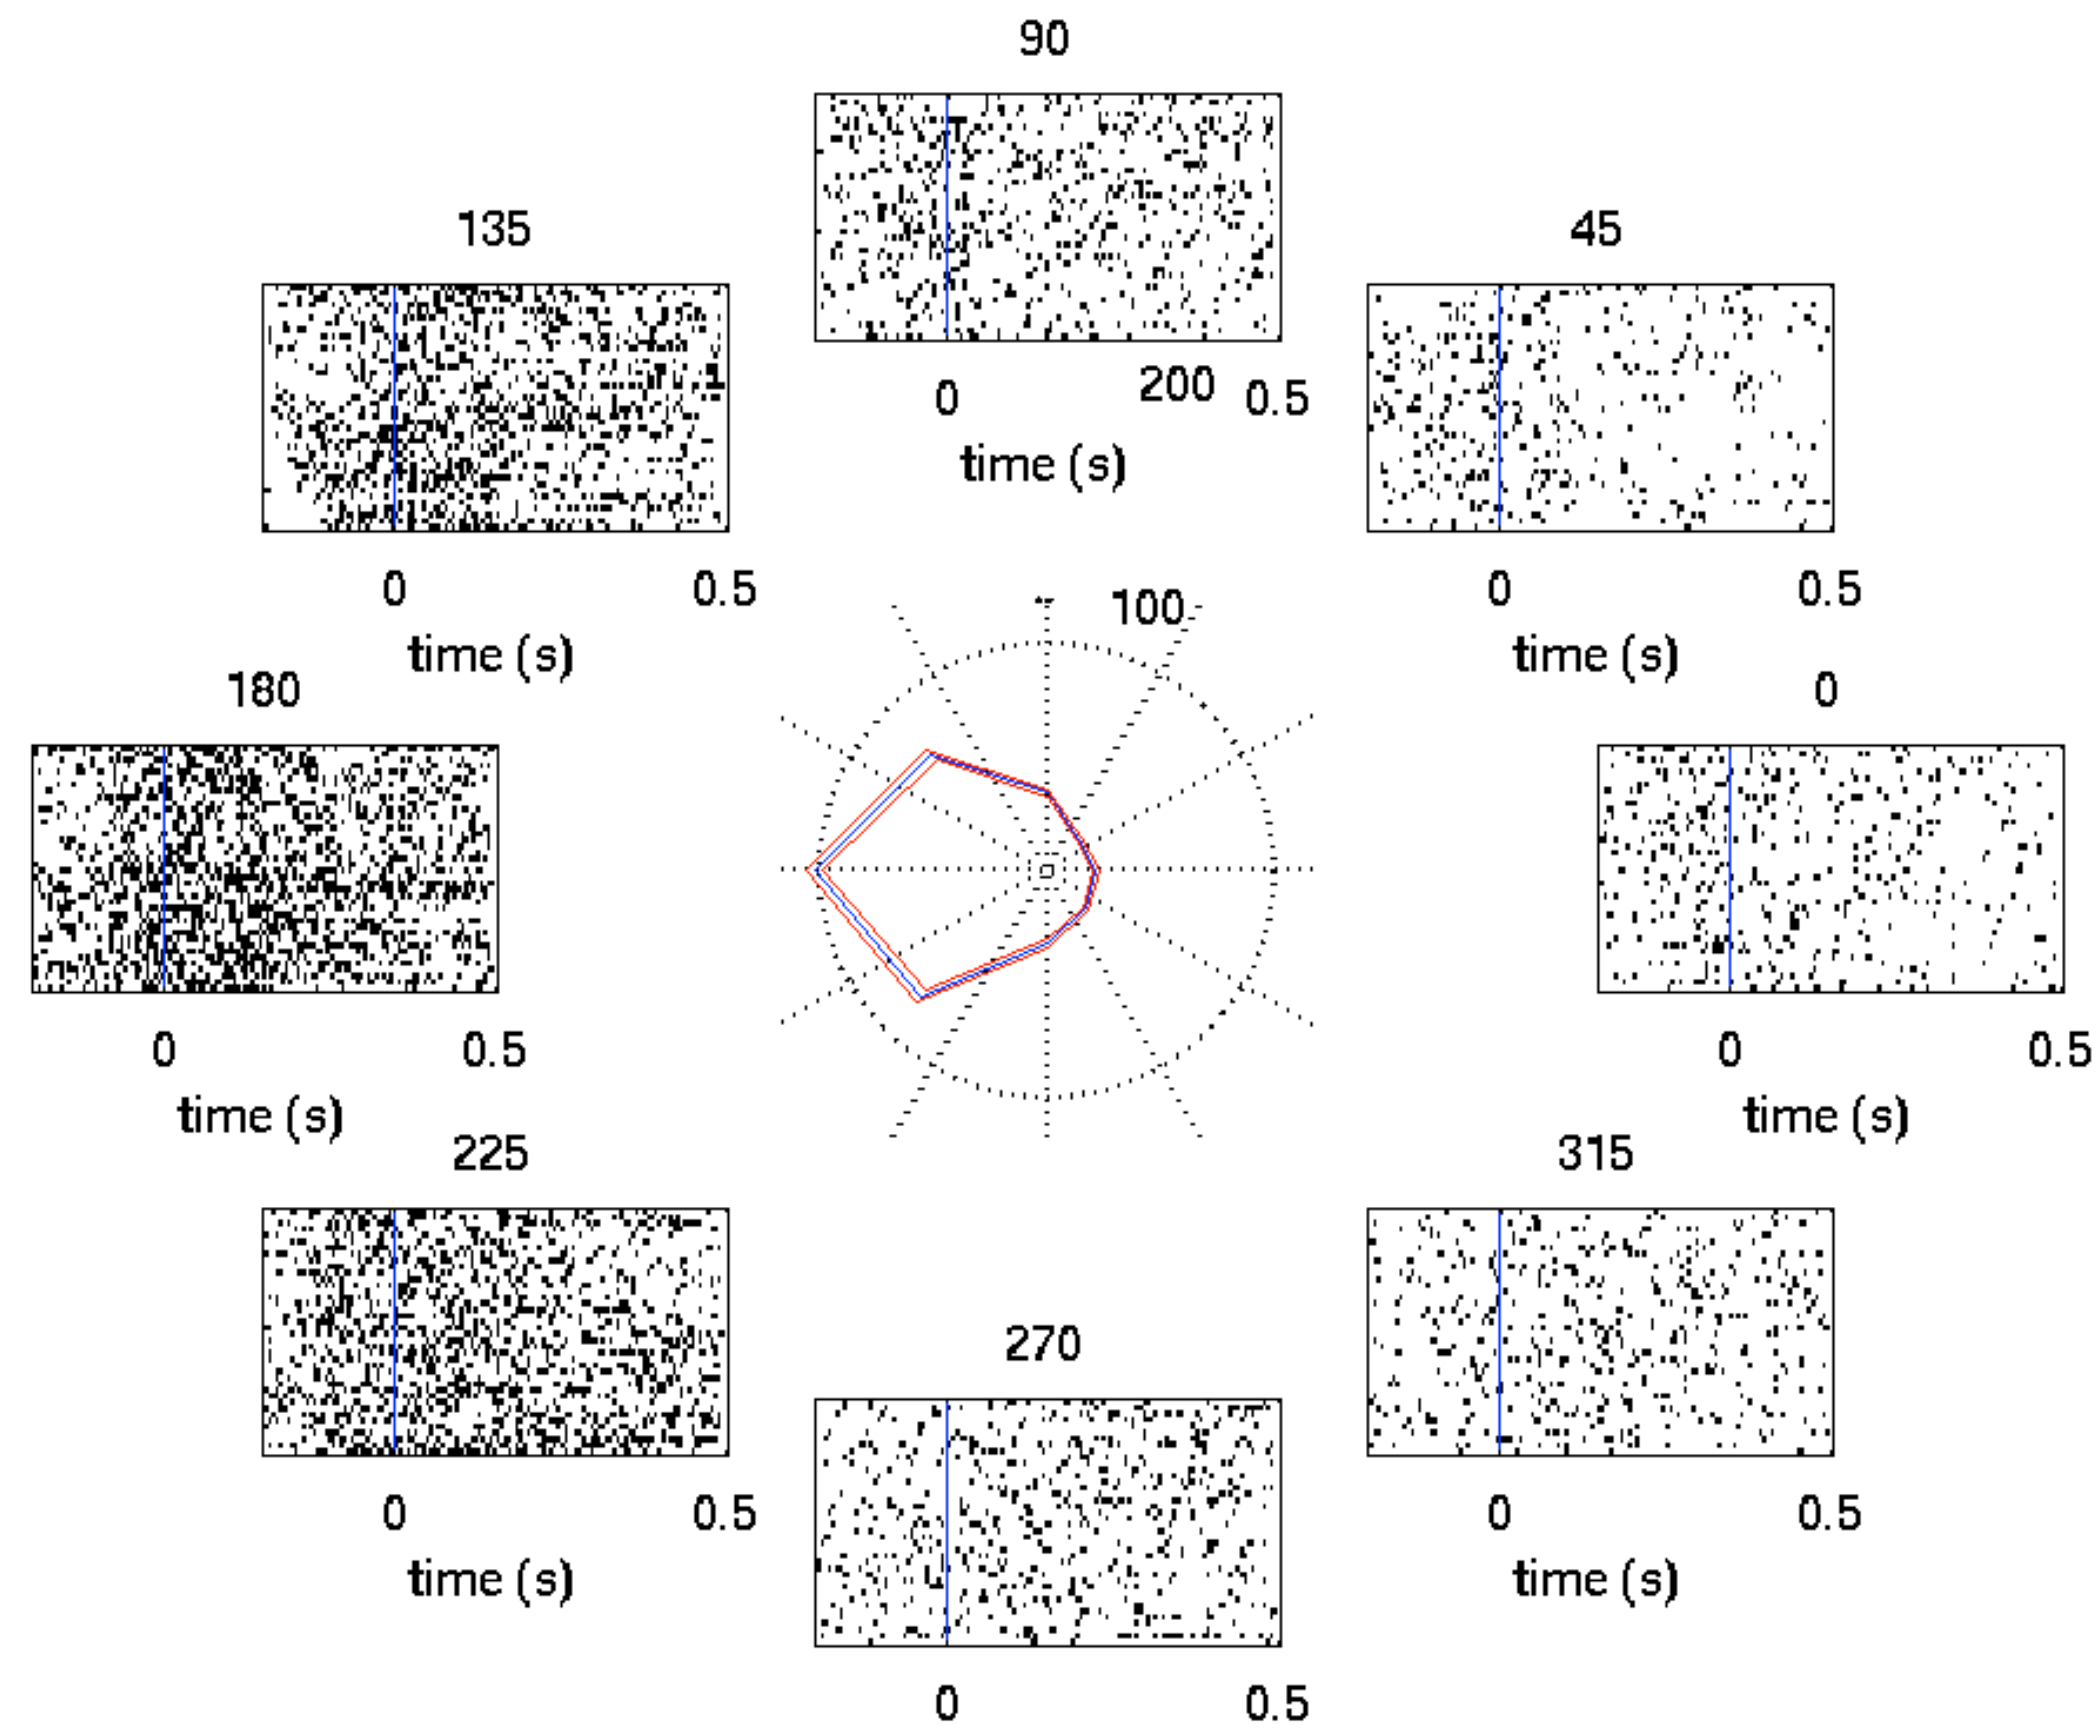

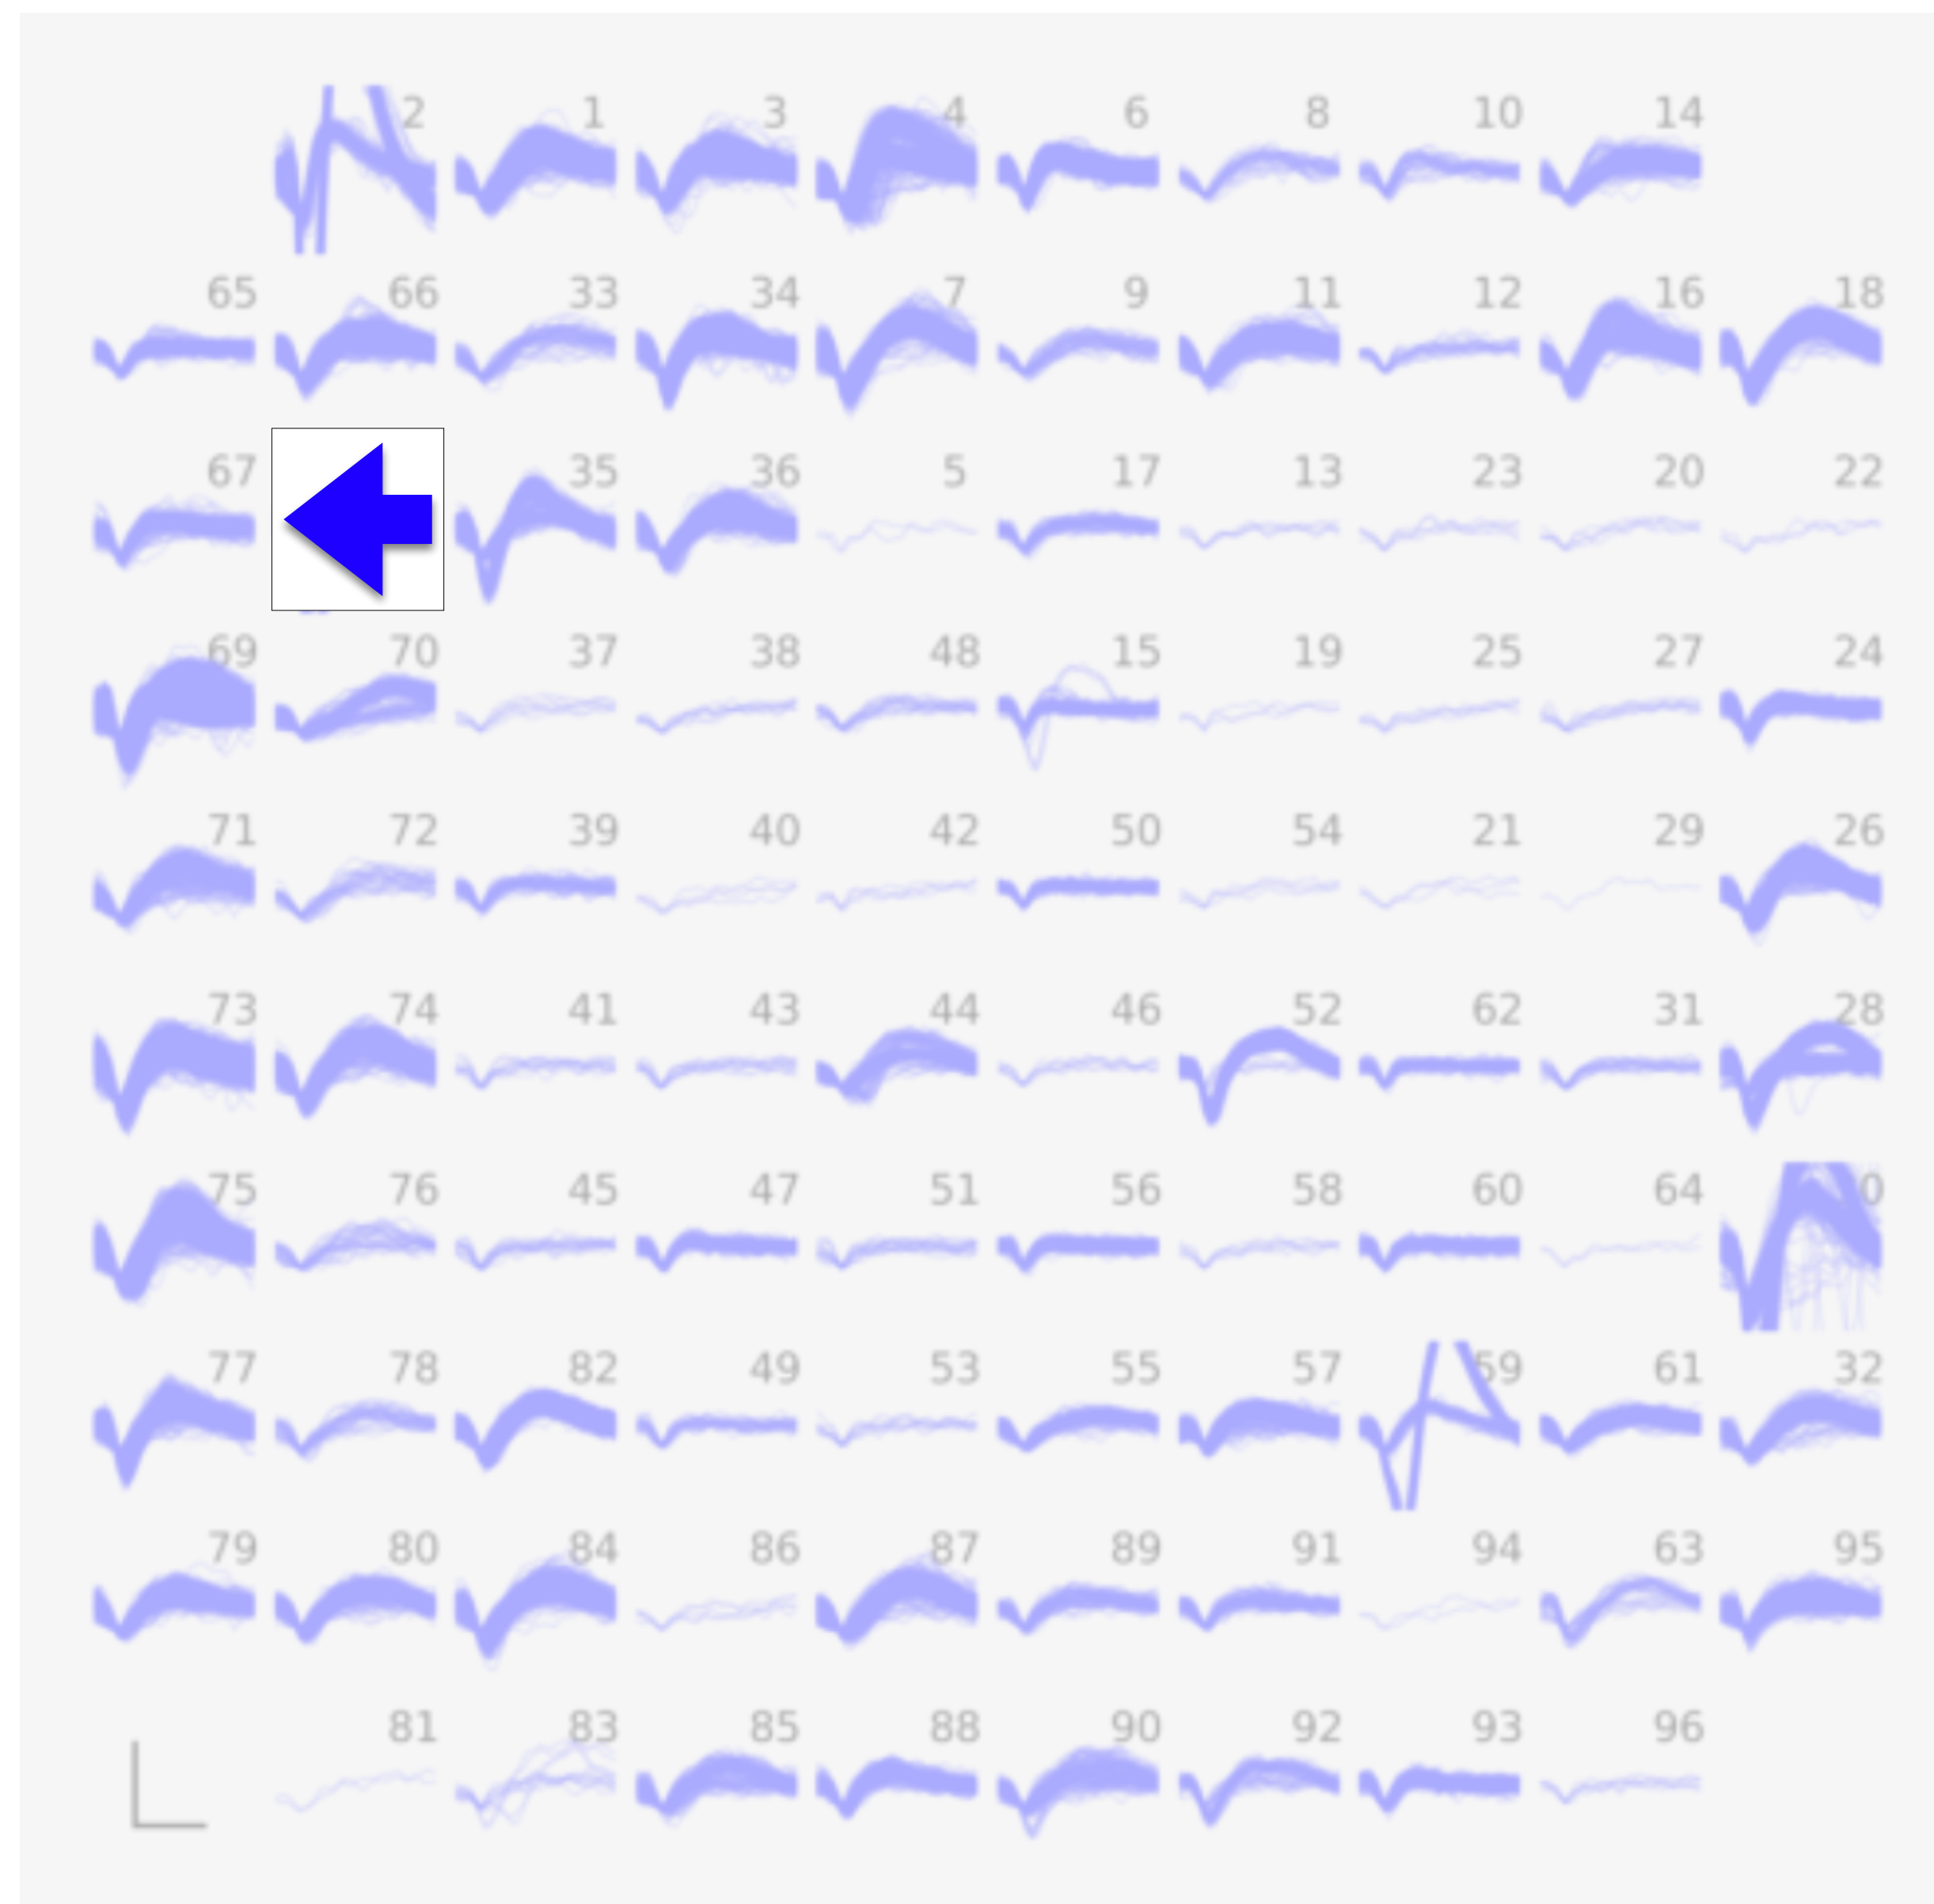

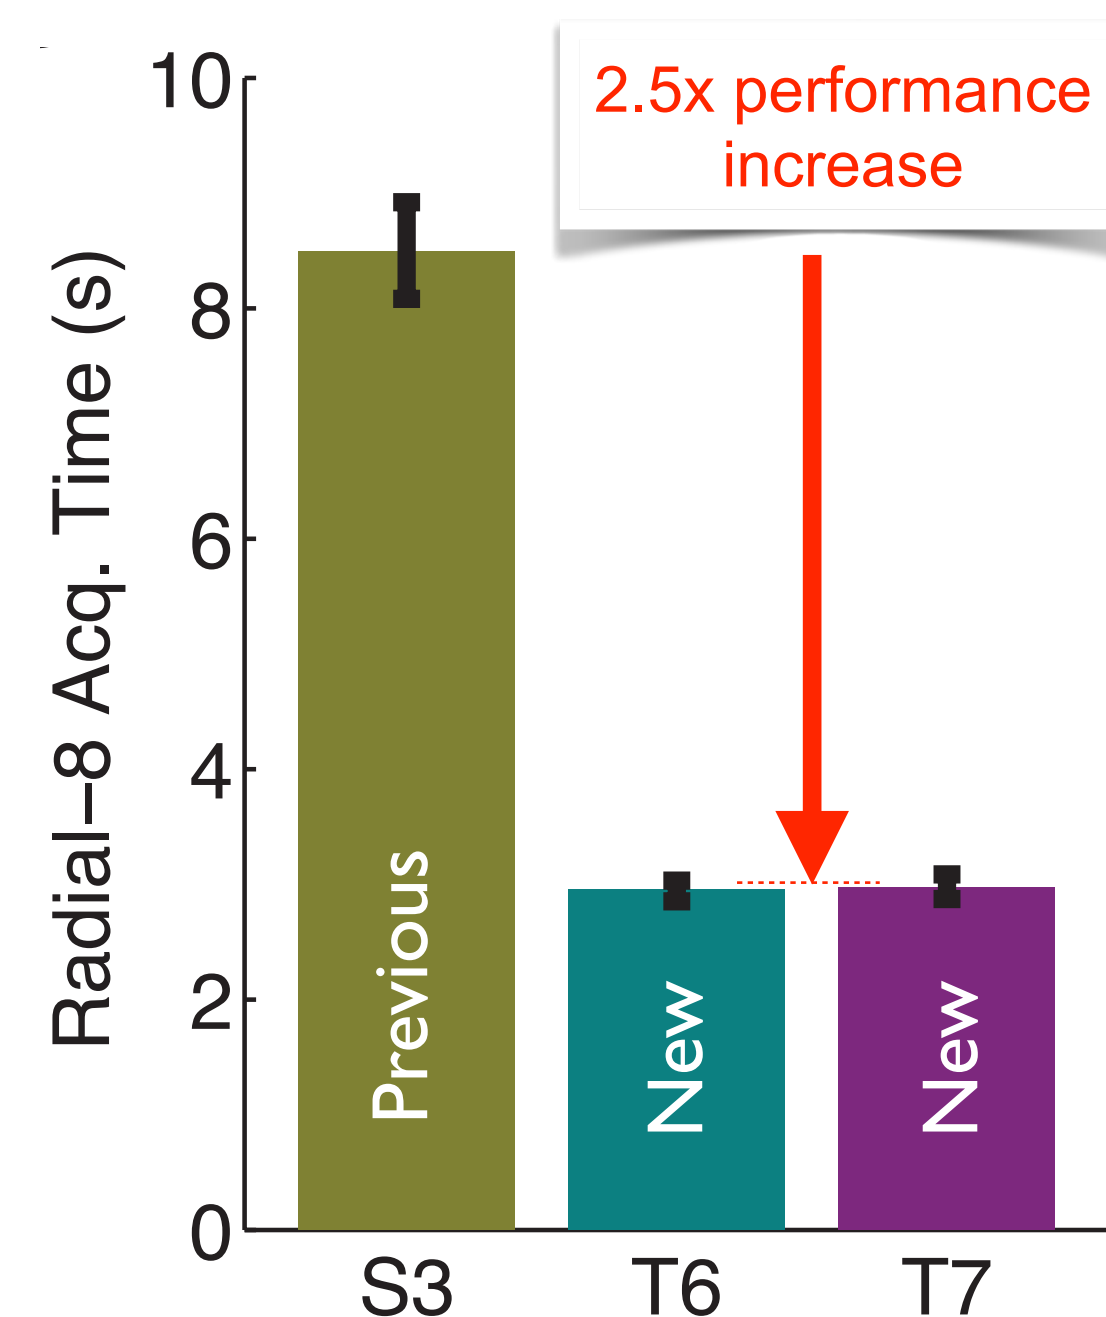

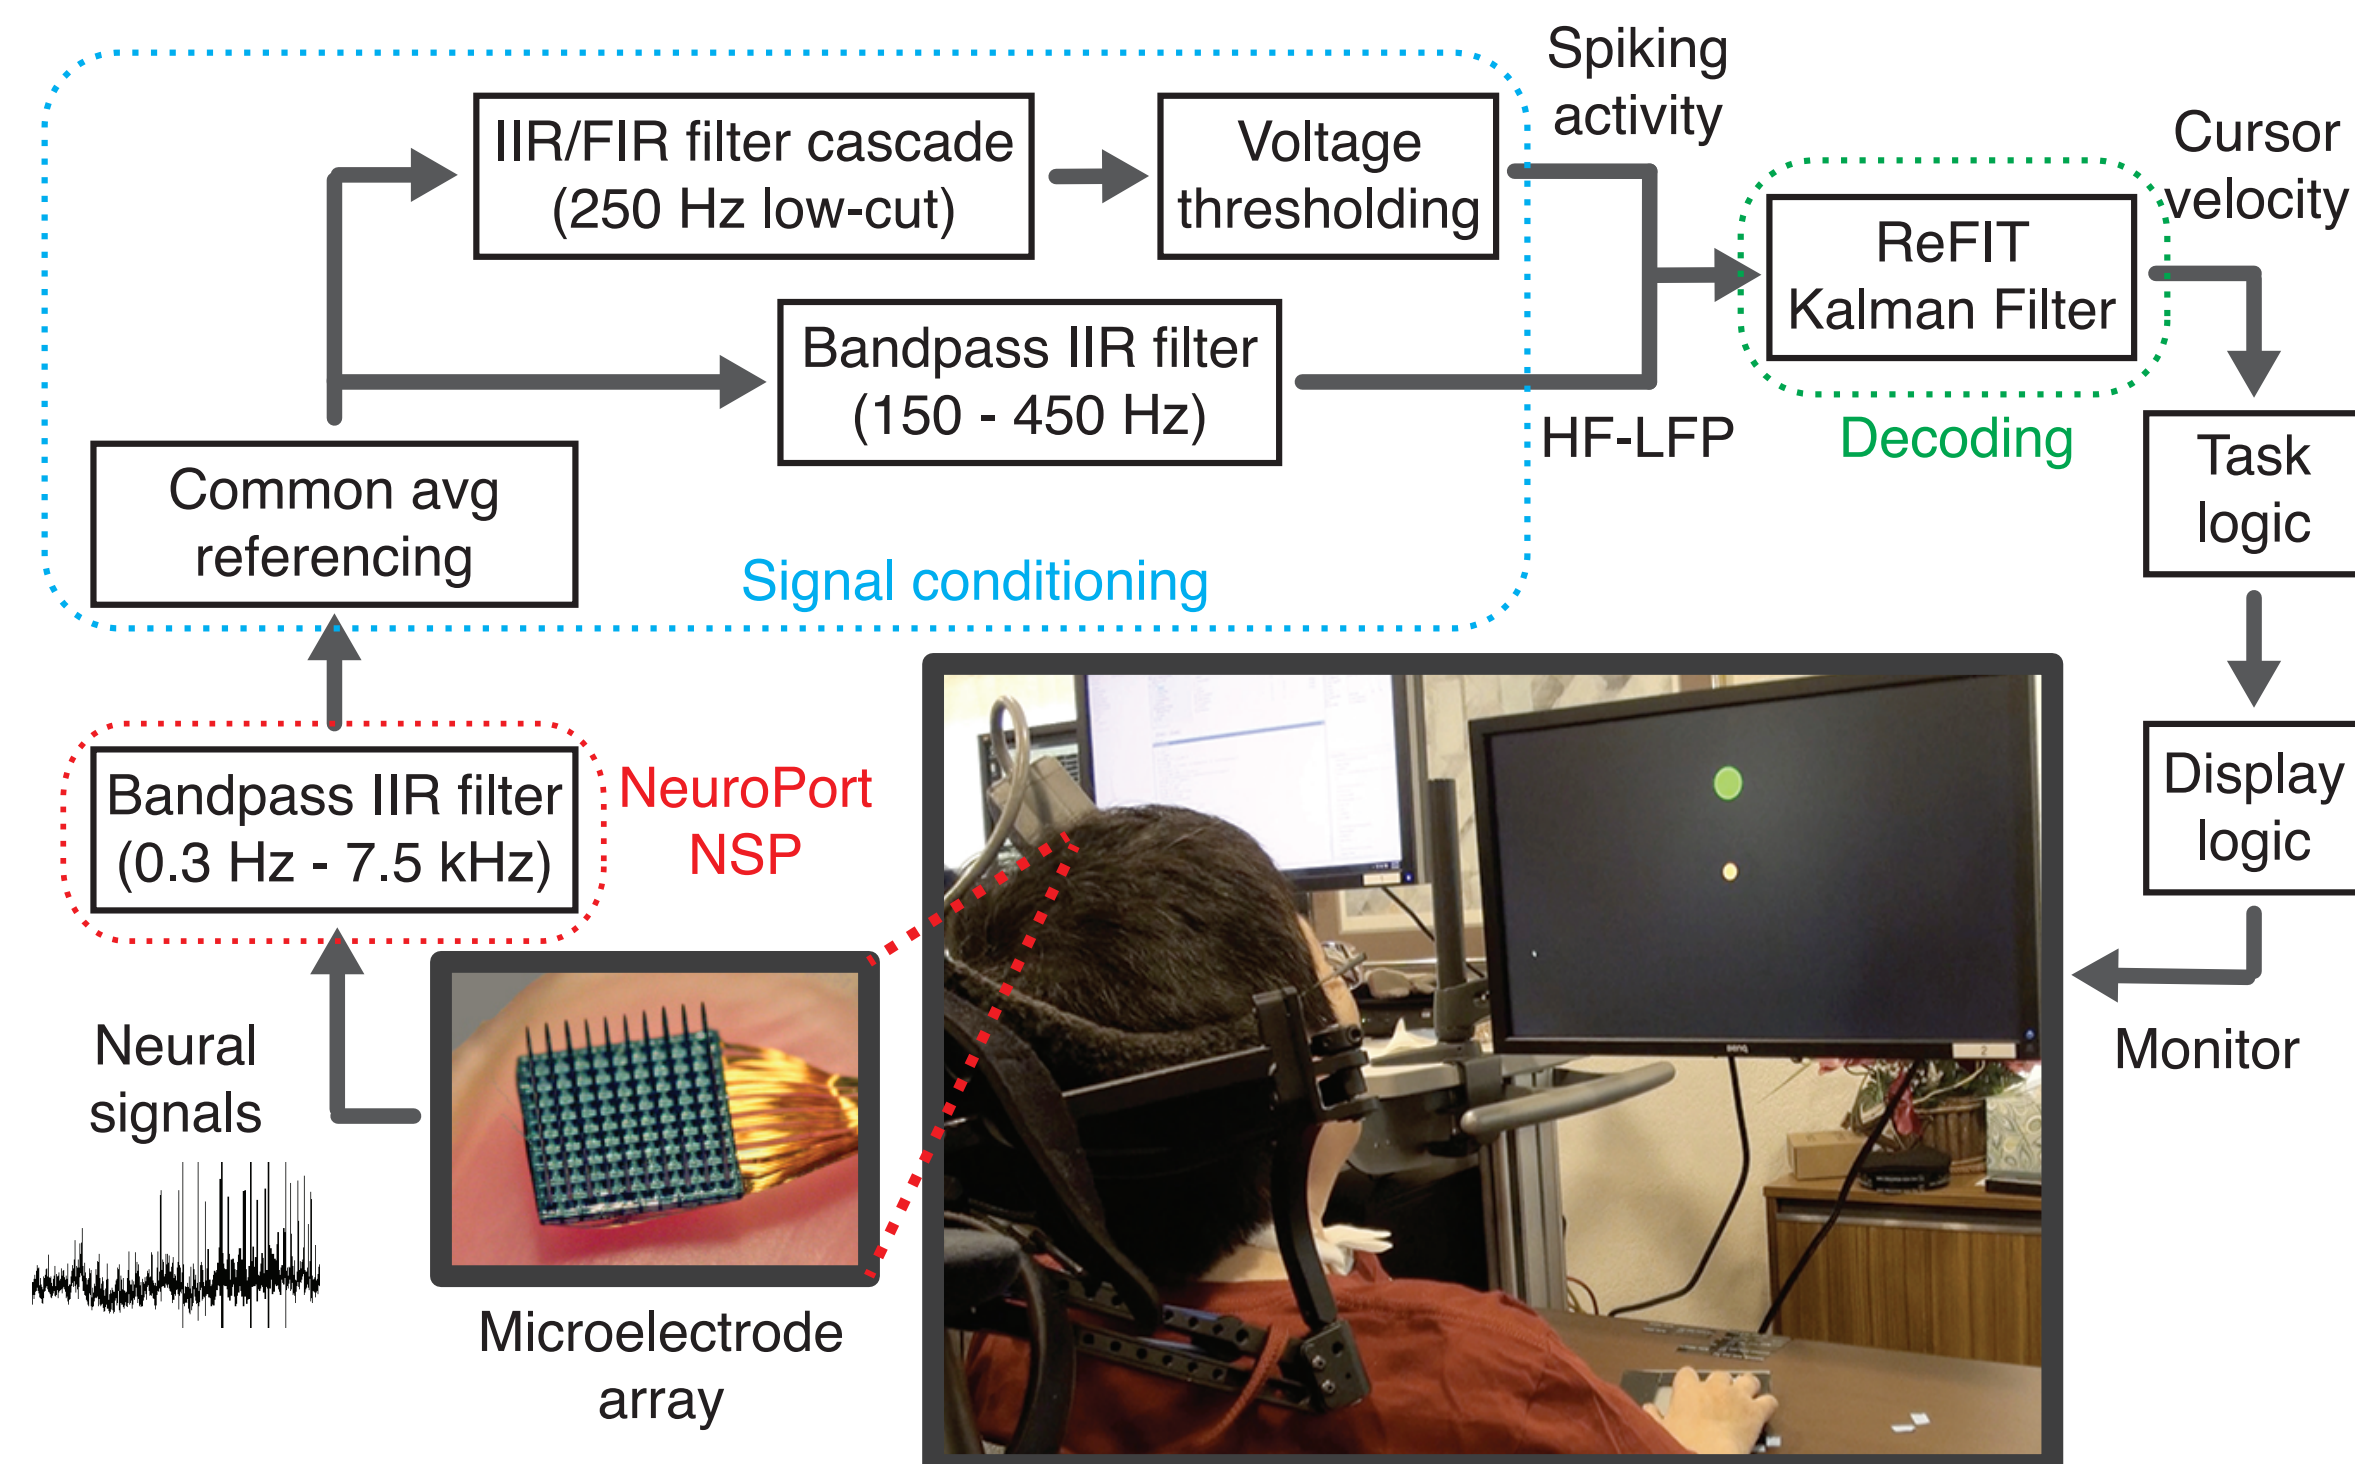

Georgopoulos et al. (1986) *Science*

Translating Communication BCI

Design of signal conditioning, decoders and real-time systems

Gilja*, Pandarinath*, ..., Hochberg, Shenoy**, Henderson** (2015) *Nature Medicine*
 Jarosiewicz, ..., Henderson, Shenoy, Donoghue, Hochberg (2015) *Science Translational Medicine*
 BrainGate2 pilot clinical trial. CAUTION: Investigational device. Limited by federal law to investigational use.

