Table II-9: Non-Professorial Teaching Staff
Annual snapshot, as of Oct. 15 of each year.

Non-professorial teaching staff are often hired on a part-time basis, sometimes only for a single academic quarter. Their headcounts and full time equivalents (FTE) are provided from the October 15 payroll snapshot of each year. Note that there is likely to be substantial variation in these headcounts across the academic year.

Clinician educators were previously part of the larger category of voluntary clinical faculty; this larger category no longer exists. Clinician educators were first reported in 2004-05, and their numbers have grown extremely quickly. There have also been major increases in lecturers and instructors over the past 10 years. While other categories tend to show some growth over time, they also have a great deal more year-to-year variation.
