COMM 238. Democratic Theory: Normative and Empirical Issues — (For undergraduates and M.A. students; Ph.D. students, register for 338.) Conflicting visions in terms of normative conflicts and empirical evidence. How citizens communicate with each other and their representatives, and how their representatives deliberate. Topics include theories of deliberation, how democracy is transformed when brought to the mass public, how informed a public is needed, and potential pathologies of small group communication in settings including juries, town meetings, and contemporary public consultations. Readings include Madison, Burke, Mill, Lippmann, Dewey, Schumpeter, Dahl, Sunstein, and Mansbridge.

1-5 units, Win (Fishkin, Luskin)

COMM 239. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives — The social and psychological processes involved in asking and answering questions via questionnaires for the social sciences; optimizing questionnaire design; open versus closed questions; rating versus ranking; rating scale length and point labeling; acquiescence response bias; don’t-know response options; response choice order effects; question order effects; social desirability response bias; attitude and behavior recall; and introspective accounts of the causes of thoughts and actions.

4 units (Krosnick) not given 2005-06

COMM 241A. History of Film: The First 50 Years — (Graduate section; see 141A.)

4 units (Breitrose) not given 2005-06

COMM 241B. History of Film: The Second 50 Years — (Graduate section; see 141B.)

4 units (Breitrose) not given 2005-06

COMM 244. Democracy, Press, and Public Opinion — (For undergraduates and M.A. students; Ph.D. students register for 344.) The democratic tradition provides conflicting visions of what a democracy is or might be, offering different views of the role of the press and citizens in engaging public issues. Focus is on democratic theory with empirical work on public opinion and the role of the media. Topics include campaigns, the effects of new technology, competing strategies of public consultation, public journalism, and possibilities for citizen deliberation. Prerequisite: consent of instructor.

1-4 units (Fishkin) not given 2005-06

COMM 246. Language and Discourse: Race, Class, and Gender — Theories concerning the discursive construction of identity and representation of cultures. Relationships between power and powerful speech. How language mediates and constructs identity; how it is associated with race, class and gender; and how people resist and manipulate these associations. Sources include conversation, public and popular culture, education, literature, and film.

1-4 units (Morgan) not given 2005-06

COMM 320G. Advanced Topics in New Media and American Culture —Primarily for Ph.D. students. Prerequisite: 220 (formerly 219) or consent of instructor.
1-5 units, Spr (Turner)

COMM 325G. Comparative Studies of News and Journalism —Focus is on topics such as the roles and responsibilities of journalists, news as a genre of popular literature, the nexus between press and state, and journalism’s commitment to political participation.
1-5 units (Glasser) not given 2005-06

COMM 326. Advanced Topics in Human Virtual Representation —Topics include the theoretical construct of person identity, the evolution of that construct given the advent of virtual environments, and methodological approaches to understanding virtual human representation. Prerequisite: consent of instructor.
1-5 units, Win (Bailenson)

COMM 331G. Communication and Media Ethics —Limited to Ph.D. students. Advanced topics in press ethics and responsibility. Prerequisite: 231 or consent of instructor.
1-3 units (Glasser) not given 2005-06

COMM 336G. Democracy, Justice, and Deliberation —(Same as 236G; see 236G.)
1-5 units (Fishkin) not given 2005-06

COMM 338. Democratic Theory: Normative and Empirical Issues —(Same as 238; see 238.)
1-5 units, Win (Fishkin, Luskin)

COMM 344. Democracy, Press, and Public Opinion —(Same as 244; see 244.)
1-4 units (Fishkin) not given 2005-06

COMM 347. Research in Political Psychology —Multi-methodological. Public preferences about government policies; the impact of the mass media on public opinion; party identification formation and change; voter decision making; determinants of voter turnout; issue public membership and its effects; measurement of public opinion; and the interface of democratic governments with their constituents.
2-4 units (Kronnick) not given 2005-06

COMM 348. Gender, Culture, and Communication —The field of gender and communication and principal questions in feminism theory in the context of linguistics, media studies, and sociolinguistics. Historiographical and theoretical perspectives on feminism and technology. International and multicultural focus. Areas include discourse and interaction, gender and culture, communication theory, gender and media, cultural studies, political economy, and symbolic communication. How everyday interactions, media, film, popular culture, and journalism incorporate gender and sexuality and perpetuate stereotypes of men, women, and sexuality. Prerequisite: consent of instructor.
1-5 units, Win (Morgan)

COMM 349. Ethnography of Communication —Ethnographic methods and the study of discourse and interaction. The impact of ethnography on research and field methods; how results validate knowledge across disciplines. The relationship of ethnography of communication to disciplines such as anthropology, linguistics, communications, and sociology. Focus is on the integration of ethnography and other research techniques for the documentation of communication and its role in the establishment and management of social encounters. Prerequisite: consent of instructor.
1-5 units, Spr (Morgan)

COMM 360G. Political Communication —Limited to Ph.D. students. Advanced topics. Prerequisite: 260 or consent of instructor.
1-5 units, Spr (Iyengar)

COMM 361. Field Experimentation in Political Communication Research —The design of large-scale field experiments. Recent developments in analysis of experimental data including matching, propensity scores, and other techniques that address the problem of selection bias. Prerequisite: consent of instructor.
4 units (Iyengar) not given 2005-06

COMM 368. Experimental Research in Advanced User Interfaces —(Same as 268; see 268.)
1-5 units, Win, Spr (Nass)

COMM 370G. Communication and Children —Limited to Ph.D. students. Prerequisite: 270 or consent of instructor.
1-5 units (Roberts) not given 2005-06

COMM 372G. Seminar in Psychological Processing —Limited to Ph.D. students. Advanced topics. Prerequisite: 272 or consent of instructor.
1-5 units, Win (Reeves)

COMM 374G. Freedom and Control of Communication —The meaning of freedom of public communication in democratic communities, focusing on the tensions between freedom and control, rights and opportunities, individual liberty and political equality.
1-5 units, Spr (Glasser)

COMM 379. History of the Study of Communication —The origins of communication/media theory and research emphasizing the rise of communication as a separate field of study. The influence of schools of thought concerning the scope and purpose of the study of communication. Readings include foundational essays and studies. Prerequisite: Ph.D. student or consent of instructor.
1-5 units (Glasser) not given 2005-06

COMM 380. Curriculum Practical Training —Practical experience in the communication industries. Prerequisites: graduate standing in Communication, consent of instructor. Meets requirements for Curricular Practical Training for students on F-1 visas. 380 May be repeated four times for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

COMM 397. Complementary Project —Individual research for Ph.D. candidates.
1-6 units, Aut, Win, Spr, Sum (Staff)

COMM 398. Major Research Project —Individual research for Ph.D. candidates.
1-6 units, Aut, Win, Spr, Sum (Staff)

COMM 399. Advanced Individual Work
1-9 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES
Courses approved for the Communication major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

FLORENCE
COMM 53. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema —(Same as ITALGEN 191F, ARTHIST 160Y, HISTORY 235V.)

Courses given in Comparative Literature have the subject code COMPLIT. For complete list of subject codes, see Appendix.

The Department of Comparative Literature offers courses in the history and theory of literature through comparative approaches. The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy. Several distinct major tracks are available for each degree, some of them offered in cooperation with other departments.

UNDERGRADUATE PROGRAM

BACHELOR OF ARTS

The undergraduate major in Comparative Literature is designed for students who combine the drive and ability to master foreign languages with a strong commitment to literary study. In all cases, students must do a substantial portion of their work in at least one foreign language. The major enables these students to pursue carefully constructed programs involving the in-depth study of literature in one or more languages not their own; and the study of their literature of specialization, its theory, and its practice in relation to other literatures, communications media, and disciplines.

The major is distinguished from those in the national literatures by its comparative scope, by the requirement of seminars that focus on fundamental theoretical questions regarding the nature of literature and literary inquiry, and by its requirement that the students' programs of study be structured around the exploration of a single literary genre, historical epoch, or theoretical problem. It differs from the “interdisciplinary” majors in English and Modern Thought and Literature (MTL) by its requirement that every student’s program be anchored in the study of a literature other than that of his or her native language and, with specific regard to MTL, by its chronological scope.

The “comparative” aspect of each student’s program of specialization is fulfilled according to which of the three available tracks he or she elects to follow:

Track A: The Literary Studies track integrates in-depth work in a primary literature with extensive work in a second literature (in the original language) and complementary course work in an outside field.

Track B: The Interdisciplinary track integrates in-depth work in a primary literature with the focused study of literature in relation to other arts (film, music, painting, etc.), intellectual disciplines (anthropology, history, linguistics, philosophy, etc.), or comparative work in area studies.

Track C: Interdisciplinary track with special concentration in the study of Philosophical and Literary Thought. This track integrates in-depth work in a primary literature with a systematic and articulated study of philosophy and its relations to literature.

An honors program is available in Comparative Literature for all three of these tracks (see below) that integrates substantial in-depth work in a primary literature with extensive work in a second literature (in the original language) or discipline, but also requires the writing of a senior honors paper.

In all three tracks, students work closely with the department’s Director of Undergraduate Studies in designing an individually tailored program of specialization involving two related areas of study. Individual study plans require considerable advance planning and must meet the approval of the Director of Undergraduate Studies.

Declaring the Major—As soon as a student knows that he or she would like to declare the Comparative Literature major (and no later than Autumn Quarter of the junior year), he or she should obtain a worksheet for the appropriate track (see below) from the Comparative Literature office. The completed worksheet (with prospective courses for future years) should be handed to the Director of Undergraduate Studies with an updated official transcript and the student’s advising file. The director should sign the worksheet, indicating his or her approval of the feasibility of the proposed program. This worksheet needs to be updated at least once during each academic year.

Advising—When a student declares Comparative Literature, he or she may choose to declare the Director of Undergraduate Studies as his or her adviser since the director approves credit for all course work (including course work abroad). The adviser may also be a member of the core Comparative Literature faculty. If this occurs, the student must meet periodically with the Director of Undergraduate Studies to monitor his/her progress in the major and for all questions regarding the major’s requirements.

Overseas Campuses and Abroad Programs—The Department of Comparative Literature encourages time abroad, both for increased proficiency in language and the opportunity for advanced course work. Course work done at campuses other than Stanford is counted toward proficiency in language and the opportunity for advanced course work. Course work done at campuses other than Stanford is counted toward the major at the discretion of the Director of Undergraduate Studies and is contingent upon the University’s acceptance of classes for units. To that end, students abroad must make an effort to save all notes, papers, correspondence, etc., to increase the chance of acceptance.

Honors College—The Department of Comparative Literature encourages all honors students to enroll in the honors college scheduled during the weeks preceding the beginning of every academic year. Applications to the college are available from the department administrator. The honors college is coordinated by the Division of Literatures, Cultures, and Languages (DLCL).

Writing in the Major (WIM)—In 2005-06, the WIM requirement for Comparative Literature should be met through completion of a WIM course in the student’s primary literary field:

- Chinese—CHINGEN 133/233
- French—FRENLIT 130, 131, 132, 133
- Italian—ITALLANG 114
- Japanese—JAPANGEN 138/238
- German Studies—GERLIT 123N, 131A/231A
- Slavic Languages—SLAVGEN 146/246
- Spanish and Portuguese—SPANLANG 102, 102B
- English—ENGLISH 160

318
REQUIREMENTS
CORE FOR TRACKS A, B, AND C

All majors in Comparative Literature (including honors) are required to complete the following courses, the first as near as possible to the date of declaration and the second during the senior year. Together, these core seminars ensure that majors have been introduced to the framing propositions and principal methods of the discipline. More specifically these courses are designed to lead students to inquire about the historical standing of such concepts as the literary, the aesthetic, criticism, genre, text, and theory.

1. COMPLIT 101, Seminar on Literature and the Institution of Literary Study (5 units), provides students with an introduction to the comparative study of literature, to the history of poetic theory, and to the historical development of literary fields. It is concerned with addressing foundational questions such as: what kind of knowledge is literary knowledge and how has this knowledge been codified and categorized with respect to other forms of knowledge? Fulfills the Writing in the Major requirement for Comparative Literature majors.

2. COMPLIT 199, Senior Seminar on Literary Theory (5 units), offers advanced students of comparative literature the opportunity for in-depth study of the evolution of modern literary theory and, particularly, of contemporary theoretical perspectives regarding the study of literary artifacts.

TRACK A—LITERARY STUDIES

Literary works are shaped by a complex interplay of historical forces and constraints, including contacts between differing cultures and traditions; the evolution of literary genres, practices, and conventions; shifts in media and technologies of reproduction and diffusion; and the imitation of model authors. By combining in-depth work in a primary literature with work in a second literature, this track emphasizes the study of such phenomena. It requires:

1. Courses using materials in the original language:
   a) five courses which make up an intellectually coherent program, in the literature of the first language A.
   b) three courses are in the literature of language B. These course selections must be coordinated with the courses selected in the literature of language A in order that, taken together, they form a cohesive program of study focused on one of:
      1) a specific literary genre
      2) a historical epoch
      3) a theoretical question

   Note: if either A or B is the student’s native language, further work must be done in a third language to the extent of at least one course in its literature. Literature courses usually begin after two years of college-level study. Bilingual students may count either tongue as native and the other as acquired. If language A, B, or C is Chinese, Japanese, Russian, or another language in which two years of language study does not constitute sufficient basis for literary study, some of the advanced work required for the major may be completed in translation or fulfilled through work in an advanced language course. An appropriate program should be approved following consultation with the department’s Director of Undergraduate Studies.

2. Three cognate courses supplementing a student’s work in the two chosen literatures and lending it further intellectual shape according to the criteria noted above. One course from the COMPLIT 100 series (but neither 101 or 199), or another course offered by the Department of Comparative Literature may be counted under this rubric.

3. One course, usually in translation, in a literature distant from the literatures of the student’s concentration that can provide an outside perspective on the student’s area of specialization.

4. Students in this track must also write at least one seminar paper that is comparative in nature. This paper should draw on previous course work, the paper must be an original composition; general guidelines for length require 18–20 pages. It must be submitted to the Director of Undergraduate Studies and receive his or her approval no later than the end of Winter Quarter in the fourth year of study.

TRACK B—INTERDISCIPLINARY

Literary creation is a complex human enterprise that intersects with a wide array of other fields of human endeavor and creation. Track B is designed to promote the focused study of intersections between literature and the arts (including film, music, and painting), and other disciplines (including anthropology, feminist studies, history, history of science, linguistics, and philosophy). It requires:

1. Five courses using materials in the original language, and making up an intellectually coherent program in the literature of a language other than the student’s native tongue. Bilingual students may satisfy this requirement in either of their original languages or in a third language.

2. Six courses (chosen as a function of the courses noted above) in:
   a) a single discipline or closely related cluster of disciplines
   b) the cultural history of a single historical epoch
   c) one or more of the fine arts; media or film studies
   d) area studies

   This course work must be shaped around the literature courses selected in item 1. It must either treat cogent analytical or thematic issues in the chosen discipline, or be directly relevant to the chosen historical specialization. Students who chose option ‘2d’ must select courses that include work outside a single area studies focus that have a genuinely comparative aspect. Each of these six courses must be approved in advance by the Director of Undergraduate Studies.

3. At least two of the eleven courses in items 1 and 2 shall be taught by Comparative Literature faculty.

4. One course, usually in translation, on a literature distant from the student’s two concentrations. The intention here is, as above, to offer an outside perspective on the student’s field of specialization.

5. Students in this track must also write at least one seminar paper that is interdisciplinary in nature. This paper should bring together material from courses taken in their primary literature and in another discipline and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member in COMPLIT 194), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). Though it may draw on previous course work, the paper must be an original composition; general guidelines for length require 18–20 pages. It must be submitted to the Director of Undergraduate Studies and receive his or her approval no later than the end of Winter Quarter in the fourth year of study.

   Students who choose the interdisciplinary option should be aware that it requires careful advance planning given that many course offerings are offered in alternate years.

TRACK C—PHILOSOPHICAL AND LITERARY THOUGHT

Undergraduates may major in Comparative Literature with a special degree field in interdisciplinary studies at the intersection of literature and philosophy. Students in this track take courses alongside students from other departments that also have specialized tracks associated with the program for the study of Philosophical and Literary Thought. Each student in this track is assigned an adviser in Comparative Literature, and students who chose option ‘2d’ must submit course schedules and course of study must be approved in writing by the adviser, the Director of Undergraduate Studies of Comparative Literature, and the Director of Undergraduate Studies of the program.

A total of 65 units must be completed for this track, including the following requirements:

1. Five courses using materials in the original language and making up an intellectually coherent program in the literature of a language other than the student’s native tongue. Bilingual students may satisfy this requirement in either of their original languages or in a third language.
The coherence of this program must be approved in writing by the Director of Undergraduate Studies of Comparative Literature.

2. Philosophy and Literature Gateway Course (4 units): COMPLIT 181 (enroll in PHIL 81, FRENGEN 181, OR ITALGEN 181). This course should be taken as early as possible in the student’s career, normally in the sophomore year.

3. Philosophy Writing in the Major (5 units): PHIL 80. Prerequisite: introductory philosophy class.

4. Aesthetics Writing in the Major (ca. 4 units): one course from the PHIL 170 series.

5. Language, Mind, Metaphysics, and Epistemology (ca. 4 units): one course from the PHIL 180 series.

6. History of Philosophy (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.

7. Related Courses (ca. 8 units): two upper division courses relevant to the study of philosophy and literature as identified by the committee in charge of the program. A list of approved courses is available from the undergraduate adviser of the program in philosophical and literary thought.

8. One course, typically in translation, in a literature distant from that of the student’s concentration and offering an outside perspective on that literary tradition.

9. Capstone Seminar (ca. 4 units): in addition to COMPLIT 199, students take a capstone seminar of relevance to philosophy and literature approved by the undergraduate adviser of the program in philosophical and literary thought. The student’s choice of a capstone seminar must be approved in writing by the Director of Undergraduate Studies of Comparative Literature and by the Director of Undergraduate Studies of the program.

10. Seminar Paper Requirement: students must write at least one seminar paper that is interdisciplinary in nature. This paper brings together material from courses taken in philosophy and literature, and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). Though it may draw on previous course work, the paper must be an original composition, 18-20 pages in length. It must be submitted to the Director of Undergraduate Studies and receive approval no later than the end of Winter Quarter in the fourth year of study.

At least two of the courses counted toward requirements 1, 2, 7, 8, and 9 must be taught by Comparative Literature faculty. Transfer units may not normally be used to satisfy requirements 2, 3, 4, 5, 6 and 9. Units devoted to acquiring language proficiency are not counted toward the 65-unit requirement.

MINORS

The undergraduate minor in Comparative Literature (CL) represents an abbreviated version of the major. In all cases, students must do a substantial portion of their work in at least one foreign language.

All minors in Comparative Literature are required to complete COMPLIT 101, Seminar on Literature and the Institution of Literary Study (5 units). This provides an essential introduction to the framing propositions and principal methods of the discipline.

In addition, all minors must complete two courses in the literature of a language other than their native tongue. All materials in each course must be in the original language.

1. Literary Studies Track: integrates in-depth work in a primary literature with work in a second literature. Requirements are:
   a) two courses in a second literature (this may include courses in translation, as well as courses in English and/or American literature).
   b) one additional course in Comparative Literature.

2. Interdisciplinary Track: integrates in-depth work in the primary literature with the focused study of literature in relation to another art or intellectual discipline. Requirements are:
   a) two courses in a single discipline, or the cultural history of a single historical epoch.
   b) one additional course in Comparative Literature.

The minor is modeled primarily on the structure and progression of the major (with the appropriate reduction in course and unit requirements, as stipulated by the Committee on Undergraduate Studies). It retains the distinction between the two CL tracks and enables students to design a course of study built around the core CL seminar.

The Director of Undergraduate Studies is responsible for evaluating all requests and individual study plans for the minor.

HONORS PROGRAM

The honors option is reserved for exceptionally motivated students who wish to undertake an even more intensive and extensive program of study leading to the writing of a senior honors paper. The program allows for either a “Literary Studies” or an “Interdisciplinary” emphasis and it requires:

1. Six courses, using materials in the original language and making up an intellectually coherent program, in the literature of language A. For the interdisciplinary emphasis, these courses must be in the literature of a language other than the student’s native tongue.

2. Emphasis:
   a) For a Literary Studies Emphasis: three courses using materials in the original language, in the literature of language B. Note: Track A’s rules regarding students’ native languages, bilingualism, and special exemptions for students studying Chinese, Japanese, Russian, etc., also govern students in the honors program who opt for a literary studies emphasis. These course selections must be coordinated with the courses selected in the literature of language A in order that, taken together, they form a cohesive program of study focused on one of the following:
      1) a specific literary genre  
      2) an historical epoch  
      3) a theoretical question and three cognate courses that supplement a student’s work in the two chosen literatures and lend it further intellectual shape. One course from the COMPLIT 100 series (but not 101 or 199) may be counted under this rubric.
   b) For an Interdisciplinary Emphasis: six courses as outlined in the general requirements for the Interdisciplinary Track (Track B), above. This course work must be shaped around the literature courses selected in item 1. It must either treat cogent analytic or thematic issues in the chosen discipline, or be directly relevant to the chosen historical specialization. Each of these six courses must be approved in advance by the Director of Undergraduate Studies.

3. One further course is required, usually in translation, on a literature distant from the two of the student’s concentrations, so as to provide an “outside” perspective on the student’s area of specialization.

4. During Spring Quarter of the junior year, a letter requesting admission to the honors program must be submitted to the department’s Director of Undergraduate Studies. This letter must be accompanied by:
   a) the completed, signed worksheet
   b) an updated transcript
   c) a sample seminar paper
   d) an intended plan of study for the senior year (drawn up according to the emphasis selected)
   e) a preliminary statement (two to five pages) regarding the proposed topic of the honors paper (elaborated in consultation with the Director of Undergraduate Studies)

   In Spring Quarter of the junior year, the student may enroll for 2 units of credit for independent research in COMPLIT 194.

   This application is voted on by the Comparative Literature honors committee, made up of the Director of Undergraduate Studies and the Chair of the Department of Comparative Literature. Should it be approved, a faculty tutor is appointed by the director according to the topic. At the appropriate time, a second reader is designated by the honors committee.

5. Once the request for admission to the honors track has been approved, the student must enroll in a 2-unit seminar focusing on research and writing the honors thesis, in the Autumn Quarter of the senior year.
This course helps to refine the project description and begin research in preparation for composing the honors paper.

6. During Winter Quarter of the senior year, the student must enroll in a 5-unit independent study (COMPLIT 195) with his or her faculty tutor for purposes of drafting the honors paper. At the end of the quarter, a completed draft must be submitted to the tutor. If it meets his or her approval as is, two copies must then be forwarded to the honors committee, which decides on the basis of the paper’s quality whether or not the student is awarded honors. If the faculty tutor feels that the paper still requires rewriting at the end of Winter Quarter, the student may complete revisions during Spring Quarter for purposes of final submission. In order to be considered for honors in Comparative Literature, two copies of the final paper must be submitted to the honors committee no later than the fifth week of Spring Quarter. Completion of honors course work, independent research, and the finished thesis earns a total of 10-12 units of credit.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but must be of appropriate comparative or theoretical scope and should reflect the student’s chosen emphasis. Quality (not quantity) is the key criterion. As a rule of thumb, however, they run in the range of 40-70 pages.

Honors Awards — The two readers of any honors thesis in Comparative Literature may elect to nominate the thesis in question for University-wide awards if they feel that it is deserving. In addition, the department honors committee evaluates on a competitive basis the honors theses completed in a given year and nominates one for University-wide awards competitions.

GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The Ph.D. program is designed for a small group of students whose linguistic background, breadth of interest in literature, and curiosity about the problems of literary scholarship and theory (including the relation of literature to other disciplines) make this program more appropriate to their needs than the Ph.D. in one of the individual literatures. Students take courses in at least three literatures (one may be that of the native language), to be studied in the original. The program is designed to encourage familiarity with the major approaches to literary study prevailing today.

Before starting graduate work at Stanford, students should have completed an undergraduate program with a strong background in one literature and some work in a second literature studied in the original language. Since the program demands an advanced knowledge of two non-native languages and a reading knowledge of a third non-native language, students should at the time of application have an advanced enough knowledge of one of the three to take graduate-level courses in that language when they enter the program. They should be making enough progress in the study of a second language to enable them take graduate courses in that language not later than the beginning of the second year, and earlier if possible. Applicants are expected to take an intensive course in the third language before entrance.

A considerable part of a student’s work consists of individual study toward the oral examinations, for which each student devises reading lists in consultation with the graduate adviser. These examinations are centered on the study of particular periods, genres, and problems of literary study.

Students are admitted under a fellowship plan which attempts to integrate financial support and completion of residence requirements with their training as prospective university teachers. Tenure as a fellow, assuming satisfactory academic progress, is for a maximum of four or five years. The minimum teaching requirement is the same regardless of financial support. (For specific teaching requirements, see below.) Five years of support are normally available, from a combination of fellowships and teaching assistantships, to Ph.D. candidates admitted to the Comparative Literature Department who are making satisfactory progress toward the degree.

APPLICATION PROCEDURES

Competition for entrance into the program is keen. The program is kept small so that students have as much opportunity as possible to work in individual projects under faculty supervision throughout the period of study. No more than 16 students are in residence at any one time. The department does not plan to admit more than three or four new students for the class entering in September. Completed applications are due January 3. Because of the special nature of comparative literature studies, the statement of purpose included in the application for admission should contain the following information besides the general plan for graduate work called for on the application:

1. A detailed description of the applicant’s present degree of proficiency in each of the languages studied, indicating the languages in which the applicant is prepared to do graduate work at present and outlining plans to meet additional language requirements of the program.
2. A description of the applicant’s area of interest (for instance, theoretical problems, genres, periods) within literary study and the reasons for finding comparative literature more suitable to his or her needs than the study of a single literature. Applicants should also indicate what they think will be their primary field.

All applicants should arrange to have the results of the general section of the Graduate Record Examination sent to the Department of Comparative Literature.

Recommendations should, if possible, come from faculty in at least two of the literatures in which the student proposes to work.

Applicants must submit a copy of an undergraduate term paper which they consider representative of their best work.

DEGREE REQUIREMENTS

Residence — A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. The student must take 135 units of graduate work, in addition to the doctoral dissertation, of which at least 72 units must be within the department. At least three consecutive quarters of course work must be taken at Stanford.

Languages — Students must know three non-native languages, two of them sufficiently to qualify for graduate courses in these languages and the third sufficiently to demonstrate the ability to read a major author in this language. Only the third language may be certified by examination. The other two are certified by graduate-level course work specified below. Language preparation must be sufficient to support graduate-level course work in at least one language during the first year and in the second language during the second year. Students must demonstrate a reading knowledge of the third non-native language no later than the beginning of the third year.

Literatures made up of works written in the same language (such as Spanish and Latin American) are counted as one. One of the student’s three literatures usually is designated as the primary field, the other two as secondary fields, although some students may offer two literatures at the primary level (six or more graduate courses).

Teaching — Fellows, whatever their sources of financial support, are ordinarily required to undertake a total of five quarters of supervised apprenticeships and teaching at half time. Fellows must complete whatever pedagogy courses are required by the departments in which they teach. The department’s minimum teaching requirement is a total of three quarters.

Minimum Course Requirements — Students are advised that the range and depth of preparation necessary to support quality work on the dissertation, as well as demands in the present professional marketplace for coverage of both traditional and interdisciplinary areas of knowledge, render these requirements as bare minimums. The following are required:

1. COMPLIT 369
2. COMPLIT 396L
3. A sufficient number of courses (six or more) in the student’s primary field to assure knowledge of the basic works in one national literature from its beginnings until the present.
4. At least two additional complementary courses, with most of the reading in the original, in each of two different national literatures. Students whose primary field is a non-native language are required to take two courses in one additional literature not their own. Minimum course requirements must be completed before the student is scheduled to take the University oral examination. These requirements are kept to a minimum so that students have sufficient opportunity to seek out new areas of interest. A course is an offering of 3-5 units. Independent study may take the place of up to two of the required courses, but no more; classroom work with faculty and other students is central to the program.

Examinations—Three examinations are required. The third and last is the University oral examination. Students’ reading lists for each examination must be approved by an examination committee and by the graduate adviser. The examinations consist of the following, each of which takes the form of an oral colloquy between the student and a committee of faculty members with interests in the subject areas:

1. First One-Hour Examination: on a literary genre to consist of (a) a knowledge of a substantial number of literary works in a single genre, the list to include works from a number of centuries and from at least three national literatures, and (b) a grasp of the theoretical problems involved in dealing with this genre and with the question of genre in general. The examination must be taken no later than the beginning of the student’s second year of graduate work (or the third quarter of the first year for students who enter with a year of previous graduate work).

2. Second One-Hour Examination: on literary criticism and theory, to consist of the exploration of a specific problem proposed and defined by the student. The problem must be sufficiently wide-ranging to demand the reading of critical texts from a variety of periods. The examination must be taken no later than the first quarter of the student’s third year of graduate work (or the third quarter of the second year for students who enter with a year of graduate work). Students may elect to take this section of the examination before the genre section, in which case it must be taken at the earlier time.

3. University Oral Examination: on a literary period, to consist of in-depth knowledge of a period of approximately a century, in three or more literatures with primary emphasis on a single national literature or, in occasional cases, two national literatures. The reading list covers chiefly the major literary texts of this period but may also include some studies of intellectual backgrounds and modern critical discussions of the period. Students must demonstrate a grasp of how to discuss and define this period as well as the concept of periods in general. This examination is not to be on the dissertation topic, on a single genre, or on current criticism, but rather on a multiplicity of texts from the period. Students whose course work combines an ancient with a modern literature have the option of dividing the period sections into two wholly separate periods.

Qualifying Procedures—The qualification procedures for students in Comparative Literature take place during the quarter in which the student takes the first Ph.D. examination. Ordinarily, this is the beginning of the second year, but students who enter with a year of graduate work elsewhere must take the examination no later than the third quarter of the first year. Any student may elect to take the examination during the third quarter of the first year.

Students are judged qualified to proceed to the Ph.D. on the basis of the first part of the Ph.D. examination as well as other aspects of their work (for example, performance in courses, ability to do original research) that predict strong promise for their dissertations and future careers as scholars and critics. As soon as the student has completed the qualifying procedures, the chair recommends him or her for admission to candidacy for the Ph.D. At this time the student is also recommended for the Master of Arts degree in Comparative Literature if he or she has completed 45 units of work at Stanford and has not already completed an M.A. before entering the program.

Colloquium—The colloquium normally takes place in the quarter following the University oral examination. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student lasting no more than five minutes, and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation adviser during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project’s relation to prior scholarship on the topic, and lay out a complete chapter by chapter plan.

It is the student’s responsibility to schedule the colloquium no later than the first half of the quarter after that quarter in which the student passed the University Oral Examination. The student should arrange the date and time in consultation with the department administrator and with the three examiners. The department administrator schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

PH.D. MINOR

This minor is designed for students working toward the Ph.D. in the various foreign language departments. Students working toward the Ph.D. in English are directed to the program in English and Comparative Literature described among the Department of English offerings. Students must have:

1. A knowledge of at least two foreign languages, one of them sufficient to qualify for graduate-level courses in that language, the second sufficient to read a major author in the original language.

2. A minimum of six graduate courses, of which three must be in the department of the second literature and three in the Department of Comparative Literature, the latter to include a seminar in literary theory or criticism. At least two of the three courses in comparative literature should originate in a department other than the one in which the student is completing the degree. Except for students in the Asian languages, students must choose a second literature outside the department of their major literature.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Comparative Literature department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER I requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Comparative Literature are advised to consider satisfying their GER I b, c requirements by registering for the following IHUM courses.

IHUM 8A.9A. Myth and Modernity: Culture in Germany — Two quarter sequence. The tension between tradition and progress through an examination of German cultural history. The experience of modernity typically involves overcoming or denying the past, but that same past can return to haunt the present in the form of myths. The interplay of myth and modernity, the irrationality of narrative, and the reason of progress, through the example of German culture, especially in literature, from the heroic epics of the medieval era through the catastrophes of the last century. GER: IHUM 2.3

IHUM 8A. 5 units, Win (Berman)
IHUM 9A. 5 units, Spr (Eshel, Strum)

GENERAL

These courses are aimed at freshmen and sophomores who are non-majors (and/or potential majors) and provide an entry point to the discipline of Comparative Literature.

All majors are required, as soon as possible after declaration, to complete COMPLIT 101. During the senior year, majors enroll in 199.

COMPLIT 10N. Shakespeare and Performance — Stanford Introductory Seminar. Preference to freshmen. The problem of performance including the performance of gender through the plays of Shakespeare. In-class performances of scenes from plays by students. The history of theatrical performance. Sources include filmed versions of plays, and readings on the history of gender, gender performance, and transvestite theater. GER: DB-Hum, EC-Gender

3 units, Spr (Parker)

COMPLIT 11Q. Shakespeare, Playing, Gender — Stanford Introductory Seminar. Preference to sophomores. Focus is on several of the best and lesser known plays of Shakespeare, on theatrical and other kinds of playing, and on ambiguities of both gender and playing gender. Topics: transvestism inside and outside the theater, medical and other discussions of sex changes from female to male, hermaphrodites, and fascination with the monstrous. GER: DB-Hum, EC-Gender

3 units, Win (Parker)

COMPLIT 20N. Travel: Real and Imagined Worlds — Stanford Introductory Seminar (Same as FRENGEN 20N.) Focus is on the foreign and the stranger. How otherness and difference are represented through the outsiders’ gaze. Sources include literary works and travel accounts. Topics such as utopia and monstrosity, cultural encounter, and the diversity of cultures. Readings include Plato, Marco Polo, Rabelais, Montaigne, Jean de Léry, Thomas Mann, Alexis de Toqueville, Claude Lévi-Strauss, Bernard Dadie, Italo Calvino, and Barbara Chase-Riboud. GER: DB-Hum

3-4 units, Win (Boyi)

COMPLIT 40N. Reading Across Literature — Preference to freshmen. How literature serves as a medium across which we encounter others. What happens when people are not only other readers but also other authors. What happens when the boundary between reading and writing is blurred, confused, refracted; how that enables a particular aesthetic and ethics. Introduction to literary texts which incorporate issues of culture, history, and ethics. Sources include Barthes, Woolf, Coetzee, Dafis, Shammas, and Ozeki. GER: DB-Hum, EC-GlobalCom

5 units, Spr (Palumbo-Liu)

COMPLIT 41Q. Ethnicity and Literature — Stanford Introductory Seminar. Preference to sophomores. What is meant by ethnic literature? How is ethnic writing different from non-ethnic writing, or is there such a thing as either? How does ethnicity as an analytic perspective affect the way literature is read by ethnic peoples? Articles and works of fiction; films on ethnic literature and cultural politics. How ethnic literature represents the nexus of social, historical, political, and personal issues. GER: DB-Hum, EC-AmerCul

3-5 units, Aut (Palumbo-Liu)

COMPLIT 50N. Journeys of the Mind — Stanford Introductory Seminar (Same as CLASSGEN 50N.) The concept of the journey of the mind in Western philosophical and literary texts. Narratives that represent the mind journeying in search of goodness, happiness, truth, God, self, or nature. Comparison of journey narratives across cultures and historical periods. Interactions among mind, body, and nature. Focus is on: mind separating itself from body and moving from the natural world toward higher beings; and mind as a natural entity that searches for truth or happiness on Earth. GER: DB-Hum

3-4 units, Spr (Nightingale)

COMPLIT 101. Introduction to Comparative Literature: Critical Aesthetics, Thinking, and Feeling the Beautiful — Sources include the history of aesthetics, literary criticism, and literary theory. The major figures, texts, and issues that have contributed to the development of comparative literature. The shifting importance of the work of art, artist, audience, and represented world in the history of literary criticism from classical antiquity to the postmodern era. GER: DB-Hum, WIM

5 units (Saldívar) not given 2005-06

COMPLICIT 194. Independent Research
1-5 units, Aut, Win, Spr (Staff)

COMPLICIT 195. Honors Research — 195A and B should total 10 units between two quarters. 195B and C must be the same grade.

COMPLIT 195A. Honors Thesis
1-10 units, Aut (Staff)

COMPLIT 195B. Honors Thesis
1-10 units, Win (Staff)

COMPLIT 195C. Honors Thesis
2 units, Spr (Staff)

COMPLICIT 199. Senior Seminar on Literary Theory — Introduction to structuralist, poststructuralist, psychoanalytic, and Marxist thinking about language, literature, and culture. Theoretical readings and literary texts. Readings in English translation. Prerequisite: senior Comparative Literature major or consent of instructor. GER: DB-Hum

5 units, Win (Lerer)

UNDERGRADUATE/GRADUATE

COMPLIT 118/218. Dostoevsky and His Times — (Same as SLAVGEN 151/251.) Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture, literary criticism, and intellectual history. GER: DB-Hum

4 units, Win (Frank)

COMPLICIT 119. What Isn’t an Author?: Forgery and Attribution in Chinese and Western Literature — (Enroll in CHINLIT 167/267.)

3-5 units, Aut (Rusk)

COMPLICIT 121/221. Poetics: The Grammar of the Self When the Poet Is a Woman — (Same as SLAVGEN 161/261.) Seminar. Literary works by women poets from the U.S., Russia, E. Europe, and Germany (Dickinson, Moore, Brooks and the Harlem Renaissance, Bishop, Akhmatova, Tsvetaeva, Sachs, Plat, Cisneros, Angelou, Graham, Howe, and Szymborska.) Theoretical and practical issues: breaking and entering the male preserve of high poetry; the interaction of written and oral, political, and performative modes of expression; representations of the feminine body and experience in the visual arts; and the development of a female lineage and modes of poetic legitimation, association, and inspiration. GER: DB-Hum, EC-Gender

4 units (Greenleaf) not given 2005-06
COMPLIT 123. History of Children’s Literature — (Same as ENGLISH 177.) From origins to the present. Focus is on writings for children in the English and American tradition. European texts and contexts. Techniques of critical analysis, the history of publishing and reading, and the rise of children’s literature as a commercial venture. GER:DB-Hum
3-4 units, Spr (Lerer)

COMPLIT 129. Lovers at Dawn — Medieval lyrics of courtly love in which adulterous lovers discuss physical love, strong emotions, right and wrong, and separation. How such poems accommodate a multiplicity of voices, or a woman’s voice. How medieval and later lyric is conditioned by this poetics of sex and regret? Genres: Occitan tenso and alba, German Tageliet, and the Iberian cantiga de amigo. Poets: Dante, Wolfram von Eschenbach, Chaucer, Auden, Larkin.
3-5 units, Aut (Galvez)

COMPLIT 131N. Memory in the Modernist Novel — (Enroll in GERGEN 121N.)
4 units, Spr (Douwaldzi)

COMPLIT 139. History, Fiction, and the Romantic Age — How do history and fiction interact? Focus is on 1800-50 when the historical novel was born and history was codified as a discipline. Readings of fictional and historiographical accounts include Scott, Kleist, Hegel, Hugo, Michelet, and Pushkin and others. Visual materials and films.
3-5 units, Spr (Golburt)

COMPLIT 141. Literature and Society: Introduction to Francophone Literature from Africa and the Caribbean — (Same as FRENLIT 133.) Major African and Caribbean writers. The issues raised in literary works which reflect changing aspects of the societies and cultures of Francophone Africa and the French Caribbean: meeting the challenge of acculturation and the search for identity; tradition competing with modernity; the use of oral tradition and writing; women’s role and status; writers’ social responsibility. Visual material; readings from fiction, poetry, plays, and criticism. In French. GER:DB-Hum, EC-GlobalCom
3-5 units, Spr (Boyí)

COMPLIT 142. The Literature of the Americas — (Same as ENGLISH 172E.) Representations of the creation of an American new world experience, myths of America as utopia, and critiques of notions of the self and the nation to which such myths give rise in political, historical, literary, and mass media forms. Readings include Columbus, Bernal Díaz del Castillo, Aztec codices, Sor Juana, Tocqueville, Fenimore Cooper, Whitman, Machado de Assis, Mario de Andrade, Martí, Neruda, Williams, Rulfo, Faulkner, Morrison, and Sandra Cisneros. GER:DB-Hum, EC-AmerCul
5 units (Greene, Saldívar) not given 2005-06

COMPLIT 147. The Yiddish Novel — (Enroll in SLAVGEN 123/223.)
3-4 units, Spr (Glaser)

COMPLIT 147L. Reflection on the Other: The Jew in Arabic Literature, the Arab in Hebrew Literature — (Enroll in AMELANG 126.)
4 units, Win (Barhoum, Shentov)

COMPLIT 148. Introduction to Asian American Cultures — Asian American cultural production (film, drama, poetry, fiction, music) in sociohistorical context. Topics include ethnicity, race, class, and gender, and the political economy of ethnic culture in the U.S. GER:DB-Hum, EC-AmerCul
3-5 units, Win (Palambo-Liu)

COMPLIT 148S/248S. The Literatures of Ukraine: The Modern Period — (Same as SLAVGEN 135/235.) Borderlands, national identity, geography, and narrative uses of landscape and travel within Ukraine. Contemporary literature in and about Ukraine. Readings include Ukrainian writers such as Kotliarevsky and Ukrainka, Russian writers such as Gogol and Bulgakov, and Polish and Yiddish writers. Readings in English; optional reading groups in original languages.
3-4 units, Aut (Glaser)

COMPLIT 149. What is Nobel Literature? Reading, Assessing, and Interpreting the Nobel Novels on the World Stage — Recent Nobel laureates in literature: Gabriel García Márquez, Nadine Gordimer, Toni Morrison, Kenzaburo Oe, and V.S. Naipaul. These writers from different locations participate in a global conversation about the human condition. The impact of their identities upon their thought and writing. How the Nobel prize is awarded. The role of literature in the world, and analytical skills for reading literary texts. GER:DB-Hum, EC-GlobalCom
5 units, Sum (Palambo-Liu)

COMPLIT 151A. Oedipus, Hamlet, Moses — (Enroll in GERGEN 191A/291A.)
3-5 units, Spr (Douwaldzi)

COMPLIT 159. Does Literature Matter? — What literature means to people in their daily lives. Topics include current and historical considerations of literature as a tool of ethical education; the values of leisure and pleasure as they affect perceptions and definitions of literature; and literature as a method of community building. Students examine personal experiences with literature. Readings include Tolstoy, Wright, Woolf, Eggers, and literary and cultural theorists. GER:DB-Hum
3-5 units, Spr (Gelder)

COMPLIT 181. Philosophy and Literature — (Enroll in FRENGen 181, ITALGen 181, PHIL 81.)
4 units, Aut (Landy, Anderson)

COMPLIT 227. Literary Translation — (Enroll in ENGLISH 293.)
5 units, Spr (Felstiner)

COMPLIT 241. Comparative Fictions of Ethnicity — How authors create fiction informed by the notions of ethnicity, difference, and social ideologies. Focus is on narratives written by racial and ethnic minorities whose representation reveals how they came to write and how they sense themselves to be written by historical, social, and cultural forces. How ideas such as identity, national character, ethnicity, and gender evolved. Novels from settings including the U.S., Middle East, and Asia. Authors include Sandra Cisneros, John Wideman, Zora Neale Hurston, Toshio Mori, Nieh Hualing, Anton Shammas, and N. Scott Momaday. GER: DB-Hum, EC-AmerCul
5 units, Spr (Palambo-Liu)

COMPLIT 244. Twentieth Century Central European Literature and Film: 1918 to 1968 — Is there a distinct Central European culture? The origins of literary avant-gardism inspired by Dada and Surrealism, the traumas of WWII, and anti-authoritarian reactions to censorship and socialist realism. Czechoslovakia, Hungary, Poland, Romania, and Yugoslavia. Texts and films by Esterházy, Gombrowicz, Kafka, Milosz, Schulz, Szabo, Kis, and Wajda.
5 units, Win (Labov)

COMPLIT 245. Twentieth Century Central European Literature and Film: 1968 to the Present — Political upheavals in Central Europe including Solidarity, perestroika, and the post-Communist present. How these changes are reflected in the literatures and cultures of Czechoslovakia, Hungary, Poland, Romania, and Yugoslavia. How writers and artists have been subject to political, national, and commercial demands. Texts and films by Esterházy, Gombrowicz, Kieslowski, Kundera, Milosz, Szymborska, Topol, and Zagajewski.
5 units, Spr (Labov)

COMPLIT 246. Rethinking Identities in the Era of Globalization — (Same as FRENLIT 278.) Cultural issues faced by postcolonial societies and new visions proposed by writers and thinkers to meet the challenge of globalization and preserve the local. Emphasis is on questions of difference, language, nation and identities, and identity construction. Theoretical and fictional readings include Derrida, Glissant, Kristeva, Malouf, Morejon, Senghor, and Serres. May be repeated for credit.
3-5 units, Spr (Boyí)

The problem of censorship in Iranian literary history. Were the sources of Iranian and Muslim modernity derived from the West or as an indigenous development? GER:DB-Hum
5 units, Aut (Milani)

COMPLIT 249C. History, Memory, and Cultural Discourse in Germany, Austria, and Israel—(Same as INTNLREL 103.) Comparative, theoretical, and interdisciplinary approach to literary, visual, and cinematic representations and appropriations of WW II, the Holocaust, and the founding of Israel. The relationships among representation, memorialization, and cultural and political discourses: what are the implications of different modes of historical representation? How can the memory boom of the 90s and the beginning of the 21st century be explained? How does this interest in history and memory relate to cultural globalization? In English.
5 units, Win (Saldívar)

COMPLIT 257. Self-Deception in Literature and Philosophy: Putting Philosophy at the Risk of Narrative—(Enroll in FRENLIT 257.)
3-5 units, Spr (Dupuy)

5 units, Win (Parker)

COMPLIT 315. Petrarch and Petrarchism—(Same as ITALLIT 345.) Readings from the Canzoniere, Epistole, De Vita Solitaria, and Secretum, in relation to later developments in Petrarchan poetry in Italy (Ariosto, Gaspara, Stampa, Tasso), Spain (Garcilaso, Quevedo, Gongora), England (Sydney, Shakespeare), and France (Ronsard). Topics: Petrarch and Dante, Petrarch and the aesthetics of fragmentation, and Pietro Bembo and the Petrarchan canon. In Italian.
3-5 units, Aut (Schnapp)

COMPLIT 320. Materials and Methods for the Study of Poetry—(Same as ENGLISH 350C.) For graduate students in all national literatures and for comparatists. The intellectual and professional tools relevant to scholarship on poetry in any language. Theoretical issues and practical knowledge of forms, techniques, and cultural formations in verse. Topics such as lineation, stanza, meters, material and concrete poems, prose poems, translation voices, and persona.
3-5 units (Greene) not given 2005-06

COMPLIT 320A. Epic and Empire—(Same as ENGLISH 314.) Focus is on Virgil's Aeneid and its influence, tracing the European epic tradition (Ariosto, Tasso, Camoes, Spenser, and Milton) to New World discovery and mercantile expansion in the early modern period.
5 units, Spr (Parker)

COMPLIT 321. Present Past: History, Fiction, Temporality—(Same as GERLIT 299.) The crisis of temporality and aversion to traditional notions of history in late 20th-century Western culture. Sources include literary, philosophical, and historical works with focus on the cultural dislocations attending the rebellion against modernity and the difficulty of making sense of the relation between past and present as traditional values, ideologies, and utopias weaken. Readings may include Heidegger, Benjamin, Koselleck, Ricouer, Sartre, Levi, Kafka, Agnon, Woolf, Celan, and Weiss. GER:DB-Hum
5 units, Win (Eshel, White)

COMPLIT 322A. Theories of the Novel—(Same as FRENGEN 356.) The novel as the genre most closely identified with the development of cultural modernity by literary historians and theorists. Critical models for defining the novel's poetics and cultural work. Critical readings: Bakhtin, Auerbach, Barthes, Armstrong, Genette, Radway, Bourdieu, Macherey, Jameson, and Robbe-Grillet. Tutor texts: Defoe's Robinson Crusoe, Flaubert's Madame Bovary, and Woolf's To the Lighthouse.
3-5 units, Spr (Cohen)

COMPLIT 326C. The Ethnic Bildungsroman and Historical Novel—(Same as ENGLISH 309.) Can a case be made for defining the classical stage of minority novels in formal rather than thematic terms? The Bildungsroman as the novel of human emergence despite how a human being can emerge in diverse ways. Focus is on contemporary ethnic novels to establish a formal definition for ethnic and minority narratives in the historical mode.
5 units, Win (Saldívar)

COMPLIT 331C. Institutions of Enlightenment: The Invention of the Public Sphere—(Same as HISTORY 331A, ENGLISH 303F.) The cultural foundations of the Enlightenment as public sphere and its relationship to the private or intimate sphere. The invention and naturalization of fundamental institutions of the Enlightenment such as the public, the private, the market, public opinion, literature, the individual, society, culture, knowledge, and politics.
5 units, Aut (Bender)

COMPLIT 335. F. T. Marinetti and Futurism—(Same as ITALGEN 353E.) The history and influence of the Futurist movement. Links between avant garde cultural experimentation and themes of speed, acceleration, intensification, and novelty that shaped modern and postmodern ideas about experience, subjectivity, rhythm, power, and production.
3-5 units, Spr (Schnapp)

COMPLIT 350. Mediating Otherness—How distant others are delivered via literary and other sorts of narratives. How the traditional function of literary narrative to present others across space and time is still fulfilled or fulfilled differently in the contemporary moment. The ethical importance of different modes of conveying otherness. Sources include Badiou, Derrida, Levinas, Nancy, Nussbaum, Ricouer, Spivak, new media theory, films, and novels.
5 units, Aut (Palambo-Liu)

COMPLIT 351. Explanation/Interpretation—(Same as ENGLISH 366A.) What should literary critics and historians do: explain or interpret? What is the difference between these intellectual activities, and what is at stake in the choice of one over the other? Readings include Weber, Freud, Popper, Gadamer, Hempel, Douglas, Geertz, Nussbaum, Panofsky.
5 units, Spr (Moretti)

COMPLIT 353. The Theory of the Text—Studies in the theory of textuality, textualism, discourse, and interpretation. Issues connected with narrative and narrativity; the structure of tales, stories, and myths; the modernist rejection of narrativity; and narrative as a cognitive mode. Theorists include Lukács, Propp, Greimas, Barthes, Genette, Girard, and Jameson. GER:DB-Hum
4-5 units, Win (White)

COMPLIT 354B. The Modern Tradition II—(Same as MTL 334B.) Responses, refutations, elaborations, modifications to texts in critical theory such as Gramsci, Lacan, and Derrida, and postcolonial, postmodern, and feminist theory. Prerequisite: 334A.
3-5 units, Win (Palambo-Liu)

COMPLIT 358. The Sublime and the Ugly—(Enroll in ENGLISH 383.)
5 units, Spr (Gigante)

COMPLIT 359A. Philosophical Reading Group—(Enroll in FRENGEN 395, ITALGEN 395.)
1 unit, Aut, Win, Spr (Harrison)

COMPLIT 369. Introduction to Graduate Studies: Criticism as Profession—(Same as GERLIT 369.) Major texts of modern literary criticism in the context of professional scholarship today. Readings by critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vender, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative literatures, university structures, and career paths.
5 units, Aut (Berman)
COMPLIT 395. Research  
1-15 units, Aut, Win, Spr (Staff)

COMPLIT 396L. Pedagogy Seminar I  
(Same as ENGLISH 396L.)  
Required for first-year Ph.D. students in English, Modern Thought and Literature, and Comparative Literature (except for Comparative Literature students teaching in a foreign language). Preparation for surviving as teaching assistants in undergraduate literature courses. Focus is on leading discussions and grading papers.  
2 units, Aut (Lerer)

COMPLIT 399. Dissertation  
1-15 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS  
These courses are approved for the Comparative Literature major and taught overseas at the campus indicated. Students should discuss with their major advisers which courses would best meet individual needs. Descriptions are in the “Overseas Studies” section of this bulletin, or at the Overseas Studies Office, 126 Sweet Hall.

PARIS  
COMPLIT 150X. Gardens of Earthly Delight: Landscape, Culture, and Social Spaces in France  
(Same as ENGLISH 150X.)  
4 units, Spr (Saldívar)

COMPARATIVE STUDIES IN RACE AND ETHNICITY (CSRE)

Director: C. Matthew Snipp  
Curriculum Committee: Lawrence Bobo, David Palumbo-Liu, C. Matthew Snipp, Yvonne Yarbro-Bejarano, Steven Zipperstein  
Affiliated Faculty and Teaching Staff: David Abernethy (Political Science, emeritus), Lalita Ameriarian (Asian American Studies), Anthony Antonio (Education), Rick Banks (Law), Lucius Barker (Political Science, emeritus), Donald Barr (Human Biology), Joel Beinin (History), Lawrence Bobo (Sociology), Graciela Borsato (Chicana/o Studies), Michele Elam (English), Albert Camarillo (History), Darshan Elena Campos (Chicana/o Studies), Martin Carnoy (Education), Clayborne Carson (History), Gordon Chang (History), Karen Cook (Sociology), Irene Corso (Spanish and Portuguese), Larry Cuban (Education), Linda Darling-Hammond (Education), Carol Delaney (Cultural and Social Anthropology), Carolyn Duffy (Comparative Studies in Race and Ethnicity), Keila Diehl (Asian American Studies), Jennifer Eberhardt (Psychology), Paulla Ebron (Cultural and Social Anthropology), Penny Eckert (Linguistics), Arnold Eisen (Religious Studies), Harry Elam (Drama), Luis Fraga (Political Science), George Federickson (History, emeritus), Estelle Freedman (History), Claudine Gay (Political Science), Vera Grant (African and African American Studies), Akhil Gupta (Cultural and Social Anthropology), Estella Habal (Asian American Studies), Elizabeth Hansot (Political Science, emeritus), Miyako Inoue (Cultural and Social Anthropology), Gavin Jayes (English), Terry Karl (Political Science), Pamela Karlan (Law), Michael Kirt (Education), Matthew Kohrman (Cultural and Social Anthropology), Jan Krawitz (Communication), Teresa LaF romboise (Education), Herbert Leiderman (Psychiatry, emeritus), Yvonne Maldonado (Pediatrics), Purmina Manekar (Cultural and Social Anthropology), Hazel Markus (Psychology), Monica McDermott (Sociology), Raymond McDermott (Education), James Montoya (Comparative Studies in Race and Ethnicity), Cherríe Moraga (Drama), Marcyliena Morgan (Communication), Joanna Mountain (Anthropological Sciences), Paula Moya (English), Norman Naimark (History), Na’ilah Nasir (Education), Sharon Nelson-Beer (Native American Studies), Hilton Obenzinger (Undergraduate Research Programs), Susan Olzak (Sociology), Amado Padilla (Education), Jose Palafox (Chicana/o Studies), David Palumbo-Liu (Comparative Literature), Teresa Pellinen-Chavez (Comparative Studies in Race and Ethnicity), Jack Rakove (History), Arnold Rampersad (English), Robert Reich (Political Science), Ian Read (Comparative Studies in Race and Ethnicity), John Rickford (Linguistics), Cecilia Ridgeway (Sociology), Richard Roberts (History), Aron Rodrigue (History), Richard Rosa (Spanish and Portuguese), Michael Rosenfeld (Sociology), Ramón Saldívar (English), Joel Samoff (Center for African Studies), Stephen Sano (Music), Debra Satz (Philosophy), JoEllen Shively (Native American Studies), C. Matthew Snipp (Sociology), Paul Snidman (Political Science), Sandra Soo-Jin Lee (Cultural and Social Anthropology), Claude Steele (Psychology), James Steyer (Comparative Studies in Race and Ethnicity), Ewart Thomas (Psychology), Jeanne Tsai (Psychology), David Tyack (Education, emeritus), Guadalupe Valdés (Education, Spanish and Portuguese), Richard White (History), Michael Wilcox (Cultural and Social Anthropology), Joy Williamson (Education), Carolyn Wong (Political Science), Sylvia Yanagisako (Cultural and Social Anthropology), Yvonne Yarbro-Bejarano (Spanish and Portuguese), Bob Zajonc (Psychology), Steven Zipperstein (History)

Teaching Fellows: Rachael Joo, Frank Sampson, Victor Thompson

Email: mibarra@stanford.edu
Web Site: http://ccsre.stanford.edu
Courses given in CSRE have the subject code CSRE. For a complete list of subject codes, see Appendix.

UNDERGRADUATE PROGRAMS

MAJORS

CORE CURRICULUM

The Interdisciplinary Program in Comparative Studies in Race and Ethnicity (CSRE) provides students the opportunity to structure a major or minor in comparative ethnic studies or to focus their course work in a single ethnic studies area. Four majors and minors (Asian American Studies, Comparative Studies, Chicana/o Studies, and Native American Studies) are offered as part of CSRE. All courses taken for the major must be taken for a letter grade. In addition, majors in the Program in African and African American Studies and in the Program in Jewish Studies enroll in the core curriculum offered by CSRE. The directors of the programs and of each major constitute the CSRE curriculum committee, the policy making body for the interdisciplinary program.

Students who declare any of the five majors participate in a common curriculum of the CSRE consisting of at least two introductory core courses and a senior seminar. Individually designed majors in Jewish Studies may also enroll in the CSRE core curriculum.

There are two types of introductory, interdisciplinary core courses taught by senior CSRE-affiliated faculty: regular core courses that compare across racial and ethnic groups; and single-group core courses that focus on a specific racial or ethnic group.

MINORS

Students who wish to minor in the study areas must complete six courses (a minimum of 30 units) from the approved CSRE course list, two of which must be introductory core courses. Proposals for the minor must be approved by the director of each study area.

DIRECTED READING AND RESEARCH

Directed reading and research allows students to focus on a special topic of interest. In organizing a reading research plan, the student consults with the director of the major and one or more faculty members specializing in the area or discipline.

SENIOR SEMINAR

Research and the writing of the senior honors thesis or senior paper is under the supervision of a faculty project adviser. The seminar is offered in Autumn Quarter, and discussions take students through the process of research (conceptualization, development of prospectus, development of theses, research, analysis, and writing). This course meets the Writing in the Major requirement (WIM). Those who opt to write senior papers are organized into tutorial groups in Autumn Quarter. All CSRE-related students, even those who opt to write honors theses in other departments and programs, must enroll in CSRE 200X, Senior Seminar.

RELATED PROGRAMS

CSRE-related majors have several unique opportunities available to them. The program supports full-time paid summer internships for those who apply to work in a non-profit or government agency in a public policy-related area. The CSRE Public Policy/Leadership Institute is a two-week, pre-Autumn Quarter seminar that provides exposure to critical public policy issues and is taught by a leading faculty member. The residence-based institute provides room and board and all seminar materials for participants, including a visit to Sacramento to meet with policy makers. The CSRE program also sponsors quarterly career workshops and informal luncheons for all majors and minors.

HONORS

Majors in each of the study areas who meet academic qualifications (at least a grade point average of 3.5 in CSRE-related courses) may apply for admission. Majors are expected to participate in a Spring Quarter junior workshop in preparation for their honors thesis research. Prizes for the best undergraduate honors theses are awarded annually by the Curriculum Committee of CSRE.

AFRICAN AND AFRICAN AMERICAN STUDIES (AAAS)

Director: Lawrence Bobo

Since 1997-98, AAAS has been a CSRE-related major. For major and minor descriptions and requirements, see the “African and African American Studies” section of this bulletin.

ASIAN AMERICAN STUDIES

Director: David Palumbo-Liu

Asian American Studies (AAS) provides an interdisciplinary approach to understanding the historical and current experiences of persons of Asian ancestry in the United States. In using the term “Asian American,” the AAS faculty recognize that the term seeks to name a rapidly developing, complex, and heterogeneous population and that there is neither a single Asian American identity nor one community that comprises all Asian Americans. Asian Americans include those with ancestral ties to countries or regions in East Asia, South Asia, Southeast Asia, or the Philippines, among others.

AAS brings together courses that address the artistic, historical, humanistic, political, and social dimensions of Asian Americans and is an appropriate course of study for students interested in a variety of concerns related to Asian Americans, including: artistic and cultural contributions; current social significance; historical experiences; immigration, intellectual, and policy issues; relationships with other social groups; and the construction of the notion of Asian American as it addresses important theoretical and practical issues.

REQUIREMENTS

Asian American majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course that focuses on a non-Asian ethnic group may be counted toward the 15-unit core requirement.

Majors are required to take one foundational thematic course in Asian American Studies, such as COMPLIT 148, Introduction to Asian American Cultures. Majors must complete an additional 40 units of course work from an approved list. One course must have an international dimension, preferably a focus on Asia. Five additional courses must have an Asian American focus and must be selected from social science and humanistic departments. Majors must take two courses offering a comparative perspective on race and ethnicity. Students may obtain credit for their study of a related Asian language towards their degree. A total of 60 units of course work is required for the major.

Students who wish to minor in Asian American Studies must complete two core introductory courses and four additional courses related to the thematic concentration. A total of 30 units of approved course work are required for the minor.

CHICANA/O STUDIES

Director: Yvonne Ybarro-Bejarano

Chicana/o Studies is an interdisciplinary major focusing on the Mexican-origin population of the U.S., the second largest ethnic group in the nation. Students who major or minor in Chicana/o Studies have an opportunity to select from a courses in the humanities, social sciences, and courses offered by affiliated faculty in the School of Education.

REQUIREMENTS

Chicana/o Studies majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course that focuses on a non-Mexican origin group may be counted toward the 15-unit core requirement.
Majors are required to take ENGLISH 172A/HISTORY 162, Introduction to Chicana/o Life and Culture (not given 2005-06). Majors complete an additional 40 units of courses relevant to the thematic concentration and approved by the adviser. A total of 60 units of coursework are required for the major.

Students who wish to minor in Chicana/o Studies must complete two core introductory courses, including ENGLISH 172A/HISTORY 162, and four additional courses related to the thematic concentration. A total of 30 units of approved course work are required for each minor.

**COMPARATIVE STUDIES IN RACE AND ETHNICITY**

*Director: C. Matthew Snipp*

Comparative Studies in Race and Ethnicity, the largest of the five major/minors offered in the program, does not focus on a particular ethnic group. Rather, a student in consultation with the adviser designs a curriculum in relation to a thematic concentration that compares various ethnic groups or explores topics that cut across group experiences in the United States and elsewhere in the world. For example, students may compare groups within the U.S., or compare groups in the U.S. to ethnic groups elsewhere, or study the diaspora of a single group or the sovereignty of indigenous peoples within and across different national contexts. Students in this major are able to take advantage of courses in over 22 fields offered by the affiliated faculty of CSRE.

**REQUIREMENTS**

All CSRE-related majors enroll in the 15-unit CSRE core curriculum, which consists of two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course may be counted toward the 15-unit core requirement.

Comparative Studies majors complete another 45 units of course work relevant to the thematic concentration they have chosen in consultation with the adviser.

Students who wish to minor in Comparative Studies must complete six courses (a minimum of 30 units) from the approved course list.

**TAUBE CENTER FOR JEWISH STUDIES**

*Directors: Aron Rodrigue, Steven Zipperstein*

Jewish Studies is an affiliated program of CSRE. For program and course descriptions, see the “Jewish Studies” section of this bulletin.

**NATIVE AMERICAN STUDIES**

*Director: C. Matthew Snipp*

Native American Studies provides an intensive approach to understanding the historical and contemporary experiences of Native American people. Attention is paid not only to the special relationship between tribes and the federal government, but to issues across national boundaries, including tribal nations within Canada, and North, Central, and South America. In using the term “Native American,” the NAS faculty recognize the heterogeneous nature of this population. Native Americans include the Alaska Native population, which comprises Aleuts, Eskimo, and other Native American people residing in Alaska.

The purpose of the Native American Studies major and minor is to introduce students to approaches in the academic study of Native American people, history, and culture. Students who major in Native American Studies have the opportunity of doing advanced work in related fields, including literature, sociology, education, and law. In addition to specialized course work on Native American issues, students also are expected to concentrate in a traditional discipline such as anthropology, history, or psychology to ensure a well rounded educational experience. The area of concentration and related course work should be selected in consultation with a faculty adviser in Native American Studies. All courses in the program promote the discussion of how academic knowledge about Native Americans relates to the historical and contemporary experiences of Native American people and communities.

**REQUIREMENTS**

Native American Studies must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course that focuses on a non-Native American group may be counted toward the 15-unit core requirement.

Majors complete an additional 45 units of course work that satisfy three categories of their thematic concentration: Native American focus, comparative focus, and a methodology/research course. A total of 60 units of coursework are required for the major.

Students who wish to minor in Native American Studies must complete two core introductory courses and four additional courses related to the thematic concentration. A total of 30 units of approved course work are required for the minor.

COMPARATIVE STUDIES IN RACE AND ETHNICITY

3 units, Win (Pellinen-Chavez)

CSRE 192. Race and Slavery in Brazil and the United States—Did race motivate enslavement or was racial profiling a product of slavery? Brazilian or American slavery and what it means to be a person of color in these countries today. Love, hatred, and endurance in divided societies. Sources include historical narratives, literature, film, music and iconography.
5 units, Win (Read)

CSRE 199. Pre-Honors Seminar—For students interested in writing a senior honors thesis. Conceptualizing and defining a manageable honors project, conducting interdisciplinary research, the parameters of a literature review essay, and how to identify a faculty adviser.
1 unit, Spr (Thompson)

CSRE 200R. Directed Research
1-5 units, Aut, Win, Spr (Staff)

CSRE 200W. Directed Reading
1-5 units, Aut, Win, Spr (Staff)

CSRE 200Y. CSRE Senior Honors Research
1-10 units, Win (Thompson, Snipp)

CSRE 200Z. CSRE Senior Honors Research
1-10 units, Spr (Thompson, Snipp)

CSRE 203A. The Changing Face of America: Civil Rights and Education Strategies for the 21st Century—For students with leadership potential who have studied these topics in lecture format. Race discrimination strategies, their relation to education reform initiatives, and the role of media in shaping racial attitudes in the U.S.
5 units, Spr (Montoya, Steyer)

NATIVE AMERICAN STUDIES

NATIVEAM 115B. Native American History Since 1934—(Same as CSRE 115B.) The Indian Reorganization Act, urbanization, federal government policies, the American Indian Movement and activist era of the 60s and 70s, religious freedom, economic development, and Indian gaming. Emphasis is on native sovereignty.
5 units, Spr (Staff)

NATIVEAM 116. Language, Culture, and Education in Native North America—(Same as CSRE 116.) Communication and language in crosscultural education, including literacy and interethenic communication in relation to native classrooms in the mainland U.S., Alaska, and nations and territories of the Pacific. Focus is on implications of social, cultural, and linguistic diversity for educational practice in bridging intercultural differences between schools and native communities.
GER:DB-SocSci
5 units, Win (Nelson-Barber)

NATIVEAM 117A. Diversity in Contemporary American Indian Cultures and Communities—(Same as CSRE 117A.) 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. GER:DB-SocSci
5 units (Shively) not given 2005-06

NATIVEAM 119S. History of Indian Education—(Same as CSRE 119S.) How the federal government placed education at the center of its Indian policy in second half of 19th century, subjecting Native Americans to programs designed to erase native cultures. American Indian responses to those programs. Topics include traditional Indian education, role of religious groups, Meriam Report, Navajo-Hopi Rehabilitation Act, Johnson-O’Malley Act, and public schools.
5 units, Aut (Shively)

NATIVEAM 200R. Directed Research
1-5 units, Aut, Win, Spr (Staff)

NATIVEAM 200W. Directed Reading

*recalled to active duty

Courses given in Cultural and Social Anthropology have the subject code CASA. For a complete list of subject codes, see Appendix.

The courses offered by this department are designed to: (1) provide undergraduates with instruction in cultural and social anthropology; (2) provide undergraduate majors in anthropology with a program of work leading to the bachelor’s degree; and (3) prepare candidates for advanced degrees in cultural and social anthropology.

Cultural and social anthropology addresses a wide range of issues in the comparative study of society and culture. These include issues of race, class, national origin, gender, sexual orientation, and religion as they are shaped by the experiences of education, history, and migration through which people in past and contemporary societies have defined themselves in relation to others. The scope of cultural and social anthropology includes our own society and culture as well as those of other parts of the world, especially as these are drawn together and shape one another in increasingly transnational and global interactions.

The Department of Cultural and Social Anthropology offers a wide range of approaches to the various subfields and topics within anthropology including: archaeology, environmental anthropology, linguistics, medical anthropology, political economy, science and technology studies, and sociocultural anthropology. Methodologies for the study of micro- and macro-social processes are taught through the use of qualitative and quantitative approaches. Training is offered in ethnographic research; the collection and interpretation of oral histories, surveys, and archival materials; the analysis of material culture, including mapping, cataloguing, and interpretation of material objects; and methodologies in the performative arts, including visual and performing studies. The department provides students with excellent training in theory and methods to enable them to pursue graduate study in any of the above mentioned subfields of anthropology. Students interested in the biological and evolutionary approaches to anthropology are urged to consult the Department of Anthropological Sciences.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Department of Cultural and Social Anthropology (CASA) offers a B.A. degree in Cultural and Social Anthropology and an honors program. The major provides students with expertise for understanding social and cultural transformations from an international and cross-cultural perspective. In addition to gaining an excellent foundation for graduate research and study, students majoring in Cultural and Social Anthropology can pursue careers in government, international business, international development agencies, international education, law, mass media, non-profit organizations, and public policy.

Within the major, students may include course offerings in other departments such as Anthropological Sciences, Classics, Economics, English, History, Political Science, Psychology, and Sociology, as well as course offerings in programs such as African Studies, American Studies, Archaeology, Comparative Studies in Race and Ethnicity, East Asian Studies, Feminist Studies, Latin American Studies, Public Policy, and Urban Studies.

To declare a major in Cultural and Social Anthropology, students should contact the department’s student peer adviser or student program coordinator. The department checklist for the major can be downloaded in .pdf format from http://www.stanford.edu/dept/anthroCASA/programs/undergrad.html. The checklist must be signed by the CASA faculty program adviser for the major. Submit the checklist to the student program coordinator and apply for the major in AXESS.

All undergraduate majors in Cultural and Social Anthropology (CASA) must fulfill the following requirements:

1. A program of 65 units, with at least 40 units in Cultural and Social Anthropology. The remaining 25 units may be taken from courses in related departments, including Anthropological Sciences, or transferred from other anthropological study programs, such as overseas programs. The 65 units must form a coherent program of study and be approved by the student’s faculty adviser.

2. A grade of ‘B-’ or better in CASA 90, Theory in Cultural and Social Anthropology. This course is required of all CASA majors and should be taken within a year of declaring the major or before the end of the junior year. It introduces students to anthropological theory and prepares them for upper-division courses in the department.

3. The units required for the CASA major must include at least one course from four of the six topical categories listed below:
   a) Archaeology
   b) Gender and Feminism
   c) Globalization and Transnationalism
   d) Linguistic and Symbolic Anthropology
   e) Race and Ethnicity
   f) Science, Technology, or Medicine

4. Students must choose a concentration, taking at least 15 units in three or more courses on one theme or topic. Concentrations can be defined by subject matter or cultural area. Some examples of themes for a concentration are: cultural studies, economic development, kinship, mass media, material culture, migration and immigration, political economy, popular culture, race and ethnicity, religion, urban cultures, or a particular culture area, that is, Japan, Europe, South Asia. Students must have areas of concentration approved by their advisers.

5. A minimum of 15 units must be in CASA seminars numbered 100 or above.

6. Competence in a foreign language beyond the first-year level. Such competence is usually demonstrated by completing a 5 unit course at the second-year level with a grade of "B-" or better. The requirement may be met by special examination administered through the Language Center.

7. 10 units from IHUM 27A,B (Introduction to the Humanities) may be counted towards the major. Students whose programs require non-English language study as part of a geographical or linguistics focus may ask their faculty adviser to approve up to 5 units from language courses toward the degree if such courses are at the second-year level and above, or are in a second non-English language. No more than 10
in the department. Students must initiate their participation in the senior paper program by filing an application of intent with the student program coordinator. The application must include a description of the proposed project, a program of study, and a letter of approval from a faculty sponsor. Students are encouraged to apply to the senior paper program in their junior year prior to initiating fieldwork or other research. The senior paper application of intent must be submitted no later than the second week of Autumn Quarter in the senior year.

All CASA majors are encouraged to write a senior paper. Majors should begin research for a senior paper during their junior year with guidance from their CASA faculty adviser. At the latest, department majors must submit an application of intent to write a senior paper to the student program coordinator no later than the end of the second week of Autumn Quarter in the senior year. Enrollment in CASA 95A, Research in Anthropology, is recommended during Autumn and Winter quarters. The Senior Paper Checklist must be completed, signed by the program adviser, and handed in to the student program coordinator by the end of the second week in Autumn Quarter in the senior year. Students must enroll in CASA 95B, Senior Paper, in the final quarter in the undergraduate degree program before graduating. The senior paper is submitted in the final quarter before graduation. For more information, see the student program coordinator.

All CASA majors are encouraged to write an honors paper. Majors should begin research for an honors paper prior to the last quarter of the junior year with guidance from their CASA faculty adviser. At the latest, department majors must submit an application of intent to write an honors paper to the student program coordinator no later than the end of Spring Quarter (or the third quarter) in the junior year. Department majors are eligible to apply for honors candidacy with a 3.5 GPA in the department major and a 3.0 GPA in overall course work. Enrollment in CASA 95A, Research in Anthropology, is recommended during Autumn and Winter quarters. The Honors Checklist and Timeline must be completed, signed by the program adviser, and handed in to the student program coordinator by the end of the second week in Autumn Quarter in the senior year. Students must enroll in CASA 95B, Senior Paper, in the final quarter in the undergraduate degree program before graduating. A senior paper to be considered for departmental honors is submitted in the final quarter before graduation. Senior papers with a letter grade of ‘A-‘ or better may be awarded departmental honors. For more information, see the student program coordinator.

GRADUATE PROGRAMS

University requirements for the degrees of Master of Arts and Doctor of Philosophy are described in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS

The Department of Cultural and Social Anthropology offers the M.A. degree to four groups of students: (1) Stanford undergraduates who enroll in the coterminal program; (2) Stanford graduate students taking advanced degrees in other departments or schools at Stanford who enroll in the terminal M.A. program; (3) Ph.D. students in Cultural and Social Anthropology who fulfill the M.A. requirements on the way to the Ph.D. degree; and (4) students who apply from outside Stanford for entry into the terminal M.A. program.

Applicants whose ultimate goal is the Ph.D. degree should apply directly to the Ph.D. program. Students accepted for the terminal M.A. degree program cannot transfer to the Ph.D. program; they must reapply on the same basis as other Ph.D. applicants and in competition with other Ph.D. applicants. Ph.D. students who decide to take the M.A. on the way to the Ph.D. are governed by separate requirements described in the department’s Guide to the Ph.D. Program.

COTERMINAL B.A./M.A. PROGRAM

The deadline for graduate applications to the coterminal M.A. degree program is March 14, 2006. Prospective applicants should refer to the department’s web site for information about application for graduate admission. Successful applicants for the M.A. program usually enter in
Autumn Quarter. Applicants must submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level. Applicants should also submit three letters of reference, recent original transcripts, and a statement of purpose.

The department prerequisite requirements for application to the coterminal M.A. program are listed below. Stanford undergraduates who are currently enrolled and interested in making a coterminal M.A. application to the department’s graduate M.A. degree program are required to enroll in CASA 90, Theory in Cultural and Social Anthropology, and in a minimum of 10 additional units of CASA course work with a grade of ‘A-’ or better. An overall undergraduate GPA of 3.3 (B+) or better is also required.

Graduate enrollment at Stanford for at least three quarters of full tuition for a minimum of 45 units is required of all candidates for the master’s degree, including coterminal students. Coterminal M.A. students in Cultural and Social Anthropology must take a minimum of 45 quarter units in social and cultural anthropology course work beyond the undergraduate degree with a grade point average (GPA) of 3.0 (B) or better. 45 units constitute the University minimum for the M.A. degree. However, the department requires 60 units of course work towards the coterminal M.A. degree. Of the required 60 units, 15 units may be accepted from previous undergraduate or other course work. Course work must be at or above the 100-level. 18 of the 45 units required from Cultural and Social Anthropology course work must be in courses designated primarily for graduate students (typically at least at the 200 level). Course work applied to the coterminal M.A. degree may not also be applied to the requirements for the undergraduate degree, or any other degree program.

Within the 45 units taken at Stanford, students must take CASA 290, History and Theory in Cultural and Social Anthropology or, if not given, CASA 301, History of Anthropological Theory, and two additional graduate-level seminars in the department. The remaining units may be made up of courses selected in consultation with the faculty adviser to meet the needs and interests of the student.

The coterminal program may require more than one year of study. However, full-time students entering the program with appropriate background can complete the coterminal program in one calendar year. To provide a meaningful M.A. program within a one-year period, advance planning of course work with an adviser is required. A field or library research paper, read and approved by at least two departmental faculty members, must be presented. Coterminal students must submit an acceptable project/paper proposal for the master’s paper to the faculty adviser for approval no later than the end of the fourth week in the first quarter of the graduate degree program. In addition, an acceptable Master’s Degree Program Proposal must be submitted no later than the end of the fourth week in the first quarter of the graduate degree program. Terminal M.A. students must submit an acceptable project/paper proposal for the master’s paper to their faculty adviser for approval no later than the end of the fourth week in the final quarter during which they will submit the M.A. paper.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

TERMINAL MASTER’S DEGREE PROGRAM

The deadline for graduate applications to the terminal M.A. degree program is March 14, 2006. Prospective applicants should refer to the department web site for information about application for graduate admission. Successful applicants for the M.A. program may enter only in Autumn Quarter. It is department policy not to defer graduate admission. Applicants must file a report of their Graduate Record Examination score electronically, and submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level. Applicants should also submit three letters of reference, recent original transcripts, and a statement of purpose. In addition to a clear statement of research interests in the statement of purpose, it is especially important for those applicants who choose the Archaeology track to provide a detailed description of the area of specialization as well as the topical interests for dissertation research.

The Ph.D. program includes a number of required courses and examinations. It also allows the student to develop a flexible program reflecting special interests, under the supervision of a faculty committee chosen by the student. Students are encouraged to plan for completion of all work for the Ph.D. in five years.

The Ph.D. requirements for students who matriculate beginning 2005-06 are as follows (those matriculating earlier should consult the department’s Ph.D. Handbook for their entering cohort year). Ph.D. students in Cultural and Social Anthropology must take a minimum of 135 quarter units with a minimum grade point average (GPA) of 3.0 (B). The maximum allowable number of transfer units is 45.
1. Pass within the first year, with a grade of ‘B+’ or better:
   a) at least three of the graduate-level courses in the department designated by the faculty as theory/evaluation courses, including CASA 301, History of Anthropological Theory, during Autumn Quarter; CASA 300, Reading Theory Through Ethnography (Anthropology track only), or CASA 373, Introduction to Archaeological Theory (Archaeology track only), during Winter Quarter.
   b) CASA 302, Anthropological Research Methods (Anthropology track only), or CASA 360, Archaeological Methods and Research Design (Archaeology track only) during Spring Quarter; or for the Archaeology track, a primary-level methods survey or advanced-level methods course relevant to research interests.
   c) for the Archaeology track: a course, to be decided on in consultation with the faculty adviser, that satisfies the department specialization requirement in a topical interest required of graduate Ph.D. students. Although, it is suggested that the topical interest course requirement be completed during the first year in the Ph.D. degree program, it may also be completed at any time until the end of the third year.
   d) at least 45 units of completed course work overall.

2. Satisfy the department ethics requirement by attending a special session of CASA 302, usually announced at the first class meeting, for a review of ethics in Cultural and Social Anthropology.

3. Submit an acceptable, substantial research paper in Spring Quarter. Enroll in CASA 395A, First-Year Paper, during Winter Quarter for 2-3 units, and enroll in CASA 395B, First-Year Paper, during Spring Quarter for 2-3 units (no more than 5 units total for both courses over two quarters).

4. In the second year, pass at a satisfactory level:
   a) additional graduate-level theory/evaluation courses in the department for a total of six such courses with a grade of ‘B+’ or better over the first two years of the program.
   b) CASA 394, Proposal Writing Seminar (offered Spring Quarter).
   c) CASA 310, Intersections (offered Winter Quarter in 2005-06). This course requirement is usually completed during the second year in the Ph.D. program, but it may also be completed by the end of the third year.
   d) at least 40 units of completed course work overall for a total of at least 85 units of course work by the end of the second year.

5. At the beginning of Autumn Quarter in the second year, attend the teaching assistantship training workshop.

6. Serve as a teaching assistant for one quarter in the second year.

7. By the first week of Autumn Quarter in the second year, recruit two of four qualifying paper committee members for the first qualifying paper on either topic or area.

8. By the end of the fourth week of Autumn Quarter in the second year, declare and submit the title and preliminary bibliography for the first of two qualifying papers on either topic or area. During Autumn Quarter, enroll in CASA 391A, Qualifying Paper (Area), or CASA 360, Archaeological Methods and Research Design (Archaeology track only), or CASA 373, Introduction to Archaeological Theory (Archaeology track only), during Winter Quarter.

9. By the first day of finals week in Winter Quarter in the second year, submit the first of two qualifying papers on either topic or area. During Winter Quarter, enroll in CASA 391A, Qualifying Paper (Topic), or CASA 391B, Qualifying Paper (Area).

10. For those whose native language is English, pass, by the end of Spring Quarter of the second year, an examination in a language other than English in which there is a substantial body of general theoretical literature relevant to anthropology. For those whose native language is not English, demonstrate satisfactory command of English, as evidenced by successful completion of the first two years of graduate study. The examination may be taken through the Stanford Language Center, other Stanford language departments, or by appointment with the department’s language coordinator. The examination format must be approved in advance of the examination by the department’s language coordinator.

11. During Spring Quarter, enroll in CASA 394, Proposal Writing Seminar.

12. Upon completion of the above requirements, and upon recommendation of the CASA faculty, petition the University for candidacy by the end of Spring Quarter of the second year.

13. Upon completion of the above requirements, and upon recommendation of the Cultural and Social Anthropology faculty, request the Master’s Degree on the way to the Ph.D. degree program by the end of Spring Quarter of the second year.

14. In the third year, complete the following:
   a) during the Autumn Quarter, by December 9, 2005, submit three dissertation research grant proposals, including the approved dissertation proposal, the grant application, and the approved non-medical human subjects protocol, to the faculty adviser.
   b) by the first week in Autumn Quarter in the third year, recruit the remaining two of four qualifying paper committee members for the second qualifying paper on either topic or area.
   c) by the end of the fourth week of Autumn Quarter in the third year, declare and submit the title and preliminary bibliography for the second of two qualifying papers on either topic or area. During Autumn Quarter, enroll in CASA 397, Directed Individual Study, in preparation for the second Qualifying Paper due at the end of Winter Quarter in the third year.
   d) by the first day of finals week in Autumn Quarter, in the third year, provide a statement to the Committee on Higher Degrees declaring the date planned for the oral examination and submit declaration of the oral examination committee, inclusive of the external committee chair, the committee adviser, and the three committee members to the student program coordinator.
   e) by the last day of finals week in Winter Quarter in the third year, submit the second of two qualifying papers on either topic or area. During Winter Quarter, enroll in CASA 391A, Qualifying Paper (Topic), or CASA 391B, Qualifying Paper (Area).
   f) by the end of the fourth week in Spring Quarter, schedule and pass the University oral examination in the form of a dissertation proposal defense. During this exam, file the dissertation reading committee form and confirm the committee’s revisions to the dissertation proposal for fieldwork and dissertation research. Secure approval for the revised dissertation proposal before leaving for dissertation fieldwork.

15. In the fifth year, complete the following requirements:
   a) during the fifth year and after returning from fieldwork, complete one or more teaching assistant quarters in the department. During each of Autumn, Winter and Spring quarters of the fifth year, students must attend a minimum of four of five class meetings of CASA 392, Dissertation Writers Seminar. Each quarter, chapter drafts of the dissertation should be handed in to the dissertation reading committee for review.
   b) after submission of the penultimate draft of the dissertation and before the quarter preceding the quarter in which the dissertation will be submitted for Ph.D. degree, schedule and deliver an oral presentation of the dissertation in the department.

**PH.D. MINOR**

Prospective Ph.D. minors in Cultural and Social Anthropology should request an application from the student program coordinator. The requirements for a minor in Cultural and Social Anthropology consist of the following:

1. Complete 30 units of courses in the Department of Cultural and Social Anthropology (CASA) at Stanford with a grade point average (GPA) of 3.0 or better. Course work for a minor cannot also be used to meet requirements for a master’s degree.

2. Enlist a faculty member within CASA at Stanford who will provide written consent to serve as the adviser for the minor and serve on the student’s oral examination and dissertation committees (see the student program coordinator for a listing of faculty and office hours).

3. In conjunction with the program adviser, determine a coherent course of study related to the Ph.D. program, including CASA 301, History of Anthropological Theory, two additional CASA theory courses, and one CASA course in a geographical area. For a list of current theory courses, see the student program coordinator.
4. File the necessary paperwork with the student program coordinator.
   Please note that the department requirements, listed above, are more extensive than the University requirements.

FINANCIAL SUPPORT

The department endeavors to provide needed financial support (through fellowships, teaching and research assistantships, and tuition grants) to all students admitted to the Ph.D. program who maintain satisfactory degree progress. Applicants for the Ph.D. program must file a request for financial aid when applying to the program if they wish to be considered for support. Second-year students in the Ph.D. program are required to perform one teaching assistantship quarter. Second-year students who have not secured funding for the second year summer of pre-dissertation field research are advised to make at least two pre-dissertation field research funding applications for summer support. Third-year students in the Ph.D. program who have not secured outside funding are required to make at least three extramural applications for dissertation research funding by the end of Autumn Quarter of the third year. Fourth-year students must submit a department application for funding as a predoctoral research affiliate before leaving for fieldwork. Fifth-year students in the Ph.D. program may be required to perform one or more teaching assistantship quarters. Fifth-year students in the Ph.D. program who have not secured extramural funding for the sixth year and beyond are advised to make at least two dissertation write-up funding applications and secure extramural funding for dissertation write-up from the sixth year and beyond.

In order to be eligible for department funding of summer fieldwork and research, usually taken in either the first or second-year and again in the third-year of the Ph.D. degree program, first- through fifth-year students must submit the department’s application establishing eligibility for summer funding.

No financial support is available to students enrolled for the M.A. degree.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, consult the “School of Education” section of this bulletin or address the inquiry to the Credential Administrator, School of Education.

COURSES

Undergraduates register in courses numbered in the 100s or below. Graduate students register in courses numbered in the 200s or above.

WIM indicates that the course satisfies the writing in the major requirement.

UNDERGRADUATE

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Cultural and Social Anthropology department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER: IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective Cultural and Social Anthropology majors are advised to consider satisfying their GER: IHUM 2,3 requirements by registering for the following IHUM courses.

IHUM 27A, B. Encounters and Identities — Two quarter sequence. The formation of ideas about individual and collective identities in S. Africa, W. Europe, and the U.S. Contemporary ideas about identity, including national, racial, ethnic, and gender identity; historical encounters and social transformations linking these areas. Challenging popular assumptions about the origins of identities through similarities and differences among ideas of individual and collective identity in different regions of the world. GER: IHUM 2,3

IHUM 27A. 5 units, Win (Ferguson)
IHUM 27B. 5 units, Spr (J. Collier)
CASA 88. Theories in Race and Ethnicity — Concepts and theories of race and ethnicity in the social sciences and cultural studies. U.S. based definitions, ideas, and problems of race and ethnicity are compared to those that have emerged in other areas of the world. GER:DB-SocSci
5 units, Aut (Yanagisako)

CASA 90. Theory of Cultural and Social Anthropology — Preference to CASA majors. Anthropological interpretations of other societies contain assumptions about Western societies. How underlying assumptions and implicit categories have influenced the presentation of data in major anthropological monographs. Emphasis is on Karl Marx, Emile Durkheim, Max Weber, and anthropological analyses of non-Western societies. WIM
5 units, Win (Ebron)

CASA 92. Undergraduate Research Proposal Writing Workshop — Practicum. Students develop independent research projects and write research proposals. How to formulate a research question; how to integrate theory and field site; and step-by-step proposal writing.
1-3 units, Win, Spr (Lee)

CASA 93. Prefield Research Seminar — For CASA majors only; non-majors register for 93B. Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnography, and the use of documentary materials. Strategies for successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork. Prerequisites: two CASA courses or consent of instructor.
5 units, Spr (Yanagisako)

CASA 93B. Prefield Research Seminar: Non-Majors — Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnography, and the use of documentary materials. Strategies for successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork. Prerequisites: two CASA courses or consent of instructor.
5 units, Spr (Costanzo Kapur)

CASA 94. Postfield Research Seminar — Goal is to produce an ethnographic report based on original field research gathered during summer fieldwork, emphasizing writing and revising as steps in analysis and composition. Students critique classmates’ work and revise their own writing in light of others’ comments. Ethical issues in fieldwork and ethnographic writing, setting research write-up concerns within broader contexts.
5 units, Aut (Romain)

CASA 94B. Postfield Research Seminar: Non-Majors — Goal is to produce an ethnographic report based on original field research. Student critiques. Ethical issues in fieldwork and ethnographic writing, Research writing concerns within broader contexts.
5 units (Staff) not given 2005-06

CASA 95A. Research in Anthropology — Independent research conducted under faculty supervision, normally taken junior or senior year in pursuit of a senior paper or an honors project. May be taken more than one quarter for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

CASA 95B. Senior Paper — Taken in the final quarter before graduation. Independent study and work on senior paper for students admitted to the program. Prerequisite: consent of program adviser and instructor.
1-10 units, Aut, Win, Spr, Sum (Staff)

CASA 96. Directed Individual Study — For undergraduate students with special needs, and showing the capacity to do independent work. Prerequisite: consent of instructor.
1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 103/203. Laboratory Methods in Archaeology — What do archaeologists do with the things they dig up, and how can they use artifacts to learn about past cultures? Hands-on experience cataloging, analyzing, and interpreting an archaeological collection. Students are exposed to standard methods in cataloging and curation, and in analysis of different types of artifacts, animal bone, and botanical remains. Individual or group analysis projects with reports that communicate the research findings. GER:DB-SocSci
5 units (Voss) not given 2005-06

CASA 108. History of Archaeological Thought — (Same as ARCHLGY 103.) Introduction to the history of archaeology and the forms that the discipline takes today, emphasizing developments and debates over the past five decades. Historical overview of culture, historical, processual and post-processual archaeology, and topics that illustrate the differences and similarities in these theoretical approaches.
5 units, Spr (Meskell)

CASA 150. Archaeological Methods — Methodological issues related to the investigation of archaeological sites and objects. Aims and techniques of archaeologists including: location and excavation of sites; dating of places and objects; analysis of artifacts and technology and the study of ancient people, plants, and animals. How these methods are employed to answer the discipline’s larger research questions.
5 units, Aut (Carter)

CASA 190/290. History and Theory in Cultural and Social Anthropology — Goal is to place anthropology in historical and national contexts and treat theoretical and methodological issues that inform contemporary theory and practices. Readings include Marx, Weber, Durkheim, and anthropological analysis of non-Western societies. 190 is limited to undergraduate non-CASA majors; 290 is limited to CASA undergraduate majors and master’s students. GER:DB-SocSci
5 units (Staff) not given 2005-06

CASA 199/299. Senior and Master’s Thesis Writing Workshop — Techniques of interpreting data, organizing bibliographic materials, writing, editing and revising. Preparation of papers for conferences and publications in anthropology. Seniors register for 199; master’s students register for 299.
2 units (Staff) not given 2005-06

GENERAL

AREA COURSES

5 units (Freidenfelds) not given 2005-06

CASA 72. Dance and Culture in Latin America — (Enroll in DANCE 168.)
4 units, Spr (Cashion)

CASA 74. South Asian Histories and Cultures through Popular Film: Bollywood and Beyond — Indian cinema has been a site for the articulation of ideas about nation, class, caste, gender and sexuality, community, and diaspora. Focus is on Bollywood films, and Indian cinema in general, as social, cultural, and political phenomena. How cinematic form, production and distribution networks, and audience reception mediate the emergence of postcolonial forms of identity and consciousness. Film screenings. GER:DB-SocSci, EC-GlobalCom
5 units (Mankekar) not given 2005-06

5 units, Win (Inoue)
CAS 107. Globalization of the Middle East — How processes of globalization contribute to the making of the modern Middle East. Transcending stereotypes about the Middle East to focus on historical, social, cultural, political, and economic diversities.

5 units, Aut (Dinc)

CAS 109. Anthropology in and of Mexico — The common origins of and tensions between Anglo American anthropology and the autochthonous anthropological tradition that emerged in Mexico during the 1910 Revolution.

5 units, Win (Armstrong-Fumero)

CAS 110. Crosscultural Perspectives on Women in Islam — The lives of contemporary Muslim women and constructions of gender in the Islamic world. Issues such as the veil, roles within the family, and feminist activism. Can Western categories be applied to women’s issues in the Muslim world? Is there a Muslim feminism?

5 units, Spr (Ameeriar)

CAS 127. Tibetan Ritual Life — (Same as RELIGST 217A.) The human life cycle, the calendar year, and pilgrimage as organizing principles to examine Buddhist and lay rituals that mark important occasions, bless people and places, ward off danger, heal wounds, alleviate suffering, predict the future, affirm Tibetan identity, and inspire political activism. Material culture of rituals including butter sculpture, thangka painting, and costumes; performance including monastic dance, chanting, instrumental music, song, and opera; and the meanings of rituals to those who participate in them. The role of ritual in human culture. GER:DB-Hum, EC-GlobalCom

5 units (Diehl) not given 2005-06

CAS 128. Cultural History of Japan — (Same as ANTHSCI 24/228.) Since WWII. Transformation of religion, kinship, gender, education, work, leisure, ideology, and national identity as interconnected institutions. Tokugawa and prewar Japan as antecedents to postwar developments.

GER:DB-SocSci

5-5 units (Befu) not given 2005-06

CAS 128B. Globalization and Japan — (Same as ANTHSCI 128B/228B.) Globalization theories in anthropology and sociology, and Japan in the context of these theories. Ethnographic cases of Japan’s global presence from the 15th century to the present. Processes of globalization in business management, popular culture, and expatriate communities. Japan’s multiculturalization through its domestic globalization. GER: DB-Hum, EC-GlobalCom

3-5 units, Spr (Befu)

CAS 141. Tibetan Buddhism and Culture in Exile — (Same as RELIGST 144D.) Coincides with the visit of the Dalai Lama to Stanford. The practice and meaning of formal Buddhist and lay rituals in exile; how traditionalbeliefs and practices have been reworked to meet the spiritual needs and material circumstances of Tibetan refugees. The role of the Dalai Lama in Tibetan religious and political life emphasizing the current Dalai Lama. Efforts at cultural preservation in India and the U.S., the hybrid expressive culture of refugee youth, political activism, and challenges of building and maintaining a diasporic community. Field trips to Bay Area Tibetan events; field work with local Tibetan refugees. GER:DB-Hum

5 units, Aut (Diehl)

CAS 148. The Zapatista Rebellion in Chiapas and New Indigenous Movements — How the Maya Indians of Chiapas have protagonized movements for indigenous rights and autonomy in the Americas. The rebellion in terms of its cultural, political, and economic background shaped by the Mexican context of globalization. Its relationship to indigenous movements in the Americas. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Collier)

CAS 171. Mythology, Folklore, and Oral Literature of Central Asia — Central Asian cults, myths, and beliefs from ancient time to modernity. Life crisis rites, magic ceremonies, songs, tales, narratives, taboos associated with childbirth, marriage, folk medicine, and calendrical transitions. The nature and the place of the shaman in the region. Sources include music from the fieldwork of the instructor and the Kyrgyz epoch Manas. The cultural universe of Central Asian peoples as a symbol of their modern outlook. GER:DB-SocSci

3-5 units (Kunanbaeva) not given 2005-06

CAS 184A. Asian Diasporas in America and Canada: Culture, History, Place — (Enroll in ASNAMST 184A, CSRE 184A.)

5 units, Win (Ameeriar)

TOPIC COURSES

CAS 82/282. Medical Anthropology — Emphasis is on how health, illness, and healing are understood, experienced, and constructed in social, cultural, and historical contexts. Topics: biopower and body politics, gender and reproductive technologies, illness experiences, medical diversity, and social suffering and the interface between medicine and science. GER:DB-SocSci, EC-GlobalCom

4-5 units, Spr (Choby)

CAS 111X. Introduction to Language Change — (Enroll in ANTHSCI 110, LINGUIST 160.)

4-5 units, Win (Kiparsky)

CAS 114. The Crusades and Their Legacies — Interdisciplinary. How Pope Urban II helped inaugurate and define an East/West dichotomy which still echoes discursively and literally today. The production of the divisions between East and West in the Crusade era, as seen by Europeans and Middle Easterners; current legacies of such divisions.

5 units, Spr (Duffey)

CAS 120X. Introduction to Queer Studies — (Enroll in FEMST 120.)

4-5 units, Win (Phelan)

5 units, Spr (Amouroux)

CAS 131. Archaeology and Anthropology of Visual Culture — Archaeological and anthropological inquiry into visual images and aspects of cultures.

5 units, Staff not given 2005-06

CAS 132. Science, Technology, and Gender — Why is engineering often seen as a masculine profession? What have women’s experiences been in entering fields of science and technology? How has gender been defined by scientists? Issues: the struggles of women in science to negotiate misogyny and cultural expectation (marriage, children), reproductive issues (surrogate motherhood, visual representations of the fetus, fetal surgery, breast feeding, childbirth practices), how the household became a site of consumerism and technology, and the cultural issues at stake as women join the ranks of scientists. GER:DB-SocSci, EC-Gender

3-5 units (Jain) not given 2005-06

CAS 133. City and Sounds — (Same as URBANST 133.) How do people experience modern cities and urban public cultures through auditory channels? How does sound mediate and constitute urban space? How to listen to and write about culture through sound. Students carry
out narrative interviews and sound fieldwork in the Bay Area. Readings include urban anthropology, semiotics, art history, social studies of science and technology, media studies, and musicology.

5 units (Inoue) not given 2005-06

CASA 135X. Pilgrimage and Sacred Landscapes — (Same as RELIGST 235.) Perspectives include cultural, spiritual, psychological, medical, economic, and political. Christianity, Buddhism, Hinduism, Islam, Native American and secular; sources include Europe, Tibet, India, Native America, and the Middle East. Why do pilgrims often make their journeys as difficult and painful as possible? How do landscapes become sacred? What happens when places such as Jerusalem are intersections for groups with different belief systems? Contemporary U.S. destinations such as Graceland and the Vietnam Memorial; journeys of personal or non-parochial cultural significance. GER:DB-SocSci

5 units (Diehl) not given 2005-06

5 units (Voss) not given 2005-06

CASA 146A. Language and Gender — (Enroll in LINGUIST 156.)

4 units, Win (Eckert)

CASA 158X. Culture and Learning — (Same as EDUC 287.) Learning in institutional settings in the U.S. and around the globe. Learning in families, in schools, on the job, and on the streets. Emphasis is on the cultural organization of success and failure in American schools. Tentative consideration of opportunities for making less inequality.

3-4 units (McDermott) not given 2005-06

CASA 159. New Frontiers in Biomedical Technologies: Anthropology and the Remaking of the Body — The relationship between innovations in biomedical technology and new ways of defining the body, health, and personhood through ethnographically grounded readings. Technologies that see inside and act on the living body in ways that challenge dichotomies of interior/exterior, self/other, and natural/artificial. How patients, doctors, and research scientists negotiate these technologies and how they inform human self-awareness.

5 units, Win (Remain)

ADVANCED UNDERGRADUATE AND GRADUATE SEMINARS

AREA SEMINARS

CASA 113/213. Women in Islam: The Central Asian Case — Roles of the Central Asian independent states in historical and modern perspectives. Traditional family and religious rituals, keeping an appropriate household, and women’s lore, craft, and art. Sources include instructor’s field data. GER:DB-SocSci

5 units, Win (Kunaanbaeva)

CASA 117/217. Archaeology of the American Southwest: Contemporary Peoples, Contemporary Debates — Cultural diversity and archaeology from paleo-indians to the present. Focus is on cultural fluences in areas such as the Mimbres Valley, Chaco Canyon, Mesa Verde, the Rio Grande, and the Hohokam in the Phoenix Basin. The development of agriculture, theories of social complexity and political economy, and the relationships between contemporary Native Americans, archaeologists, and the production of the past. GER:DB-SocSci

5 units, Spr (Wilcox)

CASA 118/218. Literature, Politics, and Gender in Africa — Intersections of gender, power, and desire; the politics of colonialism and Christianity; and nationalism and postcoloniality. Emphasis is on the politics of writing and critical imagination in historical and social context. Readings include novels and other texts by African writers. GER:DB-SocSci, EC-Gender

5 units (Malkki) not given 2005-06

CASA 119/219. The State in Africa — Postcolonial African states in historical and ethnographic context. Focus is on contemporary African states not as failures, but as the products of distinctive regional histories and political rationalities. GER:DB-SocSci

5 units (Ferguson) not given 2005-06

5 units (Wilcox) not given 2005-06

CASA 137E/237E. Excavation at Catalhoyuk, Turkey — Archaeological field experience by participating in Stanford’s excavation at Catalhoyuk in Summer. Focus is on the urban character of this earliest of towns. Prepares students for the Summer dig.

3-5 units, Spr (Carter)

CASA 145A/245A. Poetics and Politics of Caribbean Women’s Literature — Mid-20th century to the present. How historical, economic, and political conditions in Haiti, Cuba, Jamaica, Antigua, and Guadeloupe affected women. How Francophone, Anglophone, and Hispanophone women novelists, poets, and short story writers respond to similar issues and pose related questions. Caribbean literary identity within a multicultural and diasporic context, the place of the oral in the written feminine text, family and sexuality, translation of European master texts. History, memory, and myth, and responses to slave history, colonialism, neocolonialism, and globalization. GER:DB-SocSci, EC-AmerCul

5 units, Aut (Duffy)

CASA 153/253A. Nationalism, Culture, and Identity in Central Asia — Topics include the development of ethnic and national cultures and languages, the history behind geography, bilingualism and cultural patterns. Central Asian ways of life, cultural traditions, nationalism and identities, interrelations of language and art, in crosscultural, historical, geographical, and anthropological perspectives. GER:DB-SocSci

5 units, Spr (Kunaanbaeva)

CASA 163/263. The Politics of Humanitarianism — Anthropological approaches to contemporary practices of humanitarian intervention. How social theory can inform the politics of humanitarianism, charity, and philanthropy. Focus is on Africa from the colonial era to the present. GER:DB-SocSci

5 units, Aut (Malkki)

5 units, Aut (Malkki)

CASA 173/273. Nomads of Eurasia — The nomads of the Eurasian steppes, their lifestyles, and cultural history, including Mongolia, Kazakhstan, Kyrgyzstan, and Turkmenistan. Languages, traditional economics, art, the relationships between sedentary and nomadic peoples, and the early background and gradual Turkification and Islamization of Central Asia and Lamaization of S. Siberia. Regional trade networks (the Silk Road) where nomads were the mediators in innovations, the Mongol empire and its fate, Imperial Russian expansion, and the incorporation of Inner Asia into the USSR. GER:DB-SocSci

4-5 units (Kunaanbaeva) not given 2005-06

CASA 178/278. Archaeology of the Middle East — The roles of memory, archives, and deep time in the periods before writing in the Middle East and Europe. Prehistoric societies and their relationships with their own pasts. These societies constructed complex histories well in advance of writing. GER:DB-SocSci

5 units (Hodder) not given 2005-06
CASA 155/255. Virtual Communities: Online Technologies and Ethnographic Practice—Theoretical and practical approaches to ethnographic projects involving online technologies. Focus is on virtual communities. The methodological implications of online ethnographic research: researcher roles, the notion of identities, human subject issues, distributed collaboration, and alternative representations. Conceptual implications such as interpreting online technologies as virtual environments for human interaction versus a cultural artifact, and the nature of the Internet as setting and technology for ethnography. GER:DB-SocSci
5 units (Engel)

CASA 157/257. Fundamentalism and Modernity—Why is fundamentalism becoming more popular around the world? Is fundamentalism a reaction against or an integral aspect of modernity? GER:DB-SocSci
3-5 units (Delaney) not given 2005-06

CASA 161/261. Modern Material Culture—How social experience is impacted by material culture from toys to theme parks. How consumers perceive themselves and others through commodities. The historical development of the relationship between goods and identity from the 18th century; how systems of inequality are reproduced and subverted through material consumption. How archaeological techniques can probe the technological, social, and ideological meaning of everyday minutiae. GER:DB-Hum
5 units, Win (Mullins)

CASA 162/262. Historical Archaeology: From Colony to Heterotopia—The possibilities of historical archaeology, and of deriving meaning from the play between words and things. Premise is that the object of inquiry is to discover agency. Contradiction and discordance as indicators of points of explanation. The concept of heterotopia, or unstable places of creativity. GER:DB-Hum
5 units, Aut (Hall)

CASA 164/264. Ritual Musics of the World—(Same as MUSIC 164/264) The roles that music plays in human ritual life: physical effects of music, shamanic healing, spirit possession, and rites of worship. Gender issues in ritual music. The power of music to create and affirm communities, and as a medium for spiritual knowledge. What can be known about people, places, and cultures through sound? How does music express and shape social identity? How are belief systems and patterns of social interaction manifested in musical practices? Sources include readings and guided listening to recorded music from cultural and religious traditions around the world. GER:DB-Hum, EC-GlobalCom
4 units (Diehl) not given 2005-06

CASA 183D/283D. Border Crossings and American Identities—(Same as AMSTUD 183.) How novelists, filmmakers, and poets perceive racial, ethnic, gender, sexual preference, and class borders in the context of a national discussion about the place of Americans in the world. How Anna Devere Smith, Sherman Alexie, or Michael Moore consider redrawning such lines so that center and margin, or self and other, do not remain fixed and divided. How linguistic borderlines within multilingual literature by Caribbean, Arab, and Asian Americans function. Can Anzaldúa’s conception of borderlands be constructed through the matrix of language, dreams, music, and cultural memories in these American narratives? Course includes examining one’s own identity. GER:DB-Hum, EC-AmerCul
5 units, Win (Duffey)

CASA 185/285. Environmental Ethics—Crosscultural perspective. Application of environmental ethics to contentious or incommensurable beliefs or values. GER:DB-SocSci
5 units, Win (Gupta)

CASA 201X. Readings in Science, Technology, and Society—Focus is on anthropological approaches and contributions to the field. GER:DB-SocSci
5 units (Jain) not given 2005-06

CASA 213X. Political Anthropology from Rousseau to Freud—(Enroll in FRENGEN 256E.)
3-5 units (Dupuy) alternate years, given 2006-07
CASA 258X. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S.—(Enroll in FRENGEN 258E, STS 211.)
3-5 units, Spr (Dupuy)

GRADUATE SEMINARS

Courses in this section numbered 300 through 380, except 302, satisfy the department’s evaluation course requirement.

CASA 300. Reading Theory Through Ethnography—Required of and restricted to first-year CASA Ph.D. students. Focus is on contemporary ethnography and related cultural and social theories generated by texts. Topics include agency, resistance, and identity formation, and discourse analysis.
5 units, Win (Yanagisako)

CASA 301. History of Anthropological Theory—Required of CASA Ph.D. students. The history of cultural and social anthropology in relation to historical and national contexts and key theoretical and methodological issues as these inform contemporary theory and practices of the discipline. Enrollment limited to 15. Prerequisite: consent of instructor.
5 units, Aut (Ferguson)

5 units, Spr (Ebron)

CASA 310. Intersections—Themes of materiality and visibility, aesthetic and other forms of cultural production, and the meanings of creativity and convention. Ethnographic and archaeological material and case studies from worldwide cultural contexts.
5 units, Win (Malkki, Meskell)

CASA 313. Anthropology of Neoliberalism—How is the recent worldwide restructuring under the name neoliberalism understood as a social, cultural, and economic phenomenon? Focus is on interrogation of analytic categories, and ethnographic explorations of social and political processes.
5 units (Ferguson) not given 2005-06

CASA 319. Naturalizing Power: Kinship, Gender, Race, and Sexuality—The discursive and material practices through which social relations of inequality are naturalized. Ideologies of family, kinship, gender, and sexuality compared to the parallel processes of naturalization and mutual affirmation, and the role of anthropological theory in these naturalizations. Enrollment limited to 20. Prerequisite: consent of instructor if not a CASA graduate student.
5 units (Yanagisako) not given 2005-06

CASA 320. Historic Archaeology—Methodological and theoretical foundations for the archaeology of European colonization and the postcolonial material world. Focus is on material life and social inequality in N. America since 1492. How historical archaeologists have interpreted life in the world of global capitalism and colonization; how archaeological insights can be used to critique modern society. The interdisciplinary nature of historical archaeology, social significance of archaeological knowledge, and cultural, class, and gendered influences on archaeological interpretation.
5 units, Win (Mullins)

CASA 325. Ethics and Anthropology: Contemporary Debates—Anthropology as multidisciplinary: archaeological, biological, linguistic, and sociocultural. The historical development of ethics within anthropology and changes in epistemological frameworks. Topics include: theories of race and gender; human genomics and the new raciology of DNA; development and poverty; cultural evolution and the primitive; and rational choice theory and economic modeling. How these controversial topics are dealt with in the profession and how this information is disseminated in the public sphere. Case studies.
5 units, Spr (Wilcox)

CASA 327. Language and Political Economy—Theories of language: Saussure, Jakobson, Hymes, Marx, Foucault, Butler, and Derrida. The theorization of language in its linkages to power, social relations, and history. Prerequisites: Linguistics or Anthropology course work.
5 units, Aut (Inoue)

5 units (Wilcox) not given 2005-06

CASA 338. Anthropological Approaches to Religion
5 units (Malkki) not given 2005-06

CASA 339. Cultural Studies of Science and Technology: Race, Knowledge, and Power—Interdisciplinary debates in science and technology studies. What is science: how scientific knowledge is generated and changes; how science has shaped identities such as racial, colonial, and postcolonial. Charles Darwin, his theory of evolution, and the subsequent spread of Darwinistic ideas. Evolutionism from early 20th-century discourses of racial hierarchies, eugenics, and progress to discourses of development, modernization, and genetics research. Review of issues from the 2004-05 Revisiting Race and Ethnicity in the Context of Emerging Genetic Research lecture series at Stanford.
5 units, Aut (Luthra)

CASA 340. Narrative, Memory, Materiality: Women’s Sense of the Past—(Same as ARCHLGY 340, FRENGEN 340.) Theoretical issues concerning women’s sense of the past in different cultural and social milieus, as approached through written stories, monuments and material objects. Themes such as subjectivity, identity, and the human body. Readings include Cixious, Irigaray, Grosz, Kristeva, Spivak, Meskell, Lacan, Levinas, Ricoeur, and Badiou.
3-5 units, Spr (Domanska)

CASA 343. Culture as Commodity—Focus is on theories of commodification, interests in tourism, national cultures as marketable objects, and how identities are constituted through production and consumption. The formation of global style and taste.
5 units, Win (Ebron)

CASA 346A. Sexuality Studies in Anthropology—Current research on sexuality from perspectives including paleoanthropology, archaeology, ethnography, and linguistic anthropology. Readings paired with case studies that explore theoretical and methodological issues.
5 units (Manekar, Voss) not given 2005-06

CASA 349. Anthropology of Capitalism—Issues in cultural theory and methodology through research on people who have greater material and cultural resources than those usually studied by anthropologists. How ideas about ideology, hegemony, identity, power, and practice are altered in studying those considered to be agents of power rather than the subaltern. Topics: global capitalism, masculinity, white racial subjectivity. Enrollment limited to 20.
4-5 units, Spr (Yanagisako)

CASA 350. Nationalism and Gender—The co-implication of discourses of nationalism and gender, focusing on nationalist movements and ideologies in newly-independent countries and Third World contexts. Themes: discourses and practices of nationalism with institutions such as the state, mass media, and the family; masculinity, femininity, and militarization; and questions of representation, historiography, location, and strategy.
5 units (Manekar) not given 2005-06

CASA 352. Foucault: The Question of Method—Foucault as methodological exemplar for historical and social research. Emphasis is on his historical studies of clinical medicine, prisons, and sexuality, and on applying his methods to empirical studies of topics such as colonialism, race, and liberal governmental rationality.
5 units (Ferguson) not given 2005-06
CAS 354. Narrative, History, and Memory — Interdisciplinary. The debates surrounding theories of narrative and their relevance to ideas of history and memory. Methodological implications and applicability to analysis of social research, particularly anthropology and history.
3-5 units (Ebron) not given 2005-06

CAS 360. Archaeological Methods and Research Design — Methodological aspects of field and laboratory practice from traditional archaeological methods to the latest interdisciplinary analytical techniques. The nature of archaeological data and inference; interpretive potential of these techniques.
5 units, Spr (Lazarri)

CAS 362. Topics in Political Economy — Emphasis is on Marxist approaches. Topics: the development and articulation of capitalism, imperialism, colonialism, dependency, and world systems; 20th-century capitalism, post-Fordism, and postmodernism; the political economy of race, gender, and ethnicity; class relations and productive inequalities in the Third World; the discourse of development; and the cultural mediation of political economic transformation. The ethnographic material that employs these theories used to examine sociohistorical contexts.
5 units (Gupta) not given 2005-06

5 units, Win (Ferguson, Gupta)

CAS 365. The Mexican Codices: An Introductory Reading — (Enroll in SPANLIT 364.)
3-5 units, Win (Brotherston)

CAS 367. Advanced Topics: Medical Anthropology — Ad hoc reading group. May be repeated for credit. Prerequisite: consent of instructor.
2 units (Kohrman) not given 2005-06

CAS 370P. Advanced Pro Seminar: Topics in Archaeology
1-15 units (Voss) not given 2005-06

CAS 372. Materiality — The relationships between people and things. The world of objects plays a major role in materialism and the anthropology of material culture. Approaches that break down subject-object opposition. New social and psychological approaches that explore the mutual constitution of people and things, and object and subject. Approaches in which objects are seen to have agency, and people are seen as entangled in object worlds. Authors include Hegel, Marx, Benjamin, Miller, Gell, and Latour.
5 units (Hodder) not given 2005-06

CAS 373. Introduction to Archaeological Theory — The history of archaeological thought emphasizing recent debates. Evolutionary theories, behavioral archaeology, processual and cognitive archaeology, and approaches termed feminist and post-processual archaeology in the context of wider debate in adjacent disciplines. The application and integration of theory on archaeological problems and issues.
5 units, Win (Meskell)

CAS 375. Archaeology and Globalism — The emergence of archaeology as a discipline in the context of the rise of the nation state. Global economies and other issues have created a new context for archaeology. How are archaeology and heritage responding? The idea of world heritage. The impact of postcolonialism. The commodification of the past: the past as theme park, as travel tourism or nostalgia, as exotic and other. Conflict between uses of the past for identity and as theme park; between heritage and resource or play. The impact of the Goddess, New Age, and other movements. Archaeology and human rights issues including forensic archaeology.
4-5 units (Hodder) not given 2005-06

CAS 380. Practice and Performance: Bourdieu, Butler, and Giddens — Ethnography and archaeological, poststructuralist theories of iteration and mimesis are used by social scientists to negotiate the tension between social structure and social practice. Readings of three prominent theoretical frameworks in this area: Gidden's structuration theory, Bourdieu's practice theory, and Butler's theories of gender performativity. Ethnographic and archaeological case studies that employ methodologies inspired by these approaches. Intersections and contradictions among these theorists' work. Their use in anthropological practice. Emphasis is on gender, sexuality, and ethnicity.
5 units (Voss) not given 2005-06

CAS 391A.B. Qualifying Paper — Required of second- and third-year Ph.D. graduate students.
2-5 units, A: Topic, B: Area, Aut, Win, Spr (Staff)

CAS 392. Dissertation Writers Seminar — For graduate students in the process of writing dissertations and preparing for professional employment.
1-3 units, Aut, Win, Spr (Malkki)

CAS 393. Internship
1-15 units, Aut, Win, Spr (Staff)

CAS 394. Proposal Writing Seminar — Required of second-year Ph.D. students in Cultural and Social Anthropology. The conceptualization of dissertation research problems, the theories behind them, and the methods for exploring them. Participants draft a research prospectus suitable for a dissertation proposal and research grant applications. Limited enrollment. Prerequisite: 212 or consent of instructor.
5 units, Spr (Gupta)

CAS 395A. First-Year Paper — Required of first-year students.
2-5 units, Win (Inoue)

CAS 395B. First-Year Paper — Required of first-year graduate students.
2-5 units, Spr (Inoue)

CAS 396. Research Apprenticeship — Supervised work with an individual faculty member on a research project. May be taken for more than one quarter.
1-15 units, Aut, Win, Spr (Staff)

CAS 397. Directed Individual Study — For CASA Ph.D. students, supporting the qualifying paper and pre-dissertation field research.
1-15 units, Aut, Win, Spr, Sum (Staff)

CAS 397A. Directed Individual Tutorial — For CASA Ph.D. students working directly with a faculty member on specialized course work supporting area of interest.
1-15 units, Aut, Win, Spr, Sum (Staff)

CAS 397B. Dissertation Fieldwork — For CASA Ph.D. students conducting 4th-year dissertation field research.
1-15 units, Aut, Win, Spr, Sum (Staff)

CAS 398. Teaching Apprenticeship — Supervised experience as assistant in one undergraduate course.
1-15 units, Aut, Win, Spr, Sum (Staff)

CAS 399. Master's Research Thesis
1-15 units, Aut, Win, Spr, Sum (Staff)

CAS 444. Cultural and Social Anthropology Colloquium — Required of first-year CASA Ph.D. students.
1 unit, Aut, Win, Spr, Sum (Staff)

CAS 445. Cultural and Social Anthropological Symposium — Current topics and trends in cultural and social anthropology, cultural archaeology, and archaeology.
1 unit, Aut, Win, Spr (Staff)

OVERSEAS STUDIES

Courses approved for the Cultural and Social Anthropology major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.
DRAMA

Emeriti: (Professors) Wendell Cole, Helen W. Schrader, Carl Weber; (Associate Professor) William S. Eddelman; (Senior Lecturer) Patricia Ryan

Chair: Harry J. Elam, Jr.

Drama Division

Professors: Jean-Marie Apostolidès (French and Italian, Drama), Harry J. Elam, Jr., Peggy Phelan, Ruth Rehm (Drama, Classics)

Associate Professor: Alice Rayner

Assistant Professor: Ehren Fordyce

Professor (Teaching): Michael F. Ramsaur

Associate Professor (Teaching): Janice Ross

Senior Lecturer: Conni Strayer

Lecturers: Maya Arad, Jeffrey Bihr, Telory Davies, Alison Duxbury, Erik Flatto, Aleta Hayes, Daniel Klein, Kathryn Kostopoulos, Deborah Sussel

Visiting Professor: Stan Lai

Artists in Residence: Amy Freed, Cherríe Moraga

Black Performing Arts Division

Director: Harry J. Elam, Jr.

Steering Committee: Alice Endamme (Black Arts Quarterly), Jan Barker (BCSC), Elena Becks (Committee on Black Performing Arts), Chris Clarke (El Centro Chicano), Regina Covington (King Papers), Vera Grant (African and African American Studies), Naima Green (student), Ashley Hannah (student), Georgina Hernandez (Institute for Diversity in the Arts), Tony Kramer (Dance), Cherríe Moraga (Drama), Robert Moses (Committee on Black Performing Arts), Cindy Ng (Asian American Activities Center), Laura Selznick (VPUE)

Dance Division

Director: Tony Kramer

Senior Lecturers: Susan Cashon, Tony Kramer

Lecturers: Kasey Brown, Kristine Elliott, Diane Frank, Muisi-Kongo Malonga, Hope Mohr, Robert Moses, Richard Powers, Ronnie Reddick, Aliza Shapiro

Mail Code: Drama, 94305-5010; Dance, 94305-8125

Phone: Drama (650) 723-2576; Dance (650) 723-1234

Email: radavies@stanford.edu

Web Site: http://www.stanford.edu/dept/drama/

Courses given in Drama have the subject code DRAMA. Courses given in Dance have the subject code DANCE. For a complete list of subject codes, see Appendix B.

DRAMA DIVISION

The Department of Drama bases its undergraduate and graduate programs on the integration of theory and performance. The faculty commit themselves to the idea that artists must be able to analyze their creative work and that scholars must approach their own specializations creatively. The department prepares students for continued work in professional and university theaters, and to undertake further work in professional and university theaters.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The requirements for the B.A. degree in Drama are planned to integrate the critical and historical study of drama with the study and experience of performance. The major provides aesthetic and critical opportunities for students to develop special aptitudes. For example, a student may elect an emphasis in acting, directing, design, or critical theory, or may combine areas of emphasis. Examples of how students can structure course work to take advantage of such an emphasis are available from the major adviser. Students are encouraged to declare a major in their sophomore year.

The core program of Drama courses required of all majors is:

1. Performance/Literature/Film: one of the following: DRAMA 120A, 120B, 120C, 121A, 121B
2. Stage Management Project: 134 or 34 plus two of 39A, B, C, or D
3. Senior Project: Drama majors must complete an approved senior project in the area of their specialization: a minimum of 2 units in DRAMA 200 or 205.

Two years of a college-level foreign language are recommended. All majors, in addition to completing the core described above, are required to complete one of the following seven specializations:

1. Acting:
   a) DRAMA 120A, B, Fundamentals of Acting; DRAMA 121M, Movement; DRAMA 121V, Voice and Stage Speech
   b) The student must have completed at least 4 units of DRAMA 29 and acted in at least two department productions.
   c) DRAMA 28, Makeup for the Stage
   d) 2 units of studio class in Dance
   e) three additional acting classes
   f) one course in dramatic literature
   g) 5 units of approved electives in Drama or Dance
   h) one of DRAMA 39A, B, C, or D

2. Directing:
   a) DRAMA 170A, Introduction to Directing; 170B, Advanced Directing; and 171, Undergraduate Theater Workshop
   b) one course in dramatic literature
   c) DRAMA 30, Introduction to Theatrical Design
   d) DRAMA 31, Introduction to Lighting and Production
   e) one course in acting
   f) one of 39A, B, C, or D
   g) nine units of approved electives in Drama

3. Playwriting/Dramaturgy:
   a) DRAMA 177F or M, Playwriting
   b) DRAMA 178M, Intensive Playwriting
   c) DRAMA 170A, Introduction to Directing; 170B, Advanced Directing; and 171, Undergraduate Theater Workshop
   d) DRAMA 31, Introduction to Lighting and Production
   e) one course in acting
   f) one of 39A, B, C, or D
   g) nine units of approved electives in Drama

4. Design:
   a) DRAMA 30, Introduction to Theatrical Design
   b) DRAMA 31, Introduction to Lighting and Production
   c) two of 131, 132, 133
   d) two units each: 39A, B, C, and D
   e) two of 231, 232, 233, or 235
   f) one course in acting
   g) nine units of approved electives in Drama or Art

5. Technical Production/Stage Management:
   a) DRAMA 30, Introduction to Theatrical Design
   b) DRAMA 31, Introduction to Lighting and Production
   c) one of 131, 132, 133
   d) two units each: 39A, B, C, and D
   e) DRAMA 34, Stage Management
   f) one course in acting
   g) DRAMA 136, Drafting or MUSIC 19
   h) DRAMA 135, Sound Design for Theater
   i) nine units of approved electives in Drama

6. Dance:
   a) DANCE 158, The Body in Motion
   b) DANCE 169, Choreography, Creation, Staging, and Reconstruction
   c) one additional dance theory class from DANCE 160, 161, 166, 168, 197, or 242
1. Application involves a written submission (including transcript) in addition to the other requirements of the Drama major: for departmental honors, students must meet the following requirements.

2. Students must complete the Drama core requirements by the end of their junior year, earlier if possible. Only in exceptional circumstances can this requirement be waived; transfer from another university, extended overseas study, or temporary withdrawal from the major due to illness might constitute extenuating circumstances.

3. Students also must have completed half of the courses in their specialization by the end of their junior year.

4. Students must complete 4 units in the Honors Colloquia (described below), beginning Spring Quarter of their junior year and continuing the following three regular quarters. Each quarter’s colloquium is offered for 1 unit, S/NC. In extenuating circumstances (overseas study, for example), an honors program student may substitute other equivalent work for one quarter of the colloquium, with the approval of the honors adviser.

5. GPA in courses counting towards the major must be 3.5 by the time of graduation.

6. By the end of the seventh week of the quarter in which they plan to graduate, all students in the honors program must submit an honors thesis (described below), to be read and evaluated by their thesis committee.

7. On the basis of a student’s work in the Drama core, in the area of specialization, on the senior project, in the honors colloquia, and on the honors thesis, the faculty determines and confers honors on graduating students who have successfully completed the honors program.

8. Failure to meet any of these requirements, or to make satisfactory progress on the honors thesis, leads to dismissal from the honors program.

**HONORS COLLOQUIA AND THESIS**

The honors colloquia aim to engage honors program students in an ongoing discussion of important issues in the field, with particular focus on the students’ areas of specialization and research. The honors program adviser convenes the colloquia three times per quarter and sets the agenda for meetings and discussion. The colloquia offer venues for honors students to discuss their work in the department (their senior projects, for example), and to present and discuss their research for their honors thesis.

The honors thesis represents an extended engagement with an important issue or subject, determined by the student, the honors program adviser, and the student’s senior project adviser. It typically consists of a long essay (7,500-10,000 words) presenting the student’s research on the subject. As an honors thesis may deal with issues related to the student’s senior project, or with issues related to the student’s specialization, the honors program adviser, the senior project adviser, and another faculty member constitute the student’s honors thesis committee. They read and evaluate the thesis, and make recommendations to the faculty at large regarding its strengths and weaknesses. In the case of an honors program student whose senior project does not involve production or performance but takes written form, the requirements for the honors thesis change. In discussions with the student’s honors committee, the student develops a performance/production-based project that provides the equivalent of a written honors thesis.

**HUMANITIES**

An honors program in Humanities is available for Drama majors who wish to supplement their major with related and carefully guided studies. See the “Interdisciplinary Studies in Humanities” section of this bulletin for a description of the honors program. Students who enroll in this program may offer HUMNTIES 160 and two seminars from 190-198 in fulfillment of the departmental elective requirement.

**GRADUATE PROGRAMS**

**DOCTOR OF PHILOSOPHY**

University requirements for the Ph.D. are described in the “Graduate Degrees” section of the bulletin.

All graduate study in the Department of Drama leads to the Ph.D. degree. The doctoral program in Drama aims to integrate practical theater work with the critical and historical study of dramatic literature and theory. All candidates are expected to function both as scholars and as theater directors. The curriculum offers a two-year practical concentration in
directing along with the study of critical and performance theory, aesthetics, history, and literature. The goal of the program is to give students a thorough knowledge of the field that leads to original and significant scholarly work grounded in practice as well as an inventive directorial practice that is based on solid scholarly analysis.

The following department requirements are in addition to the University’s basic requirements for the doctorate.

**UNITS AND COURSE REQUIREMENTS**

1. A minimum of 135 units of graduate courses and seminars in support of the degree. These units are in addition to units for the doctoral dissertation.
2. The sequence in Performance and Critical Theory (DRAMA 300, 301, 302).
3. Six additional graduate seminars within the Department of Drama. These must include at least one seminar in each of the following fields:
   a) intersections of theory and performance (designated by suffix A in course number)
   b) theater history (designated by suffix B in course number)
   c) dramatic literature (designated by suffix C in course number)
   In the first two years, students take 370, Concepts of Directing; 372, Projects in Directing; 371, Visual Aesthetics for the Director; and 373, Directing and Dramaturgy. The Projects class consists of the conceptual development, design, and production of a short play in a multi-form space. In the second year, students take 374, Graduate Directors’ Performance Project, to stage a more fully developed production chosen in consultation with the faculty.

**LANGUAGE REQUIREMENT**

The candidate must demonstrate reading knowledge of one foreign language in which there is a major body of dramatic literature. The language requirement may be fulfilled in any of the following ways:
1. Achievement of a sufficiently high score (70th percentile) on the foreign language examination prepared by the Educational Testing Service (ETS). Latin and Greek are not tested by ETS.
2. A reading examination given each quarter by the various language departments, except for Latin and Greek.
3. Pass with a grade of “B” or higher a course in literature numbered 100 or higher in a foreign language department at Stanford.

The language requirement must be met before the student can be advanced to candidacy.

**TEACHING REQUIREMENT**

Four quarters of supervised teaching at half time are a required part of the Ph.D. program. The requirement is normally met by teaching three courses during the fourth year and one course during the fifth year.

**EXAMINATIONS**

Candidates must complete three examinations (one comprehensive and two qualifying) by the end of the first three years of study at Stanford.

The comprehensive examination is taken over a weekend in the Spring Quarter of the first year. The exam is based on texts given to the student by the department at the beginning of the first year. Students study these texts independently throughout the year. For the exam, they should be able to identify and compare plays and playwrights from the list of texts in terms of dramatic genres, styles, and periods, and to address comparatively and analytically critical issues of texts and performance.

The first qualifying exam, which must be completed before advancement to candidacy at the end of the second year, consists of three 15-25 page essays written in consultation with a faculty adviser, covering a specific period of dramatic literature and theater history. These essays should not duplicate any written work from seminars. One essay should deal with practical aspects of the period, for example, directing; one essay should focus on theater history of the period; and one essay should focus on dramatic criticism related to a specific text of the period. After approval by the adviser, the Graduate Studies Committee reads and evaluates these essays, one in each of Autumn, Winter, and Spring quarters.

The second qualifying examination is a departmental oral with three faculty members, at least two of whom should be from the Department of Drama. This oral covers a second period of dramatic literature and theater history. The format of this exam approximates that of the University oral.

For the two qualifying examinations, the essays and the oral, each student works out a program of study with a faculty adviser drawing from the following periods of Western drama, but may include non-Western texts:
- Classical
- Medieval and Renaissance
- 17th, 18th, and early 19th century
- Modern: 1870-1980
- Contemporary: 1980 to the present

**SAFISFACTORY PROGRESS**

Graduate students in Drama are expected to make consistent progress toward the completion of the Ph.D. degree. At the end of the first year, the departmental Graduate Studies Committee evaluates the work of each student in classes, seminars, examinations, and performance. Production planning in the Spring of each year is contingent upon students making satisfactory progress. Continuation in the program depends upon the recommendation of this faculty group. At the end of the second year, the committee reviews the student’s work in consideration of advancement to candidacy. At the end of the third year, students are expected to have developed an approved dissertation prospectus in preparation for the University oral.

**APPLICATION FOR CANDIDACY**

By the end of the second year of residence, the following requirements or appropriate equivalents must be completed:
1. Performance and Critical Theory sequence (DRAMA 300, 301, 302) and four seminars
2. The directing workshop series (DRAMA 370-374), including the successful production of two works in public performance
3. A foreign language
4. At least two examinations

Based on its evaluation of the student’s progress, the Graduate Studies Committee certifies the student’s qualifications for candidacy. Upon favorable action, the student files a formal application for candidacy, as prescribed by the University, by the end of Summer Quarter of the second year.

**RESEARCH ASSISTANTSHIP**

Generally, the third year is devoted to graduate study and research assistantships with faculty members.

**DISSERTATION PROSPECTUS**

The dissertation prospectus must be approved by the candidate’s adviser and by the departmental Graduate Studies Committee by the end of Spring Quarter of the third year.

**UNIVERSITY ORAL EXAMINATION**

The University oral examination, to be taken during the fourth year, is to demonstrate the candidate’s ability to conduct significant research in the general area of the dissertation. The examining committee consists of four faculty members, at least two of whom must be from the Department of Drama, as well as one faculty chair from outside the department. The University oral covers the area of the dissertation and is based on the prospectus and bibliography of the candidate.

**DISSERTATION**

Normally, the Ph.D. program is completed in five years. The first two years should be devoted to full-time graduate study, and the third, fourth, and fifth years to research, teaching, and writing the dissertation. Fol-
lowing formal admission to candidacy (typically at the end of the second year), the dissertation must be completed and approved within five years from the quarter in which candidacy is granted. A candidate taking more than five years is required to restate candidacy by repassing the written examinations on dramatic literature.

APPLICATION AND FELLOWSHIPS

Applicants for the Ph.D. program must write directly to the Department of Drama for information. Online graduate applications are available at http://gradadmissions.stanford.edu/. In addition to the required statement of purpose, all applicants must submit a statement detailing their practical theater experience, a sample of their written critical work, and a statement on directing. An interview, while not required, is recommended. Interviews are best scheduled after January 17 and before February 9. Graduate students in the Department of Drama begin study in the Autumn Quarter of each academic year; there are no mid-year admissions. All graduate students must be degree candidates. All admissions materials must be submitted to the Department of Drama, Memorial Auditorium 144, 551 Serra Mall, Stanford, CA 94305-5010 by December 13.

The Department of Drama awards a number of fellowships to students in the Ph.D. program. For more information, write to the address above, telephone (650) 723-2576, fax (650) 723-0843, email radavies@stanford.edu, or see http://www.stanford.edu/dept/drama/ to download the latest information in .pdf format.

JOINT PH.D. IN DRAMA AND HUMANITIES

The Department of Drama participates in the Graduate Program in Humanities (GPH) leading to a joint Ph.D. degree in Drama and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

BLACK PERFORMING ARTS DIVISION

Students founded the Committee on Black Performing Arts (CBPA) in 1968. The CBPA became an official University Program in 1972, and a division under the Department of Drama in 1997.

Under the auspices of the Institute for Diversity in the Arts (IDA), the CBPA functions as: (1) a liaison with departments in hiring faculty and developing courses in black performing arts; (2) a presenter of performances, master classes, and symposia with arts professionals in dance, drama, music, and film, framed by related academic study in anthropology, dance, drama, history, philosophy, and sociology; (3) a producer of student productions; and (4) a resource for student organizations promoting artistic expression in the black cultural tradition. While the offerings do not constitute an academic minor, students are able to concentrate studies in black performing arts as part of the B.A. major in African and African American Studies or Drama.

The CBPA publishes the Black Arts Quarterly (BAQ) twice a year. BAQ explores perforativity by and about black artists from Africa and the black diaspora, and is an international forum for artists, students, academics, and activists to present original works of art, criticism, and commentary addressing the material impact of black representation in the arts, literature, media, and popular culture.

The CBPA has developed relationships with neighboring communities through artist residencies including its collaboration in “Dreams of a City: The East Palo Alto Project.” The project produced two commissioned plays and a video documentary, a finalist at the Sundance Film Festival, based on community histories. An accompanying archive housed at the CBPA documents community history. The CBPA’s community programming continues with “Resident Dialogues,” funded by the Ford Foundation, which brings artists to campus to work with students in conversation with community members, and to create performance works shown on campus and in community settings. In 2005-06, the CBPA hosts percussionist/musician Will Calhoun from the ensemble Living Colour.

DANCE DIVISION

The Dance Division aims to develop trained bodies, inquiring minds, and aesthetic imaginations through movement as well as dance scholarship. The program emphasizes informed and active engagement in dance by stimulating a range of intelligences that honor somatic wisdom. Since its inception in 1920, dance at Stanford University has positioned itself responsive to the changing needs of the University and society. It offers a range of studio and lecture courses aimed at enhancing the understanding of dance as a way to create and communicate knowledge and meaning. The program encourages students to make connections between dance, other disciplines, culture, and society.

UNDERGRADUATE PROGRAMS

Students who wish to major in Drama with a specialization in Dance, or minor in Dance, should see the undergraduate adviser, Susan Cashion, in the Dance Division.

MINORS

For students wishing to minor in Dance, the following core requirements must be met and a program of study arranged in consultation with the minor adviser in Dance.

1. Studio Classes — A minimum of eight classes. There must be a concentration of at least three classes chosen from a particular dance form such as world, modern, jazz, ballet, or social, and the attainment of intermediate or advanced level; at least two classes in a style other than the concentration; and three additional classes. The studio dance classes are from series in: modern dance (DANCE 40, 45, 140, 141); world dance (DANCE 42, 43); jazz (DANCE 44, 58, 144, 145); social dance (DANCE 46, 146, 147, 156); ballet (DANCE 48, 148, 149); and acting (any class).

3. Performance Practice — DANCE 39D. Stage Management Project; and one of the following: DANCE 169, Staging and Choreography; DANCE 100, Performance Workshop; DANCE 190, Special Project.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Drama department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Drama are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 25A,B. Art and Ideas: Performance and Practice — Two quarter sequence. Issues in aesthetics and performance through examples from the classical age to the present. Concepts of art and practice intersecting with topics such as imitation, instruction through pleasure, the creative process, perception, social analysis, and embodiment as a form of knowledge. Texts and performances from drama, dance, music, visual arts, and performance art practices that reflect aesthetic ideas. GER: IHUM-2,3

IHUM 25A, 5 units, Win (Rayner)
IHUM 25B, 5 units, Spr (Ross)
DRAMA DIVISION

Registration for most drama classes takes place at the first class meeting; further registration information is printed in the Time Schedule each quarter. Some class sizes are limited and require advanced registration in the Department of Drama, Room 144, Memorial Auditorium.

INTRODUCTORY

DRAMA 11N. The Dancing Couple as a Lens on American Culture, 1890-1950—Stanford Introductory Seminar. Preference to Freshmen. Race, identity, gender redefinition, and the public body through the lens of social and theatrical dancing couples. The structure of domestic partnerships as mirrored on the social dance floor and theatrical and Hollywood stage. Sources include anti-dance treatises, African American dance spaces, dance marathons of the 20s and 30s, Savoy lindy hop, Irene and Vernon Castle, Fred Astaire and Ginger Rogers, precision dance, gay square dance, and same sex and gender switch tango. Live demonstrations.
4 units, Aut (Ross, Powers)

DRAMA 17N. From Inside the First World: Women of Color Playwrights Re-mapping the U.S.—(Same as SPANLIT 178N.) Stanford Introductory Seminar. Preference to freshmen. From the 60s to the present. Playwrights who create an aesthetic and political space outside the geopolitics of white capitalist patriarchy through social issues including the legacy of slavery and forced immigration, dislocation and relocation, diasporic ties, indigenous inheritance, sexuality, self-censorship, and the war on terror. Students create and perform in public short dramatic pieces informed by the playwrights’ style and subject matter. GER: DB-Hum, EC-AmerCul
3 units, Aut (Moraga)

DRAMA 20. Introduction to Acting—Theater games and physical exercises in concentration, attention, playing an objective, voice, movement, stage terminology, characterization, performing a monologue, and rehearsal techniques. Provides an experiential overview of actor training and prepares actors for advanced courses. Limited enrollment.
2 units, Aut, Win, Spr (Staff)

DRAMA 22. Scene Work—For actors who complete substantial scene work with graduate directors in the graduate workshop. 1-2 units, Aut, Win, Spr (Staff)

DRAMA 25. Shakespearean Skills—Scansion, stage combat, period movement, vocal production, and other skills for the Shakespearean actor. Limited enrollment.
1-2 units, Win, Spr (Kostopoulos)

DRAMA 28. Makeup for the Stage—The basic techniques of makeup application for the artist and/or actor: aging, prosthetics, stylization, characterization, animals, and fantasy makeup.
2 units, Aut (Strayer)

DRAMA 29. Theater Performance: Acting—Students cast in department productions receive credit for their participation as actors; 1-2 units for graduate directing workshop projects and 1-3 units for major productions (units determined by instructor). May be repeated. Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

DRAMA 30. Introduction to Theatrical Design—Lecture/lab. The basic skills of visual communication used in stage productions. Design and construction methods for stage scenery, costumes, and lighting.
4 units, Aut (Flatmoe)

DRAMA 31. Introduction to Lighting and Production—The technical and aesthetic aspects of lighting and the production process.
4 units, Win (Ramsaur)

DRAMA 32. Textiles—Introduction to fabric techniques and processes for stage costumes.
2-3 units, Win (Strayer)

DRAMA 34. Stage Management Techniques—The production process, duties, and responsibilities of a stage manager. Provides the skills needed to stage manage a production.
2-3 units, Aut, Spr (Duxbury)

DRAMA 35. Introduction to Sound for the Theater—Lecture/lab. The practical handling of sound equipment, acoustics, and editing. Analysis, creation, and implementation of theatrical sound effects, live and recorded.
3-4 units, Aut (Duxbury)

DRAMA 36A. Introduction to Woodworking—Techniques for building furniture and theatrical projects.
1-2 units, Aut (Duxbury)

DRAMA 36B. Scene Shop Techniques—Lecture/lab. Practical handling of shop equipment used in theatrical production.
1-2 units (Duxbury) not given 2005-06

DRAMA 39A, B, C, D. Theater Performance: Crew—Participation in the design and technical areas of department productions. Students commit to a specific show and receive credit for preparation and construction as a member of a running crew in a specific area.

DRAMA 39A. Theater Performance: Scenery and/or Property

DRAMA 39B. Theater Performance: Lighting/Sound

DRAMA 39C. Theater Performance: Costumes/Makeup

DRAMA 39D. Theater Performance: Prosser Stage Management
1-3 units, Aut, Win, Spr (Staff)

DRAMA 42. Costume Construction—Lecture/lab. The basic skills of constructing costumes for the stage.
2-3 units (Strayer) not given 2005-06

DRAMA 53. Greek Tragedy—(Enroll in CLASSGEN 12.)
3-5 units (McCall) not given 2005-06

INTERMEDIATE

Primarily for the major, but open to all undergraduates who have the necessary prerequisites.

DRAMA 103. Improvising—The improvisational theater techniques that teach spontaneity, cooperation, team building, and rapid problem solving, emphasizing common sense, attention to reality, and helping your partner. Based on TheatreSports by Keith Johnstone. Readings, papers, and attendance at performances of improvisational theater. Limited enrollment.
3 units, Aut, Win (Klein)

DRAMA 110. Cartographies of Race: The Institute for Diversity in the Arts at Stanford—Students work with one of four visiting California artists on artistic projects concerning diversity, culture, and race. Workshops include service learning within a community population to probe diversity and social change through the arts. GER: DB-Hum
5 units, Win (Elam)

DRAMA120A, B. Acting: The Fundamentals—For students who intend to begin serious actor training. First quarter emphasizes the understanding and utilization of the basic vocabulary of objective and action. Theater games and improvisation develop the actor’s ability to act with focus, intention, and energy. Introduction to the basics of characterization and transformation. Second quarter: the actor’s spontaneity and imagination are used to reveal the life of a play (working with dramatic texts). Approaches to the actor’s craft range from character biography to moment-to-moment truthful playing. Exercises from Strasberg, Meisner, Chaikin, Linklater, and others. Scene and monologue work are drawn from primarily naturalistic plays. Outside rehearsal time required. Must be taken in sequence. 120B. Prerequisite: 120A or consent of instructor.
3 units, 120A: Aut (Kostopoulos), Win (Freed),
120B: Spr (Kostopoulos)
DRAMA 121C. Acting: The Craft of Comedy — The basics of comedy playing, from its origins in the utterly truthful to its destination in the over-the-top. Characterization, mask, and exaggeration; class work on non-verbal scenes. The actor’s understanding of the mechanics of comedy, timing, and clowning are developed through improvisation and in-class exercises designed to free the imagination. Texts may include scenes from Feydeau, Woody Allen, Moss Hart, and Alan Ayckbourn. 
3 units, Spr (Freed)

DRAMA 121M. Movement for Actors — Kinesthetic awareness and physical presence of the performer in relationship to others through techniques of focus, spatial intent, task, and choreographic improvisation.
3 units, Aut (Bihr)

DRAMA 121P. Acting: Period and Style — Opportunity to expand acting range through an exploration of heightened language. Scenes from non-contemporary dramatic literature including Shakespeare, Shaw, Turgenev, Ibsen, and Strindberg.
3 units (Freed) not given 2005-06

DRAMA 121R. Acting American Realism — Skills appropriate to the work of major American playwrights including Williams, Miller, and Mamet.
3 units (Freed) not given 2005-06

DRAMA 121V. Voice and Speech for the Stage — Goal is to strengthen, support, and vary the voice through breath, resonance, articulation, and projection. Speech work includes phonetics, text analysis, and verbal action as it relates to dramatic material.
2 units, Win (Sussel)

DRAMA 121W. Actors Who Write/Writers Who Act — The development of dramatic scripts for solo performance and multi-character plays. Work happens on its feet, with writing deadlines and an informal workshop environment in which students present scripts, with support and feedback in dramaturgy, and help with performance and staging issues.
3 units (Freed) not given 2005-06

DRAMA 122C. Contemporary Scene Study — Acting approach to contemporary plays.
3 units (Kostopoulos) not given 2005-06

DRAMA 131. Lighting Design — Lecture/lab. Practical and aesthetic aspects of lighting: electricity, light sources, color instrumentation, control, drafting, plotting, and the aesthetic principles of lighting design, interpretation, and concept. Prerequisites: 30, 31, or consent of instructor.
4 units, Spr (Ramsaur)

DRAMA 132. Costume Design — A visual analysis of the historical styles of costume design, interpreted for the modern theater and developed by the student in various presentational media. Prerequisite: 30 or consent of instructor.
4 units, Spr (Strayer)

DRAMA 133. Stage Scenery Design — Creations of increasing complexity involve text analysis, historical and artistic style, visual research, spatial organization, drafting, sketching, model building, and director-designer collaboration. Prerequisite: 30, or consent of instructor.
4 units, Win (Flattmlo)

DRAMA 133F. Design, Space, and Documentation — Art installation, theater, dance, film, and music video projects through studio techniques including drafting and model making. Emphasis is on design projects in unconventional spaces.
2-3 units (Flattmlo) alternate years, given 2006-07

DRAMA 133P. Scenic Painting — Techniques of painting for the stage.
2-3 units, Spr (Flattmlo)

DRAMA 134. Stage Management Project — For students stage managing a Department of Drama production.
2-9 units, Aut, Win, Spr (Duxbury)

DRAMA 135. Sound Design — All aspects of sound for the theater from equipment, acoustics, and editing to the creation of theatrical sound effects, live and recorded.
4 units, Win (Duxbury)

DRAMA 140. Projects in Theatrical Production — (Graduate students register for 240.) Assistant directing; stage, costume, lighting, and sound design; technical production, stage managing, or other work in connection with Department of Drama productions. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

DRAMA 150. Chekhov and Before — (Graduate students register for 250.) Chekhov’s dramatic masterpieces in light of his Russian predecessors. Authors include Griboyedov, Gogol, Turgenev, and Ostrovsky; Chekhov’s early plays and vaudevilles.
4 units, Win (Arad)

DRAMA 151. Adaptation: Turning into Drama — (Graduate students register for 251.) Adaptation in theater: from script to production, from book to stage and screen, from one period and culture to another. The adaptations that a single author, Chekhov, has undergone: different productions of his plays and different dramatizations of his prose.
4 units, Spr (Arad)

DRAMA 152. Theater, Travel, and Technology — The theatrical nature of global tourism, the virtual travel of theatrical representation, and the role of modern technology in changing relationships between people and places. What it means to move through other spaces; how theater represents motion; and the nature of globalization and cyberspace. Sources include plays, videos, web sites, travel guides, and drives and train lines in the Bay Area.
4 units, Spr (Gillette)

4 units, Spr (Hayes)

DRAMA 159. Shakespeare — (Enroll in ENGLISH 163.)
5 units, Aut (Friedlander)

DRAMA 159B. Shakespeare — (Enroll in ENGLISH 163B.)
5 units, Spr (Parker)

DRAMA 160. Performance, Dance History, and Gender — (Graduate students register for 260; same as DANCE 160.) Shifting gender identities in western theatrical dance from the mid-18th to mid-20th centuries. The birth and development of theatrical dance. Changing notions of gender construction and the body in performance. GER:DB-Hum, EC-Gender WIM
4 units, Win (Ross)

5 units (Rayner) not given 2005-06

DRAMA 162. Performance and the Text — (Graduate students register for 262.) Formal elements in Greek, Elizabethan, Noh, Restoration, romantic, realistic, and contemporary world drama; how they intersect with the history of performance styles, character, and notions of action. Emphasis is on how performance and media intervene to reproduce, historicize, or criticize the history of drama. GER:DB-Hum
5 units (Rayner) not given 2005-06
DRAMA 163. Performance and America — (Graduate students register for 263.) Dramas by women, men, Asian Americans, Latino Americans, and African Americans are examined with regard to the role of dramatic performance within contemporary American society, and as an affective and effective arena for inducing social change. GER:DB-Hum, EC-AmerCul, WIM
5 units, Aut (Elam)

DRAMA 164. Performance and Gender — (Graduate students register for 264.) The intersectionality of race, sex, gender, and class in the formation of gendered performance. Readings from the work of Judith Butler, Eve Sedgwick, David Savran, Judith Halberstam, and David Eng. Case studies include: M. Butterfly, The Crying Game, Paris is Burning, Angels in America, and American Idol. GER:DB-Hum
5 units (Phelan) not given 2005-06

DRAMA 165. Theater History: Classical to 1900 — (Graduate students register for 265.) A dramaturgical, historical, and design approach to the study of drama, theater, and performance. GER:DB-Hum
4 units, Win (Lyons)

DRAMA 166. Theater History: 1900 to the Present — (Graduate students register for 266.) A dramaturgical, historical, and design approach to the study of drama, theater, and performance. GER:DB-Hum
4 units, Aut (Davies)

DRAMA 170A. Introduction to Directing — Practices of stage composition, work with the actor, approaches to character, and techniques of storytelling. Prerequisite: consent of instructor.
4 units, Aut (Rehm)

DRAMA 170B. Advanced Directing — Devised theater and non-text based directing. Prerequisite: 170A or consent of instructor. GER: DB-Hum
4 units, Win (Lai)

DRAMA 171. Undergraduate Theater Workshop — Undergraduate directors present one act plays in workshop performances. Credit available for actors and directors. Prerequisite: 170A/170B or consent of instructor.
1-4 units, Spr (Duxbury, Lai)

DRAMA 172. Late Postmodern Experimental Theater — (Graduate students register for 272.) History and theory behind artists such as Richard Foreman, Robert Wilson, The Wooster Group, Forced Entertainment, Goat Island, and Societas Raffaello Sanzio. Assignments include critical writing, creative writing, and mise-en-scène. GER:DB-Hum
4-5 units (Fordyce) not given 2005-06

DRAMA 173. Studies in Creativity — The creative process in composing and performing a theatrical work.
3-5 units, Spr (Lai)

DRAMA 176. Dramaturgy Project — (Graduate students register for 276.) Serve as a dramaturg on any department production. Research the production’s text source, the writing of program notes, the compilation and editing of the playbill, and possible adapting/editing of the performance text or translating text from a foreign language.
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 177. Playwriting — (Graduate students register for 277.) The autobiographical monologic/poetic possibilities in performance art explored to learn the elements of playwriting. GER:DB-Hum
5 units, Win (Freed)

DRAMA 178. Intensive Playwriting — (Graduate students register for 278.) Goal is to develop new material for the stage or complete a play-in-progress. Focus is on essential elements of playwriting, emphasizing the process of revision, and culminating in public readings of highlights of plays-in-progress. Prerequisite: experience in playwriting or consent of instructor. GER:DB-Hum
5 units, Aut (Moraga), Spr (Freed)

DRAMA 179A. Teatro America Workshop: The Theater of Native/Chicano America — (Same as SPANLIT 287.) A Chicana feminist and indigeneous approach to the theory and practice of performance. Introduction to writing for the stage. Readings include plays, stories, and performance texts by Chicano/a and Native American writers. Public performance. Prerequisite: consent of instructor. GER:DB-Hum
5 units, Spr (Díaz-Sánchez)

DRAMA 180Q. Noam Chomsky: The Drama of Resistance — Stanford Introductory Seminar. Preference to sophomores. Chomsky’s ideas and work which challenge the political and economic paradigms governing the U.S. Topics include his model for linguistics; cold war U.S. involvements in S.E. Asia, the Middle East, Central and S. America, the Caribbean, and Indonesia and E. Timor; the media, terrorism, ideology, and culture; student and popular movements; and the role of resistance. GER:DB-Hum
3 units, Win (Rehm)

DRAMA 188Q. From Brecht to Müller: German Theater and Performance since World War II — Stanford Introductory Seminar. Preference to sophomores. History and aesthetics of theater in the German-speaking countries of Central Europe: the Fascist-Nationalist tradition of the Third Reich; Brecht’s influence; developments of the 60s; political stagnation of the 70s and 80s; and the end of the Cold War.
3-5 units, Aut (Weber)

DRAMA 200. Senior Project — Individual project on the work of a playwright, period, or genre. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 201A,B,C,D. Honors Colloquium — Individual supervision of off-campus internship. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

ADVANCED COURSES
Courses numbered 200 through 299 are designed for advanced undergraduates and graduates.

DRAMA 200. Senior Project — See “Undergraduate Programs” for description.
2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 201A,B,C,D. Honors Colloquium — See “Undergraduate Programs” for description.
1 unit, Aut, Win, Spr, Sum (Rayner)

DRAMA 202. Honors Thesis — See “Undergraduate Programs” for description. May be repeated for credit.
2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 205. Senior Project: Acting — Collaborative work on a project culminating in a production.
2-5 units, Aut, Win (Kostopoulos)

DRAMA 210A,B. Actor in Performance — Preference to Drama majors and minors and to the serious student interested in further training in the performing arts. Taught in the professional conservatory tradition, with the creation of an acting ensemble. Skill building in the areas of acting, movement, voice, and speech. How to analyze and play the dramatic action of the text. Guest teachers from the professional theater complement and expand the work of the ensemble. Limited enrollment. Prerequisite: interview with instructor.
4-5 units (Kostopoulos) alternate years, given 2006-07

DRAMA 210C. Actor in Performance: Ensemble Workshop
4-5 units (Kostopoulos) alternate years, given 2006-07
DRAMA 213. Stanford Improv Ensemble—By audition only, for members of the improvisation troupe. Special project work. Prerequisite: 103. (AU)
1-2 units, Aut, Win (Klein)

DRAMA 231. Advanced Stage Lighting Design—Individually structured class in lighting mechanics and design through experimentation, discussions, and written reports. Prerequisite: 131 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Ramsaur)

DRAMA 232. Advanced Costume Design—Individually structured tutorial for costume designers. May be repeated for credit. Prerequisite: 132 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Strayer)

DRAMA 233. Advanced Scene Design—Fast-paced, individually structured workshop. May be repeated for credit. Prerequisite: 133 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 234. Advanced Stage Management Project—For students stage managing a Department of Drama production. Prerequisite: 134.
2-9 units, Aut, Win, Spr, Sum (Duxbury)

DRAMA 235. Advanced Sound Design—Individually structured tutorial for sound designers. May be repeated for credit. Prerequisite: 135 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 240. Projects in Theatrical Production—(Same as 140; see 140.)
1-5 units, Aut, Win, Spr (Staff)

DRAMA 242. The Work of Art and the Creation of Mind—(Enroll in EDUC 200.)
4 units (Staff) not given 2005-06

DRAMA 250. Chekhov and Before—(Same as 150; see 150.)
4 units, Win (Arad)

DRAMA 251. Adaptation: Turning into Drama—(Same as 151; see 151.)
4 units, Spr (Arad)

DRAMA 260. Performance, Dance History, and Gender—(Same as 160; see 160; same as DANCE 160.)
4 units, Win (Ross)

DRAMA 261. Performance and Politics—(Same as 161; see 161.)
5 units (Rehm) not given 2005-06

DRAMA 262. Performance and the Text—(Same as 162; see 162.)
5 units (Rayner) not given 2005-06

DRAMA 263. Performance and America—(Same as 163; see 163.)
5 units, Aut (Elam)

DRAMA 264. Performance and Gender—(Same as 164; see 164.)
5 units (Phelan) not given 2005-06

DRAMA 265. Theater History: Classical to 1900—(Same as 165; see 165.)
4 units, Win (Lyons)

DRAMA 266. Theater History: 1900 to the Present—(Same as 166; see 166.)
4 units, Aut (Davies)

DRAMA 272. Late Postmodern Experimental Theater—(Same as 172; see 172.)
4-5 units (Fordyce) not given 2005-06

DRAMA 273. Studies in Creativity—The creative process in composing and performing a theatrical work.
3-5 units, Spr (Lai)

DRAMA 276. Dramaturgy Project—(Same as 176; see 176.)
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 277. Playwriting—(Same as 177; see 177.)
5 units, Win (Freed)

DRAMA 278. Intensive Playwriting—(Same as 178; see 178.)
5 units, Aut (Maraq), Spr (Freed)

DRAMA 290. Special Research—Individual project on the work of a playwright, period, or genre.
1-5 units, Aut, Win, Spr, Sum (Staff)

GRADUATE
Open to advanced undergraduates with consent of instructor.

DRAMA 300. Theories of Drama and Performance—Seminar. Critical theory including readings from Marx, Freud, and Nietzsche.
5 units, Aut (Apostolides)

DRAMA 301. From Theory to Criticism—Performance theory in readings from Austin, Derrida, Butler, Schenect, Turner, Phelan, Auslander, Foster, Roach, and Diamond.
5 units, Win (Phelan)

DRAMA 302. Research Methods in Drama—Projects involving the examination of live performance, play texts, and theories of drama. The principles of argument. Goal is a foundation for course work and writing the dissertation.
5 units (Elam) alternate years, given 2006-07

DRAMA 304D. Classical Seminar—(Same as HUMNTIES 321.) The cultural and political formation of ancient Athens and Rome. Homer, Aeschylus, Sophocles, Euripides, Aristophanes, Thucydides, Plato, Virgil, Petronius, Seneca, and St. Augustine.
3-5 units, Aut (Rehm)

DRAMA 305A. Varieties of Time—Cosmological, mechanica, literary, and performative time: how the constructed, expressive, and lived perceptions of temporality intersect to syncopate in consciousness as history and ideology, memory and anticipation, space and change. Readings from Augustine, Ricoeur, Bergson, Merleau-Ponty, Bateson, Shakespeare, Chekhov, Beckett, and contemporary theater.
3-5 units, Win (Rayner)

DRAMA 320. Basic Approaches to Teaching Acting—Workshop. The pedagogy of acting to prepare graduate student teachers for introductory classes in acting.
1-3 units (Kostopoulos) alternate years, given 2006-07

DRAMA 321. Pro Seminar—Workshop. Skills needed to participate in the academic profession including abstract, conference presentation, and dissertation or book chapter.
1-3 units (Phelan) not given 2005-06

DRAMA 345. Shakespeare, Islam, and Others—(Enroll in ENGLISH 373D, COMPLIT 311.)
5 units, Win (Parker)

DRAMA 358C. Beckett—Seminar. Beckett’s plays and late writing, which have been described as proto-performance art. Recent Beckett scholarship, including new work about his analysis with Bion.
3-5 units, Spr (Phelan)

DRAMA 370-374. Graduate Directing Workshop—Core curriculum for graduate students in directing. Prerequisite: consent of instructor.

DRAMA 370. Concepts of Directing—Directorial definitions of time, space, movement, and the performer/spectator relationship. Experimentation with texts from literary and other sources, including works from the realistic tradition in drama, using a multi-form performance space.
5 units, Aut (Weber)
DRAMA 371. Visual Aesthetics for the Director — International theater design emphasizing the last thirty years. Productions from Europe, Asia, and the U.S.
2 units, Win (Eddelman)

3 units, Win (Elliott, Brown)

DRAMA 373. Directing and Dramaturgy — Dramaturgy, directorial methods, and visual concepts in the production of plays from the Elizabethan tradition to postmodernist texts. Work on the text is tested in the staging of scenes.
3-5 units, Aut (Weber)

DRAMA 374. Graduate Directors’ Performance Project — Production of a full-length play, selected in consultation with faculty. Project is designed by graduate students, sometimes in collaboration with undergraduate design students, under the supervision of design faculty. Four to five weeks rehearsal. Public performance.
3-5 units, Aut, Win, Spr, Sum (Ramsaur, Staff)

DRAMA 375. Graduate Directors’ Dramaturgy Project — Serve as a dramaturg on any department production. Work includes research on the production’s text source, the writing of program notes, and the compilation and editing of the play bill. Possible adapting/editing of the performance text, and translating text from a foreign language.
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 376. Graduate Directors’ Staged Reading Project — Presentation of a new or newly adapted work for the stage, in a mode employed in professional theater for the development of new plays. Two to four rehearsals. Public performance.
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 377. Graduate Directors’ Directed Reading Project — Directed readings of new or newly adapted works are offered. Students and faculty must agree on project.
2 units, Aut (Brown)

DRAMA 390. Tutorial
1-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 399. Dissertation Research
1-9 units, Aut, Win, Spr, Sum (Staff)

BLACK PERFORMING ARTS DIVISION
Students should consult the quarterly Time Schedule for offerings.

DANCE DIVISION
Registration for most dance classes takes place at the first class meeting; further registration information is printed in the Time Schedule each quarter. Some class sizes are limited and require advanced registration in the Dance office in Roble Gym. Series classes (I, II, III) should be taken in order, or with consent of instructor.

INTRODUCTORY
Open to all students. No previous dance experience needed.

DANCE 40. Modern Dance I — The technical and creative principles of modern dance to develop the body as an expressive instrument.
2 units, Aut, Win, Spr (Cashion)

DANCE 42. Dances of Latin America — Dances of Argentina, Brazil, Chile, Colombia, Cuba, Mexico, Peru, and Puerto Rico.
2 units, Aut (Cashion)

DANCE 43. Afro-Brazilian and Afro-Peruvian Dance — Brazilian dance forms of the Northeast: samba, coco, maculele, bloco afro. Peruvian dance of the coastal region: festejo and zamacueca.
2 units, Win (Cashion)

DANCE 44. Jazz Dance I — Basic techniques emphasizing current jazz style. Historical jazz steps enhance understanding of contemporary jazz forms.
2 units, Win, Spr (Kramer)

DANCE 45. Improvisation Plus Contact — The development of improvisation skills as a creative performance practice and as a basis for choreography; techniques of contact improvisation.
2 units, Win, Spr (Kramer)

DANCE 46. Social Dances of North America I — Introduction to the partner dances found in American popular culture: waltz, swing, tango, club two step, cha cha, merengue, and salsa. Fee. (AU)
1 unit, Aut, Win, Spr (Kramer)

2 units, Aut (Elliott, Brown)

DANCE 50. Social Dances of North America II — Swing dancing: the early Lindy of the 20s; 6- and 8-count Lindy hop, shag, Big Apple. Partnering and improvisation. Swing’s crosscultural influences and personal creativity.
2 units, Win (Powers)

DANCE 51. West African Dance — Movements and choreography from Senegal, Ghana, and the Congo. Elements unique to all African dance movement: body isolation, polyrhythmic movement, and body posture. Live drumming. Open to all levels of dancers.
2 units, Aut (Malonga)

DANCE 58. Beginning Hip-Hop — Steps and styling in one of America’s 21st-century vernacular dance forms. May be repeated for credit.
1 unit, Aut (Reddick)

DANCE 59. Intermediate-Advanced Hip-Hop — Steps and styling in one of America’s 21st-century vernacular dance forms. May be repeated for credit.
1 unit, Aut (Reddick)

INTERMEDIATE
Open to all undergraduates with dance experience.

DANCE 100. Modern Dance II — Intermediate technique. Improvisation and composition in directed studies. May be repeated for credit.
2 units, Aut (Frank), Win, Spr (Kramer)

DANCE 144. Jazz Dance II — Emphasis is on alignment, control, rhythmic coordination, and contemporary mixture of styles.
2 units, Win, Spr (Moses)

2 units, Aut, Spr (Powers)

DANCE 147. Living Traditions of Swing — Swing dancing: the early Lindy of the 20s; 6- and 8-count Lindy hop, shag, Big Apple. Partnering and improvisation. Swing’s crosscultural influences and personal creativity.
2 units, Win (Powers)

DANCE 148. Intermediate Ballet — Continuation of 48, repeating the fundamentals with increased complexity and introducing additional movement vocabulary.
2 units, Aut, Win, Spr (Brown)

ADVANCED
Open to all undergraduates with dance experience.

2 units, Aut (Mohr), Win, Spr (Frank)

DANCE 145. Jazz Dance III — Advanced level of technical proficiency in a contemporary mixture of styles. Focus is on performance skills of projection and movement quality. Prerequisite: consent of instructor.
2 units, Win, Spr (Moses)

DANCE 149. Advanced Ballet — Professional-level class in a supportive environment. Comprehensive classical ballet technique including pointe work if the student desires.
2 units, Aut, Win, Spr (Elliott)
DANCE 156. Social Dances of North America III — Advanced survey of the partner dances found in American popular culture: hustle, waltz, redowa, tango, cha cha, salsa, samba. Prerequisite: 146 or equivalent experience.
   2 units, Win (Powers)

PERFORMANCE
DANCE 23. Public Performance — For students participating in Dance Division performances.
   1 unit, Aut, Win, Spr (Kramer)
DANCE 27. Faculty Choreography — Rehearsal and performance of faculty choreography. Selection by audition.
   2 units, Aut, Win, Spr (Staff)
DANCE 57. Guest Artist — Students perform the work of a visiting artist. Audition required. May be repeated for credit.
   2 units, Aut, Win, Spr (Mohr)
DANCE 100. Performance Workshop — Student choreography is mentored to develop composition and performance skills. Required for participation in certain faculty and/or student-directed productions.
   2 units, Win, Spr (Frank, Kramer)

THEORY
Classroom or classroom/studio combination courses on topics in Dance and Performance.
DANCE 133. History of the Waltz — From Vienna in 1800. Redowa and mazurka, waltz variations, the 20th-century hesitation waltz, Parisian valse musette, and 30s Boston and waltz swing. Studio technique with performance practice for stage.
   2 units, Spr (Powers)
DANCE 134. Ballet Folklórico — The history of Ballet Folklórico including its roots in Mexican folk and N. American modern dance, Guadalajara choreographic narratives, and U.S. performance ensembles. GER:EC-GlobalCom
   3 units, Aut (Cashion)
DANCE 158. The Body in Motion — Approaches and methods in body therapy: body maintenance and conditioning, the Laban movement system, body-mind centering. GER:DB-Hum
   3 units, Aut (Shapiro)
DANCE 160. Performance, Dance History, and Gender — (Same as DRAMA 160/260.) Shifting gender identities in western theatrical dance from the mid-18th to mid-20th centuries. The birth and development of theatrical dance. Changing notions of gender construction and the body in performance. GER:DB-Hum, EC-Gender
   4 units, Win (Ross)
DANCE 161. Dance and Live Art in the Twentieth Century — History and development of postmodern dance and performance art. Topics include Dandyism, Bauhaus experiments, Black Mountain College, Judson Church, contact improvisation, the culture wars, and performance and illness. GER:DB-Hum
   4 units, Win (Ross)
DANCE 166. History of Social Dance in Western Culture — Movement and historic social dance from the past five centuries, including studio technique and history. Performance practices for stage, including deportment, body language, and demeanor distinctive to each era.
   2 units (Powers) alternate years, given 2006-07
DANCE 168. Dance and Culture in Latin America — Dance forms of Latin America as aspects of human behavior. Emphasis is on cultural influences (European, African, and indigenous) that have shaped the ritual and social dance forms of Argentina, Brazil, Chile, Cuba, Mexico, and Puerto Rico. GER:DB-Hum, EC-GlobalCom
   4 units, Spr (Cashion)

DANCE 169. Choreography: Creation, Staging, and Reconstruction — Skills and criteria for the choreographic process. Invention, staging, and reconstruction. The creative process and practical considerations in making a dance work.
   3 units, Aut (Kramer)
DANCE 190. Special Research — Topics related to the discipline of dance.
   1-5 units, Aut, Win, Spr, Sum (Staff)
DANCE 191. Independent Research — Individual supervision of off-campus internship. Prerequisite: consent of instructor.
   1-18 units, Aut, Win, Spr, Sum (Staff)
DANCE 197. Art and Community: Dance in Prisons — Participatory seminar. The nexus of art, community, and social action, using dance to study how the performing arts affect self-construction, perception and experiences of embodiment, and social control for incarcerated teenagers in Santa Clara Juvenile Hall. GER:DB-Hum
   4 units, Win (Ross)

ADVANCED THEORY
Courses numbered 200 through 299 are designed for advanced undergraduates and graduate students.
DANCE 242. The Work of Art and the Creation of Mind — (Enroll in EDUC 200.)
   4 units (Staff) not given 2005-06
DANCE 290. Special Research — Individual project on the work of any choreographer, period, genre, or dance-related topic.
   1-18 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES
Courses approved for the Drama major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN
DRAMA 101A. Contemporary Theater — (Same as GERLIT 195.)
   5 units, Spr (Kramer)
DRAMA 153F. Exploration in Crosscultural Theater
   3 units, Spr (Friedlander)
EAST ASIAN STUDIES

Director: Carl Bielefeldt
Affiliated Faculty and Staff:
Anthropological Sciences: Melissa Brown, Arthur P. Wolf
Art and Art History: Melinda Takeuchi, Richard Vinograd
Business: Kenneth Singleton
Comparative Literature: David Palumbo-Liu
Cultural and Social Anthropology: Harumi Befu (emeritus), Miyako Inoue, Matthew Kohrman (on leave)
East Asian Studies: Joo-yoon Jung, Young Kwan Yoon, E. Anthony Zaloom
Economics: Masahiko Aoki
History: Gordon Chang, Peter Duus (emeritus), Harold L. Kahn (emeritus), Mark Lewis, Mark Mancall, Chihio Sawada, Matthew Sommer, Kären Wigen
Linguistics: Peter Sells
Political Science: John W. Lewis (emeritus), Lyman Miller, Daniel Okimoto, Jean C. Oi (on leave)
Religious Studies: Carl Bielefeldt, Keila Diehl, Bernard Faure (on leave Winters, Spring), Naoko Kumada, Fabrizio Pregadio, Lee H. Yearley, Michael Zimmermann
Sociology: Gi-Wook Shin, Andrew Walder (on leave)
Other Stanford faculty with teaching or research interests related to East Asia: Takeshi Amemiya (Economics), Barton Bernstein (History), Richard Dasher (Electrical Engineering), Larry Diamond (Hoover Institution), Walter P. Falcon (Institute for International Studies), Thomas Metzger (Hoover Institution), Ramon Myers (Hoover Institution), Leonard Ortolano (Civil and Environmental Engineering), Mark Peatit (Hoover Institution), Karen Seto (Geological and Environmental Sciences)
Center Offices: Building 50, Main Quad
Mail Code: 94305-2034
Phone: (650) 723-3362, 723-3363; fax: (650) 725-3350
Web Site: http://www.stanford.edu/dept/CEAS/

The Center for East Asian Studies (CEAS) coordinates all University instructional, research, and special activities related to East Asia, Japan, and Korea. Faculty and students who share a common interest in the study of East Asia are brought together by the center from a broad range of academic concerns covering nearly every discipline and historical period. As a National Resource Center designated by the Department of Education, Title VI, the center is also involved in programs that link the University’s resources on East Asia with civic groups, secondary schools, and local colleges in the San Francisco Bay Area. CEAS belongs to the Division of International and Comparative Area Studies in the School of Humanities and Sciences, and is affiliated with the Walter H. Shorenstein Asia-Pacific Research Center (http://iaparc.stanford.edu/).

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major in East Asian Studies enables students to obtain a comprehensive understanding of East Asia broadly conceived, which is the vast area stretching from Japan through Korea and China to the contiguous areas of the Central Asian land mass. Majors in East Asian Studies begin or continue the mastery of Chinese, Japanese, or Korean. Within the humanities or social sciences, they focus on a particular sub-region, for example, Japan, South China, Hong Kong and Taiwan; or western China and Central Asia; or a substantive issue involving the region as a whole, such as environment, public health, rural development, historiography, cultural expression, Buddhism’s impact on East Asian cultures, or traditional Japanese civilization. The major seeks to reduce the complexity of a region to intellectually manageable proportions and illuminate the interrelationships among the various facets of a society. Potential majors must submit a Student Proposal for a Major in East Asian Studies not later than the end of the first quarter of the junior year for approval by the East Asian Studies undergraduate committee.

Majors must complete at least 75 units of course work on China, Japan, and/or Korea. Courses to be credited toward major requirements must be completed with a grade of ‘C’ or better. Requirements are:

1. **Language**: proficiency in Chinese, Japanese, or Korean language at the second-year level or above, to be met either by course work or examination. Students who meet the requirement through examination are still expected to take an additional 1.5 units of language at a higher level, or literature courses taught in the language, or the first year in an additional Asian language. No more than 30 units of language courses are counted toward the major.

2. **Gateway Courses**: a minimum of three gateway courses, one in each area. The gateway courses are:
   a. **Art, Literature and Religion**
   ARTHIST 2. Ideas and Forms in Asian Art
   CHINGEN 91. Traditional East Asian Civilization: China
   JAPANGEN 92. Traditional East Asian Civilization: Japan
   RELIGST 150 Mahayana Buddhism in East Asia
   RELIGST 154 Buddhism Today: Responses to New Global Challenges
   b. **History**
   HISTORY 92A. Historical Roots of Modern East Asia
   HISTORY 92B. East Asia in the Age of Imperialism
   HISTORY 291E. Maps, Borders, and Conflict in East Asia
   c. **Contemporary Social Sciences**
   ANTHSCI 7. Marriage and Kinship
   POLISCI 148S: The U.S. and Asia During the Cold War
   SOC 167A. Asia-Pacific Transformation

3. **Substantive Concentration**: additional courses on East Asia, one of which must be a seminar.

4. **Capstone Essay**: completion of a paper of approximately 7,500 words, written either in a directed reading course or for one of the courses in item 3 above, which should be built upon the student’s thematic interests. A 1-unit Spring Quarter course is required for all majors, in which they discuss and work through their capstone essays or senior honors theses.

5. At least one quarter overseas in the country of focus.

Majors are encouraged to distribute their course work among at least three disciplines and two subregions in Asia. (The subregions need not be traditionally defined. Examples include China, Japan, or Korea; or, in recognition of the new subregions which are emerging: South China, Hong Kong, and Taiwan; or Central Asia, Xinjiang, and Mongolia.) At least four courses must have a thematic coherence built around a topic such as:

- Buddhism’s impact on East Asian cultures
- Culture and society of modern Japan
- Environmental issues of Asia
- Fine arts and literature in late imperial China
- Foreign Policy in East Asia
- Social transformation of modern China
- Traditional Japanese civilization

An East Asian Studies course that satisfies the University Writing in the Major requirement (WIM) should be completed before beginning the senior essay. This year, CHINGEN 133, JAPANGEN 138, and HISTORY 256 satisfy the WIM requirement.

The courses for the major must add up to at least 75 units and all must be taken for a letter grade.
MINORS

The goal of the minor in East Asian Studies is to provide the student with a broad background in East Asian culture as a whole, while allowing the student to focus on a geographical or temporal aspect of East Asia. The minor may be designed from the following, for a total of six courses. All courses should be taken for a letter grade.

1. Three gateway courses, one in each area (see above for listing of gateway courses).
2. One undergraduate seminar and two other courses from among those listed each quarter as approved for East Asian Studies majors, including literature courses but excluding language courses.

Applications for the minor are due no later than the second quarter of the junior year.

HONORS PROGRAM

Majors with a grade point average (GPA) of 3.25 or better in all courses related to East Asia may apply for the honors program no later than the final quarter of the junior year. Application entails submitting an honors prospectus to the student’s adviser for approval. Admission is granted by the CEAS undergraduate committee, acting on the adviser’s recommendation.

Honors requirements are satisfactory completion of:
1. An honors thesis of high quality of approximately 10,000 words to be submitted in lieu of the senior capstone essay
2. 5 to 10 units of directed individual study in connection with the thesis project
3. One advanced level colloquium or seminar dealing with China, Japan, or Korea

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

The center admits a limited number of Stanford undergraduates to work for a coterminous M.A. degree in East Asian Studies. Applications must be submitted by January 11 of the junior year. Applicants are expected to meet the same standards as those seeking admission to the M.A. program: they must submit a written statement of purpose; a Stanford transcript; three letters of recommendation, at least two of which should be from members of the department of concentration; and scores from the General Test of the Graduate Record Exam. In addition, applicants must provide a list of courses they intend to take to fulfill degree requirements. The decision on admission rests with the M.A. admissions committee of the Center for East Asian Studies. Students must meet all requirements for both B.A. and M.A. degrees. They must complete a total of 15 full-time quarters or the equivalent, or three full quarters after completing 180 units for a total of 225 units.

For University coterminous degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

OVERSEAS PROGRAMS

Internships — CEAS provides overseas summer internship opportunities in China, Japan, and Korea to undergraduates in any major. Host organizations include government and non-profit organizations, and media, financial, and electronic companies. Applications are due in February.

Language Study — CEAS provides undergraduate fellowships for language study in China, Japan, or Korea; students must simultaneously apply to a pre-approved language program abroad. Applications are due in February.

Overseas Seminars — Three-week seminars in China, Japan, or Korea are jointly offered in late summer by CEAS and the Overseas Studies Program office. See http://osp.stanford.edu in late autumn for next summer’s offerings.

For more information about CEAS overseas programs, contact Denise Chu at denisech@stanford.edu or see http://www.stanford.edu/dept/CEAS.

DISTINGUISHED PRACTITIONERS

Eminent professionals whose work in East Asia brings real-life knowledge to the classroom serve as visiting lecturers through the CEAS Distinguished Practitioners from East Asia program. Teaching this year are: Dr. Young Kwan Yoon, former Minister of Foreign Affairs and Trade of the Republic of Korea (EASTASN 185K, International Relations and Korea), and Anthony Zaloom, former partner at Skadden, Arps, Tokyo and Beijing (EASTASN 183C, Doing Business in China).

EAST ASIAN STUDIES (PAYSON J. TREAT) THEME HOUSE

EAST House, on campus at Governor’s Corner, is an undergraduate residence that houses 60 students and offers them a wide variety of opportunities to expand their knowledge, understanding, and appreciation of Asia. A member of the East Asian Studies faculty serves as resident fellow of EAST House. Assignment is made through the regular undergraduate housing draw.

STANFORD IN BEIJING

Stanford in Beijing allows Stanford undergraduates to live and study at Peking University. Classes are taught in English by a Stanford faculty-in-residence and Peking University professors. Students are considered enrolled in Peking University and may participate in athletic and musical activities on campus, including Chinese art and calligraphy, tai-chi, and wushu. For more information, contact the Overseas Studies office at Sweet Hall, or see http://osp.stanford.edu/program/beijing/.

KYOTO CENTER FOR JAPANESE STUDIES

Students interested in the study of Japanese language, history, culture, and social organization can apply to the Kyoto Center for Japanese Studies, a September-to-April program managed by Stanford that includes students from eight other American universities. Every Spring Quarter, the Stanford Center in Technology and Innovation, also at the Kyoto Center, offers an academic quarter focused on Japanese organizations and the political economy of research, development, and production of high technology and advanced industries. An internship in a Japanese firm, laboratory, or agency follows the training program. For information about the Kyoto Center, contact the Overseas Studies office at Sweet Hall, telephone (650) 723-3558.

GRADUATE PROGRAMS

MASTER OF ARTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The M.A. program in East Asian Studies is designed both for students who plan to complete a Ph.D., but who have not yet decided on the particular discipline in which they prefer to work, and for students who wish to gain a strong background in East Asian Studies in connection with a career in nonacademic fields such as business, law, education, journalism, or government service. However, career-oriented students should realize that a master’s degree in East Asian Studies alone may provide insufficient preparation for work in many professions, and they are advised to plan for additional professional training.

The master’s degree program allows a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. The director of the center assigns faculty advisers to all students. Members of the staff and faculty are available for academic and career planning. The M.A. program is normally completed in two academic years, but students can shorten this time by receiving credit for prior language work or by attending summer sessions. Students are urged to complete the degree requirements within one year if their background makes it possible.

Applicants must submit scores for the General Test of the Graduate Record Examination. Foreign applicants are also required to take the Test of English as a Foreign Language. Applications for admission and financial aid should be made online; a paper application, if required, may
be obtained from Graduate Admissions, Old Union, 520 Lasuen Mall, Stanford University, Stanford, California 94305-3005.

The basic requirements for the M.A. degree in East Asian Studies are as follows:

**Language Requirement**—Students must complete the equivalent of Stanford’s first three years of language training in either Chinese, Japanese, or Korean. Students entering the program without any language preparation should complete first- and second-year Chinese, Japanese, or Korean within the first year of residence at Stanford. This will necessitate completing a summer language program. Language courses taken at Stanford must be for letter grades.

The language requirement may be satisfied in part or in full by placing into an appropriate Stanford language class through the language proficiency exam given by the Department of Asian Languages. Students who fulfill this minimum three-year language requirement before completing other requirements are encouraged to continue language study, or take courses in which Chinese or Japanese are used, for as long as they are in the program. Language courses beyond the third-year level may be applied to the Area Studies requirement discussed below.

Students in the M.A. program are eligible to apply for the Inter-University language programs in Beijing and Yokohama. For further information, see the "Institute for International Studies" section of this bulletin. Work completed in one of these programs may be counted toward the M.A. degree’s language requirement.

**Area Studies Requirement**—Students must complete the 1-unit core course, EASTASN 330, and an additional nine courses numbered 100 or above related to East Asia. (Chinese and Japanese language courses numbered 100-199 are considered to be at the third-year level and do not count toward the courses required for the degree.) The nine courses must be 3 or more units, taken for a letter grade. At least 23 units must be designated primarily for graduate students (typically at the 200-300 levels).

An integral part of the program is training in research and a demonstration of research ability in a discipline. Three courses, one of which must be a seminar, colloquium, or advanced course in which a research paper on China, Korea, or Japan is written, must be within a single department. The six additional area courses may be taken in departments of the student’s choosing. Some theory-oriented or methodological courses may be used to meet part of these requirements provided they are demonstrably useful for understanding East Asian problems. Credit toward the Area Studies requirement is not given for courses taken before entering the M.A. program. Students in this program, however, may take courses for exchange credit at the University of California, Berkeley, with the approval of their adviser and the Office of the Registrar.

**M.A. Thesis Requirement**—A master’s thesis, representing a substantial piece of original research, should be filed with the center’s program office as part of the graduation requirements. With the adviser’s approval, the master’s thesis requirement may be satisfied by expanding a research paper written for an advanced course.

**DUAL DEGREE PROGRAMS**

**EAST ASIAN STUDIES AND LAW**

This program grants an M.A. degree in East Asian Studies and a Doctor of Jurisprudence (J.D.) degree. It is designed to train students interested in a career in teaching, research, or the practice of law related to East Asian legal affairs. Students must apply separately to the East Asian Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student’s background and level of training in Chinese, Japanese, or Korean.

**EAST ASIAN STUDIES AND EDUCATION**

This program grants an M.A. degree in East Asian Studies and a secondary school teaching credential in social studies. To be eligible for this program, students should apply to the M.A. program in East Asian Studies and then apply to the Stanford Teacher Education Program during the first year at Stanford. Completing the dual program requires at least two years, including one summer session when beginning the education component of the program.

**EAST ASIAN STUDIES AND BUSINESS**

This program grants an M.A. degree in East Asian Studies and a Master of Business Administration degree. Students must apply separately to the East Asian Studies M.A. program and the Graduate School of Business and be accepted by both. Completing this combined course of study requires approximately three academic years (perhaps including summer sessions), depending on the student’s background and level of training in Chinese, Japanese, or Korean language.

**DOCTORAL PROGRAMS**

Stanford does not offer a Ph.D. in East Asian Studies. However, there are more than 100 doctoral students with a specialization on China, Korea, or Japan within various departments and schools of the University. The departments that offer an East Asian concentration are: Anthropological Sciences, Art and Art History, Asian Languages, Comparative Literature, Cultural and Social Anthropology, History, Linguistics, Political Science, Religious Studies, and Sociology. It is also possible to specialize in East Asia within some of the doctoral programs of the professional schools of Business, Education, and Law. Inquiries should be directed to the individual department or school concerning.

**POSTDOCTORAL PROGRAMS**

The Center for East Asian Studies offers two postdoctoral fellowships in Chinese Studies each year. Two postdoctoral fellowships in Japanese Studies are available from the Stanford Institute of International Studies, and the Asia-Pacific Research Center has a postdoctoral program in contemporary Chinese Studies.

**FINANCIAL AID**

Students in graduate programs who plan to do work in Chinese, Japanese, or Korean language, and area studies courses, may be eligible for Foreign Language and Area Studies (FLAS) fellowships and are encouraged to apply for them at the time of application to Stanford. Recipients of FLAS fellowships must be American citizens or permanent residents. For further information, see http://www.stanford.edu/dept/CEAS/.

**COURSES**

The courses listed below deal primarily with China, Japan, and/or Korea. Many other theoretical and methodological courses within the various departments at Stanford are taught by faculty who are East Asian specialists; these courses often have a substantial East Asian component and may be found under the department listings in this bulletin.

**EAST ASIAN LANGUAGES**

For courses in Chinese, Japanese, and Korean language instruction with the subject codes CHINLANG, JAPANLNG, and KORLANG, see the "Language Center" section of this bulletin. For courses in Classical Chinese with the subject code CHINLIT, see the “Asian Languages” section of this bulletin.

**UNDERGRADUATE**

EASTASN 5. East House Seminar — May be repeated for credit.
1 unit, Aut, Spr (Bielefeldt)

EASTASN 100E. Political Economy of Development and Reform in East Asia — (Same as ICA 100E.) Comparison of economic take-offs, crises, and reforms in China, S. Korea, and Japan. Institutional foundations of economic development; how such institutions generated problems, have undergone reform, and test the E. Asian model of development and reform.
5 units, Spr (Jung)

3-5 units, Win (Zalom)
EASTASN 185K. International Relations and Peace Building on the Korean Peninsula — Distinguished practitioner course; taught by former S. Korean foreign minister. Korea as the only remaining divided nation from the Cold War. The nature of and major issues related to Cold War confrontation on the Korean peninsula; scenarios for peace building in Korea and implications for international relations.

3-5 units, Aut (Yoon)

ADVANCED

EASTASN 191. Journal of East Asian Studies
1 unit, Aut, Win, Spr (Staff)

EASTASN 198. Senior Colloquium in East Asian Studies
1 unit, Spr (Bielefeldt)

EASTASN 199. Directed Reading
1-9 units, Aut, Win, Spr, Sum (Staff)

EASTASN 200E. Globalization and the State in East Asia — (Same as ICA 200E.) Changes in state economic roles at different stages of development in China, S. Korea, and Japan. How globalization has affected the functions and institutions of the state. Roles of the state in the economic miracle, financial crisis, and the reform process. Changes in institutions, functions, and authorities. The impact of political context in reform outcomes.
5 units, Win (Jung)

EASTASN 330. Core Seminar: Issues and Approaches in East Asian Studies — For East Asian Studies M.A. students only.
1 unit, Aut (Bielefeldt)

INTERDEPARTMENTAL OFFERINGS

See the respective department listings for course descriptions and General Education Requirements (GER) information.

ANTHROPOLOGICAL SCIENCES

ANTHSCI 7. Marriage and Kinship
4-5 units, Spr (Wolf)

ANTHSCI 128B/228B. Globalization and Japan
3-5 units, Spr (Befu)

ANTHSCI 203. Topics in the Anthropology of China and Taiwan
3-5 units, Win (Brown)

ART HISTORY

ARTHIST 2. Ideas and Forms in Asian Art
5 units, Win (Takeuchi)

4 units, Aut (Takeuchi)

ARTHIST 185/385. Art in China’s Modern Era
4 units, Win (Vinograd)

ARTHIST 187/387. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868
4 units (Takeuchi) not given 2005-06

ARTHIST 282A. Imagining the Imperial: Images of the Court in Late Ming Dynasty Public Culture
5 units, Win (Staff)

ARTHIST 283A. Paris and Shanghai: Sites of Modernity
5 units, Spr (Larkin, Vinograd)

ARTHIST 287. Pictures of the Floating World: Images from Japanese Popular Culture
5 units, Spr (Takeuchi)

CHINESE GENERAL

For complete listings of Chinese language and literature courses, see the “Asian Languages” section of this bulletin.

CHINGEN 51. Chinese Calligraphy
1-2 units, Spr (Chuang)

CHINGEN 91. Traditional East Asian Civilization: China
5 units, Aut (Rusk)

CHINGEN 131/231. Chinese Poetry in Translation
4 units, Win (DiBello)

CHINGEN 132/232. Chinese Fiction and Drama in Translation
4 units (J. Wang) not given 2005-06

CHINGEN 133/233. Literature in 20th-Century China
4 units, Spr (Jones)

CHINGEN 135. Lovers, Drinkers, and Fighters: The World of the Chinese Martial Arts Novel
4 units (Kam) not given 2005-06

CHINESE LITERATURE

For complete listings of Chinese language and literature courses, see the “Asian Languages” section of this bulletin.

CHINLIT 161/261A. Passion in Late Imperial Literature
4 units (Levis) not given 2005-06

CHINLIT 167/267. What Isn’t an Author?: Forgery and Attribution in Chinese and Western Literature
3-5 units, Aut (Rusk)

CHINLIT 201. Proseminar: Bibliographic and Research Methods in Chinese Studies
5 units, Aut (Dien)

CHINLIT 263. Lyric (Shih) I
2-4 units, Win (Wang)

CHINLIT 271. Traditional Chinese Fiction: Short Stories
2-4 units (J. Wang) not given 2005-06

CHINLIT 272. Traditional Chinese Fiction: Novels
2-4 units (J. Wang) not given 2005-06

CHINLIT 381. Early Chinese Thought
5 units (Levis) not given 2005-06

CULTURAL AND SOCIAL ANTHROPOLOGY

CASA 77/277. Japanese Society and Culture
5 units, Win (Inoue)

CASA 135X. Pilgrimage and Sacred Landscapes
4 units, Win (Diehl)

CASA 141. Tibetan Buddhism and Culture in Exile
5 units, Aut (Diehl)

ECONOMICS

ECON 124. Contemporary Japanese Economy
5 units, Win (Aoki)

ELECTRICAL ENGINEERING

EE 402A. Topics in International Technology Management
1 unit, Aut (Dasher)

EE 402T. Entrepreneurship in Asian High-Tech Industries
1 unit, Spr (Dasher)

HISTORY

HISTORY 90Q. Buddhist Political and Social Theory
5 units, Aut (Mancall)

356
HISTORY 92A. The Historical Roots of Modern East Asia  
5 units, Spr (Miller)

HISTORY 92B. East Asia in the Age of Imperialism  
5 units, Aut (De Boer)

HISTORY 192/392A. China: The Early Empires  
5 units (M.E. Lewis) not given 2005-06

HISTORY 193. Late Imperial China  
5 units, Spr (Sommer)

HISTORY 194B. Late Medieval and Early Modern Japan  
5 units, Win (Wigen)

HISTORY 195. Introduction to Korean History and Culture  
5 units (Sawada) not given 2005-06

HISTORY 256/356. U.S.-China Relations: From the Opium War to Tiananmen  
5 units, Win (Chang)

HISTORY 291B. Modern China  
4-5 units, Spr (Henriot)

HISTORY 291E. Maps, Borders, and Conflict in East Asia  
5 units, Aut (Wigen)

HISTORY 293/392B. Law and Society in Late Imperial China  
5 units, Aut (Sommer)

HISTORY 293J. Korean History and Culture through Film  
5 units, Spr (Sawada)

HISTORY 295J/395J. Chinese Women’s History  
5 units, Spr (Sommer)

HISTORY 297E. The Meiji Culture  
5 units, Win (Duass)

HISTORY 297F. Japan Since 1945  
5 units, Win (Duass)

HISTORY 392C. Key Topics in Qing History  
5 units, Spr (Sommer)

HISTORY 394A. Directions in Asian Studies  
5 units (Wigen) not given 2005-06

HISTORY 396D. Modern Japan  
5 units, Spr (Wigen)

HISTORY 492A,B. The Family in Early China  
4-5 units (M. E. Lewis) not given 2005-06

HISTORY 494. The Body in Early China  
5 units, Win (M. E. Lewis)

HISTORY 495A,B. Qing Legal Documents  
5 units, A: Win, B: Spr (Sommer)

HISTORY 496A,B. Research Seminar on Modern China  
5 units, Spr (Henriot)

JAPANESE GENERAL  
For complete listings of Japanese language and literature courses, see the “Asian Languages” section of this bulletin.

JAPANGEN 51/151. Japanese Business Culture  
2-5 units, Win (Dasher)

JAPANGEN 73N. Japanese Horror: The Tropes of the Vengeful Ghost  
4 units, Spr (Reichert)

JAPANGEN 92. Traditional East Asian Civilization: Japan  
5 units, Win (Levy)

4 units (Reichert) not given 2005-06

JAPANGEN 137. Classical Japanese Literature in Translation  
4 units, Aut (Nakamura)

JAPANGEN 138/238. Survey of Modern Japanese Literature in Translation  
4 units, Aut (Reichert)

JAPANGEN 148/248. Modern Japanese Narratives: Literature and Film  
2-5 units, Spr (Levy)

JAPANGEN 166. Japanese Buddhism  
1-5 units, Aut (Odagiri)

JAPANESE LITERATURE  
For complete listings of Japanese language and literature courses, see the “Asian Languages” section of this bulletin.

JAPANLIT 170/270. The Tale of Genji and Its Historical Reception  
4 units, Spr (Carter)

JAPANLIT 201. Proseminar: Introduction to Graduate Study in Japanese  
4-5 units (Carter) not given 2005-06

JAPANLIT 260. Japanese Poetry and Poetics  
2-4 units, Win (Carter)

JAPANLIT 281. Japanese Pragmatics  
4 units, Win (Staff)

JAPANLIT 282. Japanese Sociolinguistics  
4 units, Win (Satoh)

JAPANLIT 296. Readings in Modern Japanese Literature  
2-5 units, Aut (Levy)

JAPANLIT 298. The Theory and Practice of Japanese Literary Translation  
2-5 units, Spr (Levy)

JAPANLIT 350. Japanese Historical Fiction  
3-5 units (Carter) not given 2005-06

JAPANLIT 381. Topics in Pragmatics and Discourse Analysis  
3-5 units (Matsumoto) not given 2005-06

JAPANLIT 396. Modern Japanese Literature  
3-5 units (Staff) not given 2005-06

MATERIAL SCIENCE  
MATSCI 159Q. Japanese Companies and Japanese Society  
3 units, Spr (Sinclair)

MUSIC  
MUSIC 164/264. Ritual Musics of the World  
4 units (Diehl) not given 2005-06

POLITICAL SCIENCE  
POLISCI 112/312. Japanese Foreign Policy  
5 units, Aut (Okimoto)

POLISCI 115R. International Relations of Korea  
5 units, Win (Kang)

POLISCI 140L. China in World Politics  
5 units (Miller) not given 2005-06

POLISCI 148/348. Chinese Politics: The Transformation and the Era of Reform  
5 units (Oi) not given 2005-06
RELIGST 308. Medieval Japanese Buddhism
3-5 units, Aut (Faure)

RELIGST 313. Buddhist Iconography and Ritual
3-5 units (Faure) not given 2005-06

RELIGST 370. Comparative Religious Ethics
4 units (Yearly) not given 2005-06

SOCIOMETRY

SOC 111/211. State and Society in Korea
5 units (Shin) not given 2005-06

SOC 117A/217A. China Under Mao
5 units (Walder) not given 2005-06

SOC 152/252. Sociology of Japanese Society
5 units, Spr (Tsutsui)

SOC 167A/267A. Asia-Pacific Transformation
5 units, Aut (Shin)

ECONOMICS

Honorary Emeritus: (Professor): Anne O. Krueger

Chair: Timothy F. Bresnahan

Associate Professor: Jonathan Levin, Mark McClellan

Assistant Professors: Ran Abramitzky, Liran Einav, Peter Hansen, Aprajit Mahajan, Muriel Niederle, Luigi Pistaferri, Antonio Rangel, Michele Tertilt, Mark Wright

Senior Lecturer: Geoffrey Rothwell

Lecturers: Doru Cojoc, Gregory Rosston, Derek Stimel

Assistant Professors: David Baron, Jay Bhattacharya, John Ferejohn, Alan Garber, Ilan Guttman, Kenneth Judd, David Kreps, Rosamond Naylor, Bruce Owen, Mitchell Polinsky, Peter C. Reiss, D. John Roberts, James Strnad, Barry Weingast, Robert Wilson

Visiting Professors: Orazio Attanasio, Ove Grandstrand, Anne Royalty, Jerun Schroeder, T.N. Srinivasan

Visiting Assistant Professors: Galina Hale, Alessandro Tarozzi

Instructors: Oren Ahooibam, Marcelo Clerici-Arias, Christine Gathmann, Alex Gould, Mark Tendall

Acting Instructor: Erik Snowberg

Mail Code: 94305-6072

Phone: (650) 725-3266

Web Site: http://www-econ.stanford.edu/

Courses given in Economics have the subject code ECON. For a complete list of subject codes, see Appendix B.

The department’s purpose is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. There is training for the general student as well as for those who plan careers as economists in civil service, private enterprise, teaching, or research.

The undergraduate program provides an excellent background for those going on to graduate work in the professional schools (for example, business and law) and may also be structured to prepare students for a Ph.D. program in economics. The department’s curriculum is an integral part of Stanford’s programs in International Relations, Public Policy, and Urban Studies.
The primary objective of the graduate program is to educate students as research economists. In the process, students also acquire the background and skills necessary for careers as university teachers and as practitioners of economics. The curriculum includes a comprehensive treatment of modern theory and empirical techniques. Currently, 20 to 25 students are admitted each year.

The faculty represent a wide spectrum of interests and conduct research on a broad range of topics. Most fields of economics are covered, including behavioral economics, comparative institutional analysis, econometrics, economic development, economic history, experimental economics, industrial organization, international trade, labor, macro- and microeconomic theory, mathematical economics, and public finance.

**UNDERGRADUATE PROGRAMS**

**BACHELOR OF ARTS**

The total number of units required for the major is 75. Students are encouraged to complete the core courses 1-5 below, as early as possible. Ideally, students should complete the core during the sophomore year, before taking upper division courses. Courses may not be taken before the prerequisites are completed. The required number of field courses is four. There is great flexibility in the choice of electives, including upper-division math and statistics.

Of the 75 units required for the major, at least 50 must be taken at Stanford in California. Students cannot declare Economics as their major or minor until they have completed ECON 50 with a grade of ‘B’ or better.

**REQUIREMENTS FOR THE ECONOMICS MAJOR (75 UNITS)**

1. **ECON 1 (5 units):** principles of economics.
2. **ECON 102A (5 units):** introduction to statistical methods. It is recommended that students satisfy this basic statistics requirement before proceeding with the rest of the program. Prerequisite: MATH 41 or equivalent.
3. **ECON 50 (5 units):** basic price theory. Prerequisite: ECON 1 and 50M or MATH 51, or passed diagnostic test (administered at the beginning of ECON 50) on multi-variable calculus.
4. **ECON 51 and 52 (10 units):** intermediate micro- and macroeconomics. Prerequisite: ECON 50.
5. **ECON 102B (5 units):** econometrics. Prerequisites: ECON 50 and 102A. Material in ECON 102B is used in a number of field courses. Students are strongly advised to design their program of study so that ECON 102B is not taken in their senior year but early in their program.

*Field Courses* (must be taken at Stanford in California; 20 units) — Four courses must be chosen from among ECON 111, 118, 121, 140,* 141, 145, 149, 150, 154, 155, 156, 157, 160, 165 (5 units each).

*Writing in the Major Course* (5 units) — This requirement is fulfilled by ECON 101. This course should be taken only after completing ECON 51 and 52, 102B, and at least two field courses.

*Electives* (20 units) — Choose from Economics courses numbered from 100 through 198, excluding 190 and 191. Up to 10 units may be satisfied by MATH 52, 53, 103, 113, 114, 115; or STATS 200.

A maximum of 10 units of transfer credit or of ECON 139D, Directed Reading, may be taken under this section. Suitable transfer credit must be approved in writing by the Associate Director of Undergraduate Studies. Advanced undergraduate majors with strong quantitative preparation may enroll in graduate (200-level) courses with permission of the Director of Undergraduate Studies and the course instructor. Some courses offered by Overseas Studies may be counted towards this requirement. The department does not give credit for internships.

* Students may not count units from both ECON 135 and 140 towards their major as the courses are too similar in content.

**OTHER REQUIREMENTS**

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit, and 50 of the 75 units required for the major must be taken at Stanford in California.

Students with sufficiently high scores on the Advanced Placement Microeconomics and Macroeconomics tests can receive AP credit which enables them to fulfill the Economics major without taking ECON 1. However, these students nevertheless must take 75 units of economics courses to obtain the major: the AP credit does not yield any units toward the major.

A grade point average (GPA) of 2.0 or better must be received for all units applied toward the preceding requirements.

To use transfer credit in partial satisfaction of the requirements, the student must obtain written consent from the department’s Associate Director of Undergraduate Study, who establishes the amount of credit to be granted toward the department requirements (see the Information Book for Economics Majors). Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics major.

The time limit for satisfactory completion of a course is one year from the date an “incomplete” is given, although instructors may set a shorter time limit. Students are responsible for seeing that all grades of incomplete are cleared within the time limit.

**SAMPLE PROGRAMS**

Sample listings of upper-division economics electives may be examined in the department’s Information Book for Economics Majors, available in the Economics Building, room 136. Sample programs are provided for the following areas of emphasis: (1) liberal arts, (2) pre-business, (3) quantitative, (4) international, (5) political economy and regulation, and (6) preparation for graduate school in economics.

**MINORS**

The minor in Economics has two main goals. The first is to acquaint students with the rudiments of micro- and macroeconomic theory that are required of all majors. The second is to allow students to build basic competence in the application of this theory to two fields of economics of their choosing, and the opportunity to specialize further in any one of these fields by taking one additional advanced course in the Department of Economics.

**COURSE WORK**

1. **ECON 1 (5 units):** principles of economics.
2. **ECON 50 (5 units):** basic price theory. Prerequisites: ECON 1 and 50M or MATH 51, or passed diagnostic test (administered at the beginning of ECON 50) on multi-variable calculus.
3. **ECON 51 and 52 (10 units):** intermediate micro- and macroeconomics. Prerequisite: ECON 50.
4. Two field courses (must be taken at Stanford in California; 10 units) may be chosen from the following list: ECON 102B, 111, 118, 121, 140,* 141, 145, 149, 150, 154, 155, 156, 157, 160, 165.
5. One elective (5 units) from Economics courses numbered 100 through 198, excluding 190 and 191.

* Students may not count units from both ECON 135 and 140 towards their major as the courses are too similar in content.

**OTHER REQUIREMENTS**

If the candidate’s major requires basic Economics courses (items 1 through 3), then only half of the units from those courses apply toward the economics minor. To attain the overall 35 units required by the minor, the student must take additional Economics courses under items 4 and 5. At least 20 out of the 35 units for the minor must be taken at Stanford. Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics minor.

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit. A grade point average (GPA) of 2.0 or better must be received for all units applied toward the minor.

Students must complete their declaration of the minor no later than the last day of the preceding quarter before their degree conferral.
HONORS PROGRAM

The honors program offers an opportunity for independent research, creativity, and achievement. It is designed to encourage a more intensive study of economics than is required for the normal major, with course and research work of exceptional quality. Honors students may participate in an Honors Research Symposium during Spring Quarter, with those nominated for prizes making oral presentations. The honors program requires:

1. Completing all requirements for the major.
2. Achieving a grade point average (GPA) of at least 3.5 for the 75 units required of the Economics major. See details in the Information Book for Economics Majors.
3. Complete ECON 102B and at least two lecture courses most relevant for the proposed topic of the honors thesis by the end of the junior year. (These can be included in the basic 75 units.)
4. Candidates must write an honors thesis in their senior year for at least one unit and up to 10 units of credit (ECON 199D). The thesis must be of very high quality and written under the direction of a member of the department or its affiliated faculty. Units of 199D do not count toward the course work requirements for the basic economics major, or in the computation of the GPA requirement for honors. Students who take ECON 199D for 10 units may apply 5 of those units to meet the Writing in the Major (WIM) requirement. Such students complete the major with at least 80 units overall.

Juniors interested in the honors program should attend an informational meeting scheduled by the honors program director during the first week of each quarter. At this meeting, students receive information on organizing an honors project and are given details on honors programs. Prospective candidates for the honors program should submit an application to the director no later than the end of the first month of the third quarter before graduation. (Typically Autumn Quarter of the senior year.) Also required, later in the same quarter, is a three-page thesis proposal that must be approved by the thesis adviser.

GRADUATE PROGRAMS

Graduate programs in economics are designed to ensure that students receive a thorough grounding in the methodology of theoretical and empirical economics, while at the same time providing specialized training in a wide variety of subfields and a broad understanding of associated institutional structures. Toward these ends, the program is arranged so that the student has little choice in the curriculum at the outset but considerable latitude later on.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics.

MASTER OF ARTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The department does not admit students who plan to terminate their graduate study with the M.A. degree. Students may (but need not) elect this degree in preparation for the Ph.D. degree. A master’s option is also available to Ph.D. candidates from other departments.

Admission — Prospective students must have completed the Stanford requirements for a B.A. in Economics or approximately equivalent training. Since students are required to take some of the same courses as Ph.D. candidates, similar preparation in mathematics and statistics generally is expected. Prospective applicants should submit their credentials together with a plan of study to the Director of Graduate Study for approval.

Requirements — A master’s program must satisfy these criteria:

1. Completing, at Stanford, at least 45 units of credit beyond those required for the bachelor’s degree, of which at least 40 units must be in the Department of Economics. Students must complete ECON 202 and at least three other 200-level courses. They must receive a grade of ‘B’ or better in ECON 202. Undergraduate courses must be numbered 105 or higher. No seminar courses numbered 300 or above can be counted.

2. Demonstrating competence in empirical methodology by receiving a grade of ‘B’ or better in both ECON 270 and 271, or by receiving a grade of ‘B’ or above in each of ECON 102A, B, and C.

3. Submitting two term papers (or a thesis of sufficient quality). At least one of these papers must be deemed to represent graduate-level work. Normally, this means that it is written in connection with a 200-level course. A maximum of 10 units of credit can be earned for a thesis toward the 45-unit degree requirement.

4. A grade point average (GPA) of 3.0 must be maintained for all master’s level work. All courses must be taken for a letter grade.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

Admitted students must be adequately prepared in calculus, linear algebra, and statistics (see above). When deemed appropriate, a student may be required to complete the necessary background preparation at Stanford. All students take a common core curriculum at the outset and later branch out into the desired fields of specialization. Well-prepared students should anticipate spending, with some overlap, approximately two years in course work and another two years in seminars, independent study, and dissertation research. The goal is to complete the program in four years, although some types of research programs may require at least five years to complete. The department has a strong commitment to guiding students through the program expeditiously.

Questions and petitions concerning the program and the admissions process should be addressed to the Director of Graduate Study, who has responsibility for administering the graduate program.

Specific requirements are best discussed in two stages, the first consisting of requirements for admission to candidacy and the second involving further requirements for earning the degree.

Admission to Candidacy for Ph.D. — A student may apply for admission to candidacy when the following minimal requirements are met:

1. Successful results on comprehensive examinations in core economics (the examinations based on material from ECON 202, 203, 204; and 210, 211, 212), and econometrics (the examination based on material from ECON 270, 271, 272).

2. Completing the requirements in two additional fields of specialization from the list below or, if approved in advance by the Director of Graduate Study, in one such field together with a substantial amount of work toward a second field taught in a related department. Advanced fields include econometrics, economic development, economic history, industrial organization, international economics, labor economics, microeconomic theory, monetary theory and advanced macroeconomics, and public finance.

   Each field listed above can be satisfied by completing two courses, although students in some fields may be advised to add a third course, which can then be counted toward the distribution requirement discussed later. All courses (or comprehensive exams, when offered) must be passed with a grade of ‘B’ or better.

3. Completing a candidacy paper, normally written in conjunction with one of the special fields selected above.

   It is expected that the student will meet, and indeed exceed, the above standards by the beginning of the third year of residency. When this is not possible for any reason, the Director of Graduate Study should be consulted as early as possible during the second year. Once it is deemed that the above standards have been met, the student should complete the Application for Candidacy for Degree of Doctor of Philosophy. After approval, candidacy remains valid for five years (although it can be terminated earlier by the department if progress is deficient); it can be renewed or extended beyond this period only under unusual circumstances.
Further Requirements for the Ph.D. Degree —

1. Distribution Requirement: Students must complete four other graduate-level courses meeting the following requirements:
   a) at least one course from the area of economic history, unless history
      is one of the two fields of specialization.
   b) courses in at least two fields other than the two fields of speciali-
      zation. Distribution courses cannot be crosslisted in those fields.
   c) with advance approval of the Director of Graduate Study, some of
      these distribution courses may be drawn from related fields taught in
      other departments. However, including courses taken to meet either
      the specialization or distribution requirements, no more than two
      courses in total may be taken outside the Economics department.

2. Teaching Experience: each student must serve as a teaching assistant for at least one quarter. It is strongly recommended that this require-
   ment be satisfied before the final year of residence.

3. Seminar Participation: each student is expected to participate in at
   least two all-year research seminars by the end of the fourth year of
   residence. Normally, participation in a seminar requires one or more
   oral presentations and the submission of a research paper (which, how-
   ever, need not be completely separate from dissertation research).

4. Ph.D. Dissertation: the process involves selecting a topic, choosing
   an appropriate adviser, submitting a prospectus (signed by the adviser)
   outlining the proposed research, selecting a three-member reading
   committee (usually all from the Department of Economics, although
   exceptions can be made under certain circumstances), passing the
   University oral examination at which these three faculty (and two other
   members of the Academic Council) ask questions about the completed
   research, and submitting a final draft of the work signed by all members
   of the reading committee. The student is advised to initiate this process
   as early as possible.

PH.D MINOR

To be recommended for the Ph.D. degree with Economics as a minor
subject, a student must qualify in three fields of economics, at least one of
which must be in the core economics sequence. The standard of achieve-
ment in these fields is the same for minors as for major candidates, including
the department’s comprehensive examinations where appropriate.

JOINT DEGREE PROGRAMS WITH THE
SCHOOL OF LAW

The Department of Economics and the School of Law offer a joint
program leading to the Ph.D. in Economics and the J.D. degree in Law.
See the Stanford University bulletin Law School for descriptions of its
participation in the joint program.

To qualify, the student’s program objectives must clearly justify such
a joint program. Decisions are made by the Director of Graduate Study.
A student’s program in economics must satisfy the same standards as a
Ph.D. degree in Economics taken with a minor in Law. It is expected that
dissertation research will cross department lines and that members of the
dissertation committee will be drawn from both faculties.

Students normally spend the first year full-time either in Economics or
in Law and the second year full-time in the other department. After the second
year, courses in economics and law may be pursued simultaneously.

Other joint programs may be arranged; for example, the Ph.D. in Eco-
nomics combined with one or two years of study in the School of Law,
leading either to the nonprofessional Master of Legal Studies (M.L.S.)
degree or the nonprofessional Master of Jurisprudence (J.M.). See the
bulletin Law School for the requirements. Conversely, a student taking the
J.D. in the School of Law may apply for an M.A. in Economics.

FELLOWSHIPS AND ASSISTANTSHIPS

The department awards a number of fellowships for graduate study.
Many first-year and a few select second or third-year students are awarded
full fellowships, including a stipend and tuition. All students whose re-
ords justify continuation in the program may be assured support for the
second through fourth years in the form of employment as a teaching or
research assistant. These half-time appointments provide a stipend and
tuition allowance. Entering students are not normally eligible for research
or teaching assistantships.