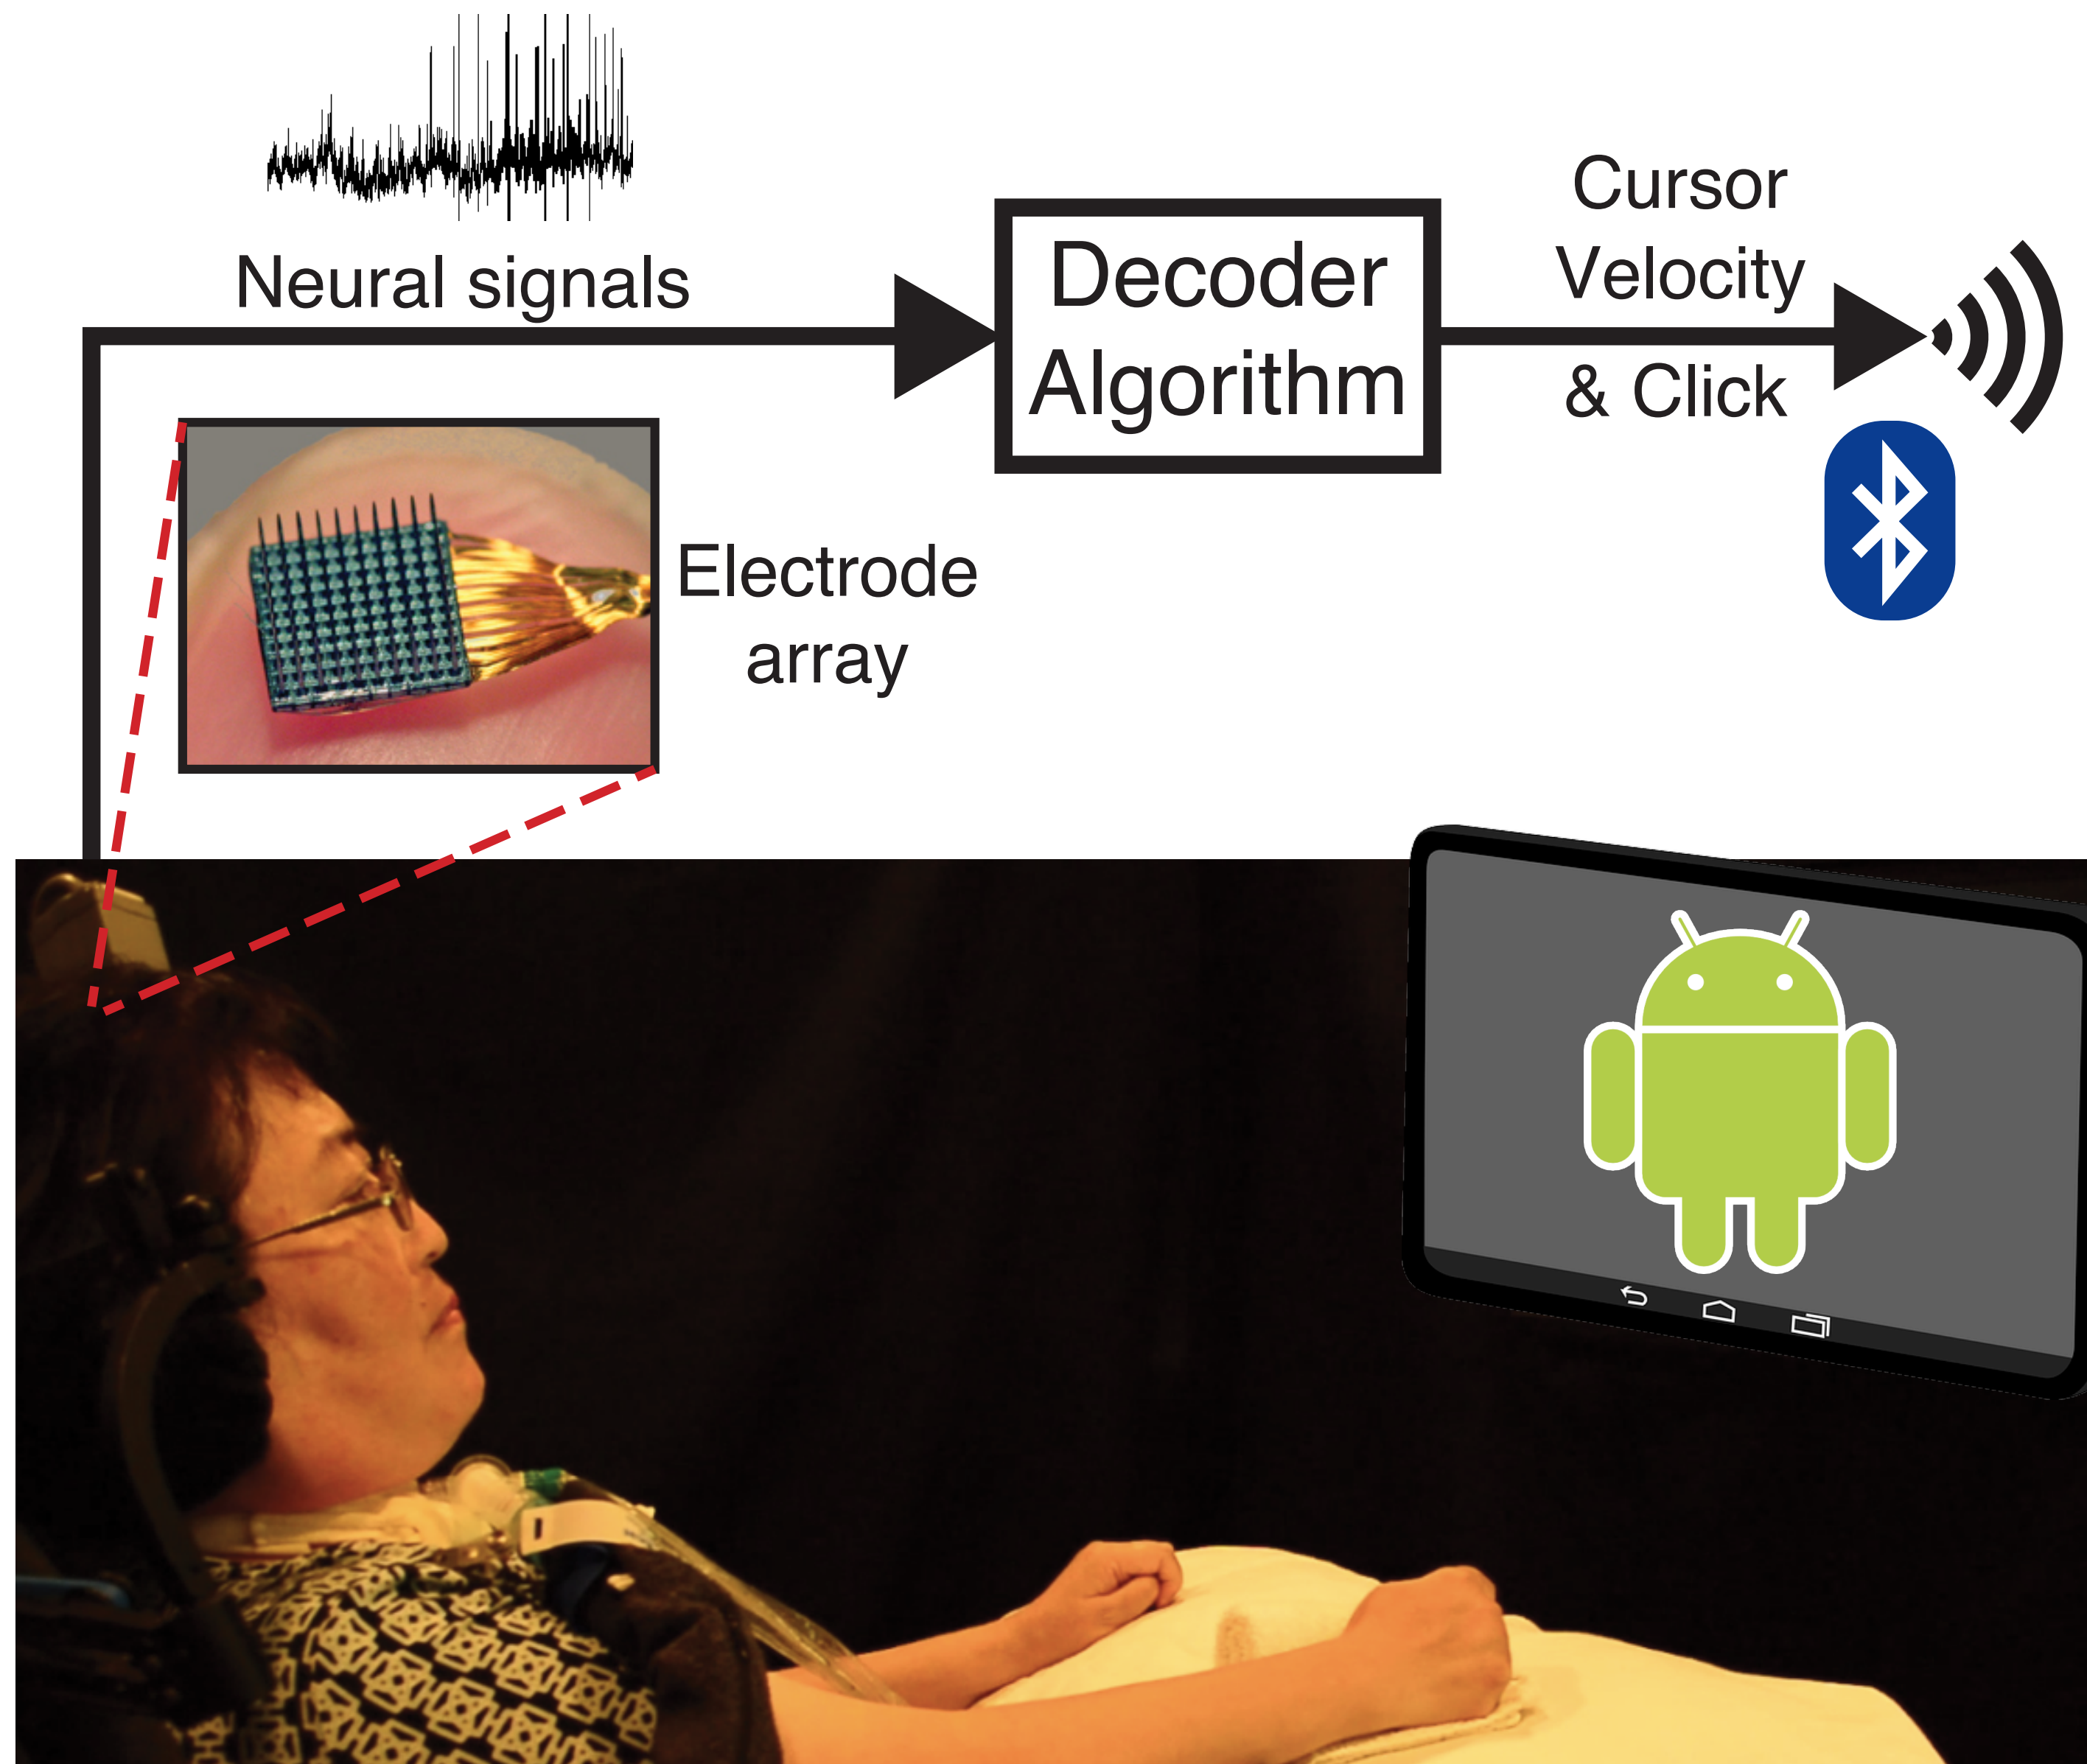

Pandarinath*, Nuyujukian*, et al. (2017) *eLife*

Existing setup

Android Interface

Increasing the performance of iBCIs with rapid and dexterous behaviors

System Overview

Willett, Avansino, Hochberg, Henderson**, Shenoy** (2021) High-performance brain-to-text communication via imagined handwriting. *Nature*.

Neural Representation of Handwriting

Does the neural representation of handwriting remain intact years after paralysis?

