

## **How to get to the Java Control Panel using the iOS operating system for MAC computers**

To make changes to the Java Settings is similar to the Windows 7 instruction (PDF), but for iOS operating system you get to the Java control panel in a different manner.

Here are the basic steps:

1. Go to the APPLE icon on the upper left of your screen
2. Go to System Preferences
3. Click on Java icon
4. The Java control panel will come up on another screen

At that point, please follow the instructions for Windows 7 Instructions for your application.