Applications should be submitted before January 1 to the department
admissions committee.

COURSES

WIM indicates that the course satisfies the Writing in the Major
requirements.

ECON 1. Elementary Economics — The economic way of thinking
and the functioning of a modern market economy. The behavior of consumers
and firms. Markets for goods and inputs. Analysis of macroeconomic
variables: output, employment, inflation, interest rate. Determination of
long-run growth and short-term fluctuations. The role of government:
regulation, monetary, and fiscal policy. Limited enrollment. GER:DB-
SocSci
5 units, Aut (Clerici-Arias), Win (Rangel), Spr (Stinem), Sum (Staff)

ECON 11N. Understanding the Welfare System — Stanford Introduc-
tory Seminar. Preference to freshmen. Welfare reform legislation and
the devolution revolution. The transfer of responsibility for anti-poverty
programs to the states. How recent reforms change the welfare system
and who is likely to be affected. Food stamps, AFDC, TANF, SSI, and
Medicaid. Income transfer programs such as earned income tax credit
and income taxes, and labor market regulations such as minimum wages
and overtime rules. Economic principles to understand the effectiveness
of these programs and their consequences on the behavior of families.
Pre- or corequisite: ECON 1. Recommended: basic understanding of
labor markets, taxes, and transfers.
2 units, Aut (McCurdy)

ECON 50. Economic Analysis I — Individual consumer and firm behavior
under perfect competition. The role of markets and prices in a decen-
tralized economy. Monopoly in partial equilibrium. Economic tools are
developed from multi-variable calculus, using partial differentiation and
Techniques for constrained and unconstrained optimization. Prerequisites:
1, and 50M or MATH 51, or passed diagnostic test (administered at the
beginning of ECON 50) on multivariable calculus. GER:DB-Math
5 units, Aut (Tendall), Win (Abramitzky)

ECON 50M. Mathematical Preparation for Economics—Prepara-
tion for 50 and 102A for students who either did not pass the diagnostic
test administered at the beginning of 50 or who have not taken MATH
51. Elements of multi-variable calculus, constrained optimization, and
matrix algebra. Prerequisites: 1 and MATH 41.
5 units, Aut (Jacob), Win (Ahoobim), Spr (Asmundson)

ECON 51. Economic Analysis II — Introduction to neoclassical analy-
sis of general equilibrium, welfare economics, imperfect competition,
externalities and public goods, intertemporal choice and asset markets,
risk and uncertainty, game theory, adverse selection, and moral hazard.
Multivariable calculus is used. Prerequisite: 50.
5 units, Win (Tendall), Spr (Malkert), Sum (Staff)

ECON 52. Economic Analysis III — Growth and fluctuations in the
economic system as a whole. National income accounts and aggregate
relationships among stocks and flows in markets for goods, labor, and
financial assets. Economic growth, inflation, and unemployment. The role
of macroeconomic policies in the short and long run. Prerequisite: 50.
5 units, Aut (Tertilt), Spr (Klenow), Sum (Staff)

ECON 90. Introduction to Financial Accounting — (Graduate students
register for 190.) How to read, understand, and use corporate financial
statements. Oriented towards the use of financial accounting information
(rather than the preparer), and emphasizes the reconstruction of economic
events from published accounting reports.
5 units, Aut (Stanton), Win (Guttman)
ECON 91. Introduction to Cost Accounting—(Graduate students register for 191.) The use of internal financial data for managerial decision making.  
5 units, Spr (Stanton)

3 units, Win (Marotta)

ECON 101. Economic Policy Analysis—Economic policy analysis, writing, and oral presentation. Topics vary with instructor. Limited enrollment. Prerequisites: 51 and 52, 102B, and two field courses. Some sections require additional prerequisites. WIM  
5 units, Aut (Cojoc, Greif), Win (Gould, Clerici-Arias, Rothwell), Spr (Russell, Cojoc, Hansen)

ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists—Description and examples of the use of statistical techniques relevant to economics. Basic rules of probability, conditional probability, discrete and continuous probability distributions. Point estimation, tests of hypotheses, confidence intervals, and linear regression model. Prerequisite: MATH 41 or equivalent. GER:DB-Math  
5 units, Aut, Win (Stimel)

5 units, Win (Ryu), Spr (Royalty)

ECON 102C. Advanced Topics in Econometrics—Identification and estimation of the effect of human capital variables on earnings (e.g., the return to education, tenure), and identification and estimation of labor supply models, focusing on microeconomic data. Topics: instrumental variable estimation, limited dependent variable models (probit, logit, and tobit models), and panel data techniques (fixed effect and random effect models, dynamic panel data models).  
5 units (Pistaferri) not given 2005-06

ECON 103. Applied Econometrics—The construction and use of econometric models for analyzing economic phenomena. Students complete individual projects and core material. Topics vary with the instructor. Limited enrollment. Prerequisites: 52, 102B.  
5 units, Spr (Attanasio)

ECON 106. World Food Economy—The interrelationships among food, populations, resources, and economic development. The role of agricultural and rural development in achieving economic and social progress in low-income nations. Emphasis is on the public sector decision making as it relates to food policy.  
5 units, Win (Falcon, Naylor)

ECON 111. Money and Banking—Money, interest rates, banks and other financial institutions at both micro and macro levels. Micro: alternative financial instruments, the determination of interest rates, the yield curve, and the role of banks and other capital market institutions in the intermediation process. Supply of money, regulation, and supervision. Macro: the choice of monetary policy by the central bank, the impact of monetary policy making institutions on this choice and the various channels through which monetary policy affects inflation and real variables in the economy. Emphasis is on the institutional structure of Federal Reserve System and the conduct of monetary policy in the U.S. Prerequisites: 50, 52.  
5 units, Aut (Gould), S (Staff)

ECON 113. Technology and Economic Change—The economic causes and consequences of technological change. The historical experience of advanced industrial countries and the more recent experience of less developed economies. Topics: the origins of modern industry in the U.S. and Europe, technology and the growth of large-scale organizations, late-comers to industrialization (Japan and newly industrializing countries), economic growth and slowdown in mature industrial countries, and present concerns and future prospects (the influence of technology on employment, civilian spillover from military R&D, and coping with rapid technological change).  
5 units, Spr (Grandstrand)

ECON 114. Economy and Economics of Ancient Greece—Introduction to the history of Greek civilization from the Mycenaean period to the 4th century B.C. The formalist-substantivist controversy: what behavioral assumptions should be made in order to understand the working of the Athenian economy. The economics and ethical thoughts of Plato and Aristotle in contrast to utilitarianism, which became a foundation of modern economics. Prerequisite: 1. GER:EC-GlobalCom  
5 units, Aut (Amemiya)

ECON 115. European Economic History—Economic changes and growth in W. Europe from antiquity to the present. The transformation of Europe from an economically and culturally backward part of the world to the center of the world economy pre-WW I. Topics: the role of techniques and sciences, variations of the extent of market activities, institutional changes, international politics, demography. GER:DB-SocSci  
5 units (Greif) not given 2005-06

ECON 116. American Economic History—From colonial times to the present. The application of economic analysis to historical issues, and the role of historical context in economics. Topics: American economic growth in international perspective; the economics of slavery and regional divergence; the origins and consequence of the American system of technology and business organization; recent U.S. economic performance in historical perspective. Prerequisite: 1. GER:DB-SocSci, EC-AmerCul  
5 units, Spr (Wright)

ECON 117. Economic History and Modernization of the Islamic Middle East—From the rise of Islam to the present. Transformation of region from economically advanced to underdeveloped. Role of religion in economic successes and failures. Current obstacles to development. Topics: Islamic economic institutions; innovation and change; political economy of modernization; interactions with other regions; and economic consequences of Islamism.  
5 units (Kuran) not given 2005-06

ECON 118. Development Economics—The economic problems and policy concerns of developing countries. Theories of growth and development: inequality and poverty; credit and labor markets; population growth and fertility choice; migration; sustainable development and globalization. Emphasis on economic models rather than case studies. Prerequisites: 50, 52, 102B. GER:EC-GlobalCom  
5 units, Aut (Staff)

ECON 120. Socialist Economies in Transition—Privatization, restructured, and institutional change in E. Europe and the former Soviet Union. Analysis of property rights, corporate governance, incentives, and resource allocation in socialist and transitional economies. Emphasis is on liberalization and privatization policies (including mass and voucher programs) as the primary instruments to induce changes in behavior. Prerequisite: 50. Recommended: 51.  
5 units, Spr (Gathmann)

ECON 121. Development Economics, with Special Reference to East Asia—The macroeconomic aspects of economic development: structural transformation, resource utilization, mobilization, and allocation; the sources of economic growth; intersectoral transfers; the role of the external sector; money and finance in development; stabilization in closed and open economies; strategies for economic development; the role of tangible capital; and endogenous technical progress. Illustrations
from the economic development experience of E. Asia, including Japan, China, Hong Kong, S. Korea, Singapore, Taiwan, Indonesia, Malaysia, Philippines, Thailand. Prerequisite: 52. GER:EC-GlobalCom

5 units (Staff) not given 2005-06

ECON 124. Contemporary Japanese Economy — The Japanese economy in comparative and historical perspective. Micro and institutional aspects, i.e., firms, the employment system, corporate governance and financial institutions, and the macro economy. Elementary applications of macro and micro economics. Prerequisite: 50. GER:EC-GlobalCom

5 units, Win (Aoki)

ECON 126. Economics of Health and Medical Care — (Graduate students register for 256; same as BIOMEDIN 150/256.) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisite: ECON 50 and ECON 102A or equivalent statistics, or consent of instructor. Recommended: ECON 51.

5 units, Aut (Bhattacharya)

ECON 135. Finance I for Non-MBAs — (Same as FINANCE 221, MS&E 245G.) For graduate students and advanced undergraduates. The foundations of finance with applications in corporate finance and investment management. Major financial decisions made by corporate managers and investors with focus on process valuation. Topics include criteria for investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities. Major corporate financial instruments including debt, equity, and convertible securities. Equivalent to core MBA finance course, FINANCE 220. Prerequisites: 51, or ENGR 60, or equivalent; ability to use spreadsheets, and basic probability and statistics concepts including random variables, expected value, variance, covariance, and simple estimation and regression.

4 units, Win (Admati)

ECON 136. Auctions and Market Design — Competitive bidding for asset purchases and procurement of industrial needs; bidder entry decisions; design of mechanisms for complicated resource allocation problems. Prerequisites: 51, 160.

5 units, Win (Milgrom)

ECON 137. Information and Incentives — Incentives in situations where one part has more information than another. A part may have better information about things that it controls (moral hazard), or about things that are outside of its control (adverse selection). The general structure of incentive problems and the design of contracts and institutions to deal with such problems. Applications: executive and employee compensation, sharecropping, financial contracts and credit rationing, insurance, markets with unobservable quality, monopolistic price discrimination, regulation of natural monopolies, income taxation and redistribution, the provision of public goods, and auctions.

5 units (Staff) not given 2005-06

5 units, Aut (Kurz)

ECON 139D. Directed Reading

1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 140. Introduction to Financial Economics — Modern portfolio theory and corporate finance. Topics: properties of various financial instruments including financial futures, mutual funds, the capital asset pricing model, and models for pricing options and other contingent claims. Prerequisites: 51, 102A.

5 units, Spr (Kurz), Sum (Staff)

ECON 141. Public Finance and Fiscal Policy — What role should and does government play in the economy? What are the effects of government expenditure, borrowing, and taxation? Policy topics: budget surpluses/deficits; tax reform; social security, public goods, and externalities; fiscal federalism; public investment; and cost-benefit analysis. Prerequisites: 51, 52.

5 units, Win (Cojoc)

ECON 142. The Political Economy of the Federal Budget — Tools of economic analysis; how the federal government makes budgetary decisions. Factors that have contributed to the growth in federal spending, taxation, and the national debt; congressional and executive branch budget processes and their effects on government policy making; spending programs including Social Security, Medicare, welfare, and infrastructure programs. Prerequisites: 50, 52; may be taken concurrently.

5 units, Spr (Snowberg)

5 units (Hammond) not given 2005-06

5 units, Win (Pencavel)

ECON 145. Urban Economics — Costs and benefits of cities, city location, land rent and land use, suburbanization, zoning, poverty, housing and segregation, homelessness, local government finance, transportation, schools, and crime. Prerequisites: 50, 102A.

5 units (Staff) not given 2005-06

ECON 147. Economics of Human Resources — Investments in human capital including education, on-the-job training, government training, and health. The effects of human capital accumulation on wages and wage growth and on wage differentials by gender and race. Sample selections and experimental data. Poverty and inequality. Optional research project for public policy organization on labor market/human resources issues. Prerequisite: 51.

5 units, Win (Staff)

ECON 148. Economic Policy Analysis — (Same as PUBLPOL 104.) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to government policies.

5 units (Segal) not given 2005-06

5 units (Segal) not given 2005-06

ECON 150. Economic Policy Analysis — The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to government policies.
to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisites: ECON 50 and 102A.
5 units, Win (Noll)

ECON 152. Mass Media Economics and Policy — (Enroll in PUBLPOL 172.)
4-5 units (Owen) not given 2005-06

ECON 153. Economics of the Internet — Applications of microeconomic theory to Internet businesses: auctions, online transactions, entry barriers, valuation, pricing of facilities, policy for broadband communications, network economics, standards, economics of information. Prerequisites: 51 and one of 102B, 103, 104, 113, 135, 137, 140, 149, 157, or 160.
5 units, Aut (Hanson)

ECON 154. Economics of Legal Rules and Institutions — The design and consequences of legal rules. Common ideas that run through law including individual rationality, economic efficiency, conventional and Coasian analyses of externalities, enforcement, costs, and market consequences of legal restrictions on contract terms. Private versus public enforcement of law; the tradeoff between certainty and severity of punishment; the choice between ex post and ex ante sanctions; and the choice between property and liability rules. Applications to property, intellectual property, contract, criminal, tort, family, and environmental law. Prerequisite: 51.
5 units, Win (Owen)

5 units, Spr (Gouldner)

ECON 157. Imperfect Competition — The interaction between firms and consumers in markets that fall outside the benchmark competitive model. How firms acquire and exploit market power. Game theory and information economics to analyze how firms interact strategically. Topics include monopoly, price discrimination, oligopoly, collusion and cartel behavior, anti-competitive practices, the role of information in markets, anti-trust policy, and e-commerce. Sources include theoretical models, real-world examples, and empirical papers. Prerequisite: 51.
5 units, Aut (Hussein)

ECON 158. Antitrust and Regulation — The history, economics, and legal background of the institutions under which U.S. industry is subject to government control. Topics: antitrust law and economics; the economics and practice of public utility regulation in the communications, transportation, and energy sectors; and the effects of licensing. Emphasis is on the application of economic concepts in evaluating the performance and policies of government agencies. Prerequisite: 51.
5 units, Spr (Rosston, Noll)

ECON 160. Game Theory and Economic Applications — Mathematical introduction to game theory and its applications to economics. Topics: strategic and extensive form games, Nash equilibrium, subgame-perfect equilibrium, Bayesian equilibrium, and perfect Bayesian equilibrium. The theory is applied to repeated games, auctions, and bargaining. Examples from economics and political science. Prerequisites: 51 and course in calculus, or consent of instructor.
5 units, Spr (Hammond)

ECON 162. Monetary Economics — Dynamic analysis of the role of money and monetary policy in the macro economy, using calculus. Topics: the exchange process and the role of money; inside and outside money; inflation and the inflation tax; international monetary systems; the indeterminacy of floating exchange rates; policies to fix the exchange rate and inflationary incentives; currency crises and speculative attacks; money and interest-bearing government debt; the government’s budget constraint and the coordination of monetary and fiscal policies; hyperinflations and stabilizations; the effect of the national debt on consumption, savings, investment and output; time consistency of government policies. Prerequisite: 52.
5 units (Staff) not given 2005-06

ECON 165. International Economics — Comparative advantage in production and trade among nations; trade policy; increasing returns, imperfect competition and trade; the international monetary mechanism; domestic monetary, fiscal, and exchange rate policies and their relationship to foreign trade; global financial crises and trade. Prerequisites: 1, 51, 52.
5 units, Spr (Hale), Sum (Staff)

ECON 167. European Monetary and Economic Integration — The economics of the European Community and the internal market. Analysis of current competition, transportation, and factor market policies, including the problems of agriculture and unemployment. Fiscal harmonization and mercantilist rivalry. European Monetary Union (EMU): genesis, implementation, and consequences of a common currency and central bank. Foreign exchange and foreign trade. Prerequisites: 51, 52, or equivalents.
5 units, Win (Schoefer)

ECON 168. Path Dependence and Economic Analysis — Historically contingent change in the economy; theoretical and applied research on path-dependent phenomena and their implications for economic policy. Topics: self organization in economics; relationships between micro level irreversibilities, branching processes, positive feedback dynamics and the generation of emergent properties at the macroeconomic level; non convexities, lock-in to suboptimal equilibria, and the economics of QWERTY. Historical antecedents and modern formalizations of historical economics, applications of paradigmatic models of non-ergodic stochastic processes. Case studies. Research papers required. Prerequisites: two upper-level economics courses in applied fields. Limited enrollment.
5 units (Staff) not given 2005-06

ECON 169. International Financial Markets and Monetary Institutions — (Graduate students register for 269.) How nations are linked financially through money, capital, and exchange markets, emphasizing policy issues including the role of the International Monetary Fund, monetary and exchange rate policy, prevention and resolution of financial crises in emerging markets, current account imbalances, and capital mobility. Development and use of macroeconomic models of international financial linkages and microeconomic models of hedging, optimal selection of currencies for invoice and trade credit, and parity relationships in futures, swaps, and options markets. Prerequisite: 165.
5 units, Win (Taylor)

ECON 170. Intermediate Econometrics I — (Graduate students register for 270.) Probability, random variables, and distributions; large sample theory; theory of estimation and hypothesis testing. Limited enrollment. Prerequisites: math and probability at the level of Chapter 2, Paul G. Hoel, Introduction to Mathematical Statistics, 5th ed.
2-5 units, Aut (Hansen, Mahajan)

ECON 171. Intermediate Econometrics II — (Graduate students register for 271.) Linear regression model, relaxation of classical-regression assumptions, simultaneous equation models, linear time series analysis. Limited enrollment. Prerequisite: 270.
5 units, Aut (Wolak)

2-5 units, Win (MacCurdy)
ECON 178. Neuroeconomics—(Graduate students register for 278; same as PSYCH 278.) Techniques from neuroscience and psychology to study how the brain makes economic decisions; implications for the social sciences, especially economics and political science. Topics include: brain processes related to reward, control, and attention; role of emotion in decision making; morality; emotion in social encounters; bargaining and strategic thinking; decision making and probability assessment in risky situations; intertemporal decision making; and addiction. Prerequisite: graduate background in neuroscience or economics, or consent of instructor.

  5 units (Rangel) not given 2005-06

ECON 179. Experimental Economics—Methods and major subject areas that have been addressed by laboratory experiments. Focus is on a series of experiments that build on one another. Topics include decision making, two player games, auctions, and market institutions. How experiments are used to learn about preferences and behavior, trust, fairness, and learning. Final presentation of group projects. Prerequisites: 50, 51, 102A.

  5 units (Niederle) not given 2005-06

ECON 190. Introduction to Financial Accounting—(Same as 90; see 90.)

  5 units, Aut (Stanton), Win (Guttman)

ECON 191. Introduction to Cost Accounting—(Same as 91; see 91.)

  5 units, Spr (Stanton)

ECON 198. Junior Honors Seminar

  5 units, Spr (Rothwell)

ECON 199D. Honors Thesis Research—In-depth study of an appropriate question and completion of a thesis of very high quality. Normally written under the direction of a member of the Department of Economics (or some closely related department). See description of honors program. Register for at least 1 unit for at least one quarter. Meets first week of Autumn Quarter (see Stanford Daily for details).

  1-10 units, Aut, Win, Spr, Sum (Rothwell)

PRIMARILY FOR GRADUATE STUDENTS

ECON 239D. Directed Reading

  1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 299. Practical Training—Students obtain employment in a relevant research or industrial activity to enhance their professional experience consistent with their degree programs. At the start of the quarter, students must submit a one page statement showing the relevance of the employment to the degree program along with an offer letter. At the end of the quarter, a three page final report must be supplied documenting work done and relevance to degree program.

  1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 400. Ph.D. Dissertation

  1-15 units, Spr (Staff)

A. CORE ECONOMICS

ECON 202. Core Economics: Modules 1 and 2—(Non-Economics graduate students register for 202N.) Open to advanced undergraduates with consent of instructors. Theory of the consumer and the implications of constrained maximization; uses of indirect utility and expenditure functions; theory of the producer, profit maximization, and cost minimization; behavior under uncertainty; partial equilibrium analysis and introduction to models of general equilibrium. Limited enrollment. Prerequisite: thorough understanding of the elements of multivariate calculus and linear algebra.

  2-5 units, Aut (Levin, Segal)

ECON 202N. 202 For Non-Economics Ph.D. Students—Core Economics modules 1 and 2 for non-Economics Ph.D. students.

  2-5 units, Aut (Mumford)

  2-5 units, Win (Bernheim)

ECON 203N. 203 For Non-Economics Ph.D. Students

  2-5 units (Staff) not given 2005-06

ECON 204. Core Economics: Modules 9 and 10—The theory of contracts, emphasizing contractual incompleteness and the problem of moral hazard. Incentive regulation. Competition with imperfect information, including signaling and adverse selection. The theory of resource allocation over time, competitive equilibrium, and intertemporal efficiency. Limited enrollment. Prerequisite: 203.

  2-5 units, Spr (Milgrom)

  2-5 units, Aut (Terliti)

ECON 211. Core Economics: Modules 11 and 12—Capital asset pricing models, equilibrium with securities, pricing of securities, and arbitrage. Overlapping generations models with incomplete market structure and sunspots. Foundations of Bayesian dynamic learning. Investment theory and empirics, including adjustment costs and the q theory; consumption theory and empirics, focusing on the life-cycle model; and the labor market. Limited enrollment. Prerequisite: 210.

  2-5 units, Win (Hall, Klenow)

ECON 212. Core Economics: Modules 4 and 8—Monetary theory: economic fluctuations, the role of money (overlapping generations, cash in advance, money in the utility function), dynamic impact of changes in money on the economy, natural rate of unemployment and job creation/destruction, exchange rate determination, international transmission of money, dynamic stochastic general equilibrium models. Macroeconomic policy: rationale for central bank independence, time inconsistency, the impact of public debt, rules versus discretion, interest rate versus money rules, international monetary policy coordination, rational expectations, econometric policy evaluation. Limited enrollment. Prerequisite: 203, 211.

  2-5 units, Spr (Taylor)

ECON 301. Microeconomic Workshop

  1-10 units, Aut, Win, Spr (Staff)

ECON 305. Economic Applications Workshop

  1-10 units, Aut, Win, Spr (Staff)

ECON 310. Macroeconomic Workshop

  1-10 units, Aut, Win, Spr (Staff)

B. ECONOMIC DEVELOPMENT

To receive credit for this field, students must complete 214 and 217, and submit a paper from one of these courses. Students wishing to do research in the field are advised to take courses in international economics, such as 266, and in comparative institutional analysis.

ECON 214. Development Economics: Microeconomic Issues—Microeconomic analysis of markets and institutions in developing countries. Topics: the role of the household; models of savings, credit, and risk; adjustment to aggregate shocks; occupational choice, credit constraints, and credit market imperfections; health and nutrition; new technology; and education. Emphasis is on empirical tests of and evidence for theoretical models.

  2-5 units, Win (Tarozzi)
ECON 216. Development Economics and Growth: Macroeconomics—The historical experience of economic development; patterns of economic growth; sources of economic growth; models of economic development (two-gap models, dual economy models, open economy models, new growth models), savings and capital accumulation; the role of money and finance; inflation; taxation; stabilization in closed and open economies with incomplete and/or imperfect markets; human and other forms of intangible capital; infrastructural capital and externalities; income distribution; numerical general equilibrium models.

2-5 units, Aut (Attanasiu)

2-5 units (McKinnon) not given 2005-06

ECON 267. Special Topics in International Economics—The level and growth effects of trade and trade liberalization in neoclassical and endogenous growth models. The empirical evidence (country specific and cross country), on the effects of trade liberalization on growth, poverty, and inequality within and between countries. Implications for national and international policies. Multilateral versus preferential trade liberalization including the Doha round of multilateral trade negotiations.

2-5 units, Win (Hale)

ECON 315. Development Workshop
1-10 units, Aut, Win, Spr (Staff)

C. ECONOMIC HISTORY/INSTITUTIONS

The requirement for the field is one research paper on a subject approved by one of the faculty teaching any of the following courses.

ECON 224. Science, Technology, and Economic Growth—Upper-division undergraduates may enroll with consent of instructor. The roles played by the growth of scientific knowledge and technical progress in the development of industrial societies. Emphasis is on the interactions between science and technology, and the organizational factors which have influenced their effectiveness in contributing to productivity growth.

2-5 units, Win (David)

ECON 226. U.S. Economic History—The American economy from colonial times to the present. The role of economic history as a distinctive intellectual approach to the study of economics. Topics: American growth record and its determinants, the origins and character of U.S. technology, slavery, the Great Depression, recent U.S. performance in historical perspective.

2-5 units, Spr (Wright)

ECON 228. Institutions and Organizations in Historical Perspective—Emphasis is on the formative period from the 11th to 18th centuries. Formation, function, and evolution of institutions; alternative conceptual frameworks such as neoclassical, transaction cost economics, institutionalism, and Marxism and neo-Marxism; game theory, mechanism design, and contract theory. Institutions related to trade organization, the organization of production, feudalism, mercantilism, and the state.

2-5 units, Aut (Greif)

ECON 325A,B,C. Economic History Workshop
1-10 units, Aut, Win, Spr (Staff)

D. MONETARY THEORY AND ADVANCED MACROECONOMICS

Requirements for this field are completion of 233 and 234.

2-5 units, 233: Win (Klenow), 234: Spr (Hall), 235: (Klenow, Kocherlakota) not given 2005-06

E. PUBLIC FINANCE

To receive credit for the field, students must complete 241 and 242 by passing the final examinations, and submit an acceptable research paper on a topic approved by the instructor for either course. Students may take Public Finance as a field and still count 243 and/or 244 toward satisfying their distribution requirements.

2-5 units, Win (Bernheim)

2-5 units, Spr (Shoven)

ECON 243. Economics of Environment—Open to upper-division undergraduates with consent of instructor. Sources of environmental problems in market economies and policy options for addressing these problems. Topics: choice of policy instruments (taxes, standards, tradable permits), environmental risk assessment, valuation of non-marketed commodities (environmental amenities, biodiversity), environmental policy making under uncertainty, the optimal mix of corrective and distortionary tax instruments, and the dynamics of economic growth in the presence of non-reproducible natural resources.

2-5 units, Win (Goulding)

ECON 244. Psychology and Economics—Experimental and field evidence related to the psychological mechanisms behind static choice, intertemporal choice, choice under risk and uncertainty, choice in social situations, and hedonics. Models of economic choice based on these findings, and how they improve the explanatory and predictive value of standard theories. Prerequisites: 204, 271, or consent of instructor.

2-5 units, Spr (Rangel)

ECON 341. Workshop on the Economics of the Public Sector—Issues in measuring and evaluating the economic performance of government tax, expenditure, debt, and other policies; their effects on private economic activity, saving, investment, labor supply; alternative policies and methods of evaluation. Workshop combines student research, faculty presentations, and guest speakers. Prerequisite: 241 or consent of instructor.

1-10 units, Aut, Win, Spr (Staff)

ECON 343. Workshop in Environmental and Natural Resources Economics—Economic analyses of environmental and natural resource problems and policies. Presentations by faculty and graduate students.

1-10 units, Aut, Win, Spr (Staff)

F. ECONOMICS OF LABOR

To receive credit for this field, students must complete two from 246, 247, and 248.

2-5 units, Aut (Pencavel)

ECON 247. Labor Economics II—The economics and econometrics of program evaluation. The impact of public policies on labor demand, labor supply, human capital and wage determination. Social, natural, and quasi-experiments.

2-5 units, Win (Pistaferri)
ECON 249. Personnel Economics—(Enroll in MGTECON 652.)
4 units (Staff)

ECON 345. Applications Workshop
1-10 units, Aut, Win, Spr (Staff)

G. ECONOMICS OF INDUSTRY
To receive credit for the field, students must complete 257 and 258 and submit one research paper, the subject of which has been approved in advance by one of the faculty teaching 257, 258, or 260.

ECON 250A. Natural Resource and Energy Economics—First part of two course sequence. Issues in provision and management of non-renewable and renewable natural resources, and energy products and services. Theory and empirical methods related to: market structure, pricing, and performance of important energy and resource industries; sources of market failure in these industries; and alternative regulatory approaches. Prerequisites: 202, 203, 204, 270, 271, and 272, or equivalents with consent of instructor.
2-5 units, Aut (Gould, Wolak)

ECON 250B. Environmental Economics—Second of two course sequence. Sources of environmental problems in market economies; policy options for addressing these problems. Topics include: alternative environmental policy instruments such as taxes, standards, and tradable permits; valuation of non-marketed commodities such as environmental amenities and biodiversity; and environmental policy making under uncertainty. Applications include global climate change and green tax reform. Prerequisites: 202, 203, 204, 270, and 271, or equivalents with consent of instructor.
2-5 units, Win (Gould, Wolak)

ECON 256. Economics of Health and Medical Care—(Same as 156; see 156.)
5 units, Aut (Bhattacharya)

ECON 257, 258. The Economics of Industry, Regulation, and Firm Organizations I/II—Theoretical and empirical analyses of the determinants of market structure; firm behavior and market efficiency in oligopolies; price discrimination; price dispersion and consumer search; differentiated products; the role of information in markets, including insurance and adverse selection; auctions; collusion and cartel behavior; advertising; entry and market structure; market dynamics; strategic behavior.
2-5 units, 257: Aut (Levin, Einav), 258: Win (Noll, Wolak)

ECON 260. Special Topics in Industrial Organization and Regulation—Current research and policy interest. Topics may include: empirical tests of oligopoly theories; non-price competition; entry and market structure; the role of information in markets; auctions; e-commerce; dynamics of change in regulatory policy; theory of economics institutions; antitrust status of joint ventures; and use of capacity, innovation, and product variety as a barrier to entry. Significant unresolved research issues and promising ways to attack them. Prerequisite: 257. Recommended: 258.
2-5 units, Spr (Athey, Einav)

ECON 355. Industrial Organization Workshop—Current research in the field by visitors, presentations by students, and discussion of recent papers. Students write an original research paper, make a formal presentation, and lead a structured discussion.
1-10 units, Aut, Win, Spr (Staff)

H. INTERNATIONAL ECONOMICS
To receive credit for this field, students must complete 266 and either 265 or 269, and submit a paper from one of these courses. All three courses are recommended. For students doing research in the field, further supporting courses are found in the fields of economic development, industrial organization, and public finance.

ECON 265. International Finance and Open Economy Macroeconomics—Monetary foundations of international exchange; the rules of the game. The world dollar standard. Hedging foreign exchange risk. International capital flows and the current account. Monetary and fiscal policies in open economies. Currency crises in developing economies and institutional reform; the IMF.
2-5 units, Aut (McKinnon)

2-5 units, Spr (Srinivassan)

ECON 269. International Financial Markets and Monetary Institutions—(Same as 169; see 169.)
5 units, Win (Taylor)

ECON 365. International Trade Workshop
1-10 units, Aut, Win, Spr (Staff)

I. ECONOMETRICS
A student may satisfy the requirements for the econometrics field by completing the requirements of one of two subfields:
I-1: Theoretical Econometrics: To receive credit in the theoretical econometrics subfield, students must complete 273A and 273B.
2-5 units, Win (Hansen)

I-2: Applied Econometrics: To receive credit in the applied econometrics subfield, students must complete 273A and either 274 or 275. Students must also complete a course or set of courses that is empirically oriented. The last requirements must be approved by the Director of Graduate Study in consultation with the instructor of 274 or 275.
2-5 units, Win (MaCurdy)

ECON 270. Intermediate Econometrics I—(Same as 170; see 170.)
2-5 units, Aut (Hansen, Mahajan)

ECON 271. Intermediate Econometrics II—(Same as 171; see 171.)
5 units, Aut (Wolak)

ECON 272. Intermediate Econometrics III—(Same as 172; see 172.)
2-5 units, Win (MacCurdy)

ECON 273A. Advanced Econometrics I—Parametric asymptotic theory. Large-sample properties of estimators defined as the solution to an optimization problem, under a variety of assumptions for the true data generation process. General large sample results for maximum likelihood, nonlinear least squares, nonlinear instrumental variables estimators, including the generalized method of moments estimator under general conditions. Asymptotic hypothesis testing procedures derived for each estimation framework.
2-5 units, Win (Wolak)

ECON 273B. Advanced Econometrics II—Simulations methods. Semiparametric and nonparametric methods. Optimal rate of convergence and semiparametric efficiency bounds. Prerequisite: 273A.
2-5 units, Spr (Mahajan)

ECON 274. Limited Dependent Variables—Discrete choice models; Tobit models; Markov chain and duration models. Prerequisite: 273 or consent of instructor.
2-5 units, Spr (Ryu)

2-5 units, Win (Hansen)

ECON 276. Advanced Econometrics—Possible topics: robust estimation, stochastic control, prediction theory, Bayesian analysis, factor analysis, pooling of time series and cross section data. Prerequisite: 273A, B.
2-5 units (Staff) not given 2005-06

ECON 370. Econometrics Workshop
1-10 units, Aut, Win, Spr (Staff)
J. MICROECONOMIC THEORY

To receive credit for this field, students must complete two courses in one of the following two subfields:

J-1: General Theory: 280, 281, 284, 286, 287

J-2: Decisions, Contracts and Incentives: 282, 283, 286, 289

Note: taking one course from each track does not satisfy the microeconomic theory field requirement.

ECON 278. Neuroeconomics — (Same as 178, see 178.)
5 units (Rangel) not given 2005-06

ECON 279. Experimental Economics — An introduction to experimental economics, its methods, and major subject areas that have been addressed by laboratory experiments. Focus is on a series of experiments that build on one another, and allow researchers with different theoretical dispositions to narrow the range of potential disagreement. Prerequisites: 202, 203, 204, or consent of instructor.
2-5 units (Niederle) not given 2005-06

ECON 280. Welfare Economics — Social choice theory with and without interpersonal comparisons; Pareto efficiency with public goods, externalities, and non-convexities; potential Pareto improvements. Private information, incentive constraints, and mechanism design. Welfare measurement, cost benefit analysis, and analysis of economic policy reform.
2-5 units (Staff) not given 2005-06

2-5 units (Hammond) not given 2005-06

ECON 282. Contracts, Information, and Incentives — General issues and recent developments in mechanism design and the theory of contracts. Topics include: hidden characteristics and hidden action models with one and many agents, role of commitment and renegotiation in long-term relationships, incomplete contracts and applications to the theory of the firm.
2-5 units, Win (Segal)

ECON 283. Advanced Topics in Contracts and Organization — Recent developments and promising research. Topics may change from year to year, but may include: reputational concerns and implicit contracts in long-term relationships, property rights and the hold-up problem, multilateral contracting, communication requirements of allocation problems, communication without full commitment (cheap talk). Prerequisite: 282 or consent of instructor.
2-5 units (Johannes) not given 2005-06

ECON 284. Topics in Dynamic Financial Economics — Dynamic general equilibrium asset pricing and economic volatility. Characteristics of real and financial volatility, the equity risk premium, the term structure of interest rates, and the forward premium. The role of dynamic learning and diversity of beliefs in the propagation of economic volatility, and the relationship of such diversity to money non-neutrality, the real effect of monetary shocks, and real business cycles theories; implications for problems of time consistency in monetary policy, rules versus discretion and alternative monetary rules. Recent papers presented by students. Prerequisites: 204 or equivalent, basic probability theory, or consent of instructor.
2-5 units (Staff) not given 2005-06

ECON 285. Market Design — Analysis of rules that govern the operation of markets with and without the assistance of prices. Emphasis is on markets in which complicated preferences and constraints, limitations on the use of cash, or variations in contract details among bidders decisively impair the performance of simple market rules. Matching markets such as the National Resident Matching Program and airline slot exchanges, asset auctions such as the spectrum auctions, electricity markets, and Internet procurement services.
2-5 units, Spr (Milgrom)

ECON 286. Game Theory and Economic Application — Solution concepts for non-cooperative games, repeated games, games of incomplete information, reputation, and experiments. Standard results and current research topics. Prerequisite: 203 or consent of instructor.
2-5 units, Spr (Levin)

ECON 287. General Equilibrium Theory — Existence, efficiency, and Walrasian equilibrium in exchange economies. Production, financial markets, incomplete markets, sequence economies with infinitely-lived agents. Prerequisites: 204 or consent of instructor.
2-5 units, Aut (Hammond)

ECON 288. Computational Economics — Computational approaches to solving economic problems. Overview of numerical analysis. Economic problems in computationally tractable forms, and the use of numerical analysis techniques to solve them. Examples of problems solved numerically (general equilibrium models, optimal taxation, dynamic programming, economic growth, life-cycle models, intervention in commodity markets, Bayesian econometrics, equilibria of dynamic and repeated games, and nonlinear rational expectations equilibria with asymmetric information). Prerequisite: equivalent of first-year graduate core economics sequence.
2-5 units (Judd) not given 2005-06

ECON 289. Advanced Topics in Game Theory and Information Economics — Topics include repeated games with informational asymmetries, including applications to collusion as well as government policy games and dynamic insurance problems; advanced topics in auction theory and mechanism design; intrapersonal games, such as self-control problems and dynamic inconsistency; information acquisition in decision problems, games, and mechanisms.
2-5 units (Staff) not given 2005-06

ECON 290. Multiperson Decision Theory — (Same as MGTECON 608.) Students and faculty review and present recent research papers on theories and economic applications of decision theory, game theory, and mechanism design. Applications include market design and analyses of incentives and strategic behavior in markets, and topics such as auctions, bargaining, contracting, and computation.
4 units, Spr (Wilson)

ECON 292. Comparative Analysis of Organizations and Institutions — Game theoretic; classic and evolutionary analysis of institutions as multiple equilibria. Norms, social embeddedness, organizations as conventions, contract enforcement and corporate governance mechanisms, and states. Institutional complementarities and diachronic institutional linkage.
5 units (Staff) not given 2005-06

ECON 385. Mathematical Economics Workshop
1-10 units, Aut, Win, Spr (Staff)

ECON 387. Microeconomics Workshop — (Same as MGTECON 629A.) Focus is on game-theoretic analyses. Topics from related fields such as macroeconomics, experimental and behavioral economics, electronic commerce, computer science, law, political science, and psychology.
2 units, Aut, Win, Spr (Staff)

ECON 391. Microeconomic Theory Seminar — Game theoretic (classic and evolutionary analysis of institutions as multiple equilibria). Norms, social embeddedness, organizations as conventions, contract enforcement and corporate governance mechanisms, and states. Institutional complementarities and diachronic institutional linkage. May be repeated for credit.
1-10 units, Aut, Win, Spr (Staff)
OVERSEAS STUDIES

Courses approved for the Economics major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN
ECON 161X. The German Economy in the Age of Globalization
4-5 units, Win (Klein)

FLORENCE
ECON 126X. The Euro, the Dollar, and the Developing Countries in a World of Globalization
4 units, Spr (Yotopoulos)

MOSCOW
ECON 120X. Economic Reform and Economic Policy in Modern Russia
5 units, Aut (Mau)

PARIS
ECON 124X. Building the European Economy: Economic Policies and Challenges Ahead
5 units, Aut (Le Cacheux)
ECON 125X. Globalization and Its Effect on France and the European Union
5 units, Spr (Germanangue)

SANTIAGO
ECON 119X. The Chilean Economy: History, International Relations, and Development Strategies
5 units, Spr (Muñoz)
ECON 160X. Latin America in the International Economy
5 units, Win (Di Filippo)
ECON 165X. Latin American Economies in Transition
5 units, Aut (DiFilippo)

ENGLISH

Chair: Ramón Saldívar
Director of Creative Writing Program: Eavan Boland
Director of Program in Writing and Rhetoric: Andrea A. Lunsford

Professors: John B. Bender (English, Comparative Literature), Eavan Boland, Terry Castle, W. S. Di Piero (on leave Autumn), J. Martin Evans, John Felstiner, Kenneth W. Fields (on leave Winter, Spring), Shelley Fisher Fishkin, Jay W. Fliegelman, Roland Greene (English, Comparative Literature; on leave), Seth Lerer (English, Comparative Literature), Andrea A. Lunsford, Franco Moretti (English, Comparative Literature), Stephen Orgel (on leave Spring), Patricia A. Parker (English, Comparative Literature), Robert M. Polhemus (on leave), Arnold Rampersad, David R. Rigs, Ramón Saldívar (English, Comparative Literature), Elizabeth Tallent, Tobias Wolff

Associate Professors: Michele Elam, Ursula Heise, Gavin Jones, Paula Moya, Jennifer Summit, Blakey Vermeule, Alex Woloch

Assistant Professors: Brett Bourbon, Denise Gigante, Nicholas Jenkins, Robert Kaufman (on leave Winter, Spring), Si anne Ngai (on leave), Judith Richardson, Christopher Rovee

Professor (Teaching): Larry Friedlander (on leave Winter)

Senior Lecturer: Claude Reichard

Lecturers: Andrew Altschul, Valerie Brelinski, Peter Campion, Angus Fletcher, Adam Johnson, Tom Kealey, Annette Keogh, David MacDonald, Tom McNeely, Joyce Moser, Hilton Obenzinger, Linda Paulson, Eric Puchner, Bruce Snider, Edward Steidle, Malena Watrous, Marvina White (on leave)

Acting Professors: Helen B. Brooks, Carol Shloss

Courtesy Professor: Bryan Wolf (on leave)

Consulting Assistant Professor: Matthew Jockers
Visiting Professor: Rukmini Bhaya Nair
Visiting Associate Professor: Steven Justice

Department Offices: Building 460, Room 201
Mail Code: 94305-2087

Courses given in English have the subject code ENGLISH. For a complete list of subject codes, see Appendix.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The English Major is designed to provide students with both an understanding of the development of literatures in English and an appreciation of the variety and richness of literary texts. It offers a rigorous training in interpretive thinking and precise expression.

PREPARATION FOR THE MAJOR

The following departmental requirements are in addition to the University’s basic requirements for the bachelor’s degree. With the exception of the course in Poetry and Poetics or any other when taken to satisfy the Writing in the Major (WIM) requirement, any two of the requisite courses may be taken on a satisfactory/no credit basis at the discretion of the instructor.

MAJOR PROGRAMS OF STUDY

Because the Department of English recognizes that the needs and interests of literature students vary, it has approved several major programs of study. Each of these has different objectives and requirements; students should consider carefully which major corresponds most closely to their
personal and intellectual objectives. Students who have declared a major before Autumn Quarter 2002 may choose to follow the department’s previous guidelines for the major. Please consult the departmental website or the undergraduate English coordinator for details about requirements for the major before Autumn 2002.

MAJOR IN ENGLISH LITERATURE

This program provides for the interests of students who wish to understand the range and historical development of British and American literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis.

Students declaring a major in English Literature during Autumn Quarter 2002 and thereafter must choose a total of twelve 5-unit courses. At least one of these courses must be in American literature and at least one must be in British literature after 1750. The twelve courses must be chosen to fulfill the following six categories of requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in Critical Methods.
6. Five additional elective courses chosen from among those offered by the Department of English. Students must select three of these courses from one of the following concentrations:
   a) a specific genre: drama, film, lyric poetry, or prose fiction
   b) a specific historical period: literature before 1750, literature between 1750 and 1900, or literature after 1900
   c) one of the following areas of interest: gender and sexuality; language and rhetoric; literary theory; race and ethnicity; or single authors

Consult the English Department for a list of the courses under each of these concentrations for 2005-06. In lieu of one of these concentrations, students may take three courses from another well-defined area of interest with the approval of their adviser and the Director of Undergraduate Studies.

In place of one of these five elective courses, students may choose one upper-division course in a foreign literature read in the original language.

At least one of the courses satisfying the major must be a major’s seminar, which is any of the 5-unit seminar courses offered in the English department or an English seminar offered in the Stanford in Oxford program at St. Catherine’s College.

Students are urged not to postpone satisfying this requirement until late in their major career. Undue tardiness may result in a delay of degree conferral. Students are encouraged to take seminar format courses in both the junior and senior years.

Students may apply as many as four English courses taken at other approved universities towards the English major. Requests for transfer credit, including course syllabi and official transcript, should be submitted to the undergraduate student services coordinator. Approval of such courses towards the major is at the discretion of the Director of Undergraduate Studies.

Foreign Language Requirement — There is no foreign language requirement for English majors beyond the university requirement, but students who plan to study English at the graduate level should be aware that advanced reading skills in one or more foreign languages enhance their chances of admission to and success in most Ph.D. programs.

EMPHASIS IN THE ENGLISH MAJOR

English with a Creative Writing Emphasis — This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or fiction. Students declaring an English major with a Creative Writing Emphasis must take a total of twelve 5-unit courses offered through the Department of English and the Program in Creative Writing and fulfill the seminar requirement. The twelve courses must be chosen to fulfill the following requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in Critical Methods.
6. One course in 20th-century literature.
7. Majors with the Creative Writing emphasis must take four courses specifically designed for either the fiction or the poetry concentration. Fiction writers must first take ENGLISH 90, Fiction Writing, then two quarters of 190, Intermediate Fiction Writing, or 290A, Advanced Fiction Writing, and 146, Development of the Short Story. Poetry writers must first take ENGLISH 92, then two quarters of 192, Intermediate Poetry Writing, or 292, Advanced Poetry Writing, and one course in poetry in addition to ENGLISH 160, Poetry and Poetics, to be approved by a professor in the Creative Writing program. Courses taken to satisfy one of the six requirements above cannot also satisfy a Creative Writing requirement. ENGLISH 198 or tutorials taken elsewhere (such as tutorials in the Overseas Studies Program) may not be substituted for required courses. Admission to ENGLISH 290A and 292 is by consent of the instructor and is based on the quality of the student’s work.

ENGLISH WITH INTERDISCIPLINARY EMPHASIS

This major is intended for students who wish to combine the study of one broadly defined literary topic, period, genre, theme or problem with an interdisciplinary program of courses relevant to that inquiry. Students are required to fulfill the language and seminar requirements listed under the major in English. Students declaring an English major with an interdisciplinary emphasis during Autumn Quarter 2002 and thereafter must choose a total of fourteen 5-unit courses. These courses must fulfill the following requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in Critical Methods.
6. Three additional elective courses chosen from among those offered by the Department of English. Students must select two of these courses in relation to their interdisciplinary focus.
7. Four courses related to the area of inquiry from such disciplines as anthropology, the arts (including the practice of one of the arts), classics, comparative literature, European or other literature, feminist studies, history, modern thought and literature, political science, and African American studies. These courses should form a coherent program and they must be relevant to the focus of the courses chosen by the student to meet the requirement. Each of these courses must be approved in advance by the interdisciplinary program director. In addition, students in the interdisciplinary program must write at least one interdisciplinary paper. This may be a senior honors essay (197), a senior independent essay (199), an individual research paper (194 or 198), or a paper integrating the material in two courses the student is taking in two different disciplines.

MINORS

Both the Department of English and the Creative Writing program offer a distinct minor.

English Literature — The minor in English Literature offers some flexibility for those students who want to pursue specific interests within British and American literature, while still requiring certain courses that ensure coverage of a variety of periods, genres, and methods of studying literature. In order to graduate with a minor in English, students must complete the following program of seven 5-unit courses, at least one of which must be a seminar:
1. ENGLISH 160. Poetry and Poetics.
2. One course from each of the following historical periods:
   a) British literature to 1750
   b) British literature from 1750 to 1900 or American literature before 1900
   c) 20th-century British or American literature
3. Shakespeare
4. Two elective courses.
   One of the two elective courses may be a course in Creative Writing.

Creative Writing — The minor in Creative Writing offers a structured environment in which students interested in writing fiction or poetry develop their skills while receiving an introduction to literary forms. Students choose a concentration in either fiction or poetry. All courses must be taken for a letter grade.

1. Four writing workshops, three in the chosen concentration, one outside.
   a) Fiction minors must first take ENGLISH 90, Fiction Writing, then one or two quarters of 190, Intermediate Fiction Writing, or 290A Advanced Fiction Writing. The fourth writing course must be ENGLISH 92, Poetry Writing.
   b) Poetry minors must first take ENGLISH 92, Poetry Writing, then one or two quarters of 192, Intermediate Poetry Writing, or 292, Advanced Poetry Writing. The fourth writing course must be ENGLISH 90, Fiction Writing.
2. Two literature courses:
   a) Fiction minors must take ENGLISH 146, The Development of the Short Story; poetry minors must take ENGLISH 160, Poetry and Poetics.
   b) One elective course, selected with the approval of the Creative Writing program adviser. Beginning with academic year 2004-05, ENGLISH 94, Introduction to the Creative Writing Minor, is required instead of the elective literature course.

INTERDEPARTMENTAL MAJORS

English and French Literatures — This major provides a focus in British and American literature with additional work in French literature. The program of each student must be approved by the Director of Undergraduate Studies in English and by the Department of French and Italian.

Students declaring a major in English and French during Autumn Quarter 2002 and thereafter must choose a total of thirteen 5-unit courses, at least one of which must be a seminar. In addition, at least one of the courses must be in American literature and at least one must be in British literature after 1750. These courses are to be selected from the following categories.

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in Critical Methods.
6. Two elective courses.
7. A coherent program of four courses in French literature, read in the original.

English and German Literatures — Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in German literature, read in the original, with approval by the departments involved as specified above.

English and Italian Literatures — Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in Italian literature, read in the original, with approval by the departments involved as specified above.

English and Spanish or Spanish American Literatures — Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in Spanish literature, read in the original, with approval by the departments involved as specified above.

ADVANCED WORK

INDIVIDUAL RESEARCH

Students taking 100- or 200-level courses may, with the consent of the instructor, write a follow-up 5-unit paper based on the course material and due no later than the end of the succeeding quarter (register for 194). The research paper is written under the direct supervision of the professor; it must be submitted first in a preliminary draft and subsequently in a final version.

INTEGRATED WORK

Students taking (either simultaneously or consecutively) two or three courses which have a clear thematic or historical relationship to each other may, with the consent of the relevant instructors, write one large-scale paper of 7,000-10,000 words integrating the material in the courses in question.

SENIOR INDEPENDENT STUDY

Independent study is open, on approval by the department, to seniors majoring in English literature who wish to work throughout the year on a critical or scholarly essay of about 10,000 words. In rare circumstances, advisers may nominate exceptional students for honors if the student’s thesis is outstanding and the program of study has been approximately equivalent to that required of regular honors students.

HONORS PROGRAM

Students who wish to undertake a more extensive program in English literatures, including the Honors Seminar and independent research, are invited to apply for the honors program no later than Autumn Quarter of the junior year. All outstanding students are encouraged to engage in an honors thesis project.

Admission is selective. Provisional admission is announced in December. Permission to continue in the program is contingent upon submission, by May 15 of the junior year, of a Senior Honors Essay proposal with a bibliography.

In the Spring Quarter of the junior year, students take a 5-unit honors seminar on critical approaches to literature. (Students who are studying at Oxford or at other institutions may be exempted from this seminar on request and with the approval of the director of the honors program). The junior year seminar is designed to help students develop proposals, pose methodological questions, investigate theoretical problems, and become aware of the various approaches to literary studies.

In Winter Quarter of the senior year, honors students take a 3-unit essay workshop focused on the process of researching and writing the essay.

In the senior year, honors students complete the senior honors essay for 10 units under supervision of a faculty adviser.

The deadline for submitting the honors essay is May 15.

Students in the honors program complete all the requirements of the major and the following:

Junior seminar and workshop, 8 units total
Senior Honors Essay, 10 units

Note — For other opportunities for extended essay projects, see Senior Independent Essay and ENGLISH 194 and 199.

HONORS PROGRAM IN HUMANITIES

An honors program in Humanities is available for English Literature majors who wish to supplement the major with a related and carefully guided program of studies. See the “Interdisciplinary Studies in Humanities” section of this bulletin for a description of the program. Students wishing to take the Comparative Literature option within the honors program in Humanities should see the “Comparative Literature” section of this bulletin.
THE ENGLISH MAJOR AND THE OVERSEAS CAMPUS

The flexibility of the English major permits students to attend an overseas campus in any quarter, but it is advisable, and in some cases essential, that students spend their senior year at Stanford if they wish to participate in the Honors Program or a special in-depth reading course. For more information on Stanford overseas programs, see the “Overseas Studies” section of this bulletin.

Students should consult their advisers and the undergraduate program officer to make sure that they can fulfill the requirements before graduation. The Stanford Program in Oxford usually offers courses which apply toward both University requirements and area requirements for the English major. In either case, students should save the syllabi from their courses if they wish to apply to use them to fulfill an English major requirement.

VISITING STUDENTS

Students who do not wish to become candidates for a graduate degree, but who are qualified to meet the standards of admission to a master’s or Ph.D. program, may apply to Graduate Admissions, Registrar’s Office, Stanford University for admission as nonmatriculated students for a period of not more than three consecutive quarters. Each quarter they may take up to three English courses numbered 101 to 299, or two such courses and (with the consent of the instructor) one English course numbered above 300.

GRADUATE PROGRAMS

For University regulations governing advanced degrees, see the “Graduate Degrees” section of this bulletin.

Eligibility—Students with a bachelor's degree of acceptable quality may apply to pursue graduate work toward an advanced degree in English at Stanford. (Formal application for candidacy is a separate step taken somewhat later.) Students whose previous preparation is in a field other than English are expected to make up deficiencies. Credits for previous graduate work at Stanford or elsewhere more than five years old may be reevaluated or rejected.

Graduate students are admitted as candidates for only the Ph.D. or the M.A. in English and American Literature. The M.A. program is a terminal, one-year program without financial aid.

MAJOR OF ARTS

Candidates may earn the master’s degree in English and American Literature by satisfying the following requirements:

1. Successful completion with a 3.0 (B) grade point average (GPA) of at least nine courses (a minimum of 45 units), two of which must be 300-level courses. Ordinarily, graduate students enroll in courses numbered 200 and above. They may take no more than three courses numbered 101-199 without the consent of the Director of Graduate Studies. The master’s student may take no more than 10 units of directed reading and research (ENGLISH 398). Interested students should consult their faculty adviser or the graduate program adviser for further details.

During the first two weeks of the first quarter, candidates for the master’s degree in English and American Literature should consult the adviser designated by the Director of Graduate Studies in order to draw up a three quarter study plan. The student’s program consists of five required courses: ENGLISH 296; two courses in literature before 1800 and two courses in literature after 1800; plus four elective courses representing a mixture of survey and specialized courses chosen to guarantee familiarity with a reasonable proportion of the works on the reading list for doctoral candidates. Students whose undergraduate transcripts do not show courses in the following areas must take courses in these areas as part of their M.A. program: Medieval, Renaissance, 18th century, 19th century, 20th century (the latter two in either British or American literature). Normally, no more than two courses taken outside the department may count toward the degree, but the Graduate Studies Committee considers exceptions. No creative writing courses may be used to fulfill the requirements.

Candidates who can demonstrate unusually strong preparation in the history of English literature may undertake a 40 to 60-page master’s thesis. Such candidates may register for up to 10 units of ENGLISH 399 with the faculty member who supervises the thesis work. Candidates who write a master’s thesis may petition to be excused from up to 10 units of the requirements described above. The additional 35 units normally consist of the five required courses and two elective courses. These courses are chosen by the student and approved by the adviser and the Director of Graduate Studies.

2. Demonstration of a reading knowledge of one foreign language. (For ways of fulfilling this requirement, see the section below on language requirements for the Ph.D.)

COTERMINAL BACHELOR’S AND MASTER’S DEGREES IN ENGLISH LITERATURE

Students in the major who are interested in further graduate work in English may apply for Stanford’s coterminal master’s program. Candidates for a coterminal master’s degree must fulfill all requirements for the M.A. in English (including the language requirement), as well as general and major requirements for the B.A. in English. A minimum GPA of 3.7 in the major is required of those applying for the coterminal master’s degree. Students must also take the GRE exam in the year in which they apply. No courses used to satisfy the B.A. requirements (either as General Education Requirements or department requirements) may be applied toward the M.A. No courses taken more than two quarters prior to admission to the coterminal master’s program may be used to meet the 45-unit University minimum requirement for the master’s degree.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

COTERMINAL PROGRAM WITH SCHOOL OF EDUCATION

Students interested in becoming middle school and high school teachers of English may apply for admission to the Ceterminal Teaching Program (CTP) of the Stanford Teacher Education Program (STEP) in the School of Education. CTP students complete a special curriculum in English language, composition, and literature that combines a full English major with supplemental coursework in subjects commonly taught in California public schools and a core program of foundational courses in educational theory and practice. They are then admitted to STEP for a fifth year of pedagogical study and practice teaching. Students who successfully complete the curriculum requirements are able to enter STEP without the necessity of taking either the GRE or the usual subject matter assessment tests. At the end of five years, CTP students receive a B.A. in English, an M.A. in Education, and a California Secondary Teaching Credential. Students normally apply to the Ceterminal Teaching Program at the end of their sophomore year or at the beginning of their junior year. For complete program details and for information on how to apply, consult the Director of Undergraduate Studies in English or the CTP coordinator in the School of Education.

DOCTOR OF PHILOSOPHY

University regulations regarding the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin.

The following department requirements, dealing with such matters as residence, dissertation, and examinations, are in addition to the University’s basic requirements for the doctorate. (Students should consult the most recent edition of The Ph.D. Handbook; copies are available in the English graduate studies office.)

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the bachelor’s degree. Candidates are required to complete at least 135 units of graduate work in addition to the doctoral dissertation. At least
three consecutive quarters of graduate work, and the final course work in the doctoral program, must be taken at Stanford.  
A student may count no more than 65 units of non-graded courses toward the 135 course units required for the Ph.D., without the written consent of the Director of Graduate Studies. A student takes at least 70 graded courses (normally fourteen courses) of the 135 required total units (396L, 397A, 398, and 399 do not count toward the 70 graded units). No more than 15 units (normally three courses) may come from 100-level courses.

This program is designed to be completed in five years. Five quarters of supervised teaching, two as a teaching assistant in a literature course, one as a teaching apprentice, and two as the instructor of a Program in Writing and Rhetoric (PWR) course, are a requirement of the Ph.D. program.

In the first quarter of their first year, students take a 2-unit seminar in pedagogy as preparation for their initial teaching assistantship. In the first quarter of their second year, students take a pedagogy seminar and an apprentice teaching program. The seminar and apprentice teaching constitute a 50-percent teaching appointment. Apprentice teachers attend the classes and conferences of a senior mentor/instructor for two to three weeks. While teaching during the second and third quarters of the second year, students continue to participate in a series of PWR pedagogy workshops and visit one another’s classrooms.

ENGLISH AND AMERICAN LITERATURE

All students are expected to do course work across the full range of English and American literature. Students would be required to fulfill the following requirements. Note: fulfillment of requirements 1, 2, and 3 must be through Stanford courses; students will not be excused from these three requirements or granted credit for course work done elsewhere.

1. ENGLISH 396, Introduction to Graduate Study for Ph.D. Students (5 units), a course that introduces students to the methods of literary study, and ENGLISH 396L, Pedagogy Seminar I, for first year students (2 units).
2. Graduate-level (i.e., at least 200-level) course work in English literature before 1700, and English and American literature after 1700 (at least 5 units of each).
3. Graduate-level (i.e., at least 200-level) course work in some aspect of literary theory (e.g., courses in literary theory itself, narrative theory, poetics, rhetoric, cultural studies, gender studies; at least 5 units).
4. Students concentrating in British literature are expected to take at least one course (5 units) in American literature; students concentrating in American literature are expected to take at least one course (5 units) in British literature.
5. Of all courses taken, a minimum of six courses for a letter grade must be graduate colloquia and seminars, of which at least three must be graduate seminars. The colloquia and seminars should be from different genres and periods, as approved by the adviser.
6. Completion, in Autumn Quarter of the second year, of a pedagogy seminar which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during winter and spring quarters. There are no units associated with this work.
7. The remaining units of graded, graduate-level courses and seminars should be distributed according to the adviser’s judgment and the candidate’s needs. A student may receive graduate credit for no more than three 100-level courses in the Department of English.
8. Consent of the adviser if courses taken outside the Department of English are to count toward the requirement of 70 graded units of course work.
9. An oral qualifying examination based on a reading guide, to be taken at the end of the summer after the first year of graduate work. The final decision as to qualification is made by the graduate studies committee in consideration of the student’s overall record for the first year’s work in conjunction with performance on the examination. Note: A student coming to the doctoral program who has done graduate work at another university must petition in the first year at Stanford for transfer credit for course work completed elsewhere. The petition should list the courses and grades, and describe the nature and scope of course work, as well as the content, contact hours, and writing requirements. A syllabus must be included. The Director of Graduate Studies considers the petition in conjunction with the student’s overall performance.

10. A University Oral Examination to be taken no later than the Spring Quarter of the student’s third year in the Ph.D. program. This examination covers the field of concentration as defined by the student and the student’s adviser.

ENGLISH AND COMPARATIVE LITERATURE

The Ph.D. program in English and Comparative Literature is designed for students wishing an extensive knowledge of the literature, thought, and history of England and of at least one foreign country, for one period. Approximately half of the student’s course work and reading is devoted to this period, with the remainder of the time given to other periods of English and American literature since 1350.

This degree, administered by the Department of English, is to be distinguished from the Ph.D. in Comparative Literature. The latter program is intended for students unusually well prepared in foreign languages and involves advanced work in three literatures, one of which may be English. Interested students should consult a Department of English adviser, but faculty from Comparative Literature may also provide useful supplementary information.

The requirements are as follows:

1. Qualifications: see item 9 under requirements of the Ph.D. program in English literature. For qualifications in the doctoral program in English and Comparative Literature, candidates are not held responsible for literature before 1350, but instead include on their reading list a selection of works from a foreign language read in the original language.
2. A knowledge of the basic structure of the English language and of Chaucer. This requirement may be met by examination, or by taking 10 units of courses chosen from among those offered in linguistics, English philology, and early and middle English literature including Chaucer. No particular courses are required of all students.
3. A 5-unit course, ENGLISH 396, Introduction to Graduate Study, and a 2-unit course, ENGLISH 396L, Seminar in Pedagogy I.
4. Completion, in Autumn Quarter of the second year, of a pedagogy seminar, which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during winter and spring quarter. There are no units associated with this work.
5. A knowledge of one foreign language sufficient to take graduate-level literature courses in a foreign-language department and an advanced reading knowledge of a second language.
6. A minimum of 45 units in the history, thought, and literature of one period, in two or more languages, one of which must be English and one foreign. Students normally include at least two courses in a foreign language read in the original language and two courses listed under Comparative Literature or Modern Thought and Literature. As many as 20 units of this requirement may be satisfied through courses in reading and research. A student may receive graduate credit for no more than three 100-level courses in the Department of English.
7. A minimum of six courses for a letter grade from graduate colloquia and graduate seminars, of which three must be graduate seminars and of which at least four must be in the Department of English. Among these courses, students should take one in literary theory or criticism. These colloquia and seminars should be in different genres and periods as approved by the adviser.
8. A University oral examination covering the field of concentration as defined by the student and the student’s adviser. This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study. However, those who spend the third year studying abroad may take this examination after their return early in the fourth year.
All candidates for the Ph.D. degree (except those in English and Comparative Literature, for whom special language requirements prevail) must demonstrate a reading knowledge of two foreign languages. Candidates in the earlier periods must offer Latin and one of the following languages: French, German, Greek, Italian, or Spanish. In some instances, they may be required to offer a third language. Candidates in the later period (that is, after the Renaissance) must offer either French, German, or Latin as one language and may choose the second language from the following: Greek, Latin, French, German, Italian, Spanish, Russian, or another language relevant to the student’s field of study. In all cases, the choice of languages offered must have the approval of the candidate’s adviser. Any substitution of another language must be approved by the Director of Graduate Studies.

The Graduate Studies Committee does not accept courses taken as an undergraduate in satisfaction of the language requirement for doctoral candidates. For students coming to doctoral work at Stanford from graduate work done elsewhere, satisfaction of a foreign language requirement is determined by the Director of Graduate Studies based on the contact hours, syllabus, reading list, etc. Transfer is not automatic.

The candidate must satisfy one language requirement by the end of the first year (that is, before registration in the following year), and the other by the end of the third year.

Foreign language requirements for the Ph.D. may be fulfilled in any of the following ways:

1. A reading examination given each quarter by the various language departments, except for Latin and Greek.
2. For Latin and Greek, an examination by the Department of English. The Latin examination is given before registration in the Autumn Quarter in order to permit those who need the course to register for Latin 3. It is also given in the eighth week of the Winter and Spring quarters, along with other department examinations for languages not tested by the Educational Testing Service.
3. Passage with a grade of ‘B’ or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford. As an alternative for Latin, French, Italian, German, and Spanish, passage of CLASSLAT 51 and 52, FRENLANG 50, ITALLANG 50, GERLANG 52, and SPANLANG 50, respectively, with a grade of ‘B’ or higher.

CANDIDACY

Students are expected to file for candidacy after successful completion of qualifying procedures and, in any event, by the end of the second year of doctoral study. Candidacy is valid for five years, and may be extended, subject to satisfactory progress.

DISSERTATION

As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work.

Immediately after the dissertation topic has been approved by the adviser, the candidate should file a formal reading committee form as prescribed by the University.

The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.

JOINT PH.D. IN ENGLISH AND HUMANITIES

The Department of English participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in English and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

PH.D. IN MODERN THOUGHT AND LITERATURE

Stanford also offers a Ph.D. degree in Modern Thought and Literature. Under this program, students devote approximately half of their time to a modern literature from the Enlightenment to the present, and the other half to interdisciplinary studies. Interested students should see the “Modern Thought and Literature” section of this bulletin and consult the chair of the program.

CREATIVE WRITING FELLOWSHIPS

The Creative Writing Program each year offers five two-year fellowships in poetry and five two-year fellowships in fiction. These are not degree-granting fellowships. Information is available in the Creative Writing office, (650) 725-1208.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

NUMBERING SYSTEM

Pre-1750:
100-110 Lecture Courses
111-119 Seminar Courses
1750-1900:
120-129 Lecture Courses
130-139 Seminar Courses
Post-1900:
140-149 Lecture Courses
150-159 Seminar Courses

Required Courses:
160-169
Themes and Topics:
170-179 Lecture Courses
180-189 Seminar Courses

Courses for Advanced Undergraduates and Graduate Students:
200-289
Graduate Colloquia:
300-313
Graduate Seminars:
314-389
Writing Courses, Workshops, Individual Study:

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by English department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in English are advised to consider satisfying their IHUM-2,3 requirements by registering for the following IHUM courses.

IHUM 37A, 5 units, Win (Riggs)
IHUM 37B, 5 units, Spr (Felstiner)
INTRODUCTORY (FOR NON-MAJORS)

Classes for students whose major is undeclared, or who are not majoring in English.

ENGLISH 5. Great Texts and Key Issues: An Introduction to Literature — How literary texts interact with issues such as morality, identity, sexuality, nationality, religion, and politics. Readings from national literatures including Italian, French, English, American, and German; genres including short story, essay, novella, drama, travelogue, and novel; historical spectra from the 14th-20th centuries. GER:DB-Hum
3 units, Spr (Evans)

ENGLISH 9. Masterpieces of English Literature I: Chaucer, Shakespeare, Milton, and their Contemporaries — (English majors and others taking 5 units, register for 109.) From the late 14th to the late 17th century. GER:DB-Hum
3 units, Aut (Fletcher)

ENGLISH 20. Masterpieces of English Literature II: From the Enlightenment to the Modern Period — (English majors and others taking 5 units, register for 120.) From the 18th to the 20th centuries. Topics include the development of the novel, rise of the lyric, Romanticism, realism, Modernism, characterization, representation of consciousness, and the cinematic imagination. GER:DB-Hum
3 units, Spr (Rovee)

ENGLISH 21. Masterpieces of American Literature — (English majors and others taking 5 units, register for 121.) Political, racial, and sexual questions which inform works of American literature from the early Republic to the mid-20th century. GER:DB-Hum
3 units, Win (Obenzinger)

ENGLISH 60. Poetry and Poetics — (English majors and others taking 5 units, register for 160.) Introduction to the reading of poetry, with emphasis on how the sense of poems is shaped through diction, imagery, and technical elements of verse. GER:DB-Hum, WIM
3 units, Aut (Jenkins), Win (Felstiner), Spr (Boland)

INTRODUCTORY SEMINARS

Suffix N = Preference to freshmen
Suffix Q = Preference to sophomores

ENGLISH 54N. Orwell: Literature and Political Engagement — Stanford Introductory Seminar. How Orwell made political writing into an art by representing political crises including imperialism, poverty, inequality, revolution, and totalitarianism. His experiments with literary forms that blurred the lines between fiction and nonfiction, literature and journalism, essay and memoir, realism and allegory. Focus is on major works and relevance to socially-engaged literature, writing, and journalism. GER:DB-Hum
3 units, Aut (Elam)

ENGLISH 56N. Mixed Race in the New Millennium — Stanford Introductory Seminar. Contemporary literary and cultural representations of the mixed race experience. Sources include novels, memoirs, and secondary texts in history, race theory, and literary criticism that engage issues related to racial and cultural hybridity including the literary history of the mulatto, passing, gender politics, identity formation, and social location. GER:DB-Hum
3 units, Aut (Elam)

ENGLISH 65N. Contemporary Women Fiction Writers — Stanford Introductory Seminar. Focus is on writers who contribute to a sense of contemporary domestic and global politics, sex and sexual orientation, and place and its meanings. Short stories, novels, essays, and poetry. Writers include Toni Morrison, Edwidge Danticat, Alice Munro, Edna O’Brien, and Mary Gaitskill. GER:DB-Hum
3 units, Spr (Tallent)

ENGLISH 68N. Mark Twain and American Culture — Stanford Introductory Seminar. Mark Twain defined the rhythms of American prose, the contours of its moral map, and its promise, failures, foibles, and flaws. Focus is on how his work provides a window on his time and speaks to the present. Sources include his travel books, journalism, short stories, and novels. GER:DB-Hum
4 units, Aut (Fishkin)

ENGLISH 70N. Shakespeare on Film — Stanford Introductory Seminar. Introduction to film studies. A Midsummer Night’s Dream directed by Reinhardt and Hall; Romeo and Juliet by Zeffirelli and Luhrman; Henry V by Olivier and Branagh; Hamlet by Gade, Olivier, Kozintsev, Zeffirelli, Branagh, and Almeryda. GER:DB-Hum
3 units, Win (Riggs)

ENGLISH 73N. Conflict and Resolution in the Novel — Stanford Introductory Seminar. Preference to freshmen. The social work of the novel, its strategies for articulating difference, and its capacity to objectify points of view and posit resolutions to ideological disputes. The novel as an artistic device, part of material history, and style of social consciousness. Its relationship to language and cultural systems of representation. Readings from Franz Kafka, Milan Kundera, Toni Morrison, Umberto Eco, and John Coetzee. GER:DB-Hum
3 units, Win (Shless)

ENGLISH 82Q. Shakespeare’s Plays — Stanford Introductory Seminar. Eight representative plays; sonnets. Student papers provide topics for discussion. Students direct and perform scenes from the plays studied. GER:DB-Hum
5 units, Aut (Rebholz)

ENGLISH 83Q. Playwriting: A Workshop in Craft — Stanford Introductory Seminar. Preference to sophomores. The fundamentals of crafting a stage play, including genre, dialogue, characterization, and plot. Professional models for such craft elements, and newer approaches. Students develop a dramatic idea into a more polished version of a scene or short one-act play to demonstrate the elements of stagecraft.
4 units, Aut (DiPirro)

ENGLISH 86N. Wicked Witches of the West and their Children: Dangerous Women in Greek and Shakespearean Tragedy — Stanford Introductory Seminar. Writers of tragedy, and powerful, heroic, or witch-like women. How these characters bring the unworlky and forbidden into theater. Comparison of women from Greek tragedy and Shakespeare such as Medea and Lady Macbeth to relate the depiction of female danger with the cultures and conventions of their periods. GER:DB-Hum, EC-Gender
3 units, Aut (Friedlander)

ENGLISH 87Q. The Graphic Novel: Literature Lite? — Stanford Introductory Seminar. The evolution of funnies to comics and graphic novels. How definitions and representations of this genre have changed over the last century. The controversy over the status of the graphic novel. GER:DB-Hum
5 units, Win Lunsford)

PRE 1750

Lecture courses: 100-109
Seminar courses: 110-119

ENGLISH 102. Chaucer — Chaucer’s Canterbury Tales, focusing on forms of medieval vernacular literature, the critical traditions of interpretation, and the social and political contexts for his work and its immediate reception. GER:DB-Hum
5 units, Win (Lerer)

ENGLISH 104C. From Epic to Romance: The Medieval Literature of Courtly Love — Cultural traditions and historical events that precipitated a shift in medieval narrative modes from epic to romance: the Germanic ethos, the Celtic tradition, Hispano-Arabic love poetry, the Crusades, the Provençal troubadours. Readings from Beowulf and the Volsunga Saga, the Tain and the Mabinogion, the Lais of Marie de France, the romances of Chrétien de Troyes, and Provençal lyrics. GER:DB-Hum
5 units, Spr (Steidle)
5 units, Aut (Orgel)

ENGLISH 109. Masterpieces of English Literature I: Chaucer, Shakespeare, Milton, and their Contemporaries—(Same as 9; see 9.) GER:DB-Hum
5 units, Aut (Fletcher)

ENGLISH 113B. Elizabeth I in Elizabethan Literature—Poems and plays by Spenser, Sidney, and Raleigh in which representations of the Queen merge concerns about national identity, gender, sexuality, and desire. Elizabeth as a writer whose poetry, letters, and speeches respond to those representations and raise questions about the historical meanings of female power. Elizabeth’s modern-day legacy in films such as *Elizabeth*. GER:DB-Hum
5 units, Spr (Summit)

ENGLISH 115D. Tragedy—The development of tragedy from Aristotle to *Apocalypse Now*. The origins of tragedy and its place in modern life. GER:DB-Hum
5 units, Aut (Fletcher)

ENGLISH 116C. Restoration Literature—Preference to majors. The 1660 return of the court after the Civil War and the flowering of literature and culture much of which focused on the king as charismatic and fascinating, yet embittered, lazy, dissolute, and promiscuous. The ambivalence provoked by the Stuart court. Literature that focuses on the figure of Satan, such as *Paradise Lost*. Why Satan becomes such a powerful figure in the culture’s imagination. Issues such as transgression, sexuality, regicide, and heroism. GER:DB-Hum
5 units, Spr (Vermeule)

ENGLISH 117. 18th-Century Satire—Preference to majors. Satire as a cultural universal. The commitment and intensity of 18th-century British satire, by turns funny, brutal, scabrous, and melancholy. How satire tends to focus on sex and power. The role satire in contemporary American culture: when does speech become too hot to handle? Authors include: Horace, Juvenal, Swift, Pope, Johnson, Burney, Voltaire, and Orwell. GER:DB-Hum
5 units, Win (Vermeule)

1750-1900
Lecture courses: 120-129
Seminar courses: 130-139

ENGLISH 120. Masterpieces of English Literature II: From the Enlightenment to the Modern Period—(Same as 20; see 20.) GER: DB-Hum
5 units, Spr (Rovee)

ENGLISH 121. Masterpieces of American Literature—(Same as 21; see 21.) GER:DB-Hum
5 units, Win (Obenzinger)

ENGLISH 123. American Literature and Culture to 1855—(Same as AMSTUD 150.) Major issues in early American cultural and literary history; developments in the fine and domestic arts; and methodological issues central to American Studies. Texts include Cotton Mather and Melville. GER:DB-Hum, EC-AmerCul
5 units, Win (Fliegelman)

ENGLISH 123A. American Women Writers, 1850-1920—How female writers negotiated literary, social, and intellectual movements including 19th-century abolitionism and sentimentalism, and 20th-century progressivism and avant garde modernism. Authors include Harriet Beecher Stowe, Harriet Jacobs, Rebecca Harding Davis, Emily Dickinson, Kate Chopin, Sui Sin Far, Gertrude Stein, Willa Cather, and Charlotte Perkins Gilman. GER:DB-Hum
5 units, Spr (Richardson)

ENGLISH 123C. Henry James—The tales, nouvelle, novels, and critical essays of America’s most influential novelist and theorist of fiction, including “Daisy Miller,” *Portraits of a Lady*, *Turn of the Screw*, and *Wings of the Dove*. GER:DB-Hum
5 units, Aut (Dekker)

ENGLISH 124. The Eighteenth-Century British Novel—Authors include Behn and Sterne. GER:DB-Hum
5 units, Spr (Castle)

ENGLISH 126B. The Nineteenth-Century British Novel—The novel as a recent innovation developing in 18th-century England. Seven novels spanning the 19th and early 20th centuries, including the Romanticism of Shelley’s *Frankenstein*, the realism of the major writers of high Victorian times, the nightmare of Conrad’s *Heart of Darkness*, and Woolf’s *To the Lighthouse* as a reflection on the 19th-century fictions to which the 20th century was compelled to respond. GER:DB-Hum
5 units, Aut (Paulson)

ENGLISH 135B. Jane Austen—Preference to majors. The fiction of Jane Austen, including the *Juvenilia*, *Lady Susan*, and her unfinished novel *Sanditon*. The critical tradition and how she has been interpreted on film. GER:DB-Hum
5 units, Win (Vermeule)

ENGLISH 135C. Dickens—How Dickens’ literary modes, including the comic, grotesque, sentimental, melodramatic, and realistic, widened the range of 19th-century fiction. Issues include: the relationship between Dickens and urban modernity; the complexity and strangeness of Dickensian humor; tensions between narrative fragmentation and coherence; self-reflexivity and the novel’s treatment of writing and language; and strategies of social representation. GER:DB-Hum
5 units, Spr (Woloch)

ENGLISH 136. Romantic Poetry—Romantic experiments with form. The philosophical, political, and cultural implications of the forms of imaginative writing during this period, including the epic and dramatic, sonnets, odes, lyrical ballads and prose, songs, and conversation poems. Authors include Wordsworth, Smith, Coleridge, Blake, Keats, Hunt, Byron, Lamb, and Shelley. GER:DB-Hum
5 units, Aut (Gigante)

5 units, Aut (Rovee)

ENGLISH 137. Keats and Wilde—Writing at different ends of the 19th century, Keats and Wilde shared a commitment to art and beauty. The political significance of that commitment in a culture of mechanization. Their major writings; close reading technique. Issues include: aestheticism and the politics of culture; art and public morality; eroticism; the role of the artist; book illustration; 19th-century masculinities; and imagination and lying. GER:DB-Hum
5 units, Spr (Rovee)

ENGLISH 138C. Huckleberry Finn and American Culture—(Same as AMSTUD 138C.) Preference to majors. From publication to the present, Mark Twain’s *Adventures of Huckleberry Finn* has generated widespread disagreement over what it is, what it does, and why it should be valued. The literature, history, and popular culture that shaped the novel, and that it helped shape. Topics include vernacular traditions in American literature, the history of racism in American society, and the role of African American voices in shaping the text. GER:DB-Hum
5 units, Win (Fishkin)

ENGLISH 139E. Irish American Literature—Preference to majors. From the late 18th-century pre-famine years to the present. Emphasis is on how this sub-canonical fits into the canon of American literature. GER: DB-Hum
5 units, Aut (Jockers)
POST 1900

Lecture courses: 140-149
Seminar courses: 150-159

ENGLISH 142C. The Dream Factory: Introduction to Classic Hollywood Movies — The great Hollywood film studios, the development of film genres such as comedy, film noir, adventure, and musicals, and how movies reflect or create American fears, fantasies, and dreams. Cultural and social background. Directors such as Alfred Hitchcock, Billy Wilder, William Wyler, Steven Spielberg, and Quentin Tarantino. GER:DB-Hum
5-3 units, Spr (Moser)

ENGLISH 146. Development of the Short Story — Required of creative writing students in fiction. The WW II, postwar, and contemporary short story. GER:DB-Hum
5 units, Win (Tallent)

ENGLISH 146C. Hemingway, Hurston, Faulkner, and Fitzgerald — While Hemingway and Fitzgerald flirted with the avant garde in Europe, Hurston and Faulkner performed anthropological fieldwork in the American South. The concerns and styles of four writers who marked America’s coming-of-age as a literary nation with their experiments in the regional and global, the racial and cosmopolitan, the macho and feminist, the decadent and impoverished. GER:DB-Hum
5 units, Aut (Jones)

5 units, Win (Di Piero)

ENGLISH 150D. Women Poets — Preference to majors. GER:DB-Hum
5 units, Spr (Boland)

ENGLISH 150F. W. B. Yeats — Preference to majors. Yeats’ poetry, prose writings, and two of his plays. Themes include nationalism, the imagination, sexuality, the occult, modernity, Irishness, eugenics, and authoritarianism. GER:DB-Hum
5 units, Win (Jenkins)

ENGLISH 152D. W.E.B. Du Bois and American Culture — Preference to majors. His life and career. Focus is on the first half of his life from his Harvard doctoral dissertation to the end of the Harlem Renaissance in which he played a crucial role. Sources include his books on history and sociology, scholarly essays, novels, and journals that he edited. GER:DB-Hum
5 units, Win (Elam)

5 units, Spr (Vermeule)

ENGLISH 153H. Digital Humanities: Literature and Technology — (Same as HUMNTIES 198.) How electronic texts, literary databases, computers, and digital corpora offer unique ways of reading, analyzing, and understanding literature. Intellectual and philosophical problems associated with an objective methodology within a traditionally subjective discipline. GER:DB-Hum
5 units, Aut (Jockers)

ENGLISH 153J. Virginia Woolf and the Social System — Woolf’s major prose narratives in light of the social and historical circumstances which brought them into being and to which they respond. Topics include The Voyage Out as the portrait of the artist as a young woman; Mrs. Dalloway and the English class system; the domestic politics of To the Lighthouse; feminism in historical perspective in A Room of One’s Own; pacifism and the coming of war in Between the Acts; and lesbian consciousness in Orlando. GER:DB-Hum
5 units, Spr (Shloss)

ENGLISH 154C. Modern British Poetry — Poets include Thomas Hardy, G. M. Hopkins, Thom Gunn, and W. S. Graham. GER:DB-Hum
5 units, Win (Di Piero)

ENGLISH 155. The Journey: Pound, Bishop, Walcott — Poetry’s basic axis is metaphor, a trope which enacts a kind of journey, a crossing from the known into the unknown and a return back. Why the journey has retained a poetic theme from ancient civilizations to the present. The work of three modern poets for whom the journey, as subject and structuring formal principle, has been especially important. GER:DB-Hum
5 units, Win (Jones)

REQUIRED COURSES

Lecture courses: 160-169; there are no required seminar courses.

ENGLISH 160. Poetry and Poetics — (Same as 60; see 60.)
5 units, Aut (Jenkins), Win (Felstiner), Spr (Boland)

ENGLISH 163. Shakespeare — Major plays emphasizing theatrical representation of extreme characters. GER:DB-Hum
5 units, Aut (Friedlander)

ENGLISH 163B. Shakespeare — GER:DB-Hum, EC-Gender
5 units, Spr (Parker)

THEMES AND TOPICS

Lecture courses: 170-179
Seminar courses: 180-189

ENGLISH 172. Contemporary Indian English Fiction, 1980-2005 — Styles, theme, and its ideological changes in the Indian novel in English since Rushdie’s Midnight’s Children. The new generation of Indian novelists known as Rushdie’s children. The vitality of this fiction. How the Indian subcontinent has been imaginatively reworked in recent Indian Anglophone writing and the crosscultural impact of such reinvention. GER:DB-Hum
5 units, Aut (Nair)

ENGLISH 172B. Multiculturalism and Magic Realism — The metaphors of multiculturalism in the vocabulary of popular culture. Multiculturalism as utopian vision of social amity and nightmarish fantasy of dystopia. How self intimacy and radical otherness intersect in the contemporary world through the mix-and-match style that multiculturalism shares with magic realist fictions such as Gabriel García Márquez, Ben Okri, and Salman Rushdie. GER:DB-Hum
5 units, Win (Nair)

ENGLISH 172D. Introduction to Comparative Studies in Race and Ethnicity — (Same as PSYCH 155, CSRE 196C.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER: DB-SocSci
5 units, Win (Markus, Moya)

ENGLISH 176. Science Fiction — International science fiction from the late 19th century to the present. How writers and filmmakers imagine future societies in relation to evolving technologies and changing natural environments. Does cultural change drive technological development, or vice versa? Are alien worlds reflections of or alternatives to human society? What are the grounds for utopian hope or dystopian fear of the future? Authors include Verne, Wells, Strugatzky, Lem, Gibson, Sterling, Le Guin, Atwood, and Weller. GER:DB-Hum
5 units, Win (Heise)
ENGLISH 177. History of Children’s Literature — (Same as COMPLIT 123.) From origins to the present. Focus is on writings for children in the English and American tradition. European texts and contexts. Techniques of critical analysis, the history of publishing and reading, and the rise of children’s literature as a commercial venture. GER:DB-Hum 5 units, Win (Brooks)

ENGLISH 180A. Truth, Fiction, and Interpretation — (Same as HUMNTIES 194Z.) What does it mean for something to be fictional? How the answer to this question dictates what can be said about fiction and limits interpretative methods. What kind of thing is a fiction? Is there a realm of wisdom from which the logician is banned? Readings include fictions, poems, and philosophy. GER:DB-Hum 5 units, Aut (Rerer)

ENGLISH 180D. Poetics and Politics of Caribbean Women’s Literature — (Enroll in CASA 145A/245A.) 5 units, Aut (Duffey)

ENGLISH 180F. American Book History, 1660-1860 — Publishing, the marketplace, the history of reading, printing, and other aspects of the book in pre-Civil War America. GER:DB-Hum 5 units, Spr (Fliegelman)

ENGLISH 181. The English Essay Tradition — Mixing personal reflections with social critique, the familiar essay appeared at the beginning of the 18th century as a way to shape tastes and morals. How writers such as Joseph Addison, Samuel Johnson, Oliver Goldsmith, Henry Mackenzie, Leigh Hunt, Charles Lamb, and William Hazlitt developed confessional, critical, parodic, picturesque, melancholy, comic, and grotesque styles to portray contemporary character types and the universal human condition. GER:DB-Hum 5 units, Aut (Gigante)

ENGLISH 182. Conflict and Resolution: The Artist as Witness — (Same as HUMNTIES 194S.) The social work of the novel. Its strategies for articulating difference and capacity to objectify points of view and posit resolutions to ideological disputes. The novel as artistic device, material history, narrative, and style of social consciousness. Its relationship to language and systems of representation that it shares with the wider culture. Its formal organization of choice, creation of misapprehension, and construction of deviation. Theorists include Bakhtin, Barthes, Brooks, and Jameson. Reading include Tolstoy, Kafka, Swift, Kundera, Morrison, Coetzee, and Hosseini. GER:DB-Hum 5 units, Spr (Gross)

ENGLISH 182A. Does Literature Matter? — (Enroll in COMPLIT 159.) 3-5 units, Spr (Gelder)

ENGLISH 184A. The Reciprocal Vision — How European and American authors have represented and misrepresented each other’s national culture and character from the American Revolution to the present. GER:DB-Hum 5 units, Spr (Evans)

ENGLISH 184B. Text as Context — (Same as HUMNTIES 194B.) Conditions that situate texts in their social, political, religious, and artistic dimensions, and that impact on conceptions of meaning. Changing views of relationships between text and their audience. Film adaptations. Texts include Rumi, Donne, Shakespeare, Joyce, Woolf, Stein, Beckett, Pound, and Picasso. GER:DB-Hum 5 units, Win (Brooks)

ENGLISH 185. Narrative Theory and the Emotions — How cultures use stories to construct, memorize, and illuminate the world. Narrative as a universal discourse that regulates and stimulates emotional life. Major perspectives on narrative from Aristotle to Zizek. Why narratives are a universal discourse that regulates and stimulates emotional life. Major perspectives on narrative from Aristotle to Zizek. Why narratives are essential to the organization of inner worlds of feeling. GER:DB-Hum 5 units, Win (Nair)

ENGLISH 186. Tales of Three Cities: New York, Chicago, Los Angeles — How urban form and experience shape literary texts and how literary texts participate in the creation of place, through the literature of three American cities as they ascended to cultural and iconographical prominence: New York in the early to mid 19th century; Chicago in the late 19th and early 20th centuries; and Los Angeles in the mid to late 20th century. GER:DB-Hum 5 units, Win (Richardson)

UNDERGRADUATE WORKSHOPS AND DIRECTED READING

ENGLISH 191. Advanced Writing — (Enroll in PWR 191.) 3 units, Spr (Diogenes)

ENGLISH 192W. Projects in Research, Writing, and Rhetoric — (Enroll in PWR 192.) 1-5 units, Aut (Obenzinger)

ENGLISH 193. Writing the Honors Thesis — (Enroll in PWR 193.) 1-5 units, Win, Spr (Obenzinger)

ENGLISH 194. Individual Research — See section above on Undergraduate Programs, Opportunities for Advanced Work, Individual Research.

ENGLISH 195. Ad Hoc Undergraduate Seminar — Undergraduates (at least three) who wish, in the following quarter, to study a subject or an area not covered by regular courses may plan an informal seminar and approach a member of the department to supervise it. A syllabus should be submitted to the director of undergraduate advising at least two weeks before the end of the quarter. No more than 5 units of credit are given for 195 and/or 196 in one quarter. 195 may not be used to fulfill departmental area or elective requirements without permission. May be repeated for credit.

ENGLISH 195A. A Research Seminar in American Studies — (Same as AMSTUD 210.) For juniors and seniors who wish to pursue a paper topic or research question beyond the confines of a traditional course. Year-long sequence. Students meet individually and in a tutorial setting with the professor to discuss projects, participate in small group discussions, and present a chapter of a senior thesis, thesis prospectus, or research paper. Limited enrollment. May be repeated for credit.

ENGLISH 195W. Peer Writing Tutor Training Course — (Enroll in PWR 195.) 3 units, Spr (Moneyhun)

ENGLISH 196A. Honors Seminar: Critical Approaches to Literature — Required of all juniors in the English honors program.

ENGLISH 197. Seniors Honors Essay — In two quarters.

ENGLISH 198. Individual Work — Undergraduates who wish to study a subject or area not covered by regular courses may, with consent, enroll for individual work under the supervision of a member of the department. 198 may not be used to fulfill departmental area or elective requirements without consent. Group seminars are not appropriate for 198. 1-5 units, Win, Spr, Sum (Staff)

ENGLISH 199. Senior Independent Study — Open, with department approval, to seniors majoring in English who wish to work throughout the year on a 10,000 word critical or scholarly essay; see note under “Honors Program” above. Applicants submit a sample of their expository prose, proposed topic, and bibliography to the Director of Undergraduate Studies before preregistration in May of the junior year. Each student accepted is responsible for finding a department faculty adviser.

1-10 units, Aut, Win, Spr (Staff)
### CREATIVE WRITING

**ENGLISH 28B. The Occasions of Poetry**  
3 units, Win (Staff)

**ENGLISH 29. Reading for Writers: Writing for Nations**  
3 units, Spr (Staff)

**ENGLISH 90. Fiction Writing** — Problems of narrative and imaginative writing. Prerequisite: PWR 1  
5 units, Aut, Win, Spr (Brelinski, Kealey, McNeely, Watrous)

**ENGLISH 92. Reading and Writing Poetry** — Prerequisite: PWR 1.  
5 units, Aut, Win, Spr (Campion)

**ENGLISH 94. Introduction to the Creative Writing Minor** — For minors in creative writing. The forms and conventions of the contemporary short story and poem. How form, technique, and content combine to make stories and poems organic. Prerequisite: 90 or 92.  
5 units, Aut, Win (Johnson)

**ENGLISH 94A. Creative Nonfiction** — Historical and contemporary as a broad genre including travel and nature writing, memoir, biography, journalism, and the personal essay. Students use creative means to express factual content.  
5 units, Aut, Win (Johnson)

**ENGLISH 95. Form and Theory of the Novel** — Seminar. For writers. How form and technique reveal the writer’s world view. How writers connect detail, description, action, dialog, and thought to create scenes. How the balance of these elements creates an author’s voice. How scenes build tension, create empathy, propel story, reveal character, explore setting, and raise or contest ideas. Tradition, conventions, design, narrative strategy, research, and historical perspective. Guest instructors from Stanford’s Jones Lecturers in fiction.  
5 units, Spr (Johnson)

**ENGLISH 190. Intermediate Fiction Writing** — May be taken twice. Lottery. Priority to last quarter/year in school, majors in English with Creative Writing emphasis, and Creative Writing minors. Prerequisite: 90.  
5 units, Aut, Win, Spr (Altschul, Kealey, MacDonald, McNeely, Puchner, Watrous)

**ENGLISH 190F. Fiction Writing for Film** — Workshop. For screenwriting students. Story craft, structure, and dialogue. Assignments include short scene creation, character development, and a long story. How fictional works are adapted to screenplays, and how each form uses elements of conflict, time, summary, and scene. Prerequisite: 90.  
5 units, Win (Kealey)

**ENGLISH 192. Intermediate Poetry Writing** — May be taken twice. Lottery. Priority to last quarter/year in school, majors in English with Creative Writing emphasis, and Creative Writing minors. Prerequisite: 92.  
5 units, Aut, Win, Spr (Campion, Snider)

**ENGLISH 290A. Advanced Fiction Writing** — Promising fiction writers who have completed the 90 and 190 workshops engage in practical criticism, and the challenges of refining a short story, draft to draft. Students selected by instructor.  
5 units, Win (Tallent), Spr (MacDonald)

**ENGLISH 292. Advanced Poetry Writing** — Promising student poets write poetry in an atmosphere of mutual aid. Students selected by instructor.  
5 units, Spr (Campion)

**ENGLISH 390. Graduate Fiction Workshop** — For Stegner fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.  
3 units, Aut (L’Heureux), Win (Tallent), Spr (Wolff)

**ENGLISH 392. Graduate Poetry Workshop** — For Stegner fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.  
3 units, Aut (Fields), Win (Boland), Spr (Di Piero)

### ADVANCED UNDERGRADUATE/GRADUATE

**ENGLISH 235D. The Shelley Circle** — Themes and preoccupations of Romantic-era novels and poetry by radical, scandalous, and path-breaking members of the Shelley circle including Mary Wollstonecraft, William Godwin, Mary Shelley, Percy Bysshe Shelley, Lord Byron, and John Keats. GER:DB-Hum  
5 units, Spr (Gigante)

**ENGLISH 251. Donne and His Contemporaries** — The influence of Donne’s dramatic realism on poets of his time and modern poets such as Browning, Eliot, and Rich. How intellectual and cultural changes in Donne’s lifetime left their mark on his writing. GER:DB-Hum  
5 units, Aut (Brooks)

**ENGLISH 256. The Cantos of Ezra Pound** — Pound’s efforts to renew English poetry, translate and adapt works from other languages, found the imagist and vorticist movements, and influence the cultural, aesthetic, economic, and political literature of the 20th century. His image of the poet as visionary who simultaneously attempts to write a poem containing history and paradise. Focus is on his modernist epic The Cantos, and his early works and prose. GER:DB-Hum  
5 units, Win (Shliss)

**ENGLISH 257. Imagism: The Bigger Picture** — Imagism as a poetic movement whose tenets had an major impact on later poetry. Philosophical and historical contexts, reasons for its brief lifespan, and reverberations of its doctrines in modern poetry’s obsession with the ocular, images, and the shape of the poem on the page. Authors include T. E. Hulme, Pound, H. D. Moore, and Williams. GER:DB-Hum  
5 units, Spr (Jenkins)

**ENGLISH 271. History of the English Language** — From origins in the Germanic dialects, through Old and Middle English, to modern English. The development of English as a literary language, relationships between political control and linguistic expression, and the historical impact of writing and reading on the forms of English.  
5 units, Aut (Lerer)

**ENGLISH 271B. Chaucer: Early Works** — Chaucer’s early works including lyrics, allegorical dream visions, and Troilus and Criseyde. His experiments with literary form and tradition; gender, desire, history, and writing as his central concerns. Readings include critical and contextual materials that illuminate his classical and medieval literary sources, responses to late medieval culture, and society, and place in literary history.  
5 units, Win (Summit)

**ENGLISH 276. The Enigma of Victorianism** — The bizarre and effective combination of ruthless capitalism and sentimental moralism typical of 19th-century Britain and 21st-century America. Why would a culture build a train station and cover it with the shell of a gothic cathedral? Can people believe in ethical statements contradicted by reality? Focus is on novels, poetry, melodramas, journalism, and essays.  
5 units, Spr (Moretti)

**ENGLISH 279D. James Joyce: Ulysses** — Close reading.  
5 units, Win (Bourbon)

**ENGLISH 293. Literary Translation** — Baudelaire, Rilke, Neruda, Celan, Pagis, Shakespeare, Keats, Dickinson, Whitman, Yeats, Eliot, Frost, and Duncan. Students present work in progress, discussing practical and theoretical questions.  
5 units, Spr (Felstiner)

**ENGLISH 296. Introduction to Critical Theory: Literary Theory and Criticism Since Plato** — Required colloquium for incoming M.A. students. Major critical texts from Plato and Aristotle to Stanley Fish, focusing on issues such as mimesis, canonicity, evaluation, and interpretation.  
5 units, Aut (Evans)
ENGLISH 300. The Pearl Poet—Four poems of the Cotton Nero A.x. manuscript: Pearl, Cleanse, Patience, and Sir Gawain and the Green Knight. Conceptual problems of category, aesthetics, and literary history that attend them.
5 units, Win (Justice)

ENGLISH 302. The History of the Book
5 units, Aut (Orgel)

ENGLISH 303F. Institutions of Enlightenment: The Invention of the Public Sphere—(Same as HISTORY 331A, COMPLIT 331C.) The cultural foundations of the Enlightenment as public space and its relationship to the private or intimate sphere. The invention and naturalization of fundamental institutions of the Enlightenment such as the public, the private, the market, public opinion, literature, the individual, society, culture, knowledge, and politics.
5 units, Aut (Bender)

ENGLISH 307C. Methods and Materials for the Study of Modern Literature—Tools, strategies, and sources for cultural analysis of literary works from the late 18th century to the 20th century. Novels by Sterne, Gaskell, and DeLillo introduce the non-literary signifying practices that constitute their respective social formations. Readings of these competing discourses include 18th-century newspapers and political cartoons, mid-Victorian parliamentary reports and conduct manuals, and American mass market magazines and documentary films.
5 units, Spr (Keogh)

ENGLISH 308A. Mark Twain—Journalism, travel books, novels, stories, sketches, and essays by Mark Twain; critical responses to his work from the 19th century to the present; and creative responses to his work by 20th-century writers in the U.S. and other countries such as Japan. How Twain and his critics engaged issues such as race and racism, anti-Semitism, imperialism, history, gender, technology, identity, and performance. Field trip to Mark Twain papers at Berkeley.
5 units, Spr (Fishkin)

ENGLISH 309. The Ethnic Bildungsroman and Historical Novel—(Same as COMPLIT 326C.) Can a case be made for defining the classical stage of minority novels in formal rather than thematic terms? The Bildungsroman as the novel of human emergence despite how a human being can emerge in diverse ways. Focus is on contemporary ethnic novels to establish a formal definition for ethnic and minority narratives in the historical mode.
5 units, Win (Saldivar)

SEMINARS

ENGLISH 311. British Women Novelists of the Twentieth Century, Excluding Woolf—Writers may include Rebecca West, Sylvia Townsend Warner, Elizabeth Bowen, Muriel Spark, Clemence Dane, Mary Butts, Kate O’Brien, Mary Renault, Jean Rhys, Maureen Duffy, and Iris Murdoch.
5 units, Win (Castles)

ENGLISH 314. Epic and Empire—(Same as COMPLIT 320A.) Focus is on Virgil’s Aeneid and its influence, tracing the European epic tradition (Ariosto, Tasso, Camoes, Spenser, and Milton) to New World discovery and mercantile expansion in the early modern period.
5 units, Spr (Parker)

ENGLISH 319. Realisms and Anti-Realisms—The strategies and aesthetics of representation in fiction and film. Foundational articulations of a realist aesthetic crossing political and generic divides. Georg Lukács, Erich Auerbach, and André Bazin, in relation to polemics against realism developed since the 60s. The significance of returning to these theories and to the idea of realism itself in the wake of poststructuralism and deconstruction.
5 units, Win (Woloch)

ENGLISH 334A. The Modern Tradition I—(Same as MTL 334A.) Preference to first-year students in Modern Thought and Literature and English. Texts that have formed the foundation for contemporary cultural and social theory including Kant, Hegel, Marx, Weber, Lukács, Nietzsche, Freud, and Heidegger.
5 units, Aut (Moya)

ENGLISH 361. Memoria: The Arts and Practices of Memory—Questions of memory at the forefront of research, from neurosciences to anthropology to literary studies, and the flood of memoirs and memories attest to the contemporary power of memory. Goal is to reclaim the canon of memoria for English and rhetoric studies. Sources include primary texts in the history of memory. The role of memory in writing and literature, focusing on the 20th century to the present.
5 units, Aut (Lunsford)

ENGLISH 363D. Identity, Experience, and Knowledge in Feminist Theory—Debates in contemporary feminist thought focusing on texts that interrelate identity, experience, and knowledge.
5 units, Win (Nair)

ENGLISH 365B. Antebellum American Literature and Culture—Interdisciplinary. Cultural production in the decades before the Civil War from furniture to literature.
5 units, Win (Fliegelman)

ENGLISH 366A. Explanation/Interpretation—(Same as COMPLIT 351.) What should literary critics and historians do: explain or interpret? What is the difference between these intellectual activities, and what is at stake in the choice of one over the other? Readings include Weber, Freud, Popper, Gadamer, Hempel, Douglas, Geertz, Szondi, and Panofsky.
5 units, Spr (Moretti)

ENGLISH 369. Literature and Visual Culture in 19th-Century Britain—Ethical, political, and aesthetic issues implicated by the rise of the museum, popular spectacles, photography and painting, novels and games, and traditional literary-artistic relations from Reynolds to Ruskin.
5 units, Aut (Rovee)

ENGLISH 369E. Postcolonial Theory and Practice—Postcoloniality as a contested term in literary and cultural theory. When, why, what, where, and how was the postcolonial? Theorists include Fanon, Said, Appiah, Moi, and Spivak. Bridging the gap between postcolonial theory and practice to discover its emancipatory potential.
5 units, Aut (Nair)

ENGLISH 369X. Introduction to Graduate Studies: Criticism as Profession—(Enroll in COMPLIT 369, GERLIT 369.)
5 units, Aut (Berman)

ENGLISH 373C. Who was Shakespeare?—Methods and materials of literary biography in the early modern period. Focus is on the life and work of Shakespeare.
5 units, Aut (Riggs)

ENGLISH 373D. Shakespeare, Islam, and Others—(Same as COMPLIT 311.) Shakespeare and other early modern writers in relation to new work on Islam and the Ottoman Turk in early modern studies. Othello, Twelfth Night, Titus Andronicus, The Merchant of Venice, and other Shakespeare plays. Kyd’s Solomon and Perseda, Daborne’s A Christian Turned Turk, Massinger’s The Renegado, Marlowe’s The Jew of Malta, and literary and historical materials.
5 units, Win (Parker)

ENGLISH 378. Emerson—His essays as literature and philosophy.
5 units, Win (Bourbon)

ENGLISH 381. Toni Morrison and the Occasion of Black Feminism—The acclaimed American novelist and literary critic. Sources include her novels, and literary and political criticism. Her role as a public intellectual. 20th-century black feminist theory and criticism.
5 units, Win (Elam)
ENGLISH 383. The Sublime and the Ugly—18th- and 19th-century aesthetics at the nexus of philosophy, science, literature, and theory. Categories include: the sublime and the beautiful; the ugly and the uncanny; the monstrous, deformed, and grotesque. Writers including Wordsworth, Coleridge, Mary Shelley, and John Polidori; philosophers and aesthetic theorists include Burke, Kant, Blumenbach, Freud, Adorno, and Zizek.

5 units, Spr (Gigante)

ENGLISH 388B. The Theory of the Text—(Enroll in COMPLIT 353.)
4-5 units, Win (White)

5 units, Spr (Heise)

WORKSHOPS AND DIRECTED READING

ENGLISH 394. Independent Study—Preparation for qualifying examination and for the Ph.D. oral examination.
1-10 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 395. Ad Hoc Graduate Seminar—Three or more graduate students who wish in the following quarter to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a member of the department to supervise it.
1-5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 396. Introduction to Graduate Study for Ph.D. Students—For incoming Ph.D. students. The major modes of research, criticism, and theory at work in the discipline of English studies.
5 units, Aut (Jones)

ENGLISH 396L. Pedagogy Seminar I—(Same as COMPLIT 396L.)
Required for first-year Ph.D. students in English, Modern Thought and Literature, and Comparative Literature (except for Comparative Literature students teaching in a foreign language). Preparation for surviving as teaching assistants in undergraduate literature courses. Focus is on leading discussions and grading papers.
2 units, Aut (Lerer)

ENGLISH 397A. Pedagogy Seminar II—Apprenticeship for second-year graduate students in English, Modern Thought and Literature, and Comparative Literature who teach in the Program in Writing and Rhetoric. Each student is assigned as an apprentice to an experienced teacher and sits in on classes, conferences, and tutorials, with eventual responsibility for conducting a class, grading papers, and holding conferences. Meetings explore rhetoric, theories and philosophies of composition, and the teaching of writing. Each student designs a syllabus in preparation for teaching PWR 1.
1 unit, Aut (Lansford)

ENGLISH 398. Research Course—A special subject of investigation under supervision of a member of the department. Thesis work is not registered under this number.
1-18 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 398R. Revision and Development of a Paper—Students revise and develop a paper under the supervision of a faculty member with a view to possible publication.
5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 399. Thesis
1-10 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES
Courses approved for the English major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

OXFORD

ENGLISH 114Z. English Literature: 1509-1642
5 units, Aut (van Es)

ENGLISH 116Z. Restoration Literature, 1642-1740
5 units, Win (Bullard)

ENGLISH 154Z. English Literature, 1740-1832
5 units, Spr (Plaskitt)

ENGLISH 163X. Shakespeare
5 units, Aut, Win (Groves)

ENGLISH 174X. The Rise of the Novel
5 units, Spr (Plaskitt)

PARIS

ENGLISH 150X. Gardens of Earthly Delight: Landscape, Culture, and Social Spaces in France—(Same as COMPLIT 150X.)
4 units, Spr (Saldivar)
PROGRAM IN ETHICS IN SOCIETY

Director: Debra Satz (Philosophy)

Steering Committee: Eamonn Callan (Education), Arnold Eisen (Religious Studies), John Ferejohn (Political Science), Barbara Fried (Law School), Agnieszka Jaworska (Philosophy), Scotty McLennan (Dean of Religious Life), Rob Reich (Political Science), Eric Roberts (Computer Science), Debra Satz (Philosophy), Allen Wood (Philosophy), Lee Yearley (Religious Studies)

Affiliated Faculty: Kenneth Arrow (Economics, emeritus), Donald Barr (Sociology), Barton Bernstein (History), Michael Bratman (Philosophy), Albert Camarillo (History), Nadeem Hussain (Philosophy), David Kennedy (History), Tamar Schapira (Philosophy), David K. Stevenson (Pediatrics), Sylvia Yanagisako (Cultural and Social Anthropology)

Mail Code: 94305-2155
Phone: (650) 723-0997
Email: joanieb@stanford.edu
Web Site: http://ethicsinsociety.stanford.edu

Courses given in Ethics in Society have the subject code ETHICSOC. For a complete list of subject codes, see Appendix B.

The Program in Ethics in Society is designed to foster scholarship, teaching, and moral reflection on fundamental issues in personal and public life. The program is grounded in moral and political philosophy, but it extends its concerns across a broad range of traditional disciplinary domains. The program is guided by the idea that ethical thought has application to current social questions and conflicts, and it seeks to encourage moral reflection and practice in areas such as business, international relations, law, medicine, politics, and science.

Current and planned initiatives of the program include:
1. Supporting and fostering ethics research.
2. Supporting innovative teaching focusing on the ethical dimensions relevant to the different disciplines across the curriculum.
3. Establishing a yearly faculty-graduate seminar focusing on topics in ethics and public life.
4. Ethics@Noon, a weekly discussion by faculty, students, and staff on topics of ethical concern.

The program also sponsors several annual public lecture series, including the Tanner Lectures in Human Values and the Wesson Lectures in Problems of Democracy.

Students interested in pursuing studies that bring moral and political theory to bear on issues in public life should consult the director. There are many course offerings at Stanford that address moral and political questions. Not all of these courses are crosslisted with the Program in Ethics in Society. Students should consult the director to determine whether such courses may be applied towards an Ethics in Society honors program or minor.

UNDERGRADUATE PROGRAM HONORS

The honors program in Ethics in Society is open to majors in every field and may be taken in addition to a department major. Students should apply for entrance at the end of Spring Quarter of the sophomore year or no later than the beginning of the Autumn Quarter of the junior year. Applicants should have a cumulative grade point average (GPA) of 3.3 (B+) or higher. They should also maintain this minimum average in the courses taken to satisfy the requirements.

Requirements —
1. Required courses (at least one of a or b must be taken at the 100 level):
   a) ETHICSOC 20. Introduction to Moral Theory, or ETHICSOC 170. Ethical Theory: normally taken in the sophomore year.
   b) ETHICSOC 30. Introduction to Political Philosophy, or ETHICSOC 171. Political Philosophy: normally taken in sophomore year.
   c) ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice: normally taken after the moral and political philosophy classes listed above.
2. One 4- or 5-unit undergraduate course on a subject approved by the honors adviser, designed to encourage students to explore those issues in Ethics in Society that are of particular interest to them. Courses of relevance to the Program in Ethics in Society are offered by members of the program committee and by other departments. Students may also take a course with the honors thesis in mind. To promote a broad interdisciplinary approach, this elective should normally be outside the Department of Philosophy. Students are not restricted to choosing from the sample of such courses included below.
3. ETHICSOC 190. Honors Seminar.
4. ETHICSOC 200A,B. Honors Thesis, on a subject approved by the honors adviser, with the work spread over two quarters.

A typical student takes ETHICSOC 20 or 170 and 30 or 171 in the sophomore year. Upon admission to the honors program as a junior, he or she takes ETHICSOC 190 in the Winter Quarter, ETHICSOC 77 in the Spring Quarter, and requirement 2 (the optional subject) at any time during the junior year, or possibly Autumn Quarter of the senior year. The honors thesis is normally written during the Autumn and Winter quarters of the senior year. Courses taken to fulfill the Ethics in Society honors requirement may be double-counted for Philosophy and other majors; Ethics in Society minors may not double count courses.

MINORS

The Ethics in Society minor is open to students in any department who wish to explore moral issues in personal and public life. Students must declare the minor on Axess no later than the last day of Autumn Quarter of their senior year, although they are strongly advised to declare sooner. The student should discuss the minor with an adviser chosen from the Ethics in Society faculty list, and prepare a draft proposal that includes a list of courses planned to fulfill the requirements and the name of the faculty adviser.

A minor in Ethics in Society requires six courses for a minimum of 25 and a maximum of 30 units toward the minor.

Requirements —
1. Three Ethics in Society courses:
   a) ETHICSOC 20. Introduction to Moral Theory, or ETHICSOC 170. Ethical Theory
   b) ETHICSOC 30. Introduction to Political Philosophy, or ETHICSOC 171. Political Philosophy
   c) ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice
2. Two courses at the 100 level or above that address some dimension of moral or political theory or practice.
3. One course at the 200 level or above that addresses a moral or political problem, in either theory or practice.

The 100-level and 200-level courses should be focused around a central theme such as biomedical ethics, ethics and economics, ethics and politics, or environmental ethics. The courses at the 100 and 200 level are normally taken after completion of ETHICSOC 20 and 30.

Subject to the approval of the Director of the Ethics in Society Program, a course covering similar subject matter in another department or program may be substituted for ETHICSOC 20/170 or 30/171. No course credited to the ETHICSOC minor may be double-counted toward major requirements.

CITIZENSHIP OPTION

The citizenship option for the minor introduces students to the theory, history, and practice of citizenship in democracies. When a student declares the minor in EIS on Axess, no notation is made of the citizenship option, and this notation does not appear on transcripts or the diploma. All students taking the citizenship option must take ETHICSOC 198, Community Engagement Internship. In addition to the courses listed in (1) above, students must take a total of three additional classes from a total of two of the following categories. Students may petition to have other relevant courses counted towards the minor.
ETHICSOC 108. Ethics and the Professions — Ethical challenges facing professionals in society. Readings and case studies. Individual moral obligations in relation to obligations as professionals. Topics: conflict of interest, client/professional privilege, and use of confidential information. Focus is on medicine, law, engineering, and ethical issues common to all professions.

4 units (Staff) not given 2005-06

ETHICSOC 131. Children’s Citizenship: Justice Across Generations — (Same as POLISCI 131.) The development of children into citizens, focusing on major social institutions responsible for their civic education: schools, families, communities, and civil society. How does each institution develop citizenship? What is the relationship between civic education and the reproduction of social equality or inequality? Do children’s rights differ from those of adults? Readings: political theorists on justice, feminist theorists on family and children, court cases on tensions between the state and community interest in education, and social critics on the practice of civic education. GER:DB-SocSci

5 units, Spr (Reich)

ETHICSOC 133. Ethics and Politics in Public Service — (Same as POLISCI 133.) Primarily for freshmen and sophomores who participate or intend to participate in service activities through the Haas Center or register for courses with service learning components. The basis for a connection between an undergraduate’s service activities and academic experiences at Stanford. What does it mean to do public service? Why should or should not citizens do volunteer work? Is public service a good thing? The history, hazards, responsibilities, and dilemmas of doing public service. Historical context of public service work in the U.S., including ethical concerns involved with service. GER:DB-SocSci

5 units, Aut (Reich)

ETHICSOC 170. Ethical Theory — (Same as PHIL 170/270.) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER:DB-Hum

4 units, Spr (Jaworska)

ETHICSOC 171. Political Philosophy — (Same as PHIL 171/271.) Questions about a just society. Which liberties should a just society protect: economic, political, expressive? What sorts of equality should a just society ensure: opportunity, outcome, economic, political? Can a just society ensure both liberty and equality? Focus is on answers from rival, contemporary theories of justice: utilitarianism, libertarianism, and egalitarian liberalism. GER:DB-Hum, EC-EthicReas

4 units, Win (Satz)

ETHICSOC 190. Ethics in Society Honors Seminar — (Same as PHIL 178.) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.

3 units, Win (Reich)

ETHICSOC 198. Community Engagement Internship — Opportunities for students to engage in community work via the Haas Center for Public Service. Students work with Haas Center staff to design an internship for students to engage in community work via the Haas Center. Historical context of public service work in the U.S., including ethical concerns involved with service. GER:DB-SocSci

3-5 units, Aut, Win, Spr, Sum (Cotterman)

ETHICSOC 199. Independent Studies in Ethics in Society

1-15 units, Aut, Win, Spr, Sum (Staff)

ETHICSOC 200A,B. Ethics in Society Honors Thesis — Limited to Ethics in Society honors students, who may enroll once in A and once in B.

1-5 units, Aut, Win, Spr, Sum (Staff)
INTERDEPARTMENTAL OFFERINGS

AMERICAN STUDIES
AMSTUD 221. Public and Professional Service: Theories and Ethical Practice of Public and Community Service
3 units, Spr (Stanton)

ANTHROPOLOGICAL SCIENCES
ANTHSCI 178. Contagion and Conflict
3-5 units (R. Barrett) not given 2005-06
ANTHSCI 191B/291B. Conduct and Misconduct in Science
3-5 units, Win (DeGusta)

ARCHAEOLOGY
ARCHLGY 103. History of Archaeological Thought
5 units, Spr (Meskell)

CLASSICS, GENERAL
CLASSGEN 317. The Professional Classicist
3-5 units, Aut (Gleason)

COMMUNICATION
COMM 131/231. Media Ethics and Responsibilities
4-5 units (Glasser) not given 2005-06
COMM 236G. Democracy, Justice, and Deliberation
1-5 units (Fishkin) not given 2005-06

COMPUTER SCIENCE
CS 201. Computers, Ethics, and Social Responsibility
3-4 units, Spr (Johnson)

CULTURAL AND SOCIAL ANTHROPOLOGY
CASA 90. Theory of Cultural and Social Anthropology
5 units, Win (Ebron)
CASA 108. History of Archaeological Thought
5 units, Spr (Meskell)
CASA 185/285. Environmental Ethics
5 units, Win (Gupta)

DRAMA
DRAMA 161/261. Performance and Politics
5 units (Rehm) not given 2005-06

ECONOMICS
ECON 224. Science, Technology, and Economic Growth
2-5 units, Win (David)

FRENCH
FRENGEN 258E. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S.
3-5 units, Spr (Dupuy)

HISTORY
HISTORY 236. The Ethics of Imperialism
5 units, Aut (Daughton)
HISTORY 243G/343G. Tobacco and Health in World History
5 units, Aut (Proctor)
HISTORY 259A.B. Poverty and Homelessness in America
5 units (Camarillo) not given 2005-06

PHILOSOPHY
PHIL 174/274. Freedom and the Practical Standpoint
4 units, Aut (Ferrero)
PHIL 377. Topics in Democratic Theory
3-5 units (Ferejohn, Satz) alternate years, given 2006-07

POLITICAL SCIENCE
POLISCI 1. Introduction to International Relations
5 units, Aut (Tomz)
5 units, Win (Sagan, Blacker, Perry)
POLISCI 130B/330B. History of Political Thought II: Early Modern Political Thought, 1500-1700
5 units, Win (Adcock)
POLISCI 130C/330C. History of Political Thought III: Freedom, Democracy, and Power
5 units, Spr (Stone)
POLISCI 131. Children’s Citizenship: Justice Across Generations
5 units, Spr (Reich)
POLISCI 143. Nongovernmental Organizations and Development in Poor Countries
5 units, Spr (Abernethy)

PSYCHOLOGY
PSYCH 179/270. The Psychology of Everyday Morality
4 units (Monin) not given 2005-06

SCIENCE, TECHNOLOGY, AND SOCIETY
STS 110. Ethics and Public Policy
5 units, Win (McGinn)

SOCIOLOGY
SOC 141A/241A. Social Class, Race, Ethnicity, Health
5 units, Win (Barr)

FEMINIST STUDIES
Director: Penelope Eckert
Program Committee: Jo Boaler (Education), Benjamin Davidson (LGBT Community Resource Center), Penelope Eckert (Linguistics), Heather Hadlock (Music), Laura Harrison (Women’s Community Center), Miyako Inoue (CASA), Andrea Lunsford (English), Londa Schiebinger (History), Elizabeth Tallent (English)

Resource Faculty and Staff:
Anthropological Sciences: Melissa Brown
Art and Art History: Wanda Corn, Pamela Lee, Melinda Takeuchi
Asian Languages: Yoshiko Matsumoto
Biological Sciences: Joan Roughgarden
Business: Sonya Grier, Joanne Martin
Classics: Maud Gleason, Susan Stephens, Yasmin Syed
Comparative Literature: Patricia Parker
Cultural and Social Anthropology: Carol Delaney, Paulla Ebron, Akhil Gupta, Miyako Inoue, Sarah Jain, Matthew Kohnman, Purnima Mankekar, Barbara Voss, Sylvia Yanagisako
Developmental Biology: Ellen Porzig
Drama: Harry J. Elam, Cherrie Moraga, Peggy Phelan
Education: Jo Boaler, Susanna Loeb, Myra Strober, Joy Williamson
English: Eavan Boland, Terry Castle, Michele Elam, Andrea Lunsford, Paula Moya, Siânne Ngai, Stephen Orgel, Ramón Saldívar, Jennifer Summit, Elizabeth Tallent
Feminist Studies: Kathleen Coll, Susan Krieger, Valerie Miner
French and Italian: Carolyn Springer
German Studies: Russell Berman, Kathryn Strachota
The Program in Feminist Studies is an interdisciplinary undergraduate program offering students the opportunity to investigate the significance of gender and sexuality in all areas of human life from the study of women and medicine to the study of transgender issues. Feminist analysis assumes that gender is a central factor in the organization of society, and that definitions of gender, sex, and sexuality do not stem from nature but are social constructions. As such, they vary across time and place, have strong ideological underpinnings, and serve political ends. The courses offered by the program use feminist perspectives to expand and reevaluate the assumptions at work in traditional disciplines in the study of individuals, cultures, social institutions, policy, and other areas of scholarly inquiry.

The Program in Feminist Studies coordinates the courses offered on women, gender, sexuality, and feminism throughout the University and facilitates the undergraduate major and minor in Feminist Studies. In addition, it encourages feminist analysis and teaching at Stanford, both in courses within the program and those housed within departments.

The program committee awards the annual Michelle Z. Rosaldo and Francisco Lopes prizes for the best undergraduate essays on women, gender, or feminism. The prizes are awarded in two divisions: a thesis division for senior honors theses and master’s papers written by undergraduates in coterminous degree programs, and an essay division. The Rosaldo prizes are awarded for the best work in the social sciences and the Lopes prizes for the best work in the humanities. Submissions are due in the Feminist Studies office April 3 for essays and May 12 for theses. Essays and theses completed later in Spring or Summer Quarter may be submitted for consideration the following year.

UNDERGRADUATE PROGRAMS

Curriculum guidelines, the Feminist Studies Handbook, and forms for the major, minor, and honors are available at the Feminist Studies office in Serra House or at http://feminist.stanford.edu. Students interested in majoring, minoring, or doing honors in Feminist Studies should consult the program administrator.

BACHELOR OF ARTS

The major in Feminist Studies may be taken as a single major, as one of multiple majors, or as a secondary major. If taken as one major of multiple majors, none of the 60 units counted toward the major in Feminist Studies may overlap with units counted toward the major in another department or program. If taken as a secondary major, up to 30 of the units counted toward the Feminist Studies major may also be counted as fulfilling the major requirements in another department or program if that department or program consents. A maximum of 10 of the 60 units for the major may be taken on a credit/no credit or satisfactory/no credit basis; a maximum of 10 may be taken as independent study or directed reading. FEMST core courses must be taken for letter grade.

The major should normally be declared by the beginning of a student’s junior year. Majors should choose two faculty advisers from the list of resource faculty, one of whom is usually the director of the Feminist Studies program. Faculty advisers work closely with the student in helping design an appropriate program of study. A proposal explaining the rationale for the plan of study and signed by both advisers must be submitted to the program office to declare the major.

CURRICULUM

The major in Feminist Studies includes a total of at least 12 courses at the 100 level or above for 60 units, plus a practicum. The courses are divided among the core and the focus, plus electives (crosslisted courses in Feminist Studies) to reach the total course requirement.

THE CORE

1. FEMST 101. Introduction to Feminist Studies. This course must be taken before 102 and 103.
2. FEMST 102. Feminist Theory. There may be several offerings in a given year.
3. FEMST 103. Feminist Methodologies. There may be several offerings in a given year.
4. One Feminist Studies course in the social sciences. Courses that fulfill this requirement can be found among courses listed under Anthropological Sciences, Communication, Cultural and Social Anthropology, Education, History, Human Biology, Law, Medicine, Political Science, Psychology, and Sociology.
5. One Feminist Studies course in the humanities. Courses that fulfill this requirement can be found among courses listed in English, Linguistics, Philosophy, Religious Studies, the arts, and languages.

THE FOCUS

Every student designs a thematic focus consisting of at least 5 courses:
1. At least three of the focus courses should be Feminist Studies courses or be selected from the list of interdepartmental offerings.
2. At least one course should be a major survey, methodology, or theory course offered by a department or interdepartmental program as an initiation into the practice of study in the field.
3. The focus should be designed in consultation with the student’s adviser. The following are examples of common focuses, but students are also encouraged to develop new focuses:

Crosscultural Perspectives on Gender
Feminist Perspectives on Science, Technologies, and Health
Gender and Education
Gender and Popular Culture
Gender in Language and Symbol
Medieval Gender Studies
Queer Studies
Women and Health
Women and Modernity
Women and Religion
Women and Work

WRITING IN THE MAJOR

Every student must complete the writing in the major (WIM) requirement. See the Feminist Studies Handbook for more details.

PRACTICUM

A practicum, in addition to the 60 units for the major, is required in order to bring together theory and practical, real-world experience. The practicum, taken for 3 to 6 units, should involve field research, community service, or other relevant experience such as a public service internship. Students plan their practicum (normally in the Winter and Spring quarters of their junior year) with the help of the Feminist Studies mentor in the major. The practicum is followed by FEMST 104 (2-4 units) which provides follow-up and reflection.
MINORS

Students interested in minoring in Feminist Studies should consult the program administrator. The minor proposal should be drafted in discussion with a faculty adviser selected from the Feminist Studies resource faculty list.

The minor in Feminist Studies consists of at least six courses, for a minimum of 30 and a maximum of 36 units. None of the units for the minor may count towards the student’s major. The minor in Feminist Studies should be declared by the Winter Quarter of a student’s junior year.

Requirements —
1. FEMST 101. Introduction to Feminist Studies. This must be taken before 102 or 103.
2. FEMST 102. Feminist Theory, or FEMST 103. Feminist Methodologies

FOCUS

A four-course thematic focus may be designed by the student or may follow one of the suggested clusters listed above. One course within the thematic focus should address crosscultural issues.

HONORS CERTIFICATION

FEMINIST STUDIES MAJORS/MINORS

Admission — The honors program offers an opportunity to do independent research for a thesis of superior academic quality. It is open to students with a grade point average (GPA) of 3.3 or better in course work in Feminist Studies. Normally, students must apply for honors certification by the end of the junior year. To apply, students should design a project in consultation with their major or minor adviser and the Feminist Studies honors tutor. A proposal describing the project and the number of units to be awarded must be submitted to the director of the program for final approval. See the Feminist Studies Handbook for details.

Requirements —
1. In addition to the normal requirements for the major, students enroll in FEMST 105 for 10-15 units towards the preparation of the honors thesis, and one unit of directed research with the director of the program which is granted for satisfactory attendance at meetings conducted by the honors tutor throughout the year.
2. Throughout the senior year, students work with faculty advisers and the Feminist Studies honors tutor. The final thesis must be submitted by May 31 and be of acceptable quality to the student’s faculty advisers. Creative projects of high intellectual caliber are eligible if they contain a section of scholarly analysis.

MAJORS IN OTHER DEPARTMENTS

Honors certification in Feminist Studies for majors in other departments or programs, as distinguished from honors for students pursuing a major in Feminist Studies, is intended to complement study in any major. See the Feminist Studies Handbook for further details.

Admission — Honors certification is open to students majoring in any field with a GPA of 3.3 or better.

As a prerequisite, students must have completed the following courses with a grade of (B+) or better:
1. FEMST 101 and a core theory course
2. or three Feminist Studies courses related to the topic of their proposed honors research.
3. and 1 unit of directed research with the director of the program which is granted for satisfactory attendance at meetings conducted by the honors tutor throughout the year.

To apply, students must first consult the Director of the Program in Feminist Studies outlining the plan for course work, the rationale for the program, and an honors project. Students must apply for honors by the end of the junior year. The chair acts as one of the student’s faculty advisers, along with the faculty member(s) who advise the thesis.

Requirements — Students enroll in FEMST 105 for 10-15 units. The final thesis must be submitted by May 31, and must be of acceptable quality to the student’s faculty advisers. Creative projects of high intellectual caliber are eligible if they contain a section of scholarly analysis.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

Courses listed in Interdepartmental Offerings pay significant attention to gender difference, the situation of women in Western or non-Western cultures, or the role of sex-gender systems in social organization. Updated listings, including courses not offered 2005-06, are available at the Feminist Studies office and at http://feminist.stanford.edu.

FEMINIST STUDIES COURSES

FEMST 14N. Women Making Music — Stanford Introductory Seminar. Preference to freshmen. Women’s roles as composers and performers across history and cultures. Music from diverse cultures, styles, and eras as a medium for women to express individuality and build community. Women’s musical activities in folk and art music of Japan, India, Ireland, and Albania; women in popular music in America, Egypt, and Africa; female musicians of the medieval, Renaissance, Romantic, and contemporary eras. GER:DB-Hum, EC-Gender
3 units (Hadlock) not given 2005-06

4 units, Spr (Robinson)

FEMST 84Q. Shakespeare, Playing, Gender — Stanford Introductory Seminar. Preference to sophomores. Focus is on several of the best and lesser known plays of Shakespeare, on theatrical and other kinds of playing, and on ambiguities of both gender and playing gender. Topics: transvestism inside and outside the theater, medical and other discussions of sex changes from female to male, hermaphrodites, and fascination with the monstrous. GER:DB-Hum, EC-Gender
3 units, Win (Parker)

FEMST 87Q. Women and Aging — Stanford Introductory Seminar. Biology, diseases, demographics, and politics of aging; relationships and sexuality; wise women and grandmothers; lifestyles and scientific articles, fiction, art, and film. Students write a research paper or participate in a service learning experience with older women. GER:EC-Gender
4 units, Win (Winograd)

FEMST 92Q. International Women’s Health and Human Rights — Stanford Introductory Seminar. Preference to sophomores. Focus is on women in poorer countries. Issues include women’s status, poverty, violence, and unequal access to education, food, and health care. Maternal mortality, sexually transmitted diseases, refugee situations, traditional practices affecting women’s and girls’ health, trafficking and prostitution, and women’s roles as they age. Readings include materials from women’s organizations outside the U.S. GER:EC-Gender
3 units, Aut (Firth-Murray)

FEMST 95Q. Gender, Culture, and HIV/AIDS — Stanford Introductory Seminar. Preference to sophomores. Issues include individual HIV risk, societal vulnerability, and gender. Sources include web resources, primary research, and research data on HIV/AIDS including the National Health and Social Life Survey (NHLS). Student presentations. GER: EC-Gender, WRITE-2
4 units, Win (Brown, Amarillas)

FEMST 101. Introduction to Feminist Studies — How gender inequality is created and perpetuated, and how feminist theory and movements respond to it. Theories of inequality; history of feminism; international and multicultural perspectives on feminism; women’s work, health, and sexuality; creativity; spirituality; and movements for social change. GER: DB-SocSci, EC-Gender
5 units, Win (Coll)
FEMST 102L. Feminist Theories of Work and Families—(Same as EDUC 196.) Economic, sociological, and legal perspectives; mainstream and feminist theories are contrasted. Emphasis is on the present day U.S. with issues in other countries and/or other historical periods. Topics: labor force participation, occupational segregation, labor market discrimination, emotional labor, unpaid work, caring labor, child care, combining work and family, single-parent families, poverty, marriage, and divorce.
4-5 units (Strober) not given 2005-06

FEMST 103/203. Feminist Theories and Methods Across the Disciplines—(Graduate students register for 203.) The interdisciplinary foundations of feminist thought, and the nature of disciplines and of interdisciplinary work. The challenges of feminism for scholarship and research, taught by a Feminist Studies resource faculty member from the discipline in question. WIM
4-5 units, Win (Longino)

FEMST 104. Practicum/Senior Seminar—For Feminist Studies majors only. Students present oral reports on the relation of the practicum to their academic work, submit a draft and revised written analysis of the practicum, and discuss applications of feminist scholarship.
2-4 units, Aut (Coll)

FEMST 105. Honors Work
1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 108. Internship in Feminist Studies—For non-majors. Augments course work in Feminist Studies with a supervised field, community, or lab experience in law offices, medical research and labs, social service agencies, legislative and other public offices, or local and national women’s organizations. One unit represents approximately three hours work per week during a 10-week quarter. Required paper. See application form on the Feminist Studies web site. Prerequisites: course in Feminist Studies, consent of program office, written consent of faculty sponsor.
1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 117. Gender, Violence, and the Body in Ancient Religion—The sex-gender system of ancient Greece. How did polarization of the sexes become a master metaphor for power struggles between husbands and wives, among men, and among parts of the self? How did religious activity, including drama, mitigate or intensify the stresses of living in a society polarized along gender lines? GER:DB-Hum, EC-Gender
3-4 units, Spr (Gleason)

FEMST 120. Introduction to Queer Studies—Gay, lesbian, bisexual, transgender, transsexual, and queer political movement and theory; sexual identities and feminism; sexual identities and cultural representation; alternative family practices; queer theory in academia. Film screenings, guest speakers, and community field trips. GER:EC-Gender
4-5 units, Win (Phelan)

FEMST 139. Rereading Judaism in Light of Feminism—During the past three decades, Jewish feminists have asked new questions of traditional rabbinic texts, Jewish law, history, and religious life and thought. Analysis of the legal and narrative texts, rituals, theology, and community to better understand contemporary Jewish life as influenced by feminism. GER:EC-Gender
4-5 units, Spr (Karlin-Neumann)

4-5 units, Win (Rivers)

FEMST 140K. Transnational Feminisms: Women’s Struggles in Global Perspective—Feminist approaches to resistance and power. Uneven forms of oppression; everyday struggles of women of color. Who writes history; about whom is it written? How do silences speak of the subjects of history? Narratives of the self through theory and ethno-
CLASSICS
CLASSGEN 117. Gender, Violence, and the Body in Ancient Religion
3-4 units, Spr (Gleason)

CULTURAL AND SOCIAL ANTHROPOLOGY
CASA 88. Theories in Race and Ethnicity
5 units, Aut (Yanagisako)

CASA 110. Crosscultural Perspectives on Women in Islam
5 units, Spr (Ameeriar)

CASA 118/218. Literature, Politics, and Gender in Africa
5 units (Maliki) not given 2005-06

CASA 132. Science, Technology, and Gender
3-5 units (Jain) not given 2005-06

CASA 144/244. Sex, Blood, Kinship, and Nation
5 units (Delaney) not given 2005-06

CASA 145A/245A. Poetics and Politics of Caribbean Women’s Literature
5 units, Aut (Duffey)

CASA 183D/283D. Border Crossings and American Identities
5 units, Win (Duffey)

CASA 346A. Sexuality Studies in Anthropology
5 units (Mankekar, Voss) not given 2005-06

DANCE
DANCE 160. Performance, Dance History, and Gender
4 units, Win (Ross)

DANCE 161. Dance and Live Art in the Twentieth Century
4 units, Spr (Ross)

DRAMA
DRAMA 11N. Dancing Couples as a Lens on American Culture, 1890-1950
4 units, Aut (Ross, Powers)

DRAMA 163/263. Performance and America
5 units, Aut (Elam)

DRAMA 164/264. Performance and Gender
5 units, Spr (Phelan)

EDUCATION
EDUC 197. Education and the Status of Women: Comparative Perspective
4-5 units (Staff) not given 2005-06

EDUC 201. History of Education in the United States
3-4 units, Win (Williamson)

EDUC 201B. Education for Liberation
3-4 units, Aut (Williamson)

EDUC 273. Gender and Higher Education
5 units, Win (Strober)

ENGLISH
ENGLISH 150D. Women Poets
5 units, Spr (Boland)

HISTORY
HISTORY 144/344. The History of Women and Gender in Science
5 units (Schiebinger) not given 2005-06

HISTORY 161. U.S. Women’s History, 1890s-1900s
5 units, Spr (Freedman)

5 units, Spr (Lougee Chappell)

HISTORY 221B. The Woman Question in Modern Russia
5 units, Win (Jolluck)

HISTORY 227/327. East European Women and War in the 20th Century
5 units, Aut (Jolluck)

HISTORY 258/358. History of Sexuality in the U.S.
5 units, Aut (Freedman)

HISTORY 295J/395J. Chinese Women’s History
5 units, Spr (Sommer)

HISTORY 298A/398A. Modernizing Women in Japan
5 units (Wigen) not given 2005-06

HUMAN BIOLOGY
HUMBIO 108. Boys’ Psychosocial Development
4 units, Spr (Chu)

HUMBIO 123. Adolescent Sexuality
3 units, Spr (Brown)

HUMBIO 126. Adolescent Development
4 units, Win (S. Feldman)

HUMBIO 169. Critical Issues in International Women’s Health
4 units, Win (Firth-Murray)

LINGUISTICS
LINGUIST 156. Language and Gender
4 units, Win (Eckert)

POLITICAL SCIENCE
POLISCI 141. The Global Politics of Human Rights
5 units, Win (Karl)

PSYCHOLOGY
PSYCH 162. The Psychology of Gender
4 units (Carstensen) not given 2005-06

RELIGIOUS STUDIES
RELIGST 112. Handmaids and Harlots
4 units (Leveen, Pitkin) not given 2005-06

RELIGST 156/356. Goddesses and Gender in Indian Religion
4 units (Hess) not given 2005-06

RELIGST 172. Sex, Body, and Gender in Medieval Religion
4 units, Spr (Gelber)

SOCIOLOGY
SOC 142/242. Sociology of Gender
5 units, Aut (Mollborn)

SPANISH LITERATURE
SPANLIT 194. Women in Film and Film by Women: A Different Gaze?
3-5 units, Aut (Haro)

SPANLIT 283/383. Chicana Feminism
3-5 units, Spr (Yarbro-Bejarano)
FINANCIAL MATHEMATICS

Director: Tze Leung Lai
Core Faculty:
Business: D. Duffie, J. M. Harrison, K. Singleton
Economics: T. Amemiya, F. Hansen, M. Kurz, J. Shoven
Electrical Engineering: T. Cover
Management Science and Engineering: K. Giesecke, P. Glynn, D. Luenberger, J. Primbs
Mathematics: S. Brendle, A. Dembo, P. Diaconis, V. Durrleman, G. Papanicolaou
Steering Committee:

This is an interdisciplinary program that aims to provide a master’s level education in applied and computational mathematics, statistics, and financial applications to individuals with strong mathematical skills.

The departments of Mathematics and Statistics, in close cooperation with the departments of Economics, and Management Science and Engineering, as well as the Graduate School of Business, provide many of the basic courses.

GRADUATE PROGRAMS
MASTER OF SCIENCE

The program requires that the student take 45 units of work. Of these 45 units of work, 12 courses must be taken from the offerings provided on the lists of required and elective courses. Ordinarily, four quarters are needed to complete all requirements.

Admission — To be eligible for admission, students are expected to have taken the following courses or their equivalent:
1. Linear algebra at the level of MATH 103.
2. Advanced calculus (real analysis) at the level of MATH 115.
3. Basic ordinary and partial differential equations at the level of MATH 131 and 132 (basic partial differential equations).
4. Probability at the level of STATS 116; theory of statistics at the level of STATS 200; and stochastic processes at the level of STATS 217 or, preferably, MATH 136.
5. Computer programming at the level of CS 106A.

Some of these courses are offered as summer courses and may be taken by candidates lacking the required background.

Candidates for admission must take the general Graduate Record Examination and preferably the subject test in Mathematics. Information about this exam can be found at http://www.gre.org.

Requirements — For the M.S. degree in Financial Mathematics, students must fulfill six of the following required courses:
1. In stochastic processes and statistics:
   a) MATH 236. Introduction to Stochastic Differential Equations
   b) STATS 240. Statistical Methods in Finance or ECON 275. Time Series and Simultaneous Equation
2. In differential equations, simulation, and computing:
   a) MATH 220B. Partial Differential Equations of Applied Mathematics
   b) MATH 239. Computation and Simulation in Finance
3. In finance and economics:
   a) MATH 180. Introduction to Financial Mathematics or MS&E 242. Investment Science or FINANCE 620 (offered by GSB; contact GSB for description). Introduction to Financial Economics
   b) MATH 238/STATS 250. Mathematical Finance

Courses that are equivalent to the above and have been taken previously may be waived by the adviser, in which case they must be replaced by elective courses in the same subject area.

In addition, students must take at least six approved elective courses from a list that can be found on the website at http://finmath.stanford.edu/. With the approval of the instructor, credit can be obtained for practical training in industry. Students must sign up for MATH 201 (not given 2005-06) or STATS 297 and write a detailed report in order to receive credit.

A seminar in Financial Mathematics is an integral part of the program and an opportunity to interact with leading academic and industry speakers (for credit, enroll in STATS 239).

These courses must be taken for letter grades where available, and an overall grade point average (GPA) of 2.75 is required. There is no thesis requirement.

Any remaining units required to complete the 45 total must be taken from the following options:
1. Courses from the approved list of electives with emphasis on computation, information technology, or finance.
2. STATS 200, 217, 218; MATH 131, 132, 202; or ECON 140
3. additional practical CS courses

The requirements must be met within two years of entering the program, or four academic quarters for those already at Stanford.

COURSES

The following are required core courses.

ECONOMICS
2-5 units, Spr (Hansen)

GRADUATE SCHOOL OF BUSINESS
4 units, Win (Staff)

MANAGEMENT SCIENCE AND ENGINEERING
MS&E 242. Investment Science — Theory and application of modern quantitative investment analysis from an engineering perspective. How investment concepts are used to evaluate and manage opportunities, portfolios, and investment products including stocks, bonds, mortgages, and annuities. Topics: deterministic cash flows (term structure of interest rates, bond portfolio immunization, project optimization); mean-variance theory (Markowitz model, capital asset pricing); and arbitrage pricing theory. Group project. Prerequisites: 120, ENGR 60, MATH 51, or equivalents. Recommended: 140, ENGR 62, knowledge of spreadsheets. Limited enrollment.
3 units, Aut (Staff)

3 units, Aut (Durrleman)

3 units, Win (Liu)

3 units, Win (Papanicolaou)

3 units, Win (Papanicolaou)

MATH 239. Computation and Simulation in Finance—(Formerly MATH 240.) Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.

3 units, Spr (Durrleman)

STATISTICS

3-4 units, Spr (Lai)

FRENCH AND ITALIAN

Emeriti: (Professors) John G. Barson, Marc Bertrand, Robert G. Cohn, John Freccero, Raymond D. Giraud, René Girard, Ralph M. Hester, Pauline Newman-Gordon, Roberto B. Sangiorgi, Leo Weinstein

Chair: Robert Harrison

Directors of Graduate Studies: Joshua Landy (French), Robert Harrison (Italian)

Directors of Undergraduate Studies: Laura Wittman (French), Carolyn Springer (Italian)

Professors: Jean-Marie Apostolidès, Margaret Cohen, Jean-Pierre Dupuy, Hans U. Gumbrecht, Robert Harrison, Jeffrey T. Schnapp, Michel Serres

Associate Professors: Elisabeth Mudimbe-Boyi, Joshua Landy, Carolyn Springer

Assistant Professors: Cécile Alduy, Dan Edelstein, Laura Wittman

Lecturer: Kathy Richman

Courtesy Professors: Paula Findlen, Michael Marrinan

Department Offices: Building 260, Room 122-123
Mail Code: 94305-2010
Department Phone: (650) 723-4183
Email: fren-ital@stanford.edu, vfahren@stanford.edu
Web Site: http://www.stanford.edu/dept/fren-ital/

Courses given in French and Italian have the subject codes FRENGEN, FRENLIN, ITALGEN, and ITALLIT. For courses in French or Italian language instruction with the subject code FRENLIT or ITALLIT, see the “Language Center” section of this bulletin. For a complete list of subject codes, see Appendix B.

FRENCH SECTION

The French section provides students with the opportunity to pursue course work at all levels in French language, literature, cultural and intellectual history, theory, film, and Francophone studies. It understands the domain of “French Studies” in the broadest possible sense: as encompassing the complex of cultural, political, social, scientific, commercial, and intellectual phenomena associated with French-speaking parts of the world, from France and Belgium to Canada, Africa, and the Caribbean.

Three degree programs are available in French: a B.A. (with two concentrations), a terminal M.A., and a Ph.D. (with various possible minors and combined degrees).

A curator for Romance Languages oversees the extensive French collection at Green Library. The Hoover Institute on War, Revolution, and Peace also includes a wealth of materials on 20th-century France and on French social and political movements.

A distinguished group of visiting faculty and instructors contribute regularly to the life of the French section. The section maintains frequent contacts with the Ecole Normale Supérieure, the Institut d’Études Politiques, the École Polytechnique, and other prestigious institutions.

France-Stanford Center for Interdisciplinary Studies — The France-Stanford Center for Interdisciplinary Studies, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, addressing historical and contemporary issues from a broad range of perspectives. Its programs bring faculty and students from across Stanford’s departments and schools together and in contact with colleagues in France to explore issues of common intellectual concern. The center invites to campus French-speaking scholars who offer courses or give lectures or seminars in various University centers and programs. It currently facilitates internships for Stanford students in computer science and engineering in Sophia-Antipolis, France’s new high-tech center near Nice.

Stanford in Paris — The Stanford Overseas Studies Program in Paris offers undergraduates the opportunity to study in France during the Autumn, Winter, and Spring quarters. It provides a wide range of academic options, including course work at the Stanford center and at the University
of Paris, independent study projects, and internships. In addition, the program promotes a high degree of interaction with the local community through volunteer employment, homestays, and internships. The minimum language requirement for admission into Stanford in Paris is one year of French at the college level.

Courses offered in Paris may count toward fulfillment of the requirements of the French major or minor. Specialized offerings at the Stanford home campus and in Paris encourage engineering students to study abroad and to coordinate internships through the department to work in France. Students should consult with the Director of Undergraduate Studies before attending the program, and after returning, in order to ensure that course work and skills acquired abroad can be coordinated appropriately with their degree program. Detailed information, including program requirements and curricular offerings, may be obtained from the “Overseas Studies” section of this bulletin, the Stanford in Paris web site http://osp.stanford.edu/program/paris, or the Overseas Studies Program Office in Sweet Hall.

UNDERGRADUATE PROGRAMS
BACHELOR OF ARTS

The French section offers a major and a minor in French. Students are encouraged to pursue a course of study tailored to their individual needs and interests. For some students, a degree in French serves as a stepping stone to entering international business or law: for others, it provides training as a translator or teacher; for others, it serves as preparation for graduate studies in French, History, or Comparative Literature.

The French literature, culture, and civilization specialization allows students to combine their work in French with work from other fields, such as African studies, linguistics, art history, music, economics, history, education, medicine, international relations, political science, or other foreign languages and literatures. The literature and philosophy specialization offers students the opportunity to pursue interdisciplinary studies at the intersection of literature and philosophy in a structured manner and alongside similarly interested students from a variety of humanistic disciplines.

Students who complete the department’s two quarter IHUM sequence are eligible for 5 units towards the French major or minor. Students enrolled in the French language discussion section of the IHUM sequence receive, in addition to these 5 units, an additional 4 units (2 per quarter), assuming that they complete the written work in French.

Prerequisites—Before declaring a French major, a student must be proficient in written and spoken French at a second-year college level. Such proficiency must be demonstrated either:

1. by having completed the entire language sequence up to and including FRENLANG 23;
2. by having scored a 5 or better on either the French language or the French literature Advanced Placement (AP) exams; or
3. by having demonstrated equivalent proficiency on the departmental placement exam offered at the beginning of each academic quarter.

Students not meeting at least one of these criteria are required to complete the portion of the language sequence as deemed necessary by the department before beginning to take courses toward the major.

REQUIREMENTS

The French major requires a minimum of 56 units, all courses of which must be taken for a letter grade and must be selected in accordance with the following requirements:

1. Advanced language (ca. 4 units): FRENLANG 126, Stylistics and Textual Analysis
2. Introductory series on French and Francophone literature and culture (ca. 12 units): three courses must be taken from the FRENLANG 130, 131, 132, 133 sequence. A 130-level course fulfills the Writing-in-the-Major requirement.
3. Research Seminar (2 units): a majors-only seminar, DLCL 189, must be taken in the Autumn Quarter of the senior year. This course prepares and assists students as they undertake either their senior project (see below) or honors thesis. It also familiarizes them with research resources in the department and University and helps students think critically about their research topics. By the end of the course, students must have chosen an adviser, generally a faculty member in the department, who offers support and feedback throughout the development of the senior project or honors thesis.

4. Ancien Régime courses (ca. 8 units): at least two courses must concern the period before July 1789. Courses fulfilling this requirement within the department must be drawn from the 140 level or above. Courses chosen from outside the department must be preapproved by the Director of Undergraduate Studies.
5. Upper-level French courses (ca. 8 units): at least two additional courses must be taken with the department. In total, at least 32 units of course work must be taken within the department. No more than three courses numbered lower than 130 may be counted towards the major.
6. Remaining courses (ca. 22 units): the student is encouraged to use the remaining five or more courses to develop a specialized knowledge of a specific domain related to either the senior project or the honors thesis. These courses must show obvious internal consistency and relevance to the chosen focus, and must be approved by the Director of Undergraduate Studies. Where possible, students are encouraged to complete their written work in French.
7. One course, for a maximum of 4 units, may be drawn from individual work (199).

Senior Project—In order to demonstrate the quality of his or her scholarly work and command of written French, each major not writing an honors thesis (see “Honors Program” below) is required to submit a senior project to the project adviser before May 15 of the senior year. The project consists of a research paper with a target length of 20 pages and must be written in French.

The senior project is not graded and no credit is offered for it. However, acceptance of the senior project by the project adviser is a condition for graduation from the department. A paper deemed unsatisfactory by the project adviser is returned to the student for rework and resubmission by an agreed-upon date.

Students are advised to begin thinking about their senior projects as early as their junior year, even if they are in Paris. While in Paris, students should avail themselves of the unique resources the city has to offer for research on their chosen topic.

FRENCH AND PHILOSOPHY

The French and Philosophy major specialization requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. Advanced language (ca. 4 units): FRENLANG 126, Stylistics and Textual Analysis
2. Introductory Series on French and Francophone Literature and Culture (ca. 12 units): three courses must be taken from the FRENLANG 130, 131, 132, 133 sequence.
3. Philosophy Writing in the Major (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. Philosophy and Literature Gateway Course (4 units): FRENLANG 181 (same as PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
5. Aesthetics, Ethics, Political Philosophy (ca. 4 units): one course from the PHIL 170 series.
6. Language, Mind, Metaphysics, and Epistemology (ca. 4 units): one course from the PHIL 180 series.
7. History of Philosophy (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
8. Upper Division French Courses (ca. 12 units): at least three courses numbered FRENLANG/FRENLANG 140 or higher.
9. Related Courses (ca. 8 units): two upper division courses relevant to the student’s chosen area of specialization. One course (4 units) may be FRENLANG 199, Individual Work.
10. Capstone Seminar (ca. 4 units): to be selected from a set of seminars chosen by the undergraduate adviser of the program in philosophical and literary thought. This course must be taken in the student’s senior year.
The capstone seminar and the two related courses must be approved by both the undergraduate adviser of French and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, will not normally be permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NS; the remainder must be taken for a letter grade.

EXTENDED MAJORS
Requirements for both extended majors are essentially identical to those of the French major with a concentration in French literature.

French and English Literatures — In addition to the requirements for the B.A. in French, candidates complete four English literature courses numbered 100 and above related to their French program.

French and Italian Literatures — In addition to the requirements for the B.A. in French, students complete four Italian courses numbered 200 and above related to their concentration in French.

MINORS
Students considering a minor in French are encouraged to design a course of studies that fosters their understanding of the interaction between French and their major field of specialization. A minimum of 24 units of undergraduate work beyond the French 23 level must be completed. All courses must be taken for a letter grade.

Requirements for the minor include one advanced language course (at the 120 level); three of the introductory series on French and Francophone literature and culture (FRENLIT 130-133); and a minimum of two additional courses in language or literature numbered 121 and above. Of these, only one may be taught in English. All courses must be chosen in consultation with the Director of Undergraduate Studies.

Double-counting is not permitted; in other words, courses used to satisfy French minor requirements may not be counted toward a student’s major or toward a second minor.

CROS DISCIPLINARY STUDIES
FRENCH AND LINGUISTICS
Linguistics majors may elect to specialize in the French language. In addition to 50 units in Linguistics, of which two courses (LINGUIST 110 and 160) may be replaced by comparable courses in French, students opting for a French Language specialization must take three courses in the introductory series devoted to French and Francophone literature and culture (FRENLIT 130-133). For full details, contact the Department of Linguistics.

HONORS PROGRAM
Majors are eligible to apply to the honors program if they have maintained an average grade point average (GPA) of 3.5 in five upper-division French courses. The honors program candidate must fulfill all regular requirements for the major, save the senior project, from which he or she is exempt. Instead, the student undertakes the writing of a research paper no shorter than 50 pages in length, written in French or English, on a specialized topic. No later than the end of the Spring Quarter of the junior year, the student must submit to the Director of Undergraduate Studies an “Application for Honors in French,” the central portion of which must contain an outline of the proposed honors essay. If it is in need of revisions, the Director of Undergraduate Studies helps the student through the revision process until the proposal is granted his or her approval. (The Director of Undergraduate Studies also helps the student identify an appropriate adviser for the essay.) Students may enroll for 2 units of credit in FRENLIT 198 for the drafting or revision of the thesis proposal in Spring Quarter of the junior year. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in FRENLIT 198 while composing the thesis during Winter Quarter. A total of 10-12 units are awarded for successful completion of honors course work, independent study, and the finished thesis. All honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15 of the terminal year. If an essay is found deserving of grade of “A-” or better by the thesis adviser, honors are granted at the time of graduation.

Honors College — The Department of French and Italian encourages all honors students to enroll in the honors college run by the Division of Literatures, Cultures, and Languages. The college meets at the end of every summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted by the Spring Quarter of the same calendar year. For more information, contact the undergraduate student services officer.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM
Each year the department admits a very small number of highly motivated undergraduates to its coterminous B.A. and M.A. degree in French. Applications must be submitted by January 31 of the senior year to the department chair and must include: a written statement of purpose, two letters of recommendation from faculty at Stanford, and a transcript. Students accepted into the coterminous program must have been undergraduate French majors and must meet all requirements that apply to both degrees.

For University coterminous degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

LA MAISON FRANÇAISE
La Maison Française, 610 Mayfield, is an undergraduate residence that serves as a campus French cultural center, hosting in-house seminars as well as social events, film series, readings, and lectures by distinguished representatives of French and Francophone intellectual, artistic, and political life.

GRADUATE PROGRAMS

Admission to the M.A. and Ph.D. Programs — Applications and admissions information may be obtained from Graduate Admissions in the Registrar’s Office, or at http://gradadmissions.stanford.edu. Applicants should read the general regulations governing degrees in the “Graduate Degrees” section of this bulletin. They should have preparation equivalent to an undergraduate major in French and should also have reached a high level of speaking and writing proficiency in French. Previous study of a language other than French is also highly desirable. Recent Graduate Record Examination (GRE) results are required, as is a writing sample representative of the applicant’s best undergraduate work.

MASTER OF ARTS
The terminal M.A. in French provides a flexible combination of language, literature, cultural history, and methodology course work designed to enhance the preparation of secondary school, junior college, or college teachers.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a grade point average (GPA) of 3.3, as well as pass the master’s examination at the end of their training. To fulfill the requirements in a single year, enrollment must be for an average of 12 units per quarter.

Applications for admission to the Masters of Arts program must be received by March 29 of the prior academic year. Candidates for this degree are not eligible for financial aid or for teaching assistantships.

REQUIREMENTS
The basic program of 45 units requires the following course work:

1. One teaching methodology course, ordinarily APPLING 201, The Learning and Teaching of Second Languages, the second-language- pedagogy course offered by the Stanford Language Center.
2. A cultural history course (to be taken either inside or outside the Department of French and Italian).
3. All remaining units are to be taken in advanced French literature courses (200 level or above), three of which must be concerned with the prerevolutionary period of French cultural history.

EXAMINATION

The terminal M.A. examination is normally administered two weeks before the end of the Spring Quarter by the three members of the examination committee, selected each year by the Director of Graduate Studies. It consists of two parts:

1. The written exam (two hours) tests the candidate’s general knowledge of French literature and is based on the same reading list as that for the Ph.D. qualifying exam (see below).

   The exam requires that the candidate answer four questions (out of six) in a manner that demonstrates his/her ability to synthesize and draw parallels between periods, genres, and systems of representation on the basis of the standard reading list. At least one question must be answered in French and two in English. Use of a dictionary is allowed.

   If the student’s performance on the exam is deemed a ‘pass’ by two out of three of the members of the examining committee, the student is then permitted to go on to the oral examination (which is ordinarily taken later the same week).

   Should the candidate fail the M.A. written exam, he/she is given a second chance at the end of the Spring Quarter.

2. The oral exam (90 minutes) assumes as its point of departure the student’s answers on the written exam. It examines the candidate’s knowledge and understanding of French literary history on the basis of the standard reading list.

   At the conclusion of the oral exam, the examination committee meets in closed session and discusses the student’s performance on the written and the oral portions of the examination. If it is judged adequate, the M.A. degree is granted. In no event may the master’s written and oral exams be taken more than twice.

DOCTOR OF PHILOSOPHY

The Department of French and Italian provides students with the opportunity to pursue advanced work in French language, literature, cultural history, theory, and Francophone studies within a uniquely flexible interdisciplinary framework. Unlike conventional Ph.D. programs, it encourages students to construct a highly individualized course of study, integrating specialization in a particular literary period or area with work in such fields as art history, classics, film studies, the history of science and technology, linguistics, literary theory, music, and philosophy. The program is founded on the belief that such a balance between period/area specialization and interdisciplinary breadth is not only desirable but essential in a field such as French Studies. Students in the Ph.D. program are normally admitted as French Fellows on a four- to five-year fellowship plan that integrates their financial support with rigorous training as scholars and as prospective university faculty.

Students admitted to the program work closely with the Director of Graduate Studies in structuring a plan consistent with their needs and interests. Aside from the benefits of the program’s flexible structure, a number of unique resources are available to students. The French section’s exchange program with the Ecole Normale Supérieure provides candidates (selected on a competitive basis) with the opportunity to pursue dissertation research in Paris.

ADVISING

Given the interdisciplinary nature of the Ph.D. program in French and the opportunity it affords each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Director of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the first year of study, each student must choose a faculty adviser whose expertise is appropriate to his or her own area of research and interests.

Entering graduate students are also paired with a faculty mentor as a function of their stated research interests at the time of admission. The role of the mentor is to advise the student on an informal basis regarding the student’s academic program and plans.

REQUIREMENTS

A candidate for the Ph.D. degree in French must complete at least 135 units of graduate-level study and teach five language courses in the section. 72 of the 135 units must be taken within the department.

Students entering with a master’s degree or previous graduate work may receive credit as determined on a case-by-case basis, up to a maximum of 45 units. Fellowship funding, teaching, and other requirements are adjusted according to University regulations.

REQU/RE进步/ENDB/ED COURSES

Three courses are required:

1. FRENGEN 369, Introduction to Graduate Studies: Fragments of a Material History of Literature, a 5-unit seminar offered in the Autumn Quarter of each year, designed to acquaint students with the theoretical and methodological concerns of literary study. This course must be taken in the first quarter of study.

2. Definition and Inquiry: FRENGEN 201E, New Methods and Sources in French and Italian Studies, a three-unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.

3. APPLLING 201, The Learning and Teaching of Second Languages, the second-language pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.

Distribution of Elective Courses—Apart from these requirements, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. Of the 135 minimum units of graduate course work required for the Ph.D., at least 72 units must be taken within the Department of French and Italian.

Language Requirements—Attaining a native or near-native fluency in French is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree. In addition, candidates are required to achieve a high level of proficiency in one additional foreign language, with the language in question to be determined by the student and his or her adviser as a function of the student’s area of specialization. Such proficiency may be demonstrated either by successfully completing a third-year level or above undergraduate course or, better, a graduate seminar in the language in question; or by passing an exam that establishes a third-year or above level of competence in writing, reading, and speaking. (In no case is passage of a standard reading competence exam considered sufficient.) In the case of ancient Greek and Latin, a high level of proficiency means a level superior to a second-year collegiate level of proficiency in reading and writing.

The second foreign language requirement should be completed as soon as possible, but in any case not later than the end of the third year for students who entered the program without an M.A., and not later than the end of the second year for students who entered the program with a master’s degree. Completion of the language requirements is a prerequisite for taking the University Oral Examination.

EXAMINATIONS

There are three examinations: the 90-minute qualifying exam, the special topic exam, and the University oral examination.

Qualifying Examination — The first oral examination, which normally takes place at the end of Spring Quarter of the first year of study, tests the student’s knowledge of the French language and of French literature. The student is responsible for scheduling the exam one month in advance. The date and time chosen must be determined in consultation with the examining committee (see below).

The exam is based on a standard reading list covering major works from all periods of French literature, from the Middle Ages to the contemporary scene. The list may be expanded to reflect a student’s particular interests, but not abridged.
Half of the exam takes place in English, half in French (with the student free to choose which portion transpires in which language).

The exam consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given either in English or in French and should engage, in a succinct and synthetic manner, an issue or set of issues of broad relevance to French literary history about which the student has been thinking as he or she has been preparing the exam. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion.

2. A 70-minute question and answer period in which the examining committee follows up on the candidate’s presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in French. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit.

The examining committee consists of two faculty members selected by the student, as well as the Director of Graduate Studies.

Two weeks before the exam, the student must also submit a graduate seminar paper which he or she considers representative of the quality of his or her graduate work at Stanford.

On the basis of this paper, the results of the qualifying examination, and an evaluation of the student’s overall progress, the members of the student’s examining committee vote for or against admission to candidacy for the Ph.D. The terminal master’s degree may be awarded to students who have completed the qualifying procedure, but whose work is judged insufficient for admission to candidacy for the Ph.D. If the overall case for or against promotion to candidacy is deemed uncertain, students may be asked either to retake the qualifying exam, to submit a new paper, or they may be admitted to candidacy on a probationary basis. Subject to approval by the Director of Graduate Studies and department chair, students already holding an advanced degree in French Studies, when admitted to the French Ph.D. program, may be excused from the qualifying exam. However, they must present a formal request for a waiver to the Director of Graduate Studies upon their arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the qualifying exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

**Special Topic Examination** — The second oral examination, which normally takes place at the end of Spring Quarter of the second year of study, concerns a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his or her adviser and the Director of Graduate Studies. Students should design this research project so that it has the breadth and focus of a book they might write or a seminar they might teach. The proposed topic should be discussed with the Director of Graduate Studies before the end of the quarter preceding the quarter in which they take the University Ph.D. examination. The University oral exam should virtually always be taken at the end of Spring Quarter of the third year of study. Students must complete minimum course requirements (as listed in this bulletin) and all language and course requirements before the quarter in which they take the University oral exam.

Early in the quarter before they intend to take the University Ph.D. examination, students must discuss the scope and nature of the period to be covered, as well as the dissertation proposal, with the Director of Graduate Studies. The reading list should include works in all genres relevant to the period covered. The amount of non-literary or crossdisciplinary material on the reading list varies according to the period and the research interests of the student. Students ordinarily cover about a century of writing in great depth. As with the preceding examinations, the Director of Graduate Studies and the student determine the committee’s makeup.

The governing principle is that the University oral examination in French must be a period exam rather than one on the specific concerns of the dissertation proposal, which is dealt with separately in a later colloquium. It follows from this basic principle that the examination will cover the major authors and genres in the student’s period of choice. The lists may well include critical and scholarly works or texts from outside the traditional domain of French literary studies (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student’s “field.”

The aim of the University oral is to establish the student’s credentials as a specialist in the period of his or her choosing, so the core of the reading list must be made up of texts that constitute the cultural baggage essential to any specialist. It follows that reading lists must not focus on the narrow area of the student’s research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work will prove relevant, but they should also remember that the examination is the central means of certifying their expertise in a literary period.
The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee and the student services officer for the Division of Literatures, Cultures, and Languages no later than two weeks preceding the examination. Students must submit the Request for University Oral Exam form to the student services officer at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. dissertation reading committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the foreign language the student presents to meet the language requirements. The two-hour examination consists of the following two parts:

1. Forty minutes: a 20-minute talk by the candidate followed by a 20-minute question and answer period concerning the talk.

   Working with the committee members, the candidate’s adviser will prepare three or more questions to be presented to the candidate at 8:00 a.m. on the day of the examination. These questions concern broad topics pertinent to the candidate’s reading list and period of specialization, including concerns relevant, but by no means limited to, the student’s projected dissertation. The candidate chooses one of the questions and develops a 20-minute talk in response. Students must not read from a prepared text, but rather must speak from notes. They are free to consult any necessary materials while preparing the talk. The candidate is questioned for 20 minutes on the talk, with the dissertation adviser starting the questioning.

2. One hour, 20 minutes: questions on the area of concentration.

   Each member of the committee, except for the chair, is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications.

   The University oral examination is a formal University event. It represents the last occasion for the faculty to evaluate a student’s overall preparation as a candidate for the Ph.D. After the University orals, only the colloquium on the dissertation prospectus and certification of the final dissertation by the student’s reading committee stand in the way of conferral of the Ph.D. The examination, therefore, is a uniquely significant event and is designed to evaluate the student’s preparation as a specialist in a given sector of French studies, but within a broader context than that provided by a single course, examination, or even the dissertation itself.

**Dissertation**

The doctoral dissertation should demonstrate the ability to carry out research, organize, and present the results in publishable form. The scope of the dissertation should be such that it could be completed in 12 to 18 months of full-time work.

*Colloquium on the Dissertation Proposal* — The colloquium normally takes place in the quarter following the University oral examination; in most cases this means early in Autumn Quarter of the student’s fourth year of study. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student (lasting no more than ten minutes), and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double-spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project’s relation to prior scholarship on the topic, and lay out a complete chapter-by-chapter plan.

It is the student’s responsibility to schedule the colloquium no later than the first half of the quarter subsequent to the quarter in which the student passed the University oral examination. The student should arrange the date and time in consultation with the student services officer and with the three examiners. The student services officer schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

**Joint Degrees and Minors**

A candidate may also take a joint degree in French and Humanities, as described in the “Interdisciplinary Studies in Humanities” section of this bulletin. Minors are possible in Comparative Literature, Italian, Linguistics, Modern Thought and Literature, and other departments offering related courses such as Art and Art History, History, Music, Philosophy, and Spanish.

Students interested in a joint degree or a minor should design their course of study with their adviser(s). Joint degrees and minors usually require 24 additional units. With careful planning, students may complete course work for the Ph.D. and the minor in a total of nine quarters.

*Ph.D. Minor in French Literature* — The department offers a minor in French Literature. The requirement for a minor in French is successful completion of 24 units of graduate course work in the French section with a grade point average (GPA) of 3.0 or above. Interested students should consult the graduate adviser.

**Italian Section**

The Italian section offers a variety of graduate and undergraduate programs in Italian language, literature, culture, and intellectual history. Course offerings range from small and highly specialized graduate seminars to general courses open to all students on authors such as Dante, Boccaccio, and Machiavelli.

On the undergraduate level, a number of options are available. In addition to the Italian major, students may choose from a minor in Italian, an honors program in the Humanities (see the “Interdisciplinary Studies in Humanities” section of this bulletin), an honors program in Italian, and two extended majors: one in Italian and French literature, and one in Italian and English literature.

On the graduate level, programs of study leading to the M.A. degree and the Ph.D. degree are offered in Italian literature. Joint programs for the Ph.D. degree with the graduate programs in Comparative Literature, Humanities, and Modern Thought and Literature are also available.

Special collections and facilities at Stanford offer the possibility for extensive research in Italian studies and related fields. These include the undergraduate and graduate libraries and the Hoover Institution for the Study of War, Revolution, and Peace. Collections in Green Research Library are especially strong in the Medieval, Renaissance, and contemporary periods; the Italian section is one of the larger constituents of the Western European collection at the Hoover Library; and the Music Library has excellent holdings in Italian opera.

*Stanford in Italy* — Stanford in Florence affords undergraduates with at least three quarters of Italian the opportunity to take advantage of the unique intellectual and visual resources of the city and to focus on two areas: Renaissance History and Art, and Contemporary Italian and European Studies. The program is structured to help integrate students as fully as possible into Italian culture through homestays, Florence University courses, the Language Partners Program, research, internship and public service opportunities, and by conducting some of the program’s classes completely in Italian. Many of the courses offered in Florence may count toward the fulfillment of requirements for the Italian major or minor. Students are encouraged to consult with the Italian undergraduate adviser before and after a sojourn in Florence to ensure that their course selections meet Italian section requirements. Information on the Florence program
is available in the “Overseas Studies” section of this bulletin, the Stanford in Florence web site http://osp.stanford.edu/program/florence, or at the Overseas Studies office in Sweet Hall.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Italian major offers students the opportunity to develop an in-depth knowledge of Italian literature, language, and civilization through a highly flexible program combining course work in Italian with work in such fields as art history, classics, comparative literature, economics, English, French, history, international relations, music, philosophy, and political science. All Italian majors are required to have completed three second-year language courses (or the equivalent taken at the Florence campus):

ITALLANG 21. Second-Year Italian, First Quarter
ITALLANG 22. Second-Year Italian, Second Quarter
ITALLANG 23. Second-Year Italian, Third Quarter

Completion of the department’s two quarter Great Works IHUM sequence (see above) entitles a student to 5 units towards the Italian major or minor. Students considering an Italian major should consult with the Italian undergraduate adviser as early as possible (even before completing the language requirement) in order to ensure a maximum of flexibility in designing a course of study suited to individual needs and cultural interests.

Italian majors must complete 60 units of course work above the 100 level. The remaining requirements for the major are:

1. A minimum of 32 units of Italian courses (selected from courses numbered 100 and above).
2. Of these courses, at least one on Dante is required, as well as at least one in each of the following areas: (a) the Middle Ages (b) the early modern period, and (c) the modern period. A Dante course may fulfill the Middle Ages requirement.
3. The intermediate-level survey sequence (ITALLIT 127, 128, 129).
4. One advanced language course beyond the level of ITALLANG 114.

Of the 60 units required for the major, up to 28 units of course work in related fields may be taken outside the department.

ITALIAN AND PHILOSOPHY

A second option is now possible within the Italian major, offering students the opportunity to combine studies in literature and philosophy. Students take most of their courses alongside students from departments specializing in the intersection of literature and philosophy.

The Italian and Philosophy major track requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. Italian Survey Sequence (ca. 12 units): ITALLIT 127, 128, 129.
2. Advanced Language Course (ca. 4 units): ITALLANG 114 and above.
3. Philosophy Writing in the Major (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. Philosophy and Literature Gateway Course (4 units): ITALGEN 181 (same as PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
5. Aesthetics, Ethics, Political Philosophy (ca. 4 units): one course from the PHIL 170 series.
6. Language, Mind, Metaphysics, and Epistemology (ca. 4 units): one course from the PHIL 180 series.
7. History of Philosophy (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
8. Upper Division Italian Courses (ca. 12 units): at least three courses numbered ITALLIT/ITALGEN 100 or higher.
9. Related Courses (ca. 8 units): two upper division courses relevant to the student’s chosen area of specialization.
10. Capstone Seminar (ca. 4 units): to be selected from a set of seminars chosen by the undergraduate adviser of the program in philosophical and literary thought. This course must be taken in the student’s senior year.

The capstone seminar and the two related courses must be approved by both the undergraduate adviser of Italian and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. No more than 24 units may be drawn from courses offered overseas. Substitutions, including transfer credit, will not normally be permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NS; the remainder must be taken for a letter grade.

EXTENDED MAJORS

Requirements for both extended majors are essentially identical to those of the Italian major with a concentration in Italian literature.

Italian and English Literatures — In addition to the 32 units required for the B.A. in Italian, candidates must complete four English literature courses numbered 100 and above related to the field of concentration in Italian Studies.

Italian and French Literatures — In addition to the 32 units required for the B.A. in Italian, candidates must complete four French literature courses numbered 100 and above related to the field of concentration in Italian Studies.

MINORS

Students considering a minor in Italian are encouraged to design a course of studies that fosters their understanding of the interaction between Italian and their second area of expertise. A minimum of 24 units of undergraduate work beyond the Italian 3 level must be completed.

Requirements for the minor include two intermediate language courses (chosen from ITALLANG 21, 22, and 23); all three of the introductory series on Italian literature and culture (ITALLIT 127, 128, 129); and a minimum of one advanced course in language or literature numbered 114 and above. All courses must be chosen in consultation with the Director of Undergraduate Studies, who is responsible for evaluating all requests and individual study plans for the minor.

HONORS PROGRAMS

ITALIAN

Italian majors with a grade point average (GPA) of 3.3 (B+) or better in all Italian courses are eligible for department honors. Students interested in the honors program should consult the Italian undergraduate adviser early in their junior year. In addition to the requirements listed above, the student must submit to the Italian faculty a proposal for the honors essay by the end of Spring Quarter of the junior year. During the quarter, students may enroll in ITALLIT 198 while drafting and revising the proposal and conducting preliminary research. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in ITALLIT 198 while composing the thesis during Winter Quarter. A total of 10-12 units are awarded for successful completion of honors course work, independent study, and the finished thesis.

HUMANITIES

An honors program in the Humanities is available for Italian majors who wish to supplement their studies with a carefully structured program of humanistic studies. See the “Interdisciplinary Studies in Humanities” section of this bulletin for further information.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

Each year the department admits a small number of highly motivated undergraduates to its coterminal B.A. and M.A. degree in Italian. Applications must be submitted by January 31 of the senior year to the department chair and must include: a written statement of purpose, two letters of recommendation from faculty at Stanford, and a transcript. Students accepted into the coterminal program must have been undergraduate Italian majors and must meet all requirements that apply to both degrees.
LA CASA ITALIANA

La Casa Italiana, 562 Mayfield, is an undergraduate residence devoted to developing an awareness of Italian language and culture. It works closely with the Italian Cultural Institute in San Francisco and with other local cultural organizations. It often hosts visiting representatives of Italian intellectual, artistic, and political life. A number of departmental courses are regularly taught at the Casa, which also offers in-house seminars. Assignment is made through the regular undergraduate housing draw.

GRADUATE PROGRAMS

Admission to the Program — Candidates are expected to be proficient in the Italian language and to have done significant course work in Italian literature and/or Italian studies on the undergraduate level. Candidates with a broad humanistic and linguistic background are especially encouraged to apply. Contact Graduate Admissions in the Registrar’s Office, Old Union, or see http://gradadmissions.stanford.edu, for application information. Recent Graduate Record Examination (GRE) results are required.

MASTER OF ARTS

TERMINAL PROGRAM

The M.A. in Italian provides a combination of language, literature, civilization, and general courses designed to prepare secondary school, junior college, or college teachers. It is preferred that applicants have undergraduate degrees in Italian or in a related field. Knowledge of a second Romance language is desirable.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a GPA of 3.3 (B+), and pass a comprehensive oral examination (see “Qualifying Examination” section below for the Ph.D.). To fulfill the requirements in one year (four quarters), students should enroll for an average of 12 units per quarter.

The basic course program (45 units) is nine graduate courses in Italian, one of which may be in a related field. The option of substituting a master’s thesis for two literature courses is available.

Reading knowledge of a second Romance language is required. French is recommended.

Requirements for the completion of the M.A. include a comprehensive literature and language oral examination, which is given before the end of Spring Quarter or at the beginning of the following Autumn Quarter. Before taking the exam, a candidate for the degree must submit to the Italian faculty a sample graduate seminar paper representative of the quality of his or her graduate work. On the basis of this paper, the results of the comprehensive examination, and the student’s overall progress, members of the department vote for or against awarding of the M.A. degree.

Applications for admission must be received by May 31. Candidates for this degree are not eligible for financial aid or teaching assistantships.

DOCTOR OF PHILOSOPHY

Stanford’s Ph.D. program in Italian offers the opportunity for advanced work in Italian literature and studies within an unusually flexible interdisciplinary framework. It is fully independent of the Ph.D. program in French and aims to encourage students to bring broader methodological and interdisciplinary concerns to bear on the study of Italian literature. Like conventional Italian Ph.D. programs, it places primary emphasis on developing a command of Italian literature as a whole. Unlike conventional Italian Ph.D. programs, it allows students to construct a highly individualized course of study, integrating specialization in a particular literary period with work in such fields as art history, classics, comparative literature, feminist studies, film, French, history, history of science, linguistics, literary theory, Medieval or Renaissance studies, philosophy, and religion. The program is founded on the belief that this sort of balance between period specialization and interdisciplinary breadth is not only desirable but also essential in a small field such as Italian studies, particularly given the diversity of the Italian literary canon, which extends over a wide variety of disciplines.

Students admitted into the Ph.D. program in Italian work closely with the adviser in structuring a plan of study appropriate to needs and interests. Such a plan usually involves a mix of teaching and courses taken within the Italian program, courses taken in other departments, and independent work under supervision of a member of the Italian faculty, thus integrating financial support with training as scholars and prospective university teachers. Assuming satisfactory academic progress, fellowships are typically offered for three or four years. Graduate-level work completed elsewhere may be counted as fulfilling part of the requirements for the degree. Students in the fifth year normally apply for outside fellowships or part-time teaching positions in the department.

Aside from the benefits of the program’s structure and fellowship plan, a number of unique resources are available to Ph.D. students in Italian at Stanford. During their years of study, students may be permitted to take courses, pursue dissertation research, and do independent work at the Stanford campus in Florence under supervision of a member of the Italian faculty. The Florence center, located in a palazzo along the Arno, is near important Florentine libraries and archives and the University of Florence. Graduate students also have at their disposal the resources of La Casa Italiana, a residential theme house which serves as an Italian cultural center and hosts such events as colloquia, lectures, and film series.

REQUIREMENTS

A candidate for the Ph.D. degree in Italian must complete at least 135 units of graduate-level study and teach five language courses in the section. 72 of the 135 units must be taken within the department.

Students entering with a master’s degree or previous graduate work may receive credit as determined on a case-by-case basis, up to a maximum of 45 units. Fellowship funding, teaching, and other requirements are adjusted according to University regulations.

Required/Recommended Courses — Three courses are required:

1. ITALGEN 369, Introduction to Graduate Studies: Fragments of a Material History of Literature, a 5-unit seminar, offered in Autumn Quarter of each year, designed to acquaint students with the theoretical and methodological concerns of literary study. This course must be taken in the first quarter of study.

2. Definition and Inquiry: ITALGEN 201E, New Methods and Sources in French and Italian Studies, a 3-unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.

3. APPLING 201, The Learning and Teaching of Second Languages, the second-language pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.

Apart from the above requirements, students are granted considerable freedom in structuring a course of study appropriate to individual needs. During the first year, most course work is usually done within the Italian section in order to ensure an adequate preparation for the qualifying examination. In the second and third years, the students’ programs normally consist of a combination of course work done inside and outside the Italian section, supplemented by tutorials and independent work pursued under supervision of the Italian faculty.

Language Requirements — As soon as possible, but not later than the end of the third year, the candidate must have passed reading examinations in two additional foreign languages. If the candidate’s period of concentration is earlier than the Romantic period, one of these must be Latin; if Romantic or later, French. Completion of the language requirement is a prerequisite for taking the University oral examination.

EXAMINATIONS

There are three examinations: the 90-minute qualifying exam, the special topic exam, and the University oral examination.

Qualifying Examination — The first oral examination, which normally takes place at the end of Spring Quarter of the first year of study, tests the student’s knowledge of the Italian language and of Italian literature. The student is responsible for scheduling the exam one month in advance.
In the course of the quarter, the student should regularly consult with committee members to discuss his or her progress. The actual examination lasts one hour. The candidate must present a tentative reading list to the members of the committee about twelve weeks before the examination and a final reading list at least one week before the examination. This list, to be headed by a title describing the topic of the examination, may be divided into two parts: core works that the student has found to be central to his or her topic, and works that fill out the periphery of the topic. Two copies of the final reading list must be given to the student services officer for the Division of Literatures, Cultures, and Languages: one for the student’s file and one for a special file which subsequent students can consult. The examination assumes the form of an oral colloquy between the student and the examining committee. It concentrates on the conclusions to which the student’s research has led him or her, and aims to determine the student’s overall mastery of the research topic in question. At the beginning of the examination, the student presents a talk of no longer than 20 minutes (not to be written out, but to be presented from notes) reviewing the results of his or her reading and outlining the major features and implications of the chosen topic. The remainder of the hour is devoted to a discussion between the student and the committee regarding the problems the student raised in the talk and the reading list itself.

The following procedures are applicable to both the qualifying and special topic exams:

1. The committee meets briefly at the end of the exam and immediately informs the student whether he or she has passed the examination.
2. In the week after the examination, the student is expected to meet individually with members of the committee to discuss strengths and weaknesses revealed during the qualifying exam or colloquy.
3. The Director of Graduate Studies places a brief letter describing each one-hour oral exam in the student’s file, a copy of which is also be furnished to the student.

**THE UNIVERSITY ORALS**

The University Ph.D. examination follows most of the same procedures outlined above. Normally students put one, and at most two, full-time quarters of study into preparation for the exam. The University oral exam should virtually always be taken at the end of Spring Quarter of the third year of study. Students must complete minimum course requirements (as listed in this bulletin) and all language and course requirements before the quarter in which they take the University oral examination.

Early in the quarter before they intend to take the University Ph.D. examination, students must discuss the scope and nature of the period to be covered, as well as the dissertation proposal, with the Director of Graduate Studies. The reading list should include works in all genres relevant to the period covered. The amount of “non-literary” or cross-disciplinary material on the reading list varies according to the period and the research interests of the student. Students ordinarily cover about a century of writing in great depth. As with the preceding examinations, the Director of Graduate Studies and the student determine the committee’s makeup.

The governing principle is that the University oral examination in Italian must be a period examination rather than one on the specific concerns of the dissertation proposal, which is dealt with separately in a later colloquium. It follows from this basic principle that the examination will cover the major authors and genres in the student’s period of choice. The lists may well include critical and scholarly works or texts from outside the traditional domain of Italian literary studies (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student’s “field.”

The aim of the University oral is to establish the student’s credentials as a specialist in the period of his or her choosing, so the core of the reading list must be made up of texts that constitute the cultural baggage essential to any specialist. It follows that reading lists must not focus on the narrow area of the student’s research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and major genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to...
use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work will prove relevant, but they should also remember that the examination is the central means of certifying their expertise in a literary period.

The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee and the student services officer for the Division of Literatures, Cultures, and Languages no later than two weeks preceding the examination. Students must submit the Request for University Oral Exam form to the student services officer at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. dissertation reading committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the two foreign languages the student presents to meet the language requirements. The two-hour examination consists of the following two parts:

1. Forty minutes: a 20-minute talk by the candidate followed by a 20-minute question and answer period concerning the talk.

Working with the committee members, the candidate’s adviser prepares three or more questions to be presented to the candidate at 8:00 a.m. on the day of the examination. These questions concern broad topics pertinent to the candidate’s reading list and period of specialization, including concerns relevant, but by no means limited to, the student’s projected dissertation. The candidate chooses one of the questions and develops a 20-minute talk in response. Students must not read from a prepared text, but rather must speak from notes. They are free to consult any necessary materials while preparing the talk. The candidate is questioned for 20 minutes on the talk, with the dissertation adviser starting the questioning.

2. One hour, 20 minutes: questions on the area of concentration.

Each member of the committee, except for the chair, is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications.

The University oral examination is a formal University event. It represents the last occasion for the faculty to evaluate a student’s overall preparation as a candidate for the Ph.D. After the University orals, only the colloquium on the dissertation prospectus and certification of the final dissertation by the student’s reading committee stand in the way of conferral of the Ph.D. The examination, therefore, is a uniquely significant event and is designed to evaluate the student’s preparation as a specialist in a given sector of Italian studies, but within a broader context than that provided by a single course, hour examination, or even the dissertation itself.

**Dissertation**

The fourth and (if necessary) fifth years of graduate study are devoted to writing and researching the doctoral dissertation. The dissertation should demonstrate the ability to carry out research, organize, and present the results in publishable form. The scope of the dissertation should be such that it could be completed in 12 to 18 months of full-time work.

**Colloquium on the Dissertation Proposal** — The colloquium normally takes place in the quarter following the University oral examination; in most cases this means early in Autumn Quarter of the student’s fourth year of study. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student (lasting no more than ten minutes), and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double-spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project’s relation to prior scholarship on the topic, and lay out a complete chapter-by-chapter plan.

It is the student’s responsibility to schedule the colloquium no later than the first half of the quarter subsequent to the quarter in which the student passed the University oral examination. The student should arrange the date and time in consultation with the student services officer and with the three examiners. The student services officer schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

**Joint Degrees and Minors**

A joint degree program in Humanities and Italian Literature is described in the “Interdisciplinary Studies in Humanities” section of this bulletin. Minors are possible in a wide variety of related fields. Joint degree programs and minors frequently require 24 additional units of work, making completion of all course requirements in nine quarters difficult if careful advance planning is not done.

**Ph.D. Minor in Italian Literature** — The section offers a minor in Italian Literature. The requirement for a Ph.D. minor is a minimum of 24 units of graduate course work in Italian literature. Students interested in a minor in Italian should consult the graduate adviser.
Courses

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

French Section

Note — Changes in course offerings after this bulletin has gone to print are sometimes necessary. Students are advised to consult the department bulletin board regularly.

Undergraduate courses in Literature and Culture (130-199)
Courses for Advanced Undergraduates and Graduates (200-299)
Graduate Seminars (300-399)

French Language Courses

The following courses in French language instruction represent a typical sequence for three years of French language study. Majors and prospective majors should consult the requirements for a B.A. in French above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at La Maison Française, see the “Language Center” section of this bulletin.

FRENLANG 1, 2, 3. First-Year French
5 units, Aut, Win, Spr (Ashalaou, Howard, Shashko, Tsethlikai, Staff)

FRENLANG 22, 23. Second-Year French
4-5 units, Aut, Win, Spr (Tsethlikai, Shashko, Staff)

FRENLANG 120. Advanced French Oral Communication
3 units, Aut, Win, Spr (Le Teuff)

FRENLANG 122. Introduction to French Culture and Civilization
3-4 units, Win (Palumbo-Liu)

FRENLANG 124. Advanced French Grammar
3-4 units, Aut, Win (Staff)

FRENLANG 126. French Stylistics and Textual Analysis
3-4 units, Spr (Le Teuff)

Introduction to the Humanities (IHUM)

The following introduction to the Humanities courses are taught by French and Italian department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in French or Italian are advised to consider satisfying their IHUM requirements by registering for the following IHUM courses.

IHUM 2. Epic Journeys, Modern Quests
— Two quarter sequence. Great religious, philosophical, and literary texts that have addressed timeless questions about human identity and the meaning of human life. Focus is on the epic tradition in the ancient and classical worlds and its transformations or abandonment in modernity. Comparisons conceptions of the afterlife. How traditions about the afterlife are created and appropriated. The diminished importance of the dead and increased emphasis on the afterlife. How traditions about the afterlife are created and appropriated. The importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum
4 units, Spr (Apostolidès)

FREN 190. Images of Women in French Cinema: 1930-1990
— The myth of the feminine idol in French films in historical and cultural context. The myth of stars as the imaginary vehicle that helped France to change from traditional society to modern nation after 1945. Filmmakers include Renoir, Truffaut, and Nelly Kaplan. The evolution of the role of women in France over 60 years. Lectures in English; films in French with English subtitles. GER:DB-Hum, EC-Gender
3-5 units, Spr (Apostolidès)

FREN 228E. Getting Through Proust
— Seminar. Selections from In Search of Lost Time. Themes: habit, heredity, constitution of the self; language, names, metaphor, and metonymy; aesthetics, music, photography, and painting; truth, lies, belief, and disenchantment; sleep, dreams, memory, time, modernity, and technology; friendship, love, homosexuality, jealousy, and mediated desire. Readings in French or English.
3-5 units, Aut (Landy)

General (in English)

These courses, with the subject code FREN 20N, do not require knowledge of French and are open to all students.

FREN 20N. Travel: Real and Imagined Worlds
— (Same as COMPLIT 20N) Stanford Introductory Seminar. Preference to freshmen. Focus is on the foreign and the stranger. How otherness and difference are represented through the outsiders’ gaze. Sources include literary works and travel accounts. Topics such as utopia and monstrosity, cultural encounter, and the diversity of cultures. Readings include Plato, Marco Polo, Rabelais, Montaigne, Jean de Léry, Thomas Mann, Alexis de Tocqueville, Claude Lévi-Strauss, Bernard Dadié, Italo Calvino, and Barbara Chase-Riboud. GER:DB-Hum
3-4 units, Win (Boyli)

FREN 47Q. Albert Camus: Novelist and Philosopher
— Stanford Introductory Seminar. Preference to freshmen. The works and thoughts of Camus, one of the most influential thinkers of his century. His artistic and intellectual production including novels, plays, and philosophical essays. The absurd and the rebellion against the absurd in his works. Readings include The Myth of Sisyphus, The Fall, and The First Man. GER:DB-Hum
4 units, Spr (Apostolidès)

FREN 481. Philosophy and Literature
— (Same as ITALGEN 481) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DLCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum
4 units, Spr (Apostolidès)

FREN 190Q. Parisian Cultures of the 19th and Early 20th Centuries
— Preference to sophomores. Political, social, and cultural events in Paris from the Napoleonic era and the Romantic revolution to the 30s. The arts and letters of bourgeois, popular, and avant garde cultures. Illustrated with slides. GER:DB-Hum
4 units, Spr (Bertrand)

FREN 192E. Images of Women in French Cinema: 1930-1990
— The myth of the feminine idol in French films in historical and cultural context. The mythology of stars as the imaginary vehicle that helped France to change from traditional society to modern nation after 1945. Filmmakers include Renoir, Truffaut, and Nelly Kaplan. The evolution of the role of women in France over 60 years. Lectures in English; films in French with English subtitles. GER:DB-Hum, EC-Gender
3-5 units, Spr (Apostolidès)

FREN 481E. New Methods and Sources in French and Italian Studies
— (Same as ITALGEN 481E) Based on student interest. Changes in research methods: the use of digitized texts, resources, and databases available through Stanford Library’s gateways. Emphasis is on strategies for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the level of students’ knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.
1-4 units, Aut (Sussman)

FREN 228. Theological Poets: Gods, Laws, and Rhythms in European Romanticism
— Why are poets held in high esteem? How did the poet supersede the philosopher as a cultural authority? The cultural, philosophical, and political transformations behind this shift and Romantic ideology. From the late Enlightenment to the mid-1800s, the religious and revolutionary reasons for the poet’s relationships with human beings and gods. Readings include Vico, Rousseau, Kant, Schelling, Hölderlin, Blake, Shelley, Keats, Lamartine, Hugo, and Musset. GER:DB-Hum
3-5 units (Edelstein) not given 2005-06
—How the notion of decadence, initially 3-4 units, Win (Cohen)

FRENGEN 258E. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S. —(Same as STS 211.) Nanoethics as a new discipline that accompanies the rise of nanotechnology research in the U.S. and Europe. Differing approaches to the ethics of science and technology in the case of a fledgling technology. 3-5 units (Dupuy) alternate years, given 2006-07

FRENGEN 259. Walter Benjamin and Paris —How Benjamin’s writings and concepts were shaped by his encounter with the literature, visual culture, and social history of 19th- and 20th-century Paris. Writings may include the Arcades Project, essays on Charles Baudelaire, reflections on the work of art in the age of mechanical reproducibility and on photography, essay on surrealism and One-Way Street, and “Theses on the Philosophy of History.” Benjamin’s criticism juxtaposed to works by French authors such as Hugo, Fourier, Baudelaire, Rimbaud, Breton, and Aragon. 3-4 units, Win (Cohen)

FRENGEN 256E. Political Anthropology from Rousseau to Freud —A confrontation between ways of accounting for society in an individualistic framework: the social contract; political economy; individualistic sociology; society as crowd; mass psychology; and sociopolitical institutions. Creating a typology of the ways in which a given anthropological constrains conceptions of the social and political order. Writers include Rousseau, Hume, Smith, Constant, Tocqueville, Marx, Durkheim, Weber, and Freud. GER:DB-Hum 3-5 units (Dupuy) not given 2005-06

FRENGEN 231E. Philosophy and Literature —(Same as PHIL 375.) Points of intersection between philosophy and literature. Philosophy on literature: philosophical approaches to the understanding of literary texts, and issues of truth, fiction, authorship, selfhood. Philosophy in literature: literary texts that invoke philosophical problems or approaches, particularly those in ethics. Philosophy as literature; problems raised by philosophical texts whose proper use requires attention to their form. Readings from Sophocles, Beckett, Plato, Montaigne, Nehamas, Nussbaum, MacIntrye, Walton. 2-4 units (Anderson, Landy) not given 2005-06

FRENGEN 340. Narrative, Memory, Materiality: Women’s Sense of the Past —(Same as ARCHLGY 340, CASA 340.) Theoretical issues concerning women’s sense of the past in different cultural and social milieus, as approached through written stories, monuments and material objects. Themes such as subjectivity, identity, and the human body. Readings include Cixious, Irigaray, Grosz, Kristeva, Spivak, Meskell, Lacan, Levinas, Ricoeur, and Badiou. 3-5 units, Spr (Domanska)

FRENGEN 353. Realism in France, 1830-34 —Practices of the novel in the first years of modern French realism; the realist novel as part of a historically located generic system. The usefulness of genre as a category of literary analysis, the semi-autonomy of literature as part of a social formation, how to make sense of forgotten literature including its challenge to norms of literary value, and materialist models for understanding literary production. Authors may include Stendhal, Balzac, Hugo, Sand, Paul de Kock, Eugène Sue, Edouard Corbière, Madame Charles Reybaud, and Théophile Gautier. Critical readings include Bourdieu, Jameson, Macherey, and Moretti. 3-5 units (Cohen) not given 2005-06

FRENGEN 318E. Philosophy and Literature —(Same as COMPLIT 322A.) The novel as the literary genre most closely identified with the development of cultural modernity by literary historians and theorists. Critical models for defining the novel’s poetics and cultural work. Critical readings such as Bakhtin, Auerbach, Barthes, Armstrong, Genette, Radway, Bourdieu, Macherey, Jameson, and Robbe-Grillet. Tutor texts such as Defoe’s Robinson Crusoe, Flaubert’s Madame Bovary, and Woolf’s To the Lighthouse. 3-5 units, Spr (Cohen)

FRENGEN 369. Introduction to Graduate Studies: Criticism as Profession —(Enroll in COMPLIT 369, GERLIT 369.) 5 units, Aut (Berman)

FRENGEN 395. Philosophical Reading Group —(Same as ITALGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht or R. Harrison is required. May be repeated for credit. 1 unit, Aut, Win, Spr (Harrison)

LITERATURE, THOUGHT, AND CULTURE

Courses in this section have the subject code FRENLIT.

UNDERGRADUATE

FRENLIT 130. Authorship, Book Culture, and National Identity in Medieval and Renaissance France —Readings: epics (La Chanson de Roland), medieval romances (Tristan; Chrétien de Troyes’ Yvain), post-Petrarchan poetics (Du Bellay, Ronsard, Labé), and prose humanists (Rabelais, Montaigne). Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, WIM 4 units, Spr (Alday)

FRENLIT 131. Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France —The literature, culture, and politics of France from Louis XIV to Rousseau. How this period produced the

ITALIAN LANGUAGE COURSES

The following courses in Italian language instruction represent a typical sequence for three years of Italian language study. Majors and prospective majors should consult the requirements for a B.A. in Italian above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at La Casa Italiana, see the “Language Center” section of this bulletin.

ITALLANG 1,2,3. First-Year Italian
2-5 units, Aut, Win, Spr (Baldocchi, Devine, Gelmetti, Napolitano, Tempesta)

ITALLANG 21,22,23. Second Year Italian
4-5 units, A: Aut, Win, Spr (Baldocchi, Devine, Gelmetti), B: Aut, Win, Spr (Baldocchi, Devine, Gelmetti), C: Spr (Gelmetti)

ITALLANG 114. Advanced Stylistics and Composition — WIM
3-4 units, Win (Baldocchi)

ITALLANG 115. Translation and Composition — WIM
3-4 units, Spr (Napolitano)

GENERAL (IN ENGLISH)

These courses, with the subject code ITALGEN, do not require knowledge of Italian and are open to all students.

ITALGEN 41N. Imagining Italy — Stanford Introductory Seminar. Preference to freshmen. Literary responses to Italy by writers in English during the past hundred years and how they continue to construct myths of Italy. How these myths have been transformed into commodities in consumer culture, making Italy a profitable fiction. Authors include Hawthorne, Howells, James, Wharton, Forster, Unsworth, Hellenga, and Mayes. GER.DB-Hum
3-4 units, Win (Springer)

ITALGEN 125. Italian Club — Exploration and appreciation of aspects of Italian and Italian American culture. Events may include: field trips, film screenings, Italian conversation, soccer games, and dinners. (AU)
1 unit, Aut, Win, Spr (Staff)

ITALGEN 166E. Women’s Voices in Contemporary Italian Literature — The canon of Italian literature consists almost exclusively of male authors, yet Italian women writers have been active since the time of Dante. Women’s prose fiction of the last 100 years. Issues include: sexual violence in female autobiographies; the experience of motherhood; the conflict between maternal love and self-determination and autonomy; and paths to political awareness. Authors include Sibilla Aleramo, Dacia Maraini, Anna Banti, Francesca Duranti, Fabrizia Ramondino. Eight novels in English translation; students encouraged to read excerpts in Italian. GER.DB-Hum
4 units (Springer) not given 2005-06

ITALGEN 181. Philosophy and Literature — (Same as FRENGEN 181, PHIL 81.) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DLCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER.DB-Hum
4 units, Aut (Landy, Anderson)

ITALGEN 191Q. Eating Life — Preference to sophomores. Interpretation and functions of food in social contexts. Positive aspects: internalization of others, life giving and self denial, offering conviviality of social and intellectual exchange, expression of traditional and religious community solidarity and intent, pleasure of the senses. Negative aspects: offense to oneself such as overeating, obesity, and anorexia, offense to others such as starvation, cannibalism, and human sacrifice as a means to commit suicide, substitution for other pleasures, useless waste. Illustrations in contemporary films.
3 units, Win (Napolitano)

ITALGEN 210E. New Methods and Sources in French and Italian Studies — (Same as FRENGEN 210E.) Based on student interest. Changes in research methods: the use of digitized texts, resources, and databases available through Stanford Library’s gateways. Emphasis is on strategies for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the level of students’ knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.
1-4 units, Aut (Sussman)

ITALGEN 235E. Inferno — The first canticle of Dante’s masterpiece. GER.DB-Hum
3-5 units, Spr (Harrison)

ITALGEN 247. Petrarch and Boccaccio — Their respective roles as founders of European Petrarchism and modern Italian prose. Petrarch’s Canzoniere and My Secret Life and Boccaccio’s Decameron. Readings in Italian and translation.
3-5 units (Harrison) not given 2005-06

ITALGEN 273. Sex, Religion, and Politics in Italian Cinema — How cinema represents conflicts central to the development of contemporary Italian society, such as sexual and racial politics, the development of countercultures including the Mafia, religion’s place in democratic political discourse, and the subversive possibilities of popular religion. Major Italian directors including Fellini, Pasolini, Giordana, and Bellochio.
3-4 units, Win (Wittman)

ITALGEN 283. Poetry and Politics in French and Italian Modernism — (Same as FRENGEN 283.) The poetic production of major modern poets in the context of their writings on politics, other poets, and contemporary political issues. To what extent can the Italian hermetic poets such as Ungaretti and Montale be considered anti-Fascist? Is there a link between the universalizing diplomatic agenda of diplomat-poets such as Claudel and Perse and their work? The notions of négritude in the communist verse of Pasolini, Glissant’s creolization, and Zanzotto’s left-wing environmentalism?
3-4 units, Aut (Wittman)

ITALGEN 284. Philosophy and Poetry in 20th-Century French and Italian Theory — (Same as FRENGEN 284.) To what extent is poetry the other of modern philosophy? How does modern aesthetic theory understand the distinction and blur the boundaries between philosophical and poetic thinking? Authors include Croce, Gentile, Sartre, Bataille, Agamben, Ricoeur, Cacciari, Derrida, and Vattimo. GER.DB-Hum
3-5 units (Wittman) not given 2005-06

ITALGEN 288. Decadence and Modernism from Mallarmé to Marini — (Same as FRENGEN 288.) How the notion of decadence, initially a term of derision, shapes and underlies the positive terms of Symbolism and Modernism. Readings include theories of decadence and examples of Symbolist and Modernist texts that attempt to exercise decadent demons, such as lust, mysticism, and the retreat into artificiality. Authors include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d’Annunzio, Valry, Ungaretti, Marinetti, and Breton. GER.DB-Hum
3-5 units (Wittman) not given 2005-06

ITALGEN 299. Modernism and Modernity — How modernism is not just a style of art but a way of thinking, a philosophy of experience that bears the hallmarks of the 20th century. Readings include works of Mallarmé, Nietzsche, Kafka, Beckett, Bataille, Proust, Benjamin, and lots of visual materials. GER.DB-Hum
1 unit, Aut (Sussman)
ITALGEN 321. Giambattista Vico—Vico’s New Science in historical context, its polemic against the rise of Cartesian critical philosophy, the basis of his original aesthetic theories, and the relationship of his thought to the traditions it foreshadows such as Hegelianism, Marxism, structuralism, hermeneutics, and speech-act theory. Readings: On the Most Ancient Wisdom of the Italians and The New Science; Descartes’ Discourse on Method; Rousseau’s Origin of Language; and Hegel’s Introduction to the Philosophy of History.
4 units, Win (Harrison)

ITALGEN 353E. F. T. Marinetti and Futurism — (Same as COMPLIT 335.) The history and influence of the Futurist movement. Links between avant garde cultural experimentation and themes of speed, acceleration, intensification, and novelty that shaped modern and postmodern ideas about experience, subjectivity, rhythm, power, and production.
3-5 units, Spr (Schnapp)

ITALGEN 369. Introduction to Graduate Studies: Criticism as Profession — (Enroll in COMPLIT 369, GERLIT 369.)
5 units, Aut (Berman)

ITALGEN 395. Philosophical Reading Group — (Same as FRENGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht or R. Harrison is required. May be repeated for credit.
1 unit, Aut, Win, Spr (Harrison)

LITERATURE, THOUGHT, AND CULTURE
Courses in this section have the subject code ITALLIT.

UNDERGRADUATE

ITALIT 127. Inventing Italian Literature: Dante, Boccaccio, Petrarcha—Dante’s Inferno and Vita Nuova, Boccaccio’s Decameron, and the love lyrics of Petrarch. Prerequisite: 3 or equivalent. GER:DB-Hum
4 units, Aut (Schnapp)

ITALIT 128. The Italian Renaissance and the Path to Modernity—The literature, art, and history of the Renaissance and beyond. Readings from the 15th through 18th centuries include Moderata Fonte, Machiavelli, Ariosto, Tasso, Galileo, and Goldoni. Prerequisite: 21 or equivalent. GER:DB-Hum
4 units, Win (Springer)

ITALIT 129. Modern Italian History and Literature—The history of the Italian nation and national literary identity in the 19th and 20th centuries. Focus is on the Risorgimento and the romantic lyric, futurism, feminism, fascism, and resistance. Authors include Foscolo, Leopardi, Verga, D’Annunzio, Aleramo, Marinetti, Pirandello, Ungaretti, and Montale. Prerequisite: 21 or equivalent. GER:DB-Hum
4 units, Spr (Springer)

ITALIT 139. Thematics of Twentieth-Century Italian Poetry—Recurring themes in 20th-century Italian poetry within a larger European context. Aesthetic, political, and philosophical issues in modernity. The poetic intent behind recurring themes of time, the void, isolationism, enclosure, and memory. Readings include Saba, Ungaretti, Montale, Eliot, Bergson, Bachelard, and Agamben.
4 units, Spr (Lopez)

ITALIT 198. Honors—Open to juniors and seniors with consent of adviser; 9-12 total units for completion of honors essay.
3-12 units, Aut, Win, Spr (Staff)

ITALIT 199. Individual Work
1-12 units, Aut, Win, Spr (Staff)

ADVANCED LITERATURE

ITALIT 245. Tasso and the Italian Baroque—The Gerusalemme liberata in the context of the cultural politics of the Counterreformation including Baroque visual culture, literature, architecture, urban planning, sculpture, and painting. In English. Prerequisite: reading knowledge of Italian.
4-5 units, Spr (Springer)

ITALIT 273. Past Imperfect: Revisiting World War II in Italian Fiction and Film—Art’s role, positive and negative, in rewriting traumatic historical events. Changing views of Fascism and WW II from the 30s to the present. Authors include Carlo Levi, Silone, Primo Levi, Morante, Bassani, and Moravia; directors include Rossellini, De Sica, Bertolucci, Scola, Cavani, and Benigni.
3-5 units (Wittman) not given 2005-06

ITALIT 299. Individual Work
1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

ITALIT 345. Petrarch and Petrarchism— (Same as COMPLIT 315.) Readings from the Canzoniere, Epistola, De Vita Solitaria, and Secretum, in relation to later developments in Petrarchan poetics in Italy (Ariosto, Gaspara, Stampa, Tasso), Spain (Garcilaso, Quevedo, Gongora), England (Sydney, Shakespeare), and France (Ronsard). Topics: Petrarch and Dante, Petrarch and the aesthetics of fragmentation, and Pietro Bembo and the Petrarchan canon. In Italian.
3-5 units, Aut (Schnapp)

ITALIT 399. Individual Work—For graduate students working on a special project or predissertation research. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES
Courses approved for the French or Italian major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

PARIS

FRENGEN 156P. American Writers in Paris: Twentieth-Century Expatriate Writers in Paris
4 units, Aut (Alduy)

FRENLIT 143P. Theater in Transition: Stage and Audience in France Today
4 units, Spr (Mervant-Roux)

FRENLIT 178F. Literature and the City
4 units, Aut (Dupas)

FRENLIT 182P. Making Films in France: An Insider’s View
4 units, Win (Apostolidès)

FRENLIT 186F, Contemporary African Literature in French— (Same as AFricaAM 186F)
4 units, Win (Azarian)

FRENLIT 191P. Women in French Cinema— (Same as FEMST 192E)
4 units, Aut (Alduy)

FRENLIT 194P. French Avant Garde Movements in the Twentieth Century
3 units, Win (Apostolidès)

FLORENCE

ITALGEN 135F. Women in Italian Cinema: Maternity, Sexuality, and the Image— (Same as FEMST 135F)
4 units, Spr (Campani)

ITALGEN 150F. High Renaissance and Maniera— (Same as ART-HIST 112Y)
5 units, Spr (Verdon)

ITALGEN 191F. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema— (Same as ART-HIST 160Y, HISTORY 235V, COMM 53)
5 units, Win (Campani)
GERMAN STUDIES

Emeriti: (Professors) Theodore M. Andersson, Gerald Gillespie, Walter F. W. Lohmes, Katharina Mommsen, Kurt Müller-Vollmer
Chair: Amir Eshel
Professors: Russell A. Berman, Elizabeth Bernhardt, Orrin W. Robinson III
Associate Professor: Amir Eshel
Assistant Professors: Charitini Douvaldzi, Arthur C. T. Strum
Senior Lecturers: William E. Petig, Kathryn Strachota
Visiting Professor: Marton Dornbach (Autumn, Winter)
Affiliated Academic Staff: Henry Lowood (Curator, Germanic Collections)
Director of Graduate Studies: Russell A. Berman
Director of Undergraduate Studies: Arthur C. Strum
Department Office: Building 260, Room 211
Mail Code: 94305-2030
Phone: (650) 723-3266
Email: germanstudies@stanford.edu
Web Site: http://www.stanford.edu/dept/german/

Courses given in German Studies have the subject code GERGEN and GERLIT. For courses in German language instruction with the subject code GERLANG, see the “Language Center” section of this bulletin. For a complete list of subject codes, see Appendix.

The department offers a variety of programs in German; and majors in German Studies formulate their plans in quarterly consultation with the Director of Undergraduate Studies.

By carefully planning their programs, students may fulfill the B.A. requirements for a double major in German Studies and another subject. An extended undergraduate major in English and German literature is available, as are co-terminal programs for the B.A. and M.A. degrees in German Studies, and joint programs for the Ph.D. degree with Comparative Literature, Interdisciplinary Studies in Humanities, Linguistics, and Modern Thought and Literature.

Special collections and facilities at Stanford offer possibilities for extensive research in German Studies and related fields pertaining to Central Europe. Facilities include the Stanford University Libraries and the Hoover Institution on War, Revolution, and Peace. Special collections include the Hildebrand Collection (texts and early editions from the 16th to the 19th century), the Austrian Collection (with emphasis on source material of the time of Maria Theresa and Joseph II, the Napoleonic wars, and the Revolution of 1848), and the Stanford Collection of German, Austrian, and Swiss Culture. New collections emphasize culture and cultural politics in the former German Democratic Republic. The Hoover Institution has a unique collection of historical and political documents pertaining to Germany and Central Europe from 1870 to the present. The department also has its own reference library. Extensive use is made of the language lab as well as the department’s own audio-visual equipment, films, tapes, and slides.

The Republic of Austria has endowed the Distinguished Visiting Professorship in Austrian Studies. The professorship rotates on a yearly basis through several departments.

Haus Mitteleuropa, the German theme house at 620 Mayfield, is an undergraduate residence devoted to developing an awareness of the culture of Central Europe. A number of department courses are regularly taught at the house, and there are in-house seminars and conversation courses. Assignment is made through the regular undergraduate housing draw.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The major in German Studies provides students with the linguistic and analytic facility to explore the significance of the rich cultural traditions and political histories of the German-speaking countries of Central Europe. At the same time, the interdisciplinary study of German culture, which can include art, history, literature, media theory, philosophy, political science, and other areas, also encourages students to evaluate broader and contradictory legacies of modernity. For example, the literary, artistic, and cultural responses to the belated and rapid modernization of Germany allow for reflection on the modern condition in general.

Similarly, the German experience of national identity and political unification sheds light on wider issues of cultural cohesion and difference, as well as on the causes and meaning of phenomena such as racial prejudice, anti-Semitism, and the Holocaust. In general, an education in German Studies not only encourages the student to consider the profound effects of German-speaking thinkers and artists on the modern world, but also provides a lens through which the particular contours of the present and past can be evaluated.

Majors must demonstrate basic language skills, either by completing GERLANG 1, 2, 3, First-Year German, or the equivalent such as an appropriate course of study at the Stanford in Berlin Center. Students then enroll in intermediate and advanced courses on literature, culture, thought, and language. Requirements for the B.A. include at least three courses at the 130-139 level (introduction surveys on topics in German literature, thought, linguistics, and culture). Every major is expected to complete at least one Writing in the Major (WIM) course. Including GERLANG 1, 2, 3, the total requirement for the B.A. is a minimum of 60 units of work. With the approval of the Director of Undergraduate Studies, appropriate courses offered by other departments can be accepted toward this total, up to a maximum of 25 units. Ten units from the IHUM 8A,9A sequence, Myth and Modernity, can be counted towards the major.

Internships—Internships in Germany are arranged through the Overseas Studies program. In addition, students may consult with the department to arrange local internships involving German language use or issues pertaining to Germany or Central Europe. Interns who prepare papers based on their experience enroll in GERLIT 298.

Extended Major in English and German Literatures—Students may enter this program with the consent of the chairs of both departments. See the “English” section of this bulletin.

Multiple Majors—Students can combine a major in German Studies with a major in any other field. By carefully selecting courses in such disciplines as history, international relations, or economics, students can prepare themselves exceptionally well in the area of Central Europe. Multiple majors are especially recommended for students spending one or more quarters at the Stanford in Berlin Center.