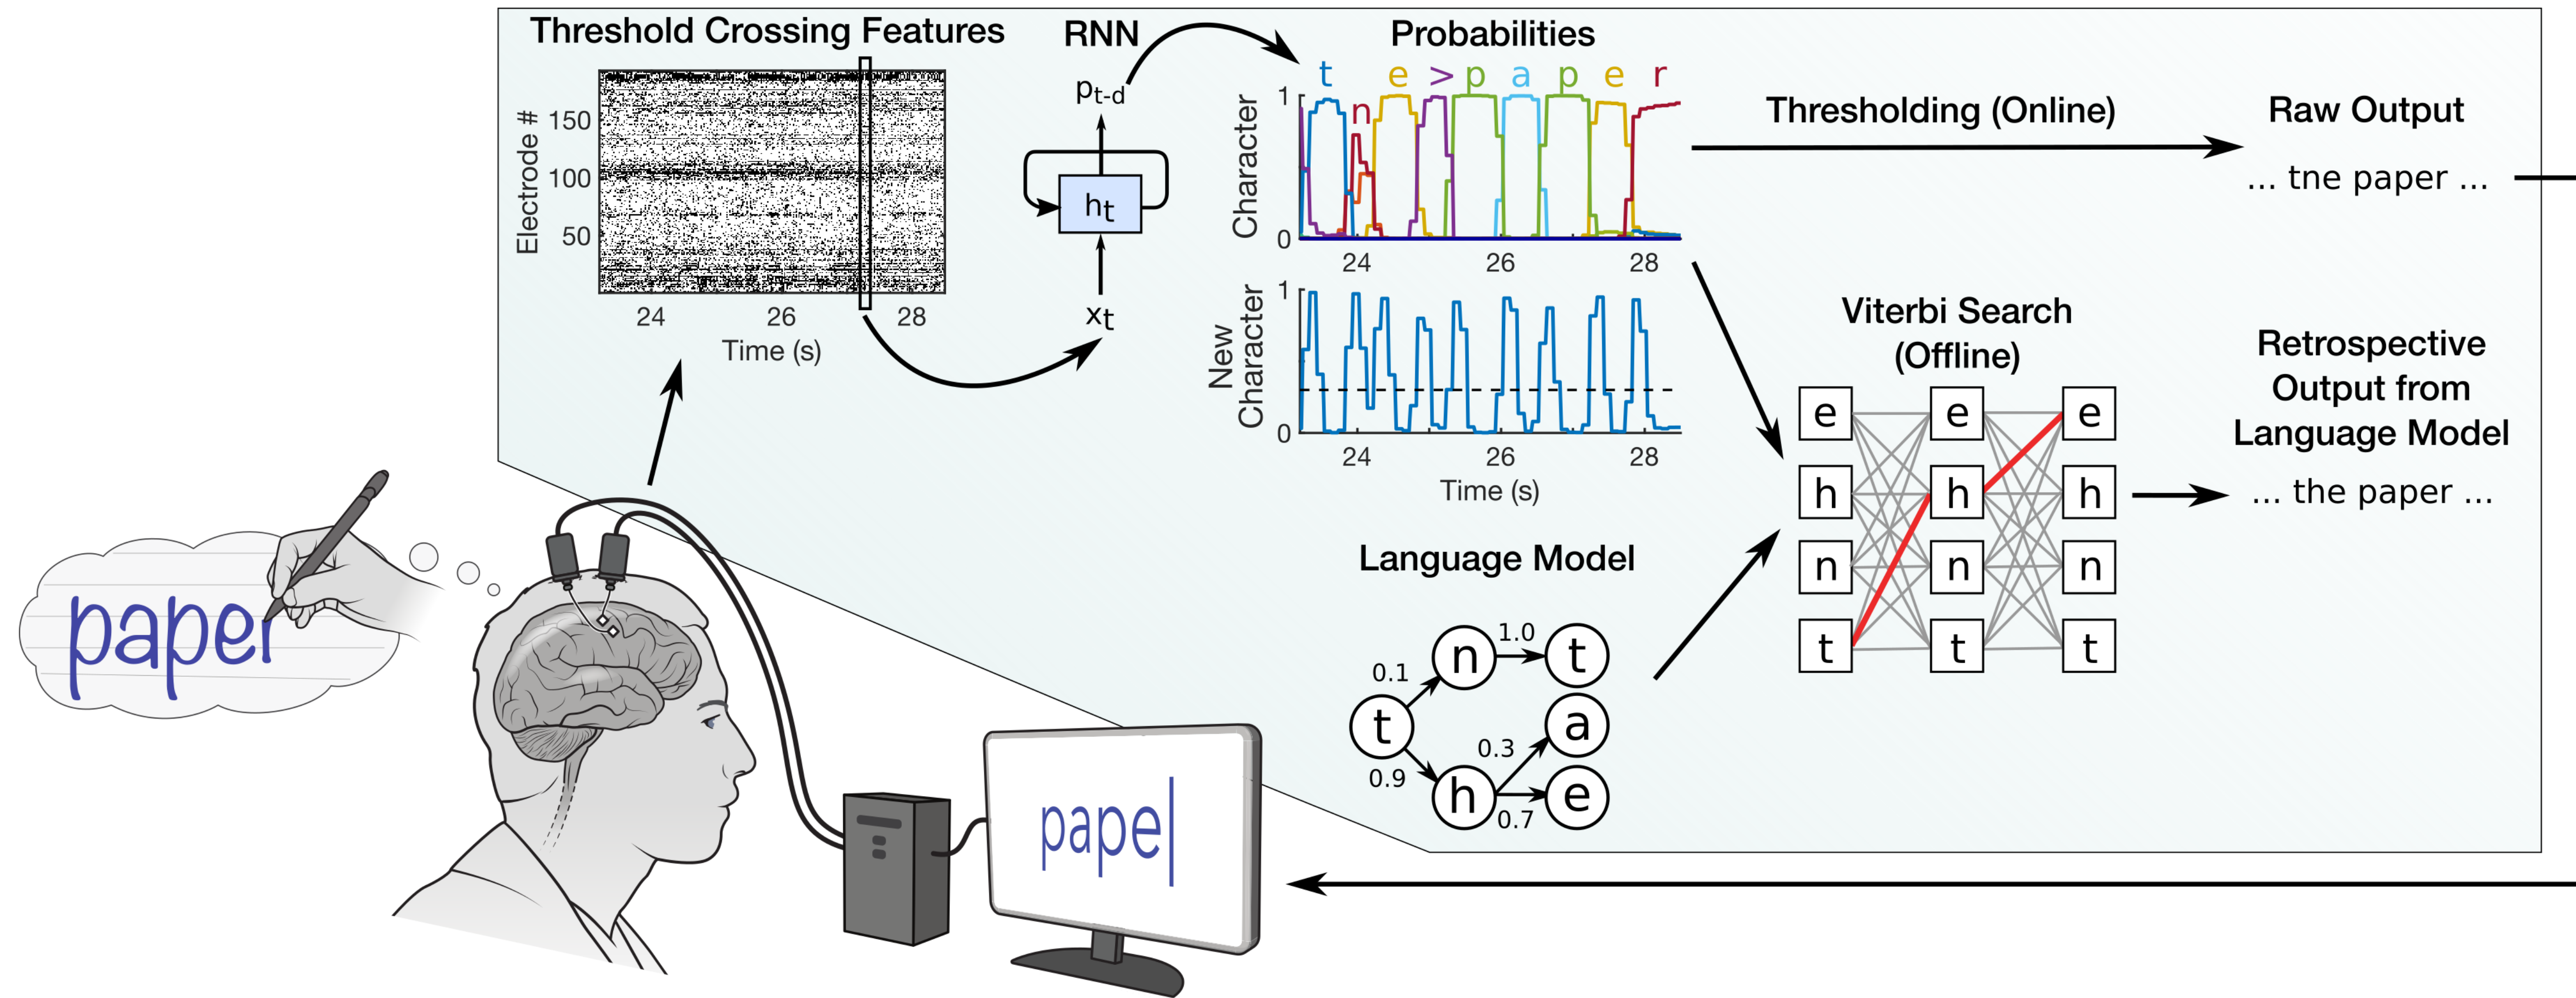

Neural Representation of Handwriting

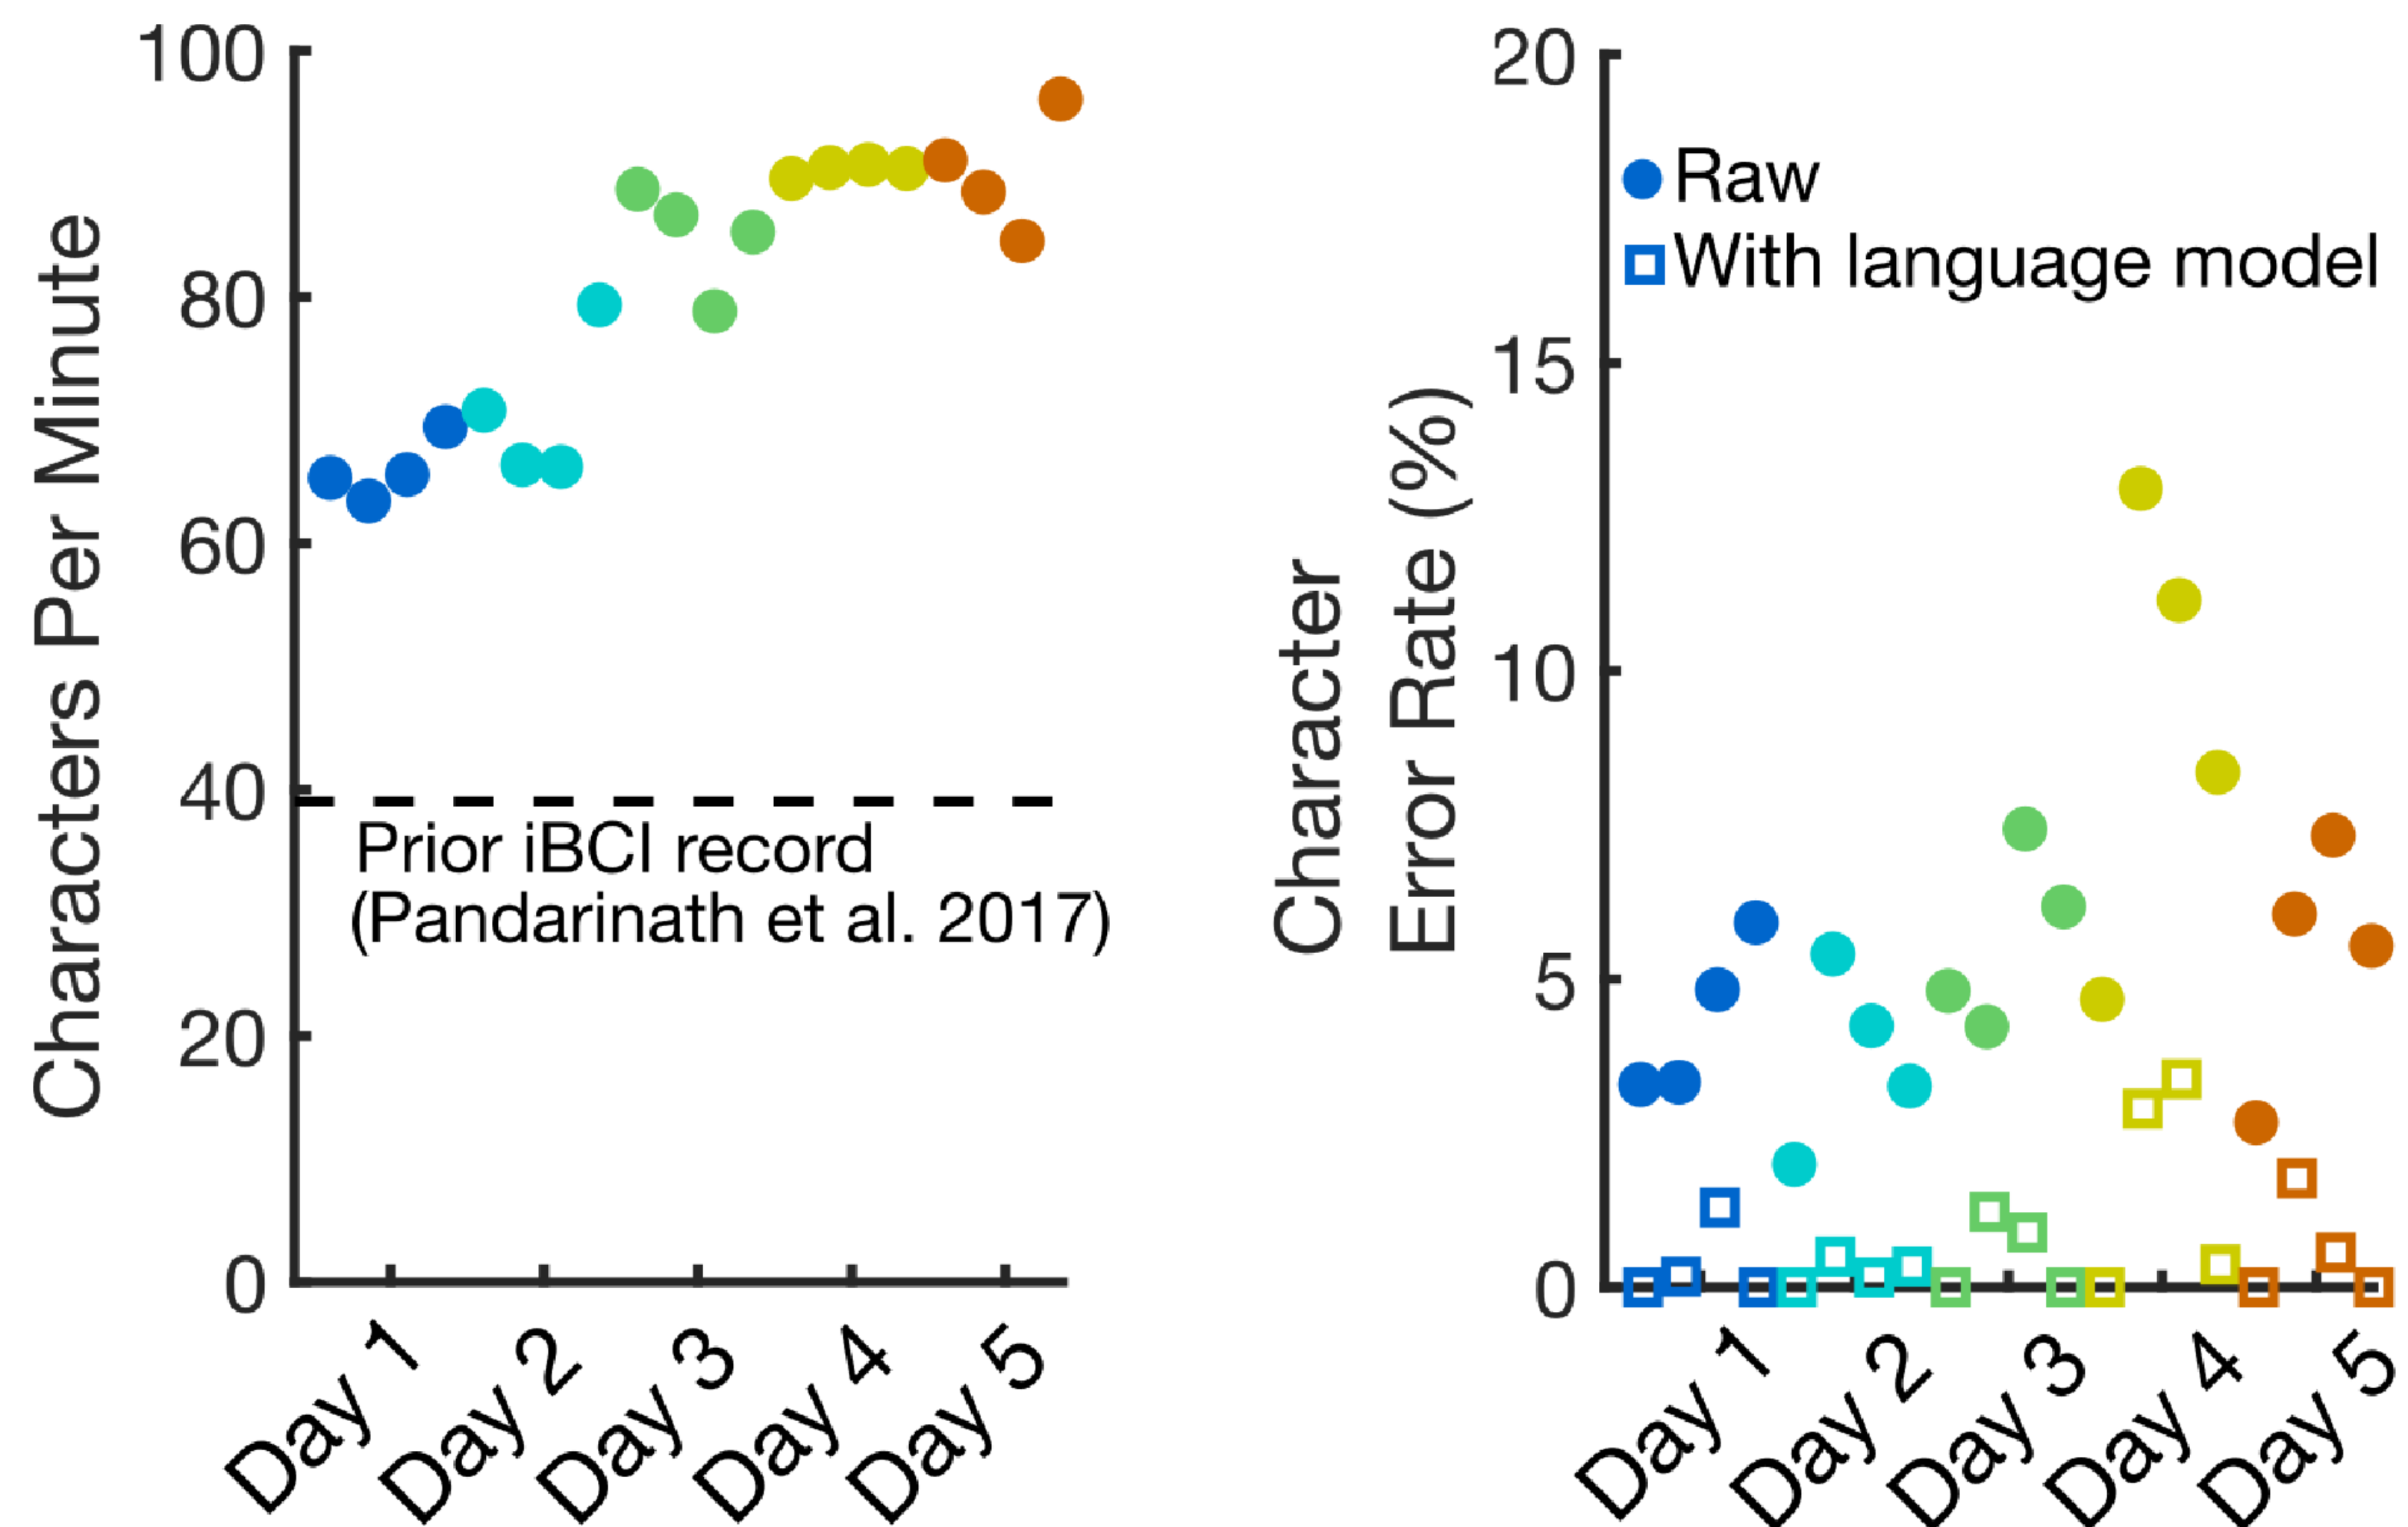

Can we reconstruct the imagined pen tip trajectory from the neural activity?

