In the Halfwood Press Encyclopedia

MEP60012 - Abby Tamara Collection
Mountain View, CA, US

Abby Tamara sent an email when she was recovering from back surgery. She figured that the Mini Etching Press would put less strain in turning an etching press driving wheel than the press she was already using. Since she wanted to get to work right away, she chose the pre-finished and completed model of the Mini Etching Press - which just happened to be a unique mahogany showcase piece we were testing.

Not long after, she sent a suite of prints she printed on her Mini Etching Press.

Tamara Abby sent four prints from intaglio plate and relief blocks.