GERMAN AND PHILOSOPHY

The German and Philosophy major option offers students the opportunity to combine studies in literature and philosophy. Students take most of their courses from departments specializing in the intersection of literature and philosophy.

The German and Philosophy major track requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. 35 units in German Studies, including:
   a) three courses at the 130 level
   b) a WIM course
2. PHIL 81, the gateway course in philosophy and literature, preferably in the sophomore year.
3. Requirements in Philosophy:
   a) PHIL 80. Prerequisite: introductory philosophy class
   b) a course in the PHIL 180 series
   c) a course in the Philosophy 170 series
   d) two courses in the history of philosophy numbered above 100
4. Two additional elective courses of special relevance to the study of philosophy and literature as identified by the committee in charge of the program. In German, these courses include GERLIT 241-243 series, Deutsches Geistesgeschichte, and other advanced seminars in German thought and literature. Students must consult with their advisers, the Director of Undergraduate Studies, and undergraduate adviser of the program in philosophical and literary thought.
5. Capstone: in place of a standard capstone course in the major, students take a capstone seminar approved through the program in philosophical and literary thought. The student’s choice of capstone seminar must be approved in writing by the Director of Undergraduate Studies and
undergraduate adviser of the program in philosophical and literary thought.

6. Units devoted to meeting the department’s language requirement are not counted toward the 65-unit requirement.

The capstone seminar and the two related courses must be approved by both the German Studies Director of Undergraduate Studies and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, are not normally permitted for items 3b, 3c, and 3d, and are not permitted under any circumstances for items 2, 3a, and 5. Up to 10 units taken in the Philosophy Department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

MINORS

There are two minor options.

German Language and Culture — Students may choose to minor in German Language and Culture if they are particularly interested in developing a strong ability in the German language, or in pursuing linguistic issues pertinent to German. Students satisfy the requirements for the minor in German Language and Culture by completing 35 units of course work, including at least three courses at the 100-129 level in either GERLANG or GERLIT, taught in German. Study at the Stanford in Berlin Center for at least one quarter is highly recommended.

German Cultural Studies — Students who wish to study German literature, culture, or thought, without necessarily acquiring facility in the German language, may pursue a minor in German Cultural Studies. Students meet the requirements for the minor in German Cultural Studies by completing 35 units of course work in German literature, culture, and thought in translation, including at least three courses at the 130 or 140 level. (Five units of the Introduction to the Humanities sequence Myth and Modernity may be counted towards the completion of requirements for the minor in German Cultural Studies.)

HONORS

Majors with a minimum grade point average (GPA) of 3.3 in German courses are eligible for departmental honors. Students interested in the honors program should consult the undergraduate adviser early in their junior year. The essay topic is chosen in consultation with a faculty member of the department and opportunities to start research projects are offered at the Stanford in Berlin Center. In addition to the requirements listed above, the student must submit a proposal for the honors essay to the German faculty by the end of Spring Quarter of the junior year. During this quarter, students may enroll for 2 units of credit in GERLIT 298 for the drafting or revision of the thesis proposal. In Autumn Quarter of the senior year, the student must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in GERLIT 298 while composing the thesis during Winter Quarter. A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis.

STANFORD IN BERLIN

All undergraduates interested in Germany are urged to enroll in the Berlin program, which is open for academic study during the Autumn, Winter, and Spring quarters. The program also offers internships in German industry, government, and cultural organizations year round. Through the Center, students with at least two years of college-level German can also take courses at the Freie Universität, Technische Universität, or Humboldt Universität. Most students live in homes with German hosts.

Most credits earned in Berlin can be applied to the undergraduate major in German Studies. All students who are planning to study at Stanford in Berlin or engage in an internship are encouraged to consult with their major Director of Undergraduate Studies and the Overseas Studies office about integrating work done abroad into their degree program. Returning interns who wish to develop a paper based on their experience should enroll in GERLIT 298. More detailed information is available at the Overseas Studies Program in Sweet Hall or with the faculty adviser in the department.

COTERMINAL PROGRAMS

Students may elect to combine programs for the B.A. and M.A. degrees in German Studies. For details, see the “Undergraduate Degrees” section of this bulletin.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

The University requirements for the M.A. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS

This program is designed for those who do not intend to continue studies through the Ph.D. degree. Students desiring the M.A. degree must complete a minimum of 45 units of graduate work. If students enroll for three quarters for a minimum of 15 units per quarter, they can fulfill the M.A. requirements in one year. The program normally includes at least one course in each of the three areas of concentration: language and linguistics, literature, and thought.

In addition, students must take graduate-level courses in German and/or approved courses in related fields such as art history, comparative literature, linguistics, history, or philosophy.

M.A. candidates must take an oral examination toward the end of their last quarter.

DOCTOR OF PHILOSOPHY

The requirements for the Ph.D. include: (1) a minimum of 36 graduate units during the first year of graduate study and a minimum of 9 units per quarter during the six quarters following the first year; (2) a reading knowledge of one language other than English and German, normally French; (3) a master’s oral examination, unless the student already has an M.A. upon entering the program; (4) a qualifying paper; (5) a qualifying examination; (6) the University oral examination; and (7) a dissertation. Students in Medieval Studies must also have a reading knowledge of Latin.

During the first year of work, the student should select courses that provide an introduction to the major areas of the discipline. During Spring Quarter of the first year, all students, except those admitted with a master’s degree, must take an oral M.A. examination. During the one-hour examination, the student is questioned by three faculty members from German Studies, chosen by the student, on work undertaken in specific graduate courses.

By July 1 of the summer following the first year of graduate study, students should present as a qualifying paper an example of their course work. Although ordinarily not meant to represent an original contribution to scholarship, it should demonstrate the candidate’s ability to grasp complex subject matter with sufficient competence to organize materials and to present arguments in a clear and concise manner commensurate with scholarly standards. The paper is submitted to the department chair, who passes it on for approval by the student’s faculty adviser and a second reader appointed by the chair in consultation with the Director of Graduate Studies.

By July 1 of the summer following the first year of graduate study, students should present as a qualifying paper an example of their course work. Although ordinarily not meant to represent an original contribution to scholarship, it should demonstrate the candidate’s ability to grasp complex subject matter with sufficient competence to organize materials and to present arguments in a clear and concise manner commensurate with scholarly standards. The paper is submitted to the department chair, who passes it on for approval by the student’s faculty adviser and a second reader appointed by the chair in consultation with the Director of Graduate Studies.

Students who enter the program with a master’s degree from another institution must submit, in lieu of a qualifying paper, a master’s thesis or a major research paper as evidence of ability to pursue advanced scholarly work.

At the end of the sixth quarter of study (and only if the qualifying paper has been accepted), the student takes a one-hour oral qualifying exam with two faculty members from German Studies, the student’s chosen adviser, and another faculty member appointed by the chair. The purpose of this examination is to demonstrate a broad familiarity with the literature of the major periods, movements, and some major figures. Only after completion of the qualifying procedure will the department approve the student’s admission to candidacy. A student who fails the qualifying examination may retake it once at the beginning of the seventh quarter.

After passing the qualifying exam, the student should consult with appropriate faculty members in order to develop a dissertation topic. It
is important to consider scholarly significance, access to resources, and feasibility of completion within a reasonable period. The student then prepares a preliminary statement describing the topic (no more than five pages), which is circulated to prospective committee members for discussion at a meeting normally held during the eighth quarter. The purpose of this meeting is to provide the student with feedback and guidance in the preparation of the formal prospectus.

The University oral examination in the Department of German Studies is based on the dissertation prospectus. The prospectus, normally 25 pages plus bibliography, elaborates on the topic, the proposed argument, and the organization of the dissertation. It must be distributed to the committee members and the outside chair at least two weeks before the formal University oral examination. Students should plan this examination for the end of the third year or the end of the subsequent summer. The examination lasts approximately two hours, permitting each of the four examiners a 25-minute question period and reserving an optional ten minutes for questions from the chair of the examination.

Students, regardless of their future fields of concentration, are expected to acquire excellence in German and thorough knowledge of the grammatical structure of German. The department expects Ph.D. candidates to demonstrate teaching proficiency in German; GERLIT 200, Teaching of Second Language Literatures (not given 2005-06), is required. The teaching requirement is five quarters during the second and third years of study. The fifth and final quarter of teaching may be postponed until the student has worked extensively on the dissertation and may be devoted to a literary topic related to the dissertation. Such courses are subject to departmental review procedures.

The department expects candidates to demonstrate research skills appropriate to their special areas of study. The requirement can be fulfilled in the capacity of either a University Fellow or a Research Assistant.

Graduate students are also advised to start developing skills in the teaching of literature by participating in the teaching of undergraduate literature courses. Students can earn up to 3 units of graduate credit for practice teaching in literature.

Regular attendance at the departmental colloquium is mandatory. Each student is expected to make a formal presentation at the colloquium for public discussion.

INTERDISCIPLINARY PROGRAMS

The department participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in German Studies and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

Students may work toward a Ph.D. in German Studies with minors in such areas as comparative literature, modern thought and literature, linguistics, or history. Students obtaining a Ph.D. in such combinations may require additional training.

Courses

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

GERMAN LANGUAGE COURSES

The following courses in German language instruction represent a typical sequence for three years of German language study. Majors and prospective majors should consult the requirements for a B.A. in “German Studies above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at the Haus Mitteleuropa, see the “Language Center” section of this bulletin.

GERLANG 1,2,3. First-Year German

5 units, Aut, Win, Spr (Staff)

GERLANG 21,22. Intermediate German

3-4 units, 21: Aut, 22: Win (Petig)

GERLANG 100. Hundert Deutsche Jahre: One Hundred German Years

3-4 units, Aut (Strachota)

GERLANG 101,102. Advanced Language Study

3-4 units, 101: Aut, 102: not given 2005-06

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by German Studies faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in German Studies are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 8A,9A. Myth and Modernity: Culture in Germany — Two quarter sequence. The tension between tradition and progress through an examination of German cultural history. The experience of modernity typically involves overcoming or denying the past, but that same past can return to haunt the present in the form of myths. The interplay of myth and modernity, the irrationality of narrative, and the reason of progress, through the example of German culture, especially in literature, from the heroic epics of the medieval era through the catastrophes of the last century. GER:IHUM-2,3

IHUM 8A. 5 units, Win (Berman)

IHUM 9A. 5 units, Spr (Eshel, Strum)

GENERAL (IN ENGLISH)

These courses, with the subject code GERGEN, do not require knowledge of German and are open to all students.

GERGEN 103A. 19th-Century Philosophy—(Enroll in PHIL 103.)
4 units, Win (A. Wood)

GERGEN 104Q. Resistance Writings in Nazi Germany—Stanford Introductory Seminar. Preference to freshmen. The letters and diaries of individuals who resisted Nazi oppression and paid with their lives. Readings include the Scholl diaries, Bonhoeffer’s letters and his Ethics, and letter exchanges from other crucial figures. No knowledge of German required; students may read texts in original if able. GER:DB-Hum
3 units, Aut (Bernhardt)

GERGEN 110A. Introductory German Conversation: Langs Die Nibelungen — Conversation adjunct to IHUM 8A, including Fritz Lang’s films Siegfried and Die Nibelungen. Corequisite: IHUM 8A, 1 unit, Win (Mitchell)

GERGEN 110C. Introductory German Conversation: German Culture in Transnational Context—German conversation course accompanying IHUM 9A. Topics may include: German colonialism and its legacy; minorities in Germany; the feminist movements; divided Germany; the Berlin Holocaust memorial; unification and the European Constitution; and Germany on film. Speakers with any level of German welcome. Corequisite: IHUM 9A.
1 unit, Spr (Hosek)

GERGEN 111A. German Modernism and Fascism—The Weimar period and its relationship to the fascist aesthetic. Major modernist works, from Expressionism to Neue Sachlichkeit; works associated with the rise of National Socialism; and the relation between art and politics. Works by Berthold Brecht, Thomas Mann, and Klaus Mann; films by Fritz Lang and Leni Riefenstahl.
3 units, Spr (Song)
GERGEN 121N. Memory in the Modernist Novel—Stanford Introductory Seminar. Preference to freshmen. The art of memory as one of the main characteristics of modernity. The relationship between memory and modernism through major narrative texts: Rainer Maria Rilke’s The Notebooks of Malte Laurids Brigge; James Joyce’s A Portrait of the Artist as a Young Man; and Marcel Proust’s Combray. How memory is represented in the novels, and its role in the perception of external reality. How memory helps to constitute personal identity. The metaphors used to define memory. Readings include theoretical and critical essays, and primary texts. GER:DB-Hum

3-5 units, Win (Douvaldzic)

GERGEN 122N. Virtue and Terror: Kant, Rousseau, and the French Revolution—Stanford Introductory Seminar. Preference to freshman. The French Revolution as culmination of the Enlightenment and effort to construct state and society in the image of reason. A philosophical interpretation of central features of revolutionary culture and politics such as festivals, paintings, and the Terror. Their importance to modern conceptions of revolution and social change through Rousseauvian and Kantian ideas either at play in the Revolution or affected by it. Sources include works by Rousseau, Kant, Robespierre, David, and Mozart.

4 units, Win (Strum)

GERGEN 166A. European Memories: Peter Weiss’ Modernism Contextualized—Weiss and the tradition of Brecht, Beckett, and Artaud; his relevance for rethinking the European past and present. The re-introduction of preeminent European intellectuals into contemporary literary-theoretical discourse. Comparative readings of texts and films which influenced Weiss to contextualize his works within European modernism. Sources include his Marat/Sade, The Investigation, and The Aesthetic of Resistance. In English.

4 units, Aut (Bach)

GERGEN 168A/268A. Freud and the Enterprise of Psychoanalysis—Psychoanalysis at the juncture of its multiple meanings as a therapeutic practice, a theory of the functioning of the human mind, a method of textual interpretation, a cultural critique, and a genealogy that accounts for the origins of morality, religion, art, and other social institutions. Readings include Freud’s major works, and Nietzsche, Ferenczi, Lacan, Laplanche, de Certeau, Kristeva, and Irigaray. GER:DB-Hum

4 units, Win (Douvaldzic)

GERGEN 181. Philosophy and Literature—(Enroll in FRENGEN 181, ITALGEN 181, PHIL 81.)

4 units, Aut (Landy, Anderson)

GERGEN 191A/291A, Oedipus, Hamlet, Moses—Texts that provided psychoanalysis with its foundational myths. Oedipus, Moses, and Hamlet as archetypes of the hero related to moments of emerging modernity: from mythos to logos, polytheism to monotheism, and action to thought. The interplay among knowledge, recognition, and desire; the role of sameness and alterity in the construction of personal, familial, and national identities; and the relation between violence and the construction of history. Readings include: Exodus, Sophocles, Shakespeare, Freud, Aeschylus, Euripides, Cavafy, Hofmannsthal, and Wolf; theoretical and critical essays by Laplanche, Lyotard, Lacan, de Certeau, Kofman, Assmann, Said, and Cavell. GER:DB-Hum

3-5 units, Spr (Douvaldzic)

GERGEN 201. The Learning and Teaching of Second Languages—(Same as APPLLING 201.) Teaching second languages from a learning perspective rather than traditional teaching methods. Focus is on instructional decision making within the context of student intellectual and linguistic development in university settings to different populations. Readings in second language acquisition.

3 units, Spr (Bernhardt)

GERGEN 206/306. Arts of Memory—From its beginnings as memorization technique for orators, ars memoriae evolved to encompass phenomena such as hermetic practices and logic, sermon composition, taxonomic systems, and ekphrastic representation. The tension between artificial and natural memory; the role of mnemonics in empirical psychology and the psychological novel; mnemonics as an alternative model to linear time and a mode of resistance to domination. Authors include Aristotle, Cicero, Augustine, Aquinas, Hugh of St. Victor, Leonardo, Comenius, Montaigne, Locke, Lessing, Goethe, Moritz; Yates, Carruthers, Foucault, Beaujour, Derrida, Mitchell, Krieger, and LeGoff. No knowledge of German required.

3-5 units, Win (Douvaldzic)

GERGEN 248. Culture Industry—German intellectual exile in California in the 40s and its encounter with Hollywood film. Topics include: the Frankfurt School and its approach to commercial and industrially produced art: popular cultures and political agenda; and elitism and modernism. Authors include Adorno, Brecht, Dieterle, and Eisler; films include Chaplin, Lang, and Godard.

4 units, Spr (Berman)

GERGEN 272. The Politics of the Humanities—Contemporary analyses of the politics of the humanities, including Rorty, Nussbaum, and Edmundson, in the context of the literary works these writers valorize, and classic analyses of the politics of art, including Plato, Rousseau, Kant, Schiller, DuBois, and Heidegger.

3-5 units, Win (Strum)

GERGEN 300. The Theory of the Text—(Enroll in COMPLIT 353.)

4-5 units, Win (White)

INTERMEDIATE

At this level, students have several options depending on their interests. After completing GERLANG 3 or the equivalent, students may register directly for courses on the GERLIT 120-level, which consider special topics in German culture while advancing language learning. Alternatively, GERLANG 21, 22, and 101 emphasize a systematic review of the language, while GERLANG 21W, 22W, and 105 study the language of business and international relations. GERLANG 100, 110, and 111 develop German language skills in the context of media such as film, television, and news’” papers. All language instruction courses with the subject code GERLANG are listed in the “Language Center” section of this bulletin.

GERLIT 119. Werther to West-Eastern Divan: Goethe’s Poetry Beyond the National Horizon—(Same as 219.) Poetic voice and vision beyond Western poetic tradition: Persian poetry and Goethe: Goethe’s vision of poetic vocation in the age of reason; Goethe’s poetry in the context of European Enlightenment; Poetic form and experience at the dawn of modernity. Readings in German and English. Discussion in English.

3-4 units, Win (Shamel)

GERLIT 123N. The Brothers Grimm and Their Fairy Tales—Stanford Introductory Seminar. Preference to freshmen. Historical, biographical, linguistic, and literary look at the Kinder- and Hausmärchen of Jacob and Wilhelm Grimm. Readings from the fairy tales, plus materials in other media such as film and the visual arts. Small group performances of dramatized fairy tales. Prerequisite: GERLANG 3 or equivalent. (In German) GER:DB-Hum, WIM

4 units, Spr (Robinson)

GERLIT 131A. The Young Goethe—(Same as 231A.) Goethe’s 18th-century works and their contexts. The spirit of rebellion in Götz von Berlichingen, Prometheus, and Werther; the classical form of Iphigenie; the bourgeois idyll Hermann and Dorothea; and Faust I. In German. GER:DB-Hum, WIM

3-4 units, Win (Strum)

GERLIT 133C. German Romanticism—(Same as 233.) The literary and theoretical innovations of early Romanticism, and works from the later phase. In German. GER:DB-Hum, WIM

3-5 units, Win (Dornsbach)
GERLIT 133F. German Self-Understanding: Between Culture and Civilization — (Same as 233F.) German-language writers’ attempts to come to terms with German culture from 1800. Visions of a national Kultur in opposition to the universalistic civilization of modernity; the role of language and the arts in this ideal; the emergence of militant nationalism and attempts to counter this tendency with enlightened patriotism; and the quandaries of postwar and post-1989 German self-understanding. GER:DB-Hum, WIM
3-5 units, Win (Dornbach)

GERLIT 133Q. Modernism and Fiction — Stanford Introductory Seminar. Preference to sophomores. Innovative ideas and narrative forms in German modernism. International and specifically German features. Problems of narration. Texts such as Musil’s Tod in Venedig, Mann’s Die Verwandlung, and Broch’s Pasenow. Close reading technique. GER:DB-Hum
4 units, Aut (Berman)

GERLIT 189Q. From Brecht to Müller: German Theater and Performance since World War II — (Enroll in DRAMA 188Q.)
3-5 units, Aut (Weber)

GERLIT 199. Independent Reading — 36 hours of reading per unit, weekly conference with instructor. May be repeated for credit. Prerequisite: consent of instructor.
1-10 units, Aut, Win, Spr, Sum (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

GERLIT 219. Werther to West-Eastern Divan: Goethe’s Poetry Beyond the National Horizon — (Same as 119; see 119.)
3-4 units, Win (Shamel)

GERLIT 226B. Kant’s Ethical Theory — (Enroll in PHIL 126/226.)
4 units, Spr (Schapiro)

GERLIT 231A. The Young Goethe — (Same as 131A; see 131A.)
3-4 units, Win (Strum)

GERLIT 233. German Romanticism — (Same as 133C; see 133C.)
3-5 units, Win (Dornbach)

GERLIT 233F. German Self-Understanding: Between Culture and Civilization — (Same as 133F; see 133F.)
3-5 units, Win (Dornbach)

GERLIT 237A. 1800: The Creation of Aesthetic Modernism in Early German Romanticism — (Same as 337.) The formation of the modern aesthetic paradigm through the interplay of philosophy, hermeneutics, and literary and poetic discourse among leading representatives of the period. Texts by Fichte, Hölderlin, Schelling, Hegel, Schleiermacher, H. Wackenroder, Tieck, Novalis, A. W. and F. Schlegel, and Jean Paul Richter. Readings and discussions in English; German Studies majors read primary texts in German.
3-5 units, Aut (Müller-Vollmer)

GERLIT 238. The Femme Fatale in German Literature and Cinema — Recent depictions in films by Fassbinder and novellas by Kirchhof. The classic femme fatale epitomized by Louise Brooks and Marlene Dietrich as icons in Hollywood film production. GER:DB-Hum
4 units, Win (Bach)

GERLIT 239. Identity/Memory: The Jewish Image in German Cinema — (Same as JEWISHST 235C.) Post-Cold War German cinema about Jewish contributions to German society, German resistance to the Nazis, and Jewish normalization in German. Perspectives on the socio-political position of Jews in German history. The emotional reality of the Jewish collective experience of assimilation, betrayal, displacement, and memory. Sources include dramatic, documentary, pre-WW II, and W. and E. German films. In English.
4 units, Win (Plotkin)

GERLIT 241. Deutsche Geistesgeschichte 1: German Aesthetic Thought, 1790-1872 — The seminal tradition of writing about art including the German Idealists (Kant, Schelling, Hegel, and Schiller), Romantics (Schlegel, Novalis, and Hoffmann), and Schopenhauer, Kierkegaard, and Nietzsche. In English. GER:DB-Hum
4 units, Aut (Dornbach)

GERLIT 289. History, Memory, and Cultural Discourse in Germany, Austria, and Israel — (Same as INTNLREL 103.)
5 units, Spr (Eshel)

GERLIT 298. Individual Work — Open only to German majors and to students working on special projects, including written reports for internships. Honors students use this number for the honors essay. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

GERLIT 299. Present Past: History, Fiction, Temporality — (Same as COMPLIT 321.) The crisis of temporality and aversion to traditional notions of history in late 20th-century Western culture. Sources include literary, philosophical, and historical works with focus on the cultural dislocations attending the rebellion against modernity and the difficulty of making sense of the relation between past and present as traditional values, ideologies, and utopias weaken. Readings may include Heidegger, Benjamin, Koselleck, Ricoeur, Sartre, Levi, Kafka, Agnon, Woolf, Celan, and Weiss. GER:DB-Hum
5 units, Win (Eshel, White)

GERLIT 310. Theorizing Experience — The theoretical relevance of the category of experience (Erfahrung). Key articulations including Hegel, Benjamin, Gadamer, and more recent authors. Topics such as: negativity in experience; the tension between internal and external standpoints; contrast between lived and interiorized experience; the character of aesthetic experience and its power to confront audiences with, or compensate them for, the experiential poverty brought on by modernity. In English.
4 units, Aut (Dornbach)

GERLIT 337. 1800: The Creation of Aesthetic Modernism in Early German Romanticism — (Same as 237A; see 237A.)
3-5 units, Aut (Müller-Vollmer)

GERLIT 369. Introduction to Graduate Studies: Criticism as Profession — (Same as COMPLIT 369.) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative literatures, university structures, and career paths.
5 units, Aut (Berman)

GERLIT 399. Independent Study
1-15 units, Aut, Win, Spr, Sum (Staff)

GERLIT 400. Dissertation Research — For graduate students in German working on dissertations only.
1-15 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

These courses are approved for the German major and taught at the campus indicated. Course descriptions can be found in the “Overseas Studies” section of this bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

BERLIN
GERGEN 174. Sports, Culture, and Gender in Comparative Perspective
5 units, Spr (Junghanns)

GERLIT 177A. Culture and Politics in Modern Germany
4-5 units, Aut (Kramer)

GERLIT 195. Contemporary Theater — (Same as DRAMA 101A.)
5 units, Spr (Kramer)
HISTORY

Emeriti: (Professors) Gordon A. Craig, Carl N. Degler, Peter Duus, Terence Emmons, George M. Fredrickson, Harold L. Kahn, George H. Knole, Richard W. Lyman, Mark Mancall, Peter Parret, Paul Seaver, Rixford K. Snyder, Peter Stansky, David B. Tyack, Lyman P. Van Slyke

Chair: Aron Rodrigue

Associate Professors: Kennell A. Jackson Jr., Jessica Riskin, Matthew H. Sommer, Amir Weiner, Karen E. Wigen

Assistant Professors: David R. Como, Robert Crews, James P. Daughton, Zephyr Frank, Sean Hanretta, Kathryn Miller, Priya Satia, Caroline WINTERER

Professor (Teaching): Herbert Klein

Courtesy Professors: Lawrence Friedman, Avner Greif, Gavin Wright

Senior Lecturers: Joseph J. Corn, Katherine Jolluck

Lecturer: Martin W. Lewis

Acting Assistant Professor: Margaret O’Mara

Department Office: Building 200, Room 113

Mail Code: 94305-2024

Phone: (650) 723-2651

Web Site: http://history.stanford.edu/

Courses given in History have the subject code HISTORY. For a complete list of subject codes, see Appendix.

History courses teach the foundational knowledge and skills (analytical, interpretive, writing) necessary for understanding the deep connections between past and present. History is a pragmatic discipline in which the analysis of change over time involves sifting the multiple influences and perspectives that affect the course of events, as well as evaluating critically the different forms of evidence historians exploit to make sense of them. Teaching students how to weigh these sources and convert the findings into a persuasive analysis lies at the heart of the department’s teaching. Graduates with a history major pursue careers and graduate study in law, public service, business, writing, and education. Further information on the department, its programs, and faculty can be found at http://history.stanford.edu/.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Department of History offers three pathways to the B.A. in History. The General Major emphasizes breadth of study among historical areas and periods as well as concentration in one selected field. The two Majors with Interdisciplinary Emphasis (Literature and the Arts, and History of Science and Medicine) combine the study of history with the methods and approaches of other disciplines, and involve substantial course work outside of History.

All History majors require the following:

1. Completion of a minimum of 58 units and at least twelve courses of at least 3 units each, to include:
   a) one Sources and Methods seminar
   b) two 200-level undergraduate colloquia
   c) at least one other small group course, to be chosen among the department’s undergraduate colloquia, research seminars, or Stanford Introductory Seminars.

2. All courses comprising the 58 units must be taken for a letter grade, and the student must maintain a grade point average (GPA) in History courses of 2.0 or higher.

3. At least six courses must be taken from regular faculty members of the Department of History.

4. History’s Writing in the Major requirement is satisfied by completing one of the following: a WIM-option colloquium or seminar; an Honors thesis in History; or a 15-page research paper in History written under faculty direction (HISTORY 299W). Work on the research paper must begin no later than Winter Quarter of the senior year (at least two quarters prior to graduation).

5. At least six quarters of enrollment in the major. Each candidate for the B.A. in History should declare a major by the Autumn Quarter of the third year of study (earlier, if possible).

One Directed Reading (299R) or Directed Research (299S) taken for 3-5 units and for a letter grade may be applied toward the twelve courses required for the B.A. in History. A maximum of five transfer courses may be applied toward the major. Advanced placement credits do not fulfill any major requirements.

Completion of the major requires planning. In Spring Quarter of the junior year, following consultation with faculty advisers, History majors are required to complete a departmental Degree Progress Review and submit it to the History office.

The department also strongly encourages students to acquire proficiency in foreign languages and study at one of Stanford’s overseas programs. Such studies are not only valuable in themselves; they can provide an opportunity for independent research and a foundation for honors essays and graduate study.

For information on specific History courses’ satisfaction of major requirements, refer to the Department of History course information web site at http://history-db.stanford.edu/courses/.

THE GENERAL HISTORY MAJOR

In pursuing the above requirements for all History majors, the student in the General History major is required to satisfy breadth and concentration requirements.

1. Breadth: to ensure chronological and geographical breadth, at least two courses must be completed in a premodern chronological period and in each of three geographical fields: Field I (Africa, Asia, and Middle East); Field II (the Americas); and Field III (Europe, including Western Europe, Eastern Europe, and Russia). Courses fulfilling the premodern chronological period may also count for Fields I-III.

2. Concentration: to develop some measure of expertise, students must complete four courses in one of the following fields of concentration: Africa, Asia, Eastern Europe and Russia, Europe before 1700, Europe since 1700, Jewish history, Latin America, science and technology, the United States, the Middle East, international history, Comparative Empires and Cultures; or a thematic subject treated comparatively, such as war and revolution, work, gender, family history, popular culture/high culture, and so on. The proposed concentration must be approved by the major adviser; a proposal for a thematic concentration must have the approval of both the adviser and the department’s Undergraduate Studies Committee. At least one and preferably two of these four courses should be an undergraduate colloquium or seminar.

Certain Introduction to the Humanities courses taught by History faculty in a Winter-Spring sequence count toward the General History major.

HISTORY MAJORS WITH INTERDISCIPLINARY EMPHASIS (HMIE)

These majors are designed for several types of students: students interested in other disciplines who want to focus on the historical aspects of the subject matter covered by that discipline; students in History who want to understand how interdisciplinary approaches can deepen their understanding of history; and students primarily interested in developing interdisciplinary approaches to historical scholarship by combining

SCHOOL OF HUMANITIES AND SCIENCES

410
the careful attention to evidence and context that motivates historical research with the analytic and methodological tools of science and the humanities. In pursuing the above requirements for all History majors, students in HMIE are required to complete their twelve courses for the major as follows:

**Gateway Course** (one course)—Students are required to take the appropriate gateway course for their interdisciplinary major. This introduces students to the application of particular interdisciplinary methods to the study of history. See the section on each HMIE for the gateway course appropriate to that major.

**Methodological Cluster** (three courses)—This cluster is designed to acquaint students with the ways in which interdisciplinary methods are employed in historical scholarship, both by practicing historians and by scholars in other disciplines whose work is historical. This program of study must provide methodological coherence and must be approved in advance by the student’s adviser. See the section on each HMIE for the appropriate Historical Methods courses.

**Geographic Cluster** (four courses)—History is embedded in time and place. This cluster is designed to emphasize that the purpose of studying methodology is to more fully understand the history of a particular region of the world. Students select a particular geographic region, as specified in the History major, and complete four courses in that area.

**Interdisciplinary Cluster** (four courses)—These courses, taken outside the Department of History, acquaint students with the methods and approaches of another discipline appropriate for the interdisciplinary study of history. This program of study must provide methodological coherence and must be approved in advance by the student’s adviser. See the section on each HMIE for appropriate interdisciplinary courses.

HMIE majors do not mandate the breadth or concentration requirements of the General History major. Introduction to the Humanities courses taught by History faculty may apply to HMIEs only to the extent that the content is specifically appropriate to the particular methodological or geographic cluster. Courses preapproved for the clusters in Interdisciplinary tracks are listed on the History advising web site.

**HISTORY, LITERATURE, AND THE ARTS**

The History, Literature, and the Arts major is designed for the student who wishes to complement his or her work in history with study in literature, particularly in a foreign language. For the purposes of this major, literature is defined broadly, including art, drama, films and poetry, memoirs and autobiography, novels, as well as canonical works of philosophy and political science. It appeals to students who are interested in studying literature primarily in its historical context, or who want to focus on both the art and history of a specific geographical area while also learning the language of that area.

**Gateway Course** HISTORY 239E, History, Literature, and Arts, gives students a broad introduction to the study of literary texts in history.

**Methodological Cluster** This cluster teaches students how historians, in particular, analyze literary texts as documentary sources. Students choose three courses from among the preapproved HLA Methodology curriculum; other courses must be approved by the HLA coordinator. These courses need not be in the student’s geographic concentration.

**Geographic Cluster** Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East or Africa. These four courses must be taken in addition to the three methodological courses required above.

**Interdisciplinary Cluster**—Four courses, taken outside the Department of History, must address the literature and arts, broadly defined, of the area chosen for the geographic concentration. The student’s adviser must pre-approve all courses in this cluster; these courses may not be double-counted towards a minor or major other than History.

**General Requirements**—Among the history courses taken, students must include a Sources and Methods seminar, two 200-level courses, and one other small group class. In addition, the Writing in the Major (WIM) requirement must be completed.

**HISTORY, SCIENCE, AND MEDICINE**

The History, Science, and Medicine (HS&M) major is a collaborative program of the Department of History, the Program in the History and Philosophy of Science, and the Stanford School of Medicine. The major is designed for: (1) students who wish to complement their work in science and/or pre-medical study with a History major that focuses explicitly on science and medicine; (2) students in the humanities and social sciences whose interest in science and medicine is primarily historical and contextual. This major allows students who are contemplating medical school to study the history of medicine and the medical humanities while fulfilling the pre-medical curriculum.

**Gateway Course** (1 course)—Students fulfill this requirement by taking the gateway course for HS&M that is offered annually: HISTORY 232F, The Scientific Revolution (Winter Quarter).

**Methodological Cluster** (3 courses)—These History courses focus on the history of science, technology, and medicine. Courses must be approved by the student’s adviser. The choice of courses depends on the student’s particular interests (for example, premodern science, medical history and literature, history of technology, medical anthropology).

**Geographic Cluster** (4 courses)—Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East or Africa. These four courses must be taken in addition to the three methodological cluster courses. Courses in the history of science, technology, and medicine that have a geographic focus may be used to fulfill this requirement, but cannot be double-counted in the methodological cluster.

**Interdisciplinary Cluster** (4 courses)—These courses are taken outside the Department of History. The cluster can be defined in any of four ways:

1. two medical humanities courses plus two complementary science courses
2. two courses about science (e.g., anthropology of science, sociology of science, philosophy of science) plus two complementary science courses
3. four courses in medical humanities
4. two courses in medical humanities and two about science. In all instances, the Interdisciplinary Cluster must be approved in advance by the student’s adviser.

**Medical Humanities Course in the Medical School**—Majors in the Medical Humanities track of the major in History, Science, and Medicine are expected to take at least one course in the School of Medicine.

**General Requirements**—Among the history courses taken, students must include a Sources and Methods seminar, two 200-level courses, and one other small group class. In addition, the Writing in the Major (WIM) requirement must be completed.

**MINORS**

Candidates for the minor in History must complete six courses, at least three of which must have a field or thematic focus. The department ordinarily defines fields in terms of geography or chronology, but it also invites students to pursue thematic topics that can be examined in broadly comparative terms. Students completing the minor may choose to concentrate in such fields as African, American, British, Asian, European (medieval, early modern, or modern), Russian and East European history, comparative empires and cultures, or such thematic topics as the history of gender, the family, religion, technology, or revolution. Students may also petition to have a concentration of their own design count toward the minor.

All six courses must be of at least 3 units each and must be taken for a letter grade. The student must maintain a grade point average (GPA) in History courses of 2.0 (C) or higher. Two of the six courses must be small-group in format (Stanford Introductory Seminars, Sources and Methods Seminars, departmental colloquia and research seminars). History courses taken at overseas campuses may count toward the minor, but at least three of the six courses must be taken from Stanford faculty. One History course from Introduction to the Humanities may count toward the six-course requirement, but not for the field concentration. One
Directed Reading (200R) course may count towards the minor, if taken for 3-5 units and for a letter grade. A maximum of three transfer courses may be used toward the minor. Advanced placement credits do not fulfill any minor requirements.

Students must declare the minor in History no later than the Autumn Quarter of the senior year. They do so via Axess under Declare Major/Minor. Minor declarations are then approved by the Department of History and confirmation is sent via email to the student.

HONORS PROGRAM

For a limited number of majors, the department offers a special program leading to honors in History. Students accepted for this program, in addition to fulfilling the general requirements stated above, begin work on an essay in Spring Quarter of the junior year and complete the essay by mid-May of the senior year. In addition to the Junior Honors Colloquium, 299H, students normally take 11 to 15 units of Senior Research, to be distributed as best fits their specific project. For students in the honors program, Senior Research units (299A,B,C) are taken in addition to the twelve required courses in History.

To enter this program, the student must be accepted by a member of the department who agrees to advise the research and writing of the essay, and must complete the Junior Honors Colloquium (299H). An exception to the latter requirement may be made for those studying overseas Winter Quarter of the junior year, but such students should consult with the director of the honors program, if possible, prior to going overseas. Under exceptional circumstances, students are admitted to the program in the Autumn Quarter of the senior year.

In considering an applicant for such a project, the adviser and director of the honors program take into account general preparation in the field of the project and expect a GPA of at least 3.5 (B+) in the student’s previous work in history and in the University. Students completing the thesis with a grade of ‘B+’ or higher are eligible for honors in History. To enter the honors program, apply at the Department of History office.

Outstanding honors essays may be considered for the University’s Golden Medals, as well as for departmental James Birdsall Weter prizes.

SECONDARY (HISTORY) TEACHER’S CREDENTIAL

Applicants for the Single Subject Teaching Credential (Secondary) in the social studies may obtain information regarding this program from the Credential Administrator, School of Education.

COTERMINAL B.A. AND M.A. PROGRAM

The department each year admits a limited number of undergraduates for coterminal B.A. and M.A. degrees in History. Coterminal applications are only accepted during Autumn Quarter; check with the History office for the application deadline. Applicants are responsible for checking their compliance with University coterminal requirements listed in the “Undergraduate Degrees and Programs” section of this bulletin. Applicants must meet the same general standards as those seeking admission to the M.A. program; they must submit a written statement of purpose, a transcript, GRE test scores, and three letters of recommendation, at least two of which should be from members of the Department of History faculty.

To be competitive, coterminal applicants should have a 3.75 GPA in their undergraduate history major (or equivalent if they are entering without a History major.) The decision on admission rests with the department faculty upon recommendation by the Graduate Admissions Committee. Students must meet all requirements for both degrees. They must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three courses that fall within a single Ph.D. field.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

ADMISSION

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Guide to Graduate Admission, available at Graduate Admissions, the Registrar’s Office, Old Union or at http://registrar.stanford.edu/publications.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

MASTER OF ARTS

University requirements for the M.A. degree are described in the “Graduate Degrees” section of this bulletin.

The department requires the completion of nine courses (totaling not less than 45 units) of graduate work; seven courses of this work must be Department of History courses. Of the seven, one must be a seminar and four must be either graduate colloquia or graduate seminars. Directed reading may be counted for a maximum of 10 units. A candidate whose undergraduate training in history is deemed inadequate must complete nine courses of graduate work in the department. The department does not recognize for credit toward the M.A. degree any work that has not received the grade of ‘A’ or ‘B.’

Terminal M.A. Program—Applicants who do not wish to continue beyond the M.A. degree are admitted to this program at the discretion of the faculty in individual fields (U.S., modern Europe, and so on). Students admitted may not apply to enter the Ph.D. program in History during the course of work for the M.A. degree.

M.A. in Teaching (History) The department cooperates with the School of Education in offering the Master of Arts in Teaching degree. For the general requirements, see the “School of Education” section of this bulletin. For certain additional requirements made by the Department of History, contact the department office. Candidates must possess a teaching credential or relevant teaching experience.

DOCTOR OF PHILOSOHY

Students planning to work for the doctorate in history should be familiar with the general degree requirements of the University outlined in the “Graduate Degrees” section of this bulletin. Those interested in applying for admission to the M.A. and Ph.D. programs should contact Graduate Admissions, the Registrar’s Office, Old Union, in order to receive an application. Applications become available in September of the year prior to intended enrollment. The application filing deadline is January 1. Applicants must file a report of their general scores on the Graduate Record Examination and submit a writing sample of 10-25 pages on a historical topic. Successful applicants for the M.A. and Ph.D. programs may enter only in Autumn Quarter.

Upon enrollment in the graduate program in History, the student has a member of the department designated as an adviser with whom to plan the Ph.D. program. Much of the first two years of graduate study is spent taking courses, and, from the outset, the student should be aware that the ultimate objective is not merely the completion of courses but preparation for general examinations and for writing a dissertation.

Admission to the Department of History in the graduate division does not establish any rights respecting candidacy for an advanced degree. At the end of the first year of graduate study, students are evaluated by the faculty and given a progress report. A decision as to whether she or he will be admitted to candidacy for the Ph.D. is normally made by the middle of the student’s third year.

After the completion of certain further requirements, students must apply for acceptance for candidacy for the doctorate in the graduate division of the University.
REQUIREMENTS

1. In consultation with the adviser, students select an area of study from the list below in which to concentrate their study and later take the University oral examination. The major concentrations are:
   - Europe, 300-1400
   - Europe, 1400-1789
   - Europe since 1700
   - Jewish History
   - Russia
   - Eastern Europe
   - Middle East
   - East Asia before 1600
   - East Asia since 1600
   - Japan
   - Africa
   - Britain and the British Empire since 1460
   - Latin America
   - The United States (including colonial America)
   - History of Science and Technology

2. The department seeks to provide a core colloquium in every major concentration. Students normally enroll in this colloquium during the first year of graduate study.

3. Students are required to take two research seminars, at least one in the major concentration. Normally, research seminars are taken in the first and second years.

4. Each student, in consultation with the adviser, defines a secondary concentration. This concentration should represent a total of four graduate courses or their equivalents, and it may be fulfilled by working in a historical concentration or an interdisciplinary concentration. The historical concentrations include:
   - a) One of the concentrations listed above (other than the student’s major concentration).
   - b) One of the concentrations listed below, which falls largely outside the student’s major concentration:
     - The Ancient Greek World
     - The Roman World
     - Europe, 300-1000
     - Europe, 1000-1400
     - Europe, 1400-1600
     - Europe, 1600-1789
     - Europe, 1700-1871
     - Europe since 1848
     - England, 450-1460
     - Britain and the British Empire, 1460-1714
     - Britain and the British Empire since 1714
     - Russia to 1800
     - Russia since 1800
     - Eastern Europe to 1800
     - Eastern Europe since 1800
     - Jewish History
     - Middle East to 1800
     - Middle East since 1800
     - Africa
     - China before 1600
     - China since 1600
     - Japan before 1600
     - Japan since 1600
     - Latin America to 1825
     - Latin America since 1810
     - The United States (including Colonial America) to 1865
     - The United States since 1850
     - The History of Science and Technology
   - c) Work in a national history of sufficiently long time to span chronologically two or more major concentrations. For example, a student with Europe since 1700 as a major concentration may take France from 1000 to the present as a secondary concentration.
   - d) A comparative study of a substantial subject across countries or periods. The secondary concentration requirement may also be satisfied in an interdisciplinary concentration. Students plan these concentrations in consultation with their advisers. Interdisciplinary concentrations require course work outside the Department of History which is related to the student’s training as a historian. Interdisciplinary course work can either add to a student’s technical competence or broaden his or her approach to the problems of the research concentration.

5. Each student, before conferral of the Ph.D., is required to satisfy the department’s teaching requirement.

6. There is no University or department foreign language requirement for the Ph.D. degree. A reading knowledge of one or more foreign languages is required in concentrations where appropriate. The faculty in the major concentration prescribes the necessary languages. In no concentration is a student required to take examinations in more than two foreign languages. Certification of competence in commonly taught languages (that is, French, German, Latin, Portuguese, Russian, and Spanish) for candidates seeking to fulfill the language requirement in this fashion is done by the appropriate language department of the University. Certification of competence in other languages is determined in a manner decided on by faculty in the major concentration. In either case, certification of language competence must be accomplished before a student takes the University oral examination.

7. The student is expected to take the University oral examination in the major concentration early in the third graduate year.

8. The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

JOINT PH.D. IN HISTORY AND HUMANITIES

The Department of History participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in History and Humanities. See the “Interdisciplinary Studies in Humanities” section of this bulletin.

FINANCIAL SUPPORT

Students who are admitted with financial support are provided multiple years of support through fellowships, teaching and research assistantships, and tuition grants. Applicants should indicate on the admissions application whether they wish to be considered for such support. No separate application for financial aid is required.

U.S. citizens and permanent resident aliens who are interested in area language studies in East Asia, Latin America, Africa, and the republics of the former Soviet Union may request a Foreign Language and Area Studies (FLAS) fellowship application from the FLAS coordinator, (650) 723-0564. The FLAS application deadline is in mid-January.

RESOURCES

The above section relates to formal requirements, but the success of a student’s graduate program depends in large part on the quality of the guidance received from faculty and on the library resources available. Prospective graduate applicants are advised to study the list of History faculty and the courses this faculty offers. As to library resources, no detailed statement is possible in this bulletin, but areas in which library resources are unusually strong are described following.

The University Library maintains strong general collections in almost all fields of history. It has a very large microtext collection, including, for instance, all items listed in Charles Evans’ American Bibliography, and in the Short-Title Catalogues of English publications, 1474-1700, and virtually complete microfilmed documents of the Department of State to 1906. It also has a number of valuable special collections including the Borel Collection on the History of California; many rare items on early American and early modern European history; the Brasch Collection on Sir Isaac Newton and scientific thought during his time; the Gimon Collection on French political economy, and other such materials.
COURSES

See the Time Schedule and http://history.stanford.edu/courses/ for updated information.

Note: many History courses have been renumbered this year; in such cases, the former number is noted in the course description.

Courses are listed in the following order:

Introductory Undergraduate
Undergraduate (by Area or Theme)
Graduate (by Area or Theme)
Overseas Studies Program Courses in History

INTRODUCTORY UNDERGRADUATE

Introductory undergraduate History courses are listed in the following subsection order:

Introduction to the Humanities (IHUM)
Introductory Lectures: 1-99
Stanford Introductory Seminars: 1N-99N, 1Q-99Q
Sources and Methods Seminars: 1S-99S

IHUM (INTRODUCTION TO THE HUMANITIES)

The following Introduction to the Humanities courses are taught by History faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1-IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in History are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 5A,B. Worlds of Islam: Global History and Muslim Societies

Two quarter sequence. Chronological and geographical overview of times and places in which Islam has been the dominant cultural framework. Elements of the Muslim faith and its related political, social, and cultural practices from the 7th-century rise of Islam to the recent past. Geographic range includes the historic Arab heartland of Islam, Africa, Persia, the Ottoman Empire, and Central Asia. GER: I-HUM 2-3

IHUM 5A. 5 units, Win (Beinin, Crews, Hanretta, Rodrigue)

IHUM 5B. 5 units, Spr (Beinin, Crews, Hanretta, Rodrigue)

INTRODUCTORY LECTURES

HISTORY 20. Introduction to Modern Russian History — The Soviet polity from establishment to collapse, and its successor states. Marxist ideology, the empire before the revolution, and basic questions that accompanied the Soviet experience: causations, visions, and interpretations of revolution; socialist state building; social engineering through col-
HISTORY 64. Introduction to Race and Ethnicity in the American Experience—How ethnicity influenced the American experience and how prevailing attitudes about racial and ethnic groups over time have affected the historical and contemporary reality of the nation’s major minority populations. Focus is on the past two centuries. GER:DB-SocSci, EC-AmerCul
5 units, Aut (Camarillo)

HISTORY 66. The United States and East Asia—(Formerly 75.) Political, social, military, and cultural interactions between the U.S. and the societies of E. Asia (China, Japan, Korea, Vietnam, and the Philippines) from the mid-19th century to the present. Major wars and diplomatic events, mutual perceptions, reciprocal consequences, and long-term trends generated by these events, and the circumstances that brought them about. American narrative with E. Asian perspectives. GER:DB-Hum
5 units (Chang) not given 2005-06

HISTORY 70. Culture, Politics, and Society in Latin America—(Formerly 80.) Introduction to the political and social history of Latin America. Emphasis is on interactions among institutional change, social structure, and political movements, emphasizing the environment and cultural values. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Frank)

HISTORY 92A. The Historical Roots of Modern East Asia—China and Japan before and during the transition to modernity. From the 17th century when E. Asia was populous, urbanized, economically advanced, and culturally sophisticated to the early 20th century when European and America dominated the Pacific, while China was in social and political upheaval and Japan had begun its march to empire. Films; mandatory discussions.
5 units, Spr (Miller)

HISTORY 92B. East Asia in the Age of Imperialism—For students planning to do additional work on the region. Interdisciplinary. Political, social, cultural, and economic development of E. Asia, 1840-1945. Responses to Western penetration of the region. Asian perspectives.
5 units, Aut (De Boer)

STANFORD INTRODUCTORY SEMINARS

These seminars serve as foundations for more advanced course work within the department. See http://introsems.stanford.edu/ for applications and information.

HISTORY 20N. Early Modern European Views of Eastern Europe and Russia—Stanford Introductory Seminar. Preference to freshmen. The contrast between the early modern image of Europe as free, civilized, democratic, rational, and clean against the notion of New World Indians, Turks, and Chinese as savage. The more difficult, contemporary problem regarding E. Europe and Russia which seemed both European and exotic. Readings concerning E. Europe and Russia from the Renaissance to the Enlightenment; how they construct a positive image of Europe and conversely a negative stereotype of E. Europe. GER:DB-Hum, EC-GlobalCom, WRITE-2
5 units, Spr (Kollmann)

4 units, Win (Stansky)

HISTORY 32N. The English Revolution—Stanford Introductory Seminar. Preference to freshmen. The English Civil War and the 11-year period in which it became a republic ruled not by a hereditary king but by a lord protector. During this revolutionary period, English men and women wrote about freedom and liberty in terms of the individual and the state, and of religion and society. The meaning of these writings which sketched for the first time in premodern Europe what democracy and a democratic republic might entail. GER:DB-Hum
4-5 units, Spr (Como)

4 units, Win (Schiebinger)

HISTORY 44N. The History of Women and Gender in Science—Stanford Introductory Seminar. The history of women’s participation in science; women as objects of scientific research; gender in the culture of the sciences; and how gender analysis has changed science theory and practice. GER:DB-Hum, EC-Gender
4 units, Win (Schiebinger)

HISTORY 48Q. South Africa: Contested Transitions—Stanford Introductory Seminar. Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are the historical and social roots and strategies? How do pride re-construct their society? Historical and current sources, including films, novels, and the Internet.
3 units, Win (Samoff)

HISTORY 49N. The Slave Trade—Stanford Introductory Seminar.
4 units, Win (Roberts)

4 units, Aut (Kennedy)

HISTORY 62N. The Atomic Bomb in Policy and History—Stanford Introductory Seminar. Preference to freshmen. Emphasis is on declassified files from WW II and recent interpretations. Why did the U.S. drop A-bombs on Japan? Were there viable alternatives, and, if so, why were they not pursued? What did the use of the A-bombs mean then and later? How have postwar interpreters explained, and justified or criticized, the A-bombings? Approaches from history, international relations, American studies, political science, and ethics address the underlying conceptions, the roles of evidence, the logic and models of explanation, ethical values, and cultural/social influences. GER:DB-SocSci
4-5 units, Win (Bernstein)

HISTORY 68Q. Why They Do or Do Not Hate Us: Political Islam and the New Global Economy—Stanford Introductory Seminar. GER: EC-GlobalCom
2 units, Aut (Beinin)

HISTORY 90Q. Buddhist Political and Social Theory—Stanford Introductory Seminar. Preference to sophomores. Contemporary Buddhist political theory and its historical and textual roots, emphasizing Tibetan, Thai, and Sri Lankan Buddhism. Topics: society and politics in Buddhist thought, Buddhist spiritual practice as social and political practice, sovereignty, the individual and society, Buddhist economic theory and practice, Buddhism and the state, Buddhist political and social theory in practice, differences between Vajrayana (Tibetan) and Theravada (S.E. Asian) Buddhist social theory.
4-5 units, Aut (Muncall)
SOURCES AND METHODS SEMINARS

Sources and methods seminars introduce the processes of historical investigation and interpretation by providing experience in interpreting documents, constructing a coherent story from them, interpreting their implications, and discovering how it is possible to agree on facts while disagreeing on meaning.

HISTORY 13S. Conspiracy, Confession, and Carnival: Urban Life in Late Renaissance Venice—The claim that 16th-century Venice had entered a period of decline. Changes in internal politics, foreign policies, and economic structures, and the strained relationship between the republic and the Church. Sources include ambassador’s reports, private letters, public decrees, works of art, contemporary histories, civic rituals, and records of the Inquisition. Readings in English.

5 units, Spr (Jackson)

HISTORY 19S. Sables, Shamans, Salvation, and Civilization: Changing Meanings of Siberia—Siberia in the minds and experiences of rulers, traders, explorers, entrepreneurs, academics, writers, revolutionaries, missionaries, and political and criminal exiles. The real and imagined impacts of this sparsely populated land on Russian history.

5 units, Aut (Monahan)

HISTORY 20S. The Soviet Citizen on Trial—Soviet state mechanisms for controlling its citizens emphasizing trials and quasi-judicial procedures. How courts, schools, workplaces, and Communist Party organizations took part in judging people. Sources include memoirs, autobiographies, literature, and trial. Approaches to Soviet history and possible narratives of Russia’s recent past.

5 units, Aut (Moyal)

HISTORY 31S. The Awful and Awesome Clock: The French and Time in the Nineteenth Century—French modifications in their relations to time including scientists embracing theories of evolution and relativity, politicians promising progress, and individuals entering a world of speed, efficiency, and anticipation. How the new outlooks on and organizations of time liberated and constrained people’s lives and elicited mixed feelings toward modernity. Sources include scientific and political treatises, pamphlets, memoirs, tourist guides, advertisements, and literary and artistic media.

5 units (Chapin) not given 2005-06

HISTORY 32S. European Intellectuals in Politics from the French Revolution to World War II—The roles that intellectuals played in shaping policy and political debate during the 19th and early 20th centuries. Sources include the political writings of Marx, Orwell, de Tocqueville, and Hugo, and political debates about empire, culture, and economics.

5 units, Win (Lobert)

HISTORY 34S. Art and Ideology in Modern European Culture—Art as emancipatory and oppressive, revelatory and deceptive, and ecstatic and dangerous. How modern European artists and thinkers conceived of art in relation to self, society, politics, gender, and ideology. Sources include philosophy, fiction, criticism, poetry, film, and the visual arts. Readings include Kant, Shelley, Marx, Poe, Nietzsche, Wilde, Woolf, Benjamin, Adorno, Barthes, and Nabokov.

5 units, Aut (Garretson)

HISTORY 35S. Heretics, Idolaters, and Libertines: The Religious Reformations of the Sixteenth Century—The shattering of a unified western Christendom. Sources include theological treatises, letters, plays, music, woodcuts, paintings, popular pamphlets, martyrologies, and official confessions of faith. What was the Reformation about and why was it important to its participants?

5 units, Aut (Gray)

HISTORY 46S. Photography and African History—Issues relating to the rise of photography by Africans in Africa towns and cities since the late 1880s. GER:DB-Hum, EC-GlobalCom

5 units, Aut (Jackson)

HISTORY 48S. Modern Africa through Its Cities

5 units, Spr (Petrocelli)

HISTORY 50S. California Conservatism—Often portrayed as a haven for liberalism, California also incubated strands of modern American conservatism. The rise of California conservatism. Primary sources include political tracts and bumper stickers.

5 units, Win (Herzog)

HISTORY 51S. Social Reform in Antebellum America

5 units, Spr (Frink)

HISTORY 70S. Race and Status in Colonial Latin America—What extent was race an organizing principle of colonial society? Focus is on the caste system of the 17th and 18th centuries. How racial labels were bestowed; what they implied for personal and social identity; and to what degree people acted and categorized others according to this classification system. Emphasis is on mixed-race descendents of Amerindians, Europeans, and African slaves. Sources include paintings, travelogues, Inquisition documents, and diaries. Readings are in English.

5 units, Spr (Flynn-Roller)

HISTORY 80S. Palestinian History and Historiography, 1948-2005—The efforts of Palestinian intellectuals and leaders to articulate alternative narratives of the Palestinian struggle for self-determination after 1948. Emphasis is on the interdisciplinary work of intellectuals such as Edward Said, Mahmoud Darwish, and Ghassan Kanafani. Official Palestinian positions such as those advanced by Yasser Arafat, Hanan Ashrawi, and Marwan Barghouti.

5 units, Win (Hanania)

UNDERGRADUATE

Lecture courses (100-199) are surveys of geographical regions and time periods.

Colloquia (200-299) are small-group courses on historical themes, primarily for juniors and seniors majoring in history. Admission is by consent of the instructor. Courses with a suffix ‘H’ are for honors students only.

Undergraduate research seminars (200-299) provide opportunities to research and write a paper using primary sources.

Suffixes A,B,C,D indicate a course sequence. Unless otherwise stated, earlier courses are not prerequisites to later courses, and students need not take an entire sequence. Other letter suffixes, and numbers without suffixes, denote stand-alone courses

Undergraduate courses are listed in the following subsection order:

International, Global, and Thematic: 100-109, 200-209
Europe Survey: 110A,B,C
Ancient and Medieval Europe: 111-119, 211-219
Eastern Europe, Russia, and Eurasia: 120-129, 220-229
Early Modern and Modern Europe: 130-139, 230-239
History of Science and Technology: 140-144, 240-244
Africa: 145-149, 245-249
United States Survey: 150A,B,C
United States: 151-169, 251-269
Latin America: 170-179, 270-279
Middle East: 180-184, 280-284
Jewish History: 185-189, 285-289
Asia: 190-198, 290-298
Individual Work: 299

INTERNATIONAL, GLOBAL, AND THEMATIC

HISTORY 101. Empires and Cultures in the Modern World—The formation of modern European empires and their expansion into Asia, Africa, and the Middle East. Topics: cultural encounters, military conquest, economic integration, the new imperialism, colonialism, nationalism, the mutual constitution of colonial power and forms of knowledge, and the culture and politics of the postcolonial world. Readings: historical texts, films, and novels. GER:DB-Hum, EC-GlobalCom

5 units (Beinin) not given 2005-06
HISTORY 102. The History of the International System—(Formerly 102A.) World politics and international relations from the dominance of empires and nation states at the turn of the century to the present. The influence of communism, fascism, and anti-imperialism, and the emergence of society as a factor in international relations. Questions of sovereignty versus the new world order. GER:DB-SocSci, EC-GlobalCom, WIM
5 units, Spr (Sheehan)

HISTORY 102G. History of Ancient Political Thought I: Constructing and Questioning Political Obligation—(Enroll in POLISCI 130A/330A.)
5 units, Aut (Adcock)

HISTORY 103E. History of Nuclear Weapons—(Formerly 101D; same as POLISCI 116.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci
5 units (Holloway) not given 2005-06

HISTORY 103G. The History of the Cold War—(Formerly 126; same as 307G.) From its beginnings in the post-WW II period to its end with the collapse of the Soviet Union. Documents and insights from the new Cold War historiography are applied to questions about the worldwide struggle between the Soviet Union and the U.S. GER:DB-SocSci
5 units (Naimark) not given 2005-06

HISTORY 105. History and Culture of Ancient Egypt—(Enroll in CLASSHIS 105.)
3-5 units, Spr (Manning)

5 units, Win (M.W. Lewis)

HISTORY 106B. Global Human Geography: Europe and Americas—(Same as ICA 161B, IPS 261B, INTNLREL 161B.) Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.
5 units, Win (M.W. Lewis)

HISTORY 202. International History and International Relations Theory—(Formerly 201D; same as 306E, POLISCI 316.) GER:DB-SocSci
5 units (Holloway) not given 2005-06

HISTORY 203. Sovereignty and the State—(Same as 306F.) The theory of sovereignty and the practice of states in modern European and America. Readings include classic texts and political documents.
GER:DB-Hum
5 units, Spr (Kennedy, Sheehan)

HISTORY 204E. Modernity, Revolution, and Totalitarianism—(Formerly 226; same as 307E.) Modern revolutionary and totalitarian politics. Sources include monographs on the medieval, Reformation, French Revolutionary, and Great War eras. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities. GER: DB-SocSci, EC-GlobalCom, WIM
5 units, Spr (Weiner)

HISTORY 204G. War, Culture, and Society in the Modern Age
5 units, Win (Weiner)

HISTORY 205. Historical Geography: Maps in the Early Modern World—(Formerly 202E; same as 309F.) Historians have recently generated a body of spatially attuned work, probing territorial identi-
HISTORY 217. The Woman Question in Medieval Europe

— Formerly 107. GER: DB-Hum
5 units (Miller) not given 2005-06

HISTORY 220C. 20th-Century Popular Culture in Russia

— Formerly 220A; same as 316. The religions based on the New Testament, by virtue of having an old to which to refer the new, entail a complicated relationship with Judaism. Focus is on the relationship of Christianity to Judaism and Jews under Christian rule during the formative medieval centuries. The formation of anti-Semitism as a factor both in this interaction and the self-identity of Christian communities. The connections between medieval anti-Semitism and modern forms of racism.
GER: DB-SocSci, WIM
5 units (Buc) not given 2005-06

HISTORY 221. The Woman Question in Modern Russia

— Formerly 217B. Russian radicals believed that the status of women provided the measure of freedom in a society and argued for the extension of rights to women as a basic principle of social progress. The social status and cultural representations of Russian women from the mid-19th century to the present. The arguments and actions of those who fought for women's emancipation in the 19th century, theories and policies of the Bolsheviks, and the reality of women's lives under them. How the status of women today reflects on the measure of freedom in post-Communist Russia.
GER: DB-SocSci, EC-Gender
5 units, Win (Jolluck)

HISTORY 221B. The Woman Question in Modern Russia

— Formerly 217B. Russian radicals believed that the status of women provided the measure of freedom in a society and argued for the extension of rights to women as a basic principle of social progress. The social status and cultural representations of Russian women from the mid-19th century to the present. The arguments and actions of those who fought for women's emancipation in the 19th century, theories and policies of the Bolsheviks, and the reality of women’s lives under them. How the status of women today reflects on the measure of freedom in post-Communist Russia.
GER: DB-SocSci, EC-Gender
5 units, Win (Jolluck)

HISTORY 221C. Historiography of the Soviet Union

— Formerly 321C. Major schools of interpretation of the Soviet phenomenon through works representative of a specific school, in chronological order, from the first major interpretation of the Soviet polity by Trotsky to postmodernist theories.
GER: DB-SocSci
5 units (Weiner) not given 2005-06

HISTORY 222. Honor, Law and Modernity

— How Europe evolved from medieval to modern; focus is on standards for conflict resolution emphasizing insults to honor. How attitudes towards the self and society, and the state’s relationship to individuals, changed from the 16th to 18th centuries in Europe and Russia. Traditional concepts of honor and patterns of settling disputes contrasted to early modern concepts of honor, private life, civility, and crime and punishment.
GER: DB-Hum, WIM
5 units, Win (N. Kollmann)

HISTORY 223. Art and Ideas in 19th-Century Russia

— Formerly 217D; same as 323. Why did so many artistic, intellectual, and revolutionary figures including Pushkin, Tolstoy, Dostoevsky, Mussorgsky, Tchaikovsky, and Lenin emerge from autocratic imperial Russia? How did the czarist state and society shape their work? Focus is on Russia’s cultural engagement with Europe and Asia through literature, music, painting, architecture, and political thought. Controversies in 19th-century thought and culture surrounding conservatism, Westernization, Slavophilism, socialism, nihilism, populism, revolutionary terrorism, empire, anti-Semitism, national identity, and revolutionary change.
GER: DB-Hum
5 units (Crews) not given 2005-06

HISTORY 224. Violence, Islam, and the State in Central Asia

— Formerly 220A; same as 324. The uses of violence in projects of empire and national state formation that have competed with Islamic and other political alternatives to shape modern Central Asia from the onset of the British and Russian imperial eras through the flight of the Taliban. Focus is on the shared experiences and geopolitics of the former Soviet republics and Afghanistan. Themes include colonial wars and imperial competition, state formation, mass mobilization, women’s emancipation, cultural revolution, developmentalism, anti-Soviet jihad, the Taliban movement, and contemporary Islamist, nationalist, and regionalist contests for the state.
5 units, Aut (Crews)

HISTORY 226F. Stalinism in Eastern Europe

5 units, Spr (Fidelis)

HISTORY 227. East European Women and War in the 20th Century

— Formerly 225D; same as 327. Thematic chronological approach through conflicts in the region: the Balkan Wars, WW I, WW II, and the recent wars in the former Yugoslavia. The way women in E. Europe have been involved in and affected by these wars compared to women in W. Europe in the two world wars. Women’s involvement in war as members of the military services, the backbone of underground movements, workers in war industries, mothers of soldiers, subjects and supporters of war aims and propaganda, activists in peace movements, and objects of wartime destruction, dislocation, and sexual violation.
GER: DB-SocSci, EC-Gender
5 units, Aut (Jolluck)
HISTORY 228. Circles of Hell: Poland in World War II—(Formerly 222B; same as 328.) In September 1939, Poland disappeared from the map of Europe, and the next six years brought unspeakable horrors. The experience and representation of Poland’s wartime history from the Nazi-Soviet Pact of 1939 to the aftermath of Yalta in 1945. Nazi and Soviet ideology and practice regarding the Poles and the ways Poles responded, resisted, and survived. The traditional self-characterization of Poles as innocent victims, and their involvement or complicity in the Holocaust, thus engaging in a current debate in Polish society. GER:DB-SocSci
5 units (Jolluck) not given 2005-06

HISTORY 229. Poles and Jews—(Same as 329.) Focus is on the period since WW I. The place of the Jews in interwar Poland, WW II, surviving Jews after the war, Polish memorialization of the Holocaust, the reality and mythology of Jews in the communist apparatus, the manipulation of anti-Semitism by the communist government, and post-communist movement toward reconciliation. Memory and national mythology emphasizing Polish wartime behavior and the relationship of Jews to communism. The sources and uses of stereotypes, and the state of Polish-Jewish relations today. GER:DB-Hum
5 units, Spr (Jolluck)

EARLY MODERN AND MODERN EUROPE

HISTORY 132. Martin Luther—(Enroll in RELIGST 141.)
5 units, Spr (Pitkin)

HISTORY 133A. Yorkist and Tudor England—(Formerly 141.)
GER:DB-Hum
5 units (Como) not given 2005-06

HISTORY 133B. Revolutionary England: The Stuart Age—(Formerly 142.) From the accession of King James I in 1603 to the death of Queen Anne in 1714: a brutal civil war, the execution of an anointed king, and the deposition of another. Topics include the causes and consequences of the English Revolution, the origins of Anglo-American democratic thought, the rise and decline of Puritanism, and the emergence of England as an economic and colonial power. GER:DB-Hum
5 units, Aut (Como)

HISTORY 134. The French Revolution—(Formerly 106A.) GER:DB-Hum
5 units (Baker) not given 2005-06

5 units, Aut (Robinson)

HISTORY 136B. European Thought and Culture in the 20th Century—European thinkers and intellectual movements from Freud to Foucault. GER:DB-Hum
5 units (Robinson) not given 2005-06

HISTORY 137. The Holocaust—(Same as 337.) The emergence of modern racism and radical anti-Semitism. The Nazi rise to power and the Jews. Anti-Semitic legislation in the 30s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry. GER:DB-Hum
5 units (Rodrigue) not given 2005-06

HISTORY 138. European Economic History—(Formerly 134.) Enroll in ECON 115.
5 units (Greif) not given 2005-06

HISTORY 139. Modern Britain and the Empire—(Formerly 140D.) From American Independence to the latest war in Iraq. Topics include: the rise of the modern British state and economy; imperial expansion and contraction; the formation of class, gender, and national identities; mass culture and politics; the world wars; and contemporary racial politics. Focus is on questions of decline, the fortunes and contradictions of British liberalism in an era of imperialism, and the weight of the past in contemporary Britain. GER:DB-Hum, EC-GlobalCom
5 units (Satta) not given 2005-06

HISTORY 232A. Power, Art, and Knowledge in Renaissance Italy—(Formerly 213C; same as 332A.) What were the defining features of the society that produced the idea and art of the Renaissance? The world of Leonardo, Machiavelli, and Michelangelo. The intersections of history, politics, art, and literature in the 15th and 16th centuries. The relationship between the Renaissance and the Reformation.
5 units (Findlen) not given 2005-06

HISTORY 232F. The Scientific Revolution—(Formerly 213; same as 332F) What do we know and how do we know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes and Newton, the early Royal Society, and less well-known contemporaries. Observing, collecting, experimenting, and philosophizing took on new meaning in this period. Their ramifications in relationship to the political, religious, and cultural events of early modern Europe. GER:DB-Hum, WIM
5 units, Win (Findlen)

HISTORY 232G. When Worlds Collide: The Trial of Galileo—(Formerly 216; same as 332G.) In 1633, the Italian mathematician Galileo was condemned by the Catholic Church for the heresy of believing the sun to be the center of the Universe. In 1992 the Church admitted that Galileo was right. What do these events reveal about the relationship between science and religion? Why has the Galileo affair been one of the most discussed episodes in Italian history and the history of science? Documents from Galileo’s life and trial and related literature on Renaissance Italy. Historians’ interpretations of the trial in relation to its documentation. GER:DB-Hum, WIM
5 units (Findlen) not given 2005-06

HISTORY 233F. Political Thought in Early Modern Britain—From 1500-1700. Theorists include Hobbes, Locke, Harrington, the Levellers, and lesser known writers and schools. Foundational ideas and problems underlying modern British and American political thought and life. GER:DB-Hum
5 units, Win (Como)

HISTORY 234. Paris and Politics, 1600-2006—The emergence of the modern city of lights. Paris as a mirror of French politics: top down, capital to country, center to periphery, noble to bourgeois to people. Sources include maps, art, music, essays, and memoirs. 5 units, Win (Lougee)

HISTORY 236. The Ethics of Imperialism—How the 19th century, defined by liberty, equality, progress, and universal human ideals, also witnessed Europe’s colonial expansion; how Europeans justified the acquisition of territories and colonial subjects. The ethical underpinnings of empire. Focus is on primary source material. Case study on the settlement of Australia; how European ideals justified inequality, violence, and genocide. The breakdown of liberal justifications of imperialism and shifts in support for empire. The modern human rights movement and the legacy of imperialism. The ethics of contemporary globalization and American imperialism.
5 units, Aut (Daughton)

HISTORY 236E. Cultures of Violence in Twentieth-Century Europe—(Formerly 228D; same as 336E.) Political, social, and cultural factors that made the 20th century the most violent in history; the triumph of European civilization and an age of catastrophe. The social and political uses of and intellectual and cultural responses to violence. How people witnessed, coped with, survived, and remembered violent episodes. State violence, and political, ethnic, and religious conflict. Topics include: colonialist violence, the WW I and II, the Holocaust, the Russian Revolution and Stalinism, decolonization, the IRA, and the former Yugoslavia. GER:DB-SocSci
5 units (Daughton) not given 2005-06
HISTORY 238K. Occupation, Terror, Civil War, and Ethnic Cleansing—(Same as 337J.) The Nazis’ attempt to build an empire and to unmix the peoples of Central and East Europe to facilitate German rule. Responses including resistance, settling accounts with neighbors, creating new territorial and political entities, oppression of minorities, and joining the Nazis. The irony of the flight, expulsion, and killing of millions of long-established German settlers after WWII. How the death and departure of Jews and Germans, and the establishment of Communism, set the region back culturally, economically, and morally, and hastened the take-over of cities by the peasant population.

5 units, Aut (Deak)

HISTORY 239E. History and the Arts in 19th- and 20th-Century Britain—(Formerly 204.) Novels, poetry, buildings, images, and music. The works in themselves and what they reveal about the society that produced them. GER:DB-Hum, WIM

5 units, Win (Stansky)

HISTORY 239F. Empire and Information—(Same as 339F.) How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable.

5 units, Aut (Satia)

HISTORY OF SCIENCE AND TECHNOLOGY

See also 41A,B, 45, 232F, 235, and 332G.

HISTORY 140. World History of Science: From Prehistory to the Scientific Revolution—(Formerly 135.) The earliest developments in science, the prehistoric roots of technology, the scientific revolution, and global voyaging. Theories of human origins and the oldest known tools and symbols. Achievements of the Mayans, Aztecs, and native N. Americans. Science and medicine in ancient Greece, Egypt, China, Africa, and India. Science in medieval and Renaissance Europe and the Islamic world including changing cosmologies and natural histories. Theories of scientific growth and decay; how science engages other factors such as material culture and religions. GER:DB-SocSci

5 units, Spr (Proctor)

HISTORY 141. Minds and Worlds from Aristotle to Newton to Einstein—(Formerly 106.) The technological, medical, philosophical, and scientific history of the five senses. Readings from antiquity to the present. How physiologists and philosophers have explained the functioning of the senses; how doctors have tampered with them both to help and to hinder; and how technologies including medical devices, scientific instruments, and tools of the arts have continually transformed the nature and experience of sensation. GER:DB-SocSci

1-5 units (Riskin) not given 2005-06

HISTORY 142J. Intellectual Revolutions—Intellectual change from Aristotle to Descartes to Newton; borrowings, byways, and fellow travelers. The 17th-century intellectual revolution and changes in concepts of knowing.

5 units, Spr (Pal)

HISTORY 143. The History of Twentieth-Century Physics: The Quantum Century—(Formerly 140.) The major scientific changes which characterized the 20th century. Relativity, quantum notions, and scientific fashions including nuclear and particle physics, superconductivity, and chaos. Emphasis is on corresponding changes in sociology and demography, the impact on philosophy, and the changed role of physics.

3-5 units, Aut (Riordan)

HISTORY 144. The History of Women and Gender in Science—(Formerly 134A, same as 344.) Women’s participation in science from the 17th century to the present in Europe and the U.S with comparisons around

the world. Why were 14 percent of German astronomers women in 1700, but only 6 percent today? Why are there more women biologists but few women physicists? Women scientists, cultural and scientific ideals of gender, changing structures of scientific institutions, and gender in the results of scientific research. GER:DB-SocSci, EC-Gender

5 units (Schiebinger) not given 2005-06

HISTORY 241F. Origins and History of the Scientific Fact—(Formerly 206P; same as 341F.) Gateway course for graduate students and advanced undergraduates. Focus is on the early modern emergence of notions that operate at the crux of modern science, including fact, evidence, experiment, demonstration, and objectivity. The development and transformation of these notions over the last four centuries, and the recent body of historical writing on the history of evidence, the history of objectivity, and the history of the modern fact. GER:DB-SocSci, WIM

5 units (Riskin) not given 2005-06

HISTORY 241G. History of the Senses—(Formerly 203A; same as 341G, STS 134.) Technological, medical, philosophical, and scientific history of the five senses, drawing upon readings from antiquity to the present. How physiologists and philosophers have explained the functioning of the senses; how doctors have tampered with them both to help and to hinder; and how technologies including medical devices, scientific instruments, and tools of the arts have continually transformed the nature and experience of sensation. GER:DB-SocSci

5 units (Riskin) not given 2005-06

HISTORY 241J. The Prehistory of Computers—(Formerly 204B; same as 341J.) From the automata of Hero of Alexandria in the 1st century A.D. to Charles Babbage’s Analytical and Difference Engines in the 1830s, the evolution of areas of inquiry during the emergence of modern computers. Topics: automata; other automatic machinery; calculating devices; representational scientific instruments; theories of language and logic; and the nature of human and artificial thought. GER:DB-SocSci

3-5 units (Riskin) not given 2005-06

HISTORY 242G. Medicine and Society in Early Modern Europe—The changing place of medicine in early modern culture. Modern medicine as a hybrid of thinking, seeing, knowing, and doing. What defined medicine for the early modern era; was it science, art, or a random assortment of practices; who were its practitioners.

5 units, Win (Pal)

HISTORY 243G. Tobacco and Health in World History—(Same as 343G.)

5 units, Aut (Proctor)

HISTORY 243S. Human Origins: History, Evidence, and Controversy—(Formerly 266S; same as 443A.) Research seminar. Debates and controversies include: theories of human origins; interpretations of fossils, early art, and the oldest tools; the origin and fate of the Neanderthals; evolutionary themes in literature and film; visual rhetoric and cliché in anthropological dioramas and phyletic diagrams; the significance of hunting, gathering, and grandmothering; climatological theories and neocatastrophic geologies; molecular anthropology; the impact of racial theories on human origins discourse. Previous knowledge of human evolution not required.

5 units, Win (Proctor)

HISTORY 244L. Theory and Practice of Feminism in Science—(Same as 344L.)

5 units, Spr (Schiebinger)

AFRICA

HISTORY 145A. Power and Knowledge in Early African History—From the earliest records to the early 19th century. How knowledge about the natural, social, and spiritual worlds was linked to the exercise of power; how technological innovations affected the emergence of states and other forms of social complexity; how religious beliefs and practices were used to legitimate or undermine authority; and how notions of health and healing knit together the physical and the social to give meaning to
gender and age relations. How the knowledge of the past was woven into
relations of power. GER:DB-Hum
5 units, Win (Hanretta)

HISTORY 145B. Africa in the 20th Century — (Formerly 148C.) The challenges facing Africans from when the continent fell under colonial rule until independence. Case studies of colonialism and its impact on
African men and women drawn from West, Central, and Southern Africa.
Novels, plays, polemics, and autobiographies written by Africans. GER:
DB-SocSci, EC-GlobalCom, WIM
5 units (Roberts) not given 2005-06

HISTORY 147G. African History in Novels and Film — (Formerly 147A.) The principal episodes in African history have been captured in
novels and, to a lesser extent, in film. What happens to history and
historical understanding as they undergo transformation in imaginative
literature and film? Does the African novel fairly represent history? Is
film only an imperfect vision of African past events GER:DB-Hum,
EC-GlobalCom
5 units, Spr (Jackson)

including philosophers, contemporary artists, and historians, and how
they have responded over the last half century to the world, Africa’s
trajectory, and Africans. Also, thinkers from everyday African life.
GER:DB-Hum
5 units (Jackson) not given 2005-06

HISTORY 245E. Health and Society in Africa — (Formerly 247B; same
as 347E.) The history of disease, therapeutic and diagnostic systems,
and the definition of health in precolonial, colonial, and postcolonial Africa.
The social and political histories of specific epidemics, including sleeping
sickness, influenza, TB, mental illness, and AIDS. The colonial contexts
of epidemics and the social consequences of disease. WIM
5 units, Spr (Roberts)

HISTORY 245G. Law and Colonialism in Africa — (Formerly 248D; same
as 348D.) Law in colonial Africa provides an opportunity to examine
the meanings of social, cultural, and economic change in the
anthropological, legal, and historical approaches. Court cases are a new
frontier for the social history of Africa. Topics: meanings of conflicts
over marriage, divorce, inheritance, property, and authority. GER:DB-
SocSci, WIM
4-5 units (Roberts) not given 2005-06

HISTORY 246. Successful Futures for Africa: An Inventory of the
1970s-2000s — (Same as 346.) How the world has talked and written
about Africa as a land of major crises. The discourses of Africa’s failures,
helping Africa, and choosing new development tactics. GER:DB-Hum,
EC-GlobalCom
5 units, Aut (Jackson)

HISTORY 246S. Popular Culture in Africa — (Same as 446A.) African
popular culture as a growing field for historical research. Case studies of
popular culture phenomena. Students explore a topic through primary
research. GER:DB-Hum, EC-GlobalCom, WIM
5 units (Jackson) not given 2005-06

HISTORY 247H. Intellectual and Cultural History in Modern
Africa — (Same as 447A.)
5 units (Hanretta) not given 2005-06

HISTORY 248. Islam in Africa — (Formerly 248B; same as 348.) Rela-
tionships between African Muslims and the broader Islamic tradition
over the last 1200 years. The roots of the Islamic tradition. Its adoption,
deriogenization, and elaboration by African Muslims. The interplay of
religion, politics, culture, and society, and how a tradition exercises
influence. The worldviews and lives of African Muslims, and how and
why they change. GER:DB-Hum, EC-GlobalCom, WIM
4-5 units, Aut (Hanretta)

HISTORY 248S. African Societies and Colonial States — (Same as
448A.) The encounter between African societies and European colonialism
in the colony or region of their choice. Approaches to the colonial state;
tours of primary source collections in the Hoover Institution and Green
Libraries. Students present original research findings and may continue
research for a second quarter. GER:DB-SocSci, WIM
5 units (Roberts) not given 2005-06

HISTORY 249. History Without Documents in Africa — (Same as
349.) From the earliest records to the 19th century. How knowledge
about the natural, social, and spiritual worlds was linked to the exercise
of power; how technological innovations affected the emergence of
states and other forms of social complexity; how religious beliefs and
practices were used to legitimate or undermine authority; how notions
of health and healing combined the physical and social to give meaning
to gender and age relations; and how knowledge of the past was woven
into relations of power. GER:DB-Hum
5 units, Win (Jackson)

HISTORY 249S. Reappraising Two African Nationalists — (Same as
449.) Kenyatta and Nkrumah were major African nationalist leaders of
the 1950s-1960s, of Kenya and Ghana respectively, two very important
African states. Increasingly, scholars and writers are re-evaluating their
significance, as this course will do. GER:DB-Hum
5 units, Win (Jackson)

UNITED STATES SURVEY

HISTORY 150A. Colonial and Revolutionary America — (Formerly
165A.) Survey of the origins of American society and polity in the 17th
and 18th centuries. Topics: the migration of Europeans and Africans
and the impact on native populations; the emergence of racial slavery
and of regional, provincial, Protestant cultures; and the political origins
and constitutional consequences of the American Revolution. GER:DB-
SocSci, EC-AmerCul
5 units, Aut (Rakove)

HISTORY 150B. 19th-Century America — (Formerly 165B.) Emphasis
is on the causes and consequences of the Civil War. Topics: Jacksonianism
and the market revolution, slavery and the old South, sectional conflict,
the rise and fall of Reconstruction, late 19th-century society and politics,
and the crisis of the 1890s. GER:DB-SocSci, EC-AmerCul, WIM
5 units, Win (White)

HISTORY 150C. The United States in the Twentieth Century — (For-
merly 165C.) Major political, economic, social, and diplomatic develop-
ments in the U.S. Themes: the economic and social role of government
(Progressive, New Deal, Great Society, and Reagan-Busheras); ethnic
and racial minorities in society (mass immigration at the turn of the
century and since 1965, the civil rights era of the 50s and 60s); the changing
status of women since WW II; shifting ideological bases, institutional
structures, and electoral characteristics of the political system (New Deal
and post-Vietnam); determinants of foreign policy in WW I and II, and
the Cold War. GER:DB-SocSci, EC-AmerCul
5 units (Staff) not given 2005-06

THE UNITED STATES

See also 62, 107.

HISTORY 150X. Introduction to African and African American
Studies — (Same as AFRICAAM 105.) Interdisciplinary, Central themes
in African American culture and history related to race as a definitive
American phenomenon. Possible topics: African survivals and interpre-
tations of slavery in the New World, contrasting interpretations of the
Black family, African American literature, and art. Possible readings:
Frederick Douglass, Harriet Jacobs, Booker T. Washington, W.E.B.
DuBois, Richard Wright, Maya Angelou, James Baldwin, Malcolm X,
Alice Walker, and Bell Hooks. Focus may vary each year. GER:DB-
Hum, EC-AmerCul, WIM
5 units, Aut (Carson)
HISTORY 154. 19th-Century U.S. Cultural and Intellectual History, 1790-1860.—(Formerly 151.) How Americans considered problems such as slavery, imperialism, and sectionalism. Topics include: the political legacies of revolution; biological ideas of race; the Second Great Awakening; science before Darwin; reform movements and utopianism; the rise of abolitionism and proselytization; phrenology and theories of human sexuality; and varieties of feminism. Sources include texts and images. GER:DB-Hum, EC-AmerCul
5 units, Spr (Winterer)

HISTORY 158. The United States Since 1945.—(Formerly 172A.) Focus is on foreign policy and politics with less attention to social and intellectual history. Topics include nuclear weapons in WWII, the Cold War, the Korean and Vietnam wars, Eisenhower revisionism, the Bay of Pigs and Cuban missile crisis, civil rights and the black freedom struggle, the women’s movement, the Great Society and backlash, welfare policy, conservatism and liberalization, the 60s anti-war movement, Watergate and the growth of executive power, Iran-Contra and Reagan reversionism, Silicon Valley, the Gulf War, the Clinton impeachment controversy, 2004 election, and 9/11 and Iraq war. GER:DB-SocSci, EC-AmerCul
4-5 units, Win (Bernstein)

HISTORY 158A. History of Education in the United States—(Enroll in EDUC 201.)
3-4 units, Win (Williamson)

HISTORY 159F. U.S. Urban History since 1920—(Enroll in UR-BANST 161.)
5 units, Aut (Kahan)

HISTORY 161. U.S. Women’s History, 1890s-1900s—(Formerly 173B.) The transformation of Victorian womanhood in the late 19th century, including the workforce participation of immigrant and black women, educational and professional opportunities for middle class white women, impact of wars and depression on 20th-century women’s lives, and rebirth of feminism. GER:DB-SocSci, EC-Gender
5 units, Spr (Freedman)

HISTORY 162. Introduction to Chicano/o Life and Culture—(Same as ENGLISH 172A.) Team-taught. The history and culture of Mexican Americans in the U.S. Readings include Américo Paredes, Luis Rodríguez, Tomás Rivera, and Sandra Cisneros. GER:DB-Hum, EC-AmerCul
5 units (Camarillo, Moya) not given 2005-06

HISTORY 164. American Spaces: An Introduction to Material Culture and the Built Environment—(Formerly 152; same as AM-STUD 152.) American history through the evidence of things, including spaces, buildings, and landscapes of the built environment. How to read such artifacts using methods and theories from anthropology, cultural geography, history, and other disciplines. GER:DB-Hum
5 units, Spr (Corn)

HISTORY 165. Mexican American History through Film—Focus is on the 20th century and themes such as immigration, urbanization, ethnic identity, the role of women, and the struggle for civil rights. GER: DB-Hum
4-5 units, Spr (Camarillo)

HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle—(Formerly 150B.) Focus is on political thought and protest movements after 1930. Individuals who have shaped and been shaped by modern African American struggles for freedom and justice. Sources include audiovisual materials. Research projects required for fifth unit. GER:DB-SocSci, EC-AmerCul
4-5 units, Spr (Carson)

HISTORY 166J, American Economic History—(Enroll in ECON 116.)
5 units, Spr (Wright)

HISTORY 251. Creating the American Republic—(Formerly 272; same as 352, POLISCI 321.) Concepts and developments in the late 18th-century invention of American Constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources. GER:DB-SocSci, WIM
5 units, Win (Rakove)

HISTORY 251G. Topics in Constitutional History—(Formerly 250B; same as POLISCI 222S.) Topics in the history of the American Constitution and its interpretation, including the invention of the concept of the written constitution in the Revolutionary era, the crisis of Civil War and Reconstruction, and the controversies over interpretation and the rights revolution in the 20th century. GER:DB-SocSci, EC-AmerCul
5 units (Rakove) not given 2005-06

HISTORY 252. Decision Making in International Crises; The A-Bomb, the Korean War, and the Cuban Missile Crisis—(Same as 355.) For advanced undergraduates and graduate students. Primary documents and secondary literature.
5 units, Aut (Bernstein)

HISTORY 252G. Environmental History in Urban America
5 units, Aut (Rawson)

HISTORY 253. America’s Greece, America’s Rome
5 units, Win (Winterer)

HISTORY 253E. Perspectives on American Identity—(Formerly 260A; same as AMSTUD 160.) Required for American Studies majors. Changing interpretations of American identity and Americanness. GER: DB-Hum, EC-AmerCul, WIM
5 units, Win, Spr (Corn, Gilliam)

HISTORY 253H. American Utopias
5 units, Spr (Rawson)

HISTORY 254. Popular Culture and American Nature—(Formerly 268A.) Despite John Muir, Aldo Leopold, and Rachel Carson, it is arguable that the Disney studios have had more to do with molding popular attitudes toward the natural world than politicians, ecologists, and activists. Disney as the central figure in the 20th-century American creation of nature. How Disney, the products of his studio, and other primary and secondary texts see environmentalism, science, popular culture, and their interrelationships. GER:DB-Hum, WIM
5 units, Spr (White)

HISTORY 256. U.S.-China Relations: From the Opium War to Tiananmen—(Formerly 275A; same as 356.) The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past. GER:DB-SocSci, EC-GlobalCom, WIM
5 units, Win (Chang)

HISTORY 257. The Politics and Ethics of Modern Science and Technology—(Same as 367, STS 221.) The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university. GER:DB-Hum
5 units (Bernstein) not given 2005-06

HISTORY 258. History of Sexuality in the U.S.—(Formerly 265A; same as 358.) Priority to History and Feminist Studies majors; a limited number of graduate students may be admitted. Readings on the social construction of sexuality, primarily U.S., in the 19th and 20th centuries. Topics: reproduction, sexual identities, and race and sexuality. Prerequisite: consent of instructor. GER:DB-SocSci, EC-Gender
5 units, Aut (Freedman)
HISTORY 258C. The U.S. West: 20th-Century Environmental History — Industrial development and population shifts; the growth of industries including agriculture, hydroelectric power, mining, and logging; and fast-growing Western cities.
5 units, Spr (Brock)

HISTORY 259A.B. Poverty and Homelessness in America — Students participate in an internship with the Emergency Housing Consortium, the primary agency providing shelter for homeless people in Santa Clara and San Mateo counties, while learning about homelessness and poverty through readings and discussions. Prerequisite: interview with instructor. GER:DB-SocSci
5 units (Camarillo) not given 2005-06

HISTORY 260. Race and Ethnicity in the American Metropolis: A Case Study of Los Angeles — (Formerly 257A, same as 357.) Contemporary history of ethnic and racial groups in urban America. Historical and social science literature focusing on groups in the Los Angeles area. Topics include immigration, poverty, education, demographic changes, political participation, conflict and cooperation, and cultural life in the modern, multicultural metropolis. GER:DB-SocSci, EC-AmerCul, WIM
5 units, Win (Camarillo)

HISTORY 264. California History — (Formerly 256A.) The myths and realities about California’s past, focusing on the 20th century. The origins of California’s diverse society. Social, political, economic, demographic, and cultural dimensions of the state’s history. GER:DB-SocSci
5 units (Camarillo) not given 2005-06

5 units, Spr (Chang)

HISTORY 265E. American Ecologies and Environments — The rise of environmental thought and scientific ecology in America. How they built upon each other in the 19th and 20th centuries. GER:DB-Hum
5 units, Aut (Brock)

HISTORY 267E. Cities in the North American West, 1840-1940 — (Formerly 270A.) Political, social, economic, and environmental forces shaping development of the major metropolitan areas of the Rocky Mountain and Pacific from Mexican pueblos to Gold Rush boomtowns to shipping capitals and military metropolises. Comparison with cities in other regions of the U.S. Topics include immigration and migration patterns, local politics, architecture and city planning, urban infrastructure, and relationships to the natural environment. GER:DB-SocSci
4-5 units (O’Mara) not given 2005-06

HISTORY 268. The Other Wests — GER:DB-Hum
5 units (White) not given 2005-06

HISTORY 268E. Politics and Politicians in the American West — (Formerly 271B; same as 367G.) — Elected officials from Western states including Leland Stanford, Lyndon Johnson, Barry Goldwater, and Arnold Schwarzenegger as dominant figures on the national political stage. Political biography as a tool to survey the political history of the West from the Gilded Age to the present. The social, economic, and environmental characteristics of the West that shaped the careers of these politicians, and the effect of Western political culture upon national electoral politics and policy.
5 units (O’Mara) not given 2005-06

HISTORY 268F. U.S. National Parks: History, Policy, and Context

5 units, Spr (Herzog)

HISTORY 275. Slavery in the Americas — (Formerly 282.)
5 units (Klein) not given 2005-06

HISTORY 275F. Social Change in Latin America Since 1900 — (Same as 375F, LATINAM 201/301.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar.
5 units (Klein) not given 2005-06

HISTORY 276. Modern Brazil — (Same as 376.) From independence in 1822 to the present. Social and cultural history. Literary and historical sources.
5 units, Spr (Frank)

HISTORY 276G. Demographic History of the U.S. — (Same as 376G.)
5 units, Win (Klein)

HISTORY 277G. Health, Medicine, and Society in Latin America — (Same as 377G, LATINAM 137/237.) The role played by disease, public health and medicine in Latin American societies during the 19th and 20th centuries. How changing perceptions and definitions of health and disease, gender and the body, and race and ethnicity have shaped official and popular understandings of the health of individuals, populations, and societies. GER:DB-SocSci
5 units, Win (Cueto)

HISTORY 278. Problems of Governance and Economic Growth in Mexico: From the Aztecs to NAFTA — (Same as POLISCI 248T.) Political and economic institutions of Mexico. The origins and economic consequences of authoritarianism. GER:DB-SocSci
5 units, Spr (Haber)
HISTORY 279. Latin American Development: Economy and Society, 1800-2000—(Same as 379.) The newly independent nations of Latin America began the 19th century with economies roughly equal to, or even ahead of, the U.S. and Canada. What explains the economic gap that developed since 1900? Why are some Latin American nations rich and others poor? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice. GER:DB-SocSci, EC-GlobalCom, WIM
5 units, Aut (Frank)

MIDDLE EAST
See also 226.

HISTORY 181. Palestine Zionism and the Arab-Israeli Conflict—(Formerly 187.) From the mid-19th century to the present. Topics: Palestine under late Ottoman rule, the development of Zionism, Palestinian nationalism, the Palestine mandate, the establishment of the state of Israel, the Arab-Israeli wars, U.S. policy toward the conflict, the Camp David agreements, both Palestinian uprisings, and the Oslo Accords. Readings from a range of viewpoints.
5 units, Aut (Beinin)

HISTORY 281. Economic and Social History of the Modern Middle East—(Formerly 286; same as 381.) The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market are combined with possible case studies of Egypt, Iraq, and Palestine.
5 units, Win (Beinin)

HISTORY 283. The New Global Economy, Oil, and Islamic Movements in the Middle East—(Formerly 286A; same as 383.) The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market; case studies of Egypt, Iraq, and Palestine. GER:DB-SocSci, EC-GlobalCom, WIM
5 units (Beinin) not given 2005-06

HISTORY 284G. Ottoman Reform in the 19th Century
5 units, Spr (Downes)

HISTORY 287S. Research Seminar on the Modern Middle East—(Same as 481.) Student-selected research topics. GER:DB-SocSci 3-5 units (Beinin) not given 2005-06

JEWS AND MUSLIMS

JEWISH HISTORY

HISTORY 185B. Jews in the Modern World—(Formerly 188C.) Possible themes: the restructuring of Jewish existence during the Enlightenment and legal emancipation at the end of the 18th century in W. Europe, the transformation of Jewish life in E. Europe under the authoritarian Russian regime, colonialism in the Sephardic world, new ideologies (Reform Judaism and Jewish nationalisms), the persistence and renewal of anti-Semitism, the destruction of European Jewry under the Nazis, new Jewish centers in the U.S., and the State of Israel. GER:DB-Hum, EC-GlobalCom
5 units, Spr (Zipperstein)

HISTORY 187. Judaism in Late Antiquity—(Enroll in RELIGST 123.)
4 units, Spr (Fonrobert)

HISTORY 286. Jews and Muslims—(Formally 285C; same as 386.) The history of Jewish communities in the lands of Islam and their relations with surrounding Muslim populations from the time of Muhammad to the 20th century. Topics: the place of Jews in Muslim societies, Jewish communal life, variation in the experience of communities in different Muslim lands, the impact of the West in the modern period, the rise of nationalisms, and the end of Jewish life in Muslim countries. GER:DB-Hum
5 units (Rodrique) not given 2005-06

ASIA

See also 92A,B

HISTORY 191. East Asia in the Early Buddhist Age—(Formerly 193.) Evolution of cities in imperial China through early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative examination of cases from European history. GER:DB-Hum, EC-GlobalCom
5 units (M.E. Lewis) not given 2005-06

HISTORY 192. China: The Early Empires—(Formerly 192B; same as 392A.) The major developments of the first unitary empires in China, the Qin and the Han; institutions and social patterns that defined imperial China as a political form and social type. Topics include geography, urbanism, the peasantry, military organization, kinship, religion, intellectual life, literary genres, and changing forms of imperial cohesion. GER:DB-Hum
5 units (M.E. Lewis) not given 2005-06

HISTORY 193. Late Imperial China—(Formerly 192B; same as 392B.) An introduction to the form and function of imperial China, from the Tang-Song transition until the collapse of imperial order. The rise of absolutism and gentry society, and concomitant shifts in culture, gender relations, and the economy. The threat of steppe nomadism which produced the Mongol and Manchu conquest dynasties. The last imperial dynasty, the Qing, which solved traditional problems but was confronted by new ones. How simultaneous disasters of internal rebellion and Western imperialist invasion destroyed the old order. GER:DB-Hum
5 units, Spr (Sawada)

HISTORY 194B. Japan in the Age of the Samurai—(From the Warring States Period to the Meiji Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community. GER:DB-Hum, EC-GlobalCom
5 units, Win (Wigen)

HISTORY 195. Introduction to Korean History and Culture—(Formerly 194D.) Japanese history from 1840 to the present. Topics include archiological records, philosophical and religious traditions, literature and the performing arts, international relations, socioeconomic change, immigration and Asian American experiences, gender issues, and popular youth cultures. GER:DB-Hum, EC-GlobalCom
5 units (Wigen) not given 2005-06

HISTORY 195C. The Rise of Modern Japan—(Formerly 194D.) The nature of borders and border conflicts in N.E. Asia from the 17th to the early 20th century. Focus is on contact zones between China, Russia, Korea, and Japan. The geopolitical imperatives that drove states to map their terrain in variable ways. Cultural, diplomatic, and imperial contexts. European pressures and contributions to E. Asian cartography; the uses of maps in surveillance, diplomacy, identity, and war. Student projects focus on a contested border zone. GER:DB-SocSci
5 units, Aut (Wigen)

HISTORY 291E. Maps, Borders, and Conflict in East Asia—(Same as 391E.) The nature of borders and border conflicts in N.E. Asia from the 17th to the early 20th century. Focus is on contact zones between China, Russia, Korea, and Japan. The geopolitical imperatives that drove states to map their terrain in variable ways. Cultural, diplomatic, and imperial contexts. European pressures and contributions to E. Asian cartography; the uses of maps in surveillance, diplomacy, identity, and war. Student projects focus on a contested border zone. GER:DB-SocSci
5 units, Aut (Wigen)
HISTORY 293. Law and Society in Late Imperial China — (Formerly 296B; same as 392B.) Connections between legal and social history. Ideology and practice, center and periphery, and state-society tensions and interactions. Readings introduce the work of major historians on concepts and problems in Ming-Qing history. GER:DB-Hum, EC-GlobalCom
5 units, Aut (Sommer)

HISTORY 293A. Tokyo: From Castle Town to Megalopolis — (Same as 393A.) The transformation of Edo, one of the world’s largest early modern cities, into Tokyo, one of the contemporary world’s largest conurbations. Topics include: the founding of Edo; the early modern built environment; the Meiji Restoration; urban social structure and residential patterns; popular culture; the 1923 earthquake; and wartime destruction and postwar reconstruction. GER:DB-Hum
5 units (Duus) not given 2005-06

HISTORY 293J. Korean History and Culture through Film — Focus is on S. Korea in the postcolonial era, 1945-present, including seminal political events, family/communal structures, educational institutions, gender norms, socioeconomic and cultural change. Analytical approaches include aesthetics, formalist readings of cinematic and literary texts, and media/cultural studies approaches that underscore political-economic issues of representation. Films and videos have English subtitles; readings in English translation.
5 units, Spr (Sawada)

HISTORY 295F. Modern China — (Same as 391B.)
4-5 units, Spr (Henirot)

HISTORY 295J. Chinese Women’s History — (Formerly 296A; same as 395J.) The lives of women in the last 1,000 years of Chinese history. Focus is on theoretical questions fundamental to women’s studies. How has the category of woman been shaped by culture and history? How has gender performance interacted with bodily disciplines and constraints such as medical, reproductive, and cosmetic technologies? How relevant is the experience of Western women to women elsewhere? By what standards should liberation be defined? Readings include primary sources in translation including fiction, memoirs, and oral histories of the Maoist era. GER:DB-Hum, EC-Gender
5 units, Spr (Sommer)

HISTORY 297. Contemporary Chinese Foreign Relations — (Same as 397, POLISCI 348S.)
5 units, Spr (Sommer)

HISTORY 297E. Meiji Culture — (Formerly 295A; same as 397E.) The political and social culture of Japan in the wake of the Meiji Restoration. Topics include the ideology of civilization and enlightenment; political dissent and social criticism; the success ethic and the new middle class; capitalism and the new business culture; urbanization and the working class; gender ideology and the family; war and militarism in popular culture; and conservatism and racial ideology. Readings from historical sources in translation including literary works. GER:DB-Hum
5 units, Win (Duus)

HISTORY 297F. Japan Since 1945 — Social, political, and cultural developments in Japan during and after the economic miracle of the 50s and 60s. Topics include: the dynamics of economic growth; transformation of rural society; growth of the new urban middle class; changing gender roles and attitudes; youth and popular culture; new religions; and cultural nationalism. GER:DB-SocSci
5 units, Win (Duus)

HISTORY 298A. Modernizing Women in Japan — (Formerly 297A; same as 398A.) Women as objects and agents of experiments in social change in the modern world. Focus is on issues raised by modernizing Japanese women from the late 19th- to the 20th-centuries. Sources include film, fiction, journalism, essays, diaries, and secondary works. Research paper using primary sources. Recommended: coursework on Japan or gender. GER:DB-Hum, EC-Gender, WIM
5 units (Wigen) not given 2005-06

HISTORY 298B. The Great East Asia War — GER:DB-SocSci
5 units (Duus) not given 2005-06

INDIVIDUAL WORK

HISTORY 299A. Senior Research I — (Formerly 200A.) WIM
1-5 units, Aut, Win, Spr (Staff)

HISTORY 299B. Senior Research II — (Formerly 200B.) WIM
1-5 units, Aut, Win, Spr (Staff)

HISTORY 299C. Senior Research III — (Formerly 200C.) WIM
1-5 units, Aut, Win, Spr (Staff)

HISTORY 299H. Junior Honors Colloquium — (Formerly 200H.)
5 units, Win (Winterer)

HISTORY 299M. Undergraduate Directed Research: Martin Luther King, Jr., Papers Project
1-4 units, Aut, Win (Carson)

HISTORY 299R. Undergraduate Directed Reading
1-5 units, Aut, Win, Spr (Staff)

HISTORY 299S. Undergraduate Directed Research and Writing— (Formerly 200X.) WIM
1-5 units, Aut, Win (Staff)

HISTORY 299W. Undergraduate Directed Writing— (Formerly 200W.)
1-5 units, Aut, Win (Staff)

HISTORY 299X. Design and Methodology for International Field Research— (Formerly 206B; same as 399A.)
1 unit, Win (N. Kollmann, Roberts)
Graduate History courses are listed in the following subsection order:
Required Colloquia, Workshops, and Seminars: 300-305, 400-405
Ancient and Medieval Europe: 311-319, 411-419
Eastern Europe, Russia, and Eurasia: 320-329, 320-329
Early Modern and Modern Europe: 330-339
History of Science and Technology: 340-344, 440-444
Africa: 345-349, 445-449
United States: 351-369, 451-469
Latin America: 370-379, 470-479
Middle East: 380-384, 480-484
Jewish History: 385-389, 485-489
Asia: 390-398, 490-498
Individual Study: 399, 499

Required Colloquia, Workshops, Seminars
HISTORY 304. Approaches to History — Required of first-year History Ph.D. students.
5 units, Aut (Kahn)

HISTORY 305. Graduate Workshop in Teaching — Introduction to teaching, lecturing, and curriculum development.
1 unit, Spr (Roberts)

International, Global, and Thematic
HISTORY 306E. International History and International Relations Theory — (Same as 202, POLISCI 316.)
5 units (Holloway) not given 2005-06

HISTORY 306F. Sovereignty and the State — (Same as 203.) The theory of sovereignty and the practice of states in modern European and America. Readings include classic texts and political documents.
5 units, Spr (Kennedy, Sheehan)

HISTORY 307E. Modernity, Revolution, and Totalitarianism — (Same as 204E.)
5 units, Spr (Weiner)

HISTORY 307G. The History of the Cold War — (Same as 103G.)
5 units (Naimark) not given 2005-06

HISTORY 308. Biography and History — (Formerly 302C; same as 207.)
5 units (Zipperstein) not given 2005-06

HISTORY 309E. History Meets Geography — Focus is on developing competence in GIS computer applications and applying it to historical problems. Previous experience with GIS not required. Recommended: complete the GIS tutorial in Branner Library before the course starts.
5 units, Spr (Frank)

HISTORY 309F. Historical Geography: Maps in the Early Modern World — (Same as 205.)
5 units (Wigen) not given 2005-06

HISTORY 337C. The International System — (Same as 237C.)
5 units, Spr (Sheehan)

Ancient and Medieval Europe
HISTORY 313. Core Colloquium in Medieval European History
4-5 units (Buc) not given 2005-06

HISTORY 314. Graduate Core Colloquium in Medieval European History
4-5 units (Miller) not given 2005-06

HISTORY 316. Medieval Antisemitism — (Same as 216.)
5 units (Buc) not given 2005-06

HISTORY 318. The Medieval Mediterranean: Power and Commerce — (Same as 218.)
5 units, Spr (Goldberg)

HISTORY 411. Empire and Hellenism: Athens and Syracuse — (Formerly 403)
4-5 units (Morris) not given 2005-06

HISTORY 413A,B. Medieval History
4-5 units (Buc) not given 2005-06

HISTORY 414A,B. Medieval History
4-5 units (Miller) not given 2005-06

Eastern Europe and Russia
HISTORY 321A. Early Modern Russian Historiography
5 units (Kollmann) not given 2005-06

HISTORY 321B. Imperial Russian Historiography
5 units (Crews) not given 2005-06

HISTORY 321C. Historiography of the Soviet Union — (Same as 221C.)
5 units (Weiner) not given 2005-06

HISTORY 323. Art and Ideas in 19th-Century Russia — (Same as 223.)
5 units (Crews) not given 2005-06

HISTORY 323B. Research Methodologies in Early Modern Russian History
5 units, Aut (Kollmann)

HISTORY 324. Violence, Islam, and the State in Central Asia — (Formerly 320; same as 224.)

HISTORY 484. Ottoman/Turkish History—(Formerly 489.)
4-5 units (Rodrique) not given 2005-06

JEWISH HISTORY
HISTORY 385A. Core in Jewish History, 17th-19th Centuries—(Formerly 384A.)
4-5 units, Aut (Rodrique)

HISTORY 385B. Core in Jewish History, 20th Century—(Formerly 384B.)
4-5 units, Win (Zipperstein)

HISTORY 386. Jews and Muslims—(Formerly 385C; same as 286.)
5 units (Rodrique) not given 2005-06

4-5 units, Win (Z. Baker)

HISTORY 485A,B. Graduate Research Seminar in Jewish History
4-5 units (Zipperstein) not given 2005-06

HISTORY 486A,B. Graduate Research Seminar in Jewish History
4-5 units, A: Spr (Rodrique), B: (Zipperstein) not given 2005-06

ASIA
HISTORY 391B. Modern China—(Same as 295E.)
4-5 units, Spr (Henriot)

HISTORY 391E. Maps, Borders, and Conflict in East Asia—(Same as 291E.)
5 units, Aut (Wigen)

HISTORY 392B. Law and Society in Late Imperial China—(Formerly 396; same as 293.)
5 units, Aut (Sommer)

HISTORY 392C. Key Topics in Qing History—Graduate colloquium. Goal is to provide the foundation of a field in Qing history for Ph.D. oral examinations; M.A. students also welcome. Issues include: the ethnic dimension of Qing imperialism; the imperial state’s relationship with the peasantry; economic and demographic dynamics; and the impact of Western imperialism.
5 units, Spr (Sommer)

HISTORY 393A. Tokyo: From Castle Town to Megalopolis—(Same as 293A.)
5 units (Duus) not given 2005-06

HISTORY 394A. Directions in Asian Studies—Colloquium. Legacies and futures of Asian Studies in the U.S. at a time of crisis in area studies. Institutional issues include the root of Asian studies in the Cold War, the role of foundations, and trends in graduate training and funding; intellectual issues include the 60s leftist critique, the 80s social science critique, and competing configurations of interdisciplinary research in cultural and ethnic studies. Each student investigates one campus or foundation’s efforts to reconfigure and revitalize Asian studies.
5 units (Wigen) not given 2005-06

HISTORY 395J. Chinese Women’s History—(Same as 295J.)
5 units, Spr (Sommer)

HISTORY 395K. Sinological Research Methods
5 units, Aut (Shao)

HISTORY 396C. Nineteenth-Century Japan—(Formerly 395C.) Third in a four-part core colloquium series for graduate students. Classic and recent works that span Japan’s 19th century, contrasting those that configure the Meiji disjuncture as a revolution with those that emphasize continuities across the 1868 divide. Emphasis is on economic, social, and cultural developments. In English.
5 units, Spr (Wigen)

HISTORY 397. Contemporary Chinese Foreign Relations—(Same as 297, POLISCI 348S.)
5 units, Spr (Miller)

HISTORY 397E. Meiji Culture—(Formerly 395; same as 297E.)
5 units, Win (Duus)

HISTORY 397F. Japan Since 1945—Social, political, and cultural developments in Japan during and after the economic miracle of the 50s and 60s. Topics include: the dynamics of economic growth; transformation of rural society; growth of the new urban middle class; changing gender roles and attitudes; youth and popular culture; new religions; and cultural nationalism.
5 units, Win (Duus)

HISTORY 398. Imperialism, Colonialism, and National Identity in Modern Japan—(Same as 298.)
5 units (Duus) not given 2005-06

HISTORY 398A. Modernizing Women in Japan—(Formerly 397A; same as 298A.)
5 units (Wigen) not given 2005-06

HISTORY 398M. Historical Geography: Maps in the Early Modern World—(Formerly 302E; same as 205.)
5 units (Wigen) not given 2005-06

HISTORY 492A,B. The Family in Early China—Proseminar on conducting research.
4-5 units (M. E. Lewis) not given 2005-06

HISTORY 494. The Body in Early China
5 units, Win (M. E. Lewis)

HISTORY 495A,B. Qing Legal Documents—How to use Qing legal documents for research. Winter: sample documents that introduce the main genres including: the Qing code and commentaries; magistrates’ handbooks and published case collections; and case records from Chinese archives. Spring: class meets occasionally; students complete research papers. Prerequisite: advanced reading ability in Chinese.
4-5 units, A: Win, B: Spr (Sommer)

HISTORY 496A,B. Research Seminar on Modern China—(Formerly 497.)
5 units, Spr (Henriot)

INDIVIDUAL STUDY
HISTORY 399A,B. Design and Methodology for International Field Research—(Formerly 306B; same as 299X.)
1 unit, A: Win, B: Spr (N. Kollmann, Roberts)

HISTORY 399W. Graduate Directed Reading—(Formerly 300W.)
1-10 units, Aut, Win, Spr (Staff)

HISTORY 499X. Graduate Research—(Formerly 400X.) Units by arrangement.
1-10 units, Aut, Win, Spr (Staff)
These courses are approved for the History major and taught overseas at the campus indicated. Students should discuss with their major advisers which courses would best meet individual needs. Descriptions are in the “Overseas Studies” section of this bulletin or at the Overseas Studies office, 126 Sweet Hall.

**BEIJING**

**HISTORY 191V. The City in Imperial China**
5 units, Spr (Lewis)

**HISTORY 192V. Female Divinities in Late Imperial China**—(Same as FEMST 193E.)
5 units, Spr (Lewis)

**BERLIN**

**HISTORY 105V. Industry, Technology, and Culture, 1780-1945**—(Same as STS 120V.)
4 units, Win (Campani)

**HISTORY 229V. Architecture and the City, 1871-1990: Berlin as a Nucleus of Modernity**—(Same as ARTHIST 110Y, STS 119V, URBANST 143U.)
4 units, Spr (Neckenig)

**FLORENCE**

**HISTORY 106V. Italy: from an Agrarian to a Postindustrial Society**—(Same as POLISCI 145P.)
4 units, Aut (Mammarella)

**HISTORY 235V. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema**—(Same as ITALGEN 191F, ARTHIST 160Y, COMM 53.)
5 units, Win (Campani)

**OXFORD**

**HISTORY 138V. The European City**
5 units, Spr (Tyack)

**HISTORY 141V. European Imperialism and the Third World, 1870-1970**—(Same as POLISCI 148P.)
5 units, Spr (Darwin)

**HISTORY 239V. Britain in the Era of the Two World Wars**
5 units, Win (Tyack)

**HISTORY 244V. Art and Society in Britain**—(Same as ARTHIST 221Y.)
5 units, Aut (Tyack)

---

**PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY**

Co-chairs: Michael Friedman (Philosophy), Paula Findlen (History)
Committee-in-Charge: Barton Bernstein (History), Joe Corn (History), Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History)

Program Committee: Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Londa Schiebinger (History)

Professors: Keith Baker (History), Barton Bernstein (History), Paula Findlen (History), Michael Friedman (Philosophy), David Holloway (History, Institute for International Studies, Political Science), Reviel Netz (Classics), Robert Proctor (History), Londa Schiebinger (History, Institute for Research on Women and Gender), Richard White (History)

Associate Professors: Jessica Riskin (History)
Assistant Professors: Sarah Jain (Cultural and Social Anthropology)
Senior Lecturer: Joseph Corn (History)
Lecturers: Carol Pal (History), Michael Riordan (SLAC), Tom Ryckman (Philosophy)

Other Affiliation: Henry Lowood (Stanford University Libraries), Audrey Shafer (Anesthesiology), Larry Zaroff (Anesthesiology)

Mail Code: 94305-2024
Email: trogers@stanford.edu
Web Site: http://HPST.stanford.edu

The Program in History and Philosophy of Science and Technology (HPST) is an interdisciplinary program focusing on the historical and contemporary aspects of science, medicine, and technology. It offers graduate degrees at the doctoral level through the departments of History and Philosophy, as well as at the master’s level through a variety of affiliated department and programs, principally Classics, Cultural and Social Anthropology, English, and Modern Thought and Literature. In addition, graduate students in such affiliated departments and programs may participate in the HPST program by taking selected courses (see below).

Its courses span the period from antiquity to the late 20th century, with special emphasis on ancient and Islamic science; Renaissance science; the scientific revolution; history of medicine and the body; history and philosophy of biology; history and philosophy of modern physics; history of the philosophy of science in the modern period; history of computers and information sciences; and gender, science, and technology. These courses are designed both for students looking for a humanistic perspective on the sciences and for students trying to understand the relationship of the sciences to humanistic knowledge.

Stanford has unique resources for the history and philosophy of science. Situated in the heart of Silicon Valley at an institution with a long and distinguished tradition in many sciences, the University is surrounded by archives for the recent history of science and technology. Stanford University Libraries has rich holdings in Special Collections for the Scientific Revolution, as well as modern and contemporary study of science and technology. The University is in close proximity to some of the most interesting public science museums in the country: the California Academy of Sciences, the Exploratorium, the Computer History Museum, and the Tech Museum. Graduate students can take advantage of faculty, classes, and archives at UC Berkeley through Stanford’s exchange program. The core of the community is the colloquium series which brings together faculty and students several times a quarter to discuss the work of invited speakers on topics of broad concerns to science and technology studies.
UNDERGRADUATE DEGREES

Students who wish to pursue the history and philosophy of science and technology should major in the Department of History, which offers an interdisciplinary major in History and Science, in the Department of Philosophy, which offers a specific degree in History and Philosophy of Science, or in the Program in Human Biology, which offers a concentration in history of science and medicine. A concentration in the anthropology of science or in ancient science can be arranged with the departments of Cultural and Social Anthropology and Classics respectively. Alternatively, students may consult with a member of the Committee-in-Charge to construct an individually designed major. The major must conform to the requirements for Individually Designed Majors (see the “Individually Designed Majors” section of the bulletin).

GRADUATE DEGREES

Students can pursue a Ph.D. in HPST through the departments of History and Philosophy. Students can pursue an M.A. in HPST through any of the participating departments and programs. Students completing the requirements of the HPST program for the M.A. or Ph.D. (including appropriate dissertation work) graduate with a diploma stating their concentration in HPST. In addition, students may also participate in the HPST program on a non-degree basis. The degree and program requirements are as follows:

All students participating in the program are required to attend the HPST colloquium series and are expected to present their own research at least once in the course of their studies at Stanford. The colloquium series meets four times per quarter as a one-unit course.

All students participating in the program take the HPST core graduate seminar (a one quarter, 6-unit course). This course is offered every other year, crosslisted in HPST, History, and Philosophy, and is team-taught by two faculty as an introduction to historical and philosophical perspectives on science and technology. In alternate years, both History and Philosophy offer their departmental core seminars in history or philosophy of science and technology respectively.

The core seminars are designated each year by the HPST program committee.

In addition to the HPST colloquium series, all doctoral students in HPST complete a four-course sequence:

1. HPST core seminar
2. Department core seminar in History or Philosophy
3. One elective seminar in history of science and/or technology
4. One elective seminar in philosophy of science and/or technology

In addition to participating in the HPST colloquium series, all master’s students in HPST are required to complete a three-course sequence:

1. HPST core seminar (or department core in alternate years)
2. One elective in history of science
3. One elective in philosophy of science

In addition to participating in the HPST colloquium series, all students in other programs participating in HPST are required to complete a two-course sequence:

1. HPST core seminar
2. One elective seminar in history or philosophy of science

Electives, in all cases, are to be selected from a list approved each year by the HPST program committee.

COURSES

INTRODUCTORY

HPS 60. Introduction to Philosophy of Science — (Same as PHIL 60) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:DB-Hum
   5 units, Spr (Longino)

HPS 61. Philosophy and the Scientific Revolution — (Same as PHIL 61) The relationship between the scientific revolution of the 17th century that resulted in the birth of modern science and the contemporaneous intellectual developments constituting the birth of modern philosophy. Readings focus on Galileo and Descartes. GER:DB-Hum
   5 units, Aut (Friedman)

HPS 62. World History of Science: From Prehistory to the Scientific Revolution — (Enroll in HISTORY 140.)
   5 units, Spr (Proctor)

HPS 62N. Values and Objectivity — (Enroll in PHIL 16N.)
   3 units, Win (Ryckman)

HPS 63N. Freedom, Community, and Morality — (Enroll in PHIL 15N.) Stanford Introductory Seminar.
   3 units, Win (Friedman)

HPS 65N. The History of Women and Gender in Science — (Enroll in HISTORY 44N.) Stanford Introductory Seminar.
   5 units, Win (Schiebinger)

   3-4 units, Spr (Netz)

SCIENCE IN HISTORY

This sequence is designed to introduce students to fundamental aspects of the history of science from antiquity to the 20th century. Students concentrating in the history of science are advised to take most or all of this sequence as a core foundation.

HPS 102. The Scientific Revolution — (Enroll in HISTORY 232F/332F.)
   5 units, Win (Findlen)

HPS 104. The History of Twentieth-Century Physics: The Quantum Century — (Enroll in HISTORY 143.)
   3-5 units, Aut (Riordan)

HPS 105. Origins and History of the Scientific Fact — (Enroll in HISTORY 241F/341F.)
   5 units (Riskin) not given 2005-06

HPS 106. The Greek Invention of Harmony and Proportion — (Enroll in CLASSGEN 137.)
   3-4 units, Spr (Netz)

HPS 107. Intellectual Revolutions — (Same as HISTORY 142J.)
   5 units, Spr (Pal)

HPS 108. Darwin in the History of Life — (Enroll in HISTORY 45.)
   5 units, Aut (Proctor)

MEDICINE IN HISTORY

This sequence is designed to introduce students to fundamental aspects of the history of medicine from antiquity to the 20th century. Students concentrating in the history of medicine are advised to take most or all of this sequence as a core foundation.

HPS 122. The Rise of Scientific Medicine — (Enroll in HISTORY 41B/343.)
   4-5 units (Lenoir) not given 2005-06

HPS 123. Ancient Medicine — (Enroll in CLASSGEN 139.)
   3-4 units, Win (Netz)

HPS 124. Tobacco and Health in World History — (Enroll in HISTORY 243G/343G.)
   5 units, Aut (Proctor)

HPS 125. Medicine and Society in Early Modern Europe — (Enroll in HISTORY 242G.)
   5 units, Win (Pal)
PHILOSOPHICAL PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY

This sequence is designed to introduce students to fundamental aspects of the philosophy of science. Students concentrating in the philosophy of science are advised to take HPS 60 above as a starting point, and combine a number of the electives listed below in conjunction with courses in the other concentrations that address their specific interests.

HPS 140. Popper, Kuhn, and Lakatos—(Enroll in EDUC 214, PHIL 156.)
   3 units, Spr (Phillips)

HPS 141. Philosophical Applications of Cognitive Science—(Enroll in PHIL 189.)
   4 units (Staff) not given 2005-06

HPS 142. Central Topics in the Philosophy of Science: Theory and Evidence—(Enroll in PHIL 164/264.)
   4 units, Win (Ryckman)

HPS 143. Philosophy of Physics—(Enroll in PHIL 165/265.)
   4 units, Spr (Ryckman)

HPS 144. Philosophy of Biology—(Enroll in PHIL 167A.)
   4 units (Staff) not given 2005-06

HPS 145. Philosophy, Biology, and Behavior—(Enroll in PHIL 167B/267B.)
   4 units, Win (Longino)

HPS 146A. Plato’s Ontology and Mathematics—(Enroll in PHIL 107/207.)
   3 units (Moravcsik) not given 2005-06

HPS 147. Kant’s Philosophy of Physical Science—(Enroll in PHIL 224.)
   4 units, Aut (Friedman)

HPS 148. Seminar in Philosophy of Science: Structural Realism—(Enroll in PHIL 365.)
   4 units (Ryckman) not given 2005-06

HPS 150. Core Seminar in Philosophy of Science—(Enroll in PHIL 360.)
   4 units (Friedman, Ryckman) alternate years, given 2006-07

ADVANCED

HISTORICAL PERSPECTIVES ON SCIENCE

The following classes focus on specific episodes in or approaches to the history of science.

HPS 151. History of the Senses—(Enroll in HISTORY 241G/341G, STS 134.)
   5 units (Riskin) not given 2005-06

   5 units, Win (Findlen)

HPS 154. When Worlds Collide: The Trial of Galileo—(Enroll in HISTORY 232G/332G.)
   5 units, Win (Findlen)

HPS 155. The Prehistory of Computers—(Enroll in HISTORY 241J/341J.)
   3-5 units (Riskin) not given 2005-06

   5 units, Win (Proctor)

CONTEMPORARY PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY

The following classes focus on contemporary cultural and social science approaches to science, technology, and medicine.

HPS 159. Theory and Practice of Feminism in Science—(Enroll in HISTORY 244/344L.)
   5 units, Spr (Schiebinger)

HPS 163. History of Computer Game Design: Technology, Culture, and Business—(Enroll in STS 145.)
   4 units (Lowood) not given 2005-06

HPS 164. Science, Technology, and Gender—(Enroll in CASA 132.)
   3-5 units (Jain) not given 2005-06

HPS 166. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S.—(Enroll in FRENGEN 258E.)
   3-5 units, Spr (Dupuy)

HPS 167. Health Care as Seen Through Medical History, Literature, and the Arts—(Enroll in HUMBIO 175.)
   4 units, Aut (Zaroff)

HPS 196. Minds and Worlds from Aristotle to Newton to Einstein—(Enroll in HISTORY 141.)
   1-5 units (Riskin) not given 2005-06

OVERSEAS STUDIES

Descriptions of these courses are in the “Overseas Studies” section of this bulletin or at the Overseas Studies office, 126 Sweet Hall. Students overseas are encouraged to participate in a wide range of internships and independent research as well.

BEIJING

HPS 105V. History of Science and Technology in China—(Same as STS 127V.)
   4 units, Spr (Ren)

FLORENCE

HPS 43V. Eating and Eating Disorders in the Context of History and Culture
   4 units, Spr (R. Casper)

HPS 44V. Medicine and Art in the Renaissance
   4 units, Win (R. Casper)

HPS 104V. In the Footsteps of Freud in Florence
   4 units, Aut (Pallanti)
PROGRAM IN HUMAN BIOLOGY

Emeriti: (Professors) Clifford Barnett (Anthropological Sciences), Luigi Cavalli-Sforza (Genetics), Carl Djerassi (Chemistry), Sanford Dornbusch (Sociology), Albert H. Hastorf (Psychology), Herant Katchadourian (Human Biology), Donald Kennedy (Biological Sciences), Carol Winograd (Medicine)

Director: Jeffrey Wine (Psychology)

Associate Director: Shirley Feldman (Psychiatry)

Professors: William H. Durham (Anthropological Sciences), Russell D. Fernald (Biological Sciences), James Ferrell (Molecular Pharmacology), Margaret Fuller (Developmental Biology), Larry Gould (Economics), H. Craig Heller (Biological Sciences), Dale Kaiser (Biochemistry), Richard Klein (Anthropological Sciences), Michael Marmor (Ophthalmology), Gordon Matheson (Orthopedic Surgery), Roeland Nusse, (Developmental Biology), Robert Sapolsky (Biological Sciences), Stephen H. Schneider (Biological Sciences), Matthew Scott, (Developmental Biology), Marcia L. Stefanick (Medicine), Shripad Tuljapurkar (Biological Sciences), Brian Wandell (Psychology), Irving Weissman (Pathology), Arthur B. Wolf (Anthropological Sciences)

Associate Professors: Anne Fernald (Psychology), Paul Fisher (Neurology and Neurological Sciences), James Fox (Anthropological Sciences), Deborah Gordon (Biological Sciences), David Katzenstein, (Medicine), David Lyons (Psychiatry), John Rick (Anthropological Sciences), Debra Satz (Philosophy), William Talbot (Developmental Biology)

Assistant Professors: Ronald Barrett (Anthropological Sciences), Rebecca Bird (Anthropological Sciences), Melissa Brown (Anthropological Sciences), Christopher Gardner (Medicine), Jamie Jones (Anthropological Sciences), Joanna Mountain (Anthropological Sciences)

Professors (Teaching): Carol Boggs (Biological Sciences), Ellen Porzig (Developmental Biology, Molecular Pharmacology)

Associate Professors (Teaching): Donald Barr (Sociology, Human Biology), Catherine Heaney (Psychology, Human Biology), David Magnus (Medicine), Robert Siegel (Microbiology and Immunology)

Other Teaching Faculty and Staff: William Abrams, Wesley F. Alles (Medicine), Douglas Bird (Anthropological Sciences), Nancy Brown (Education), Judy Chu (Education), Gerda Endemann (Biological Sciences), Anne Firth-Murray, Anne Friedlander, Daniel Garza (Orthopedic Surgery), Geoffreay Heller, Renu Heller, Judy Illes (Medicine), Philip Lee, Armin Rosenzweig, Lynn Rothschild, Merritt Ruhlen (Anthropological Sciences), Christopher Scott (Pediatrics), Darvin Scott Smith, Larry Zaroff

Course Associates: Leila Ben-Youssef, Elizabeth Brannan, Julia Carnevale, Eli Carrillo, Jamie Funamura, Victoria Parikh, Alicia Sheen, Alison Silvis

Student Advisers: Sarah Baker, David Berg, Laura Billadello, Alice Chow, Kimberly Komatsubara, Avni Patel

Advising Chairs: Carol Boggs, Robert Siegel

Honors Chair: Shirley Feldman

Program Offices: Building 80

Mail Code: 94305-2160

Phone: (650) 725-0336

Email: cacciari@stanford.edu (Student Services)

Web Site: http://humbio.stanford.edu/

Courses given in Program in Human Biology have the subject code HUMBIO. For a complete list of subject codes, see Appendix.

The Program in Human Biology is an interschool, interdepartmental, undergraduate major. The program’s mission is to provide an interdisciplinary approach to understanding the human being from biological, behavioral, social, and cultural perspectives.

The program seeks: (a) to provide a broad and rigorous introduction to the biological and behavioral sciences and their interrelationships, and (b) to explore how this knowledge, in conjunction with studies in other fields, can be applied to analyze and formulate health, environmental, and other public policies that influence human welfare.

To achieve these goals, all students complete a 30-unit core sequence, normally in the sophomore year, that provides the foundation for the major. Also during the sophomore year, students consult with student advisers to choose a faculty adviser and complete the declaration process. Together they plan a roadmap of course work designed to help each student focus on an area of interest within Human Biology. Early planning and subsequent refining of an individualized course of study, in consultation with student and faculty advisers, is a strength and requirement of the program.

The curriculum draws on faculty from across the University. To complete a B.A. in Human Biology, students must take courses from within the program and from other University departments. Most Human Biology majors go on to advanced training in professional schools, or graduate programs in the behavioral, natural, and social sciences, including coterminal master’s degree programs in other University departments. Additional information about the major may be obtained from the program’s offices or at http://humbio.stanford.edu/.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The B.A. in Human Biology (HUMBIO) requires a minimum of 84 units in the major divided between four levels of courses:

1. Fundamental Program: at least 38 units, to include

   Human Biology Core (30 units)

   Statistics (4-5 units)

   Internship (HUMBIO 197: 4 units)

The Human Biology Core refers to HUMBIO 2A and 2B, 3A and 3B, and 4A and 4B. See “Required Courses” below for more information. HUMBIO 3B fulfills the policy requirement of the major.

Statistics may be selected from courses such as STAT 20 or 141, PSYCH 10, ECON 102A, EDUC 160, and BIOSCI 141. For questions about other statistics courses that might fulfill this requirement, see the program office.

The core and statistics courses must be taken for a letter grade by majors.

The internship requirement, an independent field experience project, is graded satisfactorily/no credit only.

2. Foundation Courses: 20-unit minimum. Total units vary, depending on the focus of study selected by the student for the area of concentration. They may include introductory-level courses from across the University and lab courses. A maximum of 10 premed units (from the chemistry, physics, and calculus series, and biology lab courses) are allowed.

3. Area of Concentration: a minimum of five courses totaling at least 20 units. This in-depth area of study enables the student to focus on educational and post-baccalaureate goals. Courses must be numbered 100 to 189. Three or more departments must be represented in the concentration. Each course must be taken for a minimum of 3 units. Final approval of the concentration rests with the student advisers and faculty adviser. All area of concentration courses must be taken for a letter grade. Examples of numerous possible areas of concentration are available in the program’s student advisers’ office.

4. Upper-Division Courses: students must take three Human Biology upper-division courses numbered 100 to 189 outside their area of concentration. Lab courses cannot be used to fulfill the upper-division requirement. One upper-division course may be taken satisfactorily/no credit. Each course must be taken for a minimum of 3 units. All non-laboratory advanced HUMBIO courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement, including those listed as “enroll in” another department.

A prospective major must consult with the student and faculty advisers to obtain detailed information about the program and guidance in the development of an individual course of study. At the time the major is declared, the student must submit a written statement (3-5 pages) of
academic and long-term goals and the proposed list of courses satisfying the requirements for the major. The proposal is then reviewed by the student advisers who help identify an appropriate faculty adviser. Final approval of the proposed course of study rests with the faculty adviser. It is important to declare early, preferably by the end of Spring Quarter of the sophomore year, but not later than the end of Autumn Quarter of the junior year; students must petition the director to declare later than Autumn Quarter of the junior year. Petitions to declare late require additional documentation and are less likely to be approved.

Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

MINORS

A minor in Human Biology provides an introductory background to the relationship between the biological and social aspects of humanity’s origin, development, and prospects. Many of the major problems facing human civilization today involve both biological and social aspects. Scientific approaches to these problems are essential, but they must be broadly conceived, integrating what we know of the biological with an understanding of the social and cultural setting in which they exist. Students with a minor in Human Biology will have a strong background in the integration between the biological and social aspects of humans.

To minor in Human Biology, students must take the core curriculum (HUMBIO 194, Honors) and one additional upper-division course (for example, any course offering by Human Biology numbered 100-189, including courses crosslisted with other departments or programs). These must be taken for a minimum letter grade of “C-”. Courses that count towards the fulfillment of major requirements may not be counted towards the minor.

Students declaring a minor in Human Biology must do so no later than two quarters prior to their intended quarter of degree conferment (for example, a student must declare a minor before the end of the Autumn Quarter to graduate the following Spring Quarter).

HONORS PROGRAM

The honors program in Human Biology affords qualified majors the opportunity to work closely with faculty on an individual research project, culminating in an honors thesis. Students may begin honors research from a number of starting points including: topics introduced in the core or upper-division courses; independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences. Students may apply to the honors program once they have completed the Human Biology core, have an overall Stanford grade point average (GPA) of 3.2, and meet other requirements detailed in the honors handbook. Interested students should consult resources in the Human Biology office including the Human Biology Honors Handbook, the honors program application available from the student services office, and appointments during office hours with the Human Biology honors chair.

Courses of interest to honors students include: HUMBIO 193, Research in Human Biology, and HUMBIO 194, Honors. Most honors projects involve a total of 10-15 units of course work in HUMBIO 193 and 194.

Admission to the honors program is by application in April of the junior year. Students planning to undertake honors begin research or preparation as early as completion of the sophomore year. The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Each honors student then presents a brief summary of honors research at the Human Biology Honors Symposium in May. Human Biology also holds a Summer Honors College just prior to Autumn Quarter each year for students who have applied to the honors program. Students apply to Summer Honors College in April of the junior year. For applications, contact the program office.

STOREY HOUSE

Storey House, 544 Lasuen Mall, is an undergraduate residence for the Human Biology Academic Theme House, devoted to developing an intellectual community among Human Biology majors at Stanford, and allowing faculty and students to become acquainted and share their Human Biology interests and research. Its goals are to foster intellectual discussion in the residential lives of the students living in Storey House, mentoring relationships between upperclassmen and core students in the house, and stimulating events for all Human Biology majors facilitated by academic theme associates. Assignment is made through the regular undergraduate housing draw.

STUDENT ADVISERS

Human Biology has an advising program comprising faculty and student advisers. Before declaring Human Biology as their undergraduate major, each student must meet with one of six student advisers who assist them in developing a coherent study plan based on an individualized area of concentration, and the selection of foundation, concentration, and upper-division courses. They also assist students in selecting an appropriate faculty adviser and a suitable internship for their area of concentration and career goals. Student advisers offer drop-in services during scheduled office hours every weekday and some evenings. The student advisers also sponsor events including the Advising Extravaganza, the Internship Faire, and Beyond Hum Bio. To maintain high standards of advising that respond to the needs of individual students, student advisers meet weekly with the program’s faculty advising chair and the student services coordinator to review the program’s policies and specific student inquiries and petitions concerning the program.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. AU indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

The faculty and staff of Human Biology prepare a student handbook, on the web at http://humbio.stanford.edu/, that provides a detailed description of the Human Biology major and outlines possible areas of concentration. It reflects the most up-to-date information for the academic year and is the definitive guide for Human Biology majors.

REQUIRED CORE

Required core sequences (2A,B, 3A,B, and 4A,B) introduce the biological and social sciences, and most importantly, relationships between the two. Classes meet throughout the academic year. Students must register concurrently for the A and B series and take the core in sequence. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are not permitted to enroll. Majors must earn a minimum letter grade of ‘C-’ in core courses.

HUMBIO 2A,B. Genetics, Evolution, and Ecology

HUMBIO 2A. Genetics, Evolution, and Ecology — Introduction to the principles of classical and modern genetics, evolutionary theory, and population biology. Topics: micro- and macro-evolution, population and molecular genetics, population dynamics, and community ecology, emphasizing the genetics of the evolutionary process and applications to human populations. GER:DB-NatSci 5 units, Aut (Durham, Boggs)

HUMBIO 2B. Culture, Evolution, and Society — Introduction to the evolutionary study of human diversity. Hominid evolution, the origins of social complexity, social theory, and the emergence of the modern world system, emphasizing the concept of culture and its influence on human differences. GER:DB-SocSci 5 units, Aut (M. Brown, Klein)
HUMBIO 3A,B. Cell Biology and Developmental Biology: Environmental and Health Policy Analysis

HUMBIO 3A. Cell and Developmental Biology — The principles of the biology of cells: principles of human developmental biology, biochemistry of energetics and metabolism, the nature of membranes and organelles, hormone action and signal transduction in normal and diseased states (diabetes, cancer, autoimmune diseases), drug discovery, immunology, and drug addiction. GER:DB-NatSci
5 units, Win (Fuller, Kaiser, Nusse, Scott, Talbot)

HUMBIO 3B. Environmental and Health Policy Analysis — The relationship of the biological sciences to public policy in resource management and conservation practices, the regulation of environmental and health risks, agricultural production, the delivery of health services, the protection of biodiversity, and global climate change. Assigned policy challenges in lectures and section meetings. Readings on actual cases. GER:DB-SocSci, WIM
5 units, Win (Gould, Barr)

HUMBIO 4A,B. The Human Organism: Biology and Culture

HUMBIO 4A. The Human Organism — Organ system physiology: the principles of neurobiology and endocrinology, and the functions of body organs. The mechanisms of control, regulation, and integration of organ systems function. GER:DB-NatSci
5 units, Spr (Heller)

HUMBIO 4B. Biology and Culture — Introduction to the research and theory on early human development. How psychobiological factors shape the developing child, and how cultural practices shape the environments of childhood and influence human cognitions, emotions, moral judgments, relationships, and social behavior from birth through adolescence. GER:DB-SocSci
5 units, Spr (Feldman)

ADDITIONAL INTRODUCTORY OFFERINGS

HUMBIO 4Y. Practicum in Child Development — Practical experience at Bing Nursery School for 3.5 hours per week. Pre- or corequisite: 4B. (AU)
1 unit, Spr (F. Feldman)

HUMBIO 6. Human Origins — (Same as ANTHSCI 6.) The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them. GER:DB-NatSci
5 units (Klein) not given 2005-06

HUMBIO 14. Introduction to Anthropological Genetics — (Same as ANTHSCI 14.) The extent and pattern of variation among human genomes, the origin of these patterns in human evolution, and the social and medical impact of recent discoveries. Topics include: the Human Genome Project; human origins; ancient DNA; genetic, behavioral, linguistic, cultural, and racial diversity; the role of disease in shaping genetic diversity; DNA forensics; genes and reproductive technology. GER:DB-NatSci
5 units (Mountain) not given 2005-06

HUMBIO 21. Introduction to Brain and Behavior — (Same as BIOSCI 20.) Evolutionary principles to understand how the brain regulates behavior, described in physiological terms, and is influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities. GER:DB-NatSci
3 units (Fernald) alternate years, given 2006-07

HUMBIO 25. Human Ecology of the Amazon — (Same as ANTHSCI 25.) The diversity of peoples and cultures in the Amazon Basin and the ecosystems in which they live. Themes in ecological anthropology of Amazonia including limiting factors, the protein debate, indigenous knowledge and resource management, and anthropogenic modification. Ethnographic, historical, and archeological evidence. GER:DB-SocSci, EC-GlobalCom
5 units (Ocampo-Raeder) not given 2005-06

HUMBIO 27. Traditional Chinese Medicine — The philosophy and history behind traditional Chinese medicine. Concepts such as Qi, Yin/Yang, meridians, Chinese organs, and the 5 elements. How these concepts are applied through techniques such as acupuncture, herbal medicine, Qi gong, and massage. How traditional Chinese medicine is understood from a scientific standpoint. Political and socioeconomic implications. Observation of an acupuncturist. Readings on the integration of Eastern and Western medicine and on traditional Chinese medicine.
1 unit, Spr (Goliana)

HUMBIO 60. Population Studies — (Enroll in BIOSCI 146.)
1 unit, Win (Feldman)

HUMBIO 61. Introduction to Philosophy of Science — (Enroll in PHIL 60, HPS 60.)
5 units, Spr (Longino)

HUMBIO 78. Medical Ethics — (Enroll in PHIL 78, ETHICSOC 78.)
4 units, Spr (Jaworska)

HUMBIO 82A. Qualitative Research Methodology — Goal is to develop knowledge and skills for designing and conducting qualitative research studies including purposes, conceptual contexts, research questions, methods, validity issues, and interactions among these facets. Each student designs a qualitative research study.
3 units, Win (J. Wolf)

HUMBIO 82B. Advanced Data Analysis in Qualitative Research — For students writing up their own qualitative research. Students prepare a complete draft presenting their own qualitative research study including results, with reports drafted section by section, week by week. Class provides feedback, guidance, support.
1-3 units, Aut (J. Wolf)

STANFORD INTRODUCTORY SEMINARS

HUMBIO 87Q. Women and Aging — Stanford Introductory Seminar. Preference to sophomores. Biology, diseases, demographics, and politics of aging; relationships and sexuality; wise woman and grandmothers; lifestyles and scientific articles, fiction, art, and film. Research paper or service-learning experience with older women. GER:EC-Gender
4 units, Win (Winograd)

HUMBIO 88Q. Neuroethics: Neurotechnology, Free Will, and the Privacy of Human Thought — Stanford Introductory Seminar. Preference to sophomores. Focus is on neurotechnology and pharmacology for imaging and manipulating the brain. Free will, moral responsibility, and the privacy of human thought. What can be done versus what should be done with pioneering neurotechnologies in research, clinical medicine, and in the public arena including education, athletics, and law.
3 units, Spr (Illes)

HUMBIO 89Q. The Eye and the Implications of Vision — Stanford Introductory Seminar. Preference to sophomores. The working of the eye and vision; comparisons to animal eyes. The role of vision in pursuits such as art, history, literature, and sports. Experience in research and presentation.
3 units, Win (Marmor)

HUMBIO 91Q. Neuroethology: The Neural Control of Behavior — Stanford Introductory Seminar. Preference to sophomores. Animal behavior offers insights about evolutionary adaptations. The origins of the study of animal behavior and its development to the present. Discussion of original research papers. The use and misuse of parallels between animal and human behavior. Possible field trip to observe animals in their natural habitat. GER:DB-NatSci
3 units, Aut (R. Fernald)
HUMBIO 92Q. International Women’s Health and Human Rights — Stanford Introductory Seminar. Preference to sophomores. Focus is on women in poorer countries. Issues include women’s status, poverty, violence, and unequal access to education, food, and health care. Maternal mortality, sexually transmitted diseases, refugee situations, traditional practices affecting women’s and girls’ health, trafficking and prostitution, and women’s roles as they age. Readings include materials from women’s organizations outside the U.S. GER:EC-Gender, WRITE-2
3 units, Aut (Murray)

3 units, Aut (G. Heller)

HUMBIO 95Q. Gender, Culture, and HIV/AIDS — Stanford Introductory Seminar. Preference to sophomores. Issues include biological, social, cultural, psychological, economic, and political aspects of HIV/AIDS. Introduction to research methods and grant-proposal writing skills. Student presentations. Prerequisite: GER:EC-Gender
4 units, Win (N. Brown)

5-4 units, Spr (Abrams)

HUMBIO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine — Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women’s issues, fitness and health, and sports science. Case studies.
3 units, Spr (Matheson)

HUMBIO 98Q. The Alien Tort Claims Act of 1789 — Stanford Introductory Seminar. Preference to sophomores. The Alien Tort Claims Act of 1789 (ATCA), the oldest American law currently in force, has been used in recent years by foreign claimants of human rights or environmental injury to sue U.S. companies in U.S. courts. International, human rights, and environmental law; civil procedure and legal history; and federalism and the constitutional separation of powers.
4 units, Aut (Rosencranz)

HUMBIO 99Q. Becoming a Doctor: Readings from Medical School, Medical Training, Medical Practice — Stanford Introductory Seminar. Preference to sophomores. For students considering medicine as a career. Goal is to acquaint students with medical school, training in medicine and surgery, and the practice of medicine and surgery. Topics include: how to pick a medical school and a residency; how medicine affects family life, especially children; the differences between surgical and medical specialties; the advantages and disadvantages among academic/teaching, pure research, group practice, HMO, hospital staff, or private practice; malpractice concerns; and financial considerations.
3 units, Aut (Zaroff)

ADVANCED
Open to non-majors with the proper prerequisites. Human Biology majors have preference when enrollment is restricted. All classes listed here fulfill the Human Biology upper-division requirement, including those that say “enroll in” another department.

HUMBIO 101. Assisted Reproductive Technologies — (Enroll in DBIO 202.)
3-4 units, Win (Porzig, Behr)

HUMBIO 102A.B. Children, Youth, and the Law — The legal rights of children and adolescents in the U.S. and how those rights are defined, protected, and enforced through the legal process within the context of the developmental needs of children and youth and competing societal interests. Topics: the origins and definitions of children’s rights; adoption; custody; the juvenile justice system (abused, neglected, and dependent children, status offenders such as runaways and truants, and minors accused of crimes); education; informed consent; health care; protection from harm and child welfare; due process; privacy, freedom of expression, and exercise of First Amendment rights. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both.
A. 5 units (Abrams) alternate years, given 2006-07
B. 5 units, Win (Abrams)

HUMBIO 103. Parasites and Pestilence: Infectious Public Health Challenges — (Same as MI 103.) Parasitic and other diseases with public health impact. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environmental, vector, hosts, and reservoirs in historical context to understand public health policy approaches to halting disease transmission. Focus is on World Health Organization tropical disease research-targeted disease entities including: river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiasis, and intestinal helminthes. Guest lecturers in disease control. Original proposal to solve a current disease.
4 units,Spr (Smith)

HUMBIO 104. Aging: From Biology to Social Policy — (Enroll in ANTHSCI 171.) What people can expect when they join the ranks of the elderly. Issues include social security, medical care, lifespan, and the cultural, social, and economic consequences of a large elderly population in the U.S. and other countries. Films, service learning component. GER:DB-SocSci
5 units, Win (Barnett)

HUMBIO 106. The Anthropology of Death and Dying — (Same as ANTHSCI 175.) Death as a biocultural process. Funerary practices and attitudes toward dying in different societies. Issues include hospice care, palliative care, and euthanasia. Instructor is an anthropologist and registered nurse with hospice experience. GER:DB-SocSci
5 units, Win (Barnett)

HUMBIO 107. Astrobiology and Space Exploration — Evolution is cast against space and time, focusing on the emergence of life, intelligence, and civilization on Earth and possibly elsewhere. Human space exploration and the biological, psychological, sociological, and philosophical issues. Integrates information from astrophysics, biochemistry, chemistry, evolutionary biology, geology, paleontology, physiology, psychology, and sociology. Taught by scientists from NASA Ames Research Center. Enrollment limited to 30. Prerequisite: one year college-level mathematics, physics, chemistry, biology, or psychology; or consent of instructor.
4 units, Win (Rothschild)

HUMBIO 108. Boys’ Psychosocial Development — From early childhood through adolescence. Emphasis is on how boys’ lives and experiences are embedded within their interpersonal relationships and social and cultural contexts. Interdisciplinary approach including perspectives from fields such as psychology, sociology, anthropology, family studies, and education. GER:EC-Gender
4 units, Spr (Chu)

HUMBIO 109. Human Behavioral Biology — (Enroll in BIOSCI 150.)
3-6 units, Spr (Sapolsky) alternate years, not given 2006-07

HUMBIO 110. Vertebrate Biology — The evolution, form, function, and behavior of the vertebrates including primitive fishes, birds, mammals, and human beings. Prerequisite: Biological Sciences or Human Biology core.
3-4 units (Porzig) not given 2005-06
HUMBIO 111. Human Physiology — (Enroll in BIOSCI 112.)
4 units, Win (Garca)

4 units, Spr (Garca)

HUMBIO 113. The Economic Individual in the Behavioral Sciences — (Same as BIOSCI 128/228.) Empirical evidence for the idea of the economic individual and its associated models in economics. How the economic individual maximizes utility and cooperates with others only when it is rational to do so. Applications of this idea to animal behavior. Readings include political philosophy, psychology, and evolutionary biology; recent research articles on empirical work in animal behavior. Student presentations.
3 units, Aut (Gordon, Satz)

HUMBIO 114. The Human Genome and Disease — (Same as BIOSCI 109/209.) The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. GER:DB-NatSci
3 units, Spr (R. Heller, Kumm)

HUMBIO 115A. Humans and Viruses — (Same as MI 115A.) Concepts in biology and the social sciences, focusing on emerging infections, viral classification, transmission and prevention, vaccination and treatment, eradication of disease, viral pathogenesis, mechanisms of virally-induced cancer, and viral evolution. Topics: molecular biology of genetic shift and drift in influenza virus, cellular tropism of HIV, developmental biology of virally-induced birth defects, clinical aspects of infantile diarrhea, social aspects of the common cold, policy issues of blood antibody tests, factors in pathogenesis and transmission of prions. Prerequisites: Human Biology core or consent of instructor.
6 units, Aut (Siegel)

HUMBIO 115B. The Vaccine Revolution — (Same as MI 115B.) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in the area of vaccine development and emerging infections. Journal club format: students select articles from primary scientific literature, write formal summaries, and synthesize it into a literature review on a specific topic. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 10. Prerequisite: 115A.
6 units (Siegel) alternate years, given 2006-07

HUMBIO 117A. Community Health: Assessment and Planning I — Major determinants of health in a community. Working with community partners to identify health issues and plan programs and policies to prevent disease and promote health. Service learning component involving students in utilizing community health assessment techniques.
3 units, Win (Heaney)

HUMBIO 117B. Community Health: Assessment and Planning II — Continuation of 117A. Service learning course with emphasis on conducting community health assessment and planning projects in collaboration with community-based organizations.
3 units, Spr (Heaney)

HUMBIO 117S. Work, Stress, and Health — How work is experienced in the U.S. and how it affects American health and quality of life. Topics include technological innovations, global competition, and demographic and social transitions.
3 units (Heaney) not given 2005-06

HUMBIO 118. Human Diversity: A Linguistic Perspective — (Same as ANTHSCI 112.) The diversity and distribution of human language and its implications for the origin and evolution of the human species. The origin of existing languages and the people who speak them. Where did current world languages come from and how can this diversity be used to study human prehistory? Evidence from related fields such as archaeology and human genetics. Topics: the origin of the Indo-European languages, the peopling of the Americas, and evidence that all human languages share a common origin.
3 units, Spr (Ruhlen)

HUMBIO 119. Conservation Biology — (Same as BIOSCI 144.) Principles and application of the science of preserving biological diversity. Topics: sources of endangerment of diversity; the Endangered Species Act; conservation concepts and techniques at the population, community, and landscape levels; reserve design and management; conflict mediation. Case studies and local field trips. 3 units if taken without field trips. Prerequisites: BIOSCI 101, or HUMBIO 2A with consent of instructor. GER:DB-NatSci
3-4 units, Win (Boggs, Launer)

HUMBIO 120. Human Nutrition — The study of food, and the nutrients and substances therein. Their action, interaction, and balance in relation to health and disease. Emphasis is on the biological, chemical, and physiological processes by which humans ingest, digest, absorb, transport, utilize, and excrete food. Dietary composition and individual choices are discussed in relationship to the food supply, and to population, cultural, race, ethnic, religious, and social economic diversity. The relationships between nutrition and disease; eating disorders; ethnic diets; vegetarianism; nutritional deficiencies; nutritional supplementation; phytochemicals; and food safety. Prerequisite: Human Biology core or consent of instructor.
3 units, Spr (Gardner)

HUMBIO 121. International Health Policy: Comparative National Health Care Systems — The structure and policies of national health care systems in Europe, N. America, and Japan. How other countries have addressed issues of organization, finance, and allocation of scarce health care resources. Limited enrollment. Prerequisites: HUMBIO 160, consent of instructor.
4 units, Win (Lee, G. Heller)

HUMBIO 122. Human Physiology — Interdisciplinary approach. Anatomy of the body's major joints in the context of exercise and movement. Emphasis is on adaptations that occur with intensity and nature of exercise, age, and disease. Histology and properties of bone, muscle, tendons, ligaments, and other connective tissue. Physiology, pathology, and biomechanics.
4 units, Win (Garca)

HUMBIO 123. Adolescent Sexuality — Developmental perspective. Issues related to scientific, historical, and cultural perceptions; social influences on sexual development; sexual risk; and the limitations and future directions of research. Sexual identity and behavior, sexually transmitted diseases including HIV, pregnancy, abortion, gay and lesbian youth, sex education and condom availability in schools, mass media, exploitative sexual activity, and difficulties and limitations in studying adolescent sexuality. Legal and policy issues, gender differences, and international and historical trends. Research project, including original data collection. Limited enrollment. GER:EC-Gender
3 units, Spr (N. Brown)

HUMBIO 124. Principles of Sleep Research — (Enroll in BIOSCI 149.)
4 units (Franken, C. Heller) not given 2005-06

HUMBIO 126. Adolescent Development — Adolescence from sociological, psychological, and psychiatric perspectives. Topics: physical, physiological, and cognitive development; identity; peer group; parent/child relations; impact of school; vocational development; and problem outcomes (eating disorders, violence, and teen pregnancy). Prerequisite: 3B or PSYCH 1, or consent of instructor.
4 units, Win (S. Feldman)

HUMBIO 127. From Question to Answer: Conducting Research in the Social Sciences — For juniors preparing for honors research in their senior year. Small groups design, conduct, analyze, and write up original research. Research skills including how to design a survey, enter data on a computer, and data analysis. Enrollment limited to 12. Pre- or corequisite: PSYCH 10 or equivalent, or consent of instructor.
4 units, Aut (S. Feldman)
HUMBIO 129. Ethnicity and Medicine—(Enroll in INDE 244.)
1-3 units, Spr (R. Garcia)

HUMBIO 131. Natural Resources Policy—Focus is on federal public land and natural resources policy; mining, timber, and grazing law and policy; the legal aspects of forest, range, park, wilderness, wetlands, and wildlife management; recreation and preservation; and related issues. The role of the courts, administrative discretion, the Endangered Species Act, and the tension between protecting resources and respecting property rights. Students research one aspect of law and policy governing the management of natural resources.
5 units, Spr (Rosencranz)

HUMBIO 132. Seminar on Problem Behavior in Adolescence—Risk, protective factors, treatments, and intervention programs designed to ameliorate or prevent these problems. Externalizing behaviors (violence, delinquency, drug abuse, risk taking), internalizing problems (depression, eating disorders, suicide), and sexuality-related problems (teen pregnancy, date violence, STDs/HIV). Enrollment limited to 20. Prerequisite: 126 or consent of instructor.
4 units (S. Feldman) not given 2005-06

HUMBIO 133. Obesity in America: Clinical and Public Health Implications—Interdisciplinary clinical, research, and policy approaches. The prevalence, predictors, and consequences of obesity and diabetes; biological and physiological mechanisms; clinical treatments including medications and surgery; and the relevance of behavioral, environmental, economic, and policy approaches to obesity prevention and control. Case studies.
3 units, Win (Kiernan, Stafford)

HUMBIO 134. Ecological Anthropology—(Same as ANTHSCI 164.) Dynamics of culturally inherited human behavior and its relationship to social and physical environments. Topics include a history of ecological approaches in anthropology, subsistence ecology, sharing, risk management, territoriality, warfare, and resource conservation and management. Case studies from Australia, Melanesia, Africa, and S. America. GER: DB-SocSci
3-5 units (R. Bird) not given 2005-06

HUMBIO 135. Global Environmental Policy—Advanced seminar. Focus is on international management of regional and global environmental issues, and on the international institutions and agreements created to manage them. The need for international environmental law, its sources, and the participants in its creation and implementation. What works in international environmental management and what does not. Topics: ozone depletion, global warming, forests, transboundary and marine waters, Antarctica, endangered species, biodiversity, plant genetic resources, trade and the environment, and the rights of indigenous people. The future of global environmental policy and law.
5 units, Win (Rosencranz)

HUMBIO 136. Foundations of Bioethics—(Enroll in INDE 136.)
3 units, Win (D. Magnus)

3 units, Spr (Taljapurkar)

2-4 units (Nelson, Popat) not given 2005-06

3 units, Spr (Endemann)

HUMBIO 140. Social Class, Race, Ethnicity, Health—(Enroll in SOC 141A.)
5 units, Win (Barr)

HUMBIO 141. Race, Poverty, and the Environment—Connection between race and poverty and environmental conditions. Theoretical and practical approaches to environmental justice. Empirical evidence of environmental injustice, and causes and barriers to remediating it. How the courts, legislative bodies, executive agencies, public interest organizations, and community groups, and their lawyers have responded.
4 units, Win (Rosencranz)

HUMBIO 142C. Alternative Spring Break: AIDS and HIV in San Francisco—Preparation for the alternative Spring Break trip in which students visit and volunteer at HIV support organizations. Background on HIV and its impact on the San Francisco community.
1 unit, Win (Siegel)

HUMBIO 142G. Post-Field Seminar: A Practical Next Step for Students Returning from Abroad—For students who have recently worked abroad for two months or longer to share what they learned through international research, internship, or volunteer work. Lecture component connects international experiences with at-home activism and helps students explore directions for future work, either domestically or internationally, that builds on their experiences abroad. Students create a final product to benefit the community in which they worked and/or be used as an educational tool locally. Focus is on a practical next step for students interested in international development and related fields.
1 unit, Aut (Siegel)

HUMBIO 142P. HIV Prevention in East Africa Prefield Seminar
3 units (Siegel) not given 2005-06

HUMBIO 143. Globalization, Labor, and the Environment—Interdisciplinary. The responsibility of multinational corporations and institutions (World Bank, WTO, IMF) in the global economy, emphasizing labor and environmental standards in developing countries. Local and global case studies and research focus on social justice and empowerment for domestic and foreign victims of labor, environmental, and human rights abuses, the role of certain multinational institutions and corporations in those abuses, and tools for holding these bodies more accountable. Service-learning component with Bay Area organizations.
4 units, Spr (Rosencranz)

HUMBIO 144. Conservation and Evolutionary Ecology—(Enroll in ANTHSCI 169.)
3-5 units, Spr (D. Bird)

HUMBIO 145. Children’s Citizenship: Justice Across Generations—(Enroll in POLISCI 131.)
5 units, Spr (Reich)

HUMBIO 146. The AIDS Epidemic: Biology, Behavior and Global Response—Interdisciplinary approach to the HIV/AIDS pandemic from the view of public health, public policy nationally and internationally. The global epidemic of a fatal, sexually transmitted disease has led to attempts to change human behavior, produce a vaccine, and other approaches that bring into sharp focus the need for cost effectiveness analysis as a part of influencing public policy.
3 units (Katzenstein) not given 2005-06
HUMBIO 147. Controlling Climate Change in the 21st Century—(Enroll in EARTHSYS 147, BIOSCI 147.)
3 units (Schneider, Rosencranz) alternate years, given 2006-07

HUMBIO 148. Promoting Health Over the Life Course: Multidisciplinary Perspectives—Disease prevention and health promotion topics pertinent to different stages of the life span with focus on nutrition, physical activity, obesity, and other risk factors. Focus is on scientific investigation, the application of behavioral science to risk reduction strategies, and the importance of health promotion as a social and economic imperative.
3 units, Aut (Alles, Stefanick)

HUMBIO 149. Birds to Words: Cognition, Communication, and Language—(Enroll in PSYCH 137.)
3 units (A. Fernald, Ramscar)

HUMBIO 150. Current Topics and Controversies in Women’s Health—Interdisciplinary. Topics include health research, legal and policy issues, sex and gender differences, scientific and cultural perspectives, social influences, environmental and lifestyle effects on health, complementary medicine, and issues related to special populations.
3 units (Staff) not given 2005-06

HUMBIO 152. Environment and Growth in Developing Countries—(Enroll in INTNLREL 135.)
5 units, Aut (Rosencranz)

HUMBIO 153. Reading: Science, Education, and Politics—(Same as PSYCH 153.) The intellectual foundations of reading curriculum development including contributions of scientists, educators, and policy makers. Neural mechanisms of reading including the methodology used to measure complex behavior. Intervention studies to improve reading skills, and the implications of basic and applied science for social policy.
3 units, Spr (Wandell, Dougherty)

HUMBIO 154. Cancer Epidemiology—Epidemiological methods relevant to human research in cancer. The concepts of risk; case-control, cohort, and cross-sectional studies; clinical trials; bias; confounding; interaction; screening; and causal inference. Social, political, economic, and ethical controversies surrounding cancer screening, prevention, and research.
4 units, Win (Fisher)

HUMBIO 155. Exercise Physiology—How body systems respond to the stress of acute exercise and adapt to chronic exercise training. How the cardiovascular system adapts to optimize oxygen delivery and utilization, how muscles generate force and hypertrophy in response to training, how metabolic/biochemical pathways are regulated to support the increased energy demand of exercise. Theories on the causes of fatigue and muscle soreness, and on what limits human performance. Applied topics such as the effects of aging, gender, and environmental conditions (high altitude, heat, cold) on exercise capacity will also be discussed. Prerequisite: Human Biology core or consent of instructor.
4 units, Win (Friedlander)

HUMBIO 155S. Applied Topics in Exercise Physiology and Metabolism—Student-selected topics in exercise physiology. Emphasis is on readings of scientific research. Student presentations. Summary paper. Enrollment limited to 12. Prerequisites: 155, consent of instructor.
3 units, Spr (Friedlander)

HUMBIO 156. Human Developmental Biology and Medicine—(Same as DBIO 156.) The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryo transfer; gene and cell therapy; gametogenesis; pattern formation in the nervous system and limb development; gene and grand multiple pregnancies; prematurity, in utero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the developmental biology of humans. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.
4 units, Spr (Porzig)

HUMBIO 157. The Stem Cell: Science, Ethics, and Politics—The biology of stem cells. Their role in human development and potential for treating disease. Guest lectures by biologists, ethicists, and legal scholars. Prerequisite: Biology or Human Biology Core or consent of instructor.
3 units, Win (Nusse, C. Scott, Weissman)

HUMBIO 158. Human Abilities—(Enroll in EDUC 255, PSYCH 133.)
3 units (Shavelson) not given 2005-06

HUMBIO 159. Sports Medicine—(Same as MED 260.) Sports, exercise, health, and medicine throughout the human performance continuum. Exercise as therapy; injuries and illnesses that result from sports and exercise. Sources include physiology, nutrition, psychology, and biomechanics. Medical problems exacerbated or caused by exercise and sport; maximizing performance in elite athletes; and population-based issues such as exercise and its relationship to health, women’s issues, drugs in sport, and aging. Prerequisite: medical school enrollment, upper-division Human Biology standing, or consent of instructor.
4 units, Win (Matheson, Garza)

HUMBIO 160. Health Care in America: The Organizations and Institutions that Shape the Health Care System—Focus is on key organizations and institutions that shape U.S. health policy and health care delivery. How to assess options for health care reform.
4 units, Aut (Barr)

HUMBIO 160A. American Health Policy—Issues in health care policy making, the evolution of current systems, and theories underlying efforts for change. The national search for solutions to the problems of the uninsured, and the feasibility, options, and ramifications of universal health insurance in light of past experience and stakeholder views. Student presentations. Prerequisites: HUMBIO 160, consent of instructor. GER:DB-SocSci
3 units, Spr (G. Heller, Lee)

HUMBIO 160W. Seminar in Federal Health and Environment Programs and Agencies—Priority to students going to Stanford in Washington during Winter Quarter. The role of federal agencies and Congress in health policy making, and the agencies’ role in implementation of health and environmental policies. Emphasis is on federal policies, but includes federal-state relations. Enrollment limited to 25.
3 units, Aut (Lee)

HUMBIO 161. Human Behavioral Ecology—(Same as ANTHSCI 163.) Theory, method, and application in anthropology. How theory in behavioral ecology developed to understand animal behavior is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting. GER:DB-SocSci
3-5 units, Win (R. Bird)

HUMBIO 163. Neural Systems and Behavior—(Enroll in BIOSCI 163.)
4 units, Aut (Fernald)

HUMBIO 166. The Death Penalty: Human Biology, Law, and Policy—Combines academic study with direct student involvement. Students participate in forensic research and case investigation, including DNA evidence, psychological and physiological development, mental and physical disabilities, and witness interviews. The philosophy, structure, and application of capital punishment in the U.S. Goal is to examine, understand, and challenge the issues involved in the death penalty from the perspective of involvement in a real case. Course not taught from a preconceived belief or political or philosophical agenda except to involve students in an intellectual challenge of policy and philosophy. May be repeated for credit.
3 units, Aut, Spr (Abrams)
HUMBIO 101. International Health — Concepts of health and wellness and major descriptors and determinants of health status. International organizations and control programs, disease-related problems within population groups from an epidemiologic viewpoint, health care delivery methods, efforts to improve health through examination of current and previous programs and projects. Cultural, economic, and political contexts in international health. Prerequisites: Human Biology core or consent of instructor.

4 units (Siegel) not given 2005-06

HUMBIO 168. Medical Anthropology — (Same as ANTHSCI 170.) The crosscultural study of the health beliefs and healing systems around the world. How social processes shape human health. GER:DB-SocSci

EC-GlobalCom

3 units, Win (R. Barrett)

HUMBIO 169. Critical Issues in International Women’s Health — Women’s lives, from childhood through adolescence, reproductive years, and aging. Economic, social, and human rights factors, and the importance of women’s capacities to have good health and manage their lives in the face of societal pressures and obstacles. Emphasis is on life or death issues of women’s health that depend on their capacity to negotiate or feel empowered, including maternal mortality, violence, HIV/AIDS, access to abortion, and sex trafficking. Organizations addressing these issues.

4 units, Win (Firth-Murray)

HUMBIO 174. Ethics and Politics in Public Service — (Enroll in POLISCI 133, ETHICSCOC 133.)

5 units, Aut (Reich)

HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts — The differences between disease as pathology and as the patient’s experience. Topics include patient-doctor relationships, medical technology, the changing focus on illness, gender issues, mental illness, sick children, death and dying.

4 units, Aut (Zaroff)

HUMBIO 175S. The Literature of Health Care: Novels and Theater of Illness — Illness and disease through novels and plays by authors including Shakespeare, Miller, Sophocles, Hemingway, and Camus. How sickness involves the patient, family, community, and state.

4 units, Spr (Zaroff)

HUMBIO 177. Skeletal Development and Evolution — (Enroll in ME 280.)

3 units, Spr (Carter)

HUMBIO 178. Community Health Psychology — (Same as PSYCH 101.) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management.

3 units, Spr (Heaney)

HUMBIO 179. Environmental Change and Emerging Infectious Diseases — (Same as ANTHSCI 179/279.) The changing epidemiological environment. How human-induced environmental changes, such as global warming, deforestation and land-use conversion, urbanization, international commerce, and human migration, are altering the ecology of infectious disease transmission, and promoting their re-emergence as a global public health threat. Case studies of malaria, cholera, hantavirus, plague, and HIV. GER:DB-NatSci

3-5 units, Win (Durham, Jones)

HUMBIO 180. Human Osteology — (Same as ANTHSCI 133A/233A.) The human skeleton. Focus is on identification of fragmentary skeletal remains. Analytical methods such as paleopathology, taphonomy, and forensic techniques. Students work independently in laboratory with the collection. GER:DB-NatSci

5 units, Win (DeGusta)

HUMBIO 181. The Evolution of Human Diet — (Enroll in ANTHSCI 173A.)

5 units (Jones) not given 2005-06

HUMBIO 182. Biological Clocks — (Same as BIOSCI 135.) The biological basis for endogenous timekeeping in organisms from flies to human beings. How biological clocks are constructed at the molecular, tissue, and behavioral levels; how these clocks interact with other physiological systems and allow animals to anticipate changes in their environment. Applications of circadian rhythm principles to treating human disorders and diseases such as cancer. Prerequisite: Biological Sciences or Human Biology core, or consent of instructor. GER:DB-NatSci

3 units, Spr (C. Heller, Ruby)

HUMBIO 185. Science and Religion — (Enroll in RELIGST 270.)

4 units (Bergman, Eisen) not given 2005-06

HUMBIO 186. Evolution of Human Disease — (Enroll in ANTHSCI 172.) Seminar. Understanding human health and disease from an evolutionary perspective. Topics: Darwinian medicine, genes and disease, aging, infectious diseases, mental illness, and cancer. Prerequisites: 2A,B, upper division standing, or consent of the instructor.

5 units (R. Barrett) not given 2005-06

HUMBIO 187. Introduction to Imaging and Image-Based Human Anatomy — (Enroll in RAD 220, BIOE 220.)

3 units, Win (Gold, K. Pauly)

HUMBIO 189. Philosophy of Biology — (Enroll in PHIL 167A.)

4 units (Staff) not given 2005-06

HUMBIO 193. Research in Human Biology — Independent research conducted under faculty supervision, taken junior or senior year, normally (but not necessarily) in pursuit of an honors project. May be taken more than one quarter for credit. Students must complete application in student services office.

1-5 units, Aut, Win, Spr (Staff)

HUMBIO 194. Honors — Completion of the honors project, normally taken in the student’s final quarter. First component: the honors thesis, a final paper providing evidence of rigorous research, fully referenced, and written in an accepted scientific style. Second component: participation in the honors symposium, including a 10-minute oral presentation followed by a brief question and answer session. Prerequisites: 193 (or 199), and acceptance into the honors program.

1-10 units, Aut, Win, Spr (Staff)

HUMBIO 197. Human Biology Internship — Limited to and required of Human Biology majors. The internship is a supervised field, community, or lab experience of student’s choosing, pre-approved by Human Biology faculty and student advisers, and initiated at least three quarters prior to graduation. May be repeated for credit. Prerequisite: Human Biology Core.

1-4 units, Aut, Win, Spr (Staff)

HUMBIO 198. Senior Tutorial in Human Biology — Reading for Human Biology majors in exceptional circumstances and under sponsorship of Human Biology associated faculty. Students must apply through Human Biology student services before registering. Reading list, paper, and evaluation required.

1-5 units, Aut, Win, Spr (Staff)

HUMBIO 199. Directed Reading/Special Projects — Human Biology majors must obtain a sponsor from the Human Biology associated faculty or the Academic Council. Non-majors and students who have not declared must obtain a sponsor only from the Human Biology associated faculty. Students must complete application in student services office.

1-4 units, Aut, Win, Spr (Staff)
HUMBIO 200. Teaching of Human Biology — For upper division undergraduates and graduate students. Practical experience in teaching Human Biology or serving as an assistant in a lecture course.

1-3 units, Aut, Win, Spr (Staff)

OVERSEAS STUDIES

Descriptions of these courses are in the “Overseas Studies” section of this bulletin or at the Overseas Studies office, 126 Sweet Hall. Students overseas are encouraged to participate in a wide range of internships and independent research as well.

AUSTRALIA

HUMBIO 61X. Coral Reef Ecosystems — (Same as BIOSCI 109Z, EARTHSYS 120X.)

3 units, Win (Arrigo, Dove, Hoegh-Guldberg)

HUMBIO 62X. Coastal Resource Management — (Same as BIOSCI 110Z, EARTHSYS 121X.)

3 units, Win (Johnstone)

HUMBIO 63X. Coastal Forest Ecosystems — (Same as BIOSCI 111Z, EARTHSYS 122X.)

3 units, Win (Duke, Pole)

HUMBIO 121X. From Spirit to Brain to Mind: The Evolving Understanding of Neurology and Neuroscience

3 units, Spr (Giffard)

OXFORD

HUMBIO 122X. Comparative Health Care Systems: UK and U.S

4 units, Win (Senior)

HUMBIO 175X. Medical Ethics through Literature, Film, and Theater

4 units, Spr (Giffard)

PARIS

HUMBIO 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time — (Same as PUBLPOL 111P.)

4-5 units, Win (Staff)

SEMINARS

4 units, Win (Stanton)

PROGRAM FOR INDIVIDUALLY DESIGNED MAJORS

The Individually Designed Major program (IDM) is overseen by the School of Humanities and Sciences, located in Building 1. See also the “School of Earth Sciences” and the “School of Engineering” sections of this bulletin for IDMs in these curriculum areas.

This program is intended for currently registered undergraduates in good academic standing interested in pursuing an area of scholarly inquiry that falls outside the purview of an established academic department or program of the University. Students submit proposals for consideration by the Curriculum Committee. These should be intellectually coherent majors designed by the students themselves, with the assistance of faculty members of their choice. IDM students are required to complete a capstone requirement either as an honors project or a senior project. Information about proposal procedures, and the procedure for an honors project, is available at the Undergraduate Advising Center, Sweet Hall, first floor, and the School of Humanities and Sciences (Building 1).

In designing a major, the student consults with three faculty members (all must be Academic Council members and be from three separate departments); one of the faculty members is selected as the student’s primary adviser. In helping the student design the major and in signing the proposal requesting approval from the Curriculum Committee, the faculty members are committing themselves to act as a regular academic advisory group for the student until graduation. The committee does not consider proposals without the approval of the faculty advisory group.

APPLICATION PROCEDURE AND CURRICULUM COMMITTEE REVIEW

The program is administered by the Curriculum Committee, the School of Humanities and Sciences, and the dean’s office in the School of Humanities and Sciences. Applications are due by the fifth week of the Spring Quarter of the sophomore year.

The committee acts in lieu of a regular department of the University. This role involves certifying the scholarly merit of the program and includes the obligation to consider, approve, and recommend changes in each proposed major.

In carrying out its role, the committee reserves the right to reject proposals that, in its opinion, lack scholarly merit or are not clearly interdisciplinary. Occasionally, the committee must reject a proposal that, though of considerable academic merit, requires resources not available at Stanford. The committee also reserves the right to recommend additions to a student’s faculty advisory group.

ADVISING AND PROPOSAL

Students who are interested in the program and have met with an adviser at Undergraduate Advising, are directed to the dean’s office in the School of Humanities and Sciences to speak with the Assistant Dean for Student Affairs. The final stage of the process is the application review by the Curriculum Committee.

The proposal should begin with a statement that describes the major, articulates the motivation for and the justification and ultimate goal of the major, and shows how the courses listed relate to and fulfill the major’s goal. This statement should be followed by a list of the proposed core courses to be counted toward the major and, as far as possible, the sequence in which they are to be taken. The proposal must be signed by the selected faculty advisory group; their signatures certify that they endorse the major as described in the proposal and agree to serve as the student’s permanent advisory group. The proposal must be accompanied by a letter of recommendation from each of the three advisers giving separate appraisals of the academic viability of the proposed major. The proposal must also include a current copy of the student’s unofficial transcript.

These requirements are in addition to the general guidelines discussed under “The Major” section of this bulletin. The monitoring of the requirements and subsequent changes to the original proposal must be approved by the Cognizant Dean for Graduate and Undergraduate Studies.
THE GUIDELINES

To establish the IDM program as being fully equivalent to a Stanford B.A. or B.S. degree in an established department or program, the Senate of the Academic Council has approved specific requirements. The criteria for approval of proposals submitted include:

1. Each major shall consist of at least 75 units, all in courses at or above the 100 level (or their equivalent).
2. A maximum of 5 units of these 75 units may be taken on a credit/no credit basis.
3. A maximum of 8 units of these 75 units may be taken in practical or directed reading.
4. None of the 75 units can count towards another major or other special program.
5. Students are required to take a core sequence and WIM course in the department of one of their advisers.
6. There is a grade point requirement of 3.5.
7. The proposed major must constitute a coherent academic program that fulfills the student’s objectives and achieves a clear academic goal.
8. The proposed major must be comparable in quality and in academic rigor to degrees obtained by students in other degree-granting programs offered at Stanford.
9. The proposed major must achieve both breadth and depth within the academic discipline(s), involve interdisciplinary study, and be compatible with a liberal arts education.
10. The proposed major must not duplicate or be achievable through a major already offered by another degree-granting program or department.
11. Students must present evidence that demonstrates their ability to do independent work.
12. Students proposing individually designed majors must have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee.

INTERDISCIPLINARY STUDIES IN HUMANITIES

Emeriti: (Professors) Kurt Mueller-Vollmer, Lawrence V. Ryan
Director: Paul Robinson
Associate Director: Helen Brooks
Steering Committee: (Chair) Paul Robinson; Kendra Berenson (undergraduate student representative), Helen Brooks (English, Interdisciplinary Studies in Humanities), Colin Garretson (Graduate Program in Humanities student representative), Heather Hadlock (Music), Linda Paulson (English), Rush Rehm (Drama), Morgan Russell (undergraduate student representative), Sebastian Salvado (Graduate Program in Humanities student representative), Alex Woloch (English), Rega Wood (Philosophy)
Department Offices: Building 250, Room 251F
Mail Code: 94305-2020
Department Phone: (650) 723-3413
Email: idstudies.moore@stanford.edu
Web Site: http://www.stanford.edu/group/HSP/GPH/

Courses given in Interdisciplinary Studies in Humanities have the subject code HUMNTIES. For a complete list of subject codes, see Appendix.

The office of Interdisciplinary Studies in Humanities administers the following programs:
1. Honors Program in Humanities
2. Interdisciplinary Major in Humanities
   a) Interdisciplinary Major
   b) Interdisciplinary Major for Premeds
   c) Interdisciplinary Major in Digital Humanities
   d) Interdisciplinary Major in Philosophical and Literary Thought
3. Graduate Program in Humanities
   a) Master of Arts
   b) Joint Ph.D.
4. American Studies (see the “American Studies” section of this bulletin.)
5. Medieval Studies (see the “Medieval Studies” section of this bulletin.)
6. Program in Modern Thought and Literature (see the “Modern Thought and Literature” section of this bulletin.)

UNDERGRADUATE PROGRAMS
See also the “Honors Program” below.

BACHELOR OF ARTS

THE MAJOR IN INTERDISCIPLINARY STUDIES IN HUMANITIES

This undergraduate major is designed for students with a strong commitment to interdisciplinary study in the various humanities. A student may choose to pursue the B.A. degree in Humanities through one of four concentration options: (1) the standard student designed thematic concentration; (2) the concentration designed for students who also plan to complete the established premedical curriculum for careers in the health sciences; (3) the concentration in digital humanities; or (4) the concentration in philosophical and literary thought. For all options, the B.A. degree conferred is in Humanities. Each student chooses a field that reflects the focus of study, which is noted on the transcript after degree conferral.

Unlike the disciplines in natural and social sciences, the humanities focus on the formation of ideas through language. The goal of the program is to introduce students to different disciplinary methods as well as their intersections. Students interested in Interdisciplinary Studies in Humanities have the opportunity to arrange their courses by thematic subject matter, genre, or historical period.

Each applicant to the major submits a study plan, accompanied by a statement of purpose which outlines the rationale for a particular field of study. Students who wish to major in Humanities should receive approval of their fields before the end of the junior year. Students may complete fields in

1. Culture and Politics
2. Digital Humanities (see below)
3. Early Modern Studies
4. Ecology, Philosophy, and Literature
5. Film Studies
6. Medieval Studies
7. Modern Thought and Literature
8. Performance Studies
9. Philosophical and Literary Thought (see below)
10. Philosophy and the Visual Arts

REQUIREMENTS FOR THE MAJOR
With the exception of the premed option, each program of study must include at least 12 courses for a minimum of 60 units over and above the requirements of the Humanities honors program (30 units). However, students may count one of the core seminars taken for the honors program (see below) as one of the courses toward the major if appropriate to the area of concentration.

INTERDISCIPLINARY MAJOR

The program of study for the thematic concentration includes:

1. A statement of purpose designating the field and outlining the rationale for the program of study.
2. Six courses in one of the three areas: literary, historical, or philosophical study.
3. Three courses in each of the other two areas above.
4. The requirements for the Humanities honors program.
If additional courses are needed to make up the 60 unit minimum, the student may take those courses in any of the three categories. Each program of study must be signed by a Stanford faculty member who has agreed to act as the student’s academic adviser; the proposed program must then be approved by the director. Changes in the study plan must be approved by the student’s adviser and kept on file in the program office.

For some fields, such as film studies or modern thought and literature, specific courses or types of courses may be strongly recommended. Consult the student handbook for such recommendations.

INTERDISCIPLINARY MAJOR FOR PREMEDS

The Interdisciplinary Major in Humanities offers an option for students who are preparing to attend medical school, but who wish to focus their studies in the humanities. This program of study gives students a coherent way to organize interdisciplinary interests by theme, nationality, or historical period. In addition, students choosing this track take all the courses usually required by medical schools (two years of organic and inorganic chemistry with labs, one year of physics, one year of biology with labs, and one or two courses to provide proficiency in quantitative skills as determined by a premed adviser), as well as course work in various humanities disciplines (eight courses and a minimum of 40 units) distributed as follows:

1. A statement of purpose choosing one of the fields listed above.
2. Four courses in the student’s chosen field. Generally these four courses address different aspects of literature, history, and philosophy.
3. Three courses in medical ethics, history or philosophy of science, science, and the humanities.
4. One course in the arts.
5. The courses recommended by the Undergraduate Advising Program to fulfill medical school entrance requirements.
6. The requirements for the Humanities honors program.

INTERDISCIPLINARY MAJOR IN DIGITAL HUMANITIES

The development of new technologies has produced new topics for scholarly discussion in the humanities as well as new forms of cultural expression. The Interdisciplinary Major in Humanities offers a track for students who wish to concentrate study in the new field of Digital Humanities with the following course requirements:

1. A statement of purpose outlining a narrowly defined field of study and approved by a digital humanities adviser.
2. HUMNTIES 198 as one of the core seminars for the Humanities honors program.
3. CS 105, Introduction to Computers, or CS 106A, Programming Methodology, or equivalent.
4. Seven humanities courses relevant to the student’s focus as articulated in the statement of purpose.
5. Three computer science or technology courses relevant to the student’s focus; one course should have a technical focus, and one should deal with societal issues.
6. HUMNTIES 201, Digital Humanities Practicum, in preparation for the student’s honors project.
7. The requirements for the Humanities honors program.

INTERDISCIPLINARY MAJOR IN PHILOSOPHICAL AND LITERARY THOUGHT

The concentration in philosophical and literary thought is available in association with the crossdisciplinary Program for the Study of Philosophical and Literary Thought. Students wishing to major in Humanities with this focus must consult with the director of that program, as well as the director or associate director of Interdisciplinary Studies in Humanities. Students prepare a program of study including at least 12 courses in literary, philosophical, and historical study, of which six courses are in philosophical or literary thought, and three in each of the other two categories. Requirements:

1. A statement of purpose defining a focus in philosophical or literary thought.
2. PHIL 81, Philosophy and Literature Gateway, which can be counted toward the course requirements for philosophical study or toward the requirements for literary study.
3. PHIL 80, Mind, Matter, and Meaning
4. Courses in philosophical study normally include at least one course from the PHIL 170 sequence and one course from the PHIL 180 sequence.
5. Courses in literary study should focus on one national literature.
6. Courses in historical study should include at least one course in the history of philosophy.
7. The requirements for the Humanities honors program.
8. Students in this track are strongly encouraged, where possible, to select one or two Interdisciplinary Core Seminars which are approved as courses of special relevance for philosophical and literary thought. Interested students should consult the director of undergraduate studies for a listing of courses of special relevance to the study of philosophy and literature (which includes some of the HUMNTIES interdisciplinary core seminars).

HONORS PROGRAM

The Honors Program in Humanities aims to heighten a sense of the relations among various humanistic disciplines, and to study issues in intellectual and cultural history through aesthetic, literary, historical, religious, social, and ethical perspectives.

ADMISSION

As an extra-departmental honors program, the Humanities Honors Program is open to any qualified undergraduate at Stanford, regardless of major. Interested students may obtain information from the program office. Students are encouraged to register for the program at the earliest opportunity and to take the Core Colloquium in the sophomore year. However, students may join the program as late as the junior year under certain circumstances (e.g., transfer students). Students enrolled in the crossdisciplinary majors affiliated with the Program for the Study of Philosophical and Literary Thought, whether through the Philosophy major or one of the literature majors, are strongly encouraged to write their honors essays through the Humanities honors program. Students must meet the following entrance requirements before being admitted to the program:

1. Completion of at least two quarters of the Area One requirement, except in the case of transfer students, who will be granted exception.
2. A grade point average (GPA) of at least 3.3 (B+) in all course work in the humanities. Such course work includes any Area One sequence and all Program in Writing and Rhetoric sections; all courses in the departments of Art and Art History, Drama, and Music (except studio or performance courses); all courses in the departments of Asian Languages, Classics, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese (except first-year language courses); all courses in the departments of Comparative Literature, History, Philosophy, and Religious Studies; and all courses in the programs in Feminist Studies and Modern Thought and Literature.

REQUIREMENTS

1. Completion of 100, Honors Core Colloquium: Humanities, 3 units, preferably in the sophomore year.
2. Two different seminars in the series 190-198: 8-10 units, sophomore or junior year. Both seminars must be completed by the end of the tenth quarter of undergraduate study in order for students to remain members in good standing.
3. At least one survey course in intellectual or cultural history, 4-5 units, in a field relevant to the anticipated topic of the senior essay, choosing from among courses in history, philosophy, religious studies, literature, and the arts. Students should consult the course list in the program office.
In order to develop the requisite knowledge and methodological background to write a Humanities honors essay, students must take, during their sophomore and junior years, the required Humanities honors courses and additional humanities courses in disciplines germane to their honors essays.

5. Enrollment in 200A, one unit each, Winter and Spring quarters of the junior year.

6. An honors essay on a topic approved by the Steering Committee (usually 5 units Autumn Quarter and 5 units Winter Quarter, senior year).

7. A minimum GPA of 3.3 (B+) in all courses taken for the Honors Program, as well as an overall minimum GPA of 3.0 (B) in all course work in order to remain in the program.

**GRADUATE PROGRAMS**

University requirements for the M.A. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

**MASTER OF ARTS**

The Master of Arts program within the Graduate Program in Humanities is designed to broaden the student’s academic background and cultural knowledge through a series of seminars that study intellectual history from the classical period to the modern era. Students gain added depth by taking four advanced courses within a defined field of study.

Application is made through the Interdisciplinary Studies in Humanities office. Application procedures and deadlines are available on the web at http://gradmissions.stanford.edu. The M.A. program in Humanities is ideally completed as a half-time, two-year program, but under some circumstances it may be completed in one year as a full-time program. The department does not offer financial aid for the master’s program. Qualified undergraduates at Stanford may petition to complete the M.A. program coterminally with their bachelor’s degrees; for University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

**REQUIREMENTS**

1. Complete the five Interdisciplinary Studies in Humanities seminars (321-325).

2. Complete four graduate-level courses in an approved, established discipline to be determined in consultation with the director. At least one of these must be a graduate-level research seminar for which a research paper is required. Under “Statement of Purpose” on the application form, the candidate must indicate the field of study (for example, art history, early modern studies, philosophy, etc.) from which the graduate-level courses are drawn. The candidate must also note his or her qualifications for undertaking graduate study in that designated field. Once admitted, the student submits a proposed program of study to the director, specifying the particular courses to be taken. The proposed program is approved on its own merits to ensure that the chosen graduate courses are suited to the M.A. in Humanities.

3. Satisfactory completion of 298, the (Spring Quarter) Graduate Program in Humanities Symposium, or prior completion of the Symposium Paper by special permission.

   The minimum number of units for the M.A. degree is 45. Additional elective units may be taken at the option of the student.

   Undergraduates wishing to pursue the M.A. as part of a coterminal program should speak with the program administrator about the application procedures for coterminal students.

   For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

**JOINT PH.D.**

The Graduate Program in Humanities (GPH) provides graduate students in different disciplines an opportunity to broaden their knowledge of intellectual and cultural history by focusing on texts and ideas which have been central to all humanistic disciplines from the ancient world to the present. The program’s seminars usually focus on specific topics or issues in the context of historical, literary, philosophical, religious, and other disciplinary and theoretical orientations. The program provides a unique opportunity to study highly influential texts with a view to their relevance to the student’s own disciplinary field.

GPH members must be students earning the Ph.D. in an academic department at Stanford. Doctoral students who complete the requirements for their departments and the GPH are awarded joint doctoral degrees. Students may register for the program at any time, usually during the first quarter of graduate study. Members of the program are given first preference in registration for all of its offerings. Students complete the five GPH seminars (321-325). The course of study culminates in the GPH student symposium, which is developed and organized by the students in the program.

Although students in the GPH generally complete the program course work in their first two years of graduate study, requirements of some participating departments may necessitate completion of the GPH over three years. In some instances, one or more of the GPH seminars may fit within the requirements of the student’s home department.

The following are participating departments in the program: Art and Art History, Classics, Comparative Literature, Drama, Education, English, French and Italian, German Studies, History, Modern Thought and Literature, Music, Philosophy, Religious Studies, Slavic Languages and Literatures, and Spanish and Portuguese. Doctoral students from other departments may participate with permission of their home departments and approval of the Director of Interdisciplinary Studies in Humanities.

**REQUIREMENTS**

1. Complete satisfactory work in the student’s major field, in accordance with department requirements.

2. Complete the five GPH seminars. To qualify for candidacy, students should complete at least three seminars in the first two years of graduate residence. Exemption from, or permission to audit, a seminar may be secured by petition if the student can show coverage of the material at an advanced level.

3. Participate in the GPH student symposium, usually at the end of the second year of GPH course work (298; registration for units is optional).

4. At least one quarter of teaching for Interdisciplinary Studies in Humanities, normally a teaching internship in the third or fourth year (299; registration for units is optional).

5. Reading knowledge of at least one foreign language, ancient or modern, to be certified in the first two years of graduate work.

6. Passing the University oral examination according to the schedule prescribed by the major department with one GPH representative, approved by the director, as a member of the examining committee.

7. Submission of a Ph.D. dissertation acceptable to a committee which includes one representative of the GPH, approved by the director.

**COURSES**

See quarterly Time Schedule for changes in listings.

**HUMNTIES 100. Honors Core Colloquium: Humanities** — Required of all students in the Humanities Honors Program. Introduction to Interdisciplinary Studies in Humanities through the study and application of a range of theoretical approaches to a major literary text. This year, the course focuses on *Hamlet*, including film adaptations. Experience in both disciplinary and interdisciplinary analysis and writing is designed to help prepare students to write their honors essays in Humanities. GER:DB-Hum

3 units, Win (Brooks, Robinson)

**HUMNTIES 121. The Alienated Self** — The derivation of the concept of self from which the fundamentals of personal identity arise based on two propositions: a close reading of a literary work can be facilitated by psychological sensibility; and psychological principles can be elucidated through close reading. Authors include Dostoevsky, Camus, Freud, Mann, and McCullers.

3-5 units, Spr (Van Natta)
HUMNTIES 170. Media Studies Internship—Practical experience working with a film or media company for six to eight weeks. Students must make arrangements with companies individually and receive the consent of the Director of the Humanities Honors Program. Credit is awarded for submitting a paper after completing the internship, focused on a topic relevant to the student's studies.
3 units, Aut, Win, Spr, Sum (Robinson)

HUMNTIES 175. Individual Work
1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 181. Introduction to Strategic Foresight—How the future can be imagined and communicated. Tools to design, ponder, and share the future including narratives, scenarios, cross-impact maps, video, and artifacts. Strategic foresight methods, their advantages and disadvantages, and how to apply them in research and business.
3 units, Aut (Cockayne)

HUMNTIES 182. Case Studies in Strategic Foresight—Case studies, successes and failures, of individuals and organizations attempting to develop knowledge of the future: how effective was the foresight in helping to envision the future? Models and underlying methodologies. How to embed strategic foresight in organizations.
3 units, Win (Cockayne)

HUMNTIES 183. Strategic Foresight and Innovation—How strategic foresight methods can be used to predict future ideas, inventions, and innovations; their effects upon society? Guest lectures from field experts, seminal papers, and multiple scenarios. How to understand, explore, and prepare for impending changes in emerging technologies, and how to embed the practice in organizations.
3 units, Spr (Cockayne)

HUMNTIES 191-198. Interdisciplinary Core Seminars in Humanities—Students in the Humanities honors program must complete two different seminars from different areas before the end of the tenth quarter of undergraduate study. Other students may enroll if space allows and with the instructor's consent.

HUMNTIES 193Q. The Art of the Movies: Story, Drama, and Image—(Same as PHIL 193Q.) A philosophical study of how movies coordinate and transform elements they borrow from older arts of literary narrative, live theater, and graphic illustration. Examples from the career of Alfred Hitchcock. GER:DB-Hum
4 units, Win (Hills)

HUMNTIES 194B. Text as Context—(Same as ENGLISH 184B.) Conditions that situate texts in their social, political, religious, and artistic dimensions, and that impact on conceptions of meaning. Changing views of relationships between text and their audience. Film adaptations. Texts include Rumi, Donne, Shakespeare, Joyce, Woolf, Stein, Beckett, Pound, and Picasso. GER:DB-Hum
5 units, Win (Brooks)

HUMNTIES 194S. Conflict and Resolution: The Artist as Witness—(Same as ENGLISH 182.) The social work of the novel. Its strategies for articulating difference and capacity to objectify points of view and posit resolutions to ideological disputes. The novel as artistic device, material history, narrative, and style of social consciousness. Its relationship to language and systems of representation that it shares with the wider culture. Its formal organization of choice, creation of misapprehension, and construction of deviation. Theorists include Bakhtin, Barthes, Brooks, and Jameson. Readings include Tolstoy, Kafka, Swift, Kundera, Morrison, Coetzee, and Hosseini. GER:DB-Hum
5 units, Spr (Shloss)

HUMNTIES 194Z. Truth, Fiction, and Interpretation—(Same as ENGLISH 180A.) What does it mean for something to be fictional? How the answer to this question dictates what can be said about fiction and limits interpretative methods. What kind of thing is a fiction? Is there a realm of wisdom from which the logician is banned? Readings include fiction, poems, and philosophy. GER:DB-Hum
5 units, Aut (Bourbon)

HUMNTIES 197B. Camera as Witness: International Human Rights Documentaries—(Same as INTNLREL 141B.) Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers. GER:DB-Hum
5 units, Aut (Bojic)

HUMNTIES 197C. Camera as Witness: A Forum for Global Dialogue—(Same as INTNLREL 141C, SLAVGEN 197C.) Challenges facing film makers documenting the struggle for human rights including communication of complex situations to an international audience, interpreting foreign cultures and politics, and film maker roles as artists, activists, and journalists. Meetings with filmmakers. GER:DB-Hum
5 units, Spr (Bojic)

HUMNTIES 198J. Digital Humanities: Literature and Technology—(Same as ENGLISH 153H.) How electronic texts, literary databases, computers, and digital corpora offer unique ways of reading, analyzing, and understanding literature. Intellectual and philosophical problems associated with an objective methodology within a traditionally subjective discipline. GER:DB-Hum
5 units, Aut (Jockers)

HUMNTIES 198S. Digital Humanities—(Same as CLASSART 198S.) How digital technologies are implicated in rethinking research and learning in the arts and humanities. Topics include: visualization, simulation and gaming, authoring, collaborative research, publication and dissemination, interactivity, and information management. Examples of cutting-edge research. Project-based.
4-5 units, Spr (Shanks)

HUMNTIES 200A,B,C. Senior Research—Limited to Humanities honors students. A critical essay of about 15,000 words. Students develop a proposal beginning in Winter Quarter of the junior year, and research a topic and write the essay during senior year with the guidance of a faculty member, taking a total of 5 units each of 200B and 200C, spread out during senior year as best suits their schedules. Deadline for submitting essays is the first working day on or after May 15.

HUMNTIES 200A. Research Proposal—Preliminary planning and study. Student drafts a proposal in Winter Quarter of the junior year to submit to the committee in charge for suggestions regarding focus and bibliography. After revisions, the student resubmits a fully developed proposal to the committee for final approval. 60 hours over two quarters are expected of students developing their essay proposals for 2 units, usually 1 unit each in Winter and Spring of the junior year. Students usually make revisions of some kind in either scope or formulation of the topic. Students overseas submit proposals and receive feedback by fax or email. WIM
1-2 units, Aut, Win, Spr (Robinson)

HUMNTIES 200B. Senior Research—Regular meetings with tutor (thesis adviser). Prerequisite: 200A, WIM
1-5 units, Aut, Win, Spr (Robinson)

HUMNTIES 200C. Senior Research—Regular meetings with tutor; submission of complete first draft at least two weeks before final deadline. Prerequisite: 200B, WIM
1-5 units, Aut, Win, Spr (Robinson)

HUMNTIES 201. Digital Humanities Practicum—For Humanities majors concentrating in digital humanities. Work related to the honors thesis under the supervision of a Stanford faculty or staff member usually affiliated with the Stanford Humanities Lab. Must be approved by the Director of Interdisciplinary Studies in Humanities.
2-5 units, Aut, Win, Spr (Staff)
Weber, Eliot, Woolf, Sartre, and Camus. Hauer, Coleridge, Kierkegaard, Marx, Baudelaire, Darwin, Nietzsche, religion in European society. Authors include Descartes, Pascal, Leibniz, of printing; the reappropriation of classical thought; the expansion of democratic, as INTNLREL 114D, ICA 114D. Democracy, Development, and the Rule of Law. how such institutions generated problems, crises, and reforms in China, S. Korea, and Japan. Institutional foundations of economic development; how such institutions generated problems, have undergone reform, and test the E. Asian model of development and reform. 5 units, Win, Spr (Jung) ICA 114D. Democracy, Development, and the Rule of Law.—(Same as INTNLREL 114D, POLISCI 114D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems
function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.

5 units, Aut (Stoner-Weiss)

ICA 114T. Major Issues in International Conflict Management—
(Enroll in POLISCI 114T.)

5 units, Spr (Stedman)

ICA 143. Nongovernmental Organizations and Development in Poor Countries—(Same as POLISCI 143, INTNLREL 143A.) How nongovernmental organizations affect economic growth, equity, political stability, and prospects for democracy in poor countries. Do NGOs contribute to these goals? What is reasonable to expect from the NGO sector? Interactions among NGOs from wealthy and poor countries, governments, international financial institutions, and multinational corporations. GER:DB-SocSci

5 units, Aut (Abernethy)

5 units, Win (M.W. Lewis)

ICA 161B. Global Human Geography: Europe and Americas—(Same as INTNLREL 161B, IPS 261B, HISTORY 106B.) Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.

5 units, Win (M.W. Lewis)

ICA 163. History and Geography of Contemporary Global Issues—
(Same as INTNLREL 163, IPS 263, HISTORY 206.) The historical background and geographical context of contemporary global issues and events. Topics vary according to what is happening in the world. Student presentations. GER:DB-SocSci, WIM

5 units, Spr (Abernethy)

ICA 200E. Globalization and the State in East Asia—(Same as EASTASN 200E.) Changes in state economic roles at different stages of development in China, S. Korea, and Japan. How globalization has affected the functions and institutions of the state. Roles of the state in the economic miracle, financial crisis, and the reform process. Changes in institutions, functions, and authorities. The impact of political context in reform outcomes.

5 units, Win (Jung)

ICA 201B. Applied Econometrics—(Same as IPS 201B.) Econometric modeling, techniques, and applications. Theory, including bivariate and multivariate regression analysis, inference and hypothesis testing, heteroscedasticity, autocorrelation, and simultaneous-equation models.

5 units, Win (Aturupane)

ICA 202. Topics in International Macroeconomics—(Same as IPS 202.) Topics: standard theories of open economy macroeconomics, exchange rate and stabilization policies, the economics of monetary unification and the European Monetary Union, and emerging markets financial and currency crises.

5 units, Win (Aturupane)

ICA 203. Issues in International Economics—(Same as IPS 203.) Topics in globalization, international trade and international trade policy, including trade and economic growth, regionalism, the World Trade Organization and the political economy of trade policy.

5 units, Spr (Aturupane)

ICA 204. Theories and Concepts in International Relations—(Same as IPS 204.) Seminar. Theoretical approaches and empirical issues in the study of world affairs. Applications to problems of cooperation and conflict. Issues include violent conflicts, trade and finance, and the environment and human rights, and normative theories of international relations surrounding these issues.

5 units, Aut (M. Kim)

ICA 205. Applied Game Theory for Political Economy—(Same as IPS 205.) Solution concepts from non-cooperative game theory with applications in economics and political science. Imperfect information and signaling, off equilibrium path beliefs, and mechanism design. Emphasis is on application over formal proof. Prerequisite: background in non-cooperative game theory.

5 units, Aut (Shelton)

ICA 211. Education for All? The Global and Local in Public Policy Making in Africa—(Same as IPS 211, INTNLREL 111.) Although international institutions, national governments, and non-governmental organizations agreed in 1990 to promote education for all within a decade, the goal has not been achieved. The need in Africa is great but education systems are underfunded and overstressed, schools are crowded and poorly equipped, and teachers are overburdened and underprepared. Focus is on policy making in Africa and the intersection of policy processes and their political and economic dimensions. Case studies.

5 units, Spr (Samoff)

5 units, Win (M. Kim)

ICA 233. Introduction to Comparative and International Political Economy—(Same as IPS 233, INTNLREL 133.) Major theoretical approaches and empirical issues in international economic policies and outcomes. Review of economic theories underlying political conflicts. Topics include trade, monetary relations, sovereign debt, investment, migration and development. Comparison of developed and developing countries.

5 units, Spr (M. Kim)

ICA 238. Growth and Development: Theory and Policy Implications—(Same as IPS 238, INTNLREL 138.) Models of endogenous growth and their implications for economic policy. Likely topics include the effects of fiscal policy on factor accumulation; connection among inequality, redistributive policy, and economic growth; and trade policy and dynamic sources of comparative advantage. Prerequisite: graduate course in applied game theory.

5 units, Spr (Shelton)

ICA 239. The Political Economy of Governance—(Same as IPS 239, INTNLREL 139.) Game theoretic models of political institutions. Emphasis is on performance of collective choice institutions in the presence of heterogeneous preferences, time-inconsistent preferences, asymmetric information, and uncertainty. Likely topics include collective action, free riding, and public goods; credibility, reputation, and transparency; corruption and lobbying; delegated authority; reform and fiscal adjustment; and elections and the volatility of economic policy. Prerequisite: graduate course in applied game theory.

5 units, Spr (Shelton)

ICA 299X. Design and Methodology for International Field Research—(Same as HISTORY 299X/399A.)

1 unit, Win (N. Kollmann, Roberts)

ICA 348T. AIDS, Literacy, and Land: Policy Challenges in Contemporary Africa—(Same as POLISCI 348T.) Public policy issues, their roots, and the conflicts they engender. The policy making process: who participates; how; why; and with what results? Innovative approaches to contested policy issues. Case studies such as: a neighborhood center and clinic in Uganda; strategies in Tanzania to increase girls’ schooling; and avoiding squatter occupations and allocating land to those who use it.

4.5 units, Win (Samoff)
INTERNATIONAL POLICY STUDIES

Directors: Coit D. Blacker (Stanford Institute for International Studies), Judith L. Goldstein (Political Science)
Associate Director: Martin W. Lewis (International Policy Studies)
Executive Faculty Committee: James Fearon (Political Science), Stephen H. Haber (Political Science), Timothy Josling (Institute for International Studies), Michael McFaul (Political Science), Ronald I. McKinnon (Economics), Michael Tomz (Political Science)
Lecturers: Chonira Aturupane, Gili Drori, John Dunlop, Keith Hansen, Joo-youn Jung, Moonhawk Kim, Pawel Lutomski, Bertrand Patenaude, Cameron Shelton
Affiliated Faculty: Jonathan Bendor (Business), Gordon Chang (History), Larry Diamond (Hoover Institution), Lynn Eden (Sociology), Walter P. Falcon (Stanford Institute for International Studies), Larry Goulder (Economics), David J. Holloway (History, Stanford Institute for International Studies, Political Science), Simon Jackman (Political Science), Terry Karl (Political Science), Stephen D. Krasner (Political Science), Gail Lapidus (Stanford Institute for International Studies), Beatriz Magaloni (Political Science), Isabela Mares (Political Science), Norman Naimark (History), Rosamond Naylor (Stanford Institute for International Studies), Roger G. Noll (Economics), Jean Oi (Political Science), Daniel Okimoto (Political Science), Robert A. Packenham (Political Science), William Perry (Stanford Institute for International Studies, Management Science and Engineering), Douglas Rivers (Political Science), Richard Roberts (History), Scott D. Sagan (Political Science), Thomas Simons (History), Stephen Stedman (Political Science, Stanford Institute for International Studies), Andrew Walder (Stanford Institute for International Studies, Sociology), Jeremy Weinstein (Political Science), Ann Wren (Political Science)
Other Affiliation: Christophe Crombez (Stanford Institute for International Studies), Donald Emmerson (Stanford Institute for International Studies), Jonathan Greenberg (Law), Katherine Jolluck (History), Kathryn Stoner-Weiss (Stanford Institute for International Studies)
Program Office: Encina Hall West, Room 216
Mail Code: 94305-6045
Phone: (650) 723-4547
Web Site: http://ips.stanford.edu

Courses given in International Policy Studies have the subject code IPS. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAM
MASTER OF ARTS

University requirements for the M.A. degree are described in the "Graduate Degrees" section of this bulletin.

International Policy Studies (IPS) is a highly analytical interdisciplinary program focusing on international policy analysis. Its goal is to provide students with in-depth exposure to a range of issues that they will face in the 21st century in international business and public policy, and to develop a foundation of skills and knowledge to address those issues. The program allows students to focus on: the international economic system, developing and transition societies, security issues, or the world environment. More information on IPS can be found at http://ips.stanford.edu.

IPS requires completion of the core and cognate requirements listed below which normally amount to 48 units of credit. Additional units are required for students who have not fulfilled the prerequisites for these requirements.

ADMISSION

IPS is designed for students who have a strong undergraduate background in economics and political science. To enroll in the program, students must have taken at least one undergraduate course in international relations, as well as calculus-based undergraduate courses in statistics, microeconomics, and macroeconomics. Stanford courses satisfying these requirements are POLISCI 1 or IPS 204, and ECON 51, 52, and 102A. In addition, to fulfill the program requirements in one year, students must have completed one advanced undergraduate course in international economics, and one in either security studies or international political economy. Stanford courses that meet these requirements are ECON 165 and POLISCI 110A, B, C, or D.

Applicants from schools other than Stanford or applicants from Stanford who did not apply in their senior year should submit a Graduate Admission Application including a statement setting forth relevant personal, academic, and career plans and goals; official transcripts; three letters of recommendation; Graduate Record Examination (GRE) scores; and a writing sample of at least ten pages. TOEFL scores are required of applicants for whom English is not their first language or who did not attend an undergraduate institution where English is the language of instruction. To apply online or for information on graduate admission, go to http://gradadmissions.stanford.edu. Applicants are expected to have a B.A. or B.S. degree from an accredited school. Complete information on applying to IPS is found in the Guide to Graduate Admission. Applications for admission beginning Autumn Quarter must be filed together with supporting credentials by the preceding December 13.

Undergraduates at Stanford may apply for admission to the coterminal master’s program in IPS when they have earned a minimum of 120 units toward graduation, including AP and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The coterminal application requires the following supporting materials: two letters of recommendation from University faculty, a writing sample of at least ten pages, and a statement of relevant personal, academic, and career plans and goals. Applications must be filed together with supporting materials by December 13. For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

DEGREE REQUIREMENTS

To receive the M.A. degree in International Policy Studies, students must complete the items below. These requirements entail 23 units of core courses and an additional 25 units from the cognate curriculum. These courses have the following prerequisites: ECON 51, 52, 102A or POLISCI 350A, and ECON 165; POLISCI 1 or IPS 204 and POLISCI 110A, B, C, or D.

Core—

1. Seminar Requirement: IPS 200, Issues in International Policies (3 units)
2. Skills Requirement: any three of the following courses (15 units)—ECON 102B, C, 150; IPS 201B, 205; POLISCI 350A, B, C; PUBLPOL 105
3. International Economics Requirement (5 units): IPS 202, Topics in International Macroeconomics; or IPS 203, Issues in International Economics

Cognate Curriculum—Students must take 25 units of other IPS approved courses for their cognate. All students must take IPS 204 as part of the cognate curriculum. At least 15 units must be in one of the following areas of specialization and 10 units must be in two other areas of specializations (a complete list of the courses in these areas is available in the IPS program office):

International Political Economy
Conflict/Security Studies
Political and Economic Development
Public Organizations and Policy Implementation
World Environmental Policy

Area Specialization—Students may earn an area specialization certificate by completing 15 additional units of coursework focusing on one region. Options include Asia, Eastern Europe/Russia, Latin America, and Western Europe. Area specialization units may not be counted toward the cognate curriculum requirement.
Master’s Thesis—Students are not required to write a master’s thesis; however, students may register for 10 units of thesis research under the guidance of a faculty member. Thesis proposals must be approved by the program director. Thesis units may not be counted toward the cognate curriculum requirement. Students should register for IPS 290.

In addition, students must meet the following deadlines:

1. Complete and file the IPS Program Proposal, available in the IPS office, no later than the second week of Autumn Quarter. Students should list all courses to be used to fulfill the IPS requirements, including the required IPS 200 course. Categorical students must list unduplicated courses, that is, courses not counted toward an undergraduate degree.
2. Use Axess to file an Application to Graduate by the appropriate deadline.

Grade Requirements—All courses to be counted toward the degree, except for the core seminar, must be taken for a letter grade and receive a grade of ‘B-’ or higher.

Financial Aid—Undergraduates may petition for a fifth year of financial aid as categorical students. Note that these petitions can only be made if the undergraduate degree has not been conferred. University-based financial aid is not normally available for graduate students entering the IPS program.

COURSES

See the IPS degree requirements in the IPS program office or at http://ips.stanford.edu for updated information on additional courses.

CORE

SEMINAR REQUIREMENT

IPS 200. Contemporary Issues in International Policies—For IPS students only. Lecture series. Scholars present their analysis of major international public policy issues. May be repeated for credit.
1 unit, Aut, Win, Spr (M.W. Lewis)

SKILLS REQUIREMENT

Any three of the following classes:

IPS 201B. Applied Econometrics—(Same as ICA 201B.) Econometric modeling, techniques, and applications. Theory, including bivariate and multivariate regression analysis, inference and hypothesis testing, heteroscedasticity, autocorrelation, and simultaneous-equation models.
5 units, Win (Aturupane)

IPS 205. Applied Game Theory for Political Economy—(Same as ICA 205.) Solution concepts from non-cooperative game theory with applications in economics and political science. Imperfect information and signaling, off equilibrium path beliefs, and mechanism design. Emphasis is on application over formal proof. Prerequisite: background in non-cooperative game theory.
5 units, Aut (Shelton)

ECONOMICS

ECON 102B. Introduction to Econometrics
5 units, Win (Ryal, Spr (Royalty))

ECON 102C. Advanced Topics in Econometrics
5 units (Pistaferri) not given 2005-06

ECON 150. Economic Policy Analysis
5 units, Win (Noll)

POLITICAL SCIENCE

POLISCI 350A. Political Methodology I
5 units, Aut (Rivers)

POLISCI 350B. Political Methodology II
5 units, Win (Jackman)

POLISCI 350C. Political Methodology III
3-5 units, Spr (Rivers, Wand)

PUBLIC POLICY

PUBLPOL 105. Quantitative Methods and Their Applications to Public Policy
5 units, Spr (Rothwell)

INTERNATIONAL ECONOMICS REQUIREMENT

IPS 202. Topics in International Macroeconomics—(Same as ICA 202.) Topics: standard theories of open economy macroeconomics, exchange rate and stabilization policies, the economics of monetary unification and the European Monetary Union, and emerging markets financial and currency crises.
5 units, Win (Aturupane)

IPS 203. Issues in International Economics—(Same as ICA 203.) Topics in globalization, international trade and international trade policy, including trade and economic growth, regionalism, the World Trade Organization and the political economy of trade policy.
5 units, Spr (Aturupane)

COGNATE

Students must take 25 units in the cognate curriculum; IPS 204 is required. At least 15 units must be in one area of specialization and 10 units must be in two other areas of specializations. There are five areas of specialization: International Political Economy, Conflict/Security Studies, World Environmental Policy, Political and Economic Development, and Public Organizations and Policy Implementation.