Handwriting iBCI System Diagram

Copy Typing Performance

Willett, Avansino, Hochberg, Henderson**, Shenoy** (2021) High-performance brain-to-text communication via imagined handwriting. *Nature*.

Studying the Neural Bases of Speech in People

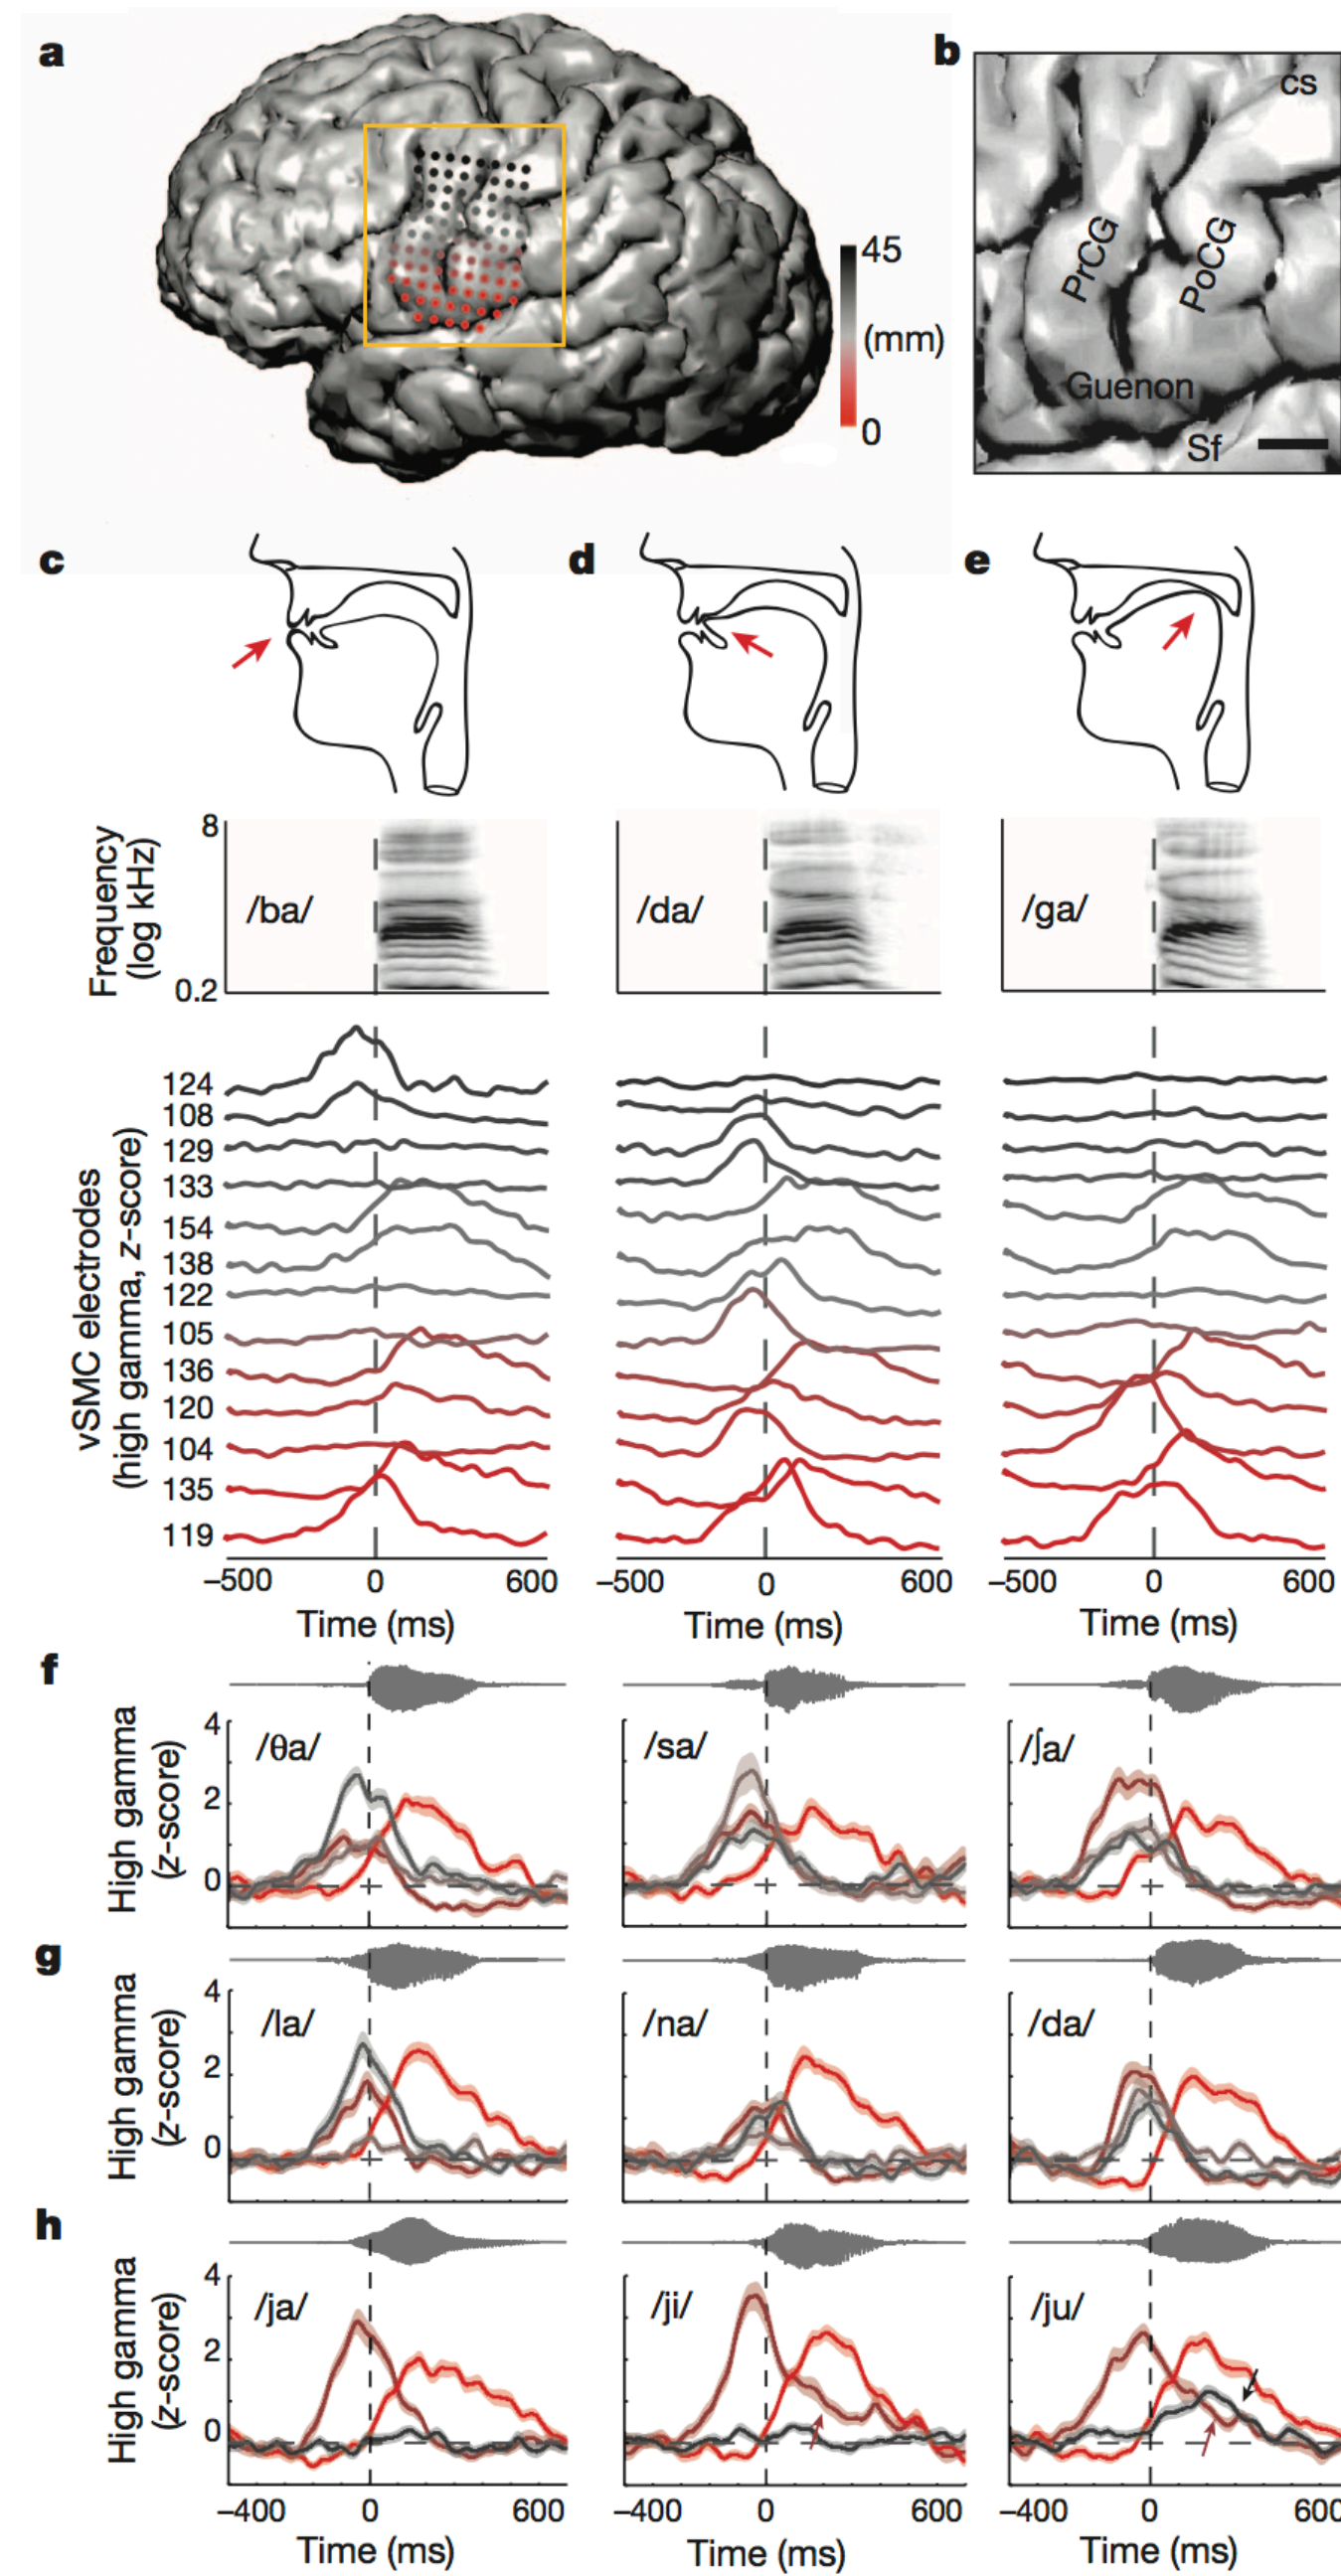

1. Fundamental neuroscience of an exquisite motor control problem.

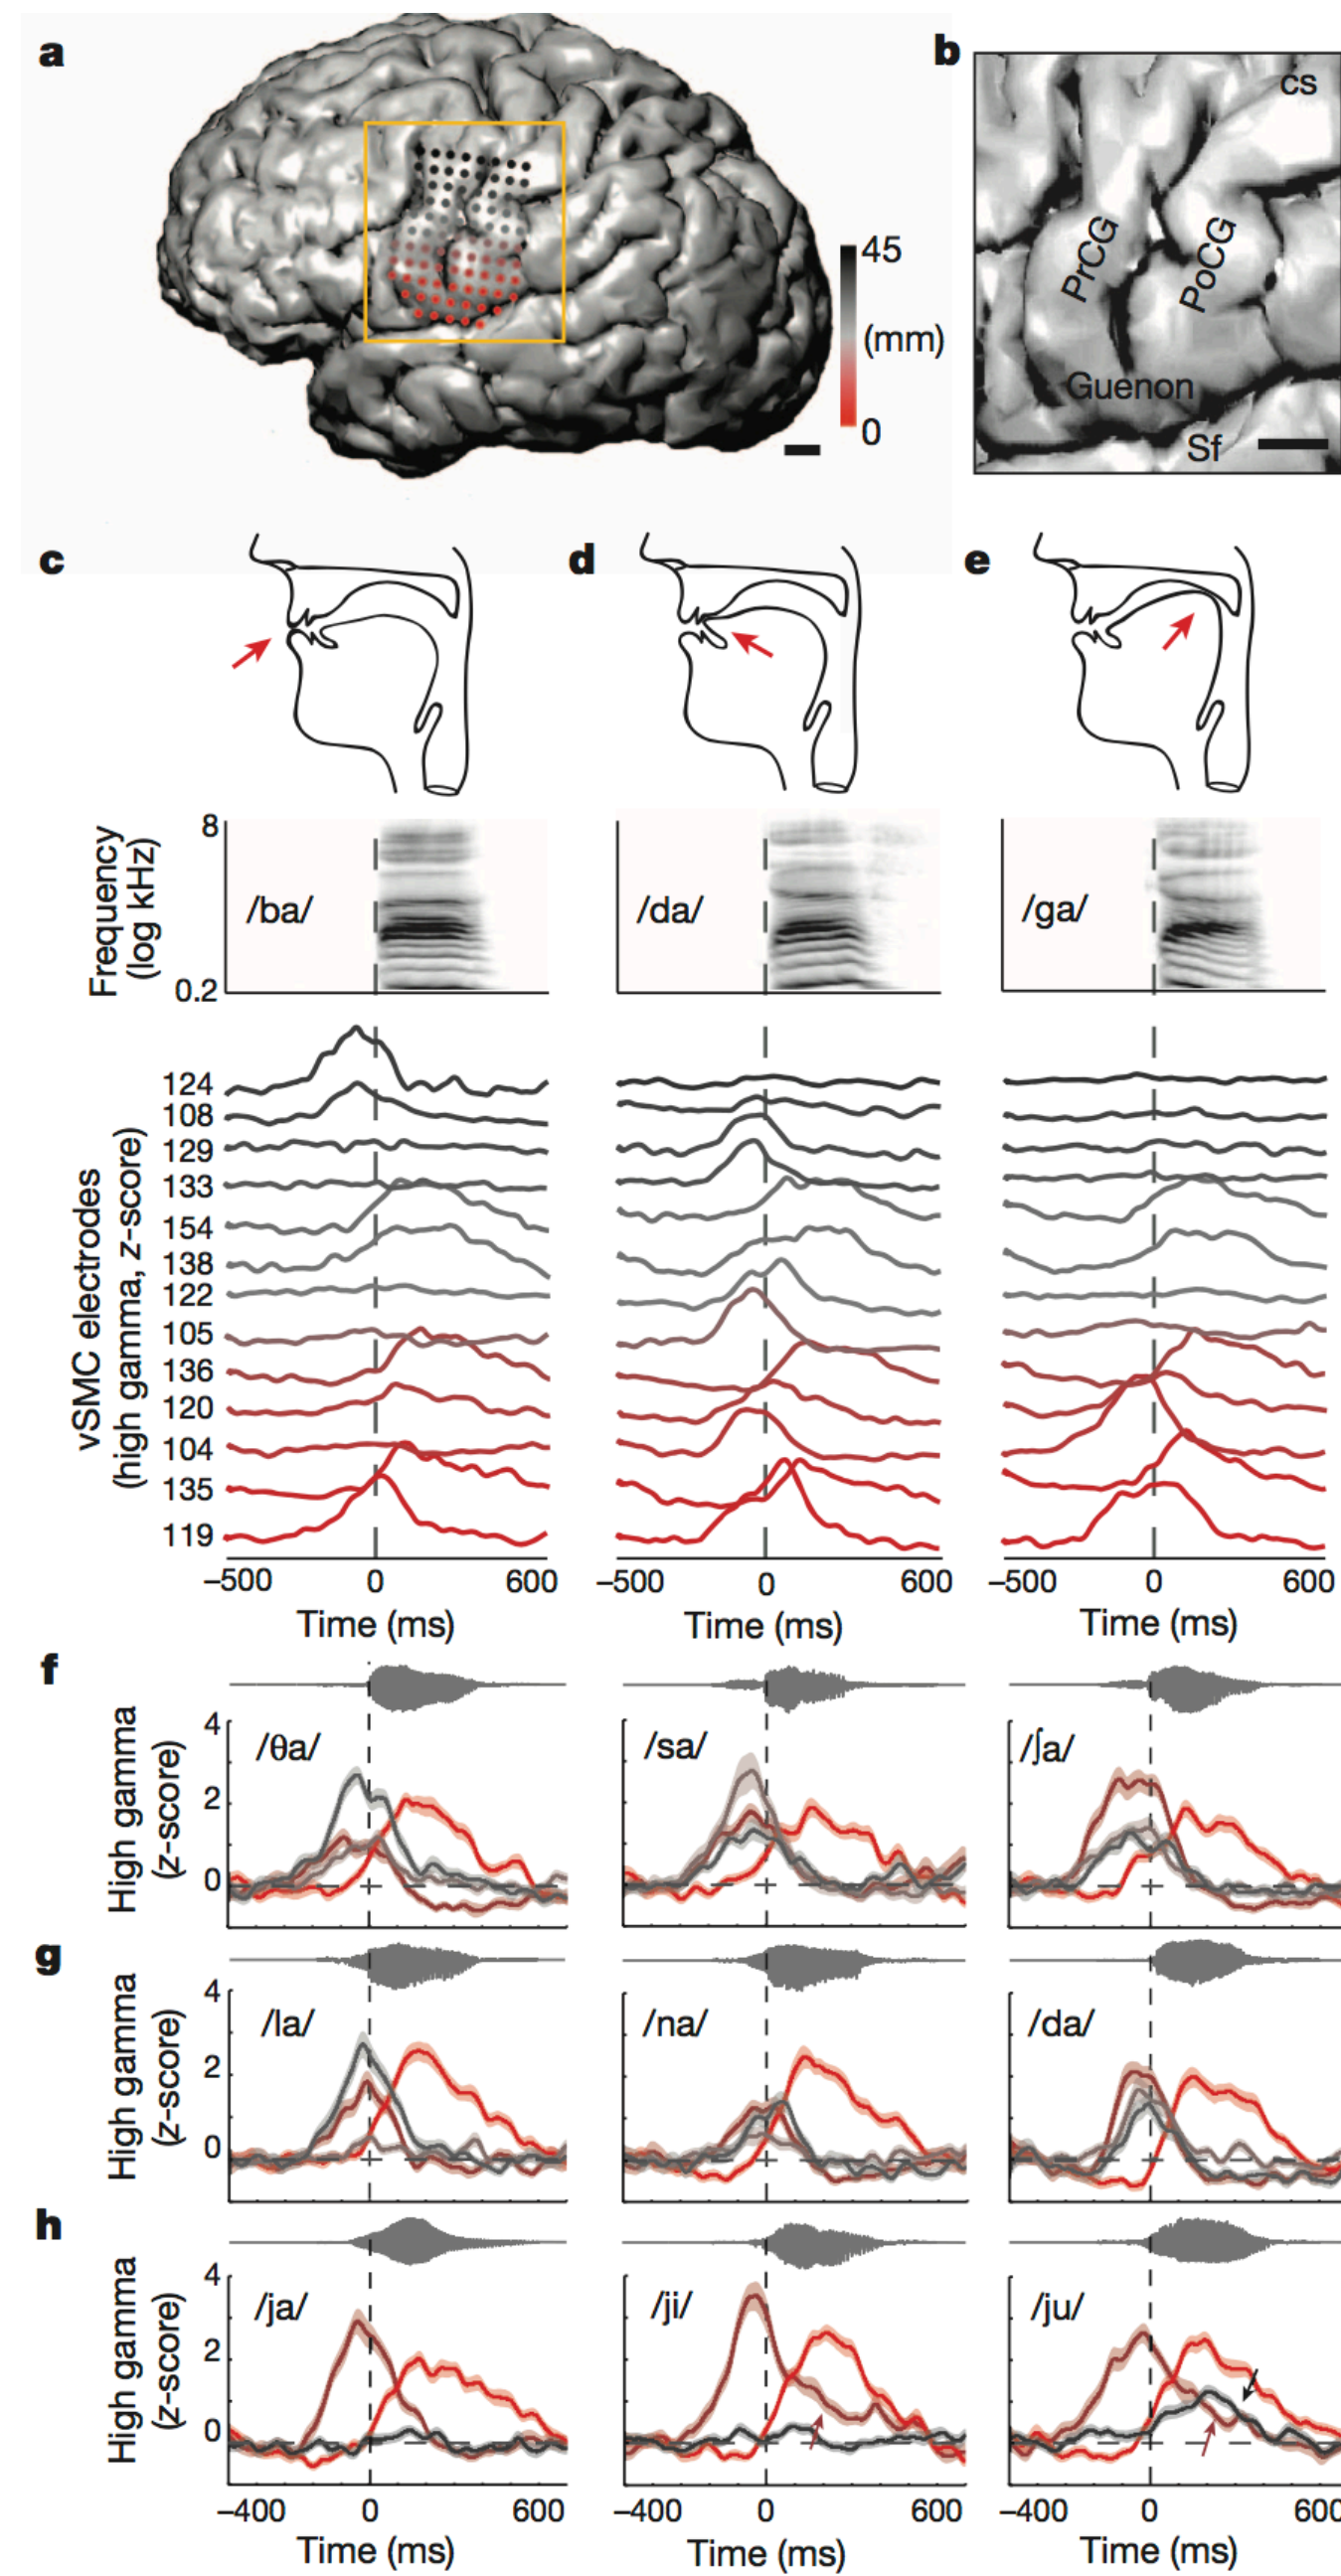

Uecker et al. (2010) *NMR in Biomed.*

2. Translational need for speech BMIs for patients who cannot speak.

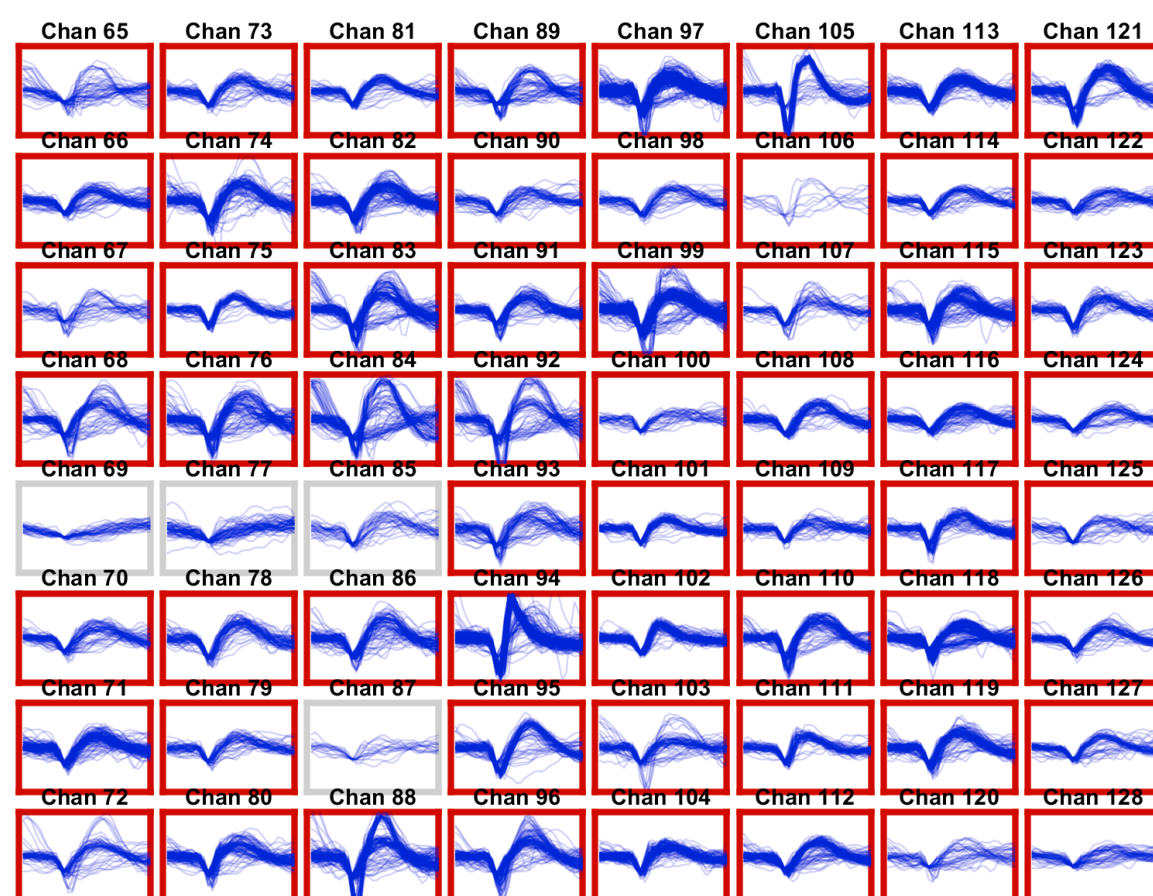

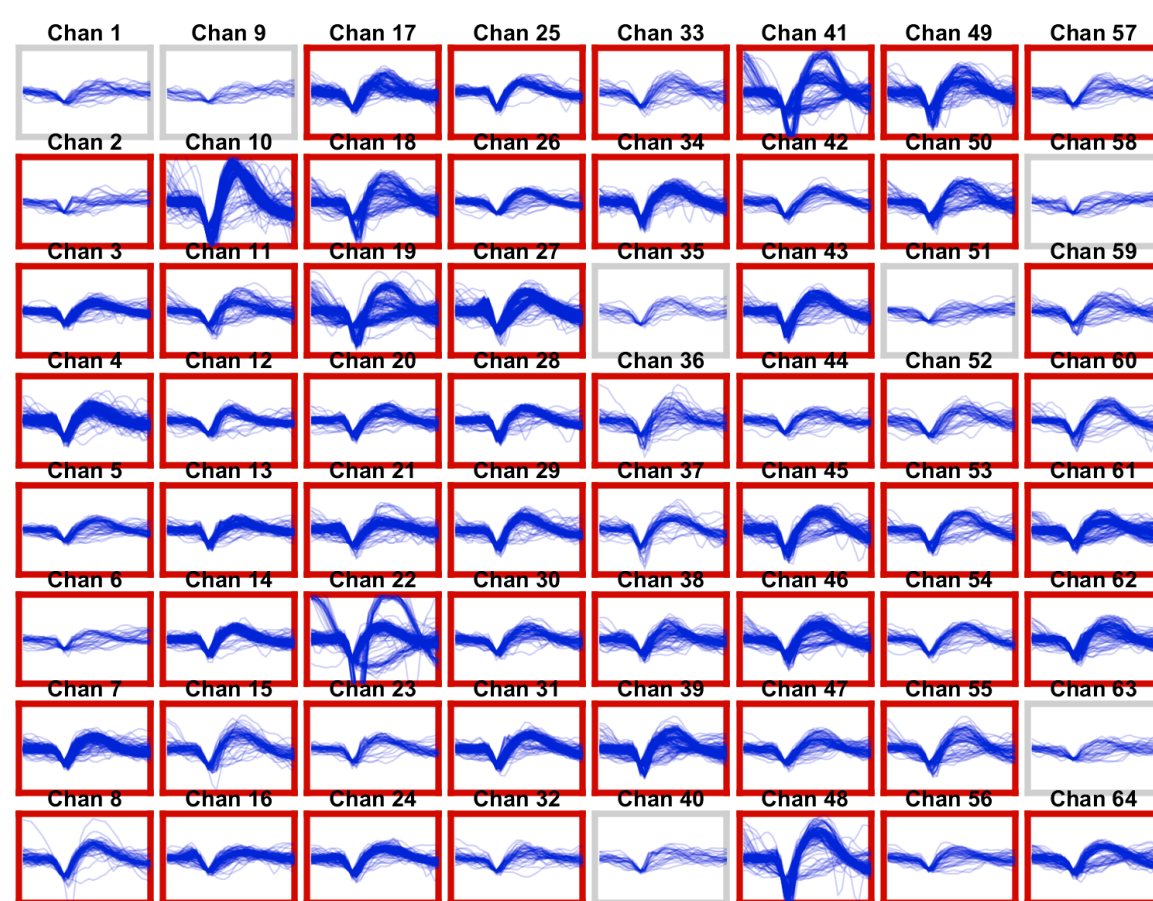

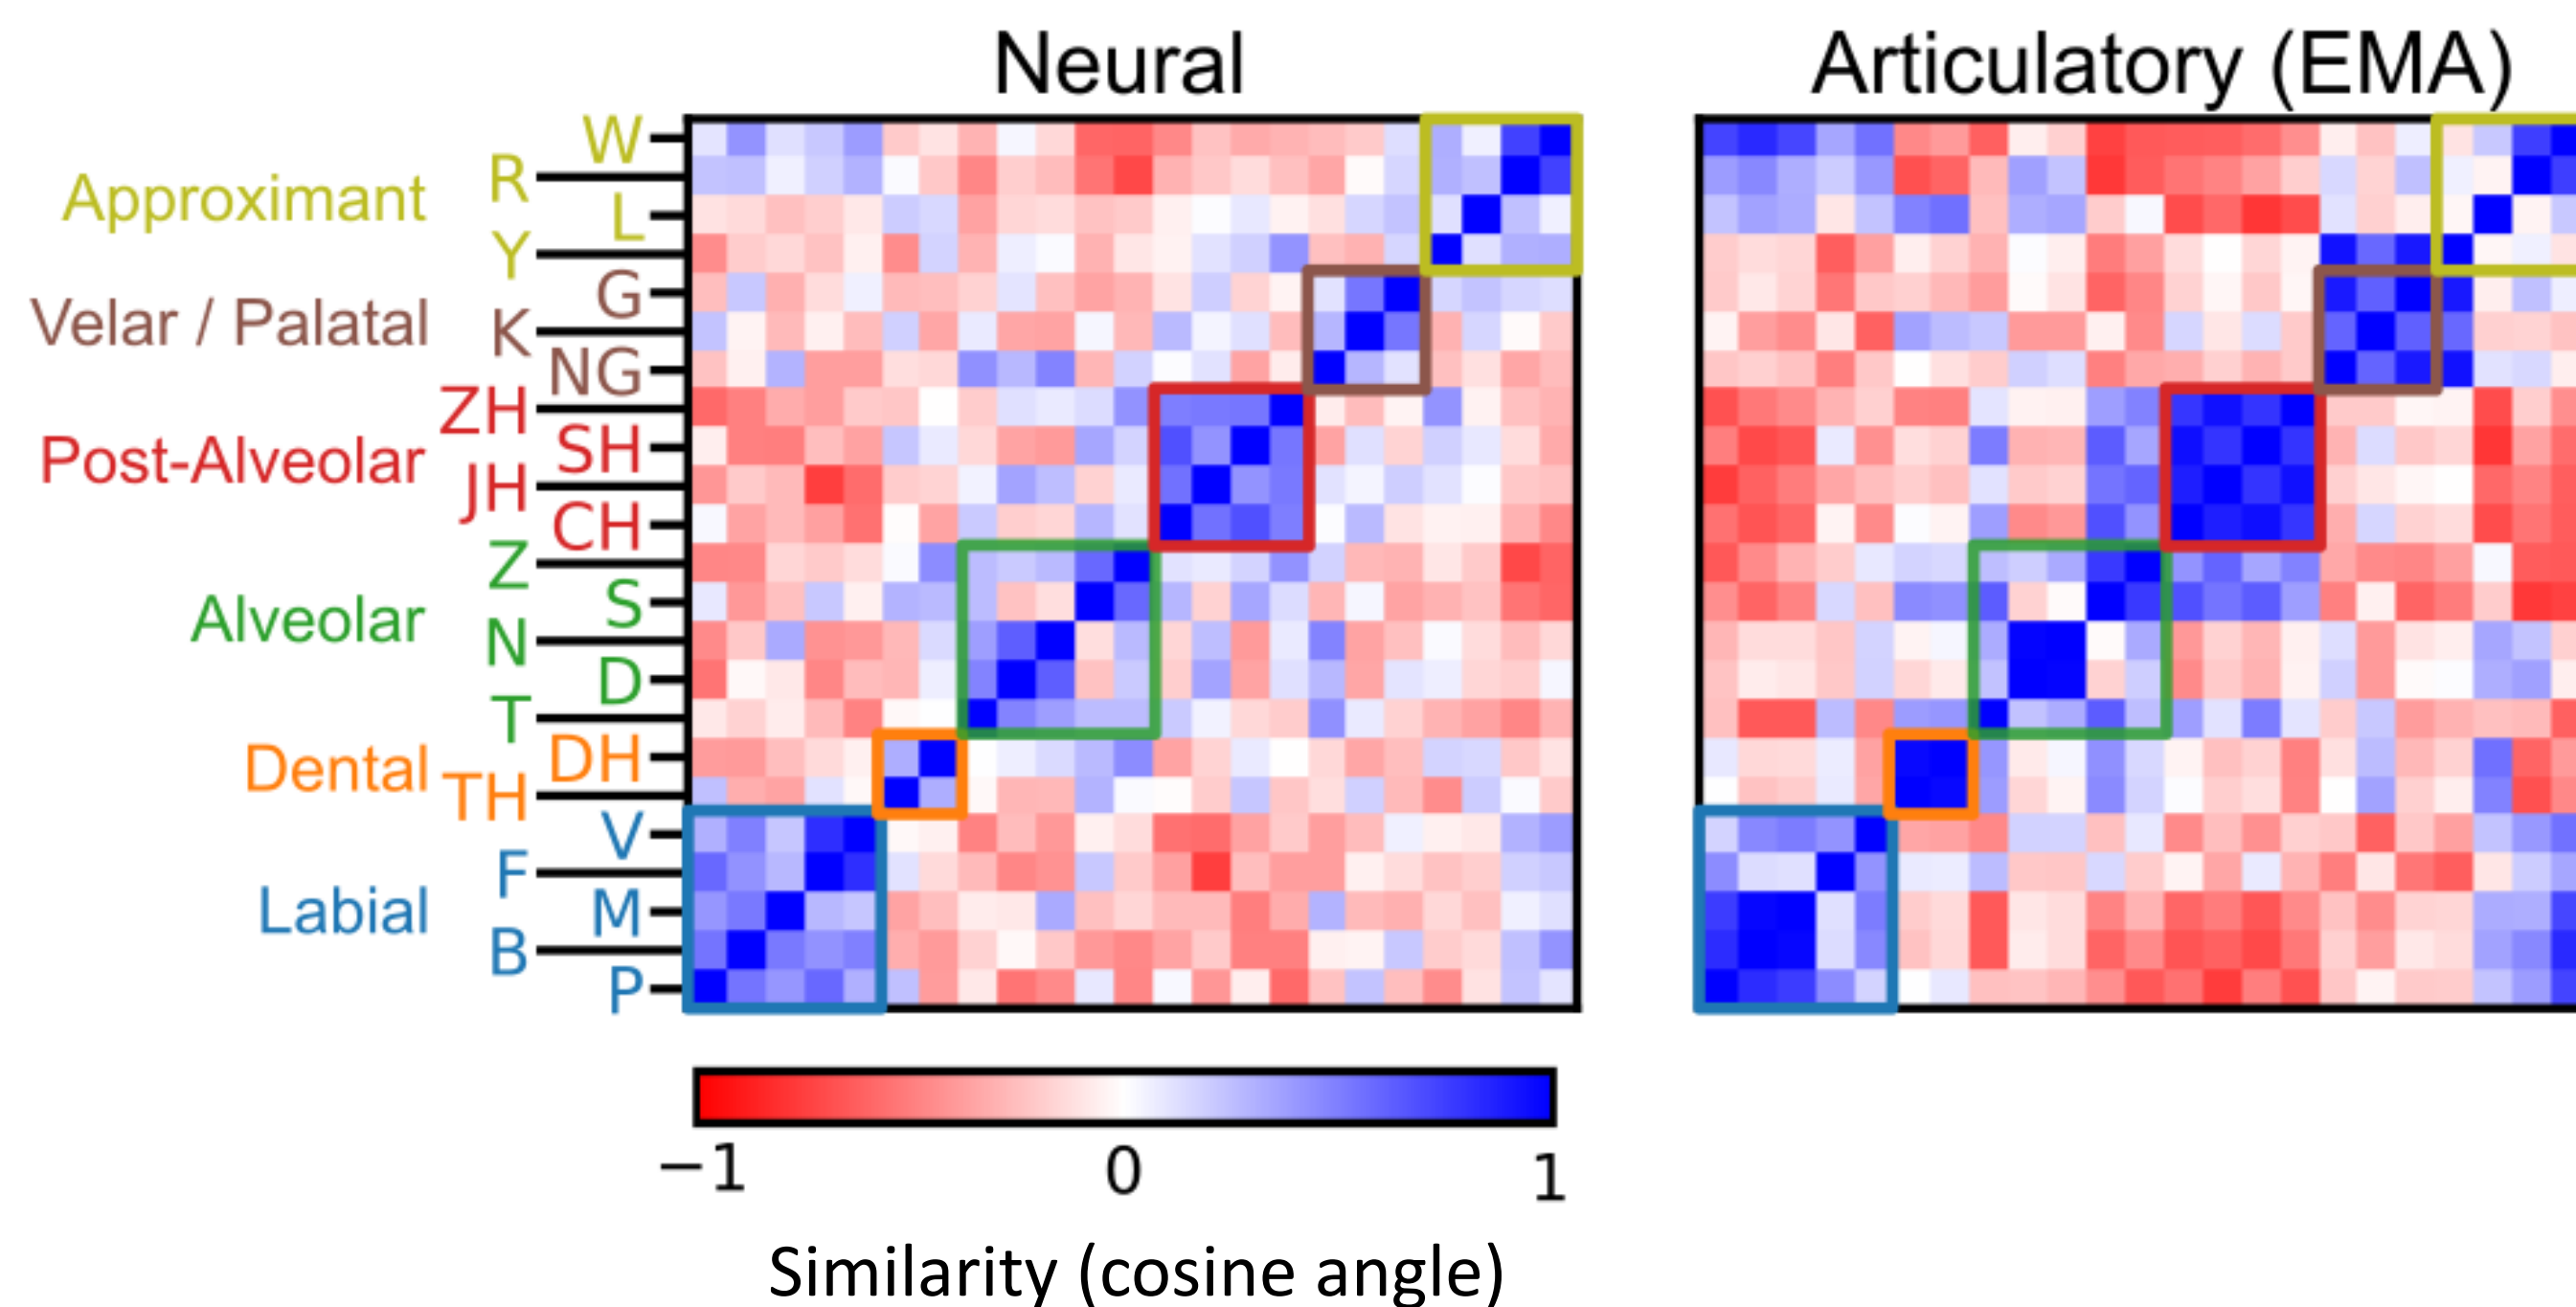

Bouchard et al. (2013) *Nature*

Dense Spatial Intermixing

Preserved Articulatory Representation

