

Sponsored Awards and the Application of the Revised Infrastructure Policy Effective 9/01/05

Issued: January 26, 2006
Revised: September 28, 2010
 Page 1 of 2

See ["OSR Revised Infrastructure Charge Guideline"](#) on the OSR Desktop Procedures page.

The award is **not** subject to the revised or prior ISC policies. Apply the sponsor's F & A rate and the correct cost base.

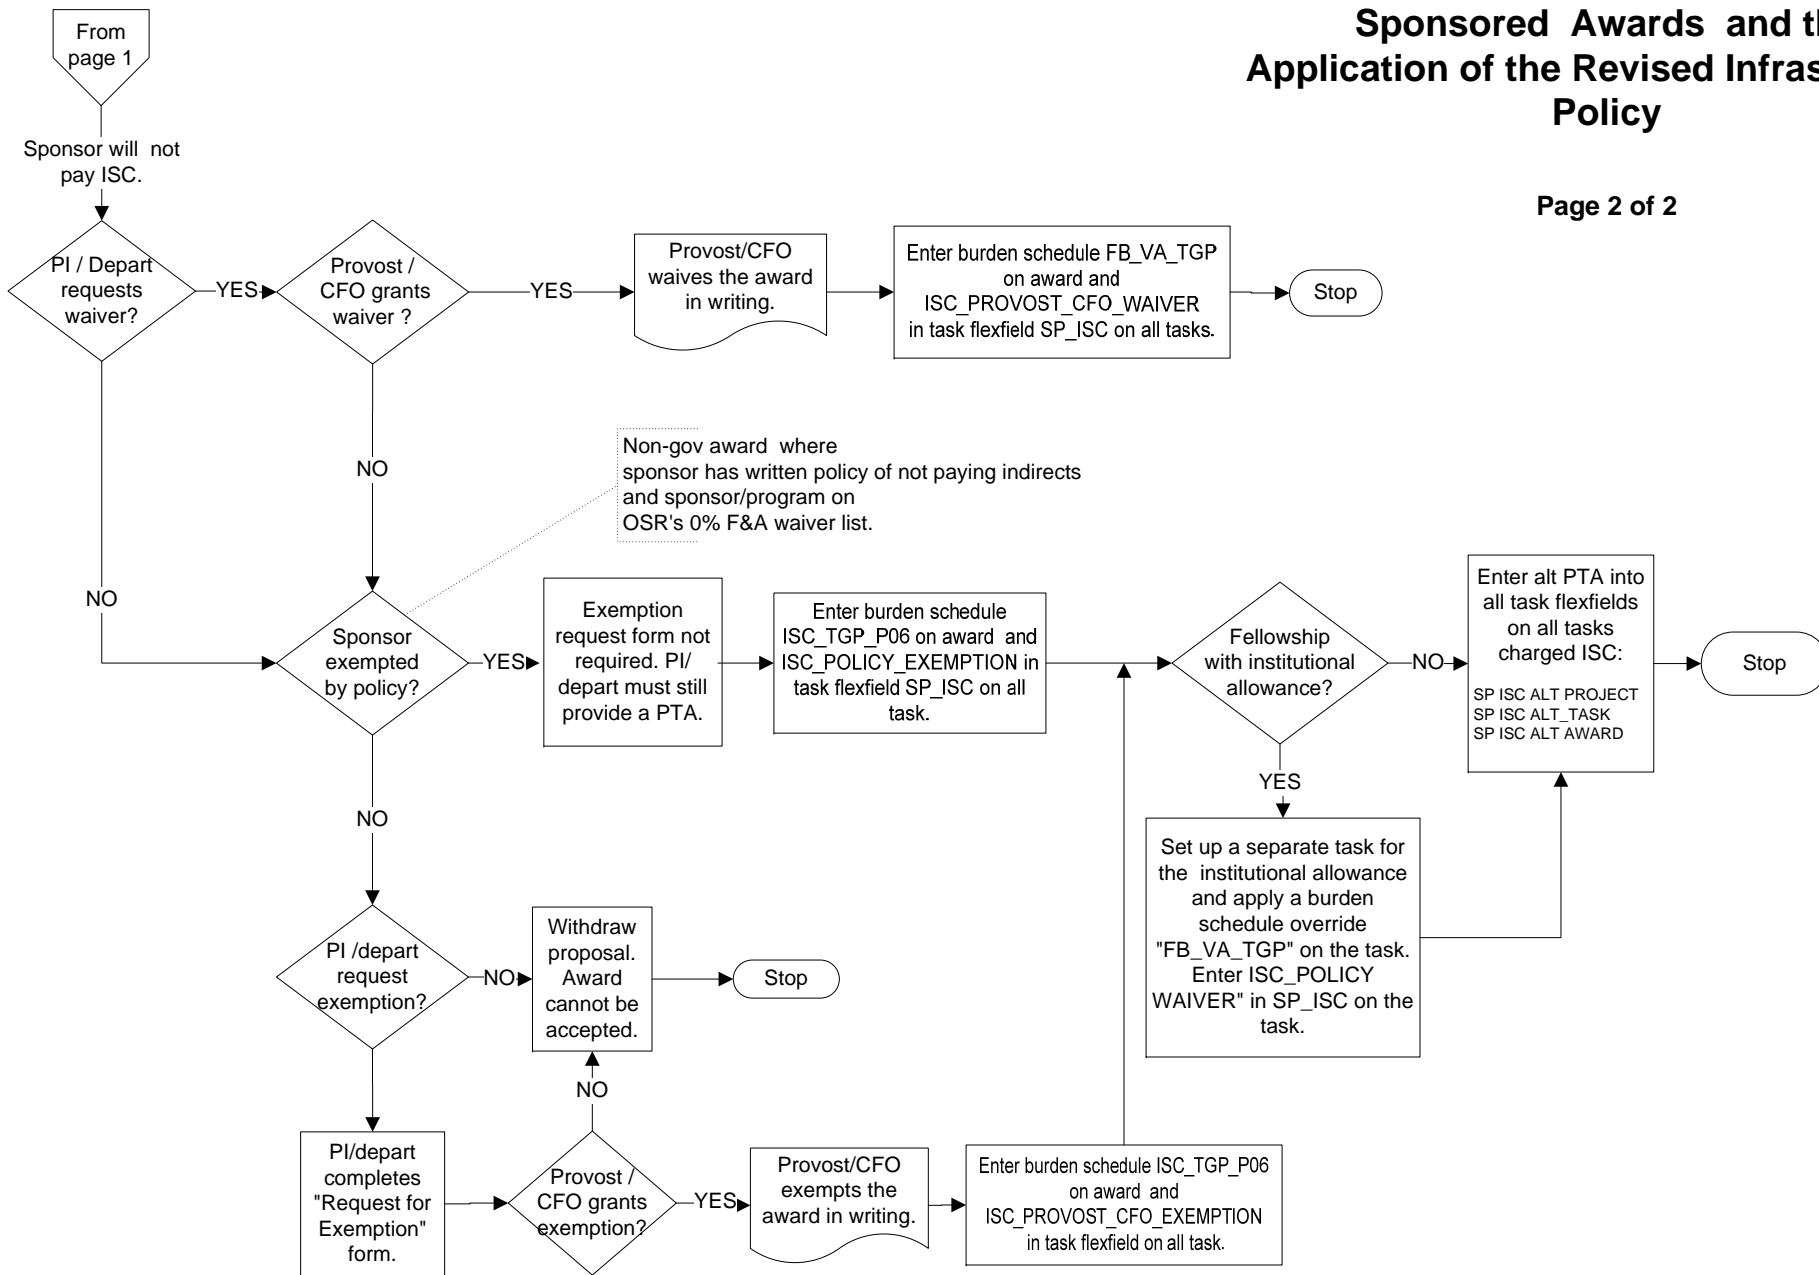

Go to ["Implementing the Infrastructure Charge \(ISC\)"](#) guideline dated May 11, 1998.

The assumption is the award was proposed under the prior ISC Policy .

US Gov awards (Federal, State of CA, local municipalities and other states) are waived by policy from ISC. SLAC sponsored awards are waived (SLAC parent org code AHYA and all child org codes that roll up into org code AHYA).

- Notes
- (1) A new competitive segment subject to the revised (8%) ISC policy added to an existing sponsored award subject to the prior ISC policy should be set up as a separate task/project and an override burden schedule applied to the new task.
 - (2) For awards that may be subject to the revised (8%) infrastructure charge and cannot be charged TGP, the burden schedule ISC_P06 is available.
 - (3) The burden schedule FB_VA_TGP may also be used as some SLAC awards excluded by policy may be non-government.

Sponsored Awards and the Application of the Revised Infrastructure Policy

Notes

- (1) A new competitive segment subject to the revised (8%) ISC policy added to an existing sponsored award subject to the prior ISC policy should be set up as a separate task/project and an override burden schedule applied to the new task.
- (2) For awards that may be subject to the revised (8%) infrastructure charge and cannot be charged TGP, the burden schedule ISC_P06 is available.
- (3) The burden schedule FB_VA_TGP may also be used as some SLAC awards excluded by policy may be non-government.