INTERNATIONAL POLITICAL ECONOMY

IPS 204. Theories and Concepts in International Relations—(Same as ICA 204.) Seminar. Theoretical approaches and empirical issues in the study of world affairs. Applications to problems of cooperation and conflict. Issues include violent conflicts, trade and finance, and the environment and human rights, and normative theories of international relations surrounding these issues.
5 units, Aut (Kim)

IPS 222A. The Political Economy of the European Union—(Same as INTNLREL 122A.) EU institutions, the legislative process, policies, relations with the U.S., enlargement and the future of the EU. History and theories of EU integration. Democratic accountability of the institutions, and the emerging party system. Principal policies in agriculture, regional development, the internal market, single currency, and competition. Emphasis is on policies that affect the relations with the U.S. including trade and security. Results of the EU’s constitutional convention.
5 units, Win (Crombez)

IPS 230. Science, Technology, and Development—(Same as INTNLREL 130.) The rates of global expansion of science, technology, and information technology, comparing nations and world religions. The social impact of these trends primarily concerning economic development and notions of progress (democratization, human rights, welfare of local populations, and national security). Globalization, science and technology policy, development, commodification of the public good, and social change. Implications of science and technology globalization, as they shape the diverging trajectory of nation states.
5 units, Aut (Drori)

IPS 233. Introduction to Comparative and International Political Economy—(Same as ICA 233, INTNLREL 133.) Major theoretical approaches and empirical issues in international economic policies and outcomes. Review of economic theories underlying political conflicts. Topics include trade, monetary relations, sovereign debt, investment, migration and development. Comparison of developed and developing countries.
5 units, Spr (M. Kim)
IPS 238. Growth and Development: Theory and Policy Implications—(Same as ICA 238, INTNLREL 138.) Models of endogenous growth and their implications for economic policy. Likely topics include the effects of fiscal policy on factor accumulation; connection among inequality, redistributive policy, and economic growth; and trade policy and dynamic sources of comparative advantage. Prerequisite: graduate course in applied game theory. 5 units, Spr (Shelton)

IPS 249. The Economics and Political Economy of the Multilateral Trade System—(Same as INTNLREL 149.) The historical development of the multilateral trade system, the current agenda of the World Trade Organization, and prospects for trade liberalization. Emphasis is on the economic rationale for multilateral trade rules, the political problems facing countries in supporting further liberalization, and the challenges to the legitimacy of WTO procedures and practices. Issues include the greater participation of developing countries, the impact of new members, and the relationship between the WTO and other multilateral bodies. Guest speakers; student research paper presentations. 5 units, Win (Jostling)

IPS 282. Southeast Asia: Issues and Perspectives—(Same as INTNLREL 182.) While long conventional to praise the Association of Southeast Asian Nations for its success, regional crises since 1997 have fostered a view of ASEAN as impotent, irrelevant, or both. It is said to have enlarged too fast to the detriment of its coherence and effectiveness, and to rely too much on national sovereignty viewed as an anachronism in a globalizing, borderless, and democratizing world. Emphasis is on Singapore and Indonesia. 5 units, Spr (Emmerson)

EAST ASIAN STUDIES
EASTASN 200E. Globalization and the State in East Asia 5 units, Win (Jung)

ECONOMICS
ECON 224. Science, Technology, and Economic Growth 2-5 units, Aut (David)
ECON 265. International Finance and Open Economy Macroeconomics 2-5 units, Aut (McKinnon)
ECON 266. International Trade 2-5 units, Spr (Srinivasan)
ECON 269. International Financial Markets and Monetary Institutions 5 units, Win (Taylor)

MANAGEMENT SCIENCE AND ENGINEERING
MS&E 271. Global Entrepreneurial Marketing 4 units, Win, Spr (Ramfjel, Smith, Kosnik)

POLITICAL SCIENCE
POLISCI 312. Japanese Foreign Policy 5 units, Aut (Okimoto)
POLISCI 340S. Political Economy of Post-Communism 5 units, Win (Stoner-Weiss)
POLISCI 345R. Political Economy of Japan 5 units, Aut (Okimoto)
POLISCI 347S. Comparative Political Economy of Developed Democracies 3-5 units, Spr (Wren)
POLISCI 348. Chinese Politics: The Transformation and the Era of Reform 5 units (Oi) not given 2005-06
POLISCI 348S. Contemporary Chinese Foreign Relations 5 units, Spr (Miller)

SOCIOLOGY
SOC 214. Economic Sociology 5 units (Granovetter) not given 2005-06
SOC 217A. China Under Mao 5 units (Walder) not given 2005-06

CONFLICT/SECURITY STUDIES
IPS 204. Theories and Concepts in International Relations—For description, see “International Political Economy” subsection above. 5 units, Aut (Kim)
IPS 219. The Role of Intelligence in U.S. Foreign Policy—(Same as INTNLREL 119.) How intelligence supports U.S. national security and foreign policies. How it has been used by U.S. presidents to become what it is today; organizational strengths and weaknesses; how it is monitored and held accountable to the goals of a democratic society; and successes and failures. Current intelligence analyses and national intelligence estimates are produced in support of simulated policy deliberations. 5 units, Win (Hansen)
IPS 240C. The U.S., U.N. Peacekeeping, and Humanitarian War—(Same as INTNLREL 140C.) The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter’s provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan. 5 units, Spr (Patenaude)
IPS 266. Russia and Islam—(Same as INTNLREL 166.) Seminar. Focus is on 1985 to the present. The policies of Gorbachev toward the Muslim populace of the Soviet Union; how post-communist Russia under Yeltsin and Putin has dealt with its Muslim minorities; and the relationship of Russia to the newly independent states of Central Asia and the South Caucasus after the breakup of the USSR in 1991. The two major wars which Russia has fought with the secessionist Russian autonomous republic of Chechnya. 5 units, Win (Dunlop)

HISTORY
HISTORY 328. Circles of Hell: Poland in World War II 5 units (Jolluck) not given 2005-06
HISTORY 356. U.S.-China Relations: From the Opium War to Tiananmen 5 units, Win (Chang)

MANAGEMENT SCIENCE AND ENGINEERING
MS&E 293. Technology and National Security 3 units, Aut (Perry, Paté-Cornell)

POLITICAL SCIENCE
POLISCI 114S. International Security in a Changing World 5 units, Win (Sagan, Blacker, Perry)
POLISCI 114T. Major Issues in International Conflict Management 5 units, Spr (Stedman)
POLISCI 312R. Domestic Politics and International Conflict 5 units (Schultz) not given 2005-06
POLISCI 318S. State Building 5 units (Krasner) not given 2005-06

POLITICAL AND ECONOMIC DEVELOPMENT
IPS 204. Theories and Concepts in International Relations—For description, see “International Political Economy” subsection above. 5 units, Aut (Kim)
IPS 230. Science, Technology, and Development—(Same as INTNLREL 130.) For description, see “International Political Economy” subsection above.
5 units, Aut (Drori)

IPS 238. Growth and Development: Theory and Policy Implications—(Same as INTNLREL 138.) For description, see “International Political Economy” subsection above.
5 units, Spr (Shelton)

ECONOMICS

ECON 106. World Food Economy
5 units, Win (Falcon, Naylor)

ECON 214. Development Economics: Microeconomic Issues
2-5 units, Win (Tarozzi)

ECON 216. Development Economics and Growth: Macroeconomics
2-5 units, Aut (Attanasio)

ECON 217. Development Economics: Money and Finance
2-5 units (McKinnon) not given 2005-06

HISTORY

HISTORY 347E. Health and Society in Africa
5 units, Spr (Roberts)

HISTORY 379. Latin American Development: Economy and Society, 1800-2000
5 units, Aut (Frank)

HISTORY 381. Economic and Social History of the Modern Middle East
5 units, Win (Beinin)

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 249. Growth and Development
3 units, Sum (de La Grandville)

POLITICAL SCIENCE

POLISCI 141. The Global Politics of Human Rights
5 units, Win (Karl)

POLISCI 246R. Market-Oriented Reform and Development in Latin America
5 units, Spr (Packenham)

POLISCI 347S. Comparative Political Economy of Developed Democracies
3-5 units, Spr (Wren)

PUBLIC ORGANIZATIONS AND POLICY IMPLEMENTATION

IPS 204. Theories and Concepts in International Relations—For description, see “International Political Economy” subsection above.
5 units, Aut (Kim)

IPS 211. Education for All? The Global and Local in Public Policy Making in Africa—(Same as ICA 211, INTNLREL 111.) Although international institutions, national governments, and non-governmental organizations agreed in 1990 to promote education for all within a decade, the goal has not been achieved. The need in Africa is great but education systems are underfunded and overstressed, schools are crowded and poorly equipped, and teachers are overburdened and underprepared. Focus is on policy making in Africa and the intersection of policy processes and their political and economic dimensions. Case studies.
5 units, Spr (Samoff)

IPS 219. The Role of Intelligence in U.S. Foreign Policy—(Same as INTNLREL 119.) For description, see “Conflict/Security Studies” subsection above.
5 units, Win (Hansen)

IPS 231. Globalization and Organizations—(Same as INTNLREL 131.) How organizations act as the carriers of globalization processes by expanding worldwide, proliferating social procedures, establishing isomorphic structures, and diffusing cultural patterns. Political structures, international relations, commercial organizations, cultural institutions. Global organizational expansion, forms of organizational adaptation, notions of national sovereignty under global organizational expansion, and forms of national and international governance. Studies of global organizational fields including science, rights, environment, development, combining theoretical, comparative, and case study pieces. WIM
5 units, Win (Drori)

IPS 232. International Governance—(Same as ICA 232, INTNLREL 132.) Actors, issues, and problems. Role of states, international governmental organizations, nongovernmental organizations, and private entities in addressing global problems. Conflicts and intervention, trade and finance, development, the environment and health, and human rights. Problems in legitimacy, decision making, implementation, and effectiveness.
5 units, Win (M. Kim)

IPS 239. The Political Economy of Governance—(Same as ICA 239, INTNLREL 139.) Game theoretic models of political institutions. Emphasis is on performance of collective choice institutions in the presence of heterogeneous preferences, time-inconsistent preferences, asymmetric information, and uncertainty. Likely topics include collective action, free riding, and public goods; credibility, reputation, and transparency; corruption and lobbying; delegated authority; reform and fiscal adjustment; and elections and the volatility of economic policy. Prerequisite: graduate course in applied game theory.
5 units, Spr (Shelton)

IPS 240A. International Law and International Relations—(Same as INTNLREL 140A.) What is the character of international legal rules? Do they matter in international politics, and if so, to what degree? The foundational theories, principles, and sources of public international law. Prominent theories of international relations and how they address the role of law in international politics. Practical problems such as human rights, humanitarian intervention, and enforcement of criminal law. International law as a dynamic set of rules, at times influenced by power, at other times constraining it, but always essential to studying international relations.
5 units, Aut (Lutomski)

IPS 240C. The U.S., U.N. Peacekeeping, and Humanitarian War—(Same as INTNLREL 140C.) For description, see “Conflict/Security Studies” subsection above.
5 units, Spr (Patenaude)

IPS 314S. Decision Making in U.S. Foreign Policy—(Same as POLISCI 314S.) Priority given to students in International Policy Studies. The formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives are supplemented by case studies. Preparation of policy memorandum and substantial research paper or take-home final.
5 units, Spr (Blacker)

HISTORY

HISTORY 355. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis
5 units, Aut (Bernstein)

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 234. Organizations and Information Systems
4 units, Win (Tabrizi)

MS&E 254. The Ethical Analyst
1-3 units, Spr (Howard)
POLITICAL SCIENCE
POLISCI 346S. The Logic of Authoritarian Government
5 units (Haber) not given 2005-06

POLISCI 348T. AIDS, Literacy, and Land: Policy Challenges in Contemporary Africa
4-5 units, Win (Samoff)

POLISCI 362. New Economics of Organization
5 units, Spr (Weingast)

POLISCI 364. Politics and Organization
5 units, Win (Bendor)

POLISCI 365. Organizational Decision Making
5 units (Bendor) not given 2005-06

SOCIOLOGY
SOC 214. Economic Sociology
5 units (Granovetter) not given 2005-06

WORLD ENVIRONMENTAL POLICY
IPS 204. Theories and Concepts in International Relations — For description, see “International Political Economy” subsection above.
5 units, Aut (Kim)

5 units, Aut (M.W. Lewis)

IPS 261B. Global Human Geography: Europe and Americas — (Same as ICA 261B, INTNLREL 161B, HISTORY 106B.) Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.
5 units, Win (M.W. Lewis)

IPS 263. History and Geography of Contemporary Global Issues — (Same as ICA 163, INTNLREL 163, HISTORY 206.) The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of The New York Times and The Economist. Topics vary according to what is happening in the world. Student presentations.
5 units, Spr (M.W. Lewis)

CIVIL AND ENVIRONMENTAL ENGINEERING
CEE 171. Environmental Planning Methods
3 units, Win (Ortolano)

ECONOMICS
ECON 155. Environmental Economics and Policy
5 units, Spr (Goulder)

ECON 243. Economics of Environment
2-5 units, Win (Goulder)

MANAGEMENT SCIENCE AND ENGINEERING
MS&E 248. Economics of Natural Resources
3-4 units, Aut (Sweeney)

MS&E 250A. Engineering Risk Analysis
2-3 units, Win (Paté-Cornell)

INDEPENDENT STUDY
IPS 290. Master’s Thesis — For IPS students only. May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

IPS 299. Directed Reading — For IPS students only. May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

INTERNATIONAL RELATIONS
Director: Kenneth Schultz (Political Science)
Interim Director: Martin W. Lewis (International Relations)
Faculty Committee: Coit D. Blacker (Stanford Institute for International Studies), James Fearon (Political Science), Judith L. Goldstein (Political Science), Stephen H. Haber (Political Science), Timothy J. Josling (Stanford Institute for International Studies), Michael McFaul (Political Science), Ronald L. McKinnon (Economics), Michael Tomz (Political Science)

Affiliated Faculty: Barton Bernstein (History), Gordon Chang (History), Larry J. Diamond (Hoover Institution), Peter Duus (History), Amir Eshel (German Studies), Walter P. Falcon (Stanford Institute for International Studies), Zephyr Frank (History), Lawrence H. Goulder (Economics), David J. Holloway (History, Political Science, IIS), Kennell Jackson, Jr. (History), Terry L. Karl (Political Science), David M. Kennedy (History), Stephen D. Krasner (Political Science), Gail Lapidus (Stanford Institute for International Studies), Beatriz Magaloni (Political Science), Mark I. Mancall (History), Isabela Mares (Political Science), Robert McGinn (Management Science and Engineering), Rosamond Naylor (Stanford Institute for International Studies), Roger Noll (Economics), Jean C. Oi (Political Science), Daniel I. Okimoto (Political Science), Robert Packenham (Political Science), William J. Perry (Stanford Institute for International Studies, Management Science and Engineering), Richard Roberts (History), Scott Sagan (Political Science), Debra M. Satz (Philosophy), James J. Sheehan (History), Andrew Walder (Stanford Institute for International Studies, Sociology), Amir Weiner (History), Jeremy Weinstein (Political Science), Ann Wren (Political Science)

Other Affiliation: Byron Bland (Stanford Institute for International Studies), Christophe Crombez (Stanford Institute for International Studies), Gerald A. Dorfman (Hoover Institution), Gili S. Drori (International Relations), John Dunlop (Hoover Institution), Donald Emmerson (Stanford Institute for International Studies), Keith Hansen (International Relations), Katherine Jollick (History), Joe-youn Jung (International, Comparative and Area Studies), Moonhawk Kim (International, Comparative and Area Studies), Pawel Lutowski (International Relations), H. Lyman Miller (Hoover Institution), Bertrand Patenaude (Hoover Institution), Armin Rosencranz (Human Biology), Joel Samoff (Center for African Studies), Cameron Shelton (International, Comparative and Area Studies), Stephen Sedman (Political Science)

Program Office: Encina Hall West, Room 216
Mail Code: 94305-6045
Phone: (650) 723-4547
Web Site: http://irweb.stanford.edu

Courses in International Relations have the subject code INTNLREL.
For a complete list of subject codes, see Appendix.

International Relations (IR) is an interdisciplinary undergraduate major focusing on the study of the changing political, economic, and cultural relations among nation states. Students pursue a course of study in world politics that includes classes in political science, economics, history, and languages, focusing on a range of issues including but not limited to international security, international political economy, political and economic development, and democratization. All International Relations majors must spend at least one quarter overseas and show two-year proficiency in a foreign language.

The International Relations program provides students with both the foundational skills and specific knowledge necessary to analyze the behavior of nations. The major prepares students for a variety of careers in government, non-governmental organizations, and business, both domestic and international. In addition, many IR students go on to graduate school in law, business, economics, or political science. More information on IR can be found at http://irweb.stanford.edu.
UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Requirements for the major (65 units) are:

1. IR core courses (numbers 1-5):
   - POLISCI 1
   - POLISCI 110A or 110B or 110C or 110D or HISTORY 158
   - ECON 1 or 50 or 51 or 52
   - Two additional upper-division Economics courses from the IR approved course offerings lists

2. At least one of the following requirements (15 units):
   - At least one course designed as a writing intensive (WIM) for International Relations.
   - At least one course designated as writing intensive (WIM) for International Relations.
   - Completion of one quarter study overseas either through the Stanford Overseas Studies Program or an approved non-Stanford program.

3. Proficiency in a foreign language through two years of course work (second-year, third-quarter) or a proficiency exam.

FUNCTIONAL SPECIALIZATION

The three functional specializations are:

1. Comparative Political and Historical Analysis (CPHA)
2. Comparative Culture and Society (CCAS)
3. Comparative and International Political Economy (CIPE)

Students must complete a total of seven courses (35 units) for their functional specialization. Four courses must be from the student’s functional area (CPHA, CCAS, CIPE); two courses from a second track; and the final course from the third track (4-2-1). Consult the updated course offering lists available in the International Relations office or on the web at http://irweb.stanford.edu/ for IR approved courses in each track.

AREA SPECIALIZATION

The area specializations are: Africa, Europe, Latin America, and Russia/East Europe. Students must complete a total of seven courses (35 units) with five courses directly related to their area specialization. Three of these five courses must be in one of the three tracks (CPHA, CCAS, CIPE), one course in a second track, and the final course in the third track. The ten remaining units must be fulfilled by comparative or further area course work.

Students must also demonstrate proficiency in a language, other than English, commonly spoken in the area chosen by completing two years of language study or by passing a second-year, third-quarter proficiency exam. Students can fulfill the overseas studies requirement by participating in an IR-approved Overseas Studies Program in the area of specialization.

Check the IR office for updated information about the area specialization requirements.

DECLARING THE MAJOR

The International Relations major must be declared no earlier than the beginning of sophomore year and no later than the end of the second quarter of the junior year. Students must submit an acceptable proposal to the director of the program and declare IR on Axess. Students completing a double major, or fulfilling International Relations as a secondary major are also required to file a proposal by the end of the second quarter of the junior year.

MINORS

A minor in International Relations is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. Declaration of the minor must take place no later than the end of the second quarter of the junior year. To declare, complete the application for a minor on Axess.

Students complete the minor by taking seven unduplicated courses (35 units) from the IR curriculum, including the following:

1. POLISCI 1
2. Two of these four courses: POLISCI 110A,B,C,D
3. Four courses from one of the three tracks (CPHA, CCAS, CIPE), or four courses relating to the same geographic region (Africa, Europe, Latin America, and Russia/East Europe). Consult the updated course offering lists available in the International Relations office or on the web site.

HONORS PROGRAM

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students must submit their honors thesis proposal in the Spring Quarter of their junior year; check with IR office for the exact deadline.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students are required to enroll in INTNLREL 290. International Relations Honors Field Research, in Spring Quarter of their junior year and consider participating in Honors College. In their senior year, honors students enroll in research units each quarter with their faculty adviser, and present a formal defense of their thesis in mid-May. Students must receive at least a grade of ‘B+’ in order to graduate with honors in International Relations.

GRADUATE PROGRAM

MASTER OF ARTS

It is possible for students majoring in International Relations to work simultaneously for a coterminal master’s degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to ensure that they fulfill the degree requirements in both fields. For information on the M.A. program in International Policy Studies, see the “International Policy Studies” section in this bulletin. For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement for International Relations.

CORE

ECONOMICS

ECON 1. Elementary Economics
5 units, Aut (Clerici-Arias), Win (Rangel), Spr (Stinem), Sum (Staff)

ECON 50. Economic Analysis I
5 units, Aut (Tendall), Win (Abramitzky)

ECON 51. Economic Analysis II
5 units, Win (Tendall), Spr (Malker), Sum (Staff)

ECON 52. Economic Analysis III
5 units, Aut (Terlilt), Spr (Klenow), Sum (Staff)
ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists
5 units, Aut, Win (Stimel)

HISTORY
HISTORY 158. The United States Since 1945
4-5 units, Win (Bernstein)

POLITICAL SCIENCE
POLISCI 1. Introduction to International Relations
5 units, Aut (Tonz)

POLISCI 110A. Sovereignty and Globalization
5 units (Krasner) not given 2005-06

POLISCI 110B. Strategy, War, and Politics
5 units, Spr (Kapur)

POLISCI 110C. America and the World Economy — WIM
5 units, Win (Goldstein)

POLISCI 110D. War and Peace in American Foreign Policy
5 units (Schultz) not given 2005-06

POLISCI 150A. Political Methodology I
5 units, Aut (Rivers)

STATISTICS
STATS 60/160. Introduction to Statistical Methods: Precalculus
5 units, Aut, Win, Spr, Sum (Staff)

ADDITIONAL OFFERINGS
The courses listed below fulfill the IR functional specialization track requirements in CPHA, CCAS, and CIPE, and can fulfill the area specialization option in Africa, Europe, Latin America, or Russia/East Europe. See http://irweb.stanford.edu or the IR program office for specific course designations. For course descriptions and General Education Requirement (GER) information, see the respective department listings. Additional relevant courses may be offered; for updated information, visit the office or the web site.

COMPARATIVE POLITICAL AND HISTORICAL ANALYSIS (CPHA)

INTNLREL 114D. Democracy, Development, and the Rule of Law — (Same as POLISCI 114D.)
Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Policy instruments used in international democracy, rule of law, and development promotion efforts.
5 units, Aut (Stoner-Weiss)

INTNLREL 119. The Role of Intelligence in U.S. Foreign Policy — (Same as IPS 219.)
How intelligence supports U.S. national security and foreign policies. How it has been used by U.S. presidents to become what it is today; organizational strengths and weaknesses; how it is monitored and held accountable to the goals of a democratic society; and successes and failures. Current intelligence analyses and national intelligence estimates are produced in support of simulated policy deliberations.
5 units, Win (Hansen)

INTNLREL 131. Globalization and Organizations — (Same as IPS 231.)
How organizations act as the carriers of globalization processes by expanding worldwide, proliferating social procedures, establishing isomorphic structures, and diffusing cultural patterns. Political structures, international relations, commercial organizations, cultural institutions. Global organizational expansion, forms of organizational adaptation, notions of national sovereignty under global organizational expansion, and forms of national and international governance. Studies of global organizational fields including science, rights, environment, development, combining theoretical, comparative, and case study pieces. WIM
5 units, Win (Drori)

INTNLREL 132. International Governance — (Same as ICA 232, IPS 232.)
Actors, issues, and problems. Role of states, international governmental organizations, nongovernmental organizations, and private entities in addressing global problems. Conflicts and intervention, trade and finance, development, the environment and health, and human rights. Problems in legitimacy, decision making, implementation, and effectiveness.
5 units, Win (M. Kim)

INTNLREL 140A. International Law and International Relations — (Same as IPS 240A.)
What is the character of international legal rules? Do they matter in international politics, and if so, to what degree? The foundational theories, principles, and sources of public international law. Prominent theories of international relations and how they address the role of law in international politics. Practical problems such as human rights, humanitarian intervention, and enforcement of criminal law. International law as a dynamic set of rules, at times influenced by power, at other times constraining it, but always essential to studying international relations.
5 units, Aut (Lutomski)

INTNLREL 163. History and Geography of Contemporary Global Issues — (Same as ICA 163, IPS 263, HISTORY 206.)
The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of The New York Times and The Economist. Topics vary according to what is happening in the world. Student presentations. GER:DB-SocSci, WIM
5 units, Spr (M. W. Lewis)

INTNLREL 182. Southeast Asia: Issues and Perspectives — (Same as IPS 282.)
While long conventional to praise the Association of Southeast Asian Nations for its success, regional crises since 1997 have fostered a view of ASEAN as impotent, irrelevant, or both. It is said to have enlarged too fast to the detriment of its coherence and effectiveness, and to rely too much on national sovereignty viewed as an anachronism in a globalizing, borderless, and democratizing world. Emphasis is on Singapore and Indonesia.
5 units, Spr (Emmerson)

INTNLREL 205. Ethics, Technology, and International Relations — (Same as IPS 285.)
Applicability of ethical principles to the analysis of international affairs including border control, intervention, transborder diffusion of national cultural products, foreign aid, national and international cultural patrimony, and war and terrorism. The role of technology in challenging traditional thinking about ethical issues in international affairs. Emphasis is on the interplay of theory and practice. Case studies. Limited enrollment.
5 units, Spr (McGinn)

HISTORY
HISTORY 102. The History of the International System — WIM
5 units, Spr (Sheehan)

HISTORY 103E. History of Nuclear Weapons
5 units (Holloway) not given 2005-06

HISTORY 103G. The History of the Cold War
5 units (Naimark) not given 2005-06

HISTORY 120C. 20th-Century Russian and Soviet History
5 units (Staff) not given 2005-06

HISTORY 125. 20th-Century Eastern Europe
5 units, Win (Jolluck)

HISTORY 137. The Holocaust
5 units (Rodrigue) not given 2005-06

HISTORY 145B. Africa in the 20th Century
5 units (Roberts) not given 2005-06

HISTORY 150C. The United States in the Twentieth Century
5 units (Staff) not given 2005-06
POLISCI 240L. Politics of the Korean Peninsula
5 units, Aut (Kang)

POLISCI 241S. Regime Change: Comparative Theories
5 units (McFaul) not given 2005-06

POLISCI 245R. Politics in Modern Iran
5 units, Win (Milani)

COMPARATIVE CULTURE AND SOCIETY (CCAS)

INTNLREL 103. History, Memory, and Cultural Discourse in Germany, Austria and Israel—Comparative, theoretical, and interdisciplinary approach to literary, visual, and cinematic representations and appropriations of WW II, the Holocaust, and the founding of Israel. The relationships among representation, memorialization, and cultural and political discourses: what are the implications of different modes of historical representation? How can the memory boom of the 90s and the beginning of the 21st century be explained? How does this interest in history and memory relate to cultural globalization? In English.
5 units, Spr (Eshel)

INTNLREL 111. Education for All? The Global and Local in Public Policy Making in Africa—(Same as ICA 211, IPS 211.) Although international institutions, national governments, and nongovernmental organizations agreed in 1990 to promote education for all within a decade, the goal has not been achieved. The need in Africa is great but education systems are underfunded and overstressed, schools are crowded and poorly equipped, and teachers are overburdened and underprepared. Focus is on policy making in Africa and the intersection of policy processes and their political and economic dimensions. Case studies.
5 units, Spr (Samoff)

INTNLREL 114D. Democracy, Development, and the Rule of Law—(Same as POLISCI 114D.) For description, see “Comparative Political and Historical Analysis” subsection above.
5 units, Aut (Stoner-Weiss)

INTNLREL 140C. The U.S., U.N. Peacekeeping, and Humanitarian War—(Same as IPS 240C.) The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter’s provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan.
5 units, Spr (Patenaude)

INTNLREL 141B. Camera as Witness: International Human Rights Documentaries—(Same as HUMNTIES 197B, SLAVGEN 197B.) Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers. GER:DB-Hum
5 units, Aut (Bojic)

INTNLREL 141C. Camera as Witness: A Forum for Global Dialogue—(Same as HUMNTIES 197C, SLAVGEN 197C.) Challenges facing film makers documenting the struggle for human rights including communication of complex situations to an international audience, interpreting foreign cultures and politics, and film maker roles as artists, activists, and journalists. Meetings with filmmakers. GER:DB-Hum
5 units, Spr (Bojic)

5 units, Aut (M.W. Lewis)

POLISCI 218. U.S. Relations in Iran
5 units, Aut (Milani)

POLISCI 140L. China in World Politics
5 units, Win (Kang)

POLISCI 141R. Russian Politics
5 units, Aut (Dakir)

POLISCI 142R. Representative Government in Europe
5 units (Wren) not given 2005-06

POLISCI 147. Comparative Democratic Development
5 units, Win (Diamond)

POLISCI 148. Chinese Politics: The Transformation and the Era of Reform
5 units (Oi) not given 2005-06

POLISCI 148S. The U.S. and Asia During the Cold War
5 units, Win (Miller)

POLISCI 149S. Islam and the West
5 units, Spr (Milani)

POLISCI 221C. Historiography of the Soviet Union
5 units (Weiner) not given 2005-06

POLISCI 223S. Stalin and Europe; Europe and Stalin
5 units (Naimark) not given 2005-06

POLISCI 228. Circles of Hell: Poland in World War II
5 units (Jolluck) not given 2005-06

POLISCI 252. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis
5 units, Aut (Bernstein)

POLISCI 256. U.S.-China Relations: From the Opium War to Tiananmen
5 units, Win (Chang)
INTNLREL 161B. Global Human Geography: Europe and Americas—(Same as ICA 161B, IPS 261B, HISTORY 106B.) Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.
5 units, Win (M.W. Lewis)

INTNLREL 166. Russia and Islam—(Same as IPS 266.) Seminar. Focus is on 1985 to the present. The policies of Gorbachev toward the Muslim populace of the Soviet Union; how post-communist Russia under Yeltsin and Putin has dealt with its Muslim minorities; and the relationship of Russia to the newly independent states of Central Asia and the South Caucasus after the breakup of the USSR in 1991. The two major wars which Russia has fought with the secessionist Russian autonomous republic of Chechnya. GER::EC-GlobalCom
5 units, Win (Danlop)

INTNLREL 205. Ethics, Technology, and International Relations—For description, see “Comparative Political and Historical Analysis” subsection above.
5 units, Spr (McGinn)

CULTURAL AND SOCIAL ANTHROPOLOGY
CASA 77/277. Japanese Society and Culture
5 units, Win (Inoue)

ECONOMICS
ECON 143. Ethics in Economics Policy
5 units (Hammond) not given 2005-06

HISTORY
HISTORY 147G. African History in Novels and Film
5 units, Spr (Jackson)

HISTORY 185B. Jews in the Modern World
5 units, Spr (Zipperstein)

HISTORY 221B. The Woman Question in Modern Russia
5 units, Win (Jolluck)

HISTORY 227. East European Women and War in the 20th Century
5 units, Aut (Jolluck)

HISTORY 245E. Health and Society in Africa
5 units, Spr (Roberts)

HISTORY 246. Successful Futures for Africa: An Inventory of the 1970s-2000s
5 units, Aut (Jackson)

HISTORY 246S. Popular Culture in Africa
5 units (Jackson) not given 2005-06

HISTORY 248S. African Societies and Colonial States
5 units (Roberts) not given 2005-06

HISTORY 281. Economic and Social History of the Modern Middle East
4-5 units, Win (Beinin)

HISTORY 287S. Research Seminar on the Modern Middle East
3-5 units (Beinin) not given 2005-06

HISTORY 295J. Chinese Women’s History
5 units, Spr (Sommer)

HISTORY 424A.B. The Soviet Civilization
5 units (Weiner) not given 2005-06

JAPANGEN 51. Japanese Business Culture
1-5 units, Win (Dasher)

PHILOSOPHY
PHIL 171. Political Philosophy
4 units, Win (Satz)

POLITICAL SCIENCE
POLISCI 141. The Global Politics of Human Rights
5 units, Win (Karl)

POLISCI 215. Explaining Ethnic Violence—WIM
5 units, Spr (Fearon)

SCIENCE, TECHNOLOGY, AND SOCIETY
STS 110. Ethics and Public Policy
5 units, Win (McGinn)

SOCIOLOGY
SOC 110. Politics and Society
5 units (Meyer) not given 2005-06

SOC 111. State and Society in Korea
5 units (Shin) not given 2005-06

SOC 117A. China Under Mao
5 units (Walder) not given 2005-06

COMPARATIVE INTERNATIONAL POLITICAL ECONOMY (CIPE)
INTNLREL 114D. Democracy, Development, and the Rule of Law—(Same as ICA 114D, POLISCI 114D.) For description, see “Comparative Political and Historical Analysis” subsection above.
5 units, Aut (Stoner-Weiss)

INTNLREL 122A. The Political Economy of the European Union—(Same as IPS 222A.) EU institutions, the legislative process, policies, relations with the U.S., and enlargement and the future of the EU. History and theories of EU integration. Democratic accountability of the institutions, and the emerging party system. Principal policies in agriculture, regional development, the internal market, single currency, and competition. Emphasis is on policies that affect the relations with the U.S. including trade and security. Results of the EU’s constitutional convention.
5 units, Win (Crombez)

INTNLREL 130. Science, Technology, and Development—(Same as IPS 230.) The rates of global expansion of science, technology, and information technology, comparing nations and world religions. The social impact of these trends primarily concerning economic development and notions of progress (democratization, human rights, welfare of local populations, and national security). Globalization, science and technology policy, development, commodification of the public good, and social change. Implications of science and technology globalization, as they shape the diverging trajectory of nation states. WIM
5 units, Aut (Drori)

INTNLREL 133. Introduction to Comparative and International Political Economy—(Same as ICA 233, IPS 233.) Major theoretical approaches and empirical issues in international economic policies and outcomes. Economic theories underlying political conflicts. Topics include trade, monetary relations, sovereign debt, investment, migration and development. Comparison of developed and developing countries.
5 units, Spr (M. Kim)

INTNLREL 135 Environment and Growth in Developing Countries—Seminar. The environmental and development policies of eight developing countries as they cope with the pressures of economic growth, pollution, and resource depletion. Countries include China, India, Nigeria, and Brazil; class chooses four more. WIM
5 units, Aut (Rosencranz)
INTNLREL 138. Growth and Development: Theory and Policy Implications—(Same as ICA 238, IPS 238.) Models of endogenous growth and their implications for economic policy. Likely topics include the effects of fiscal policy on factor accumulation; connection among inequality, redistributive policy, and economic growth; and trade policy and dynamic sources of comparative advantage. Prerequisite: graduate course in applied game theory.
5 units, Spr (Shelton)

INTNLREL 139. The Political Economy of Governance—(Same as ICA 239, IPS 239.) Game theoretic models of political institutions. Emphasis is on performance of collective choice institutions in the presence of heterogeneous preferences, time-inconsistent preferences, asymmetric information, and uncertainty. Likely topics include collective action, free riding, and public goods; credibility, reputation, and transparency; corruption and lobbying; delegated authority; reform and fiscal adjustment; and elections and the volatility of economic policy. Prerequisite: graduate course in applied game theory.
5 units, Spr (Shelton)

INTNLREL 143A. Nongovernmental Organizations and Development in Poor Countries—(Same as ICA 143, POLISCI 143.) How nongovernmental organizations affect economic growth, equity, political stability, and prospects for democracy in poor countries. Do NGOs contribute to these goals? What is reasonable to expect from the NGO sector? Interactions among NGOs from wealthy and poor countries, governments, international financial institutions, and multinational corporations. GER:DB-SocSci
5 units, Win (Abernethy)

INTNLREL 149. The Economics and Political Economy of the Multilateral Trade System—(Same as IPS 249.) The historical development of the multilateral trade system, the current agenda of the World Trade Organization, and prospects for trade liberalization. Emphasis is on the economic rationale for multilateral trade rules, the political problems facing countries in supporting further liberalization, and the challenges to the legitimacy of WTO procedures and practices. Issues include the greater participation of developing countries, the impact of new members, and the relationship between the WTO and other multilateral bodies. Guest speakers; student research paper presentations.
5 units, Win (Josling)

EAST ASIAN STUDIES

EASTASN 100E. Political Economy of Development and Reform in East Asia
5 units, Spr (Jung)

INTRODUCTION TO THE HUMANITIES PROGRAM
Director: to be announced
Assistant Vice Provost and Associate Director: Ellen Woods
Department Offices: Building 250, Room 251G
Mail Code: 94305-2020
Department Phone: (650) 723-0944
Email: ihum@vpue.stanford.edu
Web Site: http://ihum.stanford.edu

Courses given in Introduction to the Humanities Program have the subject code IHUM. For a complete list of subject codes, see Appendix.

Introduction to the Humanities offers courses which satisfy a three quarter General Education Requirement (GER) for first-year students. The purpose of the Introduction to the Humanities (IHUM) requirement is to build an intellectual foundation in the study of human thought, values, beliefs, creativity, and culture. Introduction to the Humanities courses enhance skills in analysis, reasoning, argumentation, and oral and written expression, thus helping to prepare students for more advanced work in the humanities, and for work in other areas such as the sciences, social sciences, and engineering.

The IHUM requirement may be satisfied in two different ways:

Introduction to the Humanities courses (a one quarter, interdisciplinary course followed by a two quarter, course sequence), or

The Program in Structured Liberal Education (an intensive, three quarter, residence-based program satisfying the IHUM requirement, the University Writing and Rhetoric Requirement, and one additional General Education Disciplinary Breadth Requirement in the Humanities).

COURSES

INTRODUCTION TO THE HUMANITIES

Students enrolled in Introduction to the Humanities courses satisfy the first-year requirement by pairing a one quarter interdisciplinary course in Autumn Quarter with a two quarter sequence in Winter and Spring quarters. The Autumn Quarter courses hone skills in humanistic disciplines through close reading and critical investigation of a limited number of works as preparation for further work in the humanities and, specifically, for any one of the Winter-Spring sequences.

AUTUMN

IHUM 46. Visions of Mortality — Anyone reading this is alive, and so will someday die. Issues arising from these facts of life and death beginning with the most fundamental questions arising from first-person confrontation with thoughts of one’s own mortality. Is death bad for a person, and if so, why? What can the badness or the indifference of death tell us about what makes life good? If death is the permanent end of existence, does this make human choices arbitrary, and life meaningless? GER: IHUM-1
5 units, Aut (Barrett, Bobonich)
IHUM 51. Transformations: The Intersection of High Art and Contemporary Culture—Othello, Zarathustra, and enlightenment humanism from initial occurrences through moments of reemergence in the 20th-century Western imagination. Transformations across media and contributions to modern constructions of the self and the human condition. GER:IHUM-1
5 units, Aut (Hinton, Stephens)

IHUM 53. Representing Nature: The Boundaries of the Human—The place of human beings in the natural world as influenced by values, beliefs, and cultures, all of which change over time. How modern writers represent and conceptualize the natural world, and how human beings include themselves as part of the natural world or define themselves against it. GER:IHUM-1
5 units, Aut (Nightingale, White)

IHUM 55. The Literature of Crisis—Most human lives contain major turning points or crises that transform an individual’s development. Classical, medieval, and Renaissance texts illustrating crises in the lives of authors and characters, and cultural crises that have altered the course of human history. Emphasis is on the conceptual framework to understand and cope with crisis. GER:IHUM-1
5 units, Aut (Evans, McCall)

IHUM 56. Old World Encounters: Civilizations in Dialogue Before the Modern Age—Five moments of intellectual encounter among the far-flung civilizations of the eastern hemisphere in the premodern and early modern eras. Readings are landmark works of cultural translation and ethnographic analysis, penned by scholar travelers from across the old world, and associated with large-scale cultural movements that refashioned the human landscapes of the eastern hemisphere. GER:IHUM-1
5 units, Aut (Lewis, Wigen)

IHUM 57. The Human and The Machine—Shifting boundaries between the mechanical and the human: how humans connect and interact with machines, and how they may be conceived, designed, and manipulated as machines. This history of thinking about people, society, and machines from Plato and his antecedents to contemporary dilemmas over biotechnology. Paradigms include ethical issues concerning biological and social engineering and creationist arguments for intelligent design that reveal the work of God. GER:IHUM-1
5 units, Aut (Lowood, Schnapp, Shanks)

IHUM 61. Race, Gender, and the Arts of Survival—How do men and women survive physically, intellectually, creatively, and spiritually? Survival as represented in works that model strategies to overcome physical deprivation including enslavement, castration, religious persecution, and gender discrimination. How to survive the constraints of gender, race, nation, and history: for what purpose and at what cost does one survive? What are the possibilities for effecting social and personal change? Genres include drama, fiction, epistolaries, and a slave narrative. GER:IHUM-1
5 units, Aut (Elam, Elam)

IHUM 62. Conflict, Cooperation, and Human Nature—Forms of social interaction and their relationship with what makes people human. Focus is on the construction of family systems, warfare, and slavery as uniquely human activities. How people manipulate classifications such as the nonhuman in an effort to define a potential spouse, an opponent in war, or a slave. Sources include anthropology, history, and comparative perspectives. GER:IHUM-1
5 units, Aut (Hilde, Jones)

IHUM 63. Freedom, Equality, Difference—Which freedoms should a just society promote and which should be curtailed for the sake of justice? What equalities properly concern government and how can the achievement of equality be reconciled with respect for freedom? What roles should social and political institutions take in guaranteeing freedom and equality? Focus is on interdisciplinary inquiry including political philosophy, education, literature, history, and law. Abstract ideas and case histories, using one to shed light on the other. GER:IHUM-1
5 units, Aut (Callan, Palumbo-Liu, Satz)

IHUM 64. Journeys—Works spanning 2,300 years, diverse cultural and historical situations, and different forms and genres, and which present essential aspects of the journey from birth to death. These texts trace moral, spiritual, and emotional passages within that one great journey, passages that challenge and transform people as they advance toward what poet Thomas Gray called the inevitable hour. GER:IHUM-1
5 units, Aut (Woff, Yearley)

WINTER-SPRING SEQUENCES

IHUM 2. Epic Journeys, Modern Quests—Two quarter sequence. Great religious, philosophical, and literary texts that have addressed timeless questions about human identity and the meaning of human life. Focus is on the epic tradition in the ancient and classical worlds and its transformations or abandonment in modernity. Compares conceptions of the afterlife. How traditions about the afterlife are created and appropriated. The diminished importance of the dead and increased emphasis on the power of the living in literary genres. GER:IHUM-2,3
IHUM 3. 5 units, Win (Freccero, Harrison)
IHUM 3. 5 units, Spr (Edelstein, Landy)

IHUM 5A.B. Worlds of Islam: Global History and Muslim Societies—Two quarter sequence. Chronological and geographical overview of times and places in which Islam has been the dominant cultural framework. Elements of the Muslim faith and its related political, social, and cultural practices from the 7th-century rise of Islam to the recent past. Geographic range includes the historic Arab heartland of Islam, Africa, Persia, the Ottoman Empire, and Central Asia. GER:IHUM-2,3
IHUM 5A: 5 units, Win (Beinin, Crews, Hanretta, Rodrigue)
IHUM 5B: 5 units, Spr (Beinin, Crews, Hanretta, Rodrigue)

IHUM 8A,9A. Myth and Modernity: Culture in Germany—Two quarter sequence. The tension between tradition and progress through an examination of German cultural history. The experience of modernity typically involves overcoming or denying the past, but that same past can return to haunt the present in the form of myths. The interplay of myth and modernity, the irrationality of narrative, and the reason of progress, through the example of German culture, especially in literature, from the heroic epics of the medieval era through the catastrophes of the last century. GER:IHUM-2,3
IHUM 8A: 5 units, Win (Berman)
IHUM 9A: 5 units, Spr (Eshel, Strum)

IHUM 23A.B. The Fate of Reason—Two quarter sequence. The historical fate of Socrates’ proposal that only reason can provide answers to questions of what to believe and how to act. The fate of reason in cultural contexts including medieval Christian, Islamic, and Jewish. Themes include free will, personal identity, the authority of morality, and the tension between reason as power for improving life and as insufficient means for reaching important truths. GER:IHUM-2,3
IHUM 23A. 5 units, Win (Bobonich)
IHUM 23B. 5 units, Spr (Hussain)
IHUM 25A,B. Art and Ideas: Performance and Practice — Two quarter sequence. Issues in aesthetics and performance through examples from the classical age to the present. Concepts of art and practice intersecting with topics such as imitation, instruction through pleasure, the creative process, perception, social analysis, and embodiment as a form of knowledge. Texts and performances from drama, dance, music, visual arts, and performance art practices that reflect aesthetic ideas. GER:IHUM-2,3
  IHUM 25A. 5 units, Win (Rayner)
  IHUM 25B. 5 units, Spr (Ross)

IHUM 27A,B. Encounters and Identities — Two quarter sequence. The formation of ideas about individual and collective identities in S. Africa, W. Europe, and the U.S. Contemporary ideas about identity, including national, racial, ethnic, and gender identity; historical encounters and social transformations linking these areas. Challenging popular assumptions about the origins of identities through similarities and differences among ideas of individual and collective identity in different regions of the world. GER:IHUM-2,3
  IHUM 27A. 5 units, Win (Ferguson)
  IHUM 27B. 5 units, Spr (Collier)

IHUM 28A,B. Poetic Justice: Order and Imagination in Russia — Two quarter sequence. The difference between justice and law in 19th- and 20th-century Russian writers. Focus is on the notion of poetic justice: the artistic representation of order whether divine, natural, or human. Goal is to heighten awareness of familiar narratives, mythologies, ideas, and images, and to convey a sense of a long-established national culture with its own dynamic vision. GER:IHUM-2,3
  IHUM 28A. 5 units, Win (Safran)
  IHUM 28B. 5 units, Spr (Freidin)

IHUM 31A,B. Ancient Empires — Two quarter sequence. A decisive place and period in world history: the Mediterranean basin from 800 B.C. to 400 A.D. Great empires (Assyria, Persia, Macedonia, and Rome) were carved out in war and changed the course of human development. Why did these empires arise when and where they did, how did they work, and what is their legacy? Their economic, religious, and artistic achievements balanced against genocide, enslavement, and warfare using evidence from ancient literature and archaeology, and tracing the roles of religion, property, and freedom. What they mean for the world today. GER:IHUM-2,3
  IHUM 31A. 5 units, Win (Morris)
  IHUM 31B. 5 units, Spr (Trimble)

IHUM 37A,B. Literature into Life: Alternative Worlds — Two quarter sequence. The genres of poetry, drama, and fiction from the Renaissance to the present day, focusing on the relationship between art and life. How does literature come alive on the page? What goes into a vivid representation of lived social experience? How do writers respond to historical crises? Parallel cases from art and music. GER:IHUM-2,3
  IHUM 37A. 5 units, Win (Riggs)
  IHUM 37B. 5 units, Spr (Felshtiner)

IHUM 68A,B. Approaching Religion: Tradition, Transformation, and the Challenge of the Present — Two quarter sequence. Challenges facing the world’s religions in responding to issues such as globalization, feminism, science, pluralism, and individualism. How Judaism, Buddhism, and Islam changed or resisted change in their founding moments. Encounters between these religious traditions and the forces of contemporary social change. GER:IHUM-2,3
  IHUM 68A. 5 units, Win (Fonrobert, Zimermann)
  IHUM 68B. 5 units, Spr (Eisen)

PROGRAM IN STRUCTURED LIBERAL EDUCATION

Track Chair: Mark Mancall (History)

Structured Liberal Education (SLE) offers students an intensive, three-quarter, residence-based learning experience, which simultaneously satisfies the IHUM requirement, both of the University Writing and Rhetoric requirements, and the General Education Requirement in the humanities (GER:DB-Hum).

SLE encourages students to live a life of ideas in an atmosphere that stresses critical thinking and a tolerance for ambiguity. The residence hall is the informal setting for lectures and small-group discussions. SLE instructors work closely with students and participate in dorm life. SLE enhances the classroom experience with other residence-based educational activities: a weekly film series throughout the year and a student-produced play each quarter.

SLE students receive intensive and individualized writing instruction from a team of instructors and peer writing tutors. See the “Structured Liberal Education” section of this bulletin.

9 units, Aut, Win, 10 units, Spr (Mancall, Staff)

TAUBE CENTER FOR JEWISH STUDIES

Program Director: Steven Zipperstein
Associate Program Director: Vered Shemtov
Academic Advisory Committee: Zachary Baker (Stanford University Libraries), Joel Beinin (History), Arnold Eisen (Religious Studies), Amir Eshel (German Studies), John Felshtiner (English), Charlotte Fonrobert (Religious Studies), Adriane Leveen (Religious Studies), Mark Mancall (History), Norman Naimark (History), Jack Rakove (History), Aron Rodrigue (History), David Rosenhan (Law; emeritus), Gabriella Safran (Slavic Languages and Literatures), Vered Shemtov (Division of Language and Literature), Peter Stansky (History), Sam Wineburg (Education), Amir Weiner (History), Steven Zipperstein (History)

Center Offices: Building 240, Room 203
Mail Code: 94305-2190
Phone: (650) 723-7589
Email: jewish.studies@stanford.edu
Web Site: http://www.stanford.edu/dept/jewishstudies/

Courses in Jewish Studies have the subject code JEWISHST. For a complete list of subject codes, see Appendix.

The Taube Center for Jewish Studies investigates all aspects of Jewish life in history, literature, language, and culture from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The Center annually sponsors the Donald and Robin Kennedy Undergraduate Award for the best undergraduate essay on any theme in Jewish Studies, and it coordinates the annual Dorot Travel Grants for summer study in Israel.

Graduate students enroll in the program through the departments of English, History, or Religious Studies, and must meet the requirements of those departments.

UNDERGRADUATE PROGRAMS

INDIVIDUALLY DESIGNED MAJOR

The Individually Designed Major in Jewish Studies permits interested students to focus their attention on the broad field of Jewish Studies and, at the same time, to expand their knowledge of one or another related fields.

Each major should complete at least 75 units, all in courses at or above the 100 level (or their equivalent). A maximum of 15 of these 75 units may be taken on a credit/no credit basis. A maximum of 5 of these 75 units may...
be taken in individual study or directed reading. Students must present evidence that demonstrates their ability to do independent work and have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee. Each major must obtain sponsorship from three faculty members, one of whom is the student’s primary adviser, and from one of the Directors of the Taube Center for Jewish Studies. Details about the written procedures and documents necessary for application for an individually designed major can be obtained at the Undergraduate Advising Programs, Sweet Hall, first floor, (650) 723-2426.

**REQUIREMENTS**
The faculty members in Jewish Studies have designed the following structure for the major:

<table>
<thead>
<tr>
<th>Category</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>History and Society:</td>
<td></td>
</tr>
<tr>
<td>Students must take one course in each of the three periods:</td>
<td></td>
</tr>
<tr>
<td>biblical and ancient, medieval and modern, and contemporary</td>
<td>20</td>
</tr>
<tr>
<td>Religion:</td>
<td></td>
</tr>
<tr>
<td>Biblical, rabbinic, medieval, modern</td>
<td>20</td>
</tr>
<tr>
<td>Literature:</td>
<td></td>
</tr>
<tr>
<td>Hebrew, Holocaust, American Jewish</td>
<td>15</td>
</tr>
<tr>
<td>Hebrew Language (second year or beyond):</td>
<td></td>
</tr>
<tr>
<td>Students who demonstrate by examination that they have completed the equivalent of at least two years of university-level Modern Hebrew may apply the 12 units required in this category to more work in one or the other categories required by the major, with the approval of their primary adviser.</td>
<td>12</td>
</tr>
<tr>
<td>Ancillary Courses:</td>
<td></td>
</tr>
<tr>
<td>Ancient history, medieval history, modern European history, history of philosophy, Islam, Christianity</td>
<td>8-10</td>
</tr>
<tr>
<td>Total number of units required:</td>
<td>75-77</td>
</tr>
</tbody>
</table>

Students planning an Individually Designed Major in Jewish Studies are also strongly urged to write an honors thesis. Students interested in majoring in Jewish Studies should discuss this with their adviser(s) when discussing the major itself. Up to 10 honors thesis units may be included in the major.

No course proposed for the major may be counted as fulfilling more than one required category in the proposed major. Transfer credits from other universities must be approved by the appropriate Stanford authorities.

**MINORS**
The Jewish Studies minor is open to students in any department who wish to enrich their studies through an acquisition of knowledge in Jewish history, thought, religion, literature, and society. Students must complete their declaration of the minor no later than the last day of the quarter four quarters before degree conferral. For example, a student graduating in Spring Quarter must declare the minor no later than the last day of Spring quarter of the junior year.

Students must complete six courses for a maximum of 36 units toward the minor. All courses of study should be discussed and approved by a Jewish Studies faculty member in the departments of English, History, or Religious Studies, and by the program director. In addition to suggested introductory courses, students are also encouraged to take courses in Hebrew language as part of their Jewish studies minor, and are granted credit toward the minor for up to 5 units of language study. Any variations on the minor requirements must be approved in advance by the Director of the Program in Jewish Studies.

Courses credited toward the minor must be distributed as follows:
1. Three introductory courses at the 100 level or below in the fields of history, religious studies, literature, or Hebrew language (for a maximum of 5 units) or one of the designated introductory courses offered through the Program in Comparative Studies in Race and Ethnicity.
2. Two courses at the 100 level or above from two of three areas of concentration (history, religious studies, or literature).
3. One seminar or undergraduate colloquium at the 200 level or above in one area of concentration (history, religious studies, or literature.) No course credited toward the Jewish Studies minor may be double counted toward major requirements.

**COURSES**

**HEBREW LANGUAGE COURSES**
The following courses in Hebrew language instruction are offered by the Language Center. For descriptions, other information, and additional courses including special emphasis, intensive, and summer courses, see the “Language Center” section of this bulletin.

- **AMELANG 128A,B,C. Beginning Hebrew**
  4 units, A: Aut, B: Win, C: Spr (Shemtov)

- **AMELANG 129A,B,C. Intermediate Hebrew**
  2-4 units, A: Aut, B: Win, C: Spr (Porat)

- **AMELANG 130A,B,C. Advanced Hebrew**
  1-4 units, A: Aut, B: Win, C: Spr (Shemtov)

**JEWSH STUDIES**

- **JEWISHST 101A,B,C. Beginning Yiddish**
  — Reading, writing, and speaking.
  1-5 units, A: Aut, B: Win, C: Spr (Glaser)

- **JEWISHST 104. Resistance Writings in Nazi Germany**
  — Stanford Introductory Seminar. Preference to freshmen. The letters and diaries of individuals who resisted Nazi oppression and paid with their lives. Readings include the Scholl diaries, Bonhoeffer’s letters and his Ethics, and letter exchanges from other crucial figures. No knowledge of German required; students may read texts in original if able. GER:DB-Hum
  4 units, Aut (Bernhardt)

- **JEWISHST 199A,B,C/299A,B,C. Directed Reading in Yiddish**
  (Graduate students register for 299A,B,C.) For intermediate or advanced students. May be repeated for credit.
  1-5 units, A: Aut, B: Win, C: Spr (Staff)

- **JEWISHST 235C. Identity/Memory: The Jewish Image in German Cinema**
  — (Same as GERLIT 239.) Post-Cold War German cinema about Jewish contributions to German society, German resistance to the Nazis, and Jewish normalization in German. Perspectives on the sociopolitical position of Jews in German history. The emotional reality of the Jewish collective experience of assimilation, betrayal, displacement, and memory. Sources include dramatic, documentary, pre-WW II, and W. and E. German films. In English.
  4 units, Win (Plotkin)

- **JEWISHST 245A. Modern and Contemporary Hybrid Narratives**
  4 units, Aut (Bradford)

- **JEWISHST 247A. Translation and the Rise of Jewish Literatures in Modern Times**
  — Translation theory, the linguistic diversity faced by Jewish communities, and the role of translations and adaptations of foreign language texts in the development of modern Yiddish, Ladino, and Hebrew literatures.
  4 units, Spr (Borovaya)

- **JEWISHST 247B. Introduction to Ladino Literature**
  — Origins and evolution during the two centuries of its existence. Ladino texts in English translation. Spanish-speaking students read some texts in romanized Ladino transliteration.
  4 units, Win (Borovaya)

- **JEWISHST 253/353. Globalization, Middle East Regional Dilemmas, and Israel**
  — (Graduate students register for 353.) The impact of globalization on Middle Eastern issues, emphasizing Israel. How Israel is adapting to these changes; their effects on relationships with the UN, WTO, OECD, U.S., and EU, and on regional processes including the peace process, the disengagement plan, and strategies for a more secure Middle East.
  4 units, Aut (Matias)
INTERDEPARTMENTAL OFFERINGS
AFRICAN AND MIDDLE EASTERN LANGUAGES
AMELANG 126. Reflection on the Other: The Jew in Arabic Literature, the Arab in Hebrew Literature
4 units, Win (Barhoum, Shemtov)
AMELANG 172. From Agnon to Yehoshua and Oz
1-4 units, Aut (Shemtov)

FEMINIST STUDIES
FEMST 139. Rereading Judaism in Light of Feminism
4-5 units, Spr (Karlin-Neumann)

GERMAN LITERATURE
GERLIT 289. History, Memory, and Cultural Discourse in Germany, Austria, and Israel
5 units, Spr (Eshel)
GERLIT 299. Present Pasts: History, Fiction, Temporality
5 units, Win (Eshel, White)

HISTORY
HISTORY 137/337. The Holocaust
5 units (Rodrique) not given 2005-06
HISTORY 185B. Jews in the Modern World
5 units, Spr (Zipperstein)
HISTORY 216/316. Medieval Antisemitism
5 units (Buc) not given 2005-06
HISTORY 229/329. Poles and Jews
5 units, Spr (Jolluck)
HISTORY 286/386. Jews and Muslims
5 units (Rodrique) not given 2005-06
HISTORY 385A. Core in Jewish History, 17th-19th Centuries
4-5 units, Aut (Rodrique)
HISTORY 385B. Core in Jewish History, 20th Century
4-5 units, Win (Zipperstein)
HISTORY 387. Research Methods in Jewish Studies
4-5 units, Win (Z. Baker)
HISTORY 486A. Graduate Research Seminar in Jewish History
4-5 units, Spr (Rodrique)

RELIGIOUS STUDIES
RELIGST 2N. Prophecy and Politics in America: The Thought of Abraham Joshua Heschel and Martin Luther King, Jr.
3 units, Spr (Eisen)
RELIGST 5N. Three Sacred Stories of Judaism, Christianity, and Islam
3 units, Aut (Gregg)
RELIGST 15. Introduction to the World of the Hebrew Bible
4 units, Aut (Leveen)
RELIGST 23. Introduction to Judaism
4 units, Win (Leveen)
RELIGST 112. Handmaids and Harlots
4 units (Leveen, Pitkin) not given 2005-06
RELIGST 123. Judaism in Late Antiquity
4 units, Spr (Fonrobert)
RELIGST 133. Reading the Bible Today
4 units (Leveen) not given 2005-06
RELIGST 170C. Reading in Biblical Hebrew
4 units, Spr (Leveen)
RELIGST 185. Prophetic Voices of Social Critique
4 units (Leveen) not given 2005-06
RELIGST 221. Modern Judaism
5 units (Eisen) not given 2005-06
RELIGST 232. God: A Biography
4 units, Spr (Leveen)
RELIGST 321. Modern Judaism
5 units (Eisen) not given 2005-06

SLAVIC GENERAL
SLAVGEN 123/223. The Yiddish Novel
3-4 units, Spr (Glaser)
## LANGUAGE CENTER

**Director:** Elizabeth Bernhardt  
**Associate Director:** Joan Mollitoris  
**Assistant Director:** Patricia de Castries

### African and Middle Eastern Languages

**Senior Lecturer, Coordinator, and Minor Adviser:** Khalil Barhoum (Arabic Language and Literature)  
**Lecturers:** Salem Aweiss, Gillian Jackden (Fulbright Scholar), Jacob Lubuva (Fulbright Scholar), Angaluki Muaka, Gallia Porat, Ramzi Salti, Vered Shemtov, Ahmed Tayel (Fulbright Scholar)  
**Chinese Language**  
**Associate Professor and Coordinator:** Chao Fen Sun (Asian Languages)  
**Lecturers:** Marina Chung, Sik Lee Dennig, Nina Lin, Yu-hwa Liao Rozelle, Huazhi Wang, Hong Zeng, Youping Zhang, Qi Zhu  
**English for Foreign Students**  
**Lecturers and Coordinator:** Philip Hubbard (Linguistics)  
**Lecturers:** Carole Mawson, Constance Rylance, Carol Shabrami, Keli Yerian  
**French Language**  
**Senior Lecturer:** Nelee Langmuir  
**Lecturers:** Olubunni Ashaolu, Jane Dozer-Rabedee, Heather Howard, Beatrice Le Teuff, Sylvie Palumbo-Liu, Tanya Shashko, Kenric Tsethlikai (Coordinator)  
**German Language**  
**Coordinator:** Elizabeth Bernhardt (Director, Language Center)  
**Senior Lecturers:** William E. Petig, Kathryn Strachota (on leave Spring)  
**Italian Language**  
**Senior Lecturers:** Maria Devine, Annamaria Napolitano (Coordinator; on leave Autumn)  
**Lecturers:** Marta Baldocchi, Sara Gelmetti (Acting Coordinator), Giovanni Tempesta  
**Japanese Language**  
**Associate Professor and Coordinator:** Yoshiko Matsumoto (Asian Languages)  
**Senior Lecturer:** Kazuko M. Busbin  
**Lecturers:** Fumiko Aroa, Momoe Saito Fu, Hisayo O. Lipton (Deputy Coordinator), Momoyo K. Lowdermilk, Kiyomi Nakamura, Yoshiko Tomiyama  
**Korean Language**  
**Lecturer and Coordinator:** Hee-Sun Kim  
**Portuguese Language**  
**Senior Lecturer:** Ana Isabel Delgado  
**Slavic Language**  
**Senior Lecturer:** Rima Greenhill  
**Lecturer and Coordinator:** Eugenia Khassina  
**Spanish Language**  
**Senior Lecturer:** Irene Corso  
**Lecturers:** Amy Alexander, Vivian Brates, Anna Cellinese, Candy Guzmán, Caridad Kenna, Alice Miano (Coordinator), Joan Mollitoris (Associate Director, Language Center), Consuelo Perales, Ana M. Sierra, María Cristina Urruela, Celinés Villalba-Rosado, Hae-Joon Won, Ana Zaragoza  
**Special Language Program**  
**Lecturer and Coordinator:** Eva Prionas (Modern Greek Language and Literature)  
**Lecturer:** Cathy Haas, Ony Jamhari (Fulbright Scholar)  
**Language Center Offices:** Building 30  
**Mail Code:** 94305-2015  
**Department Phone:** (650) 725-9222  
**Email:** patricia@stanford.edu  
**Web Site:** http://language.stanford.edu

Courses given in the Language Center have one of the following subject codes: AMELANG, APPLLING, CHINLANG, EFSLANG, FRENLANG, GERLANG, ITALLANG, JAPANLNG, KORLANG, PORTLANG, SLAVLANG, SPANLANG, and SPECLANG. For a complete list of subject codes, see Appendix.

The Stanford Language Center was created to oversee all language instruction at Stanford. The Center’s charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford’s language instruction; and to take leadership in research and development efforts in language learning. The Language Center is a unit within the Division of Literatures, Cultures, and Languages.

### UNDERGRADUATE PROGRAM

#### MINOR IN MIDDLE EASTERN LANGUAGES, LITERATURES, AND CULTURES

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to the Arabic and Hebrew languages, as well as an introduction to the cultures and civilizations of the Middle East. Contact the minors adviser before declaring at khalil@stanford.edu.

Students declaring a minor must do so no later than the last day of the fourth quarter before degree conferral. For example, students graduating in June (Spring Quarter) must declare the minor no later than the last day of Spring Quarter of their junior year. If a student is not able to meet this deadline, he or she may petition the Language Center director and request a revised declaration date, which may be granted at the director’s discretion.

The requirements for a minor in Middle Eastern Languages, Literatures, and Cultures are:

1. Completion of six courses in either Track A, Cultural Studies, or Track B, Language Studies.
2. Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/no credit.
3. All courses must be completed with a letter grade of ‘C’ or better.
4. Courses may not overlap with those taken for a major course of study.
5. Courses taken which also fulfill a GER count toward fulfilling both minor and GER requirements.
6. Students pursuing Track B, Cultural Studies, must complete the prerequisite of Beginning Arabic or Hebrew, or demonstrate equivalent competence.

#### CULTURAL STUDIES TRACK

Requirements are:

1. Successful completion of the prerequisite, Beginning Arabic or Hebrew, or a demonstrated equivalent competence.
2. Completion of three non-language AME program courses.
4. Course work from GER courses may be used to fulfill the unit requirements for the minor.

#### LANGUAGE TRACK

Requirements are:

1. Successful completion of the prerequisite, Beginning Arabic or Hebrew, or a demonstrated equivalent competence.
2. Completion of one year of language study at the intermediate level (AMELANG 121A,B,C for Arabic, or AMELANG 129A,B,C for Hebrew).
3. Completion of three non-language related courses. Consult the minor adviser for course options.
GRADUATE PROGRAM
Ph.D. MINOR IN APPLIED LINGUISTICS

The Ph.D. minor in Applied Linguistics has been designed to give students the opportunity to examine and explore language as it pertains to teaching, learning, translation, education, and language policies.

The Ph.D. minor requires the completion of no less than 30 units of unduplicated course work. Course work must include LINGUIST 201 (Foundations of Linguistic Analysis, 4 units). At least one additional Linguistics course must also be taken. Courses taken for the minor must be incremental units beyond those used to satisfy the major (with the exception of Linguistics 201 for Linguistics students). At least 20 of the 30 units must be at the 200 level or above. Students may also supplement their Applied Linguistics training with an array of courses from the departments of Cultural and Social Anthropology, Linguistics, and Spanish and Portuguese.

Overlapping applied linguistics concentrations are available in Learning, Teaching, and Translation of Second Languages; and in Educational and Policy Applications of Linguistics.

Some suggested courses relevant to each track are listed below the track description; a more complete listing of courses which are appropriate for the minor can be found on the Language Center’s web site at http://language.stanford.edu/.

Students in either track should develop a program of study in consultation with an academic adviser and submit the proposed program of study for approval by the Applied Linguistics Steering Committee.

THE LEARNING, TEACHING, AND TRANSLATION OF SECOND LANGUAGES TRACK

This overall program concentration requires general reading in second language acquisition (SLA) and/or translation while offering students course work in the following areas:

1. Second language acquisition in instructed contexts
2. Elements of curricular design for university and college settings
3. The acquisition of second language literacy
4. The use of technology to enhance student performance
5. Linguistics and the teaching of foreign languages
6. Theoretical foundations in the translation of various languages

Course No. and Subject Units
APPLLING 201. The Learning and Teaching of Second Languages 3
APPLLING 202. Workshop in Technology 3
APPLLING 203/SPANLIT 300. Issues and Methods in the Teaching of Heritage Languages 3.5
LINGUIST 189/289. Linguistics and the Teaching of English as a Foreign Language 4.5
LINGUIST 140/240. Language Acquisition I 4

EDUCATIONAL AND POLICY APPLICATIONS OF LINGUISTICS TRACK

This concentration is oriented toward a combination of conceptual and research foci regarding language minority populations and their educational welfare. The education of women, low-income, and language minority populations receive primary attention within this concentration.

Course No. and Subject Units
EDUC 249. Theory and Issues in the Study of Bilingualism 3-4
EDUC 275. African American English in Educational Context 3-4
EDUC 277. Education of Immigrant Students: Psychological Perspectives 4
EDUC 289. Introduction to Linguistics for Educational Researchers 4
EDUC 335X. Language Policy and Planning: National and International Perspectives 3
EDUC 435X. Research Seminar in Applied Linguistics 2-4
LINGUIST 73/273. African American Vernacular English 4
LINGUIST 150. Language in Society 4-5
LINGUIST 159. Language in the U.S. 3-5
LINGUIST 250. Sociolinguistic Theory and Analysis 4-6

COURSES

Offerings in this section are ordered as follows:

Applied Linguistics (APPLLING)
African and Middle Eastern Languages (AMELANG)
Chinese (CHINLANG)
English for Foreign Students (EFSLANG)
French (FRENLANG)
German (GERLANG)
Italian (ITALLANG)
Japanese (JAPANLNG)
Korean (KORLANG)
Portuguese (PORTLANG)
Russian (SLAVLANG)
Spanish (SPANLANG)
Special Languages (SPECLANG)

Students interested in general courses concerning languages, cultures, and literatures, or in advanced study of language and literature should consult the following departments and subject codes:

Asian Languages (CHINGEN, CHINLIT, JAPANGEN, JAPANLIT)
French and Italian (FRENGEN, FRENLIT, ITALGEN, ITALLIT)
German Studies (GERGEN, GERLIT)
Spanish and Portuguese (SPANLIT, PORTLIT)
Slavic Languages and Literatures (SLAVGEN, SLAVLIT)

APPLIED LINGUISTICS (APPLLING)

APPLLING 201. The Learning and Teaching of Second Languages — (Same as GERGEN 201.) Teaching second languages from a learning perspective rather than traditional teaching methods. Focus is on instructional decision making within the context of student intellectual and linguistic development in university settings to different populations.

Readings in second-language acquisition.

3 units, Spr (Bernhardt)

Hands-on, project-based.

3 units, Spr (Kautz)

APPLLING 203. Issues and Methods in the Teaching of Heritage Languages — (Same as SPANLIT 300.) Teaching Spanish to students raised in Spanish-speaking homes. Issues include language variation in the Spanish-speaking world, English/Spanish bilingualism in the U.S., and second dialect acquisition. Techniques for developing the academic Spanish language skills of heritage students.

3-5 units, Spr (Valdés)

APPLLING 297. Directed Reading — Search for instructor on Axess. May be repeated for credit. Prerequisite: consent of instructor.

1-4 units, Aut, Win, Spr (Staff)

AFRICAN AND MIDDLE EASTERN LANGUAGES AND LITERATURES (AMELANG)

The African and Middle Eastern Languages and Literatures Program offers a number of African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2005-06 are listed below. Additional languages may still be offered upon request, provided funding is available. Requests for the 2006-07 academic year should be made by Spring Quarter of this year at the AME program office, Building 40, Room 42B.

All beginning-level, three-unit courses are offered on a S/NC basis only. Intermediate-level and four-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year’s sequence of language study. Most three-unit language courses are offered for a two-year, three quarter sequence:
AMELANG 100A,B,C. Beginning Amharic
3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 101A,B,C. Intermediate Amharic
3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 102A,B,C. Advanced Amharic
3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 106A,B. Beginning Swahili
4 units, A: Aut, B: Win, C: Spr (Labuva, Muaka)

AMELANG 107A,B. Intermediate Swahili
2-4 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 108A,B,C. Advanced Swahili
2-4 units, A: Aut, B: Win, C: Spr (Muaka)

AMELANG 112A,B,C. Advanced Wolof
3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 133A,B,C. The African Forum
1 unit A: Aut, B: Win, C: Spr (Muaka)

AMELANG 134A,B. Beginning Igbo
3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 147A,B,C. Beginning Bambara
3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 153A,B,C. Beginning Twi
3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 156A,B,C. Beginning Zulu
3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 182A,B,C. Intermediate Fulani
3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 183A,B,C. Beginning Hausa
3 units, A: Aut, B: Win, C: Spr (Jackden)

AMELANG 186A,B,C. Beginning Yoruba
3 units, A: Aut, B: Win, C: Spr (Ashaolu)

MIDDLE EASTERN LANGUAGES COURSES

AMELANG 50A,B,C. Reading Hebrew — Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.
2-4 units, A: (Staff) not given 2005-06, B: Win (Shemtov), C: (Shemtov) not given 2005-06

AMELANG 51A. Reading Biblical Hebrew
2 units, Win (Staff)

AMELANG 120A,B,C. Beginning Arabic — Emphasis is on reading and writing standard Arabic (fusha).
5 units, A: Aut, B: Win, C: Spr (Aweiss, Barhoum, Salti)

2-5 units, A: Aut, B: Win, C: Spr (Aweiss, Salti)

AMELANG 122A,B,C. Advanced Arabic — Grammar and syntax. Complex texts and articles from the Arabic press. Oral reports, written assignments, and audiovisual aids including the Arabic Internet. Films and cultural productions.
2-5 units, A: Aut, B: Win, C: Spr (Salti)

AMELANG 126. Reflection on the Other: The Jew in Arabic Literature, the Arab in Hebrew Literature — How literary works outside the realm of western culture struggle with questions such as identity, minority, and the issue of the other. How the Arab is viewed in Hebrew literature and how the Jew is viewed in Arabic literature. Historical, political, and sociological forces that have contributed to the shaping of the writer’s views. Arab and Jewish (Israeli) culture. GER: DB-Hum, EC-GlobalCom
4 units, Win (Barhoum, Shemtov)

AMELANG 127. Land and Literature — Israel has captured the imagination of writers throughout the generations. It has been portrayed as promised land, holy land, homeland, empty land, occupied land, and land of dreams. Ideological views and political events have shaped writers’ conception of Israel. Readings include poems and prose by Hebrew/Israeli authors in translation, and theoretical texts about place and literature. No knowledge of Hebrew required. GER:DB-Hum, EC-GlobalCom
4 units (Shemtov) not given 2005-06

AMELANG 128A,B,C. Beginning Hebrew
5 units, A: Aut, B: Win (Shemtov), C: Spr (Porat)

AMELANG 129A,B,C. Intermediate Hebrew
2-4 units, A: not given 2005-06, B: Win, C: Spr (Porat)

AMELANG 130A,B,C. Advanced Hebrew
1-4 units, A: not given 2005-06, B: Win, C: Spr (Porat)

2 units (Shemtov) not given 2005-06

AMELANG 161. The Contemporary Arab World and Culture through Literature — Readings from prominent authors dealing with cultural topics such as gender and women, kinship and social concepts, nationalism, and religion. Texts delineating the cultural uniqueness of the Arab world include works by Naguib Mahfouz, Nawal El-Saadawi, Ghassan Kanafani, Tayyeb Salih, Etel Adnan, and short stories and poetry. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER:DB-Hum, EC-GlobalCom
4-5 units, (Barhoum)

AMELANG 162. Arab Women Writers and Issues — Fiction and non-fiction work. The major cultural factors shaping their feminist attitudes. Readings: Fatima Mernissi, Nawal El-Saadawi, Etel Adnan, Fadia Faqir, Alifa Rifaat, and Sahar Khalifeh. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER: DB-Hum, EC-Gender
4-5 units, Win (Barhoum)

AMELANG 163. The Arab World through Travel Literature — Popular colonialist and postcolonialist portrayals of Arab culture and Islam. Recent Western depictions of Arabs and Muslims in travel literature. Readings include Flaubert in Egypt, Guests of the Sheik, Justine, Covering Islam, Nine Parts of Desire, and Motoring with Mohammed. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER:DB-Hum, EC-GlobalCom
4-5 units, Spr (Barhoum)
CHINLANG 18,19,20. Intermediate Cantonese Conversation
2 units, 18: Aut, 19: Win, 20: Spr (Dennig)

CHINLANG 20A,B,C. Advanced Cantonese Conversation—Improving Cantonese through Hong Kong movies.
2 units, A: Aut, B: Win, C: Spr (Dennig)

CHINLANG 21,22,23. Second-Year Modern Chinese—Grammar, reading, conversation, composition. Daily sections set at the beginning of the quarter to suit schedule requirements. Prerequisite: 3 or equivalent.
5 units, 21: Aut, 22: Win, 23: Spr (Chung)

CHINLANG 21B,22B,23B. Second-Year Modern Chinese for Bilingual Students—For students with advanced comprehension and speaking skills, but lacking equivalent knowledge of grammar, reading, and writing Chinese characters. Equivalent to 21,22,23.
3 units, 21B: Aut, 22B: Win, 23B: Spr (Zhu)

CHINLANG 25. Intensive Second-Year Modern Chinese—(Graduate students register for 25A.) Equivalent to 21,22,23 combined. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 3 or equivalent.
7 units, Sum (Staff)

CHINLANG 27,28,29. Intermediate Chinese Conversation—Prerequisite: 3 or consent of instructor.
2 units, 27: Aut, 28: Win, 29: Spr (Staff)

CHINLANG 99. Language Specials—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

ADVANCED LANGUAGE

CHINLANG 101,102,103. Third-Year Modern Chinese—Written and spoken styles of modern Chinese. Reading and discussion of authentic writings on cultural topics; newspaper reports, radio, and TV broadcasts and films; online Chinese software and email network to facilitate study. Prerequisite: 23 or equivalent.
5 units, 101: Aut, 102: Win, 103: Spr (Wang)

CHINLANG 101B,102B,103B. Third-Year Modern Chinese for Bilingual Students—For students with advanced listening and speaking abilities, but lacking equivalent knowledge in reading and writing. Equivalent to 101,102,103.
3 units, 101B: Aut, 102B: Win, 103B: Spr (Wang)

CHINLANG 105. Intensive Third-Year Modern Chinese—(Graduate students register for 105A.) Equivalent to 101,102,103 combined. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 23 or equivalent.
7 units, Sum (Staff)

CHINLANG 121,122,123. Advanced Chinese Conversation—Prerequisite: 23 or equivalent.
2 units, 121: Aut, 122: Win, 123: Spr (Chung)

CHINLANG 131,132,133. Business Chinese—Commercial, economic, and business-related vocabulary. Materials include formal business conversations, newspaper and journal articles, and TV news on trade and economic. Technical language and business etiquette. Student oral and written reports on their own research regarding recent economic developments, using sources in China. Prerequisite: 23 or equivalent.
3-4 units, 131: Aut, 132: Win, 133: Spr (Wang)

CHINLANG 200. Directed Reading—May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

CHINLANG 211,212,213. Advanced Modern Chinese—Goal is to become functional speakers, readers, and writers of modern Chinese through articles and essays from newspapers, magazines, scholarly journals, and the Internet. Cultural and social science themes: students may take both themes for 5 units or one theme for reduced units. Prerequisite: three years of Chinese language.
2-5 units, 211: Aut, 212: Win, 213: Spr (Zhu)
ENGLISH FOR FOREIGN STUDENTS

These courses, numbered from 690-698, represent offerings for nonnative, English-speaking, graduate students in Autumn, Winter, and Spring quarters. Enrollment in one or more courses may be required of, or recommended to, current graduate students from other countries after they have taken the English placement examination. To enroll, students must go to http://www.stanford.edu/group/efs for directions on or before the first day of each quarter.

During the Summer Session, courses in spoken and written English are offered. Two six-week intensive courses are also offered during the summer. Summer visitors must apply directly to the EFS program.

EFSLANG 690A. Interacting in English — Strategies for communicating effectively in social and academic settings. Informal and formal language used in campus settings, including starting and maintaining conversations, asking questions, making complaints, and contributing ideas and opinions. Simulations and discussions, with feedback on pronunciation, grammar, and usage.
  1-3 units, Aut, Win (Elliott, Yerian)

EFSLANG 690B. Academic Discussion — Skills for effective participation in classroom settings, seminars, and research group meetings. Pronunciation, grammar, and appropriateness for specific tasks. Feedback on language and communication style. Prerequisite: 690A or consent of instructor.
  1-3 units, Aut, Win, Spr (Rylance, Staff)

EFSLANG 690C. Advanced Interacting in English — Communication skills for extended discourse such as storytelling and presenting supported arguments. Development of interactive listening facility and overall intelligibility and accuracy. Goal is advanced fluency in classroom, professional and social settings. Identification of and attention to individual patterned errors. Prerequisite: 690A or B or consent of instructor.
  1-3 units, Aut, Win (Yerian)

EFSLANG 691. Oral Presentation — For advanced graduate students. Practice in academic presentation skills; strategy, design, organization, and use of visual aids. Focus is on improving fluency and delivery style, with videotaping for feedback on language accuracy and usage. Prerequisite: 695A or consent of instructor.
  3 units, Aut, Win, Spr, Sum (Elliott, Yerian)

EFSLANG 692. Speaking and Teaching in English — For non-native speakers who must teach in English. Focus is on developing clarity, intelligibility, and effectiveness through weekly presentations simulating actual teaching assistant responsibilities.
  1-3 units, Aut, Win, Spr, Sum (Rylance, Yerian)

EFSLANG 693A. Listening Comprehension — Strategies for effective listening in an academic setting, focusing on identifying key ideas in lectures. Practice in understanding words and phrases commonly encountered in classroom settings. Computer-based exercises for comprehension of rapid, natural speech.
  1-3 units, Aut (Hubbard, Shabrami)

EFSLANG 693B. Listening and Communication — Listening strategies and vocabulary for understanding English in academic and non-academic contexts. Discussion and interpretation improve comprehension of communicative intent. Computer-based and video exercises; individual project. Prerequisite: 693A or consent of instructor.
  1-3 units, Aut, Win, Spr, Sum (Shabrami, Hubbard)

EFSLANG 694. Communication Strategies in Professional Life — For advanced graduate students. Task-based practice of language appropriate for professional settings in industry and related teamwork. Simulation of the roles of manager, applicant, subordinate, and coworker. Prerequisite: 693A, or consent of instructor.
  1-3 units, Win, Spr (Shabrami)

  1-3 units, Aut, Win, Spr, Sum (Mawson, Staff)

EFSLANG 695B. Advanced Pronunciation and Intonation — Continuation of 695A, focusing on American English sounds, stress, rhythm, and intonation patterns. Emphasis is on self-monitoring, integrated with short presentations. Biweekly tape assignments and tutorials. Prerequisite: 695A.
  1-3 units, Aut, Win, Spr (Elliott, Mawson)

EFSLANG 696. Understanding American Humor — Recognizing rhetorical devices, jokes, and character types common to spoken humor in the U.S. Listening practice with audio and video materials and colloquial spoken English, analysis of film and television transcripts, and crosscultural discussion. Prerequisites: 690B, 693B or consent of the instructor.
  1-3 units, Win, Spr (Rylance)

EFSLANG 698A. Writing Academic English — Preparation of graduate students to write academic papers; emphasis on fluency, organization, documentation, and appropriateness for specific writing tasks required in course work.
  1-3 units, Aut, Win, Spr, Sum (Elliott, Mawson, Rylance)

EFSLANG 698B. Advanced Graduate Writing — For graduate students experienced in English writing and currently required to write for courses and research. Class meetings and individual conferences. Prerequisite: 698A.
  1-3 units, Aut, Win, Spr, Sum (Hubbard, Shabrami, Yerian)

EFSLANG 698C. Writing and Presenting Research — For graduate students completing major research projects. Revising and editing strategies for preparing papers, conference abstracts, and poster presentations. Adapting content and style to different audiences. Students present their research with participant feedback. Prerequisites: 698B and 691 or consent of instructor.
  1-3 units, Win, Spr (Shabrami)

FRENCH LANGUAGE COURSES

FIRST- AND SECOND-YEAR FRENCH

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in French before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 21, 2005, in order to be placed in an appropriate course for Autumn Quarter. Consult the Language Center or http://language.stanford.edu/ for further information.

Basic French grammar and vocabulary are covered in FRENLANG 1, 2, 3. Upon completion of 3, students have acquired beginning-level functional proficiency in listening comprehension, speaking, reading, and writing in satisfaction of the University foreign language requirement. Students may continue with second-year French courses (22 or 23) or higher-level courses upon recommendation of the coordinator.
A grade of ‘C’ or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit, and must be taken in sequence.

FRENLANG 1,2,3. First-Year French—Emphasis is on the development of authentic discourse appropriate to French and Francophone contexts.

5 units, Aut, Win, Spr (Ashaolu, Howard, Shashko, Tsethlikai, Staff)

FRENLANG 5A,B. Intensive First-Year French—Completes first-year language sequence in two rather than three quarters. Recommended for students with previous knowledge of French who place into 5A on the placement test. 5B fulfills the University foreign language requirement. Prerequisite: French placement test and consent of instructor.

5 units, A: Aut, Win, B: Win, Spr (Howard, Shashko)

FRENLANG 10. Beginning French Oral Communication—For students who have completed 2 or equivalent. Emphasis is on speaking skills, vocabulary, and pronunciation. May be repeated once for credit.

2 units, Aut, Win, Spr (Staff)

FRENLANG 15. Intermediate French Oral Communication—For students who have completed the first-year language requirement. May be repeated once for credit.

2 units, Aut, Win, Spr (Staff)

FRENLANG 15S. Intermediate Conversation: French in Everyday Life—Same content as 15. May be repeated once for credit. Prerequisite: one year of college French or equivalent.

2 units, Sum (Staff)

FRENLANG 20A. France and Francophonie—Second-year French conversation based on themes from the regions of France and the Francophone world. Topics include travel, food, and crosscultural comparisons. Students returning from study abroad programs are encouraged to enroll. May be repeated once for credit. Prerequisite: 3 or equivalent.

2 units, Aut, Win (Le Teuff)

FRENLANG 20B. French Cinema—Second-year French conversation based on films. Intermediate-level speaking skills and advanced-level functions. Themes include: French filmmakers, stars, and trends. Film viewing in and outside the class in French. May be repeated once for credit. Prerequisite: 3 or equivalent.

2 units, Aut, Win (Le Teuff, Staff)

FRENLANG 20C. Contemporary French Language—Second-year French conversation. Intermediate-level speaking skills and advanced-level functions for formal and informal situations. Useful for students planning to travel or study abroad. May be repeated once for credit. Prerequisite: 3 or equivalent.

2 units, Spr (Le Teuff)

FRENLANG 22. Second-Year French, Part A—Proficiency-based. Advanced-level skills including past, present, and future narration, description, and defending points of view on social and cultural issues. Topics from cultural comparisons with French and Francophone contexts. Satisfies the foreign language requirement for students majoring in English. Prerequisite: 3 or consent of coordinator.

4-5 units, Aut, Win, Spr (Dozer, Tsethlikai, Shashko, Staff)

FRENLANG 23. Second-Year French, Part B—Continuation of 22. Prerequisite: 22 or consent of coordinator.

4-5 units, Aut, Win, Spr (Dozer, Tsethlikai, Shashko, Staff)

3-4 units, Win (Howard)

FRENLANG 41A,B. Intensive First-Year French—Accelerated. Written exercises, compositions, conversational practice, and daily work. Stanford graduate students restricted to 9 units register for 241A,B.

5-10 units, Sum (Staff)

FRENLANG 50. Reading French—For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Recommended: one year or reading proficiency in another Romance language.

4 units, Aut (Tsethlikai)

FRENLANG 50S. Reading French—Same content as 50.

2-4 units, Sum (Staff)

ADVANCED FRENCH

FRENLANG 120. Advanced French Oral Communication—Third-year conversation. Current events and issues in France. May be repeated for credit after two quarters. Prerequisite: 23 or equivalent.

3 units, Aut, Win, Spr (Le Teuff)

FRENLANG 121. Introduction to French Texts—Advanced discussion and readings of major literary figures and themes from medieval times to the present. Prerequisite: 23 or equivalent, or consent of coordinator.

3-4 units (Palumbo-Liu) alternate years, given 2006-07

FRENLANG 122. Introduction to French Culture and Civilization—Advanced. Discussion of French art, geography, history, political change, and social institutions. Prerequisite: 23 or equivalent.

3-4 units, Win (Palumbo-Liu)

FRENLANG 123. French Creative Writing—Advanced. Model texts introduce students to genres and styles; review of grammar and vocabulary. Discussion of original writing by students. Prerequisite: 23 or equivalent.

3-4 units, Spr (Staff)

FRENLANG 124. Advanced French Grammar—Required for students majoring or minorning in French. Prerequisite: 23 or equivalent.

3-4 units, Aut, Win (Staff)

FRENLANG 125. French Phonetics—For majors and other students who plan to enroll in advanced courses. Study and practice of the French language sound system. Language lab, multimedia, and computer facilities. Prerequisite: 23 or equivalent.

3-4 units (Palumbo-Liu) alternate years, given 2006-07

FRENLANG 126. French Stylistics and Textual Analysis—For majors and minors. Writing-intensive. Control of grammar and syntax in research and argumentative papers.

3-4 units, Spr (Le Teuff)

FRENLANG 199. Language Specials—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

FRENLANG 394. Graduate Studies in French Conversation—Prerequisite: consent of the instructor.

1-3 units, Aut, Win, Spr (Staff)

FRENLANG 395. Graduate Studies in French—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

MAISON FRANÇAISE

Other in-house courses may be announced.

FRENLANG 60A. Beginning French Conversation—(AU)

1 unit, Aut, Win, Spr (Staff)

FRENLANG 60B. Intermediate French Conversation—(AU)

1 unit, Aut, Win, Spr (Staff)

FRENLANG 60C. Advanced French Conversation—(AU)

1 unit, Aut, Win, Spr (Staff)

FRENLANG 60D. French Viticulture—(AU)

1 unit, Aut, Win, Spr (Staff)
GERMAN LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in German before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 21, 2005. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST-YEAR GERMAN

GERLANG 1,2,3. First-Year German—Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which German is spoken.

5 units, Aut, Win, Spr (Staff)

GERLANG 5A,B. Intensive First-Year German—Equivalent of 1,2,3 combined. Stanford graduate students restricted to 9 units register for 205A,B.

5 units, Sum (Staff)

GERLANG 10. Elementary German for Seniors and Graduate Students—Intensive. For students who need to acquire reading ability in German for the Ph.D. or for advanced research in their own field. 52 fulfills Ph.D. reading exam.

4 units (Petig)

GERLANG 11P. Individually Programmed Beginning German—For those who wish to complete more or fewer than 5 units a quarter, have scheduling conflicts, or prefer to work independently. Self-paced work with text and tapes; instructor available for consultation on a regular basis. 3-unit minimum for beginners. Conversational practice available for additional unit.

1-12 units, Aut, Win (Strachota), Spr (Petig)

INTERMEDIATE GERMAN

At this level, students have several options depending on their interests. After completing 3 or equivalent, students may enroll in 120-level courses which consider topics in German culture while encouraging additional language learning. Alternatively, 21,22 emphasize a systematic review of the language, 21W,22W study the language of business and international relations, and 100-level courses develop advanced language skills along with cultural awareness.

4 units, Aut (Petig)

GERLANG 21S. Intermediate German—Reading short stories, and review of German structure. Discussions in German, short compositions, videos. Prerequisite: one year of college German; or two years high school German; or equivalent of GERLANG 4; or AP German.

4 units, Sum (Petig)

GERLANG 21W. Intermediate German I: German for Business and International Relations—Equivalent to 21, but focus is on business and the political and economic geography of Germany. Audiotapes and videos. For students planning to do a business internship in a German-speaking country. Prerequisite: 3.

4 units, Aut (Petig)

GERLANG 22. Intermediate German II—Continuation of 21, with greater emphasis on reading and writing skills. Literary texts of major 20th-century writers in historical context.

4 units, Win (Petig)

GERLANG 22W. Intermediate German II: German for Business and International Relations—Equivalent to 22, but continuation of 21W. Recommended for students planning to do a business internship in a German-speaking country. Prerequisite: 21 or 21W.

4 units (Petig) not given 2005-06

GERLANG 52. Readings in Humanities—For undergraduates and graduate students with a knowledge of German who want to acquire reading proficiency. Readings from scholarly works and professional journals. Recommended for students who need to pass the Ph.D. reading exam. Prerequisite: one year of German, or 10, or equivalent.

4 units, Spr (Petig)

GERLANG 99. Language Specials—Prerequisite: consent of instructor.

1-12 units, Aut, Win, Spr, Sum (Staff)

ADVANCED GERMAN

GERLANG 100. Hundert Deutsche Jahre: One Hundred German Years—Hones German language skills while introducing the history and culture of Germany as experienced by ordinary people over the course of the 20th century. Themes include Germans and democracy, money, Hitler, books, the Wall, and food. Video series, parallel readings, discussion in German. Extra listening, reading, or speaking for fourth unit.

3-4 units, Spr (Staff)

GERLANG 101. Advanced Language Study I—Short fictional and expository readings, discussions, compositions. Review of grammatical structures. Vocabulary building with emphasis on common idiomatic expressions and troublesome lexical distinctions.

3-4 units, Aut (Staff)

GERLANG 102. Advanced Language Study II—Continuation of 101.

3-4 units (Staff) not given 2005-06

GERLANG 105. Advanced Business German—For students planning to work in a German-speaking country and for preparation of the International Business German exams. Case studies of typical business situations with accompanying videos, listening comprehension exercises, and class simulations. Business correspondence and reports in German. Prerequisite: 22 or equivalent.

4 units, Spr (Petig)

GERLANG 110. German Newspapers—For intermediate and advanced students. Read and discuss three articles a week from current newspapers and magazines, practice reading comprehension strategies with online news updates, and develop vocabulary. Writing practice if desired. May be repeated once for credit.

3-4 units, Win (Strachota)

GERLANG 111. Television News from Germany—For intermediate and advanced students. Current news reports and features for listening comprehension and vocabulary. Extra listening, speaking, or writing practice for fourth unit.

3-4 units, Aut (Strachota)

GERLANG 199. Individual Reading—Prerequisite: consent of instructor.

1-12 units, Aut, Win, Spr, Sum (Staff)

GERLANG 395. Graduate Studies in German—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

GERLANG 399. Independent Study—Prerequisite: consent of instructor.

1-6 units, Aut, Win, Spr, Sum (Staff)
HAUS MITTELEUROPA

Other in-house courses may be announced.

GERLANG 20A. Beginning German Conversation—(AU)
1 unit, Aut, Win, Spr (Staff)

GERLANG 20B. Intermediate German Conversation—(AU)
1 unit, Aut, Win, Spr (Staff)

GERLANG 20C. Advanced German Conversation—(AU)
1 unit, Aut, Win, Spr (Staff)

GERLANG 20K. Küche Mitt (German Cooking Class)—(AU)
1 unit, Aut, Win, Spr (Staff)

GERLANG 20M. Mitt Movie Series—(AU)
1 unit, Aut, Win, Spr (Staff)

GERLANG 20T. Teaching German Conversation—(AU)
1 unit, Aut, Win, Spr (Staff)

ITALIAN LANGUAGE COURSES

FIRST- AND SECOND-YEAR ITALIAN

Students who have never studied Italian before should enroll in ITALLANG 1.

Students who have had some training in Italian before entering Stanford must take a placement test. Part I (written) of the placement test must be taken online during the summer, followed by Part II (oral), to be administered on campus in September. Consult the Language Center or http://language.stanford.edu/ for further information.

Completion of ITALLANG 3 or 2A satisfies the University foreign language requirement. Students may continue with second-year Italian courses upon recommendation of the coordinator.

A grade of ‘C’ or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit, and must be taken in sequence and may not be skipped.

FIRST- AND SECOND-YEAR ITALIAN

ITALLANG 1, 2, 3. First-Year Italian—All-in-Italian, student-centered approach. Speaking and oral comprehension through authentic Italian materials. Cultural context. Language lab, multimedia, and computer facilities.
5 units, Aut, Win, Spr (Baldocchi, Devine, Gelmetti, Tempesta, Staff)

ITALLANG 1A, 2A. Accelerated First-Year Italian—Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. 2A fulfills the University language requirement.
Prerequisite: written and oral placement tests.
5 units, 1A: Aut, Win, 2A: Win, Spr (Gelmetti, Baldocchi)

ITALLANG 21, 22, 23. Second Year Italian—Reading, writing, and conversational competence through Italian culture. Review of language structures. Italian authentic materials such as literary texts, news clippings, film, video, music, and web sites. Global awareness and crosscultural understanding. Prerequisite: 3 or equivalent, or consent of coordinator.
21: 4-5 units, Aut, Win, Spr (Baldocchi, Devine, Gelmetti, Staff)
22: 4-5 units, Aut, Win, Spr (Baldocchi, Devine, Gelmetti)
23: 3-4 units, Aut (Baldocchi)

ITALLANG 24. Italian Language through Cinema—Use of film sequences to improve communication and review language structures. New Italian film directors such as Tornatore, Salvatores, and Soldini.
Prerequisite: 22 or equivalent, or consent of coordinator.
4-5 units, Spr (Gelmetti)

ITALLANG 30. Conversation: Italy Today—For students planning to go to Florence. Films, slide shows, and lectures on Italian culture including opera, modern music, wine, and food. Preview of the Florentine experience. Limited enrollment. Prerequisite: first-year Italian or consent of coordinator.
3 units, Aut (Tempesta)

ITALLANG 31. Conversation: Italy Today—Open only to students who have studied at the Florence program. Students share experiences from Florence concerning a favorite Italian novel, author, or movie director. Limited enrollment. Prerequisite: first-year Italian or consent of coordinator.
3 units, Win (Tempesta)

ITALLANG 32. Talking about Contemporary Italy through Moravia’s Short Stories—Short stories by Alberto Moravia, clips from Italian TV news, and current affairs. Limited enrollment. Prerequisite: first-year Italian or consent of coordinator.
3 units, Spr (Tempesta)

ITALLANG 41A,B,C. Intensive First-Year Italian—Covers 1-3 quarters of Italian. Conversational drills and daily work in language lab. All-in-Italian method. Listening, speaking, writing, and reading. Stanford graduate students restricted to 9 units register for 241A,B,C.
5 units, Sum (Staff)

ITALLANG 50. Reading Italian—Open to advanced undergraduates with consent of instructor; primarily for graduate students seeking to fulfill University foreign language requirements for advanced degrees. Accelerated acquisition of reading skills in Italian.
3 units, Win (Devine)

ITALLANG 60. Italian Opera from the Late 18th Century to the Early 20th Century: From Rossini to Puccini—Italian history through the operatic melodramas from the heroic epic of the Risorgimento to the social anguish of Verismo, which brings Italian opera to California as in the Girl of the Golden West by Puccini. Students view grand operas in class, and attend an opera performance. Prerequisite: 22 or consent of instructor.
3-4 units, Win (Napolitano)

ITALLANG 99. Language Specials—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

ADVANCED ITALIAN

ITALLANG 114. Advanced Stylistics and Composition—Goal is a high level of proficiency in written and spoken Italian. Literary and non-literary texts with textual and grammatical analysis, oral reports, translations, and weekly writing assignments. Prerequisite: 22 or consent of instructor. WIM
3-4 units, Win (Baldocchi)

ITALLANG 115. Translation and Composition—Continuation of 114. Emphasis is on composition, writing of short essays, and short stories. Prerequisite: 114 or consent of instructor. WIM
3-4 units, Spr (Baldocchi)

ITALLANG 394. Graduate Studies in Italian Conversation—Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

ITALLANG 395. Graduate Studies in Italian—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

CASA ITALIANA

ITALLANG 126. Italy and Italians Today—May be repeated for credit.
2 units, Aut, Win, Spr (Staff)
JAPANESE LANGUAGE COURSES

Students registering for the first time in a course must take a placement test if they have had any training in Japanese before entering Stanford. All entering students must take Part I (written and listening) of the placement test online during the summer, followed by Part II (oral and written), to be administered on campus September 21, 2005. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST- AND SECOND-YEAR JAPANESE

JAPANLNG 1,2,3, First-Year Modern Japanese—Foundation in grammar, reading, and composition. 150 Kanji characters introduced.

  5 units, 1: Aut, 2: Win, 3: Spr (Busbin)

  3 units, 7A: Aut, 8A: Win, 9A: Spr (Lowdermilk)

JAPANLNG 7B,8B,9B, First-Year Japanese Language, Culture, and Communication B—First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. 300 Kanji characters. See http://www.stanford.edu/group/ll/jlcc/1stB.htm.

  5 units, 7B: Aut, 8B: Win, 9B: Spr (Lipton, Staff)

JAPANLNG 7C, Individualized Kanji Tutoring—Corequisite: JAPANLNG 7B, 8B, or 9B.

  1-2 units, Aut, Win, Spr (Staff)

JAPANLNG 10, Intensive First-Year Japanese Language—(Stanford graduate students restricted to 9 units, register for 10G.) Equivalent to 7B,8B,9B combined.

  9-12 units (Lipton) not given 2005-06

  3 units, 17A: Aut, 18A: Win, 19A: Spr (Nakamura)

JAPANLNG 17B,18B,19B, Second-Year Japanese Language, Culture, and Communication B—Goal is to express in spoken and written Japanese advanced concepts such as comparisons and contrasts of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include newspapers, essays, and novels. Prerequisite: 9B. See http://www.stanford.edu/group/ll/jlcc/jlccb.htm.

  5 units, 17B: Aut, 18B: Win, 19B: Spr (Lowdermilk, Staff)

JAPANLNG 20, Intensive Second-Year Japanese—(Stanford graduate students restricted to 9 units, register for 20G.) Equivalent to 17B,18B,19B combined. Prerequisite 9B or equivalent.

  9-12 units (Staff)

JAPANLNG 21,22,23, Second-Year Modern Japanese—Continuation of 3. Expression of ideas, advanced grammatical patterns, 600 kanji characters, simple compositions, and enhanced understanding of Japanese culture. Goal is to read original source material.

  5 units, 21: Aut, 22: Win, 23: Spr (Arao)

JAPANLNG 27,28,29, Intermediate Japanese Conversation—Develops oral proficiency through simple sentence patterns, audio tapes, and oral presentations. For the practical use of Japanese. Prerequisite: 3, 9B, or consent of instructor.

  2 units, 27: Aut, 28: Win, 29: Spr (Busbin)

JAPANLNG 99, Language Specials—Prerequisite: consent of instructor.

  1-5 units, Aut, Win, Spr, Sum (Staff)

THIRD-YEAR ADVANCED JAPANESE

JAPANLNG 101,102,103, Third-Year Modern Japanese—Beyond fundamental grammatical forms to reading and discussion of more complex material. Emphasis is on Japanese sentence structure in newspaper and journal articles, and readings from fiction, poetry, and essays. Polite language (keigo) skills. Videos of everyday Japanese spoken at normal speed develop listening skills. Prerequisite: 23 or equivalent.

  5 units, 101: Aut, 102: Win, 103: Spr (Arao)

JAPANLNG 111,112,113, Business Japanese—Topics include cultural attitudes and approaches, work ethic, the stock market, import-export trade. Business letters, job interviews, and resume writing. May be repeated for credit. In Japanese. Prerequisite: 23, 29, or 19B, or consent of instructor.

  3 units, 111: Aut, 112: Win, 113: Spr (Fu)

JAPANLNG 121,122,123, Advanced Japanese Conversation—Focus is on fine tuning grammatical points, explaining things in Japanese, and fluency. Audiovisual material and oral presentations. Prerequisite: 23, 29, or consent of instructor.

  2 units, 121: Aut, 122: Win, 123: Spr (Lipton)

  3 units (Staff) not given 2005-06

  5 units, 127B: Aut, 128B: Win, 129B: Spr (Tomiyama)

JAPANLNG 130, Intensive Third-Year Japanese—(Stanford graduate students restricted to 9 units, register for 130G.) Equivalent to 127B,128B,129B combined. Prerequisite: 19B or equivalent.

  12 units, Sum (Staff)

JAPANLNG 200, Directed Reading—Prerequisite: consent of instructor.

  1-5 units, Aut, Win, Spr (Staff)

JAPANLNG 211,212,213, Advanced Japanese—Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: 103, 129B, or equivalent.

  3-5 units, 211: Aut, 212: Win, 213: Spr (Nakamura)

JAPANLNG 394, Graduate Studies in Japanese Conversation—Prerequisite: consent of instructor.

  1-3 units, Aut, Win, Spr (Staff)

JAPANLNG 395, Graduate Studies in Japanese—Prerequisite: consent of instructor.

  2-5 units, Aut, Win, Spr (Staff)

KOREAN LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Korean before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 21, 2005. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST- AND SECOND-YEAR KOREAN

KORLANG 1,2,3, Beginning Korean—Communicative skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.

  5 units, 1: Aut, 2: Win, 3: Spr (Kim)
KORLANG 1H,2H,3H. Beginning Korean for Heritage Learners—For Korean background students. Focus is on reading, writing, and spelling rather than speaking and listening. Meetings and individual study. Sources include textbook, workbook, and digitized listening materials. Prerequisite: consent of instructor.

1-3 units (Kim) not given 2005-06

KORLANG 21,22,23. Intermediate Korean—More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: 3 or consent of instructor.

3-5 units, 21: Aut, 22: Win, 23: Spr (Kim)

ADVANCED

KORLANG 101,102,103. Advanced Intermediate Korean—Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: 23 or consent of instructor.

2-3 units (Kim) not given 2005-06

KORLANG 120A,B,C. Korean Culture—Examination of Korean culture and society to develop fluency and vocabulary. Prerequisites: KORLANG 3 and consent of instructor.

1-2 units, 120A: not given 2005-06, 120B: Win, 120C: Spr (Kim)

KORLANG 130K. Korean Pronunciation and Intonation—Goal is intelligibility and fluency. Lab assignments. Prerequisite: 3 or consent of instructor.

2-3 units, Win (Kim)

KORLANG 160K. Korean Drama—For intermediate and advanced students. Korean culture and society through contemporary Korean drama and films. Idioms, vocabulary, and advanced grammar. Prerequisite: 23 or consent of instructor.

2-3 units, Aut (Kim)

KORLANG 171. The Structure of Korean—Introduction to modern Korean linguistics, focusing on history, phonology and morphology, syntax and semantics, socio- and psycho-linguistics, pragmatics, and language acquisition and pedagogy. Prerequisite: 3 or equivalent, or consent of instructor.

2-3 units, Spr (Kim)

KORLANG 200. Directed Reading in Korean—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

KORLANG 301,302,303. Advanced Korean—Advanced and intellectual speaking and writing skills. Vocabulary, discussion, and presentation based on readings on topics such as Korean culture, history, economy, politics, multimedia, newspaper articles, and magazines. Prerequisite: 103 or consent of instructor.

3-5 units (Staff) not given 2005-06

KORLANG 395. Graduate Studies in Korean—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Staff)

PORTLANG 1A,2A. Accelerated First-Year Portuguese—For students with two years of formal study of a Romance language, preferably Spanish. Goal is to use socially and culturally appropriate forms in conversations, providing and obtaining information, and expressing feelings, emotions, and opinions. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 2A fulfills the University’s foreign language requirement.

3-5 units, Aut, Win, Spr (Wiedemann, Delgado)

PORTLANG 11A,12A. Accelerated Second-Year Portuguese—12A fulfills the International Relations program language requirement. Goal is to use socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Prerequisite: first-year sequence, equivalent, or consent of instructor.

3-5 units, Aut, Win, Spr (Delgado, Wiedemann)

PORTLANG 50. Reading in Portuguese—For students with superior reading proficiency in Spanish or another Romance Language. Fulfills University reading requirement for advanced degrees. Reading competence for research and courses in Luso-Brazilian studies. Overview of grammar. Literary, journalistic, and academic readings.

3-4 units, Spr (Wiedemann)

PORTLANG 99. Language Specials—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Staff)

ADVANCED PORTUGUESE

PORTLANG 297. Directed Reading—Prerequisite: consent of instructor.

1-4 units, Aut, Win, Spr (Staff)

PORTLANG 394. Graduate Studies in Portuguese Conversation—Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (Staff)

PORTLANG 395. Graduate Studies in Portuguese—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

SLAVIC LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Russian before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 21, 2005. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST- AND SECOND-YEAR RUSSIAN

SLA VLANG 1,2,3. First-Year Russian—Functionally-based communicative approach, including essential Russian grammar. Russian culture and the Russian view of reality.

5 units, 1: Aut, 2: Win, 3: Spr (Staff)

SLA VLANG 5,6,7. Russian for Native Speakers—Self-paced. Reading and writing skills and communicating in formal and informal settings. Does not fulfill the University foreign language requirement.

2 units, 5: Aut, 6: Win, 7: Spr (Khassina)

SLA VLANG 51,52,53. Second-Year Russian—More difficult areas of the grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills.

5 units, 51: Aut (Khassina), 52: Win (Staff), 53: Spr (Khassina)

SLA VLANG 55 Intermediate Russian Conversation—Prerequisite: first-year Russian or equivalent placement.

2 units, Aut, Win, Spr (Greenhill)

THIRD-YEAR AND ADVANCED RUSSIAN

4 units, 111: Aut, 112: Win, 113: Spr (Greenhill)
SLAVLANG 177,178,179. Fourth-Year Russian—Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: 113 or equivalent.

3 units, 177: Aut (Staff), 178: Win, 179: Spr (Greenhill)

SLAVLANG 181,182,183. Fifth-Year Russian—Language proficiency maintenance; appropriate for majors and non-majors with significant language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia.

3 units, 181: Aut (Greenhill), 182: Win (Staff), 183: Spr (Khassina)

SLAVLANG 199. Individual Work—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLANG 299. Independent Study—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLANG 395. Graduate Studies in Russian—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

SLAVIANSKI DOM

Other in-house courses may be announced.

SLAVLANG 60A. Beginning Russian Conversation—(AU)

1 unit, Aut, Win, Spr (Staff)

SLAVLANG 60B. Intermediate Russian Conversation—(AU)

1 unit, Aut, Win, Spr (Staff)

SLAVLANG 60C. Advanced Russian Conversation—(AU)

1 unit, Aut, Win, Spr (Staff)

SLAVLANG 60D. East European Breweries and Brewing—(AU)

1 unit, Aut, Win, Spr (Staff)

SLAVLANG 60F. Slavic Films Series—(AU)

1 unit, Aut, Win, Spr (Staff)

SLAVLANG 60P. Theme Projects—(AU)

1 unit, Aut, Win, Spr (Staff)

SLAVLANG 60T. Teaching Slavic Conversation—(AU)

1 unit, Aut, Win, Spr (Staff)

SLAVLANG 99. Language Specials—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Staff)

SPANISH LANGUAGE COURSES

Students who have never studied Spanish before should enroll in SPANLANG 1. Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Spanish before entering Stanford. All entering students who have not taken the Spanish Language Advanced Placement (AP) Exam and received a score of 4 or 5, or who have not taken the SAT II with a score of 630 or above, must take Part I (written) of the placement test online during the summer at http://language.stanford.edu/SPANISH, followed by Part II (oral), to be administered on campus September 21, 2005. Students who have passed the language AP exam with a 4 or 5 or are exempted from the written test, but must take the oral on September 21, 2005 in order to determine their correct placement; these students are eligible for 10 units of credit in Spanish. Consult the Language Center or http://language.stanford.edu/ for further information.

Completion of SPANLANG 2A, 3, or 41C fulfills the University language requirement.

Students who grew up in homes where Spanish is spoken should take the placement test for the special series of courses (21B,22B,23B) designed for these speakers. The bilingual series fulfills the language requirement at Stanford. Potential home-background speakers should complete the questionnaire found at http://language.stanford.edu/HOME-BACKGROUND.

A grade of ‘C’ or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit, and must be taken in sequence.

FIRST- AND SECOND-YEAR SPANISH

SPANLANG 1,2,3. First-Year Spanish—Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish- and English-speaking world.

5 units, Aut, Win, Spr (Brates, Guzmán, Urruela, Won, Zaragoza, Staff)

SPANLANG 1A,2A. Accelerated First-Year Spanish—Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: written and oral placement tests.

5 units, 1A: Aut, Win, 2A: Win, Spr (Alexander, Guzmán, Miano, Villalba-Rosado)

SPANLANG 10. Beginning Oral Communication—For students who have completed or are currently taking 2 and who wish to devote additional time to giving pronunciation, usable vocabulary, and speaking skills. May be repeated once for credit.

2 units, Aut, Win, Spr (Corso)

SPANLANG 11C,12C,13C. Second-Year Spanish: Cultural Emphasis—Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentation of social and cultural discourse in both formal and informal contexts. Prerequisite: one year of college Spanish or equivalent.

4-5 units, Aut, Win, Spr (Kenna, Molitoris, Urruela, Won, Zaragoza)

SPANLANG 11R,12R,13R. Second-Year Spanish: Emphasis on International Relations—Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentation of language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: one year of college Spanish or equivalent.

4-5 units, 11R: Aut, 12R: Win, 13R: Spr (Perales, Sierra)

SPANLANG 15. Intermediate Oral Communication—Emphasis is on interaction in Spanish both locally and globally. Regional vocabularies and cultures at home and abroad. Interaction with local native Spanish speakers and communities globally via the Internet. May be repeated once for credit.

3 units, Aut, Win, Spr (Zaragoza)

SPANLANG 19M. Spanish for Heritage and Foreign Language Pre-Med and Public Health Students—For pre-med or public health students who grew up in homes where Spanish is spoken or for students who possess a considerable command of Spanish. Focus is on developing the ability to provide information on health-related topics to Spanish speakers in the U.S. Students participate in the organization and delivery of information on preventive health care in a workshop setting to a Spanish-speaking community.

3-4 units, Spr (Sierra)

SPANLANG 41A,B,C. Intensive First-Year Spanish—Goal is to engage in interactions with Spanish speakers in socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units register for 241A,B,C.

5 units, Sum (Staff)

SPANLANG 50. Reading Spanish—For students who have already taken Spanish for at least one year or have superior reading proficiency in another Romance language. Emphasis is on academic texts. Fulfills University reading requirements for advanced degrees, if students earn a grade of ‘B’.

3 units, Spr (Sierra)
SECOND-YEAR COURSES FOR HERITAGE LANGUAGE STUDENTS

SPANLANG 21B, 22B, 23B. Second-Year Spanish for Heritage Language Students — Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, movies, radio, and television. Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers used in more formal settings.

3-5 units, 21B: Aut, Win, 22B: Win, 23B: Spr (Staff)

ADVANCED COURSES

SPANLANG 100. Advanced Oral Communication — For students who have completed second-year Spanish or who have oral skills above the intermediate level. Interactive activities require students to persuade, analyze, support opinions, and gather and interpret others’ points of view. Focus is on vocabulary enrichment and idiomatic expressions. Cultural, literary, political, and journalistic readings. May be repeated once for credit. Prerequisite: 13 or equivalent.

3 units, Win, Spr (Staff)

SPANLANG 101. The Structure of Spanish — Criteria and skills to analyze Spanish grammatical structure. Identification of word functions in sentences and texts, types of sentences, and terminology. Structure of nouns, adjectives, and verbs, and their relationship with meaning. The differences between Spanish grammar as a formal system and in everyday life. Prerequisite: 13C, 13R, 23B, or equivalent.

3-5 units, Win (Sierra)

SPANLANG 102. Composition and Writing Workshop — Individual development of the ability to write in Spanish. Emphasis is on style and diction, and on preparing and writing essays on literary topics. Non-Spanish majors or minors may choose topics more closely related to their studies for projects. Prerequisite: two years of college Spanish or equivalent. WIM

3-5 units, Win (Kenna)

SPANLANG 102B. Composition and Writing Workshop for Heritage Language Students — For students with a good understanding of written accents, spelling, and syntax. Focus is on the craft of writing with emphasis on brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Writing essays on literary topics. Non-Spanish majors or minors may choose topics related to their studies. Prerequisite: 21B, 22B, and 23B or equivalent. WIM

3-5 units, Win (Miano)

SPANLANG 121M, 122M, 123M. Spanish for Medical Students — (Same as HRP 208, 209, 210.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, 121M: Aut, 122M: Win, 123M: Spr (Corso)

SPANLANG 199. Individual Reading — May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

SPANLANG 394. Graduate Studies in Spanish Conversation — Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (Staff)

SPANLANG 395. Graduate Studies in Spanish — Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

YOST HOUSE

Other in-house courses may be announced.

SPANLANG 60A. Beginning Spanish Conversation — (AU)
1 unit, Aut, Win, Spr (Staff)

SPANLANG 60B. Intermediate Spanish Conversation — (AU)
1 unit, Aut, Win, Spr (Staff)

SPANLANG 60C. Advanced Spanish Conversation — (AU)
1 unit, Aut, Win, Spr (Staff)

SPANLANG 60K. Cooking Class — (AU)
1 unit, Aut, Win, Spr (Staff)

SPANLANG 60M. Movie Series — (AU)
1 unit, Aut, Win, Spr (Staff)

SPANLANG 60P. Yost Lecture Series — (AU)
1 unit, Win, Spr (Staff)

SPANLANG 60T. Teaching Spanish Conversation — (AU)
1 unit, Aut, Win, Spr (Staff)

SPANLANG 99. Language Specials — May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

SPECIAL LANGUAGE PROGRAM

The Special Language Program (SLP) offers a number of foreign languages not otherwise taught at Stanford. Based on current funding and student requests, the courses for 2006-07 are listed below; however, not every course listed is taught. Additional languages may still be offered upon request, provided funding is available. Requests for the 2006-07 academic year should be made by Spring Quarter of this year at the Special Language Program office.

All beginning-level courses are offered on a satisfactory/no credit basis only. Intermediate-level and 4-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year’s sequence of language study. Most 3-unit language courses are offered for a two-year, three quarter sequence:

- All ‘A’ suffix courses are taught Autumn.
- All ‘B’ suffix courses are taught Winter.
- All ‘C’ suffix courses are taught Spring.

All beginning, intermediate, and advanced courses are 3 units except modern Greek and ASL. In some circumstances, a beginning or intermediate course may be offered in alternate years.

FULFILLING THE LANGUAGE REQUIREMENT

Students may fulfill the language requirement by taking a special language. At least 12 units are needed to complete the requirement. Students who have already taken courses in the relevant language at another institution, or who have previous knowledge of the language, can request to be tested. Tests are comprised of written and oral parts. A student must display first-year level proficiency in the requested language in order to fulfill the requirement. Testing is guaranteed only for these languages currently offered. Students planning to take a test must contact the Special Language Program no later than the Spring Quarter of sophomore year. To submit a request for language testing, or to request a language, apply via the web at http://www.stanford.edu/dept/SLP.

BEGINNING-LEVEL, FIRST-YEAR COURSES

Beginning-level, first-year language courses are required no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

INTERMEDIATE-LEVEL, SECOND-YEAR COURSES

Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incor-
porate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions.

Specific purpose curricular objectives and enhanced understanding of the culture are built in the courses through a multimodal approach.

**ADVANCED-LEVEL, THIRD-YEAR COURSES**

Advanced-level, third-year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic, print, and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

For further information consult the Special Language Program, Building 40, Room 41B.

**SPECLANG 75. Greek Culture, Ideals, and Themes, First Quarter**
—Introduction to Greek culture and its global influence in a social historical context, through images from its past and institutions in contemporary Greek society. Limited enrollment. GER:DB-Hum, EC-GlobalCom 3 units, Spr (Prionas)

**SPECLANG 115A,B,C. Beginning Uighur**
3 units A: Aut, B: Win, C: Spr (Atteavala)

**SPECLANG 116A,B,C. Intermediate Uighur**
3 units A: Aut, B: Win, C: Spr (Staff)

**SPECLANG 123A,B,C. Beginning Armenian**
3 units (Staff) not given 2005-06

**SPECLANG 126A,B,C. Beginning Turkish**
3 units, A: Aut, B: Win, C: Spr (Staff)

**SPECLANG 127A,B,C. Intermediate Turkish**
3 units, A: Aut, B: Win, C: Spr (Staff)

**SPECLANG 129A,B,C. Beginning Ukrainian**
3 units, A: Aut, B: Win, C: Spr (Staff)

**SPECLANG 132A,B,C. Beginning Tibetan**
3 units, A: Aut, B: Win, C: Spr (Lama)

**SPECLANG 138A,B,C. Beginning Navajo**
3 units, A: Aut, B: Win, C: Spr (Staff)

**SPECLANG 144A,B,C. Beginning Tagalog**
3 units, A: Aut, B: Win, C: Spr (Staff)

**SPECLANG 145A,B,C. Intermediate Tagalog**
3 units, A: Aut, B: Win, C: Spr (Staff)

**SPECLANG 146A,B,C. Beginning Persian**
3 units, A: Aut, B: Win, C: Spr (Fahimi)

**SPECLANG 150A,B,C. Beginning Vietnamese**
3 units, A: Aut, B: Win, C: Spr (Ha)

**SPECLANG 151A,B,C. Intermediate Vietnamese**
3 units, A: Aut, B: Win, C: Spr (Ha)

**SPECLANG 152A,B,C. Beginning Hindi**
3 units, A: Aut, B: Win, C: Spr (Malhotra)

**SPECLANG 153A,B,C. Intermediate Hindi**
3 units, A: Aut, B: Win, C: Spr (Malhotra)

**SPECLANG 156A,B,C. Beginning Indonesian**
3 units, A: Aut, B: Win, C: Spr (Jamhari)

**SPECLANG 159A,B,C. Beginning Punjabi**
3 units, A: Aut, B: Win, C: Spr (Dhillon)

**SPECLANG 160A,B,C. Intermediate Punjabi**
3 units, A: Aut, B: Win, C: Spr (Dhillon)

**SPECLANG 162A,B,C. Beginning Tamil**
3 units, A: Aut, B: Win, C: Spr (Staff)

**SPECLANG 164A,B,C. Beginning Czech**
3 units, A: Aut, B: Win, C: Spr (Dusatko)

**SPECLANG 165A,B,C. Intermediate Czech**
3 units, A: Aut, B: Win, C: Spr (Dusatko)

**SPECLANG 167A,B,C. Beginning Polish**
3 units, A: Aut, B: Win, C: Spr (Kieturakis)

**SPECLANG 168A,B,C. Intermediate Polish**
3 units, A: Aut, B: Win, C: Spr (Kieturakis)

**SPECLANG 170A,B,C. Beginning Modern Greek**
2-4 units, A: Aut, B: Win, C: Spr (Prionas)

**SPECLANG 171A,B,C. Intermediate Modern Greek**
4 units, A: Aut, B: Win, C: Spr (Prionas)

**SPECLANG 172A,B,C. Modern Greek Language and Culture through Literature and Film**
—Accelerated acquisition of reading, writing, comprehension, and conversation skills through literary texts and films. Grammatical structures, idiomatic expression usage, and vocabulary enrichment through complementary, multimedia-based, online materials. Alternates with 171A,B,C.
4 units, A: Aut, B: Win, C: Spr (Prionas)

**SPECLANG 173A,B,C. Beginning Hungarian**
3 units, A: Aut, B: Win, C: Spr (Mihalik)

**SPECLANG 174A,B,C. Beginning Quechua**
3 units, A: Aut, B: Win, C: Spr (Fajardo)

**SPECLANG 176A,B,C. Beginning Thai**
3 units, A: Aut, B: Win, C: Spr (Moore)

**SPECLANG 177A,B,C. Intermediate Thai**
3 units, A: Aut, B: Win, C: Spr (Moore)

**SPECLANG 178A,B,C. Beginning Sign Language**
—Limited enrollment.
4 units, A: Aut, B: Win, C: Spr (Haas)

**SPECLANG 179A,B,C. Intermediate Sign Language**
—Limited enrollment.
4 units, A: Aut, B: Win, C: Spr (Haas)

**SPECLANG 183A,B,C. Beginning Sanskrit**
3 units, A: Aut, B: Win, C: Spr (Porta)

**SPECLANG 186A,B,C. Beginning Serbo-Croatian**
3 units, A: Aut, B: Win, C: Spr (Medic)

**SPECLANG 198Q. Modern Greece in Film and Literature**
—Stanford Introductory Seminar. Preference to sophomores. Cultural and literary highlights. Filmmakers include Krokiasmis, Dassan, Boulemitis, and Scorsese; readings from Kazantzakis, Samarakis, Seferis, and Elytis. GER:DB-Hum, EC-GlobalCom 3-5 units, Aut (Prionas)

**SPECLANG 215A,B,C. Modern Greek for Heritage Language Learners**
2-4 units, A: Aut, B: Win, C: Spr (Prionas)

**SPECLANG 221A,B,C. Beginning Norwegian**
3 units, A: Aut, B: Win, C: Spr (Staff)

**SPECLANG 226 A,B,C. Beginning Khmer**
3 units, A: Aut, B: Win, C: Spr (Meng)

**SPECLANG 297. Directed Reading**
—Prerequisite: consent of instructor.
1-4 units, Aut, Win, Spr, Sum (Staff)

**SPECLANG 395. Graduate Studies in Special Language**
—Prerequisite: consent of instructor.
1-4 units (Staff)
CENTER FOR LATIN AMERICAN STUDIES

Director of the Center: Herbert S. Klein
Associate Director: Molly Vitorte
Visiting Professors: Gustavo Buscaglia, Marcos Cueto, Margo Glantz, Ruy de Queiroz

Affiliated Faculty and Staff:
Anthropological Sciences: Clifford R. Barnett (emeritus), William H. Durham, James A. Fox, Dominique Irvine, John W. Rick, Ian Robertson
Art and Art History: Barbaro Martinez-Ruiz
Biological Sciences: Gretchen Daily, Rodolfo Dirzo, Harold Mooney, Peter Vitousek, Virginia Walbot
Cantor Arts Center: Manuel Jordán
Comparative Literature: Carolyn Duffey, Roland Greene, Hans U. Gumbrecht
Cultural and Social Anthropology: George Collier (emeritus)
Dance: Susan Cashion
Earth Sciences, School of: Pamela Matson, Suki Hoagland
Economics: David McKenzie, Roger Noll, Clark Reynolds (emeritus), Esteban Rossi-Hansberg
Education, School of: Martin Carnoy, Amado Padilla
Engineering, School of: Bruce Luiginan, Leonard Ortolano
English: Ramón Saldívar (also Comparative Literature)
History: Zephyr Frank, Tamar Herzog, Herbert S. Klein
Hoover Institute: William Ratliff
Human Biology: Anne Firth Murray
Language Center, Special Languages Program: José Carlos Fajardo
Law, School of: Jonathan Greenberg
Linguistics: John Rickford
Medicine, School of: Victor F. Froelicher, Evaleen K. Jones, Samuel LeBaron, Julie Parsonnet, Peter M. Small
Political Science: Alberto Díaz-Cayeros, Stephen Haber, Terry Karl, Beatriz Magaloni, Robert Packenham (emeritus), Michael Tomz
Religious Studies: Thomas Sheehan
Sociology: Alex Inkeles (emeritus), Michael Rosenfeld

Web Site: http://las.stanford.edu/

The Center for Latin American Studies supports research and teaching on Latin America by the faculty and students of Stanford in all fields of study. Field research, language training, and interdisciplinary approaches are stressed in the Latin American Studies program, which draws on the strength and diversity of its nationally recognized faculty affiliates and substantial library holdings on Latin America. These resources are enhanced by the Tinker Visiting Professorship in Latin American Studies and the Nabuco Visiting Chair in Brazilian Studies, which bring distinguished Latin American scholars to teach at Stanford each year.

The center’s resources include funds used in support of student and faculty activities and classes in and about Latin America, visiting professors and scholars, and various forms of public outreach. CLAS also devotes resources to Iberian and Caribbean studies. The center offers an honors certificate program as well as a minor in Latin American Studies for undergraduates.

UNDERGRADUATE PROGRAMS

Although the University does not offer a B.A. in Latin American Studies, it does offer a minor and an honors program. Stanford also has departmental and interdisciplinary degree programs in which a student may concentrate on Latin America. These include Anthropological Sciences, Cultural and Social Anthropology, History, Political Science, Spanish and Portuguese, and International Relations. Contact the respective departments for further information.

MINORS

The minor in Latin American Studies is offered to students in any major who wish to develop a complementary concentration on the region. To pursue the minor, students must submit for approval an online proposal of course work no later than the second quarter of their junior year. The minor must be completed by the second quarter of the senior year. Requirements for the minor include:

1. Completion of 25 units as follows: a 5-unit course surveying Latin America such as HISTORY 70 or an approved substitute; 20 additional units at the 100 level or higher which together comprise a coherent focus on a theoretical problem or issue of the region such as culture and identity, political economy, or sustainable development. At least 10 of the 25 units must be completed at Stanford.

2. Demonstration of proficiency in either Spanish or Portuguese, equivalent to the requirement for the honors certificate.

3. Field experience in Latin America such as study abroad, summer research, or internship is recommended.

Units for a student’s major cannot be double-counted towards the minor.

Upon satisfactory completion of all requirements, the center’s subcommittee on undergraduate programs authorizes the designation of the Minor in Latin American Studies on the student’s transcript.

HONORS PROGRAM

The Honors Program in Latin American Studies is open to majors in any field. The aim of the honors program is to prepare students to pursue individualized research on Latin America, culminating in the preparation of an honors thesis written under the supervision of a faculty adviser. The honors program is particularly suited to the student who wishes to go on to graduate school or pursue employment in an institution emphasizing research and independent work. Although not required, students are encouraged to undertake independent field research in Latin America for their thesis. It is strongly recommended that students enroll in HISTORY 299X, Design and Methodology for International Field Research (1 unit), in the sophomore or junior year for an overview of research design and methods for international field research.

Admission to the honors program is by application by the end of the junior year. Applications are reviewed and approved by the CLAS director and associate director. Applicants must have a cumulative grade point average (GPA) of 3.3 (B+) or higher, and maintain this average in courses taken to satisfy the requirements. All courses must be taken for a letter grade where that option is available. Courses credited toward LAS honors and associate director. Applicants must have a cumulative grade point average (GPA) of 3.3 (B+) or higher, and maintain this average in courses taken to satisfy the requirements. All courses must be taken for a letter grade where that option is available. Courses credited toward LAS honors may be double-counted toward the student’s major requirements.

To graduate with interdisciplinary honors in Latin American Studies a student must:

1. Complete a total of 35 units in courses certified for honors by the Center for Latin American Studies, distributed as follows:
   a) A survey: HISTORY 70, Culture, Politics, and Society in Latin America, or an approved substitute. This is normally taken in the sophomore year.
   b) For breadth: two 4-5-unit courses at the 100 level or higher with a focus on the region. These courses are normally taken during the sophomore and junior years.
   c) For depth: one 4-5-unit course at the 100 level or higher with a focus on the region that explores an issue in depth of particular interest to the student, approved by the honors adviser.
   d) LATINAM 198, Honors Thesis (1-10 units), under the supervision of the student’s faculty honors adviser. Normally these units are
spread over two or three quarters of the senior year and are devoted to the completion of the honors thesis.

e) LATINAM 201 (same as HISTORY 275F), Social Change in Latin America: Social Policy and Demographic and Social Change Since 1900 (5 units). This Winter Quarter honors seminar must be taken in the senior year.

f) Enough additional courses focusing on Latin America to bring the total to 35 units. These must be at the 100-level or higher, except that up to 5 units may also come from study of Spanish or Portuguese beyond the seventh quarter, or of a second language of Latin America at any level, as outlined in the Foreign Language Requirement.

g) Of the courses applied to ‘b’ and ‘c’ above, 10 units may be completed in Overseas Studies and 5 units may be taken as directed individual study.

2. Fulfill the Foreign Language Requirement (see below).

3. Submit an honors thesis which meets standards of scholarly excellence and is approved by the thesis adviser. If graduating in June, participate in the LAS honors symposium at the end of May.

FOREIGN LANGUAGE REQUIREMENT

The minimum requirement for completion of either the minor or honors certificate is advanced proficiency in Spanish or Portuguese by any one of the following means:

1. Completion of seven quarters of college-level study of Spanish or Portuguese.

2. Completion of a course on Spanish or Portuguese language or literature, or on some other subject but taught in Spanish or Portuguese, at the 100-level or higher, with a letter grade of ‘B’ (3.0).

3. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Department of Spanish and Portuguese.

HONORS COLLEGE

The LAS honors college, sponsored along with many other departmental and interdisciplinary honors colleges by the Vice Provost for Undergraduate Education, is an intensive three-week residential program offered directly preceding Autumn Quarter. It affords returning LAS honors students who have completed field work a debriefing and a focused series of presentations by a member of the CLAS-affiliated faculty and other Stanford instructors on adviser interaction, data preservation, bibliographic resources, writing strategies, statistical analysis, organizational techniques for completing the thesis process, and opportunities to socialize with other honors students in the college, all without cost to the students. Ample time is provided for library research, individual faculty consultations, and data analysis. Applications for honors colleges are available in Spring Quarter prior to the senior year.

SUMMER INTERNSHIP GRANT

Each summer, the center awards grants to a small number of undergraduates to undertake internships in Latin America. Applications include a proposal, academic transcript, and recommendations from a faculty sponsor and one other person knowledgeable about the applicant’s abilities. Students from all departments are eligible to apply.

GRADUATE DEGREE PROGRAMS

Although the University does not offer an M.A. or Ph.D. in Latin American Studies, Stanford has several departmental programs through which a student may concentrate on Latin America. These include Anthropological Sciences, Cultural and Social Anthropology, History, Political Science, and Spanish and Portuguese. Contact the respective departments for admission information.

COURSES

LATINAM 135. The Mexican Novel and the Cinema—(Same as SPANLIT 149.) Novels dealing with the Mexican Revolution from the revolutionary period to the 80s. Adaptations to film and television. Relationship among artistic languages. 5 units, Spr (Glantz)

LATINAM 136. Gender Violence in Latin American Literature—(Graduate students register for SPANLIT 355.) Women writers who dealt with gender-based social inequities and contradictions. Writers include Sor Juana Inés de la Cruz, María de Zayas, Nellie Campobello, and Elena Garro. 5 units, Aut (Glantz)

LATINAM 137/237. Health, Medicine, and Society in Latin American History—(Same as HISTORY 277G.) The role played by disease, public health and medicine in Latin American societies during the 19th and 20th centuries. How changing perceptions and definitions of health and disease, gender and the body, and race and ethnicity have shaped official and popular understandings of the health of individuals, populations, and societies. 5 units, Win (Cueto)

LATINAM 197. Directed Individual Research—For students engaged in special interdisciplinary work that cannot be arranged by department. 1-10 units, Aut, Win, Spr (Staff)

LATINAM 198. Honors Thesis—Restricted to those writing an honors thesis in Latin American Studies. 1-10 units, Aut, Win, Spr (Staff)

LATINAM 201/301, Social Change in Latin America Since 1900—(Same as HISTORY 275F.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. 5 units (Klein) not given 2005-06

INTERDEPARTMENTAL OFFERINGS

Since CLAS is an interdisciplinary program, many of its course requirements are offered through other departments. See http://las.stanford.edu/programs/courses.html for additional course listings.

CHICANA/O STUDIES

CHICANAST 181S. U.-Mexico Borderlands in Comparative Perspective 5 units, Spr (Palafox)

HISTORY

HISTORY 70. Culture, Politics, and Society in Latin America 5 units, Win (Frank)

POLITICAL SCIENCE

POLISCI 141. The Global Politics of Human Rights 5 units, Win (Karl)

OVERSEAS STUDIES

Courses taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

SANTIAGO

LATINAM 58X. Living Chile: A Land of Extremes—(Same as EARTHSYS 110X.) 5 units, Aut, Spr (Poblete, Ginocchio)

LATINAM 141X. Politics and Culture in Chile 5 units, Spr (Subercaseaux)

LATINAM221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective—(Same as POLISCI 243P.) 5 units, Aut (Micco)
LINGUISTICS

Chair: Beth Levin
Professors: Joan Bresnan, Eve V. Clark (on leave), Penelope Eckert, Martin Kay, Paul Kiparsky, Beth Levin, Stanley Peters, John R. Rickford (on leave), Ivan A. Sag, Peter Sells, Thomas A. Wasow (Winter)
Associate Professors: David Beaver (Autumn), Daniel Jurafsky (Autumn, Winter)
Assistant Professors: Arto Anttila, Christopher Manning
Senior Lecturers: Philip L. Hubbard, Beverley J. McChesney
Consulting Professors: Ronald Kaplan, Lauri Karttunen, Geoffrey Nunberg, Annie Zaenen
Consulting Associate Professors: Jared Bernstein, Cleo Condoravdi
Lecturers: Vivienne Fong, Brook Lillehaugen
Visiting Professor: Arnold Zwicky
Visiting Assistant Professor: Norma Mendoza-Denton
Affiliated Faculty: Herbert H. Clark (on leave), James A. Fox, Kenji Hakuta, Miyako Inoue, Yoshiko Matsumoto (on leave), Orrin W. Robinson III, Richard D. Schupbach, Chaofen Sun

* Recalled to active duty.

Department Offices: Margaret Jacks Hall, Building 460
Mail Code: 94305-2150
Phone: (650) 723-4284
Email: linguistics@csil.stanford.edu
Web site: http://www-linguistics.stanford.edu

Courses given in Linguistics have the subject code LINGUIST. For a complete list of subject codes, see Appendix.

Linguistics concerns itself with the fundamental questions of what language is and how it is related to the other human faculties. In answering these questions, linguists consider language as a cultural, social, and psychological phenomenon and seek to determine what is unique in languages, what is universal, how language is acquired, and how it changes. Linguistics is, therefore, one of the cognitive sciences; it provides a link between the humanities and the social sciences, as well as education, and hearing and speech sciences.

The department offers courses at the undergraduate and graduate levels in the areas central to linguistic theory and analysis. Many of them deal with the analysis of structural patterns in the different components that make up language, including sounds (phonetics and phonology), meanings (semantics), words (morphology), sentences (syntax), and the way they vary and change over time. Other courses integrate the analysis of linguistic structure with phenomena that directly concern other disciplines. These include courses in computational linguistics, language acquisition, the philosophy of language, and sociolinguistics.

A variety of open forums provide for the discussion of linguistic issues, including colloquia and regularly scheduled workshops in child language, computational linguistics, phonology, semantics, sociolinguistics, and syntax. Faculty and visiting scholars in the department and the Center for the Study of Language and Information, whose members are computer scientists, linguists, philosophers, and psychologists, participate extensively in the activities of the department.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major stresses the study of language both as a fundamental human faculty and as a changing social institution. At the core of the program is a set of departmental courses on the nature of human language; the major also draws on courses offered by other departments and programs.

The Linguistics major cuts across the humanities and the social and physical sciences. It provides a solid general education as a background for advanced studies in such disciplines as Anthropology, Communication, Computer Science, Education (Language, Literacy, and Culture), hearing and speech sciences, languages, Law, Linguistics, Philosophy, and Psychology.

REQUIREMENTS

Requirements for the B.A. include at least 50 units of course work in Linguistics and approved courses in related fields. Of the 50 units required for the major, no more than 12 may be below 100 level. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis.

Core Courses — The core courses are:

LINGUIST 1. Introduction to Linguistics
LINGUIST 110. Introduction to Phonetics and Phonology
LINGUIST 120. Introduction to Syntax
LINGUIST 130A. Introduction to Linguistic Meaning, or 130B. Introduction to Lexical Semantics
LINGUIST 150. Language in Society, which fulfills the Writing in the Major requirement (WIM)
LINGUIST 160. Introduction to Language Change, or, in advance consultation with the Linguistics undergraduate studies chair, a course in historical linguistics or the history of a language.

All majors must complete at least five core courses, including LINGUIST 150, Language and Society, which fulfills the Writing in the Major requirement (WIM).

Other Courses — Other courses counting toward the unit requirement should form a coherent program with emphases from among the areas of concentration listed below. Students should consult with the Linguistics undergraduate studies chair when declaring the major, and maintain regular contact during the remainder of their Stanford career. Each student’s major program must be approved by the Linguistics undergraduate studies chair, or approved department adviser.

Students in the major must also take:

1. At least two 200-level Linguistics courses, typically in their area of concentration.
2. LINGUIST 197, Undergraduate Research Seminar, in the junior year. (Special arrangements can be made for transfer students and others who start the major later.)

Other Requirements

1. Foreign Language: majors must have competence in at least one language other than English as part of their understanding of the field of linguistics and its study. This is usually demonstrated by the completion of six quarters of language study at Stanford or equivalent; level of proficiency is determined by the Language Center or the relevant language department.

Students may petition to be exempted from the Language Requirement if they have grown up speaking a language other than English and can use it for everyday purposes and for linguistic analysis.

2. Junior Research Paper: this requirement is typically fulfilled by providing an additional stage of revision on a research paper previously submitted in a Linguistics course. It must be approved by both the instructor of the course and the Linguistics undergraduate studies chair.

AREAS OF CONCENTRATION

Students select one of the following areas of concentration or develop one themselves in advance consultation with the Linguistics undergraduate studies chair.

General Linguistics — This program provides a broad education in Linguistics and is advisable for students interested in advanced degrees in Linguistics. All five core courses are required.

Language and Society — This concentration focuses on the social dimensions of language.

Language Structures — This concentration focuses on the cognitive aspects of language.

1. Specialization in Chinese: in addition to the core courses in Linguistics, and LINGUIST 197, Undergraduate Research Seminar, students must
have competence in Chinese at the level of six quarters of language study at Stanford, and complete at least two courses in Chinese linguistics, one of which must be at the 200 level. Courses include:

- CHINGEN 72. The Making of an Official Language
- CHINGEN 73/173. Chinese Language, Culture, and Society
- CHINLIT 191/291. The Structure of Modern Chinese
- CHINLIT 192/292. The History of Chinese
- CHINLIT 391. Seminar in Chinese Syntax

2. Specialization in Japanese: in addition to the core courses in Linguistics, and LINGUIST 197, Undergraduate Research Seminar, students must have competence in Japanese at the level of six quarters of language study at Stanford, and complete at least two courses in Japanese linguistics, one of which must be at the 200 level. Courses include:

- JAPANGEN 71N. Language and Gender in Japan
- JAPANLIT 157. Points in Japanese Grammar
- JAPANLIT 177/277. The Structure of Japanese
- JAPANLIT 188/288. Diversity in Japanese Language: Regional Dialects and their Images
- JAPANLIT 281. Japanese Pragmatics
- JAPANLIT 289. Topics in Japanese Linguistics: Implications of Diversity in Language
- JAPANLIT 291. Readings in Japanese Linguistics
- JAPANLIT 381. Topics in Pragmatics and Discourse Analysis

3. Specialization in Spanish: in addition to the core courses in Linguistics, and LINGUIST 197, Undergraduate Research Seminar, students must have competence in Spanish at the level of six quarters of language study at Stanford, and complete at least three courses in Spanish linguistics such as SPANLIT 207, Theory and Issues in the Study of Bilingualism

Other language concentrations can be arranged on an ad hoc basis if appropriate courses are available in the relevant departments.

MINORS

Requirements for the minor include at least 28 units of course work (typically 7 courses) in Linguistics and related fields, approved in advance by the Linguistics undergraduate studies chair. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis. The courses counting towards the minor must be incremental units beyond those needed to satisfy the student’s major course of study. The minor consists of:

1. LINGUIST 1. Introduction to Linguistics
2. Two out of the following five Linguistics core courses:
   - LINGUIST 110. Introduction to Phonetics and Phonology
   - LINGUIST 120. Introduction Syntax
   - LINGUIST 130A. Introduction to Linguistic Meaning, or LINGUIST 130B. Introduction to Lexical Semantics
   - LINGUIST 160. Introduction to Language Change, or, in advance consultation with the Linguistics undergraduate studies chair, a course in historical linguistics or the history of a language.
3. At least four other courses determined in advance consultation with the Linguistics undergraduate studies chair. Students are encouraged to take at least one 200-level Linguistics course. Students may also choose to do independent work with a faculty member of their choice.

HONORS PROGRAM

Students who wish to undertake a more intensive program of study, including independent research, should seek departmental honors. An application to pursue honors work should be presented to a Linguistics undergraduate adviser before the end of the junior year. Approval is given only to students who have maintained a grade point average (GPA) of 3.3 (B+) or better in the courses required for the major.

Honors students take a total of 60 units. These must include the 50 units for the major, 10 additional units of independent study and Honors Research and an honors thesis based on research conducted with a principal adviser who must be a member of the Linguistics faculty, and a secondary faculty adviser who may, with the approval of the Undergraduate Studies Committee, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in LINGUIST 199. Independent Study, to work closely with one of the advisers on the research project. In Winter and Spring quarters, honors students register in LINGUIST 198, Honors Research, with the principal adviser for close supervision of the honors thesis. The thesis must be submitted in final, acceptable, form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

COTERMINAL PROGRAM

The Department of Linguistics admits a very limited number of undergraduates to work for their coterminal degree in Linguistics. Students are required to submit to the department a complete application, which includes a statement of purpose, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree rest with the Graduate Admissions Committee of the Department of Linguistics. For further application information, see the department’s web pages.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

MASTER OF ARTS

The University’s basic requirements for the master’s degree are discussed in the “Graduate Degrees” section of this bulletin. The following are additional departmental requirements. Candidates should review the department’s “Guidelines for the M.A. and Ph.D. Degrees” for further particulars concerning these requirements.

1. Courses: candidates must complete a minimum of 45 units of graduate work in linguistics, including at least four courses in the student’s area of specialization. No more than two courses should be at the 100 level.

Individual programs should be worked out in advance with an adviser who should ascertain that the necessary courses in the area of specialization are offered over the course of the year of anticipated enrollment. The overall grade point average (GPA) must be at least 3.0 (B) for all degree program coursework.

2. Language: reading knowledge of a non-native language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language, or in-depth research on the structure of a non-native language.

3. Thesis or Thesis Project: a research paper supervised by a committee of three faculty (normally fulfilled by up to 6 units of LINGUIST 398, Directed Research).

DOCTOR OF PHILOSOPHY

The following requirements are in addition to the basic University requirements for the degree sought; see the “Graduate Degrees” section of this bulletin. Candidates should review the department’s “Guidelines for the M.A. and Ph.D. Degrees” for further particulars concerning these requirements.

1. Language: candidates must demonstrate the ability to read at least one foreign language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language. (Particular areas of specialization may require additional research languages.)

In addition, each candidate must demonstrate an explicit in-depth knowledge of the structure of at least one language (normally neither the candidate’s native language nor the language used for the reading exam). This requirement is fulfilled by writing an original research paper on a language.

2. Courses: a minimum of 135 units of graduate work beyond the B.A. or B.S. exclusive of dissertation units or, beyond the M.A., 90 units exclusive of dissertation units. A basic course requirement detailed in
the Ph.D. guidelines guarantees that each student covers a sufficient set of subareas within the field. Candidates must maintain a satisfactory record in the number and distribution of units completed. The overall course work GPA must be at least 3.0 (B) and all of the basic courses should be completed with at least a ‘B.’

3. Research: the prospective Ph.D. candidate is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of the Autumn Quarter of the second year; the deadline for completion of the second qualifying paper is the end of Spring Quarter of the second year. The subject matter of the two papers, although it may be related (for example, same language), must be clearly distinct. The requirement is fulfilled by LINGUIST 395A, B, Research Workshop (1-2 units each), and by oral discussion with a committee of at least three faculty members selected by the student and the faculty.

4. Candidacy: students must complete a prescribed portion of the basic course requirement (see item 2 above), one foreign language requirement (see item 1 above), and one qualifying paper (see item 3 above) by the end of their second year.

5. Teaching: at least three quarters serving as teaching assistant in a linguistics course.

6. Colloquia: two oral presentations exclusive of the oral presentation of the dissertation proposal (see item 7b below). This requirement is satisfied by class presentations, conference papers, or colloquium talks. Normally, both should be given during the first four years of study.

7. Dissertation:
   a) A written dissertation proposal is required by the end of the third year.
   b) Oral presentation of the dissertation proposal, preferably as a colloquium.
   c) Approval of the dissertation topic and appointment of a dissertation committee.
   d) Successful passing of a University oral examination on the dissertation and related areas.
   e) Dissertation (up to 15 units of LINGUIST 399).

PH.D. MINOR

1. Courses: the candidate must complete 30 units of course work in linguistics at the 100 level or above, including LINGUIST 110, 120, and either 130A or 130B (100-level courses are waived if 200-level courses in the same area are taken), and at least three courses related to the area of specialization. Courses submitted for the minor must be incremental units beyond those used to satisfy the major. Individual programs should be worked out in advance with the student’s Ph.D. minor adviser in linguistics.

2. Research Project (optional): the candidate may elect to present a paper which integrates the subject matter of linguistics into the field of specialization of the candidate.

3. The linguistics adviser or designee serves on the candidate’s University oral examination committee and may request that up to one-third of the examination be devoted to the minor subject.

Ph.D. Minor in Applied Linguistics — The Department of Linguistics participates in the Applied Linguistics Minor. See the “Language Center” section of this bulletin for full details.

COGNITIVE SCIENCE

Linguistics is participating with the departments of Computer Science, Philosophy, and Psychology in an interdisciplinary program in Cognitive Science for doctoral students. The program is intended to provide an interdisciplinary education as well as a deeper concentration in linguistics. Students who complete the Linguistics and Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Linguistics. To receive this field designation, students must complete 30 units of approved courses, to be determined in consultation with the graduate studies adviser.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

LINGUISTICS

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for majors, minors, and M.A. and Ph.D. minor candidates in Linguistics. Those with numbers 200 and above are primarily for graduate students, but with consent of instructor some of them may be taken for credit by qualified undergraduates. At all levels, the course numberings indicate a special area, as follows:

- 01-04 General
- 05-09 Phonetics
- 10-14 Phonology
- 15-19 Morphology
- 20-29 Syntax
- 30-39 Semantics, Pragmatics, Discourse
- 40-49 Language Acquisition, Psycholinguistics
- 50-61 Sociolinguistics, Language Variation, Change
- 62-73 Language and Culture, Structure of a Language
- 74-79 Methods, Mathematical Linguistics, Statistics
- 80-89 Computational Linguistics
- 90-93 Applied Linguistics
- 94-99 Directed Work, Theses, Dissertations

LINGUISTICS

LINGUIST 1. Introduction to Linguistics — The cognitive organization of linguistic structure and the social nature of language use. Why language learning is difficult. Why computers have trouble understanding human languages. How languages differ from one another. How and why speakers of the same language speak differently. How language is used strategically. GER: DB-SocSci
   4 units, Aut (Eckert, Sag)

   3 units, Aut (Beaver)

LINGUIST 34N. The Language of Advertising — Stanford Introductory Seminar. Preference to sophomores. The use of language in and the structural organization of advertisements. What aspects of advertising are effective, and why? How are commercials structured? What is the relation between language and images? What kinds of language are used in what kinds of advertising?
   3 units, Win (Sells)

LINGUIST 47N. Languages, Dialects, Speakers — Stanford Introductory Seminar. Preference to freshmen. Variation and change in languages from around the world. The roots, historical development, and linguistic and social structures of variation. How languages differ from each other, and how issues in linguistics connect to other social and cultural issues. The systematic study of language. GER: DB-SocSci
   3 units, Aut (Anttila)

LINGUIST 65/265. African American Vernacular English — (Graduate students register for 265.) The English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin’ and rappin’); educational implications. GER: DB-SocSci
   3-5 units (Rickford) not given 2005-06

LINGUIST 70. Structure of English Words — Patterns of structure and meaning in English vocabulary. The processes that have led to meanings and shapes of established and recently coined words. Given that language is in constant flux, what constitutes correct usage, and who decides. Students taking optional practicum register for 5 units. GER: DB-SocSci
   4-5 units, Aut (Leben)

LINGUISTICS

LINGUISTICS 101. Comparative Linguistics — Comparative linguistics, including historical and typological studies of human languages. How and why languages differ from one another. How and why speakers of the same language speak differently. How language is used strategically. GER: DB-SocSci
   4 units, Win (Beaver, Eickhoff)

LINGUISTICS 110. Structure of English Words — Patterns of structure and meaning in English vocabulary. The processes that have led to meanings and shapes of established and recently coined words. Given that language is in constant flux, what constitutes correct usage, and who decides. Students taking optional practicum register for 5 units. GER: DB-SocSci
   4-5 units, Aut (Leben)

   4-5 units, Aut (Beaver, Eickhoff)

LINGUISTICS 201N. Phonetics — The nature of speech sounds, acoustic and physical properties of speech sounds, and their role in the perception and production of language. GER: DB-SocSci
   4 units, Win (Sells)
LINGUIST 90. Teaching Spoken English—Practical approach to teaching English to non-native speakers. Teaching principles and the features of English which present difficulties. Preparation of lessons, practice teaching in class, and tutoring of non-native speaker.
3-4 units, Spr (Yerian)

LINGUIST 105/205. Phonetics—(Graduate students register for 205.) The study of speech sounds: how to produce them, how to perceive them, and their acoustic properties. The influence of production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: 110 or equivalent, or consent of instructor.
4 units, Aut (Scarborough)

LINGUIST 107/207. Seminar in Phonetics: Clear Speech—(Graduate students register for 207.) The phonetics and phonology of clear speech styles, including explicitly clear speech, lab speech, speech to the hard-of-hearing, and child-directed speech. Frequency, predictability, and confusability effects. The relation of these listener-directed speech effects to one another and to other hyperarticulation phenomena such as lexical and phrasal stress and prosodic strengthening. May be repeated for credit.
2-4 units, Spr (Scarborough)

LINGUIST 110. Introduction to Phonetics and Phonology—Differences in the sounds of the world’s languages and how these sounds are made by the human vocal tract. Theories that account for cross-linguistic similarities in the face of differences. GER:DB-SocSci
4 units, Spr (Anttila)

LINGUIST 120. Introduction to Syntax—Grammatical constructions, primarily English, and their consequences for a general theory of language. Practical experience in forming and testing linguistic hypotheses, reading, and constructing rules. GER:DB-SocSci
4 units, Aut (Sag)

LINGUIST 124A/224A. Introduction to Formal Universal Grammar—(Graduate students register for 224A.) A formal model of universal grammar to explain crosslinguistic variation in syntactic structure: nonconfigurationality in Australian aboriginal languages, incorporation in native American languages and the Bantu languages of Africa, scrambling and head movement in European languages. Issues such as universal grammar design, and analytic problems from a variety of natural languages. Prerequisites: introduction to syntax and familiarity with logic or other symbolic systems, or consent of instructor. GER:DB-SocSci
4 units, Aut (Sells)

LINGUIST 128/228. Real English: The Syntax of Language Use—(Graduate students register for 228.) Hands-on experience with modern corpus methods, and natural spoken and written syntactic data. Syntactic analysis of spontaneous spoken conversations and newspaper reportage, using tagged and parsed corpora such as the Penn Treebank. Topics include standard subject matter suitable for a syntax introduction, but each of the core topics is investigated empirically in natural English. GER:DB-SocSci
4 units (Bresnan) not given 2005-06

LINGUIST 130A. Introduction to Linguistic Meaning—Linguistic meaning and its role in communication. How diagnostic tests can be used to categorize and separate semantic phenomena such as ambiguity and vagueness, entailment, and presupposition. How basic set theory and logic can be used to specify meanings and explain semantic phenomena. Pragmatic complications involving the assumptions and intentions of language users. Those who have not taken logic, such as PHIL 150 or 151, should also enroll in 130C. Pre- or corequisite: 120, or consent of instructor. GER:DB-SocSci
4 units, Aut (Peters)

LINGUIST 130B. Introduction to Lexical Semantics—Issues in the study of word meaning. Focus is on the core semantic properties and internal organization of the four major word categories in natural languages: nouns, verbs, adjectives, and prepositions. GER:DB-SocSci
4 units, Win (Fong)

LINGUIST 130C. Logic Laboratory—Typically taken in conjunction with 130A/230A.
1 unit, Aut (Peters)

LINGUIST 133/233. Semantics Seminar: Tense and Aspect—(Graduate students register for 233.) The temporal structure of languages. Topics include the logic of time, presentation of situations, and semantics of tense and aspect in narrative discourse.
1-4 units, Aut (Fong)

LINGUIST 140. Language Acquisition I—Processes of language acquisition in early childhood; research questions and methods.
4 units, Spr (Estigarribia)

LINGUIST 144. Introduction to Cognitive Science—(Same as SYMBYSYS 100, PSYCH 130, PHIL 190.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci
4 units, Spr (Bresnan, van Benthem)

LINGUIST 145. Language and Thought—(Enroll in PSYCH 131/262.)
4 units (H. Clark) not given 2005-06

LINGUIST 150. Language in Society—How language and society affect each other. Social dialects, and class, ethnic, and gender differences in speech. Prestige and stigma associated with different ways of speaking and the politics of language. Stylistic practice; how speakers use language to construct styles and adapt their language to different audiences and social contexts. WIM
4 units, Spr (Mendoza-Denton)

LINGUIST 152/252. Pidgin and Creole Sociolinguistics—(Graduate students register for 252.) Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portuguese, Chinook, Motu, and Sango.
2-4 units (Rickford) not given 2005-06

LINGUIST 153/253. Sociophonetics—(Graduate students register for 253.) Phonetic aspects of sociolinguistic variation and the social significance of phonetic variation. Focus is on group and individual research and phonetic theory. Topics include methods of collecting data, conducting phonetic analyses, interpreting results, and how phonetic theory informs these practices. All domains of sound, including vowels, consonants, intonation, and voice quality. May be repeated for credit. Prerequisite: 110 or equivalent or consent of instructor.
2-4 units, Win (Podesva)

LINGUIST 156. Language and Gender—The role of language in the construction of gender, the maintenance of the gender order, and social change. Field projects explore hypotheses about the interaction of language and gender. No knowledge of linguistics required. GER:DB-SocSci, EC-Gender
4 units, Win (Eckert)

LINGUIST 159/259. Language in the U.S.—(Graduate students register for 259.) The multifaceted nature of language in the U.S. Social, regional, and ethnic varieties such as African American vernacular English and Appalachian English; other languages including Spanish, Native American languages, Asian American voices, and American Sign Language; and the sociolinguistic situation including language attitudes and prejudices, rap and hip hop, the language of doctors and patients, and the English only and Ebonics controversies. GER:DB-SocSci
3-5 units (Rickford) not given 2005-06
LINGUIST 160. Introduction to Language Change.—(Same as ANTHSCI 110.) Variation and change as the natural state of language. Differentiation of dialects and languages over time. Determination and classification of historical relationships among languages, and reconstruction of ancestral stages. Types, rates, and explanations of change. Parallels with cultural and genetic evolutionary theory. Implications for the description and explanation of language in general. GER:DB-SocSci
4-5 units, Win (Kiparsky)

LINGUIST 164. English Transplanted and Transformed.—English varieties around the world, including white vernacular dialects and creole, pidgin, and indigenized Englishes. Emphasis is on the historical circumstances of origin, linguistic characteristics, and social setting in colonial and postcolonial societies. Theoretical issues pertaining to language contact, language shift, and pidgin and creole formation.
2-4 units, Aut (Roberts)

LINGUIST 166. Ebonics and Other Vernaculars in Schools and Society.—The role that Ebonics and other vernaculars such as Gullah, Appalachian English, Hawaiian Pidgin, and the Caribbean Creole varieties play in schools and societies. Such vernaculars are often blamed for their speakers’ difficulties with literacy and job mobility. The roles of vernaculars in the expressive fabric and social relationships of their speakers. Evidence that their potential usefulness in educational reform has been underestimated. GER:DB-SocSci
4 units (Rickford) not given 2005-06

LINGUIST 169. Linguistic Perspectives on American Indian Languages.—Genetic, area, and linguistic classifications of American Indian languages in social and historical context; their spoken forms and writing systems; language endangerment, preservation, and loss. Recommended: LINGUIST 1 for those enrolling for 4 units.
3-4 units, Spr (Lillehaugen)

2-4 units, Spr (Sells)

LINGUIST 174/274. Field Methods.—(Graduate students register for 274.) Hands-on. The methods by which linguists gather raw linguistic data about a language and begin analyzing its structure. Working with a speaker of a language not previously studied by class participants, students develop a description of key aspects of its grammar and examine methodologies for obtaining, storing, and manipulating data.
2-4 units, Spr (Lillehaugen)

LINGUIST 180. Introduction to Computer Speech and Language Processing.—Spoken language dialogue systems, speech recognition and synthesis, web-based question answering, and the ideas of parsing, grammars, semantic interpretation, and discourse processing. Focus is on writing scripts to use available online implementations of these applications, rather than on implementing the applications themselves. Prerequisite: CS 106B or X. GER:DB-EngrAppSci
4 units, Aut (Jurafsky)

LINGUIST 182/282. Human and Machine Translation.—(Graduate students register for 282.) The process of translation by professional and amateur translators, and by existing and proposed machine-translation systems; what each might learn from the others. Prerequisite: advanced knowledge of a foreign language. GER:DB-EngrAppSci
4 units, Aut (Kay)

LINGUIST 183/283. Programming and Algorithms for Natural Language Processing.—(Graduate students register for 283.) Construction of computer programs for linguistic processes such as string search, morphological, syntactic, and semantic analysis and generation, and simple machine translation. Emphasis is on the algorithms that have proved most useful for solving such problems. GER:DB-EngrAppSci
3-4 units, Win (Kay)

LINGUIST 187/287. Grammar Engineering.—(Graduate students register for 287.) Hands-on. Techniques for implementation of linguistic grammars, drawing on grammatical theory and engineering skills. Implementation of constraints in morphology, syntax, and semantics, working within a unification-based lexicalist framework. Focus is on developing small grammars for English and at least one other language. Prerequisite: basic syntactic theory or 120. No programming skills required.
1-4 units, Spr (King, Kaplan)

LINGUIST 188/288. Natural Language Understanding.—(Graduate students register for 288; same as CS 224U.) Machine understanding of natural language. Computational semantics (determination of sense, event structure, thematic role, time, aspect, synonymy/meronymy, causation), and computational pragmatics and discourse (coherence relations, anaphora resolution, information packaging, generation). Theoretical issues, online resources, and relevance to question answering, summarization, and inference. Prerequisites: one of LINGUIST 180, CS 224N, S; and LINGUIST 130A or B, or knowledge of logic.
2-4 units, Win (Jurafsky, Peters)

LINGUIST 191/291. Linguistics and the Teaching of English as a Second/Foreign Language.—(Graduate students register for 291.) Methods and techniques for teaching languages, using ideas from modern linguistics, and language acquisition theory. Focus is on teaching English, but the principles, methods, and techniques are applicable to any language. GER:DB-SocSci
4-5 units, Win (Hubbard)

LINGUIST 197. Undergraduate Research Seminar.—Research goals and methods in linguistics and related disciplines. Students work on a small project to define a focus for their linguistic studies and prepare for honors research. Presentations; final paper.
2 units, Win (Levin)

LINGUIST 198. Honors Research
1-15 units, Win, Spr (Staff)

LINGUIST 199. Independent Study
1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 200. Foundations of Linguistic Theory.—Theories that have shaped 20th-century linguistics; recurrent themes and descriptive practice.
4 units (Kiparsky) not given 2005-06

LINGUIST 201. Advanced Introduction to Linguistics.—Primarily for graduate students. The leading ideas of linguistic description and linguistic argumentation. The fundamental representational notions in phonology, syntax, and semantics, and the place of these notions in wider linguistic analysis.
4 units (Zwicky) not given 2005-06

LINGUIST 210. Phonology.—Introduction to phonological theory and analysis based on cross-linguistic evidence. Topics: phonological representations including features, syllables, metrical structure; phonological processes including assimilation and dissimilation; and phonological typology and universals.
4 units (Anttila) not given 2005-06

LINGUIST 211. Seminar in Phonology: Stratal Optimality Theory.—May be repeated for credit.
1-4 units, Aut (Kiparsky)

LINGUIST 212. Seminar in Phonology: Stress.—May be repeated for credit.
1-4 units, Win (Anttila)

LINGUIST 213. Seminar in Phonology: Tone.—Current issues and theoretical. Focus is on language groups of Africa, Asia, and the Americas to develop a working typology of tonal systems. May be repeated for credit.
1-4 units, Spr (Leben)

LINGUIST 214. Phonology Workshop.—May be repeated for credit.
1-2 units, Aut (Kiparsky), Win (Anttila), Spr (Kiparsky)

2-4 units (Staff) not given 2005-06

LINGUIST 217. Morphosyntax — The role of morphology in grammar: how word structure serves syntax in the expression of meaning. Universal properties and typology of morphological categories; proposals towards their principled explanation in a restrictive theory of language.

2-4 units, Win (Kiparsky)

LINGUIST 218. Seminar in Morphosyntax: A Cabinet of Curiosities — The morphology-syntax interface, focusing on problematic phenomena such as: inflectional categories that are multifunctional, syncretic even to the point of being barely discernible, defective, or suppletive; edge inflection; periphrasis; marker words; and distinct morphological and syntactic parses. May be repeated for credit.

2-4 units, Aut (Zwicky)

LINGUIST 221A. Foundations of English Grammar — A systematic introduction to the formal analysis of English grammar using the framework of Head-Driven Phrase Structure Grammar (HPSG). Topics: feature structure modeling, lexical and phrasal organization in terms of type hierarchies and constraint inheritance, clausal types, patterns of complementation, the auxiliary system, extraction dependencies, wh-constructions, and the syntax-semantics interface.

1-4 units (Sag) not given 2005-06

LINGUIST 221B. Studies in Universal Grammar — Focus is on grammatical analysis of individual languages. Builds directly on the theoretical foundations presented in 221A. Topics vary each year.

1-4 units (Sag) not given 2005-06

LINGUIST 222A. Lexical Foundations of Syntax — Introductory syntax focusing on the role of the verb and the lexicon in the determination of sentence syntax. Topics: the argument/adjunct distinction, subcategorization and argument structure, motivation for a lexicalist approach, principles governing argument expression, operations on argument structure and grammatical function changing rules, unbounded dependencies, and the approach to unbounded dependencies rooted in principles of lexical expression and subcategorization satisfaction.

2-4 units (Sells) not given 2005-06

LINGUIST 222B. Advanced Topics in Lexical Functional Grammar: Control — Theoretical perspectives on control phenomena across different languages. May be repeated for credit.

1-4 units, Win (Bresnan)

LINGUIST 229A, B, C. Laboratory Syntax I, II, III — Hands-on use of methods of handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. Offered jointly by the syntax faculty. May be repeated for credit.

1-4 units, A: Aut (Bresnan), B: Win (Sag), C: Spr (Bresnan, Zaenen)

2-4 units, Aut (Beaver)

LINGUIST 230B. Semantics and Pragmatics — Expands on 230A. Standard approaches to formal semantics (Montague grammar, DRT, and basic dynamic semantics). Analyses of semantic phenomena in these frameworks. Prerequisites: 230A; or combination of 130 and PHIL 150 and 160.

2-4 units, Spr (Peters)

LINGUIST 232A. Lexical Semantics — Introduction to issues in word meaning, focused primarily around verbs. Overview of the core semantic properties of verbs and the organization of the verb lexicon. Approaches to lexical semantic representation, including semantic role lists, prototypes, and causal and aspectual theories of event conceptualization.

2-4 units, Win (Levin)

LINGUIST 232B. Seminar in Lexical Semantics: Unaccusativity — Emphasis is on recent work. Topics: proposed semantic determinants of unaccusativity; the status of Burzio’s generalization; the crosslinguistic manifestations of unaccusativity; and case studies of unaccusative phenomena such as auxiliary selection or the causative alternation. May be repeated for credit.

1-4 units, Spr (Levin)

LINGUIST 232C. Lexical Semantics Research Seminar — May be repeated for credit. By arrangement.

1-2 units, Aut, Win, Spr (Levin)

LINGUIST 234. Discourse Analysis — The organization of language above the sentence level, and the manifestation of language in context. Practical experience in working with discourse data.

4 units (Staff) not given 2005-06

LINGUIST 237. Seminar in Semantics: Situation Semantics — (Same as PHIL 182.) Theory and applications of situation semantics to natural languages and the flow of information. May be repeated for credit.

1-4 units, Spr (Perry, Peters)

LINGUIST 241. Language Acquisition II: Advanced Topics in Language Acquisition — May be repeated for credit.

1-4 units (E. Clark) not given 2005-06

LINGUIST 246. Psycholinguistics — (Enroll in PSYCH 214.)

1-3 units (H. Clark) not given 2005-06

LINGUIST 247. Seminar in Psycholinguistics — (Same as PSYCH 227.)

2-4 units (Staff) not given 2005-06

LINGUIST 250. Sociolinguistic Theory and Analysis — Methods of modeling the patterned variation of language in society. Emphasis is on variation, its relation to social structure and practice, and its role in linguistic change. Intersection between quantitative and qualitative analysis, combining insights of sociology and linguistic anthropology with quantitative linguistic data. Prerequisite: graduate standing in Linguistics or consent of instructor.

4 units, Aut (Eckert)

LINGUIST 255. Seminar in Sociolinguistics: Language Ideology — Recent developments in cultural and anthropological theory have led to the reconceptualization of topics in sociolinguistics such as language attitudes. Differences and complementarities between the individual, psychology-oriented language attitudes approach and the macro-social, theory-based language ideologies approach. Emerging schools of language ideology, and how they can be integrated with the study of variation. May be repeated for credit.

2-4 units, Spr (Mendoza-Denton)

LINGUIST 258. Analysis of Variation — The quantitative study of linguistic variability in time, space, and society emphasizing social constraints in variation. Hands-on work with variable data. Prerequisites: 105/205 and 250, or consent of instructor.

4 units, Spr (Eckert)

LINGUIST 260A. Historical Morphology and Phonology — Sound change and analogical change in the perspective of linguistic theory. Internal and comparative reconstruction.

4 units, Spr (Kiparsky)

LINGUIST 260B. Historical Morphosyntax — Morphological and syntactic variation and change. Reanalysis, grammaticalization. The use of corpora and quantitative evidence.

2-4 units (Kiparsky) not given 2005-06
LINGUIST 279. Quantitative and Probabilistic Explanation in Linguistics—Capturing the soft constraints inherent in linguistic systems, based on quantitative evidence obtained from linguistic corpora. Computer tools for collecting and modeling data. Emphasis is on syntax.
3-4 units (Manning) not given 2005-06

LINGUIST 280. Natural Language Processing—(Same as CS 224N.) Methods for processing linguistic information and the underlying computational properties of natural languages. Syntactic and semantic processing from a linguistic and an algorithmic perspective. Focus is on modern quantitative techniques in NLP: using large corpora, statistical models for acquisition and interpretation, and representational systems. Prerequisites: CS 121/221 or LINGUIST 180, programming experience, familiarity with logic and probability.
3-4 units, Spr (Manning)

LINGUIST 281. Speech Recognition and Synthesis—(Same as CS 224S) Introduction to automatic speech recognition and speech synthesis/text-to-speech. Focus is on key algorithms including noisy channel model, hidden Markov models (HMMs), Viterbi decoding, N-gram language modeling, unit selection synthesis, and roles of linguistic knowledge. Prerequisite: programming experience. Recommended: familiarity with probability.
2-4 units, Win (Jurafsky)

LINGUIST 285. Finite State Methods in Natural Language Processing—Theory and available technology for finite state language processing. Applications include tokenization, phonological and morphological analysis, disambiguation, and shallow parsing.
3-4 units, Spr (Karttunen)

LINGUIST 286. Text Retrieval and Web Search—(Enroll in CS 276.)
3 units, Aut (Manning, Raghavan)

LINGUIST 292. The History of Chinese—(Enroll in CHINLIT 192/292.)
4 units (Sun) not given 2005-06

LINGUIST 293. Research Seminar in Applied Linguistics—(Enroll in EDUC 435X.) For graduate students in the schools of Education and Humanities and Sciences who are engaged in research pertaining to applied linguistic topics in original research. Topics: language policies and planning, language and gender, writing and critical thinking, foreign language education, and social applications of linguistic science. (SSPEP)
1-4 units (Baugh) not given 2005-06

LINGUIST 309. M.A. Project
1-3 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 390. TA Training Workshop—For second year graduate students in linguistics.
1 unit, Aut (Sells)

LINGUIST 395A, B, C. Research Workshop I, II, III—Restricted to students in the doctoral program. Student presentations of research toward qualifying papers.
1-2 units, A: Spr (Anttila), B: Spr (Levin), C: Sum (Staff)

LINGUIST 396. Research Projects in Linguistics—Mentored research project for first-year graduate students in linguistics.
2-3 units, Win (Staff)

LINGUIST 397. Directed Reading
1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 398. Directed Research
1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 399. Dissertation Research
1-15 units, Aut, Win, Spr, Sum (Staff)

DIVISION OF LITERATURES, CULTURES, AND LANGUAGES

Acting Division Head: Gregory Freidin
Division Offices: Building 260, Rooms 114-119
Mail Code: 94305-2005
Phone: (650) 724-1333; Fax: (650) 725-9306
Email: dcll@stanford.edu
Web Site: http://dlcl.stanford.edu

The Division of Literatures, Cultures, and Languages consists of six academic departments (Asian Languages, Comparative Literature, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese) as well as the Language Center, which oversees language instruction at Stanford. All the departments of the division offer academic programs leading to B.A., M.A., and Ph.D. degrees. The division brings together scholars and teachers dedicated to the study of literatures, cultures, and languages from humanistic and interdisciplinary perspectives. The departments in the division are distinguished by the quality and versatility of their faculty, a wide variety of approaches to cultural tradition and expression, and the intense focus on the mastery of languages. This wealth of academic resources, together with small classes and the emphasis on individual advising, creates a superior opportunity for students who wish to be introduced to or develop a deeper understanding of non-English speaking cultures.

The division’s departments and the Language Center offer instruction at all levels, including introductory and general courses that do not require knowledge of a language other than English. These courses satisfy a variety of undergraduate requirements and can serve as a basis for developing a minor or a major program in the member departments. The more advanced and specialized courses requiring skills in a particular language are listed under the relevant departments, as are descriptions of the minor and major programs.

COURSES

DLCL 189. Honors Thesis Seminar—Prepares undergraduate majors within the division’s constituent departments for planning, researching, and writing an honors thesis. Oral presentations and peer workshops. Research and writing methodologies, and larger critical issues in literary studies.
5 units, Aut (Wittman)

DLCL 308. Comparative Literature Colloquium—Participants discuss and critique work presented by graduate students and faculty in the DLCL. Work may include conference or seminar papers, thesis chapters, or works-in-progress. Feedback focuses on writing and argumentation, and more general responses to the subject matter. Meetings open to the public. May be repeated for credit.
2 units, Aut, Win, Spr (Berman)

DLCL 309. The Teaching of Literature—Prepares graduate students in DLCL departments to teach literature at the undergraduate level. Topics include: the opportunities and problems of transposing a research project into a feasible course; the logic of syllabi and reading lists; the structuring of a course from week to week; and other matters relevant to first-time teachers of literature. Supervised by the Graduate Affairs Committee of the DLCL.
2 units, Aut, Win, Spr (Levy, Sá)

DLCL 310. The Development of a Dissertation from Prospectus to Defense—Meets regularly throughout the year to advise and support dissertation-level students as they prepare a prospectus, begin writing, submit chapters, and complete their projects. Focus of the workshop shifts from term to term as appropriate to the participants. Supervised by the Graduate Affairs Committee of the DLCL.
2 units, Aut, Win, Spr (Safraan, Edelstein)
DLCL 311. Professional Workshop—Meets regularly throughout the year to discuss issues in the professional study of literature. Topics include the academic job market and the challenges of research and teaching at different types of institutions. Autumn Quarter focus is on the publication and place of the journal in the academic context and includes directed editorial work on Stanford’s poetry journal, Mantis. Supervised by the Graduate Affairs Committee of the DLCL.

2 units, Aut, Win, Spr (Kelly, Staff)

### MATHEMATICAL AND COMPUTATIONAL SCIENCE

**Director:** Bradley Efron  
**Associate Director:** Susan Holmes  

**Committee in Charge:** Takeshi Amemiya (Economics), Gunnar Carlsson (Mathematics), Richard Cottle (Management Science and Engineering), Thomas M. Cover (Electrical Engineering, Statistics), Bradley Efron (Statistics), Gene Golub (Computer Science), J. Michael Harrison (Graduate School of Business), Susan Holmes (Statistics), Doron Levy (Mathematics), Parviz Moin (Engineering), Art Owen (Statistics), George Papanicolaou (Mathematics), Eric Roberts (Computer Science), David Rosoga (Education), David Siegmund (Statistics), Arthur F. Veinott Jr. (Management Science and Engineering), Julie Zelenski (Computer Science)

**Program Administrator:** Helen Tombrupoulos  
**Program Offices:** Sequoia Hall, 390 Serra Mall  
**Mail Code:** 94305-4065  
**Phone:** (650) 723-2620  
**Email:** helen@stat.stanford.edu  
**Web Site:** [http://www.stat.stanford.edu](http://www.stat.stanford.edu)

Courses given in Mathematical and Computational Science have the subject code MCS. For a complete list of subject codes, see Appendix.

This interdepartmental, interschool, undergraduate program provides a major for students interested in the mathematical and computational sciences, or in the use of mathematical ideas and analysis in problems in the social or management sciences. It provides a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of automatic computation, optimal decision making, probabilistic modeling, and statistical inference. It also provides an opportunity for elective work in any of Stanford’s mathematical science disciplines.

The program uses the faculty and courses of the departments of Computer Science, Management Science and Engineering, Mathematics, and Statistics. It prepares students for graduate study or employment in the mathematical and computational sciences or in those areas of applied mathematics which center around the use of computers and are concerned with the problems of the social and management sciences.

A biology option is offered for students interested in applications of mathematics, statistics, and computer science to the biological sciences (bioinformatics, computational biology, statistical genetics, neurosciences); and in a similar spirit, an engineering option.

### UNDERGRADUATE PROGRAMS

#### BACHELOR OF SCIENCE

The requirement for the bachelor’s degree, beyond the University’s basic requirements, is an approved course program of 72-77 units, distributed as follows:

<table>
<thead>
<tr>
<th>Mathematics (MATH): 29-31 units</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>41. Calculus</td>
<td>A, W 5</td>
</tr>
<tr>
<td>and 42. Calculus</td>
<td>A, W, S 5</td>
</tr>
<tr>
<td>51. Linear Algebra &amp; Differential Calculus of Several Variables</td>
<td>A, W, S 5</td>
</tr>
<tr>
<td>or 5 1H. Honors Advanced Calculus</td>
<td>A 5</td>
</tr>
<tr>
<td>52. Integral Calculus of Several Variables</td>
<td>A, W, S 5</td>
</tr>
<tr>
<td>or 5 2H. Honors Advanced Calculus</td>
<td>W 5</td>
</tr>
</tbody>
</table>

| 5 9 5. Honors Advanced Calculus | A 5 |
| 109. Applied Group Theory (WIM) | A 3 |
| or 110. Applied Number Theory and Field Theory (WIM) | A 3 |
| or 120. Modern Algebra (WIM) | A, S 3 |
| 113. Linear Algebra and Matrix Theory | A, W 3 |

#### COMPUTER SCIENCE (CS): 16-18 units

| 103X. Discrete Structures (Accelerated) | W 3-4 |
| or 103A. Discrete Mathematics for Computer Science | A, W 3 |
| and 103B. Discrete Structures | W, S 3 |
| 106X. Programming Methodology and Abstractions (Accel.) | A 3-5 |
| or 106A. Programming Methodology | A, W, S 3-5 |
| and 106B. Programming Abstractions | W, S 3-5 |

And two of the following (CS):

| 107. Programming Paradigms | A 3-5 |
| 137. Introduction to Scientific Computing (enroll in CME 108) | W 3-4 |
| 154. Introduction to Automata and Complexity Theory | A, S 3-4 |
| 161. Design and Analysis of Algorithms | A, W 3-4 |

#### MANAGEMENT SCIENCE AND ENGINEERING (MS&E): 8-9 units

**Both:**

| 111. Introduction to Optimization (enroll in ENGR 62) | A, S 3-4 |
| 121. Introduction to Stochastic Modeling | W 4 |
| or three of the following: |
| 211. Linear and Nonlinear Optimization | A 3-4 |
| 212. Mathematical Programming and Combinatorial Optimization | S 3 |
| 221. Stochastic Modeling | W 3 |
| 251. Stochastic Decision Models | W 3 |

**Statistics (STATS): (11 units)**

| 116. Theory of Probability | A, S 3-5 |
| 191. Introduction to Applied Statistics | W 3-4 |
| or 203. Intro. to Regression Models and Analysis of Variance | S 3 |
| 200. Introduction to Statistical Inference | W 3 |

#### ELECTIVES (9 UNITS)

Three courses in mathematical and computational science, 100-level or above, and at least 3 units each. At least one must be chosen from the following:

<table>
<thead>
<tr>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 102C. Advanced Topics in Econometrics (not given 2005-06)</td>
</tr>
<tr>
<td>ECON 140. Introduction to Financial Economics</td>
</tr>
<tr>
<td>ECON 160. Game Theory and Economic Applications (prerequisite ECON 51)</td>
</tr>
<tr>
<td>ECON 179. Experimental Economics (not given 2005-06)</td>
</tr>
<tr>
<td>EE 261. The Fourier Transform and its Applications</td>
</tr>
<tr>
<td>MS&amp;E 211. Linear and Nonlinear Optimization</td>
</tr>
<tr>
<td>MS&amp;E 212. Mathematical Programming and Combinatorial Optimization</td>
</tr>
<tr>
<td>MS&amp;E 221. Stochastic Modeling</td>
</tr>
<tr>
<td>MS&amp;E 251. Stochastic Decision Models</td>
</tr>
<tr>
<td>MCS 100. Mathematics of Sports (same as STATS 50) (not given 2005-06)</td>
</tr>
</tbody>
</table>

| MATH 106. Functions of a Complex Variable | A 3 |
| MATH 108. Introduction to Combinatorics and its Applications | A 3 |
| MATH 111. Computational Commutative Algebra | W 3 |
| MATH 115. Functions of a Real Variable | A, W 3 |
| MATH 116. Complex Analysis | S 3 |
| MATH 118. Numerical Analysis | A 3 |
| MATH 131. Partial Differential Equations | A, W 3 |
| MATH 132. Partial Differential Equations II | S 3 |
| MATH 135. Nonlinear Dynamics and Chaos | S 3 |
| MATH 136. Stochastic Processes | A 3 |
| PHIL 151. First-Order Logic | W 4 |
| STATS 202. Data Analysis | A 3 |
| STATS 217. Introduction to Stochastic Processes | W 3 |

For Computer Science (CS), electives can include courses not taken as units under the CS list above and the following:

<table>
<thead>
<tr>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 108. Object-Oriented Systems Design</td>
</tr>
<tr>
<td>CS 140. Operating Systems and Programming</td>
</tr>
<tr>
<td>CS 143. Compilers</td>
</tr>
<tr>
<td>CS 157. Logic and Automated Reasoning</td>
</tr>
<tr>
<td>CS 161. Design and Analysis of Algorithms</td>
</tr>
<tr>
<td>CS 194. Software Project (prerequisite CS 108)</td>
</tr>
<tr>
<td>CS 221. Artificial Intelligence: Principles and Techniques</td>
</tr>
<tr>
<td>CS 223A. Introduction to Robotics</td>
</tr>
<tr>
<td>CS 223B. Introduction to Computer Vision</td>
</tr>
<tr>
<td>CS 225A. Experimental Robotics</td>
</tr>
<tr>
<td>CS 228. Probabilistic Models in Artificial Intelligence</td>
</tr>
</tbody>
</table>
CS 229. Machine Learning  A  3
CS 237A. Numerical Linear Algebra  A  3
CS 243. Advanced Compiling Techniques  W  3-4
EE 275. Logic Design (not given 2005-06)  3

With the adviser's approval, courses other than those offered by the sponsoring departments may be used to fulfill part of the elective requirement. These may be in fields such as biology, economics, electrical engineering, industrial engineering, and medicine, that might be relevant to a mathematical sciences major, depending on a student's interests.

1. At least three quarters before graduation, majors must file with their advisers a plan for completing degree requirements.
2. All courses used to fulfill major requirements must be taken for a letter grade with the exception of courses offered satisfactory/no credit only.
3. A course used to fulfill the requirements of one section of the program may not be applied toward the fulfillment of the requirements of another section.
4. The student must have a grade point average (GPA) of 2.0 or better in all work course used to fulfill the major requirement.

**MATHEMATICAL AND COMPUTATIONAL BIOLOGY OPTION**

Replace MATH 109/110 with either:

<table>
<thead>
<tr>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOSCI 221. Methods of Theoretical Population Biology  A  3</td>

**MATHEMATICAL AND COMPUTATIONAL SCIENCE AND ENGINEERING OPTION**

Students in the Engineering option take the introductory courses for the Mathematics and Computational Sciences major with the following allowable substitutions.

The MATH 51-53 series may be replaced by:

<table>
<thead>
<tr>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CME 100. Vector Calculus for Engineers  A  5</td>
</tr>
<tr>
<td>CME 102. Ordinary Differential Equations for Engineers  W  5</td>
</tr>
<tr>
<td>CME 104. Linear Algebra and Partial Differential Equations for Engineers  S  5</td>
</tr>
<tr>
<td>MATH 115. Functions of a Real Variable  A,W  3</td>
</tr>
<tr>
<td>STATS 116 may be replaced by either one of the following:</td>
</tr>
<tr>
<td>or CME 106. Intro to Probability &amp; Statistics for Eng.  W  4</td>
</tr>
<tr>
<td>STATS 191/STATS 203 may be replaced by:</td>
</tr>
<tr>
<td>STATS 202. Data Analysis  A  3</td>
</tr>
<tr>
<td>Electives; take at least one course from the following list:</td>
</tr>
<tr>
<td>MATH 106. Intro to Theory of Functions of a Complex Variable  A  3</td>
</tr>
<tr>
<td>MATH 108. Intro to Combinatorics Applications  A  3</td>
</tr>
<tr>
<td>MATH 116. Complex Analysis  S  3</td>
</tr>
<tr>
<td>MATH 118. Numerical Analysis  A  3</td>
</tr>
<tr>
<td>MATH 132. Partial Differential Equations II  S  3</td>
</tr>
<tr>
<td>MATH 135. Nonlinear Dynamics and Chaos  S  3</td>
</tr>
<tr>
<td>MATH 139. Intro to the Mathematics of Medical Imaging (not given 2005-06)  3</td>
</tr>
<tr>
<td>PHIL 151. First-Order Logic  A,W  4</td>
</tr>
<tr>
<td>Take at least two courses from the following list:</td>
</tr>
<tr>
<td>ENGR 15. Dynamics  A,S  3</td>
</tr>
<tr>
<td>ENGR 20. Introduction to Chemical Engineering  S  3</td>
</tr>
<tr>
<td>ENGR 25. Biotechnology  S  3</td>
</tr>
<tr>
<td>ENGR 30. Engineering Thermodynamics  A,W  3</td>
</tr>
<tr>
<td>ENGR 40. Introductory Electronics  A,S  5</td>
</tr>
<tr>
<td>ENGR 50. Introductory Science Materials  W,S  4</td>
</tr>
<tr>
<td>ENGR 105. Feedback Control Design  W  3</td>
</tr>
</tbody>
</table>

Take three additional courses from a single engineering department, and two additional courses from any engineering department(s).

**MINORS**

The minor in Mathematical and Computational Science is intended to provide an experience of the four constituent areas: Computer Science, Mathematics, Management Science and Engineering, and Statistics. Four basic courses are required:

<table>
<thead>
<tr>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 106X. Programming Methodology and Abstractions (Accelerated)  or CS 106A,B. Programming Methodology</td>
</tr>
<tr>
<td>MATH 51. Linear Algebra and Differential Calculus of Several Variables  or MATH 103. Matrix Theory and its Applications</td>
</tr>
<tr>
<td>ENGR 62. Introduction to Optimization  or MS&amp;E 121. Introduction to Stochastic Modeling</td>
</tr>
</tbody>
</table>

In addition to the above, the minor requires three courses from the following, two of which must be in different departments:

<table>
<thead>
<tr>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CME 108. Introduction to Scientific Computing</td>
</tr>
<tr>
<td>CS 107. Programming Paradigms</td>
</tr>
<tr>
<td>CS 138. MATLAB and MAPLE for Science and Engineering Applications</td>
</tr>
<tr>
<td>CS 154. Introduction to Automata and Complexity Theory</td>
</tr>
<tr>
<td>EE 261. The Fourier Transform and its Applications</td>
</tr>
<tr>
<td>ECON 102C. Advanced Topics in Econometrics</td>
</tr>
<tr>
<td>ECON 160. Game Theory and Economic Applications (prerequisite ECON 51)</td>
</tr>
<tr>
<td>MS&amp;E 211. Linear and Nonlinear Optimization</td>
</tr>
<tr>
<td>MS&amp;E 212. Mathematical Programming and Combinatorial Optimization</td>
</tr>
<tr>
<td>MS&amp;E 221. Stochastic Modeling</td>
</tr>
<tr>
<td>MS&amp;E 251. Stochastic Decision Models</td>
</tr>
<tr>
<td>MATH 103. Matrix Theory and Its Applications</td>
</tr>
<tr>
<td>MATH 106. Functions of a Complex Variable</td>
</tr>
<tr>
<td>MATH 108. Introduction to Combinatorics and its Applications</td>
</tr>
<tr>
<td>MATH 109. Applied Group Theory</td>
</tr>
<tr>
<td>MATH 110. Applied Number Theory and Field Theory</td>
</tr>
<tr>
<td>MATH 115. Functions of a Real Variable  or MATH 171. Fundamental Concepts of Analysis</td>
</tr>
<tr>
<td>MATH 131. Partial Differential Equations I</td>
</tr>
<tr>
<td>MATH 132. Partial Differential Equations II</td>
</tr>
<tr>
<td>MATH 135. Nonlinear Dynamics and Chaos</td>
</tr>
<tr>
<td>PHIL 151. First-Order Logic</td>
</tr>
<tr>
<td>STATS 200. Introduction to Statistical Inference</td>
</tr>
<tr>
<td>STATS 202. Data Analysis</td>
</tr>
<tr>
<td>STATS 203. Introduction to Regression Models and Analysis of Variance</td>
</tr>
<tr>
<td>STATS 217. Introduction to Stochastic Processes</td>
</tr>
</tbody>
</table>

Other upper-division courses appropriate to the program major may be substituted with consent of the program director. Undergraduate majors in the constituent programs may not count courses in their own departments.

**HONORS PROGRAM**

The honors program is designed to encourage a more intensive study of mathematical sciences than the B.S. program. In addition to meeting all requirements for the B.S., the student must:

1. Maintain an average letter grade equivalent in mathematical sciences courses of at least 3.4.
2. Complete at least 15 units in mathematical sciences in addition to the requirements for the major listed above. These courses should form a sustained effort in one area and constitute a program approved by the committee in charge of the Mathematical and Computational Science Program.
3. Include in the above 15 units at least one of the following:
Students interested in doing honors work should consult with their advisers by the last quarter of the junior year to prepare a program of study for submission to the committee in charge for approval. Honors work may be concentrated in fields outside the Mathematical and Computational Science programs such as, biological sciences, medicine, physics.

COURSES

3 units (Cover) not given 2005-06

MATHEMATICS

Emeriti: (Professors) Kai Lai Chung, Paul Cohen, Solomon Feferman, Robert Finn, Samuel Karlin, Joseph Keller, George Kreisel, Harold Levine, Donald Ornstein, Robert Osserman, Hans Samelson
Chair: Yakov Eliashberg
Associate Professors: Eleny Ionel, Ravi Vakil, Andras Vasy
Assistant Professors: Simon Brendle, Doron Levy
Szegö Assistant Professors: Benjamin Brubaker, Adrian Clingher, Valdo Durrelman, Razvan Fetcuau, Soren Galatius, Tianhong Li, Brian Munson, Mihrun Papikian, Peter Storm, Nathaniel Thiem
Lecturers: Andrew Blumberg, Joseph Coffey, Alexander Elgart, Sharad Goel, Christian Gromoll, Marcus Khuri, Young-Hoon Kim, Mark Lucianovic, Liping Ma, Mark Meckes, Nadya Shirokova, Wojciech Wieczorek, Matthew Young
Acting Assistant Professors: Larry Guth, Todor Milanov, Dragos Oprea
Courtesy Professors: Renata Kallosh, Grigori Mints
Consulting Professors: Keith Devlin, David Hoffman, Wu-chung Hsiang
Web site: http://math.stanford.edu

Courses given in Mathematics have the subject code MATH. For a complete list of subject codes, see Appendix.

The Department of Mathematics offers programs leading to the degrees of Bachelor of Science, Master of Science, and Doctor of Philosophy in Mathematics, and participates in the program leading to the B.S. in Mathematical and Computational Science. The department also participates in the M.S. and Ph.D. degree programs in Scientific Computing and Computational Mathematics and the M.S. degree program in Financial Mathematics.

ADVANCED PLACEMENT FOR FRESHMEN

Students of unusual ability in mathematics often take one or more semesters of college-equivalent courses in mathematics while they are still in high school. Under certain circumstances, it is possible for such students to secure both advanced placement and credit toward the bachelor’s degree. A decision as to placement and credit is made by the department after consideration of the student’s performance on the Advanced Placement Examination in Mathematics (forms AB or BC) of the College Entrance Examination Board, and also after consideration of transfer credit in mathematics from other colleges and universities.

The department does not give its own advanced placement examination. Students can receive either 5 or 10 units of advanced placement credit, depending on their scores on the CEEB Advanced Placement Examination. Entering students who have credit for two quarters of single variable calculus (10 units) are encouraged to enroll in MATH 51-53 in multivariable mathematics, or the honors version 51H-53H. These three-course sequences, which can be completed during the freshman year, supply the necessary mathematics background for most majors in science and engineering. They also serve as excellent background for the major or minor in Mathematics, or in Mathematical and Computational Science. Students who have credit for one quarter of single variable calculus (5 units) should take MATH 42 in the Autumn Quarter and 51 in Winter Quarter. Options available in the Spring Quarter include MATH 52, 53, or 103. For proper placement, contact the Department of Mathematics.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE

The following department requirements are in addition to the University’s basic requirements for the bachelor’s degree:

MAJORS

Students wishing to major in Mathematics must satisfy the following requirements:

1. Department of Mathematics courses (other than MATH 100) totaling at least 49 units credit; such courses must be taken for a letter grade. For the purposes of this requirement, courses crosslisted with another department, such as MATH 105 (STATS 116) and MATH 160A and 160B (PHIL 151 and 152), count as Department of Mathematics courses.

2. Additional courses taken from Department of Mathematics courses numbered 101 and above or from approved courses in other disciplines with significant mathematical content, totaling at least 15 units credit. At least 9 of these units must be taken for a letter grade.

3. A Department of Mathematics adviser must be selected, and the courses selected under items ‘1’ and ‘2’ above must be approved by the department’s director of undergraduate study, acting under guidelines laid down by the department’s Committee for Undergraduate Affairs. The Department of Mathematics adviser can be any member of the department’s faculty.

4. To receive the department’s recommendation for graduation, a student must have been enrolled as a major in the Department of Mathematics for a minimum of two full quarters, including the quarter immediately before graduation. In any case, students are strongly encouraged to declare as early as possible, preferably by the end of the sophomore year.

Students are normally expected to complete either the sequence 19, 20, 21 or the sequence 41, 42 (but not both). Students with an Advanced Placement score of at least 4 in BC math or 5 in AB math may receive 10 units credit and fulfill requirement ‘1’ by taking at least 39 units of Department of Mathematics courses numbered 51 and above. Students with an Advanced Placement score of at least 3 in BC math or at least 4 in AB math may receive 5 units credit and fulfill requirement ‘1’ by taking at least 44 units of Department of Mathematics courses numbered 42 and above.

Sophomore seminar courses may be counted among the choice of courses under item ‘1’. Other variations of the course requirements laid down above (under items ‘1’ and ‘2’) may, in some circumstances, be allowed. For example, students transferring from other universities may be allowed credit for some courses completed before their arrival at Stanford. However, at least 24 units of the 49 units under item ‘1’ above and 9 of the units under item ‘2’ above must be taken at Stanford. In all cases, approval for variations in the degree requirements must be obtained from the department’s Committee for Undergraduate Affairs. Application for such approval should be made through the department’s director of undergraduate study.

It is to be emphasized that the above regulations are minimum requirements for the major; students contemplating graduate work in mathematics are strongly encouraged to include the courses 116, 120, 121, 147 or
148, and 171 in their selection of courses, and in addition, take at least three Department of Mathematics courses over and above the minimum requirements laid out under items ‘1’ and ‘2’ above, including at least one 200-level course. Such students are also encouraged to consider the possibility of taking the honors program, discussed below.

To help develop a sense of the type of course selection (under items ‘1’ and ‘2’ above) which would be recommended for math majors with various backgrounds and interests, see the following examples. These represent only a very large number of possible combinations of courses that could be taken in fulfillment of the Mathematics major requirements:

**Example 1** — A general program (a balanced program of both pure and applied components, without any particular emphasis on any one field of mathematics or applications) as follows:

1. the selection of at least eight of the following courses, including three Department of Mathematics courses: MATH 105 (STATS 116), 108, 131, 132, 143, 145, 146, 147, 148, 152, 161; PHYSICS 41, 43, 45; CS 137; ECON 50. (These specific courses from other departments are only meant as an example. There are many suitable courses in several departments which can be taken to fulfill part or all of requirement 2.)

2. An applied program (recommended for those contemplating possible later graduate work (see, also, the discussion of the honors program below), providing an introduction to the main areas of mathematics both broader and deeper than the general program outlined above):

   - either MATH 19, 20, and 21, or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 103; 106; 109; 110; 111; 115
   - plus nine or more of the following courses, including at least one from each group: algebra sequence 114, 121, 152, 156; analysis sequence 131, 132, 135, 151, 174A,B; 175; geometry/topology sequence 143, 145, 146, 147; 146; logic and set theory sequence 160A,B, 161.

   - In addition, those contemplating eventual graduate work in Mathematics should seriously consider including at least one graduate-level math course such as MATH 205A, 210A, or 215A or B. Such students should also consider the possibility of entering the honors program. (Students taking 51, 52, 53 rather than 51H, 52H, 53H should consider taking 113 before attempting 114.)

   - **Example 3** — An Applied Mathematics program:

      1. either MATH 19, 20, and 21; or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 103; 105 (Statistics 116); 106; 108; 109; 110; 111; 113
      2. plus at least 15 units of additional courses in Applied Mathematics, including, for example, suitable courses from the departments of Physics, Computer Science, Economics, Engineering, and Statistics.

* Students with interests in applied mathematics, but desiring a broader-based program than the type of program suggested in Example 3, including significant computational and/or financial and/or statistical components, are encouraged to also consider the Mathematics and Computational Science program.

**MINORS**

To qualify for the minor in Mathematics, a student should successfully complete, for a letter grade, at least six Department of Mathematics courses (other than MATH 100) numbered 51 or higher, totaling a minimum of 24 units. It is recommended that these courses include either the sequence 51, 52, 53 or the sequence 51H, 52H, 53H. At least 12 of the units applied toward the minor in Mathematics must be taken at Stanford. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

**HONORS PROGRAM**

The honors program is intended for students who have strong theoretical interests and abilities in mathematics. The goal of the program is to give students a thorough introduction to the main branches of mathematics, especially analysis, algebra, and geometry. Through the honors thesis, students may be introduced to a current or recent research topic, although occasionally more classical projects are encouraged. The program provides an excellent background with which to enter a master’s or Ph.D. program in Mathematics. Students successfully completing the program are awarded a B.S. in Mathematics with Honors.

It is recommended that the sequence 51H, 52H, 53H be taken in the freshman year. Students who have instead taken the sequence 51, 52, 53 in their freshman year may be permitted to enter the honors program, but such entry must be approved by the Department of Mathematics Committee for Undergraduate Affairs.

To graduate with a B.S. in Mathematics with Honors, the following conditions apply in addition to the usual requirements for math majors:

1. The selection of courses under items ‘1’ and ‘2’ above must include all the math courses 106 or 116, 120, 171 and also must include seven or more additional courses, with at least one from each of the groups: algebra sequence 114, 121, 152, 156; analysis sequence 131, 132, 135, 136, 151, 174A, 174B, 175, 176; geometry/topology sequence 143, 145, 146, 147; 148; logic and set theory sequence 160A, 160B, 161.

2. Students in the honors program must write a senior thesis. In order to facilitate this, the student must, by the end of the junior year, choose an undergraduate thesis adviser from the Department of Mathematics faculty, and map out a concentrated reading program under the direction and guidance of the adviser. During the senior year, the student must enroll in MATH 197 for a total of 6 units (typically spread over two quarters), and work toward completion of the thesis under the direction and guidance of the thesis adviser. The thesis may contain original material, or be a synthesis of work in current or recent research literature. The 6 units of credit for MATH 197 are required in addition to the course requirements laid out under items ‘1’ and ‘2’ above and in addition to all other requirements for math majors.

In addition to the minimum requirements laid out above, it is strongly recommended that students take at least one graduate-level course (that is, at least one course in the 200 plus range). MATH 205A, 210A, and 215A or B are especially recommended in this context.

Students with questions about the honors program should see the Director of Undergraduate Advising.

**BACHELOR OF SCIENCE IN MATHEMATICAL AND COMPUTATIONAL SCIENCE**

The Department of Mathematics participates with the departments of Computer Science, Management Science and Engineering, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the “Mathematical and Computational Science” section of this bulletin.

**GRADUATE PROGRAMS**

**MASTER OF SCIENCE**

The University’s basic requirements for the master’s degree are discussed in the “Graduate Degrees” section of this bulletin. Students entering Stanford in 2001 or later should pay particular attention to the University’s course requirements for graduate degrees. The following are specific departmental requirements:

Candidates must complete an approved course program of 45 units of courses beyond the department requirements for the B.S. degree, of which at least 36 units must be Mathematics Department courses, taken for a letter grade. The Mathematics courses must include at least 18 units numbered 200 or above. The candidate must have a grade point average (GPA) of 3.0 (B) over all course work taken in Mathematics, and a GPA of 3.0 (B) in the 200-level courses considered separately. Course work for the M.S. degree must be approved during the first quarter of enrollment in the program by the department’s Director of Graduate Studies.
For the M.S. degree in Financial Mathematics, see the “Financial Mathematics” section of this bulletin.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the “School of Education” section of this bulletin or address inquiries to Credential Secretary, School of Education.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the doctorate (residence, dissertation, examinations, etc.) are discussed in the “Graduate Degrees” section of this bulletin. The following are specific departmental requirements.

To be admitted to candidacy, the student must have successfully completed 27 units of graduate courses (that is, courses numbered 200 and above). In addition, the student must pass qualifying examinations given by the department.

Beyond the requirements for candidacy, the student must complete a course of study approved by the Graduate Affairs Committee of the Department of Mathematics and submit an acceptable dissertation. In accordance with University requirements, Ph.D. students must complete a total of 135 course units beyond the bachelor’s degree. These courses should be Department of Mathematics courses or approved courses from other departments. The course program should display substantial breadth in mathematics outside the student’s field of application. The student must receive a grade point average (GPA) of 3.0 (B) or better in courses used to satisfy the Ph.D. requirement. In addition, the student must pass the Department area examination and the University oral examination and pass a reading examination in one foreign language, chosen from French, German, or Russian.

Experience in teaching is emphasized in the Ph.D. program. Each student is required to complete nine quarters of such experience. The nature of the teaching assignment for each of those quarters is determined by the department in consultation with the student. Typical assignments include teaching or assisting in teaching an undergraduate course or lecturing in an advanced seminar.

For further information concerning degree programs, fellowships, and assistantships, inquire of the academic associate of the department.

PH.D. MINOR

The student should complete both of the following:*  
1. MATH 106 or 116, 131, 132  
2. MATH 113, 114, 120 or 152

These courses may have been completed during undergraduate study, and their equivalents from other universities are acceptable.

In addition, the student should complete 21 units of 200-level courses in Mathematics. These must be taken at Stanford and approved by the Department of Mathematics’ Ph.D. minor advisor.

* A third coherent sequence designed by the student, subject to the approval of the graduate committee, may be considered as a substitute for items ‘1’ or ‘2’.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

INTRODUCTORY AND UNDERGRADUATE

The department offers two sequences of introductory courses in single variable calculus.

1. MATH 41, 42 present single variable calculus. Differential calculus is covered in the first quarter, integral calculus in the second.

2. MATH 19, 20, 21 cover the material in 41, 42 in three quarters instead of two.

There are options for studying multivariable mathematics:

1. MATH 51, 52, 53 cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize application.

MATH 51 covers differential calculus in several variables and introduces matrix theory and linear algebra, 52 covers integral calculus in several variables and vector analysis, 53 studies further topics in linear algebra and applies them to the study of ordinary differential equations. This sequence is strongly recommended for incoming freshmen with 10 units of advanced placement credit.

2. MATH 51H, 52H, 53H cover the same material as 51, 52, 53, but with more emphasis on theory and rigor.

The introductory course in modern algebra is Linear Algebra (103 or 113). There are no formal prerequisites for these courses, but appropriate mathematical maturity is expected. Much of the material in 103 is covered in the sequence 51, 52, 53.

MATH 19. Calculus — The content of MATH 19, 20, 21 is the same as the sequence MATH 41, 42 described below, but covered in three quarters, rather than two. GER:DB-Math  
3 units, Aut (Lucianovic), Win (Staff), Sum (Staff)

3 units, Win (Lucianovic), Spr (Staff)

4 units, Spr (Lucianovic)

MATH 41. Calculus — Introduction to differential and integral calculus of functions of one variable. Topics: review of elementary functions, including exponentials and logarithms, rates of change, and the derivative. Introduction to the definite integral and integration. Prerequisites: algebra, trigonometry. GER:DB-Math  
5 units, Aut (Meckes)

MATH 42. Calculus — Continuation of 41. Methods of symbolic and numerical integration, applications of the definite integral, introduction to differential equations. Infinite series. Prerequisite: 41 or equivalent. GER:DB-Math  
5 units, Aut (Gromoll), Win (Meckes)

MATH 51. Linear Algebra and Differential Calculus of Several Variables — Geometry and algebra of vectors, systems of linear equations, matrices, vector valued functions and functions of several variables, partial derivatives, gradients, chain rule in several variables, vector fields, optimization. Prerequisite: 21, 42, or a score of 4 on the BC Advanced Placement exam or 5 on the AB Advanced Placement exam, or consent of instructor. GER:DB-Math  
5 units, Aut (Brubaker, Blumberg, Clingher, Milanov, Opredel), Win (Thiem, White, Young), Spr (Meckes), Sum (Staff)

MATH 51A. Linear Algebra and Differential Calculus of Several Variables, ACE — GER:DB-Math  
5-6 units, Aut, Win, Spr (Staff)

MATH 51H. Honors Multivariable Mathematics — For prospective Mathematics majors in the honors program and students from other areas of science or engineering who have a strong mathematics background. Three quarter sequence covers the material of 51, 52, 53, and additional advanced calculus and ordinary and partial differential equations. Unified treatment of multivariable calculus, linear algebra, and differential equations with a different order of topics and emphasis from standard courses. Students should know one-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on BC Advanced Placement exam, or consent of instructor. GER:DB-Math  
5 units, Aut (Kerckhoff)

MATH 52. Integral Calculus of Several Variables — Iterated integrals, line and surface integrals, vector analysis with applications to vector potentials and conservative vector fields, physical interpretations. Divergence theorem and the theorems of Green, Gauss, and Stokes. Prerequisite: 51.  
5 units, Aut (Wieczorek), Win (Papikian, Wieczorek), Spr (Papikian)
MATH 52H. Honors Multivariable Mathematics — Continuation of 51H. Prerequisite: 51H.
3 units, Win (Simon)

5 units, Aut (Simon), Win (T. Li), Spr (Ionel, Shirokova), Sum (Staff)

MATH 53H. Honors Multivariable Mathematics — Continuation of 52H. Prerequisite: 52H.
5 units, Spr (Brendle)

MATH 80Q. Capillary Surfaces: Explored and Unexplored Territory — Stanford Introductory Seminar. Preference to sophomores. Capillary surfaces: the interfaces between fluids that are adjacent to each other and do not mix. Recently discovered phenomena, predicted mathematically and subsequently confirmed by experiments, some done in space shuttles. Interested students may participate in ongoing investigations with affinity between mathematics and physics.
3-5 units, Win (Finn)

MATH 87Q. Mathematics of Knots, Braids, Links, and Tangles — Stanford Introductory Seminar. Preference to sophomores. Types of knots and how knots can be distinguished from one another by means of numerical or polynomial invariants. The geometry and algebra of braids, including their relationships to knots. Topology of surfaces. Brief summary of applications to biology, chemistry, and physics.
3 units, Spr (Brumleve)

MATH 88N. Mathematics and Magic Tricks — Stanford Introductory Seminar. How a magic trick works is more amazing than the trick itself. Tricks that use mathematics in a hidden way: permutations, parity, finite fields, and graphs. History of magic; performance and invention of magic and new theorems.
3 units, Win (Diaconis)

3 units, Win (Bump)

UNDERGRADUATE AND GRADUATE

Unless stated, there are no prerequisites for the courses listed below. Where a prerequisite is stated, it may be waived by the instructor.