Decoding Methods

I don't want to call her a baby sitter.

Block: 17
Trial: 32

What are you proud of?

Block: 14
Trial: 15

I do not have much to compare it to.

Block: 17
Trial: 29

A New Record for Speech Decoding

Increasing the performance of iBCIs with rapid and dexterous behaviors (including speech)

Toward Full Clinical Implementation

- Improving ease of use
 - Elimination of patient cable and pedestal
 - Fully-implantable wireless system
- Improving performance
 - Higher channel count - more neurons
 - Improved decoders
 - “Always on” capability

Toward Full Clinical Implementation

- Improving ease of use
 - Elimination of patient cable and pedestal
 - Fully-implantable wireless system
- Improving performance
 - Higher channel count - more neurons
 - Improved decoders
 - “Always on” capability

Brain-to-Text '24

- Neural recordings of 12,100 Sentences

Rank 	Participant team 	WordErrorRate (↑) 
1	NPTL Pytorch Baseline (5gram + OPT6B)	9.76
2	NPTL Baseline (RNN + 5-gram + OPT) 	11.06
3	Zhao_Zhengtuo-Group (OPT-2.7b)	11.25
4	innerspeech-wyl	11.57
5	SNU-NLP2023 (Bi-GRU + 3-gram + GPT-2)	13.33
6	FATE (baseline)	15.43

Conclusions

- Brain-computer interfaces are moving closer to clinical reality
- BCI research enables insights in fundamental human neuroscience
- We will soon have systems that can provide real assistance to people with communication disorders and paralysis
- The future is very exciting!