MATH 100. Mathematics for Elementary School Teachers — Mathematics and pedagogical strategies. Core mathematical content in grades K-6, classroom presentation, how to handle student errors, and mathematical issues that come up during instruction.
4 units, Spr (Ma, Milgram)

3 units, Aut (Dembo, Khuri), Win (Goel, Shirokova), Spr (T. Li), Sum (Staff)

MATH 105. Theory of Probability — (Enroll in STATS 116.)
3-5 units (Staff)

MATH 106. Functions of a Complex Variable — Complex numbers, analytic functions, Cauchy-Riemann equations, complex integration, Cauchy integral formula, residues, elementary conformal mappings. Prerequisite: 52.
3 units, Aut (Galatius), Sum (Staff)

MATH 108. Introduction to Combinatorics and its Applications — Topics: graphs, trees (Cayley’s Theorem, application to phylogony), eigenvalues, basic enumeration (permutations, Stirling and Bell numbers), recurrences, generating functions, basic asymptotics. Prerequisites: 51 or 103 or equivalent.
3 units, Aut (Thiem)

MATH 109. Applied Group Theory — Applications of the theory of groups. Topics: elements of group theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics. WIM
3 units, Aut (Carlsson)

MATH 110. Applied Number Theory and Field Theory — Number theory and its applications to modern cryptography. Topics: congruences, finite fields, primality testing and factorization, public key cryptography, error correcting codes, and elliptic curves, emphasizing algorithms. WIM
3 units, Spr (Brumleve)

MATH 111. Computational Commutative Algebra — Introduction to the theory of commutative rings, ideals, and modules. Systems of polynomial equations in several variables from the algorithmic viewpoint. Groebner bases, Buchberger’s algorithm, elimination theory. Applications to algebraic geometry and to geometric problems.
3 units, Win (Lucianovic)

MATH 113. Linear Algebra and Matrix Theory — Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization.
3 units, Aut (Katznelson), Win (Vakil)

MATH 114. Linear Algebra and Matrix Theory II — Continuation of 113. Deeper study of 113 topics plus additional topics from invariant subspaces, canonical forms of matrices; minimal polynomials and elementary divisors; vector spaces over arbitrary fields; inner products; Jordan normal forms; Hermitian and unitary matrices; multilinear algebra; applications.
3 units, Win (Katznelson), Spr (Milgram)

MATH 115. Functions of a Real Variable — The development of real analysis in Euclidean space: sequences and series, limits, continuous functions, derivatives, integrals. Basic point set topology. Honors math majors and students who intend to do graduate work in mathematics should take 171. Prerequisite: 51.
3 units, Aut (Liu), Win (Brumleve), Sum (Staff)

3 units, Spr (Clingher)

3 units, Aut (Fetecau)

MATH 120. Modern Algebra — Basic structures in algebra: groups, rings, and fields. Elements of group theory: permutation groups, finite Abelian groups, p-groups, Sylow theorems. Polynomial rings, principal ideal domains, unique factorization domains. WIM
3 units, Aut (Shirokova), Spr (Clingher)
MATH 121. Modern Algebra II — Continuation of 120. Fields of fractions. Solvable and simple groups. Elements of field theory and Galois theory. Prerequisite: 120.
3 units, Win (J. Li)

3 units, Aut (Elgart), Win (Schoen)

3 units, Spr (Schoen)

MATH 135. Nonlinear Dynamics and Chaos — Topics: one- and two-dimensional flows, bifurcations, phase plane analysis, limit cycles and their bifurcations. Lorenz equations, fractals and strange attractors. Prerequisite: 51 and 53 or equivalent.
3 units, Spr (Fetecau)

3 units, Aut (Dembo)

3 units, Win (P. Cohen)

MATH 145. Algebraic Geometry — Real algebraic curves, Hilbert’s nullstellensatz, complex affine and projective curves, Bezout’s theorem, the degree/genus formula, Riemann surfaces, Riemann-Roch theorem. Prerequisites: 106 or 116, and 109 or 120. Recommended: familiarity with surfaces equivalent to 143, 146, 147, or 148.
3 units (Staff) not given 2005-06

MATH 146. Analysis on Manifolds — (Formerly 173.) Differentiable manifolds, tangent space, submanifolds, implicit function theorem, differential forms, vector and tensor fields. Frobenius’ theorem, DeRham theory. Prerequisite: 52 or 52H.
3 units, Aut (Galais)

MATH 147. Differential Topology — Smooth manifolds, transversality, Sard’s theorem, embeddings, degree of a map, Borsuk-Ulam theorem, Hopf degree theorem, Jordan curve theorem. Prerequisite: 115 or 171.
3 units, Spr (Manson) alternate years, not given 2006-07

MATH 148. Algebraic Topology — Fundamental group, covering spaces, Euler characteristic, homology, classification of surfaces, knots. Prerequisite: 109 or 120.
3 units (Staff) alternate years, given 2006-07

MATH 151. Introduction to Probability Theory — Counting; axioms of probability; conditioning and independence; expectation and variance; discrete and continuous random variables and distributions; joint distributions and dependence; central limit theorem and laws of large numbers. Prerequisite: 52 or consent of instructor.
3 units, Win (Liu)

MATH 152. Elementary Theory of Numbers — Euclid’s algorithm, fundamental theorems on divisibility; prime numbers, congruence of numbers; theorems of Fermat, Euler, Wilson; congruences of first and higher degrees; Lagrange’s theorem and its applications; quadratic residues; introduction to the theory of binary quadratic forms.
3 units, Spr (Brubaker)

MATH 156. Group Representations — Experimental, primarily examining symmetries on objects such as vector spaces (group representations), geometric objects (geometric group actions), and discrete sets (combinatorics). Topics: group representations and their characters, classification of permutation group representations using partitions and Young tableaux, group actions on sets and the Burnside ring, and spherical space forms. Prerequisites: linear algebra (51 and 53, or 103 or 113) and group theory (109 or 120).
3 units, Aut (Thiem)

MATH 160A. First-Order Logic — (Enroll in PHIL 151/251.)
4 units, Win (Pauly)

MATH 160B. Computability and Logic — (Enroll in PHIL 152/252.)
4 units, Spr (Pauly)

MATH 161. Set Theory — Informal and axiomatic set theory: sets, relations, functions, and set-theoretical operations. The Zermelo-Fraenkel axiom system and the special role of the axiom of choice and its various equivalents. Well-orderings and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor’s Alephs and cardinal arithmetic. Open problems in set theory.
3 units, Win (de Queiroz)

MATH 162. Philosophy of Mathematics — (Enroll in PHIL 162/262.)
4 units (Staff) not given 2005-06

MATH 171. Fundamental Concepts of Analysis — Recommended for math majors and required of honors math majors. Similar to 115 but altered content and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisites: 51 and 52, or 51H and 52H. WIM
3 units, Aut, Spr (Fetecau)

MATH 174A. Topics in Analysis and Differential Equations with Applications — For students planning graduate work in mathematics or physics, and for honors math majors and other students at ease with rigorous proofs and qualitative discussion. 174A topics may include: geometric theory of ODE’s with applications to dynamics; mathematical foundations of classical mechanics including variational principles, Lagrangian and Hamiltonian formalisms, theory of integrable systems; theories of existence and uniqueness; Sturm-Liouville theory. 174B topics may include: introduction to PDEs including transport equations, Laplace, wave, and heat equations; techniques of solution including separation of variables and Green’s functions; Fourier series and integrals; introduction to the theory of distributions; mathematical foundations of quantum mechanics. Prerequisite: 53H or 171, or consent of instructor.
3 units, Win (Guth)

MATH 174B. Honors Analysis — Continuation of 174A. Prerequisite: 174A.
3 units, Spr (Guth)

MATH 175. Elementary Functional Analysis — Linear operators on Hilbert space. Spectral theory of compact operators; applications to integral equations. Elements of Banach space theory. Prerequisite: 115 or 171.
3 units, Spr (Simon)

3 units, Aut (Durrleman)

MATH 197. Senior Honors Thesis
1-6 units, Aut, Win, Spr (Staff)
MATH 199. Independent Work — Undergraduates pursue a reading program; topics limited to those not in regular department course offerings. Credit can fulfill the elective requirement for math majors. Approval of Undergraduate Affairs Committee is required to use credit for honors majors area requirement.

1-3 units, Aut, Win, Spr (Staff)

PRIMARILY FOR GRADUATE STUDENTS

MATH 202A. Advising and Mentoring in Financial Mathematics — Students advise and mentor those enrolled in 236 or 238 to enhance professional experience consistent with the M.S. in Financial Mathematics program. May be repeated for credit. Prerequisite: 236 or 238, stochastic calculus and mathematical finance, and consent of instructor.

1-3 units, Win (Papanicolaou)

MATH 202B. Advising and Mentoring in Financial Mathematics — Students advise and mentor those enrolled in 239 or 240. Goal is to enhance professional experience consistent with the Financial Mathematics master’s program. Prerequisites: 239 or 240, computation and simulation in finance or fixed income modeling, and consent of instructor.

1-3 units, Spr (Durrleman)

MATH 205A. Real Analysis — Basic measure theory and the theory of Lebesgue integration. Prerequisite: 171 or equivalent.

3 units, Win (White)

MATH 205B. Real Analysis — Point set topology, basic functional analysis, Fourier series, and Fourier transform. Prerequisites: 171 and 205A or equivalent.

3 units, Win (Mazzeo)

MATH 205C. Real Analysis — Continuation of 205B.

3 units, Spr (Katznelson)

MATH 210A. Modern Algebra — Groups, rings, and fields; introduction to Galois theory. Prerequisite: 120 or equivalent.

3 units, Aut (Milgram)

MATH 210B. Modern Algebra — Galois theory. Ideal theory, introduction to algebraic geometry and algebraic number theory. Prerequisite: 210A.

3 units, Win (Bramfiel)

MATH 210C. Modern Algebra — Continuation of 210B. Representations of groups and noncommutative algebras, multilinear algebra.

3 units, Spr (Bump)

3 units, Aut (Coffee)

MATH 215B. Complex Analysis, Geometry, and Topology — (Math 215A is not a prerequisite for 215B.) Topics: fundamental group and covering spaces, homology, cohomology, products, basic homotopy theory, and applications. Prerequisites: 113, 120, and 171, or equivalent.

3 units, Win (Kerckhoff)

3 units, Spr (R. Cohen)

MATH 216A. Introduction to Algebraic Geometry — Algebraic curves, algebraic varieties, sheaves, cohomology, Riemann-Roch theorem. Classification of algebraic surfaces, moduli spaces, deformation theory and obstruction theory, the notion of schemes. May be repeated for credit.

3 units, Aut (Vakil)

MATH 216B. Introduction to Algebraic Geometry — Continuation of 216A. May be repeated for credit.

3 units, Win (Vakil)

MATH 216C. Introduction to Algebraic Geometry — Continuation of 216B. May be repeated for credit.

3 units, Spr (Vakil)

MATH 217A. Differential Geometry — Smooth manifolds and submanifolds, tensors and forms, Lie and exterior derivative, DeRham cohomology, distributions and the Frobenius theorem, vector bundles, connection theory, parallel transport and curvature, affine connections, geodesics and the exponential map, connections on the principal frame bundle. Prerequisite: 173 or equivalent.

3 units, Aut (Khuri)

MATH 217B. Differential Geometry — Riemannian manifolds, Levi-Civita connection, Riemann curvature tensor, Riemannian exponential map and geodesic normal coordinates, Jacobi fields, completeness, spaces of constant curvature, bi-invariant metrics on compact Lie groups, symmetric and locally symmetric spaces, equations for Riemannian submanifolds and Riemannian submersions. Prerequisite: 217A.

3 units, Win (Brendle)

MATH 217C. Differential Geometry — First and second variation of arc length, index form and variational theory of geodesics, comparison theorems and consequences for manifolds of positive and negative curvature, almost complex manifolds and integrability, Hermitian and Kaehler metrics, connections on complex vector bundles and Chern classes, Hodge theory, vanishing theorems in the Riemannian and Kaehler settings.

3 units, Spr (Schoen)

3 units, Aut (Liu)

3 units, Win (Liu)

MATH 220C. Partial Differential Equations of Applied Mathematics — Mathematical methods of imaging: array imaging using Kirchhoff migration and beamforming, resolution theory for broad and narrow band array imaging in homogeneous media, topics in high-frequency, variable background imaging with velocity estimation, interferometric imaging methods, the role of noise and inhomogeneities, and variational problems that arise in optimizing the performance of imaging algorithms and the deblurring of images. Prerequisites: 220A and B.

3 units, Spr (Papanicolaou)

3 units (Staff) not given 2005-06

3 units (Staff) not given 2005-06

MATH 224. Topics in Mathematical Biology — Mathematical models for biological processes based on ordinary and partial differential equations. Topics: population and infectious diseases dynamics, biological oscillators, reaction diffusion models, biological waves, and pattern formation. Prerequisites: 53 and 131, or equivalents.

3 units (Staff) not given 2005-06
MATH 228A. Ergodic Theory — Measure preserving transformations and flows, ergodic theorems, mixing properties, spectrum, Kolmogorov automorphisms, entropy theory. Examples, Classical dynamical systems, mostly geodesic and horocycle forms on homogeneous spaces of SL(2, R). Prerequisites: 205A, B.
3 units, Spr (Ornstein)

MATH 228B. Ergodic Theory — Continuation of 228A.
3 units (Staff) not given 2005-06

MATH 230A. Theory of Probability — (Enroll in STATS 310A.)
2-4 units, Aut (Dembo)

MATH 230B. Theory of Probability — (Enroll in STATS 310B.)
2-4 units, Win (Dembo)

MATH 230C. Theory of Probability — (Enroll in STATS 310C.)
2-4 units, Spr (Lai)

MATH 232. Topics in Probability: Geometry and Markov Chains — Dirichlet forms; Nash, Sobolev, and log-Sobolev inequalities; and applications to card shuffling and random walk on graphs. May be repeated for credit.
3 units, Win (Diaconis)

MATH 234. Large Deviations — (Same as STATS 374.) Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer’s and Sanov’s theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: MATH 230A or STATS 310.
3 units (Staff) not given 2005-06

MATH 235. Topics in Ergodic Theory — May be repeated for credit.
3 units, Win (Ornstein)

3 units, Win (Papanicolaou)

MATH 237. Topics in Stochastic Analysis: Credit Risk — The analysis of structural models for credit default starting from the Black-Scholes-Merton theory and continuing with stochastic volatility models. The theory of reduced models of default risk and doubly stochastic, intensity-based, default models. Connections with actuarial insurance problems. Hybrid structural and intensity based models for the pricing of defaultable bonds and credit default swaps. Extensions to multi-asset models with correlated defaults. Prerequisites: 236 and 238, or equivalents.
3 units, Spr (Papanicolaou)

3 units, Win (Papanicolaou)

MATH 239. Computation and Simulation in Finance — (Formerly 240.) Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.
3 units, Spr (Durrleman)

3 units, Aut, Spr (Durrleman)

MATH 244. Riemann Surfaces — Compact Riemann surfaces: topological classifications, Hurwitz’ formula, Riemann-Roch formula, uniformization theorem. Abel’s theorem, Jacobian varieties. Some elements of harmonic analysis are developed with applications. Emphasis is on methods generally applicable to algebraic curves.
3 units, Win (Eliashberg)

MATH 245. Topics in Algebraic Geometry — Derived categories and derived functors, triangulated categories and intersection cohomology, and perverse sheaves. May be repeated for credit.
3 units, Spr (Kiem)

MATH 246. Symmetric Functions and Algebraic Combinatorics — Unified treatment of topics in classical enumeration via the study of symmetric polynomials. Classical symmetric functions, Schur functions, Young tableaux, Schensted correspondence, character theory of the symmetric group, introduction to random matrix theory. Prerequisite: 210 or equivalent.
3 units (Staff) not given 2005-06

MATH 247. Topics in Group Theory — Topics include the Burnside basis theorem, classification of p-groups, regular and powerful groups, Sylow theorems, the Frattini argument, nilpotent groups, solvable groups, theorems of P. Hall, group cohomology, and the Schur-Zassenhaus theorem. The classical groups and introduction to the classification of finite simple groups and its applications. May be repeated for credit.
3 units (Staff) not given 2005-06

MATH 248. Algebraic Number Theory — Introduction to modular forms and L-functions. May be repeated for credit.
1-3 units, Aut (Brubaker, Bump)

MATH 249A. Topics in Representation Theory and Number Theory — Spectral theory of automorphic forms: representation theory of SL(2, R), analytic continuation of Eisenstein series using integral operators, spectral decomposition of Gamma\SL(2, R) and the Selberg trace formula. May be repeated for credit.
3 units, Win (Bump)

MATH 249B. Topics in Representation Theory and Number Theory — 249A and B cover the essential tools in the theory of automorphic forms. Representation theory of GL(2) over a p-adic field.
3 units, Spr (Brubaker)

3 units (Staff) not given 2005-06

MATH 256A. Partial Differential Equations — Introduction to the theory of linear and non-linear partial differential equations, beginning with linear theory involving use of Fourier transform and Sobolev spaces. Topics: Schauder and L2 estimates for elliptic and parabolic equations; De Giorgi-Nash-Moser theory for elliptic equations; non-linear equations such as the minimal surface equation, geometric flow problems, and non-linear hyperbolic equations.
3 units, Aut (Brendle)

MATH 256B. Partial Differential Equations — Continuation of 256A.
3 units, Win (Mazzeo)

MATH 257A. Symplectic Geometry and Topology — Linear symplectic geometry and linear Hamiltonian systems. Symplectic manifolds and their Lagrangian submanifolds, local properties. Symplectic geometry and mechanics. Contact geometry and contact manifolds. Relations between symplectic and contact manifolds. Hamiltonian systems with symmetries. Momentum map and its properties. May be repeated for credit.
3 units (Staff) not given 2005-06
MATH 257B. Symplectic Geometry and Topology — Continuation of 257A. May be repeated for credit.
3 units (Eliashberg) not given 2005-06

3 units, Aut (Katznelson)

MATH 261B. Functional Analysis — Continuation of 261A.
3 units (Staff) not given 2005-06

3 units (Staff) not given 2005-06

MATH 263B. Lie Groups and Lie Algebras — Continuation of 263A. May be repeated for credit.
3 units (Staff) not given 2005-06

MATH 266. Computational Signal Processing and Wavelets — Theoretical and computational aspects of signal processing. Topics: time-frequency transforms; wavelet bases and wavelet packets; linear and nonlinear multiresolution approximations; estimation and restoration of signals; signal compression. May be repeated for credit.
3 units (Staff) not given 2005-06

MATH 270. Geometry and Topology of Complex Manifolds — Complex manifolds, Kahler manifolds, curvature, Hodge theory, Lefschetz theorem, Kahler-Einstein equation, Hermitian-Einstein equations, deformation of complex structures. May be repeated for credit.
3 units, Win (J. Li)

MATH 275. Topics in Singularity Theory — Topics may include: Jet spaces; Thom transversality theorem; h-principle type results in singularity theory with applications to topology; Thom-Boardman singularities; local classification problems and results in singularity theory; Picard-Lefschetz theory; theory of oscillating integrals; Frobenius manifolds.
3 units (Staff) not given 2005-06

MATH 282A. Low Dimensional Topology — The theory of surfaces and 3-manifolds. Curves on surfaces, the classification of diffeomorphisms of surfaces, and Teichmüller space. The mapping class group and the braid group. Knot theory, including knot invariants. Decomposition of 3-manifolds: triangulations, Heegaard splittings, Dehn surgery. Loop theorem, sphere theorem, incompressible surfaces. Geometric structures, particularly hyperbolic structures on surfaces and 3-manifolds.
3 units, Aut (Kerckhoff)

MATH 282B. Homotopy Theory — Homotopy groups, fibrations, spectral sequences, simplicial methods, Dold-Thom theorem, models for loop spaces, homotopy limits and colimits, stable homotopy theory.
3 units, Win (Carlsson)

3 units, Spr (R. Cohen)

MATH 283. Topics in Algebraic and Geometric Topology — May be repeated for credit.
3 units, Aut (Manson), Win (R. Cohen)

MATH 285. Geometric Measure Theory — Hausdorff measures and dimensions, area and co-area formulas for Lipschitz maps, integral currents and flat chains, minimal surfaces and their singular sets.
3 units (Staff) not given 2005-06

MATH 286. Topics in Differential Geometry — May be repeated for credit.
3 units, Win (Schoen)

MATH 290A. Model Theory — (Enroll in PHIL 350A.)
3 units, Win (Mints)

MATH 290B. Model Theory — (Enroll in PHIL 350B.)
3 units (Staff) not given 2005-06

MATH 291A. Recursion Theory — (Enroll in PHIL 351A.)
3 units, Win (Feferman)

MATH 291B. Recursion Theory — (Enroll in PHIL 351B.)
3 units (Staff) not given 2005-06

MATH 292A,B. Set Theory — (Same as PHIL 352A,B.) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL 160A,B, and MATH 161, or equivalents.
3 units, A: Win, B: Spr (P. Cohen)

MATH 293A. Proof Theory — (Enroll in PHIL 353A.)
3 units, Win (Feferman)

MATH 293B. Proof Theory — (Enroll in PHIL 353B.)
3 units, Aut (Mints)

MATH 294. Topics in Logic — (Enroll in PHIL 354.)
3 units, Spr (Mints)

MATH 297. Algebraic Logic — (Enroll in CS 353.)
3 units, Win (Feferman)

MATH 299. Seminar in Logic and the Foundations of Mathematics — (Enroll in PHIL 350A.)
1-3 units, Aut, Win, Spr, Sum (Staff)

MATH 350. Seminar in Applied Mathematics — By arrangement. May be repeated for credit.
1-3 units, Aut, Win, Spr, Sum (Staff)

MATH 355. Graduate Teaching Seminar — Required of and limited to first-year Mathematics graduate students.
1 unit, Win (Staff)

MATH 356. Advanced Reading and Research
1-9 units, Aut, Win, Spr, Sum (Staff)

MATH 361. Research Seminar Participation — Participation in a faculty-led seminar which has no specific course number.
1-3 units, Aut, Win, Spr, Sum (Staff)

MATH 380-391. Graduate Seminars — By arrangement. May be repeated for credit.
1-3 units, Aut, Win, Spr, Sum (Staff)
**MEDIEVAL STUDIES**

**Director:** Philippe Buc  
**Committee in Charge:** Philippe Buc, Hester Gelber, Nancy S. Kollmann, William Mahrt, Jennifer Summit, Rega Wood  
**Affiliated Faculty:** George H. Brown (English), Philippe Buc (History), Charlotte Fonrobert (Religious Studies), Hester Gelber (Religious Studies), Nancy S. Kollmann (History), Seth Lerer (English), Mark E. Lewis (History), William Mahrt (Music), Kathryn Miller (History, on leave), Bissera Pentcheva (Art and Art History), Orrin W. Robinson (German Studies), Jeffrey Schnapp (French and Italian), Jennifer Summit (English), Rega Wood (Philosophy)  
**Program Offices:** Building 250, Room 251F  
**Mail Code:** 94305-2020  
**Department Phone:** (650) 723-3413  
**Email:** idstudies.moore@stanford.edu  
**Web Site:** [http://www.stanford.edu/dept/medieval/](http://www.stanford.edu/dept/medieval/)

Courses given in Medieval Studies have the subject code MEDVLST. For a complete list of subject codes, see Appendix.

The Medieval Studies Program is administered through Interdisciplinary Studies in Humanities, but the degree is conferred by the Dean of Undergraduate Studies Advisory Committee on Individually Designed Majors. The committee has approved the program as listed below. Students interested in pursuing the Medieval Studies major or minor should consult the Director of Medieval Studies. Students who are members of the Humanities Honors Program may petition to major in Medieval Studies; see the “Interdisciplinary Studies in Humanities” section of this bulletin. The major is normally declared by the beginning of the student’s third year.

The major combines interdisciplinary breadth with a disciplinary focus. The interdisciplinary emphasis is provided by MEDVLST 165, Introduction to Medieval Culture (not given 2005-06), by upper-division interdisciplinary colloquia, and by the requirement that students take courses in three different areas. Depth is ensured by the requirement that students take at least four courses in one area. A faculty adviser helps each student choose courses that integrate the requirements of breadth and depth. To that end, the following guidelines are provided.

The student should take a minimum of 60 units of course work from the list of Medieval Studies courses or appropriate alternatives approved by the director, including ten courses as follows:

1. The introductory course, MEDVLST 165, Introduction to Medieval Culture. Because 165 is not given in 2005-06, students may petition to take a substitute course. For 2005-06, HISTORY 115, Medieval Europe, fulfills this requirement. Petitions should be directed to the Director of Medieval Studies, Philippe Buc, at igorbuc@stanford.edu.

2. Two upper-division courses, ideally with an interdisciplinary component, in any field dealing with the Middle Ages.

3. Four courses in one of the following categories:
   a) Literature: English, French, German and Scandinavian, Italian, Latin, Slavic, Spanish
   b) History
   c) Art History, Drama, Music
   d) Humanities, Philosophy, Religious Studies (certain Humanities courses may fulfill requirements within other categories)

4. Two courses in a second category from the above list.

5. One course in a third category from the above list.

Students doing the Medieval Studies concentration for the Humanities major should use these requirements as guidelines for developing their programs of study.

In addition to the ten courses, a language proficiency equal to two years of college-level study is suggested in Latin or one of the following: French, German, Italian, or Spanish.

Medieval Studies has a Writing in the Major (WIM) requirement. It can be fulfilled in one of three ways:

1. Through a course designated as WIM by a department contributing to the Medieval Studies major.
2. Through a paper in a Medieval Studies course.
3. Through an independent paper with a member of the Medieval Studies faculty.

Check with the program office regarding specific requirements for each of these options.

**MINORS**

An undergraduate minor in Medieval Studies is available through the program. Students interested in completing the minor should inquire about enrollment procedures at the office of Interdisciplinary Studies in Humanities.

Requirements are as follows:

1. **Language:** in addition to the University foreign language requirement, at least a one quarter course in a classical and/or medieval vernacular language is recommended, which may count as one of the five required courses for the minor listed under item 2b.

2. The minor consists of six courses, which include:
   a) Medieval Studies 165, Introduction to Medieval Culture (core course). If 165 is not offered in a given year, students may petition to take a substitute course if necessary. Petitions should be directed to the Director of Medieval Studies.
   b) an additional five courses dealing directly with the Middle Ages. If the student’s major department or program offers medieval courses, he/she should take two of them for the Medieval Studies minor, but those courses may not also count for the major. At least three courses must be taken outside the student’s major, selected from two or more of the following categories:
      1) Language and Literature  
      2) History  
      3) Art History, Drama, Music  
      4) Humanities, Philosophy, Religious Studies  
      5) From among the Medieval Studies faculty listed above, the student chooses an adviser, who assists in the selection of courses and the design of the program.

Courses applied to the minor in Medieval Studies must be taken for a letter grade. Courses applied to the minor cannot also be applied to a student’s major or another minor.

**COURSES**

**MEDVLST 210F. Power, Legend, and Love in the 12th Century**

(Same as HISTORY 210F.) The 12th-century emergence of courtly literature focusing on the love between a man and a woman that revealed and shaped a new chivalric ethos. Literature devoted to the matter of Britain associated with the Celtic king Arthur.

2-3 units (Buc) not given 2005-06

**MEDVLST 322. Medieval Seminar**

(Same as HUMNTIES 322, RELIGST 338.) Medieval culture and ethical ideals extolled by medieval authors explicitly in philosophical and theological texts and implicitly in literary ones. Connections among ethics, cosmology, sacred history, anthropology, and soteriology in the medieval worldview. Medieval ethical beliefs as a window on medieval intellectual culture.

3-5 units, Win (Gelber)

**INTERDEPARTMENTAL OFFERINGS**

Courses suitable for self-designed majors in Medieval Studies are listed below. More detailed course descriptions are found under the various department headings. See quarterly *Time Schedule* for changes in listings.

**ART HISTORY**

**ARTHIST 105/305. Introduction to Medieval Art**

4 units (Pentcheva) not given 2005-06
ARTHIST 106/306. Byzantine Art and Architecture, 300-1453 C.E.
4 units (Pentcheva) not given 2005-06

ARTHIST 107/307. Age of Cathedrals
4 units (Pentcheva) not given 2005-06

ARTHIST 108/308. Virginity and Power: Mary in the Middle Ages
4 units, Spr (Pentcheva)

ARTHIST 187/387. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868
4 units (Takeuchi) not given 2005-06

ARTHIST 207. Light and Power: Mosaics and Stained-Glass Windows
5 units (Pentcheva) not given 2005-06

COMPARATIVE LITERATURE
COMPLIT 129. Lovers at Dawn
3-5 units, Aut (Galvez)

ENGLISH
ENGLISH 102. Chaucer
5 units, Win (Lerer)

ENGLISH 271B. Chaucer: Early Works
5 units, Win (Summit)

FRENCH LITERATURE
FREN Lit 130. Authorship, Book Culture, and National Identity in Medieval and Renaissance France
4 units, Spr (Alday)

HISTORY
HISTORY 110A. Europe from Late Antiquity to 1500
5 units (Buc) not given 2005-06

HISTORY 115. Medieval Europe
5 units, Aut (Goldberg)

HISTORY 216/316. Medieval Antisemitism
5 units (Buc) not given 2005-06

HISTORY 218/318. The Medieval Mediterranean: Power and Commerce
5 units, Spr (Goldberg)

MUSIC
MUSIC 40. Music History to 1600
4 units, Aut (Sargent)

MUSIC 140/240. Studies in Medieval Music
3-4 units, Win (Genensky) alternate years, not given 2006-07

MUSIC 141/241. Studies in Renaissance Music
3-4 units (Staff) alternate years, given 2006-07

MUSIC 221A. History of Music Theory: Ancient Through Baroque
4 units, Aut (Hinton) alternate years, not given 2006-07

MUSIC 301A. Analysis of Music: Modal
4 units, Win (Mahrt)

PHILOSOPHY
PHIL 115/215. Problems in Medieval Philosophy: Western Medieval Science
3-5 units, Win (R. Wood)

PHIL 248. Medieval Latin Paleography
3-5 units, Spr (R. Wood)

RELIGIOUS STUDIES
RELIGST 172. Sex, Body, and Gender in Medieval Religion
4 units, Spr (Gelber)

RELIGST 308. Medieval Japanese Buddhism
3-5 units, Aut (Faure)
MODERN THOUGHT AND LITERATURE

Director: Elisabeth Mudimbe-Boyi
Committee in Charge: Lanier Anderson, Gordon Brotherston, Jean-Pierre Dupuy, Dan Edelstein, Shelley Fisher Fishkin, Sherman Jackson, Andrea A. Lunsford, Barbara Martinez-Ruiz, Paula Moya, Elisabeth Mudimbe-Boyi, Richard White
Affiliated Faculty: Lanier Anderson (Philosophy), Eamonn Callan (Education), Jean-Pierre Dupuy (French and Italian), Paul Ebron (Cultural and Social Anthropology), Dan Edelstein (French and Italian), Amir Ezehl (German Studies), Shelley Fisher Fishkin (English), Estelle Freedman (History), James Ferguson (Cultural and Social Anthropology), Theodore Glasser (Communication), Roland Greene (English, Comparative Literature), Hans U. Gumbrecht (French and Italian, on leave), Akhil Gupta (Cultural and Social Anthropology), Sean Hanretta (History), Robert Kaufman (English), Matthew Kohrman (Cultural and Social Anthropology), Joshua Landy (French and Italian), Andrea A. Lunsford (English), Liisa Malikki (Cultural and Social Anthropology), Purimina Mankekar (Cultural and Social Anthropology, on leave), Barbara Martinez-Ruiz (Art and Art History), Franco Moretti (Comparative Literature), Paula Moya (English), Elisabeth Mudimbe-Boyi (French and Italian), David Palumbo-Liu (Comparative Literature), Patricia Parker (English, Comparative Literature), Arnold Rampersad (English), Ramón Saldívar (Comparative Literature), Debra Satz (Philosophy), Richard White (History), Bryan Wolf (Art and Art History, on leave), Alex Woloch (English), Sylvia Yanagisako (Cultural and Social Anthropology), Yvonne Yarbro-Bejarano (Spanish and Portuguese), Steven Zipperstein (History)

Program Offices: Building 250, Room 251F

Web Site: http://www.stanford.edu/dept/MTL

Courses given in Modern Thought and Literature have the subject code MTL. For a complete list of subject codes, see Appendix.

The Program in Modern Thought and Literature is administered through the office of Interdisciplinary Studies in Humanities. The program admits students for the Ph.D. and a very limited number for a coterminal M.A. degree. Admission to this program is granted only on condition that in the course of working on their master’s degree they do not apply to enter the Ph.D. program in Modern Thought and Literature. The deadline for application is early February.

To apply, applicants submit:
1. An unofficial grade transcript from Axess.
2. A “Petition for Admission to the Coterminal Program” from Degree Progress in the Registrar’s Office.
3. A statement giving the reasons the student wishes to pursue this program and its place in his or her future plans. This statement should pay particular attention to the reasons why the student could not pursue the studies he or she desires in some other way.
4. A plan of study listing, quarter by quarter, each course by name, units, and instructor, to be taken in order to fulfill the requirements for the degree for a total of 45 units, including at least 20 units of advanced work in one literature, and at least 20 units in a coherent interdisciplinary program of courses taken in non-literature departments.
5. A writing sample of critical or analytical prose.
6. Two letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

REQUIREMENTS

The candidate for the M.A. must complete at least 45 units of graduate work, to be divided in the following manner:
1. The introductory seminar, MTL 334A, 5 units, or another graduate-level seminar offered by a member of the Committee in Charge and approved by the student’s graduate program adviser.
2. At least 20 units of advanced course work in literature, to be approved by the director.
3. At least 20 units of course work in a coherent and individually arranged interdisciplinary program, to be approved by the director.

By the end of the course of study, each candidate must also demonstrate a reading knowledge of at least one foreign language.

GRADUATE PROGRAMS

The Ph.D. in Modern Thought and Literature is an interdisciplinary program combining work in modern literary/cultural studies with work in one or more other modern disciplines.

The Ph.D. program is designed specifically for students who have a strong interest in literature or culture, but whose approach or focus requires an interdisciplinary program; for example, students interested in anthropological or philosophical approaches to literature and culture; gender studies; ethnic studies; or in topics such as legal humanities, popular culture, and social or cultural theory.

Modern Thought and Literature is intended for students who plan to teach and write in literature departments or in interdisciplinary programs in the humanities, cultural studies, or humanistic social sciences, or for students intending to formulate cultural policy.

Course work in the program is divided about evenly between advanced courses in literature departments and advanced courses in non-literature departments.

MASTER OF ARTS

The Master of Arts is available to students who are admitted to the doctoral program. Students are not admitted into the program for the purpose of earning a terminal Master of Arts degree. Candidates for the Ph.D. who satisfy the committee of their progress and satisfactorily complete 45 units of course work forming a coherent program of study, may apply for an M.A. in Modern Thought and Literature.
University requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin.

A candidate for the Ph.D. degree in Modern Thought and Literature must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. He or she is expected to complete at least 18 courses of graduate work in addition to the dissertation. Students may spend one year of graduate study abroad.

Requirements for the Ph.D. in Modern Thought and Literature are:

2. A coherent program of eight courses of advanced work in literary studies to be worked out with the adviser, of which at least six must be regularly scheduled courses in literature. Courses in the teaching of composition (ENGLISH 396, 397), ad hoc graduate seminars (MTL 395), research courses (MTL 398), and thesis registration (MTL 802) may not be counted among these six courses; MTL 396L, 397, 399, 802 may not be counted toward these requirements under any circumstances.

3. Eight courses of advanced work in non-literature departments, the core of which is completion of either a departmental minor or an interdisciplinary concentration, typically consisting of six courses. Departmental minors are available from the departments of Cultural and Social Anthropology, Art and Art History, Communication, History, Philosophy, Political Science, Religious Studies, and Sociology (see the relevant information in those sections of this bulletin). Approved interdisciplinary concentrations have been established in popular culture, ethnic studies, feminist and gender studies, and science and technology studies (specific course requirements are available from the program office). Individually designed concentrations may be approved by petition to the director. In addition to the required six courses in a minor or a concentration, two additional courses from non-literature departments are chosen in consultation with each student’s academic adviser. Course restrictions noted above in item 2 also apply.

4. Qualifying Paper: this certifies that students are likely to be able to undertake the quality of research, sustained argumentation, and cogent writing demanded in a doctoral dissertation. The qualifying paper must be a substantial revision of a seminar paper written at Stanford during the first year and should embody a substantial amount of independent research, develop an intellectual argument with significant elements of original thinking, and demonstrate the ability to do interdisciplinary work. Each paper is evaluated by two or three readers (designated before the end of the first year of graduate study), one of whom must be a member of the Committee in Charge. Qualifying papers must be submitted to the program office no later than the end of the third week of the fifth quarter of enrollment, normally, winter of the second year.

5. Teaching, an essential part of the program, is normally undertaken in conjunction with the Department of English. Candidates are required to demonstrate competence in teaching.

6. Students must demonstrate, by the end of the third quarter of the first year, a reading knowledge of one foreign language and, by the beginning of the first quarter of the third year, a reading knowledge of one other foreign language. Reading knowledge means the ability to make a genuine scholarly use of the language: that is, to read prose of ordinary difficulty. Students may not take the University oral examination before completion of the foreign language requirement.

7. Candidacy: at the end of the second year, students apply for candidacy. The following qualifications are required before candidacy can be certified: the earlier submission of a satisfactory qualifying paper, demonstration of a reading knowledge of one foreign language; satisfactory progress in course work; a list of courses applicable to the degree, distinguishing between courses appropriate to the literary component and courses appropriate to the interdisciplinary component; designation of a departmental minor or an interdisciplinary concentration; and the submission of a statement outlining the scope and coherence of the interdisciplinary component of the program in relation to the literary component and noting the relevance of the course work to that program.

8. Annual Review: the program and progress of each student must be approved by the Committee in Charge at the end of each academic year.

9. University Oral Examination: this examination, covering the student’s areas of concentration, normally is taken in the third year of graduate study. It is a two-hour oral examination administered by four faculty members specializing in the student’s areas of concentration, and a chair from another department. The exam is based on a substantial reading list prepared by the student in conjunction with the faculty committee and designed to cover the areas of expertise pertinent to the student’s dissertation project.

10. Colloquium on the Dissertation Proposal: sometime after the University oral examination, or in conjunction with that examination, the dissertation committee assembles for up to one hour to discuss the dissertation proposal with the student. Prior to this meeting, the student should have consulted each member of the committee to discuss the proposal and compile a bibliography.

11. Dissertation: the fourth and fifth years are devoted to the dissertation, which should be a substantial and original contribution acceptable to the Committee on Modern Thought and Literature. The subject is drawn from the literature of specialization and the area of nonliterary studies.

HUMANITIES

The program participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Modern Thought and Literature and Humanities. For a description of the Humanities program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, and in the Division of Literatures, Cultures, and Languages. For other offerings, students should consult listings in the individual departments of interest. Consent of instructor is often required.

Students in the doctoral program in Modern Thought and Literature are advised to read through the offerings in English as well as offerings of the non-literature departments in which they wish to concentrate: for example, courses dealing with culture listed under Cultural and Social Anthropology, courses dealing with film under Communication or Art and Art History, courses in intellectual and cultural history under History. If the area of nonliterary interest is thematic rather than disciplinary, doctoral students should look under program listings such as Feminist Studies, African and African American Studies, or Comparative Studies in Race and Ethnicity.

MTL 111. A Short History of Stanford Student Life: Wilbur Remembers Five Decades of Campus Culture —How students have communicated, studied, interacted with one another, and related to the University and the world outside over five decades of change from the 60s to the present. Hands-on research in the University archives. GER:DB-Hum 3 units, Aut (Mesa)

MTL 175. Individual Work — For undergraduates only. 2-5 units, Aut, Win, Spr, Sum (Staff)

MTL 300. Modern Thought and Literature Colloquium — Required of first-year graduate students in the program; open to all students in the program and to others by consent of instructor. Weekly meeting of students in the program to discuss interdisciplinary scholarship, writing, and issues pertaining to the requirements for the Ph.D. Presentations by affiliated faculty and by student panels. 1-3 units, Spr (Mudimbe-Boyti)
MTL 334A. The Modern Tradition I—(Same as ENGLISH 334A.) Preference to first-year students in Modern Thought and Literature and English. Texts that have formed the foundation for contemporary cultural and social theory including Kant, Hegel, Marx, Weber, Lukács, Nietzsche, Freud, and Heidegger.

3 units, Aut (Moya)

MTL 334B. The Modern Tradition II—(Same as COMPLIT 354B.) Responses, refutations, elaborations, modifications to texts in critical theory such as Gramsci, Lacan, and Derrida, and postcolonial, postmodern, and feminist theory. Prerequisite: 334A.

3 units, Win, Spr (Mudimbe-Boyi)

MTL 390. Qualifying Paper—Preparation and writing of the qualifying paper for the Ph.D. in Modern Thought and Literature.

1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 395. Ad Hoc Graduate Seminar—Graduate students (three or more) who wish to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a suitable member of the faculty to supervise it.

1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 396L. Pedagogy Seminar I—(Enroll in ENGLISH 396L.)

2 units, Aut (Lerer)

MTL 397. Teaching Praxis—For Modern Thought and Literature doctoral students only. Teaching experience. Consent of program director required.

1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 398. Research—Students pursue a special subject of investigation under supervision of a member of the committee or another faculty member. Thesis work is not to be registered under this number.

1-15 units, Aut, Win, Spr, Sum (Staff)

MTL 399. Reading for Orals—Reading in preparation for the University Oral Examination.

1-15 units, Aut, Win, Spr, Sum (Staff)

MTL 400. Symposium—Preparation for and participation in the annual student symposium.

1-5 units, Win, Spr (Mudimbe-Boyi)
Varied opportunities for instrumental and vocal study and performance are available to majors and nonmajors alike. Students wishing to obtain individual instruction, to participate in chamber music, or to play in department ensembles should note that auditions are held during registration week in Autumn Quarter. While there may be openings in some private studios for qualified students during other quarters, it is to the student's advantage to audition in autumn, as most slots are filled for the entire year.

The department is housed in Braun Music Center, Dinkelspiel Auditorium, and The Knoll, including three concert halls for concert and recital productions, two rehearsal halls, a small chamber hall, and a state-of-the-art, hexagonal listening/research room. Pianos, organs, harpsichords, and a variety of early stringed and wind instruments are available for student use. In addition, advanced students may use fine old stringed instruments and bows from the Harry R. Lange Historical Collection (http://music.stanford.edu/DeptInfo/Langcol.html).

The Music Library (http://www-sul.stanford.edu/depts/music/index.html) contains a comprehensive collection of scores, books, and recordings with an emphasis on Western art music. In addition, the Department of Special Collections holds an invaluable collection of musical manuscripts and first and early editions, and the Archive of Recorded Sound has a superb collection of historical recordings of all types.

For more information on the Department of Music, see http://music.stanford.edu/.

The Stanford Center for Computer Research in Music and Acoustics (CCRMA) is a multidisciplinary facility where composers and researchers work together using computer-based technology both as an artistic medium and as a research tool. Areas of ongoing interest at CCRMA include: composition, applications hardware, applications software, synthesis techniques and algorithms, physical modeling, real-time controllers, signal processing, digital recording and editing, psychoacoustics and musical acoustics, music manuscripting by computer, and real-time applications.

The CCRM community consists of administrative and technical staff, faculty, research associates, graduate research assistants, graduate and undergraduate students, visiting scholars, visiting researchers and composers, and industrial affiliates. Center activities include academic courses, seminars, small interest-group meetings, summer workshops, and colloquia. Concerts of computer music are presented several times each year with an annual outdoor computer-music festival in July.

CCRMA houses studios, computing facilities, and a networked system of software that includes programs and tools for editing, viewing, synthesizing, and analyzing sound. For a detailed and up-to-date description of facilities available, see the CCRMA home page at http://ccrma.stanford.edu/.

The Center for Computer-Assisted Research in the Humanities (CCARH), located in Braun Music Center, conducts research focused on constructing computer databases for music and on creating programs that allow student and staff researchers to access, analyze, print, and electronically perform the music. For more information, see the CCARH home page at http://www.ccarh.org/.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major in Music is built around a series of foundation courses in theory, musicianship, and music history, in addition to performance and the proficiency requirements outlined below. Because of the sequence of courses, it takes more than two years to complete the requirements for the major. Prospective majors are urged to consult the undergraduate student services officer in the department as early as possible in order to plan a program that allows sufficient time for major course work, practice, and University requirements outside the major. Early planning is especially important for students wishing to double-major, for those contemplating overseas study during their undergraduate years, for those wishing to do an in-depth concentration in the music major, and for those with particular musical talents and interests. All required courses for the B.A. in Music and in the Music, Science, and Technology specialization must be taken for a letter grade. Electives may be taken credit/no credit, but any courses taken towards concentration requirements must also carry a letter grade.

1. Students are required to include the following foundation courses in their programs:
   a) Theory: MUSIC 21, 22, 23
   b) History: MUSIC 40, 41, 42, and three from the series 140-148
   c) Composition: MUSIC 121 and two from 122A, B, or C

2. Additionally, Music majors must fulfill the following two performance requirements:
   a) Instruction in instrumental and/or vocal performance: minimum of five quarters, comprising a minimum of 15 units.
   b) Ensemble: five quarters (5 units minimum) of work in one or more of the department’s organizations or chamber groups. MUSIC 156, “sic”; Improvisation Collective, and MUSIC 157, Mariachi Band, do not satisfy this requirement. MUSIC 181 may count for up to two of the ensemble-unit requirements for the music major. To fulfill the ensemble requirement, music majors need to participate at least three quarters in the department’s traditional large ensembles (MUSIC 159–167), with the exception of students whose primary instrument is harp, keyboard, or guitar, who need to participate at least one quarter in the ensembles above, but who may fulfill the rest of the requirement with chamber music (171).

3. Majors are required to pass a Piano Proficiency examination as a part of the requirements to complete MUSIC 23. Offered separately from the course at the end of the Autumn and Spring quarters or at other times by appointment, it consists of scales and arpeggios, performance of a simple tune (to be set by the examiner), sight reading, and the performance of prepared pieces (consult the department undergraduate adviser for details). Remedial skills are taught in MUSIC 12A,B,C.

4. Majors must also pass an Ear-Training Proficiency examination, which is part of the requirements to complete MUSIC 23. It may be taken by arrangement, demonstrating a student’s ability to hear music accurately and to perform it at sight.

RECOMMENDED SCHEDULE FOR THE MUSIC MAJOR

The following sample schedule shows how a student may include substantial work on a major in music while also fulfilling the University General Education Requirements during the freshman and sophomore years. The schedule also includes foreign language study, which is strongly recommended for all music majors and especially for those expecting to continue into graduate work in any area of music.

MUSIC, SCIENCE, AND TECHNOLOGY

The specialization in Music, Science, and Technology is designed for those students with a strong interest in the musical ramifications of rapidly evolving computer technology and digital audio, and in the acoustic and psychoacoustic foundations of music. The program entails a research project under faculty guidance and makes use of the highly multidisciplinary environment at CCRMA. This program can serve as a complementary major to students in the sciences and engineering.

1. Students in the program are required to include the following courses in their studies:
   a) Theory: 21, 22, 23, 121, 151 (WIM) (4 units each); 150 (3 units); 220A,B,C (4 units each); 250A (4 units)
   b) History: two from 40, 41, 42
   c) Applied: individual studies in performance (6 units) or 192A,B; and Ensemble or 192C (5 units)
   d) Research project: 220D (4 units)

2. Students in Music, Science, and Technology must also pass the Piano and Ear-Training Proficiency examinations required of all Music majors.

MINORS

Minors in Music and in the Music, Science, and Technology specialization provide the student with a core of essential Music courses in the disciplines that establish both a foundation for informed appreciation of music and a basis for more advanced study, should the student wish to pursue it.

MUSIC

Total 40

CONCENTRATIONS

Concentrations are offered in performance, conducting, composition, or history and theory. In each concentration, 6 additional course units in the area of concentration beyond the basic requirements for the major are required. In addition, each concentrator registers for an independent project (198, 4 units) in the senior year under faculty supervision, leading to a senior recital, a composition, a conducting project, or a senior research paper. Students wishing to pursue the concentration in performance must demonstrate private-lesson-level proficiency on their instrument. Specific guidelines and information on the concentration tracks are available from the Department of Music office.

HONORS PROGRAM

Honors in Music is awarded by the faculty to concentrators who have produced an independent project of exceptional quality and meet certain department standards in musicianship, scholarship, and academic standing. The conferral of honors is done solely through faculty consultation. Students do not petition for honors.

OVERSEAS STUDIES

Courses in Music are often available at Stanford overseas programs, especially in Berlin, Paris, and Oxford. See the Overseas Studies Program section of this bulletin immediately following this section for this year’s listings. Music majors and minors should talk to the Department of Music undergraduate administrator prior to going overseas.

GRADUATE PROGRAMS

University requirements for the M.A., D.M.A., and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin. The following statements apply to all the graduate degrees described below, unless otherwise indicated.

Admission—Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers, according to the proposed field of concentration) when they return the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 13 application deadline. All applicants, except those applying for the M.A. in Music, Science, and Technology (M.A./MST), are also required to submit a departmental entrance test in theory and musicianship, which is available from the Music Department. All components of the application are due by December 13. International students whose first language is not English are required to take the TOEFL exam (with certain exceptions: see the University Registrar’s web site at http://gradadmissions.stanford.edu/).

Department Examinations—All entering graduate students except those in the M.A./MST program are required to take: (1) a diagnostic examination testing the student in theory (counterpoint, harmony, and analysis) and (for musicologists only) the history of Western art music, and (2) a proficiency examination in sight-singing and piano sight-reading. These exams are given at the beginning of study in the department (usually the week before school begins).

None of Stanford’s required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of “A,” “B,” or “Satisfactory” (a passing grade in an instructor-mandated credit/no credit course) in music courses taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

MASTER OF ARTS

Residence—A minimum of 45 academic units is required for the master’s degree in Music.

MUSIC

Students in the doctoral programs who enter directly from the bachelor’s level may, upon completing 45 units and advancing to candidacy, be recommended for the M.A. degree. The Department of Music does not accept students for study only towards the M.A. degree except in the Music, Science, and Technology program, described below.

MUSIC, SCIENCE, AND TECHNOLOGY

This is a one-year program of 45 units focusing on the integration of music perception, music-related signal processing and controllers, and synthesis. The program is designed for students having an undergraduate engineering or science degree, or a degree that includes course work in engineering mathematics.

Required are:
- MUSIC 151. Psychophysics and Cognitive Psychology for Musicians 4
- MUSIC 154. Composition and Performance of Instrumental Music with Electronics 3
- MUSIC 192A. Foundations of Sound-Recording Technology 3
- MUSIC 192B. Advanced Sound-Recording Technology 3
- MUSIC 220A. Fundamentals of Computer-Generated Sound 4
- MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing 4
- MUSIC 220C. Research Seminar in Computer-Generated Music 4
- MUSIC 250A. HCT Theory and Practice 4
- MUSIC 320. Introduction to Digital Audio Signal Processing 4
DOCTORAL PROGRAMS

Residence — The candidate must complete a minimum of 135 academic units (see Residency under the “Graduate Degrees” section of this bulletin). Doctoral candidates working on Ph.D. dissertations or Doctor of Musical Arts (D.M.A.) final projects that require consultation with faculty members continue enrollment in the University under Terminal Graduate Registration (TGR), after they have reached the required 135 academic units and have completed their Special Area examinations.

Foreign Language Requirement — At the time of advancement to candidacy, all D.M.A. students, and Ph.D. students in the Computer-Based Theory and Acoustics program, are required to have demonstrated a reading knowledge of one language other than English and the ability to translate into idiomatic English. Ph.D. students in Musicology are required to demonstrate proficiency in German and a similar competence in a second language, chosen from French, Italian, or Latin (or, on a case-by-case basis, another language, if it has significant bearing on the candidate’s field of study).

Qualifying Examination — A written and oral examination for admission to candidacy is given just prior to the fourth quarter of residence for D.M.A. students, and Ph.D. students in the Computer-Based Music Theory and Acoustics programs; for Ph.D. students in Musicology, the exams are given just prior to the eighth quarter of residence. This exam tests knowledge of history, theory, repertory, and analysis.

Teaching — All students in the Ph.D. or D.M.A. degree programs, regardless of sources of financial support, are required to complete six quarters of their supervised teaching at half time. Music 280 (given in Spring Quarter) is a required course for Teaching Assistants. Additional quarters of teaching may be required.

Basic Requirements — Doctoral programs in the Department of Music do not require a master’s degree as a prerequisite. All students entering directly from the bachelor’s degree level are required to take the following course (which is, however, required of all students in musicology, regardless of entering degree level):

**Course No. and Subject** Units
200. Graduate Proseminar 4

All doctoral candidates must take:
301A,B,C. Music Analysis: Modal, Tonal, and Post-Tonal 12

DOCTOR OF MUSICAL ARTS IN COMPOSITION

The Doctor of Musical Arts (D.M.A.) degree in Composition is given breadth through collateral studies in other branches of music and in relevant studies outside music as seems desirable.

Examinations — A written Special Area examination in the candidate’s field of concentration, including a final project proposal, is required to be completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. A public lecture/demonstration is also required during the last quarter of residence. It should be one hour in length, treating aspects of the final project.

Requirements — Besides those requirements listed above, candidates are expected to produce a number of works demonstrating their ability to compose in a variety of forms and for the common media: vocal, instrumental, and electronic music. If possible, the works submitted are presented in public performance prepared by the composer. Annual progress is reviewed by the composition faculty. The final project in composition is an extended work for instruments, voices, electronic media, or a combination of these. MUSIC 323, Doctoral Seminar in Composition (16 units), is a required course.

DOCTOR OF PHILOSOPHY

The Ph.D. in Music can be pursued in two concentrations: Musicology or Computer-Based Music Theory and Acoustics.

Examinations —
1. Special Areas: a written and oral examination testing the student’s knowledge of music and research in the student’s field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.
2. Ph.D. Orals: the University oral examination, taken once the dissertation is substantially underway, is an oral presentation and defense of dissertation research methods and results.

Requirements — Besides those requirements listed above, other requirements by concentration are:

MUSICOLGY

**Course No. and Subject** Units
221A. History of Music Theory: Ancient Through Baroque 4
221B. History of Music Theory: Classical Through Modern 4
269A. Seminar in Performance Practices 4
300A,B. Seminar in Notation 8
310. Research Seminars in Musicology* 24-40
312A,B. Aesthetics and Criticism of Music 8

* The requirement is for eight seminars of 3-5 units each. Students may petition to take up to two graduate seminars in other departments, in consultation with their advisor.

COMPUTER-BASED MUSIC THEORY AND ACOUSTICS

220A,B,C. Computer-Generated Music Seminars 12
220D. Research in Computer Music 12
221A. History of Music Theory: Ancient Through Baroque 4
221B. History of Music Theory: Classical Through Modern 4
320. Introduction to Digital Audio Signal Processing 4

JOIN PH.D. IN MUSIC AND HUMANITIES

The department participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Music and Humanities. For a description of the program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement. (AU) indicates that the course is subject to the University Activity limitations (8 units maximum).

Many Department of Music courses have pages on the web which are linked to the Music home page. Courses with web sites at press time are noted in their entries below.

GENERAL

MUSIC 8A. Rock, Sex, and Rebellion — Development of critical listening skills and musical parameters through genres in the history of rock music. Focus is on competing aesthetic tendencies and subcultural forces that shaped the music. Rock’s significance in American culture, and the minority communities that have enriched rock’s legacy as an expressively diverse form. Lectures, readings, listening, and video screenings. GER: DB-Hum, EC-AmerCul

3 units (Applebaum) not given 2005-06

MUSIC 9A. Tchaikovsky, Stravinsky, Shostakovich, and Beyond: A History of Russian Music — Introduction to Russian culture through classical music and folklore, including sacred, secular, oral, and written music. The variety of Russian sung folklore in its traditional context, and how it is reflected in the music of Russian composers including Glina, Mussorgsky, Rimsky-Korsakov, Tchaikovsky, Skryabin, Stravinsky, Prokofiev, and Shostakovich. Listening assignments include fieldwork data and video recordings. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Zemtsovsky)
MUSIC 11N-32N. Stanford Introductory Seminars

MUSIC 11N. A View from the Podium: The Art of Conducting — Stanford Introductory Seminar. How a conductor interprets music, realizes a personal vision through the rehearsal process, and communicates with orchestra and audience. Conducting as based on human communication skills. How to apply these lessons to other fields of endeavor. GER:DB-Hum
3 units, Aut (Cai)

MUSIC 13Q. Classical Music and Politics: Western Music in Modern China — Stanford Introductory Seminar. For students interested in social history, cultural studies, China studies, international relations, and music. From the Italian Jesuit, Matteo Ricci, who presented a clavicord to the Chinese emperor to the emergence of a modern generation of Chinese musicians. GER:DB-Hum, EC-GlobalCom
3 units, Spr (Cai)

MUSIC 15Q. Topos in American Music — Stanford Introductory Seminar. Preference to sophomores. American music as a central element in the quest for a national artistic expression that reflects the social order that forms it: pluralistic, multicultural, largely immigrant, democratic, and combining elements of its cultivated and vernacular traditions. Ballads, blues, band music, musical comedy, minstrel, missions music, American Indian music, country music, rags, rock, rhythm-and-blues, jazz, spirituals, swing, shape-notes. GER:DB-Hum, EC-AmerCul
3 units, Win (A.Cohen)

MUSIC 16Q. *Ki ho'alu*: The New Renaissance of a Hawaiian Musical Tradition — Stanford Introductory Seminar. Preference to sophomores. Developed in the Hawaiian Islands during the 1830s, *ki ho'alu*, or Hawaiian slack key guitar, is an art form experiencing newfound popularity coinciding with the growth of political activism in Hawaiian culture. The musical, cultural, historical, and political perspectives of Hawaiian music and *ki ho'alu*, through hands-on experience, readings, discussion, and workshops. Hawaiian music and history and relationships among performance, cultural expression, community, and identity. GER:DB-Hum, EC-AmerCul
3 units, Aut (Sano)

4 units, Spr (Sano, Uyechi)

MUSIC 36Q. Shakespeare’s Songbook to Purcell’s Musical Theater — Preference to sophomores. Courtly music, tavern tunes, and the life and theater of Elizabethan England with consideration of John Dowland, John Wilbye, William Lawes, Henry Purcell, and other musicians of the time. The span, interrelations, and genesis of music, poetry, dance, and theater in 17th-century England. GER:DB-Hum
3 units, Aut (Houle)

MUSIC 18A. Jazz History: Ragtime to Bebop, 1900-1940 — From the beginning of jazz to the war years. GER:DB-Hum
3 units, Win (Berry)

MUSIC 18B. Jazz History: Bebop to Present, 1940-Present — Modern jazz styles from Bebop to the current scene. Emphasis is on the significant artists of each style. GER:DB-Hum
3 units, Spr (Berry)

MUSIC 20A. Jazz Theory — Introduces the language and sounds of jazz through listening, analysis, and compositional exercises. Students apply the fundamentals of music theory to the study of jazz. Prerequisite: 19 or consent of instructor. GER:DB-Hum
3 units, Aut (Nadel)

MUSIC 20B. Advanced Jazz Theory — Approaches to improvisation through listening and transcribing, and developing familiarity with important contributors to this music. Topics: scale theory, altered dominants, and substitute harmony. Prerequisite: 20A or consent of instructor. GER:DB-Hum
3 units (Nadel) alternate years, given 2006-07

MUSIC 20C. Jazz Arranging and Composition — Jazz arranging and composition for small ensembles. Foundation for writing for big band. Prerequisite: 20A or consent of instructor.
3 units, Win (Nadel) alternate years, not given 2006-07

MUSIC 127. Instrumentation and Orchestration — Individual instruments, instrumental groups within the orchestra, and combinations of groups. Arrangements from piano to orchestral music. Score analysis with respect to orchestration. Practical exercises using chamber ensembles and school orchestra. Prerequisite: 23, GER:DB-Hum
3 units (Staff) not given 2006-07

MUSIC 159X. Music and Religion in South Asia — (Enroll in RE-LIGST 159/359.)
4-5 units, Win (Hess)

FOUNDATIONS FOR B.A. MAJOR

Students with training in theory should take a placement exam given at the beginning of each quarter for admission to more advanced courses. Students must not assume that they may begin study in MUSIC 21.

MUSIC 19. Introduction to Music Theory — For non-music majors and music majors or minors unable to pass the proficiency test for entry to 21. The fundamentals of music theory and notation, basic sight reading, sight singing, ear training, keyboard harmony; melodic, rhythmic, and harmonic dictation. Skill oriented, using piano and voice as basic tools to develop listening and reading skills. GER:DB-Hum
3 units, Aut, Spr (T. Berger)

MUSIC 21,22,23. Elements of Music — Melody, harmony, counterpoint, and rhythm are studied through analysis, composition, and exercises in practical musicianship. Emphasis is on tonal theory with components in melody, counterpoint, and harmony. Analytical and practical musicianship skills are taught, with analysis and compositional projects in historical styles. Students with previous training in theory should take a placement exam given at the beginning of each quarter for admission to more advanced courses. Students must not assume that they may begin study in MUSIC 21.

MUSIC 21. Elements of Music I — Preference to majors. Introduction to tonal theory. Practice and analysis. Diatonic harmony focusing on melodic and harmonic organization, functional relationships, voice-leading, and tonal structures. Ear-training and keyboard-harmony skills; analytical methods and listening strategies. Students intending to continue with 22-23 who do not have piano proficiency should begin 12 (class piano) concurrently. Enrollment limited to 40. Prerequisite: pass proficiency examination in basic musical skills on first day of class; students who do not pass may take 19. GER:DB-Hum
4 units, Aut (Aquilanti), Win (T. Berger)

MUSIC 22. Elements of Music II — Preference to majors. Introduction to chromatic harmony focusing on secondary functions, modulations, harmonic sequences, mode mixture, and the Neapolitan, and augmented sixth chords. Analysis of musical forms and harmonizations complemented by harmonic and melodic dictation, sight singing, and other practical skills. Prerequisite: 21 or consent of instructor. GER:DB-Hum
4 units, Win (Aquilanti), Spr (Thomalla)

MUSIC 23. Elements of Music III — Preference to majors. Continuation of chromatic harmony, complex forms, and introduction to early 20th-century techniques. Satisfactory passage of ear-training proficiency exam, part of the course’s final, is a requirement for course completion and for continuation in the major sequence. Passage of departmental piano-proficiency exam is also required to pass this course. Prerequisite: 22 or consent of instructor. GER:DB-Hum
4 units, Aut (Jones), Spr (Aquilanti)
MUSIC 40, 41, 42. Music History — The history of Western art music from Gregorian chant to the present, stressing major styles and genres in their intellectual and institutional settings.

**MUSIC 40. Music History to 1600** — Pre- or corequisite: 23. GER: DB-Hum
4 units, Aut (Sargent)

**MUSIC 41. Music History 1600-1830** — Pre- or corequisite: 23. GER:DB-Hum
4 units, Win (Hadlock)

**MUSIC 42. Music History Since 1830** — Pre- or corequisite: 23. GER:DB-Hum
4 units, Spr (Hinton)

**MUSIC 121. Analysis of Tonal Music** — Complete movements, or entire shorter works of the 18th and 19th centuries, are analyzed in a variety of theoretical approaches. Prerequisites: 23, or consent of instructor; and successful completion of the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Win (Barth)

**MUSIC 122A. Eighteenth-Century Counterpoint** — Analysis and composition of two- and three-part inventions and three- and four-voice fugues. Use of keyboard, ear training, and sight singing. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units (Staff) not given 2005-06

**MUSIC 122B. Harmonic Materials of 19th Century** — Analysis of 19th-century music, with compositional exercises based on 19th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Spr (Ulman)

**MUSIC 122C. Introduction to 20th-Century Composition** — Contemporary works, with emphasis on music since 1945. Projects in free composition based on 20th-century models. Prerequisites: 23, or consent of instructor; and successful completion of the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Aut (Ferneyhough)

**COMPOSITION**

**MUSIC 123. Undergraduate Seminar in Composition** — Current trends in composition. May be repeated for credit. Prerequisite: music major, and 23 or consent of instructor. GER:DB-Hum
3 units, Aut (Jones), Win (Ulman)

**MUSIC 125. Individual Undergraduate Projects in Composition** — May be repeated for credit. Prerequisites: music major and one quarter of 123.
1-3 units, Aut, Win, Spr (Staff)

**MUSIC 323. Doctoral Seminar in Composition** — Illustrated discussions of compositional issues and techniques. Students present their own work to the class, and individually to the instructor.
4 units, Aut (Ulman), Win (Ferneyhough)

**MUSIC 325. Individual Graduate Projects in Composition**
1-5 units, Aut, Win, Spr, Sum (Staff)

**HISTORY AND LITERATURE**

**MUSIC 140-148. Seminars in Music History** — Specialized topics in music history are each offered at least once within any two-year period. Topics vary each year. May be repeated for credit. Music majors may repeat the same seminar in music history only once for credit toward the major and must turn in different papers the second time. GER:DB-Hum, WIM

**MUSIC 140. Studies in Medieval Music** — Pre- or corequisite: 23 (WIM at 4-unit level only.)
3-4 units, Win (Genensky) alternate years, not given 2006-07

**MUSIC 141. Studies in Renaissance Music** — Pre- or corequisite: 23. (WIM at 4-unit level only.)
3-4 units (Staff) alternate years, given 2006-07

**MUSIC 142. Studies in Baroque Music** — Pre- or corequisite: 23. (WIM at 4-unit level only.)
3-4 units (Staff) not given 2005-06

**MUSIC 143. Studies in Classic Music** — Pre- or corequisite: 23. (WIM at 4-unit level only.)
3-4 units, Spr (Hadlock) alternate years, not given 2006-07

**MUSIC 144. Studies in Romantic Music** — Pre or corequisite: 23. (WIM at 4-unit level only.)
3-4 units (Staff) alternate years, given 2006-07

**MUSIC 145. Studies in Modern Music** — Pre- or corequisite: 23. (WIM at 4-unit level only)
3-4 units, Aut (Barth) alternate years, not given 2006-07

**MUSIC 148. Musical Shakespeare: Theater, Song, Opera, and Film** — (Same as HUMNTIES 192G.) The role of music in productions, adaptations, and interpretations of Shakespeare’s plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic and film adaptations. Incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include Romeo and Juliet, Othello, Macbeth, Hamlet, The Tempest, Midsummer Night’s Dream, and Twelfth Night. Pre- or corequisite: 23. GER:DB-Hum, WIM at 4- or 5-unit level only
3-5 units (Grey) not given 2005-06

**MUSIC 164/264. Ritual Musics of the World** — (Same as CASA 164/264.) The roles that music plays in human ritual life: physical effects of music, shamanic healing, spirit possession, and rites of worship. Gender issues in ritual music. The power of music to create and affirm communities, and as a medium for spiritual knowledge. What can be known about people, places, and cultures through sound? How does music express and shape social identity? How are belief systems and patterns of social interaction manifested in musical practices? Sources include readings and guided listening to recorded music from cultural and religious traditions around the world. GER:DB-Hum, EC-GlobalCom
4 units (Diehl) not given 2005-06

4 units, A: Aut (Plebuch), B: Spr (Hinton) alternate years, not given 2006-07

**MUSIC 240-248. Seminars in Music History** — For graduate students; topics as in 140-148. Participation in upper-class seminars, with additional in-depth research. Specialized topics in music history are each offered at least once within any two-year period. Topics vary each year.

**MUSIC 240. Studies in Medieval Music**
3-4 units, Win (Genensky) alternate years, not given 2006-07

**MUSIC 241. Studies in Renaissance Music**
3-4 units (Staff) alternate years, given 2006-07

**MUSIC 242. Studies in Baroque Music**
3-4 units (Staff) not given 2005-06

**MUSIC 243. Studies in Classic Music**
3-4 units, Spr (Hadlock) alternate years, not given 2006-07

**MUSIC 244. Studies in Romantic Music**
3-4 units (Staff) alternate years, given 2006-07

**MUSIC 245. Studies in Modern Music**
3-4 units, Aut (Barth) alternate years, not given 2006-07

**MUSIC 248. Musical Shakespeare: Theater, Song, Opera, and Film** — (Graduate section; see 148; same as HUMNTIES 192G.)
3-5 units (Grey) not given 2005-06

**MUSIC 310. Research Seminar in Musicology** — For graduate students. Topics vary each quarter. May be repeated for credit.
3-5 units, Aut (Hinton), Win (Hadlock), Spr (Reynolds)
MUSIC 192A. Foundations of Sound-Recording Technology — For upperclass undergraduate and graduate students; preference given to music majors with MST specialization. Topics: electronic devices, the physics of sound transduction and microphone operation, selection and placement; mixing consoles; connectors and device interconnection; grounding and shielding; the principles of analog magnetic recording; operation maintenance of recording equipment; the basic principles of recording engineering. Enrollment limited. Prerequisites: 151; algebra, physics basics, and consent of instructor. GER:DB-EngrAppSci
3 units, Aut (Kadis)

MUSIC 192B. Advanced Sound Recording Technology — Topics: noise reduction techniques; dynamics and time-delay audio effects; the principles of digital audio; disk- and tape-based digital recorders; digital audio workstations and editing; advanced multitrack techniques; SMPTE and MIDI time code and device synchronization; MIDI sequencing and synchronization. See http://ccrma.stanford.edu/courses/. Prerequisite: 192A. GER:DB-EngrAppSci
3 units, Win (Kadis)

MUSIC 192C. Session Recording — Independent engineering of recording sessions. May be repeated for credit. Prerequisites: 192A, B. 1-2 units, Aut, Win, Spr (Kadis)

MUSIC 220A. Fundamentals of Computer-Generated Sound — Techniques for digital sound synthesis, effects, and reverberation. Topics: summary of digital synthesis techniques (additive, subtractive, nonlinear, wavetable, spectral-modeling, and physical-modeling); digital effects algorithms (phasing, flanging, chorus, pitch-shifting, and vocoding); and techniques for digital reverberation. Majors (undergraduate or graduate) must take for 4 units. See http://ccrma.stanford.edu/courses/.
2-4 units, Aut (Chafe)

MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing — The use of high-level programming language as a compositional aid in creating musical structures. Advanced study of sound synthesis techniques. Simulation of a reverberant space and control of the position of sound within the space. See http://ccrma.stanford.edu/courses/.
2-4 units, Win (Lopez-Lezcano)

MUSIC 220C. Research Seminar in Computer-Generated Music — Individual projects in composition, psychoacoustics, or signal processing. See web site. Prerequisite: 220B.
2-4 units, Spr (Chafe)

MUSIC 220D. Research in Computer-Generated Music — Independent research projects in composition, psychoacoustics, or signal processing. May be repeated for credit. Prerequisite: 220C. See http://ccrma.stanford.edu/courses/.
1-4 units, Aut, Win, Spr, Sum (Staff)

MUSIC 250A. HCI Theory and Practice — HCI issues as they relate to music applications in composition and performance. Project-oriented, examining issues from the technical and theoretical perspectives of computer science, haptics, and music theory. See http://ccrma.stanford.edu/courses/.
3-4 units, Aut, Win (Verplank)

MUSIC 253. Musical Information: An Introduction — The kinds of musical information used in sound, graphical, and analytical applications. Emphasis is on independent concepts and principles in musical representation and research objectives (repertory analysis, performance analysis, theoretical models, similarity, and stylistic simulation). Examples from Western art music. Prerequisites: one year of music theory or equivalent; methods courses in fields such as musical analysis, symbolic systems, information processing, sound engineering, or intellectual property issues.
1-4 units, Win (Selfridge-Field)

MUSIC 254. Applications of Musical Information: Query, Analysis, and Style Simulation — Participants explore the issues introduced in 253 in greater depth and take initiative for research projects related to a theoretical or methodological issue, a software project, or a significant analytical result. Prerequisite: 253 or consent of instructor.
1-4 units, Spr (Selfridge-Field)

MUSIC 255. Orchestration and Timbral Analysis — Introduction to the art and craft of orchestration and timbral analysis. Combines a hands-on approach to orchestration with applied computational timbral analysis. Geared for music majors with a concentration or interest in composition or MST. Weekly assignments in orchestration and timbral analysis, along with computer-based timbral analysis. Final project involving either computer-based analysis or an advanced orchestration assignment. See http://ccrma.stanford.edu/courses/255/.
1-4 units (J. Berger) not given 2005-06
MUSIC 319. Research Seminar on Computational Models of Sound Perception — All aspects of auditory perception, often with emphasis on computational models. Topics: music perception, signal processing, auditory models, pitch perception, speech, binaural hearing, auditory scene analysis, basic psychoacoustics, and neurophysiology. See http://ccrma.stanford.edu/courses/.

I-3 units, Aut, Win, Spr (Slaney)

3-4 units, Aut (J. Smith)

MUSIC 420. Signal Processing Methods in Musical Acoustics — Computational methods in musical sound synthesis and digital audio effects based on acoustic physical models. Topics: acoustic simulation with delay lines, digital filters, and nonlinear elements; comb filters; allpass filters; artificial reverberation; delay-line interpolation and sampling-rate conversion; phasing, flanging, and chorus effects; efficient computational models of strings, woodwinds, brasses, and other musical instruments. See http://ccrma.stanford.edu/courses/420/. Prerequisite: 320 or equivalent, PHYSICS 21 or equivalent course applying Newton’s laws of motion. Recommended: EE 264, PHY 113.

3-4 units, Win (J. Smith)

MUSIC 421. Audio Applications of the Fast Fourier Transform (FFT) — Spectrum analysis and signal processing using the FFT with emphasis on audio applications. Topics: Fourier theorems; FFT windows; spectrum analysis; spectrograms; sinusoidal modeling; spectral modeling synthesis; FFT convolution; FIR filter design and system identification; overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and resynthesis. See http://ccrma.stanford.edu/courses/421/. Prerequisites: 420 or consent of instructor.

3-4 units, Spr (J. Smith)

MUSIC 422. Perceptual Audio Coding — History and basic principles: development of psychoacoustics-based data-compression techniques; perceptual-audio-coder applications (radio, television, film, multimedia/internet audio, DVD, EMD). In-class demonstrations: state-of-the-art audio coder implementations (such as AC-3, MPEG) at varying data rates; programming simple coders. Topics: audio signals representation; quantization; bit rate to frequency mapping; introduction to psychoacoustics; bit allocation and basic building blocks of an audio codec; perceptual audio codes evaluation; overview of MPEG-1, 2, 4 audio coding and other coding standards (such as AC-3). Prerequisites: knowledge of digital audio principles, familiarity with C programming. Recommended: 320, EE 261. See web site.

3 units, Win (Bosi)

1-4 units, Aut, Win, Spr (J. Smith)

MUSIC 424. Signal Processing Techniques for Digital Audio Effects — Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of MUSIC 320 or EE 261; Matlab and modest C programming experience. Recommended: MUSIC 420 or EE 264; audio effects in mixing and mastering at the level of MUSIC 192.

3-4 units, Spr (Berners, Abel)

MUSIC 424. Signal Processing Techniques for Digital Audio Effects — Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of MUSIC 320 or EE 261; Matlab and modest C programming experience. Recommended: MUSIC 420 or EE 264; audio effects in mixing and mastering at the level of MUSIC 192.

3-4 units, Spr (Berners, Abel)

MUSIC 425. Audio Applications of the Fast Fourier Transform (FFT) — Spectrum analysis and signal processing using the FFT with emphasis on audio applications. Topics: Fourier theorems; FFT windows; spectrum analysis; spectrograms; sinusoidal modeling; spectral modeling synthesis; FFT convolution; FIR filter design and system identification; overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and resynthesis. See http://ccrma.stanford.edu/courses/421/. Prerequisites: 420 or consent of instructor.

3-4 units, Spr (J. Smith)

MUSIC 426. Perceptual Audio Coding — History and basic principles: development of psychoacoustics-based data-compression techniques; perceptual-audio-coder applications (radio, television, film, multimedia/internet audio, DVD, EMD). In-class demonstrations: state-of-the-art audio coder implementations (such as AC-3, MPEG) at varying data rates; programming simple coders. Topics: audio signals representation; quantization; bit rate to frequency mapping; introduction to psychoacoustics; bit allocation and basic building blocks of an audiocodec; perceptual audio codes evaluation; overview of MPEG-1, 2, 4 audio coding and other coding standards (such as AC-3). Prerequisites: knowledge of digital audio principles, familiarity with C programming. Recommended: 320, EE 261. See web site.

3 units, Win (Bosi)

1-4 units, Aut, Win, Spr (J. Smith)

MUSIC 428. Signal Processing Techniques for Digital Audio Effects — Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of MUSIC 320 or EE 261; Matlab and modest C programming experience. Recommended: MUSIC 420 or EE 264; audio effects in mixing and mastering at the level of MUSIC 192.

3-4 units, Spr (Berners, Abel)

MUSIC 521. Audio Applications of the Fast Fourier Transform (FFT) — Spectrum analysis and signal processing using the FFT with emphasis on audio applications. Topics: Fourier theorems; FFT windows; spectrum analysis; spectrograms; sinusoidal modeling; spectral modeling synthesis; FFT convolution; FIR filter design and system identification; overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and resynthesis. See http://ccrma.stanford.edu/courses/421/. Prerequisites: 420 or consent of instructor.

3-4 units, Spr (J. Smith)

MUSIC 522. Perceptual Audio Coding — History and basic principles: development of psychoacoustics-based data-compression techniques; perceptual-audio-coder applications (radio, television, film, multimedia/internet audio, DVD, EMD). In-class demonstrations: state-of-the-art audio coder implementations (such as AC-3, MPEG) at varying data rates; programming simple coders. Topics: audio signals representation; quantization; bit rate to frequency mapping; introduction to psychoacoustics; bit allocation and basic building blocks of an audio codec; perceptual audio codes evaluation; overview of MPEG-1, 2, 4 audio coding and other coding standards (such as AC-3). Prerequisites: knowledge of digital audio principles, familiarity with C programming. Recommended: 320, EE 261. See web site.

3 units, Win (Bosi)

1-4 units, Aut, Win, Spr (J. Smith)

MUSIC 524. Signal Processing Techniques for Digital Audio Effects — Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of MUSIC 320 or EE 261; Matlab and modest C programming experience. Recommended: MUSIC 420 or EE 264; audio effects in mixing and mastering at the level of MUSIC 192.

3-4 units, Spr (Berners, Abel)

MUSIC 625. Audio Applications of the Fast Fourier Transform (FFT) — Spectrum analysis and signal processing using the FFT with emphasis on audio applications. Topics: Fourier theorems; FFT windows; spectrum analysis; spectrograms; sinusoidal modeling; spectral modeling synthesis; FFT convolution; FIR filter design and system identification; overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and resynthesis. See http://ccrma.stanford.edu/courses/421/. Prerequisites: 420 or consent of instructor.

3-4 units, Spr (J. Smith)

MUSIC 626. Perceptual Audio Coding — History and basic principles: development of psychoacoustics-based data-compression techniques; perceptual-audio-coder applications (radio, television, film, multimedia/internet audio, DVD, EMD). In-class demonstrations: state-of-the-art audio coder implementations (such as AC-3, MPEG) at varying data rates; programming simple coders. Topics: audio signals representation; quantization; bit rate to frequency mapping; introduction to psychoacoustics; bit allocation and basic building blocks of an audio codec; perceptual audio codes evaluation; overview of MPEG-1, 2, 4 audio coding and other coding standards (such as AC-3). Prerequisites: knowledge of digital audio principles, familiarity with C programming. Recommended: 320, EE 261. See web site.

3 units, Win (Bosi)

1-4 units, Aut, Win, Spr (J. Smith)

MUSIC 628. Signal Processing Techniques for Digital Audio Effects — Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of MUSIC 320 or EE 261; Matlab and modest C programming experience. Recommended: MUSIC 420 or EE 264; audio effects in mixing and mastering at the level of MUSIC 192.

3-4 units, Spr (Berners, Abel)
MUSIC 173/273. Voice
1-3 units, Aut, Win, Spr (Giovannetti, Wait)

MUSIC 174/274. Stringed Instruments
MUSIC 174A/274A. Violin
1-3 units, Aut, Win, Spr (Kleyman, Harms, Nuttall, Shiffman)
MUSIC 174B/274B. Viola
1-3 units, Aut, Win, Spr (Kleyman, Robertson)
MUSIC 174C/274C. Violoncello
1-3 units, Aut, Win, Spr (S. Harrison, Costanza)
MUSIC 174D/274D. Contrabass
1-3 units, Aut, Win, Spr (Moyer)
MUSIC 174E/274E. Viola Da Gamba
1-3 units, Aut, Win, Spr (Dornenburg)
MUSIC 174F/274F. Classical Guitar
1-3 units, Aut, Win, Spr (Ferguson)
MUSIC 174G/274G. Harp
1-3 units, Aut, Win, Spr (Chauvel)
MUSIC 174H/274H. Baroque Violin
1-3 units, Aut, Win, Spr (Martin)
MUSIC 174I/274I. Early Plucked Strings
1-3 units, Aut, Win, Spr (Staff)
MUSIC 175/275. Woodwind Instruments
MUSIC 175A/275A. Flute
1-3 units, Aut, Win, Spr (Blaisdell, Hawley, Holmes-Schaefle, Maestre)
MUSIC 175B/275B. Oboe
1-3 units, Aut (Hubbard), Win, Spr (Matheson)
MUSIC 175C/275C. Clarinet
1-3 units, Aut, Win, Spr (Bell, Brandenburg)
MUSIC 175D/275D. Bassoon
1-3 units, Aut, Win, Spr (Olivier)
MUSIC 175E/275E. Recorder/Renaissance Wind Instruments
1-3 units, Aut, Win, Spr (Myers)
MUSIC 175F/275F. Saxophone
1-3 units, Aut, Win, Spr (Stein)
MUSIC 175G/275G. Baroque Flute
1-3 units, Aut, Win, Spr (Staff)
MUSIC 176/276. Brass Instruments
MUSIC 176A/276A. French Horn
1-3 units, Aut, Win, Spr (Ragent)
MUSIC 176B/276B. Trumpet
1-3 units, Aut, Win, Spr (Johnson-Hamilton)
MUSIC 176C/276C. Trombone
1-3 units, Aut, Win, Spr (Kenley)
MUSIC 176D/276D. Tuba
1-3 units, Aut, Win, Spr (Clements)
MUSIC 177/277. Percussion
1-3 units, Aut, Win, Spr (Veregge)

PERFORMANCE PRACTICES
MUSIC 126. Introduction to Thoroughbass — The development of continuous techniques and skills for figured-bass realization. Performance and analysis of selected repertoire, using thoroughbass principles and exercises based on historical theoretical treatises. Prerequisite: 21.
1-3 units, Win (T. Berger)

MUSIC 130. Elementary Conducting
MUSIC 130A. Introduction to Conducting — Baton techniques and rehearsal procedures. The development of coordination of the members of the body involved in conducting; fluency in beat patterns and meters; dynamics, tempi, cueing, and use of the left hand in conducting. Prerequisites: 121 and diagnostic musicianship exam given first day of class; preference to students who have completed 122B.
3 units (Staff) alternate years, given 2006-07

MUSIC 130B. Elementary Orchestral Conducting — Prerequisites: 127 or previous orchestral performance experience, 130A.
3 units (Cai) alternate years, given 2006-07

MUSIC 130C. Elementary Choral Conducting — Techniques specific to the conducting of choral ensembles: warm-ups, breathing, balance, blend, choral tone, isolation principles, recitative conducting, preparation, and conducting of choral/orchestral works. Prerequisite: 130A.
3 units (Sano) alternate years, given 2006-07

MUSIC 131. Intermediate Orchestral Conducting — Prerequisite: 130A, B, or C, or orchestral conducting experience.
3 units, Win (Cai)

MUSIC 169A/269A. Seminar in Performance Practices — Performance techniques, theoretical principles, aesthetics, and musical resources of various historical periods. GER.DB-Hum
4 units, Spr (T. Berger, Myers)

MUSIC 181. Solo Vocal Repertoire — Solo vocal repertoire for advanced vocal students. Song and operatic literature is studied and performed by class participants. Repertoire varies and/or spans more than one quarter, allowing students to repeat the course for credit.
1 unit, Aut, Win, Spr (Genensky)

MUSIC 182. Diction for Singers — The international phonetic alphabet and its application to German, French, and Italian vocal literature. Open also to pianists interested in vocal coaching and choral conducting.
1 unit, Win (Dahl)

MUSIC 183. Art Song Interpretation — For advanced singers and pianists as partners. Performance class in workshop setting. Prerequisite: consent of instructor. Recommended: 170 for pianists or 182 for singers.
MUSIC 183A. German Art Song Interpretation — Composers from Beethoven and Schubert to Wolf and Strauss.
1 unit, Spr (Dahl) alternate years, not given 2006-07
MUSIC 183B. French Art Song Interpretation — Composers include Fauré, Debussy, Ravel, and Poulenc.
1 unit (Dahl) alternate years, given 2006-07

MUSIC 184. Schumann Song Cycles — For advanced singers and pianists as partners. Focus is on Dichterliebe, and Frauenliebe und Leben. Performance class in workshop setting. Prerequisite: consent of instructor. Recommended: 170 or 182.
1 unit (Dahl) alternate years, given 2006-07

MUSIC 230. Advanced Orchestral Conducting — May be repeated for credit. Prerequisite: 130B.
2-4 units, Aut, Win, Spr (Cai)

MUSIC 231. Advanced Choral Conducting — May be repeated for credit. Prerequisite: 130C.
2-4 units, Aut, Win, Spr (Sano)

ENSEMBLE
An audition is required for admission to any University musical ensemble; audition schedules are posted during the registration period in Autumn Quarter. Audition is by appointment in Winter and Spring quarters: contact the ensemble director. Membership is open to all students including those who do not register for credit, although these courses may be repeated for credit. Many Department of Music ensembles tour on a regular basis, usually after commencement in June.

MUSIC 156. “sic”: Improvisation Collective — Small ensemble devoted to learning trans-idiomatic improvisation techniques and composing inde-terminate pieces in a workshop setting. One major concert. Prerequisite: access to an instrument. Improvisational experience and conventional instrumental virtuosity not required.
1 unit, Win (Staff)
MUSIC 157. Introduction to Mariachi Ensemble — Introduction to the practice of mariachi music, tradition, and history. Focus is on learning traditional sones, rancheras, huapangos, and boleros. Requirements: ability to play and access to instruments (violin, trumpet, guitar, vihuela, and guitarrón).

1 unit, Aut, Win, Spr (Lucero)

MUSIC 159. Early Music Singers — Small choir specializing in Medieval, Renaissance, and early Baroque vocal music. One major concert per quarter.

1 unit, Aut (Sargent), Win, Spr (Mahrt)

MUSIC 160. University Orchestra — 70- to 100-member ensemble performing major orchestral works; minimum one concert per quarter.

1 unit, Aut, Win, Spr (Cai)

MUSIC 161. University Bands

MUSIC 161A. Stanford Wind Ensemble — 40- to 50-member ensemble performing transcriptions of symphonic music, brass band music, and repertoire composed specifically for symphonic band. One concert per quarter.

1 unit, Aut, Win, Spr (Aquilanti)

MUSIC 161B. Jazz Orchestra — Big band format. Repertoire drawn primarily from the contemporary jazz-ensemble literature. One formal concert per quarter.

1 unit, Aut, Win, Spr (Berry)

MUSIC 161C. Red Vest Band — A small ensemble of the Leland Stanford Junior University Marching Band open to members of the LSJUMB by audition and consent of instructor. Members perform at all men’s and women’s home basketball games and travel to some away and post-season games. Twice-weekly rehearsals focus on introduction of new student arrangements and the LSJUMB’s repertoire of rock, funk, and traditional styles.

1 unit, Win (Aquilanti)

MUSIC 162. Symphonic Chorus — 100- to 150-voice ensemble, performing major choral masterworks with orchestra. One concert per quarter.

1 unit, Aut, Win, Spr (Sano)

MUSIC 163. Memorial Church Choir — Official choir of Memorial Church, furnishing music for Sunday services and special occasions in the church calendar.

2 units, Aut, Win, Spr (Wait)

MUSIC 165. Chamber Chorale — Select 24-voice chamber ensemble, specializing in virtuoso choral repertoire from all periods of Western art music.

1 unit, Aut, Win, Spr (Sano)

MUSIC 167. University Singers — Mixed-repertoire chorus, performing choral repertoire from all periods of Western art music and other world cultures.

1 unit, Aut, Win, Spr (Morgan)

MUSIC 169. Stanford Taiko — Select North American taiko ensemble, performing traditional and contemporary repertoire for Japanese drums. Multiple performances in Winter and Spring quarters, also touring; instrument construction and maintenance. Admission by audition in Autumn Quarter only.

1 unit, Aut, Win, Spr (Sano, Uyechi)

MUSIC 170. Collaborative Piano — Performance class in a workshop setting. Techniques of collaboration with vocalists and instrumentalists in repertoire ranging from songs and arias to sonatas and concertos. Prerequisite: private-lesson proficiency level in piano, or consent of instructor.

1 unit, Aut (Dahl)

MUSIC 171. Chamber Music — Small combinations for strings, winds, and keyboard instruments. Open to students at the private-lesson-proficiency level to hone ensemble skills, preferably while taking private lessons. Selected string instrument participants are invited to participate in a chamber orchestra, led by members of the St. Lawrence String Quartet, without conductor. Winter Quarter: chamber orchestra in conjunction with chamber chorale performing choral sacred music of the Baroque period, led by members of the St. Lawrence. All new and returning students are required to audition.

1 unit, Aut, Win, Spr (Staff)

UNDERGRADUATE DIRECTED READING AND RESEARCH

MUSIC 197. Undergraduate Teaching Apprenticeship — Work in an apprentice-like relationship with faculty teaching a student-initiated course. Prerequisite: consent of instructor.

1-2 units, Aut, Win, Spr (Staff)

MUSIC 198. Concentrations Project — For concentration program participants only. Must be taken in senior year.

4 units, Aut, Win, Spr (Staff)

MUSIC 199. Independent Study — For advanced undergraduates and graduate students who wish to do work outside the regular curriculum. Before registering, student must present specific project and enlist a faculty sponsor.

1-5 units, Aut, Win, Spr, Sum (Staff)

GRADUATE RESEARCH AND SPECIAL STUDIES

MUSIC 200. Graduate Proseminar — Required of first-year graduate students in music. Introduction to research in music, bibliographical materials, major issues in the field, philosophy, and methods in music history. Guest lecturers and individual research topics.

4 units, Aut (Hadlock, McBride)

MUSIC 269B. Research in Performance Practices — Directed reading and research.

1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 280. TA Training Course — Required for doctoral students serving as teaching assistants. Orientation to resources at Stanford, guest presentations on the principles of common teaching activities, supervised teaching experience. Students who entered in the Autumn should take 280 in the Spring prior to the Autumn they begin teaching.

1 unit, Spr (H. Lee)

MUSIC 300. Seminar in Notation — Western notation of the Middle Ages and Renaissance: principles, purposes, and transcription.

MUSIC 300A. Medieval Notation

4 units, Spr (Mahrt)

MUSIC 300B. Renaissance Notation

4 units (Staff) not given 2005-06

MUSIC 301A. Analysis of Music: Modal

4 units, Win (Mahrt)

MUSIC 301B. Analysis of Music: Tonal

4 units, Aut (J. Berger)

MUSIC 301C. Analysis of Music: Post-Tonal

4 units, Spr (Ferneyhough)

MUSIC 302. Research in Musicology — Directed reading and research.

1-5 units, Aut, Win, Spr, Sum (Staff)

1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 341. Ph.D Dissertation

1-9 units, Aut, Win, Spr, Sum (Staff)

MUSIC 399. D.M.A. Final Project

1-9 units, Aut, Win, Spr, Sum (Staff)
OVERSEAS STUDIES PROGRAM

Program Director: Norman Naimark
Stanford Program in Australia
Director, Centre for Marine Studies, University of Queensland: Ove Hoegh-Guldberg
Faculty: Kevin Arrigo, Tony Chifflings, Sophie Dove, Norman Duke, Maoz Fine, Ron Johnston, Michael Pole, Roger Shore, Selina Ward
Stanford Program in Beijing
Director: Jason D. Patent
Faculty: Mark E. Lewis, Wenjun Li, Dingcheng Ren, Xiaochun Sun, John C. Y. Wang, Daqing Zhang, Pei Zhang, Qi Zhang, Dunhua Zhao
Stanford Program in Berlin
Director: Karen Kramer
Stanford Program in Florence
Director: Ermelinda Campani
Faculty: Khaled Fouad Allam, Gerhard Casper, Regina Casper, Antonio Cassese, Pamela Grossman, Charles Lomerve, Giuseppe Mammarella, Leonardo Morlino, Stefano Pallanti, Fiorenza Quercioli, Filippo Rossi, Timothy Verdon, Pan Yotopoulos
Stanford Center for Technology and Innovation (SCTI)—Kyoto
Kyoto Center for Japanese Studies (KCJS)
Director: Terry MacDougall
Faculty: Monica Bethe, Toshiko Fujiwara, Toshikiko Hayashi, Takashi Hikino, Rebecca Jennison, Bettina Langer-Teramoto, Catherine Ludvik, Junko Minamoto, Shigemi Nakagawa, Leslie Pincus, Clyde Tatum, Haruka Ueda, Mariko Uemiyi, Chihiro Yamaoka, Emiko Yasumoto
Stanford Program in Moscow
Program Manager: Alexander Abashkin
Faculty: Vladimir Mau, Andrei Melville, Richard Schupbach, Dmitri Trenin
Stanford Program in Oxford
Director: Geoffrey Tyack
Faculty: Sarah Billington, Paddy Bullard, Giovanni Capoccia, Helena Chance, John Darwin, Rona Giffard, Beatrice Groves, Helen Kidd, Robert McMahon, Amanda Palmer, Emma Plaskitt, Derek Robinson, John Senior, Bart van Es, Thomas Wasow
Stanford Program in Paris
Director: Estelle Halevi
Faculty: Cécile Alduy, Viviane Azarian, Jean-Marie Apostolidès, Colette Deremble, Jean Paul Deremble, Benjamin Dupas, Jean-Marie Fessler, Marc Germanangue, Patrick Guedon, Jacques Le Cacheux, Fabienne Maitre, Sophie Maurer, Nonna Mayer, Florence Mercier, Marie-Madeleine Mervant-Roux, Elizabeth Molkou, Anne Muxel, Dominique Remy-Granger, Pauline Reychman, Marie-Christine Ricci, Ramón Saldivar
Stanford Program in Santiago
Director: Edmundo Fuenzalida (through 2005); Iván Jaksic (beginning in 2006)
Faculty: Germán Correa, Armando DiFilippo, Claudio Fuentes, Rosanna Ginocchio, María Paz Haro, Sergio Micco, Rosanna Ginocchio, Oscar Muñoz, Veronica Poblete, Hernán Pons, Jorge Ruffinelli, Robert Siegel, Bernardo Subercaseaux, Teresa Valdés
Program Offices: First Floor, Sweet Hall
Mail Code: 94305-3089
Phone: (650) 723-3558
Email: study@osp.stanford.edu
Web Site: http://osp.stanford.edu

Courses given in Overseas Studies Program have subject codes beginning with OSP. For a complete list of subject codes, see Appendix.

Stanford University encourages students to explore the opportunities of study abroad through regular programs in Australia, Beijing, Berlin, Florence, Kyoto, Moscow, Oxford, Paris, and Santiago. Students may enroll for one or more quarters at most centers. Course offerings in engineering, humanities, sciences, and social sciences provide full Stanford credit. Many courses also count toward major requirements and/or fulfill General Education Requirements. Academic or paid internships are available at the Berlin, Florence, Kyoto-SCTI, Paris, and Santiago programs. Research opportunities are available in various formats at different centers. Minimum academic and language prerequisites are specific to each program. See http://osp.stanford.edu for information on these requirements.

While studying overseas through OSP, students remain registered at Stanford and pay regular tuition, along with the Overseas Studies fee which is based on Stanford room and board rates. Regular financial aid applies, and may be increased to cover additional costs. At most centers, students live in a homestay or with local students.

Overseas Studies also offers a limited number of special programs including, in 2005-06, nine three-week faculty-led seminars at overseas locations and a quarter-long program in Cape Town, South Africa.

Overseas Studies, located on the first floor of Sweet Hall, has full-time staff members and student advisers to assist in planning for overseas study. The following information, while accurate at the time of printing, is subject to change. See http://osp.stanford.edu/ for updated information.

COURSES

(AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

International Relations has approved a number of Overseas Studies courses for major credit; these are listed in the “International Relations” section of this bulletin.

AUSTRALIA

OSPAUSTL 10. Coral Reef Ecosystems—(Enroll in BIOSCI 109Z, EARTSYS 120X, HUMBIO 61X.) Key organisms and processes, and the complexity of coral reef ecosystems. Students explore the Great Barrier Reef from the southern end which demonstrates the physical factors that limit coral reefs, to the northern reef systems which demonstrate key aspects of these high biodiversity ecosystems. Human-related changes. Emphasis is on research experiences and development of analytical skills. Two units only counted for Biological Sciences major. GER:DB-EngrAppSci
3 units, Win (Arrigo, Dove, Hoegh-Guldberg)

OSPAUSTL 20. Coastal Resource Management—(Enroll in BIOSCI 110Z, EARTSYS 121X, HUMBIO 62X.) Problem solving, research, communication, teamwork, and social assessment skills in sustainable coastal zone management. Issues include: ecosystem functions and values at risk under the proposed development in case study; environmental outcomes most desirable for the local stakeholders and how those are defined; features of the human communities and their function as they relate to the management options; tools or mechanisms for a sustainable management outcome. Taught by multidisciplinary team that includes Australian and developing country experts. Two units only counted for Biological Sciences major. GER:DB-EngrAppSci
3 units, Win (Johnstone)

SCHOOL OF HUMANITIES AND SCIENCES
techniques, pollution and eutrophication, and environmental control of marine plant distribution and productivity. Two units only counted for Biological Sciences major. GER:DB-EngrAppSci
3 units, Win (Duke, Pole)

OSPBEIJ 40. Australian Studies — Introduction to Australian society, history, culture, politics, and identity. Field trips. Two sections: one draws on social science framework and methodology; the other on literature, visual art, and popular culture.
3 units, Win (Staff)

OSPBEIJ 50. Targeted Research Project — Prior to arriving in Australia, students establish a link with University of Queensland faculty to develop project ideas that combine personal interests and career goals with opportunities presented by the Australian Coastal Studies program, such as how mangrove roots find sediment rich zones of the shore, or the dynamics of ecotourism in southern and northern coastal Queensland. Project report and presentation in Australia.
4 units, Win (Hoegh-Guldberg)

BEIJING

OSPBEIJ 12. Environmental Challenges in China’s Development — (Enroll in EARTHSYS 105X.) Pressures on China’s environment and natural resources resulting from its transition from a planned economy to a market economy. Social, economic, and environmental issues; health effects of environmental pollution; limitations on resources for development. Social responses to environmental challenges; and strategies for sustainable development. GER:DB-SocSci
4 units, Aut (Li)

5 units, Aut, Spr (Q. Zhang)

OSPBEIJ 16. Philosophy and Religion, East and West — (Enroll in RELIGST 19B.) Sacred, secular, intellectual, practical, indigenous, and introduced elements in Chinese culture. Chinese religion, ethics, and philosophy through comparisons with Western counterparts: Confucianism, Taoism, and Zen Buddhism; Greek philosophy, Christianity, and modernity. Comparisons include: cosmology and moral metaphysics; human nature and original sin; Confucian humanity and Christian love; individualism and collectivism; shame culture and guilt culture; and Asian values and modernization. GER:DB-Hum
4 units, Aut (Zhao)

OSPBEIJ 17. Doing Business in China: Local Careers and Expanding with International Business — Career options involving China. Invited speakers talk about their work experiences in China. This year’s focus is on entrepreneurship, business, and information technology.
1 unit, Aut, Spr (Koontz)

OSPBEIJ 18. Chinese Literature in Translation — Focus is on classical literature. Literary history of Chinese culture, most important authors, characteristics of the Chinese literary tradition. Comparative method applied to universal literary phenomena such as motif and genre. Recommended: ability to read Chinese. GER:DB-Hum
4 units, Spr (P. Zhang)

4 units, Spr (Ren)

OSPBEIJ 22. Language, Culture, and Meaning: Understanding Human Cognition in a Crosscultural Context — (Enroll in LINGUIST 165.) Introduction to cognitive linguistics including conceptual metaphor, metonymy, image schemas, frame semantics, and mental spaces. Theorists and empirical investigations. Using Beijing as an example, how cognition and culture interact, how all human beings are cultural, and how culture and language influence behaviors and expectations. GER:DB-SocSci
4 units, Aut, Spr (Patent)

4 units, Aut (Wang)

OSPBEIJ 27. The City in Imperial China — (Enroll in HISTORY 191V.) Physical and social aspects of cities in China, and their evolution. Topics include city walls, streets and markets, gardens, temples, pleasure quarters, policing, and the unique nature of the imperial capital. Early versus late imperial China. Beijing as the last imperial capital. Primary and secondary sources in translation. Field trips. GER:DB-Hum, EC-GlobalCom
5 units, Spr (Lewis)

CHINESE LANGUAGE PROGRAM

OSPBEIJ 2,3. Second-Year Modern Chinese — (Enroll in CHINLANG 21C,23C.)
5 units, 2: Aut, 3: Spr (Staff)

OSPBEIJ 4,5. Third-Year Modern Chinese — (Enroll in CHINLANG 101C,103C.)
5 units, 4: Aut, 5: Spr (Staff)

OSPBEIJ 6. Advanced Modern Chinese — (Enroll in CHINLANG 211C.)
5 units, Aut (Staff)

OSPBEIJ 8. First-Year Modern Chinese — (Enroll in CHINLANG 3C.)
5 units, Spr (Staff)

OSPBEIJ 9. Chinese Language Tutorial
2 units, Spr (Staff)

BERLIN

OSPBER 10. Inventing the Modern City: Berlin in the Twenties and the Nineties — (Enroll in URBANST 155V.) Berlin’s reinvention in the 20s as a modern city and site for new art, radical politics, and a modern urban lifestyle; and in the 90s as national and international capital within a transforming Europe. Art movements that shaped the urban Weimar scene compared to projects in the new Berlin. Students create multimedia presentations. GER:DB-SocSci
4 units, Spr (Friedlander)

OSPBER 11. Jewish Berlin: The Metropolis in the Imagination of a Minority — (Enroll in RELIGST 21F.) History of Jewish life in Berlin from the 19th century to WW II. Focus is on moments of literary and cultural creativity: Jewish Enlightenment at beginning of 19th century and role of Jewish women; protest against bourgeois German-Jewish culture at beginning of 20th century; literary, artistic and political productivity of the interwar years. Relationship between German and Jewish cultures. Revival of Jewish life in current city life. GER:DB-Hum
4 units, Aut (Fonrobert)
OSPBER 12. The Politics of Memory — (Enroll in RELIGST 22F.) Politics of memorializing WW II focusing on Berlin. How the memory of WW II and its representation became constitutive to the self-consciousness of democratic culture in Germany. What constitutes the nature of collective memory; who has the authority to represent the war; the function of the memorial in public consciousness; and limits of representation of terror or genocide. Theoretical literature on politics of memory. Field trips to memorials. GER:DB-SocSci
3 units, Aut (Fonrobert)

OSPBER 14. Exploration in Crosscultural Theater — (Enroll in DRAMA 153F.) Two classic plays, German and American, from cross-cultural perspectives. Stanford and German students studying American culture at the Free University share linguistic and social expertise. Two weekend meetings; scene work; dramatic exploration. No theatrical experience required.
3 units, Spr (Friedlander)

5 units, Win (Brückner)

4-5 units, Win (Kramer)

OSPBER 19. Mechanical Engineering Design — (Enroll in ME 112X.) Transmission of motion or power with devices incorporating mechanisms such as gears, linkages, and cams. System-level objectives involving power transmission, efficiency, and prescribed motion; design goals include reliability, strength, and ease of fabrication. Focus is on representative component types with information applicable to other elements. Brainstorming, benchmarking, prototyping, and testing. GER: DB-EngrAppSci
4 units, Win (Gerdes)

OSPBER 20. Why Do We Drive What We Drive? — (Enroll in ME 114X.) Cars as a metaphor for cultural differences. With technological resources similar for most countries, design and engineering choices reflect social, political, legal, and historical factors. Insights into the values held by cultures through vehicle design. Focus is on the U.S. and Germany.
3 units, Win (Gerdes)

OSPBER 30. Berlin vor Ort: A Field Trip Module — The cultures of Berlin as preserved in museums, monuments, and architecture. Berlin’s cityscape as a narrative of its history from baroque palaces to vestiges of E. German communism, from 19th-century industrialism to grim edifices of the Sachsenhausen concentration camp. Competing political agendas and the criteria of historical selection in monument-alteration and removal, renaming streets, and structuring the capital city. Focus is on the interface between sociopolitical life and artistic expression. In German. (AU)
1 unit, Aut, Win, Spr (Neckenig)

OSPBER 37. Web Projects — Plan and develop a multimedia web project based on academic work associated with a concurrent course. Prerequisite: knowledge of web design or preparation on home campus.
1 unit, Aut, Win, Spr (Kramer)

OSPBER 38. Research Module — For continuing students. Research under the guidance of a local specialist in libraries, archives, research institutes, and/or in the field. Prerequisite: GERGEN 177A.
3-4 units, Win, Spr (Kramer)

OSPBER 64. Film and Writing — (Enroll in ARTHIST 162Y.) German culture through film. Sensitivity for film structure through creative writing tutorials and screening workshops. Composition and narrative structure (storyline, suspense, character development). Screen-writing exercises.
3-4 units, Spr (Maerker)

OSPBER 66. Theory from the Bleachers: Reading German Sports and Culture — (Enroll in SOC 158S.) German culture past and present through the lens of sports. Intellectual, societal, and historical-political contexts. Comparisons to Britain, France, and the U.S. The concepts of Körperkultur, Leistung, Show, Verein, and Haltung. Fair play, the relation of team and individual, production and deconstruction of sports heroes and heroines, and sports nationalism. Sources include sports narrations and images, attendance at sports events, and English and German texts.
3 units, Win (Junghans)

OSPBER 93. Globalization: International Challenges, Regional Responses — (Enroll in POLISCI 110P.) The rigid system of the Cold War was replaced by the flexible, almost anarchic system of globalization. Post-cold war political and economical upheaval triggered large migrations. In the age of multinational corporations, many predict the end of the national state in the context of a single superpower without adequately powerful, independent, and compensating institutions. Negative consequences of the dynamic process of globalization are often accredited to the superpower. GER:DB-SocSci
4-5 units, Spr (Tempel)

OSPBER 101A. Contemporary Theater — (Enroll in GERLIT 195, DRAMA 101A.) Texts of plays are supplemented by the theoretical writings of the respective playwrights and background reading in theater history and theory. Weekly theater trips, a tour of backstage facilities, attendance at a rehearsal, and discussions with actors, directors, or other theater professionals. In German. GER:DB-Hum
5 units, Spr (Kramer)

OSPBER 105V. Industry, Technology, and Culture, 1780-1945 — (Enroll in HISTORY 105V, STS 120V.) From the steam engine to the modern factory, the engineer emerges as the hero of the innovative and the new in the modern world. The dialectical relationships among material, intellectual, and social culture using the example of modern materials, transport, and communications systems, the micro- and macrocosms discovered in physics, chemistry, and astronomy, and the revolutionizing influence of photography, film, and TV. GER:DB-Hum
4 units, Win (Neckenig)

4 units, Spr (Neckenig)

OSPBER 115X. The German Economy: Past and Present — (Enroll in ECON 115X, POLISCI 111P.) The history of the German economy in: the Wilhelmine Empire, the Weimar Republic, the Third Reich, the postwar real socialism of the GDR, and the free market economy of the FRG. The processes of economic transition since unification and the current challenges faced by united Germany as Europe’s first economic power and the world’s second largest export nation. GER:DB-SocSci
4-5 units, Aut (Klein)

OSPBER 117V. The Industrial Revolution and its Impact on Art, Architecture, and Theory — (Enroll in STS 117V, ARTHIST 141Y.) The interlinking of architecture and painting with technological and scientific development. In a period of industrial revolution, the dominance of positivist thinking and empirical methods promotes in the cultural and artistic realm a response of euphoric acceptance or emphatic rejection. Artwork as a social, cultural, and spiritual symbol is a response to scientific and
technological development, yet claims timeless validity. Topics: frictions between idealism and realism, photography and painting, historicism and functionalism, expression and dadaism, futurism and new sobriety, functionalism and Nazi classicism. GER:DB-Hum
5 units, Aut (Neckenig)

4-5 units, Aut (Brückner)

OSPBER 161X. The German Economy in the Age of Globalization — (Enroll in ECON 161X) Germany’s role in the world economy: trade, international financial markets, position within the European Union; economic relations with Eastern Europe, Russia, the Third World, and the U.S. International aspects of the economic and environmental policies of the Red-Green Coalition Government. The globalization of the world’s economy and Germany’s competitiveness as a location for production, services, and R&D, focusing on the German car industry. GER:DB-SocSci
4-5 units, Win (Klein)

OSPBER 174. Sports, Culture, and Gender in Comparative Perspective — (Enroll in GERGEN 174) Theory and history of mass spectator sports and their role in modern societies. Comparisons with U.S., Britain, and France; the peculiarities of sports in German culture. Body and competition cultures, with emphasis on the entry of women into sports, the modification of body ideals, and the formation and negotiation of gender identities in and through sports. The relationship between sports and politics, including the 1936 Berlin Olympic Games. GER:DB-SocSci, EC-Gender
5 units, Spr (Junghanns)

OSPBER 177A. Culture and Politics in Modern Germany — (Enroll in GERGEN 177A) Key paradigms of modern Germany: German romanticism, the belated state and national identity, National Socialism and the Holocaust, Germany divided and unified. Literary, analytical, and theoretical texts; newspaper articles; film and TV; oral history. GER:DB-SocSci, EC-Gender
4-5 units, Aut (Kramer)

GERMAN LANGUAGE PROGRAM

OSPFLOR 1Z. Accelerated German: First and Second Quarters — (Enroll in GERLANG 1Z) A jump start to the German language, enabling students with no prior German to study at the Berlin Center. Covers GERLANG 1 and 2 in one quarter.
8 units, Aut (Siegt, Wohlfeil), Win (Urlaub, Wohlfeil)

OSPBER 3B. German Language and Culture — (Enroll in GERLANG 3B) Grammar, composition, and conversation. Increases fluency in German as rapidly as possible to help students take advantage of the many opportunities in Berlin. Corequisite: GERLANG 100B.
5 units, Aut, Win, Spr (Biege)

OSPBER 22B. Berliner Geschichte(n): Second-Year German — (Enroll in GERLANG 22B) Readings in history, literature, politics, and economics.
5 units, Aut, Win, Spr (Friesel-Kopecki)

OSPBER 100B. Aktives Deutsch — (Enroll in GERLANG 100B) Required for students enrolled in GERLANG 3B; open to students in other German language classes. Active use of German, including vocabulary from a variety of fields and disciplines, and discussion of current issues.
2 units, Aut, Win, Spr (Keller)

ON VIDEOTAPE
See the “School of Engineering” section of this bulletin for course descriptions.

OSPFLOR 40B. Introductory Electronics — (Enroll in ENGR 40B) GER:DB-EngrAppSci
5 units, Aut, Win, Spr (Khuri-Yakub)

4 units, Aut, Win (Staff)

FLORENCE

OSPFLOR 41. The Contemporary Art Scene in Tuscany: Theory and Practice — (Enroll in ARTSTUDI 147Y) The ever-changing and multifaceted scene of contemporary art through visual and sensorial stimulation. How art is thought of and produced in Italy today. Hands-on experience. Sketching and exercises on-site at museums and exhibits, plus workshops on techniques. GER:DB-Hum
3-5 units, Aut (Rossi)

OSPFLOR 42. Academic Internship — Mentored internships in banking, education, the fine arts, health, media, not-for-profit organizations, publishing, and retail. May be repeated for credit.
1-5 units, Win, Spr (Campani)

4 units, Spr (R. Casper)

OSPFLOR 44. Medicine and Art in the Renaissance — (Enroll in HPS 44V) Relationships among medicine, illness, and art in the Italian Renaissance. Greek and Roman medicine; writings of Arab physicians such as Ibn Sina. The establishment of medicine as a discipline at 12th-century universities in Salerno, Bologna, Padua, and Paris. The Black Death; etiology; social and economic impact on government, community, and church; and associated changes in Sienese and Florentine art. How anatomical knowledge was used in expressing emotions such as strength, courage, pain, or sacrifice; how it shaped the works of Donatello, da Vinci, Michelangelo, and Sanzio. GER:DB-Hum
4 units, Win (R. Casper)

OSPFLOR 45. Qualities of Democracy in the Nation State — Theoretical issues with respect to the quality of democracy: electoral arrangements, responsiveness, accountability, rule of law, and the substance of freedom and equality. Tools of subversion: how political elites develop different ways to avoid responsibility in actual everyday political activities. The democracy deficit of the EU: the institutions and practices of EU governance and the constitutional treaty. Case studies. Stanford students join Italian students from the Istituto Italiano di Scienze Umane. GER:DB-SocSci
5 units, Win (G. Casper, Morlino)

OSPFLOR 46. Doing School: A Comparative Study of American and European High Schools — (Enroll in EDUC 91Z) Comparison of how American and European high schools are organized and the consequences for student academic and social experience. Readings on high school include Pope’s Doing School, sections of Ball’s work on Beachside Comprehensive, and Sizer’s study of high school. Field trips to high schools to interview students. GER:DB-SocSci
3 units, Aut (Grossman)
OSPFLOR 47. Learning to Learn: Italian Theories of Early Childhood Education—(Enroll in EDUC 90Z.) The influence of the Reggio Emilia schools and the works of Maria Montessori. Field trips to local preschools. How these approaches have been taken up in America, and how they have been shaped by the American context. GER:DB-SocSci 3 units, Aut (Grossman)

OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition—(Enroll in ARTSTUDI 113Y.) The city’s art and theories of how art should be presented. The history and typology of world-class collections. Social, economic, political, and aesthetic issues in museum planning and management. Collections include the Medici, English and American collectors of the Victorian era, and modern corporate and public patrons. GER:DB-Hum 4 units, Win (Rossi, Verdon)

OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema—(Enroll in ITAL-GEN 191F, ARTHIST 160Y, HISTORY 235V, COMM 53.) Structural and ideological attributes of narrative cinema, and theories of visual and cinematic representation. How film directors have translated history into stories, and war journals into visual images. Topics: the role of fascism in the development of Italian cinema and its phenomenology in film texts; cinema as a way of producing and reproducing constructions of history; film narratives as fictive metaphors of Italian cultural identity; film image, ideology, and politics of style. GER:DB-Hum 5 units, Win (Campani)

OSPFLOR 52. The Euro, the Dollar, and the Developing Countries in a World of Globalization—(Enroll in ECON 126X.) Operation of exchange networks that link countries and deliver outcomes, positive or negative. Free-market, free-trade, laissez-faire framework: the case of globalization with the dollar as the main instrument of financial intermediation; and the case of the EU or regionalization with the euro as the main instrument. Operational approach to the economic outcomes of these forms of globalization. GER:DB-SocSci, EC-GlobalCom 4 units, Spr (Totopoulou)

OSPFLOR 54. High Renaissance and Maniera—(Enroll in ITALGEN 150F, ARTHIST 112Y.) The development of 15th- and early 16th-century art in Florence and Rome. Epochal changes in the art of Michelangelo and Raphael in the service of Pope Julius II. The impact of Roman High Renaissance art on masters such as Fra’ Bartolomeo and Andrea del Sarto. The tragic circumstances surrounding the early manners: Pontormo and Rosso Fiorentino and the transformation of early Mannerism into the elegant style of the Medicean court. Contemporary developments in Venice. GER:DB-Hum 5 units, Spr (Verdon)

OSPFLOR 55. Academy of Fine Arts: Studio Art—(Enroll in ARTSTUDI 198F.) Courses through the Accademia delle Belle Arti. Course details upon arrival. Minimum Autumn and Winter Quarter enrollment required: 1-3 units in Autumn. May be repeated for credit. 1-5 units, Aut, Win, Spr (Staff)

OSPFLOR 65. Qualities of Democracy in a Supranational Perspective—Theoretical issues with respect to the quality of democracy: electoral arrangements, responsiveness, accountability, rule of law, and the substance of freedom and equality. Tools of subversion: how political elites develop different ways to avoid responsibility in actual everyday political activities. The democracy deficit of the EU: the institutions and practices of EU governance and the constitutional treaty. Case studies. Stanford students join Italian students from the Istituto Italiano di Scienze Umane. GER:DB-SocSci 5 units, Spr (G. Casper, Morlino)

OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality, and the Image—(Enroll in ITALGEN 135F, FEMST 135F.) Film in the social construction of gender through the representation of the feminine, the female, and women. Female subjects, gaze, and identity through a historical, technical, and narrative frame. Emphasis is on gender, identity, and sexuality with references to feminist film theory from the early 70s to current methodologies based on semiotics, psychoanalysis, and cultural studies. Advantages and limitations of methods for textual analysis and the theories which inform them. Primarily in Italian. GER:DB-Hum, EC-Gender 4 units, Win (Cassese)

OSPFLOR 71. Becoming an Artist in Florence: Contemporary Art in Tuscany and New Tendencies in the Visual Future—(Enroll in ARTSTUDI 141Y.) Recent trends in art, current Italian artistic production, differences and the dialogue among visual arts. Events, schools, and movements of the 20th century. Theoretical background and practical training in various media. Work at the Stanford Center and on-site at museums, exhibits, and out in the city armed with a sketchbook and camera. Emphasis is on the importance of drawing as the key to the visual arts. Three workshops enable students to master the techniques introduced. GER:DB-Hum 3-5 units, Spr (Rossi)

OSPFLOR 75. Contributions to Art, Culture, and Society in Tuscany—(Enroll in ITALGEN 130F, ITALRO 132Y.) The role of art and culture in the history of Tuscany, including the city’s influence on the arts, as well as in the development of scientific, medical, and cultural institutions. GER:DB-Hum, EC-GlobalCom 4 units, Spr (Cassese)

OSPFLOR 76. In Italy: Contemporary Art—(Enroll in ITALGEN 136F) Recent trends in art, current Italian artistic production, differences and the dialogue among visual arts. Events, schools, and movements of the 20th century. Theoretical background and practical training in various media. Work at the Stanford Center and on-site at museums, exhibits, and out in the city armed with a sketchbook and camera. Emphasis is on the importance of drawing as the key to the visual arts. Three workshops enable students to master the techniques introduced. GER:DB-Hum 3-5 units, Spr (Rossi)

OSPFLOR 79. Migrations and Migrants: The Sociology of a New Phenomenon—(Enroll in SOC 114S.) Interdisciplinary approach to the study of immigration. Typology of forms of migration through politics put into action by the EU and within single nations. Related cultural and religious questions which elicit symbolic borders, territorialization of cultural identities, and the often spatial differentiation of immigrants and locals. The politics of integration and the instruments necessary to manage it. GER:DB-SocSci, EC-GlobalCom 5 units, Spr (Allam)

OSPFLOR 81. In the Footsteps of Freud in Florence—(Enroll in HPS 104Y.) Freud’s encounter with Florence, and its lasting effects on his writings, theories, and psychoanalysis. Reconstruction through documentary materials of his concrete and symbolic Florentine itinerary, including the staircase to Mons Florentinus, the walls of San Miniato a Monte, and the Torre del Gallo. GER:DB-SocSci 4 units, Aut (Pallanti)

OSPFLOR 94. Photography in Florence—(Enroll in ARTSTUDI 70Y.) Introduction to the functioning of the camera, exposure, and b/w film processing and printing. Emphasis is on perceptive imagery and the development of technical proficiency. 35mm camera required. Limited enrollment. 4 units, Win (Loverme)

OSPFLOR 106V. Italy: from an Agrarian to a Post-industrial Society—(Enroll in HISTORY 106V, POLISCI 145P.) Italian history from the Risorgimento to the present. Italian society, crises, evolution, values, and the relation to the political institutions existing in different periods. The ideologies, political doctrines, and historical events which contributed to the formation of modern Italy’s predominant subcultures, Catholic and Socialist. In Italian. GER:DB-SocSci
4 units, Aut (Mammarella)

OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence—(Enroll in ARTHIST 111Y.) Lectures, site visits, and readings reconstruct the circumstances that favored the flowering of architecture, sculpture, and painting in Florence and Italy, late 13th to early 16th century. Emphasis is on the classical roots; the particular relationship with nature; the commitment to human expressiveness; and rootedness in the real-world experience, translated in sculpture and painting as powerful plasticity, perspective space, and interest in movement and emotion. GER:DB-Hum
4 units, Win (Verdon)

4 units, Aut (Campani)

ITALIAN LANGUAGE PROGRAM

OSPFLOR 35. Second-Year Italian, First Quarter—(Enroll in ITALLANG 21F.) Review of grammatical structures; grammar in its communicative context. Listening, speaking, reading, and writing skills practiced and developed through authentic material such as songs, newspaper articles, video clips, and literature. Insight into the Italian culture and crosscultural understanding.
4 units, Aut, Win, Spr (Quercioli)

OSPFLOR 37. Second-Year Italian, Second Quarter—(Enroll in ITALLANG 22F.) Grammatical structures, listening, reading, writing, speaking skills, and insight into the Italian culture through authentic materials. Intermediate to advanced grammar. Content-based course, using songs, video, and literature, to provide cultural background for academic courses.
4 units, Win (Quercioli)

OSPFLOR 66. Advanced Italian Conversation—(Enroll in ITALLANG 31F.) Refine language skills and develop insight into Italian culture using authentic materials. Group work and individual meetings with instructor.
4 units, Aut, Win, Spr (Quercioli)

ON VIDEOTAPE
See the “School of Engineering” section of this bulletin for course descriptions.

4 units, Aut (Staff)
OSMOSC 215X. The Political Economy of Japan—(Enroll in POLISCI 240P.) Institutions and processes in the political organization of economic activity in modern Japan. The interaction of public and private sector institutions in the growth of Japan’s postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, government interaction, and public policy making. The transformation of Japanese industrial policy from the rapid growth of heavy and chemical industries to the promotion of high technology and communications industries. The international, political, and economic ramifications of the structure and importance of Japanese capitalism. GER:DB-SocSci
5 units, Aut (Mau)

JAPANESE LANGUAGE PROGRAM

OSMOSC 9K. First-Year Japanese Language, Culture, and Communication B—(Enroll in JAPANLNG 9K.)
5 units, Spr (Yasamato)

OSMOSC 19K. Second-Year Japanese Language, Culture, and Communication B—(Enroll in JAPANLNG 19K.)
5 units, Spr (Yamaoka)

OSMOSC 103K. Upper Advanced Japanese—(Enroll in JAPANLNG 211K.)
5 units, Spr (Uemiya)

OSMOSC 129K. Third-Year Japanese Language, Culture, and Communication B—(Enroll in JAPANLNG 129K.)
5 units, Spr (Fujitani)

ON VIDEOTAPE

See the “School of Engineering” section of this bulletin for course descriptions.

OSMOSC 40K. Introductory Electronics—(Enroll in ENGR 40K.)
GER:DB-EngrAppSci
5 units, Spr (Khuri-Yakub)

MOSCOW

OSMOSC 60. Russian Politics and Institutions in a Comparative Perspective—(Enroll in POLISCI 118P.) Historical developments from early periods through the Soviet era. Evolution of the political regime in Russia from Yeltsin to Putin; transformation of political institutions and processes, political culture, and public attitudes. GER:DB-SocSci
5 units, Aut (Melville)

OSMOSC 61. Problems and Prospects of Post-Soviet Eurasia—(Enroll in POLISCI 143P.) Processes shaping the former Soviet Union or the Commonwealth of Independent States, including Russia and the newly independent states of Eastern Europe, the South Caucasus, and Central Asia. Economic and political models since the break-up of the USSR. Changing geopolitics of post-Soviet Eurasia: political regimes, economic development, security, energy relationships, post-Soviet societies, religion, and globalization. GER:DB-SocSci
5 units, Aut (Trenin)

5 units, Aut (Mau)

OSMOSC 64. The Master and Margarita and its Moscow Setting—(Enroll in SLAVGEN 112.) Historical background. The language of the narrator and the more Gogolian aspects of Bulgakov’s writing. Field trips to locations important in the novel and Bulgakov’s life including Patriarchs’ Ponds, Bulgakov’s apartment, and the statue of Gogol. GER:DB-Hum
3-4 units, Aut (Schupbach)

RUSSIAN LANGUAGE PROGRAM

OSMOSC 10M. Intensive First-Year Russians—(Enroll in SLAVLANG 10M.)
9 units, Aut (Kurganoza)

OSMOSC 51M. Second-Year Russian—(Enroll in SLAVLANG 51M.)
5 units, Aut (Boldyreva)

OSMOSC 111M. Third-Year Russian—(Enroll in SLAVLANG 111M.)
5 units, Aut (Staff)

OXFORD

OSPOXFRD 24. British and American Constitutional Systems in Comparative Perspective—(Enroll in POLISCI 244P.) Introduction to the study of constitutions and constitutional systems of government. Analysis of the detailed workings of the British and American systems of government. Comparative study of the most important constitutional issues facing Britain and the United States such as how suspected terrorists should be treated in a time of war. How we think about fundamental constitutional questions. GER:DB-SocSci
5 units, Spr (McMahon)

OSPOXFRD 35. Modern UK and European Government and Politics—(Enroll in POLISCI 141P.) Background of main political systems in Europe and recent developments in European politics. Topics: Blair’s constitutional reforms; the consequences of the German reunification; Berlusconi’s rise to power in Italy; the extreme right in France and elsewhere; the single currency; the enlargement of the EU; and proposals for a constitution and their recent rejection by the French and Dutch electorates. GER:DB-SocSci
4 units, Aut (Capoccia)

OSPOXFRD 42. Comparative Health Care Systems: UK and U.S.—(Enroll in HUMBIO 122X.) Differences between UK and U.S. health care systems from modern and historical perspectives. Evolution, current problems, future developments. Case of Canada as point of comparison. Attempts to maximize health gains while controlling costs, one system on the public service ideal, the other on market principles. Social, cultural, and ethical issues related to the development of health care systems; opportunities to interact with NHS doctors, nurses, and administrators. GER:DB-SocSci, EC-GlobalCom
4 units, Win (Senior)

OSPOXFRD 44. The Rise of the Novel—(Enroll in ENGLISH 174X.) The many novels that flooded the literary market throughout the 18th century. Male canonical writers such as Richardson and Fielding, and novels written by women. Topics include satire, sensibility, and the contemporary suspicion of the novel form as morally pernicious. GER: DB-Hum
5 units, Spr (Plaskitt)

OSPOXFRD 51. Britain in the Era of the Two World Wars—(Enroll in HISTORY 239V.) Causes of Britain’s involvement, her role in the final outcome, and their impact on Britain’s role as a world power. The effects of the wars on British politics, culture, and the everyday lives of combatants and non-combatants. Films, literature, reminiscences, and historical sources. GER:DB-Hum
5 units, Win (Tyack)
4 units, Aut (Billington)

OSPOXFRD 62. Nature versus Nurture.—(Enroll in LINGUIST 40Z.) To what extent is human behavior determined by genetic endowment and/or on upbringing and experiences? Recent research in cognitive science, and classic readings including Pinker’s The Blank Slate. Why the controversy remains. GER:DB-SocSci
3 units, Win (Wasow)

OSPOXFRD 63. Varieties of English.—(Enroll in LINGUIST 57Z.) Shaw’s observation that England and the U.S. are divided by a common language is salient to any American visiting Britain. Major dialect differences between British and American English including pronunciation, vocabulary, and grammar; why these differences evolved. Students collect primary data through conversations and online searches. GER: DB-SocSci
3 units, Win (Wasow)

OSPOXFRD 65. Oxford: The City as a Work of Art.—Oxford’s role as patron of British art, architecture, and design from the 13th century to the present. Themes in the history of art, architecture, and design: medieval and gothic, renaissance, classical, modern and postmodern. Resources such as university and college buildings, museums, galleries, and private collections. The roles of patronage and collecting; the functioning of the arts.
2 units, Aut, Win (Chance)

3 units, Spr (Giffard)

OSPOXFRD 68. Medical Ethics through Literature, Film, and Theater.—(Enroll in HUMBIO 175X.) Sources include poems, short stories, and novels by American, German, and English authors including Rilke, Mann, Lewis, Kafka, Dickens, John Keats, Virginia Woolf, and William Carlos Williams. Topics: suffering, death and dying, disability, the doctor/patient relationship. Field trips to the theatre, local physician, and local medical humanities program. GER:DB-Hum
4 units, Spr (Giffard)

OSPOXFRD 70. The European City.—(Enroll in HISTORY 138V.) Population growth, technological change, and revolutionary social and architectural ideologies have transformed European cities. How and why the transformation occurred through key texts and the physical fabric of the cities. Topics: effects of Baroque patronage in the 17th and 18th centuries; rebuilding the city centers in the 19th century, the growth of suburbs; the impact of mass transportation; the influence of modernist doctrines in the 20th century; ongoing attempts by governments to tackle endemic problems of slums, poverty. Comparisons with U.S. cities. GER:DB-SocSci
5 units, Spr (Tyack)

OSPOXFRD 98. Creative Writing Workshop.—Topics: selection and combination; poetic language; metaphor and cohesion; setting and the pathetic fallacy; sentence variety; genres; dialogue; point of view; narrative positions; colors and senses; time management; plotting. Enrollment limited with enrollment based on writing sample.
3 units, Aut, Win, Spr (Kidd)

OSPOXFRD 114Z. English Literature, 1509-1642.—(Enroll in ENGLISH 114Z.) From the beginning of Henry VIII’s reign to the onset of the Civil War, excluding Shakespeare. The poetry, prose, and drama of the period in their literary, cultural, and historical contexts. Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine’s undergraduates. GER:DB-Hum
5 units, Aut (van Es)

OSPOXFRD 116Z. English Literature, 1642-1740.—(Enroll in ENGLISH 116Z.) From the Civil War to the middle of the 18th century. The poetry, prose, and drama of the period in their literary, cultural, and historical contexts, and key texts. Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine’s undergraduates. GER:DB-Hum
5 units, Win (Bullard)

OSPOXFRD 117W. Gender and Social Change in Modern Britain.—(Enroll in SOC 117W.) Changes in the social institutions, attitudes, and values in Britain over the past 20 years. Social changes occurring as a consequence of the Thatcher years of government. Changes to the British economy, the welfare state, National Health Service, the education system, the criminal justice system, gender relations, marriage, divorce, reproduction, and the family. The consequences in terms of British competitiveness, income distribution, wealth and poverty, social class, health and illness, educational attainment and skills development, crime, and family life. GER:DB-SocSci, EC-Gender
4 units, Aut (Palmer)

OSPOXFRD 141V. European Imperialism and the Third World, 1870-1970.—(Enroll in HISTORY 141V, POLISCI 148P.) European imperialism from its zenith in the late 19th century to the era of decolonization after WWII. The effects of Western imperialism in the Third World. The legacy of imperialism and decolonization to the modern world. GER:DB-SocSci, EC-GlobalCom
5 units, Spr (Darwin)

5 units, Spr (Plaskitt)

OSPOXFRD 163X. Shakespeare.—(Enroll in ENGLISH 163X.) For English majors or minors only. Topics include the use of soliloquy, epilogues, alternation of prose and verse, rhetoric, meta-theatricality. Close reading technique. Taught jointly with students from St. Catherine’s College. GER:DB-Hum
5 units, Aut (Garver)

OSPOXFRD 166X. The Modern British Economy.—(Enroll in ECON 166X.) The nature of the modern British economy. Recent developments in the main areas of the British economy, emphasizing the changes over the past 10 to 20 years. Sufficient economic concepts are introduced to allow students with basic economic knowledge to take part in the analysis of recent trends. Comparisons with other European countries and the U.S. Prerequisite: ECON 1. GER:DB-SocSci
4 units, Win (Robinson)

OSPOXFRD 221Y. Art and Society in Britain.—(Enroll in ARTHIST 221Y, HISTORY 244V.) Themes in 18th-, 19th-, and 20th-century British art. Painting, sculpture, and design. Comparisons between the British experience and that of continental Europe and the U.S. Readings address problems related to the role of art in modern society. GER: DB-Hum
5 units, Aut (Tyack)
PARIS

4 units, Spr (Maurer)

OSPPARIS 25. Literature and the City — (Enroll in FREN Lit 178F.) Subtle and hidden aspects of Paris through the eyes of France’s greatest writers, poets, and philosophers including Balzac, Baudelaire, Zola, and Aragon. Essays, poems, and novels that portray the historical, social, and political reality of the city better than textbooks or guides. GER: DB-Hum
4 units, Aut (Maurer)

OSPPARIS 31. American Writers in Paris: Twentieth-Century Expatriate Writers in Paris — (Enroll in FRENGEN 156P.) Paris as inspiration and refuge for writers and artists; the urge to go to Paris. Field trips trace their steps and intellectual and artistic development. Role of cultural institutions such as the cafés and salons in the life and creativity of the expatriate. Paris as a part of American culture, myth, longing, and source of inspiration and influence. GER:DB-Hum
4 units, Aut (Allday)

OSPPARIS 33. Gardens of Earthly Delight: Landscape, Culture, and Social Spaces in France — (Enroll in ENGLISH 150X, COMPLIT 150X.) Cultural geography of French social spaces as sites for the development of personal, social, and political experiences of national identity. Roles of literary and architectural art and how they represented cultural and social ideology. The artistry of gardens through metaphysics, aesthetics, and theology. GER:DB-Hum
4 units, Spr (Saldivar)

OSPPARIS 34. Women in French Cinema — (Enroll in FEMST 192E, FREN Lit 191P.) Social tensions, political issues, gender politics, and psychological problems as seen through French films on and by women. Contemporary French culture and its relations to moral, social, and political issues such as immigration, sexuality, gender relations, poverty, modernity, and tradition. Guest women film writers, directors, and critics. Field trip to Cinémathèque française. GER:DB-Hum, EC-Gender
4 units, Aut (Allday)

OSPPARIS 35. Making Films in France: An Insider’s View — (Enroll in FREN Lit 182P.) Contemporary French culture through film in the context of political economy, history, sociology, art, psychology, and literature. Guest speakers including director, sound technician, editor, and actor. GER:DB-Hum
4 units, Win (Apostolidès)

OSPPARIS 36. French Avant Garde Movements in the Twentieth Century — (Enroll in FREN Lit 194P) Artistic and political perspectives. Relations to global and official French culture, and their intellectual heritage. GER:DB-Hum
3 units, Win (Apostolidès)

OSPPARIS 41. EAP: Perspective, Interior Decorating, Volume, and Design — (Enroll in ARTSTUDI 61Y.) May be repeated for credit.
2 units, Aut, Win, Spr (Staff)

OSPPARIS 42. EAP: Drawing with Live Models — (Enroll in ARTSTUDI 140Y.) May be repeated for credit.
2 units, Aut, Win, Spr (Staff)

OSPPARIS 43. EAP: Painting and Use of Color — (Enroll in ARTSTUDI 144Y.) May be repeated for credit.
2 units, Aut, Win, Spr (Staff)

OSPPARIS 44. EAP: Graphic Art — (Enroll in ARTSTUDI 60Y.) May be repeated for credit.
2 units, Aut, Win, Spr (Staff)

OSPPARIS 56. Theater in Transition: Stage and Audience in France Today — (Enroll in FREN Lit 143P.) The static and silent spectator as first partner of the stage and sometimes co-creator of the theatrical event. Audience; new forms of performance; how space is reinvented; new light and sound effects; how texts are re-interpreted; and the changing role of the actor on the stage. GER:DB-Hum
4 units, Spr (Mervant-Roux)

OSPPARIS 57. Human Rights in Comparative Perspective — (Enroll in POL Sc 143P.) Human rights spring from Enlightenment principles but their status in the American and French constitutions differ. Have European court decisions created a transatlantic human rights model giving more weight to Anglo-Saxon legal tradition? Philosophical, historical, and legal resources; recent case studies from both sides of the Atlantic. GER:DB-SocSci, EC-GlobalCom
4-5 units, Spr (Remy-Granger)

5 units, Spr (Germanagne)

4 units, Spr (Halevi)

OSPPARIS 107Y. The Age of Cathedrals: Religious Art and Architecture in Medieval France — (Enroll in ARTHIST 107Y.) The major artistic and cultural movements that changed the face of France from the period of Suger in the 12th century through the reign of St. Louis in the 13th century. Monastic spirituality progressively gave way to an urban culture focused on man and secular knowledge, which developed daring and sophisticated building techniques. The years 1150-1250 represented a period of architectural renaissance and l’Ile-de-France was its birthplace. GER:DB-Hum
4 units, Aut (Deremble)

OSPPARIS 120X. French Painting — (Enroll in ARTHIST 123Y.) Changes in artistic aims and the interaction between artist and society throughout the period. Weekly field trips to Paris museums holding paintings of David, Ingres, Delacroix, Courbet, Daumier, Manet, Renoir, Monet, Degas, and others. GER:DB-Hum
4 units, Win (Halevi)

OSPPARIS 122X. Europe: Integration and Disintegration of States, Politics, and Civil Societies — (Enroll in POL Sc 149P.) European integration is now an economic, social, and political reality. This integration has a history of mutation and a transformation of its very foundation. Topics: the evolution of welfare states, elites, political parties, and systems in Europe; lobbies, trade unions, voluntary associations, social movements, popular protest, citizenship, democracy. GER:DB-SocSci
4-5 units, Win (Strudel)

OSPPARIS 124X. Building the European Economy: Economic Policies and Challenges Ahead — (Enroll in ECON 124X.) The main issues and challenges of European economic construction. The European Economic Union at the end of 50s; European industrial, agricultural, social, and monetary economic policies. Topics: wider definitions of Europe, Europe’s relations with industrial and developing countries, Europe’s challenge in confronting global economic crises. GER:DB-SocSci
5 units, Aut (Le Cacheux)
OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time—(Enroll in HUMBIO 153X, PUBLPOL 111P.) Health systems respond to the health needs of a given population. Must they be organized, or left to the free play of the market? What is the role of the state in the delivery of health care? Focus is on the evolution of the health profession in France and the U.S.; developments in health policy and reforms; measures restraining professional autonomy such as prescription guidelines in the French Medical Convention between doctors and the state. Is the solution to the growth of health expenditures and reduced access to health care the end of autonomy for the medical profession? GER:DB-SocSci
4-5 units, Win (Fessler)

OSPPARIS 186F. Contemporary African Literature in French—(Enroll in AFRICAAM 186F, FRENLANG 186F.) Focus is on African writers and those of the Diaspora, bound together by a common history of slave trade, bondage, colonization, and racism. Their works belong to the past, seeking to save an oral heritage of proverbs, story tales, and epics, but they are also contemporary. GER:DB-Hum, EC-GlobalCom
4 units, Win (Azarian)

OSPPARIS 211X. Political Attitudes and Behavior in Contemporary France—(Enroll in POLISCI2141P) The institutions of the Fifth Republic, the main political forces, and their evolution. Electoral behavior, taking into account other forms of political action such as the demonstrations for the defense of schools (1984) and the lycée students (1990), or the protest that followed the desecration of the Jewish cemetery in Carpentras. Attitudes and values are linked to voting choice. (In French and English.) GER:DB-SocSci
4-5 units, Aut (Mayer, Muxel)

FRENCH LANGUAGE PROGRAM

OSPPARIS 22P. Intermediate French I—(Enroll in FRENLANG 22P)
4 units, Aut, Win, Spr (Staff)

OSPPARIS 23P. Intermediate French II—(Enroll in FRENLANG 23P)
4 units, Aut, Win, Spr (Staff)

OSPPARIS 124P. Advanced French I—(Enroll in FRENLANG 124P)
4 units, Aut (Staff)

OSPPARIS 125P. Advanced French II—(Enroll in FRENLANG 125P)
4 units, Win, Spr (Staff)

ON VIDEOTAPE

See the “School of Engineering” section of this bulletin for course descriptions.

OSPPARIS 40P. Introductory Electronics—(Enroll in ENGR 40P)
GER:DB-EngrAppSci
5 units, Aut, Spr (Khuri-Yakub)

OSPPARIS 50P. Introductory Science of Materials—(Enroll in ENGR 50P)
GER:DB-EngrAppSci
4 units, Aut, Win (Staff)

SANTIAGO

OSPSANTG 5. Director’s Seminar—Current issues and events in Chilean political and cultural life. May be repeated for credit.
2 units, Aut (Fuenzalida)

OSPSANTG 34. Traces of Authority: The City of Santiago de Chile—(Enroll in URBANST 157V.) Relationships between acquisition, maintenance, and transmission of power in society, and the organization of public space in the city using Santiago as example. Sources include downtown buildings, maps of the city, and pictures of older buildings. Comparison with American and European cities. GER:DB-SocSci
5 units, Aut (Fuenzalida)

OSPSANTG 36. Darwin’s South America—The route of the HMS Beagle. How Darwin’s ideas proved to be insightful or incorrect. Origin of Species as a window into the evolution of Darwin’s thinking. Field trips to related areas, possibly the Atacama Desert.
5 units, Spr (Siegel)

OSPSANTG 56. Contemporary Chilean Women Writers—(Enroll in SPANLIT 155X.) Poems by Nobel Prize Winner Gabriela Mistral. Novels by María Luisa Bombal (La última niebla), Carolina Geel (Cárcel de mujeres), Marta Brunet (María Nadie), Isabel Allende (La casa de los espíritus), Pía Barros (A horcajadas), and Marcela Serrano (Para que no me olvides). How these authors have articulated women’s consciousness and experiences and questioned their own world’s values from a feminist perspective. GER:DB-Hum, EC-Gender
3-5 units, Win (Haro)

3-5 units, Win (Spiller)

OSPSANTG 104X. Modernization and Culture in Latin America—(Enroll in ANTHSCI 104X, SPANLIT 212X.) Intellectual and cultural expressions of Latin America against the background of modernization viewed as a constant tension between rationalization and subjectification, change and identity preservation, and the logic of development or economic expansion and the logic of the culture. Readings include Morande, Cultura y modernización en América Latina and Sarlo, Una modernidad periférica. GER:DB-Hum, EC-GlobalCom
5 units, Aut (Subercaseaux)

OSPSANTG 111. Social Heterogeneity in Latin America—(Enroll in SPANLIT 155S, SOC 111S.) Latin America is characterized by social heterogeneity and inequality. An interpretation of these phenomena, focusing on the social, ethnic, gender, political, and economic dimensions. Their historical roots and unfolding during the periods of industrialization, the 60s, 70s, and 80s, and the contemporary situation. GER:DB-SocSci
5 units, Aut (Valdés)

OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century—(Enroll in POLISCI 242P) Chile’s strides towards becoming a developed country have engendered high levels of alienation and dissatisfaction among significant sectors of the population. The roots of this apparent paradox of modernization, focusing on newly emerging actors in the Chilean political scene: Mapuche organizations, women’s groups, the environmental movement, and new features of the established ones like trade unions and human rights activists. GER:DB-SocSci
5 units, Spr (Correa)
OSPANTG 118X. Cultural Modernization: The Case of Chile — (Enroll in SPANLIT 166S.) Elite, mass-media, and popular cultural changes in Chile under conditions of economic liberalization and political. The reception of cultural meanings from the center of the world social system (U.S., EU and Japan), reformulation to respond to local conditions, and export in the shape of cultural artifacts. Innovative elements rooted in the regional and local culture. GER:DB-SocSci
5 units, Win (Micco)

OSPANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies — (Enroll in ECON 119X.) The Chilean economy in five stages, taking into account: the international economic position of Chile; internal economic structures closely related to the inherited historical conditions and to the changing international economic position of the country; and the economic strategies prevalent during the period and the concrete development policies conducted by government authorities. GER:DB-SocSci
5 units, Spr (Mañez)

OSPANTG 129X. Latin America in the International System — (Enroll in POLISCI 117P.) Latin America’s role in world politics, with emphasis on the history and models for explaining U.S.-Latin American relations. Latin America’s evolving relationship in the international system. GER:DB-SocSci
4-5 units, Win (Fuentes)

OSPANTG 130X. Latin American Economies in Transition — (Enroll in ECON 165X.) Introduction to the main debates and approaches developed to understand and analyze the economies of Latin America. Recent processes of transition to market economies. Common characteristics among countries of the region; the differences and special traits of individual countries. Historical, analytical, and empirical perspectives on topics at the center of controversies and specific policy problems over several decades. Recommended: ECON 1, 51, and 52. GER:DB-SocSci
5 units, Aut (DiFilippo)

OSPANTG 141X. Politics and Culture in Chile — (Enroll in LATINAM 141X.) The relationship between politics and culture in Chile during the 20th century, reflecting on the effects of such relationships on esthetics and identity. The possibility that, in Chile, culture has been pulled by politics and social praxis, a condition that has created a deficit in cultural thickness. The oligarchic regime around 1920, the welfare state around 1940, projects of social transformation around 1970, dictatorship around 1980, women writers and Mapuche poetry in contemporary Chile. GER:DB-Hum, EC-GlobalCom
5 units, Spr (Subercaseaux)

5 units, Win (DiFilippo)

OSPANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective — (Enroll in POLISCI 243P, LATINAM 221X.) The dynamics of the Chilean transition. Topics: challenges faced by democratic governments in 90s framed by the legacy of military rule, 1973-90; political culture; institutional traditions of democracy; and the Chilean process within the broader context of Latin American political development. GER:DB-SocSci
5 units, Aut (Micco)

SPANISH LANGUAGE PROGRAM
OSPANTG 12S,13S. Accelerated Second-Year Spanish: Chilean Emphasis — (Enroll in SPANLANG 12S,13S.) Intensive sequence integrating language, culture, and sociopolitics of Chile. Emphasis is on achieving advanced proficiency in oral and written discourse including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisites for 12S: one year of college Spanish, or 11 or 21B more than two quarters prior to arriving in Santiago. Prerequisites for 13S: 11 or 21B within two quarters of arriving in Santiago, or 12 or 22B.
5 units, Aut, Win, Spr (Abad, Bobbert, Pons, Toledo)

OSPANTG 33. Spanish Language Tutorial — Prerequisite: two years of college Spanish or equivalent placement. 2 units, Aut, Win, Spr (Pons)

SPECIAL PROGRAMS
In addition to courses at its established centers, the Overseas Studies Program offers courses in other locations around the world. Additional details can be found at http://osp.stanford.edu.

4 units, Win (Stanton)

OSPGEN 22. Community Reconstruction and Development in Post-Apartheid South Africa — (Enroll in AFRICAAM 121, SOC 107S.) Emphasis is on theory and practice of community reconstruction and development using the Western Cape region as a case study. How S. African communities redress economic injustice and stagnation in partnership with nongovernmental organizations, metropolitan government agencies, and higher education institutions. Innovative processes of community development and local policies and contexts that support or inhibit these approaches. Service-learning component. Location: Cape Town, South Africa. GER:DB-SocSci
4 units, Win (Stanton)

OSPGEN 23. History and Politics of South Africa in Transition — (Enroll in AFRICAAM 124.) S. Africa’s unfolding democratic era: its achievements in development and reconciliation; and challenges related to continuing poverty, a stagnant economy and high unemployment, and HIV and other health challenges. Topics: modern South African politics; affirmative action and employment equity; the Truth and Reconciliation Commission; violence and ethnicity; racial identity and racism; S. Africa and the African Renaissance; and land distribution and restoration. Location: Cape Town, South Africa. GER:DB-SocSci
4 units, Win (Simons)

OSPGEN 24. Targeted Research Project — Research that responds to needs of Western Cape communities or health service providers, and ties in to disciplinary course work. Location: Cape Town, South Africa. 4 units, Win (Stanton)

OSPGEN 51. Ecology, Evolution, and the Natural History of Baja California — (Enroll in BIOSCI 100.) The ecosystem of the Midriff Island Area in the Gulf of California from several disciplinary perspectives. Tools for ecology and evolutionary biology. Daily fieldwork. Bahía de Los Angeles as case study to examine effects of human impact and challenges in developing a sustainable relationship with marine ecosystems. Location: Baja California, Mexico. 3 units, Aut (Petrov, Volny)
OSPGEN 52. The Political Economy of the European Union — (Enroll in POLISCI 44P, ECON 14X.) EU and NATO institutions, their challenges and impact on relations with the U.S. The Euro and monetary policy, economic aspects of European integration, the EU judicial system, and foreign and security policy. Students meet with politicians, diplomats, and business leaders. Field trips to the European Parliament, the European Commission and NATO headquarters in Brussels, and the European Court of Justice in Luxembourg. Location: Leuven, Belgium.

2 units, Aut (Crombez)

OSPGEN 54. Energy and Development in the Brazilian Amazon — (Enroll in EARTHSYS 30X, PUBLPOL 30P.) The poverty of the Brazilian Amazon in the face of its rich natural resources. Pressure on government to preserve the natural environment and develop its economic potential; trade-offs facing policy makers when crafting economic development and energy policy. Discussions with government officials, energy industry executives, and NGOs in Rio de Janeiro. Focus is on case studies in Manaus; site visits, theory and analytical tools, and discussions with stakeholders. Locations: Rio de Janeiro and Manaus, Brazil.

2 units, Aut (Victor)

2 units, Aut (Sun)

2 units, Aut (Seto)

OSPGEN 57. Tokyo Since 1945: Rising from the Ruins — (Enroll in HISTORY 96V.) Tokyo’s postwar history, its prosperity, and the problems that prosperity created. How Tokyo was transformed after its destruction in WW II into a global metropolis at the hub of international trade, and financial, technological, and cultural networks. Tokyo as metaphor for the postwar recovery of Japan as economic superpower: affluence, consumerism, popular urban culture, and the social costs of the accompanying population influx. Location: Tokyo, Japan.

2 units, Aut (Duus)

OSPGEN 58. The New Global Economy, Democratic Development, and Islam in Morocco — (Enroll in HISTORY 83V.) Muslim faith, colonial rule, nation and state building, and challenges and disappointments of economic and political developments common across the Arab-Muslim world, using the Moroccan experience as a prism. History of Morocco from French colonial rule to independence. Moroccan economic and political development issues of the last twenty years. Location: Rabat, Morocco.

2 units, Aut (Beinin)

2 units, Aut (Katzenstein)
PHILOSOPHY

Emeriti (Professors): Fred Dretske, Solomon Feferman, Georg Kreisel, David S. Nivison, Patrick Suppes, James O. Urmson
Honorary Emeritus (Professor): Richard Rorty
Chair: Kenneth Taylor
Director of Graduate Study: Michael Bratman
Director of Undergraduate Study: Chris Bobonich
Professors: Michael Bratman, John Etchemendy, Dagfinn Føllesdal (Autumn), Michael Friedman (on leave Spring), Helen Longino, Grigori Mints, Julius Moravcsik, John Perry, Kenneth Taylor, Johan vanBenthem (Spring), Thomas Wasow (on leave), Allen Wood (on leave Autumn)
Associate Professors: Lanier Anderson, Chris Bobonich, Mark Crimmins, Graciela De Pierris, Debra Satz
Assistant Professors: Nadeem Hussain, Agnieszka Jaworska (on leave Autumn), Krista Lawlor (on leave), Marc Pauly, Tamar Schapiro (on leave Autumn)
Professor (Research): Rega Wood
Lecturer: Katherine Dunlop
Acting Assistant Professors: David Hills, Thomas Ryckman
Courtesy Professors: Reviel Netz, Denis Phillips
Visiting Associate Professor: Ruy de Queiroz (Winter, Spring)
Visiting Assistant Professor: Luca Ferrero

Courses given in Philosophy have the subject code PHIL. For a complete list of subject codes, see Appendix.

Philosophy concerns itself with fundamental problems. Some are abstract and deal with the nature of truth, justice, value, and knowledge; others are more concrete, and their study may help guide conduct or enhance understanding of other subjects. Philosophy also examines the efforts of past thinkers to understand the world and people’s experience of it.

Although it may appear to be an assortment of different disciplines, there are features common to all philosophical enquiry. These include an emphasis on methods of reasoning and the way in which judgments are formed, on criticizing and organizing beliefs, and on the nature and role of fundamental concepts.

Students of almost any discipline can find something in philosophy which is relevant to their own specialties. In the sciences, it provides a framework within which the foundations and scope of a scientific theory can be studied, and it may even suggest directions for future development. Since philosophical ideas have had an important influence on human endeavors of all kinds, including artistic, political, and economic, students of the humanities should find their understanding deepened by acquaintance with philosophy.

Philosophy is an excellent major for those planning a career in law, medicine, or business. It provides analytical skills and a breadth of perspective helpful to those called upon to make decisions about their own conduct and the welfare of others. Philosophy majors who have carefully planned their undergraduate program have an excellent record of admission to professional and graduate schools.

The Special Program in the History and Philosophy of Science enables students to combine interests in science, history, and philosophy. Students interested in this program should see the special adviser.

The joint major in Philosophy and Religious Studies combines courses from both departments into a coherent theoretical pattern.

Graduate students and undergraduate majors in philosophy have formed associations for discussion of philosophical issues and the reading of papers by students, faculty, and visitors. These associations elect student representatives to department meetings.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

There are two ways of majoring in philosophy: the General Program and the Special Program in the History and Philosophy of Science. A student completing either of these receives a B.A. degree in Philosophy. There is also a major program offered jointly with the Department of Religious Studies. To declare a major, a student should consult with the Director of Undergraduate Study and see the undergraduate student services administrator to be assigned an adviser and work out a coherent plan. The department strongly urges proficiency in at least one foreign language.

GENERAL PROGRAM

1. Course requirements, minimum 55 units:
   a) preparation for the major: an introductory course (under 100) and 80. (PHIL 80 should normally be taken no later than the first quarter after declaring the major.) Students taking both quarters of the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track can count 5 units toward the introductory Philosophy requirement.
   b) the core, 24 additional Philosophy units, as follows:
      1) Logic: one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
      2) Philosophy of science: any course from 60, 61, 156, 163-168
      3) Moral and political philosophy: one from 170-173
      4) Metaphysics and epistemology: one from 180-189
      5) History of philosophy: 100 and 102 are required of each major
   c) one undergraduate philosophy seminar from the 194 series.
   d) electives: courses numbered 10 or above, at least 13 units of which must be in courses numbered above 99.

2. Units for Tutorial, Directed Reading (PHIL 196, 197, 198), The Dualist (PHIL 198), Honors Seminar (PHIL 199), or affiliated courses may not be counted in the 55-unit requirement. No more than 10 units completed with grades of “satisfactory” and/or “credit” may be counted in the 55-unit requirement.

A maximum of 10 transfer units or two courses can be used for the departmental major. In general, transfer courses cannot be used to satisfy the five area requirements or the undergraduate seminar requirement. Students may not substitute transfer units for the PHIL 80 requirement.

SPECIAL PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE

Undergraduates may major in Philosophy with a degree field in History and Philosophy of Science under the Department of Philosophy. Each participating student is assigned an adviser who approves the course of study. A total of 61 units are required for the sub-major, to be taken according to requirements 1 through 5 below. Substitutions for the listed courses are allowed only by written consent of the undergraduate adviser for History and Philosophy of Science. Students are encouraged to consider doing honors work with an emphasis on the history and philosophy of science. Interested students should see the description of the honors thesis in Philosophy and consult their advisers for further information.

1. Three science courses (for example, biology, chemistry, physics) for 12 units.

2. The following Philosophy (PHIL) core courses must be completed with a letter grade by the end of the junior year:
   a) one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
   b) 60 or 61
   c) 80

3. Three history of science courses.

4. Three philosophy of science courses, of which one must be PHIL 164.

5. Three additional courses related to the major, in philosophy or history, to be agreed on by the adviser.
6. At least six courses in the major must be completed at Stanford with a letter grade. Units for Tutorial, Directed Reading, or The Dualist (196, 197, 198) may not be counted in the requirement. No more than 10 units completed with grades of “satisfactory” and/or “credit” may be counted in the requirement.

7. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring a major. Transfer courses are strictly limited when used to satisfy major requirements.

**SPECIAL TRACK IN PHILOSOPHICAL AND LITERARY THOUGHT**

Undergraduates may major in Philosophy with a special degree field in philosophy and literature. Students in this track take courses alongside students from other major departments which also have specialized tracks associated with the program for the study of philosophical and literary thought, with administrative staff in the DLCL. Each student in this track is assigned an adviser in Philosophy, and students’ schedules and overall course of study must be approved in writing by the adviser, and the Director of Undergraduate Studies in Philosophy and of the program.

A total of 65 units must be completed for this track, including the following requirements:

1. Core requirements for the major in Philosophy, including:
   a) an introductory course
   b) PHIL 80
   c) the core distribution requirements listed in section 1b of the general program above

2. Gateway course in philosophy and literature (PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.

3. Three courses in a single national literature, chosen by the student in consultation with the adviser and the program director of undergraduate studies. This normally involves meeting the language proficiency requirements of the relevant literature department.

4. Electives within Philosophy beyond the core requirements totaling at least 5 units, and drawn from courses numbered 100 or higher.

5. Two upper division courses of special relevance to the study of philosophy and literature, as identified by the committee in charge of the program. A list of approved courses is available from the program director of undergraduate studies.

6. Capstone seminar in the PHIL 194 series.

7. Capstone seminar of relevance to the study of philosophy and literature, as approved by the program committee. In some cases, with approval of the Philosophy Director of Undergraduate Study and the program director of undergraduate studies, the same course may be used to meet requirements 6 and 7 simultaneously. In any case, the student’s choice of a capstone seminar must be approved in writing by the Philosophy Director of Undergraduate Study and the program director of undergraduate studies.

Students are encouraged to consider doing honors work in a topic related to philosophy and literature, either through the Philosophy honors program, or through Interdisciplinary Studies in the Humanities.

The following rules also apply to the special track:

1. Units for Honors Tutorial, Directed Reading (PHIL 196, 197, 198), The Dualist (PHIL 198), Honors Seminar (PHIL 199) may not be counted toward the 65-unit requirement. No more than 10 units with a grade of “satisfactory” or “credit” may be counted toward the unit requirement.

2. A maximum of 15 transfer units may be counted toward the major, at most 10 of which may substitute for courses within Philosophy. Transfer credits may not substitute for PHIL 80 or 81, and are approved as substitutes for the five area requirements or PHIL 194 only in exceptional cases.

3. Courses offered in other departments may be counted toward requirements 3, 5, and 7, but such courses, including affiliated courses, do not generally count toward the other requirements. In particular, such courses may not satisfy requirement 4.

4. Units devoted to meeting the language requirement are not counted toward the 65-unit requirement.

**MINORS**

A minor in Philosophy consists of at least 30 units of Philosophy courses satisfying the following conditions:

1. IHUM 23A and B (The Fate of Reason) may be counted for a maximum of 5 units.

2. At least 10 units must be from courses numbered 100 or above.

3. The 30 units must include one of:
   a) a history of philosophy course numbered 100 or above
   b) two quarters of Area 1 (only 5 of the 10 units can count towards 30-unit requirement)

4. One course from any two of the following three areas (PHIL):
   a) Philosophy of science and logic: 60, 61, 156, 163-168; 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
   b) Moral and political philosophy: 20, 30, 170-172
   c) Metaphysics and epistemology: 10, 80, 180-189

5. Units for tutorials, directed reading, and affiliated courses may not be counted.

6. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring. The number of transfer units is generally limited to a maximum of 10.

7. No more than 6 units completed with grades of “satisfactory” and/or “credit” count towards the 30-unit requirement.

Students must declare their intention to minor in Philosophy in a meeting with the Director of Undergraduate Study. This formal declaration must be made no later than the last day of the quarter two quarters before degree conferral. The Permission to Declare a Philosophy Minor (signed by the Director of Undergraduate Study) lists courses taken and to be taken to fulfill minor requirements. This permission is on file in the department office. Before graduation, a student’s record is checked to see that requirements have been fulfilled, and the results are reported to the University Registrar.

**HONORS PROGRAM**

Students who wish to undertake a more intensive and extensive program of study, including seminars and independent work, are invited to apply for the honors program during Winter Quarter of the junior year. Admission is selective on the basis of demonstrated ability in philosophy, including an average grade of at least ‘A-’ in a substantial number of philosophy courses and progress towards satisfying the requirements of the major.

With their application, candidates should submit an intended plan of study for the remainder of the junior and the senior years. It should include at least 5 units of Senior Tutorial (196) during Autumn and/or Winter Quarter(s) of the senior year. Students who are applying to Honors College may use the same application for philosophy honors. In the quarter preceding the tutorial, students should submit an essay proposal to the Philosophy undergraduate director and determine an adviser.

Students applying for honors should enroll in Junior Honors Seminar (199) during the Spring Quarter of the junior year.

The length of this essay may vary considerably depending on the problem and the approach; usually it falls somewhere between 7,500 and 12,500 words. The honors essay may use work in previous seminars and courses as a starting point, but it cannot be the same essay that has been used, or is being used, in some other class or seminar. It must be a substantially new and different piece of work reflecting work in the tutorials.

A completed draft of the essay is submitted to the adviser at the end of the Winter Quarter of the senior year. Any further revisions must be finished by the fifth full week of the Spring Quarter, when three copies of the essay are to be given to the undergraduate secretary. The honors essay is graded by the adviser together with a second reader, chosen by the adviser in consultation with the student. The student also provides an oral defense of the thesis at a meeting with the adviser and second reader. The essay must receive a grade of ‘A-’ or better for the student to receive honors.
The honors tutorials represent units in addition to the 55-unit requirement.
The Department of Philosophy cooperates with the honors component of the “Interdisciplinary Studies in Humanities” as described in that section of this bulletin.

**JOINT MAJOR IN PHILOSOPHY AND RELIGIOUS STUDIES**

The joint major in Philosophy and Religious Studies consists of 60 units of course work with approximately one third each in the philosophy core, the religious studies core, and either the general major or the special concentration. Affiliated courses cannot be used to satisfy this requirement.

No courses in either the philosophy or religious studies core may be taken satisfactory/no credit or credit/no credit.

In general, transfer units cannot be used to satisfy the core requirements. Transfer units and substitutions must be approved by the director of undergraduate studies in the appropriate department.

**CORE REQUIREMENTS**

1. Philosophy (PHIL) courses:
   a) 80
   b) 16 units, including at least one Philosophy course from each of the following areas:
      1) Logic and philosophy of science: 50 (formerly 57), 60, 61, 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169), 156, 162-168
      2) Ethics and value theory: 170-173
      3) Epistemology, metaphysics, and philosophy of language: 180-189
      4) History of philosophy: 100-103

2. Religious Studies courses: 20 units, including at least two courses in diverse religious traditions (for example, an Eastern and a Western or a literate and a preliterate tradition) and including at least one seminar.

**General Major Requirements** — Five additional courses (approximately 20 units) divided between the two departments. No more than 5 of these units may come from courses numbered under 99 in either department. Each student must also take at least one undergraduate seminar in religious studies and one undergraduate seminar in philosophy.

**Special Concentration** — With the aid of an adviser, students pursue a specialized form of inquiry in which the combined departments have strength; for example, American philosophy and religious thought, philosophical and religious theories of human nature and action, philosophy of religion. Courses for this concentration must be approved in writing by the adviser.

**Directed Reading and Satisfactory/No Credit Units** — Units of directed reading for fulfilling requirements of the joint major are allowed only with special permission. No more than 10 units of work with a grade of ‘satisfactory’ count toward the joint major.

**HONORS PROGRAM**

Students pursuing a joint major in Philosophy and Religious Studies may also apply for honors by following the procedure for honors in either of the departments.

**COTERMINAL BACHELOR’S AND MASTER’S DEGREES**

It is possible to earn an M.A. in Philosophy while earning a B.A. or B.S. This can usually be done by the end of the fifth undergraduate year, although a student whose degree is not in philosophy may require an additional year. Standards for admission to, and completion of, this program are the same as for M.A. applicants who already have the bachelor’s degree when matriculating. Applicants for the coterminal program are not, however, required to take the Graduate Record Exam. Information about applying is available from Graduate Admissions in the Registrar’s Office. The application deadline for Philosophy is January 10.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

**GRADUATE PROGRAMS**

The department is prepared to direct and supervise individual study and research to supplement instruction offered in the courses listed below. In addition, advanced seminars not listed in the catalog are frequently organized in response to student interest. Candidates for advanced degrees are urged to discuss their entire program of study with their department advisers as early as possible.

Applications to graduate programs in the Department of Philosophy can be obtained from Graduate Admissions, the Registrar’s Office. Applicants should take the Graduate Record Examination by October of the year the application is submitted.

**MASTER OF ARTS**

University requirements for the M.A. are discussed in the “Graduate Degrees” section of this bulletin.

Four programs lead to the M.A. in Philosophy. One is a general program providing a grounding in all branches of the subject. The others provide special training in one branch.

**Admissions** — All prospective master’s students, including those currently enrolled in other Stanford programs, must apply for admission to the program. The application deadline is March 28 of the academic year preceding entry into the program. In exceptional circumstances, consideration may be given to applications received after the March 28 deadline but before April 30. No fellowships are available. Entering students must meet with the director of the master’s program and have their advisers’ approval, in writing, of program proposals. The master’s program should not be considered a stepping stone to the doctoral program; these two programs are separate and distinct.

**Unit Requirements** — Each program requires a minimum of 45 units in philosophy. Students in a special program may be allowed or required to replace up to 9 units of philosophy by 9 units in the field of specialization. Although the requirements for the M.A. are designed so that a student with the equivalent of a strong undergraduate philosophy major at Stanford might complete them in one year, most students need longer. Students should also keep in mind that although 45 units is the minimum required by the University, quite often more units are necessary to complete department requirements. Up to 6 units of directed reading in philosophy may be allowed. There is no thesis requirement, but an optional master’s thesis or project, upon faculty approval, may count as the equivalent of up to 8 units. A special program may require knowledge of a foreign language.

At least 45 units in courses numbered 100 or above must be completed with a grade of ‘B-’ or better at Stanford. Students are reminded of the University requirements for advanced degrees, and particularly of the fact that for the M.A., students must complete three full quarters as measured by tuition payment.

**GENERAL PROGRAM**

The General Program requires a minimum of 45 units in Philosophy courses numbered above 99. These courses must be taken for a letter grade and the student must receive at least a ‘B-’ in the course. Courses taken to satisfy the undergraduate core or affiliated courses may not be counted in the 45 units. The requirement has three parts:

1. **Undergraduate Core:** students must have when they enter, or complete early in their program, the following undergraduate courses (students entering from other institutions should establish equivalent requirements with a master’s adviser upon arrival or earlier):
   a) Logic: 50 (formerly 57), 150 (formerly 159), or 151 (formerly 160A)
   b) Philosophy of science: any course from 60, 61, 163-167
   c) Moral and political philosophy: one from 170-173
   d) Metaphysics and epistemology: one from 80, 180-189
   e) History of philosophy: two history of philosophy courses numbered 100 or above

2. **Graduate Core:** students must take at least one course numbered over 105 from three of the following five areas (courses used to satisfy the undergraduate core cannot also be counted toward satisfaction of the graduate core). Crosslisted and other courses taught outside the Department of Philosophy do not count towards satisfaction of the core.
a) Logic and semantics  
b) Philosophy of science and history of science  
c) Ethics, value theory, and moral and political philosophy  
d) Metaphysics, epistemology, and philosophy of language  
e) History of philosophy  

Each master’s candidate must take at least two courses numbered above 200 (these cannot be graduate sections of undergraduate courses). One may be a graduate core seminar (360, 370, 380, 381), but no student is admitted to a core seminar before completing undergraduate requirements in the area of the seminar and securing the approval of the instructor.

3. Specialization: students must take at least three courses numbered over 105 in one of the five areas.

SPECIAL PROGRAM IN SYMBOLIC SYSTEMS

Students should have the equivalent of the Stanford undergraduate major in Symbolic Systems. Students who have a strong major in one of the basic SSP disciplines (philosophy, psychology, linguistics, computer science) may be admitted, but are required to do a substantial part of the undergraduate SSP core in each of the other basic SSP fields. This must include the following three philosophy courses or their equivalents: 80; 151 (formerly 160A); and one from 181, 183, 184, 186. This work does not count towards the 45-unit requirement.

COURSE REQUIREMENTS

1. Four courses in philosophy at the graduate level (numbered 200 or above), including courses from three of the following five areas:
   a) Philosophy of language  
b) Logic  
c) Philosophy of mind  
d) Metaphysics and epistemology  
e) Philosophy of science  

   At most two of the four courses may be graduate sections of undergraduate courses numbered 100 or higher.

2. Three courses numbered 100 or higher from outside Philosophy, chosen in consultation with an adviser. These courses should be from two of the following four areas:
   a) Psychology  
b) Linguistics  
c) Computer Science  
d) Education  

   Remaining courses are chosen in consultation with and approved by an adviser.

SPECIAL PROGRAM IN THE PHILOSOPHY OF LANGUAGE

Admission is limited to students with substantial preparation in philosophy or linguistics. Those whose primary preparation has been in linguistics may be required to satisfy all or part of the undergraduate core requirements as described in the “General Program” subsection above. Those whose preparation is primarily in philosophy may be required to take additional courses in linguistics.

COURSE REQUIREMENTS

1. Philosophy of language: two approved courses in the philosophy of language numbered 180 or higher.

2. Syntactic theory and generative grammar: 384 and LINGUIST 231.

3. Logic: at least two approved courses numbered 151 (formerly 160A) or higher.

4. An approved graduate-level course in mathematical linguistics or automata theory.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the Ph.D. degree (residence, dissertation, examination, and so on) are discussed in the “Graduate Degrees” section of this bulletin. The requirements detailed here are department requirements.

All courses used to satisfy proficiency requirements must be passed with a letter grade of ‘B-’ or better (no satisfactory/no credit).

At the end of each year, the department reviews the progress of each student to determine whether the student is making satisfactory progress, and on that basis to make decisions about probationary status and termination from the program where appropriate.

Any student in one of the Ph.D. programs may apply for the M.A. when all University and department requirements have been met.

PROFICIENCY REQUIREMENTS

1. Course requirements, to be completed during the first two years:
   a) four core graduate courses and seminars in philosophy of language (381); philosophy of mind, metaphysics, and epistemology (380); value theory (370); and philosophy of science (360)
   b) three of the four items listed below:
      1) three history courses, each consisting of an approved graduate-level course in the history of philosophy. Courses satisfying this seven-out-of-eight requirement must include at least one history course in ancient philosophy, one in modern.
      2) PHIL 151 (formerly 160A)
      3) PHIL 150 (formerly 159) or the equivalent
      d) A total of at least 49 units of course work in the Department of Philosophy numbered above 110, but not including Teaching Methods (PHIL 239) or affiliated courses. Units of Individual Directed Reading (PHIL 240) may be included only with the approval of the Director of Graduate Study.

2. Teaching Assistance: a minimum of five quarters of teaching assistance, usually during the second and third years. As part of the training for being a teaching assistant, Ph.D. students are required to take PHIL 239 during Spring Quarter of their first and second years.

3. Candidacy: to continue in the Ph.D. program, each student must be approved for candidacy during the sixth academic quarter (normally the Spring Quarter of the student’s second year). Students may be approved for candidacy on a conditional basis if they have only one or two outstanding deficiencies, but are not officially advanced to candidacy until these deficiencies have been removed. Approval for candidacy indicates that, in the department’s judgment, the student can successfully complete the Ph.D. In reaching this judgment, the department considers the overall quality of the student’s work during the first six quarters and the student’s success in fulfilling course requirements.

4. During the third year of graduate study, and after advancement to candidacy, a Ph.D. student should successfully complete at least three graduate-level courses/seminars, at least two of which must be in philosophy. Courses required for candidacy are not counted toward satisfaction of this requirement. Choice of courses/seminars outside philosophy is determined in consultation with a student’s adviser.

5. During the summer of their second year, students are required to attend a dissertation development seminar given by the department.

6. Dissertation work and defense: the third and fourth (and sometimes fifth) years are devoted to dissertation work.
   a) Dissertation Proposal: by Spring Quarter of the third year, students select a dissertation topic, a reading committee, and some possible thesis relative to that topic. The topic and thesis should be sketched in a proposal of three to five pages, plus a detailed, annotated bibliography indicating familiarity with the relevant literature. The proposal should be approved by the reading committee before the meeting on graduate student progress late in Spring Quarter.
   b) Departmental Oral: during Autumn Quarter of the fourth year, students take an oral examination, called the “Departmental Oral,” based on at least 30 pages of written work, in addition to the proposal. The aim of the exam is to help the student arrive at an acceptable plan for the dissertation and to make sure that the student, thesis, topic, and adviser make a reasonable fit. In cases where such an exam is deemed inappropiate by the reading committee, the student may be exempted by filing a petition with the Director of Graduate Study, signed by the student and the members of the reading committee.
   c) Fourth-Year Colloquium: no later than the Spring Quarter of the fourth year, students present a research paper in a seminar open to the entire department. This paper should be on an aspect of the student’s dissertation research.
**SPECIAL GRADUATE PROGRAMS**

The department recognizes that some students may need to spend a large amount of time preparing themselves in some other discipline related to their philosophical goals, or in advanced preparation in the area within philosophy. In such circumstances, the department may be willing to waive some of the Ph.D. requirements. Such an exemption is not automatic; a program must be worked out with an adviser and submitted to the department some time in the student’s first year. This proposal must be in writing and must include:

1. The areas to be exempted (see below).
2. A program of additional courses and seminars in the special area (usually at least 12 units).
3. A justification of the program that considers both intellectual coherence and the student’s goals.

The department believes there is plenty of room for normal specialization within the program as it stands, and that all students specialize to some extent. Thus, the intent is not to exempt courses on a one-to-one basis, but only to grant exemptions when a student plans an extensive and intensive study of some relevant area.

Special program students may be exempted from the following:

1. One additional item from the items listed above in requirement 1(a).
2. PHIL 150 (formerly 159); but in this case, a student must take PHIL 50 (formerly 57)

If a student’s special program involves substantial course work outside of philosophy, the student may, with the approval of the adviser, petition the department to reduce requirement 1(d) (the Philosophy unit requirement for the first two years). Normally this requirement is not reduced below 32 units.

**PH.D. MINOR**

To obtain a Ph.D. minor in Philosophy, students must follow these procedures:

1. Consult with the Director of Graduate Study to establish eligibility, and select a suitable adviser.
2. Give to the department academic assistant a signed copy of the program of study (designed with the adviser) which offers:
   a) 30 units of courses in the Department of Philosophy with a letter grade of ‘B+’ or better in each course. No more than 3 units of directed reading may be counted in the 30-unit requirement.
   b) At least one course or seminar numbered over 99 to be taken in each of these five areas:
      1) Logic
      2) Philosophy of science
      3) Ethics, value, theory, and moral and political philosophy
      4) Metaphysics, epistemology, and philosophy of language
      5) History of philosophy
   c) Two additional courses numbered over 199 to be taken in one of those (b) five areas.
3. A faculty member from the Department of Philosophy (usually the student’s adviser) serves on the student’s doctoral oral examination committee and may request that up to one third of this examination be devoted to the minor subject.
4. Paperwork for the minor must be submitted to the department office before beginning the program.

**INTERDEPARTMENTAL PROGRAMS**

**GRADUATE PROGRAM IN HUMANITIES**

The Department of Philosophy also participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Philosophy and Humanities. It is described in the “Interdisciplinary Studies in Humanities” section of this bulletin.

**GRADUATE PROGRAM IN COGNITIVE SCIENCE**

Philosophy participates with the departments of Computer Science, Linguistics, and Psychology in an interdisciplinary program in Cognitive Science. It is intended to provide an interdisciplinary education, as well as a deeper concentration in philosophy, and is open to doctoral students. Students who complete the requirements within Philosophy and the Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Philosophy. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of philosophy. The list of approved courses can be obtained from the Cognitive Science program located in the Department of Psychology.

**SPECIAL TRACK IN PHILOSOPHY AND SYMBOLIC SYSTEMS**

Students interested in interdisciplinary work relating to artificial intelligence, cognitive science, computer science, linguistics, or logic may pursue a degree in this program.

**Prerequisites**—Ideally, admitted students have covered the equivalent of the core of the undergraduate Symbolic Systems Program requirements as described in that section of this bulletin, including courses in artificial intelligence (AI), cognitive science, linguistics, logic, and philosophy. The graduate program is designed with this background in mind. Students missing part of this background may need additional course work. Aside from the required course work below, the Ph.D. requirements are the same as for the regular program.

**Courses of Study**—The program consists of two years of courses and two years of dissertation work. Students are required to take the following courses in the first two years:

1. Six Philosophy courses:
   a) two of the following: 360, 370, 380, 381
   b) one course in the history of modern philosophy
   c) two quarters of graduate logic courses from among 350A, 351A, 352A, 353A
   d) at least one additional seminar in the general area of symbolic systems: e.g., 354, 358
2. Five cognitive science and computer science courses:
   a) at least two courses in cognitive psychology
   b) two or three graduate courses in computer science, at least one in AI and one in theory
3. Three linguistics and computational linguistics courses:
   a) graduate courses on natural language that focus on two of the following areas: phonetics and phonology, syntax, semantics, or pragmatics
   b) one graduate course in computational linguistics, typically LINGUIST 239
4. At least two additional graduate seminars at a more advanced level, in the general area of the program, independent of department. These would typically be in the area of the student’s proposed dissertation project.

The requirements for the third year are the same as for other third-year graduate students in philosophy: a dissertation proposal, creation of a dissertation committee, and at least three approved graduate courses and seminars. The dissertation committee must include at least one member of the Department of Philosophy and one member of the Program in Symbolic Systems outside the Department of Philosophy.

The requirement for the fourth year is the same as for the other graduate students in philosophy: a department oral on an initial draft of part of the dissertation, a fourth year colloquium, and a University oral exam when the dissertation is essentially complete.
5JOINT PROGRAM IN ANCIENT PHILOSOPHY

This program is jointly administered by the Departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers (with a strong specialization in ancient languages and philology) or classicists (with a concentration in philosophy).

Students are admitted to the program by either department. Graduate students admitted by the Philosophy department receive their Ph.D. from the Philosophy department; those admitted by the Classics department receive their Ph.D. from the Classics department. For Philosophy graduate students, this program provides training in classical languages, literature, culture, and history. For Classics graduate students, this program provides training in the history of philosophy and in contemporary philosophy.

Each student in the program is advised by a committee consisting of one professor in each department.

Requirements for Philosophy Graduate Students:

These are the same as the proficiency requirements for the Ph.D. in Philosophy with the following exception: if the student has already taken two courses in modern philosophy, there is no need to take a course in modern philosophy to satisfy proficiency requirement 1.a.2.

One year of Greek is a requirement for admission to the program. If students have had a year of Latin, they are required to take 3 courses in second- or third-year Greek or Latin, at least one of which must be in Latin. If they have not had a year of Latin, they are then required to complete a year of Latin, and take two courses in second- or third-year Greek or Latin.

Students are also required to take at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Classics department and two of which must be in the Philosophy department.

GRADUATE DEGREES IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

See the description in the “History and Philosophy of Science and Technology” section of this bulletin.

GRADUATE FELLOWSHIPS AND ASSISTANTSHIPS

A limited amount of fellowship support is available for Ph.D. students in philosophy. Students request aid by checking the appropriate box on the application form. Details of this program may be obtained from the department. Note that a condition of financial aid may be teaching assistance that goes beyond the Ph.D. requirement.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. See the quarterly Time Schedule for revised listings.

INTRODUCTORY

These courses acquaint the student with some of the most important problems, positions, and methods in Philosophy. Some are designed to give general preparation for further work in Philosophy. Some apply the philosopher’s approach to particular problems and subjects encountered in other areas of study.

PHIL 10. God, Self, and World: An Introduction to Philosophy — Traditional philosophical problems including the existence of God, how and what one can know about the world, how to understand the nature of the mind and its relation to the body, and whether people have free will. Paradoxes. Readings include classical and contemporary texts. GER: DB-Hum

5 units, Aut (Perry)

PHIL 12N. Being at Home as an Ethical Concept — Stanford Introductory Seminar. Preference to freshmen. The ethical significance of the home in literature and philosophy. How people build, leave, return to, or give up on homes. How a stance towards the home shapes ideas of self and society. Case studies may include other cultures such as China. GER: DB-Hum

3 units, Aut (Moravcsik)

PHIL 13N. What is the Truth? — Stanford Introductory Seminar. Preference to freshmen. This question can be answered precisely in some important cases. In some of those cases, truth can be established through proof. Successes in this quest for certified truth are closely connected to successes of automation of reasoning. Recommended: 5 units AP in Mathematics, or 5 units in Stanford Mathematics courses with a grade of A. GER: DB-Hum

3 units, Spr (Mints)

PHIL 15N. Freedom, Community, and Morality — Stanford Introductory Seminar. Preference to freshmen. Does the freedom of the individual conflict with the demands of human community and morality? Or, as some philosophers have maintained, does the freedom of the individual find its highest expression in a moral community of other human beings? Readings include Camus, Mill, Rousseau, and Kant. GER: DB-Hum

3 units, Win (Friedman)

PHIL 16N. Values and Objectivity — Stanford Introductory Seminar. Preference to freshmen. What is meant by the objectivity of beliefs and attitudes? Can the commitment of science to truthfulness be free of particular perspectives and subjective influence? Is objectivity a matter of degree relative to the kind of inquiry undertaken? Readings from philosophy of science, moral philosophy, and philosophy of mind. GER: DB-Hum

3 units, Win (Friedman)

PHIL 20. Introduction to Moral Philosophy — (Same as ETHICSOC 20.) What is the basis of moral judgment? What makes right actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous character? Answers to classic questions in ethics through the works of traditional and contemporary authors. GER: DB-Hum, EC-EthicReas

5 units, Win (Schapiro)

PHIL 30. Introduction to Political Philosophy — (Same as ETHICSOC 30.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER: DB-Hum, EC-EthicReas

5 units, Aut (Hussain)

PHIL 50. Introductory Logic — (Formerly 57.) Propositional and predicate logic; emphasis is on translating English sentences into logical symbols and constructing derivations of valid arguments. GER: DB-Math

4 units, Aut, Spr (Lafave)

PHIL 60. Introduction to Philosophy of Science — (Same as HPS 60.) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER: DB-Hum

5 units, Spr (Longino)

PHIL 61. Philosophy and the Scientific Revolution — (Same as HPS 61.) The relationship between the scientific revolution of the 17th century that resulted in the birth of modern science and the contemporaneous intellectual developments constituting the birth of modern philosophy. Readings focus on Galileo and Descartes. GER: DB-Hum

5 units, Aut (Friedman)

PHIL 77. Methodology in Ethics: Translating Theory into Practice — (Same as ETHICSOC 77.) Ideally, social policies are informed by ethical thought and reflection, but doing good in the world requires the active translation of moral theory and political philosophy into action. What kinds of empirical data are relevant to social decision making, and how should they be collected, evaluated, and integrated into normative analysis? What assumptions about human nature are in play? How should diverse cultural values be addressed? Case studies from biomedical science, business, and government.

4 units, Spr (Jones)

PHIL 80. Philosophy and Technology — Stanford Introductory Seminar. Preference to freshmen. How should technological changes be evaluated and integrated into ethical thinking? This question can be answered precisely in some important cases. In some of those cases, technology can be established through proof. Successes in this quest for certified technology are closely connected to successes of automation of reasoning. Recommended: 5 units AP in Computer Science, or 5 units in Stanford Computer Science courses with a grade of A. GER: DB-Hum

3 units, Win (Lalezari)
PHIL 78. Medical Ethics—(Same as ETHICSOC 78.) Introduction to moral reasoning and its application to problems in medicine: informed consent, the requirements and limits of respect for patients’ autonomy, surrogate decision making, euthanasia and physician-assisted suicide, and abortion. GER:DB-Hum, EC-Gender
4 units, Spr (Jaworska)

PHIL 80. Mind, Matter, and Meaning—Central topics in philosophy: free will and determinism, the relation of mind and body, and whether machines can think. Emphasis is on analytical writing skills. Prerequisite: introductory philosophy course. GER:DB-Hum, WIM
5 units, Win (Crimmins), Spr (Taylor)

PHIL 81. Philosophy and Literature—(Same as FRENG 181, ITALGEN 181.) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DLCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum
4 units, Aut (Landy, Anderson)

HISTORY OF PHILOSOPHY

100-103 are surveys of important figures and movements in Western philosophy. Other courses cover particular periods, movements, and figures in the history of philosophy. Prospective Philosophy majors should take as many as possible during the sophomore year.

PHIL 100. Greek Philosophy—Greek philosophical thought, covering Socrates, Plato, Aristotle, and the Hellenistic schools (the Epicureans, the Stoics, and the Skeptics). Topics: the nature of the soul, virtue and happiness, knowledge, and reality. GER:DB-Hum
4 units, Aut (Bobonich)

PHIL 102. Modern Philosophy, Descartes to Kant—Major figures in early modern philosophy in epistemology, metaphysics, and philosophy of mind. Writings by Descartes, Locke, Leibniz, Berkeley, Hume, and Kant. GER:DB-Hum
4 units, Spr (De Pierris)

PHIL 103. 19th-Century Philosophy—Focus is on ethics and the philosophy of history. Works include Mill’s Utilitarianism, Hegel’s The Philosophy of World History, Marx’s Economic and Philosophical Manuscripts, Kierkegaard’s The Sickness Unto Death, and Nietzsche’s On the Genealogy of Morals. GER:DB-Hum
4 units, Win (A. Wood)

PHIL 107/207. Plato’s Ontology and Mathematics—(Graduate students register for 207.) Plato’s theories on parts of reality.
3 units (Moravcsik) not given 2005-06

PHIL 115/215. Problems in Medieval Philosophy: Western Medieval Science—(Graduate students register for 215.) Aristotle, Avicenna, Rufus, Aquinas, and Ockham on atomism, creationism, and substantial change. Encountering the competing claims of Aristotelian philosophy and revealed religion, medieval natural philosophers asked whether the world always existed, whether the past was finite, whether the world will end, what elements comprise the world, whether it is made of indivisible atoms or continuous substances, whether each substance or individual has a single or multiple natures, and whether elements change into another. May be repeated for credit. GER:DB-Hum
3-5 units, Win (R. Wood)

PHIL 117/217. Aristotle on Substance—(Graduate students register for 217.) Did Aristotle have a coherent notion of substantiality, and if so, what key properties must substances have? The implications of Aristotle’s theory of categories for his theories of substance.
4 units, Spr (Moravcsik)

PHIL 120/220. Hume—(Graduate students register for 220.) Hume’s theoretical philosophy, in particular, skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self. GER:DB-Hum
4 units, Spr (De Pierris)

PHIL 121/221. Descartes—(Graduate students register for 221.) Descartes’s philosophical writings on rules for the direction of the mind, method, innate ideas and ideas of the senses, mind, God, eternal truths, and the material world. GER:DB-Hum
4 units (De Pierris) not given 2005-06

PHIL 122/222. Hegel’s Phenomenology of Spirit—(Graduate students register for 222.) The aims and parts of the execution of the philosophical project of Hegel’s first major work. Issues in epistemology, metaphysics, and ethics; and the relationship between the systematic and historical aspects of Hegel’s project. May be repeated for credit. Prerequisite: course in the history of modern philosophy. GER:DB-Hum
4 units, Spr (A. Wood)

PHIL 125/225. Kant’s First Critique—(Graduate students register for 225.) The founding work of Kant’s critical philosophy emphasizing his contributions to metaphysics and epistemology. His attempts to limit metaphysics to the objects of experience. Prerequisite: course dealing with systematic issues in metaphysics or epistemology, or with the history of modern philosophy. GER:DB-Hum
4 units, Win (A. Wood)

4 units, Spr (Schapiro)

PHIL 127/227. Kant’s Critique of the Power of Judgment—(Graduate students register for 227.) Kant’s third and final critique investigates the transcendental grounds of aesthetic taste and the use of teleology in the study of nature, with the aim of unifying theoretical and practical reason in the critical system. The analytic of the beautiful, the role of taste and artworks in human life, and the methodology of teleological judgment which is to unite the teleology of nature and morals into a single system of practical reason. GER:DB-Hum
4 units (A. Wood) not given 2005-06

PHIL 132/232. Existentialism—(Graduate students register for 232.) Focus is on the existentialist preoccupation with human freedom. What constitutes authentic individuality? What is one’s relation to the divine? How can one live a meaningful life? What is the significance of death? A rethinking of the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including their social and political consequences in light of 20th-century fascism and feminism. GER:DB-Hum
4 units, Aut (Anderson)

PHIL 133/233. Major Figures in 20th-Century Philosophy—(Graduate students register for 233.) Husserl, Heidegger, Sartre, Gadamer, Wittgenstein, Quine, Davidson, and Rawls. Readings from their central writings. GER:DB-Hum
4 units (Føllesdal) not given 2005-06

PHIL 134/234. Phenomenology, Existentialism, and Hermeneutics—(Graduate students register for 234.) Husserl’s phenomenology as a key to understanding contemporary continental philosophy, notably Heidegger’s and Sartre’s existentialisms, Gadamer’s hermeneutics, and recent trends in contemporary German and French philosophy. The role of intentionality in contemporary debates in cognitive science. Husserl’s Ideas and Cartesian Meditations read in full; selections from Heidegger, Sartre, and Gadamer. GER:DB-Hum
4 units (Føllesdal) not given 2005-06
PHIL 135/235. Wittgenstein — (Graduate students register for 235.) The main themes and claims in Wittgenstein’s later work concentrating on his views about meaning, mind, knowledge, the nature of philosophical perplexity, and the nature of philosophical progress in his Philosophical Investigations. Emphasis is on the relationship between the novel arguments of the Investigations and its ways of writing up the results of philosophical questioning. GER:DB-Hum
4 units (Hills) not given 2005-06

PHIL 138/238. Recent European Philosophy: Between Nature and History — (Graduate students register for 238.) Themes and thinkers in 20th-century continental philosophy. Emphasis is on novel understandings of time, language, and cultural power. Thinkers include Heidegger, Benjamin, Saussure, and Foucault, together with precursors and contemporary admirers and critics. GER:DB-Hum
4 units (Hills) not given 2005-06

PHIL 143/243. Rationalists — (Graduate students register for 243.) Developments in 17th-century continental philosophy. Descartes’s views on mind, necessity, and knowledge, Spinoza and Leibniz with attention to their own doctrines and their criticism of their predecessors. Prerequisite: 102. GER:DB-Hum
4 units, Aut (Dunlop)

PHIL 147/247. History of Analytic Philosophy — (Graduate students register for 247.) Theories of knowledge in Frege, Carnap, and Quine. Emphasis is on conceptions of analyticity and treatment of logic and mathematics. Prerequisite: 50 and one course numbered 150-165 or 181-190. GER:DB-Hum
4 units, Win (Dunlop)

LOGIC AND PHILOSOPHY OF SCIENCE

PHIL 150/250. Basic Concepts in Mathematical Logic — (Graduate students register for 250.) (Formerly 159.) The concepts and techniques used in mathematical logic, primarily through the study of the language of first order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability. GER: DB-Math
4 units, Aut (Pauly)

PHIL 151/251. First-Order Logic — (Graduate students register for 251.) (Formerly 160A.) The syntax and semantics of sentential and first-order logic. Concepts of model theory, Gödel’s completeness theorem and its consequences: the Löwenheim-Skolem theorem and the compactness theorem. Prerequisite: 150 or consent of instructor. GER:DB-Math
4 units, Win (Pauly)

PHIL 152/252. Computability and Logic — (Graduate students register for 252; formerly 160B.) Approaches to effective computation: recursive functions, register machines, and programming styles. Proof of their equivalence, discussion of Church’s thesis. Elementary recursion theory. These techniques used to prove Gödel’s incompleteness theorem for arithmetic, whose technical and philosophical repercussions are surveyed. Prerequisite: 151. GER:DB-Math
4 units, Spr (Pauly)

PHIL 154/254. Modal Logic — (Graduate students register for 254.) Emphasis is on action and information. The interdisciplinary nature of the field, including philosophy, computer science, linguistics, mathematics, and economic game theory. Prerequisite: 150 (formerly 159) or preferably 151 (formerly 160A). GER:DB-Math
4 units (van Benthem) not given 2005-06

PHIL 155/255. Concepts of Freedom — (Graduate students register for 255.) Historical and current concepts of freedom. The views of Hume, Kant, Mill, A.V. Dicey, and Hayek; recent works, including economic concepts of freedom. Recent work on free will as a properly empirical concept. GER:DB-Hum
4 units, Spr (Suppes)

PHIL 156. Popper, Kuhn, and Lakatos — (Same as EDUC 214.) These 20th-century philosophers of science raise fundamental issues dealing with the nature of scientific progress: the rationality of change of scientific belief, science versus non-science, role of induction in science, truth or verisimilitude as regulative ideals. Their impact in the social sciences and applied areas such as educational research. GER:DB-Hum
3 units, Spr (Phillips)

PHIL 157/257. Topics in Philosophy of Logic — (Graduate students register for 257.) Disputed foundational issues in logic; the question of what the subject matter and boundaries of logic are, such as whether what is called second-order logic should be counted as logic. What is the proper notion of logical consequence? May be repeated for credit. Pre- or corequisite: 151, or consent of instructor.
3 units, Win (Feferman)

PHIL 161. Set Theory — (Enroll in MATH 161.)
3 units, Win (de Queiroz)

PHIL 162/262. Philosophy of Mathematics — (Graduate students register for 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: 151 or consent of instructor.
4 units (Staff) not given 2005-06

PHIL 164/264. Central Topics in the Philosophy of Science: Theory and Evidence — (Graduate students register for 264.) The relation of theory to evidence and prediction, problems of induction, empirical under-determination of theory by evidence, and theory choice. Hypothetico-deductive, Bayesian, pragmatic, and inference to the best explanation models of explanation. The semantic approach to theories. GER:DB-Hum
4 units, Win (Ryckman)

PHIL 165/265. Philosophy of Physics — (Graduate students register for 265.) The philosophy of quantum mechanics. From classical to quantum mechanics, the double slit experiment, Schrödinger’s wave equation, the Born rule, Heisenberg’s uncertainty principle, the measurement problem, EPR and Bell’s theorem, interpretations of quantum theory including the relative state formulation, and quantum logic. May be repeated for credit. GER:DB-Hum
4 units, Spr (Ryckman)

PHIL 167A/267A. Philosophy of Biology — (Graduate students register for 267A.) Philosophical questions raised by evolutionary biology. The concepts of fitness and adaptation. How are hypotheses about adaptation to be tested? How should organisms be classified? How can the history of the phylogenetic branching process be inferred? Are there laws in evolutionary biology? Are theories in biology reducible to theories in physics? What does evolutionary biology contribute to the understanding of human mind and culture? GER:DB-Hum
4 units (Staff) not given 2005-06

PHIL 167B/267B. Philosophy, Biology, and Behavior — (Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: evolutionary versus proximate causal explanations of behavior; genetic and other determinisms; and classification and measurement of behavior. Prerequisite: 167A; or one PHIL course and either one BIOSCI course or Human Biology core; or equivalent with consent of instructor.
4 units, Win (Longino)

ETHICS, AESTHETICS, AND SOCIAL AND POLITICAL PHILOSOPHY

PHIL 170/270. Ethical Theory — (Graduate students register for 270; same as ETHICSOC 170) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER:DB-Hum
4 units, Spr (Jaworska)
PHIL 171/271. Political Philosophy — (Graduate students register for 271; same as ETHICSOC 171.) Questions about a just society. Which liberties should a just society protect: economic, political, expressive? What sorts of equality should a just society ensure: opportunity, outcome, economic, political? Can a just society ensure both liberty and equality? Focus is on answers from rival, contemporary theories of justice: utilitarianism, libertarianism, and egalitarian liberalism. GER:DB-Hum, EC-EthicReas
4 units, Win (Satz)

PHIL 173B/273B. Metaethics — (Graduate students register for 273B.) Can moral and ethical values be justified or is it just a matter of opinion? Is there a difference between facts and values? Are there any moral truths? Does it matter if there are not? Focus is not on which things or actions are valuable or morally right, but what is value or rightness itself. Contemporary metaethics. Prerequisites: 80, 181, and an ethics course. GER:DB-Hum
4 units, Win (Hussain)

PHIL 174/274. Freedom and the Practical Standpoint — (Graduate students register for 274.) Confronted with the question of how to act, people think of themselves as freely determining their own conduct. Natural science poses a challenge to this by explaining all events, including human actions, in terms of causal processes. Are people justified in thinking of themselves as free? Major philosophical approaches to this question: incompatibilism, compatibilism, and the two-standpoint view. GER:DB-Hum
4 units, Aut (Ferrero)

PHIL 175M/275M. Agency and Ethics — (Graduate students register for 275M.) Human beings as agents; agency as the basis of much of ethics. GER:DB-Hum
4 units, Spr (Moravcsik)

PHIL 176/276. Political Philosophy: The Social Contract Tradition — (Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Answers by political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant. GER:DB-Hum
4 units (Hills) not given 2005-06

PHIL 176B/276B. The Economic Individual in the Behavioral Sciences — (Graduate students register for 276B.)
4 units, Aut (Satz, Gordon)

PHIL 177. Philosophical Issues Concerning Race and Racism — (Same as POLISCI 136.) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in racism? How should ethnic and racial identities be viewed to secure the conditions in which humanity can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance among competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion. GER:DB-Hum, EC-AmerCul
4 units (Satz) not given 2005-06

PHIL 178. Ethics in Society Honors Seminar — (Same as ETHICSOC 190.) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.
3 units, Win (Reich)

EPISTEMOLOGY, METAPHYSICS, PHILOSOPHY OF MIND, AND PHILOSOPHY OF LANGUAGE

PHIL 179/279. Semantics: Theories of Meaning — (Graduate students register for 279.) What makes ambiguity, polysemy, and context sensitivity needed in natural languages? Why is this not the case with formal languages. How to develop semantics for context-sensitive structures. GER:DB-Hum
4 units, Aut (Moravcsik)

PHIL 181/281. Philosophy of Language — (Graduate students register for 281.) The study of conceptual questions about language as a focus of contemporary philosophy both for its inherent interest and because philosophers see questions about language as behind perennial questions in other areas of philosophy including epistemology, the philosophy of science, metaphysics, and ethics. Introduction to key concepts and debates about the notions of meaning, truth, reference, and language use, with relations to psycholinguistics and formal semantics. Readings from philosophers such as Frege, Russell, Wittgenstein, Grice, and Kripke. Prerequisites: 80 and background in logic.
4 units, Aut (Crimmins)

PHIL 182. Seminar in Semantics: Situation Semantics — (Same as LINGUIST 237.) Theory and applications of situation semantics to natural languages and the flow of information. May be repeated for credit.
1-4 units, Spr (Perry, Peters)

PHIL 183/283. Quine — (Graduate students register for 283.) The philosophy of Quine: meaning and communication; analyticity, modalty, reference, and ontology; theory and evidence; naturalism; mind, and the mental. GER:DB-Hum
4 units, Aut (Follesdal)

PHIL 184/284. Theory of Knowledge — (Graduate students register for 284.) Competing theories of epistemic justification (foundationalism, coherentism, and externalism) against the background of radical skepticism. Readings from contemporary sources. Prerequisite: 80 or consent of instructor. GER:DB-Hum
4 units, Spr (Hills)

PHIL 186/286. Philosophy of Mind — (Graduate students register for 286.) Debates concerning the nature of mental states, their relation to physical states of the human body, how they acquire their content, how people come to know about them in themselves and others, and the roles they play in the explanation of human conduct.
4 units (Staff) not given 2005-06

PHIL 187/287. Philosophy of Action — (Graduate students register for 287.) What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is intention? What is it to act intentionally? What is it to act for a reason? Are the reasons for which one acts causes of one’s action? What is it to act autonomously? Readings include Davidson and Frankfurt. Prerequisite: 80. GER:DB-Hum
4 units, Win (Bratman)

PHIL 188. Personal Identity — People seem to remain the same despite the changes they undergo during their lives. Why? The answer can influence one’s beliefs about whether people are essentially bodies or minds, and whether one’s own survival matters. Readings include John Locke, Thomas Reid, David Hume, Bernard Williams, and Derek Parfit. GER:DB-Hum
4 units, Aut (Ferrero)

PHIL 189. Philosophical Applications of Cognitive Science — The relevance of recent discoveries about the mind to philosophical questions in metaphysics, epistemology and philosophy of science, and ethics. Questions include: is there a right way to carve up the world into categories? Are the rules of logic objective, or just the way we happen to think? Is there such a thing as objective right and wrong?
4 units (Staff) not given 2005-06

PHIL 190. Introduction to Cognitive Science — (Same as SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER: DB-SocSci
4 units, Spr (Bresnan, van Benthem)
PHIL 193Q. The Art of the Movies: Story, Drama, and Image — (Same as HUMNTIES 193Q.) A philosophical study of how movies coordinate and transform elements they borrow from older arts of literary narrative, live theater, and graphic illustration. Examples from the career of Alfred Hitchcock. GER:DB-Hum
4 units, Win (Hills)

PHIL 194D. Undergraduate Seminar: Practical Reasoning — Priority to majors. Enrollment limited to 12. May be repeated for credit. Prerequisite: background in philosophy, 80.
4 units, Aut (Bratman)

PHIL 194E. Undergraduate Seminar: Ethical Antitheory — May be repeated for credit.
4 units, Win (Hills)

PHIL 194R. Topics in Metaphysics and Epistemology — Priority to majors. Enrollment limited to 12.
4 units, Win (Crimmins)

PHIL 196. Tutorial, Senior Year
5 units, Aut, Win, Spr, Sum (Staff)

PHIL 197. Individual Work, Undergraduate
1-15 units, Aut, Win, Spr, Sum (Staff)

PHIL 198. The Dualist — Weekly meeting of the editorial board of The Dualist, a national journal of undergraduate work in philosophy. Open to all undergraduates. May be taken 1-3 quarters. (AU)
1 unit, Aut, Win, Spr (Potochnik, Yap)

PHIL 199. Seminar for Prospective Honors Students — Open to juniors intending to do honors in philosophy. Methods of research in philosophy. Topics and strategies for completing honors project.
2 units, Spr (Staff)

PRIMARILY FOR GRADUATE STUDENTS

PHIL 224. Kant’s Philosophy of Physical Science — Kant’s Metaphysical Foundations of Natural Science (1786), published between the first (1781) and second (1787) editions of the Critique of Pure Reason, in the scientific and philosophical context provided by Newtonian natural philosophy and the Leibnizean tradition. The place of this work in the development of Kant’s thought. Prerequisite: acquaintance with either Kant’s theoretical philosophy or the contemporaneous scientific context, principally Newton, Leibniz, and Euler.
4 units, Aut (Friedman)

PHIL 230. The Philosophical and Educational Thought of John Dewey — (Same as EDUC 304.) Dewey’s pragmatic philosophy and educational thought; his debt to Darwin, Hegel, Peirce, and James; his educational writings including Democracy and Education; and his call for a revolution in philosophy in Reconstruction in Philosophy.
4 units (Philips) not given 2005-06

PHIL 237. Nietzsche — Preference to Ph.D. students. Nietzsche’s later works emphasizing The Gay Science, Beyond Good and Evil, and On the Genealogy of Morals. The overall shape of Nietzsche’s philosophical and literary projects, and his core doctrines such as eternal recurrence, will to power, and perspectivism. Problems such as the proper regulation of belief, and the roles of science, morality, art, and illusion in life.
4 units (Anderson) not given 2005-06

PHIL 239. Teaching Methods in Philosophy — For Ph.D. students in their first or second year who are or are about to be teaching assistants for the department. Discussion of issues about the teaching of philosophy.
1-4 units, Spr (Darby)

PHIL 240. Individual Work for Graduate Students — May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

PHIL 241. Dissertation Development Seminar
3 units, Sum (Staff)

PHIL 248. Medieval Latin Paleography — (Formerly PHIL 314.) The history of medieval scripts and medieval abbreviation. Dating and placing Latin European medieval manuscripts. Editing medieval texts in philosophy, psychology, physics, and theology. Class project: an anonymous commentary on Aristotle’s ethics preserved in a Florentine manuscript.
3-5 units, Spr (R. Wood)

PHIL 258. Minds and Machines — Readings on arguments concerning mechanical models of the mind including Turing machine models to which Gödel’s incompleteness theorems are relevant, and connectionist (neural net) models. Prerequisites: 151 (formerly 160A), 152, or equivalents. Recommended: 389.
4 units (Feferman) not given 2005-06

PHIL 289. Seminar on the Language of Thought — The relation of recent research that favors the hypothesis that mental phenomena can be understood as computations over representations in a language of thought enrooted in people’s brains. How this program promises solutions to traditional problems in the philosophy of mind while leaving behind pretheoretic intuitions such as about qualia or consciousness. Readings include Rey, Fodor, Dennett, Searle, and Levine.
4 units (Staff) not given 2005-06

PHIL 313. Aristotle’s Psychology and Philosophy of Mind — Primary reading is De Anima.
4 units (Bobonich) not given 2005-06

PHIL 318. Aristotle’s Ethics — Topics in Aristotle’s ethical theory and related parts of his psychology.
4 units, Win (Bobonich)

PHIL 323. Kant’s Criticism of Metaphysics — Motivations and strategies of Kant’s criticisms of traditional metaphysics in the Critique of Pure Reason. Leibnizian and Wolffian versions of the concept containment theory of truth and the Wolffian ideal of a conceptual system of metaphysical knowledge. Kant’s analytic/synthetic distinction, focusing on its place in the rejection of metaphysics and in arguments about the ideas of reason in the transcendental dialectic. Prerequisite: course on the first Critique, or consent of instructor.
4 units, Spr (Anderson)

PHIL 325. Modern Seminar — (Same as HUMNTIES 325.) Modern anxieties about the place of human concerns within a disenchanted natural world, focusing on texts of philosophy, social theory, and imaginative literature. Cultural and psychological consequences of perceived decline in and threats to religious faith. Authors may include Schiller, Schopenhauer, Coleridge, Kierkegaard, Marx, Baudelaire, Darwin, Nietzsche, Weber, Eliot, Woolf, Sartre, and Camus.
3-5 units, Win (Anderson)

PHIL 328. Fichte’s Theory of Intersubjectivity — The founder of the German Idealist movement who adopted but revised Kant’s project of transcendental philosophy basing it on the principle of awareness of free self-activity. Awareness of other selves and of ethical relations to them as a necessary condition for self-awareness. His writings from 1793-98 emphasizing the place of intersubjectivity in his theory of experience.
4 units (A. Wood) not given 2005-06

PHIL 335. Topics in Aesthetics
4 units, Aut (Hills)

PHIL 350A. Model Theory — (Formerly PHIL/MATH 290A.) Language and models of the first order, predicate calculus, complete and decidable theories. Fraisse-Ehrenfeucht games. Preservation theorems. Prerequisites: 150, 151, or equivalent.
3 units, Win (Mints)

PHIL 350B. Model Theory — (Formerly PHIL/MATH 290B.) Kripke (possible world) semantics of intuitionistic and modal logics. Completeness results and strategies in automated deduction. Algebraic models. Second order systems. May be taken independently of 350A. Prerequisites: 151, 154, or equivalent.
3 units (Staff) not given 2005-06
PHIL 351A,B. Recursion Theory—(Formerly PHIL 291A/MATH 291A.) Theory of recursive functions and recursively enumerable sets. Register machines, Turing machines, and alternative approaches. Gödel’s incompleteness theorems. Recursively unsolvable problems in mathematics and logic. Introduction to higher recursion theory. The theory of combinators and the lambda calculus. Prerequisites: 151, 152, and 161, or equivalents.
3 units, A: Win (Feferman), B: Spr (de Queiroz)

PHIL 352A,B. Set Theory—(Same as MATH 292A,B.) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: 151, 152, and 161, or equivalents.
3 units, A: Win, B: Spr (P. Cohen)

3 units, A: (Feferman) not given 2005-06 B: Aut (Mints)

PHIL 354. Topics in Logic—(Formerly PHIL/MATH 294.) Epsilon calculus. Syntax and semantics of first order epsilon calculus. Hilbert’s epsilon substitution method. Recent progress and open problems. Prerequisites: 151, 152, or equivalents.
3 units, Spr (Mints)

PHIL 355. The Logic of Collective Judgments and Beliefs—Topics in deliberative democracy and social epistemology. How do groups arrive at collective judgments? What is a collective belief and how is it formed? How can formal logic provide insights into these notions? Focus is on formal logical models relating to collective judgments and beliefs. Prerequisite: 151 or consent of instructor.
4 units, Win (Pauly)

PHIL 356. Applications of Modal Logic—Applications of modal logic to knowledge and belief, and actions and norms. Models of belief revision to develop a dynamic doxastic logic. A workable modeling of events and actions to build a dynamic deontic logic on that foundation.
3 units (Staff) not given 2005-06

PHIL 358. Logic, Language, and Information—(Formerly 298.) Logical systems for analyzing information structures, communication, and other cognitive actions. Special topics: systems for information update; logic and game theory. Prerequisite: 169 or equivalent background in modal logic.
3 units, Spr (van Benthem)

PHIL 359. Advanced Modal Logic—(Formerly 269.) Mathematical analysis of modal systems, including bisimulation and expressive power, correspondence theory, algebraic duality, completeness and incompleteness, and extended modal logics, up to guarded fragments of first-order logic, fixed-point logics, and second-order logic. Prerequisite: 151, 154/254, or an equivalent background.
4 units (van Benthem) not given 2005-06

PHIL 360. Core Seminar in Philosophy of Science—Limited to first- and second-year Philosophy Ph.D. students.
4 units (Friedman, Ryckman) alternate years, given 2006-07

PHIL 365. Seminar in Philosophy of Science: Structural Realism—This recent version of scientific realism and its differences with standard realism and antirealism. Historical antecedents in Hertz, Poincaré, Russell, Eddington, and Weyl.
4 units (Ryckman) not given 2005-06

PHIL 370. Core Seminar in Ethics—(Formerly 270.) Limited to first- and second-year students in the Philosophy Ph.D. program.
4 units, Aut (Hussain)

PHIL 372. Problems in Kantian Ethics—May be repeated for credit.
4 units, Win (Schapiro)

PHIL 374. Valuing—What is it to value something? How is valuing related to desire? Judging something to be valuable, caring, the emotions, or having policies? What is the relation between valuing and the will? Are there reasons for valuing things or pursuing what we value? Readings from contemporary literature including Bratman, Frankfurt, Harman, Helm, Raz, Scheffler, and Velleman.
4 units (Jaworska) not given 2005-06

PHIL 376. Agency and Personal Identity—How philosophical theories of agency interact with philosophical accounts of personal identity. Readings include David Velleman and Harry Frankfurt.
4 units, Spr (Bratman, Perry)

PHIL 377. Topics in Democratic Theory—(Same as POLSCI 333.) Modern approaches to democratic theory including liberal, communitarian, republican, and participatory theories beginning with the works of Locke, Rousseau, and Mill. Writers: John Rawls, Ronald Dworkin, Jeremy Waldron, Joshua Cohen, Habermas, Petit, Iris Marion Young, Ian Shapiro, and Amy Gutmann.
3-5 units (Ferejohn, Satz) alternate years, given 2006-07

PHIL 378. Problems in Medical Ethics—Focus is on recent philosophical work concerning the moral status of non-paradigmatic human beings such as fetuses or Alzheimer’s patients, and non-ideal conditions of decision making such as concretized emotions or exploitation. Prerequisite: 170 or equivalent.
4 units, Win (Jaworska)

PHIL 379. Graduate Seminar in Metaethics—Theories about the meaning of ethical terms and the content of ethical judgments. Do these theories fit with best accounts of human agency and practical deliberation? Readings from recent literature. Prerequisites: 173B/273B, 181, 187/287 or equivalent.
4 units (Hussain) not given 2005-06

PHIL 380. Core Seminar in Metaphysics and Epistemology—Limited to first- and second-year students in the Philosophy Ph.D. program.
4 units, Win (Perry)

PHIL 381. Core Seminar in Philosophy of Language—Limited to first- and second-year students in the Philosophy Ph.D. program.
4 units (Perry) alternate years, given 2006-07

2 units, Aut (Esser, Suppes, Føllesdal)

PHIL 383. Justification and Entitlement—The recent idea that one is entitled to certain beliefs, without having to justify them, has been garnering support from rationalist and empiricist philosophers. What epistemic entitlement might be, whether anyone has it, and what it might be good for. Readings include Goldman, Burge, Peacocke, Sellar, and Williams.
4 units (Lawlor) not given 2005-06

PHIL 385B. Topics in Metaphysics and Epistemology
4 units, Spr (Crinmins)

PHIL 386B. Subjectivity—Readings from Husserl and others in the phenomenological tradition, and recent work on intentionality and consciousness by philosophers and cognitive scientists.
4 units, Aut (Føllesdal, Perry)

PHIL 387. Practical Reason—Contemporary work on practical rationality.
4 units (Bratman) not given 2005-06
PHIL 388. Graduate Seminar in Philosophy of Language
4 units, Win (Taylor)

PHIL 435. Topics in the Philosophy of Social Science—(Enroll in POLISCI 435.)
5 units, Spr (Stone)

PHIL 450. Thesis
1-15 units, Aut, Win, Spr, Sum (Staff)

PHYSICS

Emeriti: (Professors) Stanley S. Hanna, William A. Little, Walter E. Meyerhof, David M. Risdon, H. Alan Schwetman, Richard Taylor (SLAC), Mason R. Yearian; (Professor, Research) John P. Turneaure; (Professor, Courtesy) Peter A. Sturrock, Robert Wagener
Chair: Stanley G. Wojcicki
Associate Chair: Robert Wagener
Directors of Graduate Study: Sarah Church, Shoucheng Zhang
Director of Undergraduate Study: Roger Romani
Associate Professors: Tom Abel, Shamit Kachru, Roger W. Romani, Eva Silverstein
Assistant Professors: Sarah Church, David Goldhaber-Gordon, Hari Manoharan, Steve Allen
Professors (Research): John A. Lipa, Phillip H. Scherrer, Todd I. Smith
Courtesy Professor: Richard N. Zare
Lecturers: Alexander Kossovich, Gregorz M. Madejski, Rick Pam
Consulting Professors: Ralph DeVoe, Barbara Jones, Alan Title
Visiting Professors: Gerald Fisher, Allen Tucker, Gareth Williams
Department Offices: 382 Via Pueblo Mall
Mail Code: 94305-4060
Phone: (650) 723-4344
Web Site: http://www.stanford.edu/dept/physics

Courses in Physics have the subject code PHYSICS. For a complete list of subject codes, see Appendix.

The study of physics is undertaken by three principal groups of students: those preparing for careers in professional fields that require a knowledge of physics, such as medicine or engineering; and those preparing for careers in physics or related fields, including teaching and research in colleges and universities, research in federally funded laboratories and industry, and jobs in technical areas. Physics courses numbered below 100 are intended to provide a sound foundation in physics or related fields, including teaching and research in colleges and universities, research in federally funded laboratories and industry, and jobs in technical areas. Physics courses numbered below 100 are intended to provide a sound foundation in physics or related fields, including teaching and research in colleges and universities, research in federally funded laboratories and industry, and jobs in technical areas.

The Physics Library, a center for the reading and study of physics and astronomy at all levels, includes print and electronic access to current subscriptions and back sets of important journals together with textbooks, dissertations, scholarly monographs, and the collected works of the most eminent physicists.

Course work is designed to provide students with a sound foundation in both classical and modern physics. Students who wish to specialize in astronomy, astrophysics, or space science should also consult the “Astronomy Course Program” section of this bulletin.

Three introductory series of courses include labs in which undergraduates carry out individual experiments. The Intermediate and Advanced Physics Laboratories offer facilities for increasingly complex individual work. Laboratories provide students with a sound basis for more advanced laboratory work, including the conception, design, and fabrication of laboratory equipment. Undergraduates are also encouraged to participate in research; most can do this through the honors program and/or the summer research program.

Graduate students find opportunities for research in the fields of astrophysics, particle astrophysics, cosmology, experimental particle physics, theoretical particle physics, intermediate energy physics, low temperature physics, condensed matter physics, materials research, atomic physics, laser physics, quantum electronics, coherent optical radiation, novel imaging technologies, and biophysics. Faculty advisers are drawn from many departments, including Physics, Applied Physics, Materials Science and Engineering, Electrical Engineering, and Biological Sciences. Opportunities for research are also available with the faculty at SLAC in the areas of theoretical and experimental particle physics, particle astrophysics, cosmology, and accelerator design.

The number of graduate students admitted to the Department of Physics is strictly limited. Students should submit applications by December 14 for the following Autumn Quarter. Graduate students may normally enter the department only at the beginning of Autumn Quarter.

UNDERGRADUATE PROGRAMS

The study of physics is undertaken by three principal groups of undergraduates: those including physics as part of a general education; those preparing for careers in professional fields that require a knowledge of physics, such as medicine or engineering; and those preparing for careers in physics or related fields, including teaching and research in colleges and universities, research in federally funded laboratories and industry, and jobs in technical areas. Physics courses numbered below 100 are intended to serve all three of these groups. The courses numbered above 100 meet the needs mainly of the third group, but also of some students majoring in other branches of science and in engineering.
ENTRY-LEVEL SEQUENCES
The Department of Physics offers three year-long, entry-level physics sequences, the PHYSICS 20, 40 (formerly 50), and 60 series. The first of these is non-calculus-based, and is intended primarily for those who are majoring in the biological sciences. Such students with AP credit, particularly those who are considering research careers, may wish to consider taking the PHYSICS 20 or 40 series, rather than using AP placement. These introductory series provide a depth and emphasis on problem solving that is of significant value in biological research, which today involves considerable physics-based technology.

For those intending to major in engineering or the physical sciences, or simply wishing a stronger background in physics, the department offers the PHYSICS 40 and 60 series. Either of these satisfy the entry-level physics requirements of any Stanford major. The 60 series is intended for those who have already taken a Physics course at the level of the 40 series, or at least have a strong background in mechanics, some background in electricity and magnetism, and a strong background in calculus. The PHYSICS 40 series begins with mechanics in Winter Quarter, electricity and magnetism in Spring Quarter, and light and heat in Autumn Quarter. While it is recommended that most students begin the sequence with mechanics (PHYSICS 41) in Winter Quarter, those who have had strong physics preparation in high school (such as a score of at least 4 on the Physics Advanced Placement C exam) may start the sequence with PHYSICS 45 in Autumn Quarter.

BACHELOR OF SCIENCE
A calculus-based entry-level series is required, either PHYSICS 61, 63, 64, 65, 67, or 41, 43, 44, 45, 46 (or preferably 67 rather than 44). Students who take the PHYSICS 40 series take PHYSICS 70, which covers the foundations of modern physics. This material is incorporated into the PHYSICS 60 series beginning in 2005-06. Students taking the PHYSICS 60 series in 2005-06 or later do not take PHYSICS 70; instead they must take one advanced Physics elective (100-level or higher). In addition, the following more advanced courses are required: PHYSICS 105, 107 (WIM), 108, 110, 120, 121, 130, 131, 170, and 171; MATH 51, 52, 53, 131; one additional Mathematics course numbered 100 or higher; or PHYSICS 112. MATH 51H, 52H, and 53H may substitute for MATH 51, 52, and 53. It is strongly recommended that students intending to complete a Ph.D. in Physics also take PHYSICS 113, 134, and one or more of the following, depending upon their interests: PHYSICS 152, 153A,B, 160, 161, 172, 181, 204. PHYSICS 113 is designed to be taken in parallel with 110. The department advises the study of some computer science such as CS 106. Mathematics and Physics courses taken to satisfy the department’s major requirements cannot be taken on a credit/no credit basis. Prospective Physics majors are also recommended to take PHYSICS 59, Current Research Topics, in their freshman or sophomore year.

To decide which introductory sequence is appropriate, students contemplating majoring in Physics are urged to consult with the instructor of PHYSICS 61, 41 or 45, or the Director of Undergraduate Study, at the earliest possible date to see which sequence is the most suitable. Students who begin taking an entry level Physics course after their freshman year and wish to major in Physics are generally advised to take the PHYSICS 61, 63, 65 sequence, provided they have previously taken MATH 41.

Undergraduates are offered help with physics problems in the department tutoring center, the Reference Frame, which is staffed Monday through Thursday.

REQUIRED COURSES FOR MAJORS

</table>

* These courses are not required, but 113 and 134 are recommended for students who intend to complete a Ph.D. in Physics.
** Those wishing to do physics theory in graduate school may wish to take a collection of courses in the Department of Mathematics rather than PHYSICS 112.

For sample schedules illustrating how to complete the Physics major, see http://www.stanford.edu/dept/physics/academics/undergrad.html#sample.

CONCENTRATIONS IN PHYSICS

The primary purpose of concentrations in the Physics major is to provide consistent and more formal advising to students who want to concentrate in a particular area of physics during their undergraduate education, or prepare for future studies (e.g., graduate studies) in a particular area of physics. Physics majors are not required to choose a concentration and a concentration does not add any formal requirements to the Physics major. Upon graduation, students will receive a certificate of completion of a concentration.

Students seeking further advice on a given concentration should contact the professor whose name appears next to the respective title of each section below.

A. THEORETICAL PHYSICS (Andrei Linde)
At least four, one quarter courses selected from the following courses, or three courses plus an honors thesis:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 204, Advanced Seminar in Theoretical Physics</td>
<td>A 2</td>
</tr>

<tr>
<td>PHYSICS 262, Introduction to Gravitation</td>
<td>A 2</td>
</tr>
<tr>
<td>PHYSICS 330, 331, 332, Quantum Field Theory</td>
<td>A 2</td>
</tr>
<tr>
<td>PHYSICS 351, 352, Elementary Particle Physics</td>
<td>A 2</td>
</tr>
<tr>
<td>PHYSICS 362, Advanced Extragalactic Astrophysics and Cosmology</td>
<td>A 2</td>
</tr>
<tr>
<td>PHYSICS 364, Advanced Gravitation</td>
<td>A 2</td>
</tr>
</tbody>
</table>

Notes to students taking this concentration:
1. No more than one of the courses should be taken for CR/NC.
2. Students should take either the undergraduate Quantum Mechanics series (PHYSICS 130, 131, 134) or the graduate series (PHYSICS 230-232), but not both for credit.
3. Students should discuss the choice of courses with members of the Institute for Theoretical Physics and/or their major adviser.

B. APPLIED PHYSICS (Hari Manoharan)
At least four, one quarter courses selected from the following courses, or three courses plus an honors thesis:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 172, Physics of Solids I</td>
<td>A 2</td>
</tr>
<tr>
<td>APPPHYS 270, Magnetism and Long Range Order in Solids</td>
<td>A 2</td>
</tr>
<tr>
<td>MATSCI 195, Waves and Diffraction in Solids</td>
<td>A 2</td>
</tr>
</tbody>
</table>
C. BIOPHYSICS (David Goldhaber-Gordon)

We recommend that Physics majors interested in pursuing a career in biophysics consider a minor in Biological Sciences.

D. ASTROPHYSICS (Roger Romani, Sarah Church)

Requirements:
PHYSICS 100. Introduction to Observational and Laboratory Astronomy
PHYSICS 160. Introduction to Stellar and Galactic Astrophysics
PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology

Plus one elective from below or an honors thesis:
PHYSICS 211. Continuum Mechanics
PHYSICS 260. Introduction to Astrophysics and Cosmology
PHYSICS 262. Introduction to Gravitation
PHYSICS 312. Basic Plasma Physics
(prerequisites are PHYSICS 210 and PHYSICS 220)

E. GEOPHYSICS (Rosemary Knight, Geophysics)

At least four, one quarter courses selected from the following courses, or three courses plus an honors thesis:
GEOPHYS 102. Geosphere
GEOPHYS 112. Exploring Geosciences with MATLAB
GEOPHYS 140. Introduction to Remote Sensing
GEOPHYS 150. General Geophysics and Physics of the Earth
GEOPHYS 180. Geophysical Inverse Problems
GEOPHYS 182. Reflection Seismology
GEOPHYS 190. Near-Surface Geophysics
GEOPHYS 262. Rock Physics
GEOPHYS 288. Crustal Deformation

INDIVIDUALLY DESIGNED MAJOR PROGRAM IN TEACHING PHYSICAL SCIENCE

This major, a joint effort of the Department of Physics and the Stanford Teacher Education Program, is designed for students to prepare themselves as high school teachers of physics and general science. Students complete 45-47 units of Physics and related Mathematics courses, 40-43 units of course work in other sciences such as the life sciences, chemistry, and geosciences, and in general issues of science, and 9-15 units of concentration and depth courses. Total program units: 94-105. Students interested in this program should consult Professor Patricia Burchat (burchat@stanford.edu, 725-5771), and Frederic Stout, coordinator of the STEP Coterminal Teaching Program in the School of Education (fstout@stanford.edu, 725-6321).

CORE PHYSICS COURSES:

Course No. and Subject Qtr. and Units
Mechanics:
PHYSICS 41. Mechanics or PHYSICS 61. Mechanics and Special Relativity 4
Heat:
PHYSICS 45. Light and Heat
PHYSICS 46. Light and Heat Lab

PHYSICS 65. Thermodynamics and Foundations of Modern Physics
Electricity and Magnetism:
PHYSICS 43. Electricity and Magnetism
PHYSICS 63. Electricity, Magnetism, and Waves
PHYSICS 64. Electricity and Magnetism Lab
PHYSICS 105. Analog Electronics (Lab) 8-9
Wave Motion:
PHYSICS 107. Laboratory Seminar. Optics (WIM) 4
Modern Physics:
PHYSICS 70. Foundations of Modern Physics 4
Applications:
PHYSICS 59. Current Research Topics 1

Mathematics (Physics departmental requirement):
MATH 51, 52, 53. Multivariable Calculus

and a course in Statistics (choose one):
STATS 110. Statistical Methods in Engineering and the Physical Sciences
STATS 116. Theory of Probability
STATS 141. Biostatistics
STATS 166. Statistical Methods in Computational Genetics

STATS 191. Introduction to Applied Statistics 20

Total ................................................................. 45-47

ADDITIONAL SCIENCE BREADTH COURSES

Life Sciences:
BIOSCI 41. Evolution, Genetics, and Ecology
BIOSCI 42. Biochemistry, Molecular Biology, and Cell Biology
BIOSCI 43. Development and Physiology of Organisms
CHEM 31. Chemical Principles
CHEM 33. Structure and Reactivity

Geosciences:
EARTHSYS 10. Introduction to Earth Systems
PHYSICS 15. The Nature of the Universe
PHYSICS 16. Cosmic Horizons

General Issues of Science:
STS 101. Science, Technology, and Contemporary Society
HUMBIO 2S, 3S, 4S
and EDUC 180. Directed Reading in History of Science

and ENGR 103. Public Speaking and Presentation Development

CONCENTRATION AND DEPTH COURSES

3 courses (100 level or above) in a single area of concentration

Total units for general science 49-58
Total units for the Physical Science program ............................................... 94-105

This individually designed major program in Physical Science includes all the elements of a Program of Subject Matter Preparation for Secondary Teachers of Physics and General Science that has been approved by the California Commission on Teacher Credentialing (CCTC). Students who complete the program are exempt from taking the CSET examination in Physics and General Science for admission to the Stanford Teacher Education Program (STEP) or any other accredited secondary teacher education program in California. Full details of the CCTC-approved program may be found at http://ed.stanford.edu/suse/programs-degrees/program-co-terminal-step.html. Note: the Stanford individually designed major program in Physical Science requires course work beyond the CCTC-approved program, specifically 9-15 units of depth courses in a field of concentration: Physics, Astrophysics, Biological Sciences, Chemistry, Earth Sciences, Human Biology, or Computational Mathematics. See the adviser in the Physics department or the School of Education for more details.

MINORS

Students who take the 20 or 40 series at Stanford in support of their major may count those units towards the minor. Those who have fulfilled Physics requirements at the 20 or 40 series level by enrollment at another accredited university, or through advanced placement credits, may count credits towards 21/22 and 23/24, or 41 and 43/44, respectively. 25/26, or 45/46 for a technical minor, must be taken at Stanford even if similar material has been covered elsewhere. With the 21/22/23/24 or 41/43/44 exception noted above, all courses for the minor must be taken at Stanford University for a letter grade, and a grade of ‘C’ or better must be received for all units applied toward the minor. The minor declaration deadline is three quarters before graduation, i.e., beginning of Autumn Quarter if the student is graduating at the end of Spring Quarter.

MINOR IN PHYSICS

An undergraduate minor in Physics requires a minimum of 27 units with the following course work:

Non-Technical—For students whose majors do not require the PHYSICS 40 or 60 series:

Course No. Units
PHYSICS 21, 22, 23, 24, 25, and 26 12
Any combination of Physics courses totaling 15 units or greater 15

Total ................................................................. 27
MINOR IN ASTRONOMY

Students wishing to pursue advanced work in astrophysical sciences should major in physics and concentrate in astrophysics. However, students outside of physics with a general interest in astronomy may organize their studies by completing one of the following minor programs.

An undergraduate minor in astronomy requires the following courses:

**Non-Technical**—For students whose majors do not require the PHYSICS 40 series:

<table>
<thead>
<tr>
<th>Course No.</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 41, 43/44, 45/46 and PHYSICS 70</td>
<td>18</td>
</tr>
<tr>
<td>or PHYSICS 61, 63/64, 65/67</td>
<td>15</td>
</tr>
</tbody>
</table>

at least three PHYSICS courses numbered 100 or above 15

Total .......................................................... 27-30

**Technical**—For students whose majors require the PHYSICS 40 series:

<table>
<thead>
<tr>
<th>Course No.</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 15, 16, 17</td>
<td>6</td>
</tr>
<tr>
<td>Choose two courses from the following:</td>
<td></td>
</tr>
<tr>
<td>PHYSICS 15, 16, 17</td>
<td>6</td>
</tr>
<tr>
<td>PHYSICS 15, 16, 17</td>
<td>6</td>
</tr>
</tbody>
</table>

Total .......................................................... 19-20 (9-10 in addition to the 20 series)

**GRADUATE PROGRAMS**

**MASTER OF SCIENCE**

The department does not offer a coterminal degree program, or a separate program for the M.S. degree, but this degree may be awarded for a portion of the Ph.D. degree work.

University requirements for the master’s degree, discussed in the “Graduate Degrees” section of this bulletin, include completion of 45 units of unduplicated course work after the bachelor’s degree. Among the department requirements are a grade point average (GPA) of at least 3.0 (B) in courses 210 or 211, 212, 220, 221, 230, 231, or their equivalents. Up to 6 of these required units may be waived on petition if a thesis is submitted.

**DOCTOR OF PHILOSOPHY**

The university’s basic requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin. The minimum department requirements for the Ph.D. degree in Physics consist of completing all courses listed below, and at least one quarter from each of two subject areas (among condensed matter, quantum optics and atomic physics, astrophysics and gravitation, and nuclear and particle physics) chosen from courses with numbers above 232, except 290 and 294. The requirements in the following list may be fulfilled by passing the course at Stanford or passing an equivalent course elsewhere: 210 or 211, 212, 220, 221, 230, 231, 290, 294. A grade point average (GPA) of at least 3.0 (B) is required in all the courses taken toward the degree.

All Ph.D. candidates must have math proficiency equivalent to the following Stanford math courses: 106, 113, 114, 131, 132.

Prior to making an application for candidacy, each student is required to pass a comprehensive qualifying examination on undergraduate physics. This closed book exam is given in the month of January immediately following the student’s arrival at Stanford. This is a written examination held over two days, covering particle mechanics, electricity and magnetism, quantum mechanics, statistical mechanics, thermodynamics, special relativity, and general physics. A thesis proposal must be submitted during the third year. In order to assess the direction and progress toward a thesis, an oral report and evaluation are required during the fourth year. After completion of the dissertation, each student must take the University oral examination (defense of dissertation).

Three quarters of teaching (including a demonstrated ability to teach) are a requirement for obtaining the Ph.D. in Physics.

Students interested in applied physics and biophysics research should also take note of the Ph.D. granted independently by the Department of Applied Physics and by the Biophysics Program. Students interested in astronomy, astrophysics, or space science should also consult the “Astronomy Course Program” section of this bulletin.

**PH.D. MINOR**

Minors in Physics must take at least six courses numbered 210 to 232 among the 20 required units. All prospective minors must obtain approval of their Physics course program from the Physics Graduate Study Committee at least one year before award of the Ph.D.

**FELLOWSHIPS AND ASSISTANTSHIPS**

The Department of Physics makes an effort to support all its graduate students through fellowships, teaching assistantships, research assistantships, or a combination of sources. Information on application procedures is mailed with the admission information.

**TEACHING CREDENTIALS**

For information on teaching credentials, consult the “School of Education” section of this bulletin or address an inquiry to the Credential Administrator, Office of Academic Services, Cubberley Building, School of Education.
COURSES

There are four series of beginning courses. One course from the teen series (11, 15, 16, 17, 19) is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics. The 20 series (21, 22, 23, 24, 25, 26) is recommended for general students and for students preparing for medicine or biology. The 40 series (41, 43, 44, 45, 46; formerly the 50 series) is for students of engineering, chemistry, geology, mathematics, or physics. The advanced freshman series (61, 63, 64, 65, 67) is for students who have had strong preparation in physics and calculus in high school. Students who have had appropriate background and wish to major in physics should take this introductory series.

The 20, 40, and 60 series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments correlated with the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the 40 and 60 series.

Courses beyond 99 are numbered in accordance with a three-digit code.

The first digit indicates the approximate level of the course:

- Undergraduate courses
- Research, special, or current topics

The second digit indicates the general subject matter:

- Laboratory
- General courses
- Nuclear physics
- Astrophysics, cosmology, gravitation
- Condensed matter physics
- Optics and atomic physics
- Miscellaneous courses

UNDERGRADUATE

WIM indicates that the course satisfies the Writing in the Major requirements.

PHYSICS 11N. The Basic Rules of Nature—Stanford Introductory Seminar. Preference to freshmen. Scientists have developed successful descriptions of the basic behavior of matter on microscopic scales (inner space) and on scales characteristic of the universe as a whole (outer space). Despite these successes, deep mysteries remain. Elements of these successful descriptions including quantum mechanics, particle physics, and general relativity. Remaining mysteries and the leading approaches that scientists hope will unravel them including string theory and M theory. Discussions are semiquantitative. Term project paper. Prerequisite: high school physics or equivalent. GER:DB-NatSci

3 units, Aut (Shenk)

PHYSICS 15, 16, 17, Topics in Modern Astronomy—Designed for, but not restricted to, undergraduates not majoring in the physical sciences. Emphasis is on aspects of modern astronomy, astrophysics, and cosmology. No mathematics beyond algebra used. Courses may be taken individually or in sequence.

PHYSICS 15. The Nature of the Universe—The structure, origin, and evolution of the major components of the Universe: planets, stars, and galaxies. Emphasis is on the formation of the Sun and planets, the evolution of stars, and the structure and content of our galaxy. Topics: cosmic enigmas (dark matter, black holes, pulsars, X-ray sources), star birth and death, and the origins of and search for life in the solar system and beyond. GER:DB-NatSci

3 units, Win, Sum (Sako)

PHYSICS 16. Cosmic Horizons—The origin and evolution of the universe and its contents: stars, galaxies, quasars. The overall structure of the cosmos and the physical laws that govern matter, space, and time. Topics include the evolution of the cosmos from its primeval fireball, the origin of the elements and the formation of stars and galaxies, exotic astronomical objects (black holes, quasars, supernovae, and gamma ray bursts), dark matter, and the fate of the cosmos. GER:DB-NatSci

3 units, Aut (Abel)

PHYSICS 17. Black Holes—Newton’s and Einstein’s theories of gravity and their relationship to the predicted properties of black holes. Their formation and detection, and role in galaxies and high-energy jets. Hawking radiation and aspects of quantum gravity. GER: DB-NatSci

3 units, Spr (Blandford)

PHYSICS 19. How Things Work: An Introduction to Physics—Principles of physics in an approachable context by examining familiar objects such as a microwave oven, refrigerator, and pop-up toaster. Emphasis is on developing an intuitive picture. Estimates of real quantities from simple calculations. Prerequisite: high school algebra and trigonometry. GER:DB-NatSci

3 units, Win (I.R. Fisher)

PHYSICS 21. Mechanics and Heat—For biology, social science, and premedical students. Introduction to Newtonian mechanics, fluid mechanics, theory of heat. Calculus is used as a language and developed as needed. Prerequisite: working knowledge of elementary algebra and trigonometry. GER:DB-NatSci

3 units, Aut (Wojcicki)

PHYSICS 21S. Mechanics and Heat w/laboratory—Equivalent to 21 and 22. GER:DB-NatSci

4 units, Sum (G. Fisher)

1 unit, Aut (Staff)

PHYSICS 23. Electricity and Optics—Electric charges and currents, magnetism, induced currents; wave motion, interference, diffraction, geometrical optics. Prerequisite: 21. GER:DB-NatSci

3 units, Win (Gratta)

PHYSICS 24. Electricity and Optics Laboratory—Pre- or corequisite: 23.

1 unit, Win (Staff)

PHYSICS 25. Modern Physics—Introduction to modern physics. Relativity, quantum mechanics, atomic theory, radioactivity, nuclear reactions, nuclear structure, high energy physics, elementary particles, astrophysics, stellar evolution, and the big bang. Prerequisite: 23 or consent of instructor. GER:DB-NatSci

3 units, Spr (Linde)

4 units, Sum (G. Fisher)

PHYSICS 26. Modern Physics Laboratory—Pre- or corequisite: 25.

1 unit, Spr (Staff)

PHYSICS 28. Mechanics, Heat, and Electricity—For biology, social science, and premedical students. The sequence 28 and 29 fulfills, in ten weeks, the one-year college physics requirement with lab of most medical schools. Topics: Newtonian mechanics, fluid mechanics, theory of heat, electric charges, and currents. Calculus is used as a language and developed as needed. Prerequisite: working knowledge of elementary algebra and trigonometry. GER:DB-NatSci

6 units, Sum (G. Fisher)
PHYSICS 29. Electricity and Magnetism, Optics, Modern Physics—Magnetism, induced currents; wave motion, optics; relativity, quantum mechanics, atomic theory, radioactivity, nuclear structure and reactions, elementary particles, astrophysics, and cosmology. Prerequisite: 28. GER:DB-NatSci
6 units, Sum (G. Fisher)

PHYSICS 41. Mechanics—(Formerly 53.) Vectors, particle kinematics and dynamics, work, energy, momentum, angular momentum; conservation laws; rigid bodies; mechanical oscillations and waves. Discussions based on use of calculus. Corequisite: MATH 19 or 41, or consent of instructor. GER:DB-NatSci
4 units, Win (Susskind)

PHYSICS 43. Electricity and Magnetism—(Formerly 55.) Electrostatics, Coulomb’s law, electric fields and fluxes, electric potential, properties of conductors, Gauss’s law, capacitors and resistors, DC circuits; Magnetic forces and fields, Biot-Savart law, Faraday’s law, Ampere’s law, inductors, transformers, AC circuits, motors and generators, electric power, Galilean transformation of electric and magnetic fields, Maxwell’s equations; limited coverage of electromagnetic fields and special relativity. Prerequisites: 41 (formerly 53), and MATH 19 or 41. Corequisite: MATH 20 or 42, or consent of instructor. GER:DB-NatSci
4 units, Spr (Osheroff)

PHYSICS 44. Electricity and Magnetism Lab—(Formerly 56.) Pre- or corequisite: 43 (formerly 55).
1 unit, Spr (Staff)

PHYSICS 45. Light and Heat—(Formerly 51.) Reflection and refraction, lenses and lens systems; polarization, interference, and diffraction; temperature, properties of matter and thermodynamics, introduction to kinetic theory of matter. Prerequisites: high school physics or 41 (formerly 53), and MATH 19 or 41, or consent of instructor. GER:DB-NatSci
4 units, Aut (Michelson)

PHYSICS 45N. Advanced Topics in Light and Heat—Stanford Introductory Seminar. Preference to freshmen. Expands on the subject matter presented in 45 to include optics and thermodynamics in everyday life, and applications in the research laboratory. Corequisite: 45 or advanced placement.
1 unit, Aut (Greven)

PHYSICS 46. Light and Heat Laboratory—(Formerly 52.) Pre- or corequisite: 45 (formerly 51).
1 unit, Aut (Staff)

PHYSICS 50. Astronomy Laboratory and Observational Astronomy—Introduction to observational astronomy with emphasis on the use of optical telescopes. Observations of stars, nebulae, and galaxies in laboratory sessions with 16- and 24-inch telescopes at the Stanford Observatory. Lectures and analysis are descriptive; no calculations or previous physics required. Limited enrollment. Lab. GER:DB-NatSci
3 units, Spr (Church)

PHYSICS 59. Current Research Topics—Recommended for prospective Physics majors. Presentations of current research topics by faculty with research interests related to physics, often including tours of experimental laboratories where the research is conducted.
1 unit, Aut (Staff)

PHYSICS 61,63,65. Advanced Freshman Physics—For students with a strong high school mathematics and physics background contemplating a major in Physics or interested in a rigorous treatment of physics. The fundamental structure of classical physics including Newtonian mechanics, electricity and magnetism, waves, optics, thermodynamics, Foundations of modern physics including special relativity, atomic structure, quantization of light, matter waves and the Schrödinger equation. Diagnostic quiz in calculus and conceptual Newtonian mechanics at first meeting to decide if course is appropriate; some students may benefit more from the 40 (formerly 50) series. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable); pre- or corequisite MATH 42. GER:DB-NatSci
PHYSICS 61. Mechanics and Special Relativity
4 units, Aut (Susskind)

PHYSICS 63. Electricity, Magnetism, and Waves
4 units, Win (Allen)

PHYSICS 65. Thermodynamics and Foundations of Modern Physics
4 units, Spr (Marcus)

PHYSICS 64. Advanced Electromagnetism Laboratory—Experimental work in mechanics, electricity and magnetism. Corequisite 63.
1 unit, Win (Staff)

2 units, Spr (Fisher)

PHYSICS 70. Foundations of Modern Physics—Required for Physics majors who completed the 40 or 50 series, or the PHYSICS 60 series prior to 2005-06. Special relativity, the experimental basis of quantum theory, atomic structure, quantization of light, matter waves, Schrödinger equation. Prerequisites: 41, 43. Corequisite: 45. Recommended: prior or concurrent registration in MATH 53.
4 units, Aut (Kasevich)

PHYSICS 80N. The Technical Aspects of Photography—Stanford Introductory Seminar. Preference to freshmen. For those with some background in photography. How cameras record photographic images on film and electronically. The technical photographic processes which the photographer must understand in order to use cameras effectively. Camera types and their advantages, how lenses work and their limitations, camera shutters, light meters and the proper exposure of film, film types, depth of focus, control of the focal plane and perspective, and special strategies for macro and night photography. View cameras and range finder technical cameras. Students exploit the flexibility of these formats to take photographs around campus. Prerequisite: knowledge of elementary physics.
3 units, Win (Osheroff)

PHYSICS 83N. Physics in the 21st Century—Stanford Introductory Seminar. Preference to freshmen. Current topics at the frontier of modern physics. Topics include subatomic particles and the standard model, symmetries in nature, extra dimensions of space, string theory, supersymmetry, the big bang theory of the origin of the universe, black holes, dark matter, and dark energy of the universe. Why does the sun shine; cosmology and inflation. GER:DB-NatSci
3 units, Win (Dimopoulos)

3 units, Aut (Manoharan)

PHYSICS 100. Introduction to Observational and Laboratory Astronomy—For physical science or engineering students. Emphasis is on the quantitative measurement of astronomical parameters such as distance, temperature, mass, composition of stars, galaxies, and quasars. Observation using the 16- and 24-inch telescopes at the Stanford Observatory. Limited enrollment. Prerequisites: one year of physics; prior or concurrent registration in 25, 65, or 70; and consent of instructor. GER:DB-NatSci
4 units, Aut (Romani)
PHYSICS 105, 107, 108. Intermediate Physics Laboratory Sequence — Sequence in experimental techniques required of all Physics majors.

PHYSICS 105. Intermediate Physics Laboratory I: Analog Electronics — Analog electronics, from Ohm’s Law and passive circuits to transistor and op amp circuits, with an emphasis on developing practical circuit design skills to prepare undergraduates for laboratory research. Course culminates in a short design project. Minimal use of math and physics, no prior electronics experience assumed beyond introductory physics. Prerequisite: PHYSICS 43 (formerly 55) or 63 or other introductory electricity and magnetism course.

3 units, Aut (Pam)

PHYSICS 107. Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis — Experiments on lasers, Gaussian optics, and atom-light interaction, with emphasis on data and error analysis techniques. Students describe a subset of experiments in scientific paper format. Prerequisites: completion of 40 (formerly 50) or 60 series, 70, and 105. Recommended: 130, prior or concurrent enrollment in 120. WIM

4 units, Win (Kasevich)

3 units, Spr (Moler)

4 units, Spr (Gratta)

PHYSICS 112. Mathematical Methods of Physics — Theory of complex variables, complex functions, and complex analysis. Fourier series and Fourier transforms. Special functions such as Laguerre, Legendre, and Hermite polynomials, and Bessel functions. The uses of Green’s functions. Covers material of MATH 106 and 132 most pertinent to Physics majors. Prerequisites: MATH 50 or 50H series, MATH 131.

4 units, Win (Fetter)

PHYSICS 113. Computational Physics — Numerical methods for solving problems in mechanics, electromagnetism, quantum mechanics, and statistical mechanics. Methods include numerical integration; solutions of ordinary and partial differential equations; solutions of the diffusion equation, Laplace’s equation and Poisson’s equation with relaxation methods; statistical methods including Monte Carlo techniques; matrix methods and eigenvalue problems. Short introduction to MatLab, used for class examples; class projects may be programmed in any language such as C. Prerequisites: MATH 53, prior or concurrent registration in PHYSICS 110, 121. Previous programming experience not required.

4 units (Cabrida) not given 2005-06

PHYSICS 120, 121. Intermediate Electricity and Magnetism — Vector analysis, electrostatic fields, including multipole expansion; dielectrics. Special relativity and transformation between electric and magnetic fields. Maxwell’s equations. Static magnetic fields, magnetic materials. Electromagnetic radiation, plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation. Wave guides and cavities. Prerequisites: 43 (formerly 55) or 63; concurrent or prior registration in MATH 53 and 131 for 120 and 121, respectively. Recommended: concurrent or prior registration in 112.

PHYSICS 120, 4 units, Win (Greven)

PHYSICS 121, 4 units, Spr (Shen)

PHYSICS 130, 131. Quantum Mechanics — The origins of quantum mechanics, wave mechanics, and the Schrödinger equation. Heisenberg’s matrix formulation of quantum mechanics, solutions to one-dimensional systems, separation of variables and the solution to three-dimensional systems, the central field problem and angular momentum eigenstates, spin and the coupling of angular momentum, Fermi and Bose statistics, time-independent perturbation theory. Prerequisites: 70, 110; pre- or corequisites: 120, 121, and MATH 131.

PHYSICS 130, 4 units, Aut (Kahn)

PHYSICS 131, 4 units, Win (Kahn)

4 units, Spr (Kapitulnik)

3 units, Win (Roodman)

4 units, Win (Kachru)

PHYSICS 153B. Introduction to String Theory II — Open strings and D-branes. Emergence of gauge theory and connections to particle physics. String thermodynamics and black holes. T-duality, string compactification, and stringy modifications of geometry. Prerequisite: 153A.

4 units, Spr (Kachru)

PHYSICS 160. Introduction to Stellar and Galactic Astrophysics — Physics of the sun. Evolution and death of stars. White dwarfs, novae, planetary nebulae, supernovae, neutron stars, pulsars, binary stars, x-ray stars, and black holes. Galactic structure: interstellar medium, molecular clouds, HI and HII regions, star formation and element abundances. Prerequisites: calculus and one year of college physics at the level of the PHYSICS 40 (formerly 50) series or equivalent.

3 units, Win (Romani)

PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology — Observations of the distances and compositions of objects on cosmic scales: galaxies, galaxy clusters, quasars, and diffuse matter at high redshift. Big bang cosmology, physical processes in the early universe, the origin of matter and the elements, inflation, and creation of structure in the Universe. Observational evidence for dark matter and dark energy. Future of the Universe. Prerequisites: calculus and college physics at the level of the 40 (formerly 50) series.

3 units, Spr (Michelson)

PHYSICS 164. Planetary Systems: Dynamics and Origins — (Enroll in GES 222.)

3-4 units, Aut (Lissauer)

PHYSICS 169. Independent Study in Astrophysics and Honors Thesis — While not all projects require three quarters, the sequence below suggests the format most projects are expected to follow. Projects may commence in Autumn, Winter, Spring, or Summer.

PHYSICS 169A. Independent Study in Astrophysics and Honors Thesis: Selection of the Problem — Description of the problem, its background, work planned in the subsequent two quarters, and development of the theoretical apparatus or initial interpretation of the problem.

1-9 units, Aut, Win, Spr, Sum (Staff)

PHYSICS 169B. Independent Study in Astrophysics and Honors Thesis: Continuation of Project — Substantial completion of the required computations or data analysis for the research project selected.

1-9 units, Aut, Win, Spr, Sum (Staff)

PHYSICS 169C. Independent Study in Astrophysics and Honors Thesis: Completion of Project — Completion of research and writing of a paper presenting methods used and results.

1-9 units, Aut, Win, Spr, Sum (Staff)
PHYSICS 170, 171. Thermodynamics, Kinetic Theory, and Statistical Mechanics—The derivation of laws of thermodynamics from basic postulates; the determination of the relationship between atomic substructure and macroscopic behavior of matter. Temperature; equations of state, heat, internal energy; entropy; reversibility; applications to various properties of matter; absolute zero and low-temperature phenomena. Distribution functions, transport phenomena, fluctuations, equilibrium between phases, phase changes, the partition function for classical and quantum systems, Bose-Einstein condensation, and the electron gas. Cooperative phenomena including ferromagnetism, the Ising model, and lattice gas. Irreversible processes. Prerequisites: 45 (formerly 51) or 65, and MATH 53.

PHYSICS 170. 4 units, Aut (Fetter)
PHYSICS 171. 4 units, Win (Zhang)

3 units, Spr (I. R. Fisher)

PHYSICS 173. Magnetism and Long Range Order in Solids—(Enroll in APPPHYS 270.)

3 units (I. R. Fisher) not given 2005-06

PHYSICS 173B. Concepts in Condensed Matter Physics—Focus is on simple, archetypical examples. Topics include interaction and correlation, emergent order and symmetry breaking, new states of matter, pattern formation, and nonlinear dynamics in material systems. Prerequisite: introductory solid state or condensed matter physics.

1 unit (Beasley) not given 2005-06

PHYSICS 181. Introduction to Modern Optics—(Enroll in EE 268.)

3 units, Aut (Byer)

PHYSICS 190. Independent Study—Undergraduate research in experimental or theoretical physics under the supervision of a faculty member. Prerequisites: superior work as an undergraduate Physics major, and consent of instructor.

1-9 units, Aut, Win, Spr, Sum (Staff)

PHYSICS 204. Advanced Seminar in Theoretical Physics—Topics of recent interest in theoretical physics: Bose-Einstein condensation of atoms, high T$_c$ superconductivity of cuprates, quantized Hall effect, quantum and classical chaos, superfluidity in 2D, protein folding. Work in the seminar may provide a basis for an honors project in theoretical physics. Prerequisite: 134 or consent of instructor.

3 units, Aut (Domiach)

PHYSICS 204B. Seminar in Theoretical Physics—Applications of the Renormalization Group; emphasis is on principles and intuitions.

3 units (Shenker) not given 2005-06

PHYSICS 205. Undergraduate Honors Research—Experimental or theoretical project and thesis in Physics under supervision of a faculty member. Planning of the thesis project should begin no later than middle of the junior year. Successful completion of an honors thesis leads to graduation with departmental honors. Prerequisites: superior work in Physics as an undergraduate major and approval of the honors adviser.

1-12 units, Aut, Win, Spr, Sum (Staff)

PHYSICS 207. Laboratory Electronics—(Enroll in APPPHYS 207.)

3 units, Win (Fox)

PHYSICS 208. Laboratory Electronics—(Enroll in APPPHYS 208.)

3 units (Fox) alternate years, given 2006-07

GRADUATE

3 units, Spr (Kallos)

PHYSICS 211. Continuum Mechanics—Elasticity, fluids, turbulence, waves, gas dynamics, shocks, and MHD plasmas. Examples from everyday phenomena, geophysics, and astrophysics.

3 units, Win (Blandford)

3 units, Spr (Fetter)

PHYSICS 215. Numerical Methods for Physicists and Engineers—(Enroll in APPPHYS 215.)

3 units, Aut (Moler)

PHYSICS 216. Back of the Envelope Physics—Techniques to make order-of-magnitude estimates of physical effects. Goal is to sharpen physical intuition and promote a synthesis of physics through the application of undergraduate physics to problems, some not included in the standard curriculum. Techniques such as scaling and dimensional analysis. Applications include properties of materials, geophysics, astrophysics and cosmology, biomechanics, and particle physics. Prerequisites: undergraduate mechanics, statistical mechanics, electricity and magnetism, and quantum mechanics.

3 units, Aut (Madejski)

PHYSICS 220. 3 units, Aut (Church)
PHYSICS 221. 3 units, Spr (Church)

PHYSICS 222. Applied Quantum Mechanics I—(Enroll in EE 222.)

3 units, Aut (Miller)

PHYSICS 223. Applied Quantum Mechanics II—(Enroll in EE 223.)

3 units, Win (Miller)

PHYSICS 226. Physics of Quantum Information—(Enroll in APPPHYS 226.)

3 units (Yamamoto) alternate years, given 2006-07

PHYSICS 230, 231, 232. Quantum Mechanics—Prerequisites: quantum mechanics at the undergraduate level and a strong course on differential equations.

PHYSICS 230. Quantum Mechanics—Fundamental concepts. Introduction to Hilbert spaces and Dirac’s notation. Postulates applied to simple systems, including those with periodic structure. Symmetry operations and gauge transformation. The concept of propagators and path integral quantization. Problems related to measurement theory.
The quantum theory of angular momenta and central potential problems (hydrogen, quarkonium).

3 units, Aut (Silverstein)

3 units, Win (Shenker)

3 units, Spr (Shenker)

PHYSICS 252. Introduction to High Energy Physics — See 152.

3 units, Win (Roodman)

3 units, Aut (Petrossian)

PHYSICS 262. Introduction to Gravitation — Review of special relativity. Introduction to general relativity. Curvature, energy-momentum tensor, Einstein field equations. Newtonian limit of general relativity. Black holes, gravitational waves, cosmology. Prerequisites: 121 or other courses including special relativity.

3 units, Win (Wagoner)

PHYSICS 272. Solid State Physics I — (Enroll in APPPHYS 272.)

3 units, Win (Manoharan)

PHYSICS 273. Solid State Physics II — (Enroll in APPPHYS 273.)

3 units, SPR (Manoharan)

PHYSICS 275. Electrons in Nanostructures — The behavior of electrons in metals or semiconductors at length scales below 1 micron, smaller than familiar macroscopic objects but larger than atoms. Ballistic transport, Coulomb blockade, localization, quantum mechanical interference, and persistent currents. Topics may include quantum Hall systems, spin transport, spin-orbit coupling in nanostructures, magnetic tunnel junctions, Kondo systems, and 1-dimensional systems. Readings focus on the experimental research literature, and recent texts and reviews. Prerequisite: undergraduate quantum mechanics and solid state physics.

3 units, SPR (Goldhaber-Gordon)

PHYSICS 290. Research Activities at Stanford — Required of first-year Physics graduate students; suggested for junior or senior Physics majors for 1 unit. Review of research activities in the department and elsewhere at Stanford at a level suitable for entering graduate students.

1-3 units, Aut (Romani)

PHYSICS 291. Practical Training — Opportunity for practical training in industrial labs. Arranged by student with the research adviser’s approval. A brief summary of activities is required, approved by the research adviser.

3 units, Sum (Staff)

PHYSICS 292. Introductory Biophysics — (Enroll in APPPHYS 192/292.)

3 units, SPR (Doniach) alternate years, not given 2006-07

PHYSICS 293. Literature of Physics — Intensive study of the literature of any special topic. Preparation, presentation of reports. If taken under the supervision of a faculty member outside the department, approval of the Physics chair required. Prerequisites: 25 units of college physics, consent of instructor.

1-15 units, Aut, Win, Spr, Sum (Staff)

1 unit, Aut, Win, Spr (Pam)

PHYSICS 301. Astrophysics Laboratory — Seminar/lab. Astronomical observational techniques and physical models of astronomical objects. Observational component uses the 24-inch telescope at the Stanford Observatory and ancillary photometric and spectroscopic instrumentation. Emphasis is on spectroscopic and photometric observation of main sequence, post-main sequence, and variable stars. Term project developing observational equipment or software. Limited enrollment. Prerequisite: consent of instructor.

3 units, Aut (Romani)

PHYSICS 321. Basic Plasma Physics — For the nonspecialist who needs a working knowledge of plasma physics for space science, astrophysics, fusion, or laser applications. Topics: orbit theory, the Boltzmann equation, fluid equations, MHD waves and instabilities, EM waves, the Vlasov theory of ES waves and instabilities including Landau damping and quasilinear theory, the Fokker-Planck equation, and relaxation processes. Advanced topics in resistive instabilities and particle acceleration. Prerequisite: 210 and 220, or consent of instructor.

3 units (Kosovichev) not given 2005-06

3 units (Kasevich) not given 2005-06

PHYSICS 323. Laser Cooling and Trapping — Principles of laser cooling and atom trapping. Optical forces on atoms, forms of laser cooling, atom optics and atom interferometry, ultra-cold collisions, and introduction to Bose condensation of dilute gases. Emphasis is on the development of the general formalisms that treat these topics. Applications of the cooling and trapping techniques: atomic clocks, internal sensors, measurements that address high-energy physics questions, many-body effects, polymer science, and biology. Prerequisite: 231 or equivalent.

3 units, SPR (Kasevich)

PHYSICS 324. Introduction to Accelerator Physics — (Enroll in APPPHYS 324.)

3 units, Win (Chao, Ruth) alternate years, not given 2006-07

3 units, Aut (Peskin)

3 units, Win (Peskin)

PHYSICS 351. Particle Physics and Collider Physics — The standard big bang theory, its successes and problems. Versions of inflationary cosmology including old, new, chaotic, and hybrid inflation. Reheating of the Universe and creation of matter after inflation. The theory of density perturbations, large-scale structure formation, and anisotropy of cosmic microwave background radiation. Eternal inflation and the global structure of the Universe. Anthropic principle, the cosmological constant problem, and dark energy. Towards inflation in string theory and brane cosmology. 3 units, Aut (Dimopoulos)

PHYSICS 360. Physics of Astrophysics — Theoretical concepts and tools for modern astrophysics. Radiation transfer equations; emission, scattering, and absorption mechanisms: Compton, synchrotron and Bremsstrahlung processes; photoionization and line emission. Equations of state of ideal, interacting, and degenerate gasses. Application to astrophysical sources such as HII regions, supernova remnants, cluster of galaxies, and compact sources such as accretion disks, X-ray, gamma-ray, and radio sources. Prerequisites: 121, 171 or equivalent. 3 units, Win (Petrosian)

PHYSICS 361. Stellar and Galactic Astrophysics — Astronomical data on stars, star clusters, interstellar medium, and the Milky Way galaxy. Theory of stellar structure; hydrostatic equilibrium, radiation balance, and energy production. Stellar formation, Jean’s mass, and protostars. Evolution of stars to the main sequence and beyond to red giants, white dwarfs, neutron stars, and black holes. Structure of the Milky Way; the disk and spiral arms, central bulge or bar, black hole, the halo, and mass of the galaxy. Prerequisites: 221, and 260 or 360. 3 units (Petrosian) not given 2005-06

PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology — Observational data on the content and activities of galaxies, the content of the Universe, cosmic microwave background radiation, gravitational lensing, and dark matter. Models of the origin, structure, and evolution of the Universe based on the theory of general relativity. Test of the models and the nature of dark matter and dark energy. Physics of the early Universe, inflation, baryosynthesis, nucleosynthesis, and galaxy formation. Prerequisites: 210, 211, 260 or 360. 3 units, Spr (Petrosian) alternate years, not given 2005-06

PHYSICS 364. Advanced Gravitation — Principles and experiments. Methods for solving Einstein equations. Penrose diagrams, singularities, black holes, and thermodynamics. Charged and rotating black holes, Hawking radiation. Anti de Sitter and de Sitter spaces in applications to high energy physics and cosmology. Topics in general relativity, astrophysics, and high-energy physics. Prerequisites: 220, 221, and 262, or equivalent introduction to general relativity. 3 units (Linde) not given 2005-06

PHYSICS 370. Theory of Many-Particle Systems — Application of quantum field theory to the nonrelativistic, many-body problem, including methods of temperature-dependent Green’s functions and canonical transformations. Theory of finite-temperature, interacting Bose and Fermi systems with applications to superfluidity, superconductivity, and electron gas. Offered occasionally. Prerequisite: 232. 3 units (Zhang) not given 2005-06

PHYSICS 372. Condensed Matter Theory I — (Enroll in APPPHYS 372.)

PHYSICS 373. Condensed Matter Theory II — (Enroll in APPPHYS 373.) 3 units (Staff) not given 2005-06

PHYSICS 377. Literature of Condensed Matter Physics — (Enroll in APPPHYS 377.) 3 units, Aut (Shen) alternate years, not given 2006-07

PHYSICS 383. Introduction to Atomic Processes — (Enroll in APPPHYS 383.) 3 units, S. Harris alternate years, not given 2006-07

PHYSICS 387. Quantum Optics and Measurements — (Enroll in APPPHYS 387.) 3 units, Win (Yamamoto) alternate years, not given 2006-07

PHYSICS 388. Mesoscopic Physics and Nanostructures — (Enroll in APPPHYS 388.) 3 units, Spr (Yamamoto) alternate years, not given 2006-07

PHYSICS 450, 451, 452. Theoretical Physics of Particles and Fields — Advanced topics in theoretical high-energy physics. Topics change by quarter and year to provide a background in all areas of current theoretical research. Prerequisite: 332.

PHYSICS 456. Theoretical Physics of Particles and Fields — Advanced topics in theoretical high-energy physics. Topics change by quarter and year to provide a background in all areas of current theoretical research. Prerequisite: 332.

PHYSICS 450. Introduction to Supersymmetry and Supergravity — Construction of quantum field theories with supersymmetry. Super-space, nonrenormalization theorems, supersymmetry breaking, and supergravity. Models of supersymmetry in elementary particle physics. Extended and high-dimensional supersymmetry. Supergravity in 5, 11, and other higher dimensions. Prerequisite: 332. 3 units (Kallosh) not given 2005-2006

PHYSICS 451. Physics Beyond the Standard Model — Grand unified theories. Supersymmetric standard model. Large extra dimensions and TeV-strings. The landscape of vacua, split supersymmetry. 3 units, Win (Dimopoulos)
PHYSICS 452. Particle Astrophysics — What current understanding of quantum gravity and string/M theory says about physics behind horizons. Goal is to develop areas for future research.
3 units, Spr (Staff)

PHYSICS 463. Special Topics in Astrophysics: Experimental Cosmology — Content varies depending on participant interest. This year, topics include nonlinear aspects of structure formation as they relate to the first objects in the Universe, galaxies, and clusters of galaxies. Cosmological parameter estimation including observational methods and analysis techniques. Stereoscopic visualization and current observational data.
3 units, Aut (Abel, Allen)

PHYSICS 473A. Condensed Matter Physics — (Enroll in APPPHY 473A.)
2 units (Staff) not given 2005-06

PHYSICS 490. Research — Open only to Physics graduate students, with consent of instructor. Work is in experimental or theoretical problems in research, as distinguished from independent study of a non-research character in 190 and 293.
1-15 units, Aut, Win, Spr, Sum (Staff)

POLITICAL SCIENCE

Chair: Terry M. Moe

Associate Professor: Luis R. Fraga, Simon D. Jackman, Michael A. McFaul (Stanford in Washington), Kenneth A. Schultz (on leave)

Assistant Professors: Alberto Díaz-Cayeros, Claudine Gay, Beatriz Magaloni (on leave), Isabela Mares (on leave Autumn), Rob Reich, Peter Stone, Michael R. Tomz, Jonathan Wand, Jeremy Weinstein, Carolyn Wong, Anne T. Wren (on leave Autumn, Winter)

Professor (Research): Norman Nie

Lecturers: Mary I. Dakin, Volodymyr Kulyk, Abbas Milani, Andrew R. Rutten, Kathryn Stoner-Weiss, Mary Sprague

Courtesy Professors: David P. Baron, Jonathan B. Bendor, Coit D. Blacker, Gerhard Casper, Larry Diamond, Gerald A. Dorfman, Jean-Pierre Dupuy, James Fishkin, Lawrence Friedman, Keith Krehbiel, Roger Noll, Stephen J. Stedman

Courtesy Associate Professor: Debra M. Satz

Visiting Professors: Robert Adcock, Josef Joffe, David Kang, Paul Kapur

Visiting Associate Professor: H. Lyman Miller

Visiting Lecturer: Anu Kulkarni

Department Offices: Encina Hall West, Room 100
Mail Code: 94305-6044
Phone: (650) 723-1806
Web Site: http://polisci.stanford.edu

Courses given in Political Science have the subject code POLISCI. For a complete list of subject codes, see Appendix.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

To receive a B.A. in Political Science, a student must:

1. Submit an application for the Political Science major to the undergraduate administrator, and declare on Axess. Forms are available in Encina Hall West, Room 100. For additional information, drop by or phone (650) 723-1608. Students must complete their major declaration no later than the end of Autumn Quarter in junior year.

2. Complete 60 units:
   a) 35 Political Science course units must complete the breadth requirements.
   b) 15 Political Science units must be completed by taking other Political Science courses including directed reading, other introductory-level courses, and freshman/sophomore seminar courses.
   c) the remaining 10 units may be from: other Political Science courses; courses outside the department that are related to the student’s interests in political science and are not introductory-level courses in other disciplines such as ECON 1 or PSYCH 1. Courses from outside the department should be listed on the declaration form and approved by the Director of Undergraduate Studies when the major is declared; alternatively, a petition may be submitted later.

3. Satisfy breadth requirements (35 units): each major must take two courses out of the following Political Science courses, one of which must be in the primary concentration; the other may be in any field. These courses should be completed by the end of sophomore year.
POLISCI 1. Introduction to International Relations
POLISCI 2. American National Government and Politics
POLISCI 3. Introduction to Political Philosophy
POLISCI 4. Introduction to Comparing Political Systems
POLISCI 151A. Doing Political Science, or POLISCI 151B. Data Analysis for Political Science

The primary concentration must be completed by fulfilling the depth requirement with at least 20 units (see Statement 4).

Each major should declare a secondary concentration in another subfield, with at least 10 units in that concentration. Each major should take at least 5 units in a third subfield.
4. Satisfy a depth requirement. Each major should declare a primary concentration in one subfield and take at least 20 units in this concentration, including the introductory course for that subfield. Subfields include:
   - International Relations (1, 110-119, 210-219, 310-319)
   - American Politics (2, 120-129, 220-229, 320-329)
   - Political Theory (3, 130-139, 230-239, 330-339)
   - Comparative Politics (4, 140-149, 240-249, 340-349)
5. Demonstrate the capacity for sustained research and writing in the discipline. This requirement is satisfied by taking a Political Science course designated as a Writing in the Major (WIM) course.
6. Take at least one 5-unit, advanced undergraduate seminar in Political Science.
7. Students may apply a maximum of 10 units from Stanford Summer Session or courses outside Stanford. Transfer students are allowed up to 20 units of transfer units or summer session. A maximum of 15 units may be applied towards breadth requirements and 5 towards other Political Science course units. All transfer cases require petitions which must be reviewed and approved by the Director of Undergraduate Studies.
8. Directed reading and Oxford tutorial units require a petition and may only be applied towards any related course units. These units may not be used to fulfill a breadth requirement, and no more than 10 units of directed reading and Oxford tutorial units may count toward the required 60 Political Science units.
9. Courses counting toward the 60-unit requirement must be taken for a letter grade, although units in excess of the required 60 may be taken on a credit/no credit basis. A minimum grade of ‘C’ is required for courses to count towards major requirements.

MINORS

Students must complete their declaration of the minor via Axess no later than the end of the junior year.

To receive a minor in Political Science, a student must complete a minimum of 30 unduplicated units. All units must be in courses listed or crosslisted in the Department of Political Science. A maximum of 5 units of directed reading may count if supervised by a member of the department.

All units are for a letter grade. A minimum grade of OC is required for courses to count towards minor requirements.

Concentration — The student selects a subfield in which three courses are taken. One of these courses is the introductory course, the other two at a more advanced level (numbered above 100). Where a linked set of advanced courses is offered (as with the Political Theory 130A,B,C series), the introductory course need not be taken.

The concentration corresponds to one of the subfields the department already has in place, namely, international relations, American politics, political theory, and comparative politics.

Distribution — Three courses must be in the area of concentration, as specified above, for 15 units. An additional 10 units of intermediate and advanced courses (100 level or above) must be in two additional subfields.

Transfer Work — A maximum of 10 units of work completed outside Stanford may be given Political Science credit toward the minor for transfer students. A maximum of 5 units of work completed in Stanford Summer Session or outside of Stanford for non-transfer students may be given Political Science credit toward the minor. All such cases must be individually reviewed and approved by the Director of Undergraduate Studies.

PRIZES

There are several annual prizes for undergraduate students: the Arnaud B. Leavelle Memorial Prize for the best paper in the History of Political Thought sequence (POLISCI 130A,B,C), a cash prize for the best thesis written in political theory, the Lindsay Peters, Jr., Memorial Prize for the outstanding student each year in POLISCI 2, and Cottrell Prizes for outstanding students in POLISCI 1, 3, and 4.

HONORS PROGRAM

The honors program offers qualified students an opportunity to conduct independent research, write a thesis summarizing their findings, and make a presentation of their work. During the process of research, analysis, thinking, drafting, rethinking, and redrafting, students work closely with a faculty adviser and their fellow students.

Applicants must have a 3.5 grade point average (GPA) in Political Science courses, and an adviser who must be a member of the academic council. Application forms should be completed by the Spring Quarter of the junior year, and can be obtained from the department office.

Students who are interested in writing a thesis are encouraged to enroll in POLISCI 299Q, Junior Research Seminar, in the Winter Quarter of their junior year. This credit/no-credit course is designed to help students find a manageable thesis topic and adviser.

Students who are accepted into the program should plan to make the thesis the focus of their senior year. They should enroll in POLISCI 299A,B,C, which covers research and writing directed by the student’s adviser. In addition, students must enroll in POLISCI 299R, a 3-unit Autumn Quarter seminar designed to develop research and writing skills. In the Winter and Spring quarters, students enroll in POLISCI 299S and T, which are credit/no credit tutorials in which students work with other students and tutors to finish their research.

Most students find themselves in one of two groups: (1) those who already have substantial background in their thesis topic, and can expect to complete the honors program in two or three quarters for a total of 10-15 units completed in POLISCI 299A,B,C; or (2) those who have little or no previous work on the topic, and can expect to complete the program in three quarters with 15 units of work.

To complete the honors program, students must:
1. Complete all requirements for the major.
2. Enroll in POLISCI 299R.
3. Complete a thesis of honors quality (B+ or better).

Honors work done for credit (POLISCI 299A,B,C) may not be counted toward the required 60 units in Political Science.

GRADUATE PROGRAMS

Admission — Prospective graduate students should see http://gradmissions.stanford.edu for application materials. Applicants for admissions to graduate work are required to submit a recent writing sample (not to exceed 35 pages). All applicants are required to submit a sample of their writing and to take the General Test of the Graduate Record Examination. Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). The TOEFL requirements are waived for applicants who have recently completed two or more years of study in an English-speaking country. For details concerning these tests, see the Guide to Graduate Admission, available at http://registrar.stanford.edu/publications. The application deadline is December 6. Admission is offered for the Autumn Quarter only. The department expects all students to pursue a full-time program except for time devoted to teaching or research assistantships.

MASTER OF ARTS

The M.A. degree may be pursued as part of a joint degree program with one of the University’s professional schools. Students interested in a joint degree should apply for admission to the M.A. program in Political Science during the Autumn Quarter of the first year in the Stanford professional school.
Doctoral candidates may elect to take the M.A. degree when they have met the following requirements:

1. Completion of at least three quarters of residency as a graduate student with 45 units of credit of which at least 25 units must be taken in Political Science graduate seminars of 300 level and above. Not more than 25 units of the 45-unit requirement may be taken in a single field.
2. At least two graduate seminars in each of two fields and at least one graduate seminar in a third field.
3. Of the remaining 20 units, not more than 10 units of work from related departments may be accepted in lieu of a portion of the work in Political Science. Not more than 10 units may be taken as directed reading.
4. Courses must be numbered above 300.
5. A grade point average (GPA) of 2.7 (B-) or better must be attained for directed reading and all course work.

The department does not offer a coterminal bachelor’s and master’s degree.

Doctoral candidates may pursue master’s degrees from other departments. Recent examples include but are not restricted to master’s degrees in Statistics and Economics. Students interested in this option should consult the relevant sections of this bulletin for both University and department requirements for master’s degrees.

**MASTER OF ARTS IN TEACHING**

The M.A. degree in Teaching is offered jointly by this department and the School of Education. The degree is intended for candidates who have a teaching credential or relevant teaching experience and wish to further strengthen their academic preparation. The program consists of a minimum of 25 units in Political Science courses and 12 units in the School of Education. A student’s program must be approved by the Director of Graduate Studies before the courses are taken. Detailed program requirements are outlined in the “School of Education” section of this bulletin.

**DOCTOR OF PHILOSOPHY**

The University’s basic requirements for the Ph.D. degree are discussed in the “Graduate Degrees” section of this bulletin.

Programs of study leading to the Ph.D. degree are designed by the student, in consultation with advisers and the Director of Graduate Studies, to serve his or her particular interests as well as to achieve the general department requirements. A student is recommended to the University Committee on Graduate Studies to receive the Ph.D. degree in Political Science when the following program of study has been completed:

1. The candidate for the Ph.D. degree must offer three of the following concentrations in political science: American politics, comparative politics, international relations, methodology, political theory, and political organizations. Upon petition, a special field (for example, public law, or urban politics) may be offered as a third concentration. Students concentrate on two of these areas by fulfilling, depending on the concentration, combinations of the following: written qualifying examinations, research papers, research design, or course work. The requirement for the third concentration may be satisfied by taking either a written examination in that area or by offering a minimum of 10 units with a grade point average (GPA) of 3.0 (B) or better in the third concentration from among the formal graduate-level courses in the six divisions of the department. The third concentration cannot be satisfied by courses taken as a requirement for a first or second concentration. A third concentration in theory requires two courses in addition to the 5 units necessary to fulfill the program requirement. Completion of special concentrations may require more than 10 units of course work. Students are not permitted to use the following combination of concentrations for the purposes of fulfilling the requirements for the Ph.D.: American politics, political organizations, and methodology. Students wishing to concentrate in American politics, political organizations, and methodology are not prohibited from doing so, but must add another field of concentration to their course of study.

2. The Ph.D. candidate is required to demonstrate competence in a language and/or skill that is likely to be relevant to the dissertation research. The level of competence needed for successful completion of the research is determined by the student’s adviser. All candidates must complete 5 units of statistical methods or its equivalent. Students who are in the concentration of international relations, American politics, or political organizations are required to take an additional 5 units of methods. Previous instruction can be counted towards this requirement only if approved by the Director of Graduate Studies.
3. Every Ph.D. candidate must complete at least five units of graduate-level instruction in political theory.
4. By the start of the fourth quarter in residence, each first-year graduate student submits to the student’s adviser a statement of purpose. This statement indicates the student’s proposed major concentrations of study, the courses taken and those planned to be taken to cover those fields, the student’s plan for meeting language and/or skill requirements, plans for scheduling of comprehensive examinations and/or research papers, and, where possible, dissertation ideas or plans. This statement is discussed with, and must be approved by, the student’s adviser. In the Autumn Quarter following completion of their first year, students are reviewed at a regular meeting of the department faculty. The main purposes of this procedure are, in order of importance: to advise and assist the student to realize his or her educational goals; to provide an incentive for clarifying goals and for identifying ways to achieve them; and to facilitate assessment of progress toward the degree.
5. Students must take the comprehensive exams in two major fields by the end of their second year in the program. Students are expected to have passed these examinations and to have faculty approval of their research paper by the end of their second year.
6. Upon completion of one research paper and two comprehensive exams in his or her two major concentrations, the student files an Application for Admission to Candidacy for the Ph.D. which details program plans and records. The University and the department expects that students be admitted to candidacy by the completion of their sixth quarter as a full-time student. Each second-year student is reviewed and considered for admission to candidacy in a meeting of the faculty that is typically held during the tenth week of Spring Quarter. Since completion of two comprehensive exams and a research paper are prerequisites for admission to candidacy, students should plan their first- and second-year studies so that these requirements are satisfied by the time of the faculty review meeting. In particular, students should submit their research paper to the relevant faculty readers no later than the start of Spring Quarter, since revisions of the paper are often required prior to obtaining faculty approval.
7. During the third year, a formal dissertation proposal is submitted by the student to a thesis committee of three faculty members, including the principal adviser. The dissertation proposal requires approval by the student’s dissertation adviser and the Director of Graduate Studies. Dissertation proposals must be approved by the end of the third year.
8. A candidate for the Ph.D. in Political Science is required to serve as a teaching assistant (TA) in the department for a minimum of three quarters.
9. Doctoral candidates who apply for the M.A. degree are awarded that degree on completion of the requirements outlined in the description of the M.A. program.
10. The candidate must pass the University oral examination on the area of the dissertation at a time, after the passing of the written comprehensive examinations, suggested by the candidate’s dissertation committee.
11. The candidate must complete a dissertation satisfactory to the Dissertation Reading Committee and the University Committee on Graduate Studies.
PH.D. MINOR

Candidates in other departments offering a minor in Political Science select two concentrations in political science in consultation with the Director of Graduate Studies and submit to her or him a program of study for approval. Written approval for the program must be obtained from the Director of Graduate Studies before application for doctoral candidacy. Students are required to complete at least 20 units in Political Science courses. Two of these courses, in separate concentrations of political science, must be 300 level and above. All grades must be a GPA of 3.0 (B) or better. Candidates may be examined in their concentrations in the general oral examination by a member of the Department of Political Science, chosen in consultation with the Director of Graduate Studies.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Summer Quarter — During Summer Quarter, the Department of Political Science offers a variety of courses and seminars. Offerings depend upon available faculty.

The department uses the following course numbering system:

1–99 Introductory Courses
100-199 Intermediate Undergraduate Lecture Courses
200-299 Advanced Undergraduate Seminar Courses
300-400 Advanced Undergraduate/Graduate Courses
400-500 Graduate Courses

Course information is accurate when the Stanford Bulletin goes to press; however, students should be aware that there may be changes and should check the quarterly Time Schedule for up-to-date information.

INTRODUCTORY

POLISCI 1. Introduction to International Relations — Approaches to the study of conflict and cooperation in world affairs. Applications to war, terrorism, trade policy, the environment, and world poverty. Debates about the ethics of war and the global distribution of wealth. GER: DB-SocSci 5 units, Aut (Tomz)

POLISCI 2. Introduction to American National Government and Politics — The role and importance of the ideal of democracy in the evolution of the American political system. American political institutions (the Presidency, Congress, and the Court) and political processes (the formation of political attitudes and voting) are examined against the backdrop of American culture and political history. The major areas of public policy in the current practice of the ideal of democracy. GER: DB-SocSci 5 units, Win (Ferejohn, Fiorina)

POLISCI 3. Introduction to Political Philosophy — (Enroll in PHIL 30, ETHICSCOC 30.) 5 units, Aut (Hussain)

POLISCI 4. Introduction to Comparing Political Systems — Politics in major regime types including democratic, authoritarian, and communist; how types of politics affect economic development and state/society relations. GER: DB-SocSci, EC-GlobalCom 5 units, Spr (Díaz-Cayeros)

POLISCI 15N. Explaining Ethnic Violence — Stanford Introductory Seminar. Preference to freshmen. Particularly deadly forms of ethnic violence since 1945 including violence associated with civil wars where the combatants claim to represent ethnic groups, and violence associated with ethnic riots. Case studies and theoretical work on the sources and nature of ethnic violence. GER: DB-SocSci 5 units, Spr (Fearon)

POLISCI 23N. Public Opinion and American Foreign Policy — Stanford Introductory Seminar. Preference to sophomores. How citizens make choices about issues in foreign policy. How choices among alternative courses of action are influenced by national identity. Goal is to introduce undergraduates to doing research, translating promising ideas into testable hypotheses, and seeing how far the chain of implication can be extended by analyzing public opinion surveys. Focus is on quantitative analysis using software. No background in statistics required. GER: DB-SocSci 5 units, Win (Sniderman)

POLISCI 32Q. Politics through Literary Lenses: Different Vantage Points — Stanford Introductory Seminar. Preference to sophomores. How political activity is understood through drama and novels, particularly utopian and dystopian novels. Do different genres such as drama or utopian writing offer different insights into politics? How do stories and myths function within the political arena, particularly myths of new beginnings, golden ages, and the possibility of perfection? Is the concreteness of literature compatible with the search for generalizations in political science? GER: DB-Hum 3 units, Win (Hansot)

POLISCI 41N. Comparative Public Opinion and Political Behavior — Stanford Introductory Seminar. Preference to sophomores. Comparison of mass publics in Italy and the U.S. Do they arrive at political choices in similar or different ways? Comparison of considerations when choosing between policy alternatives. Goal is to introduce undergraduates to doing research, translating promising ideas into testable hypotheses, and seeing how far the chain of implication can be extended by analyzing public opinion surveys. Focus is on quantitative analysis using software. No background in statistics required. GER: DB-SocSci 5 units, Spr (Sniderman)

POLISCI 45N. Civil War Narratives — Stanford Introductory Seminar. Preference to freshmen. Focus is on a new statistics-based theory to account for the susceptibility of countries to civil war. How to write a theory-based historical narrative. Students write and present an original historical narrative focusing on how well the theory explains a particular history and new factors to explain civil war onsets. GER: DB-SocSci 5 units, Aut (Laitin)

POLISCI 48G. The Historical Roots of Modern East Asia — (Enroll in HISTORY 92A.) 5 units, Spr (Miller)

POLISCI 48H. East Asia in the Age of Imperialism — (Enroll in HISTORY 92B.) 5 units, Aut (De Boer)

INTERMEDIATE UNDERGRADUATE LECTURES

INTERNATIONAL RELATIONS

Students interested in international relations are encouraged to take POLISCI 1. While not a formal prerequisite for many of the courses below, it provides background for more advanced work.

The courses in international relations offered in Political Science can be divided into those dealing with global political, military, and economic problems, and those dealing with the foreign relations of nations or geographic regions. Students concentrating in international relations are encouraged to select their courses from both groups.

Students interested in a major in international relations should refer to the “International Relations” section of this bulletin.

POLISCI 110A. Sovereignty and Globalization — The relationship between globalization and the viability of state sovereignty, the development of international institutions, and the international distribution of wealth and security. GER: DB-SocSci 5 units (Krasner) not given 2005-06

POLISCI 110B. Strategy, War, and Politics — Traditional and modern theories on the causes of war and sources of peace. Contrasting explanations for the origins of WW I and II; alternative theories of deterrence in the nuclear age; the causes of war in the Persian Gulf, ethnic conflicts, and terrorism in the post-Cold War era. GER: DB-SocSci 5 units, Spr (Kapur)
POLISCI 110C. America and the World Economy — American foreign economic policy. Issues: the evolution of American tariff and trade policy, the development of mechanisms for international monetary management, and American foreign investment policy reflected in the changing political goals pursued by American central decision makers. Prerequisite: 1 or equivalent. GER:DB-SocSci, WIM 5 units, Win (Goldstein)

POLISCI 110D. War and Peace in American Foreign Policy — The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. GER: DB-SocSci 5 units (Schultz) not given 2005-06

POLISCI 110X. America and the World Economy — (Same as 110C.) Does not fulfill WIM requirement. GER:DB-SocSci 5 units, Win (Goldstein)

POLISCI 111D. British Politics — Over the last two decades, Margaret Thatcher and Tony Blair have provoked major changes in policies, politics, and the institution of government. The impact of these changes on the world’s oldest democracy. GER:DB-SocSci, EC-GlobalCom 5 units, Spr (Dorfman)

POLISCI 112. Japanese Foreign Policy — (Graduate students register for 312.) The origins of WW II in the Pacific; Japan’s role in international security; the N. Korean nuclear crisis; Japan’s evolving security policies; and the U.S.-Japan trade conflict. GER:DB-SocSci, EC-GlobalCom 5 units, Aut (Okimoto)

POLISCI 114D. Democracy, Development, and the Rule of Law — (Same as INTNLREL 114D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts. 5 units, Aut (Stoner-Weiss)

POLISCI 114R. Technology and National Security — (Enroll in MS&E 193/293.) 3 units, Aut (Perry, Paté-Cornell)

POLISCI 114S. International Security in a Changing World — The major international and regional security problems in the modern world. Interdisciplinary faculty lecture on the political and technical issues involved in arms control, the military legacy of the Cold War, regional security conflicts, proliferation of advanced weapons capabilities, ethnic conflicts, and terrorism. GER:DB-SocSci 5 units, Win (Sagan, Blacker, Perry)

POLISCI 114T. Major Issues in International Conflict Management—(Same as ICA 114T.) Conflict prevention, mediation and implementation of peace agreements, peacekeeping, peacebuilding, and humanitarian intervention. Topics: ethical dilemmas of conflict management, evaluation of international, regional, and non-governmental organizations in conflict management, the future of the UN, and the use of economic sanctions. GER:DB-SocSci 5 units, Spr (Stedman)

POLISCI 115R. International Relations of Korea — The historical and current situation of N. and S. Korea. Korea’s relations with its neighbors emphasizing China and Japan; North-South relations; the economic situation in N.E. Asia; and US-ROK relations. International relations theories. GER:DB-SocSci, EC-GlobalCom 5 units, Win (Kang)

POLISCI 116. History of Nuclear Weapons — (Same as HISTORY 103E.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci 5 units (Holloway) not given 2005-06

AMERICAN POLITICS

POLISCI 120A. American Political Sociology and Public Opinion: Who We Are and What We Believe — First of team-taught, intermediate-level, three-part sequence designed to introduce students to topics in American politics and government. The sociology of the U.S. and the political beliefs and values of Americans. Students may enroll for one, two, or three quarters, but the course is cumulative so maximum benefit results from enrollment in the entire sequence. Completion of 2 is assumed but not required. GER:DB-SocSci 5 units (Fiorina, Snidman) not given 2005-06

POLISCI 120B. Parties, Interest Groups, the Media, and Elections — The role of political parties, interest groups, and the media in the American political system. Rules, resources, voter turnout, and vote choice in U.S. elections. GER:DB-SocSci 5 units, Aut (Sprague)

POLISCI 120C. American Political Institutions: Congress, the Executive Branch, and the Courts — How politicians, once elected, work together to govern America. The roles of the President, Congress, and Courts in making and enforcing laws. Focus is on the impact of constitutional rules on the incentives of each branch, and on how they influence law. GER:DB-SocSci 5 units, Win (Rutter)

POLISCI 121. Urban Politics — (Same as URBANST 111.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor. GER:DB-SocSci 5 units, Win (Fraga)

POLISCI 122. Introduction to American Law — (Same as AMSTUD 179, LAW 106.) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general. GER:DB-SocSci 3-5 units, Aut (Friedman)

POLISCI 123. Politics and Public Policy — (Same as PUBLPOL 101.) The domestic policy making process, emphasizing how elected officials, bureaucrats, and interest groups shape government policies in areas including tax, environmental, and social welfare policy, given their goals and available tactics. How public policies are formulated and implemented. The results of this process using equity and efficiency criteria. Prerequisite: 2. GER:DB-SocSci 5 units, Spr (Sprague)

POLISCI 124R. Judicial Politics and Constitutional Law: The Federal System — The impact of constitutional rules on policy making in the U.S. with a focus on structural issues such as separation of powers and federalism. Topics such as: the role of unelected judges in a democracy; the rule of law; and the constitutionality of the war in Iraq. Prerequisites: 2 or equivalent, and sophomore standing. GER:DB-SocSci, WIM 5 units, Aut (Rutter)
POLISCI 124T. Legislatures, Courts, and Public Policy — (Same as PUBLPOL 124T.) How courts exert power and play a role in creating policy in the U.S. Can or should judges read their own values into law? Can the elected branches check the power of unelected judges? What is good government and how do courts fit into it? Focus is on the Civil Rights Act of 1964 examining the political maneuvers to pass it and recent Supreme Court decisions applying it to affirmative action. GER: DB-SocSci
5 units, Win (Rotten)

POLISCI 127. Organizations and Public Policy — (Enroll in PUBLPOL 102.)
5 units, Win (Bendor)

POLISCI 127S. Mass Media Economics and Policy — (Enroll in PUBLPOL 172.)
4-5 units (Owen) not given 2005-06

POLISCI 128. Colonial and Revolutionary America — (Enroll in HISTORY 150A.)
5 units, Aut (Rakove)

POLISCI 129. The Death Penalty: Human Biology, Law, and Policy — (Enroll in HUMBIO 166.)
3 units, Aut, Spr (Abrams)

POLITICAL THEORY

POLISCI 130A. History of Ancient Political Thought I: Constructing and Questioning Political Obligation in the Ancient World — (Graduate students register for 330A.) Political philosophy in classical antiquity, focusing on canonical works of Plato, Aristotle, Cicero, and St. Augustine. Historical background. Topics include: political obligation, citizenship, and leadership; and tensions between political obligation and the claims of family, philosophy, and faith. GER: DB-SocSci
5 units, Aut (Adcock)

POLISCI 130B. History of Political Thought II: Early Modern Political Thought, 1500-1700 — (Graduate students register for 330B.) The development of constitutionalism, Renaissance humanism and the Reformation, and changing relationships between church and states. Emphasis is on the relationships among political thought, institutional frameworks, and immediate political problems and conflicts. The usefulness of the history of political thought to political science. GER: DB-SocSci
5 units, Win (Adcock)

POLISCI 130C. History of Political Thought III: Freedom, Reason, and Power — (Graduate students register for 330C.) Classic works in political theory on the themes of freedom, democracy, or power since the American and French revolutions. Readings include Kant, Hegel, Marx, Nietzsche, Dewey, and Foucault. GER: DB-SocSci
5 units, Spr (Stone)

POLISCI 131. Children’s Citizenship: Justice Across Generations — (Same as ETHICSOC 131.) The development of children into citizens, focusing on major social institutions responsible for their civic education: schools, families, communities, and civil society. How does each institution develop citizenship? What is the relationship between civic education and the reproduction of social equality or inequality? Do children's rights differ from those of adults? Readings: political theorists on justice, feminist theorists on family and children, court cases on tensions between the state and community interest in education, and social critics on the practice of civic education. GER: DB-SocSci
5 units, Spr (Reich)

POLISCI 133. Ethics and Politics in Public Service — (Same as ETHICSOC 133.) Primarily for freshmen and sophomores who participate or intend to participate in service activities through the Haas Center or register for courses with service learning components. The basis for a connection between an undergraduate’s service activities and academic experiences at Stanford. What does it mean to do public service? Why should or should not citizens do volunteer work? Is public service a good thing? The history, hazards, responsibilities, and dilemmas of doing public service. A historical context of public service work in the U.S., introducing the range of ethical concerns involved with service. GER:DB-SocSci
5 units, Aut (Reich)

POLISCI 134. Democracy and the Communication of Consent — (Enroll in COMM 136/236.)
4-5 units, Aut (Fishkin)

POLISCI 136S. Political Philosophy — (Enroll in PHIL 171/271, ETHICSOC 171.)
4 units, Win (Satz)

POLISCI 138. Modern Political Ideologies — Prominent political ideologies that define the terms of contemporary political discourse including liberalism, conservatism, feminism, and anarchism through the intellectual debates generated by the French Revolution. Readings include Price, Burke, Godwin, Wollstonecraft, and Paine. GER:DB-Hum
5 units, Win (Stone)

POLISCI 139. Children, Youth, and the Law — (Enroll in HUMBIO 102B.)
5 units, Win (Abrams)

COMPARATIVE POLITICS

Undergraduate courses and seminars in comparative politics generally fall into two groups: those dealing with a particular country or region, and those dealing with major political problems or processes. Students are encouraged to take courses from both groups, and are also urged to do course work in more than one country or region.

POLISCI 140. Political Economy of Development — Emphasis is on the interplay between political economic processes, and national and international factors from Latin America, Africa, and Asia. Do governments provide the foundations for economic development? The role of the state in solving problems of violence and capital accumulation. GER: DB-SocSci, EC-GlobalCom
5 units, Spr (Diaz-Cayeros)

POLISCI 140L. China in World Politics — The implications of the rise of China in contemporary world politics and for American foreign policy, including issues such as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions.
5 units (Miller) not given 2005-06

5 units, Win (Karl)

POLISCI 141R. Russian Politics — The evolution of the Russian political system including the Soviet era, reform attempts from Khrushchev to Gorbachev, and the collapse of the USSR. Post-communist political institutions including the Russian federal system, executive-legislative relations, political parties, and lobbies; social and economic conditions and the post-communist relationship between political and economic reform; and foreign relations with the former Soviet states and the West. GER:DB-SocSci, EC-GlobalCom
5 units, Aut (Dakin)
POLISCI 142. Political Economy of Western Europe — Differences in economic performance explained by the relative importance of structural institutional variables and the strategic choices of key political actors. Topics: macroeconomic policy, wage determination and income inequality, welfare state expansion and retrenchment, European integration. Readings focus on Britain, Germany, and Sweden. GER:DB-SocSci, EC-GlobalCom
5 units (Mares) not given 2005-06

POLISCI 142R. Representative Government in Europe — How electoral institutions, party systems, and structures of interest group representation differ across European countries, and between Europe and the U.S. How these variations influence the structure and content of ideological debate and mediate its influence on the policy making process. How European integration is altering the structure of citizen representation in EU member states. GER:DB-SocSci
5 units (Wren) not given 2005-06

POLISCI 143. Nongovernmental Organizations and Development in Poor Countries — (Same as ICA 143, INTNLREL 143A.) How nongovernmental organizations affect economic growth, equity, political stability, and prospects for democracy in poor countries. Do NGOs contribute to these goals? What is reasonable to expect from the NGO sector? Interactions among NGOs from wealthy and poor countries, governments, international financial institutions, and multinational corporations. GER:DB-SocSci
5 units, Spr (Abernethy)

POLISCI 144S. Democracies and Autorocracies — The study of political regimes. The main characteristics of democratic versus authoritarian regimes. What determines that political order is established in the form of democracy or authoritarianism? How democracies and autocracies operate; how each regime achieves political order, adopts public decisions, and impacts economic performance. GER:DB-SocSci
5 units (Magaloni) not given 2005-06

POLISCI 145. Politics and Development in Latin America — Political, economic, and social development in Brazil, Mexico, Cuba, and Argentina. Emphasis is on historical and comparative analyses and policy and theoretical issues such as ideologies of development, democracy and its alternatives, constraints on national autonomy, and civil-military, state-society, and state-market relations. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Packenham)

POLISCI 146R. War Transitions: The Promise and Perils of Post-Conflict Reconstruction — Theoretical and policy approaches to post-conflict political, social, and institutional reconstruction in Latin American, Africa, Asia, and the Middle East. The evolution of reconstruction policies in comparative and historical perspective; changing roles of state and non-state actors; security in transition; demobilization and reintegration of combatants; resettlement of displaced populations; constitutional and institutional design and creation; social justice and reconciliation; economic development in war-distorted economies; and environment, resources, and public health after war. GER:DB-SocSci
5 units, Win (Kalkarni)

POLISCI 147. Comparative Democratic Development — Social, cultural, political, economic, and international factors affecting the development and consolidation of democracy in historical and comparative perspective. Individual country experiences with democracy, democratization, and regime performance. Emphasis is on the third wave of democratization over the past three decades and contemporary possibilities for democratic change. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Diamond)

POLISCI 148/348. Chinese Politics: The Transformation and the Era of Reform — (Graduate students register for 348.) For advanced undergraduates and beginning graduate students. The content, process, and consequences of reform in China from 1976 to the present. Changes in property rights, markets, credit, and the role of the state in economic development. GER:DB-SocSci, EC-GlobalCom
5 units (Oi) not given 2005-06

POLISCI 148G. Asia-Pacific Transformation — (Enroll in SOC 167A/267A.)
5 units, Aut (Shin)

POLISCI 148R. Chinese Politics — The politics of the People’s Republic of China. The origins of the Communist Revolution, the institutionalization and consequences of communist rule, and attempts to reform the system since 1978. GER:DB-SocSci
5 units, Aut (Miller)

POLISCI 148S. The U.S. and Asia During the Cold War — International relations perspective. WW II and its impact on international relations; the efforts of Allied statesmen to design a stable postwar order; the Chinese civil war; the American occupation of Japan; the Korean War; S.E. Asian independence struggles; the American alliance system in the 50s, the Sino-Soviet alliance; Indo-Pakistani conflicts; the Vietnam War; strategic realignment in the 70s; and the legacy of the Cold War on the region’s international agenda and American policy priorities. The relevance of the region to the international system. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Miller)

POLISCI 149S. Islam and the West — Changes in relative power and vitality of each side. The relationship in the Middle Ages revolved around power and domination, and since the Renaissance around modernity. Focus is on Muslims of the Middle East. GER:DB-SocSci
5 units, Spr (Miller)

POLITICAL METHODOLOGY

POLISCI 150A. Political Methodology I — (Graduate students register for 350A.) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus. GER:DB-Math
5 units, Aut (Rivers)

POLISCI 150B. Political Methodology II — (Graduate students register for 350B.) Understanding and using the linear regression model in a social-science context; properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations, graphical techniques for model fitting and checking; interactions among exploratory variables; pooling data; extensions for binary responses. GER:DB-Math
5 units, Win (Jackman)

POLISCI 150C. Political Methodology III — (Graduate students register for 350C.) Models for discrete outcomes, time series, measurement error, and simultaneity. Introduction to nonlinear estimation, large sample theory. Prerequisite: 150B/350B.
3-5 units, Spr (Rivers, Wand)

POLISCI 151A. Doing Political Science — For students planning a major in Political Science. An introduction to social science methodological approaches, from case studies and formal models, to the study of politics and government. Beneath the diversity of means that political scientists use to pursue knowledge lies a common language, core concepts, and scholarly goals. Concepts and their use through the research of Stanford Political Science professors. In addition to the instructors, 6-8 other faculty appear in various course sessions. Goal is to prepare students to do political science, not just study it. GER:DB-Math
5 units (Fiorina, Jackman) not given 2005-06

POLISCI 151B. Data Analysis for Political Science — Operationalization of concepts, measurement, scale construction, finding and pooling/merging data, cross-tabulations, tests of association, comparison of means, correlation, scatterplots, and regression models. How to present the results of data analysis in research reports, essays, and theses. Emphasis is on getting and using data with appropriate statistical software. Prior mathematics not required. GER:DB-Math
5 units, Spr (Jackman)
POLISCI 152. Introduction to Game Theoretic Methods in Political Science—(Graduate students register for 352.) Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes’ theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor. 5 units (Fraga) not given 2005-06

ADVANCED UNDERGRADUATE SEMINARS

INTERNATIONAL RELATIONS

POLISCI 215. Explaining Ethnic Violence—What is ethnic violence and why does it occur? Should elite machinations, the psychology of crowds, or historical hatreds be blamed? Case studies and theoretical work on the sources and nature of ethnic violence. GER:DB-SocSci, WIM 5 units, Spr (Fearon)

POLISCI 218. U.S. Relations in Iran—The evolution of relations between the U.S. and Iran. The years after WW II when the U.S. became more involved in Iran. Relations after the victory of the Islamic republic. The current state of affairs and the prospects for the future. Emphasis is on original documents of U.S. diplomacy (White House, State Department, and the U.S. Embassy in Iran). Research paper. GER:DB-SocSci 5 units, Aut (Milani)

AMERICAN POLITICS

POLISCI 221R. Urban Policy—Public finance, housing, education, transportation, and crime in major metropolitan areas in the U.S. Students are placed in internships in government departments, social service agencies, or community-based organizations. Required policy brief integrating theory with the internship experience. GER:DB-SocSci, EC-AmerCul, WIM 5 units, Aut (Fraga)

POLISCI 221S. Civic Capacity and Urban Youth—The logic and possibilities of mobilizing urban youth to overcome the decline in civic engagement across American society. Can youth be trained to be advocates for their interests in education or in local government? If youth are mobilized, can this serve as a catalyst to mobilize their parents and other adults? Class requirements include an internship of at least 7 hours per week in the John W. Gardner Center for Youth and their Communities. GER:DB-SocSci, EC-AmerCul, WIM 5 units, Aut (Fraga)

POLISCI 221T. Politics of Race and Ethnicity in the United States—Race and ethnicity issues used to understand current challenges to political development of the U.S. Focus is on political institutions and how current issues such as campaigning, affirmative action, and voting rights operate within parameters set by these institutions. National values underlying notions of identity, citizenship, justice, and public interest. GER:DB-SocSci, EC-AmerCul 5 units (Fraga) not given 2005-06

POLISCI 221U. Latinos in American Politics—(Same as PUBLPOL 189.) Evolution of Latino participation in American politics from the mid-19th century to the present. Issues include conquest, immigration, the Chicano movement, national origin diversity, gender, political parties, and office holding. GER:DB-SocSci, EC-AmerCul 5 units, Win (Fraga)

POLISCI 221V. California Politics: Past, Present, and Future—(Same as PUBLPOL 188.) Changing patterns of politics from the mid-19th century to the present. Emphasis is on the role of institutions in structuring the state’s politics. GER:DB-SocSci, EC-AmerCul 5 units, Win (Fraga)

POLISCI 222S. Topics in Constitutional History—(Same as HISTORY 250B.) Topics in the history of the American Constitution and its interpretation, including the invention of the concept of the written constitution in the Revolutionary era, the crisis of Civil War and Reconstruction, and the controversies over interpretation and the rights revolution in the 20th century. GER:DB-SocSci, EC-AmerCul 5 units (Rakove) not given 2005-06

POLISCI 223R. Philanthropy and Social Innovation—(Enroll in PUBLPOL 183.) 5 units (Arrillaga) not given 2005-06

POLISCI 223S. The Imperial Temptation: U.S. Foreign Policy in a Unipolar World—How did the collapse of the Soviet Union liberate the U.S. from the constraints of bipolarity. How current policy fits into earlier traditions such as Wilsonianism or realism. Normative questions; what is America’s proper role in the world? GER:DB-SocSci 5 units, Spr (Sniderman)

POLISCI 224R. Democratic Citizenship: Can Ordinary Citizens Reason about Politics—The tradition of skepticism about whether ordinary citizens can discharge the responsibilities of democratic citizenship. How this skepticism has been strengthened by recent research on public opinion and electoral behavior. Sources include the interplay of empirical and normative democratic theory. GER:DB-SocSci 5 units, Spr (Sniderman)

POLISCI 225R. Black Politics in the Post-Civil Rights Era—The shift among Black Americans from protest to politics. Emphasis is on the development and use of political resources as the means to achieve policy objectives. Topics: black political attitudes and political participation, voting rights and representation, party politics, multiracial coalition building. GER:DB-SocSci, EC-AmerCul 5 units, Aut (Gay)

POLISCI 227R. Polarized Politics and Special Interest Groups—The influence of special interest groups on electoral competition and policy outcomes in the U.S., and the increasing partisan polarization among elites. How money spent by special interest groups affects the types of candidates who are elected, the agendas of the parties, and the votes of Congressmen. GER:DB-SocSci 5 units, Win (Wand)

POLITICAL THEORY

POLISCI 231S. Contemporary Theories of Justice—Social and political justice and contemporary debates in political theory. Recent works that develop the principles of justice, and the political arrangements that best satisfy their requirements. Limited enrollment. GER: DB- SocSci, WIM 5 units, Win (Reich)

POLISCI 232. Civil Society and the Nonprofit Sector—(Enroll in URBANST 121.) 2-4 units, Spr (Sievers)

COMPARATIVE POLITICS

POLISCI 240L. Politics of the Korean Peninsula—Historical development of Korean politics, the political economy of development in S. Korea since 1948, and N. Korean politics. GER:DB-SocSci 5 units, Aut (Kang)

POLISCI 242T. Social Protection Around the World—The political origin of and differences in major policies of social protection across developed and developing countries; recent challenges faced by these policies. Why some countries provide old-age or sickness benefits to all citizens, while others offer no protection during employment-related risks. Are these differences in policies and institutions driven by economic development alone? Prerequisite: 4.
5 units (Mares) not given 2005-06

POLISCI 242U. Varieties of Capitalism—Core differences in institutions and policies across advanced industrialized democracies. Are there meaningful distinctions among models of capitalism? Do these differences persist in the face of economic globalization? Topics: industrial relations, corporate governance, and social insurance. Prerequisite: 4.
GER:DB-SocSci
5 units (Mares) not given 2005-06

POLISCI 243R. Research Seminar in Democratization and Human Rights—Goal is to produce a minimum 30-page paper based on field research abroad. Students prepare research problem statement, meet individually with the professor, and circulate drafts for class comment. Graduate students should register for directed reading under the professor’s name. GER:DB-SocSci
5 units, Win (Karl)

POLISCI 244R. Political Economy of Disease: AIDS in Historical Perspective—Demographic, economic, cultural, and political changes in the wake of AIDS. The social dimensions of infectious diseases and epidemics; the impact of epidemics on political and economic institutions; and the political economy of responses to the AIDS crisis. Students conduct original research on causes and/or consequences of AIDS or AIDS-related policies. GER:DB-SocSci
5 units (Weinstein) not given 2005-06

POLISCI 245R. Politics in Modern Iran—Modern Iran has been a smythe for political movements, ideologies, and types of states. Movements include nationalism, constitutionalism, Marxism, Islamic fundamentalism, social democracy, Islamic liberalism, and fascism. Forms of government include Oriental despotism, authoritarianism, Islamic theocracy, and liberal democracy. These varieties have appeared in Iran in an iteration shaped by history, geography, proximity to oil and the Soviet Union, and the hegemony of Islamic culture. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Milani)

POLISCI1246R. Market-Oriented Reform and Development in Latin America—Preference to juniors and seniors. Theoretical and policy approaches to Latin American development in recent decades emphasizing policies since the 80s and their effects on economic, social, and political development. GER:DB-SocSci
5 units, Spr (Packenham)

5 units, Aut (Kulkarni)

POLISCI 247S. Politics and Economic Policy in Advanced Industrial Democracies—Political economic approaches to patterns of economic policy making and performance in the advanced industrial democracies of W. Europe and N. America. What is the role of political ideology and government partisanship in influencing economic outcomes? How do the political parties interact with organized interest groups in the formation of economic strategies? Can voters influence patterns of economic policy making and how is this influence felt? What are the cross-national impacts of globalization and the increasing openness of trade and capital markets? What constraints are placed on domestic political actors by the development of supranational political organizations like the EU?
GER:DB-SocSci
5 units, Spr (Wren)

POLISCI 247T. The Politics of the European Union—The origins and the current structure of the EU. The effects of the EU on domestic politics, the electoral landscape, the distribution of political power, the power of national governments to formulate public policy, and economic and social policies. Current issues in EU politics including the creation of the EU constitution; the enlargement of the EU to include countries from the former Soviet bloc; the future of European welfare states; and the EU’s military role. GER:DB-SocSci, EC-GlobalCom
5 units (Wren) not given 2005-06

POLISCI 247U. Electoral and Party Politics in Developed Democracies—The relationships between political parties and electorates, and their impact on public policy formation in W. Europe and N. America. The historical origins of modern parties and party systems, the determinants of individual voting behavior, the role of parties in electoral competition and government formation, the effects of partisan governments and elections on political-economic outcomes, and recent shifts in the structure of electoral cleavages and party systems.
5 units (Wren) not given 2005-06

POLISCI 248. Mexican Politics—Why did Mexico fail to eliminate poverty and destitution despite resources channeled to that end and a rhetoric of social justice inherited from the Revolution? The durability of the political regime, the peculiar characteristics of the Mexican process of democratization, and the regime’s incentives to redress ancestral problems of inequality and destitution. Emphasis is on crafting research projects on the political economy of Mexican development, and hypothesis testing with empirical data. GER:DB-SocSci, EC-GlobalCom
5 units (Díaz-Cayeros) not given 2005-06

POLISCI 248S. Latin American Politics—Fundamental transformations in Latin America in the last two decades: why most governments are now democratic or semidemocratic; and economic transformation as countries abandoned import substitution industrialization policies led by state intervention for neoliberal economic policies. The nature of this dual transformation. GER:DB-SocSci
5 units (Magaloni) not given 2005-06

POLISCI 248T. Problems of Governance and Economic Growth in Mexico: From the Aztecs to NAFTA—(Same as HISTORY 278.) Political and economic institutions of Mexico. The origins and economic consequences of authoritarianism. GER:DB-SocSci
5 units, Spr (Haber)

RESEARCH
POLISCI 299A,B,C. Senior Project—Students conduct independent research work towards a senior honors thesis. See “Honors Program” above.
1-5 units, Aut, Win, Spr (Staff)

POLISCI 299Q. Junior Research Seminar—For students interested in writing a senior honors thesis. Focus is on finding a manageable topic and an adviser.
2 units, Win (Rutten)

POLISCI 299R. Senior Research Seminar—Required of students writing honors theses. Focus is on acquiring research skills and developing an appropriate research design. WIM
3 units, Aut (Rutten)

POLISCI 299S,T. Senior Honors Tutorial—Required of students writing honors theses. Focus is on solving problems in writing a thesis such as keeping on schedule and rewriting drafts. Students work with other honors students and graduate student tutors.
2 units, S: Win, T: Spr (Staff)
ADVANCED UNDERGRADUATE/GRADUATE
INTERNATIONAL RELATIONS
POLISCI 310A. International Relations Theory, Part I — First of a three-part graduate sequence. History of international relations, current debates, and applications to problems of international security and political economy.
  5 units, Aut (Tomz)

POLISCI 310B. International Relations Theory, Part II — Second of a three-part graduate sequence. History of international relations theory, current debates, and applications to problems of international security and political economy. Prerequisite: 310A.
  5 units, Win (Fearon, Sagan)

POLISCI 310C. Research in International Relations—Third of a three-part graduate sequence. Focus is on developing research papers begun in 310A or B, and exploring active areas of research in the field. Prerequisite: 310B.
  3-5 units (Staff) not given 2005-06

POLISCI 311A,B,C. Workshop in International Relations—For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.
  1-5 units, A: Aut (Goldstein, Tomz), B: Win (Sagan, Tomz),
  C: Spr (Fearon, Goldstein)

POLISCI 312. Japanese Foreign Policy—(For graduate students; see 112.)
  5 units, Aut (Okimoto)

POLISCI 312R. Domestic Politics and International Conflict—Theoretical and empirical research on the effects of domestic politics and political institutions on the incidence, outcome, and resolution of international conflict. Topics include the democratic peace, diversionary conflict, economic sources of war and peace, domestic influences on war outcomes, and the politics of resolving international rivalries.
  5 units (Schultz) not given 2005-06

POLISCI 314S. Decision Making in U.S. Foreign Policy—(Same as IPS 314S.) Priority given to students in International Policy Studies. The formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives are supplemented by case studies. Preparation of policy memorandum and substantial research paper or take-home final.
  5 units, Spr (Blacker)

POLISCI 316. International History and International Relations Theory—(Same as HISTORY 202/306E.) GER:DB-SocSci
  5 units (Holloway) not given 2005-06

POLISCI 318S. State Building—Past and present efforts by external actors to influence domestic authority structures. Topics may include: colonialism; protection of minority rights in the 19th and first half of the 20th century; U.S. intervention in the Caribbean and Central America; U.S. and Soviet intervention in Europe after WW II; Afghanistan; and Iraq. For Ph.D. students; others with consent of instructor.
  5 units (Krasner) not given 2005-06

AMERICAN POLITICS
POLISCI 321. Creating the American Republic—(Same as HISTORY 251/352.) Concepts and developments in the late 18th-century invention of American Constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources. GER:DB-SocSci
  5 units, Win (Rakove)

POLISCI 322. Campaign Finance and Elections—The strategies and behavior of special interest groups, parties, candidates, and voters in the U.S. Emphasis is on statistical models and empirical tests of formal models. Prerequisite: 350B; 351 sequence or 352; or equivalents.
  5 units (Wand) not given 2005-06

POLISCI 323R. The Press and the Political Process—(Same as COMM 160/260.) The role of mass media and other channels of communication in political and electoral processes. GER:DB-SocSci
  4-5 units, Win (Iyengar)

POLISCI 323S. Analysis of Political Campaigns—(Same as COMM 162/262.) Seminar. The evolution of American political campaigns, and the replacement of the political party by the mass media as intermediary between candidates and voters. Academic literature on media strategies, the relationship between candidates and the press, the effects of campaigns on voter behavior, and inconsistencies between media campaigns and democratic norms. Do media-based campaigns enable voters to live up to their civic responsibility? Has the need for well-financed campaigns increased the influence of elites over nominations? Have citizens become disengaged? GER:DB-SocSci
  4-5 units, Aut (Iyengar)

POLISCI 324R. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives—(Enroll in COMM 239.)
  4 units (Krosnick) not given 2005-06

POLISCI 325S. Race and Place in American Politics—The political opinions of individuals cannot be explained apart from the environments within which they occur. How features of neighborhood environments, including their racial and socioeconomic composition, shape the politics and political behavior of Americans. How shifting patterns of residential segregation and suburbanization affect the attitudes and behaviors of African Americans and whites.
  5 units, Aut (Gay)

POLISCI 326R. Urban Politics and Public Policy — Major theoretical approaches regarding democracy, participation, representation, economic development, and governance.
  5 units (Fraga) not given 2005-06

POLISCI 328. Introduction to the Politics of Education—(Enroll in EDUC 220B.)
  4 units, Spr (Kirst)

POLITICAL THEORY
POLISCI 330A History of Ancient Political Thought I: Constructing and Questioning Political Obligation in the Ancient World—(For graduate students; see 130A.)
  5 units, Aut (Adcock)

POLISCI 330B History of Political Thought II: Early Modern Political Thought, 1500-1700—(For graduate students; see 130B.)
  5 units, Win (Adcock)

POLISCI 330C History of Political Thought III: Freedom, Reason, and Power—(For graduate students; see 130C.)
  5 units, Spr (Stone)

  5 units, Win (Stone)

POLISCI 333. Topics in Democratic Theory—(Same as PHIL 377.) Modern approaches to democratic theory including liberal, communitarian, republican, and participatory theories beginning with the works of Locke, Rousseau, and Mill. Writers: John Rawls, Ronald Dworkin, Jeremy Waldron, Joshua Cohen, Habermas, Petit, Iris Marion Young, Ian Shapiro, and Amy Gutman.
  3-5 units (Ferejohn, Satz) alternate years, given 2006-07

POLISCI 334R. Democracy, Justice, and Deliberation—(Enroll in COMM 236G/336G.)
  1-5 units (Fishkin) not given 2005-06
POLISCI 334S. Democracy, Press, and Public Opinion—(Enroll in COMM 244/344.)  
1-4 units (Fishkin) not given 2005-06

POLISCI 334T. Democratic Theory: Normative and Empirical Issues—(Enroll in COMM 238/338.)  
1-5 units, Win (Fishkin, Luskin)

POLISCI 338G. Political Anthropology from Rousseau to Freud—(Enroll in FRENGEN 256E.)  
3-5 units (Dupuy) alternate years, given 2006-07

POLISCI 338I. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S.—(Enroll in FRENGEN 258E.)  
3-5 units, Spr (Dupuy)

COMPARATIVE POLITICS

POLISCI 340R. Political Economics—How governments collect revenue, allocate spending, and obtain credit, as determined by variations in institutional and political conditions. The emphasis in a democracy on the provision of public goods and services and representative accountability as against the emphasis in less democratized settings on the extractive capacity of the state, the temporal horizons of rulers, and the purchase of political support with money.  
5 units (Díaz-Cayeros) not given 2005-2006

POLISCI 340S. Political Economy of Post-Communism—The sources of the collapse of the communist states in E. Europe and the former Soviet Union. Issues facing the formation and consolidation of post-communist states and societies including democratization, privatization, nationalism, and foreign relations between newly independent states. Models and historical analogues for analyzing the emergence of post-communist politics.  
5 units, Win (Stoner-Weiss)

POLISCI 340U. Politics of Identity in Eastern Europe—Relations between policy and identity in post-communist E. Europe. Language, ethnicity, religion, and memory in areas such as education, public administration, citizenship, foreign policy, media, churches, holidays, and monuments. Emphasis is on Ukraine; also Belarus, Estonia, Romania, Macedonia, Tatarstan, and Chuvashia. How different degrees of radicalism in nationalizing policy are determined by inherited ideologies and identities, and how they determine post-Soviet identity transformation.  
5 units, Win (Kulyk)

POLISCI 341T. Comparative Democratization and Regime Change—Issues of democracy, its definition, problems of transition and consolidation, and comparison. The relationship between democracy and the military, the economy, and the interstate system.  
5 units, Spr (Karl)

POLISCI 342R. Politics of Welfare State Expansion and Reform—The main theories explaining the development of the welfare state and its impact on the organization of the political economy. The relative importance of institutional variables, social cleavages, partisanship, and ideology, and the role of economic openness in explaining cross-national differences in social policy. The recent politics of social policy adjustment, and the extent existing differences among welfare states endure in the face of unfavorable economic and demographic developments and common political pressures towards welfare state retrenchment.  
5 units (Mares) not given 2005-06

POLISCI 343R. African Civil Wars in Comparative Perspectives: A Research Seminar—Taught jointly with Columbia University via videoconferencing. Topics include causes of civil war, patterns of recruitment and participation, organization of rebel groups, strategies of warring factions, bargaining in the context of peace processes, and civil war termination. Required research paper using original datasets from instructors. Prerequisites: econometric modeling and graduate course work in comparative politics, international relations, and statistics.  
5 units, Aut (Weinstein)

POLISCI 344S. Comparative Political Institutions—Overview of existing political institutions and their impact on political-economic outcomes. The roles of political institutions and what determines their stability, how they are chosen, and which processes enable their transformation over time. The main variances in institutional settings, emphasizing the menu of democratic institutions, including parliamentary, semi-presidential, and presidential systems; electoral rules; bicameralism; federalism; and legislative-executive relations. The effect of political institutions on economic growth and political stability.  
5 units (Magaloni) not given 2005-06

POLISCI 344U. Political Culture—An approach to culture that emphasizes its equilibrium attributes through relationships among culture, choice, coordination, and common knowledge. Implications for the study of political processes and institutions. Required paper on the role of culture in a political institution.  
5 units, Spr (Laitin, Weingast)

POLISCI 345R. Political Economy of Japan—Institutions and processes in the political organization of economic activity in Japan. The interaction of public and private sector institutions in the growth of Japan’s postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, and public policy making. Comparison of Japan’s political economy before the bursting of the bubble in 1990-91 with the current situation; why it fell into stagnation and why it has taken Japan so long to recover.  
5 units, Aut (Okimoto)

POLISCI 346S. The Logic of Authoritarian Government—If authoritarianism is less economically efficient and a less stable form of political organization than democracy, then why, as a matter of history, are there more authoritarian governments than democracies? The theoretical and empirical literature on authoritarian governments, and related literatures on the micro-economic analysis of property rights and credible commitments.  
5 units (Haber) not given 2005-06

POLISCI 347S. Comparative Political Economy of Developed Democracies—Theoretical approaches to differences in economic policy and performance across the advanced industrial democracies. What is the relative importance of government partisanship and ideology, social cleavages, and institutional structures in explaining patterns in economic policy and outcomes? How do these political models compare with models emphasizing economic variables such as capital market integration, trade openness, or technological change?  
3-5 units, Spr (Wren)

POLISCI 348S. Contemporary Chinese Foreign Relations—(Same as HISTORY 297/397.)  
5 units, Spr (Miller)

4-5 units, Win (Samoff)

POLITICAL METHODOLOGY

POLISCI 350A. Political Methodology I—(For graduate students; see 150A.)  
5 units, Aut (Rivers)

POLISCI 350B. Political Methodology II—(For graduate students; see 150B.)  
5 units, Win (Jackman)

POLISCI 350C. Political Methodology III—(For graduate students; see 150C.)  
5 units, Spr (Rivers, Wand)
POLISCI 351A. Foundations of Political Economy — (Same as POL- ECON 680.) Emphasis is on formal models of collective choice, public institutions, and political competition. Topics include voting theory, social choice, institutional equilibria, agenda setting, interest-group politics, bureaucratic behavior, and electoral competition.
4 units, Aut (Shotts)

POLISCI 351B. Economic Analysis of Political Institutions — (Same as POLIECON 681.) Applying the techniques of microeconomic analysis and game theory to the study of political behavior and institutions, including information economics, games of incomplete information, sequential bargaining theory, repeated games, and rational expectations. Applications include agenda formation in legislatures, the implications of legislative structure, government formation, lobbying, electoral competition and interest groups, the control of bureaucracies, interest group competition, and collective choice rules.
4 units, Win (Baron)

POLISCI 351C. Applied Formal Models: Governmental Decision Making — (Same as POLIECON 682.) Focus is on empirical applications of formal models to the study of legislatures to obtain a systematic understanding of collective decision making. Prerequisites: 351A,B, or equivalent.
4 units, Spr (Krehbiel)

POLISCI 352. Introduction to Game Theoretic Methods in Political Science — (For graduate students; see 152.)
5 units (Fearon) not given 2005-06

POLISCI 353A,B,C. Workshop in Statistical Modeling — Theoretical aspects and empirical applications of statistical modeling in the social sciences. Guest speakers. Students present a research paper. Prerequisite: 350B or equivalent.
1-5 units, A: Aut, B: Win, C: Spr (Jackman, Rivers, Wand)

POLISCI 355. Advanced Topics in Research Methods — Applications to American and comparative politics and international relations.
1-5 units, Win (Wand)

POLITICAL ORGANIZATIONS

POLISCI 362. New Economics of Organization — (Same as OB 686.) Survey of economic approaches to organization, emphasizing theory and application, with attention to politics.
5 units, Spr (Weingast)

POLISCI 364. Politics and Organization — Political institutions and formal organizations. Norms, expectations, and routines characteristic of informal political structure.
5 units, Win (Bendor)

POLISCI 365. Organizational Decision Making — Behavioral theories of organization. Emphasis is on the institutional applications of bounded rationality. Models of incrementalism; evolutionary models of change; organizational learning. The differences between predictions of theories of perfect rationality and those of imperfect rationality. Organizational responses (constructive and pathological) to constraints on information processing. Institutional contexts; public agencies and firms.
5 units (Bendor) not given 2005-2006

GRADUATE

POLISCI 411A,B,C. Research Seminar in International Security and Social Science — Advanced graduate students, faculty, and visitors present research on contemporary problems in international security.
1 unit, Aut, Win, Spr (Eden, Sagan)

POLISCI 420A. Approaches to the Study of American Politics — Theories of American politics, focusing on Congress, the presidency, the bureaucracy, and the courts.
5 units, Aut (Weingast)

POLISCI 420B. Topics in American Political Behavior — For graduate students with some background in American politics embarking on their own research. Current research in American politics, emphasizing political behavior and public opinion. Possible topics: uncertainty and ambivalence in political attitudes, heterogeneity in public opinion, the structure of American political ideology, political learning, the media as a determinant of public opinion, and links between public opinion and public policy.
5 units, Win (Gay)

POLISCI 420C. American Political Institutions — Field seminar. Prerequisites: 420A,B.
5 units, Spr (Ferejohn)

POLISCI 422A,B. Research Seminar in American Political Institutions — Two quarter sequence. Recent work on American institutions including Congress, the courts, and administrative agencies. Some attention to issues of federalism.
5 units (Ferejohn) not given 2005-06

POLISCI 424. Introduction to Political Psychology — Current issues in public opinion and political psychology. The design and analysis of experiments embedded in survey research. Focus is on reviewing the research literature and analyzing relevant data sets.
5 units, Win (Sniderman)

POLISCI 427. The Political Economy of Immigration — The theoretical and empirical literature on migration politics and the economic causes and effects of migration. The political economy of American immigration in comparative perspective. The immigration dilemmas of governments in W. Europe, Asia, and Australia.
5 units, Spr (Wong)

POLISCI 435. Topics in the Philosophy of Social Science — Topics relevant to present-day political science practice including: the foundation of probability theory; theories of scientific progress; the scope and limits of rational choice theory; and interpretive social science.
5 units, Spr (Stone)

POLISCI 436. Rational Choice — The scope and limits of rational choice theory. Possible topics: explanatory and normative uses of rational choice; self-interest versus altruism; the nature of social norms; incommensurable choices; and bounded rationality.
5 units (Stone) not given 2005-06

POLISCI 440A. Theories in Comparative Politics — Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of instructor. Theories addressing major concerns in the comparative field including democracy, regime change, the state, revolutions, national heterogeneity, and economic performance.
5 units, Aut (Díaz-Cayeros, Laitin)

POLISCI 440B. Comparative Political Economy — Required of all Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. Micro- and macro-level explanations for variation in economic policies and outcomes. The formation of cleavages and political coalitions, and the economic and political consequences of variation in partisanship, political institutions, regime types, and economic openness.
5 units, Win (Haber)

POLISCI 440C. Methods in Comparative Politics — Required of Political Science Ph.D. candidates with comparative politics as a first or second concentration; others by consent of instructor. Current methodological
standards in comparative politics. Students develop their own research design that meets these standards.

5 units, Spr (Laitin, Weinstein)

POLISCI 440D. Workshop in Comparative Politics — Faculty, guest speakers, and graduate students conducting research in comparative politics present work-in-progress. Graduate students may enroll for up to 5 total units apportioned by quarter. Auditors welcome. Graduate students whose major or minor field is comparative politics must make at least one presentation to the seminar.

1-5 units, Aut (Díaz-Cayeros), Win, Spr (Díaz-Cayeros, Mares)

POLISCI 441. Politics of Development — Theoretical understanding of how political processes and institutions are reflected in poverty and inequality; the creation of land, labor, and credit markets; and the configuration of fiscal, monetary, and trade policies. The politics of developing countries with emphasis on contrasts between Latin America and Africa.

5 units (Díaz-Cayeros) not given 2005-06

POLISCI 442. Qualitative and Field Methods — Qualitative methods for data gathering and analysis in political science. Theoretical literature on research design; challenges associated with analysis; techniques for fieldwork. Topics include case selection, levels of analysis, process tracing, ethical concerns in the field, participant observation, interviewing, archival research, survey design, and field experiments. Prerequisites: 440A,B,C.

5 units (Weinstein) not given 2005-06

POLISCI 443R. Corporate Restructuring and Governance in Asia — The political economy of state-business relations and attempts at reform. Problems that have emerged since the 1997 financial crisis and the reforms and restructuring that have been introduced. Focus is on the politics that surround the reforms and their consequences for corporate governance. Cases include China, Japan, and Korea.

5 units (Oi) not given 2005-06

POLISCI 443S. Political Economy of Reform in China — The content, process, and problems of China’s post-Mao reforms. Changes in property rights, markets, credit, and the role of the state in economic development. Comparative insights about reform in the Chinese communist system that distinguishes it from the experience of regimes in Eastern Europe and the former Soviet Union. Readings in Chinese and English. Prerequisite: knowledge of post-1949 Chinese government and politics.

5 units (Oi) not given 2005-06

OVERSEAS STUDIES

Courses approved for the Political Science major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BEIJING

POLISCI 246P. Comparing the Chinese and American Legal Systems

5 units, Aut, Spr (Zhang)

BERLIN

POLISCI 110P. Globalization: International Challenges, Regional Responses

4-5 units, Spr (Tempel)

POLISCI 111P. The German Economy: Past and Present — (Same as ECON 115X.)

4-5 units, Aut (Klein)

POLISCI 112P. A People’s Union? Money, Markets, and Identity in the EU

4-5 units, Aut (Brückner)

POLISCI 245P. Shifting Alliances? The European Union and the U.S

5 units, Win (Brückner)

FLORENCE

POLISCI 42P. An Extraordinary Experiment: Politics and Policies of the New European Union

5 units, Aut (Morlino)

POLISCI 145P. Italy: From Agrarian to Postindustrial Society — (Same as HISTORY 106V.)

4 units, Aut (Mammarella)

POLISCI 210P. Current Issues in Human Rights and International Justice

4 units, Win (Cassese)

KYOTO

POLISCI 211P. Japan in Contemporary International Affairs

5 units, Spr (MacDougall)

POLISCI 240P. The Political Economy of Japan

4-5 units, Spr (Hayashi)

MOSCOW

POLISCI 118P. Russian Politics and Institutions in a Comparative Perspective

5 units, Aut (Melville)

POLISCI 143P. Problems and Prospects of Post-Soviet Eurasia

5 units, Aut (Trenin)

OXFORD

POLISCI 141P. Modern UK and European Government and Politics

4 units, Aut (Capoccia)

POLISCI 148P. European Imperialism and the Third World, 1870-1970 — (Same as HISTORY 141V.)

5 units, Spr (Darwin)

POLISCI 244P. British and American Constitutional Systems in Comparative Perspective

5 units, Spr (McMahon)

PARIS

POLISCI 143P. Human Rights in Comparative Perspective

4-5 units, Spr (Remy-Granger)

POLISCI 149P. Europe: Integration and Disintegration of States, Politics, and Civil Societies

4-5 units, Win (Strudel)

POLISCI 241P. Political Attitudes and Behavior in Contemporary France

4-5 units, Aut (Mayer, Muxel)

SANTIAGO

POLISCI 117P. Latin America in the International System

4-5 units, Win (Fuentes)

POLISCI 242P. Modernization and its Discontents: Chilean Politics at the Turn of the Century

5 units, Spr (Correa)

POLISCI 243P. Political Transition and Democratic Consolidation: Chile in Comparative Perspective — (Same as LATINAM 221X.)

5 units, Aut (Micco)
MORRISONS INSTITUTE FOR POPULATION AND RESOURCE STUDIES

Faculty: (Director) Marcus W. Feldman (Biological Sciences); Carl Djerassi (Chemistry), William Durham (Anthropological Sciences), Paul R. Ehrlich (Biological Sciences), Lawrence H. Goulder (Economics, Institute for International Studies), Mary Lake Polan (Obstetrics and Gynecology), Shripad Tuljapurkar (Biological Sciences)

Institute Office: 371 Serra Mall (Gilbert 116)
Mail Code: 94305-5020
Phone: (650) 723-7518
Email: morrinist@stanford.edu
Web Site: http://www.stanford.edu/group/morrinist/

Although Stanford University does not have a degree program in population studies, it does have scholars of international reputation in specialties such as demographic history, demographic methods, economic demography, epidemiology, population biology, population genetics, and the sociology and anthropology of populations.

The Morrison Institute for Population and Resource Studies is an interdisciplinary group serving three major functions: (1) encouraging graduate work in population and resource studies through fellowship grants and supervision, (2) instituting courses and seminars in population and resource studies, and (3) bringing visiting faculty to Stanford to strengthen existing course offerings. The institute also organizes an interdisciplinary Colloquium on Population Studies to introduce upper-division undergraduates and graduate students to issues in population-related specialties.

COURSES

Many departments offer courses focusing on issues related to the study of populations and resource use. The following course is sponsored by the Morrison Institute.

BIOSCI 146. Population Studies—Series of talks by distinguished speakers introducing approaches to population and resource studies.
1 unit, Win (Feldman)
10 units must be pre-approved by the student services office or faculty adviser. These courses should represent a coherent thematic focus. One way to achieve this focus is through a specialization track. All courses taken to satisfy the 70-unit requirement must be taken for a grade of ‘C-’ or better (except for courses offered only on a satisfactory/no credit basis). All majors must take PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable Statistics course. Advanced placement (AP) credit may no longer be used toward the Psychology major requirements. Beyond these two required courses, students must complete at least five of the following ten core Psychology courses, with a minimum of two from each area A and B:

**Area A Courses:**
- BIOSCI 20, Introduction to Brain and Behavior (formerly PSYCH 20)
- PSYCH 30, Introduction to Perception
- PSYCH 45, Introduction to Learning and Memory
- PSYCH 55, Introduction to Cognition and the Brain

**Area B Courses:**
- PSYCH 60, Introduction to Developmental Psychology
- PSYCH 70, Introduction to Social Psychology
- PSYCH 75, Introduction to Cultural Psychology
- PSYCH 80, Introduction to Personality Psychology
- PSYCH 90, Introduction to Clinical Psychology
- PSYCH 95, Introduction to Abnormal Psychology

Students who declared a major in Psychology prior to the 2002-03 academic year may choose any five of the ten core courses. Students who declared a major in Psychology prior to the 2005-06 academic year may choose to adhere to the 55-unit major requirement, taking PSYCH 1 and 10, five core courses, and elective courses, totaling 55 units.

Students must take one Writing in the Major (WIM) course in Psychology, and should check the Stanford Bulletin yearly as these courses may change. The department also strongly recommends that all majors take at least one advanced seminar.

Students may count up to 10 units of research, independent study, and practica (including but not limited to PSYCH 194, 195, 281) toward the Psychology major. Students who are teaching assistants for a Psychology course or are enrolled in the senior honors program are allowed up to 15 units in independent study and practica. Any units beyond the limit of 10 or 15 may be counted toward the 180 units required for graduation.

Summer Quarter Psychology courses are not equivalent to courses given during the regular academic year and, while applicable toward the 70 units needed for the major, may not be used to fulfill the core course requirement. Additionally, a course taken during the Summer Quarter cannot be used to replace the grade of a non-Summer Quarter course, even if the title and units of the two courses are the same.

**Beyond the Minimal Requirements** — The following recommendations may be helpful to students who wish to plan a program which goes beyond the minimal requirements listed above:

1. Within the general major, the student may take advanced undergraduate or graduate courses, including seminars. The student may also take advantage of widespread opportunities for directed research, working closely with individual faculty and graduate students.
2. The student may apply to the Senior Honors Program, described below.
3. The student may elect to pursue one of four specialization tracks: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience, described below.

The training obtained from the pursuit of any of these options is valuable not only for students considering graduate work in psychology, but also for those thinking of professional careers outside of psychology in fields such as business, counseling, education, law, or medicine.

**MINORS**

**Declaration** — Students who wish to declare a minor field of concentration in Psychology must do so no later than the deadline for their application to graduate.

**Requirements** — Completion of a minimum of 35 units in Psychology is required for the minor, in addition to PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable statistics course. Advanced placement (AP) credit may no longer be used towards the Psychology minor. The minor must include three of ten core courses, with a minimum of one from each of two areas (A: BIOSCI 20; PSYCH 30, 40, 45, 50; and B: 60, 70, 75, 80, 90, 95) and elective Psychology courses of at least three units each, totaling 35 units. Students who declared a Psychology minor prior to the 2002-03 academic year may choose any three of the ten core courses. Students who declared a Psychology minor prior to the 2005-06 academic year may choose to complete seven total courses: PSYCH 1 and 10, three core courses, and two elective courses. Independent study, research, and practica cannot be counted toward the minor. Summer Quarter Psychology courses are not applicable toward the 35 units needed for the minor. All courses used to fulfill the requirements of the minor must be passed with a grade of ‘C-’ or better.

**TRANSFER CREDIT**

Evaluation of transfer credit for the Psychology major or minor is a three-step process. First, in order to submit an undergraduate petition for transfer credit, a student must already have declared Psychology as a major or minor. Second, Stanford credit for courses completed at other institutions must be granted by the External Credit Evaluation section of the Registrar’s Office. Those units can then be applied toward the 180 units required for graduation. Third, the Psychology department evaluates the courses to determine if they can be applied toward Psychology major or minor requirements. To have a course evaluated, students complete an undergraduate petition form (available from the student services office) and submit it with a course syllabus and a copy of the signed transcript from the External Credit Evaluation section showing the number of Stanford units granted for the course.

Psychology majors must complete at least 43 units of course work toward their major at Stanford. No more than 10 units of transfer credit may be counted toward the Psychology minor. Both majors and minors may use only one transfer course towards fulfilling the core course requirements. Additional courses may be used to fulfill the 70-unit requirement, but do not count as core courses.

**SPECIALIZATION TRACKS**

Students in the major program, including those in the Senior Honors Program, may elect to specialize in one of four tracks: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience. Specialization tracks consist of a coherent set of courses leading to advanced undergraduate or even graduate level courses in an area. In the ideal case, the student who specializes would acquire an understanding of a range of psychological processes, as well as an appreciation of the significance of these processes in the chosen area of application. In this way, specialization could facilitate the student’s preparation for a professional career in, for example, medicine, business, or counseling, as well as for graduate work in Psychology.

Specialization in a track is optional, although students who do not wish to complete all the requirements for a track may still want to use the track as a guideline for an integrated program in Psychology. Students who choose to complete a specialization track must meet the requirements for the major plus the additional requirements designated for the track. Typically the courses required for a track include one or two required courses, four to six recommended courses in Psychology, one or two advanced seminars, and three to four courses in related disciplines. Psychology courses completed for the track count toward satisfying the major requirements. Courses from other departments listed for the tracks may count toward the 10 outside units for the major requirement, but must be pre-approved by the student services office or faculty adviser. The Mind, Culture, and Society track includes a two quarter research practicum; students are encouraged to apply for this track by Autumn Quarter of their junior year. Application forms are available from the student services office. There is no application for the other tracks, but all tracks must be declared on Axess and students must submit a track form that can be found at http://www-psych.stanford.edu/undergraduate_forms.html or at the student services office. Completion of a track is noted on a student’s transcript, but not on the diploma.
Information about the required and recommended courses for each track is available from the student services office.

HONORS PROGRAM

The senior honors program is designed for exceptionally able Psychology majors who wish to pursue a year of intensive supervised independent research. Admission to the program is made at the end of the student’s junior year on the basis of (1) excellent academic performance, (2) previous research experience, and (3) two letters of recommendation by faculty and/or graduate students. An information meeting about the program is held in Winter Quarter. Applications are available late Spring Quarter and are to be turned in to the student services office with a current transcript and recommendations by June 17 prior to the student’s senior year.

Students interested in the program should involve themselves in research as early as possible and should acquire a broad general background in Psychology, including statistics, and a deep background in their chosen area. The honors program is particularly appropriate for students planning to go to graduate school in Psychology or in other social sciences, as well as in computer science, business, law, and medicine.

During Autumn Quarter of their senior year, honors program students participate in a weekly seminar. Initially, discussions are on general methods and issues in psychological research, but most of the sessions are devoted to discussions of students’ presentations of their proposed research. During the quarter, students meet with their advisers to develop their experimental program and begin data collection. At the end of Autumn Quarter, students turn in a written proposal. Winter and Spring quarters are devoted to completing the research, analyzing and making sense of the data, and writing the thesis, which is submitted mid-May. Students give oral presentations of their projects at the annual Honors Convention, scheduled for the day between classes and exams. This convention is attended by undergraduates, graduate students, and faculty.

GRADUATE PROGRAMS

MASTER OF ARTS

The Department of Psychology normally offers a Master of Arts degree only to students concurrently enrolled in its Ph.D. program or to students currently pursuing Stanford B.A. or M.A. degrees. Admission to the program is by Psychology faculty nomination only. All applicants must satisfy University residency requirements for the degree and are responsible for consulting with their primary departments or the Financial Aid Office about the effects of the proposed program on their current funding. General University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

Stanford undergraduate students who would like advanced training in Psychology may apply for a coterminal M.A. degree in Psychology. To do so, students should consult with the student services officer in the department. Along with a coterminal program application, applicants must submit (1) a statement of purpose, (2) a preliminary program plan specifying the courses in which they intend to enroll, (3) at least two letters of recommendation from Stanford faculty members familiar with their academic work, (4) a current Stanford undergraduate transcript, and (5) a written nomination by a member of the Psychology faculty willing to serve as the student’s master’s degree adviser. This program is limited in size and admission is selective. Applicants must have earned a minimum of 120 units towards graduation as shown on the transcript. The department’s deadline for the submission of an application to the coterminal program is January 10.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

In exceptional cases, students concurrently enrolled in another doctoral or professional program at Stanford may also apply for the M.A. degree. Such applicants also consult with the department’s student services officer.

Students must complete at least 45 units of Psychology courses for the degree. (For coterminal degree students, course work for the master’s degree may not duplicate courses taken for the undergraduate degree.) Of these 45 units, at least 27 must be in Psychology courses numbered 200 or above. Units from research, teaching, independent study, and lab courses, such as PSYCH 258, 269, 275, 281, 282, and 297, may not be counted toward these 27 units. Two of the graduate courses of at least 3 units each (one from Area A and one from Area B below) are required. In addition, at least one upper division statistics course is required. The course must be approved by the student’s adviser. It is recommended that all coterminal students enroll in PSYCH 196, Contemporary Psychology. In addition to the unit and course requirements, coterminal students are required to serve as a teaching assistant for one Psychology course. Details about the teaching assistantships are available upon acceptance to the program.

All courses to be counted toward the master’s degree must be passed with a grade of ’B+’ or better (unless the course is offered only on a satisfactory/no credit basis). Units from research, teaching, practica, independent study, and lab courses, such as PSYCH 258, 269, 275, 281, 282, and 297, may be counted toward the remaining required 18 units. Psychology courses numbered in the 100-level and courses from other Stanford departments may be used to satisfy the remaining 18 units. Courses specifically for undergraduates (i.e., undergraduate honors courses) may not be counted toward the master’s program unit requirements. Demonstration of competence in the design and execution of psychological research is also required for receipt of the master’s degree. This demonstration entails completion of a master’s thesis. If the student is currently doing a senior honors thesis, this honors thesis may be accepted as proof of research competence provided the honors thesis is judged to be master’s level research by the student’s adviser and the department’s Committee on Graduate Studies. If the student has just completed an honors thesis in Psychology in the prior year, the student would be expected to continue independent research during the coterminal year and to submit thesis research in a written report which, together with the completed honors thesis, would constitute the master’s thesis. All students are required to make an oral presentation of their research during the Spring Quarter, and to present their thesis or written report by June 1.

Area A Courses:
- 202. Cognitive Neuroscience
- 205. Foundations of Cognition
- 210. Memory and Learning
- 214. Psycholinguistics
- 221. Applied Vision and Image Systems
- 228. Ion Transport
- 251. Affective Neuroscience
- 261. Emotion
- 261A. Learning and Cognition in Activity

Area B Courses:
- 211. Developmental Psychology
- 212. Social Psychology
- 213. Personality and Psychopathology
- 215. Mind, Culture, and Society
- 217. Topics and Methods in Cultural Psychology
- 259. Emotions: History, Theories, Research
- 271. Applications of Social Psychology

DOCTOR OF PHILOSOPHY

There are no specific course requirements for admission to the doctoral program. However, an applicant should have research experience as an undergraduate, as well as the equivalent of an undergraduate major in psychology. The major focus of the doctoral program is on research training, and admission is highly selective.

Applicants for admission must submit their scores on the general Graduate Record Examination as part of the application. GRE subject scores are strongly encouraged.

General University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

In addition to fulfilling Stanford University requirements for the degree, the following departmental requirements are stipulated.
First-Year Course Requirements — During the first year of graduate study, the student must take 207, Proseminar for First-Year Ph.D. Graduate Students, at least one approved graduate statistics course, and at least two core courses from the list below:

- 202. Neuroscience
- 205. Foundations of Cognition
- 211. Developmental Psychology
- 212. Social Psychology
- or 215. Mind, Culture, and Society
- 213. Personality

Students in each area may be required to take up to two additional non-core graduate courses in their area of specialization.

The student is expected to spend at least half of the time in research from the beginning of the first year of graduate study to the completion of the Ph.D., normally taking no more than 10 units of course work each quarter. At the end of the first year of graduate study, the student must file with the department a written report of the first-year research activities. The deadline for filing this report is June 1.

Second-Year Course Requirements — By the end of the second year of graduate study, the student must complete the core courses listed above and take a second approved graduate course in statistics.

Third-Year Major Area Paper — During the first week of Autumn Quarter of the fourth year, the student must turn in a Conceptual Analysis of the Dissertation Area (CADA). This paper provides a general framework for the research topic of the dissertation, addresses the central issues within the specialty area, and reviews the pertinent literature. Typically, the analysis has the kind of scope found in the opening chapters of the more traditional dissertations, but the exact format and scope of the paper is a joint decision made by student and adviser.

Prior to Autumn Quarter, the student should select two faculty members to read this paper and give feedback and commentary on it. These should be two faculty members most likely to serve later on the oral committee of the dissertation. A portion of the paper, revised as appropriate, can then become the first section of the actual dissertation proposal.

If the student should radically change the area of the dissertation research after the CADA has been written, the formal CADA procedure does not need to be repeated for the second dissertation topic. The student is still expected, however, to be knowledgeable about the literature and problems of any research topics being pursued for the dissertation.

Minor Requirements — The candidate must complete either a University minor satisfactory to the minor department, or elect to have the minor waived by selecting 12 upper-level units. These 12 units may be fulfilled by either (a) non-core graduate courses in Psychology, excluding any non-core graduate courses required by a particular area, or (b) graduate-level courses in other departments comparable in quality to Psychology’s graduate courses. If there is any question about comparability, students should consult the Graduate Education Committee before taking the course.

Dissertation Reading Committee — The candidate must select a dissertation reading committee satisfactory to the department. The minimum membership of this committee must be (1) the principal dissertation adviser, (2) a second member from within the department, and (3) a third member chosen from Psychology or another department.

Orals — The candidate must pass the University oral examination, which is based on the dissertation proposal, not on the completed dissertation. The reason for this policy is to permit the oral examination to serve the function of guiding and improving the proposed research. This function can best be served if the oral examination is scheduled early in the year in which the dissertation research is conducted. It is therefore expected that the oral examination be taken by the end of the Autumn Quarter of the fourth year.

Dissertation Requirements — The candidate must complete a dissertation satisfactory to the dissertation reading committee.

Ph.D. candidacy expires five years after admission to candidacy at the end of the second year of study. Reapplication requires department reexamination.

STUDENT EVALUATIONS

First-Year Evaluation — It is the department’s policy to evaluate the progress of each graduate student at the end of the first year of graduate study. As part of the procedure, each student is required to file with the department a report of the first-year research activities.

Students should discuss this report and the evaluation procedures with their adviser as early as possible in their first year. The report is due on June 1. If the student fulfills the academic promise displayed upon entrance, he or she is invited to continue to the doctorate.

The first-year evaluation is primarily based on three factors:
1. quality of research carried out in the first year
2. performance in courses (especially required courses)
3. recommendations of the adviser (including a commitment on the part of that adviser to continue in that role)

Second-Year Evaluation — A similar evaluation is conducted at the end of the second year of graduate training involving the same criteria as the first year; however, the student is not required to submit a paper. Students who do not make satisfactory progress during the second year may be dropped from the program.

THE DOCTORAL TRAINING PROGRAM

As indicated by the requirements described above, a student may concentrate in any one of several areas within psychology. Regardless of area, however, the training program places emphasis on the development of research competence, and students are encouraged to develop those skills and attitudes that are appropriate to a career of continuing research productivity.

Two kinds of experience are necessary for this purpose. One is the learning of substantial amounts of technical information. A number of courses and seminars are provided to assist in this learning, and a student is expected to work out a program, with his or her adviser, to attain this knowledge in the most stimulating and economical fashion.

A second aspect of training is one that cannot be gained from the courses or seminars. This is firsthand knowledge of, and practical experience with, the methods of psychological investigation and study. These methods include ways of behaving with the people or animals being studied. Students are provided with whatever opportunities they need to reach those levels of competence representative of doctoral standing. Continuing research programs, sponsored by members of the faculty, offer direct opportunities for experience in fields represented by the faculty’s many research interests.

Each student achieves competence in unique ways, and at different rates. Each student and adviser share in planning a program leading to the objectives discussed. The student is expected to spend half of his or her time on research and normally takes no more than 10 units of course work per quarter.

TEACHING REQUIREMENT

The department views experience in supervised teaching as an integral part of its graduate program. Regardless of the source of financial support, all students serve as teaching assistants for five Psychology courses during their graduate study. Of the courses, two should be PSYCH 1, Introduction to Psychology, and/or PSYCH 10, Statistical Methods. Students are discouraged from participating in teaching during the first year of graduate study. Students typically progress from closely supervised teaching to more independent work. Some students may be invited to offer a supervised, but essentially independent, seminar during their final year of graduate study.

PH.D. MINOR

Candidates for the Ph.D. degree in other departments may elect a minor in Psychology. To obtain a minor, the student must complete 20 units of course work at the graduate level in the Department of Psychology, excluding PSYCH 275 (graduate-level research). Crosslisted graduate courses can be used to satisfy this requirement. All courses counting toward the Ph.D. minor must be passed with a grade of ‘B-’ or better (unless the course is offered only on a satisfactory/no credit basis).
COGNITIVE SCIENCE PROGRAM

Psychology participates, along with the departments of Computer Science, Linguistics, and Philosophy, and the School of Education, in an interdisciplinary program of cognitive science. The program is intended to provide students with an interdisciplinary education as well as a deeper concentration in psychology. Doctoral students in Psychology are eligible to participate in the cognitive science program. Students who complete the requirements receive a special designation in cognitive science along with the Ph.D. in Psychology. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of psychology. For information or course approval, see the student services officer.

PSYCHOLOGY COLLOQUIUM

The Psychology Colloquium meets on most Wednesday afternoons at 3:45. Speakers from Stanford and other institutions present topics of current interest. Graduate students are expected to attend.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

SUMMER SESSION

The courses announced for the Summer Session are those regularly scheduled in the department curriculum. Additional courses may be announced by Stanford Summer Session at http://summer.stanford.edu.

STANFORD INTRODUCTORY SEMINARS

PSYCH 7Q. Language Acquisition—Stanford Introductory Seminar. Preference to sophomores. Debates concerning how biology guides linguistic development; theories about the nature and origins of human language abilities; and experimental research on the emergence of understanding in infancy.

3 units, Aut (A. Fernald)

3 units, Spr (Markman)

PSYCH 12N. Self Theories—Stanford Introductory Seminar. The impact of people’s self theories, their beliefs in a fixed self versus a self that can be developed through motivation and performance in school, business, sports, and relationships. How self theories develop and can be changed. Readings include research articles and popular writings. GER:DB-SocSci

3 units, Aut (Dweck)

PSYCH 13N. Culture and Social Relationships—Stanford Introductory Seminar. Preference to freshmen. How does culture influence how people relate to others including romantic partners, family, friends, acquaintances, and strangers? The cultural norms, values, and structures that shape expectations of and interactions with others. GER:DB-SocSci

3 units, Win (Tsai)

PSYCH 19N. Memory and Brain—Stanford Introductory Seminar. Preference to freshmen. How experience shapes people. Why some experiences are readily and accurately remembered, whereas others are forgotten or misremembered. What is known about how the brain supports learning and remembering; how this cognitive ability is sometimes prone to error and distortion.

3 units, Win (Wagner)

OPEN TO ALL STUDENTS

PSYCH 1. Introduction to Psychology—Human behavior and mental processes including the nervous system, consciousness, learning, memory, development, emotion, psychopathology, interpersonal process, society, and culture. Current research. GER:DB-SocSci

5 units, Aut (Gross, Quill), Win (Kirkham, Quill), Spr (Staff, Quill)

PSYCH 10. Introduction to Statistical Methods: Precalculus—(Same as STATS 60/160.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math

5 units, Aut (Walther), Win (Thomas), Spr (Bartroff), Sum (Staff)

PSYCH 30. Introduction to Perception—Perceptual psychology and sensory neuroscience, emphasizing vision and hearing. Topics include anatomy and physiology of the eye and ear, and of the visual and auditory areas of the brain, pitch and loudness perception, speech perception, color vision, depth and motion perception, and object and face recognition. Recommended: 1. GER:DB-NatSci

3 units, Win (Grill-Spector)

PSYCH 45. Introduction to Learning and Memory—The literature on learning and memory including cognitive and neural organization of memory, mechanisms of remembering and forgetting, and why people sometimes falsely remember events that never happened. Cognitive theory and behavioral evidence integrated with data from patient studies and functional brain imaging. Recommended: 1.

3 units, Spr (Wagner)

PSYCH 55. Introduction to Cognition and the Brain—Major topics in cognitive psychology and neuroscience, including empirical approaches to perception, language, learning, memory, knowledge representation, problem solving, and reasoning.

4 units, Spr (Boroditsky)

PSYCH 60. Introduction to Developmental Psychology—Psychological development from birth to adulthood, emphasizing infancy and the early and middle childhood years. The nature of change during childhood and theories of development. Recommended: 1. GER:DB-SocSci, WIM

3 units, Win (Johnson)

PSYCH 60A. Introduction to Developmental Psychology Section—Guided observation of children age 2-6 at Bing Nursery School. Corequisite: 60.

2 units, Win (Hartman)

PSYCH 70. Introduction to Social Psychology—Theory and empirical research in social psychology: conformity, obedience, helping, and aggression; attitudes, persuasion, identity and roles; person perception, attribution, and social judgment; interpersonal and intergroup relationships, social conflict, prejudice, and stereotyping. Original research proposal. Recommended: 1. GER:DB-SocSci, WIM

4 units, Spr (Ross, Staff)

PSYCH 75. Introduction to Cultural Psychology—The cultural sources of diversity in thinking, emotion, motivation, self, personality, morality, development, and psychopathology. Recommended: 1. GER:DB-SocSci, EC-GlobalCom, WIM

5 units (Markus) alternate years, given 2006-07

PSYCH 80. Introduction to Personality Psychology—Concepts and research methods, major theoretical approaches, and related empirical findings. The psychodynamic, trait, biological, humanistic, behavioral, social learning, cognitive, and cultural perspectives. Recommended: 1. GER:DB-SocSci

3 units, Spr (Tsai)

PSYCH 90. Introduction to Clinical Psychology—Topics include the history of clinical psychology, models and assessment of personality, behavior, cognition, psychopathology, and approaches to the treatment
of abnormal behavior. Emphasis is on current theory, research, issues in, and the role of clinical psychology in contemporary society. Recommended: 1. GER:DB-SocSci
3 units, Aut (Gottlib)

PSYCH 95. Introduction to Abnormal Psychology—(Formerly 90.) The nature, origin, and treatment of a variety of psychological disorders from various psychological and biomedical perspectives. Historical and current controversies in the field. Recommended: 1. GER:DB-SocSci
3 units, Spr (Hong)

PSYCH 101. Community Health Psychology—(Same as HUMBIO 178.) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management.
3 units, Spr (Heaney)

PSYCH 102. Longevity—Multidisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, and lawyers.
3 units, Win (Carstensen, Rando)

PSYCH 103S. Psychology and Culture—How many psychological processes assumed to be universal are culture-bound; why human thinking should be studied in conjunction with sociocultural context. Cultural sources of diversity in thinking, emotion, motivation, self, personality, development, social interaction, and psychopathology. How cultural traditions and social practices regulate, express, transform, and permute psychological functioning. Sources include recent crosscultural literature.
3 units, Sun (Rice, Wong)

PSYCH 110. Research Methods and Experimental Design—Structured research exercises and design of an individual research project. Prerequisite: consent of instructor. GER:DB-SocSci, WIM
5 units, Win (M. Lepper)

PSYCH 112S. The Psychology of Mind Reading—Interdisciplinary. How to understand facial expressions, body language, gesture, intentional and unintentional actions, and deception; the development of mind-reading in children and across species. How the mind understands other minds. How to evaluate empirical research. Readings from cognitive, social, and developmental psychology and neuroscience.
3 units, Sun (Martin, Lozano)

PSYCH 117A. Community Health: Assessment and Planning I—(Enroll in HUMBIO 117A.)
3 units, Win (Heaney)

PSYCH 117B. Community Health: Assessment and Planning II—(Enroll in HUMBIO 117B.)
3 units, Spr (Heaney)

PSYCH 120. Cellular Neuroscience: Cell Signaling and Behavior—Neural interactions underlying behavior. Prerequisites: 1 or basic biology. GER:DB-NatSci
4 units, Aut (Wine)

PSYCH 121. Ion Transport and Intracellular Messengers—(Graduate students register for 228.) Ion channels, carriers, ion pumps, and their regulation by intracellular messengers in a variety of cell types. Lab demonstrations and hands-on introduction to techniques such as patch clamping. Recommended: 120 or introductory course in biology or human biology.
1-3 units (Wine) not given 2005-06

PSYCH 122. Human Behavioral Biology—(Enroll in BIOSCI 150.)
3-6 units, Spr (Sapolsky) alternate years, not given 2006-07

PSYCH 125. Beyond Stereotype Threat: Claiming a Rightful Place in an Academic Community—(Same as CTL 130.) Stereotype threat as mitigating the quality of a student’s test performance; its impact on academic success at Stanford. How to reduce the impact of stereotype threat on Stanford students.
2 units, Win (Glickman)

PSYCH 130. Introduction to Cognitive Science—(Same as SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci
4 units, Spr (Bresnan, van Benthem)

PSYCH 131. Language and Thought—(Graduate students register for 262.) The psychology of language including: production and understanding in utterances; from speech sounds to speaker’s meaning; children’s acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or LINGUIST 1. GER:DB-SocSci
4 units (H. Clark) not given 2005-06

PSYCH 133. Human Abilities—(Same as EDUC 255.) Psychological theory and research on human cognitive abilities; their nature, development, and measurement; and their importance in society. Persistent controversies and new areas of research, recent perspectives on the nature-nurture debate and the roles of genetics, health and education in shaping HCAs. Prerequisite: PSYCH 1 or equivalent. (PSE) GER:DB-SocSci
3 units (Shavelson) not given 2005-06

PSYCH 134. Seminar on Language and Deception—Deceptive, exploitative, and other noncooperative uses of language. How is language used to deceive or exploit? Where are these techniques practiced and why? What are the personal, ethical, and social consequences of these practices?
Prerequisite: 131, LINGUIST 1, or PHIL 181. GER:DB-SocSci
3 units (H. Clark) not given 2005-06

PSYCH 135. The Science of Well-Being—Limited enrollment. Preference to students who have taken 75. Prerequisite: application; consent of instructor.
3 units, Win (Markus, Curhan)

PSYCH 137. Birds to Words: Cognition, Communication, and Language—(Graduate students register for 239A.) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults. GER:DB-SocSci
3 units, Aut (A. Fernald, Ramscar)

PSYCH 140. Research Methods in Developmental Psychology—Conceptual and methodological issues related to research on early development, training in experimental design, lab, and observational procedures, and the collection, analysis, and interpretation of data. Students conduct supervised experiments with infants and preschoolers at the Center for Infant Studies in the Department of Psychology and at Bing Nursery School. Limited enrollment. Lab required. GER:DB-SocSci
5 units (Markman, Johnson) not given 2005-06

PSYCH 141. Cognitive Development—Topics and issues on cognitive development, developmental changes in memory, conceptual organization, logical reasoning, and communication skills. Prerequisite: 1. GER:DB-SocSci
3 units, Aut (Markman)

PSYCH 143. Developmental Anomalies—(Graduate students register for 239.) Neurodevelopmental disorders and impairments. What can the sparing of isolated mental abilities in otherwise devastating disorders (or vice versa) tell about the mind and its development in the normal case? Disorders and impairments: autism, congenital blindness, deafness, dyslexia, and Williams syndrome. Prerequisites: 60, 141 or LINGUIST 1. GER:DB-SocSci
3 units (Johnson) not given 2005-06
PSYCH 145. Seminar on Infant Development —For students preparing honors research. Conceptual and methodological issues related to research on developmental psycholinguistics; training in experimental design; and collection, analysis, and interpretation of data. Limited enrollment.
1-2 units, Win (A. Fernald)

PSYCH 146. Observation of Children—Learning about children through guided observations at Bing Nursery School, Psychology’s lab for research and training in child development. Physical, emotional, social, cognitive, and language development. Recommended: 60. GER: DB-SocSci
3-5 units, Aut, Spr (Winters, Hartman)

PSYCH 147. Development in Early Childhood—Supervised experience with young children at Bing Nursery School. 3 units require 4 hours per week in Bing classrooms throughout the quarter; 4 units require 7 hours per week; 5 units require 10.5 hours per week. Seminar on developmental issues in the Bing teaching-learning environment. Prerequisite: 60 or 146, or consent of instructor.
3-5 units, Aut, Win, Spr (Staff)

PSYCH 149. The Infant Mind: Cognitive Development over the First Year—How do babies learn so much in so little time? Emphasis is on cognitive and perceptual development, and the relationship between brain and behavior in infancy. Prerequisite: 1. Recommended: 60 or 141. GER: DB-SocSci
3 units, Win (Kirkham)

PSYCH 152. Mediation for Dispute Resolution—(Same as EDUC 131.) Mediation as more effective and less expensive than other forms of settling disputes such as violence, lawsuits, or arbitration. How mediation can be structured to maximize the chances for success. Simulated mediation sessions.
3 units, Aut (Kramholz)

PSYCH 153. Reading, Science, Education, and Politics—(Same as HUMBIO 153.) The intellectual foundations of reading curriculum development including contributions of scientists, educators, and policy makers. Neural mechanisms of reading including the methodology used to measure complex behavior. Intervention studies to improve reading skills, and the implications of basic and applied science for social policy.
3 units, Spr (Kirkham)

PSYCH 155. Introduction to Comparative Studies in Race and Ethnicity—(Same as CSRE 155, ENGLISH 196C.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER: DB-SocSci
5 units, Win (Markus, Moya)

PSYCH 156. Applications of Social Psychology—(Graduate students register for 271.) The application of social psychological theory and research to evaluating the impact of social interventions, strategies, and shortcomings in personal and social decision making; the effects of mass media and other sources of social persuasion; conflict resolution and negotiation; applications in legal, medical, educational, and business settings. Prerequisites: 1 and 10, or consent of instructor.
1-4 units (Ross) not given 2005-06

PSYCH 158. Emotions: History, Theories, and Research—(Graduate students register for 259.) Theoretical and empirical issues in the domain of emotions. The history of emotion theories, current approaches, and the interaction between emotion and cognition.
1-3 units, Spr (Zajonc)

PSYCH 161. Emotion—(Graduate students register for 261.) The scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas. GER: DB-SocSci
3 units, Win (Gross)

PSYCH 162. The Psychology of Gender—Research and theory on the socialization and psychological development of women and men. The biological, cultural, and social factors that influence gendered behavior. GER: EC-Gender
4 units (Carstensen) not given 2005-06

PSYCH 163. Interpersonal Basis of Abnormal Behavior—The role of interpersonal problems and processes in producing forms of psychopathology including neurotic reactions and schizophrenia. Conventional empirical methods clarify the origin, nature, and treatment of emotional and personality disorders. Prerequisite: 90. GER:DB-SocSci
3 units, Win (Horowitz)

PSYCH 165. Peace Studies—(Same as POLISCI 111.) Interdisciplinary. The challenges of pursuing peace in a world where the sources of conflict are many, and regional, ethnic, and religious antagonisms are rising. The art of creating and maintaining peace from historical, social, psychological, and moral perspectives. Goal is to illustrate the contributions of academic disciplines and critical analyses to the study of peace, and to prepare students to think critically and to act responsibly and effectively on behalf of peace. Students explore a conflict and offer contributions to the building of peace. Limited enrollment. GER: DB-SocSci
5 units (Bland, Ross, Holloway) not given 2005-06

PSYCH 166. Seminar on Personal and Social Change—Social cognitive approaches to personal and social change. Applications of sociocognitive theory to the modification of psychological dysfunctions in familial, educational, medical, and organizational settings. Ethical and value issues in behavior change.
3 units, Spr (Bandura)

PSYCH 167. Seminar on Aggression—The causes and modification of individual and collective aggression. Major issues in aggression: social labeling of injurious conduct, social determinants of aggression, effects of the mass media, institutionally sanctioned violence, terrorism, psychological mechanisms of moral disengagement, modification of aggressive styles of behavior, and legal sanctions and deterrence doctrines.
3 units, Win (Bandura)

PSYCH 168. Emotion Regulation—(Graduate students register for 268.) The scientific study of emotion regulation. Topics: historical antecedents, conceptual foundations, autonomic and neural bases, individual differences, developmental and cultural aspects, implications for psychological and physical health. Focus is on experimentally tractable ideas. GER: DB-SocSci
3 units, Spr (Gross)

PSYCH 171. Research Seminar on Aging—Two quarter practicum exposes students to multiple phases of research by participating in a laboratory focusing on social behavior in adulthood and old age. Review of current research; participation in ongoing data collection, analysis, and interpretation. Prerequisites: 1, research experience, and consent of instructor.
4 units, Aut, Win, Spr (Carstensen)

PSYCH 173. Mind, Culture, and Society Research Lab—For juniors in the Mind, Culture, and Society track. Offered over two quarters. Lecture series on current research topics. Research project in second quarter.
2-3 units, Win, Spr (Markus)

PSYCH 177. Senior Seminar on Mind, Culture, and Society—For seniors in the Mind, Culture, and Society track.
3 units, Aut (Markus)

PSYCH 178. Stigma and Marginality—(Graduate students register for 263.) The perceptions and strategies of the targets of prejudice and discrimination, with emphasis on race and ethnicity. Topics: social perceptions and the judgments of targets, racial identity, behavioral consequences of prejudice and discrimination, and legal/policy implications. Readings from social psychology, African American studies, sociology, and law. Limited enrollment. GER: DB-SocSci
3 units (Eberhardt) not given 2005-06
PSYCH 179. The Psychology of Everyday Morality — (Graduate students register for 270.) For graduate students, cotermals, and senior Psychology majors. Traditional approaches focusing on how morality colors mundane human activities such as eating and on morality as defined by actors themselves rather than social scientists. Moral hypocrisy, food and disgust, taboo trade-offs, moral reproach, and prejudice with compunction. Limited enrollment. Prerequisite: 70 and consent of instructor.

4 units (Monin) not given 2005-06

PSYCH 180. Social Psychological Perspectives on Stereotyping and Prejudice — (Graduate students register for 245.) Classic and contemporary social psychological approaches to prejudice and stereotyping. Emphasis is on how stereotypes are employed and maintained, and the influence of stereotyping on behavior in domains including education, employment, politics, and law. Limited enrollment. GER: DB-SocSci

3 units (Eberhardt) not given 2005-06

PSYCH 185. Contemporary Issues in Peace Studies — (Graduate students register for 285; same as POLISCI 311) Interdisciplinary. The challenges of pursuing peace in a world of conflict and regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Current research in social psychology, political science, international relations, and negotiation theory. Student involvement in real-world efforts to identify and overcome the barriers that impede a peace settlement. Prerequisite: consent of instructor. GER: DB-SocSci

3 units (Bland, Ross, Holloway) not given 2005-06

PSYCH 192. Career and Personal Counseling — (Same as EDUC 134/234.) Methods of integrating career and personal counseling with clients and counselors from differing backgrounds. Practice with assessment instruments. Case studies of bicultural role conflict. Informal experience in counseling. (PSE)

3 units, Spr (Krumholz)

PSYCH 194. Reading and Special Work — Independent study. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr, Sum (Staff)

PSYCH 195. Special Laboratory Projects — Independent study. May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.

2-3 units, Aut, Win, Spr, Sum (Staff)

PSYCH 196. Contemporary Psychology: Overview of Theory, Research, Applications — Capstone experience for juniors and seniors that bridges course work with research opportunities. Lectures representing the department’s areas: social, personality, developmental, neuroscience, and cognitive psychology. Faculty present current research and engage with participants. Discussions led by advanced graduate students in the field represented by that week’s guest. Students write research proposals. Small grants available to students interested in conducting a pilot study of their proposed research. Limited enrollment. Prerequisite: consent of instructor. May be repeated for credit.

3 units, Aut (Thomas)

PSYCH 197. Advanced Research — Limited to students in senior honors program. Weekly research seminar, independent research project under the supervision of an appropriate faculty member. A detailed proposal is submitted at the end of Autumn Quarter. Research continues during Winter and Spring quarters as 198. A report demonstrating sufficient progress is required at the end of Winter Quarter.

1-4 units, Aut (Eberhardt)

PSYCH 198. Senior Honors Research — Limited to students in the senior honors program. Finishing the research and data analysis, written thesis, and presentation at the Senior Honors Convention. May be repeated for credit.

1-4 units, Win, Spr (Zimbardo)

PSYCH 199. Research Methods in Psychology — Prerequisite: 207 or consent of instructor.

3 units, Win (Markman, Dweck)

PSYCH 201. Social Psychology — Prerequisite: 207 or consent of instructor.

3 units, Win (M. Lepper, Ross)

PSYCH 211. Personality and Psychopathology — Theory and research. Prerequisite: 207 or consent of instructor.

3 units, Spr (Horowitz)

PSYCH 214. Psycholinguistics — Prerequisite: graduate standing in Psychology or consent of instructor.

3 units (H. Clark) not given 2005-06

PSYCH 215. Mind, Culture, and Society — Social psychology from the context of society and culture. The interdependence of psychological and sociocultural processes: how sociocultural factors shape psychological processes, and how psychological systems shape sociocultural systems. Theoretical developments to understand social issues, problems, and policies. Works of Baldwin, Mead, Asch, Lewin, Burner, and contempo-
ratory theory and empirical work on the interdependence of psychology and social context as constituted by gender, ethnicity, race, religion, and region of the country and the world. Prerequisite: 207 or consent of instructor.

**PSYCH 217. Topics and Methods in Cultural Psychology** — Conceptual and methodological issues in cultural psychology. Possible topics: the mechanisms by which cultural influences psychological and social processes in monocultural and multicultural contexts; relations between culture and biology; measurement of culture; development of culturally appropriate instruments and tasks; and use of questionnaire, interview, observational, and physiological methods to study cultural influences on human behavior. May be repeated for credit.

1-3 units, Win (Tsai)

**PSYCH 218. Early Social Cognitive Development** — Current literature on social and cognitive development in infancy emphasizing the interface between the two domains. May be repeated for credit.

1-3 units, Spr (Johnson)

**PSYCH 220. Topics in Cognitive Development** — Prerequisite: graduate standing in Psychology or consent of instructor.

1-3 units (Markman) not given 2005-06

**PSYCH 221. Applied Vision and Image Systems** — The design and control of color imaging devices (display, printers, cameras, and scanners). Aspects of human vision relevant to software and hardware design. Topics: digital halftoning, color calibration, color metrics, ficker sensitivity, motion compensation, human spatial resolution, visual masking, JPEG principles, printer design, scanner design, and color software architecture. Lab.

1-3 units, Win (Wandell)

**PSYCH 222. Social Norms** — (Same as OB 630.) Research and theory on the origins and function of social norms. Topics include the estimation of public opinion, function of norms as ideals and standards of judgment, and impact of norms on collective and individual psychology. How to identify and formulate tractable research questions.

4 units (Miller) not given 2005-06

**PSYCH 224. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives** — (Enroll in COMM 239.)

4 units (Krosnick) not given 2005-06

**PSYCH 227. Seminar in Psycholinguistics** — (Same as LINGUIST 247.)

2-4 units (Staff) not given 2005-06

**PSYCH 228. Ion Transport and Intracellular Messengers** — (Undergraduates register for 121; see 121.)

1-3 units (Wine) not given 2005-06

**PSYCH 230. Aping: Imitation, Control, and the Development of the Human Mind** — Seminar. The idea that a childhood that prolongs a state of stimulus-bound helplessness beyond that of animals is the price human beings pay for the benefits of shared cognitive structures. How such structures enable social collaboration, language, and the transmission and sharing of knowledge. Sources include psychological data from animals and humans, and recent discoveries in neuroscience.

1-3 units, Spr (Kirkham, Ramscarc)

**PSYCH 231. Graduate Seminar on Self-Efficacy** — The origins, mediating mechanisms, and effects of people’s beliefs in their ability to control events in their lives. Alternative theories of perceived control; the nature and structure of self-efficacy belief systems; major sources of efficacy beliefs; processes through which they affect human functioning; development of analysis of efficacy beliefs over life course; the application of self-efficacy theory to cognitive development, health functioning, clinical dysfunctions, organizational functioning, and athletic performance; the exercise of collective efficacy to accomplish social change.

1-3 units (Bandura) not given 2005-06

**PSYCH 232. Workshop on Neuroeconomics and the Neural Basis of Decision Making**

2 units, Win, Spr (Knutson, Newsome, Rangel)

**PSYCH 234. Topics in Affective Disorders** — Current research topics in the study of affective disorders. Topics: epidemiology and phenomenology of affective disorders, psychological theories of depression, gender differences in affective disorders, cognitive and social functioning of depressed persons, psychobiology of affective disorders, depression in children, postpartum depression, suicide issues in the treatment of depression, and cultural aspects of affective disorders. Prerequisite: graduate standing in Psychology or consent of instructor.

1-3 units (Gotlib) not given 2005-06

**PSYCH 235. American Indian Mental Health and Education** — (Enroll in EDUC 340X.)

3-5 units (LafRomboise) not given 2005-06

**PSYCH 239. Developmental Anomalies** — (Undergraduates register for 143; see 143.)

3 units (Johnson) not given 2005-06

**PSYCH 239A. Birds to Words: Cognition, Communication, and Language** — (Undergraduates register for 137; see 137.)

3 units, Aut (A. Fernald, Ramscarc)

**PSYCH 240. Language Acquisition I** — (Enroll in LINGUIST 140.)

4 units, Spr (Estigarribia)

**PSYCH 241. Language Acquisition II: Advanced Topics in Language Acquisition** — (Enroll in LINGUIST 241.)

1-4 units (E. Clark) not given 2005-06

**PSYCH 243. General Development Seminar** — Prerequisite: consent of instructors.

1-2 units, Win (Markman, A. Fernald, Kirkham)

**PSYCH 244. Psychology of Aging** — Theory and research in gerontology. Normal and abnormal changes that occur in biological, cognitive, and psychological aging. Emphasis is on the environmental factors that influence the aging process. Prerequisite: graduate standing in Psychology or consent of instructor.

1-3 units (Carstensen) not given 2005-06

**PSYCH 245. Social Psychological Perspectives on Stereotyping and Prejudice** — (Undergraduates register for 180; see 180.)

3 units (Eberhardt) not given 2005-06

**PSYCH 248. Introduction to Test Theory** — (Enroll in EDUC 252.)

3-4 units, Spr (Haertel)

**PSYCH 249A. Problems in Measurement: Item Response Theory** — (Enroll in EDUC 353A.)

3 units, Aut (Haertel)

**PSYCH 250. High-level Vision** — Theories and ongoing research. Topics: behavioral studies pertaining to representation of objects; generalization and invariances; learning new categories; neuropsychological deficits; properties of high-level visual areas in monkeys and human beings; and theories and models of object and face recognition.

1-3 units (Grill-Spector) alternate years, given 2006-07

**PSYCH 251. Affective Neuroscience** — Theory and research. Comparative and human research approaches map affective function to neuroanatomical and neurochemical substrates. Prerequisite: consent of instructor.

3 units (Knutson) not given 2005-06

**PSYCH 252. Statistical Methods for Behavioral and Social Sciences** — For students who seek experience and advanced training in empirical research. Analysis of data from experimental through factorial designs, randomized blocks, repeated measures; regression methods through multiple regression, model building, analysis of covariance; categorical data analysis through two-way tables. Integrated with the use of statistical computing packages. Prerequisite: 10 or equivalent.

1-6 units, Aut (Thomas)
PSYCH 253. Statistical Theory, Models, and Methodology — Practical and theoretical advanced data analytic techniques such as loglinear models, signal detection, meta-analysis, logistic regression, reliability theory, and factor analysis. Prerequisite: 252 or EDUC 257.
  3 units, Spr (Thomas)
PSYCH 254. Frontiers of Personality — In the 70s, personality research almost disappeared from psychology. Recently, there has been a resurgence of interest in it, especially from fields outside traditional psychology. New findings from fields such as genetics, neuroscience, medicine, and health psychology. Readings from current science journals with an emphasis on the interdisciplinary integration and applications of personality research.
  3 units (Knutson) not given 2005-06
PSYCH 255. Topics in Personality and Abnormal Psychology — Topic varies every year. This year’s topic is the construct of a prototype, prototype methodology, and applications to clarifying phenomena such as miscommunications, close relationships, and inter-rater reliability. May be repeated for credit. Prerequisite: consent of instructor.
  1-3 units, Aut, Win, Spr, Sum (Staff)
PSYCH 256. Topics in Language and Cognition — Perspectives from psychology, computational modeling, and neuroscience. May be repeated for credit. Prerequisite: consent of instructor.
  1-3 units (Ramscar) not given 2005-06
PSYCH 258. Graduate Seminar in Social Psychology Research — For students who are already or are planning to become involved in research on social construal and the role that it plays in a variety of phenomena, notably the origin and escalation of conflict.
  1-3 units, Aut, Win, Spr (Zajonc)
PSYCH 259. Emotions: History, Theories, and Research — (Undergraduates register for 158; see 158.)
  1-3 units, Spr (Zajonc)
PSYCH 260. Emotion — (Undergraduates register for 161; see 161.)
  3 units, Win (Gross)
PSYCH 262. Language and Thought — (Undergraduates register for 131; see 131.)
  4 units (H. Clark) not given 2005-06
PSYCH 263. Stigma and Marginality — (Undergraduates register for 178; see 178.)
  3 units (Eberhardt) not given 2005-06
PSYCH 266. Current Debates in Learning and Memory — Memory is not a unitary faculty, but consists of multiple forms of learning and remembering. The cognitive and neural architectures of memory, focusing on the application of functional brain imaging (primarily fMRI and ERP).
  3 units (Wagner) not given 2005-06
PSYCH 267. Cognitive Psychology Concepts in Clinical and Social Psychology — How memory concepts have influenced clinical and social psychology. Topics include childhood amnesia, autobiography, emotions and memory, distortions and illusions of memory, recovery of repressed memories, false memories, implicit memories, unconscious influences, and theories of psychopathology. Social topics include stereotypes, self-serving biases, and two-process theories of attitudes.
  2-3 units, Spr (Bower)
PSYCH 268. Emotion Regulation — (Undergraduates register for 168; see 168.)
  3 units, Spr (Gross)
PSYCH 269. Graduate Seminar in Personality Research — May be repeated for credit. Prerequisite: graduate standing in Psychology.
  1 unit, Aut, Win, Spr (Gotlib)
PSYCH 270. The Psychology of Everyday Morality — (Undergraduates register for 179; see 179.)
  4 units (Momin) not given 2005-06
PSYCH 271. Applications of Social Psychology — (Undergraduates register for 156; see 156.)
  1-4 units (Ross) not given 2005-06
PSYCH 272. Special Topics in Psycholinguistics — May be repeated for credit. Prerequisite: consent of instructor.
  1-3 units (H. Clark) not given 2005-06
PSYCH 275. Graduate Research — Intermediate-level research undertaken with members of departmental faculty. Prerequisite: consent of instructor.
  1-15 units, Aut, Win, Spr, Sum (Staff)
PSYCH 278. Neuroeconomics — (Same as ECON 178/278.) Techniques from neuroscience and psychology to study how the brain makes economic decisions; implications for the social sciences, especially economics and political science. Topics include: brain processes related to reward, control, and attention; role of emotion in decision making; morality; emotion in social encounters; bargaining and strategic thinking; decision making and probability assessment in risky situations; intertemporal decision making; and addiction. Prerequisite: graduate background in neuroscience or economics, or consent of instructor.
  5 units (Rangel) not given 2005-06
PSYCH 279. Topics in Cognitive Control — The processes that enable flexible behavior by biasing contextually relevant perceptual, mnemonic, and response representations or processing pathways. Cognitive control is central to volitional action, allowing work with memory, task/goal states, and overriding inappropriate responses. Current models of cognitive control, functional neuroimaging, and neuropsychological evidence.
  1-3 units (Wagner) not given 2005-06
PSYCH 281. Practicum in Teaching — Enrollment limited to teaching assistants in selected Psychology courses. May be repeated for credit.
  1-5 units, Aut, Win, Spr, Sum (Staff)
PSYCH 282. Practicum in Teaching PSYCH 1 — Logistical training including: preparing for sections; creating, proctoring, correcting exams; grading an iterative writing assignment; office hours; review sessions; developing audiovisual expertise; communicating via coursework. Review of student evaluations with instructor to set goals and strategies. Second quarter focuses on pedagogical improvement. Limited to current PSYCH 1 TAs. May be repeated for credit.
  1-2 units, Aut, Win, Spr (Quill)
PSYCH 283. Interdisciplinary Seminar on Conflict and Dispute Resolution — (Same as LAW 611, MS&E 459.) Problems of conflict resolution and negotiation from an interdisciplinary perspective. Presentations by faculty and scholars from other universities.
  1 unit, Win (Hensler, Ross)
PSYCH 285. Contemporary Issues in Peace Studies — (Same as POLISCI 311; undergraduates register for 185; see 185.)
  3 units (Bland, Ross, Holloway) not given 2005-06
PSYCH 290. Graduate Research Methods — Primary tool use for psychologists: basics of experiment design; computer-based experiments; web-based experiments; data analysis packages and data presentation; exploratory statistics; eye-tracking methods; psychophysiology methods; survey construction; corpus and discourse analysis; and perhaps hypnosis. Prerequisite: Ph.D. student in Psychology.
  2 units, Win (Crosby)
PSYCH 296. Methods in Personality and Social Psychology — Focus is on developing a set of methodological skills in personality and social psychology. Experimental survey and multivariate methods. Topics: archival and correlational studies; experimental and quasi-experimental design; formulating the research problem; going from abstract ideas to concrete instances; handling research artifacts; measuring and analyzing change data; observational techniques; organizing data: professional and ethical issues; triangulation; validity and reliability of measurement. Practicum format. Research proposal. Prerequisite: graduate standing in Psychology or consent of instructor.
  1-3 units, Aut (M. Lepper, Steele)
PSYCH 297. Seminar for Coterminal Master of Arts — Contemporary issues and student research. Student and faculty presentations.
1-2 units, Aut, Win, Spr (Thomas)

PSYCH 459. Frontiers in Interdisciplinary Biosciences — (Same as CHEMENG 459, BIOSCI 459, CHEM 459, BIOC 459, BIOE 459.) For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See http://www.stanford.edu/group/biox/courses/459.html. Recommended: basic mathematics, biology, chemistry, and physics.
1 unit, Aut, Win, Spr (Robertson)

PUBLIC POLICY PROGRAM

Director: Bruce M. Owen
Associate Director: Geoffrey Rothwell (Senior Lecturer, Economics)
Executive Committee: Jonathan Bendor (Business), David Brady (Political Science, Hoover Institution), Morris Fiorina (Political Science), Luis Fraga (Political Science), Daniel Kessler (Business and Law), Roger Noll (Economics), Susan Olzak (Sociology), Leonard Ortolaño (Civil and Environmental Engineering), Debra Satz (Philosophy)
Affiliated Faculty and Staff: Donald Barr (Sociology), Coit Blacker (Stanford Institute for International Studies), Timothy Bresnanahan (Economics), M. Kate Bundorf (Health Research and Policy), John Cogan (Hoover Institution), Luis Fraga (Political Science), Judith Goldstein (Political Science), Lawrence Goulder (Economics, Institute for International Studies), Henning Hillmann (Sociology), Mark Hlatky (Health Research and Policy), Nicholas Hope (Center for Research on Economic Development and Policy Reform), Michael Kirs (Education), Thomas McCurdy (Economics), Mark McClellan (Economics, School of Medicine; on leave), Robert McGinn (Management Science and Engineering), Milbrey McCluskey (Education), Debra Meyerson (Education), Terry Moe (Political Science), Norman Nie (Political Science), Bruce Owen (Economics), James Phillips (Business), A. Mitchell Polinsky (Law), Andy Rutten (Political Science), Myra Strobeber (Education), Barton Thompson (Law), Nancy Brandon Tuma (Sociology), Barry Weingast (Political Science), Frank Volok (Economics)

Lecturers: Laura Arrillaga, Patrick Egan, Roger Printup, Mary Sprague, Patrick Windham

Visiting Associate Professor: Eva Meyerson Milgrom

Department Phone: (650) 723-3452
Web Site: http://www.stanford.edu/dept/publicpolicy/

Courses given in Public Policy Program have the subject code PUBLPOL. For a complete list of subject codes, see Appendix.

Government plays an important, ubiquitous role in contemporary society. Moreover, the growing complexity of public policies, the political processes that give rise to them, and the organizations that implement them have created a need in government, business, and the nonprofit sector for people who understand how government operates. The Public Policy Program provides students with the foundational skills and institutional knowledge necessary for understanding the policy process, and provides an interdisciplinary course of study in the design, management, and evaluation of public sector programs and institutions. The major in Public Policy is useful as preparation for employment as an analyst in government agencies or business; as a foundation for postgraduate professional schools in business, education, law, and public policy; and as preparation for graduate study in the social sciences, especially economics, political science, and sociology. For more details about the Public Policy Program, including updated information about course offerings and other activities, see http://www.stanford.edu/dept/publicpolicy/

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The core courses in the Public Policy Program develop the skills necessary for understanding the political constraints faced by policy makers, assessing the performance of alternative approaches to policy implementation, evaluating the effectiveness of policies, and appreciating the sharp conflicts in fundamental human values that often animate the policy debate. After completing the core, students apply these skills by focusing their studies in one of several areas of concentration. The areas of concentration address specific field of public policy, types of institutions, or a deeper development of the tools of policy analysis. A list of recommended courses for each concentration is available in the Public Policy Program office. Areas of concentration are:

- Advanced Methods of Policy Analysis
- Business Policies
- Design of Public Institutions
- Development and Growth Policies
- Education
- Environment, Resources, and Population
- Health Care
- International Policies
- Law and the Legal System
- Media and Policy
- Science and Technology Policy
- Social Entrepreneurship
- Social Policy: Discrimination, Crime, Poverty
- Urban and Regional Policy

Completion of the program in Public Policy requires 83 units of course work.

1. 35 units of prerequisite courses: POLISCI 2; ECON 1, 50, 102A, 102B; SOC 160 or MS&E 180; and either MATH 19 and 20, or 41. In addition, students may be required to take ECON 50M before enrolling in ECON 50, and are encouraged to take MATH 42 and 51, and at least one course in linear algebra.

2. Five additional units of analytical skills courses. Among the courses that satisfy the requirement are ECON 51, 52, 102C; and POLISCI 151A, B, 152. For current information about courses that fulfill this requirement, check with the program office.

3. The 25-unit sequence of 5-unit core courses, which students should plan to complete by the end of their junior year (see below for descriptions 101-105). To satisfy the core requirement in Philosophy, students must take PUBLPOL 103A or 103B.

4. Majors must complete 15 units of course work in an area of concentration. The 15 units of post-core course work must be approved by a concentration adviser.

5. Seniors are required to participate in one quarter (3 units) of the Senior Seminar (PUBLPOL 200A, B, or C). Majors also must submit at least one research paper during the senior year and present it before the Senior Seminar. The senior paper may be a term paper for either the senior seminar or another course, or an honors thesis.

6. A maximum of 10 units may be taken on a satisfactory/no credit basis in the prerequisite courses for the Public Policy core. All remaining courses required for Public Policy majors must be taken for a letter grade.

7. Students must complete the Public Policy core and their concentration area courses with a grade point average (GPA) of 2.0 or higher.

8. The major must be declared no later than the end of Autumn Quarter of the junior year. Application forms are available in the Public Policy Program office and on the web site.

The Public Policy Program encourages students to participate in various Stanford internship programs, including those available through the Haas Center for Public Service and Stanford in Washington.
MINORS

The Public Policy Program offers a minor that is intended to provide students with interdisciplinary training in applied social sciences. Students who pursue the minor are required to take the courses listed below for a total of 34 units in Public Policy and its supporting disciplinary departments. Because University rules prohibit double-counting courses, the requirements for a minor differ according to the student’s major requirements.

For students whose major department or program requires no courses in economics, political science, or sociology, the requirements for a Public Policy minor are:

- **Course No. and Subject**
- **Units**
- ECON 1, 50; PUBLPOL 104
- 15
- POLISCI 2 and PUBLPOL 101
- 10
- MS&E 180 and PUBLPOL 102
- 9

For students who are Economics majors or who satisfy a major requirement by taking ECON 50, but no courses in political science, the requirements for a Public Policy minor are:

- **Course No. and Subject**
- **Units**
- MS&E 180 and PUBLPOL 102
- 9
- POLISCI 2: PUBLPOL 101
- 10
- PUBLPOL 103
- 5
- PUBLPOL 104
- 5
- PUBLPOL 105
- 5

For students who are Political Science majors or who satisfy a major requirement by taking POLISCI 2 but no courses in Economics, the requirements for a Public Policy minor are:

- **Course No. and Subject**
- **Units**
- ECON 1, 50, 102A; PUBLPOL 104
- 20
- PUBLPOL 103
- 5
- MS&E 180 and PUBLPOL 102
- 9

For Sociology majors, the requirements for a Public Policy minor are:

- **Course No. and Subject**
- **Units**
- ECON 1, 50, 102A; PUBLPOL 104
- 20
- POLISCI 2; PUBLPOL 101
- 10
- PUBLPOL 103
- 5

For students who major in another interdepartmental program (such as International Relations) and who satisfy major requirements by taking ECON 50, POLISCI 2, and an introductory course in statistics (such as ECON 102A or STATS 60), the requirements for a Public Policy minor are:

- **Course No. and Subject**
- **Units**
- ECON 102B; PUBLPOL 105
- 10
- PUBLPOL 101
- 5
- PUBLPOL 103
- 5
- PUBLPOL 104
- 5
- MS&E 180 and PUBLPOL 102
- 9

HONORS PROGRAM

The Public Policy Program offers students the opportunity to pursue honors work during the senior year. To graduate with honors in Public Policy, a student must:

1. Apply for admission to the honors program no later than the end of the second week of Autumn Quarter of the senior year.
2. Complete the requirements for the B.A. in Public Policy and achieve a grade point average (GPA) of 3.3 in the following courses: the Public Policy core, the student’s concentration area courses, the Senior Seminar, and PUBLPOL 199 (senior research). Courses not taken at Stanford are not included in calculating the GPA.
3. Enroll in at least 8 but no more than 15 units of PUBLPOL 199 during the senior year and receive a final grade on the senior thesis of at least a ‘B+.’

Students who intend to pursue honors work should plan their academic schedules so that most of the core courses are completed before the beginning of the senior year, and all of the core and concentration courses are completed by the end of Winter Quarter of senior year. This scheduling gives students both the time and the necessary course background to complete a senior research project in Spring Quarter. In addition, honors students are encouraged to enroll in PUBLPOL 197, Junior Honors Seminar, during Winter Quarter; this course focuses on developing a research plan and the research skills necessary to complete a thesis. Also, students should plan on taking PUBLPOL 105 during their junior year.

To apply, a student must submit a completed application to the Public Policy Program office with a brief description of the thesis. The student must obtain the sponsorship of a faculty member who approves of the thesis description and who agrees to serve as a thesis adviser. Students intending to write a thesis involving more than one discipline may wish to have two advisers, at least on of which is from the faculty listed above.

The honors thesis must be submitted to both the thesis adviser and the Public Policy Program office. Graduation with honors requires that the thesis be approved by both the adviser and the Director of the Public Policy Program. The role of the director is to assure that the thesis deals with an issue of public policy and satisfies the standards of excellence of the program. However, the grade for the honors thesis is determined solely by the adviser. The thesis adviser sets the deadlines for receiving the final draft of the thesis; the director sets the deadline for theses to be considered for University and department awards. To graduate with honors at the Spring commencement, a student must submit a final bound copy and an electronic copy of the thesis to the Public Policy program office no later than the last Friday in May. To be considered for awards given to outstanding senior theses, a student must submit a copy of the thesis to the Public Policy program office no later than the third Wednesday in May.

Members of the core faculty in Public Policy are available to provide assistance in selecting a senior thesis topic.

COURSES

<table>
<thead>
<tr>
<th>WIM indicates that the course satisfies the Writing in the Major requirements.</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUBLPOL 101. Politics and Public Policy — (Same as POLISCI 123.) The domestic policy making process, emphasizing how elected officials, bureaucrats, and interest groups shape government policies in areas including tax, environmental, and social welfare policy, given their goals and available tactics. How public policies are formulated and implemented. The results of this process using equity and efficiency criteria. Prerequisite: POLISCI 2. GER:DB-SocSci 5 units, Spr (Sprague)</td>
</tr>
<tr>
<td>PUBLPOL 102. Organizations and Public Policy — Analysis of public organizations, stressing problems of effective management and incentives in a non-market environment. Prerequisite: SOC 160 or MS&amp;E 180. GER:DB-SocSci 5 units, Win (Bendor)</td>
</tr>
<tr>
<td>PUBLPOL 103A. Introduction to Political Philosophy — (Enroll in PHIL 30, ETHICSOC 30.) 5 units, Aut (Hussain)</td>
</tr>
<tr>
<td>PUBLPOL 103B. Ethics and Public Policy — (Same as STS 110, MS&amp;E 197.) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, WIM 5 units, Win (McGinn)</td>
</tr>
<tr>
<td>PUBLPOL 104. Economic Policy Analysis — (Same as ECON 150.) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisites: ECON 50 and 102A. WIM 5 units, Win (Noll)</td>
</tr>
</tbody>
</table>
PUBLPOL 105. Quantitative Methods and Their Applications to Public Policy — Reviews material covered in prerequisites with applications of quantitative independent variable techniques to labor market data. Maximum likelihood estimation and estimation dependent variable models with an application to voting models. Final papers estimate influence of quantitative and qualitative independent variables on Congressional voting probabilities. Prerequisites: ECON 102A.B. GER:DB-SocSci 5 units, Spr (Rothwell)

PUBLPOL 124T. Legislatures, Courts, and Public Policy — (Same as POLISCI 124T.) How courts exert power and play a role in creating policy in the U.S. Can or should judges read their own values into law? Can the elected branches check the power of unelected judges? What is good government and how do courts fit into it? Focus is on the Civil Rights Act of 1964 examining the political maneuvers to pass it and recent Supreme Court decisions applying it to affirmative action. GER:DB-SocSci 5 units, Spr (Ruten)

PUBLPOL 145. Globalization and Labor Conditions — The politics and economics of alternative private and public policies aimed at improving labor conditions around the world. Do international trade, offshore outsourcing, international migration, and multinational corporations undermine working conditions and labor rights? 5 units (Flanagan) not given 2005-06

PUBLPOL 149L. The Death Penalty: Human Biology, Law, and Policy — (Enroll in HUMBIO 166.) 3 units, Aut, Spr (Abrams)

PUBLPOL 154. Economics of Legal Rules and Institutions — (Enroll in ECON 154.) 5 units, Win (Owen)

PUBLPOL 163. Formal Organizations — (Enroll in SOC 160.) 5 units, Win (Hillmann)

PUBLPOL 164. Comparative Public Policy — Problems, answers, underlying political philosophies, and impacts of public policy choices in areas such as aging populations, health care costs, illegal immigration, terrorism, pollution, and competition from low-cost countries. Focus is on N. America and Europe. GER:DB-SocSci 3 units (Crombez) not given 2005-06

PUBLPOL 168. Managing Global Diversity: The Matrix of Change — Diversity in organizations consists not only of racial, cultural, and gender differences, but also differences in perspectives and interests among employees based on profession, assignments, or compensation. Diversity can be a source of strength when different perspectives lead to insight and information, and when pay differences leave room to reward superior performance. It can also be a barrier to communication and cooperation. Policy and managerial issues concerning when and how far to encourage diversity and how to harness its strengths and mitigate the conflicts it can create. GER:DB-SocSci 5 units, Win (Meyersson Milgrom)

PUBLPOL 172. Mass Media Economics and Policy — Consumer demand for, the economic structure of, and federal regulation and policies affecting print and electronic mass media industries including the Internet. Topics include economies of scale and first-copy costs, production of non-rivalrous consumption goods, demand and supply of diversity and localism, ownership concentration, access barriers, technological change, the role of networks, and efficient risk bearing. Prerequisite: ECON 50 or equivalent preparation in microeconomics. GER:DB-SocSci 4-5 units (Owen) not given 2005-06

PUBLPOL 173. Risk in Contemporary Culture — (Enroll in STS 163.) 4 units, Spr (Schmid)

PUBLPOL 174. Science and Engineering in the Security State — (Enroll in STS 165.) 4 units, Spr (Slayton)

PUBLPOL 175. Technology in Modern Security Discourse — (Enroll in STS 170.) 4 units, Aut (Slayton)

PUBLPOL 180. Social Innovation — The mechanisms and features of social innovation defined as the process of inventing, securing support for, and implementing novel solutions to social needs and problems. Focus is on the social, economic, technical, and organizational mechanisms underlying innovations. Sources include social science theory and research, and insights from the practical world. GER:DB-SocSci 4 units, Aut (Phillis)

PUBLPOL 182. Polarized Politics and Special Interest Groups — (Enroll in POLISCI 227R.) 5 units, Win (Wand)

PUBLPOL 183. Philanthropy and Social Innovation — Philanthropy’s role in modern society and the translation of its vision and capital into social action. How individuals, foundations, corporations, and philanthropic organizations engage in social investing. Topics: the individual and philanthropy; philanthropic history and industry; foundation strategy and infrastructure; philanthropy and the political landscape; corporate philanthropy and social responsibility; global social investing; grant-making; outcome assessment; and social innovation. Readings: business school cases, and theoretical and industry articles. Guest speakers include global philanthropists, foundation presidents, and Silicon Valley business leaders. Final project: students write grant proposals. Enrollment limited to 20. GER:DB-SocSci 5 units (Arrillaga) not given 2005-06

PUBLPOL 185. Managing Public Policy — The role of administration in the U.S. government. Major issues include political control of government agencies, role of the civil service, reinventing government, contracting out government services, budgeting, and human resource administration. GER:DB-SocSci 5 units, Aut (Printup)

PUBLPOL 187. IT and Society: Unanticipated Consequences of New Technologies — How human inventions impact other inventions, society, the individual, and history. Unintended social consequences of technologies, such as railroads, telegraphs, telephones, automobiles, and jet travel. Group projects focus on the design of a national survey to gauge the social effects of Internet technology (IT) on how people spend their time, including the impact of Internet use on non-work activities such as sleep and time spent with friends and family. Practical and innovative techniques in statistical analysis. GER:DB-SocSci 3-4 units, Win (Nie)

PUBLPOL 188 California Politics: Past, Present, and Future — (Same as POLISCI 221V.) Changing patterns of politics from the mid-19th century to the present. Emphasis is on the role of institutions in structuring the state’s politics. GER:DB SocSci, EC-AmerCul 5 units, Win (Fraga)

PUBLPOL 189. Latinos in American Politics — (Same as POLISCI 221V.) Evolution of Latino participation in American politics from the mid-19th century to the present. Issues include conquest, immigration, the Chicanvo movement, national origin diversity, gender, political parties, and office holding. GER:DB-SocSci, EC-AmerCul 5 units, Win (Fraga)

PUBLPOL 190. Social Innovation and the Social Entrepreneur — (Enroll in URBANST 131.) 1 unit, Aut (Staff)

PUBLPOL 191. Concepts and Analytic Skills for the Social Sector — (Enroll in URBANST 132.) 4 units, Win (Kieschnick)

PUBLPOL 193. Social Entrepreneurship Collaboratory — (Enroll in URBANST 133.) 4 units, Win, Spr (Edwards)
PUBLPOL 194. Technology Policy — The evolution of U.S. technology policy and how policy is made. Topics: federal technology policy before and after WW II; the debate over using R&D programs to promote economic growth and competitiveness; the impact of federal policy on the development of the Internet and biotechnology; and stem-cell research and digital copyrights as examples of controversies over the social impact of technological activities. Prerequisites: ECON 1, POLISCI 2.
4-5 units, Win (Windham)

PUBLPOL 196. The Political Economy of the Federal Budget — (Enroll in ECON 142.)
5 units, Win (Windham)

PUBLPOL 197. Junior Honors Seminar — Primarily for students who expect to write an honors thesis. Weekly sessions discuss writing an honors thesis proposal (prospectus), submitting grant applications, and completing the honors thesis. Readings focus on writing skills and research design. Students select an adviser, outline a program of study for their senior year, and complete a prospectus by the end of the quarter. Seniors working on their theses also may enroll and present their research to the seminar participants. Seniors are required to make substantial progress on their thesis by the end of the quarter. Enrollment limited to 25.
5 units, Win (Rothwell)

PUBLPOL 198. Directed Readings in Public Policy
1-5 units, Aut, Win, Spr (Staff)

PUBLPOL 199. Senior Research
1-15 units, Aut, Win, Spr (Staff)

PUBLPOL 200A,B,C. Senior Seminar — For Public Policy students. How to conduct research in public policy. Students make oral presentations and write a paper on a topic in public policy. Topic and methods of analysis determined by student in consultation with instructor. Prerequisites: completion of core courses in Public Policy or consent of instructor.
3 units, A: Aut, B: Win (Sprague), C: Spr (Egan)

PUBLPOL 209. Economics and Public Policy — (Enroll in MGT-ECON 309.)
4 units (Kessler) not given 2005-06

PUBLPOL 231. Political Economy of Health Care in the United States — (Same as HRP 391, MGTECON 331.) The economic tools and institutional and legal background to understand how markets for health care products and services work. Moral hazard and adverse selection. Institutional organization of the health care sector. Hospital and physician services markets, integrated delivery systems, managed care, pharmaceutical and medical device industries. Public policy issues in health care, medical ethics, regulation of managed care, patients’ bill of rights, regulation of pharmaceuticals, Medicare reform, universal health insurance, and coverage of the uninsured. International perspectives, how other countries’ health care systems evolved, and what the U.S. can learn from their experiences.
4 units, Spr (Kessler)

OVERSEAS STUDIES

Courses approved for the Public Policy major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

PARIS
PUBLPOL 111P. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time — (Same as HUMBIO 153X.)
4-5 units, Win (Staff)
1. At least eight of the 60 units must be courses at the introductory level. Students may satisfy this requirement by taking either:
   a) IHUM 68A,B, Approaching Religion: Tradition, Transformation, and the Challenge of the Present (Winter/Spring sequence), or
   b) two courses numbered less than 100, one of which must be a designated gateway-to-the-major course. Stanford Introductory Seminars are not gateways to the major; however, one Stanford Introductory Seminar in Religious Studies may be used to fulfill 4 units required in courses numbered under 100.
2. At least 29 units are to be taken in intermediate lecture and seminar courses numbered 100-289. Of these, at least two seminars are required from courses numbered above 200. Language courses relating to students’ study of religion within the department (such as Arabic, biblical Hebrew, New Testament Greek, Chinese, or Japanese) may, with departmental approval, be counted among these 29 units.
3. 15 units in integrative courses:
   a) Majors’ Seminar: RELIGST 290, Theories of Religion (5 units)
   b) Senior Essay or Honors Thesis Research: RELIGST 297 (3-5 units; up to 10 units over two quarters)
   c) Senior Majors’ Colloquium: RELIGST 298 (5 units, Spring Quarter), concluding with public presentations of the results of work on a senior essay or honors thesis.
   d) completion of either a senior essay or honors thesis. See below concerning the difference between these options.
4. Each student, in consultation with his/her adviser, works out a focus of study centering either on a particular religious tradition or on a theme or problem which cuts across traditions such as ritual, ethics, scripture, or gender.

SENIOR ESSAY
A 25-30 page essay on a topic chosen by the student and approved by the adviser upon receipt of a student’s proposal by the end of the fourth quarter prior to expected graduation. The character and content of the essay, which is meant to allow the student to call into play knowledge and skills learned in the course of the major, may take several forms. For example, a student may return to a subject studied earlier but now pursued with more questions or from a new perspective, or research a recent or new topic of interest in the field, or offer a carefully framed critical assessment of what has been learned in the major based on review of influential sources, theories, and methods of studying religion. The senior essay is read and graded by the student’s adviser and one other member of the Religious Studies faculty.

HONORS THESIS
A 40-80 page research paper on a topic chosen by the student and approved by the adviser upon receipt of a proposal in the fourth quarter prior to expected graduation. The paper, supported by mastery of primary and secondary scholarship, advances a well-reasoned, supportable thesis. Writers of honors theses must have a grade point average (GPA) of 3.5 in Religious Studies courses, and at least 3.2 overall, and are expected to have already demonstrated success in writing research papers. The honors thesis is read and graded by the student’s adviser and one other member of the Religious Studies faculty. Theses earning a grade of A- or above receive honors.

MINORS
A minor in Religious Studies requires a minimum of 7 courses (30-36 units of graded work). Students must declare the minor no later than the last day of the quarter, two quarters before degree conferral.

Requirements for the minor include:
1. Two introductory courses. To satisfy this requirement, students take either:
   a) IHUM 68A,B, Approaching Religion: Tradition, Transformation, and the Challenge of the Present (Winter/Spring sequence), or
   b) two courses numbered less than 100, one of which must be a designated gateway-to-the-major course. Stanford Introductory Seminars are not gateways to the major; however, one Stanford Introductory Seminar in Religious Studies may be used to fulfill 4 units required in courses numbered under 100.
2. Five intermediate lecture and seminar courses, 100-289.
3. One course in directed reading (RELIGST 199) may count towards the minor.
4. Students may petition for other Stanford courses to fulfill minor requirements, but they must take courses from at least two Religious Studies faculty members.
5. Students are strongly encouraged to focus their program of study either in a religious tradition or in a theme which cuts across traditions. In consultation with their advisers, students may design the minor in Religious Studies to complement their major.

MAJOR IN RELIGIOUS STUDIES AND PHILOSOPHY
The departments of Religious Studies and Philosophy jointly nominate for the B.A. students who have completed a major in the two disciplines. See a description of this joint major under the “Philosophy” section of this bulletin, or in the guidelines available from the undergraduate director of either department.

GRADUATE PROGRAMS
MASTER OF ARTS
University regulations pertaining to the M.A. are listed in the “Graduate Degrees” section of this bulletin. The following requirements are in addition to the University’s basic requirements.

The student completes at least 45 units of graduate work at Stanford beyond the B.A. degree, including a required graduate seminar (304A or B). Residence may be completed by three quarters of full-time work or the equivalent.

The student’s plan of courses is subject to approval by the Graduate Director. No field of specialization is expected, but students may focus work in particular areas. Advanced and graduate courses in other departments may be taken. No thesis is required; a thesis, if elected, may count for as many as 9 units.

Each student demonstrates reading knowledge of at least one foreign language.

DOCTOR OF PHILOSOPHY
University regulations regarding the Ph.D. are found in the “Graduate Degrees” section of this bulletin. The following requirements are in addition to the University’s basic requirements.

Residence — Each student completes three years (nine quarters) of full-time study, or the equivalent, in graduate work beyond the B.A. degree, and a minimum of 135 units of graduate course work (excluding the dissertation).

Field of Study — The Ph.D. signifies special knowledge of a field of study and potential mastery of an area of specialization within it. The faculty of the department have established certain fields of study in which the department’s strengths and those of other Stanford departments cohere. They are: East Asian religions, Christianity, Judaism, religious ethics, and modern Western religious thought. Students who wish to specialize in other fields must obtain early approval by the faculty.

Stages of Advancement —
1. In the first two years, the student refines an area of specialization within the chosen field of study in preparation for candidacy.
2. After attaining candidacy, the student concentrates on the area of specialization in preparation for the qualifying examination.
3. The student writes a dissertation and defends it in the University oral examination.

Languages — Each student demonstrates a reading knowledge of two foreign languages, including French or German. Each student also demonstrates reading knowledge of other ancient or modern languages necessary for the field of study, area of specialization, and dissertation topic.

Courses — Each student satisfactorily completes the two graduate seminars (304A,B), two quarters of the pedagogy seminar (391), and one reading seminar before the candidacy decision. Other courses are taken with the approval of a faculty adviser in consideration of the student’s
field of study.

Candidacy — At the end of each academic year, the department’s faculty recommend second-year students for candidacy on the basis of all relevant information, and especially on the student’s candidacy dossier which includes the approved declaration of an area of specialization, certification for one foreign language, and two substantial papers written for courses during the previous two years.

Paper-in-Field — During the third year, under the supervision of their adviser, students prepare a paper suitable for submission to an academic journal in their field. The paper is read and approved by at least two faculty members in the department.

Teaching Internship — At least one teaching internship under the supervision of faculty members is undertaken at a time negotiated with the Graduate Director. Students receive academic credit for the required internship, which is a project of academic training and not of employment.

Qualifying Examination — To qualify for writing a dissertation, the student must successfully pass a comprehensive examination in the chosen field and the area of specialization. The student must complete the second language requirement before taking qualifying examinations.

Dissertation — The dissertation contributes to the humanistic study of religion and is written under the direction of the candidate’s dissertation adviser and at least two other members of the Academic Council. The University oral examination is a defense of the completed dissertation.

PH.D. MINOR IN RELIGIOUS STUDIES

Candidates for the Ph.D. in other departments may select a Ph.D. minor in Religious Studies. The minor requires at least 24 units in Religious Studies at the 200 level or above. Four of the 24 units should be in “Theories and Methods.”

JOINT PH.D. IN RELIGIOUS STUDIES AND HUMANITIES

Religious Studies participates in the Graduate Program in Humanities leading to the joint Ph.D. in Religious Studies and Humanities, described in the “Interdisciplinary Studies in Humanities” section of this bulletin.

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Religious Studies department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Religious Studies are advised to consider satisfying their GER:1b,c requirements by registering for the following IHUM courses.

IHUM 68A.B. Approaching Religion: Tradition, Transformation, and the Challenge of the Present — Two quarter sequence. Challenges facing the world’s religions in responding to issues such as globalization, feminism, science, pluralism, and individualism. How Judaism, Buddhism, and Islam changed or resisted change in their founding moments. Encounters between these religious traditions and the forces of contemporary social change. GER:IHUM-2,3

IHUM 68A.B. 5 units, Win (Fonrobert, Zimmermann)
IHUM 68A.B. 5 units, Spr (Eisen)

INTRODUCTORY

RELIGST 2N. Prophecy and Politics in America: The Thought of Abraham Joshua Heschel and Martin Luther King, Jr. — Stanford Introductory Seminar. Preference to freshmen. The religious beliefs and political activities of these pre-eminent religious figures in 20th-century America, each a hero in his own religious community and beyond who took the mandate of the biblical prophets, convinced that God demanded action, to transform the social order. GER:DB-Hum, EC-AmerCul
3 units, Win (Eisen)

4 units, Win (Yearley)

RELIGST 5N. Three Sacred Stories of Judaism, Christianity, and Islam — Stanford Introductory Seminar. Preference to freshmen. Interpretations of the scriptural narratives of Sarah and Hagar/Hajar, Jonah/Yunus and the great fish, and Mary/Maryam, the mother of Jesus/Isa, by the rabbis, the first Christian theologians, and early commentators on the Qur’an, and by artists in the three traditions. GER:DB-Hum, EC-GlobalCom
3 units, Aut (Gregg)

RELIGST 6N. The Life of the Buddha — Stanford Introductory Seminar. Preference to freshmen. Who was the historical Buddha Gautama and what is known about him, and his time and society? The oldest texts attributed to him and what they reveal about him, and his ideas and spirituality. Sources include Indian literary works in translation, Buddhist art, and contemporary films about the Buddha’s life. GER:DB-Hum, EC-GlobalCom
4 units, Spr (Zimmermann)

RELIGST 11. Religious Classics of Asia: India’s Ramayana Epic — The Ramayana as one of the most important religious and cultural texts of India. Its heroes, Rama and Sita, as incarnations of the supreme God and Goddess and models for ideal manhood and womanhood. Textual and performative versions including Valmiki’s 2,000-year-old Sanskrit poem, medieval vernacular versions, rural women’s folk songs, and the TV serial of 1988-89. Ramayana traditions through the lenses of religion, literature, performance, popular culture, gender, and politics. GER:DB-Hum, EC-GlobalCom
3 units (Hess) not given 2005-06

RELIGST 12. Introduction to Hinduism — Historical study from earliest period to the present, including religious poetry, narrative, performance, concepts of self and liberation, yoga, ritual, God and gods, views of religion through history, region, class, caste, and gender. GER:DB-Hum, EC-GlobalCom
4 units, Spr (Hess)

RELIGST 14. Introduction to Buddhism — Basic tenets of Buddhism with focus on its origin, intellectual developments, ethical foundations, and meditative practices. Translations of Buddhist texts from different periods and cultures. The spread of Buddhism throughout Asia and, since the last century, the West. GER:DB-Hum, EC-GlobalCom
4 units (Zimmermann) not given 2005-06

RELIGST 15. Introduction to the World of the Hebrew Bible — Cultural and religious context including its interactions with Sumerian and Phoenician epic. Recent archeological discoveries that shed light on Israelite religion. Theories of authorship and analysis of priestly and prophetic texts. GER:DB-Hum
4 units, Aut (Leeven)

RELIGST 16. Introduction to South Asian Buddhism — Focus is on Buddhist intellectual developments from the time of its founder, the historical Buddha Shakyamuni, to contemporary forms in Nepal and Sri Lanka. Basic aspects of Buddhist ethics, ritual, and art. GER:DB-Hum, EC-GlobalCom
4 units (Zimmermann) not given 2005-06

4 units, Spr (Bielefeldt)

RELIGST 23. Introduction to Judaism — The historical development
of Jewish religious thought and practice, from the biblical period to the present. Scriptural, liturgical, midrashic, legal, historical, and philosophical texts reflecting that development. The Sabbath, and annual festivals and sacred days. GER:DB-Hum
4 units, Win (Leveen)

RELIGST 24. Introduction to Christianity — The historical development of Christian religious thought and practice from Jesus to the present. Emphasis is on the formation of Christianity’s major teachings and their transformation and diverse expressions in the medieval, reformation, and modern periods. Readings focus on primary texts. GER:DB-Hum
4 units, Aut (Pitkin)

RELIGST 32. The Problem of God — Gateway course. Monotheism is a belief for which people continue to live and die. Philosophical inquiry into the concept of God through its classic formulations, modern critics, and contemporary defenders. What has the idea of God meant to serious minds in the past? And in the modern or postmodern world? GER:DB-Hum
4 units, Win (Sockness)

RELIGST 42. Philosophy of Religion — Gateway course. Classic and modern questions in the philosophy of religion traced through Western and Eastern traditions: the coherence of theism, relativism, verification and ethics of belief, and implications of science. Readings from traditional and modern texts. GER:DB-Hum
4 units, Aut (Gerber)

RELIGST 53. Jews and Judaism in America — Development of the Jewish religious tradition in 20th-century America and its role in the life of its ethnic community. Comparison to the role of the church in the life of the African American community. Historical, sociological, and theological works complemented by novels, poetry, films, and TV. GER:DB-Hum, EC-AmerCul
4 units (Eisen) not given 2005-06

RELIGST 55. Introduction to Chinese Religions — Confucianism, Daoism, Buddhism, and the interchange among these belief systems and institutions. Set against the background of Chinese history, society, and culture, with attention to elite and popular religious forms. GER: DB-Hum, EC-GlobalCom
4 units (Eisen) not given 2005-06

RELIGST 56. Introduction to Daoism — Historical survey from origins to the present. Main schools, notions, communal rites, and individual practices, and the relation of Daoism to facets of Chinese culture.
4 units, Win (Pregadio)

RELIGST 82. Approaches to the Study of Religion: Christianity — Gateway course. Historical and contemporary Christianity from four viewpoints: ritual and prayer; sacred texts and creeds; ethics and life; and community governance. GER:DB-Hum
4 units (Pregadio) not given 2005-06

RELIGST 84. Mystics, Pilgrims, Monks, and Scholars: Religious Devotion in Medieval Christianity — Gateway course. The variety and vitality of religious expression in medieval Christian Europe. How Christians sought God through mystical encounter, the structure of monastic life, visits to shrines, devotion to the saints, and the study of scripture and ancient Christian wisdom. Readings focus on primary texts. GER:DB-Hum
4 units (Pitkin) not given 2005-06

UNDERGRADUATE LECTURES

RELIGST 103K. Demons, Witches, and Priests: Religion and Popular Culture in Russia — (Enroll in HISTORY 220G/320G.)
5 units, Aut (Kollmann)

RELIGST 105. Spiritual, not Religious: What Does this Phrase Mean? — Does this often-voiced formula mark a significant cultural change? Viewpoints and philosophies that present themselves as spiritual in books and films, and in the language and practices of adherents. What are the central ideas and convictions of the spiritual, not religious, person or group? What do spirit and spiritual connote that creates distance from religious ideas and practices? GER:DB-Hum, EC-GlobalCom
4 units (Gregg) not given 2005-06

RELIGST 106. New Pope, New Church — The recent election of Joseph Ratzinger as Benedict XVI. His legacy during the papacy of John Paul II. The state of the Catholic church in the areas of creed, morality, liturgy, and polity. Prospects for reforming Catholicism during the current papacy. GER:DB-Hum
4 units, Aut (Sheehan)

RELIGST 107/307. Hindus and Muslims in South Asia — Graduate students register for 307.) Hindus and Muslims have been living together in S. Asia for over 1000 years in peace and conflict, creating composite cultures and interdependent social worlds. In 1947, they split violently into separate nations, yet 100 million Muslims remain in India. The history of Hindu and Muslim life in the subcontinent, including religious literature, arts, practices, and sociopolitical formations. GER:DB-Hum, EC-GlobalCom
4-5 units (Hess) not given 2005-06

RELIGST 108. Japanese Religion through Film — Aspects of Japanese religion using recent animated films and movies as primary materials. GER:DB-Hum
4 units, Aut (Faure)

RELIGST 109K. Gender and Sexuality in Early Christianity — How earliest Christianity constructed two categories of embodied existence: gender and sexuality. The attitudes of Christians about sexuality, body, masculinity, and womanhood? Modes of practice such as asceticism and virginity that enabled believers to manage the desires of the flesh. Greco-Roman constructions of masculinity, femininity, and desire; how Christianity irreversibly transformed traditional views. GER:DB-Hum, EC-Gender
4 units, Win (Kalleres)

RELIGST 110. Handmaids and Harlots — Miraculous births, wandering in the wilderness, encounters with angels: scriptural stories of women such as Hagar, Sarah, Hannah, and Mary, and how their tales are read and re-told by later Jews and Christians. Sources include the Hebrew Bible and New Testament, Jewish and Christian commentary, and religious iconography. GER:DB-Hum, EC-Gender
4 units (Leveen, Pitkin) not given 2005-06

RELIGST 111. Zhuangzi and the Daoist Idea of Sainthood — Focus is on its views of the Dao and the application of those views to self-cultivation, ethics, government, and the ideal of sainthood. GER:DB-Hum, EC-GlobalCom
4 units (Pregadio) not given 2005-06

RELIGST 112. Jews and Judaism in America — Development of the Jewish religious tradition in 20th-century America and its role in the life of its ethnic community. Comparison to the role of the church in the life of the African American community. Historical, sociological, and theological works complemented by novels, poetry, films, and TV. GER:DB-Hum, EC-AmerCul
4 units (Eisen) not given 2005-06

RELIGST 113. Jews and Judaism in America — Development of the Jewish religious tradition in 20th-century America and its role in the life of its ethnic community. Comparison to the role of the church in the life of the African American community. Historical, sociological, and theological works complemented by novels, poetry, films, and TV. GER:DB-Hum, EC-AmerCul
4 units (Eisen) not given 2005-06

5 units (Kalleres) not given 2005-06
RELIGST 119/319. Gandhi and Nonviolence—(Graduate students register for 319.) Gandhi’s life; his advocacy and practice of nonviolence in political movements in India and S. Africa; Indian religious sources of ahimsa or nonviolence; political interpretations of the Bhagavad Gita; Gandhian theory of nonviolence; adaptations of Gandhian nonviolence for conflict resolution in the world; critiques of Gandhi. GER:DB-Hum, EC-GlobalCom
4 units, Aut (Hess)

RELIGST 120. Reading the Qur’an—The sacred text from perspectives including historical, mystical, juridical, literary, Islamist, and feminist. Focus is on reading and listening to the original text. Interpretive tools include traditional sources (hadîth, sirah, tafsîr, and Sufi literature) and contemporary literature (Salafi, Islamist, reformist, and feminist). The Qur’an’s use in ritual practice as reading and recitation. GER:DB-Hum, EC-GlobalCom
4 units, Win (McLarney)

RELIGST 122. Radical Catholicism—Past, present, and future of Roman Catholicism in Europe and the Americas. Its roots in Second Temple Judaism and the Greco-Latin world, the structural crises of contemporary Catholicism in governance, spirituality, doctrines, and morals, and the possibility of radical change in those areas. GER:DB-Hum
4 units (Sheehan) not given 2005-06

RELIGST 123. Judaism in Late Antiquity—The religious world and literature of the rabbis who created the classical and normative literature of Judaism. Jewish diversity and sectarianism in the first century C.E., responses to Roman imperialism and the destruction of Jerusalem, the emergence of the rabbinic movement, the rabbi and sage as new Jewish leader, rabbinic authority and the making of religious boundaries, heresy versus orthodoxy, and the role of the family in rabbinic religion. Readings include primary sources in English translation and contemporary scholarship. GER:DB-Hum
4 units (Sheehan) not given 2005-06

RELIGST 125. Catholic Reformation—Reform and renewal of Roman Catholicism in the 16th century through key figures and movements such as Erasmus, Ignatius of Loyola, Teresa of Avila, and the Council of Trent. GER:DB-Hum
4 units (Pitkin) not given 2005-06

RELIGST 126. Protestant Reformation—16th-century evangelical reformers (Luther, Calvin) and reform movements (Lutheran, Reformed, Anabaptist) in their medieval context. GER:DB-Hum
4 units (Pitkin) not given 2005-06

RELIGST 127. Introduction to Classical Judaism—The genres of classical Jewish literature and the issues which shaped its worldview. Selections from rabbinic (Jewish sacred) texts in English translation: Midrash, Mishnah, and Talmud. Topics include the biblical background, the emergence and nature of rabbinic authority and its institutions, the religious importance of discipleship, the legitimacy of dissent, diaspora versus Israel, perceptions of other religions and cultures, the tension between commitment to family and commitment to religious life. GER:DB-Hum
4 units (Pitkin) not given 2005-06

RELIGST 133. Reading the Bible Today—How did Israelites identify themselves? Did the Exodus happen? Why did Deborah have so much power? The influence of recent interpretations such as ethnic studies, literary approaches, feminist critique, and archeological discoveries on contemporary readings and reception of the biblical texts. GER:DB-Hum
4 units (Leveen) not given 2005-06

RELIGST 136. Buddhist Yoga—Introduction to Buddhist models of spiritual practice emphasizing issues in the interpretation of the contemplative path. GER:DB-Hum, EC-GlobalCom
4 units, Win (Bieiefeldt)

RELIGST 138. Faith, Doubt, and Ethics—Comparative examination of five 20th-century theological classics from the Protestant, Jewish, and Roman Catholic traditions: Karl Barth’s Epistle to the Romans, Martin Buber’s I and Thou, Reinhold Niebuhr’s Moral Man and Immoral Society, Paul Tillich’s Courage to Be, Abraham Heschel’s Man is Not Alone, and Karl Rahner’s Foundations. GER:DB-Hum
4 units (Sockness) not given 2005-06

RELIGST 141. Martin Luther—Religious radical, theological dissident, or social conservative? The religious reforms of Martin Luther in intellectual and historical context. Focus is on theology, ethics, biblical interpretation, and social reforms. GER:DB-Hum
5 units, Spr (Pitkin)

RELIGST 143. Pain, Power, and Imitation: Martyrdom in Early Christianity—Why the Roman authorities persecuted early Christians, and why the Christians resisted the government. How these acts of defiance were understood by the martyrs’ peers and successors. The mentality of the martyrs themselves, and the role that martyrdom played in the growth of the early church. Sources include martyr texts, 100-400 C.E., and modern scholarly interpretations. GER:DB-Hum
4 units, Spr (Washburn)

RELIGST 144D. Tibetan Buddhism and Culture in Exile—(Same as CASA 141.) Coincides with the visit of the Dalai Lama to Stanford. The practice and meaning of formal Buddhist and lay rituals in exile; how traditional beliefs and practices have been reworked to meet the spiritual needs and material circumstances of Tibetan refugees. The role of the Dalai Lama in Tibetan religious and political life emphasizing the current Dalai Lama. Effects at cultural preservation in India and the U.S.; the hybrid expressive culture of refugee youth, political activism, and challenges of building and maintaining a diasporic community. Field trips to Bay Area Tibetan events; field work with local Tibetan refugees.
5 units, Aut (Diehl)

RELIGST 150. Mahayana Buddhism in East Asia—The Lotus school of Mahayana, and its Indian sources, Chinese formulation, and Japanese developments. GER:DB-Hum
4 units, Spr (Bieiefeldt)

RELIGST 152. The Great Clarity Tradition in Early Medieval Daoism—History, teachings, and methods of the Great Clarity (Taiqing) tradition of Daoism in China that developed in the third and fourth centuries C.E. Its integration into mainstream medieval Daoism, decline after new traditions arose in the latter half of the fourth century, and legacy to the later history of Daoism.
4 units, Spr (Pregadio)

RELIGST 154. Buddhism Today: Responses to New Global Challenges—How do the traditions of Buddhism cope with new social, ethical, and global challenges? Case studies from Sri Lanka, Japan, and the West. The historical position of Buddhist social thought. Buddhism’s ascetic and meditative legacy; friend or foe of social engagement? GER:DB-Hum, EC-GlobalCom
4 units, Aut (Zimmermann)

RELIGST 156/356. Goddesses and Gender in Indian Religion—(Graduate students register for 356.) Introduction to the abundant female forms of the divine in India; goddess stories, iconographies, worship; lives and religious practices of women and men; constructions of gender in religion and society. Readings in history, myth, poetry, ritual, ethnography, sociology, films. GER:DB-Hum, EC-Gender
4 units (Hess) not given 2005-06
RELIGST 159/359. Music and Religion in South Asia—(Graduate students register for 359.) Music and religion have been closely related for millennia in the India subcontinent. Topics include theories of sound, mantra, music as yoga, guru-disciple relationship, devotional singing, gods and their relation to music, aesthetic theory, classical and folk forms, and Hindu and Muslim traditions. Practical instruction in music. Coordinated with Stanford S. Asian music festival in Winter 2006. GER: DB-Hum, EC-GlobalCom
4-5 units, Win (Hess)

RELIGST 162. Spirituality and Nonviolent Social Transformation—(Enroll in URBANST 126.)
4 units, Win (McLennan, Karlín-Neumann, Sanders)

RELIGST 164. Ritual Musics of the World—(Enroll in CASA 164/264, MUSIC 164/264.)
4 units (Diehl) not given 2005-06

RELIGST 169. Christianity in Late Antiquity—Communal struggles, personal rivalries, theological conflicts, and social controversies in the early church (2nd-6th centuries C.E.) that shaped Christianity and its history. Heresy and orthodoxy, hierarchy and charisma, gender and class, persecution and martyrdom, paganism and classical tradition, creeds and councils, asceticism and the body, church and state, eastern and western Christianity. GER:DB-Hum
4 units (Kalleres) not given 2005-06

RELIGST 170C. Reading in Biblical Hebrew—The third quarter of a three-quarter sequence in Biblical Hebrew. Readings and translation of biblical narratives emphasizing grammar and literary techniques. Prerequisite: AMELANG 170B.
4 units, Spr (Leveen)

RELIGST 172. Sex, Body, and Gender in Medieval Religion—Anxiety about sex and the body increased markedly during the early years of Christianity, while the doctrine of the Incarnation put the human body at the center of religious concern. Ideas of virginity, chastity, ascetic self-denial of necessities like food, sleep, and freedom from pain were central to lay and clerical piety. The religious theory and practice associated with questions about sex, body, and gender in the Middle Ages as constructed in literature, mythology, ritual, mystic, and monastic texts. GER:DB-Hum, EC-Gender
4 units, Spr (Gelber)

RELIGST 185. Prophetic Voices of Social Critique—Judges, Samuel, Amos, and Isaiah depict and question power, strong rulers who inevitably fail, the societal inequities and corruption inevitable in prosperity, and the interplay between prophet as representative of God and the human king. How these texts succeed in their scrutiny of human power and societal arrangements through attention to narrative artistic and poetic force, and condemnation of injustice. May include a service-learning component in conjunction with the Haas Center. GER:DB-Hum
4 units (Leveen) not given 2005-06

UNDERGRADUATE DIRECTED READING

RELIGST 199. Individual Work—Prerequisite: consent of instructor and department. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

UNDERGRADUATE SEMINARS

RELIGST 204. Buddhist Philosophy and Religion in Comparative Perspective—Foundational Buddhist positions on human nature through the ways in which Buddhism has portrayed the boundaries of the human. Juxtaposition of Buddhist and Western philosophical/religious views of liberation, asceticism, body and mind, consciousness, language, epistemology and ethics. Sources include: Buddhist texts in translation such as the Buddhist Canon, Nagajuna, and Vasubandhu; and Plato, Aristotle, Augustine, Descartes, Hume, Kant, and Berkeley. GER:DB-Hum
4 units, Win (Ronkin)

RELIGST 210. Translating the Daode Jing—One of the most frequently translated works in world literature. Challenges faced by translators, support from commentaries and related sources, and assumptions underlying translations into Western languages. Recommended: classical Chinese. GER:DB-Hum
4 units, Win (Pregadio)

RELIGST 211. Religion, Politics, and American Democracy—Seminar. Should religious arguments have a public role in policy debates in a democratic society that includes conflicting religious conceptions of the good? Does the separation of church and state require a completely secular society? Readings include Rawls, Rorty, Carter, Hauerwas, and Stout.
5 units (Harvey) not given 2005-06

RELIGST 212. Chuang Tzu—The Chuang Tzu in its original setting and as understood by its spiritual progeny. Limited enrollment. GER: DB-Hum
5 units, Win (Yearley)

RELIGST 213. Daode Jing—Passages of the Daode jing (Scripture of the Way and its Virtue) and interpretation in major traditional commentators. Topics include Daoist metaphysics, the ideal of saihthood, the view of rulership and society, and Daoist notions of non-action, spontaneity, and return to the Dao. GER:EC-GlobalCom
4 units (Pregadio) not given 2005-06

RELIGST 216/316. Doctrine and Practice in Theravada Buddhism—(Graduate students register for 316.) The religious principles, practices, underlying doctrines, and the accommodation between religion and society in the Theravada tradition of Sri Lanka and S.E. Asia. The origins of Buddhism in ancient India, the consolidation of the Theravada tradition, the development of its monastic, intellectual, and lay communities, its spread across S.E. Asia, and modern transformations and trends. Anthropological and textual perspectives, and methodological difficulties. GER:EC-GlobalCom
4-5 units (Kumada, Ronkin) not given 2005-06

3 units, Aut (Kumada)

RELIGST 218/318. Buddhist Ethics: Nonviolence and Compassion—(Graduate students register for 318.) Approaching Buddhist ethics descriptively. The position of ethics in Indian Buddhism, its relation to Buddhist soteriological goals, and changes since the founder. Themes include nonviolence (ahimsa), compassion, bodhisattva, the ascetic saint (arahat), and social activism. Readings of Buddhist literature in translation. GER:EC-GlobalCom
4 units (Zimmermann) not given 2005-06

RELIGST 221/321. Modern Judaism—(Graduate students register for 321.) Changes in Judaism over the last two centuries with focus on emancipation, Zionism, and developments in theology and practice. GER:DB-Hum
5 units (Eisen) not given 2005-06

RELIGST 228/328. Buddhist Sanskrit Texts on Ethics—(Graduate students register for 328.) Translation and interpretation. Texts on Buddhist morality from the first half of the first millennium C.E. Prerequisite: reading competence in Sanskrit.
1-5 units, Win (Zimmermann)

RELIGST 232. God: A Biography—Readings in the Hebrew Bible illuminate a God who walks among human beings, appears on mountain top and in cloud, and can be challenged and conciliated. Genesis, Exodus, the prophet Ezekiel, and Job convey the dimensions in which the religious imagination encounters the Hebrew God. Recent works such as The God of Old, The Divine Symphony, and An Early History of God in which an ancient multidimensional approach to God re-emerges. GER:DB-Hum
4 units, Spr (Leveen)
RELIST 235. Pilgrimage and Sacred Landscapes—(Same as CASA 135X.) Perspectives include cultural, spiritual, psychological, medical, economic, and political. Christianity, Buddhism, Hinduism, Islam, Native American and secular; sources include Europe, Tibet, India, Native America, and the Middle East. Why do pilgrims often make their journeys as difficult and painful as possible? How do landscapes become sacred? What happens when places such as Jerusalem are intersections for groups with different belief systems? Contemporary U.S. destinations such as Graceland and the Vietnam Memorial; journeys of personal or non-parochial cultural significance. GER:DB-Hum
4 units, Win (Diehl)

RELIST 245. Religion, Reason, and Romanticism—(Same as HUMNTIES 196B.) The late 18th-century European cultural shift from rationalist to romantic modes of thought and sensibility. Debates about religion as catalysts for the new Zeitgeist. Readings include: the Jewish metaphysician, Mendelssohn; the dramatist, Lessing; the philosopher of language and history, Herder; the critical idealist, Kant; and the transcendental idealist, Fichte. GER:DB-Hum
5 units (Sockness) not given 2005-06

RELIST 245S. Islam and the West—(Enroll in POLISCI 149S.)
5 units, Spr (Milani)

RELIST 251/351. Readings in Indian Buddhist Texts—(Graduate students register for 351.) Introduction to Buddhist literature through original texts in Sanskrit. No knowledge of Sanskrit required. GER:DB-Hum
4-5 units (Zimmermann) not given 2005-06

RELIST 254T. Japanese Buddhism—(Enroll in JAPANGEN 166.)
1-5 units, Aut (Odagiri)

RELIST 256E. Political Anthropology from Rousseau to Freud—(Enroll in FREGEN 256E.)
3-5 units (Dupuy) alternate years, given 2006-07

RELIST 257. Readings in East Asian Religious Texts—Readings from primary sources. Prerequisite: classical Chinese.
4 units, Spr (Pregadio)

3-5 units, Win (Bielefeldt)

RELIST 270. Science and Religion—Relations between the fields via case studies drawn primarily from biology and Judaism highlighting similarities and differences. Current debates emphasizing genetics, the evolution of learning, communication, ritual and tradition, and the role of religious and scientific communities. GER:DB-Hum
4 units (Staff) not given 2005-06

RELIST 271A,B. Dante’s Spiritual Vision—Mysticism, poetry, ethics, and theology in Dante’s Divine Comedy. Supplementary readings from classical authors such as St. Augustine and St. Thomas, and from modern writers. Students may take 271A without B. GER:DB-Hum
A: 4 units, B: 5 units, (Yearley) not given 2005-06

RELIST 274/374. From Kant to Kierkegaard—(Graduate students register for 374.) The main currents of religious thought in Germany from Kant’s critical philosophy to Kierkegaard’s revolt against Hegelianism. Emphasis is on the theories of religion, the epistemological status of religious discourse, the role of history (especially the figure of Jesus), and the problem of alienation/reconciliation in seminal modern thinkers: Kant, Schleiermacher, Hegel, and Kierkegaard. GER:DB-Hum
5 units (undergraduates), 3-5 units (graduate students), Spr (Sockness)

RELIST 275/375. Kierkegaard and Religious Existentialism—(Graduate students register for 375.) Close reading of Kierkegaard’s pivotal work, Concluding Unscientific Postscript. The discovery and appropriation of Kierkegaard in the 20th century by Christian and Jewish thinkers. GER:DB-Hum
5 units (undergraduates), 3-5 units (graduate students)
(Sockness) not given 2005-06

RELIST 278. Heidegger, Rahner, and God—A critical presentation of the post-1989 paradigm shift in Heidegger research and its relevance to questions of religion and God. Prerequisite: consent of instructor. GER:DB-Hum
5 units (Sheehan) not given 2005-06

RELIST 279/379. Heidegger and the Holy—(Graduate students register for 379.) Heidegger’s philosophy as opening a new door onto the possibility of experiencing the sacred after the collapse of traditional metaphysical theology. A close reading of Being and Time as an introduction to the question of the holy.
4 units, Win (Sheehan)

RELIST 290. Majors Seminar—Introduction to Religious Studies through the fields and approaches represented by the faculty of the Stanford Department of Religious Studies. WIM
4 units, Win (Eisen)

RELIST 297. Senior Essay/Honors Essay Research—Guided by faculty adviser. Prerequisite: consent of instructor and of the department.
3-5 units, Aut, Win, Spr (Staff)

RELIST 298. Senior Colloquium—For Religious Studies majors writing the senior essay. Students present work in progress, and read and respond to others. Approaches to research and writing in the humanities.
5 units, Spr (Hess)

GRADUATE SEMINARS, RESEARCH, AND TEACHING

RELIST 304A,B. Theories and Methods—Required of graduate students in Religious Studies. Approaches to the study of religion. Prerequisite: consent of instructor.
4 units, A: Aut (Yearley), B: (Faure) not given 2005-06

RELIST 308. Medieval Japanese Buddhism—Japanese religion and culture, including Buddhism, Shinto, popular religion, and new religions, through the medium of film.
3-5 units, Aut (Faure)

RELIST 313. Buddhist Iconography and Ritual
3-5 units (Faure) not given 2005-06

RELIST 335. Enlightenment Seminar—(Same as HUMNTIES 324.) Enlightenment thought, culture, and politics organized around 17th- and 18th-century debates concerning the meaning, role, and viability of religion in European society. Authors include Descartes, Pascal, Leibniz, Voltaire, Rousseau, Hume, and Kant.
3-5 units, Aut (Sockness)

RELIST 338. Medieval Seminar—(Same as HUMNTIES 322, MED-VLST 322.) Medieval culture and ethical ideals extolled by medieval authors explicitly in philosophical and theological texts and implicitly in literary ones. Connections among ethics, cosmology, sacred history, anthropology, and soteriology in the medieval worldview. Medieval ethical beliefs as a window on medieval intellectual culture.
3-5 units, Win (Gelber)

RELIST 347. Research in Religion in Late Antiquity: Early Christian Platonism—Elements of Platonistic thought in texts including: Gospel of John, Epistle to the Hebrews, Justin’s 2nd Apology, Origen’s On First Principles, and comparison of Philo’s and Gregory of Nyssa’s Life of Moses.
4 units, Aut (Gregg)
RELIGST 370. Comparative Religious Ethics—The difference that the word religious makes in religious ethics and how it affects issues of genre. Theoretical analyses with examples from W. and E. Asia. Prerequisite: consent of instructor. 4 units (Yearley) not given 2005-06.

RELIGST 389. Individual Work for Graduate Students—May be repeated for credit. Prerequisite: consent of instructor. 1-15 units, Aut, Win, Spr, Sum (Staff).

RELIGST 390. Teaching in Religious Studies—Required supervised internship. 4 units, Aut, Win, Spr (Staff).

RELIGST 391. Pedagogy—Required of Ph.D. students. 1 unit, Aut (Epstein).

RELIGST 392. Candidacy Essay—Prerequisite: consent of graduate director. 1-15 units, Aut, Win, Spr (Staff).

RELIGST 395. Master of Arts Thesis 2-9 units, Aut, Win, Spr (Staff).

OVERSEAS STUDIES

Courses approved for the Religious Studies major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BEIJING

RELIGST 19B. Philosophy and Religion, East and West 4 units, Aut (Zhao).

BERLIN

RELIGST 21F. Jewish Berlin: The Metropolis in the Imagination of a Minority 4 units, Aut (Fonrobert).

RELIGST 22F. The Politics of Memory 3 units, Aut (Fonrobert).

KYOTO

RELIGST 17R. Religion and Japanese Culture 4-5 units, Spr (Ludvik).

CENTER FOR RUSSIAN, EAST EUROPEAN AND EURASIAN STUDIES

Emeriti: Terence L. Emmons, Joseph N. Frank, Alex Inkeles, Joseph Van Campen, Henry Rowen
Director: Nancy S. Kollmann (History)
Associate Director: Mary Dakin
Academic Coordinator: Jack Kollmann

Professors: Lazar Fleishman (Slavic Languages), Gregory Freidin (Slavic Languages), David J. Holloway (History, Political Science, on leave), Nancy S. Kollmann (History), David Laitin (Political Science), Norman Naimark (History), Aron Rodrigue (History), Richard D. Schupbach (Slavic Languages), Nancy B. Tuma (Sociology), Steven J. Zipperstein (History)

Associate Professors: Maria Gough (Art History), Monika Greenleaf (Slavic Languages, on leave), Michael McFaul (Political Science), Gabriella Safran (Slavic Languages), Amir Weiner (History)

Assistant Professors: Robert Crews (History), Pavle Levi (Art History), Bissera Pentcheva (Art History, on leave)
Senior Lecturers: Rima Greenhill (Slavic Languages), Katherine Jolluck (History), Geoffrey Rothwell (Economics)

Lecturers: John Dunlop (International Policy Studies), Amelia Glaser (Slavic), Eugenia Khassina (Slavic Language), Alma Kunanbaeva (Cultural and Social Anthropology), Volodymyr Kulyk (Political Science), Izaly Zemtsovsky (Music)

Courtesy Professors: Coit Blacker (Political Science)
Affiliates: Michael Bernstam (Hoover Institution), Robert Conquest (Hoover Institution), Elena Danielson (Hoover Institution), John D. Dunlop (Hoover Institution), Joseph D. Dwyer (Hoover Institution), Bertrand Patenaude (Hoover Institution), Karen Rondestvedt (Stanford Libraries), Kathryn Stoner-Weiss (Stanford Institute for International Studies), Wojciech Zalewski (Stanford Libraries)

Center Offices: Building 40, Main Quad
Mail Code: 94305-2006
Phone: (650) 723-3562
Web Site: http://CREEES.stanford.edu

Courses given by the Center for Russian, East European and Eurasian Studies have the subject code REES. For a complete list of subject codes, see Appendix.

The Center for Russian, East European and Eurasian Studies (CREEES) coordinates the University’s teaching, research, and extracurricular activities related to the former Soviet Union and Eastern Europe, and administers two interdisciplinary academic programs: an undergraduate minor and an M.A. graduate degree program. Information on center programs and activities is available at http://CREEES.stanford.edu. CREEES and its degree programs are directed by the CREEES Steering Committee, composed of faculty members associated with the Center. The programs draw on the strengths of nationally recognized area faculty and research affiliates and significant library and archival collections at Stanford. The Center is a U.S. Department of Education Title VI National Resource Center for Russia and East Europe.

UNDERGRADUATE PROGRAMS

MINORS

The minor in Russian, East European and Eurasian Studies (REEES) is an interdisciplinary area studies program that allows the participating student significant opportunity to select REEES courses in various departments according to his or her interests.

REQUIREMENTS

1. Two core courses: one on Russia/Eurasia, one on Eastern Europe, to be selected by the student from an annual list of qualifying courses issued by CREEES.
2. At least four additional REEES courses, totaling at least 20 units.
3. The student’s courses, core and additional, must be distributed among at least three departments. In addition to REEES courses in the departments of History, Political Science, and Slavic Languages and Literatures, REEES courses in Cultural and Social Anthropology, Economics, Sociology, and so on, when offered, may qualify. The CREEES academic coordinator determines which courses qualify for the minor.
4. A capstone experience in REEES, including, but not limited to, one of the following:
   a) a departmental seminar course for advanced undergraduates
   b) directed reading and research with a Stanford faculty member or a CREEES-approved resident or visiting scholar
   c) participation in the Stanford Overseas Studies Program in Moscow.

Foreign Language—The REEES minor has no language requirement, but students are strongly encouraged to attain working competence in Russian or another relevant language. Courses at the third-year level or
above in Russian or another language of the former Soviet Union or Eastern Europe (excluding German) may be counted towards the REEES minor, up to a maximum of 3 units per academic quarter, 9 units total.

Additional Information — The total number of courses applied to the REEES minor must be at least six, but the minor should total no more than 36 units. Courses counting towards the REEES minor may not be counted towards the student’s major. Courses taken at Stanford overseas campuses (particularly the Moscow campus) may count towards the REEES minor, with the approval in each case of the CREEES academic coordinator; at least three courses for the minor must be taken in residence at Stanford.

Approval of CREEES Academic Coordinator — Students interested in pursuing the REEES minor should consult the CREEES academic coordinator. The minor is declared online using the AXESS system. Students declaring the REEES minor must do so no later than three quarters prior to their intended quarter of degree conferral. Approval of minor declarations and certification of requirements are made by the academic coordinator.

Students pursuing the REEES minor work with the CREEES academic coordinator, who is responsible for determining that requirements for the minor are satisfied.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES

To qualify for a coterminal M.A. degree in Russian, East European and Eurasian Studies, besides completing University requirements for the B.A. degree, a student must:

1. Submit a coterminal application for admission to the program no later than the quarter prior to the expected completion of the undergraduate degree, normally the Winter Quarter prior to Spring Quarter graduation. Students with advanced placement and transfer credit must apply at least four quarters before the expected master’s degree conferral date. Applications may be obtained at Registrar.stanford.edu/publications/. The deadline for all coterminal applications to the M.A. program in Russian, East European and Eurasian Studies is January 10, 2006.

2. Include in the application a program which outlines, by quarter, the schedule of courses the student plans to complete toward the M.A. degree. The student should seek the advice of the CREEES academic coordinator in drafting this schedule. The application also should include: (a) a current Stanford transcript; (b) a one-page statement of purpose; and (c) two letters of recommendation from Stanford professors. Applicants must have a grade point average (GPA) of at least 3.0 (B). Coterminal applicants must take the general test of the Graduate Record Examination and have the results sent to Graduate Admissions, Office of the University Registrar.

3. Complete 15 full-time quarters or the equivalent, or three quarters in full-time residence after completing 180 units; and complete, in addition to the 180 units required for the bachelor’s degree, a minimum of 48 units for the master’s degree.

The same courses may not be counted to meet both undergraduate and graduate requirements, and no courses taken before the junior year may be used to meet the course requirements for the master’s degree. Requirements for completion of the M.A. degree are summarized below; a more detailed description of the program and requirements is available from the center.

SLAVIC THEME HOUSE

Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence which houses 50 students and offers a wide variety of opportunities to expand knowledge, understanding, and appreciation of Russia, the former Soviet Union, and Eastern Europe.

OVERSEAS STUDIES PROGRAMS

Undergraduate students interested in the study of languages, history, culture and social organization of the countries of Russia, Eurasia, and Eastern Europe can apply to study at the Stanford centers in Moscow and Berlin. Participation in these programs is encouraged and easily integrated into the REEES minor. Information about these programs is available at http://osp.stanford.edu.

GRADUATE PROGRAMS

MASTER OF ARTS

CREEES offers a one-year intensive interdisciplinary master’s degree program in Russian, East European and Eurasian Studies for students with a strong prior language and area studies background. The program structure allows students the flexibility to pursue their particular academic interests, while providing intellectual cohesion through a required core curriculum that addresses historical and contemporary processes of change in the former Soviet Union and Eastern Europe. This core curriculum consists of three core courses and REES 200, Core Seminar Series. The program may be taken separately or coterminally with a B.A. degree program. The interdisciplinary M.A. program typically serves three types of students:

1. Those who intend to pursue careers and/or advanced degrees in such fields as business, education, government, journalism, or law, and who wish to establish competence in Russian, East European and Eurasian studies.

2. Those who intend to apply to a Ph.D. program involving Russian, East European and Eurasian studies and who need to enhance their academic skills and credentials.

3. Those who are as yet undecided on a career but who wish to continue an interest in Russian, East European and Eurasian studies.

ADVISING

The advising structure is two-tiered: each M.A. candidate works with the CREEES academic coordinator who advises on the program of course work and monitors the student’s progress toward completing the degree. Candidates are also assigned a faculty adviser from the Academic Council faculty, who provides intellectual and academic guidance.

ADMISSION

Applicants are encouraged to apply electronically; see http://gradadmissions.stanford.edu/ for a link to the electronic application and general information regarding graduate admission, or to request a written application. In addition, prospective applicants are strongly encouraged to consult with the academic coordinator at CREEES regarding the application process.

To qualify for admission to the program, the following apply:

1. Applicants must have earned a B.A. or B.S. degree, or the equivalent.

2. Applicants must have completed at least three years of college-level Russian language study or the equivalent prior to beginning the program. Other languages of Eastern Europe or the former Soviet Union may be accepted on a case-by-case basis.

3. Applicants whose native language is not English are ordinarily expected to take the Test of English as a Foreign Language (TOEFL) and have the results sent to Graduate Admissions, Office of the University Registrar.

4. All applicants must take the General Test of the Graduate Record Examination and have the results sent to Graduate Admissions, Office of the University Registrar.

The deadline for submission of applications for admission and for financial aid is January 3, 2006. Admission is normally granted for Autumn Quarter, but requests for exceptions are considered.

The successful applicant generally demonstrates the following strengths: requisite foreign language study, significant course work in Russian, East European and Eurasian studies in multiple disciplines, outstanding grades in previous academic work, high GRE scores (particularly verbal and analytical writing), study or work experience in the region, strong letters of recommendation, and a persuasive statement of purpose explaining why and how the program fits the applicant’s academic and career goals.
DEGREE REQUIREMENTS

Candidates for the M.A. degree must meet University requirements for an M.A. degree as described in the “Graduate Degrees” section of this bulletin.

The M.A. program in REEES can ordinarily be completed in one academic year by a well-prepared student; longer periods of study are permitted.

Requirements to complete the interdisciplinary M.A. degree are principally ones of distribution, with the exception of three required core courses and a core seminar, as described below. Each student, with the advice of the CREEES academic coordinator, selects courses according to the student’s interests, needs, and goals.

All students in the M.A. REEES program must complete a minimum of 48 academic credit units within the following guidelines.

1. Core Courses: students must complete three, one quarter core courses.
   - Each year, four to six courses, typically from the History, Political Science, and Slavic Languages and Literatures departments, are designated as M.A. core courses; students may select three of these to meet the core course requirement. Courses selected as core courses examine subject areas of fundamental importance within modern Russian, East European and Eurasian Studies, and address questions of research, methodology, and current scholarship.

2. Core seminar 200, Current Issues in Russian, East European and Eurasian Studies, is required of all students in the M.A. program for a total of three academic quarters. The goal of this course is to survey current methodological and substantive issues in Russian, East European and Eurasian studies, acquaint students with Stanford resources and faculty, and present professional development and career options.

3. Interdisciplinary Course Work: a minimum of five graduate courses in Russian, East European and Eurasian studies must be completed and distributed among at least three departments. All course work applied to the 48-unit minimum must deal primarily with Russian, Eurasian, or East European studies.

4. Language Study: students in the program are expected to study Russian or another language of the former Soviet Union or Eastern Europe. Credit towards the 48-unit minimum (maximum 3 units per quarter, 9 units total) is allowed for advanced language work; in the case of Russian, “advanced” is defined as third-year Russian language instruction and above. Similar standards apply for other languages.

5. All course work qualifying for the 48-unit minimum (except REES 200) must have a letter grade of ‘B’ or higher. (‘B-’ does not count for degree credit, nor does ‘S’ or ‘CR’.)

6. All courses counting towards the 48-unit minimum must be approved by the CREEES academic coordinator, who ensures that planned course work satisfies requirements towards the degree. The CREEES director and steering committee determine the requirements.

A description of the M.A. program is also available on the web at http://CREEES.stanford.edu/GraduatePrograms.html and by request from the Center for Russian, East European and Eurasian Studies.

FINANCIAL AID

Subject to funding, CREEES may have a limited number of Foreign Language and Area Studies (FLAS) fellowships for U.S. citizens or permanent residents. Additional financial aid may also be available from CREEES. Applicants in the M.A. program have priority in the annual FLAS competition; in recent years CREEES has also awarded FLAS fellowships in the Graduate School of Business, the School of Medicine, and the School of Law. Consult the CREEES academic coordinator for further information about the application and award process. Applications for FLAS fellowships can be obtained at http://CREEES.stanford.edu/FellowshipsGrants.html.

DOCTORAL PROGRAMS

Since the University does not offer a Ph.D. in Russian, East European and Eurasian Studies, students wishing to pursue a REEES-related doctoral program must apply to one of the departments offering a Ph.D. with an emphasis on Russia, Eurasia, or Eastern Europe, such as the departments of History, Political Science, or Slavic Languages and Literatures.

COURSES

REEES 200. Current Issues in Russian, East European and Eurasian Studies — Enrollment limited to REEES students. Scholars present analyses of methodologies, challenges, and current issues in the study of Russia, E. Europe, and Eurasia.
   1 unit, Aut, Win, Spr (N. Kollmann)

INTERDEPARTMENTAL OFFERINGS

The courses listed below by department deal at least in part with Russia, the former Soviet Union, or Eastern Europe. See the respective department listings for course descriptions. Additional relevant courses by resident or visiting faculty may be offered; for updated information, consult the quarterly Time Schedule or contact the Center for Russian, East European and Eurasian Studies. Students in the area studies M.A. program must have their course list approved each quarter by the Academic Coordinator prior to enrollment.

ART HISTORY

ARTHIST 106/306. Byzantine Art and Architecture, 300-1453 C.E.
   4 units (Pentcheva) not given 2005-06

ARTHIST 145/345. European Modernism and the International Avant Gardes, 1895-1945
   4 units, Aut (Gough)

ARTHIST 410. Aesthetics of the Icon
   5 units (Pentcheva) not given 2005-06

CULTURAL AND SOCIAL ANTHROPOLOGY

CASA 113/213. Women in Islam: The Central Asian Case
   5 units, Win (Kunanbaeva)

CASA 153/253A. Nationalism, Culture, and Identity in Central Asia
   5 units, Spr (Kunanbaeva)

DRAMA

DRAMA 150/250. Chekhov and Before
   4 units, Win (Arad)

DRAMA 151/251. Adaptation: Turning into Drama
   4 units, Spr (Arad)

ECONOMICS

ECON 120. Socialist Economies in Transition
   5 units, Spr (Gathmann)

HISTORY

HISTORY 19S. Sables, Shamans, Salvation, and Civilization: Changing Meanings of Siberia
   5 units, Aut (Monahan)

HISTORY 20. Introduction to Modern Russian History
   5 units, Spr (Weiner)

HISTORY 20N. Early Modern European Views of Eastern Europe and Russia
   5 units, Spr (Kollmann)

HISTORY 20S. The Soviet Citizen on Trial
   5 units, Aut (Moyal)

HISTORY 102. The History of the International System
   5 units, Spr (Sheehan)

HISTORY 120A. Russia, 988-1762
   4-5 units, Aut (N. Kollmann)
HISTORY 120B. History of Imperial Russia
5 units, Win (Crews)

HISTORY 125/325A. 20th-Century Eastern Europe
5 units, Win (Jolluck)

HISTORY 204E. Modernity, Revolution, and Totalitarianism
5 units, Spr (Weiner)

HISTORY 204G. War, Culture, and Society in the Modern Age
5 units, Win (Weiner)

HISTORY 220G. Demons, Witches, and Priests: Religion and Popular Culture in Russia
5 units, Aut (J. Kollmann)

HISTORY 221B. The Woman Question in Modern Russia
5 units, Win (Jolluck)

HISTORY 222. Honor, Law and Modernity
5 units, Win (N. Kollmann)

HISTORY 224/324. Violence, Islam, and the State in Central Asia
5 units, Aut (Crews)

HISTORY 226F. Stalinism in Eastern Europe
5 units, Spr (Fidelis)

HISTORY 227/327. East European Women and War in the 20th Century
5 units, Aut (Jolluck)

HISTORY 229/329. Poles and Jews
5 units, Spr (Jolluck)

HISTORY 299X/399A. Design and Methodology for International Field Research
1 unit, Win (N. Kollmann, Roberts)

HISTORY 321B. Imperial Russian Historiography
5 units (Crews) not given 2005-06

HISTORY 323B. Research Methodologies in Early Modern Russian History
5 units, Aut (N. Kollmann)

HISTORY 424A,B. Soviet Civilization—(Formerly 419.)
4-5 units, A: Win, B: Spr (Weiner)

INTERNATIONAL POLICY STUDIES
IPS 266. Russia and Islam
5 units, Win (Dunlop)

LANGUAGE CENTER
For courses in Russian, Eastern European, and Eurasian language instruction with the subject code SLAVLANG or SPECLANG, see the “Language Center” section of this bulletin.

MUSIC
MUSIC 9A. Tchaikovsky, Stravinsky, Shostakovich, and Beyond: A History of Russian Music
3 units, Spr (Zemtsovsky)

POLITICAL SCIENCE
POLISCI 114D. Democracy, Development, and the Rule of Law—(Same as INTNLREL 114D.)
5 units, Aut (Stoner-Weiss)

5 units, Win (Sagan, Blacker, Perry)

POLISCI 141R/340T. Russian Politics
5 units, Aut (Dakin)

POLISCI 340S. Political Economy of Post-Communism
5 units, Win (Stoner-Weiss)

POLISCI 340U. Politics of Identity in Eastern Europe
5 units, Win (Kulyk)

POLISCI 341T. Comparative Democratization and Regime Change
5 units, Spr (Karl)

SLAVIC GENERAL
SLAVGEN 13N. Russia, Russian, Russians
3-4 units, Win (Schupbach)

SLAVGEN 77Q. Russia’s Weird Classic: Nikolai Gogol
3 units, Aut (Fleishman)

SLAVGEN 123/223. The Yiddish Novel
3-4 units, Spr (Glaser)

SLAVGEN 135/235. The Literatures of Ukraine: The Modern Period
3-4 units, Aut (Glaser)

SLAVGEN 145/245. The Age of Experiment, 1820-50
3-4 units, Aut (Fleishman)

SLAVGEN 146/246. The Age of Transgression: The Great Russian Novel
4 units, Win (Safran)

SLAVGEN 147/247. The Age of War and Revolution: A Survey of Russian Literature and Culture, 1900-1950s
4 units, Spr (Graham)

SLAVGEN 151/251. Dostoevsky and His Times
4 units, Win (Frank)

SLAVGEN 155/255. Anton Chekhov and the Turn of the Century
4 units, Spr (Safran)

SLAVGEN 163/263. Gender in Postwar Russian Culture
4 units, Aut (Graham)

SLAVGEN 197B. Camera as Witness: International Human Rights Documentaries—(Same as HUMNTIES 197B, INTNLREL 141B.)
5 units, Aut (Bojic)

SLAVGEN 197C. Camera as Witness: International Human Rights Documentaries—(Same as HUMNTIES 197C, INTNLREL 141C.)
5 units, Spr (Bojic)

SLAVIC LITERATURE
SLAVLIT 129/229. Poetry as System: Introduction to Theory and Practice of Russian Verse
4 units (Fleishman) not given 2005-06

SLAVLIT 184/284. History of the Russian Literary Language
3-4 units, Win (Schupbach)

SLAVLIT 188/288. From Alexander Blok to Joseph Brodsky: Russian Poetry of the 20th Century
3-4 units, Aut (Fleishman)

SLAVLIT 200. Proseminar in Literary Theory and Study of Russian Literature
4 units, Aut (Freidin)

SLAVLIT 200A. Introduction to Library and Archival Research in Slavic Studies
2-3 units, Aut (Fleishman)

SLAVLIT 203. Academic Russian
3 units, Aut (Golburt)

SLAVLIT 271. Poema: Russia’s Long Narrative Poem
3-4 units, Spr (Fleishman)

SLAVLIT 272. Osip Mandelstam and the Modernist Paradigm
2-4 units, Win (Freidin)
SCIENCE, TECHNOLOGY, AND SOCIETY

Emeriti: James Adams (Management Science and Engineering, Mechanical Engineering), Alex Inkeles (Sociology), Walter Vincenti (Aeronautics and Astronautics)

Director: Robert McGinn (Management Science and Engineering; Science, Technology, and Society)

Program Committee: Stephen Barley (Management Science and Engineering), Ursula K. Heise (English), Brad Osgood (Electrical Engineering), Eric Roberts (Computer Science), Scott Sagan (Political Science), Fred Turner (Communication)

Lecturers: Henry Lowood, Sonja Schmid, Rebecca Slayton

Affiliated Faculty and Staff: Stephen Barley (Management Science and Engineering), Barton Bernstein (History), Scott Bukatman (Art and Art History), Thomas Byers (Management Science and Engineering), Joseph Corn (History), Jean-Pierre Dupuy (French), Paula Findlen (History), David Freyberg (Civil and Environmental Engineering), Ursula K. Heise (English), Sarah Jain (Cultural and Social Anthropology, on leave), Joseph Manning (Classics), Gilbert Masters (Civil and Environmental Engineering), Brad Osgood (Electrical Engineering), Jessica Riskin (History, on leave), Eric Roberts (Computer Science), Nathan Rosenberg (Economics), Scott Sagan (Political Science), Michael Shanks (Classics, Cultural and Social Anthropology), Paul Turner (Art and Art History), Gavin Wright (Economics)

Mail Code: 94305-2120
Phone: (650) 723-2565
Web Site: http://sts.stanford.edu

Courses given in Science, Technology, and Society have the subject code STS. For a complete list of subject codes, see Appendix.

Technology and science are activities of central importance in contemporary life, intimately bound up with society’s evolving character, problems, and potentials. If scientific and technological pursuits are to further enhance human well-being, they and their effects on society and the individual must be better understood by non-technical professionals and ordinary citizens as well as by engineers and scientists. Issues of professional ethics and social responsibility confront technical practitioners. At the same time, lawyers, public officials, civil servants, and business people are increasingly called upon to make decisions requiring a basic understanding of science and technology and their ethical, social, and environmental consequences. Ordinary citizens, moreover, are being asked with increasing frequency to pass judgment on controversial matters of public policy related to science and technology. These circumstances require education befitting the complex sociotechnical character of the contemporary era.

Science, Technology, and Society (STS) is an interdisciplinary program devoted to understanding the nature, consequences, and shaping of technological and scientific activities in modern and contemporary societies. Achieving this understanding requires critical analysis of the interplay of science and technology with human values and world views, political and economic forces, and cultural and environmental factors. Hence, students in STS courses study science and technology in society from a variety of perspectives in the humanities and social sciences. To provide a basic understanding of technology and science, STS majors are also required to achieve either literacy (B.A.) or a solid grasp of fundamentals (B.S.) in some area of engineering or science.

GENERAL INFORMATION

Selected STS courses may be used, individually or in groups, for various purposes:
1. To satisfy University General Education Requirements
2. To satisfy the Technology in Society Requirement of the School of Engineering
3. To comprise parts of student-designed concentrations required for majors in fields such as Human Biology and Public Policy
4. To satisfy the requirements of the STS Honors Program complementing any major (see below)
5. To satisfy requirements for the minor in STS (see below)
6. To satisfy requirements for a minor in STS (see below)

STS courses are particularly valuable for undergraduates planning further study in graduate professional schools (for example, in business, education, engineering, law, journalism, or medicine) and for students wishing to relate the specialized knowledge of their major fields to broad technology and science-related aspects of modern society and culture.

The STS Program is a unit of the Center for the Interdisciplinary Study of Science and Technology (CISST). For further information about CISST see the “Academic Centers” section of this bulletin.

UNDERGRADUATE PROGRAMS

Degree programs in STS are interdisciplinary curricula devoted to understanding the nature and significance of technology and science in modern society. Majors analyze phenomena of science and technology in society from ethical, aesthetic, historical, economic, and sociological perspectives. In addition, students pursuing the B.A. degree study a technical field in sufficient depth to obtain a grasp of basic concepts and methods, and complete a structured concentration on a theme, issue, problem, or area of personal interest related to science and technology in society. Those seeking the B.S. degree complete at least 50 structured units in technology, science, and mathematics. The particular technical courses chosen reflect the student’s special interest in science and technology in society. Specific requirements for the bachelor’s degree in STS are as follows:

BACHELOR OF ARTS

1. STS Core (eight courses):
   a) Interdisciplinary Foundational course: STS 101 or 101Q
   b) Disciplinary Analyses (five courses with at least one in each category):
      1) philosophical/ethical perspectives: STS 110, 112, 114, 116, 118
      2) historical perspectives: STS 102, 120, 122, 123A, 124, 126, 128, 130, 134
      3) social science perspectives: STS 138, 152, 162, 169, 171, 172
   c) Advanced courses (one course in each category):
      1) disciplinary analysis: STS 207, 210, 211, 212, 215, 217, 218, 219, 221, 229, 231
   2) senior colloquium: STS 200

2. Technical Literacy (five courses):
   a) CS 105 or 106A or equivalent; and
   b) A four-course sequence (minimum of 12 units) in one field of engineering or science (sample sequences available in the STS office); or
   c) Four of the following Engineering Fundamentals courses: Engineering 10, 14, 15, 20, 25, 30, 40, 50, 60, 62, 70A (see course descriptions in the “School of Engineering” section of this bulletin).

3. Thematic Concentration (minimum of 20 units, at least five courses, one each from among those designated on the appropriate concentration course list as foundational and advanced). Thematic concentrations are organized around an STS-related problem or area. The following thematic concentration topics have been pre-certified: the intersections of technology and science with aesthetics, development, history and philosophy, information and society, public policy, social change, and work and organizations.

Course lists for these concentration topics are available in the STS office. A student selecting one of the certified topics may include one or more courses not on the corresponding course list if they are germane to
the concentration and meet the student’s special interests. Alternatively, the student may choose to design a thematic concentration topic and course package subject to program approval. Each thematic concentration, certified or self-designed, requires the signature of an appropriate faculty adviser. See the program director for details.

**BACHELOR OF SCIENCE**

The student pursuing the B.S. degree shall complete the STS Core and a structured package of at least 50 units of technical courses intended to enable students to understand socially significant technical phenomena in some field of engineering or science. Introductory courses in mathematics or physics (for example, MATH 19 or PHYSICS 19) are not normally counted as parts of this technical depth component.

The B.S. candidate follows one of two models in fulfilling the minimum 50-unit technical depth requirement:

1. **Focused Depth:** at least seven courses amounting to at least 25 units in a single field of science or engineering, with the remaining units (except for at most two stand-alone courses) grouped in sequences of at least three courses each in other fields of science or engineering. For example, a Focused Depth package might contain eight mechanical engineering, three physics, three mathematics, and three computer science courses, and one course each in electrical engineering and chemistry. At least four of the seven courses in the focused depth area must be advanced, that is, not normally taken in the first year of study in that field.

2. **Clustered Depth:** two or more clusters of at least five courses and 15 units each in different fields of science or engineering, with at most two stand-alone courses, and remaining courses, if any, in sequences of three or more courses. For example, a Clustered Depth package might contain five-course clusters in computer science, electrical engineering, and physics, three courses in civil engineering, and one course each in biology and chemical engineering. At least two courses in each cluster area must be advanced.

It is recommended that B.S. majors complete CS 106A or equivalent.

**MINORS**

Students planning careers in many technical and non-technical fields, including business, education, engineering, science, law, medicine, and public affairs, are faced with important STS issues in their professional practice. Therefore, a minor in STS is likely to prove practically valuable as well as intellectually stimulating.

**Requirements** — The STS minor requires successful completion of six courses satisfying the following four requirements:

1. **Foundational Course:** STS 101 or 101Q
2. One disciplinary analysis course from each of the following three categories:
   a) Philosophical/Ethical Perspectives: STS 110, 112, 114, 115, 116, 117, 118, 119
   b) Historical Perspectives: STS 102, 120, 122, 123A, 124, 126, 128, 130, 134
   c) Social Science Perspectives: STS 138, 152, 162, 169, 171, 172
3. Two advanced courses, from one or two of the following categories, building on courses taken under requirements 1 and 2:
   a) Philosophical/Ethical Perspectives: STS 207, 210, 211, 212, 215, 217
   b) Historical Perspectives: STS 130, 134, 221, 229
   c) Social Science Perspectives: STS 207, 218, 219, 231, 279
4. At least one of the courses taken under requirements 1 to 3 should incorporate a weekly, small group discussion.
5. With at most one exception, all courses taken to satisfy STS minor requirement must be taken for a letter grade where available. The exception cannot be STS 101 or 101Q.

**Note** — Students wishing to use a course not listed above to satisfy one of the requirements for a minor in STS may petition to do so. For details, inquire at the STS office, Building 370, Room 109.

**HONORS PROGRAM**

STS offers a limited number of students an opportunity to achieve honors through in-depth study of the interaction of science and technology with society. The honors program is open to students majoring in any field (including STS). Students accepted for this program carry out an honors project, the work for which normally begins in Spring Quarter of the junior year and is completed by mid-May of the senior year. Students who want their theses to be considered for the Firestone Prize must submit them to STS by May 20, 2006; all theses must be submitted to STS by June 1, 2006. STS thesis projects usually entail writing an honors essay, although occasionally students have chosen to produce a technical artifact or carry out some other work that itself represents original thinking. When a project results in a work other than an essay, students must also submit an accompanying scholarly exegesis of the work in question.

**ADMISSION**

Application for admission to the STS honors program is typically made during the last quarter of the student’s junior year. By the eighth week of that quarter, interested students must have completed, or be completing that quarter, at least two of the four courses required to satisfy honors requirements 1 to 4 listed below. Each applicant must also have submitted a formal proposal for her or his project to the STS Honors Committee, including the name of the primary thesis adviser. For proposal parameters, see the document *Honors in STS*, available in the STS office. Students whose proposals are approved are encouraged to apply to attend Honors College in early September to get a running start on their theses. STS honors students are also encouraged to sign up for 1-5 units of credit per quarter in STS 195A,B,C for work on the honors project. While not required, doing so leaves the student sufficient time to finish the thesis in three quarters. Writing a senior honors thesis while simultaneously carrying a full academic load each quarter is a very difficult task to complete with distinction. STS majors pursuing honors in STS or another honors program take STS 200 for 2 units instead of 4 and do not write a research paper for this required course. However, failure to complete the thesis requires additional research work in STS 200. (Note: under exceptional circumstances, a student may be admitted to the STS honors program early in the first quarter of his or her senior year.)

**REQUIREMENTS**

For non-STS Majors

1. Foundational Course: STS 101 or 101Q
2. One Philosophical/Ethical Perspectives course: STS 110, 112, 114 115, 116, 117, 118, 210, 211, 212, 215
3. One Historical Perspectives course: STS 102, 120, 122, 123A, 124, 126, 128, 130, 134, 221, 229
5. Honors Project: an original critical essay (or investigative project with accompanying explanatory essay) on an STS topic of general importance (up to 12 units may be taken while working on the thesis). Past honors projects are on file in the STS office library.

For STS majors

1. Completion of STS core.
2. Requirement 5 above.

To earn honors, the project must receive a grade of at least ‘B’ on the completed thesis. The student not majoring in STS must also achieve a grade point average (GPA) of at least 3.3 in the courses taken to satisfy requirements 1 to 4 above. In the case of STS majors, the student must compile a GPA of at least 3.3 in the entire STS core. If all these requirements are met, the designation “Honors Program in Science, Technology, and Society” is affixed to the student’s permanent record and appears in the commencement program.
COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

See http://sts.stanford.edu for updated course scheduling information, course syllabi, faculty and staff information, and information about how to declare a major or a minor in STS.

INTRODUCTORY

STS 101. Science, Technology, and Contemporary Society — (Graduate students register for 201; same as ENGR 130.) Key social, cultural, and values issues raised by contemporary scientific and technological developments; distinctive features of science and engineering as sociotechnical activities; major influences of scientific and technological developments on 20th-century society, including transformations and problems of work, leisure, human values, the fine arts, and international relations; ethical conflicts in scientific and engineering practice; and the social shaping and management of contemporary science and technology. GER:DB-SocSci
4-5 units, Aut (McGinn)

STS 101Q. Technology in Contemporary Society — Stanford Introductory Seminar. Preference to sophomores. Introduction to the STS field. The nature of science and technology and their relationship, what is most distinctive about these forces today, and how they have transformed and been affected by contemporary society. Social, cultural, and ethical issues raised by recent scientific and technological developments. Case studies from areas such as information technology and biotechnology, with emphasis on the contemporary U.S. Unexpected influences of science and technology on contemporary society and how social forces shape scientific and technological enterprises and their products. Enrollment limited to 12. GER:DB-SocSci
4 units, Aut (McGinn)

STS 102. Science, Technology, and Art: The Worlds of Leonardo— (Graduate students register for 202; same as HISTORY 31.) The intersections among science, technology, and society, and an interdisciplinary introduction to Renaissance studies. Why does this 15th-century artist, engineer, and inventor continue to fascinate and inspire innovative, interdisciplinary work? The world of the historical Leonardo, looking at his range of interests and accomplishments (including Mona Lisa, human anatomies, flying machines), and the culture of invention that shaped him. Students think with Leonardo, reconstructing some of his projects. The persistence of the Renaissance as a touchstone for innovation in the 21st century, examining the myth of Leonardo. GER:DB-Hum
5 units, Win (Findlen)

STS 110. Ethics and Public Policy — (Same as MS&E 197, PUBLPOL 103B.) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, WIM
5 units, Win (McGinn)

STS 112. Ten Things: Science, Technology, and Design — (Same as CLASSTRT 113/213.) Connections among science, technology, society and culture by examining the design of a prehistoric hand axe, Egyptian pyramid, ancient Greek perfume jar, medieval castle, Wedgwood teapot, Edison’s electric light bulb, computer mouse, Sony Walkman, supersonic aircraft, and BMW Mini. Interdisciplinary perspectives include archaeology, cultural anthropology, science studies, history and sociology of technology, cognitive science, and evolutionary psychology.
4-5 units, Win (Shanks)

STS 114. Technology, Ecology, and the Imagination of the Future — Seminar. Literary visions of the future from the 60s to the present. How such texts imagine new and existing technologies in interrelation with the evolution of natural ecosystems. The development of wild habitats, alterations of the human body, and visions of the future city. The role of images and stories about globalization. Literary, scientific, and technical texts. GER:DB-Hum
5 units (Heise) not given 2005-06

STS 115. Ethical Issues in Engineering — (Same as ENGR 131.) Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; the ethics of whistle blowing; ethical conflicts of engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations; ethical issues arising from engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies, guest practitioners, and field research. Limited enrollment. GER:DB-Hum
4 units (McGinn) alternate years, given 2006-07

STS 116. Philosophy and the Scientific Revolution — (Enroll in HPS 61, PHIL 61.)
5 units, Aut (Friedman)

STS 118. The Invention of Modern Architecture — (Enroll in ARTHIST 141/341.)
4 units, Aut (Turner)

STS 120. Science and Technology in Ancient Egyptian Society — (Same as CLASSHIS 131.) From 3000 B.C.E. to the Roman period. What was the source of technological change and innovation in Egypt? Why is the ancient Egyptian legacy important for later developments? What was the balance between changes internal and external to Egypt? Topics: ancient texts concerned with science, technology, mathematics, astronomy, medicine; Egyptian material culture and building techniques; the economic role of technology; Alexandrian science and its legacy.
4 units (Manning) not given 2005-06

STS 122. American Spaces: An Introduction to Material Culture and the Built Environment — (Enroll in HISTORY 164, AMSTUD 152.)
5 units, Spr (Corn)

STS 123A. The Scientific Revolution — (Enroll in HISTORY 232F/332F.)
5 units, Win (Findlen)

STS 124. American Economic History — (Enroll in ECON 116.)
5 units, Spr (Wright)

STS 126. The Prehistory of Computers — (Enroll in HISTORY 241J/341J.)
3-5 units (Riskin) not given 2005-06

STS 128. Science and Technology in WW II and What Happened Afterward — (Same as EE 45.) The efforts of engineers, mathematicians, and scientists during WWII. The effect on the postwar world in areas such as information, communication, transportation, materials, and medicine. Science and engineering in the war effort, and what became of them after the war, drawn from: encryption and computation; radar, communication, and electronics; control and optimization; materials; drugs and medicine. GER:DB-EngrAppSci
3 units (Osgood) not given 2005-06

STS 130. Origins and History of the Scientific Fact — (Enroll in HISTORY 241F/341F.)
5 units (Riskin) not given 2005-06

STS 134. History of the Senses — (Same as HISTORY 241G/341G.)
Technological, medical, philosophical, and scientific history of the five senses, drawing upon readings from antiquity to the present. How physiologists and philosophers have explained the functioning of the senses; how doctors have tampered with them both to help and to hinder; and how technologies including medical devices, scientific instruments, and tools of the arts have continually transformed the nature and experience of sensation. GER:DB-SocSci
5 units (Riskin) not given 2005-06
  5 units, Win (Sagan, Blacker, Perry)

STS 145. History of Computer Game Design: Technology, Culture, and Business—Historical contexts include entertainment media, computing technology, applications of gaming technology, and business history. Topics: play in human culture, early computer games from chess to space war, the role of artificial intelligence research, the history of computer graphics and sound technology, the evolution of techniques and genres of computer game design, video game machines, games and the microcomputer revolution, networked gaming, gadgets and games as factors in the evolution of software and hardware, marketing, gendering of games and game play, virtual worlds, simulation, video and computer game industries, and technology transfer such as military simulations. Enrollment limited to 90.
  4 units (Lowood) not given 2005-06

STS 152. Digital Media in Society—(Enroll in COMM 120/220.)
  4-5 units, Spr (Turner)

STS 162. Computers and Interfaces—(Enroll in COMM 169/269.)
  4-5 units, Win (Nass)

STS 163. Risk in Contemporary Culture—How people perceive, assess, and handle risks. Concepts such as risk, uncertainty, probability, and safety. Approaches to risk assessment, management, and communication. Relationship between scientific experts and the public. Relationship of science to state agencies in the context of regulatory decision making for high risk technologies.
  4 units, Spr (Schmid)

  4 units, Spr (Slayton)

STS 169. History of Nuclear Weapons—(Enroll in HISTORY 103E, POLSCI 116.)
  5 units (Holloway) not given 2005-06

STS 170. Technology in Modern Security Discourse—Technology’s central role in discussions of international security issues including nuclear proliferation or containment, ballistic missiles or anti-missiles, biological weapons or vaccines, and data mining or computer security. What uses can and should technology serve in diplomacy? Why are some weapons stigmatized while others are deemed acceptable? How does discourse itself become a weapon? The history of the technologies and the discourses about them.
  4 units, Aut (Slayton)

STS 171. Technology and National Security—(Enroll in MS&E 193/293.)
  3 units, Aut (Perry, Paté-Cornell)

STS 172. Issues in Technology and Work for a Post-Industrial Economy—(Enroll in MS&E 181.)
  3 units, Spr (Barley)

STS 173. High Technology Entrepreneurship—(Enroll in ENGR 145.)
  4 units, Win (Byers, Komisar)

STS 184. Technology Policy—(Enroll in PUBLPOL 194.)
  5 units, Win (Windham)

STS 190. Honors Seminar—For juniors intending to pursue honors in STS or a related discipline. Goal is to identify a research problem and identify key components of honors research and thesis writing such as literature reviews, methodologies, theoretical frameworks, and writing standards.
  4 units, Win (Slayton)

STS 195A,B,C. Honors Project—For students in STS honors program. 195A for submission of proposal; 195B for continued study and writing; 195C for final work on project.
  1-5 units, Aut, Win, Spr (Staff)

STS 199. Individual Work
  1-5 units, Aut, Win, Spr (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

STS 200. Senior Colloquium—Key analytical and theoretical texts treating the natures and interplay of science, technology, and society. Only STS majors writing senior honors theses may take for 2 units. Prerequisite: STS major with senior standing and four STS core courses, or consent of instructor.
  2-4 units, Win (Roberts), Spr (Heise)

STS 201. Science, Technology, and Contemporary Society—(Same as 101, ENGR 130; see 101.)
  4-5 units, Aut (McGinn)

  5 units, Win (Findlen)

STS 207. Science, Technology, and Economic Growth—(Enroll in INTNLREL 205.)
  3-5 units, Aut (Ptak)

STS 210. Ethics, Science, and Technology—Ethical issues raised by advances in science and technology. Topics: biotechnology including agriculture and reproduction, the built environment, energy technologies, and information technology. Prerequisite: 110 or another course in ethics. Limited enrollment. GER:DB-Hum
  4 units, Spr (McGinn) alternate years, not given 2006-07

STS 211. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S.—(Enroll in FRENGEN 258E.)
  3-5 units, Spr (Dupuy)

STS 212. Ethics, Technology, and International Relations—(Enroll in INTNLREL 205.)
  5 units, Spr (McGinn)

STS 215. Computers, Ethics, and Social Responsibility—(Enroll in CS 201.)
  3-4 units, Spr (Johnson)

STS 217. Good Products, Bad Products—(Enroll in ME 314.)
  3-4 units, Win (Beach)

STS 218. The Role of the University in the Knowledge Economy—The industrial world has come to consist of knowledge economies; economic performance has come to depend upon the ability to advance knowledge in science and technology. University research activities are sources of commercial advantage. Many universities routinely take out patents, some of which are highly profitable. The historical forces and the social and economic policy implications behind the new economic importance of universities. Emphasis is on Stanford’s role in Silicon Valley.
  3 units (Rosenberg) not given 2005-06

STS 219. Management and Organization of Research and Development—(Enroll in MS&E 281.)
  3 units (Barley) not given 2005-06

STS 221. The Politics and Ethics of Modern Science and Technology—(Same as HISTORY 257.) The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university. GER:DB-Hum
  5 units (Bernstein) not given 2005-06
SLAVIC LANGUAGES AND LITERATURES

Emertii: (Professors) Joseph Frank, Joseph A. Van Campen
Chair: Gabriella Safran
Professors: Lazar Fleishman, Gregory Freidin, Richard D. Schupbach
Associate Professors: Monika Greenleaf, Gabriella Safran
Senior Lecturer: Rima Greenhill
Director of Graduate Studies: Lazar Fleishman
Director of Undergraduate Studies: Gregory Freidin

* Recalled to active duty.

Department Offices: Building 40, Room 41C
Mail Code: 94305-2006
Phone: (650) 723-4438
Email: slavic@stanford.edu
Web Site: http://slavic.stanford.edu

Courses given in Slavic Languages and Literatures have the subject code SLAVGEN, SLAVLANG, and SLAVLIT. For a complete list of subject codes, see Appendix.

The department accepts candidates for the degree of Bachelor of Arts, Master of Arts, and Doctor of Philosophy. Particular requirements for each degree are described below.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Department of Slavic Languages and Literatures (Slavic) offers three tracks for undergraduate majors: Russian Language and Literature; Russian Language, Culture, and History; and Russian and Philosophy.

Writing in the Major — Undergraduates are required by the University to pass at least one writing-intensive course in their field of concentration in order to graduate. Majors in any Slavic track may satisfy the writing requirement by passing SLAVGEN 146.

RUSSIAN LANGUAGE AND LITERATURE

The track in Russian Language and Literature is designed for those students who desire to gain a firm command of the Russian language and to study the nation’s literary tradition. Emphasis is placed on the linguistic and philological study of literature, as well as the history of Russian literature and related media in the broader context of Russian culture. Students may explore historically related literary traditions (for example, English, French, German), as well as other related fields. The Russian Language and Literature track also welcomes students with an interest in Russian and Slavic linguistics.

Prerequisites — Successful completion of SLAVLANG 51, 52, 53, or the equivalent, as determined by the results of the department placement examination.

REQUIREMENTS

Candidates for the B.A. degree with a track in Russian Language and Literature must complete an additional 52 units according to the following distribution:

Russian Literature — The 20-unit core literature sequence consisting of: SLAVGEN 145, 146, 147 or 148; SLAVLIT 187, 188.

Electives — Students must take 20 units of electives embracing at least two of the following categories: (1) Russian language or linguistics; (2) Russian literature; and (3) historically related literatures. These courses are selected in consultation with the undergraduate director. With department permission, work in related academic fields may be applied toward the degree requirements. Students who have completed IHUM 28A,B, Poetic Justice: Order and Imagination in Russian Culture, with a grade
‘B’ or better may count these 10 units towards elective courses required for the major in Russian Languages and Literature or the major in Russian Language, Culture, and History.

 Majors who concentrate in Russian Language and Literature must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major.

**RUSSIAN LANGUAGE, CULTURE, AND HISTORY**

The track in Russian Language, Culture, and History is for students who would like to obtain a firm command of the Russian language and to pursue a broad, interdisciplinary study of Russian literature, other expressive media (including film), as well as cultural traditions and institutions. Emphasis is placed on the relation of the Russian literary tradition to disciplines that have enriched the historical understanding of Russian literature: primarily history, but also anthropology, communications, political science, and sociology.

**Prerequisites** — Successful completion of the following or the equivalent as determined by the results of the department placement examination:

SLAVLANG 51, 52, 53. Second-Year Russian

**REQUIREMENTS**

Candidates for the B.A. degree with a concentration in Russian Language, Culture, and History must complete an additional 52 units according to the following distribution.

**Russian Language** — A minimum of 12 units from the following:

- SLAVLANG 111, 112, 113. Third-Year Russian
- SLAVLANG 177, 178, 179. Fourth-Year Russian
- SLAVLANG 181, 182, 183. Fifth-Year Russian

**Prerequisites:**

**19th-Century Russian Literature and History** — A minimum of 8 units chosen from the following courses or the equivalent; students must choose one course from Slavic and one course from History.

SLAVGEN 145, 146

**HISTORY 120B**

**20th-Century Russian Literature and History** — A minimum of 8 units chosen from the following or the equivalent; students must choose one course from Slavic and one course from History.

SLAVGEN 147 or 148

**HISTORY 120C**

**Electives** — In order to complete the basic degree requirements, students must take 24 additional units of course work embracing at least two of the following categories: (1) Russian language; (2) Russian literature; and (3) Russian history. These courses are selected in consultation with the undergraduate director. With department permission, work in related academic fields (for example, anthropology, communications, political science, religion, sociology) may apply toward the degree requirements.

Majors with a concentration in Russian Language, Culture, and History must earn a GPA of 2.0 (C) or better in order to receive credit toward the major.

**RUSSIAN AND PHILOSOPHY**

The track in Russian and Philosophy offers students the opportunity to gain a command of the Russian language and literary tradition, while gaining a background in philosophical thought, broadly construed. They take courses alongside students in other departments participating in the program in Philosophical and Literary Thought, with administrative staff in the DLCL.

**Prerequisites** — Completion of SLAVLANG 51, 52, 53, or the equivalent as determined by the results of the department placement examination.

**REQUIREMENTS**

Candidates for the B.A. degree with a concentration in Russian and Philosophy must complete an additional 67 units according to the following distribution:

**Russian Language** — A minimum of 12 units selected from the following: SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183.

**Russian Literature** — A minimum of 16 units of Russian literature, including the following:

1. SLAVGEN 145 and 146
2. SLAVGEN 147 or 148
3. SLAVLIT 187 or 188

**Electives** — At least 12 units of electives in Russian language and literature, selected in consultation with the undergraduate director.

**Philosophy and Literature Gateway Course** (4 units): FRENGEN 181 (same as PHIL 81)

**Philosophy Writing in Major** (5 units): PHIL 80; prerequisite: introductory philosophy course.

**Philosophy Core** — 12 units, including the following:

1. Value Theory: a course in the PHIL 170 series
2. Theories of Mind, Language, Action: a course in the PHIL 180 series
3. History of Philosophy: a course from the PHIL 100-139 series

**Related Course** — An upper-division course of special relevance to philosophy and literature. A list of approved courses is available from the program director.

**Capstone Seminar** — To be taken in the senior year, and selected from a list of seminars approved by the director of the program in philosophical and literary thought.

Majors who concentrate in Russian and Philosophy must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major. Courses in other departments may not, in general, be counted toward the Russian language, Russian literature, and elective requirements, but may be counted toward the other requirements.

**MINORS**

The Department of Slavic Languages and Literatures offers three undergraduate minor programs in Russian Language, Literature, and Culture.

The minor program is designed for students who, while pursuing a major in another program, seek a comprehensive introduction to Russian culture, whether primarily through (1) Russian language courses; or (2) a combination of minimal proficiency in Russian and courses in the history of Russian culture; or (3) courses on Russian literature in translation and, depending on the student’s interest, other forms of the country’s cultural expression and social institutions. Students seeking a Slavic minor are particularly encouraged to take advantage of Stanford’s Overseas Studies Program in Moscow. Students who have chosen one of the minor programs in Russian may use 5 units of IHUM credit towards their electives.

**RUSSIAN LANGUAGE**

**Prerequisites** — The minor track in Russian Language requires the successful completion of SLAVLANG 1, 2, 3, First-Year Russian, and SLAVLANG 51, 52, 53, Second-Year Russian, or a demonstrated equivalent competence as determined by the departmental Russian language placement examination.

**Requirements** — Candidates for the B.A. degree with a minor track in Russian Language must complete 24 units of Russian language and literature courses according to the following distribution: 12 to 15 units selected from SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183. The remaining 9 to 12 units should be selected from SLAVGEN 145, 146, 147, 148, SLAVLIT 187, 188, other monograph courses offered by the department, or, with the approval of the department’s undergraduate adviser, in history, politics, linguistics, or other relevant programs.

**RUSSIAN LANGUAGE, LITERATURE, AND CULTURE**

**Prerequisites** — The minor track in Russian Language, Literature, and Culture requires the completion of SLAVLANG 1A, 2B, 3C, First-Year Russian, or the equivalent as determined by the departmental Russian language placement examination.

**Requirements** — Candidates for the B.A. degree with the minor track in Russian Language, Literature, and Culture must complete 28 units according to the following distribution:
1. A minimum of 16 units of courses on literature and culture selected from the following Slavic Languages and Literatures courses: two quarters in the SLAVGEN 145, 146, 147, 148 sequence, Russian Literature in English Translation, or one quarter in the SLAVGEN 145, 146, 147, 148 sequence and one quarter in the SLAVLIT 187, 188 sequence, Russian Poetry (prerequisite: second-year Russian); and at least one monograph course focusing on a single writer.

2. 12 units of elective courses either in the Department of Slavic Languages and Literatures or, with the approval of the Slavic department’s undergraduate adviser, in History, Linguistics, Political Science, or other relevant programs.

RUSSIAN CULTURE
Candidates for the B.A. degree with the minor track in Russian Culture must complete 36 units according to the following distribution: a minimum of 20 units of courses on literature and culture selected from the following Slavic Languages and Literatures courses: three quarters in the SLAVGEN 145, 146, 147, 148 sequence, Russian Literature in English Translation, and two monograph courses focusing on a single writer. In addition, one course in Russian history is selected from HISTORY 120B or 120C. No knowledge of Russian is required.

Electives — 11 units of elective courses either in the Department of Slavic Languages and Literatures or, with the approval of the Slavic department’s undergraduate adviser, in Art, History, Linguistics, Political Science, or other relevant programs.

The deadline for minor declarations in all tracks is no later than the last day of the third quarter before degree conferral.

HONORS PROGRAM
Students in any track with a grade point average (GPA) of 3.3 (B+) or better in their major courses are eligible to participate in the department’s honors program. Prospective honors students may enroll for 2 units of credit in SLAVLIT 199 in Spring Quarter of the junior year to conduct preliminary research and draft an honors proposal. In addition to the program requirements above, students must also complete the following:

1. Majors in any track who propose a senior project in literature must take a course in literary or cultural theory; this requirement may be fulfilled by enrollment in DLCL 189 or in an advanced course related to the area of the student’s expected research. Students concentrating in Russian Language, Culture, and History and pursuing a project in cultural history must take a course in literary or cultural theory, a graduate seminar in the area of their topic, or DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. DLCL 189 is taken in Autumn Quarter of the senior year. Students concentrating in Russian Language and Literature who propose a senior project in Russian language select their course in consultation with the undergraduate director.

2. SLAVLIT 199, taken for 5 units of credit while composing the thesis during Winter Quarter. To qualify for honors, the candidate must receive a grade of ‘B’ or better on the thesis or project completed during this period. A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis.

SLAVIC THEME HOUSE
Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence that offers a wide variety of opportunities to expand one’s knowledge, understanding, and appreciation of Russian and Eastern Europe.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM
The department allows a limited number of undergraduates to work for coterminal B.A. and M.A. degrees in Slavic Languages and Literatures with a concentration on Russian. In addition to University requirements for the B.A. degree, the student must:

1. Submit an application for admission by January 31 of the senior year. Applicants must meet the same general standards as those seeking admission to the M.A. program. Applicants must submit: an application for admission; a written statement of purpose; a transcript; and three letters of recommendation, at least two of which should be from members of the Department of Slavic Languages and Literatures faculty.

2. Meet all requirements for both the B.A. and M.A. degrees. Applicants must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three graduate-level courses.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS
MASTER OF ARTS
University requirements for the M.A. degree are discussed in the “Graduate Degrees” section of this bulletin.

Admission — The requirements for admission to the master’s degree program in Russian are:

1. A B.A. (or its equivalent) from an accredited college or university.
2. A command of the Russian language sufficient to permit the student to do satisfactory graduate work in an area of specialization.
3. A familiarity with Russian literature sufficient to permit the student to perform adequately in courses at the graduate level.

The applicant’s previous academic training in Russian language and literature must normally serve as a tentative indication of competence. Accordingly, the department does not ordinarily consider applications from students who have not had at least three years of college Russian and some undergraduate training in Russian literature of the 19th and 20th centuries.

Before registering for the first quarter’s work in the department, entering graduate students are required to take placement examinations in language and literature. Students who fail to perform satisfactorily on such examinations must register for remedial courses in the areas in which they are deficient. Such remedial courses, normally completed within the first three quarters of residence, carry no credit toward either the M.A. or the Ph.D. degree.

Course Requirements — Candidates for the M.A. who are not also candidates for the Ph.D. should plan course work that ensures adequate preparation for the M.A. final examination at the end of the third quarter of work. Ph.D. candidates should attempt to include as many of the department’s basic course offerings as possible in the first-year program to ensure sufficient time to complete the M.A. thesis during the fifth quarter of registration. In any case, course work should be planned in consultation with the graduate adviser, whose written approval of the overall course load is required.

Candidates for the M.A. must complete a program of 45 units, of which 36 units must be selected from courses given by the department. The other 9 units may, with approval of the candidate’s adviser, be selected from courses in related fields. Of the 36 units in the department, a minimum of 9 may be in language and a minimum of 9 in literature. The remaining 18 units may be distributed in accordance with the needs and interests of the student, and with the advice and approval of the department adviser.

No credit toward the M.A. degree is allowed for first- or second-year courses in non-Slavic languages required for the Ph.D. degree.

The M.A. Thesis — A requirement for candidates for a Ph.D., the M.A. thesis represents a complete article-length research paper (6,900 words) that, in both form and substance, qualifies for submission to English language professional publications in the Slavic field. The M.A. thesis must be submitted to the thesis adviser no later than the fifth quarter and approved no later than the sixth quarter of registration.

Final Examination — Students not enrolled in the Ph.D. program may either submit an M.A. thesis or take a final examination. In the latter case, regardless of the area of specialization, the student must demonstrate in a written examination: (1) command of the phonology, morphology, syntax, and lexicology of contemporary Standard Russian sufficient to teach beginning and intermediate courses at the college level; (2) an ability to
read contemporary Standard Russian sufficient to assist students studying contemporary Russian poetry or literary prose; and (3) sufficient familiarity with Russian literature of either the 19th or 20th century to successfully handle survey courses dealing with a chosen period of specialization.

The examination should be passed at the end of the final quarter of required course work.

**MASTER OF ARTS IN TEACHING**

The degree of Master of Arts in Teaching is offered jointly by the department and the School of Education. It is intended for candidates with a teaching credential or relevant teaching experience who wish to further strengthen their academic preparation. Requirements for the degree are outlined in the “School of Education” section of this bulletin. The program includes 45 units, of which 25 must be in the teaching field and 12 in education. Specific language requirements are established in consultation with the department.

**DOCTOR OF PHILOSOPHY**

University requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin.

Students enrolled in the Ph.D. program in Slavic Languages and Literatures are expected to fulfill the following requirements:

1. **Minor or Related Fields:** during the course of study, students must develop substantial expertise in a field contiguous to the area of specialization. A candidate may elect to present a full minor or, in consultation with the graduate adviser, develop a special program in a related field.
   a) **Related Field:** a student is required to complete a sequence of basic courses (12 units) in a chosen discipline outside the Department of Slavic Languages and Literatures. The choice of patterns is one of the following:
      1) a sequence of three courses in one West European literature, selected in consultation with the adviser, or
      2) three basic courses in comparative literature to be selected in consultation with the graduate adviser and the Department of Comparative Literature.
   b) **Minor:** if the student elects a minor (for example, French, German, Spanish, or Russian history), he or she should take six graduate courses in that department with a minimum of 20 units at the graduate level, according to the minor requirements established by that department. Students considering minors in other departments, such as Asian Languages, English, or Comparative Literature, should consult with the adviser, the Chair of the Department of Slavic Languages and Literatures, and the chair of the minor department. Students who wish to enroll in the Graduate Program in the Humanities should apply there.

2. **Admission to Candidacy:** candidates should read carefully the general regulations governing the degree, as described in the “Graduate Degrees” section of this bulletin. No student is accepted as a candidate until the equivalent of the M.A. degree requirements, including the M.A. thesis described above, are completed. Admission to candidacy is determined early in the sixth quarter of graduate studies. The candidate by that time must have demonstrated commitment to graduate studies by completion of a minimum of 60 quarter units of credit and with a grade point average (GPA) of 3.3 (B+) or better.

3. **Proficiency Test:** administered for all entering graduate students, this test determines whether the student’s knowledge of Russian language and literature falls below the department’s standard. Students who fail to excel in this test are asked to complete appropriate courses in the first year of graduate study.

4. **Course Requirements:** before qualifying for the department oral and written examinations, a Ph.D. candidate is expected to accumulate at least 72 quarter units of credit for courses taken while in graduate school. No less than half of this course work (36 units) must be done in the Department of Slavic Languages and Literatures, including at least 24 units of credit for seminar-level courses. (All entering graduate students are expected to enroll in SLAVLIT 200.) The candidate must submit to the department’s Academic Progress Committee three seminar-level papers completed at the Department of Slavic Languages and Literatures, as well as the M.A. thesis.

5. **Foreign Languages:** a candidate must demonstrate reading knowledge of French or German, plus another language useful for the student’s area of concentration, by passing written examinations.

6. **Examinations:** a candidate must pass the departmental general qualifying examinations. The written part covers:
   a) the history and structure of the Russian language and its relationship to the other Slavic languages. (Students are excused from this portion of the examination if they have completed SLAVLIT 211 and 212 with a grade point average (GPA) of 2.7 (B-) or better.)
   b) the history of Russian literature, including its relationship to the development of other Slavic literatures, or West European literature, or to Russian intellectual history.

The oral portion follows shortly after the successful completion of the written portion. The department oral examination is designed to test the student’s knowledge of the major cultural and literary trends in a period of their choice as well as the student’s ability to participate in a challenging scholarly discussion. It can be used most profitably as an opportunity to do intensive reading in the period of a candidate’s projected dissertation work. Preparation for the oral should begin immediately following the successful completion of the department’s written examination. After consulting with members of the faculty, the student proposes a reading list, which, once approved, serves as the basis for the examination. The exam structure requires that the student make an opening presentation on a topic or set of topics of particular interest or relevance to the period in question. After an open discussion of the presentation, each examiner is given the chance to question the student on other topics related to the reading list.

Following the department examinations, a candidate must pass a University oral examination, which is a defense of a dissertation proposal covering content relevant to the area of study, rationale for the proposed investigation, and strategy to be employed in the research.

**Specialization**—Candidates in Slavic Languages and Literatures specialize in literature and related media. Candidates may draw up individual programs of study and research in consultation with the graduate adviser. Requirements vary according to the nature of the specialized program requested.

**Continuation**—Continuation in the Ph.D. program is contingent on: for first-year students, a high quality of performance in course work (decided by department evaluation); for second-year students, an M.A. thesis, which should be completed no later than the end of the second quarter of the second year.

**Course Work, Breadth Requirements, and Overall Scheduling**—

1. Candidates for the Ph.D. degree are allowed as much freedom as possible in the selection of course work to suit their individual program of study. However, candidates are held responsible for all of the areas covered by the general examinations, regardless of whether they have registered for the department’s offerings in a given field. For this reason, it is strongly recommended that before taking Ph.D. examinations, students complete seminar-level work directly related to the following broad areas:
   a) Russian poetry
   b) the Russian novel
   c) 20th-century Russian literature
   d) 19th-century Russian literature (the Age of Pushkin and after)
   e) 18th-century Russian literature (from the early 1700s to the Age of Pushkin)
   f) Medieval Russian literature
g) a monograph course on a major Russian author
h) theory of literature

Students may not normally register for individual work in a given area until they have covered the basic course offerings in that area. First-year students may register for individual work only under special circumstances and must obtain the written approval of the graduate adviser. Those candidates who are also candidates for the M.A. degree should consult the course requirements for that degree in planning their first year’s work. The M.A. thesis or written examination should be completed by the end of the fifth quarter of graduate study at the latest. The remainder of the second year should be devoted to course work preparing the student for the general qualifying examination and to fulfill the requirements of the minor, if any. Any department’s general qualifying examinations must be taken by the end of the first quarter of the third year of study; they may be taken during the second year if the student and the adviser feel this is appropriate. During the two quarters following the general qualifying examinations, the student should be concerned primarily with preparation for the University oral examination, which should take place no later than the end of the third quarter of the third year. However, students may, if necessary, do limited amounts of course work not directly related to the dissertation proposal. The fourth and fifth years should be devoted to research and writing leading to completion of the Ph.D. dissertation.

2. Students possessing the equivalent of the Stanford M.A. are normally expected to adhere to the schedule for the second, third, and fourth years of work outlined under item 1 above.

3. Students in the Ph.D. program are required to do four quarters of teaching in partial fulfillment of the requirements of the Ph.D. degree: three quarters of first-year Russian, and one quarter of literature as a teaching assistant to a faculty member (usually for one of the survey courses in translation: SLAVGEN 145, 146, 147, 148). All students are required to take a one quarter TA training course, APPLING 201, during their first year.

Non-Slavic Language Requirements — Credit toward either the M.A. or the Ph.D. degrees is not given for first- or second-year courses in non-Slavic languages. It is assumed that, on entering the program, the student has a reading knowledge of either German or French. The reading examination in German or French must be passed by the end of the first year of study. The reading examination in the second language of choice must be passed by the end of the second year of study. Both language examinations must be passed before the candidate takes the University oral examination, that is, before the end of the third year.

JOINT PH.D. IN SLAVIC LANGUAGES AND LITERATURES AND HUMANITIES

The Department of Slavic Languages and Literatures participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Slavic Languages and Literatures and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University activity unit limitation (8 unit maximum).

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

RUSSIAN LANGUAGE COURSES

The following courses in Russian language instruction represent a typical sequence for three years of Russian language study. Majors and prospective majors should consult the requirements for a B.A. in Russian above. For descriptions, other information, and additional courses including special emphasis, intensive, and summer courses, and for other Slavic languages under the SPECLANG subject code, see the “Language Center” section of this bulletin.

SLAVLANG 1,2,3. First-Year Russian
5 units, 1: Aut, 2: Win, 3: Spr (Staff)

SLAVLANG 51,52,53. Second-Year Russian
5 units, 51: Aut, 52: Win, 53: Spr (Staff)

SLAVLANG 111,112,113. Third-Year Russian
4 units, 111: Aut, 112: Win, 113: Spr (Greenhill)

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Slavic Languages and Literatures department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Slavic Languages and Literatures are advised to consider satisfying their IHUM-2,3 requirements by registering for the following courses.

IHUM 28A. B. Poetic Justice: Order and Imagination in Russia — Two quarter sequence. The difference between justice and law in 19th- and 20th-century Russian writers. Focus is on the notion of poetic justice: the artistic representation of order whether divine, natural, or human. Goal is to heighten awareness of familiar narratives, mythologies, ideas, and images, and to convey a sense of a long-established national culture with its own dynamic vision. GER:IHUM-2,3
IHUM 28B. 5 units, Win (Safran)
IHUM 28B. 5 units, Spr (Freidin)

GENERAL

This curriculum covers topics of general interest. Courses are open to all students and have no prerequisites. Some courses may be taken for graduate credit. Additional work in the original language may be arranged with individual instructors. The courses:

1. introduce students to the major authors and texts in the Russian literary and cultural tradition,
2. offer broad conceptual frameworks for understanding the material covered, and
3. demonstrate the dynamic interaction between cultural texts and a variety of contexts (literary, intellectual, and sociopolitical).

While these goals are pursued to some extent in all courses, the curriculum may be classified according to the following contextual emphasis to assist students in choosing courses according to their interests.

Literary Movements and Genres: SLAVGEN 145, 146, 147, 155, 156
Literature and Intellectual History: SLAVGEN 151, 190
Literature and Social History: SLAVGEN 141, 149
Media, Gender, Ethnicity: SLAVGEN 148, 152, 154, 161, 162, 163, 165, 166, 167, 168, 221

SLAVGEN 13N. Russia, Russian, Russians—Stanford Introductory Seminar. Preference to freshmen. The political and cultural history of Russia and the Russians: prominent persons, prominent events, and how they shape current attitudes and society. Short works by Russian authors. GER:DB-Hum
3-4 units, Win (Schupbach)

SLAVGEN 77Q. Russia’s Weird Classic: Nikolai Gogol—Stanford Introductory Seminar. Preference to sophomores. The work and life of Nikolai Gogol, the eccentric founder of Fantastic Realism. The relationship between romanticism and realism in Russian literature, and between popular Ukrainian culture and high Russian and W. European traditions in Gogol’s oeuvre. The impact of his work on 20th-century modernist literature, music, and art, including Nabokov, literature of the absurd, Shostakovich, Meyerhold, and Chagall. GER:DB-Hum
3 units, Aut (Fleishman)
SLAVGEN 122/222. Yiddish Literature — The humor, drama, anger, and artistry of modern of E. European and American Yiddish writers including Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Chaim Grade, and Yankev Glatshtyen. In English. GER:DB-Hum, EC-GlobalCom
3-4 units, Spr (Safran) not given 2005-06

SLAVGEN 123/223. The Yiddish Novel — How Yiddish novels reveal changes in modern Jewish life and literature in Europe and the U.S. The influences of folklore, traditional Jewish culture, and European literature. Works by Isaac and Joshua Singer, Joseph Opatoshu, Der Nister, Chaya Rosenfarb, Sholem Asch, and David Bergelson. Readings in English; optional sessions for close readings in Yiddish. GER:DB-Hum
3-4 units, Spr (Glaser)

SLAVGEN 133/233. Poles and Others: Literature and History in Modern Poland — The physical and cultural territories of the former Polish-Lithuanian Commonwealth have long been objects of contest. The 20th century witnessed two or three rebirths of Poland and one or two deaths; a belated modernization of Polish society; the final inclusion of Polish-speaking peasants and burghers in a Polish national identity; and the exclusion of Jews, Germans, Lithuanians, Belarusians, Ukrainians, and others from the state and participation in a partially shared culture. GER:DB-Hum
3-4 units, not given 2005-06

SLAVGEN 135/235. The Literatures of Ukraine: The Modern Period — (Same as COMPLIT 148S/248S.) Borderlands, national identity, geography, and narrative uses of landscape and travel within Ukraine. Contemporary literature in and about Ukraine. Readings include Ukrainian writers such as Kotliarevsky and Ukrainka, Russian writers such as Gogol and Bulgakov, and Polish and Yiddish writers. Readings in English; optional reading groups in original languages.
3-4 units, Aut (Glaser)

SLAVGEN 141/241. Staging the Revolution: Russian Theater and Society, 1917-1937 — Between 1917 and 1937, artistic experimentation in the Russian theater coincided with political and social changes in Russian society. Modernist artists interpreted the revolution as an artistic possibility to demolish conventions of representation. Mass festivals, circus, and street performances replaced the old theater. In the time of the Great Terror and staged trials, theater and opera remained among the leading arts, but state patronage caused a major reorientation of artistic practices. Readings include plays by Mayakovskiy, Bulgakov, Babel, Tretiakow, and Erdman. Readings in English. GER:DB-Hum
4 units (Staff) not given 2005-06

SLAVGEN 145/245. The Age of Experiment, 1820-50 — (Same as COMPLIT 145S/245S.) The Golden Age of Russian literature as a period of one-of-a-kind experiments. Pushkin, Lermontov, and Gogol in the context of Russian culture and contemporary European trends. GER:DB-Hum, EC-GlobalCom
3-4 units, Aut (Fleishman)

SLAVGEN 146/246. The Age of Transgression: The Great Russian Novel — Tolstoy’s War and Peace, Dostoevsky’s Demons, and Turgenev’s Fathers and Sons, written in decade following the emancipation of the serfs and the great legal reforms, ask how much one person can change history for good or ill. Chekhov’s Ward Number Six as an example of the deformation and adaptation of this tradition at the end of the age of realism. Historical and philosophical context and literary-critical techniques. GER:DB-Hum, EC-GlobalCom, WIM
4 units, Win (Safran)

SLAVGEN 147/247. The Age of War and Revolution: A Survey of Russian Literature and Culture, 1900-1950s — First of two-part sequence. Russian modernism and the avant garde. The Russian Revolution, the era of the NEP, Soviet civilization, and the literature of opposition following Stalin’s death. All texts in English translation. GER:DB-Hum, EC-GlobalCom
4 units, Spr (Graham)

SLAVGEN 148/248. The Age of Dissent: A Survey of Russian Literature and Culture, 1953 to the Present — From the death of Stalin to post-communist Russia. Literature of the thaw and de-Stalinization, official and unofficial literature of dissent, samizdat, village and urban prose, literature of the new emigration, late Soviet underground, sots-art, perestroika, and post-communist literature and culture. Texts in English translation. For graduate credit for research paper, register for SLAVLIT 399. GER:DB-Hum, EC-GlobalCom
2-4 units (Freidin) not given 2005-06

SLAVGEN 151/251. Dostoevsky and His Times — (Same as COMPLIT 118/218.) Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture, literary criticism, and intellectual history. GER:DB-Hum
4 units, Win (Frank)

SLAVGEN 155/255. Anton Chekhov and the Turn of the Century — Chekhov’s art in its Russian literary, historical, philosophical, and political contexts. Short stories and major plays; supplemental readings for graduate students from Chekhov’s letters and works by his friends and contemporaries, such as Leskov, Tolstoy, Korolenko, and Gorky. GER:DB-Hum
4 units, Spr (Safran)

SLAVGEN 156/256. Nabokov and Modernism — (Same as COMPLIT 156D/256D.) Nabokov’s stories, novels, and a film script in the context of: modernist writers such as Bergson, Proust, and Joyce; media including painting, film, and photography; and philosophical thought. Critical approaches that elude the author’s control. Readings include Bend Sinister, Lolita, Pale Fire, Speak Memory, and Ada. GER:DB-Hum
3-5 units (Greenleaf) not given 2005-06

SLAVGEN 161/261. Poetess: The Grammar of the Self when the Poet is a Woman — (Same as COMPLIT 121/221.) Seminar. Lyric works by women poets from the U.S., Russia, E. Europe, and Germany (Dickinson, Moore, Brooks and the Harlem Renaissance, Bishop, Akhmatova, Tsvetayeva, Sachs, Plath, Cisneros, Angelou, Graham, Howe, and Szyborska.) Theoretical and practical issues: breaking and entering the male preserve of high poetry; the interaction of written and oral, political, and performative modes of expression; representations of the feminine body and experience in the visual arts; and the development of a female lineage and modes of poetic legitimation, association, and inspiration. GER:DB-Hum, EC-Gender
4 units (Greenleaf) not given 2005-06

SLAVGEN 162/262. Gender Images in Film — Film creates permanent new images of femininity. One of its conscious prerequisites is the notion of social stereotypes. The development of enduring images of the film heroine, 1914-90, through a comparison of the Russian, American, and W. European cinema, and analytical approaches to them from feminist film theory. GER:EC-Gender
3 units (Staff) not given 2005-06

SLAVGEN 163/263. Gender in Postwar Russian Culture — Issues of femininity and masculinity in Russian literature, film, and popular culture from the 40s to the present. Readings include fiction, memoirs, poetry, drama, and theoretical works in gender studies.
3-4 units, Aut (Graham)

3-4 units (Fleishman) not given 2005-06
SLAVGEN 169/269. Folklore: Theory and Practice — Genres, scholarship, and collection methods. Differences between and mutual influence of folklore and media such as literature and film. The folk origins of contemporary archetypes, narratives, and beliefs. Primary sources are Russian and Slavic folklore; comparative theoretical readings.
3–4 units (Graham) not given 2005-06

SLAVGEN 190/290. Tolstoy’s Anna Karenina and the Social Thought of Its Time — (Same as HUMNTIES 197F). Preference to Humanities honors students. Historical and cultural context, contesting major currents of social thought in Tolstoy’s time including Marx on class and history, Mill on sex equality, Nietzsche, Dostoevsky, and Shestov on morality and power, Freud on desire and the unconscious, Durkheim on the nature of religion, and Weber on legitimation and authority. Limited enrollment. See http://www.stanford.edu/~gfreidin/courses/AK/. GER:DB-Hum
5 units (Freidin) alternate years, given 2006-07

SLAVGEN 197B. Camera as Witness: International Human Rights Documentaries — (Same as HUMNTIES 197B, INTNLREL 141B). Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers. GER: DB-Hum
5 units, Aut (Bojic)

SLAVGEN 197C. Camera as Witness: International Human Rights Documentaries — (Same as HUMNTIES 197C, INTNLREL 141C.) Challenges facing film makers documenting the struggle for human rights including communication of complex situations to an international audience, interpreting foreign cultures and politics, and filmmaker roles as artists, activists, and journalists. Meetings with filmmakers. GER: DB-Hum
5 units, Spr (Bojic)

SLAVGEN 313. Visuality and Literacy Workshop — Relationships among visual arts, theater, and literature in the culture of modernity.
1–2 units (Staff) not given 2005-06

ADVANCED UNDERGRADUATE AND GRADUATE

4 units (Fleishman) not given 2005-06

4 units (Fleishman) not given 2005-06

SLAVLIT 183/283. Readings in the Russian Press — For students at the fifth-year Russian level. Advanced language training based on Russian newspapers and magazines. Discussion of issues regarding the Russian media and reading articles of a typical Russian press format.
4 units (Staff) not given 2005-06

SLAVLIT 184/284. History of the Russian Literary Language — Major structural and semantic changes from the 10th to the 19th centuries. Recommended: 211, 212
3–4 units, Win (Schapbach)

3–4 units (Fleishman) not given 2005-06

SLAVLIT 187/287. Russian Poetry of the 18th and 19th Centuries — Required of all majors in Russian language and literature; open to undergraduates who have completed three years of Russian, and to graduate students. The major poetic styles of the 19th century as they intersected with late classicism, the romantic movement, and the realist and post-realist traditions. Representative poems by Lomonosov, Derzhavin, Zhukovskii, Pushkin, Baratynskii, Lermontov, Tiutchev, Nekrasov, Fet, Soloviev. Lectures/discussions in Russian.
3 units (Fleishman) not given 2005-06

3–4 units, Aut (Fleishman)

SLAVLIT 189/289. Literature from Old Rus’ and Medieval Russia — From earliest times through the 17th century. The development of literary and historical genres, and links among literature and art, architecture, and religious culture. Readings in English; graduate students read in original.
4 units (Zhitov) not given 2005-06

SLAVLIT 194A/294A. Russia and The Other: A Cultural Approach — Seminar for students returning from Moscow; required of Slavic majors working on honors thesis; recommended for Slavic majors and minors. Russian cultural identity and its emergence in literature and art dealing with the other (W. Europe; the Orient including Central Asia, Siberia and the Caucasus, and marginal groups including Jews, Gypsies, and American students of Russian). Works of literature and other cultural texts; introduction to literary analysis, cultural and social theory. Class presentation.
4–5 units (Safran, Freidin) not given 2005-06

SLAVLIT 194B/294B. Russia and The Other: A Cultural Approach — For students who choose to develop their ideas further by doing additional research and writing a scholarly paper, possibly an honors thesis in Slavic literature or related field. Class presentation and research paper. Prerequisite: 194A.
4–5 units (Freidin, Safran) not given 2005-06

SLAVLIT 199. Individual Work for Undergraduates — Open to Russian majors or students working on special projects. May be repeated for credit. Prerequisite: consent of instructor.
1–5 units, Aut, Win, Spr (Staff)

SLAVLIT 200. Proseminar in Literary Theory and Study of Russian Literature — Required for graduate students and honors undergraduates in Slavic; first-year Slavic graduate students must enroll during their first quarter. Introduction to graduate study in Russian literature and culture: profession, discipline, and approaches to the study of literature and culture. Theoretical readings, practical exercises in the analysis of verse and narrative, and recent monographs on Russian literature.
4 units, Aut (Freidin)

SLAVLIT 200A. Introduction to Library and Archival Research in Slavic Studies — Required of first-year Slavic graduate students. Major Western and Slavic language sources and search methodologies pertaining to Russian and E. European area studies. Tailored to students’ research interests.
2–3 units, Aut (Fleishman)

SLAVLIT 200B. Proseminar in Russian Literary Theory — Corequisite: 305.
1 unit (Safran) not given 2005-06

SLAVLIT 203. Academic Russian — How to read and analyze secondary sources, formulate arguments, and present intellectual work in Russian.
In Russian. Prerequisite: four years of Russian or equivalent.
3 units, Aut (Golburt)

SLAVLIT 211. Introduction to Old Church Slavic — The first written language of the Slavic peoples. Grammar. Primarily a skills course, with attention to the historical context of Old Church Slavic.
3 units (Timberlake) not given 2005-06

SLAVLIT 212. Old Russian and Old Church Slavic — Continuation of 211. Readings in additional canonical Old Church Slavic texts, fol-
lowing the Church Slavic tradition as it develops in early Rus (Kiev, Novgorod). Selections from the Primary Chronicle, Boris and Gleb, The Life of Theodosius. The general issues of writing and the reception of Byzantine culture in early Russia.

3 units (Timberlake) not given 2005-06

SLAVLIT 213. The Literary Dialogue of Pushkin and Gogol in the Formative Context of the 1830s—(Same as COMPLIT 213.) Pushkin and Gogol’s poetic, fictional, and journalistic works of the 1830s as an implicit dialogue about the emerging artistic and national directions of Russian literature, the Petersburg text, journalism, and theater. Paired Pushkin and Gogol texts read against the background of Belinsky, Polegin, Senkovsky, Shakhostokoi, St. Beuve, Jules Janin, Balzac, and L. Ginzburg. Prerequisite: Russian. GER:DB-Hum

2-4 units (Greenleaf) not given 2005-06

SLAVLIT 225. Readings in Russian Realism—Open to graduate students and advanced undergraduates. Russian realist and naturalist prose emerged in a historical context that fostered specific ideas about the function and form of the literary word. Readings from Turgenev, Goncharov, Leskov, Saltykov-Shchedrin, Dostoevsky, Garshin, Tolstoy, Chekhov, Gorky, Bunin. Discussions in English.

4 units (Safran) not given 2005-06

SLAVLIT 227. Boris Pasternak and the Poetry of the Russian Avant Garde—Pasternak’s works within a cultural context to identify and analyze characteristic features of the Russian avant garde poetics. Readings in Russian.

3-4 units (Staff) not given 2005-06

SLAVLIT 270. Pushkin—Major poems and prose with detailed examination of his cultural milieu. Emphasis is on changes in the understanding of literary concepts relevant to this period of Russian literature (poetic genres, the opposition between poetry and prose, romanticism).

2-3 units (Staff) not given 2005-06

SLAVLIT 270C. Pushkin and The Moderns—(Same as COMPLIT 270.) Graduate seminar. Pushkin’s major poetic texts and a study of the Pushkin function in specific works of 20th-century Russian literature. Prerequisite: knowledge of Russian.

3-5 units (Greenleaf) not given 2005-06

SLAVLIT 271. Poema: Russia’s Long Narrative Poem—Russian long narrative poems of the 19th and 20th centuries in literary and historical context.

3-4 units, Spr (Fleishman)

2-4 units, Win (Freidin)

SLAVLIT 299. Individual Work for Graduate Students—For graduate students in Slavic working on theses or engaged in special work. Prerequisite: written consent of instructor.

1-12 units, Aut, Win, Spr, Sum (Staff)

SLAVLIT 305. Russian Critical Traditions—The Russian intelligentsia invested its literature with esthetic and ethical value, and developed a critical apparatuses that have inspired Western approaches to text. Readings in theorists from the 19th-20th centuries including positivists and formalists. Possible topics: 19th-century radicals, futurist manifestoes, formalists, Freudian and Marxist models, Bakhtin, and the Tartu semioticians. Readings in English. Prerequisite: some familiarity with the Russian canon.

3-4 units (Safran) not given 2005-06

SLAVLIT 310. Civilizing Process: Paradigms of Society and Culture in Modern Russian Literature and Film—Texts representing theoretical models of society and culture in confrontation with works of Russian fiction and film. Emphasis is on Norbert Elias’s civilizing process and related theories. Topics: body and desire (Freud, Bakhtin); manners and civilizing process (Elias, Cuddihy, Lotman); symbolic forms, ritual, and systems (Geertz, Zorin); identities and practices (de Certeau, Bourdieu); subcultures (Hebdige). Authors include Mayakovsky, Babel, Mandelstam, Bulgakov, Platonov, Zoshchenko, Erofeev, Pelevin, Trifonov, and Petrushevskaya; film makers: Mamin and Rogozhkin. Recommended: knowledge of Russian.

2-4 units (Freidin) not given 2005-06

SLAVLIT 369. Introduction to Graduate Studies: Criticism as Profession—(Enroll in COMPLIT 369, GERLIT 369.)

5 units, Aut (Berman)

SLAVLIT 399. Advanced Research Seminar in Russian Literature—Follow-up to 200- or 300-series seminars, as needed. May be repeated for credit.

2-4 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

Courses approved for the Slavic Languages and Literatures major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

MOSCOW

SLAVGEN 112. The Master and Margarite and Its Moscow Setting

3-4 units, Aut (Schupbach)
SOCIOLOGY

Chair: to be announced
Professors: Lawrence Bobo, Karen Cook, Paula England, Mark Granovetter, David Grusky, Michael T. Hannan, Douglas McAdam, Susan Olzak, Cecilia Ridgeway, C. Matthew Snipp, Nancy B. Tuma, Andrew Walder
Associate Professor: Gi-Wook Shin
Assistant Professors: Henning Hillmann, Noah Mark, Monica McDermott, Michael Rosenfeld, Rebecca L. Sandefur
Associate Professor (Teaching): Donald Barr
Lecturers: Cynthia Brandt, Robin Cooper
Courtesy Professors: Anthony Bryk, Glenn Carroll, Larry Diamond, Joanne Martin, Clifford J. Nass, Walter Powell, Francisco Ramirez
Courtesy Associate Professors: Michele Landis Dauber, Sean Reardon
Consulting Professor: Daniel McFarland
Consulting Associate Professor: Ruth Cronkite
Visiting Associate Professors: Eva-Maria Meyersson Milgrom, Patricia Thornton
Department Offices: Building 120, Room 160
Mail Code: 94305-2047
Phone: (650) 725-3956
Web Site: http://www.stanford.edu/dept/soc/

Courses given in Sociology have the subject code SOC. For a complete list of subject codes, see Appendix.

Sociology is concerned with the full spectrum of social behavior (of individuals, small groups, large organizations, communities, institutions, and societies) and provides a strong intellectual background for students considering careers in the professions or business. Students may pursue degrees in sociology at the bachelor’s, master’s (crotinal), or doctoral levels.

UNDERGRADUATE PROGRAMS

Sociology offers two programs leading to the B.A. degree: the general sociology major and the specialized major. Both are designed around a core curriculum, the intent of which is to ensure adequate coverage of basic sociological knowledge and to provide enough flexibility for tailoring the degree program to fit individual needs and interests. The general major consists of the core curriculum plus a selection of additional courses in one area of sociology. Areas of concentration include Organizations, Business, and the Economy; Race and Ethnic Relations; Social Movements, Comparative Politics, and Social Change; Social Psychology and Interpersonal Processes; and Social Stratification and Inequality. If a specialized major is completed, the student’s transcript will reflect his or her specialized field of study. These programs and the requirements for each are described below.

CORE CURRICULUM AND GENERAL SOCIOLOGY MAJOR

To graduate with a B.A. in Sociology, students must complete a minimum of 60 units of course work in the major. All units applied to the major must be taken for a letter grade (except for SOC 190-193) and a grade point average (GPA) of 2.0 (C) or better must be achieved. Related course work from other departments may fulfill part of this requirement, but such work must be approved in advance by a department advisor and must not exceed 15 units. All degree candidates must fulfill the following core requirements:

1. Introduction to Sociology (1). It is recommended that students take this course early in their program.
2. Methods for Sociological Research (180), or its equivalent.
3. An introductory course in statistics such as SOC 181B, STATS 60, PSYCH 60, or equivalent.
4. Classics of Modern Social Theory (170), or an equivalent course in social theory.
5. At least three foundation courses, each from a different area of concentration.
6. Senior Seminar: Honors (200H) or Senior Seminar for Majors (200), to be taken during the senior year. These courses fulfill the Writing in the Major (WIM) requirement.

To complete the general Sociology major, students must also complete 20 additional units of work.

SPECIALIZED SOCIOLOGY MAJOR

The department recognizes that some students may wish to engage in more in-depth study than that provided by the major in general Sociology. The specialized Sociology major permits students to pursue a more focused program in one of these five field designations: Organizations, Business, and the Economy; Race and Ethnic Relations; Social Movements, Comparative Politics, and Social Change; Social Psychology and Interpersonal Processes; and Social Stratification and Inequality. To complete the requirements for the B.A. degree in Sociology with a field designation, a student must complete all core curriculum requirements and complete 20 units of course work in the selected field of concentration.

CONCENTRATION AREAS

Each area identifies a specialized area of inquiry, a set of skills within sociology, and basic preparation for a variety of careers. A brief description of each area follows.

Organizations, Business, and the Economy—Focus is on the arrangements which societies construct for the provision of material goods or services. A formal organization which provides goods or services for profit and sells them through a market is called a business, and the economic system is capitalism. Social needs are also met through government and not-for-profit organizations, such as garden clubs, hospitals, prisons, and the Red Cross. Some private and social needs are met outside of organizations, such as health care provided by family members and exchange of favors among friends. Courses stress the factors that determine whether needs that people define are met through markets or by non-market allocation, through organizations or by other means. They also investigate the environmental and technical factors that shape organization structure, the determinants of how efficiently organizations operate, and the interpersonal processes that shape individual behavior within organizations. Careers related to this area include management and administration in business or public settings, management consulting and analysis, and legal studies related to corporations, organizations, and business.

Race and Ethnic Relations—Focus is on issues surrounding the emergence, persistence, and dynamics of conflict and cooperation among race and ethnic groups in the United States and elsewhere. Course topics include racial identity, sources of prejudice and hostility, emergence of minority movements, indigenous peoples’ movements, ethnic genocide, ethnic collective violence, and cooperation among groups.

Social Movements, Comparative Politics, and Social Change—Focus is on the emergence, reproduction, and change of political systems and institutions, especially on why and how different political systems and social movements appear in different times and places, and how differences in political regimes and economic systems influence attempts to change these systems. The origins and significance of national and transnational social movements, transition to democracy, including revolution, nationalism, and other forms of collective action, in creating and sustaining these changes analyzed across countries and over time. Careers that are relevant to this area include law, public policy, government service, nonprofit and international nongovernmental organizations, business online and media.
organizations (especially those with international interests), consulting, and managerial jobs.

Social Psychology and Interpersonal Processes—Focus is on the social organization of individual identity, beliefs, and behavior, and upon social structures and processes which emerge in and define interpersonal interactions. Processes studied include social acceptance and competition for prestige and status, the generation of power differences, the development of intimacy bonds, the formation of expectation states which govern performance in task oriented groups, and social pressures to constrain deviance. Foundation courses emphasize the effect of social processes on individual behavior and the analysis of group processes. This area provides training for careers with a significant interpersonal component, including advertising and marketing, business, education, law, management, medicine and health, or social work.

Social Stratification and Inequality—Focus is on forms of social inequality, including areas such as: the shape and nature of social inequalities; competition for power; allocation of privilege; production and reproduction of social cleavages; and consequences of class, race, and gender for outcomes such as attitudes, political behavior, and lifestyles. Many courses emphasize changes in the structure of social inequalities over time, and the processes which produce similarities or differences in stratification across nations. Topics include educational inequality, employment history, gender differences, income distributions, poverty, race, and ethnic relations, social mobility, and status attainment. Careers related to this field include administration, advertising, education, foreign service, journalism, industrial relations, law, management consulting, market research, public policy, and social service.

CONCENTRATION AREA COURSES

Many of the department courses can be categorized as primarily oriented to one of the five areas of concentration; a few courses are relevant to more than one area. Within each area of concentration, one or more undergraduate foundations courses are identified which provide a general introduction to the area or some portion of it. Courses, classified by area, are as follows:

1. Organizations, Business, and the Economy
   Foundation courses: 114 or 160
   Other courses: 110, 115, 130, 161-169, 260-268
2. Race and Ethnic Relations
   Foundation courses: 145 or 148
   Other courses: 139, 141A, 143, 144, 146, 147
3. Social Movements, Comparative Politics, and Social Change
   Foundation courses: 110 or 118 or 130
4. Social Psychology and Interpersonal Processes
   Foundation courses: 120 or 121
   Other courses: 125-128, 132, 142, 150, 220-227, 242
5. Social Stratification and Inequality
   Foundation course: 140
   Other courses: 132, 134, 139, 141, 141A-149, 150, 241, 241A-249

MINORS

The minor in Sociology is intended to familiarize students with the basic concepts and methods of the discipline. In addition to ensuring considerable breadth of exposure to the fundamental issues and approaches of the field of sociology, students are encouraged to obtain some depth of exposure to one of the specialized areas of study.

The requirements for a minor in sociology are as follows:

<table>
<thead>
<tr>
<th>Course No. and Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 1. Introduction to Sociology</td>
<td>5</td>
</tr>
<tr>
<td>SOC 180. Methods for Sociological Research</td>
<td>5</td>
</tr>
<tr>
<td>Two foundation courses, one each from two of the field five concentration areas (see above)</td>
<td>10</td>
</tr>
<tr>
<td>Additional course work in the department, preferably in the areas of concentration associated with the foundation courses taken (consult listing of courses for each area described elsewhere in the Stanford Bulletin)</td>
<td>15</td>
</tr>
<tr>
<td>Total course work required</td>
<td>35</td>
</tr>
</tbody>
</table>

All courses qualifying for the minor must be taken for a letter grade, and a grade point average (GPA) of 2.0 (C) or better must be achieved.

HONORS PROGRAM

Students desiring to undertake an independent scholarly project under the direction of a faculty member are encouraged to apply for admission to the department’s honors program. To enter the program, the student must be accepted by a faculty member of the department who agrees to advise on the research and writing of the essay. It is possible in some cases for students to work with faculty advisers in other departments, but such arrangements must be approved by the chair of the Undergraduate Studies Committee. Admission to the program requires a grade point average (GPA) of 3.5 or higher in courses taken within the major, and an overall GPA of 3.3 (B+) or higher in all undergraduate course work.

Work on the project can begin earlier, but ordinarily is initiated in connection with the course requirements of SOC 200H, Honors Senior Seminar, or SOC 200, Senior Seminar. Students are encouraged to begin designing their honors project in connection with this seminar, in consultation with the seminar leader and a faculty member who is willing to serve as sponsor for the honors project. If admitted to the program, the work can then be completed during Winter and Spring Quarters.

To formally enter the program, a student must complete an application form available from the department office. The form requires the endorsement of the faculty sponsor and is to be accompanied by a brief description of the project to be undertaken and a copy of the student’s undergraduate transcript. Prospective candidates must submit the copy of the completed application to the chair of the Undergraduate Studies Committee no later than the end of the third quarter before graduation (typically Autumn Quarter of the senior year).

Honors students may earn up to 12 units credit for work leading to completion of the required honors thesis (excluding units associated with the Senior Seminar). To be eligible for an honors degree, a grade of ‘A’ or better must be earned on the honors thesis. If an ‘A’ is not earned, the thesis credit counts toward meeting the standard major requirements.

Successful completion of honors in Sociology requires (1) completion of all requirements for the major; and (2) completion of a thesis of honors quality (a grade of ‘A’ or higher). The thesis is due on or before the beginning of the End-Quarter period in the student’s final quarter before graduating. If the thesis has been sponsored by a faculty member outside the department, it must be submitted to both that sponsor and to the chair of the Undergraduate Studies Committee, who appoints a departmental reader to evaluate the paper. Both the sponsor and the reader must agree that the paper merits honors. In every case, two copies of the final paper must be submitted. One is retained by the department and becomes a part of the department’s permanent collection.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

Stanford undergraduate students who wish additional training in sociology (whatever their undergraduate major), and who have a good academic record (a GPA of at least 3.5 in previous undergraduate work is required), may apply to the coterminal master’s program as described in the “Undergraduate Degrees” section of this bulletin.

To apply for admission to the coterminal program, students should submit the coterminal application and the following: (1) a statement of purpose providing the rationale for the proposed program of study, (2) a proposed program that specifies at least 45 units of course work relevant to the degree program and at least 36 units in Sociology, (3) a current undergraduate transcript, and (4) two letters of recommendation from Stanford faculty familiar with the student’s academic work.

All 45 course units to be counted toward the graduate degree must be at or above the 100 level; at least 18 course units must be above the 200 level. Because the acquisition of research skills is an important component of graduate training in the social sciences, it is recommended that coterminal students take one or more research methodology courses, for example, SOC 280 or 281B. All units applied to the coterminal master’s...
degree must be taken for a grade and an overall grade point average (GPA) of 3.0 (B) or better is required.

Most coterminal students propose programs that concentrate on one of the five areas of concentration offered by the department: Organizations, Business, and the Economy; Race and Ethnic Relations; Social Movements, Comparative Politics, and Social Change; Social Psychology and Interpersonal Relations; and Social Stratification and Inequality. This approach helps to ensure program coherence.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

University requirements for the M.A. and Ph.D. degree are described in the “Graduate Degrees” section of the bulletin.

Admission — Each applicant must submit results from the general Graduate Record Examination (GRE). Foreign students must take the TOEFL exam (a minimum score of 250 on the computer-based test or 600 on the paper-based test is required). Applicants must also submit a personal statement, writing sample, three letters of recommendation, and transcripts. For more information, see http://gradadmissions.stanford.edu.

MASTER OF ARTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin. The department does not admit students who are candidates solely for the M.A. in Sociology. The M.A. degree is available to Ph.D. candidates in Sociology or from other departments. In this instance, the usual admission requirements are waived and course requirements are determined in consultation with a Sociology adviser. Students must complete a minimum of 45 units with a grade point average (GPA) of 3.0 (B) or better. All 45 units must be taken in courses taught by Sociology faculty and must be taken for a grade whenever possible. Research and directed reading courses are acceptable, but must be approved in advance. All course work must be at the 100 level or above; 18 units must be above the 200 level. Interested students should contact the department for additional information and advance approval of their programs.

DOCTOR OF PHILOSOPHY

The department admits only those students who appear to have the aptitude and qualities to complete the Ph.D. program successfully. The curriculum and degree requirements are designed to provide students with the necessary knowledge and skills to become proficient as both scholars and teachers. The courses and requirements also provide faculty with essential information on the progress of each student and on areas of difficulty or deficiency requiring attention and improvement. Doctoral students in the department must take all required courses for a grade and are expected to earn a grade of B+ or better in each course. Any grade of B or below is considered to be less than satisfactory.

Students must complete the following department requirements for the Ph.D. degree in Sociology:

1. In order to receive a thorough introduction and orientation to the field of sociology, the department, and the faculty, each student must enroll in SOC 305, Graduate Proseminar. The proseminar is a one-quarter course given during the Autumn Quarter of the first year of residence. One unit of credit is given for this course; grading is on a satisfactory/no credit basis. The proseminar leader also serves as the academic adviser for all first-year students. After the first year, students are allowed to select their academic adviser from among members of the department’s faculty.

2. As partial preparation for becoming an accomplished researcher, each student must complete three quarters of research experience, working under the supervision of one or more faculty members (including regular, emeritus, and affiliated faculty). The experience may involve paid work as a Research Assistant (RA), or unpaid work as a research apprentice, carried out to obtain research experience. With the approval of the chair of Graduate Studies, research experience may be acquired by involvement in research projects outside the department, for example, the American Institute for Research or the Veteran’s Administration Hospital. It is recommended that students complete their research requirements early in their graduate program; the requirement must be completed by the end of the fourth year of residency.

3. As partial preparation for becoming an accomplished teacher, each student must complete three quarters of teaching apprenticeship in departmental courses, or in other courses by approval. Work as either a teaching assistant (TA) under the supervision of a faculty member or as a teaching fellow (TF) fulfills this requirement. All students are required to take a one-quarter TA training course offered by the department during their first year. In addition, students are expected to take advantage of department and University teacher training programs during their first few years of residence. Students for whom English is a second language are expected to acquire sufficient facility in English to be an effective teacher.

4. In order to demonstrate command of a range of sociological literatures, students must take four broad survey courses. Each year the department specifies which courses meet this requirement, and will undertake to ensure that an adequate selection of such courses is offered. A list of courses that generally fulfill this requirement is listed in the requirements section below. Students should consult with their adviser to ensure that the combination of courses selected to meet this requirement exhibits sufficient breadth. This requirement is normally completed by the end of the second year of residency and must be met by the end of the third year of residency.

5. In order to obtain a thorough grounding in sociological theory, each student must take two courses. One course should be in classical sociological theory (SOC 370A or 370B or equivalent), and the second course should be on the development of theory and research design (SOC 372 or equivalent).

6. In order to obtain a thorough grounding in research methods, each student must complete a series of required courses in methodology. Students with little background in statistics are encouraged to take SOC 281B or equivalent. See the requirements section below for specific course requirements.

7. In partial preparation for a career of writing scholarly papers, each student must complete a paper by May 15 of the second year of residency. This second-year paper may be on any sociological topic, and may address theoretical, empirical, or methodological issues. The paper is expected to reflect original work and is considered an important piece of evidence in the decision to advance to candidacy. A two-person committee that includes the primary adviser evaluates the paper. Although the reading committee is usually comprised of two regular faculty members in the department, emeritus and other faculty outside of the department may serve as a committee member with prior approval.

8. In order to demonstrate the ability to conduct independent scholarly work, each student must prepare a dissertation prospectus and pass the University oral examination. The oral exam is intended to evaluate the dissertation prospectus or a partial draft of the dissertation and to assess the student’s knowledge of the relevant theory and research in the area in which the project intends to contribute.

9. Each student must complete a doctoral dissertation. Assessment of satisfactory completion is determined by the student’s doctoral committee members. All students are invited to present their dissertation findings at an informal department colloquium.

The faculty assumes the responsibility to provide students with timely and constructive feedback on their progress toward a degree. In order to evaluate student progress and to identify potential problem areas, the department’s faculty reviews the academic progress of each first-year student at the beginning of Winter and Spring quarters and again at the end of Spring Quarter. The reviews at the beginning of Winter and Spring Quarters are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. The review at the end of Spring Quarter is more thorough: Each student’s
performance during the first year is reviewed and discussed. Possible outcomes of the spring review include: (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program.

Students leaving the program at the end of the first year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residence or financial support. All students are given feedback from their advisers at the end of their first year of graduate work, helping them to identify areas of strength and potential weakness.

At the end of the second year of residency, the faculty again review the progress of all doctoral students in the program. Students who are performing well, as indicated by their course work, teaching and research apprenticeship performance, and second-year paper, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are still on probation at this stage may be (1) advanced to candidacy; (2) retained on probation with specification of the steps still required to be removed from this status; or (3) terminated from the program.

At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student.

**REQUIREMENTS**

**SURVEY COURSES**

Students must complete four courses from the approved list, including:

- 308. Social Demography
- 310. Political Sociology
- 314. Economic Sociology
- 316. Historical and Comparative Sociology
- 318. Social Movements and Collective Action
- 320. Foundations of Social Psychology
- 322. Social Interaction, Social Structure, and Social Exchange
- 324. Social Networks
- 340. Social Stratification
- 342B. Gender and Social Structure
- 345. Comparative Race and Ethnic Relations
- 360. Foundations of Organizational Sociology
- 362. Organization and Environment
- 363A. Seminar on Organizational Theory
- 363B. Seminar on Organizations: Institutional Analysis

**RESEARCH METHODS**

The following course requirements apply to all students who enter the Ph.D program in 2005-06 or later. In addition to the courses identified below, there are three other methods requirements currently in development: a modular methods course to be taken Autumn Quarter of the second year, and a new two quarter methods course to be taken in Winter and Spring quarters of the second year. Students are expected to complete one elective from a list of approved courses. The modular methods course and the new two quarter methods course are offered for the first time in 2006-07.

- 381A. Sociological Methodology IA: Computer-Assisted Data Analysis
- 381B. Sociological Methodology IB: Statistics (recommended for students with little statistical background)
- 382. Sociological Methodology II: The General Linear Model
- 383.. Sociological Methodology III: Advanced Models for Discrete Outcomes

**THEORY**

- 370A. Sociological Theory: Social Structure, Inequality, and Conflict
- 370B. Sociological Theory: Social Interaction and Group Processes
- 372. Theoretical Analysis and Design

Students must complete additional course work sufficient to prepare them to write their second-year paper.

**PH.D. MINOR**

Sociology offers a minor for School of Education doctoral students. Students must complete a minimum of 30 graduate-level units with a grade point average (GPA) of 3.0 (B) or better. All 30 units for the minor are to be in courses taught by Sociology faculty with the following exception: 5 units may be taken in a statistics or methods course taught in another department. All units must be taken for a grade. Research and directed reading courses are acceptable, but must be approved in advance. The specific program must be approved by a Sociology adviser and filed with the Department of Sociology.

**JOINT PROGRAMS WITH THE SCHOOL OF LAW**

The School of Law and Department of Sociology conduct joint programs leading to either a combined J.D. degree with an M.A. degree in Sociology or to a combined J.D. degree with a Ph.D. in Sociology.

Law students interested in pursuing an M.A. in Sociology apply for admission to the Department of Sociology during the first year of Law school. Once admitted to the Department of Sociology, the student must complete standard departmental master’s degree requirements as specified in this bulletin. Applications for the joint J.D./M.A. degree program must be approved by both the department and the Law school. Faculty advisers from each program participate in the planning and supervising of the student’s academic program.

The J.D./Ph.D. degree program is designed for students who wish to prepare themselves for research or teaching careers in areas relating to both legal and sociological concerns. Students interested in the joint degree program must be admitted to both the School of Law and the Department of Sociology. Interest in the joint degree program must be noted on each of the student’s applications. Alternatively, an enrolled student in either the Law School or the Sociology department may apply to the other program, preferably during their first year of study.

Upon admission, students are assigned a joint program faculty adviser who assists the student in planning an appropriate program and ensuring that all requirements for both degrees are satisfied. The faculty adviser serves in this capacity during the student’s course of study regardless of whether the student is enrolled in the School of Law or the Sociology department.

J.D./Ph.D. students may elect to begin their course of study in either the School of Law or the Department of Sociology. Students must be enrolled full-time in the Law school for the first year of Law school, and must enroll full time in the graduate school for the first year of the sociology program. After that time, enrollment may be in the graduate school or the Law school, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the Ph.D. degrees. Up to 36 semester (54 quarter) hours of approved courses may be counted toward both degrees, but no more than 24 semester (36 quarter) hours of courses that originate outside the Law school may count toward the Law degree. To the extent that courses under this joint degree program originate outside of the Law school but count toward the Law degree, the Law school credits permitted under Section 17(1) of the Law School Regulations for cross-registration in other schools or departments of Stanford University are reduced on a unit-per-unit basis, but not below zero. Students must complete the equivalent of 210 quarter units to complete both degrees. Tuition and financial aid arrangements normally are through the school in which the student is currently enrolled.
COURSES

Courses are open to all students without prerequisites, unless specifically indicated. Courses numbered 200-299 are open to advanced undergraduate and graduate students. Courses numbered 300 and above are normally offered to matriculated doctoral students only. Courses with an ‘X’ suffix are taught at an overseas campus only.

OPEN TO ALL STUDENTS

INTRODUCTORY

SOC 1. Introduction to Sociology — Concepts, methods, and theoretical orientations. Sociological imagination illustrated by recent theory and research. Possible topics: the persistence of class cleavages; ethnic, racial, and gender inequalities; religious beliefs and the process of secularization; functions and dysfunctions of educational institutions; criminology and social deviance; social movements and social protest; production and reproduction of culture; rise of organizational society. GER:DB-SocSci

5 units, Win (McAdam), Spr (Snipp)

SOC 22N. The Roots of Social Protest — Stanford Introductory Seminar. Preference to freshmen. The conditions under which social protest occurs and the emergence, success, and viability of contemporary social movements. Examples include women’s civil rights, ecology, and antiwar and anti-globalization movements in the U.S. and elsewhere. Sociological theories to explain the timing, location, and causes of mobilization; how researchers evaluate these theories. Comparison of tactics, trajectories, and outcomes.

3 units, Aut (Rosenfeld)

SOC 25N. Understanding the Sixties — Stanford Introductory Seminar. Preference to freshmen. The tendency of critics to view the 60s through ideological lenses as either the best or worst of times has made a balanced perspective difficult to achieve. Goal is to provide a sociological explanation for the political and cultural turbulence that marked the era. The confluence of demographic, political, economic, and cultural trends that date back to at least the 30s. The ambiguous legacy of the 60s. Using the 60s to shed light on the 80s and 90s. Enrollment limited to 16.

3 units, Win (McAdam)

SOC 26N. The Changing American Family — Preference to freshmen. Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, same sex cohabitation and marriage: what do all these changes mean?

3 units, Aut (Rosenfeld)

5 units, Aut (Snipp)

SOC 46N. Race, Ethnic, and National Identities: Imagined Communities — Stanford Introductory Seminar. Preference to freshmen. How new identities are created and legitimated. What does it mean to try on a different identity? National groups and ethnic groups are so large that one individual can know only an infinitesimal fraction of other group members. What explains the seeming coherence of groups? If identities are a product of the imagination, why are people willing to fight and die for them? Enrollment limited to 16.

3 units, Spr (Rosenfeld)

POLITICAL AND COMPARATIVE SOCIOLOGY

SOC 108. Population and Society — (Graduate students register for 208.) Population size, composition, geographical distribution, and change in contemporary and historical perspective. Determinants of important processes affecting population including births, deaths, marriages, and geographical moves. Social, economic, and political consequences of population characteristics and population change. Population problems and policies.

4-5 units, Spr (Pals)

SOC 109. Sociology of Terrorism — (Graduate students register for 209.) Multidisciplinary including psychology, sociology, political science, and economics. Comparison of terrorist organizations and movements across institutions, places, and times; their motives, tactics, financing, and organization. Emphasis is on suicide bombing. What mass media think they know and what they do not know.

5 units, Spr (Meyersson Milgrom)

SOC 110. Politics and Society — (Graduate students register for 210.) Themes of political sociology, the origins and expansion of the modern state, linkages between state and society, the impact of the modern world system on national policies, the internal distribution of power and authority, and the structure of political group formation and individual participation in modern states. Emphasis is on modern empirical literature. GER:DB-SocSci

5 units (Meyer) not given 2005-06

SOC 111. State and Society in Korea — (Graduate students register for 211.) 20th-century Korea from a comparative historical perspective. Colonialism, nationalism, development, state-society relations, democratization, and globalization with reference to the Korean experience.

5 units (Shin) not given 2005-06

SOC 112. Comparative Democratic Development — (Enroll in POLISCI 147.)

5 units, Win (Diamond)

SOC 115A. Social Structure, Culture, and the Economy — (Graduate students register for 215A.) How neoclassical economists assume that society is a collection of individuals who act rationally and independently of one another, while economic sociologists emphasize the social context and relation with others as people work, buy, and sell. The interplay among social structure, culture, and economic life. Potential topics: religion and social class; centrality and power; markets, hierarchies, and networks; the diffusion of innovations; small worlds and scale-free networks; strong and weak ties; and brokers, bridges, and communication networks.

5 units, Win (Everton)

SOC 117A. China Under Mao — (Graduate students register for 217A.) The transformation of Chinese society from the 1949 revolution to the eve of China’s reforms in 1978: the creation of a socialist economy, the reorganization of rural society and urban workplaces, the emergence of new inequalities of power and opportunity, and the new forms of social conflict during Mao’s Cultural Revolution of 1966-69 and its aftermath. GER:EC-GlobalCom

5 units (Walder) not given 2005-06

SOC 118. Social Movements and Collective Action — (Graduate students register for 218.) Why social movements arise, who participates in them, the obstacles they face, and how to gauge movement success or failure? Theory and empirical research. Application of concepts and methods to a social movement such as civil rights, gay marriage equality, environmental justice, fair wages, anti-globalization, or pro-choice or anti-abortion.

5 units, Spr (Brandt)

SOC 130. Education and Society — (Graduate students register for 230; same as EDUC 220C.) The effects of schools and schooling on individuals, the stratification system, and society. Education as socializing individuals and as legitimizing social institutions. The social and individual factors affecting the expansion of schooling, individual educational attainment, and the organizational structure of schooling. GER:DB-SocSci

4-5 units, Win (Ramirez)

SOC 133. Computers and Interfaces — (Enroll in COMM 169/269.)

4-5 units, Win (Nass)
SOC 136. Law and Society — (Graduate students register for 236.) Major issues and debates in the sociology of law. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; the law in action versus the law on the books; organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement. GER:DB-SocSci

3-5 units, Aut (Dauber)

SOC 137. Homelessness: Its Causes, Consequences, and Policy Solutions — Homelessness as a social policy issue and concern within the local community. Service-learning format: students work with a local community partner to assess needs of local homeless, and evaluate policies and services delivery.

5 units, Aut (Barr)

SOC 138. American Indians in Comparative Historical Perspective — (Graduate students register for 238.) Demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty. GER:DB-SocSci

3-5 units, Win (Snipp)

SOC 152. Sociology of Japanese Society — Politics, business, work, social security, crimes, law, education, history, popular culture, folk culture, family structure, gender, and ethnic diversity. Goal is to challenge commonly held notions through sources such as empirical data, ethnographic accounts, movies, photos, and video footage. Comparative sociological perspectives to situate Japan in the wider world.

5 units, Spr (Tsutsui)

SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES

SOC 105. Status, Friendship, and Social Pressure — The basic social processes that structure the individual’s experience in interpersonal situations, including group pressure on individual choices, social control of deviants, operation of status distinctions (sex and race), and formation of friendships and intimate (love) relationships. Structured exercises and simulation gaming in section meetings provide experience with these processes. Lectures examine the processes in terms of theoretical ideas, empirical research, and clinical strategy. Enrollment limited to 30. GER: DB-SocSci

5 units (Staff) not given 2005-06

SOC 120. Interpersonal Relations — (Graduate students register for 220.) Forming ties, developing norms, status, conformity, deviance, social exchange, power, and coalition formation; important traditions of research have developed from the basic theories of these processes. Emphasis is on understanding basic theories and drawing out their implications for change in a broad range of situations, families, work groups, and friendship groups. GER:DB-SocSci

5 units (Ridgeway) not given 2005-06

SOC 121. Social Psychology and Social Structure — (Graduate students register for 221.) The individual’s relationship to social groups, from two-person groups to society at large. Emphasis is on how social structure shapes individuals and how individuals affect their social environment. Topics: identity, agency, interpersonal relations, social dilemmas, the life course, and collective behavior. GER:DB-SocSci

5 units, Win (Cooper)

SOC 122. Sociology of Culture — (Graduate students register for 222.) Why do people act like different kinds of culture? How do cultural taste and practice affect friendship patterns, academic success, occupational attainment, and marital selection? Emphasis is on the relationship between culture and social structure with attention to social networks, social class, cultural capital, and symbolic exclusion. Topics include musical taste, arts participation, leisure activity, urban legends, names chosen for children, and opinions, beliefs, and values. GER:DB-SocSci

5 units, Aut (Mark)

SOC 123. Sex and Love in Modern Society — (Graduate students register for 223.) Social influences on private intimate relationships involving romantic love and sexuality. Topics include the sexual revolution, contraception, dating, hook-ups, cohabitation, sexual orientation, and changing cultural meanings of marriage, gender, and romantic love. GER:DB-SocSci, EC-Gender

5 units (England) not given 2005-06

SOC 125. Sociology of Religion — (Graduate students register for 225.) The social patterns of religious belief and practice, and the classical and contemporary theoretical approaches to understanding these patterns. Topics: churches, sects and cults, sources of religious pluralism, relationships between religion and aspects of social structures including the economy, class structure, ethnicity, social networks, and the state. GER:DB-SocSci

5 units, Spr (Mark)

SOC 126. Introduction to Social Networks — (Graduate students register for 226.) Theory, methods, and research. Concepts such as density, homogeneity, and centrality; applications to substantive areas. The impact of social network structure on individuals and groups in areas such as communities, neighborhoods, families, work life, and innovations. GER:DB-SocSci

5 units, Win (Mark)

SOC 127. Bargaining, Power, and Influence in Social Interaction — (Graduate students register for 227.) Research and theoretical work on bargaining, social influence, and issues of power and justice in social settings such as teams, work groups, and organizations. Theoretical approaches to the exercise of power and influence in social groups and related issues in social interaction such as the promotion of cooperation, effects of competition and conflict, negotiation, and intergroup relations. Enrollment limited to 40. GER:DB-SocSci

3-5 units, Win (Cook)

SOC 128. Sociology of the Life Course — (Graduate students register for 228.) Focus is on continuity and change in human lives, and how an individual’s life course is linked to the fate of larger social structures. Individual life patterns and trajectories in the domains of family, education, and work. Topics include the transition to adulthood and the impact of disruptive historical change on life courses. Applying the life course approach to an area of student interest such as political attitudes, criminal careers, or health outcomes.

5 units, Win (Brandt)

SOC 150. The Family — Theories of social psychology to study interactions within American families and between the family and other institutions. Topics: the nature and history of the family, state regulation of families, variations by class and ethnicity, family violence, gender roles, parenting, and divorce. GER:DB-SocSci

5 units, Aut (Yiu)

SOCIAL STRATIFICATION AND INEQUALITY

SOC 132. Sociology of Education: The Social Organization of Schools — (Graduate students register for 332; same as EDUC 110/310.) Topics and case studies that elaborate on the embeddedness of classrooms and schools in social environments, spanning school processes such as stratification, authority, moral and technical specialization, curricular differentiation, classroom instruction, voluntary associations, social crowds, and peer influence. (SSPEP) GER:DB-SocSci

4 units, Spr (McFarland)

SOC 134. Education and the Status of Women: Comparative Perspective — (Enroll in EDUC 197.)

4-5 units (Staff) not given 2005-06
SOC 135. Seminar in Women’s Health: Women and Disabilities — (Enroll in FEMST 260/360.)
5 units, Spr (Krieger)

SOC 139. American Indians in Contemporary Society — (Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history. GER:EC-AmerCul
5 units, Win (Bobo)

SOC 140. Introduction to Social Stratification — (Graduate students register for 240.) The main classical and modern explanations of the causes of social, economic, and political inequality. Issues include: power; processes that create and maintain inequality; the central axes of inequality in contemporary societies (race, ethnicity, class, and gender); the consequences of inequality for individuals and groups; and how social policy can mitigate and exacerbate inequality. Cases include technologically simple groups, the Indian caste system, and the modern U.S. GER:DB-SocSci
5 units, Win (Grusky)

SOC 141. Controversies about Inequality — (Graduate students register for 241.) Debate format involving Stanford and guest faculty. Forms of inequality including racial, ethnic, and gender stratification; possible policy interventions. Topics such as welfare reform, immigration policy, affirmative action, discrimination in labor markets, sources of income inequality, the duty of rich nations to help poor nations, and causes of gender inequality.
5 units, Spr (Grusky)

SOC 141A. Social Class, Race, Ethnicity, Health — (Graduate students register for 241A.) Socioeconomic, racial, and ethnic differences in health status. Access to care of racial and ethnic minorities and those from lower social classes. Institutional factors such as government programs, and individual factors such as unconscious racial bias on the part of care providers or distrust of providers on the part of patients. The intersection of lower social class and ethnic minority status in health status and health care access. GER:DB-SocSci, EC-AmerCul
4-5 units, Win (Barr)

SOC 142. Sociology of Gender — (Graduate students register for 242.) Gender inequality in contemporary American society and how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes; arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations. GER:EC-Gender
5 units, Aut (Mollborn)

SOC 143. Prejudice, Racism, and Social Change — (Graduate students register for 243.) Ethno-racial attitudes and beliefs in the U.S. since 1965. Conflict including urban riots and cooperation including interracial dating, marriage, and mixed-race identity. Changes in racial prejudice and racism and their influence in domains of life such as jobs, housing, political power, and everyday interactions.
5 units (Bobo) not given 2005-06

SOC 144. Race and Crime in America — (Graduate students register for 244.) Theories of involvement in crime and deviance emphasizing youth gangs, poverty, the impact of racial residential segregation on involvement in crime, and the impact of high rates of incarceration. The role of the media in fostering fear of crime and racial stereotypes. Public policy questions such as post-incarceration disenfranchisement and reintegration.
5 units, Spr (Bobo)

SOC 145. Race and Ethnic Relations — (Graduate students register for 245.) Race and ethnic relations in the U.S. and elsewhere. The processes that render ethnic and racial boundary markers, such as skin color, language, and culture, salient in interaction situations. Why only some groups become targets of ethnic attacks. The social dynamics of ethnic hostility and ethnic/racial protest movements. GER:EC-AmerCul
5 units, Win (Bobo)

SOC 147. Crime and Incarceration — (Graduate students register for 247.) The process of criminal justice in the U.S.; major theories of criminal deviance. How individuals and social groups are processed through the criminal court system; historical changes in correctional philosophy and organizational structure; inmate socialization; and changes in the social environment of U.S. prisons. GER:DB-SocSci
5 units, Aut (Colwell)

SOC 148. Racial Identity — (Graduate students register for 248.) The construction and meanings of racial identities in the U.S. Attention is on multiracial identities and the shifting boundaries of racial categories in contemporary America. GER:EC-AmerCul
5 units (McDermott) not given 2005-06

SOC 149. The Urban Underclass — (Graduate students register for 249; same as URBANST 112.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Analysis of ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci
5 units, Spr (Rosenfeld)

ORGANIZATIONS, BUSINESS, AND THE ECONOMY

SOC 114. Economic Sociology — (Graduate students register for 214.) The sociological approach to production, distribution, consumption, and markets, emphasizing the impact of norms, power, social structure, and institutions on the economy. Comparison of classical and contemporary approaches to the economy among the social science disciplines. Topics: consumption, labor markets, organization of professions such as law and medicine, the economic role of informal networks, industrial organization, including the structure and history of the computer and popular music industries, business alliances, capitalism in non-Western societies, and the transition from state socialism in E. Europe and China. GER:DB-SocSci
5 units (Granovetter) not given 2005-06

SOC 115. Topics in Economic Sociology — (Graduate students register for 215.) Discussion of topics initially explored in 114/214, with emphasis on countries and cultures outside N. America. Possible topics: families and ethnic groups in the economy, corporate governance and control, corporate strategy, relations among firms in industrial districts and business groups, the impact of national institutions and cultures on economic outcomes, transitions from state socialism and the role of the state in economic development. Possible case studies: the U.S., Germany, Italy, Britain, France, Brazil, Korea, India, Japan, and China. Prerequisite: 114/214 or 314.
5 units (Staff) not given 2005-06

SOC 116. Globalization and Organizations — (Enroll in INTNLREL 131, IPS 231.)
5 units, Win (Drori)

SOC 154A. Science, Technology, and Development — (Enroll in IPS 230, INTNLREL 130.)
5 units, Aut (Drori)

5 units, Win (Hillmann)
SOC 161. The Social Science of Entrepreneurship — (Graduate students register for 261.) Who is likely to become an entrepreneur and where is entrepreneurship likely to occur? Classic and contemporary theory and research. Interaction with expert practitioners in creating entrepreneurial opportunities including venture and corporate capitalists. The role of culture, markets, hierarchies, and networks. Market creation and change, and factors that affect success of new organizations. Field projects on entrepreneurial environments such as technology licensing offices, entrepreneurial development organizations, venture capital firms, and corporate venturing groups. GER: DB-SocSci
      5 units, Spr (Thornton)

SOC 165. Power, Gender, and the Professions — (Graduate students register for 265.) Alternative views of professions and professionals, combining theories of professions and gender. The institutionalization of professional power and professional structure in the 20th century. Changing professional roles in the face of increasing bureaucratization of professional work. The role of gender in professional work, and alternative explanations for gender-based differences. How these forces operate, particularly in the professions of medicine, law, and academics. GER: DB-SocSci
      5 units (Barr) not given 2005-06

SOC 167A. Asia-Pacific Transformation — (Graduate students register for 267A.) Post-WW II transformation in the Asia-Pacific region, with focus on the ascent of Japan, the development of newly industrialized capitalist countries (S. Korea and Taiwan), the emergence of socialist states (China and N. Korea), and the changing relationship between the U.S. and these countries.
      5 units, Aut (Shin)

SOC 168. Managing Global Diversity: The Matrix of Change — (Enroll in PUBBLPOL 168.)
      5 units, Win (Meyersson Milgrom)

SOC 169. Health Care in America: The Organizations and Institutions that Shape the Health Care System — (Enroll in HUMBIO 160.)
      4 units, Aut (Barr)

SOC 169A. American Health Policy — (Enroll in HUMBIO 160A.)
      3 units, Spr (G. Heller, Lee)

SOCIOLOGICAL THEORY

SOC 170. Classics of Modern Social Theory — (Graduate students register for 270.) For majors only. Contributions of Marx, Weber, and Durkheim to contemporary sociology. Topics: the problem of social order and the nature of social conflict; capitalism and bureaucracy; the relationship between social structure and politics; the social sources of religion and political ideology; and the evolution of modern societies. Examples from contemporary research illustrate the impact of these traditions.
      5 units, Win (Oltuk)

RESEARCH METHODS

SOC 180. Introduction to Sociological Research — (Graduate students register for 280.) Focus is on strategies for designing research and analyzing data. GER: DB-SocSci
      5 units, Aut (Hillmann)

SOC 181B. Sociological Methods: Statistics — (Graduate students register for 281B.) Statistical methods of principal relevance to sociology: contingency tables, correlation, and regression.
      5 units (Staff) not given 2005-06

SOC 182. Designing Surveys for Social Science Research — Priority to undergraduates who have received URP funds. Practical introduction to survey methods. Topics include causality, research design, sampling, and item and questionnaire format. Offered through the Methods of Analysis Program in the Social Sciences (MAPSS). Enrollment limited to 25.
      3 units, Spr (Staff)

SOC 183. Qualitative Methods in Social Science Research — Priority to undergraduates who have received URP funds. Goal is to prepare students to design and implement their own qualitative research projects. Topics include: articulating research questions and objectives; connecting research to theoretical concerns in the social sciences; formulating appropriate research strategies; and project design. Offered through the Methods of Analysis Program in the Social Sciences (MAPSS). Enrollment limited to 25.
      3-5 units, Spr (Staff)

SOC 200. Senior Seminar for Majors — Capstone course in which sociological problems are framed, linked to theories, and answers pursued through research designs. WIM
      5 units, Aut, Spr (Cooper)

SOC 200H. Senior Seminar for Honors
      5 units (McDermott) not given 2005-06

SOC 202. Preparation for Honors Thesis — (Same as URBANST 202.) Primarily for juniors in Sociology or Urban Studies thinking about writing a senior honors thesis; sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. Students write a research prospectus and grant proposal for research funding. Urban Studies seniors writing an honors thesis register for 1 unit to present their work. For WIM credit, must be junior or sophomore registering for at least 3 units. WIM
      1-5 units, Win (Tuma)

INDIVIDUALIZED LEARNING EXPERIENCES, PRIMARILY FOR UNDERGRADUATE MAJORS

SOC 190. Undergraduate Individual Study
      1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 191. Undergraduate Directed Research — Work on a project of student’s choice under supervision of a faculty member. Prior arrangement required.
      1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 192. Undergraduate Research Apprenticeship — Work in an apprentice-like relationship with faculty on an on-going research project. Prior arrangement required.
      1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 193. Undergraduate Teaching Apprenticeship
      1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 196. Senior Thesis — Work on an honors thesis project under faculty supervision (see description of honors program). Must be arranged early in the year of graduation or before.
      1-15 units, Aut, Win, Spr, Sum (Staff)

FOR ADVANCED/COTERMINAL UNDERGRADUATES AND MASTER’S STUDENTS

SOC 208. Population and Society — (For graduate students; see 108.)
      4.5 units, Spr (Pals)

SOC 209. Sociology of Terrorism — (For graduate students; see 109.)
      5 units, Spr (Meyersson Milgrom)

SOC 210. Politics and Society — (For graduate students; see 110.)
      5 units (Meyer) not given 2005-06

SOC 211. State and Society in Korea — (For graduate students; see 111.)
      5 units (Shin) not given 2005-06

SOC 215A. Social Structure, Culture, and the Economy — (For graduate students; see 115A.)
      5 units, Win (Everton)

SOC 217A. China Under Mao — (For graduate students; see 117A.)
      5 units (Walder) not given 2005-06
SOC 218. Social Movements and Collective Action—(For graduate students; see 118.)  
5 units, Spr (Brandt)

SOC 230. Education and Society—(For graduate students; see 130; same as EDUC 220C.)  
4-5 units, Win (Ramirez)

SOC 231. World, Societal, and Educational Change: Comparative Perspectives—(Same as EDUC 136/306D.) Theoretical perspectives and empirical studies on the structural sources of educational expansion and differentiation, and on the cultural and structural consequences of educational institutionalization. Research topics: education and nation building; education, mobility, and equality; education, international organizations, and world culture. GER:DB-SocSci  
4-5 units, Win (Ramirez)

SOC 234. Research Seminar on Access to Justice—(Graduate students register for 334.) The functions and dysfunctions of modern legal systems. Topics include: official statements of the U.S. and the EU about the rights of parties to civil disputes; the roles of lawyers as gatekeepers and facilitators; the filtering process by which injuries and experiences become the basis for legal claims; access to and use of courts; the balance of power and advantage between individual persons and organizations in disputes. Prerequisite: advanced undergraduate or graduate standing, or consent of instructor.  
5 units (Sandefur) not given 2005-06

SOC 236. Law and Society—(For graduate students; see 120.)  
3-5 units, Aut (Landis Dauber)

SOC 238. American Indians in Comparative Historical Perspective—(For graduate students; see 138.)  
3-5 units, Win (Snipp)

SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES

SOC 220. Interpersonal Relations—(For graduate students; see 120.)  
5 units (Ridgeway) not given 2005-06

SOC 221. Social Psychology and Social Structure—(For graduate students; see 121.)  
5 units, Win (Cooper)

SOC 222. Sociology of Culture—(For graduate students; see 122.)  
5 units, Aut (Mark)

SOC 223. Sex and Love in Modern Society—(For graduate students; see 123.)  
5 units (England) not given 2005-06

SOC 224A. Traditions of Microsociology—(Same as EDUC 312A.) The educational applications of sociological and social psychological theory and research to interaction processes in schools. Readings include: foundational works by Mead, Schutz, and Simmel; contemporary work by Goffman, Homans, Merton, Blau, and Harold. Readings span empirical settings such as work, classrooms, gangs, primate societies, and children's games. Topics: processes of influence, role differentiation, identity formation, social mechanisms, and intra/inter group dynamics of peer relations. Methods for observation and analysis of small groups. (SSPEP)  
4 units, Win (McFarland) alternate years, not given 2006-07

SOC 224B. Contemporary Microsociology—(Same as EDUC 312B.) How to interpret interpersonal social situations using contemporary microsociological theories. Interaction processes observed in educational settings. The roles of intention, identity, routines, scripts, rituals, conceptual frameworks, and emotions in interaction. Processes by which interactions reverberate to more general changes in social structure. Readings include Goffman, Collins, Wieder, Garfinkel, Scheff, von Goethe, and Schegloff.  
4 units (Staff) alternate years, given 2006-07

SOC 225. Sociology of Religion—(For graduate students; see 125.)  
5 units, Spr (Mark)

SOC 226. Introduction to Social Networks—(For graduate students; see 126.)  
5 units, Win (Mark)

SOC 227. Bargaining, Power, and Influence in Social Interaction—(For graduate students; see 127.)  
3-5 units, Win (Cook)

SOC 228. Sociology of the Life Course—(For graduate students; see 128.)  
5 units, Win (Brandt)

SOCIAL STRATIFICATION AND INEQUALITY

SOC 237. Homelessness: Its Causes, Consequences, and Policy Solutions—Homelessness as a social policy issue and concern within the local community. Service-learning format: students work with a local community partner to assess needs of local homeless, and evaluate policies and services delivery.  
5 units, Aut (Barr)

SOC 239. American Indians in Contemporary Society—(For graduate students; see 139.)  
5 units, Spr (Snipp)

SOC 240. Introduction to Social Stratification—(For graduate students; see 140.)  
5 units, Win (Grusky)

SOC 241. Controversies about Inequality—(For graduate students; see 141.)  
5 units, Spr (Grusky)

SOC 241A. Social Class, Race, Ethnicity, Health—(For graduate students; see 141A.)  
4-5 units, Win (Barr)

SOC 242. Sociology of Gender—(For graduate students; see 142.)  
5 units, Aut (Mollborn)

SOC 243. Prejudice, Racism, and Social Change—(For graduate students; see 143.)  
5 units (Bobo) not given 2005-06

SOC 244. Race and Crime in America—(For graduate students; see 144.)  
5 units, Spr (Bobo)

SOC 245. Race and Ethnic Relations—(For graduate students; see 145.)  
5 units, Win (Bobo)

SOC 247. Crime and Incarceration—(For graduate students; see 147.)  
5 units, Aut (Colwell)

SOC 248. Racial Identity—(For graduate students; see 148.)  
5 units (McDermott) not given 2005-06

SOC 249. The Urban Underclass—(For graduate students; see 149.)  
5 units, Spr (Rosenfeld)

ORGANIZATIONS, BUSINESS, AND THE ECONOMY

SOC 214. Economic Sociology—(For graduate students; see 114.)  
5 units (Granovetter) not given 2005-06

SOC 215. Topics in Economic Sociology—(For graduate students; see 115.)  
5 units (Staff) not given 2005-06

SOC 260. Formal Organizations—(For graduate students; see 160.)  
5 units, Win (Hillmann)

SOC 261. The Social Science of Entrepreneurship—(For graduate students; see 161.)  
5 units, Spr (Thornton)
SOC 261B. Women in Organizations — (Same as OB 387) Women’s working experiences in managerial and professional positions. Career-related gender issues, including: the effects of gender proportions on a woman’s experience in a job; how to shape human resource policies and organizational cultures; how to pick an organization with good gender relations; how networking strategies of men and women differ; the realities of starting an independent business; how to maximize the fairness of promotions and pay; and how to cope with gender-related difficulties in work situations.

4 units, Win (Martin)

SOC 265. Power, Gender, and the Professions — (For graduate students; see 165.)

5 units (Barr) not given 2005-06

SOC 267A. Asia-Pacific Transformation — (For graduate students; see 167A.)

5 units, Aut (Shin)

SOCIOLOGICAL THEORY

SOC 252. Sociology of Japanese Society — Politics, business, work, social security, crimes, law, education, history, popular culture, folk culture, family structure, gender, and ethnic diversity. Goal is to challenge commonly held notions through sources such as empirical data, ethnographic accounts, movies, photos, and video footage. Comparative sociological perspectives to situate Japan in the wider world.

5 units, Spr (Tsutsui)

SOC 270. Classics of Modern Social Theory — (For graduate students; see 170.)

5 units, Win (Olszak)

RESEARCH METHODS

SOC 257. Causal Inference in Quantitative Educational and Social Science Research — (Same as EDUC 257C.) Quantitative methods to make causal inferences in the absence of randomized experiment including the use of natural and quasi-experiments, instrumental variables, regression discontinuity, matching estimators, longitudinal methods, fixed effects estimators, and selection modeling. Assumptions implicit in these approaches, and appropriateness in research situations. Students develop research proposals relying on these methods. Prerequisites: exposure to quantitative research methods; multivariate regression.

3 units (Reardon) not given 2005-06

SOC 280. Introduction to Sociological Research — (For graduate students; see 180.)

5 units, Aut (Hillmann)

SOC 281B. Sociological Methods: Statistics — (For graduate students; see 181B.)

5 units (Staff) not given 2005-06

PRIMARILY FOR DOCTORAL STUDENTS

300-level courses are limited to matriculated doctoral students; other students require consent of instructor.

GENERAL

SOC 300. Workshop: Teaching Development — For first-year Sociology doctoral students only. The principles for becoming an effective instructor, adviser, and mentor to undergraduates. Topics: ethics, course organization and syllabus development, test construction and grading, conflict resolution, common classroom problems, and University policies related to matters such as sexual harassment. Technologies and other topics related to making effective presentations, and campus resources to improve classroom performance. Roundtable discussions with faculty and advanced graduate students known for teaching excellence. Students may be asked to give demonstration lecture.

2 units, Spr (Beck)

SOC 305. Graduate Proseminar — For first-year Sociology doctoral students only. Introduction and orientation to the field of Sociology.

1 unit, Aut (Staff)

SOC 308. Social Demography — For graduate students and advanced undergraduates. Topics: models of fertility behavior, migration models, stable population theory, life table analysis, data sources, and measurement problems. How population behavior affects social processes, and how social processes influence population dynamics. Recommended: sociological research methods; basic regression analysis and log linear models.

5 units (Snipp) not given 2005-06

POLITICAL AND COMPARATIVE SOCIOLOGY

SOC 310. Political Sociology — Theory and research on the relationship between social structure and politics. Social foundations of political order, the generation and transformation of ideologies and political identities, social origins of revolutionary movements, and social consequences of political revolution. Prerequisite: doctoral student.

5 units (Walder) not given 2005-06

SOC 311A,B,C. Comparative Studies of Educational and Political Systems — (Same as EDUC 387A,B,C.) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)

2-5 units, A: Aut, B: Win, C: Spr (Meyer, Ramirez)

SOC 312. Workshop: Collective Action and Social Movements — Recent research on the legislative process, national and international social movements and collective action, and the intersection of politics, organizations, and social movement activity. Graduate student presentations. May be repeated for credit.

1-5 units, Aut, Win, Spr (McAdam, Olszak)

SOC 316. Historical and Comparative Sociology — Theory and research on macro-historical changes of sociological significance such as the rise of capitalism, the causes and consequences of revolutions, and the formation of the modern nation state and global world system. Methodological issues in historical and comparative sociology.

5 units, Aut (Shin)

SOC 318. Social Movements and Collective Action — Topics: causes, dynamics, and outcomes of social movements; organizational dimensions of collective action; and causes and consequences of individual activism.

5 units, Spr (McAdam)

SOC 334. Research Seminar on Access to Justice — (For graduate students; see 234.)

5 units (Sandefur) not given 2005-06

SOC 337. Workshop on Korean Studies — For graduate students or undergraduates working on honors theses. Comparative and sociological perspectives. Discussions of readings, presentation of project findings, or participation in faculty’s research.

2 units (Shin) not given 2005-06

SOC 368. Workshop: Politics and Social Change — Market reform, privatization, regime change, and political movements in rapidly changing societies. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units (Walder) not given 2005-06
SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES
SOC 317C. Workshop on Community and Youth Development—(Same as EDUC 317X.) The Youth Development Seminar presents an opportunity to discuss, read, and collaborate on youth development research issues by providing participants with access to the National Longitudinal Study of Adolescent Health Data (requires permission), tutorials on statistical methods to facilitate analysis of the dataset, and articles that help researchers develop tools of inquiry. Participants present their work for feedback.
1-2 units (Staff) not given 2005-06

2-5 units (Ridgeway) not given 2005-06

SOC 321. Workshop: Social Psychology — Current theories and research agendas, reviews of recent publications, presentations of ongoing research by faculty and students. May be repeated for credit. Prerequisite: consent of instructor.
2-5 units (Staff) not given 2005-06

SOC 322. Social Interaction, Social Structure, and Social Exchange — Current theory and research on topics such as social cognition and identity, group processes, bargaining and negotiation, social justice, social dilemmas and exchange, and networks and collective action. The social exchange approach.
5 units, Spr (Cook)

SOC 324. Social Networks — How the study of social networks contributes to sociological research. Application of core concepts to patterns of relations among actors, including connectivity and clusters, duality of categories and networks, centrality and power, balance and transitivity, structural equivalence, and blockmodels. Friendship and kinship networks, diffusion of ideas and infectious diseases, brokerage in markets and organizations, and patronage and political influence in historical contexts.
3-5 units, Aut, Win, Spr (Hillmann)

SOC 326. Workshop: Sociology of Culture — Current theories and research agendas, critical reviews of recent publications, presentations of ongoing research by faculty and students. May be repeated for credit. Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Mark)

SOC 327. Frontiers of Social Psychology — Advanced topics, current developments, theory, and empirical research. Possible topics include social identity processes, status beliefs and processes, social exchange, affect and social cohesion, legitimacy, social difference and inequality, norms, and social dilemmas.
3-5 units (Ridgeway) not given 2005-06

SOC 342B. Gender and Social Structure — The role of gender in structuring contemporary life. Social forces affecting gender at the psychological, interactional, and structural levels. Gender inequality in labor markets, education, the household, and other institutions. Theories and research literature.
3-5 units (England) not given 2005-06

SOCIAL STRATIFICATION AND INEQUALITY
SOC 332. Sociology of Education: The Social Organization of Schools — (For graduate students; see 132; same as EDUC 110/310.)
4 units, Spr (McFarland)

SOC 336. Sociology of Law — Classical perspectives and contemporary developments in the sociological investigation of law and legal systems. Foundational works in the sociology of law, contemporary statements, and topics of interest to participants. Possible topics include: legal services markets; the effects of law on behaviors and attitudes; the workings of concrete components of legal institutions; and comparative legal systems. May be repeated for credit.
3-5 units (Sandefur) not given 2005-06

SOC 340. Social Stratification — Classical and contemporary approaches to the unequal distribution of goods, status, and power. Modern analytic models of the effects of social contact, cultural capital, family background, and luck in producing inequality. The role of education in stratification. The causes and consequences of inequality by race and gender. The structure of social classes, status groupings, and prestige hierarchies in various societies. Labor markets and their role in inequality. The implications of inequality for individual lifestyles. The rise of the new class, the underclass, and other emerging forms of stratification. Prerequisite: Ph.D. student or consent of instructor.
5 units, Win (Grusky)

SOC 342A. Race and Ethnic Relations — Presentations of current work by faculty, students, and guest speakers. Recent publications and contemporary issues. May be repeated for credit. Prerequisite: consent of instructor.
3-5 units (McDermott) not given 2005-06

SOC 344. Changing Ideologies of Race in the U.S. — Research by historians, social psychologists, political scientists, and sociologists on the content, roots, and social dynamics of racial identities and beliefs.
3 units (Bobo) not given 2005-06

SOC 345. Seminar in Comparative Race and Ethnic Relations — Factors that create, maintain, and diminish the salience of race and ethnic boundaries. Theoretical debates surrounding the emergence, persistence, and change in racial and ethnic boundaries, nationalism and sovereignty, and mobilization. Empirical evidence on race and ethnic tensions, conflict, and warfare. The relationship between democracy, immigration, and diversity.
5 units (Olzak) not given 2005-06

ORGANIZATIONS, BUSINESS, AND THE ECONOMY
SOC 314. Economic Sociology — Classical and contemporary literature covering the sociological approach to markets and the economy, and comparing it to other disciplines. Topics: consumption, labor, professions, industrial organization, and the varieties of capitalism; historical and comparative perspectives on market and non-market provision of goods and services, and on transitions among economic systems. The relative impact of culture, institutions, norms, social networks, technology, and material conditions. Prerequisite: doctoral student or consent of the instructor.
5 units (Granovetter) not given 2005-06

SOC 335. Illegal Organizations and the State — The political economy of illegal organizations and their relationship to the state from contemporary and historical-comparative perspectives. When do state governments enforce the deterrence of illegal behavior? When do states redefine the boundary between legal and illegal behavior? When do they promote such activities to advance their own interests? Topics: state-sponsored terrorism; organized crime such as the Mafia as placeholder for government; violence and coercion in state building; organized corruption; sea piracy and privateering as instruments in conflicts between states; weapon smuggling; and the production and distribution of narcotics.
3-5 units, Win (Hillmann)

SOC 355. Higher Education and Society — (Enroll in EDUC 355X.)
3 units (Gamport) not given 2005-06

SOC 360. Foundations of Organizational Sociology — Core problems in the sociology of organizations, main theoretical perspectives, and research programs directed at evaluating these perspectives.
5 units (Staff) not given 2005-06

SOC 361. Social Psychology of Organizations — (Same as OB 671.) Social psychological theories and research relevant to organizational behavior. Current research topics in micro-organizational behavior and their relationship to cognitive and social psychology and sociology. Topics
include models of attribution, social comparison and justice, commitment, stereotyping, informal relationships, groups, and leadership. Prerequisites: Ph.D. student, and a graduate-level social psychology course.

4 units, Spr (Staff)

SOC 362. Organization and Environment — (Same as OB 672.) Leading sociological approaches to analyzing relations of organizations and environments emphasizing dynamics, Theoretical formulations, research designs, and results of empirical studies. Prerequisite: Ph.D. student.

4 units, Win (Hannan)

SOC 363. Social and Political Processes in Organizations — (Same as OB 676.) Seminar. Focus is on cognition, attitudes, and behavior in organizations, drawing on psychological and sociological research at the meso level of analysis. Topics vary each year, including organizational learning and decision making; power and conflict; emotions in organizations; mobility and stratification; gender inequality and discrimination; networks; organizational justice and legitimacy; cultural perspectives on organizations. Prerequisite: Ph.D. student.

4 units, Spr (Martin)

SOC 363A. Seminar on Organizational Theory — (Same as EDUC 375A.) For Ph.D. students. Social science literature on organizations. Major theoretical traditions and debates. The intellectual development of the field reflects shifts in emphasis in studies from workers to managers, organizational processes to outputs, and single organizations to populations of organizations. May be repeated for credit.

5 units, Win (Powell)

SOC 363B. Seminar on Organizations: Institutional Analysis — (Same as EDUC 375B.) The fruitfulness of research programs from institutional, network, and evolutionary perspectives in explaining large-scale change in organizational populations and institutions.

3-5 units, Spr (Powell)

SOC 366. Organizational Behavior and Analysis — (Same as EDUC 288X.) Principles of organizational behavior and analysis; theories of group and individual behavior; organizational culture; and applications to school organization and design. Case studies.

4 units, Aut (McFarland)

SOC 367. Institutional Analysis of Organizations — Reading and research on the nature, origins, and effects of the modern institutional system. Emphasis is on the effects of institutional systems on organizational structure.

3-5 units, Aut (Scott)

SOC 369. Network Analysis of Formal and Informal Organizations — (Same as EDUC 316.) The educational applications of social network analysis. Introduction to social network theory, methods, and research applications in sociology. Network concepts of interactionist (balance, cohesion, centrality) and structuralist (structural equivalence, roles, duality) traditions are defined and applied to topics in small groups, social movements, organizations, communities. Applications to data on schools and classrooms. (SSPEP)

4-5 units (McFarland) alternate years, given 2006-07

SOC 374A,B. Research Workshop: Knowledge Networks — (Same as EDUC 374A,B.) Research workshop. Key factors that shape processes of transferring basic knowledge into commercial development. Topics: the sociology and economics of science, intellectual property and patenting issues, university-industry relations, cross-national differences in knowledge transfer and science/technology policy, and entrepreneurial activity in universities. Students must have or develop research projects on these topics. Undergraduate prerequisite: consent of instructor.

A: 1-3 units, Win, B: 2-3 units, Spr (Powell)

SOC 376. Perspectives on Organization and Environment — (Enroll in OB 674.)

4 units, Win (Staff)

SOCIOLOGICAL THEORY

SOC 370A. Sociological Theory: Social Structure, Inequality, and Conflict — The traditions of structural analysis derived from the work of Marx, Weber, and related thinkers. Antecedent ideas in foundational works are traced through contemporary theory and research on political conflict, social stratification, formal organization, and the economy.

3-5 units, Aut (Olzak)

SOC 370B. Social Interaction and Group Process — The analyses of social solidarity and group processes derived from such thinkers as Durkheim, Simmel, and Mead. Antecedent ideas in foundational works are traced through contemporary theory and research on small group processes, social networks, group identification, and related subjects.

3-5 units, Spr (Zelditch)

SOC 372. Theoretical Analysis and Design — Theoretical analysis and the logical elements of design, including the systematic analysis of the logical structure of arguments, the relationship of arguments to more encompassing theoretical or metatheoretical assumptions, the derivation of logical implications from arguments, assessments of theoretically significant problems or gaps in knowledge.

3-5 units, Aut (Zelditch)

RESEARCH METHODS

SOC 374A. Research Workshop: Knowledge Networks — (Same as EDUC 374A.) Research workshop. Key factors that shape processes of transferring basic knowledge into commercial development. Topics: the sociology and economics of science, intellectual property and patenting issues, university-industry relations, cross-national differences in knowledge transfer and science/technology policy, and entrepreneurial activity in universities. Students must have or develop research projects on these topics. Undergraduate prerequisite: consent of instructor.

1-3 units, Win (Powell)

SOC 380. Qualitative Methods — Equivalent to 180/280, but restricted to doctoral candidates in Sociology or Sociology of Education. Methods in contemporary sociological research, focusing on strategies for designing research and analyzing data.

5 units (Staff) not given 2005-06

SOC 381A. Sociological Methods 1A: Computer-Assisted Data Analysis — The computer as research tool. Common data sets in the social sciences. Necessary skills for further courses in sociological methodology.

3 units (Everton) not given 2005-06

SOC 382. Sociological Methodology II: The General Linear Model — The general linear model for discrete and continuous variables. Introduction to model selection, the principles of estimation, assessment of fit, and modeling diagnostics. Prerequisites: 281A,B, or equivalents.

3-6 units, Win (Tuma)

3-6 units, Spr (Tuma)

SOC 387. Frontiers of Quantitative Sociological Research — Advanced topics in quantitative sociological research, especially recently-developed models and methods. Possible topics: robust regression methods, bootstrapping, local likelihood estimation, quantile regression, two-sided logit models, event count models, event sequence models, heterogeneous diffusion models, and models for change in social networks.

3-5 units (Tuma) not given 2005-06

SOC 388. Log-Linear Models — Analysis of categorical data with log-linear and negative binomial models. Measures of fit and hypothesis testing.

5 units, Aut (Rosenfeld)
SOC 389. Mixed Method Research Design and Analysis — Research designs that incorporate qualitative and quantitative analyses in a single project. The tension between thinking case-wise and variable-wise; how the focus on relationships between variables that is the hallmark of the quantitative approach can be brought into qualitative work. 
3-5 units (England) not given 2005-06

GRADUATE INDIVIDUAL STUDY

SOC 390. Graduate Individual Study
1-15 units (Staff)

SOC 391. Graduate Directed Research
1-15 units (Staff)

SOC 392. Research Apprenticeship
1-15 units (Staff)

SOC 393. Teaching Apprenticeship
1-15 units, Aut, Win, Spr, Sum (Staff)

SOC 394. Thesis
1-15 units, Aut, Win, Spr, Sum (Staff)

SOC 395. Research Internship — Graduate students integrate internship work into their academic program. Students register in the quarter following internship work and complete a research report outlining their work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets requirements for Curricular Practical Training for students on F-1 visas. Work completed cannot be counted toward the departmental research assistantship requirement.
1-15 units (Staff)

OVERSEAS STUDIES

These courses are approved for the Sociology major and taught at the campus indicated. Course descriptions can be found in the “Overseas Studies” section of this bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

BERLIN

SOC 158S. Theory from the Bleachers: Reading German Sports and Culture
3 units, Win (Junghanns)

FLORENCE

SOC 114S. Migrations and Migrants: The Sociology of a New Phenomenon
5 units, Spr (Allam)

OXFORD

SOC 117W. Gender and Social Change in Modern Britain
4 units, Aut (Palmer)

PARIS

SOC 115S. Immigration in France
4 units, Spr (Maurer)

SANTIAGO

SOC 111S. Social Heterogeneity in Latin America — (Same as SPAN-LIT 164S.)
5 units, Aut (Valdés)

SEMINARS

SOC 107S. Community Reconstruction and Development in Post-Apartheid South Africa — (Same as AFRICAAM 121.) Location: Cape Town, South Africa.
4 units, Win (Stanton)

CENTER FOR SPACE SCIENCE AND ASTROPHYSICS

Director: Robert V. Wagoner

Associate Directors: Umran S. Inan, Roger W. Romani, Philip H. Scherrer

Professors: Roger Blandford (Physics, SLAC), Elliot Bloom (SLAC), W. Gary Ernst (Geological and Environmental Sciences), Lambertus Hesselink (Electrical Engineering), Umran S. Inan (Electrical Engineering), Steven Kahn (Physics, SLAC), Peter F. Michelson (Physics), Vahe Petrosian (Physics), Norman H. Sleep (Geophysics), G. Leonard Tyler (Electrical Engineering)

Associate Professors: Tom Abel, Bruce B. Lusignan (Electrical Engineering), Roger W. Romani (Physics), Howard Zebker (Electrical Engineering, Geophysics)

Assistant Professors: Steve Allen, Sarah Church (Physics), Guenther Walther (Statistics)

Professors (Research): C.-W. Francis Everitt (Hansen Laboratory), Philip H. Scherrer (Physics)

Associate Professor (Research): Chris Chyba (Geological and Environmental Sciences)

Consulting Professors: Alan M. Title, Martin Walt (Electrical Engineering)

SLAC Staff Physicist: Grzegorz Madejski

Center Offices: Varian, Room 316

Mail Code: 94305-4060

Phone: (650) 723-1439

Email: danav@stanford.edu

Web Site: http://www.stanford.edu/group/CSSA/

The center is an interdepartmental organization coordinating teaching and research in space science and astrophysics. Its members are drawn from the Department of Geological and Environmental Sciences in the School of Earth Sciences; the departments of Aeronautics and Astronautics, Electrical Engineering, and Mechanical Engineering in the School of Engineering; the departments of Applied Physics, Physics, and Statistics in the School of Humanities and Sciences; the W. W. Hansen Experimental Physics Laboratory; and the Stanford Linear Accelerator Center. Its membership also includes all faculty and appropriate staff at the Kavli Institute for Particle Astrophysics and Cosmology, located at SLAC and the Physics department.

Research now in progress covers a wide array of investigations and is approached in a variety of ways, including experiments flown on rockets, satellites, and space probes; ground-based observations made from the Hobby-Eberly Telescope, the Wilcox Solar Observatory, and from national observatories; and theoretical research including computer modeling. Topics currently being studied include cosmology, gamma-ray astronomy, gravitation theory and experiments, including gravitational waves (LIGO, LISA), guidance and control, high-energy astrophysics, ionospheric and magnetospheric physics, microwave and infrared astronomy, planetary sciences, solar physics, solar-terrestrial phenomena, stellar structure, theoretical astrophysics, x-ray and extreme ultraviolet astronomy, and the study of life in the universe. Some of these projects involve opportunities for collaboration with scientists at the Lockheed-Martin Research Laboratory through the Stanford-Lockheed Institute for Space Research, the NASA/Ames Research Center, and the SETI Institute.

Stanford is a member of the Universities Space Research Association, a consortium of universities which operates the Lunar Science Institute in
Stanford is the lead institution for the GLAST gamma-ray observatory, Gravity Probe B, and the Solar Oscillations Investigation on the Solar and Heliospheric Observatory spacecraft (SOHO); and participates in the USA X-ray satellite and the Soft X-Ray Telescope program on the Japanese Yohkoh spacecraft.

Stanford is also a member of the Hobby-Eberly Telescope Consortium which has constructed a 10-meter telescope at the McDonald Observatory of the University of Texas. Full science operations are in progress.

The facilities of the center are available to any interested and qualified student, who must be admitted by and registered in a department. The departments of Aeronautics and Astronautics, Applied Physics, Electrical Engineering, Mechanical Engineering, and Physics offer opportunities leading to an M.S. or Ph.D. degree for work in space science or astrophysics. The center also offers opportunities to undergraduates who may, for instance, participate in research projects in their junior or senior years, on a part-time basis during the school year or on a full-time basis during the summer. The Astronomy Course Program operates a small student observatory where students may gain practical experience in astronomical observing. The course list at the end of this entry includes courses of interest to undergraduates, as well as courses primarily of interest to graduate students.

Further information is available from the director.
The Language Center is designed to enable students to develop a concentration in a particular area of interest, accompanied by basic work in other areas. Students are normally expected to declare the major during the sophomore year, but it is possible to declare during the junior year as well, particularly after overseas study in Santiago, Chile.

The major in Spanish requires 50 units in addition to completion of one of the second-year language sequences, or equivalent:

- **SPANLANG 21B, 22B, 23B, Second-Year Spanish for Heritage Language, or a combination of the above second-year language courses.**
- For area 5 (Portuguese language and Luso-Brazilian literature and culture), the following courses may replace the ones above: all Portuguese classes count toward the major in area 5:
  - PORTLANG 1A, 2A (or PORTLANG 1, 2, 3)
  - PORTLANG 11A, 12A

Course work for the major is grouped under the following subject areas; students are required to take four courses in one of these areas, two courses in a second and one in a third. Students in area five are required to take six courses in their main area, one course in a second area, and one course in a third area:

1. **Latin American/Caribbean studies (including Brazil)**
2. **Iberian Studies (including Portugal)**
3. **U.S. Latino/Chicano studies**
4. **Language in the Spanish-speaking world**
5. **Portuguese language and Luso-Brazilian literature and culture**

Course work for the major in areas 1-4 must include:

- **One of the language sequences or equivalent (see above).**
- **One 100-level Brazilian literature class.**
- **One 200-level Brazilian literature class.**

All courses in the department numbered 101 or above count toward the major. With the consent of the student’s adviser, up to 10 units of relevant course work outside the department and up to 10 units of course work done in English may be counted toward the major, more if the major subject area is Latino/Chicano studies. With the consent of the adviser, up to 25 units of relevant course work taken abroad may be counted toward the major. All courses must be taken for a letter grade. SPANLANG 100, Advanced Oral Communication, does not count toward the major. Courses taken credit/no credit do not count toward the major.

**How to Declare a Major** — Students interested in declaring a Spanish major should see the majors and minors coordinator, Josué Cartagena-Calderón, or the undergraduate adviser, Lúcia Sá.

**Double Majors** — The major in Spanish and Portuguese is designed to combine readily with a second major in another field and with study abroad. Students may not count the same course to fulfill requirements in both majors.

**Courses for Heritage Language Speaker** — The Language Center offers a series of second- and third-year courses specially designed for students who grew up in homes where Spanish is spoken and who wish to develop their existing linguistic strengths. See the “Language Center” section of this bulletin for these courses. The suffix ‘B’ in course numbers indicates these courses.

**MINORS**
The department offers two minor concentrations. With the consent of the student’s adviser, up to 10 units of relevant course work outside the department, and up to 15 units of relevant course work taken abroad, may count toward the following minors:

**LANGUAGE AND CULTURE STUDIES**
This minor is intended for students who wish to focus on developing advanced linguistic competence in Spanish and/or Portuguese, or who wish to combine acquisition of linguistic competence with the study of the literature, thought, culture, or language systems of the Spanish- or Portuguese-speaking world.

**Requirements** — Thirty units of course work at the level of SPANLANG 11 or above, and/or in Portuguese at any level. Students must take at least three courses in one of the following subject areas (note that eligible courses change annually):

- 1. Latin American and Iberian Studies; recommended: SPANLIT 133, 136, 139, 149, 173, and 194; and any SPANLIT course numbered 213-279.
- 3. Advanced Language: any combination of second-year Spanish and/or first- and second-year Portuguese, plus a selection of 100- and 200-level language courses; recommended: SPANLIT 207.
- 4. Luso-Brazilian Language and Culture; recommended: PORTLANG 11A, 12A; PORTLIT 268.

**CULTURE AND AREA STUDIES**
This minor is intended for students who wish to study the literature, culture, or thought of the Spanish- and Portuguese-speaking world without necessarily acquiring proficiency in Spanish or Portuguese language. Students choosing this minor are strongly encouraged to take language courses in Spanish or Portuguese, including reading courses (such as SPANLANG 50 or PORTLANG 50). Such courses count toward, but are not required for, this minor.

**Requirements** — Thirty units of course work in Latin American, Iberian, U.S. Latino/Chicano, or Luso-Brazilian literature, culture, language, and thought studied in the original or in translation at the level of SPANLANG 11 or above.

**HOW TO DECLARE A MINOR**
For minors in the School of Humanities and Sciences, students must complete their declaration of the minor no later than the last day of the quarter two quarters before degree conferral. For example, a student graduating in June (Spring Quarter) must declare the minor no later than the last day of Autumn Quarter of senior year. Students declaring a minor should meet with the majors and minors coordinator, Josué Cartagena-Calderón.

**HONORS PROGRAM**
Spanish and Portuguese majors with a grade point average (GPA) of 3.3 (B+) or better in major courses may apply to the honors program in Spring Quarter of the junior year. Students should submit an application for the honors program and a proposal outline and may enroll for 2 units of credit in DLCL 189, Honors Thesis Seminar, for the drafting or revision of the thesis proposal and preliminary research. Honors students are encouraged to participate in the honors college coordinated by the Division of Literatures, Cultures, and Languages and offered at the end of the summer before the senior year. In Autumn Quarter of the senior year, students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in SPANLIT 198 while composing the thesis during Winter Quarter. Each honors student must write an honors essay of 20-25 pages under the direction of a faculty member who serves as adviser, and the completed thesis...
must be submitted by the end of Winter Quarter. A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis. Consult the undergraduate adviser for additional information on the honors program.

OVERSEAS STUDIES

All majors are strongly encouraged to study abroad. To transfer credits from non-Stanford programs abroad, consult the Office of the Registrar. Depending on course selections, up to 25 units of course work taken abroad may be applied toward the major and 15 units toward the minor in Spanish. Students planning study abroad, or returning from study programs, are encouraged to consult with the majors and minors coordinator or an undergraduate adviser to coordinate the course work from abroad with their degree program.

Both the department and Bechtel International Center maintain information banks on study abroad programs. Stanford sponsors the following options.

STANFORD IN SANTIAGO, CHILE

The Stanford Program in Santiago, Chile, requires one year of college Spanish to begin study in Autumn, one year plus one quarter to begin in Winter, and completion of two years to begin in Spring. Course work in Santiago is done entirely in Spanish, with the opportunity to attend classes at Chilean universities during Spring Quarter. Detailed information, including curricular offerings, is listed in the “Overseas Studies” section of this bulletin, or on the Overseas Studies Program web site at http://osp.stanford.edu. Internships and research opportunities may be arranged for two quarter students.

BRAZIL AND PORTUGAL

The University maintains a relationship with the Universidade Estatal do Rio de Janeiro in Brazil. Students interested in study in Brazil or Portugal should contact Professor Sá or Lyris Wiedemann.

SPAIN

The Department of Spanish and Portuguese recommends study in Spain with the Hamilton College Academic Year in Spain program, administered by the Department of Romance Languages of Hamilton College in cooperation with faculty members of Williams and Swarthmore colleges. Two distinguishing features of this program are: (1) Spanish must be spoken at all times, both in and outside of class; all students are required to sign a pledge to this effect before their arrival in Madrid; (2) the arrangement of independent study projects in lieu of regular courses. The program is based in Madrid, where the cultural, educational, social, and geographical benefits are optimal.

An additional excellent program recommended by the department is the Madrid campus of St. Louis University. This program has many of the features of the Hamilton College program. In addition, it has its own buildings and facilities located on the outskirts of the University of Madrid campus. This is the only U.S. overseas studies program in Spain that has received full accreditation by the Spanish authorities.

Students interested in study in Spain should consult Professor Haro or Predmore.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the “School of Education” section of this bulletin and the credentials administrator, School of Education.

COTERMINAL B.A. AND M.A.

The requirements for the coterminal B.A. are the same as those outlined below for the M.A. No course can count for both the B.A. and M.A. degrees. Contact Graduate Admissions at the Registrar’s Office for information.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

STEP COTERMINAL TEACHING PROGRAM

The Department of Spanish and Portuguese, in cooperation with the Stanford Teacher Education Program (STEP) of the School of Education, offers a special course of study for students interested in becoming teachers. By following this course of study in Spanish Language, Literatures, and Cultures and enrolling in the STEP Coterminal Teaching Program, students can, after 5 years, receive a B.A. in Spanish and Portuguese, an M.A. in Education, and a California Teaching Credential.

The Spanish Language, Literatures, and Cultures curriculum consists of approximately 50 quarter units in addition to demonstrated proficiency in the language, defined as listening, speaking, reading, and writing at a level equivalent to advanced on the ACTFL Oral Proficiency Interview. This course of study fulfills all the major requirements of the Department of Spanish and Portuguese and includes coursework in linguistics and language diversity studies, the history of the Spanish-speaking world, and Spanish literature and cultures.

Students enrolled in the STEP Coterminal Teaching Program are also expected to complete a series of core courses during their undergraduate years. These include one course in developmental psychology; one course in cognitive psychology; one course in the social foundations of education; one course on the role of race, class, and ethnicity in American society; a structured internship experience in a community-based organization serving youth and/or their families; and a teaching practicum offered by the School of Education.

For more information about this option, please consult Professor Valdés and/or the coordinator of the STEP Coterminal Teaching Program in CERAS 309; (650) 725-6321 or (650) 725-0652.

GRADUATE PROGRAMS

University requirements for the M.A. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS IN SPANISH AND PORTUGUESE

This terminal M.A. degree program is for students who do not intend to continue their studies through the Ph.D. degree. Students in this program may not apply concurrently for entrance to the Ph.D. program. Students must complete a minimum of 45 graduate-level units, 36 of which must have a grade point average (GPA) of 3.0 or above.

The requirements of the M.A. are:

1. One linguistics course (LINGUIST 203, 204, 205, 206, 207), one course in language pedagogy, and one course in literary or cultural theory
2. Two 200-or-above courses in Latin American or Latino/Chicano literature
3. Two 200-or-above courses in Peninsular literature or Luso-Brazilian literature
4. Reading knowledge of one foreign language other than Spanish (preferably Portuguese for students concentrating in Spanish)

Independent study courses (SPANLIT 299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by permission of one of the graduate advisers, Yvonne Yarbro-Bejarano or Gordon Brotherston.

In addition, students may take approved courses in related fields such as classics, comparative literature, education, history of art, linguistics, modern thought, and philosophy.

DOCTOR OF PHILOSOPHY

The requirements of the Ph.D. are:

1. 135 units of graduate-level course work with a grade point average (GPA) of 3.0 (B) or above. Units completed toward the M.A. degree can be counted for the Ph.D.
2. One course in Spanish linguistics, one course on methods of teaching Spanish, and one course on introduction to literary theory
3. A reading knowledge of Portuguese and one other foreign language
4. The qualifying paper, the comprehensive, and the University oral examinations, as described below
5. Teaching of three to five courses in the department
6. Completion of a dissertation

Independent study courses (299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by consent of the graduate adviser. For basic residency and candidacy requirements, see the “Graduate Degrees” section of this bulletin. For further information, consult the department’s Graduate Student Handbook.

In preparation for teaching, Ph.D. candidates must take APPLLING 201 and/or SPANLIT 300 in the first year.

In consultation with the adviser, students select one major field of study from the following:

1. Spanish Literature of the Golden Age
2. Modern Spanish Literature
3. Spanish American Literature to Independence
4. Spanish American Literature of the 19th and 20th Centuries
5. Chicano Literature and Culture.

In addition, candidates select two secondary areas of study outside the major field from the following:

1. Spanish Medieval Literature
2. Spanish Literature of the Golden Age
3. Modern Spanish Literature
4. Spanish American Literature of the Colonial Period
5. Spanish American Literature from Independence
6. Chicano Literature
7. Literary Theory
8. Linguistics
9. Spanish American Film
10. Brazilian Literature

At least four courses must be taken in the major field of study. At least two courses must be taken in each secondary area. Students whose major field is in Spanish-American or Latino/Chicano Literature must choose one secondary area in Peninsular literature and vice versa. One secondary area of concentration may be taken outside the department in consultation with the adviser.

In addition to the department’s course offerings, students may take relevant courses with the approval of their adviser in other departments and programs, such as the graduate programs in Comparative Literature, Feminist Studies, History, Humanities, or Modern Thought and Literature. It is also possible to complete a minor in another department with approval of the adviser. Normally, not more than 25 units are taken outside the department.

After the first year of study, the student’s progress is evaluated by the faculty to determine whether continuation to the Ph.D. is recommended and whether there are particular areas where improvement is needed. For this evaluation, students submit a research paper of approximately 20 pages by the third week of Winter Quarter of the second year. The requirements for this paper are outlined in the Graduate Student Handbook.

If approval of the qualifying paper is granted, the student should file a formal application for candidacy no later than the end of the second year, as prescribed by the University. Course requirements are usually completed by the third year of study. A written comprehensive examination on the major field and secondary areas is then taken. The examination is based on a list of readings, selected in consultation with the adviser, which integrates major and secondary topics in both Peninsular and Latin American or Latino/Chicano Studies. At this time, students hand in a long research paper to be evaluated by the faculty. For further details, consult the Graduate Student Handbook.

Following the comprehensive examination, students should find a topic requiring extensive original research and request that a member of the department serve as dissertation adviser. The student must complete the Reading Committee form and request that the chair approve a committee to supervise the dissertation. The committee may advise extra preparation within or outside the department, and time should be allowed for such work. The University oral examination usually takes place one or two quarters after passing the comprehensive examination. The oral examination covers plans for the dissertation based on a prospectus approved by the committee (15 to 20 pages), and may be taken in English, Spanish, or Portuguese.

The dissertation must be submitted to the reading committee in substantially final form at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree. Ph.D. dissertations must be completed and approved within five years from the date of admission to candidacy. Candidates taking more than five years must apply for reinstatement of candidacy.

PH.D. MINOR

For a minor in Spanish or Portuguese, the student must complete 25 units, with a grade point average (GPA) of 3.0 or above, selected from courses numbered 200 or higher.

Students who choose a minor in another department should consult with advisers in that department.

JOINT PH.D. PROGRAMS

The Department of Spanish and Portuguese participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Spanish and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, and Slavic Languages and Literatures, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

OVERVIEW

1. Stanford Introductory Seminars, freshman and sophomore preference
2. Literature, Culture, Linguistics, and Theory (120-399)
   a) Undergraduate Courses (130-199)
   b) Courses for Advanced Undergraduates and Graduates (200-299)
      Language, Linguistics, and Theory (200-212)
      Peninsular Literature (213-239)
      Latin American Literature (240-279)
      Latino/Chicano Literature (280-289)
      Individual Work (299)
3. Graduate Seminars (300-399)
   a) Linguistics, Methodology, and Literary Theory (300-313)
   b) Peninsular Literature (314-339)
   c) Latin American Literature (340-369)
   d) Luso-Brazilian Literature (370-379)
   e) Chicano Literature (380-389)
   f) Individual Work (399)
   g) Dissertation Research (802)

Courses bearing the suffix “E” are taught in English and do not assume competence in another language. All other courses require some knowledge of Spanish or Portuguese, and may be given in those languages or bilingually.

SPANISH AND PORTUGUESE LANGUAGE COURSES

The following courses in Spanish and Portuguese language instruction represent a typical sequence for three years of Spanish and Portuguese language study. Majors and prospective majors should consult the requirements for a B.A. in Spanish or Portuguese above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at the Yost House, see the “Language Center” section of this bulletin.
SPANLANG 1,2,3. First-Year Spanish
5 units, Aut, Win, Spr (Guzmán, Schell, Urruela, Won, Zaragoza, Staff)

SPANLANG 11C,12C,13C. Second-Year Spanish: Cultural Emphasis
4-5 units, Aut, Win, Spr (Kenna, Schell, Urruela, Won)

SPANLANG 100. Advanced Oral Communication
3 units, Aut, Win, Spr (Staff)

SPANLANG 101. The Structure of Spanish
3-5 units, Aut, Win (Sierra)

SPANLANG 102. Composition and Writing Workshop
3-5 units, Aut (Kenna)

PORTLANG 1,2,3. First-Year Portuguese
5 units, 1: Aut, 2: Win, 3: Spr (Delgado)

PORTLANG 11A,12A. Accelerated Second-Year Portuguese
3-5 units, Aut, Win, Spr (Delgado, Wiedemann)

STANFORD INTRODUCTORY SEMINARS

SPANLIT 101N. Visual Studies and Chicana/o Art — Stanford Introductory Seminar. Preference to freshmen. Images, context, and spectatorship. Who is seen and not seen in visual contexts? Whose gaze is privileged? Which aspects of the past are circulated as visual representations? Whose fantasies are fed by which visual images? In what circumstances is looking and returning the gaze an act of political resistance? How do people interact with images to make and remake the world in the shape of their own desires and fantasies? GER:DB-Hum, EC-AmerCul
3-5 units, Win (Yarbro-Bejarano)

SPANLIT 111N. Contemporary Spain: The Challenge of Change — Stanford Introductory Seminar. Preference to freshmen. Years marked by experimentation and change in life in Spain. Society and culture from postwar times and the transition years from the Franco regime to the present democratic state. Student research project. Prerequisite: AP score of 4 or 5 in Spanish language or literature, or equivalent. GER:DB-Hum
4 units, Aut (Haro)

3-5 units, Win (Predmore)

SPANLIT 115N. Growing up Bilingual — Stanford Introductory Seminar. Preference to freshmen. How do people become bilingual? When and how do people use two languages in their everyday lives? What kinds of bilinguals are there? Intended for students who have grown up in bilingual communities or households, or who have studied Spanish formally for three or more years at the secondary level. Field project involving students studying in nearby Latin community.
3-5 units, Aut (Valdés)

SPANLIT 165Q — Machado, Jiménez, Lorca: An Exploration of Self and Society in 20th-Century Spanish Lyric Poetry — Stanford Introductory Seminar. Preference to sophomores. Focus is on: Antonio Machado’s Soledades, galerías y otros poemas, and Campos de Castilla; Juan Ramón Jiménez’ Diario de un poeta recien casado; and Federico Garcia Lorca’s Canciones. Prerequisite: reading knowledge of Spanish. Recommended: 100-level SPANLIT courses or equivalent.
3-5 units, Win (Predmore)

SPANLIT 178N. From Inside the First World: Women of Color Playwrights Re-mapping the U.S. — (Same as DRAMA 17N.) Stanford Introductory Seminar. Preference to freshmen. From the 60s to the present. Playwrights who create an aesthetic and political space outside the geopolitics of white capitalist patriarchy through social issues including the legacy of slavery and forced immigration, dislocation and relocation, diasporic ties, indigenous inheritance, sexuality, self-censorship, and the war on terror. Students create and perform in public short dramatic pieces informed by the playwrights’ style and subject matter. GER: DB-Hum, EC-AmerCul
3 units, Aut (Morgana)

PORTLIT 193Q, Spaces and Voices of Brazil through Films — Stanford Introductory Seminar. Preference to sophomores. Brazilian culture through films that portray its five cultural-geographical regions. Focus is on movies and complementary texts on Brazilian culture to understand the forces that shaped the multicultural reality of modern Brazil.
3-4 units, Aut (Wiedemann)

LITERATURE, CULTURE, LINGUISTICS, AND THEORY

UNDERGRADUATE

SPANLIT 42. Dances of Latin America — (Enroll in DANCE 42.)
2 units, Aut (Cashion)

SPANLIT 43. Afro-Brazilian and Afro-Peruvian Dance — (Enroll in DANCE 43.)
2 units, Win (Cashion)

SPANLIT 105C. The Literature of the Americas — (Enroll in COMP-LIT 142, ENGLISH 172E.)
5 units (Greene, Saldívar) not given 2005-06

3-5 units, Spr (Cartagena-Calderón)

SPANLIT 136. Introduction to Modern Peninsular Spanish Literature — Representative works of Spanish literature from the 1830s to the 1930s: Larra, Espronceda, Bécquer, Rosalía de Castro, Galdós, Unamuno, Valle-Inclán, Machado, and García Lorca. Emphasis is on texts related to the problem of Spain within the democratic tradition of Spanish liberalism. In English. GER:DB-Hum
3-5 units, Aut (Kenna)

SPANLIT 139. Spain Reimagined: the Generation of 1898 — New theories on the contribution of Spain’s Generation of 1898; new light on the role of philosophy, politics, religion, regenerationism, and Europeanization in intellectuals such as Giner de los Ríos, Joaquín Costa, Lucas Mallada, Ganiyey, Unamuno, Valle-Inclán, Ramiro de Maetzu, and Antonio Machado. Sources include essays, novels, and poetry.
3-5 units, Win (Fernández-Medina)

SPANLIT 140. Introduction to Methods of Literary and Cultural Analysis — Notions, terminologies, methods, tools, and resources of literary and cultural analysis. Topics include: literature and material culture; the formation of cultural identities; the intersection of aesthetics and nation building; popular and mass discourses; the re-democratization of authoritarian societies; and globalization. Sources include readings from peninsular Spanish, Latin American, and Latin/o literary texts, and other forms of artistic expression including film, music, and the visual arts.
3-5 units, Aut (S)
SPANLIT 149. The Mexican Novel and the Cinema—(Same as LATINAM 135.) Novels dealing with the Mexican Revolution from the revolutionary period to the 80s. Adaptations to film and television. Relationship among artistic languages.

5 units, Spr (Glantz)

SPANLIT 173. Literature, Consumption, and Revolution in Cuba—Preference to freshmen. How issues of consumption were articulated by Cuban authors and artists before, during, and after the revolution of 1959. How revolutionary discourse is constructed around the unstable relation between commerce and culture. Relationships between the texts or works of art and their circulation and distribution, and between consumption and gender, racial, and sexual identity. Commodification of the nation and nationalization of the commodities. Readings: José Martí, Fernando Ortiz, Reinaldo Arenas, Lezama Lima, and Nancy Morejón; movies by Gutiérrez Alea; and visual work by Wilfredo Lam. GER:DB-Hum

3-5 units, Spr (Rosa)

SPANLIT 181S. U.S.-Mexico Borderlands in Comparative Perspective—(Enroll in CHICANST 181S, CSRE 181S.)

5 units, Spr (Palafox)

SPANLIT 194. Women in Film and Film by Women: A Different Gaze?—Female representation in Hispanic films from male and female perspectives. Is there a distinctively feminine approach to filmmaking? How do female directors’ objectives, preoccupations, and aesthetics differ? Do women looking at women project less stereotypical images? Are male directors becoming more sympathetic to the woman’s plight? Can a woman director be one of the boys? Spanish, Latin American, and Chicano films. GER:DB-Hum, EC-Gender

3-5 units, Aut (Haro)

SPANLIT 199. Individual Work—Open only to students in the department, or by consent of instructor. Spanish and Portuguese.

1-12 units, Aut, Win, Spr, Sum (Staff)

ADVANCED UNDERGRADUATES AND GRADUATE STUDENTS

LANGUAGE, LINGUISTICS, AND THEORY

SPANLIT 207. Theory and Issues in the Study of Bilingualism—(Same as EDUC 149/249.) Sociolinguistic perspective. Emphasis is on typologies of bilingualism, the acquisition of bilingual ability, description and measurement, and the nature of societal bilingualism. Prepares students to work with bilingual students and their families and to carry out research in bilingual settings. (SSPEP) GER:DB-Hum

3-5 units, Aut (Valdés)

SPANLIT 214. Introduction to Ladino Literature—(Enroll in JEWISHST 247B.)

4 units, Win (Borovaya)

PENINSULAR LITERATURE

SPANLIT 222. The Problem of Two Spains: Literature and Society in 19th-Century Spain—Representative literary figures including Larra, Espronceda, Zorrilla, Rosalía de Castro, Bécquer, and Galdós. Modern lyric poetry and the modern realist novel against the background of Napoleonic invasions, the loss of overseas colonies, two Carlist civil wars, and frustrated attempts to establish the First Spanish Republic.

3-5 units, Spr (Predmore)

SPANLIT 224. The Spanish Republic, the Civil War, and the Aftermath—The significance of the civil war in Spanish, European, and world history. The International Brigades. The effect of war on the literary and cultural life of the country and the response of writers from Spain (Alberti, Lorca, Machado) and Latin America (Guillón, Neruda, Vallejo). Literary protest during the Franco regime by Aleixandre, Alonso, Cela, and Sender.

3-5 units, Spr (Predmore)

LATIN AMERICAN LITERATURE

SPANLIT 243. Cuba from Che to Elian in Literature and Film—The development of literature, film, art, and historical discourse in Cuba since 1959 as related to daily life. How these arts worked for or against political power and created heroes and heroines.

3-5 units, Win (Ruffinelli)

3-5 units, Win (Ruffinelli)

SPANLIT 263. Andean Literatures—The constitutive bases of Andean literatures in forms including oral narrative, poetry writing, music, dance, weaving, and ritual. Rethinking Western definitions of literature to recognize Andean types of textuality. Texts include José María Arguedas’s Los ríos profundos, El Inca Garcilaso’s Comentarios reales, and Felipe Guaman Poma de Ayala’s Nueva corónica y buen gobierno. Theories of transculturation, heterogeneity, textual ontology, textual rights, and heteroglossia.

3-5 units, Spr (Rowe)

SPANLIT 264. Intellectuals in Latin America: Between Interpretation and Reality—Configurations and functions of Latin American intellectuals in the 19th and 20th centuries. The relationship of the intellectual with political power.

3-5 units, Aut (Laera)

SPANLIT 268. Monstrous Fictions: Nightmares and Fantasies in Contemporary Latin American Narrative—Contemporary stories in which the ordinary world is moved by the irruption of some kind of monstrousity of bodies, spaces, or personal ties, or the coexistence of an aberrant double.

3-5 units, Win (Laera)

SPANLIT 269. Borges—Short stories, poetry, and essays. His works as literature and as a paradigm for the subsequent generation, utilizing film adaptations of the short stories to make comparisons between two different aesthetic expressions.

3-5 units, Win (Rosa)

SPANLIT 274. Say You Want a Revolution: Argentina and Brazil in the Sixties—Representations of the revolutionary subject in literary and aesthetic works at a moment of political antagonism. Aesthetic languages to examine cultural practices and modes through which literature and aesthetics intervene in the configuration of Hispanic American imaginaries.

3-5 units, Aut (Aguilar)

SPANLIT 275. Market and Culture in the Caribbean—How the Caribbean has been imagined and lived through textual and cultural strategies, reacting to and influencing political and economic scenarios. How the image of the Caribbean is constructed from spatial and social locations and how the cultural landscape has recently been transformed. Issues: cultural geography; migration; urban problems; and popular cultures, race, and feminism. GER:DB-Hum

3-5 units, Spr (Rosa)

SPANLIT 278. Senior Seminar: The Picarresco Across the Centuries—16th- and 17th-century picarresque fiction as one of Spain’s major contributions to world literature and a still influential literary mode. Its characteristics, antecedents, and evolution to the present. The picaro/a as social outcast; issues of subversion, social reform, justice, satirical power, and ironic criticism. Sources include works from Spain and Latin America.

3-5 units, Win (Cartagena-Calderón)

LATINO/CHICANO LITERATURE

SPANLIT 283. Chicana Feminisms—(Graduate students register for 383.) From the 70s to the present. Comparison to frameworks of social inequality including race, class, and sexuality. Readings include Alma García, Ana Nieto-Gómez, Marta Cotera, Elizabeth Martínez, Cherríe Moraga, Gloria Anzaldúa, Chela Sandoval, Ana Castillo, Sonia...
SPANLIT 287. Teatro America Workshop: The Theater of Native/Chicano America — (Same as DRAMA 179A.) A Chicana feminist and indigenist approach to the theory and practice of performance. Introduction to writing for the stage. Readings include plays, stories, and performance texts by Chicano/a and Native American writers. Public performance. Prerequisite: consent of instructor. GER:DB-Hum
5 units, Win (Yarbro-Bejarano)

SPANLIT 289. The Body in Chicana/o Cultural Representations — What is at stake in representations of the body? Social meanings of the body as depicted in Chicana/o cultural texts including literature and visual art. The body as: location of knowledge and resistance; target and challenger of racism, misogyny, class oppression, and homophobia; conforming to or refusing discourses of the ideal citizen; and site and agent of desire. Writers and artists may include Laura Aguilar, Oscar Casares, Arturo Islas, and Cherríe Moraga.
5 units, Win (Yarbro-Bejarano)

INDIVIDUAL WORK
PORTLIT 299. Individual Work — Open to department undergraduates or graduates by consent of professor. May be repeated for credit.
1-12 units, Aut, Win, Spr, Sum (Staff)

SPANLIT 299. Individual Work — Open to department undergraduates or graduates by consent of professor. May be repeated for credit.
1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE SEMINARS
Open to undergraduates with consent of instructor.

LINGUISTICS, METHODOLOGY, AND LITERARY THEORY
5 units, Spr (Valdés)

PENINSULAR LITERATURE
SPANLIT 319. Don Quijote and Cultural Studies — The impact of cultural studies on early modern Spanish literature and Cervantes’ Don Quijote. The cultural and confictive construction of gender, sexuality, ethnicity, and other formative features of early modern Spanish identity; materialist practices; empire and nation building; ideological formation and cultural authority in Counter-Reformation Spain.
3-5 units, Aut (Cartagena-Calderón)

LATIN AMERICAN LITERATURE
SPANLIT 333. The Verse Epic of the Americas — Since independence, major attempts have been made to write a Great Song of America or an epic commensurate with the geography and history of the continent. Focus is on such attempts in Spanish, Portuguese, and English. Pablo Neruda’s 1950 Canto general, the most celebrated success to date.
3-5 units, Spr (Brotherston)

SPANLIT 342. Literature and Political Economy in Latin America’s Long 19th Century — The relationship between literature and forms of exchange in Latin America during the republican period. From the first loans taken by the new states to the New York stock market crash, how Latin American writers reflected on commerce, finance, credit, and new forms of consumption and property, and how their literary production responded to them. Primary readings include Andres Bello, Bilbao, Gómez de Avellaneda, and Jorge Lu’s Borges. Theoretical texts include Simmel, Mauss, J. J. Goux, and Rama.
3-5 units, Win (Rosa)

SPANLIT 346. Where is the Money? Economy and Fictional Imagination in Latin American Romances of the 19th Century — How fiction represents money, and how those social, textual, and symbolic representations make it possible to admire or criticize a merchandised world and to compensate for the social anxiety produced by economic transformations.
3-5 units, Win (Laera)

SPANLIT 354. Censorship and Culture in Argentina, Chile, and Uruguay: Literature, Cinema, and Music — Military dictatorships in the South Cone during the 80s repressed artistic expressions as subversive and dangerous. Films such as La batalla de Chile, literary works such as Nanina and El guardiaespaldas, and popular songs, forbidden because they told an unofficial story.
3-5 units, Spr (Raffinelli)

SPANLIT 355. Gender Violence in Latin American Literature — Undergraduates register for LATINAM 136.) Women writers who dealt with gender-based social inequities and contradictions. Writers include Sor Juana Inés de la Cruz, María de Zayas, Nellie Campobello, and Elena Garro.
3-5 units, Aut (Glantz)

SPANLIT 360. Marginal Identities: Representations of Bandits and Prostitutes in Latin American — The relationship between fiction and identity from 1880 to the present in Latin American romances. Representations of the late 19th-century Mexican or Argentine outlaw or 90s prostitutes as privileged configurations to exhibit transgression and marginality; how they embody forms of social, cultural, and political crisis, and how fiction intervenes in culture and politics.
3-5 units, Aut (Laera)

3-5 units, Win (Rowe)

SPANLIT 364. The Mexican Codices: An Introductory Reading — The pre-European books or codices of Mexico as a neglected chapter of world literature. How they illuminate early America. Their impact on Western knowledge and imagination since first contact. How they help in reconsidering what constitutes script and visible language. The principles of reading and interpreting them. In English and Spanish.
3-5 units, Win (Brotherston)

SPANLIT 369C. Introduction to Graduate Studies: Criticism as Profession — (Enroll in COMPLIT 369, GERLIT 369.)
5 units, Aut (Berman)

CHICANO LITERATURE
SPANLIT 381. Working with the Archive: Chicana/o Culture — Archival research in Chicana/o writing. Theories of the archive and the position of the investigator. Presentation of research findings from the writers’ personal papers held in Special Collections. Writers include Arturo Islas, Cherríe Moraga, Bernice Zamora, Harry Gamboa, Jr., Juan Felipe Herrera, Raúl Salinas, Ricardo Sánchez, and Jimmy Santiago Baca. In English.
3-5 units (Yarbro-Bejarano) not given 2005-06

SPANLIT 383. Chicana Feminisms — (Same as 283; see 283.)
3-5 units, Spr (Yarbro-Bejarano)
INDIVIDUAL WORK
PORTLIT 399. Individual Work — For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

SPANLIT 399. Individual Work — For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES
Courses approved for the Spanish and Portuguese majors and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

SANTIAGO
SPANLIT 118X. Chilean Society through the Lens of Cinema
3-5 units, Aut (Ruffinelli)

SPANLIT 155X. Contemporary Chilean Women Writers
3-5 units, Win (Haro)

SPANLIT 164S. Social Heterogeneity in Latin America — (Same as SOC 111S.)
5 units, Aut (Valdés)

SPANLIT 166S. Cultural Modernization: The Case of Chile
5 units, Win (Micco)

SPANLIT 290Z. Modernization and Culture in Latin America — (Same as ANTHSCI 104X.)
5 units, Aut (Subercaseaux)

STATISTICS
Emeriti: Theodore W. Anderson, Albert Bowker, M. Vernon Johns, Lincoln E. Moses, Ingram Olkin, Charles Stein
Chair: Bradley Efron
Associate Professor: Guenther Walther
Assistant Professor: Jonathan Taylor
Associate Professor (Teaching): Susan Holmes
Courtesy Professor: Richard A. Olshen
Courtesy Associate Professors: Simon Jackman, David Rogosa
Mail Code: 94305-4065
Phone: (650) 723-2620
Web Site: http://www-stat.stanford.edu

Courses given in Statistics have the subject code STAT. For a complete list of subject codes, see Appendix.

The department’s goals are to acquaint students with the role played in science and technology by probabilistic and statistical ideas and methods, to provide instruction in the theory and application of techniques that have been found to be commonly useful, and to train research workers in probability and statistics. There are courses for general students as well as those who plan careers in statistics in business, government, industry, and teaching.

The requirements for a degree in statistics are flexible, depending on the needs and interests of the students. Some students may be interested in the theory of statistics and/or probability, whereas other students may wish to apply statistical and probabilistic methods to a substantive area. The department has long recognized the relation of statistical theory to applications. It has fostered this by encouraging a liaison with other departments in the form of joint and courtesy faculty appointments: Economics (Anderson), Education (Olkin, Rogosa), Electrical Engineering (Cover), Geological and Environmental Sciences (Switzer), Health Research and Policy (Efron, Hastie, Johnstone, Moses, Olshen, Tibshirani, Wong), Mathematics (Dembo, Diaconis), Political Science (Jackman), and the Stanford Linear Accelerator (Friedman). The research activities of the department reflect an interest in both applied and theoretical statistics, and probability. There are workshops in biology-medicine and in environmental factors in health.

In addition to courses for Statistics majors, the department offers a number of service courses designed for students in other departments. These tend to emphasize the application of statistical techniques rather than their theoretical development.

The Department of Statistics is well equipped for statistical applications and research in computational statistics. Computer facilities include several networked Unix servers and a PC lab for general research and teaching use. The Mathematical Sciences Library serves the department jointly with the departments of Mathematics and Computer Science.

The department has always drawn visitors from other countries and universities. As a consequence, there is usually a wide range of seminars offered by both the visitors and our own faculty.

UNDERGRADUATE PROGRAMS
MAJOR
Students wishing to build a concentration in probability and statistics are encouraged to consider declaring a major in Mathematical and Computational Sciences. This interdepartmental program is administered in the Department of Statistics (Bradley Efron, chair) and provides core training in computing, mathematics, operations research, and statistics, with opportunities for further elective work and specialization. See the “Mathematical and Computational Science” section of this bulletin.
MINORS
The undergraduate minor in Statistics is designed to complement major degree programs primarily in the social and natural sciences. Students with an undergraduate Statistics minor should find broadened possibilities for employment. The Statistics minor provides valued preparation for professional degree studies in postgraduate academic programs.

The minor consists of a minimum of six courses with a total of at least 20 units. There are two required courses (8 units) and four qualifying or elective courses (12 or more units). An overall 2.75 grade point average (GPA) is required for courses fulfilling the minor.

1. Qualifying Courses: at most, one of these two courses may be counted toward the six course requirement for the minor: MATH 52; STATS 191.
2. Required Courses: STATS 116 and 200.
3. Elective Courses: at least one of the elective courses should be a STATS 200-level course. The remaining two elective courses may also be 200-level courses. Alternatively, one or two elective courses may be approved courses in other departments. Special topics courses and seminars for undergraduates are offered from time to time by the department and these may be counted toward the course requirement.

Examples of elective course sequences are:
- STATS 202, 203, emphasizing data analysis and applied statistics
- STATS 205, 206, (207), emphasizing statistical methodology
- STATS 206, ECON 160, emphasizing economic optimization
- STATS 206, PSYCH 156, emphasizing psychology modeling and experiments
- STATS 207, EE 264, (279), emphasizing signal processing
- STATS 217, BIOSCI 283, emphasizing genetic and ecologic modeling
- STATS 217, 218, emphasizing probability and its applications
- STATS 240, 250, emphasizing mathematical finance

GRADUATE PROGRAMS

MASTER OF SCIENCE
The department requires that the student take 45 units of work from offerings in the Department of Statistics or from authorized courses in other departments. Ordinarily, four or five quarters are needed to complete all requirements.

Student must fulfill the following requirements for the M.S. degree:
1. STATS 116, 200, 191 or 203, and 217. Courses previously taken may be waived by the adviser, in which case they must be replaced by other graduate courses offered by the department.
2. One of MATH 103, 113, 115, 171; and one of CS 106A, 106X, 137. Substitution of other courses in Mathematics and Computer Science may be made with consent of the adviser.
3. At least four additional courses from graduate offerings in the department (202-399). Consent of the adviser is required in order to take more than 6 units of STATS 260, 390, or 399.
4. Additional units to complete the requirements may be chosen from the list available from the department. Other graduate courses (200 or above) may be authorized by the adviser if they provide skills relevant to statistics or deal primarily with an application of statistics or probability and do not overlap courses in the student’s program. There is sufficient flexibility to accommodate students with interests in applications to business, computing, economics, engineering, health, operations research, and biological and social sciences.

Students with a strong mathematical background who may wish to go on to a Ph.D. in Statistics should consider applying directly to the Ph.D. program.

All statistics courses required for the M.S. degree (116, 200, 217, and four additional Statistics graduate courses) must be taken for letter grades, and an overall 2.75 grade point average (GPA) is required.

DOCTOR OF PHILOSOPHY
The department looks for motivated students who want to prepare for research careers in statistics or probability, either applied or theoretical. Advanced undergraduate or master’s level work in mathematics and statistics provides a good background for the doctoral program. Quantitatively oriented students with degrees in other scientific fields are also considered for admission. The program normally takes four years.

Program Summary — STATS 300A,B,C, 305, 306A,B, and 310A,B,C (first-year core program); pass two of three parts of the qualifying examination (beginning of second year); breadth requirement (second or third year); University oral examination (end of third year or beginning of fourth year); dissertation (fourth year).

In addition students are required to take 9 units of advanced topics courses offered by the department (including at least two of the following: 314, 317, 318, 315A, or 315B, but not including literature, research, or consulting), and 3 units of statistical consulting. All students who have passed the qualifying exam but have not yet passed the University oral examination must take 319 at least once per year.

First-Year Core Courses — STATS 300 systematically surveys the ideas of estimation and of hypothesis testing for parametric and nonparametric models involving small and large samples. 305 is concerned with linear regression and the analysis of variance. 306 surveys a large number of modeling techniques, related to but going beyond the linear models of 305. 310 is measure-theoretic probability theory, beginning with the basic concepts of analysis. Students who do not have enough mathematical background can take 310 after their first year but need to have their first-year program approved by the Ph.D. program adviser.

Qualifying Examinations — These are intended to test the student’s level of knowledge when the first-year program, common to all students, has been completed. There are separate examinations in the three core subjects of statistical theory and methods, applied statistics and probability theory, and all are given before the beginning of the Autumn Quarter, usually before the beginning of their second year. Students may take two or three of these examinations and are expected to show acceptable performance in two examinations.

Breadth Requirement — Students are advised to choose an area of concentration in a specific scientific field of statistical applications; this can be realized by taking at least 15 units of course work approved by the Ph.D. program adviser.

Current areas with suggested course options include:
- Computational Biology and Statistical Genomics — Students are expected to take 9 units of graduate courses in genetics or neurosciences (imaging), such as GENE 203/BIOSCI 203, as well as 9 units of classes in Statistical Genetics or Bioinformatics, STATS 345, STATS 366, STATS 367.
- Machine Learning — Courses can be chosen from the following list:
  - Statistical Learning: STATS 315A and 315B
  - Data Bases: CS 245, 346, 347
  - Probabilistic Methods in AI: CS 221
  - Stochastic Learning Theory and Pattern Classification: CS 229
- Applied Probability — Students are expected to take 15 units of graduate courses in some of the following areas:
  - Control and Stochastic Calculus: MS&E 322, 351, MATH 237, EE 363
  - Finance: STATS 250, FINANCE 622, MATH 236
  - Information Theory: EE 376A, 376B
  - Monte Carlo: STATS 318, 345, 362, MS&E 323
  - Queuing Theory: EE 327, GSB 661, 663
  - Stochastic Processes: STATS 317, MATH 234
- Earth Science Statistics — Students are expected to take:
  - STATS 317 (Stochastic Processes)
  - STATS 318 (Monte Carlo Markov Chains)
  - STATS 352 (Spatial Statistics)
  - and three courses from the GES or Geophysics departments, such as GES 144. Fundamentals of Geographic Information Science or GEOPHYS 210. Basic Earth Imaging.
Students are expected to take three advanced courses from the department with an applied orientation such as:

- STATS 261/262 (Discrete Data and Survival Analysis)
- STATS 324 (Multivariate Analysis)
- STATS 343 (Time Series)
- STATS 354 (Bootstrap and Resampling)

and three advanced quantitative courses from departments such as Psychology, Sociology, Political Science, Anthropology, Economics, and the Schools of Education, Business or Medicine.

University Oral Examination — The University oral examination is taken on the recommendation of the student’s research adviser after the thesis problem has been well defined and some research progress has been made. Usually, this happens early in the student’s fourth year. The oral examination consists of a 40-minute presentation on the thesis topic, followed by two question periods. The first relates directly to the student’s presentation and the second is intended to explore the student’s familiarity with broader statistical topics related to the thesis research.

Financial Support — Students accepted to the Ph.D. program are offered financial support. All tuition expenses are paid and there is a fixed monthly stipend determined to be sufficient to pay living expenses. Financial support can be continued for five years, department resources permitting, for students in good standing. The resources for student financial support derive from funds made available for student teaching and research assistantships. Students receive both a teaching and research assignment each quarter which, together, do not exceed 20 hours. Students are strongly encouraged to apply for outside scholarships, fellowships, and other forms of financial support.

PH.D. MINOR

The Department of Statistics devises individual Ph.D. minor programs, but the department urges all graduate students in other fields who wish to have a subspecialty in statistics to study for an M.S. degree instead. The unit requirement for an M.S. degree is 45 units, whereas the number of units required for a minor averages around 30. This difference of 15 units can be made up by the student by including in the M.S. program courses from his or her own field which are related to statistics or applications of statistics.

COURSES

INTRODUCTORY

Introductory courses for any student with an interest in the problems of descriptive statistics and statistical inferences are STATS 30, 50, 60, and 141. These courses have no mathematical prerequisites. STATS 60 and 141 explain the techniques and methods of statistical inference. STATS 60 emphasizes applications in the social sciences and STATS 141 applications in the biological sciences. STATS 60 and 141 can be followed by STATS 191 which explains more advanced methods and their applications.

STATS 110, 116, 200, 217-218 are introductory but have a calculus prerequisite. STATS 110 covers the most important techniques used in the analysis of experimental data in engineering and science. STATS 110 can be followed by STATS 191. STATS 116 provides a general introduction to the theory of probability. It may be followed by STATS 200, which deals with statistical theory, or by 217 and 218, which deal with stochastic processes. The sequence 116, 200 is a two quarter sequence in basic mathematical statistics; the sequence 116, 217, 218 is a one-year course in basic probability theory.

STATS 30. Statistical Thinking — Statistical inference, with a minimum of mathematical formulation. Topics: comparisons and the randomized clinical trial, statistical significance, accuracy and the meaning of statistical error (plus or minus), correlation and regression to the mean, exploratory methods and data mining, life tables and survival analysis, and learning from experience (Bayesian inference). Lectures supplemented with web-based statistical simulations. GER:DB-Math

3 units (Staff) not given 2005-06

STATS 47N. Breaking the Code? — Stanford Introductory Seminar. Preference to freshmen. Cryptography and its counterpart, cryptanalysis or code breaking. How the earliest cryptanalysts used statistical tools to decrypt messages by uncovering recurring patterns. How such frequency-analysis tools have been used to analyze biblical texts to produce a Bible code, and to detect genes in the human genome. Overview of codes and ciphers. Statistical tools useful for code breaking. Students use simple computer programs to apply these tools to break codes and explore applications to various kinds of data. GER:DB-Math

3 units, Win (Holmes)

3 units (Cover) not given 2005-06

STATS 60. Introduction to Statistical Methods: Precalculus — (Graduate students register for 160; same as PSYCH 10.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math

5 units, Aut (Walther), Win (Thomas), Spr (Bartroff), Sum (Staff)

STATS 110. Statistical Methods in Engineering and the Physical Sciences — Introduction to statistics for engineers and physical scientists. Topics: descriptive statistics, probability, interval estimation, tests of hypotheses, nonparametric methods, linear regression, analysis of variance, elementary experimental design. Prerequisite: one year of calculus. GER:DB-Math

4-5 units (Bartroff)

3-5 units, Aut (Diaconis), Spr (Nacu), Sum (Staff)

3 units (Staff) not given 2005-06

STATS 141. Biostatistics — (Same as BIOSCI 141.) Statistical analysis of biological data. Topics: discrete and continuous distributions, testing hypotheses and confidence procedures, fixed and random effects analysis of variance, regression, and correlation. Wilcoxon and other nonparametric procedures, inference on contingency tables and other data arising from counts. Tests of goodness of fit. Emphasis is on finding numerical solutions to biostatistical problems, and practical interpretations and their implications. GER:DB-Math

4-5 units, Aut (Rogosa)

STATS 160. Introduction to Statistical Methods: Precalculus — (Graduate students register for 60; see 60; same as PSYCH 10.)

5 units, Aut (Walther), Win (Thomas), Spr (Bartroff), Sum (Staff)

3-4 units, Win (Holmes)

STATS 191. Introduction to Applied Statistics—Statistical tools for modern data analysis. Topics include regression and prediction, elements of the analysis of variance, bootstrap, and cross-validation. Emphasis is on conceptual rather than theoretical understanding. Applications to social/biological sciences. Student assignments/projects require use of the software package R. Recommended: 60, 110, or 141. GER:DB-Math

3 units, Win (Olkin)

STATS 199. Independent Study—For undergraduates.

1-15 units, Aut, Win, Spr, Sum (Staff)

CONTINUATION

Courses in this category have been designed for particular use in applications. Generally, they have introductory statistics or probability as prerequisites.

STATS 200. Introduction to Statistical Inference—Modern statistical concepts and procedures derived from a mathematical framework. Statistical inference, decision theory; point and interval estimation, tests of hypotheses; Neyman-Pearson theory. Bayesian analysis; maximum likelihood, large sample theory. Prerequisite: STAT 191. 3 units, Win (Romano), Sum (Staff)

3 units, Win (Romano), Sum (Staff)

STATS 202. Data Analysis—Data mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in very large databases or through web mining. Topics: decision trees, neural networks, association rules, clustering, case based methods, and data visualization.

3 units, Aut (Friedman)

3 units, Spr (Switzer)

STATS 204. Applied Regression Analysis—Introduction to the statistical analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis, canonical correlations, multidimensional scaling, clustering. Pre- or corequisite: 200.

3 units, Win (Owen)

STATS 205. Introduction to Nonparametric Statistics—Nonparametric analogs of the one- and two-sample t tests and analysis of variance; the sign test, median test, Wilcoxon’s tests, and the Kruskal-Wallis and Friedman tests, tests of independence. Nonparametric regression and nonparametric density estimation, modern nonparametric techniques, nonparametric confidence interval estimates.

3 units, Win (Friedman)

STATS 206. Applied Multivariate Analysis—Introduction to the statistical analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis, canonical correlations, multidimensional scaling, clustering. Pre- or corequisite: 200.

3 units, Win (Owen)

STATS 207. Introduction to Time Series Analysis—Time series models used in economics and engineering. Trend fitting, autoregressive and moving average models and spectral analysis, Kalman filtering, and state-space models. Seasonality, transformations, and introduction to financial time series. Prerequisite: basic course in Statistics at the level of 200.

3 units, Spr (Staff)

STATS 208. Introduction to the Bootstrap—The bootstrap is a computer-based method for assigning measures of accuracy to statistical estimates. By substituting computation in place of mathematical formulas, it permits the statistical analysis of complicated estimators. Topics: nonparametric assessment of standard errors, biases, and confidence intervals; related resampling methods including the jackknife, cross-validation, and permutation tests. Theory and applications. Prerequisite: course in statistics or probability.

3 units, Spr (Staff)

STATS 211. Topics in Quantitative Methods: Meta-Analysis—(Same as EDUC 493B.) Meta-analysis as a quantitative method for combining the results of independent studies enabling researchers to evaluate available evidence. Examples of meta-analysis in medicine, education, and social and behavioral sciences. Statistical methods include nonparametric methods, contingency tables, regression and analysis of variance, and Bayesian methods. Project involving an existing published meta-analysis. Prerequisite: basic sequence in statistics.

1-3 units, Win (Olkin)

STATS 212. Applied Statistics with SAS—Data analysis and implementation of statistical tools in SAS. Topics: reading in and describing data, categorical data, dates and longitudinal data, correlation and regression, nonparametric comparisons, ANOVA, multiple regression, multivariate data analysis, using arrays and macros in SAS. Prerequisite: statistical techniques at the level of 191 or 203; knowledge of SAS not required.

3 units, Sum (Staff)

STATS 214. Randomness in the Physical World—(Enroll in AP-PHYS 214.)

3 units (Diaconis, S. Holmes, Kapitulnik, Shenker)

alternate years, given 2006-07

3 units, Win (Romano), Sum (Staff)

3 units, Spr (Cover), Sum (Staff)

STATS 219. Stochastic Processes—(Enroll in MATH 136.)

3 units, Aut (Dembo)

3 units (Staff) not given 2005-06

3 units, Sum (Staff)

STATS 239A,B. Workshop in Quantitative Finance—Topics of current interest.

1 unit, A: Aut, B: Win (Durrleman)
3-4 units, Spr (Lai)

3 units, Win (Papanicolaou)

STATS 252. Data Mining and Electronic Business — The Internet and related technologies have caused the cost of communication and transactions to plummet, and consequently the amount of potentially relevant data to explode. The underlying principles, statistical issues, and algorithmic approaches to data mining and e-business, with real world examples.
3 units, Sum (Staff)

STATS 253. Spatial Statistics — (Same as STATS 352.) Statistical descriptions of spatial variability, spatial random functions, grid models, spatial partitions, spatial sampling, linear and nonlinear interpolation and smoothing with error estimation, Bayes methods and pattern simulation from posterior distributions, multivariate spatial statistics, spatial classification, nonstationary spatial statistics, space-time statistics and estimation of time trends from monitoring data, spatial point patterns, models of attraction and repulsion. Applications to earth and environmental sciences, meteorology, astronomy, remote-sensing, ecology, materials. GER:DB-Math
3 units (Staff) not given 2005-06

STATS 260A,B,C. Workshop in Biostatistics — (Same as HRP 260A,B,C.) Applications of statistical techniques to current problems in medical science. Enrollment for more than 2 units of credit involves extra reading or consulting and requires consent of instructor.

STATS 260A. 1-3 units, Aut (Lazzeroni, Olshen, Bloch, Efron, Hastie, Lavori, Tibshirani, Wong)

STATS 260B. 3 units, Win (Lazzeroni, Olshen, Bloch, Efron, Hastie, Lavori, Tibshirani, Wong)

STATS 260C. 1-5 units, Spr (Lazzeroni, Olshen, Bloch, Efron, Hastie, Lavori, Tibshirani, Wong)

3 units, Win (Hastie, Cobb)

STATS 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis — (Same as HRP 262.) Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.
3 units, Spr (Cobb)

STATS 270. A Course in Bayesian Statistics — (Ph.D. students register for 370.) Bayesian statistics including theory, applications, and computational tools. Topics: history of Bayesian methods, foundational problems (what is probability?), subjective probability and coherence, exchangeability and deFinetti’s theorem. Conjugate priors, Laplace approximations, Gibbs sampling, hierarchical and empirical Bayes, nonparametric methods, Dirichlet and Pula tree priors. Bayes robustness, asymptotic properties of Bayes procedures.
3 units (Staff) not given 2005-06

STATS 279. Practical Training — For students in the M.S. program in Financial Mathematics only. Students obtain employment in a relevant industrial or research activity to enhance their professional experience. May be repeated for credit. Prerequisite: consent of adviser.
1-3 units, Aut, Win, Spr, Sum (Lai)

STATS 298. Industrial Research for Statisticians — Masters-level research as in 299, but must be conducted for an off-campus employer. Final report required. Prerequisite: enrollment in Statistics M.S. or Ph.D. program (prior to candidacy).
1-9 units, Aut, Win, Spr, Sum (Staff)

STATS 299. Independent Study — For Statistics M.S. students only. Reading or research program under the supervision of a Statistics faculty member. May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

PRIMARYLY FOR DOCTORAL STUDENTS

Sequences 300A,B,C, 305, 306B, and 310A,B,C comprise the fundamental sequence which serves as a general introduction to and prerequisite for further work.

STATS 300. Advanced Topics in Statistics
3 units, Sum (Staff)

STATS 300A,B,C. Theory of Statistics — Elementary decision theory; loss and risk functions, Bayes estimation; UMVU estimators, shrinkage estimators. Hypothesis testing and confidence intervals; Neyman-Pearson theory; UMP tests and uniformly most accurate confidence intervals; use of unbiasedness and invariance to eliminate nuisance parameters. Large sample theory; basic convergence concepts; robustness; efficiency; contiguity, locally asymptotically normal experiments; convolution theorem; asymptotically UMP and maximin tests. Asymptotic theory of likelihood ratio and score tests. Rank permutation and randomization tests; jackknife, bootstrap, subsampling and other resampling methods. Further topics: sequential analysis, optimal experimental design, empirical processes with applications to statistics, Edgeworth expansions, density estimation, time series.
2-4 units, A: (Romano), B: (Walther), C: Spr (Walther)

STATS 305. Introduction to Statistical Modeling — The linear model: simple linear regression, polynomial regression, multiple regression, anova models; and with some extensions, orthogonal series regression, wavelets, radial basis functions, and MARS. Topics: normal theory inference (tests, confidence intervals, power), related distributions (\( F \), \( t \)), numerical methods (QR, SVD), model selection/regularization (Cp, AIC, BIC), diagnostics of model inadequacy, and remedies including bootstrap inference, and cross-validation. Emphasis is on problem sets involving substantial computations with data sets, including developing extensions of existing methods. Prerequisite: consent of instructor, 116, 200, one applied statistics course, CS 106A, MATH 114.
2-4 units, Aut (Owen)

STATS 306A. Methods for Applied Statistics — Extension of modeling techniques of 305: binary and discrete response data and nonlinear least squares. Topics include regression, Poisson loglinear models, classification methods, clustering. May be repeated for credit. Prerequisite: 305 or equivalent.
2-4 units, Win (Owen)
2-4 units, Spr (Tibshirani)

STATS 310A. Theory of Probability — Mathematical tools: asymptotics, metric spaces; measure and integration; Lp spaces; some Hilbert spaces theory. Probability: independence, Borel-Cantelli lemmas, almost sure and Lp convergence, weak and strong laws of large numbers. Weak convergence and characteristic functions; central limit theorems; local limit theorems; Poisson convergence. Prerequisites: 116, MATH 171.
2-4 units, Aut (Dembo)

2-4 units, Win (Dembo)

2-4 units, Spr (Lai)

STATS 314. Advanced Statistical Methods — Topic this year is multiple hypothesis testing. The demand for new methodology for the simultaneous testing of many hypotheses as driven by modern applications in genomics, imaging, astronomy, and finance. High dimensionality: how tests of many hypotheses may be considered simultaneously. Classical techniques, and recent developments. Stepwise methods, generalized error rates such as the false discovery rate, and the role of resampling. May be repeated for credit.
2-3 units, Spr (Romano)

STATS 315A,B. Modern Applied Statistics — Two-part sequence on new techniques for predictive and descriptive learning using ideas that bridge gaps among statistics, computer science, and artificial intelligence. Emphasis is on statistical aspects of their application and integration with more standard statistical methodology. Predictive learning refers to estimating models from data with the goal of predicting future outcomes, in particular, regression and classification models. Descriptive learning is used to discover general patterns and relationships in data without a specific predictive goal. From a statistical perspective, it can be viewed as computer automated exploratory analysis of usually large complex data sets.

STATS 315A. Learning 2-3 units, Win (Hastie)

STATS 315B. Data Mining 2-3 units, Spr (Friedman)

STATS 316. Introduction to Stochastic Differential Equations — (Enroll in MATH 236.)
3 units, Win (Papanicolaou)

2-3 units (Staff) not given 2005-06

2-3 units, Aut (Diaconis)

STATS 319. Literature of Statistics — Literature study of topics in statistics and probability culminating in oral and written reports. May be repeated for credit.
1-3 units, Win (Cover), Spr (Switzer)

STATS 322. Computational Methods for Geometric Design and Imaging — Multiresolution approximation analysis as a mathematical tool for the construction of wavelets and sub-banding coding schemes; modifications and extensions of this have contributed to the advancement in curve/surface design and image manipulation. Computational methods for geometric design and image processing. Curve and surface subdivision schemes, and computational schemes based on the anisotropic diffusion model. The diffusion framework applied to the analysis and visualization of higher dimensional data sets by introducing diffusion kernels and metrics.
2-3 units (Staff) not given 2005-06

2-3 units (Staff) not given 2005-06

2-3 units (Staff) not given 2005-06

STATS 350. Advanced Topics in Probability Theory — Topics reflect interests of students and instructor. Possible topics: Brownian motion, coarse graining, concentration inequalities, discrete probability, Gibbs measures, interacting particle systems, large deviations, percolation, random matrices, Stein’s method.
2-3 units (Staff) not given 2005-06

STATS 352. Spatial Statistics — (Same as STATS 253; see 253.)
3 units (Staff) not given 2005-06

2-3 units, Aut (Owen)

STATS 366. Computational Biology — (Same as STATS 166, BIO-MEDIN 366; see 166.)
2-3 units, Aut (Holmes)

STATS 367. Statistical Models in Genetics — Stochastic models and related statistical problems in linkage analysis of qualitative and quantitative traits in humans and experimental populations; sequence alignment and analysis; and population genetics/evolution, both classical (Wright-Fisher-Kimura) and modern (Kingman coalescent). Computational algorithms as applications of dynamic programming, Markov chain Monte Carlo, and hidden Markov models. Prerequisites: knowledge of probability through elementary stochastic processes and statistics through likelihood theory.
2-3 units (Staff) not given 2005-06

STATS 370. A Course in Bayesian Statistics — (Same as STATS 270; see 270.)
3 units (Staff) not given 2005-06
### PROGRAM IN STRUCTURED LIBERAL EDUCATION

**Director and Professor:** Mark Mancall (History)

**Coordinator:** Suzanne Greenberg

The Program in Structured Liberal Education (SLE) is designed specifically for first-year students interested in an interdisciplinary approach to the liberal arts. The program emphasizes intellectual rigor and individualized contact between faculty and students. SLE has three basic purposes: to present a coherent program of instruction; to develop a student’s ability to ask effective questions of texts, teachers, the culture, and themselves; and to develop intellectual skills in logical reasoning, critical reading, expository writing, and group discussions. SLE stresses inquiry, criticism, and a tolerance for ambiguity. Neither the instructors nor the curriculum provides ready-to-serve answers to the questions being dealt with; rather, SLE encourages a sense of intellectual challenge, student initiative, and originality.

Freshmen interested in enrolling in SLE should indicate this preference for their Area One assignment. SLE is designed as a three-quarter sequence and students should be willing to make a commitment for the entire year.

Correspondence regarding the program should be addressed to Program in Structured Liberal Education, Florence Moore Hall, Stanford University, Stanford, CA 94305.

### COURSES

**SLE 91, 92, 93. Structured Liberal Education**—SLE demands approximately 60 percent of the average academic workload during freshman year. Autumn Quarter focus is on the mythological and cultural foundations of ancient Greece and Israel. Winter Quarter focus is on the religious, ideological, and aesthetic transformations that occurred in Europe, Asia, and the New World as a result of the Middle Ages, Renaissance, Scientific Revolution, and Enlightenment. Spring Quarter focus is on the social, political, and artistic forces that shape the modern world. Completion of the SLE program satisfies the GER: IHUM, DB-Hum, and both University Writing Requirements.

### PROGRAM IN SYMBOLIC SYSTEMS

**Director:** Ivan A. Sag

**Program Coordinator:** Todd Davies

**Program Committee:** Lera Boroditsky, Todd Davies, Byron Reeves, Eric Roberts, Ivan A. Sag, Paul Skokowski, Kenneth A. Taylor

**Undergraduate Advising Fellows:** Tina Chen, Ro-El Rio Cordero, Matthew Etchemendy, Gorkem Ozbek, Itamar Rosenne, Renee Trochet

**Program Faculty:**
- Art and Art History: Scott Bukatman (Associate Professor)
- Aplied Physics: Bernardo Huberman (Consulting Professor)
- Classics: Reviel Netz (Professor)
- Communication: Jeremy Bailenson (Assistant Professor), Clifford Nass (Professor), Byron Reeves (Professor), Frederick Turner (Assistant Professor)
- Computer Science: David Dill (Professor), Brian Jeffrey Fogg (Consulting Assistant Professor), Michael Genesereth (Associate Professor), Margaret Johnson (Senior Lecturer), Oussama Khatib (Professor), Scott Klemmer (Assistant Professor), Daphne Koller (Associate Professor), Jean-Claude Latombe (Professor), Marc Levoy (Associate Professor), Christopher Manning (Assistant Professor), John McCarthy (Professor Emeritus), Andrew Ng (Assistant Professor), Nils Nilsson (Professor Emeritus), Vaughn Pratt (Professor Emeritus), Eric Roberts (Professor, Teaching), Tim Roughgarden (Assistant Professor), Terry Winograd (Professor)
- Economics: Antonio Rangel (Assistant Professor), Muriel Niederle (Assistant Professor)
- Education: Raymond P. McDermott (Professor), Roy Pea (Professor), Daniel Schwartz (Associate Professor)
- Electrical Engineering: John R. Koza (Consulting Professor), Krishna Shenoy (Assistant Professor)
- French and Italian: Jean-Pierre Dupuy (Professor)
- Genetics: Russ B. Altman (Associate Professor)
- History: Jessica G. Riskin (Assistant Professor)
- Linguistics: Arto Anttila (Assistant Professor), David Beaver (Assistant Professor), Joan Bresnan (Professor), Eve Clark (Professor), Vivienne Fong (Lecturer), Daniel Jurafsky (Associate Professor), Ronald Kaplan (Consulting Professor), Lauri Karttunen (Consulting Professor), Martin Kay (Professor), Beth Levin (Professor), Christopher Manning (Assistant Professor), Stanley Peters (Professor), Ivan A. Sag (Professor), Thomas A. Wasow (Professor, Annie Zamen (Consulting Professor)
- Management Science and Engineering: Pamela Hinds (Associate Professor)
- Mathematics: Persi Diaconis (Professor), Solomon Feferman (Professor Emeritus)
- Medicine: Russ B. Altman (Associate Professor), John R. Koza (Consulting Professor)
- Music: Jonathan Berger (Associate Professor), Christopher Chafe (Associate Professor), Eleanor Selfridge-Field (Consulting Professor), William L. Verplank (Lecturer)
- Neurobiology: Ben Barres (Associate Professor), Jennifer Raymond (Assistant Professor)
- Philosophy: Michael Bratman (Professor), Mark Crimmins (Associate Professor), John Etchemendy (Professor), Solomon Feferman (Professor Emeritus), Dagfinn Follesdal (Professor), David Israel (Consulting Associate Professor), Krista Lawlor (Assistant Professor), Grigorii Mints (Professor), Marc Pauly (Assistant Professor), Raymond Perau (Consulting Associate Professor), John Perry (Professor), Kenneth Taylor (Associate Professor), Johan van Benthem (Professor), Thomas A. Wasow (Professor)
- Psychiatry and Behavioral Sciences: Vinod Menon (Assistant Professor)
- Psychology: Lera Boroditsky (Assistant Professor), Herbert H. Clark (Professor), Anne Fernald (Associate Professor), Susan Johnson (Assistant Professor), Brian Knutson (Assistant Professor), Ellen

---

STATS 374. Large Deviations—(Same as MATH 234.) Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer’s and Sanov’s theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: MATH 230A or STATS 310.

3 units (Staff) not given 2005-06

STATS 376A,B. Information Theory—(Enroll in EE 376A,B.)

3 units, A: Win (Weissman), B: Spr (Cover)

STATS 390. Consulting Workshop—Provides the skills required of practicing statistical consultants, including exposure to statistical applications. Students participate as consultants in the department’s drop-in consulting service, analyze client data, and prepare formal written reports. Seminar provides supervised experience in short term consulting. May be repeated for credit. Prerequisites: course work in applied statistics or data analysis, and consent of instructor.

1-3 units, Aut (Olshen), Win (Switzer), Spr (Walther)

STATS 398. Industrial Research for Statisticians—Doctoral research as in 298, but must be conducted for an off-campus employer. Final report required. Prerequisite: Statistics Ph.D. candidate.

1-9 units, Aut, Win, Spr, Sum (Staff)

STATS 399. Research—Research work as distinguished from independent study of nonresearch character in 199. May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)
Markman (Professor), Michael Ramscar (Assistant Professor), Barbara Tversky (Professor), Anthony Wagner (Assistant Professor), Brian Wandell (Professor)

**Statistics:** Persi Diaconis (Professor), Susan P. Holmes (Associate Professor)

**Symbolic Systems:** William Byrne (Consulting Assistant Professor), Todd Davies (Lecturer), Tracy King (Consulting Associate Professor), Pat Langley (Consulting Professor), Jeff Shrager (Consulting Associate Professor), Paul Skokowski (Consulting Professor)

**Other Affiliates:** David Barker-Plummer (Engineering Research Associate), Keith Devlin (Senior Research Engineer, CSLI Executive Director), Daniel Flickinger (CSLI Senior Research Engineer), John Kunz (Senior Research Engineer), Stephan Oepen (CSLI Senior Research Engineer)

**Program Offices:** Margaret Jacks Hall, Building 460, Room 40A

**Mail Code:** 94305-2150

**Phone:** (650) 723-4284

**Email:** ssp-af@csli.stanford.edu

**Web Site:** http://symsys.stanford.edu

Courses given in the Program in Symbolic Systems have the subject code SYMBSYS. For a complete list of subject codes, see Appendix.

Both human beings and computers can manipulate symbols. This observation lies at the heart of Symbolic Systems, an interdisciplinary program focusing on the relationship between natural and artificial systems that represent, process and act on information. Computer programs, natural languages, the human mind, and the Internet are all examples of symbolic systems. As such, they all embody concepts whose study forms the core of the Symbolic Systems curriculum: concepts such as representation, communication, and intelligence. A body of knowledge and theory has developed around these notions, from disciplines like philosophy, computer science, linguistics, psychology, statistics, neurobiology, and communication. Since the invention of computers, researchers have been working across these and other disciplines to study questions such as: In what ways are computers and computer languages like humans and their languages? How can the interaction between people and computers be made easier and more beneficial? Can we build computers and robots that think and feel?

The Symbolic Systems Program (SSP) offers an opportunity to explore these issues. The core requirements include courses in symbolic logic, the philosophy of mind, formal linguistics, cognitive psychology, programming, the mathematics of computation, statistical theory, artificial intelligence, and interdisciplinary approaches to cognitive science. The core courses are designed to prepare students with the vocabulary, theoretical background, and technical skills needed for more concentrated study and research at the advanced undergraduate and graduate levels. Most of the courses in SSP are drawn from affiliated departments. Courses designed specifically for the program are aimed at integrating and supplementing topics covered by the department-based offerings. The curriculum includes humanistic approaches to questions about language and intelligence, as well as training in science and engineering.

SSP offers both B.S. and M.S. degree programs. Both programs require students to master a common core of required courses, and to choose an area of specialization.

**UNDERGRADUATE PROGRAMS**

**BACHELOR OF SCIENCE**

The program leading to a B.S. in Symbolic Systems provides students with a core of concepts and techniques, drawing on faculty and courses from various departments. The curriculum prepares students for advanced training in the interdisciplinary study of language and information, or for postgraduate study in any of the main contributing disciplines. It is also excellent preparation for employment immediately after graduation.

Symbolic Systems majors must complete a core of required courses plus a concentration consisting of six additional courses. All major courses are to be taken for letter grades unless an approved course is offered satisfactory/no credit only. All core courses must be passed with a grade of "C-" or better. Students who receive a grade lower than this in a core course must alert the program of this fact, so that a decision can be made about whether the student should continue in the major.

**CORE REQUIREMENTS**

In order to graduate with a B.S. in Symbolic Systems, a student must complete the following requirements. (Please note that some of these courses have other courses as prerequisites. Students are responsible for completing each course’s prerequisites before they take it.)

1. **Cognitive Science:** either SYMBSYS 100, Introduction to Cognitive Science, or one of the following:
   - LINGUIST 280/CS 224N. Natural Language Processing
   - PSYCH 131. Language and Thought
   - PSYCH 137. Birds to Words: Cognition, Communication, and Language

2. **Computer Programming:**
   - a) CS 106A. Programming Methodology, and 106B. Programming Abstractions; or 106X. Programming Methodology and Abstractions (Accelerated); and
   - b) CS 107. Programming Paradigms

3. **Discrete Structures:** CS 103B. Discrete Structures; or CS 103X. Discrete Structures (Accelerated)

4. **Logic:** PHIL 150. Basic Concepts in Mathematical Logic, and 151. First-Order Logic

5. **Statistics/Probability:** one of the following:
   - EE 178. Introduction to Probability and Statistics
   - MATH 151. Introduction to Probability Theory
   - MSE 120. Probabilistic Analysis
   - STATS 110. Statistical Methods in Engineering and the Physical Sciences
   - STATS 116. Theory of Probability
   - STATS 121. Probability, Induction, Statistics

6. **Philosophical Foundations:** an introductory course in Philosophy must be taken prior to PHIL 80, from among the following:
   - a Philosophy Department Stanford Introductory Seminar, numbered 11-19
   - PHIL 10. God, Self, and World: An Introduction to Philosophy
   - PHIL 20. Introduction to Moral Philosophy
   - PHIL 30. Introduction to Political Philosophy
   - PHIL 60. Introduction to Philosophy of Science
   - IHUM 23A.B. The Fate of Reason and PHIL 80. Mind, Matter, and Meaning

7. **Cognitive Psychology:** PSYCH 55. Introduction to Cognition and Brain

8. **Formal Linguistics:**
   - LINGUIST 120. Introduction to Syntax; and one of the following:
     - LINGUIST 130A. Introduction to Linguistic Meaning
     - LINGUIST 130B. Introduction to Lexical Semantics
     - LINGUIST 230A. Introduction to Semantics and Pragmatics

9. **Artificial Intelligence:** CS 121. Introduction to Artificial Intelligence; or 221. Artificial Intelligence: Principles and Techniques

10. **Turing Computability:** one of the following:
    - CS 103B. Discrete Structures
    - CS 154. Introduction to Automata and Complexity Theory
    - PHIL 152. Computability and Logic
    - SYMBSYS 100. Introduction to Cognitive Science

11. **Advanced Small Seminar:** an upper-division, limited-enrollment seminar drawing on material from other courses in the core. Courses listed under Symbolic Systems Program offerings with numbers from SYMBSYS 201 through 209 are acceptable, as are other courses which will be announced at the beginning of each academic year.

   * CS 103X does not fulfill this requirement.

   † A course taken to fulfill one of these requirements can also be counted toward another requirement, as part of either the core or a student’s concentration, but not both (see below).
CONCENTRATION AREAS

In addition to the core requirements listed above, the Symbolic Systems major requires each student to complete a concentration consisting of six courses that are thematically related to each other. Students select concentrations from the list below or design others in consultation with their advisers.

- Applied Logic
- Artificial Intelligence
- Cognitive Science
- Computer Music
- Decision Making and Rationality
- Learning
- Human-Computer Interaction
- Natural Language
- Neurosciences
- Philosophical Foundations

MINORS

Students may minor in Symbolic Systems by completing either item 1 or item 2 below.

1. One course in each of the following core areas (please note that several of these courses have prerequisites):
   a) Cognition: SYMBSYS 100* or PSYCH 55
   b) Logic and Computation: PHIL 150 or 151, or CS 103B, 103X, or 154
   c) Computer Programming: CS 106B, 106X, or 107
   d) Philosophical Foundations: SYMBSYS 100* or PHIL 80
   e) Formal Linguistics: LINGUIST 120, 130A, or 130B
   f) Artificial Intelligence: CS 121 or 221

2. SYMBSYS 100, plus an interdisciplinary SSP concentration listed on the SSP web site at http://symsys.stanford.edu. To qualify, the selection of courses used for the minor must be interdisciplinary; i.e., it must either include courses from at least three departments, or include more than one course from each of two departments.

*SYMBSYS 100 may not be counted for both areas ‘a’ and ‘d’.

UNDERGRADUATE RESEARCH

The program strongly encourages all SSP majors to gain experience in directed research by participating in faculty research projects or by pursuing independent study. In addition to the Symbolic Systems Honors Program (see below), the following avenues are offered.

1. Summer Internships: students work on SSP-related faculty research projects. Application procedures are announced in the winter quarter for SSP majors.
2. Research Assistantships: other opportunities to work on faculty research projects are typically announced to SSP majors as they arise during the academic year.
3. Independent Study: under faculty supervision, students work on independent projects. For course credit they may enroll in SYMBSYS 196.

Contact SSP for more information on any of these possibilities, or visit the program’s web site at http://www.stanford.edu/dept/symbol. In addition, the Undergraduate Research Opportunities office on campus offers numerous grants and scholarships supporting student research projects at all levels; see http://uro.stanford.edu.

HONORS PROGRAM

Seniors in SSP may apply for admission to the Symbolic Systems honors program prior to the beginning of their final year of study. Students who are accepted into the honors program can graduate with honors by completing an honors thesis under the supervision of a faculty member. Course credit for the honors project may be obtained by registering for SYMBSYS 190, Honors Tutorial, for any quarters while a student is working on an honors project. Juniors who are interested in doing an honors project during their senior year are strongly advised to take SYMBSYS 91, Junior Honors Seminar. SYMBSYS 191, Senior Honors Seminar, is recommended for honors students during the senior year. Contact SSP or visit the program’s web site for more information on the honors program, including deadlines and policies.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES

Many SSP majors also complete coterminal M.S. or M.A. degrees in affiliated departments. In addition to the Symbolic Systems M.S. program (see below), the Department of Philosophy offers a special Symbolic Systems track for interdisciplinary graduate level work.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

GRADUATE PROGRAMS

The University’s basic requirements for the M.S. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

MASTER OF SCIENCE

The M.S. degree in Symbolic Systems is designed to be completed in the equivalent of one academic year by coterminal students or returning students who already have a B.S. degree in Symbolic Systems. Admission is competitive, providing a limited number of students with the opportunity to pursue course and project work, in consultation with a faculty adviser who is affiliated with the Symbolic Systems Program. The faculty adviser may impose requirements beyond those described here.

Admission to the program as a coterminal student is subject to the policies and deadlines described in the “Undergraduate Degrees” section of this bulletin (see “Coterminal Bachelor’s and Master’s Degrees”). Applicants to the M.S. program are reviewed each quarter during the academic year. Information on exact deadlines and required procedures for applying are available from the Symbolic Systems Program’s Student Services Coordinator in the Linguistics Department office (460-127E).

REQUIREMENTS

A candidate for the M.S. degree in Symbolic Systems must complete a program of 45 units. At least 36 of these must be graded units, passed with an average grade of 3.0 (B) or better, and any course taken to fulfill requirements A, B, or C below must be taken for a letter grade unless the course is offered S/NC only. The 45 units may include no more than 21 units of courses from those listed below under Requirements A and B. Furthermore, none of the 45 units to be counted toward the M.S. degree may include units counted toward an undergraduate degree at Stanford or elsewhere. Course requirements are waived only if evidence is provided that similar or more advanced courses have been taken, either at Stanford or another institution. Courses that are waived rather than taken may not be counted toward the M.S. degree.

Each candidate for the M.S. degree must fulfill the following requirements:

REQUIREMENT A

Demonstrated competence in the core requirements for the B.S. degree in Symbolic Systems. Candidates who have gone through the Symbolic Systems undergraduate program satisfy this requirement in the course of the B.S. degree in Symbolic Systems. Other students admitted as candidates for a Symbolic Systems M.S. degree must complete all the Symbolic Systems undergraduate core requirements, with the exception of the advanced seminar requirement.

REQUIREMENT B

1. Completion of two additional skill requirements:
   a) Computer Programming: CS 108, Object-Oriented Systems Design; and
   b) Empirical Methods: one of the following:
      COMM 206, Communication Research Methods
      COMM 268/368, Experimental Research in Advanced User Interfaces
      COMM 318, Doctoral Research Methods II
LINGUIST 220/CS 224N. Natural Language Processing
PSYCH 110. Research Methods and Experimental Design
PSYCH 252. Statistical Methods for Behavioral and Social Science
(for 3 or more units)
PSYCH 253. Statistical Theory, Models, and Methodology (for 3 units)
STATS 191. Introduction to Applied Statistics
STATS 200. Introduction to Statistical Inference
a Statistics course numbered higher than 200
2. Completion of three quarters of the Symbolic Systems Program M.S. Seminar (SYMSYS 291).

REQUIREMENT C
Completion of an approved specialization track. All tracks of the Symbolic Systems M.S. program require students to do a substantial project. The course requirements for each track are designed to prepare a student to undertake such a project. The nature of the project depends on the student’s focus, but may include software development, user testing, or a combination of these. In all cases, a written thesis or paper describing the project is required. The project normally takes three quarters, and work on the project may account for up to 15 units of a student’s program. Each track of the SSP M.S. program has its own core requirements, as well as unit requirements from a set of elective courses. The tracks and their requirements are given below.

The Human-Computer Interaction (HCI) Track—The HCI Core:
a course in Computer Science numbered 141-179, or CS 241-279, or
CS 295. Software Engineering; and
CS 147. Introduction to HCI Design; and
CS 247. Human-Computer Interaction: Interaction Design Studio; and
CS 376. Research Topics in Human-Computer Interaction

The Natural Language Technology (NLT) Track—For the NLT Core, in addition to the courses below, students in the NLT track must complete LINGUIST 220/CS 224N. Natural Language Processing, which can be used as the empirical methods course for Requirement B above.
1) An in-depth theory of English grammar course such as LINGUIST 221A, Foundations of English Grammar
2) A graduate-level semantics course (if not already taken as part of Requirement A) such as LINGUIST 232A, Lexical Semantics, or 230B, Semantics and Pragmatics
3) A two-course sequence in Computational Linguistics:
LINGUIST 180. Introduction to Computer Speech and Language Processing; and
LINGUIST 183/283. Programming and Algorithms for Natural Language Processing
The NLT Electives (at least 8 units from the following list):
CS 145. Introduction to Databases
CS 147. Introduction to HCI Design
CS 161. Design and Analysis of Algorithms
CS 221. Artificial Intelligence: Principles and Techniques
CS 222. Knowledge Representation
CS 224M. Multi-Agent Systems
CS 228. Probabilistic Models in Artificial Intelligence
CS 229. Machine Learning
CS 276. Text Retrieval and Web Search
CS 329. Topics in Artificial Intelligence
LINGUIST 205. Phonetics
LINGUIST 221B. Studies in Universal Grammar
LINGUIST 222A. Lexicalist Foundations of Syntax
LINGUIST 222A. Introduction to Formal Universal Grammar
LINGUIST 227A. Research Seminar in Syntax
LINGUIST 230B. Semantics and Pragmatics
LINGUIST 233. Semantics Seminar
LINGUIST 234. Discourse Analysis
LINGUIST 285. Finite State Methods in Natural Language Processing
LINGUIST 282. Human Machine Translation
PHIL 298. Logic, Language, and Information
PSYCH 205. Foundations of Cognition
PSYCH 214. Psycholinguistics
PSYCH 272. Special Topics in Psycholinguistics

The Individually Designed Option—Students wishing to design their own M.S. curriculum in Symbolic Systems must present a project plan as part of their application. This plan must be endorsed by the student’s adviser prior to admission to the Symbolic Systems M.S. program. The application must also specify at least 20 units of coursework that the student will take in support of the project.
Students are admitted under this option only if they present well-developed plans whose interdisciplinary character makes them inappropriate for any departmental master’s program, but appropriate for Symbolic Systems.

COURSES
SYMSYS 10. Symbolic Systems Forum—A weekly lecture series, featuring different speakers who report on research of general interest to Symbolic Systems students and faculty. Regular attendance required for credit. May be repeated for credit.
1 unit, Aut, Win, Spr (Staff)

SYMSYS 100. Introduction to Cognitive Science—(Same as LINGUIST 144.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major.
GER:DB-SocSci
4 units, Spr (Bresnan, van Benthem)

SYMSYS 145. Cognition in Interaction Design—Interactive systems from the standpoint of human cognition. Topics include skill acquisition, complex learning, reasoning, language, perception, methods in usability testing, special computational techniques such as intelligent and adaptive interfaces, and design for people with cognitive disabilities. Students conduct analyses of real world problems of their own choosing and redesign/analyze a project of an interactive system.
GER:DB-SocSci
3 units, Spr (Shragar)

SYMSYS 150. Computers and Social Decisions—Issues in the design of systems for interactive and collective decision making. Topics such as theories of games and social choice; qualitative and quantitative procedures for making collective decisions; psychological effects of presentation and framing on expressions of preference; features of dialogue systems and online communities; the ideal speech situation and related notions; online voting; the digital divide; and privacy, security, and trust.
GER:DB-SocSci
3 units (Davies) not given 2005-06

SYMSYS 205. Systems: Theory, Science, and Metaphor—Systems science explores abstract properties of systems such as network connectivity, complexity, and emergence, with applications in natural, social, and artificial domains. How useful are these theories? Are their claims testable or generalizable? Do they change the way people think and talk? Topics announced during the previous quarter on course web site. Limited enrollment. Prerequisites: Symbolic Systems undergraduate core course in each of philosophy, psychology or linguistics, and computer science.
3 units (Davies) not given 2005-06

SYMSYS 209. Battles Over Bits—The changing nature of information in the Internet age and its relationship to human behavior. Philosophical assumptions underlying practices such as open source software development, file sharing, common carriage, and community wireless networks,
contrasted with arguments for protecting private and commercial interests such as software patents, copy protection, copyright infringement lawsuits, and regulatory barriers. Theory and evidence from disciplines including psychology, economics, computer science, law, and political science. Prerequisite: PSYCH 40, 55, 70, or SYMBSYS 202.

3 units, Aut (Davies)

SYMBSYS 216. Biological Knowledge and Symbolic Biocomputing — Topics include the representation of biological knowledge including biological ontologies and qualitative and semi-quantitative models; model-based reasoning and explanation; automatic and guided model discovery; and knowledge-based biocomputation. No programming experience required.

3 units, Spr (Shrager)

RESEARCH

SYMBSYS 91. Junior Honors Seminar — Recommended for juniors doing an honors project during the following year. Defining a topic, choosing an adviser, considering overall goals. Resources at Stanford and some experiences of seniors discussed with guest speakers.

2 units, Win (Davies)

SYMBSYS 190. Senior Honors Tutorial — Under the supervision of their faculty honors adviser, students work on their senior honors project. May be repeated for credit.

1-5 units, Aut, Win, Spr, Sum (Staff)

SYMBSYS 191. Senior Honors Seminar — Recommended for seniors doing an honors project. Under the leadership of the Symbolic Systems program coordinator, students meet, discuss, and present their honors project.

2 units, Aut (Davies)

SYMBSYS 196. Independent Study — Independent work under the supervision of a faculty member. Can be repeated for credit.

1-15 units, Aut, Win, Spr, Sum (Staff)

SYMBSYS 291. Master’s Program Seminar — Enrollment limited to students in the Symbolic Systems M.S. degree program. Can be repeated for credit.

1 unit, Aut, Win, Spr (Davies)

INTERDEPARTMENTAL OFFERINGS

See the respective department listings for course descriptions and General Education Requirements (GER) information.

BIOLOGICAL SCIENCES

BIOSCI 20. Introduction to Brain and Behavior
3 units (Fernald) alternate years, given 2006-07

BIOSCI 150/250. Human Behavioral Biology
3-6 units, Spr (Sapolsky) alternate years, not given 2006-07

COMMUNICATION

COMM 106/206. Communication Research Methods
4-5 units, Win (Krosnick)

COMM 169/269. Computers and Interfaces
4-5 units, Win (Nass)

COMM 172/272. Psychological Processing of Media
4-5 units, Spr (Reeves)

COMPUTER SCIENCE

CS 103A. Discrete Mathematics for Computer Science
3 units, Aut, Win (Plummer)

CS 103B. Discrete Structures
3 units, Win (Johnson), Spr (Koltun)

CS 103X. Discrete Structures (Accelerated)
3-4 units, Win (Cain)
ECONOMICS
ECON 51. Economic Analysis II
5 units, Win (Tendall), Spr (Malker), Sum (Staff)
ECON 137. Information and Incentives
5 units (Staff) not given 2005-06
ECON 160. Game Theory and Economic Applications
5 units, Spr (Hammond)
ECON 178/278. Neuroeconomics
5 units (Rangel) not given 2005-06

EDUCATION
EDUC 218. Topics in Cognition and Learning: Quantitative Reasoning
3 units, Aut (Schwartz)
EDUC 298. Online Communities of Learning
3 units (Pea) not given 2005-06

ELECTRICAL ENGINEERING
EE 178. Probabilistic Systems Analysis
3 units, Win (El Gamal)
EE 376A. Information Theory
3 units, Win (Weissman)

ENGINEERING
ENGR 62. Introduction to Optimization
4 units, Aut, Spr (Staff)

LINGUISTICS
LINGUIST 105/205. Phonetics
4 units, Aut (Scarborough)
LINGUIST 110. Introduction to Phonetics and Phonology
4 units, Spr (Antilla)
LINGUIST 120. Introduction to Syntax
4 units, Aut (Sag)
LINGUIST 124A/224A. Introduction to Formal Universal Grammar
4 units, Aut (Sells)
LINGUIST 128/228. Real English: The Syntax of Language Use
4 units (Bresnan) not given 2005-06
LINGUIST 130A. Introduction to Linguistic Meaning
4 units, Aut (Peters)
LINGUIST 130B. Introduction to Lexical Semantics
4 units, Win (Fong)
LINGUIST 140. Language Acquisition I
4 units, Spr (Estigarribia)
LINGUIST 180. Introduction to Computer Speech and Language Processing
4 units, Aut (Jurafsky)
LINGUIST 182/282. Human and Machine Translation
4 units, Aut (Kay)
LINGUIST 183/283. Programming and Algorithms for Natural Language Processing
3-4 units, Win (Kay)
LINGUIST 187/287. Grammar Engineering
1-4 units, Spr (King, Kaplan)
LINGUIST 210. Phonology
4 units (Antilla) not given 2005-06
LINGUIST 221A. Foundations of English Grammar
1-4 units (Sag) not given 2005-06
LINGUIST 221B. Studies in Universal Grammar
1-4 units (Sag) not given 2005-06
LINGUIST 222A. Lexicalist Foundations of Syntax
2-4 units (Sells) not given 2005-06
LINGUIST 230A. Introduction to Semantics and Pragmatics
2-4 units, Aut (Beaver)
LINGUIST 230B. Semantics and Pragmatics
2-4 units, Spr (Peters)
LINGUIST 232A. Lexical Semantics
2-4 units, Win (Levin)
LINGUIST 241. Language Acquisition II: Advanced Topics in Language Acquisition
1-4 units (E. Clark) not given 2005-06
LINGUIST 247. Seminar in Psycholinguistics
2-4 units (Staff) not given 2005-06
LINGUIST 280. Natural Language Processing
3-4 units, Spr (Manning)
LINGUIST 285. Finite State Methods in Natural Language Processing
3-4 units, Spr (Karttunen)

MANAGEMENT SCIENCE AND ENGINEERING
MS&E 120. Probabilistic Analysis
5 units, Aut (Shachter)
MS&E 121. Introduction to Stochastic Modeling
4 units, Win (Glynn)
MS&E 201. Dynamic Systems
3-4 units, Spr (Tse)
MS&E 430. Contextual and Organizational Issues in Human-Computer Interaction
3-4 units, Spr (Hinds)

MATHEMATICS
MATH 103. Matrix Theory and its Applications
3 units, Aut, Win, Spr, Sum (Staff)
MATH 113. Linear Algebra and Matrix Theory
3 units, Aut, Win (Vakil)
MATH 151. Introduction to Probability Theory
3 units, Win (Liu)

MECHANICAL ENGINEERING
ME 115. Human Values in Design
3 units, Win (Staff)

MUSIC
MUSIC 151. Psychophysics and Cognitive Psychology for Musicians
4 units, Spr (J. Berger)
MUSIC 220A. Fundamentals of Computer-Generated Sound
2-4 units, Aut (Chafe)
MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing
2-4 units, Win (Lopez-Lezcano)
MUSIC 250A. HCI Theory and Practice
3-4 units, Aut, Win (Verplank)
MUSIC 253. Musical Information: An Introduction
1-4 units, Win (Selfridge-Field)
MUSIC 254. Applications of Musical Information: Query, Analysis, and Style Simulation
1-4 units, Spr (Selfridge-Field)
SCHOOL OF HUMANITIES AND SCIENCES

NEUROBIOLOGY
NBIO 204. Computational Neuroimaging
1-3 units (Wandell, Grill-Spector) alternate years, given 2006-07
NBIO 206. The Nervous System
8 units, Win (Barres, Knudsen, Newsome, Raymond, Clandinin, Moore, Bacocus)
NBIO 218. Neural Basis of Behavior
4 units, Spr (Knudsen, Raymond) alternate years, not given 2006-07

PHILOSOPHY
PHIL 80. Mind, Matter, and Meaning
5 units, Win, Spr (Taylor)
PHIL 102. Modern Philosophy, Descartes to Kant
4 units, Spr (De Pierris)
PHIL 133/233. Major Figures in 20th-Century Philosophy
4 units (Føllesdal) not given 2005-06
PHIL 150/250. Basic Concepts in Mathematical Logic
4 units, Aut (Pauly)
PHIL 151/251. First-Order Logic
4 units, Win (Pauly)
PHIL 152/252. Computability and Logic
4 units, Spr (Pauly)
PHIL 154/254. Modal Logic
4 units (van Benthem) not given 2005-06
PHIL 162/262. Philosophy of Mathematics
4 units (Staff) not given 2005-06
PHIL 164/264. Central Topics in the Philosophy of Science: Theory and Evidence
4 units, Win (Ryckman)
PHIL 167B/267B. Philosophy, Biology, and Behavior
4 units, Win (Longino)
PHIL 181/281. Philosophy of Language
4 units, Aut (Crimmins)
PHIL 184/284. Theory of Knowledge
4 units, Spr (Hills)
PHIL 186/286. Philosophy of Mind
4 units (Staff) not given 2005-06
PHIL 187/287. Philosophy of Action
4 units, Win (Bratman)
PHIL 188. Personal Identity
4 units, Aut (Ferrero)
PHIL 189. Philosophical Applications of Cognitive Science
4 units (Staff) not given 2005-06
PHIL 350A. Model Theory
3 units, Win (Mints)
PHIL 358. Logic, Language, and Information
3 units, Spr (van Benthem)

PSYCHOLOGY
PSYCH 30. Introduction to Perception
3 units, Win (Grill-Spector)
PSYCH 45. Introduction to Learning and Memory
3 units, Spr (Wagner)
PSYCH 70. Introduction to Social Psychology
4 units, Spr (Ross, Staff)
PSYCH 120. Cellular Neuroscience: Cell Signaling and Behavior
4 units, Aut (Wine)
PSYCH 131/262. Language and Thought
4 units (H. Clark) not given 2005-06
PSYCH 137/239A. Birds to Words: Cognition, Communication, and Language
3 units, Aut (A. Fernald, Ramscar)
PSYCH 141. Cognitive Development
3 units, Aut (Markman)
PSYCH 143/239. Developmental Anomalies
3 units (Johnson) not given 2005-06
PSYCH 156/271. Applications of Social Psychology
1-4 units (Ross) not given 2005-06
PSYCH 202. Cognitive Neuroscience
3 units, Spr (Grill-Spector, Wagner, Wandell, Wine)
PSYCH 204A. Computational Neuroimaging
1-3 units (Wandell, Grill-Spector) alternate years, given 2006-07
PSYCH 227. Seminar in Psycholinguistics: Psycholinguistics of Conversational Speech
2-4 units (Jurafsky, H. Clark) not given 2005-06
PSYCH 250. High-level Vision
1-3 units (Grill-Spector) alternate years, given 2006-07
PSYCH 251. Affective Neuroscience
3 units (Knutson) not given 2005-06
PSYCH 252. Statistical Methods for Behavioral and Social Sciences
1-6 units, Aut (Thomas)
PSYCH 253. Statistical Theory, Models, and Methodology
3 units, Spr (Thomas)
PSYCH 272. Special Topics in Psycholinguistics
1-3 units (H. Clark) not given 2005-06
PSYCH 278. Neuroeconomics
5 units, Aut (Knutson, Rangel)

SOCIOLOGY
SOC 126/226. Introduction to Social Networks
5 units, Win (Mark)

STATISTICS
STATS 110. Statistical Methods in Engineering and the Physical Sciences
4-5 units Aut, Sum (Staff)
STATS 116. Theory of Probability
3-5 units, Aut (Diaconis), Spr (Nacu), Sum (Staff)
STATS 121. Probability, Induction, Statistics
3 units (Staff) not given 2005-06
STATS 191. Introduction to Applied Statistics
3-4 units, Win (Taylor)
STATS 200. Introduction to Statistical Inference
3 units, Win (Romano), Sum (Staff)
A major in Urban Studies prepares students for careers and advanced study in fields such as business, law, public policy, urban design, and urban planning; many have obtained graduate degrees in architecture, urban design, planning, community conflict resolution and the nonprofit sector. Other courses include: POLISCI 221T. Politics of Race and Ethnicity in the United States; POLISCI 143. Nongovernmental Organizations and Development in Poor Countries; HISTORY 260. Race and Ethnicity in the American Metropolis; ENGR 150. Social Innovation and Entrepreneurship; CEE 148. Design and Construction of Affordable Housing; and SOC 1, Introduction to Sociology.

Undergraduate Programs

All students majoring in Urban Studies must complete the Urban Studies core. Those who specialize in urban planning and design, urban education, or community organization must complete their majors by meeting the appropriate requirements for their chosen concentration, supplemented by electives that bring the total units to a minimum of 73. URBANST 198, URBANST 199, and prerequisites for required courses and for electives do not count towards the 73-unit minimum.

The Urban Studies major at Stanford prepares students to address urbanization, urban change, and the interaction of people and groups in urbanized areas. The major gives students a knowledge base and theoretical, analytical, and practical skills to understand urban social systems and effect social change. The major requires students to complete four types of courses totaling at least 73 units: 19 units in the core, 8 units of skills courses, 25 units in an area of concentration, and 10 units in the capstone sequence. If units in these categories total less than 73, the remaining units may be fulfilled by courses in other concentrations or in Urban Studies courses numbered 100 or higher (except URBANST 198 and 199). Majors must also complete two prerequisites, ECON 1, Elementary Economics, and SOC 1, Introduction to Sociology.

Urban Studies students obtain basic quantitative skills by completing MATH 19, 20, and 21, preferably before the junior year.

Urban Studies students should consider an internship in an urban organization in the public or private sector. Urban Studies majors may enroll in one course for credit for such an internship. Students can consult the Haas Center for Public Service on courses with internship placements at community organizations.

Urban Studies students should spend at least one quarter studying at an overseas studies program to learn how cities vary across societies. Some Urban Studies core course requirements, as well as electives, can be satisfied at Stanford overseas campuses. Courses offered overseas vary from year to year, and students should check in advance with Overseas Studies and Urban Studies concerning which courses meet Urban Studies requirements. It is often possible to arrange a summer placement relevant to an Urban Studies major at Stanford’s overseas locations.

A minimum grade of ‘C’ is required for courses used to satisfy requirements for the major. Qualified students may write a senior honors thesis and graduate with honors; see details in “Honors Program” below. Students interested in declaring Urban Studies as a major are required to meet first with one of the program directors; they then declare the Urban Studies major on Axess.

Urban Studies majors should complete URBANST 110, Introduction to Urban Studies, before Spring Quarter of their junior year. The following courses, totally 19 units, are required:

- URBANST 110. Introduction to Urban Studies
- URBANST 111. Urban Politics
- URBANST 112. The Urban Underclass
- URBANST 113. Introduction to Urban Design

Skills

A minimum of 8 units are required. The following courses may be used to fulfill the skills requirement; additional courses may be available on the program web site or in the program office:

- ARTSTUDI 60. Design I: Fundamental Visual Language
- CASA 93B. Prefield Research Seminar

Concentrations

Students must complete at least 25 units in one of the following concentrations. Courses may not be double counted. Students should consult an adviser to develop a program that meets their intellectual goals.

Community Organization—Focus is on how community action, philanthropy, and organizations in nonprofit and for-profit sectors address urban social problems. Courses concerned with public service and community organizations provide a foundation for more advanced studies of community conflict resolution and the nonprofit sector. Other courses introduce students to concepts, skills, and aspects of urban planning and design. This concentration prepares students to enter graduate programs concerned with urban affairs and community service, and to work with local governmental agencies and for-profit and nonprofit organizations engaged in community service and development.

Students who may want to pursue a graduate degree in business or city planning are encouraged to take ECON 50, Economic Analysis I.

The following course is required for the community organization concentration:

- POLISCI 133. Ethics and Politics in Public Service

The following courses may be counted toward the community organization concentration:

- CASA 88. Theories in Race & Ethnicity
- CEE 148. Design and Construction of Affordable Housing
- ENGR 150. Social Innovation and Entrepreneurship
- HISTORY 260. Race and Ethnicity in the American Metropolis
- POLISCI 143. Nongovernmental Organizations and Development in Poor Countries
- POLISCI 221T. Politics of Race and Ethnicity in the United States
- PUBLPOL 183. Philanthropy and Social Innovation
The purpose of this concentration is to prepare students for a career in educational policy and practice in diverse settings. This concentration is a useful basis for graduate study in educational policy, law, or business, and for students who have been admitted by the School of Education to pursue a coterminal master’s degree in the Stanford Teacher Education Program (STEP), the Policy, Organization and Leadership Studies Program (POLIS), or the John Gardner Center for Youth and Community Studies Program (POLS). Students who choose this concentration may be eligible for the undergraduate honors program of the School of Education, in which case opportunities to obtain teaching and advising experience are available in nearby schools through Upward Bound and other programs administered by the Haas Center for Public Service and through courses offered by the School of Education.

Students who choose this concentration may be eligible for the undergraduate honors program of the School of Education, in which case they should enroll in EDUC 199A, B, or C during their senior year. The following course is required for the urban education concentration:

**EDUC 212X. Urban Education**

The following courses may be counted toward the urban education concentration. Students pursuing a self-designed concentration must submit proposals for approval by the Director of Urban Studies by the middle of the second quarter of the student’s junior year. Applications received after that deadline are not considered. Students interested in designing their own concentration are strongly encouraged to meet with the Director of Urban Studies before the end of their sophomore year.

**CAPSTONE**

All majors are required to complete a sequence of two seminars, totaling at least 10 units, in which students design a senior project and write the results of their project. The capstone seminars can be used to satisfy the Writing in the Major requirement and to complete some work on an honors thesis. URBANST 201 or 202 should be taken in the junior year, and URBANST 203 in the senior year.

**MINORS**

The minor in Urban Studies is designed to introduce students to approaches in several different disciplines to the study of cities, and provides them with the opportunity to explore their interests in one of four specialized fields: Community Organization, Urban Education, Urban Planning and Design, or Urban Planning and Design Social Innovation. Students must declare a minor in Urban Studies no later than the last day of the quarter that is four quarters before degree conferred.

The minor in Urban Studies requires completion of seven courses for a letter grade, including URBANST 110, Introduction to Urban Studies. Two of the seven courses must be from among the other core classes: URBANST 111, 112, 113. At least one course must be from each category.
1. Community Organization
   a) POLISCI 133. Ethics and Politics in Public Service
   b) SOC 118. Social Movements and Collective Action
   c) URBANST 121. Civil Society and the Nonprofit Sector
   d) URBANST 132. Concepts and Analytic Skills for the Social Sector
2. Urban Education
   a) EDUC 110. Sociology of Education
   b) EDUC 179. Urban Youth and their Institutions: Research and Practice
   c) EDUC 212X. Urban Education
   d) URBANST 144. Dilemmas in Urban Education
3. Urban Planning and Design
   a) CEE 148. Design and Construction of Affordable Housing
   b) MS&E 196. Transportation Systems and Urban Development or URBANST 165. Sustainable Urban and Regional Transportation Planning
   c) POLISCI 221R Urban Policy
   d) URBANST 161. Urban History Since 1920
   e) URBANST 162. Managing Local Governments
   f) URBANST 163. Land Use Control
   g) URBANST 171. Urban Design Studio
4. Social Innovation
   a) URBANST 121. Civil Society and the Nonprofit Sector
   b) URBANST 132. Concepts and Analytic Skills for the Social Sector
   c) PUBPOL 180. Social Innovation
   d) ENGR 150. Social Entrepreneurship Startup (must be taken for 4 or 5 units for the minor) or URBANST 133. Social Entrepreneurship Collaboratory

HONORS PROGRAM
The honors program offers qualified students an opportunity to conduct independent research and to write a thesis summarizing the results. Before being accepted to the honors program in Urban Studies, a student must declare a major in Urban Studies and complete at least 30 of the 73 required units including all prerequisites and core classes.

1. complete URBANST 202 (offered Winter Quarter);
2. have an overall GPA of 3.3 and a GPA of at least 3.5 in Urban Studies
3. submit an application, including a one-page abstract and the signatures of an adviser and, if applicable, a second reader. If the adviser is not a member of Stanford’s Academic Council, the student must have a second reader who is an Academic Council member. The application must be submitted to the program office no later than the last day of classes in Spring Quarter of the junior year, and it must then be approved by the Director of the Urban Studies honors program. Honors students must register for 7-15 units total in URBANST 199, Senior Honors Thesis, over the course of their senior year. These units do not count towards the 73-unit requirement for graduating with a B.A. in Urban Studies. Honors work is considered to be above and beyond regular graduation standards.

URBANST 202 is required for all students who plan on writing honors theses. This course should be taken during junior year. Students who plan to be away during Winter Quarter of their junior year are advised to take URBANST 202 in the Winter Quarter of their sophomore year.

In Winter Quarter of senior year, all students writing honors theses must register for one unit of URBANST 202, in which they present portions of their theses as models for juniors in the class. Seniors also meet separately to present and discuss their work-in-progress. All honors students are required to present their theses at the Senior Honors Colloquium in Spring Quarter of senior year.

To graduate with honors, students must receive a grade of at least ‘A-‘ in the honors work and have a GPA of at least 3.5 in courses for the Urban Studies major at the time of graduation.

COTERMINAL PROGRAMS
Undergraduates in Urban Studies may enter coterminal master’s degree programs in a number of departments and schools in the University. In recent years, Urban Studies majors have developed coterminal programs with the departments of Civil and Environmental Engineering, Cultural and Social Anthropology, and Sociology, and with the School of Education. A special coterminal program with the School of Education exists for students in the Urban Education concentration, but other coterminal programs can also be arranged through the School of Education. Information and applications for coterminal degree programs are available at the Undergraduate Advising Office. Students should discuss the coterminal program with a program director during their junior year.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#coterm.

COURSES
Further descriptions and details of current courses offered by the Program on Urban Studies may be obtained from the program office before each quarter.

URBANST 110. Introduction to Urban Studies—The study of cities and urban civilization. History of urbanization and disciplinary methodologies comprising the field of urban studies including economics, political science, sociology, urban design, urban history, and urban public policy. GER:DB-SocSci
4 units, Aut, Spr (Stout), Win (Kahan)

URBANST 111. Urban Politics—(Same as POLISCI 121.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor. GER:DB-SocSci
5 units, Win (Fraga)

URBANST 112. The Urban Underclass—(Same as SOC 149.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci
5 units, Spr (Rosenfeld)

URBANST 113. Introduction to Urban Design—Urban design theory and contemporary practice. Critical issues in urban development and conservation. Neighborhood livability, central city revitalization, historic preservation, and regional growth are examined through comparative case studies from N. America and abroad. Projects focus on neighborhood, downtown, and regional issues in San Francisco and the Bay Area. Two Saturday field workshops in San Francisco. GER:DB-SocSci
5 units, Win (Gast)

URBANST 121. Civil Society and the Nonprofit Sector—Development of the idea of civil society from early Enlightenment Europe to the contemporary U.S. Historical and theoretical foundations. Contemporary features of the nonprofit sector including its legal, economic, political, and ethical dimensions. Structure and operation of modern philanthropy and challenges of the 21st century.
2-4 units, Spr (Sievers)

URBANST 123. Introduction to Community-Based Research—Principles and practice of community-based research as a collaborative enterprise between academic researchers and community members. Guest speakers from community organizations, faculty members, and alumni of the Public Service Scholars Program. How previous experience with community organizations provides a starting point for developing community-based senior theses or independent research projects.
1 unit, Aut (Schmidt-Posner)

URBANST 124. Urban Youth and Their Institutions: Research and Practice—(Enroll in EDUC 179.)
4.5 units (McLaughlin) not given 2005-06

URBANST 125. Youth Empowerment and Civic Engagement—(Enroll in EDUC 179B.)
2-4 units (McLaughlin) not given 2005-06
URBANST 126. Spirituality and Nonviolent Social Transformation — A life of engagement in social transformation is often built on a foundation of spiritual and religious commitments. Case studies of nonviolent social change agents including Rosa Parks, César Chávez, and Women in Black; the religious and spiritual underpinnings of their commitments. Theory and principles of nonviolence. Films and readings. A service learning component includes placements in organizations engaged in social transformation. GER:DB-Hum
4 units, Win (McLennan, Karlin-Neumann, Sanders)

URBANST 130. Social Innovation — (Enroll in PUBLPOL 180.)
4 units, Aut (Phills)

URBANST 131. Social Innovation and the Social Entrepreneur — Invited lecture series. Perspectives and endeavors of thought leaders and entrepreneurs who address social needs in the U.S. and internationally through private for-profit and nonprofit organizations, nongovernmental organizations, or public institutions.
1 unit, Aut (Phills, Staff)

URBANST 132. Concepts and Analytic Skills for the Social Sector — Analytical methods, marketing, language, organizational mission, strategy, and finance in the for-profit and nonprofit social sectors. Focus is on the integration of theory and application. Opportunities and limits of methods from the for-profit sector to meet social goals. Enrollment limited to 20. Prerequisite: ECON 1. GER:DB-SocSci
4 units, Win (Kieschnick)

URBANST 133. Social Entrepreneurship Collaboratory — Interdisciplinary student teams create and develop U.S. and international social entrepreneurship initiatives. Proposed initiatives may be new entities, or innovative projects, partnerships, and/or strategies impacting existing organizations and social issues in the U.S. and internationally. Focus is on each team’s research and on planning documents to further project development. Project development varies with the quarter and the skill set of each team, but should include: issue and needs identification; market research; design and development of an innovative and feasible solution; and drafting of planning documents. In advanced cases, solicitation of funding and implementation of a pilot project. Enrollment limited to 30. May be repeated for credit. Prerequisite: 131, 132 (may be taken concurrently), or consent of instructor.
4 units, Win, Spr (Edwards, Scher)

URBANST 135. Social Innovation and Entrepreneurship — (Enroll in ENGR 150.)
1-6 units, Aut, Win, Spr (Behrman)

URBANST 140. Urban Education — (Enroll in EDUC 212X.)
3-4 units, Spr (McDermott)

URBANST 144. Dilemmas in Urban Education — Dichotomies such as: large, traditional schools versus small schools; segregation versus integration; and teacher certification versus large-scale testing. Topics: interaction of the city in the school through gang activity or job placement programs; current legal challenges; class size reduction; tracking; and retention and social promotion policies. Students contribute their own experiences. Goal is to explore issues facing education in an urban setting, not to solve problems. GER:DB-SocSci
5 units, Win (Scarloss)

URBANST 147. Crime and Incarceration — (Enroll in SOC 147.)
5 units, Aut (Colwell)

URBANST 161. U.S. Urban History since 1920 — Possible topics include: the end of European immigration and its impact on cities; the rise of the automobile; mass culture and consumerism; the Depression and cities; WW II and the martial metropolis; de-industrialization; suburbanization; African American migration; urban renewal; riots, race, and the narrative of urban crisis; the impact of immigration from Asia, Latin America, and Africa; homelessness; the rise of the Sunbelt cities; gentrification; globalization and cities. GER:DB-SocSci
5 units, Aut (Kahan)

URBANST 162. Managing Local Governments — In-the-trenches approach. Issues in leading and managing local governments in an era of accelerating and discontinuous change. Focus is on practical strategies related to financing, public services impacted by increasing demand and revenue constraints, the politics of urban planning, private-public partnerships, public sector marketing, entrepreneurial problem solving, promoting a learning and risk-taking organizational culture, and developing careers in local government. Enrollment limited to 25; preference to Urban Studies majors. GER:DB-SocSci
3-4 units, Win (Benest, Boesch)

URBANST 163. Land Use Control — Methods of land use control related to the pattern and scale of development and the protection of land and water resources. Emphasis is on the relationship between the desired land use goal and geographical landscape, physical externalities, land use law, and regulatory agencies. Topics include the historical roots of modern land use controls; urban reforms of the 19th century; private ownership of land; zoning; local, state, and federal land use regulation; and land trusts preservation. Smart growth, environmental impact consideration, private property rights, and special purpose agencies are related to current issues. GER:DB-SocSci
4 units, Spr (Hall)

URBANST 164. Utopia and Reality in Modern Urban Planning — Primarily for Urban Studies majors. Utopian urbanist thinkers such as Ebenezer Howard, Le Corbusier, and Frank Lloyd Wright who established the conceptual groundwork of contemporary urban planning practice. Research paper. GER:DB-Hum, WIM
5 units, Win (Stout)

URBANST 165. Sustainable Urban and Regional Transportation Planning — Environmental, economic, and equity aspects of urban transportation in 21st-century U.S. Expanding choices in urban and regional mobility that do not diminish resources for future generations. Implications for the global environment and the livability of communities. GER:DB-EngrAppSci
4-5 units, Aut (Kott)

URBANST 166. Urbanization, Global Change, and Sustainability — (Enroll in GES 138.)
3 units (Seto) not given 2005-06

URBANST 171. Urban Design Studio — The practical application of urban design theory. Projects focus on designing neighborhood and downtown regions to balance livability, revitalization, population growth, and historic preservation.
5 units, Spr (Glanz)

URBANST 174. Architectural Design Process — (Enroll in CEE 131.)
4 units, Spr (Blake, Todd)

URBANST 190. Urban Professions Seminar — Workshop. Contemporary practice of urban design and planning, community development, urban education, public service law, and related fields. Topics depend partly on student interests. Bay Area professionals lecture and respond to questions concerning their day-to-day work, impressions of their field, and the academic background recommended for their work. At least one session focuses on graduate schools and degrees relevant to these fields.
1 unit (Kahan) not given 2005-06

URBANST 194. Internship in Urban Studies — For Urban Studies majors only. Students organize an internship in an office of a government agency, a community organization, or a private firm directly relevant to the major. Reading supplements internship. Paper summarizes internship experience and related readings.
2-4 units, Aut, Win, Spr (Staff)

URBANST 195. Special Projects in Urban Studies
1-5 units, Aut, Win, Spr (Staff)

URBANST 197. Directed Reading
1-5 units, Aut, Win, Spr (Staff)
URBANST 198. Senior Research in Public Service—Limited to seniors approved by their departments for honors theses, and admitted to the year-round Public Service Scholars Program sponsored by the Haas Center for Public Service. What standards in addition to those expected by the academy apply to research conducted as a form of public and community service? How can communities benefit from research? Theory and practice of research as a form of public service. Readings in research theory and methods of participatory action research; presentations on research as service; workshops on each participant’s thesis work-in-progress; public presentation of completed research; and thesis evaluation by a community-based reader. May be repeated for credit. Corequisite: 199.

    1-3 units, Aut, Win, Spr (Schmidt-Posner, Staff)

URBANST 199. Senior Honors Thesis
    1-15 units, Aut, Win, Spr (Staff)

URBANST 200A. Choosing a Topic and Questions for a Senior Project—For juniors and sophomores majoring in Urban Studies or Sociology.
    1-2 units, Aut (Kahan)

URBANST 201. Preparation for Senior Project—First part of capstone experience for Urban Studies majors not writing honors theses. Students explore an urban issue of their choice and develop a proposal for a research project or internship based on it. The research or internship may be carried out beginning in Spring, Summer, or Autumn Quarter. Register for 203 to complete writing. WIM
    5 units, Spr (Kahan)

URBANST 202. Preparation for Honors Thesis—(Same as SOC 202.) Primarily for juniors in Sociology or Urban Studies thinking about writing a senior honors thesis; sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. Students write a research prospectus and grant proposal for research funding. Urban Studies seniors writing an honors thesis register for 1 unit to present their work. For WIM credit, must be junior or sophomore registering for at least 3 units. WIM
    1-5 units, Win (Tuma)

URBANST 203. Senior Seminar—Students write a substantial paper analyzing the research or internship project developed in 201 or 202. Students work independently but collaboratively, share work in progress, and offer peer feedback. Oral presentations.
    5 units (Staff) not given 2005-2006

OVERSEAS STUDIES
Courses approved for the Urban Studies major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN
URBANST 143U. Architecture and the City, 1871-1990: Berlin as a Nucleus of Modernity—(Same as ARTHIST 110Y, HISTORY 229V, STS 119V.)
    4 units, Spr (Neckenig)

URBANST 155V. Inventing the Modern City: Berlin in the Twenties and the Nineties
    4 units, Spr (Friedlander)

FLORENCE
URBANST 156V. The Duomo and Palazzo della Signoria: Symbols of a Civilization—(Same as ARTHIST 115Y.)
    4 units, Aut (Verdon)

SANTIAGO
URBANST 157V. Traces of Authority: The City of Santiago de Chile
    5 units, Aut (Fuenzalida)
PROGRAM IN WRITING AND RHETORIC

Faculty Director: Andrea A. Lunsford
Associate Director: Marvin Diogenes
Assistant Director: Alyssa O’Brien
Writing in the Major Director: Claude Reichard
Stanford Writing Center Director: Clyde Moneyhun
Stanford Writing Center Assistant Directors: Wendy Goldberg, John Tinker
Community Writing Project Coordinator: Carolyn Ross

Department Offices: Building 460, Room 223, Margaret Jacks Hall
Mail Code: 2085
Department Phone: (650) 723-2631
Email: pwrcourses@stanford.edu
Web Site: http://pwr.stanford.edu

Courses given in the Program in Writing and Rhetoric have the subject code PWR. For a complete list of subject codes, see Appendix.

GOALS OF THE PROGRAM IN WRITING AND RHETORIC

The Program in Writing and Rhetoric (PWR) designs and teaches courses that meet the Writing and Rhetoric requirement for undergraduates at Stanford as well as intermediate and advanced writing and rhetoric classes. For more information on the requirement, see the “Courses” section below and the “Writing and Rhetoric Requirement” section of this bulletin.

PWR courses engage students in rhetorical and contextual analysis of texts and substantive research-based argument. Students in PWR courses learn and practice time-tested rhetorical principles to gain increasing control over the intellectual and stylistic elements of their writing; they learn to analyze the ideas and persuasive strategies of others and to apply those insights to their own writing.

Toward these ends, PWR 1 focuses on elements of academic argument: understanding a writer’s stance; developing a supportable argumentative thesis; discovering, developing, and deploying cogent proofs; making appropriate organizational and stylistic choices; and understanding the expectations of audiences. The course emphasizes research-based writing, including the effective use of print and non-print sources, primary and secondary sources, and data based on fieldwork. Students enrolled in PWR 1 carry out significant research and use it as the basis for a polished and persuasive research-based argument.

PWR 2 further develops students’ skills in writing and oral presentation, emphasizing the ongoing development of content, organization, and style. The course addresses the dynamic interdependence of writing and speaking, as well as the importance of visual and multimedia elements in effective presentation of research. Students enrolled in PWR 2 have opportunities for practice and revision of written assignments and oral presentations as well as opportunities to present the results of scholarly inquiry, with an emphasis on how to work purposefully and well with a variety of presentation media.

As a general rule, students complete a minimum of four major assignments in both PWR 1 and 2. Written assignments vary from 5 to 15 pages in length, and students work intensively on revising each piece of writing. Oral presentations may involve collaborative work as well as multimedia elements. All assignments involve analyzing a range of texts as well as identifying, evaluating, and using multiple sources in support of academic and research-based arguments. In-class work on how to read with an increasingly critical eye and how to identify, evaluate, integrate, and cite sources effectively provides some of the most important academic learning experiences of students’ first years of work at Stanford.

Writing and Rhetoric classes enroll no more than 15 students, and all classes are conducted as seminars in which participation is crucial. In-class work often includes close reading of and responding to the writing of peers; these workshops are augmented by a minimum of three individual or small group conferences with the PWR instructor during the quarter.

THE STANFORD WRITING CENTER

The Stanford Writing Center, located in Room 020 of Margaret Jacks Hall (Building 460), supports student writing in the full range of academic and extracurricular contexts. The center emphasizes support for students writing for PWR, Introduction to the Humanities, and Stanford Introductory Seminars, while also serving all Stanford undergraduates through one-to-one and group tutorials, workshops, and seminars. Other events sponsored or hosted by the center include regular Writers’ Nights featuring fiction and poetry readings, the “How I Write” series of dialogues with Stanford faculty, and spoken word performances. For further details on the center, visit the center’s web site at http://swc.stanford.edu.

THE STANFORD STUDY OF WRITING

In 2001, PWR began a major research project, the Stanford Study of Writing, focusing on the development of undergraduate writing and the teaching of writing. All students participating in the study received an electronic portfolio including all their writing when they graduated in 2005. This academic year, a group of study participants continues to submit their writing from settings which include graduate programs and workplaces.

PWR PEDAGOGY PROGRAM

PWR offers ENGLISH 397A, a pedagogy seminar for all graduate students (TAs) from English, Modern Thought and Literature, and Comparative Literature who teach PWR courses as part of their graduate studies. Taught in the Autumn Quarter, the pedagogy seminar focuses on syllabus design, developing writing assignments, and responding to student writing. The history of rhetoric and writing supplies a theoretical foundation as well as practical lessons for how to teach writing and research most effectively. In the Winter and Spring, graduate students continue their pedagogical development through a series of workshops and seminars focused on specific issues in the teaching of writing. Elements of the pedagogy program include class visits; group evaluation of writing assignments; workshops and lectures; a handbook on teaching; a library of teaching materials; a program web site with links to other writing program sites; and individual work with mentors and peers.

TRAINING FOR PEER WRITING CONSULTANTS

PWR offers PWR 195, a course on the tutoring of writing for undergraduates selected to serve as peer writing consultants in the Stanford Writing Center and across the campus, and PWR 198 for undergraduates who plan to work as tutors in high school as part of the Ravenswood Writings project.

COURSES

The Writing and Rhetoric requirement approved by the Faculty Senate in May 2001 includes courses at three levels. The first-level course, taken in the first year, can be satisfied by courses in PWR or Structured Liberal Education; the curriculum emphasizes analysis and research-based argument. The second-level course, to be completed by the end of the sophomore year, is a writing and oral/multimedia presentation course taught by the Program in Writing and Rhetoric and by other programs and departments; completion of Structured Liberal Education also satisfies the second-level requirement. The third-level course is a Writing in the Major (WIM) course taught in each major. WIM courses provide students with systematic opportunities to develop skills for writing in their chosen
fields. A list of certified WIM courses may be found in the table of “Undergraduate Major Unit Requirements” in the “Undergraduate Degrees and Programs” section of this bulletin. WIM course descriptions may be found under individual department and program sections.

The new sequence of required courses provides a coordinated approach responsive to how students mature as writers, researchers, and presenters during their undergraduate years. At each level, students are given opportunities to develop greater sophistication in conducting inquiry and producing scholarly work in progressively more specific disciplinary contexts.

Before the term in which students enroll in the first two levels of the requirement, they review course descriptions on the program website at http://pwr.stanford.edu. After reviewing the offerings, students submit a list of top choices, and the PWR office assigns students to courses based on these preferences.

**THE WRITING AND RHETORIC 2 REQUIREMENT**

As noted above, the second-level course requirement may be satisfied through completion of courses offered through PWR or by other programs and departments. Before the quarter in which students are assigned to enroll in the second-level course, they will be able to review all available courses that meet the requirement on the program website at http://pwr.stanford.edu. In addition to PWR 2, some Center for the Teaching of Learning courses and Stanford Introductory Seminars (SIS) satisfy the second-level Writing and Rhetoric requirement (WR 2). SIS courses require an additional application form; see http://introsems.stanford.edu/ and the SIS Winter and Spring supplements for more information.

**COMMUNITY WRITING PROJECT (CWP)**

Students may elect to enroll in a section of PWR 1 or 2 which has the designation “CWP” on the PWR website. Students in CWP sections write at least one project during the term (a grant proposal, pamphlet, news article, profile, or website) for a local community service agency. The Community Writing Project coordinator provides an orientation for each CWP section, including a description of participating agencies. Community Writing Project assignments are then made in consultation with the instructor and the CWP coordinator.

**PWR 1. Writing and Rhetoric 1**—Fulfills first level of the writing requirement. Rhetorical and contextual analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Also for students admitted to Stanford prior to Autumn 2003-04 who scored 4 or 5 on the English AP Exam or 6 or 7 on the International Baccalaureate Higher Level Exam.

4 units, Aut, Win, Spr (Staff)

**PWR 2. Writing and Rhetoric 2**—Further work in developing skills in argument and research-based writing, with emphasis on oral presentations of research-based arguments. Individual conferences with instructor, and collaborative projects. Prerequisite: PWR 1.

4 units, Aut, Win, Spr (Staff)

**PWR 4. Directed Writing**—For students who have completed the second level of the writing and rhetoric requirement and want further work on developing their writing. Analysis and research-based argument, writing for a range of audiences and in varied disciplinary contexts. Workshops and individual conferences. May be repeated for credit.

3-4 units, Aut, Win, Spr (Staff)

**PWR 5. Independent Writing**—For students who have completed the first two levels of the writing requirement and wish to work on a specialized writing project with the guidance of a PWR instructor.

1-5 units, Aut, Win, Spr (Staff)

**PWR 6. Writing Workshop**

1 unit, Aut (Staff)

**PWR 191. Advanced Writing**—Open to undergraduates and graduate students. Crafting nonfiction prose in a range of genres. Tutorials, workshops, discussions. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

3 units, Spr (Diogenes)

**PWR 192. Projects in Research, Writing, and Rhetoric**—Advanced work on research projects, early drafts of theses, expository excursions, manifestos, scripts, first-hand accounts, investigative reports, proposals, comic disputations, and other textual, rhetorical and imaginative explorations. Shared work, discussions, and examination of methods, rhetorics, and styles in all disciplines. Prerequisite: consent of instructor.

1-5 units, Aut (Obenzinger)

**PWR 193. Writing the Honors Thesis**—For students from all majors in the process of writing an honors thesis. Review of key elements of thesis process, including literature reviews, structure, argumentation, style, and documentation. Group and individual workshops.

1-5 units, Win, Spr (Obenzinger)

**PWR 195. Peer Writing Tutor Training Course**—For students selected to serve as peer writing tutors in the Stanford Writing Center and/or at other campus sites. Readings on and reflection about writing processes, the dynamics of writing and tutoring situations, tutoring techniques, learning styles, diversity, and ethics. Observation of tutoring sessions, written responses to readings, and other written work.

3 units, Spr (Moneyhun)

**PWR 198X. Tutoring with Adolescents: Ravenswood Writes**—(Same as EDUC 198X.) Strategies and approaches for teaching writing to students from diverse backgrounds and languages, and cultural and learning styles. Course prepares students to become tutors for Ravenswood Writes. Prerequisites: application and committee approval.

3 units, Spr (Ball, Lunsford)
SCHOOL OF LAW

Dean: Larry D. Kramer
Vice Dean: Mark G. Kelman
Associate Dean for Curriculum: G. Marcus Cole
Associate Dean for Public Interest and Clinical Education: Lawrence Marshall
Associate Dean for Research and Academics: Pamela S. Karlan
Senior Associate Dean and Chief Financial Officer: Frank Brucato
Associate Deans: Faye Deal, Catherine Glaze, Catherine Nardone, Susan Robinson

Associate Professor: Mariano-Florentino (Tino) Cuéllar, Michele Landis Dauber

Assistant Professors: Amalia D. Kessler, Jenny S. Martinez, Alison D. Morantz

Professor (Teaching): William S. Koski

Associate Professors (Teaching): Jayashri Srikantia, Allen Weiner

Senior Lecturers: Margaret R. Caldwell, David W. Mills, Alan Morrison, Helen Stacy

Courtesy Professor: Daniel P. Kessler

Visiting Professors: Juliet Brodie, Christopher L. Kutz, David J. Luban, Joan Petersilia, Jane Schacter, Alan O. Sykes, Timothy Wu

Legal Research and Writing Instructors: Eric Fink, Grace Humphreys, Suzanne Kim, Beth McLellan, Jeanne Merino, Eliza Patten

Affiliated Faculty: Alexandria Boehm (Engineering), Madhav Rajan (GSB)

School Office: Stanford Law School, Office of the Registrar, Law School Building 559, Nathan Abbot Way, Stanford, CA 94305-8610

Phone: (650) 723-0994

Web Site: http://lawschool.stanford.edu/

Courses given in Law have the subject code LAW. For a complete list of subject codes, see Appendix.

The School of Law was established as a department of the University in 1893. Its purpose is to provide a thorough legal education for students who are fitted by their maturity and their previous academic training to pursue professional study under university methods of instruction. The curriculum leading to the first professional degree in law (J.D.) constitutes an adequate preparation for the practice of law in any English-speaking jurisdiction. Graduate work leading to the degrees of Master of Laws, Master of the Science of Law, and Doctor of the Science of Law are also offered. For the full curriculum, see the Stanford University School of Law web site at http://lawreg.stanford.edu. The school is on a two-term academic calendar: Autumn term classes begin on September 6, 2005 and the term ends on December 14, 2005; Spring term classes begin on January 23, 2006, and the term ends on May 5, 2006.

COURSES

GRADUATE

The following courses are open to qualified graduate students in other departments of the University with the consent of the instructor:

LAW 307. Gender, Law, and Public Policy—(Same as FEMST 307.) Topics: equal protection standards, employment, reproductive rights, sexual harassment, rape, domestic violence, pornography, sexual orientation, feminist legal theory, and the family. Prerequisite: second- or third-year law student; others by consent of instructor.

3 term units, Spr semester (Rhode)

LAW 313. Health Law and Policy I—One of a two-course sequence; may be taken separately or in any order. For medical students; graduate students admitted by consent of instructor. The American health care system and its legal and policy problems. Characteristics of medical care compared with other goods and services, difficulties in assuring quality care, and the patchwork financing system. How the present system works, where it does not work, and how it might be improved.

3 term units, Aut semester (Greely)

LAW 329. Intellectual Property as a Strategic Asset—Open to business students. How intellectual property, including patents, trademarks, copyrights, and trade secrets, creates value. Why intellectual property based companies are among the most profitable, and why firms such as Ford are shedding physical assets to concentrate their patent portfolios and acquire brand names. Research project explores how a student-chosen company manages intellectual property as an asset and how it manages the law’s impact on the asset.

3 term units, Spr semester (Goldstein)

LAW 356. Children and Public Policy—Possible topic is: education; vulnerable older youth, including dropouts and youth in the juvenile justice or foster care system; or abused and neglected children.

4 units, Spr semester (Wald)

LAW 368. Law and Biosciences—(Same as HRP 211.) For medical students; graduate students by consent of instructor. Legal, social, and ethical issues arising from advances in the biosciences. Focus is on human genetics; also advances in assisted reproduction and neuroscience. Topics include forensic use of DNA, genetic testing, genetic discrimination, eugenics, cloning, pre-implantation genetic diagnosis, neuroscientific methods of lie detection, and genetic or neuroscience enhancement.

3 term units, Aut semester (Greely)

LAW 369. Legal Ethics—Professional ethics and regulation. Topics include candor, confidentiality, conflicts of interest, lawyer/client relationships, competence, regulatory structures, delivery of services, and pro bono responsibilities.

3 term units, Aut semester (Luban, Rhode)

LAW 369. Legal Ethics—The organization of the legal profession and how it controls the delivery of legal services including issues such as bar admission, discipline, attorneys’ fees, pro bono obligations, limitations on advertising, and restrictions on non-lawyers undertaking activities performed by lawyers. The impact of these rules on services and cost. Traditional ethics: client confidentiality and avoiding conflicts of interest. Their impact on clients, the courts, and third parties. Ethical and related issues that arise in class actions; applicable rules of procedure and due process cases.

3 term units, Spr semester (Morrison)
LAW 440. Biotechnology Law and Policy — Interdisciplinary. Patenting, corporate organization and financing, conflicts of interest, regulatory approvals, health care financing issues, and tort liability. Prospects for and implications of the biotechnology revolution. Materials for non-scientists on background knowledge about the science and technologies involved, and for non-law students on background knowledge about the legal system. Students groups to present solution to posed problems. Undergraduates require consent of instructor.
3 term units, Spr semester (Greeley)

LAW 504. Globalization, Middle East Regional Dilemmas, and Israel — (Same as JEWISHST 253/353.) The impact of globalization on Middle Eastern issues, emphasizing Israel. How Israel is adapting to changes in the international arena, their effect on its relationship with organizations such as the UN, WTO, OECD, U.S., and EU, and their effect on regional processes including the Middle East peace process, the disengagement plan, and strategies for a more secure Middle East.
4 units (2 term units for Law students), Aut (Mattias)

LAW 514. California Coast: Science, Policy, and Law — (Same as CEE 175A/275A, EARTHSYS 175/275.) Interdisciplinary. The legal, science, and policy dimensions of managing California’s coastal resources. Coastal land use and marine resource decision making. The physics, chemistry, and biology of the coastal zone, tools for exploring data from the coastal ocean, and the institutional framework that shapes public and private decision making. Field work: how experts from different disciplines work to resolve coastal policy questions.
3-4 units, Aut (Caldwell, Boehm, Sivas)

LAW 538. Sociology of Law — Same content as SOC 136/236. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; law in action versus law on the books; organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement.
3 units, Aut (Dauber)

LAW 604. Environmental Workshop — Academicians, practitioners, and policy makers discuss their current research or work in the environmental and natural resources field. Students lead in-class discussions.
2 term units, Spr semester (Caldwell)

LAW 611. Interdisciplinary Seminar on Conflict and Dispute Resolution — (Same as MS&E 459, PSYCH 283.) Problems of conflict resolution and negotiation from an interdisciplinary perspective. Presentations by faculty and scholars from other universities.
1 unit, Win (Hensler, Ross)

NONPROFESSIONAL

The following course is open to undergraduates and graduate students in other departments, and may be counted toward the B.A. degree, but not toward professional degrees in law.

LAW 106. Introduction to American Law — (Same as AMSTUD 179, POLISCI 122.) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general. GER:DB-SocSci
5 units, Aut (Friedman)

SCHOOL OF MEDICINE

Dean: Philip Pizzo
Senior Associate Dean for Research and Training: John C. Boothroyd
Senior Associate Dean for Research and Training: Harry B. Greenberg
Senior Associate Dean for Medical Education: Julie Parsonnet

The School of Medicine offers courses of study leading to the M.S., Ph.D., and M.D. degrees.

UNDERGRADUATE PROGRAMS

At the undergraduate level, a number of the school’s courses are open to any registered Stanford student who has fulfilled the prerequisites, subject to the usual limits of course enrollment and faculty approval. In the classroom, the school offers courses targeted to undergraduates as well as graduate-level courses where advanced undergraduates with a strong background in the life sciences are welcome. Among these offerings are many Stanford Introductory Seminars for freshmen and sophomores; interested students are encouraged to peruse the complete list of these offerings in the “Stanford Introductory Seminars” section of this bulletin or at http://www.stanford.edu/group/introsems/.

GRADUATE PROGRAMS

M.S. AND PH.D. PROGRAMS

The School of Medicine is home to graduate programs covering a broad range of disciplines within biomedicine leading to Ph.D. or M.S. degrees. All of these programs focus on interdisciplinary training with in-depth investigation of an original problem of fundamental importance to biomedicine. Each degree program sets its own curriculum, but many courses are taught by groups of faculty from multiple programs and departments. Flexibility is a priority to ensure that all students obtain the best possible training for pursuing careers in their areas of interest. Admission is through one of about 15 home programs. These home programs enable students to carry out dissertation research and training with School of Medicine faculty, as well as investigators in the departments of Biological Sciences and Biophysics in the School of Humanities and Sciences. Detailed information on School of Medicine M.S. and Ph.D. programs, curricula, and research can be found at http://med.stanford.edu/ms/ and http://med.stanford.edu/phd/. Application information may be obtained from Graduate Admissions, Office of the University Registrar, Old Union Building, 520 Lasuen Mall, Stanford University, Stanford, CA 94305-3005, or at http://gradadmissions.stanford.edu/.

M.D. PROGRAM

The School of Medicine seeks to attract creative medical students who are passionate about scholarship and wish to improve the health of the world’s people through research, innovation, and leadership. The Stanford M.D. curriculum provides education in biomedical and clinical sciences along with study and independent research through scholarly concentrations. Emphasis is placed on interdisciplinary learning, with streamlined content and melding of basic science and clinical instruction across the curriculum. Blocks of unscheduled time allow for individual or group study, participation in elective courses, research, and reflection. Alternative pathways through the curriculum include an option of a fifth or sixth year of study as well as opportunities for pursuing a second degree, such as an M.P.H. or Ph.D.

Broad clinical science education occurs throughout the curriculum with exposure to patient care and the practice of medicine beginning on the first day of medical school. Students may begin clinical clerkships as early as May of the second year. All medical students complete formal clinical experiences in medicine, surgery, pediatrics, obstetrics-gynecology, family medicine, psychiatry, neurology, and critical care.

Scholarly concentrations offer opportunities for in-depth study in subject areas including bioengineering, biomedical ethics and medical humanities, biomedical informatics, clinical research, community health
and public service, health services and policy research, immunology, molecular basis of medicine, neuroscience, women's health, and other areas that are independently designed. Students may pursue a scholarly concentration through the Original Research Track or the Scholars Track. Students in the Original Research Track pursue in-depth study in the area of concentration as well as a four quarter, independent research project, concluding with completion and write-up of the project. Original research is not required in the Scholars Track. Students also have the opportunity to conduct a Traveling Scholars project overseas. Following completion of 13 quarters of academic work, additional quarters may be taken at a decreased tuition rate. Completion of the M.D. degree must be achieved within six years, unless a petition is granted to extend this time frame.

Students with strong interests in medical research as a career are urged to investigate opportunities available under the auspices of the Medical Scientist Training Program (MSTP). This program provides a limited number of students the opportunity to pursue an individualized program of research and course work leading to both the M.D. and Ph.D. degrees. The estimated time for completion of the program is seven years. Students interested in participating in the MSTP are asked to provide supplemental information relevant to their research background and are considered for entry into the MSTP at the time of their application to the School of Medicine. Stanford also participates in a joint Master of Public Health program with the University of California, Berkeley, which requires an additional year to complete. Details about these programs may be found at http://med.stanford.edu/combined_degree/.

Stanford recognizes the diversity of the United States and California populations and is committed to representing this diversity in the medical student class. Provided an applicant to the school has completed the basic courses in physics, chemistry, and biology, the choice of an undergraduate major may reflect other interests, including the arts and humanities. Course work in biochemistry and the behavioral sciences is strongly recommended because of their importance in understanding medicine. Extracurricular activities and breadth of interests and experiences play an important role in the selection of students from among those applicants having superior records.

For further details on the M.D. degree, including admission requirements, see http://med.stanford.edu/md/admissions/.

## BIOCHEMISTRY

**Chair:** Suzanne R. Pfeffer

**Professors:** Patrick O. Brown, Douglas L. Brutlag, Gilbert Chu, Ronald W. Davis, James E. Ferrell, Jr., Daniel Herschlag, Mark A. Krasnow, Suzanne R. Pfeffer, James A. Spudich

**Associate Professors:** Chaitan S. Khosla, Sharon Long

**Assistant Professors:** Aaron F. Straight

**Courtesy Professors:** Suzanne E. Kohler, Sharon Long

**Department Offices:** Beckman Center, B400

**Mail Code:** 94305-5307

**Phone:** (650) 723-6161

**Web Site:** http://biochem.stanford.edu/

Courses given in Biochemistry have the subject code BIOC. For a complete list of subject codes, see Appendix.

Biochemistry is a department within the School of Medicine, with offices and labs located in the Beckman Center for Molecular and Genetic Medicine at the Stanford Medical Center. Courses offered by the department may be taken by undergraduate, graduate, and medical school students.

Advanced courses are offered in more specialized areas and they emphasize the most recent developments in biochemistry, cell biology, and molecular biology. These courses include the physical and chemical principles of biochemistry, enzyme reaction mechanisms, membrane trafficking and biochemistry, molecular motors and the cytoskeleton, mechanisms and regulation of nucleic acid replication and recombination, the biochemistry of bacterial and animal viruses, the molecular basis of morphogenesis, the molecular and cell biology of yeast, and the structure and function of both eukaryotic and prokaryotic chromosomes.

Opportunities exist for directed reading and research in biochemistry and molecular biology, utilizing the most advanced research facilities, including those for light and electron microscopy, chromatography and electrophoresis, protein and nucleic acid purification, rapid kinetic analysis, synthesis and analysis, single molecule analyses using laser light traps, microarray generation and analysis and computer graphic workstation facilities for protein and nucleic acid structural analysis. Ongoing research utilizes a variety of organisms, from bacteria to animal cells.

## GRADUATE PROGRAM

### DOCTOR OF PHILOSOPHY

Requirements for the M.S. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin. The department does not offer undergraduate degrees.

The Department of Biochemistry offers a Ph.D. program which begins in the Autumn Quarter of each year. The program of study is designed to prepare students for productive careers in biochemistry; its emphasis is training in research, and each student works closely with members of the faculty. In addition to the requirement for a Ph.D. dissertation based on original research, students are required to complete six advanced courses in biochemistry and related areas. Selection of these courses is tailored to fit the background and interests of each student. A second requirement involves the submission of two research proposals which are presented by the student to a small committee of departmental faculty members who are also responsible for monitoring the progress of student curricular and research programs, and a journal club presentation. All Ph.D. students are expected to participate actively in the department’s seminar program, and students are encouraged to attend and to present papers at regional and national meetings in cellular biochemistry and molecular biology. Teaching experience is an integral part of the Ph.D. curriculum and is required for the degree.

The Department of Biochemistry offers an M.S. degree only to students already enrolled in the Ph.D. program. Students should contact the Graduate Studies adviser for more details.

Those applying for graduate study should have at least a baccalaureate degree and should have completed work in cell and developmental biology, basic biochemistry and molecular biology, and genetics. Also required are: at least one year of university physics; differential and integral calculus; and analytical, organic, inorganic, and physical chemistry. The department is especially interested in those applicants who have research experience in biology or chemistry. Students must submit an application, including transcripts and letters of recommendation, by December 13.

Applications should be submitted at http://gradadmissions.stanford.edu and http://www.med.stanford.edu/school/biosciences/. If necessary, a paper application can be requested by mail from Graduate Admissions, Registrar’s Office, Old Union, 520 Lasuen Mall, Stanford University, Stanford CA 94304-3005, by phone (650) 723-4291, or email at gradadmissions@stanford.edu. Applicants are notified by April 1 of decisions on their applications. Stanford University requires scores from the Graduate Record Examination (GRE) (verbal, quantitative, and analytical), and applicants must submit scores from the GRE Subject Test in either biochemistry, biology, or chemistry. Applicants should take the October GRE exam.

All applicants are urged to compete for non-Stanford fellowships or scholarships, and U.S. citizens should complete an application for a National Science Foundation Predoctoral Traineeship. Students are provided with financial support to cover normal living expenses; Stanford tuition costs are paid.

All applicants for admission to the department are considered without regard to race, color, creed, religion, sex, age, national origin, or marital status.
Postdoctoral research training is available to graduates who hold a Ph.D. or an M.D. degree. Qualified individuals may write to individual faculty members for further information.

At present, the primary research interests of the department are the structure and function of proteins and nucleic acids, the biochemistry and control of development processes, molecular motors and the cytoskeleton, the trafficking of proteins between membrane-bound organelles, the control and regulation of gene expression, bioinformatics/protein structure design, and the application of microarrays to problems in human health and disease.

COURSES

3 units, Spr (Brutlag)

BIOC 199. Undergraduate Research—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

BIOC 202. Metabolic Biochemistry: Structure, Metabolism, and Energetics—Structure and function of biological molecules, enzyme kinetics and mechanisms, bioenergetics, pathways of intermediary metabolism and their control, and membrane structure and function. Course offered via online lectures and problem sets, with weekly small-group review sessions.

1-3 units, Aut (Brutlag)

BIOC 205. Molecular Foundations of Medicine—Topics include: DNA structure, replication, repair, and recombination; chromosome structure and function; gene expression including mechanisms for regulating transcription and translation; and methods for manipulating DNA, RNA, and proteins. Patient presentations illustrate how molecular biology affects the practice of medicine.

3 units, Aut (Chu, Brown, Krasnow)

BIOC 210. Advanced Topics in Membrane Trafficking—The structure, function, and biosynthesis of cellular membranes and organelles. Current literature. Prerequisites: 200, 203, or equivalents, and consent of instructor.

3 units (Pfeffer) not given 2005-06

BIOC 214. Physical and Chemical Principles of Enzyme Function—Enzymatic mechanisms, with emphasis on the fundamental behavior of biochemical systems and the properties that emerge due to the complex nature of these systems. Student presentations on specific enzymes based on classic and current literature, developed in consultation with the instructor. Prerequisites: BIOC/SBIO 241 and a course in organic chemistry.

3-5 units (Herschlag) not given 2005-06

BIOC 215. Frontiers in Biological Research—(Same as DBIO 215, GENE 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker’s primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.

1 unit, Aut, Win, Spr (Harbury, Kingsley, Baker)

BIOC 217. Advanced Tutorial in Special Topics—Readings and tutorial in membrane biochemistry, enzyme mechanisms, chromosome structure, biochemical genetics, bacterial and animal viruses, and nucleic acid enzymology. Conducted by advanced graduate students and postdoctoral fellows.

1-3 units, Aut, Win, Spr (Staff)

BIOC 218. Computational Molecular Biology—Online course; see http://biochem218.stanford.edu. For molecular biologists and computer scientists. Major issues, existing methods, and future directions concerning biological sequences and structure. Topics: accessing molecular databases, pattern search, classification of sequence and structure, alignment of sequences, rapid similarity searching, phylogenies, automated pattern learning, representing protein structure, gene expression profiling, clustering expressed genes, and discovering transcription factor binding sites. Lecture/lab. Final project. Enrollment limited to 40. Prerequisite: BIOSCI 52 or equivalent, or consent of instructor.

3 units (Brutlag) not given 2005-06

BIOC 220. Chemistry of Biological Processes—(Same as MPHA 220.) The principles of organic and physical chemistry as applied to biomolecules. Goal is a working knowledge of chemical principles that underlie biological processes, and chemical tools used to study and manipulate biological systems. Prerequisites: organic chemistry and biochemistry, or consent of instructor.

4 units, Aut (Wandall, Herschlag, Chen, Bogoy)

BIOC 221. The Teaching of Biochemistry—Required for teaching assistants in 203, 204, 217, or 218. Practical experience in teaching on a one-to-one basis, and problem set design and analysis. Familiarization with current lecture and text materials; evaluations of class papers and examinations. Prerequisite: enrollment in the Biochemistry Ph.D. program or consent of instructor.

3 units, Aut, Win, Spr, Sum (Staff)

BIOC 230. Molecular Interventions in Human Disease—For M.D. students who intend to declare a concentration in molecular basis of medicine, M.S.T.P. students, and Ph.D. students with a strong interest in medicine. Advanced medical biochemistry focusing on cases where molecular-level research has led to new medical treatments or changes in the understanding of important diseases. The underlying molecular basis of diseases and the reasons for success and failure in molecular approaches to treatment. Student-led discussions on primary medical and scientific literature.

2-3 units, Aut (Theriot, Harbury)

BIOC 241. Biological Macromolecules—(Enroll in SBIO 241.)

3-5 units, Aut (Puglisi, Weis, Block, Herschlag, Ferrell, McKay, Pande, Garcia)

BIOC 242. Methods in Molecular Biophysics—(Enroll in SBIO 242.)

3 units (Weis, Puglisi) not given 2005-06

BIOC 257. Currents in Biochemistry—Limited to graduate students and postdoctoral fellows in Biochemistry. Seminars by Biochemistry faculty on their ongoing research. Background, current advances and retreats, general significance, and tactical and strategic research directions. Written reviews required.

1-2 units (Kornberg, Lehman) not given 2005-06

BIOC 299. Directed Reading—May be repeated for credit. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

BIOC 399. Research and Special Advanced Work—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

BIOC 450. Introduction to Biotechnology—(Enroll in CHEMENG 450.)

3 units, Spr (Khosla)
CENTER FOR BIOMEDICAL ETHICS

Director: David C. Magnus
Director Emeritus: Thomas A. Raffin
Associate Director: Mildred K. Cho
Assistant Director: Anne J. Footer
Participating Faculty and Staff: Clarence H. Braddock, Julie A. Collier, LaVerla M. Crawley, Maren Grainger-Monsen, Henry Greely, Judy Illes, Agnieszka Jaworska, Sandra S. Lee, Jose R. Maldonado, Audrey Shafer, Sara L. Tobin, Lawrence I. Zaroff
Center Offices: 701 Welch Road, Building A, Suite 1105, Palo Alto, CA 94304
Mail Code: 94304-5748
Phone: (650) 723-5760
Web Site: http://scbe.stanford.edu/

The Stanford University Center for Biomedical Ethics (SCBE) is dedicated to interdisciplinary research and education in biomedical ethics, and provides clinical and research ethics consultation. SCBE serves as a scholarly resource on emerging ethical issues raised by medicine and biomedical research.

SCBE offers a scholarly concentration in Biomedical Ethics and Medical Humanities to medical students. This program allows medical students to study in depth the ethical and humanistic dimensions of research and practice. Additional information on requirements for the scholarly concentration, and a comprehensive list of other related courses is available at http://scbe.stanford.edu/education/bemh.html.

COURSES

For further information, see the Stanford University School of Medicine Catalog.

MEDICINE

INDE 136. Foundations of Bioethics—Classic articles, legal cases, and foundational concepts. Theoretical approaches derived from philosophy. The ethics of medicine and research on human subjects, assisted reproductive technologies, genetics, cloning, and stem cell research. Ethical issues at the end of life.
3 units, Win (Magnus)

INDE 212. The Human Condition: Medicine, Arts, and Humanities—The interdisciplinary field of medical humanities: the use of the arts and humanities to examine medicine in personal, social, and cultural contexts. Topics include the doctor/patient relationship, the patient perspective, the meaning of doctoring, and the meaning of illness. Sources include visual and performance arts, film, and literary genres such as poetry, fiction, and scholarly writing. Non-M.D. students may enroll with consent of instructor.
2 units, Spr (Zaroff)

INDE 226. History of Medicine Online
1 unit, Aut, Win, Spr Sum, (Meites, Shafer)

INDE 238. Current Concepts and Dilemmas in Genetic Testing—(Same as GENE 238) For M.D. students and biomedical graduate students. Issues arising from the translational process from research to commercialization. Diagnostic inventions and applications, community implications, newborn screening, cancer genetics, and pharmacogenomics. Guest experts. Limited enrollment.
2 units, Spr (Tobin, Cowan, Schrijver)

MED 250A. Medical Ethics I—Required core course for Scholarly Concentration in Biomedical Ethics and Medical Humanities. The field of bioethics including theoretical approaches to bioethical problems. Contemporary controversies and clinical cases. Issues include: genetics and stem cell research; rationing; ethical issues in care at the end of life; organ transplantation issues. Values that arise in different situations and clinical encounters.
2 units, Win (Magnus)

MED 255. The Responsible Conduct of Research—Forum. How to identify and approach ethical dilemmas that commonly arise in biomedical research. Issues in the practice of research such as in publication and interpretation of data, and issues raised by academic/industry ties. Contemporary debates at the interface of biomedical science and society regarding research on stem cells, bioweapons, genetic testing, human subjects, and vertebrate animals. Completion fulfills NIH/ADAMHA requirement for instruction in the ethical conduct of research. Recommended: research experience.
1 unit, Aut, Win, Spr (Staff)

INTERDEPARTMENTAL OFFERINGS

BIOMEDICAL INFORMATICS PROGRAM

Committee: Russ B. Altman (Chair and Program Director); Mark A. Musen (Co-Director); Betty Cheng, Amar K. Das, Lawrence M. Fagan (Associate Directors); Douglas L. Brutlag, Atul Butte, Teri E. Klein

Participating Faculty and Staff by Department:

- Anesthesiology: David M. Gaba (Professor)
- Biochemistry: Douglas L. Brutlag (Professor), Ron Davis (Professor), Julie Theriot (Assistant Professor)
- Bioinformatics: Scott L. Delp (Associate Professor)
- Biostatistics: Richard A. Olshen (Professor)
- Business: Alan M. Garber (Professor, by courtesy)
- Civil and Environmental Engineering: Raymond E. Levitt (Professor)
- Computer Science: Serafim Batzoglou (Assistant Professor), Leo Guibas (Professor), Daphne Koller (Associate Professor), Jean-Claude Latombe (Professor), Giao Wiederhold (Professor, Research, emeritus), Terry Winograd (Professor)
- Genetics: Russ B. Altman (Professor), Mike Cherry (Associate Professor, Research), Stanley N. Cohen (Professor, Research, emeritus), Stuart Kim (Professor), Teri E. Klein (Senior Research Scientist), Richard M. Myers (Professor), Gavin Sherlock (Assistant Professor)
- Health Research and Policy: Mark A. Hlatky (Professor), Richard A. Olshen (Professor), Robert Tibshirani (Professor)
- Management Science and Engineering: Margaret Brandeau (Professor), Ronald A. Howard (Professor), Ross D. Shachter (Associate Professor)
- Mathematics: Samuel Karlin (Professor, emeritus)
- Medicine: Jay Bhattacharya (Assistant Professor), Terrance Blaschke (Professor), Atul Butte (Assistant Professor), Robert W. Carlson (Professor), Amar K. Das (Assistant Professor), Parvati Dev (Senior Research Scientist), Lawrence M. Fagan (Senior Research Scientist), Alan M. Garber (Professor), Mary Goldstein (Professor), Michael Higgins (Consulting Associate Professor), Peter D. Karp (Consulting Assistant Professor), David Katzenstein (Professor, Research), John Koza (Consulting Professor), Henry Lowe (Associate Professor, Research; Senior Associate Dean for Information Resources and Technology), Mark A. Musen (Professor), Douglas K. Owens (Associate Professor), Robert W. Shafer (Assistant Professor, Research), P.J. Utz (Associate Professor)
- Microbiology and Immunology: Karla Kirkegaard (Professor), Garry Nolan (Associate Professor)
- Neurosurgery: John R. Adler (Professor), Ramin Shahidi (Assistant Professor, Research)
- Obstetrics and Gynecology: W. LeRoy Heinrichs (Professor, emeritus)
- Pathology: Arend Sidow (Assistant Professor)
- Pediatrics: Atul Butte (Assistant Professor)
- Psychiatry and Behavioral Sciences: Amar K. Das (Assistant Professor)
- Radiation Oncology: Arthur L. Boyer (Professor), Lei Xing (Assistant Professor, Research)
- Radiology: Sam Gambhir (Professor), Gary H. Glover (Professor), Sandy A. Napel (Professor), Norbert J. Pelc (Professor), Geoffrey Rubin (Associate Professor)
- Statistics: Trevor J. Hastie (Professor), Susan Holmes (Professor), Art Owen (Professor)
- Structural Biology: Michael Levitt (Professor)
- Surgery: Thomas Krummel (Professor), Charles Taylor (Assistant Professor, Research)

Program Offices: MSOB 215
Mail Code: 94305-5479
Phone: (650) 723-6979
Web Site: http://www.bmi.stanford.edu

Courses given in Biomedical Informatics Program have the subject code BIOMEDIN. For a complete list of subject codes, see Appendix.

This interdisciplinary program was created in response to a recognized need for well-trained researchers and academic leaders in the expanding field of biomedical informatics. The Biomedical Informatics Program was formerly called Medical Informatics Sciences (1982-2000).

The program in Biomedical Informatics emphasizes research to develop novel computational methods that can advance biomedicine. Students receive training in the investigation of new approaches to conceptual modeling and to development of new algorithms that address challenging problems in the biological sciences and clinical medicine. Students with a primary interest in developing new informatics methods and knowledge are best suited for this program. Students with a primary interest in the biological or medical application of existing informatics techniques may be better suited for training in the application areas themselves.

GRADUATE PROGRAMS

The Biomedical Informatics Program is interdepartmental and offers instruction and research opportunities leading to M.S. and Ph.D. degrees in Biomedical Informatics. All students are required to complete the core curriculum requirements outlined below, and also to elect additional courses to complement both their technical interests and their goals in applying informatics methods to clinical settings, biology, or imaging. Students who fail to maintain a 3.0 grade point average (GPA) in all five categories of the core curriculum are expected to pass a comprehensive exam in that area before the graduate degree is granted. In addition, prior to being formally admitted to candidacy for the Ph.D. degree, the student must demonstrate knowledge of biomedical informatics fundamentals and a potential for research by passing a qualifying exam.

The core curriculum is common to all degrees offered by the program but is adapted or augmented depending on the interests and prior experience of the student. Deviations from the core curriculum outlined below must be justified in writing and approved by the student’s Biomedical Informatics academic adviser and the chair of the Biomedical Informatics Committee. It should be noted, however, that the program is intended to provide flexibility and to complement other opportunities in applied medical research that exist at Stanford. Although most students are expected to comply with the basic program of study outlined here, special arrangements can be made for those with unusual needs or those simultaneously enrolled in other degree programs within the University. Similarly, students with prior relevant training will have the curriculum adjusted to eliminate requirements that were met as part of their prior training.

CORE CURRICULUM

All students are expected to participate regularly in the Biomedical Informatics Student Seminar (201) and Colloquia (200), regardless of whether they register for credit in those courses. In addition, all students are expected to fulfill requirements in the following five categories:

1. Core Biomedical Informatics (15 units): students are expected to understand current applications of computing in biology and medicine and to develop a broad appreciation for research in the management of biomedical information. Required courses are: BIOMEDIN 200, 201, 210, 211, 212, and 214, all of which should be taken during the first and second year in the program. BIOMEDIN 200 and 201 are required courses but are not counted toward the core Biomedical Informatics requirement. Students must also take an additional 3 units of Biomedical Informatics course work (which may include crosslisted courses from other departments, but not including BIOMEDIN 200, 201, 299, 302, 303, or 305), selected in consultation with the academic adviser.

2. Computer Science (9 units): the student is expected to acquire knowledge of the use of computers, computer organization, programming, and symbolic systems. It is assumed that students will have had matriculation prior computing experience at least equivalent to a course introducing the fundamentals of data structures and algorithms such as CS 103A,B, 103X, 106A,B, 106X, or other courses approved by
academic adviser or executive committee. All students are required to take a minimum of 9 units of courses in the Department of Computer Science. If similar courses have not been taken previously, these units must include CS 121, 161, and a course that requires significant programming and knowledge of machine architectures (for example, CS 108, or the CS 193 series). For those who have taken such courses previously, replacement units may be taken from any other course in CS selected by the student and approved by the academic adviser. A course in databases is especially recommended. With the exception of CS 108, all other courses applied to the degree requirements must be numbered 137 or higher.

3. Probability, Statistics, and Decision Science (9 units): students are required to take at least three courses that span the following five topics: basic probability theory, Bayesian statistics, decision analysis, machine learning, and experimental-design techniques. Prior courses in statistics at least equivalent to STATS 60 and calculus equivalent to MATH 42 are prerequisites. A prior course in linear algebra equivalent to MATH 103 or 113 is recommended. For the probability requirements, students may, for example, take MS&E 120, STATS 116, or MS&E 221. For the statistics requirements, students should take STATS 141, if they have not had an equivalent class prior to entry to the program. Otherwise, sequences (taken after STATS 116) may include STATS 200 followed by a course in stochastic modeling, machine learning or data mining, such as STATS 202 or 315A, B, or CS 228 or 229. Options for decision analysis include MS&E 152 or 252, or cost effectiveness analysis (BIOMEDIN 432). Specific courses should be chosen in consultation with the student’s academic adviser. Also recommended is a course in the psychology of human problem solving.

4. Biomedical Domain Knowledge (9 units): students are expected to acquire an understanding of pertinent life sciences and how to analyze a domain of application interest. Prior courses in biology at least equivalent to BIOSCI 41 and 42 are prerequisites. All students must have completed a course in basic biochemistry, molecular biology, or genetics. Other areas of basic biology may be an acceptable alternative. Exposure to laboratory methods in biology is encouraged. All students without formal health care training must take IMMUNOL 230 (formerly BIOMEDIN 207).

5. Social and Ethical Issues (3 units): candidates are expected to be familiar with key issues regarding ethics, public policy, financing, organizational behavior, management, and pertinent legal topics. Students may select at least 3 units from suitable courses that include, for example, BIOMEDIN 432; CS 201; MS&E 284, 197; HRP 391, 392; or any other advanced course in policy and social issues proposed by the student and approved by the Biomedical Informatics academic adviser.

The core curriculum generally entails a minimum of 45 units of course work, but can require substantially more or less depending upon the courses selected and the previous training of the student. The varying backgrounds of students are well recognized and no one is required to take courses in an area in which he or she has already been adequately trained; under such circumstances, students are permitted to skip courses or substitute more advanced work. Students design appropriate programs for their interests with the assistance and approval of their Biomedical Informatics academic adviser. At least 27 units of formal course work are expected.

PROGRAM REQUIREMENTS FOR THE ACADEMIC M.S., PROFESSIONAL M.S., AND COTERMINAL DEGREES

Students enrolled in any of the M.S. degrees must complete the program requirements in order to graduate. Programs of at least 54 units that meet the following guidelines are normally approved:

1. Completion of the core curriculum.

2. A minimum of 6 additional units of courses in Computer Science numbered 135 or higher, courses in Management Science and Engineering or Statistics numbered 200 or higher, PSYCH 256 or 225, or relevant courses in other departments approved by the student’s academic adviser.

3. Electives: additional courses to bring the total to 54 or more units.

The University requirements for the M.S. degree are described in the “Graduate Degrees” section of this bulletin.

MASTER OF SCIENCE (ACADEMIC)

This degree is designed for individuals who wish to undertake in-depth study of biomedical informatics. Normally, a student spends two years in the program and implements and documents a substantial project during the second year. The first year involves acquiring the fundamental concepts and tools through course work and research project involvement. All first- and second-year students are expected to devote 50 percent or more of their time participating in research projects. Research rotations are not required, but can be done with approval of the academic adviser or training program director. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics. This degree requires a written research paper to be approved by two faculty members.

MASTER OF SCIENCE (PROFESSIONAL)

This degree is primarily designed for the working professional who already has advanced training in one discipline and wishes to acquire interdisciplinary skills. This program is offered part-time and courses are available online. The professional M.S. is offered in conjunction with Stanford Center of Professional Development (SCPD), which establishes the rates of tuition and fees. SCPD is based on the honors cooperative model (HCP), which assumes that the student is working in a corporate setting and is enrolled in the M.S. on a part-time basis. The student has up to five years to complete the program. Research projects are optional and the student must make arrangements with program faculty. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

MASTER OF SCIENCE (COTERMINAL)

The coterminal degree program allows undergraduates to study for a master’s degree while completing their bachelor’s degree(s) in the same or a different department. Please refer to the “Coterminal Bachelor’s and Master’s Degrees” section under “Undergraduate Degrees and Programs” in this bulletin for additional information.

The coterminal Master of Science program follows the same program requirements as the Master of Science (Professional), except for the requirement to be employed in a corporate setting. The coterminal degree is only available to current Stanford undergraduates. Coterminal students are enrolled full-time and courses are taken on campus. Research projects are optional and the student must make arrangements with program faculty. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/publications/#Coterm.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the doctorate (residence, dissertation, examination, and so on) are discussed in the “Graduate Degrees” section of this bulletin.

Individuals wishing to prepare themselves for careers as independent researchers in biomedical informatics, with applications experience in bioinformatics, clinical informatics, or imaging informatics, should apply for admission to the doctoral program. The following are additional requirements imposed by the Biomedical Informatics Interdisciplinary Committee:

1. A student should plan and successfully complete a coherent program of study including the core curriculum and additional requirements for the master’s program. In addition, doctoral candidates are expected to take at least three more advanced courses (see categories under item ‘2’ of the master’s program requirements). In the first year, two or three research rotations are strongly encouraged. The master’s requirements should be completed by the end of the second year in the program (six
quarters of study, excluding summers). Doctoral students are generally advanced to Ph.D. candidacy after passing the qualifying exam, which takes place during the second year of training. A student’s academic adviser has primary responsibility for the adequacy of the program, which is regularly reviewed by the Biomedical Informatics Executive Committee.

2. To remain in the Ph.D. program, each student must attain a grade point average (GPA) as outlined above, and must pass a comprehensive exam covering introductory level graduate material in any curriculum category in which he or she fails to attain a GPA of 3.0. The student must fulfill these requirements and apply for admission to candidacy for the Ph.D. by the end of six quarters of study (excluding summers). In addition, reasonable progress in the student’s research activities is expected of all doctoral candidates.

3. During the third year of training, generally in the Winter Quarter, each doctoral student is required to give a preproposal seminar that describes evolving research plans and allows program faculty to assure that the student is making good progress toward the definition of a doctoral dissertation topic. By the end of nine quarters (excluding summers), each student must orally present a thesis proposal to a dissertation committee that generally includes at least one member of the Biomedical Informatics Executive Committee. The committee determines whether the student’s general knowledge of the field, and the details of the planned thesis, are sufficient to justify proceeding with the dissertation.

4. As part of the training for the Ph.D., each student is required to be a teaching assistant for two courses approved by the Biomedical Informatics Executive Committee; one should be completed in the first two years of study.

5. The most important requirement for the Ph.D. degree is the dissertation. Prior to the oral dissertation proposal and defense, each student must secure the agreement of a member of the program faculty to act as dissertation adviser. The principal adviser need not be an active member of the Biomedical Informatics program faculty, but all committees should include at least one participating BMI faculty member.

6. No oral examination is required upon completion of the dissertation. The oral defense of the dissertation proposal satisfies the University oral examination requirement. At the completion of the dissertation, the student should give a final talk.

7. The student is expected to demonstrate an ability to present scholarly material orally and present his or her research in a lecture at a formal seminar.

8. The student is expected to demonstrate an ability to present scholarly material in concise written form. Each student is required to write a paper suitable for publication, usually discussing his or her doctoral research project. This paper must be approved by the student’s academic adviser as suitable for submission to a refereed journal before the doctoral degree is conferred.

9. The dissertation must be accepted by a reading committee composed of the principal dissertation adviser, a member of the program faculty, and a third faculty member chosen from anywhere within the University.

COURSES

BIOMEDIN 156/256. Economics of Health and Medical Care — (Same as ECON 126/256.) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisite: ECON 50 and 102A or equivalent statistics, or consent of instructor. Recommended: ECON 51.

5 units, Aut (Bhattacharya)

BIOMEDIN 200. Biomedical Informatics Colloquium — Series of colloquia offered by program faculty, students, and occasional guest lecturers. Credit available only to students in a Biomedical Informatics degree program. May be taken no more than three times for credit.

1 unit, Aut, Win, Spr (Musen)

BIOMEDIN 201. Biomedical Informatics Student Seminar — Participants report on recent articles from the Biomedical Informatics literature or their research projects. Goal is to teach presentation skills. Credit available only to students in an Biomedical Informatics degree program. May be repeated three times for credit.

1 unit, Aut, Win, Spr (Musen)

BIOMEDIN 202. Introductory Biomedical Informatics — Overview of current research problems and computational approaches to them. Topics include medical security and privacy, electronic medical records, controlled terminologies and biomedical ontologies, electronic retrieval, technology-assisted learning environments, medical decision making and support, sequence analysis, phylogenetics, biological networks and pathways, microarray analysis, natural language processing, and protein structural analysis and prediction. For medical students; others by consent of instructor. Graduate students in the Biomedical Informatics training program may not take this class for credit.

1 unit, Aut, Win, Spr, Sum (Cheng, Fagan)

BIOMEDIN 210. Introduction to Biomedical Informatics: Fundamental Methods — (Same as CS 270.) Issues in the modeling, design, and implementation of computational systems for use in biomedicine. Topics: basic knowledge representation, controlled terminologies in medicine and biological science, fundamental algorithms, information dissemination and retrieval, knowledge acquisition, and ontologies. Emphasis is on the principles of modeling data and knowledge in biomedicine and on translation of resulting models into useful automated systems. Recommended: principles of object-oriented systems.

3 units, Aut (Musen)

BIOMEDIN 211. Introduction to Clinical Systems — (Same as CS 271.) Design and implementation of computational and information systems in complex biomedical environments. Topics: requirements analysis, workflow and organizational factors, functional specification, knowledge models, data heterogeneity and standards, component-based architectures, human-computer interaction, and system evaluation. Case studies illustrate challenges of system design for research and clinical settings. Prerequisite: 210, or consent of instructor.

3 units, Win (Das)

BIOMEDIN 212. Biomedical Informatics Project Course — (Same as CS 272.) Hands-on software building. Student teams conceive, design, specify, implement, evaluate, and report on a software project in the domain of biomedicine. Creating written proposals, peer review, providing status reports, and preparing final reports. Guest lectures from professional biomedical informatics systems builders on issues related to the process of project management. Software engineering basics. Prerequisites: 210 or 214, or consent of instructor.

3 units, Aut (Altman, Cheng, Klein)

BIOMEDIN 214. Representations and Algorithms for Computational Molecular Biology — (Same as CS 274.) Topics: algorithms for alignment of biological sequences and structures, computing with strings, phylogenetic tree construction, hidden Markov models, computing with networks of genes, basic structural computations on proteins, protein structure prediction, protein threading techniques, homology modeling, molecular dynamics and energy minimization, statistical analysis of 3D biological data, integration of data sources, knowledge representation and controlled terminologies for molecular biology, graphical display of biological data, and genetic algorithms and programming applied to biological problems. Prerequisites: programming skills and matrix algebra.

3-4 units, Spr (Altman)

1 unit, Spr (Altman)
BIOMEDIN 216A. Biological Knowledge and Symbolic Biocomputing
3 units, Spr (Shrager)

BIOMEDIN 228. Influence Diagrams and Probabilistic Networks — (Enroll in MS&E 355.)
3 units, Win (Shachter) alternate years, not given 2006-07

BIOMEDIN 231. Computational Molecular Biology — (Enroll in BIOC 218.)
3 units (Brutlag) not given 2005-06

3 units, Win (Hastie, Cobb)

BIOMEDIN 234. Biomedical Genomics — How genomics is influencing medical research and health-care delivery, illuminating the genomic discoveries being translated into diagnostic and therapeutic medical applications. Themes: the relevance of human genome project and functional genomics to inherited and acquired diseases, and the role of public databases and computational methods for solving problems in biology. Human genetic variation, SNPs, comparative genomics, computer models of biological processes, microbial genomics, pharmacogenomics, structure-based drug design, gene therapy. Case studies demonstrate the use of information technologies for converting molecular biological data into knowledge that can improve patient care and accelerate the discovery of new therapeutics.
3 units, Win (Shafer)

BIOMEDIN 239. Computer-Based Medical Education — Directed reading and research for graduate students in web-based hypermedia and simulation techniques in education. Possible topics: replacement of a lecture or a lab session, distance learning, student models, and clinical case simulations.
1-6 units, Aut, Win, Spr, Sum (Dev)

BIOMEDIN 240. Causal Models in Biomedical Informatics — Computational formalisms for encoding causal models in biological and biomedical domains from recent work on modeling genetic networks; also models that arise in medical applications. Readings include papers that describe causal models within a specific representational framework. Associated methods for reasoning over knowledge structures in that paradigm and for inducing such models from data. Goal is to understand how to represent, reason about, and discover biological knowledge in each framework, along with the strengths and weaknesses of that formalism.
3 units (Langley) not given 2005-06

BIOMEDIN 251. Outcomes Analysis — (Same as HRP 252.) Introduction to methods of conducting empirical studies which use large existing medical, survey, and other databases to ask both clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics.
3 units, Spr (Bhattacharya)

BIOMEDIN 262. Computational Genomics — (Same as CS 262.) Applications of computer science to genomics, and concepts in genomics from a computer science point of view. Topics: dynamic programming, sequence alignments, hidden Markov models, Gibbs sampling, and probabilistic context-free grammars. Applications of these tools to sequence analysis: comparative genomics, DNA sequencing and assembly, genomic annotation of repeats, genes, and regulatory sequences, microarrays and gene expression, phylogeny and molecular evolution, and RNA structure. Prerequisites: 161 or familiarity with basic algorithmic concepts. Recommended: basic knowledge of genetics.
3 units, Win (Batzoglou)

BIOMEDIN 273. Algorithms for Structure and Motion in Biology — (Same as CS 273.) Algorithms motivated by challenges in predicting molecule properties in silico. Topics: geometric and kinematic models of biomolecules (proteins, ligands), conformation spaces, retention of structure from experimental data, finding sequence and structural similarities, molecular surfaces and shape analysis, energy calculation, detection of steric clashes and proximity computation, conformation sampling, threading, and study of folding and binding motions.
3 units, Spr (Batzoglou, Latombe)

BIOMEDIN 278. Probabilistic Models in Artificial Intelligence — (Enroll in CS 228.)
3 units, Win (Koller, Elidan)

BIOMEDIN 299. Directed Reading and Research
1-18 units, Aut, Win, Spr, Sum (Staff)

BIOMEDIN 301. Special Topics in Biomedical Informatics
1-6 units, Aut, Win, Spr, Sum (Staff)

BIOMEDIN 303. Statistics for Research — Statistical methods commonly used in research. Emphasis is on when and how to use the methods rather than on proofs. How to describe data and detect unusual values, compare treatment effects, interpret p-values, detect and quantify trends, and power for an experiment, and choose statistical tests and software. Topics include descriptive statistics (mean, median, standard deviation, standard error), probability, paired and unpaired t-tests, analysis of variance, correlation, regression, chi-square, discriminant analysis, and power and sample size. Statistical analysis software including Excel and Statistics.
1 unit (M. Walker) alternate years, given 2006-07

BIOMEDIN 328. Computational Structural Biology — (Enroll in SBIO 228, BIOPHYS 228.)
3 units, Aut, Spr (Levitt)

BIOMEDIN 329. Topics in Artificial Intelligence — (Enroll in CS 329.)
3 units, Aut, Win, Spr (Staff)

3-4 units, Spr (Hanrahan)

2-3 units, Aut (Holmes)

BIOMEDIN 374. Algorithms in Biology — (Same as CS 374.) Algorithms and computational models applied to molecular biology and genetics. Topics vary annually. Possible topics include biological sequence comparison, annotation of genes and other functional elements, molecular evolution, genome rearrangements, microarrays and gene regulation, protein folding and classification, molecular docking, RNA secondary structure, DNA computing, and self-assembly. May be repeated for credit. Prerequisites: 161, 262 or 274, or BIOCHEM 218, or equivalents.
2-3 units, Aut (Batzoglou)
BIOMEDIN 379. Interdisciplinary Topics: Computational Systems Biology—(Enroll in CS 379.)
3 units, Win (Staff)

BIOMEDIN 390A,B,C. Curricular Practical Training—Provides educational opportunities in biomedical informatics research. Qualified biomedical informatics students engage in internship work and integrate that work into their academic program. Students register during the quarter they are employed and must complete a research report outlining their work activity, problems investigated, key results, and any follow-up on projects they expect to perform. BIOMEDIN 390A, B, and C may each be taken only once.
1 unit, Aut, Win, Spr, Sum (Musen)

BIOMEDIN 432. Analysis of Costs, Risks, and Benefits of Health Care—(Same as MGTECON 332, HRP 392.) For graduate students. The principal evaluative techniques for health care, including utility assessment, cost-effectiveness analysis, cost-benefit analysis, and decision analysis. Emphasis is on the practical application of these techniques. Group project presented at end of quarter. Guest lectures by experts from the medical school, pharmaceutical industry, health care plans, and government.
4 units, Aut (Garber, Owens)

CANCER BIOLOGY PROGRAM

Program Director: Joseph Lipsick (Pathology and Genetics)
Committee on Cancer Biology: Steven Artandi (Medicine), Laura Attardi (Radiation Oncology, Genetics), Jeffrey Axelrod (Pathology), Dean Felsher (Medicine, Pathology), Joseph Lipsick (Pathology, Genetics), Anthony Oro (Dermatology), Timothy Stearns (Biological Sciences, Genetics)

Program Offices: Alway Building, 300 Pasteur Drive, Room M105
Mail Code: 94305-5121
Phone: (650) 723-6198
Email: Gina.Rocca@stanford.edu
Web Site: http://www.stanford.edu/group/cancerbio/

Courses given in Cancer Biology have the subject code CBIO. For a complete list of subject codes, see Appendix.

Established in 1978, the Cancer Biology Program at Stanford University includes an interdisciplinary program leading to the Ph.D. degree. During the past 25 years, understanding of cancer has increased dramatically with the discovery of oncogenes, tumor suppressor genes, pathways of DNA damage and repair, cell cycle regulation, angiogenesis and responses to hypoxia, and recent glimpses into the molecular basis of metastasis. In addition, methods of parallel analysis including gene expression arrays, protein arrays, and tissue arrays have begun to refine and redefine the taxonomy of cancer diagnosis. This explosion of basic and clinical science has, in turn, resulted in the first successful cancer chemotherapy and immunotherapies based on knowledge of specific molecular targets. Stanford presents a unique environment to pursue interdisciplinary cancer research because the School of Medicine, the School of Humanities and Sciences, and the School of Engineering are located on a single campus, all within walking distance of one another.

The goal of the Cancer Biology Ph.D. program is to provide students with education and training that enables them to make significant contributions to this remarkable field. Course work during the first year is designed to provide a broad understanding of the molecular, genetic, cellular biological, and pathobiological aspects of cancer. Students also learn about the current state of the epidemiology, clinical diagnosis, treatment, and prevention of human cancers. Equally important during the first year is a series of three rotations in research laboratories chosen by each student. By the beginning of the second year, each student chooses a research adviser and begins work on the dissertation project. A qualifying examination must be completed by the end of the second year. An annual Cancer Biology conference at Asilomar on the Pacific Ocean provides students with an opportunity to present their research to one another and to faculty.

BIOMEDIN 379. Interdisciplinary Topics: Computational Systems Biology—(Enroll in CS 379.)
3 units, Win (Staff)

BIOMEDIN 390A,B,C. Curricular Practical Training—Provides educational opportunities in biomedical informatics research. Qualified biomedical informatics students engage in internship work and integrate that work into their academic program. Students register during the quarter they are employed and must complete a research report outlining their work activity, problems investigated, key results, and any follow-up on projects they expect to perform. BIOMEDIN 390A, B, and C may each be taken only once.
1 unit, Aut, Win, Spr, Sum (Musen)

BIOMEDIN 432. Analysis of Costs, Risks, and Benefits of Health Care—(Same as MGTECON 332, HRP 392.) For graduate students. The principal evaluative techniques for health care, including utility assessment, cost-effectiveness analysis, cost-benefit analysis, and decision analysis. Emphasis is on the practical application of these techniques. Group project presented at end of quarter. Guest lectures by experts from the medical school, pharmaceutical industry, health care plans, and government.
4 units, Aut (Garber, Owens)

CANCER BIOLOGY PROGRAM

Program Director: Joseph Lipsick (Pathology and Genetics)
Committee on Cancer Biology: Steven Artandi (Medicine), Laura Attardi (Radiation Oncology, Genetics), Jeffrey Axelrod (Pathology), Dean Felsher (Medicine, Pathology), Joseph Lipsick (Pathology, Genetics), Anthony Oro (Dermatology), Timothy Stearns (Biological Sciences, Genetics)

Program Offices: Alway Building, 300 Pasteur Drive, Room M105
Mail Code: 94305-5121
Phone: (650) 723-6198
Email: Gina.Rocca@stanford.edu
Web Site: http://www.stanford.edu/group/cancerbio/

Courses given in Cancer Biology have the subject code CBIO. For a complete list of subject codes, see Appendix.

Established in 1978, the Cancer Biology Program at Stanford University includes an interdisciplinary program leading to the Ph.D. degree. During the past 25 years, understanding of cancer has increased dramatically with the discovery of oncogenes, tumor suppressor genes, pathways of DNA damage and repair, cell cycle regulation, angiogenesis and responses to hypoxia, and recent glimpses into the molecular basis of metastasis. In addition, methods of parallel analysis including gene expression arrays, protein arrays, and tissue arrays have begun to refine and redefine the taxonomy of cancer diagnosis. This explosion of basic and clinical science has, in turn, resulted in the first successful cancer chemotherapy and immunotherapies based on knowledge of specific molecular targets. Stanford presents a unique environment to pursue interdisciplinary cancer research because the School of Medicine, the School of Humanities and Sciences, and the School of Engineering are located on a single campus, all within walking distance of one another.

The goal of the Cancer Biology Ph.D. program is to provide students with education and training that enables them to make significant contributions to this remarkable field. Course work during the first year is designed to provide a broad understanding of the molecular, genetic, cellular biological, and pathobiological aspects of cancer. Students also learn about the current state of the epidemiology, clinical diagnosis, treatment, and prevention of human cancers. Equally important during the first year is a series of three rotations in research laboratories chosen by each student. By the beginning of the second year, each student chooses a research adviser and begins work on the dissertation project. A qualifying examination must be completed by the end of the second year. An annual Cancer Biology conference at Asilomar on the Pacific Ocean provides students with an opportunity to present their research to one another and to faculty.

expected time to degree is four to five years.

Students are not limited to a single department in choosing their research adviser. The Cancer Biology Ph.D. program currently has approximately 50 graduate students located in various basic science and clinical departments throughout the School of Medicine and the School of Humanities and Sciences.

GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described under the “Graduate Degrees” section of this bulletin.

A small number of well-qualified applicants are admitted to the program each year. Applicants should have completed an undergraduate major in the biological sciences; applicants with undergraduate majors in physics, chemistry, or mathematics may be admitted if they complete background training in biology during the first two years of study. During the first year, each student is required to take a minimum of three, one quarter laboratory rotations. Students must choose a dissertation adviser prior to the end of Summer Quarter, first year, but not before the end of Spring Quarter, first year.

The requirements for the Ph.D. degree are as follows:

1. Training in biology equivalent to that of an undergraduate biology major at Stanford.
2. Completion of the following courses:
   a) CBIO 241. Molecular, Cellular, and Genetic Basis of Cancer
   b) GENE 203. Advanced Genetics
   c) MCP 221. Cell Biology of Physiological Processes
   d) MPH 210. Signal Transduction Pathways and Networks
   f) MED 255. Responsible Conduct in Research; with permission, may be audited.
3. At least 6 units of additional cancer biology-related, graduate-level courses. Course work taken is determined in consultation with the student’s adviser and/or the Program Director.
4. Presentation of research results at the annual Cancer Biology Conference on at least three occasions, at least one being an oral presentation.
5. Successful completion of a qualifying examination in Cancer Biology is required for admission to Ph.D. candidacy. The exam consists of an NIH-style written grant proposal not to exceed ten pages (excluding references), and an oral examination. The examining committee consists of three faculty members from the Cancer Biology Program and does not include the student’s dissertation adviser. The composition of this committee is chosen by the student and dissertation adviser and must be submitted to and approved by the program director prior to the end of Autumn Quarter, second year. The qualifying examination must be taken prior to the end of Spring Quarter, second year. If necessary, one retake is permitted prior to the end of Summer Quarter, second year. After the qualifying examination has been successfully completed, the student is required to form a dissertation reading committee that includes the student’s adviser and three other members of the Academic Council with appropriate expertise. Each student is required to arrange annual meetings (more frequently, if necessary) of the dissertation reading committee, at which time oral presentations of progress during the past year and a plan of study for the coming year are presented and discussed. Completion of each annual committee meeting must be communicated in writing to the Program Director by the adviser by the end of Spring Quarter each year.
6. The major accomplishment of each successful Ph.D. student is the presentation of a written dissertation resulting from independent investigation that contributes to knowledge in the area of cancer biology. An oral examination is also required for the Ph.D. degree. In the Cancer Biology Program, a public seminar (one hour) is presented by the Ph.D. candidate, followed by a closed-door oral examination. The oral examination committee consists of at least four examiners (the members of the doctoral dissertation reading committee) and a chair.
The oral examination chair may not have a full or joint appointment in the adviser’s or student’s home department. However, a courtesy appointment does not affect eligibility. The oral examination chair may be from the same department as any other member(s) of the examination committee. All members of the oral examination committee are normally members of the Academic Council, as the oral examination chair must be. With the prior approval of the program director or school dean, one of the examiners may be a person who is not a member of the Academic Council if that individual contributes expertise not otherwise available. Official responsibility for selecting the oral examination chair rests with the program. Cancer Biology delegates this to the student and dissertation adviser.

COURSES

CBIO 299. Research — Cancer Biology Program. For a complete list of subject codes, see Appendix.

CBIO 280. Cancer Biology Journal Club — Focus is on recent papers in the literature presented by graduate students. Letters grade required. Undergraduates require consent of course director.

CBIO 241. Molecular, Cellular, and Genetic Basis of Cancer — Core course required for all first-year Cancer Biology graduate students. Focus is on key experiments and discoveries with emphasis on genetics, molecular biology, and cell biology. Topics include carcinogenesis, tumor virology, oncogenes, tumor suppressor genes, cell cycle regulation, angiogenesis, invasion and metastasis, cancer genomics, cancer epidemiology, and cancer therapies. Discussion sections based on primary research articles that describe key experiments in the field. Prerequisites: BIOSCI 41/42 4 units, Spr (Lipsick)

CBIO 260. Teaching in Cancer Biology — Credit is given for assisting a professor in the teaching of a cancer biology course. Prerequisite: consent of supervising instructor. 1-10 units, Aut, Win, Spr (Staff)

CBIO 280. Cancer Biology Journal Club — Focus is on recent papers in the literature presented by graduate students. Discussion sections based on primary research articles that describe key experiments in the field. Prerequisites: BIOSCI 41/42 4 units, Spr (Lipsick)

CBIO 299. Research — Cancer Biology Ph.D. students must register as soon as they begin dissertation-related research work. 1-18 units, Aut, Win, Spr, Sum (Staff)

COMPARATIVE MEDICINE

Chair: Linda C. Cork
Professor: Linda C. Cork
Associate Professors: Donna Bouley, Paul Buckmaster, Sherrill Green, Shaul Hestrin, Ravi Tolwani
Assistant Professors: Catherine Beckwith, Corinna Darian-Smith, Manuel Garcia

Department Offices: Edwards Building, Room R321
Mail Code: 94305-5342
Phone: (650) 498-5080
Web Site: http://med.stanford.edu/compmed/

Courses given in Comparative Medicine have the subject code COMPMED. For a complete list of subject codes, see Appendix.
COMP MED 108/208. Animals Advancing Biomedical Technology — (Graduate students register for 208.) Open to graduate students and undergraduates in all degree programs, especially computer science, engineering, or the BioX program. Lectures by faculty members in Comparative Medicine and invited speakers from the biomedical industry. The role of animals in biomedical research. Possible topics include: comparative anatomy and physiology of species used in biotechnology and medical device research; selecting an animal model for a research project; the genetically engineered mouse; and preclinical, animal testing of medical devices intended for use in humans. No background in animal biology required.

2 units (Cork) not given 2005-06

COMP MED 215. Synaptic Transmission — (Enroll in MCP 215.) 5 units, Aut (Smith, Madison)

UNDERGRADUATE INDIVIDUAL WORK

COMP MED 198. Directed Reading — May be taken as a prelude to research and may also involve participation in a lab or research group seminar and/or library research.

1-3 units, Aut, Win, Spr, Sum (Staff)

COMP MED 199. Undergraduate Research — By arrangement with department faculty. May be repeated for credit.

1-3 units, Aut, Win, Spr, Sum (Staff)

FOR GRADUATE STUDENTS

COMP MED 299. Directed Reading — May be repeated for credit. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

COMP MED 399. Research — Opportunities are available in comparative medicine and pathology, immuno-histochemistry, electron microscopy, molecular genetics, quantitative morphometry, neuroanatomy and neurophysiology of the hippocampus, pathogenesis of intestinal infections, immunopathology, biology of laboratory rodents, anesthesiology of laboratory animals, gene therapy of animal models of neurodegenerative diseases, and development and characterization of transgenic animal models. Enrollment limited to 6. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

DEVELOPMENTAL BIOLOGY

Emeriti: (professors) David A. Clayton, David S. Hogness, A. Dale Kaiser
Chair: Margaret Fuller
Associate Chair: Lucy Shapiro
Professors: Ben Barres, Gerald Crabtree, Margaret Fuller, Stuart Kim, David Kingsley, Roeland Nusse, Matthew Scott, Lucy Shapiro, James Spudich, Irving Weissman
Associate Professors: William Talbot, Anne Villeneuve
Assistant Professor: Seung Kim
Associate Professor (Teaching): Ellen Porzig
Associate Professor (Research): Harley McAdams

Courses given in Development Biology have the subject code DBIO.

For a complete list of subject codes, see Appendix.

A fundamental problem in biology is how the complex set of multicellular structures that characterize the adult animal is generated from the fertilized egg. Advances at the molecular level, particularly with respect to the genetic control of development, have been explosive. These advances represent the beginning of a major movement in the biological sciences toward the understanding of the molecular mechanisms underlying developmental decisions and the resulting morphogenetic processes. This new thrust in developmental biology derives from the extraordinary methodological advances of the past decade in molecular genetics, immunology, and biochemistry. However, it also derives from groundwork laid by the classical developmental studies, the rapid advances in cell biology and animal virology, and from models borrowed from prokaryotic systems. Increasingly, the work is directly related to human diseases, including oncogene function and inherited genetic disease.

The Department of Developmental Biology includes a critical mass of scientists who are leading the thrust in developmental biology and who can train new leaders in the attack on the fundamental problems of development. Department labs work on a wide variety of organisms from microbes to worms, flies, and mice. The dramatic evolutionary conservation of genes that regulate development makes the comparative approach of the research particularly effective. Scientists in the department labs have a very high level of interaction and collaboration. The discipline of developmental biology draws on biochemistry, cell biology, genetics, and molecular biology.

The department is located in the Beckman Center for Molecular and Genetic Medicine within the Stanford University Medical Center.

GRADUATE PROGRAM

MASTER OF SCIENCE

Students in the Ph.D. program in Developmental Biology may apply for an M.S. degree, assuming completion of their course requirements and preparation of a written proposal. The master’s degree awarded by the Department of Developmental Biology does not include the possibility of minors for graduate students enrolled in other departments or programs. Students are required to take, and satisfactorily complete, at least three lecture courses offered by the department, including 210, Developmental Biology. In addition, students are required to take three courses outside the department. Students are also expected to attend Developmental Biology seminars and journal clubs. In addition, the candidate must complete a research paper proposing a specific experimental approach and background in an area of science relative to developmental biology.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The graduate program in Developmental Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program in which individuals are candidates for both the M.D. and Ph.D. degrees.

Students are required to take, and satisfactorily complete, at least six courses, including Developmental Biology (210); Advanced Genetics (203); Frontiers in Biological Sciences (215); and an advanced molecular biology, biochemistry, or biophysics course. Students are also expected to attend Developmental Biology seminars and journal clubs.

Successful completion of a qualifying examination is required for admission to Ph.D. candidacy. The examination consists of two parts. One proposal is on a subject different from the dissertation research and the other proposal is on the planned subject of the thesis. The final requirements of the program include the presentation of a Ph.D. dissertation as the result of independent investigation and constituting a contribution to knowledge in the area of developmental biology. The student must then successfully pass the University oral examination which is taken only after the student has substantially completed his or her research. The examination is preceded by a public seminar in which the research is presented by the candidate. The oral examination is conducted by a dissertation reading committee.

COURSES

Course and lab instruction in the Department of Developmental Biology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

DBIO 156. Human Developmental Biology and Medicine — (Same as HUMBIO 156.) The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryo transfer; gene and cell therapy; gametogenesis; pattern formation
in the nervous system and limb development; gene and grand multiple pregnancies; prematurity, in utero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the developmental biology of humans. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.

4 units, Spr (Porzig)

DBIO 198. Research
1-18 units, Aut, Win, Spr, Sum (Staff)

DBIO 199. Undergraduate Research
1-18 units, Aut, Win, Spr, Sum (Staff)

DBIO 201. Development and Disease Mechanisms—Mechanisms that direct human development from conception to birth. Conserved molecular and cellular pathways regulate tissue and organ development; errors in these pathways result in congenital anomalies and human diseases. Topics: molecules regulating development, cell induction, developmental gene regulation, cell migration, programmed cell death, pattern formation, stem cells, cell lineage, and development of major organ systems. Emphasis on links between development and clinically significant topics including infertility, assisted reproductive technologies, contraception, prenatal diagnosis, multiparity, teratogenesis, inherited birth defects, fetal therapy, adolescence, cancer, and aging.

4 units, Aut (Kingsley, Crabtree, Porzig, Seung, Kim, Nussel, Scott)

DBIO 202. Infertility: Mechanisms of Disease and Clinical Frontiers—(Same as OBGYN 202.) Primary literature in basic and clinical science, and demonstrations of assisted reproductive technologies (ART). Techniques include in vitro fertilization including micromanipulation procedures such as intracytoplasmic sperm injection and the culture of blastocysts, using mouse gametes, and pre-embryos. Students observe procedures in the ART clinic. Recommended: DBIO 201 or consent of instructors.

3-4 units, Win (Porzig, Behr)

DBIO 203. Advanced Genetics—(Same as BIOSCI 203, GENE 203.) For graduate students in Bioscience programs; may be appropriate for graduate students in other programs. The genetic toolbox. Examples of analytic methods, genetic manipulation, genome analysis, and human genetics. Emphasis is on use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems. Faculty-led discussions sections with evaluation of papers. Students with minimal experience in genetics should prepare by working out problems in college level textbooks.

4 units, Aut (Barsh, Kim, Sidow, Stearns)

DBIO 210. Developmental Biology—Current areas of research in developmental biology. How organismic complexity is generated during embryonic and post-embryonic development. The roles of genetic networks, induction events, cell lineage, maternal inheritance, cell-cell communication, and hormonal control in developmental processes in well-studied organisms such as vertebrates, insects, and nematodes. Team-taught. Students meet with faculty to discuss current papers from the literature. Prerequisite: graduate standing, consent of instructor. Recommended: familiarity with basic techniques and experimental rationales of molecular biology, biochemistry, and genetics.

5 units, Spr (Talbot, Nussel, Crabtree, Fuller, Kim, Kingsley, Scott)

DBIO 215. Frontiers in Biological Research—(Same as BIOC 215, GENE 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker’s primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.

1 unit, Aut, Win, Spr (Harbury, Kingsley, Baker)

DBIO 232. Readings in the History of Molecular Biology—Prerequisite: graduate standing.
2 units (Kaiser) not given 2005-06

DBIO 299. Directed Reading—May be repeated for credit. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

DBIO 399. Research—Investigations sponsored by faculty members. May be repeated for credit. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

EPIDEMIOLOGY PROGRAM

Director: Victor W. Henderson (Professor, Health Research and Policy, and Neurology and Neurological Sciences)

Advisory Committee: Stephen P. Fortmann (Professor, Medicine), John R. Huguenard (Associate Professor, Neurology and Neurological Sciences), Charles C. Prober (Professor, Pediatrics, and Microbiology and Immunology), Robert Tibshirani (Professor, Health Research and Policy)

Core Faculty and Academic Teaching Staff: Raymond R. Balise (Lecturer), Gary D. Friedman* (Consulting Professor), Mark Hlatky (Professor), Victor W. Henderson* (Professor), Abby C. King* (Professor), Lorene M. Nelson* (Associate Professor), Julie Parsonnet* (Professor), Rita A. Popat (Instructor), Dee W. West* (Professor), Alice S. Whittemore* (Professor)

Instructor: Kristin Cobb

* Member of the program steering committee

Program Offices: HRP Redwood Building, Room T213D.
Mail Code: 94305-5405
Phone: (650) 723-5456
Email: epi@stanford.edu
Web Site: http://www.stanford.edu/dept/HRP/epidemiology/

GRADUATE INTERDISCIPLINARY PROGRAM IN EPIDEMIOLOGY

The Graduate Interdisciplinary Program in Epidemiology offers instruction and interdisciplinary research opportunities leading to the M.S. degree in Epidemiology. Core faculty and academic teaching staff are administratively housed in the Department of Health Research and Policy. Affiliated faculty come from Stanford University departments and centers and Bay Area research facilities. The program provides researchers from diverse clinical backgrounds with the knowledge and skills to become clinical investigators; it also provides an introduction to Epidemiology for students without a clinical background or research experience and students with research experience in the behavioral and social sciences. Research strengths include cancer epidemiology, cardiovascular disease epidemiology, infectious disease epidemiology, musculoskeletal disease epidemiology, neuroepidemiology, epidemiologic methods, genetic epidemiology, reproductive epidemiology and women’s health, and environmental and occupational epidemiology.

The program recognizes two academic tracks leading to the M.S. degree: the Traditional Epidemiology track for students without prior clinical training who are considering careers in epidemiology and for behavioral and social scientists who wish to bring an epidemiologic orientation to their research; and the Clinical Epidemiology track for physicians and others with specific interests in clinical research who receive training in epidemiologic methods, statistical analysis, and other areas essential to patient-oriented clinical research. Students in this track are typically clinical investigators with an M.D. or comparable clinical degree, often during the fellowship stage of their training.

To receive the degree, students in both instructional tracks are expected to obtain a grounding in epidemiologic methods and applied biostatistics and to demonstrate research skills through the completion of a master’s thesis. Required courses are HRP 225, Design and Conduct of Clinical
and Epidemiologic Studies; HRP 226, Advanced Epidemiologic and Clinical Research Methods; HRP 236, Epidemiology Research Seminar; HRP 259, Introduction to Probability and Statistics for Epidemiology; HRP 261, Intermediate Biostatistics; HRP 262, Regression, Prediction, Survival Analysis; and a master’s thesis with 12 or more units of credit. Students in the Clinical Epidemiology track must also complete HRP 251, Design and Conduct of Clinical Trials; and MED 255, Responsible Conduct of Research. All students are required to select at least two other courses in Epidemiology. Students are assigned a methodology mentor, who is usually from the Department of Health Research and Policy, and a research mentor, who may be from another department. For the students in the Clinical Epidemiology track, the research mentor is often an affiliated faculty member from the department of the student’s clinical specialty. Other programmatic requirements are described in Graduate Interdisciplinary Program in Epidemiology, Information and Guidelines, available from the educational coordinator in the Department of Health Research and Policy.

COURSES

The course listings of individual departments participating in the Graduate Interdisciplinary Program in Epidemiology should be consulted for complete descriptions.

GENETICS

Emeritus: (Professor) Luca Cavalli-Sforza, Leonard Herzenberg
Chair: Richard M. Myers
Professors: Russ Altman, Gregory S. Barsh, Stanley N. Cohen, Ronald W. Davis, Andrew Fire, Uta Francke, Margaret Fuller, Mark Kay, Stuart Kim, Joseph Lipsick, Richard M. Myers, Matthew Scott
Associate Professors: Michele Calos, Arend Sidow, Tim Stearns, Anne Villeneuve, Douglas Vollrath
Assistant Professors: Laura Attardi, Julie Baker, Anne Brunet, James Ford, Julien Sage, Joanna Mountain, Man-Wah Tan
Professor (Research): Leonore Herzenberg
Associate Professors (Research): J. Michael Cherry, Zijie Sun
Assistant Professor (Research): Gavin Sherlock
Courtey Professor: Hank Greely
Consulting Professor: David Cox
Mail Code: 94305-5120
Phone: (650) 723-3335
Email: genetics-info@genome.stanford.edu
Web Site: http://genome-www.stanford.edu/genetics/

Courses given in Genetics have the subject code GENE. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAMS

University requirements for the Ph.D. degree are described in the “Graduate Degrees” section of this bulletin.

The Ph.D. program in the Department of Genetics offers graduate students the opportunity to pursue a discipline that encompasses not just a set of tools but a coherent and fruitful way of thinking about biology and medicine. All major areas of genetics are represented in the department, including human genetics (molecular identification of Mendelian traits and the pathophysiology of genetic disease, gene therapy, genetic epidemiology, analysis of complex traits, genetic anthropology, and human evolution), and application of model organisms such as bacteria, yeast, flies, worms, zebrafish, or mice to basic questions in biomedical research. The department is especially strong in genomic and bioinformatic approaches to genome biology and evolution, and includes several genome-scale databases such as the Saccharomyces Genome Database (SGD), the Stanford Microarray Database (SMD), and the Pharmacogenetics and Pharmacogenomics Knowledge Base (PharmGKB), the Stanford Human Genome Center (SHGC), and, administered through the Department of Biochemistry, the Stanford Genome Technology Center (SGTC).

Exposure to the broad intellectual scope that characterizes and integrates the department is provided by laboratory rotations, dissertation research, a series of advanced courses in genetics and other areas of biomedical science, seminar series, journal clubs, and an annual three-day retreat that includes faculty members, students, postdoctoral fellows, and staff scientists. A strong emphasis is placed on interactions and collaborations among students, postdoctoral students, and faculty members within the department and throughout the campus.

Located in the School of Medicine, the department includes approximately 50 graduate students, 75 postdoctoral fellows, 50 staff members, and 30 faculty. In addition to interactions within the department, graduate students have contact with a much larger number of students, fellows, and faculty programs throughout the School of Medicine and the University.

During their first year, graduate students in the department take advanced graduate courses and sample several areas of research by doing rotations in three or four of the department’s laboratories. At the end of the first three quarters, students may select a laboratory in which to do their dissertation research. While the dissertation research is generally performed in one laboratory, collaborative projects with more than one faculty member are encouraged. In addition to interacting with their faculty preceptor, graduate students receive input regularly from other faculty members who serve as advisers on their dissertation committee. Study for the Ph.D. generally requires between four and five years of graduate work, most of which is focused on dissertation research.

Students are generally enrolled in the program to receive the Ph.D. degree, although a limited number of M.D. candidates can combine research training in genetics with their medical studies. Ph.D. candidates who have passed the qualifying exam in the second year can opt to receive the M.S. degree.

There are opportunities for graduate students to teach in graduate-level and professional-school courses. In addition, students are encouraged to participate in educational outreach activities coordinated by the department, which include opportunities to interact with secondary school students and teachers, lay groups, and local science museums.

Students who have recently received a bachelor’s, master’s, M.D., or Ph.D. degree in related fields may apply for graduate study in the Department of Genetics. Prospective students must have a background in general biology, mathematics, physics and chemistry. Decisions for admission are based on comparison of the relative merits of all the candidates’ academic abilities and potential for research. Interviews take place in late February or early March and successful applicants are offered admission by early spring. Students who wish to pursue a combined M.D./Ph.D. degree are considered for admission into the graduate program in the Department of Genetics after they have been admitted to the M.D. program in the School of Medicine. All applicants are considered equally regardless of race, color, creed, religion, national origin, sexual preference, age, or gender.

Students begin graduate studies in the Autumn Quarter. Prospective students are encouraged to start the application process early to ensure that they are able to submit a complete application by the December deadline. All students accepted into the Ph.D. program in the Department of Genetics are provided with full tuition and a stipend to cover the cost of living. Two training grants from the National Institutes of Health provide major support for the graduate training program in the department. Other student support is provided by departmental funds and from research grants, both federal and private, of the faculty. In addition, a number of graduate students are funded by fellowships, including those from the National Science Foundation. Prospective students are encouraged to apply for a fellowship by requesting an application from the National Science Foundation, http://www.nsf.gov. The application is due on November 1 of each year.
COURSES

For further information on the availability of courses, consult the quarterly Time Schedule, or inquire at the departmental office. Additional courses in or related to genetics are included in the listings of the departments of Biological Sciences, Biochemistry, Developmental Biology, Microbiology and Immunology, Neuroscience, Biomedical Informatics, and Structural Biology.

GENE 104Q. Law and the Biosciences — Stanfords Introductory Seminar. Preference to sophomores. Focus is on human genetics; also assisted reproduction and neuroscience. Topics include forensic use of DNA, genetic testing, genetic discrimination, eugenic, cloning, pre-implantation genetic diagnosis, neuroscientific methods of lie detection, and genetic or neuroscience enhancement. Student presentations on research paper conclusions.
3 units, Spr (Greely)

GENE 106Q. The Heart of the Matter — Stanfords Introductory Seminar. Preference to sophomores. The molecular and biochemical basis of life. Emphasis is on the methods and scientific logic that lead to advances in knowledge. The human heart and circulatory system is the unifying theme for topics such as the constituents and activities of cells, tissues, and organs; the chemicals and proteins that carry on life processes; the biotechnology revolution; the role of genes in human disease and normal functions; and the Human Genome Project. How scientific knowledge is built up through research; how biology initiates advances in medicine; and how science, engineering, and economics interact in biotechnology. Student presentations, demonstrations, and field trips. GER:DB-NatSci
3 units, Win (Myers, Simoni)

3 units, Win (Altman)

GENE 199. Undergraduate Individual Research — Prerequisite: consent of instructor. May be repeated for credit.
1-18 units, Aut, Win, Spr, Sum (Staff)

GENE 202. Human Genetics — Theoretical and experimental basis for the genetics of human health and disease. Molecular, chromosomal, biochemical, developmental, cancer, and medical genetics, emphasizing the last. Clinical case discussions. Prerequisites: biochemistry; basic genetics.
4 units, Aut (Ford, Myers)

GENE 203. Advanced Genetics — (Same as BIOSCI 203, DBIO 203.) For graduate students in Bioscience programs; may be appropriate for graduate students in other programs. The genetic toolbox. Examples of analytic methods, genetic manipulation, genome analysis, and human genetics. Emphasis is on use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems. Faculty-led discussions sections with evaluation of papers. Students with minimal experience in genetics should prepare by working out problems in college level textbooks.
4 units, Aut (Barsh, Kim, Sidow, Stearns)

GENE 211. Genomics — Genome evolution, organization, and function; technical, computational, and experimental approaches; hands-on experience with representative computational tools used in genome science; and a beginning working knowledge of PERL.
3 units, Win (Cherry, Myers, Sidow, Sherlock)

GENE 215. Frontiers in Biological Research — (Same as BIOC 215, DBIO 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker’s primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.
1 unit, Aut, Win, Spr (Harbury, Kingsley, Baker)

GENE 222. Method and Logic in Experimental Genetics — For graduate students only. How experimental strategies are applied to biological questions irrespective of discipline boundaries. Examples include purifying activities from complex mixtures, localizing molecules in space and time, discovering macromolecular interactions, inferring from sequence similarity, using structure to elucidate function, and applying genomics to biological problems. Weekly discussion of two representative papers selected by faculty and a student presentation of a third paper which illustrate principles of biochemistry and cell and molecular biology, and the historical context of important scientific advances.
3 units, Win (Baker)

GENE 233. The Biology of Small Modulatory RNAs — (Same as MI 233, PATH 233.) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Requires paper proposing novel research.
2 units, Aut (Chen, Fire)

GENE 235. C. elegans Genetics — Genetic approaches to C. elegans, practice in designing experiments and demonstrations of its growth and anatomy. Probable topics include: growth and genetics, genome map and sequence, mutant screens that start with a desired phenotype, reverse genetics and RNAi screens, genetic duplications, uses of null phenotype non-null alleles, genetic interactions and pathway analysis, and embryogenesis and cell lineage. Focus of action, mosaic analysis, and interface with embryological and evolutionary approaches.
2 units, Spr (Fire)

GENE 238. Current Concepts and Dilemmas in Genetic Testing — (Same as INDE 238.) For M.D. students and biomedical graduate students. Issues arising from the translational process from research to commercialization. Diagnostic inventions and applications, community implications, newborn screening, cancer genetics, and pharmacogenomics. Guest experts. Limited enrollment.
2 units, Spr (Tobin, Cowan, Schrijver)

GENE 255. The Responsible Conduct of Research — A forum for scientists to familiarize themselves with institutional policies/practices and professional standards that define scientific integrity. Overview of ethics in research, authorship, patents, and human interest at the academic-commercial interface, and small group sessions for more extended discourse between students and faculty. Completion fulfills NIH/ADAMHA requirement for instruction in the ethical conduct of research. Required course for incoming students.
1 unit, Win (Staff)

GENE 260. Supervised Study — Genetics graduate student lab research from first quarter to filing of candidacy. May be repeated for credit. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

GENE 262. Advanced Microbial Genetics and Genomics — (Same as BIOSCI 162/262.) Genetic tools for studying the cell biology and behavior of bacteria. Case studies on genetic approaches in combination with biochemistry, microscopy, and genomics to study mechanisms of gene expression, signal transduction, cell cycle regulation, development, and pathogenesis. GER:DB-NatSci
4 units, Spr (Tan, Burkholder)

GENE 299. Directed Reading — May be repeated for credit. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

GENE 399. Research — May be repeated for credit. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)
HEALTH RESEARCH AND POLICY

Emeriti: (Professors) John Faquhar, Victor R. Fuchs, Lincoln E. Moses, Ralph S. Paffenbarger, Jr.
Chair: Alice Whittemore
Co-Chair: Robert Tibshirani
Associate Professors: Laurence Baker, Lorene M. Nelson
Assistant Professor: M. Kate Bundorf
Professor (Research): Dan Bloch
Associate Professor (Research): Laura Lazzeroni
Courtesy Professors: Stephen P. Fortmann, Alan M. Garber, Mary Goldstein
 Courtesy Associate Professors: Alex Macario, Yvonne Maldonado, Mark McClellan (on leave), Douglas Owens, David R. Rogosa, Marilyn Winkleby
Courtesy Assistant Professors: Michael K. Gould, Paul Heidenreich
Senior Lecturer: Irene Corso
Lecturers: Raymond Balise, Margaret Eaton, Laurel Habel, Lisa Herrington, Pamela Horn-Ross, Andy Karter, David Lilenfeld, Caroline Tanner, Timothy K. Stanton, Stephen Van Den Eeden
Consulting Professors: Gary Friedman, Elizabeth Holly, Joseph Selby
Consulting Associate Professors: Paul Barnett, Sally Glaser, Esther John
Consulting Assistant Professor: Todd Wagner
Visiting Associate Professor: Marion Lee
Instructor: Kristin Cobb, Rita Popat
Mail Code: 94305-5405
Phone: (650) 723-5082
Email: hrp@med.stanford.edu
Web Site: http://www.stanford.edu/dept/HRP/

Courses given in Health Research and Policy have the subject code HRP. For a complete list of subject codes, see Appendix.

The Department of Health Research and Policy has three principal areas of scholarly interest:

1. Biostatistics deals with scientific methodology in the medical sciences, emphasizing the use of statistical techniques.
2. Epidemiology is concerned with problems of health and disease in human populations and with efforts toward improving levels of health. Epidemiology also provides training in the application of epidemiologic methods to the study of disease etiology and control.
3. Health Services Research is concerned with many aspects of health policy analysis in the public and private sectors.

GRADUATE PROGRAMS

The Program in Epidemiology and the Program in Health Services Research are housed in the Department of Health Research and Policy. These programs, which offer M.S. degrees in Epidemiology and in Health Services Research, are described separately in the relevant sections this bulletin. Students with an interest in pursuing advanced degrees with an emphasis on biostatistics can do so through programs offered by the Department of Statistics. Division of Biostatistics faculty participate in these programs.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T213D, Stanford, California 94305-5405.

COURSES

HRP 89Q. Introduction to Crosscultural Issues in Medicine—Stanford Introductory Seminar. Preference to sophomores. Crosscultural issues that impact health care delivery such as ethnicity, immigration, language barriers, and service expectations. Fosters an understanding of culturally unique and non-English speaking populations, developing interpersonal and communication skills with diverse ethnic groups.
GER:EC-American
3 units, Win (Corso)

HRP 199. Undergraduate Research—Student investigations sponsored by faculty members. Prerequisite: consent of the instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

HRP 206. Topics in Quantitative Methods: Meta-Analysis—(Enroll in STATS 211, EDUC 493B.)
1-3 units, Win (Olkin)

HRP 207. Issues and Methods of Health Services and Policy Research—Primarily for students in the Health Services and Policy Research scholarly track. Topics include health care systems and institutions, health insurance, regulation, cost effectiveness analysis, and medical decision making.
2 units, Aut (Baker, McDonald)

HRP 209. Medicine and the Law—Topics: medical malpractice, patient consent and confidentiality rights, human subject research, withdrawing life support and physician-assisted suicide, futile medical care, legal requirements in psychiatry, physician discipline, medical staff law, and HMO litigation.
2 units, Win (Eaton)

HRP 210. Health Law and Policy—(Same as Law 313.) Open to law or medical students and qualified undergraduates by consent of instructor. The American health care system and its legal and policy problems. Topics: characteristics of medical care compared to other goods and services; difficulties of assuring quality care; the complex patchwork of the financing system; and ethical problems the system raises. Course begins September 6.
3 term units, Aut semester (Greely)

HRP 211. Law and Biosciences—(Same as LAW 368.) For medical students; graduate students by consent of instructor. Legal, social, and ethical issues arising from advances in the biosciences. Focus is on human genetics; also advances in assisted reproduction and neuroscience. Topics include forensic use of DNA, genetic testing, genetic discrimination, eugenics, cloning, pre-implantation genetic diagnosis, neuroscientific methods of lie detection, and genetic or neuroscience enhancement. Course begins September 6.
3 term units, Aut semester (Greely)

HRP 212. Crosscultural Medicine—Interviewing and behavioral skills needed to facilitate culturally relevant health care across all population groups. Explicit and implicit cultural influences operating in formal and informal medical contexts.
3 units, Spr (Corso)

HRP 214. Scientific Writing—Step-by-step through the process of writing and publishing a scientific manuscript. How to write effectively, concisely, and clearly. Preparation of an actual scientific manuscript. Students are encouraged to bring a manuscript on which they are currently working to develop and polish throughout the course.
2-3 units, Win (Cobb)

HRP 223. Data Management and Statistical Programming—The skills required for management and analysis of biomedical data. Topics include importing and exporting data from multiple database systems, visualizing and cleaning data, data management for multicenter projects, and data security. Introduction to applied statistical programming relevant to epidemiologic and clinical research. No previous programming experience required.
2-3 units, Aut (Balise)
HRP 225. Design and Conduct of Clinical and Epidemiologic Studies—Intermediate-level. The skills to design, carry out, and interpret epidemiologic studies, particularly of chronic diseases. Topics: epidemiologic concepts, sources of data, cohort studies, case-control studies, cross-sectional studies, sampling, estimating sample size, questionnaire design, and the effects of measurement error. Prerequisite: 159/259 or equivalent, or consent of instructor.
3-4 units, Aut (Popat)

HRP 226. Advanced Epidemiologic and Clinical Research Methods—The principles of measurement, measures of effect, confounding, effect modification, and strategies for minimizing bias in epidemiologic studies. Prerequisite: 225 or consent of instructor.
3-4 units, Win (Nelson)

HRP 230. Cancer Epidemiology—Descriptive epidemiology and sources of incidence/mortality data; the biological basis of carcinogenesis and its implications for epidemiologic research; methodological issues relevant to cancer research; causal inference; major environmental risk factors; genetic susceptibility; cancer control; examples of current research; and critique of the literature. Prerequisite: 225, or consent of instructor.
3 units, Win (West) alternate years, not given 2006-07

HRP 231. Epidemiology of Infectious Diseases—The principles of the transmission of the infectious agents (viruses, bacteria, rickettsiae, mycoplasma, fungi, and protozoan and helminth parasites). The role of vectors, reservoirs, and environmental factors. Pathogen and host characteristics that determine the spectrum of infection and disease. Endemicity, outbreaks, and epidemics of selected infectious diseases. Principles of control and surveillance.
3 units (Parsonnet, Maldonado) not given 2005-06

HRP 234. Foundations of Pharmacoepidemiology—Historical development of pharmacoepidemiology, the drug development process and pharmacoepidemiology role in it, pharmacoepidermia/drug safety systems, epidemiology in outcomes research, the role of pharmacoepidemiology in risk management, and classic examples of pharmacoepidemiologic investigations.
2-3 units, Spr (Lilenfeld) alternate years, not given 2006-07

HRP 236. Epidemiology Research Seminar—Weekly forum for ongoing epidemiologic research by faculty, staff, guests, and students, emphasizing research issues relevant to disease causation, prevention, and treatment. May be repeated for credit.
1 unit, Aut, Win, Spr (Friedman, Henderson)

HRP 248. Promoting Health over the Life Course: Multidisciplinary Perspectives—(Enroll in HUMBIO 148.)
3 units, Aut (Alles, Stefaniak)

HRP 250C. Statistical Analysis in Educational Research: Multivariate Analysis—(Enroll in EDUC 250C.)
2-4 units, Win (Olkin)

HRP 251. Design and Conduct of Clinical Trials—The rationale for phases 1-3 clinical trials, the recruitment of subjects, techniques for randomization, data collection and endpoints, interim monitoring, and reporting of results. Emphasis is on the theoretical underpinnings of clinical research and the practical aspects of conducting clinical trials.
3 units, Spr (Hlatky)

HRP 252. Outcomes Analysis—(Same as BIOMEDIN 251.) Introduction to methods of conducting empirical studies which use large existing medical, survey, and other databases to ask both clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics.
3 units, Spr (Bhattacharya)

HRP 256. Economics of Health and Medical Care—(Enroll in ECON 126/256, BIOMEDIN 156/256.)
5 units, Aut (Bhattacharya)

HRP 259. Introduction to Probability and Statistics for Epidemiology—Topics: random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals. Correlation, regression, analysis of variance, and nonparametric tests. Introduction to least squares and maximum likelihood estimation. Emphasis is on medical applications.
4-5 units, Aut (Cobb)

HRP 260A,B,C. Workshop in Biostatistics—(Same as STATS 260A.) Applications of statistical techniques to current problems in medical science. Enrollment for more than 2 units of credit involves extra reading or extra consulting and requires consent of instructor.
1-3 units, A: Aut, B: Win, C: Spr (Lazzeroni, Olshen, Bloch, Efron, Hastie, Lavori, Tibshirani, Wong)

3 units, Win (Hastie, Cobb)

HRP 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis—(Same as STATS 262.) Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.
3 units, Spr (Cobb)

HRP 280,281,282. Spanish for Medical Students—(Same as SPAN-LANG 121M,122M,123M.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.
3 units, 280: Aut, 281: Win, 282: Spr (Corso)

HRP 283. Health Services Research Core Seminar—Presentation of research in progress and tutorials in the field of health services research.
1 unit, Aut, Win, Spr (Baker, Bundorf, Garber, Hlatky, Owens)

HRP 290. Advanced Spanish Conversation—Oral language skills covering pediatric, gynecological, and other specialty exams; patient education and counseling; and diseases such as diabetes, asthma, and TB. Prerequisite: Spanish proficiency or consent of instructor.
3 units, Aut, Win, Spr (Corso)

HRP 299. Directed Readings in Health Research and Policy—Epidemiology, health services research, preventive medicine, medical genetics, public health, economics of medical care, occupational or environmental medicine, international health, or related fields. May be repeated for credit. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

HRP 351. Innovation and Management in Health Care—(Same as GSBGEN 351.) The workings of the major institutions such as hospitals, health insurance companies, HMOs, Medicare and Medicaid, federal regulators, and the medical establishment. National health expenditures and alternative models for healthcare financing and delivery. Trends in treatment innovations provided by biopharmaceuticals, medical devices, and surgical procedures; delivery innovations facilitated by information systems and new processes. Policy and business challenges raised by these innovations and the health care ecosystems they promote.
4 units, Win (Zenios)
HRP 391. Political Economy of Health Care in the United States—
(Same as PUBLPOL 231, MGTECON 331.) The economic tools and
institutional and legal background to understand how markets for health
care products and services work. Moral hazard and adverse selection.
Institutional organization of the health care sector. Hospital and phy-
sician services markets, integrated delivery systems, managed care,
pharmaceutical and medical device industries. Public policy issues in
health care, medical ethics, regulation of managed care, patients’ bill of
rights, regulation of pharmaceuticals, Medicare reform, universal health
insurance, and coverage of the uninsured. International perspectives,
how other countries’ health care systems evolved, and what the U.S.
can learn from their experiences.
4 units, Spr (Kessler)

HRP 392. Analysis of Costs, Risks, and Benefits of Health Care —(Same
as MGTECON 332, BIOMEDIN 432.) For graduate students. The
principal evaluative techniques for health care, including utility assess-
ment, cost-effectiveness analysis, cost-benefit analysis, and decision
analysis. Emphasis is on the practical application of these techniques.
Group project presented at end of quarter. Guest lectures by experts
from the medical school, pharmaceutical industry, health care plans,
and government.
4 units, Aut (Garber, Owens)

HRP 399. Research—Graduate students investigations sponsored by
individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

HEALTH SERVICES RESEARCH
PROGRAM

Director: Mark Hlatky (Professor, Health Research and Policy, and
Medicine)

Executive Committee: Laurence Baker (Associate Professor, Health
Research and Policy), M. Kate Bundorf (Assistant Professor, Health
Research and Policy), Alan Garber (Professor, Medicine), Mary
Goldstein (Associate Professor, Medicine), Mark Hlatky (Professor,
Health Research and Policy, and Medicine), Douglas Owens (Associ-
ate Professor, Medicine)

Participating Faculty and Staff by Department:
Anesthesia: Alex Macario (Associate Professor)
Economics: Thomas Macurdy (Professor), Mark McClellan (Associate
Professor, on leave)
Business: Alain Entenhouen (Professor, emeritus), Daniel Kessler (Pro-
fessor)

Health Research and Policy: Laurence Baker (Associate Professor), Paul
Barnett (Consulting Associate Professor), M. Kate Bundorf (Assistant
Professor), Victor Fuchs (Professor, emeritus), Trevor Hastie (Pro-
fessor), Mark Hlatky (Professor), Philip Lavori (Professor), Richard
Olshen (Professor), Ciaran Phibbs (Consulting Associate Professor),
Joseph Selby (Consulting Professor), Anita Stewart (Visiting Scholar),
Robert Tibshirani (Professor)

Law: Henry Greely (Professor)

Management Science and Engineering: Margaret Brandeau (Professor)

Medicine: Jay Bhattacharya (Assistant Professor), Alan Garber (Pro-
fessor), Mary Goldstein (Professor), Michael Gould (Assistant Professor),
Paul Heidenreich (Assistant Professor), Mark Hlatky (Professor),
Mark McClellan (Associate Professor, on leave), Douglas Owens
(Professor)

Pediatrics: Paul Wise (Professor)

Psychiatry: Rudolph Moos (Professor)

Sociology: Richard Scott (Professor, emeritus)

Program Offices: HRP Redwood Building, Room T213D
Mail Code: 94305-5405
Phone: (650) 723-5456
Email: HSRprogram@med.stanford.edu
Web Site: http://www.stanford.edu/dept/HRP

GRADUATE PROGRAM
MASTER OF SCIENCE

The Master's Degree Program in Health Services Research seeks to
train students in the quantitative analysis of issues in health and medical
care. The program emphasizes an individually designed program of course
work and completion of a master’s project under the mentorship of a faculty
member. The typical student in the program is either a physician who has
completed residency training and is preparing for a research career, or a
student with a strong background in policy analysis who wishes to focus
on problems in health or medical care. Faculty interests include outcomes
research, health economics, health care organization, health care access,
quality of care, decision analysis, clinical guidelines, and assessment of
patient preferences and quality of life.

To receive the degree, students are expected to demonstrate knowledge of
issues in health services research and the quantitative skills necessary for
research in this area. Students must take at least 45 units of course work (9
of the units may be double-counted to meet other degree requirements)
and write a University thesis. The course work requirements are:
1. At least 8 units from the following group of Health Research and Policy
(HRP) core courses: 256, Economics of Health and Medical Care; 391,
Political Economy of Health Care in the United States; 392, Analysis
of Costs, Risks, and Benefits in Health Care.
2. At least 6 units of graduate-level statistics courses. The sequence of
HRP 261 and 262 is strongly recommended.
3. At least 3 units of HRP 283, Health Services Research Core Seminar.
4. At least 15 units of HRP research credit from 299, Directed Reading,
or 399, Research.
5. An additional set of approved elective courses to complete the program
total of at least 45 units.

For additional information, address inquiries to the Educational
Coordinator, Department of Health Research and Policy, Stanford
University School of Medicine, HRP Redwood Building, Room T213D,
Stanford, California 94305-5405.

Courses
The course listings of individual departments participating in the
Health Services Research Program should be consulted for complete
descriptions.

IMMUNOLOGY PROGRAM

Chair, Executive Committee for the Immunology Program: Lawrence
Steinman (Professor, Neurology and Neurosciences)

Director for Immunology Program: K. Christopher Garcia (Associate
Professor, Microbiology and Immunology)

Director for Clinical Immunology Program: C. Garrison Fathman
(Medicine/Immunology and Rheumatology)

Participating Departments and Faculty:
Biological Sciences: Patricia F. Jones (Professor)
Cardiothoracic Surgery: Carol Clayberger (Associate Professor,
Research, Pediatrics)
Chemistry: Harden M. McConnell (Professor, emeritus)*
Genetics: Leonard A. Herzenberg (Professor, emeritus), Lenore
A. Herzenberg (Professor, Research), Man-wah Tan (Assistant
Professor)

Medicine/Bone Marrow Transplantation Program: Robert Negrin
(Professor), David Miklos (Assistant Professor), Judith Shizuru
(Associate Professor)

Medicine/Endocrinology: Ajay Chawla (Assistant Professor)

Medicine/Hematology: Peter Lee (Assistant Professor)

Medicine/Immunology and Rheumatology: C. Garrison Fathman
(Professor), Jane R. Parnes (Professor), William Robinson (Assistant
Professor), Samuel Strober (Professor), Paul J. Utz (Assistant
Professor)

Medicine/Oncology: Gilbert Chu (Associate Professor, and Bio-
chemistry), Dean Felsher (Assistant Professor), Ronald Levy
SCHOOL OF MEDICINE

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The interdepartmental Immunology Program offers instruction and research opportunities leading to a Ph.D. in Immunology. The goal of the program is to develop young investigators who have a solid foundation in immunology as well as related sciences and who can carry out innovative research. The program features a flexible selection of courses and seminars to enrich the students’ backgrounds, combined with extensive research training in the laboratories of the participating immunology faculty.

Students applying to the program typically have an undergraduate major in biological sciences, but majors in other areas are acceptable if the applicants have had sufficient course work in biology and chemistry. Formal application should be made by December 12. Applications are evaluated by the Immunology Predoctoral Committee based on scores on the GRE exams (including the subject test in either biology, biochemistry, or chemistry), which should be taken by the October test date; grades; evidence of prior research experience; letters of recommendation, including letters from research sponsor(s); and commitment to a career in biomedical research. Interested Stanford medical students are welcome to apply to the program and should submit a formal application by December 12th.

Students admitted to the program are offered financial support covering tuition, a living stipend, insurance coverage, and an allowance for books/travel. Applicants are urged to apply for independent fellowships such as from the National Science Foundation. Fellowship applications are due in November of the year prior to matriculation in the graduate program, but Immunology graduate students may continue to apply for outside fellowships after matriculation. Because of the small number of department-funded slots, students who have been awarded an outside fellowship will have an improved chance of acceptance into the program. On matriculation, each student is assisted in selecting courses and lab rotations in the first year and in choosing a lab for the dissertation research. Once a dissertation adviser has been selected, a dissertation committee including at least two Immunology faculty, and including the dissertation adviser, is constituted to guide the student during the dissertation research. The student must meet with the dissertation committee at least once a year.

Candidates for Ph.D. degrees at Stanford must satisfactorily complete a three-year program of study that includes 72 units of graduate course work and research. At least 3 units must be taken with each of four different Stanford faculty members.

The requirements for the Ph.D. degree in Immunology include the following:

1. Training in biology and cognate disciplines equivalent to that provided by the undergraduate Biology major at Stanford.
2. Completion of the following courses (or their equivalents from undergraduate work):
   a) Basic Immunology (BIOSCI 230 or MI 200)
   b) Advanced Immunology (IMMUNOL 201, 202, 203)
   c) Biochemistry and Molecular Biology (BIOC 200)
   d) Advanced Genetics (GENE 203)
   e) Cell Biology of Physiological Processes (MCP 221)
   f) Principles of biological technologies (IMMUNOL 215)
   g) one of three possible courses: MPHA 210, Signal Transduction Pathways and Networks; SBIO 241, Biological Macromolecules; or DBIO 210, Developmental Biology.
   h) Responsible Conduct in Science (MED 255)
   i) Immunology Journal Club (IMMUNOL 305)
3. First-year students are required to take both the IMMUNOL 311, Seminar in Immunology and the companion course, IMMUNOL 311A, Seminar Discussion in Immunology, and participation in IMMUNOL 305, Immunology Journal Club. Students in their second year and above must participate in the IMMUNOL 311, Seminar in Immunology and may opt to take the companion course, IMMUNOL 311A. Students who have not yet achieved TGR status must register for 1 unit for IMMUNOL 311. Students attend the weekly Immunol-
ogy Seminar Series (4-5 p.m., Tuesdays). Students read the papers of and have dinner with visiting seminar speakers two or three times each quarter, and meet with a faculty member to discuss the material.

4. Elective courses as agreed upon by the student, adviser, and advisory committee. Electives may be chosen from graduate courses and seminars in any of the biomedical science departments and programs.

5. Completion in the first year of two or three one quarter rotations. Two weeks after taking the written portion of the qualifying examination process in mid-July, students shall present their lab rotation research projects to the Predoctoral Committee. Medical students who have declared Immunology as their scholarly concentration major, and who are accepted into the Ph.D. program, are exempt from doing lab rotations.

6. Teaching assistantship in two immunology courses. A teaching assistantship requirement may be fulfilled by proposing a graduate student-initiated course IMMUNOL 315, Topics in Immunology. Before fulfilling their teaching assistantships, Immunology graduate students are required to undertake a teaching assistantship workshop offered at the beginning of every quarter by the Center for Teaching and Learning.

7. For admission to candidacy, completion of two requirements by the end of the Autumn Quarter of the second year: a rotation presentation on one of three lab rotations, and a comprehensive written examination in immunology and related biomedical sciences must be completed satisfactorily by the middle of Summer Quarter of the first year. Finally, students must prepare and defend a research proposal on their dissertation research by December 17, the end of Autumn Quarter of their second year. Administration and evaluation of these requirements is the responsibility of the student’s dissertation committee.

8. Participation (through regular attendance and oral presentation) in the student-run immunology journal clubs for at least the first 2 years (IMMUNOL 305). First- through fourth-year students are also expected to attend the graduate students’ journal club, the Tuesday evening immunology seminars, and the annual Stanford Immunology Scientific Conference.

9. Passing of the University oral examination on the dissertation research, which is to be taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the candidate presents his/her research.

10. Completion of a Ph.D. dissertation, resulting from independent investigation and constituting a contribution to knowledge in the area of immunology.

**COURSES**

Course and lab instruction in the Immunology Program conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

**IMMUNOL 201. Advanced Immunology I**—(Same as MI 211.) For graduate and medical students and advanced undergraduates. Molecules and cells of the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte differentiation and activation; regulation of immune responses; autoimmunity and other problems in clinical immunology. Prerequisites: undergraduate course in Immunology; and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology.

3 units, Win (Chien, Staff)

**IMMUNOL 202. Advanced Immunology II**—(Same as MI 212.) Readings of immunological literature and specific areas of immunology. Classic problems and emerging areas are covered based on primary literature. Student and faculty presentations. Prerequisite: 211.

3 units, Spr (Garcia, Staff)

**IMMUNOL 203. Advanced Immunology III**—(Same as MI 213.) Key experiments and papers in immunology. Student presentations and faculty participation; faculty describe their experimental process and scientific papers. Prerequisite: IMMUNOL 201/MI 211 or IMMUNOL 202/MI 212.

3 units, Sum (Staff)

**IMMUNOL 215. Principles of Biological Technologies**—(Same as MI 215.) Required of first-year graduate students in Microbiology and Immunology, and the Immunology program. The principles underlying commonly utilized technical procedures in biological research. Lectures and primary literature critiques on gel electrophoresis, protein purification and stabilization, immunofluorescence microscopy, FACS. Prerequisites: biochemistry, organic chemistry, and physics.

2 units, Spr (Kirkegaard)

**IMMUNOL 230. Introduction to Medicine**—For graduate students in biological sciences, bioengineering, and biomedicalinformatics. Information and approaches used by physicians to understand human disease. Focus is on diabetes. Lectures by medical school and outside faculty. Field trips, including a biotechnology company, clinics, and the clinical laboratory. Quarter-long, team projects addressing current medical issues.

2-4 units, Spr (Mellins, Parnes)

**IMMUNOL 290. Teaching in Immunology**—Practical experience in teaching by serving as a teaching assistant in an immunology course.

1-10 units, Aut, Win, Spr, Sum (Staff)

**IMMUNOL 299. Directed Reading in Immunology**

1-15 units, Aut, Win, Spr, Sum (Staff)

**IMMUNOL 300. Research**—For Ph.D., M.D./Ph.D. students, and medical students whose scholarly concentrations are in immunology.

1-15 units, Aut, Win, Spr, Sum (Staff)

**IMMUNOL 305. Immunology Journal Club**—Required of first- to fourth-year graduate students. Graduate students present and discuss recent papers in the literature. May be repeated for credit.

1 unit, Aut, Win, Spr (Staff)

**IMMUNOL 311. Seminar in Immunology**—Enrollment limited to Ph.D., M.D./Ph.D., and medical students whose scholarly concentrations are in immunology. Current research topics.

1 unit, Aut, Win, Spr (Fathman, Steinman)

**IMMUNOL 311A. Immunology Seminar Discussion**—Required of first-year students. Students discuss papers of speakers in 311, and meet with the speakers. Corequisite: 311.

1 unit, Aut, Win, Spr (Fathman, Steinman)

**IMMUNOL 315. Special Topics in Immunology**—Graduate student-initiated seminar in journal club style. Previous topics include evolutionary immunology and the principles of vaccine development, cytokines, tumor immunology, and neuroimmunology. May be repeated for credit.

1-4 units, Aut, Win, Spr, Sum (Staff)

**IMMUNOL 317. Frontiers in Immunology**—Seminar class in journal club style. Focus is on one topic in immunology per quarter. Readings range from historical development to current research and questions. May be repeated for credit.

1-3 units, Aut, Win, Spr, Sum (Staff)
**MICROBIOLOGY AND IMMUNOLOGY**

**Emeriti: (Professors)** Sidney Raffel, Leon T. Rosenberg, Esther M. Lederberg  
**Chair:** Mark M. Davis  
**Associate Professors:** Kenan Christopher Garcia, Peter Jackson, Garry Nolan, David Relman  
**Assistant Professors:** Matthew Bogyo, Chang-Zheng Chen, David Schneider, Upinder Singh, Julie Theriot  
**Associate Professor (Teaching):** Robert D. Siegel  
**Courtesy Assistant Professor:** Christopher Contag (Pediatrics)  
**Department Offices:** D300 Fairchild Building, 299 Campus Drive  
**Mail Code:** 94305-5124  
**Phone:** (650) 725-8541  
**Email:** micro_immuno@lists.stanford.edu  
**Web Site:** http://cmgm.stanford.edu/micro/  

Courses given in Microbiology and Immunology have the subject code MI. For a complete list of subject codes, see Appendix.

The Department of Microbiology and Immunology offers a complete program of training leading to the Ph.D. degree, as well as research training, courses, and seminars for medical students and postdoctoral fellows. Research interests focus on two broad areas, host/parasite interactions, and the function of the immune system. Individual laboratories investigate mechanisms of pathogenesis and the physiology of viruses, bacteria, and protozoan parasites, as well as the lymphocyte function in antigen recognition, immune response, and autoimmunity.

**GRADUATE PROGRAMS**  
**MASTER OF SCIENCE**

A regular M.S. program is not offered, although this degree is awarded under special circumstances. Candidates for master’s degrees are expected to have completed the preliminary requirements for the B.S. degree, or the equivalent. In addition, the candidate is expected to complete 45 quarter units of work related to microbiology; at least 25 of these units should concern research devoted to a thesis. The thesis must be approved by at least two members of the department faculty.

**DOCTOR OF PHILOSOPHY**

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

**Application, Admission, and Financial Aid**—Prospective Ph.D. candidates should have completed a bachelor’s degree in a discipline of biology or chemistry, including course work in biochemistry, chemistry, genetics, immunology, microbiology, and molecular biology. The deadline for receipt of applications with all supporting materials is December 15.

Applicants must file a report of scores on the general subject tests and on an advanced test (normally in cellular and molecular biology, chemistry, or biochemistry) of the Graduate Record Examination (GRE). It is strongly recommended that the GRE be taken before October so that scores are available when applications are evaluated.

In the absence of independent fellowship support, entering predoctoral students are fully supported with a stipend and tuition award. Highly qualified applicants may be honored by a nomination for a Stanford fellowship. Successful applicants have been competitive for predoctoral fellowships such as those from the National Science Foundation.

**Program for Graduate Study**—The Ph.D. degree requires course work and independent research demonstrating an individual’s creative, scholastic, and intellectual abilities. On entering the department, students meet an advisory faculty member and together they design a timetable for completion of the degree requirements. Typically, this consists of first identifying gaps in the student’s undergraduate education and determining courses that should be taken. Then, a tentative plan is made for two to four lab rotations (one rotation per quarter). During the first year of graduate study in the department, each student also takes six or seven upper-level (200-series) courses. Three of these courses, Principles of Biological Techniques, Medical Microbiology, and Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites, are specific requirements of this department. Three courses, Advanced Genetics, Molecular Biology, and Cell Biology, are part of the core curriculum that is required of many graduate students in Stanford Biosciences.

In Spring Quarter of the second year, each student defends orally a formal research proposal on a topic outside the intended thesis project. The outline of this proposal is due to the Graduate Program Steering Committee by March 1st. Based on successful performance on this proposal, the student is admitted to candidacy. In the Autumn Quarter of the second year, a research proposal based on the student’s own thesis topic is defended to his or her thesis committee. Teaching experience and training are also part of the graduate curriculum. All graduate students are required to act as teaching assistants for two quarters. In addition, first- and second-year graduate students are required to participate in a bi-weekly journal club.

**COURSES**

**MI 25N. Modern Plagues**—Stanford Introductory Seminar. Preference to freshmen. The molecular and medical aspects of new and old microorganisms that infect humans. Goal is to place modern human plagues in scientific and historical perspective focusing on the factors that lead to emergence and control. WRITE-2  
3 units, Spr (Boothroyd)

**MI 103. Parasites and Pestilence: Infectious Public Health Challenges**—(Same as HUMBIO 103.) Parasitic and other diseases with public health impact. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs in historical context to understand public health policy approaches to halting disease transmission. Focus is on World Health Organization tropical disease research-targeted disease entities including: river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiasis, and intestinal helminthes. Guest lecturers in disease control. Original proposal to solve a current disease.  
4 units, Spr (Smith)

**MI 104. Innate Immunology**—(Undergraduate section; see 204.)  
3 units, Spr (Schneider)

**MI 115A. Humans and Viruses**—(Same as HUMBIO 115A.) Concepts in biology and the social sciences, focusing on emerging infections, viral classification, transmission and prevention, vaccination and treatment, eradication of disease, viral pathogenesis, mechanisms of virally-induced cancer, and viral evolution. Topics: molecular biology of genetic shift and drift in influenza virus, cellular tropism of HIV, developmental biology of virally-induced birth defects, clinical aspects of infantile diarrhea, social aspects of the common cold, policy issues of blood antibody tests, factors in pathogenesis and transmission of prions. Prerequisites: Human Biology core or consent of instructor.  
6 units, Aut (Siegel)

**MI 115B. The Vaccine Revolution**—(Same as HUMBIO 115B.) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in the area of vaccine development and emerging infections. Journal club format: students select articles from primary scientific literature, write formal summaries, and synthesize it into a literature review on a specific topic. Emphasis is on the development of critical reading, analysis, experimental design, and interpretation of data. Students give oral presentations and lead discussions based on their scientific journal reading. Enrollment limited to 10. Prerequisite: 115A.  
6 units (Siegel) alternate years, given 2006-07
MI 185. Topics in Microbiology — Topics include diversity, molecular regulation, growth, bioenergetics, and unique metabolic processes. Student papers for presentation on current topics such as antibiotic resistance and molecular approaches to bioremediation. Prerequisites: CHEM 31, 33, 35. Recommended: BIOSCI 31.

3 units, Spr (Matin, Staff)

MI 198A,B,C,D,E,F. Directed Reading — Fields of research open to students are decided in consultation with sponsoring faculty member.
1-15 units, Aut, Win, Spr, Sum (Staff)

MI 198A. Microbiology
MI 198B. Immunology
MI 198C. Virology
MI 198D. Microbial Genetics
MI 198E. Parasitology
MI 198F. Bacterial Physiology

MI 199. Undergraduate Research — Individual study or research by arrangement with a faculty member. Possible fields: microbial molecular biology and physiology, microbial pathogenicity, immunology, virology, and molecular parasitology. Prerequisites: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MI 203. Biological Stress Response — Current literature. Possible topics: the nature and molecular regulation of the stress response; biochemistry and structural biology molecular chaperones; the role of stress proteins in the pathogenic process; psychoneuroendocrinology; multidrug resistance. Limited enrollment. Prerequisites: Biological Sciences core; upper-division course in molecular biology/genetics or biochemistry.
3 units, Win (Matin, Staff) alternate years, not given 2006-07

MI 204. Innate Immunology — (Undergraduate register for 104.) Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora immunity. How microbes induce and defeat innate immune reactions with examples from vertebrates, invertebrates, and plants.
3 units, Spr (Schneider)

MI 206. Animal Viruses — Current literature. Possible topics: the nature and molecular regulation of the stress response; biochemistry and structural biology molecular chaperones; the role of stress proteins in the pathogenic process; psychoneuroendocrinology; multidrug resistance. Limited enrollment. Prerequisites: Biological Sciences core; upper-division course in molecular biology/genetics or biochemistry.
3 units (Mocarski, Staff) alternate years, given 2006-07

MI 209. Medical Microbiology — For graduate and advanced undergraduate students. Required of first-year graduate students in Microbiology and Immunology. Introduction to the concepts of microbial pathogenesis with emphasis on the mechanisms employed by pathogenic microorganisms in establishing infection in the host, and the responses of the host to infection. Prerequisite: understanding of biochemistry and molecular biology.
1-3 units, Spr (Falckow)

MI 210. Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites — For graduate, medical, and advanced undergraduate students. Required for first-year graduate students in Microbiology and Immunology. The molecular mechanisms by which microorganisms invade animal and human hosts, express their genomes, interact with macromolecular pathways in the infected host, and induce disease. Problem sets and recent literature pertaining to microbial pathogenesis.
5 units, Win (Sarnow, Staff)

MI 211. Advanced Immunology I — (Same as IMMUNOL 201.) For graduate and medical students and advanced undergraduates. Molecules and cells of the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte differentiation and activation; regulation of immune responses; autoimmunity and other problems in clinical immunology. Prerequisites: undergraduate course in Immunology; and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology.
3 units, Win (Chien, Staff)

MI 212. Advanced Immunology II — (Same as IMMUNOL 202.) Readings of immunological literature and specific areas of immunology. Classic problems and emerging areas are covered based on primary literature. Student and faculty presentations. Prerequisite: 211.
3 units, Spr (Garcia, Staff)

MI 213. Advanced Immunology III — (Same as IMMUNOL 203.) Key experiments and papers in immunology. Student presentations and faculty participation; faculty describe their experimental process and scientific papers. Prerequisite: IMMUNOL 201/MI 211 or IMMUNOL 202/MI 212.
3 units, Sum (Staff)

MI 215. Principles of Biological Technologies — (Same as IMMUNOL 215.) Required of first-year graduate students in Microbiology and Immunology, and the Immunology program. The principles underlying commonly utilized technical procedures in biological research. Lectures and primary literature critiques on gel electrophoresis, protein purification and stabilization, immunofluorescence microscopy, FACS. Prerequisites: biochemistry, organic chemistry, and physics.
2 units, Spr (Kirkegaard)

MI 233. The Biology of Small Modulatory RNAs — (Same as GENE 233, PATH 233.) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Requires paper proposing novel research.
2 units, Aut (Chen, Fire)

MI 250. Frontiers in Microbiology and Immunology — Required of first- and second-year students in Microbiology and Immunology. How to evaluate biological research. Held in conjunction with the Microbiology and Immunology Friday noon seminar series. Before the seminar, students and faculty discuss one or more papers from the speaker’s primary research literature on a related topic. After the seminar, students meet informally with the speaker to discuss their research.
1 unit, Aut, Win, Spr (Sarnow)

MI 299. Directed Reading — Prerequisite: consent of instructor. See faculty list for section numbers.
1-18 units, Aut, Win, Spr, Sum (Staff)

MI 399. Directed Reading — Prerequisite: consent of instructor. See faculty list for section numbers.
1-18 units, Aut, Win, Spr, Sum (Staff)

MI 399. Graduate Research — Students who have completed required foundation courses may elect research work in general bacteriology, bacterial physiology and ecology, bacterial genetics, microbial pathogenicity, immunology, parasitology, and virology. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

**MOLECULAR AND CELLULAR PHYSIOLOGY**

Chair: Richard S. Lewis

Associate Professor: V. Daniel Madison

Assistant Professors: Miriam Goodman, Merritt Maduke

Coursey Associate Professor: Anson W. Lowe

Coursey Assistant Professors: John Huguenard, Richard J. Reimer

Department Offices: Beckman Center, B100

Mail Code: 94305-5345

Phone: (650) 725-7554

Email: schantae@stanford.edu

Web Site: http://mcp.stanford.edu
Courses given in Molecular and Cellular Physiology have the subject code MCP. For a complete list of subject codes, see Appendix.

The Department of Molecular and Cellular Physiology is located in the Beckman Center for Molecular and Genetic Medicine.

A central goal of physiology in the post-genomic era is to understand how thousands of encoded proteins serve to bring about the highly coordinated behavior of cells and tissues. Research in the department approaches this goal at many levels of organization, ranging from single molecules and individual cells to multicellular systems and the whole organism. The faculty share common interests in the molecular mechanisms of cell signaling and behavior, with a special focus on structure/function analysis of ion channels and G-protein coupled receptors, and their roles at the cellular, organ, and whole-organism levels; the molecular basis of sensory transduction, synaptic transmission, plasticity and memory; the role of ion channels and calcium in controlling gene expression in neural and immune cells; and the regulation of vesicle trafficking and targeting, cell polarity, and cell-cell interactions in the nervous system and in epithelia. Research programs employ a wide range of approaches, including molecular and cell biology, biochemistry, genetics, biophysics, x-ray crystallography and solution NMR, electrophysiology, and in vitro and in vivo imaging with confocal and multi-photon microscopy.

GRADUATE PROGRAMS

The department offers required and elective courses for students in the School of Medicine and is also open to other qualified students with the consent of the instructor. Training of medical, graduate, and postdoctoral students is available. The program offers a course of study leading to the Ph.D. degree. No B.S. is offered, and an M.S. is offered only in the unusual circumstance where a student completes the course work, rotation, and the written section of the qualifying exam, but is unable to complete the requirements for the Ph.D.

DOCTOR OF PHILOSOPHY

Students with undergraduate or master’s degrees who have completed a year each of college chemistry (including lectures in organic and physical chemistry), physics, calculus, and biology are considered for admission to graduate study. Applicants submit a report of scores from the Graduate Record Examination (verbal, quantitative, analytical, and an advanced subject test in one of the sciences) as part of the application.

Students who do not speak English as their native language must submit scores from TOEFL unless waived by Graduate Admissions, the Registrar’s Office.

Study toward the Ph.D. is expected to occupy five years, including summers. A minimum of six quarter-long courses are required. These include four graduate-level courses (200-300 series) and a choice of two out of these three courses: MCP 221, MCP 255, and MCP 256. Students are also required to take the Molecular and Cellular Physiology seminar/Research In Progress series. Each student presents a talk on research in progress to the department at least every other year, starting their second year. Acceptable grades for all course work must be a minimum of 'B-' and at least two grades equal to 'A-' or above are necessary (but not sufficient) for continuation in the program.

Qualifying Examination — At the end of the second year in residence as a graduate student, each Ph.D. candidate presents a written thesis proposal to be defended at an oral comprehensive examination. The examinations may be taken only after all course work has been completed by the required standard. Students undertake individual research studies as early as possible after consultation with their preceptor. Upon passing this exam, the student is advanced to candidacy for the Ph.D.

Dissertation and University Oral Examination — The results of independent, original work by the students are presented in a dissertation. The oral examination is largely a defense of the dissertation.

Advisers and Advisory Committees — A graduate advisory committee, currently Professors Lewis and Aldrich, advises students during the period before the formation of their qualifying committees.

Financial Aid — Students may be funded by their advisers’ research grants, by training grants, by department funds, or by extramural funds. Students are encouraged to obtain funding from outside sources (e.g., NIH and NSF).

COURSES

Course and lab instruction in the Department of Molecular and Cellular Physiology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

MCP 100Q. The Hippocampus as a Window to the Mind — Stanford Introductory Seminar. Preference to sophomores.
3 units, Spr (Madison)

MCP 199. Undergraduate Research — Fields of research open to students decided in consultation with sponsoring faculty member.
1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 200-204. Physiology — Offered jointly with the Department of Medicine. Lectures, small group instruction, clinical presentations, and lab demonstrations of normal and disordered human cardiovascular physiology, normal and disordered function in the endocrine, respiratory, renal, fluid and electrolyte, and acid-base systems. Prerequisite: understanding of general biochemistry.

MCP 200. Cardiovascular Physiology
5 units, Spr (Kobilka)

MCP 202. Gastrointestinal Physiology
1-3 units, Aut (Lowe)

MCP 203. Renal Physiology
1-3 units, Aut (Meyer)

MCP 204. Respiratory Physiology
1-2 units, Aut (Raffin)

MCP 213. Special Topics in Molecular and Cellular Physiology — Seminar. Introductory and advanced physiological topics agreed on by an instructor and students. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 215. Synaptic Transmission — Primarily for graduate students with an interest in synaptic function; interested medical students and advanced undergraduates may enroll. The anatomical, physiological, and biochemical basis of synaptic function in the peripheral and central nervous system. Research papers.
5 units, Aut (Smith, Madison)

MCP 216. Genetic Analysis of Behavior — (Same as NBIO 216.) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.
4 units (Clandinin, Goodman) not given 2005-06

MCP 218. Transmembrane Signal Transduction — The molecular mechanisms of signal transduction for a variety of structurally and functionally different plasma membrane receptors. Topics: the structure of receptors and the interaction of the receptor protein with the lipid bilayer; ligand binding and ligand mediated changes in receptor structure; and cytosolic, cytoskeletal, and membrane proteins that interact with receptors. Recent research developments and the value of experimental approaches for the study of receptors.
2 units, Win (Kobilka)

MCP 221. Cell Biology of Physiological Processes — Open to graduate and medical students. Mechanisms of membrane and cellular biogenesis in relation to physiological processes. Emphasis is on regulatory and signaling mechanisms involved in coordinating cellular phenomena such as cellular organization, function, and differentiation. Topics: cellular compartmentalization, transport and trafficking of macromolecules, organelle biogenesis, cell division, motility and adhesion, and multicellularity. Prerequisites: Biological Sciences core, BIOSCI 187/287.
2-5 units, Win (Kopito, Frydman, Nelson)
MCP 221A,B,C,D,E,F,G,H. Cell Biology of Physiological Processes Discussion — Required course taken with 221, taught by medical school faculty, to expand on the topics covered in 221. Students register for only one section. Prerequisites: Biological Sciences core, BIOCHEM 201.

2 units, Win (Staff)

MCP 222. Imaging: Biological Light Microscopy — (Same as BIOSCI 152.) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biological Sciences core. GER:DB-NatSci

3 units, Spr (S. Smith)

MCP 232. Advanced Imaging Lab in Biophysics — (Same as BIOSCI 132/232, BIOPHYS 232.) Laboratory and lectures. Microscopy, emphasizing hands-on experience with a range of apparatus and techniques. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Advanced topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, optical trapping, and fiber optic methods. Limited enrollment. Recommended: basic physics, Biological Sciences core or equivalent, and consent of instructor. GER:DB-NatSci

4 units, Spr (S. Block, Schnitzer, S. Smith, Stearns)

MCP 255. Molecular Physiology of Membranes — Recommended for MCP graduate students; open to graduate and medical students; advanced undergraduates with consent of instructor. Structure and mechanisms of the molecules underlying transmembrane processes. Topics include structure of membrane proteins, energetics of membranes, transmembrane signaling (receptors and channels), transport (transporters and pumps), single molecule methods and theory, and membrane complexes. Lectures introduce concepts; student activities and small group discussion emphasize application of concepts to research the literature. Recommended: BIOCS/BIO 214 or equivalent.

4 units, Win (Maduke, Aldrich)

MCP 256. Molecular Physiology of Cells — Recommended for MCP graduate students; open to graduate and medical students; advanced undergraduates with consent of instructor. Dynamic aspects of cell function, including cellular energetics, gas exchange, solute transport, absorption and secretion in epithelia, ionic and electrical signaling in nerve and muscle, and sensory physiology. Emphasis is on the cellular function of ion channels and transporters, joining experimental and analytical approaches. Lectures, in-class readings, discussions, student presentations, and the use of mathematical models of cell function. Recommended: 255; basic cell and molecular biology.

4 units, Spr (Lewis, Goodman)

MCP 258. Information and Signaling Mechanisms in Neurons and Circuits — How do synapses, cells and neural circuits process information relevant to a behaving organism? How phenomena of information processing emerge at several levels of complexity in the nervous system, including sensory transduction in molecular cascades, information transmission through axons and synapses, plasticity and feedback in recurrent circuits, and encoding of sensory stimuli in neural circuits.

5 units, Aut (Aldrich, Baccus, Tsien)

MCP 299. Directed Reading — Prerequisite: consent of instructor. See faculty list for section numbers.

1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 399. Advanced Research — Investigation sponsored by individual faculty members undertaken by interested, qualified medical or graduate students. Research fields include endocrinology, neuroendocrinology, and topics in molecular and cellular physiology.

1-18 units, Aut, Win, Spr, Sum (Staff)

MOLECULAR PHARMACOLOGY

Emeritus: (Professors) Robert H. Dreisbach, Avram Goldstein, Dora B. Goldstein, Tag E. Mansour, James P. Whitlock

Chair: Daria Mochly-Rosen

Professors: James E. Ferrell, Jr., Oleg Jardetzky, Tobias Meyer, Daria Mochly-Rosen, Richard A. Roth

Assistant Professors: James K. Chen, Karlene A. Cimprich, Thomas J. Wandless

Consulting Professors: Gordon Ringold, Alejandro Zaffaroni

Web Site: http://molepharm.stanford.edu

Courses given in Molecular Pharmacology have the subject code MPHA. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAMS

MASTER OF SCIENCE

Students in the Ph.D. program may apply for an M.S. degree, after having satisfactorily completed the course and laboratory requirements of the first two years. The degree also requires a written thesis based on literature or laboratory research. Postdoctoral research training is available to graduates having the Ph.D. or M.D. degree.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The Department of Molecular Pharmacology offers interdisciplinary training to prepare students for independent careers in biomedical science. Research and training in the department focuses on the mechanisms by which hormones and drugs regulate cell function, and on the development of new therapeutic technologies. At the heart of these issues lies the analysis of cell signaling at the level of pathways and networks.

The program leading to the Ph.D. degree includes formal and informal study in pharmacology, genetics, biochemistry, and molecular cell biology. First-year students spend one quarter in each of three different laboratories, working closely with other graduate students, a professor, and postdoctoral fellows on various research projects. During the fourth quarter, the student chooses a faculty mentor with whom to undertake a thesis research, based on available positions and the student’s interest. During or before the eighth quarter of study, students must pass a qualifying exam which consists of an oral exam on general knowledge and a defense of a research proposal. Course requirements are fulfilled during the first two years of study; the later years of the four- to six-year program are devoted to full-time dissertation research. Close tutorial contact between students and faculty is stressed throughout the program.

Research opportunities also exist for medical students and undergraduates. The limited size of the labs in the department allows for close tutorial contact between students, postdoctoral fellows, and faculty.

The department participates in the four quarter Health and Human Disease sequence which provides medical students with a comprehensive, systems-based education in physiology, pathology, microbiology, and pharmacology.

COURSES

Course and lab instruction in the Department of Molecular Pharmacology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/ph8-2.html.

MPHA 199. Undergraduate Research

1-18 units, Aut, Win, Spr, Sum (Staff)

ADVANCED

Open to all University students; instructor’s consent required prior to registration. Students should consult with the instructor about the adequacy of their preparation.
MPHA 210. Signal Transduction Pathways and Networks — The molecular mechanisms through which cells receive and respond to external signals. Emphasis is on principles of cell signaling, the systems-level properties of signal transduction modules, and experimental strategies through which cell signaling pathways are being studied. Prerequisite: working knowledge of biochemistry and genetics.
4 units, Win (Ferrell, Meyer)

MPHA 220. Chemistry of Biological Processes — (Same as BIOC 220.) The principles of organic and physical chemistry as applied to biomolecules. Goal is a working knowledge of chemical principles that underlie biological processes, and chemical tools used to study and manipulate biological systems. Prerequisites: organic chemistry and biochemistry, or consent of instructor.
4 units, Aut (Wandless, Herschlag, Chen, Bogyo)

MPHA 240. Drug Discovery — The scientific principles and technologies involved in making the transition from a basic biological observation to the creation of a new drug emphasizing molecular and genetic issues. Prerequisite: biochemistry, chemistry, or bioengineering.
4 units (Mochly-Rosen, Cimprich) alternate years, given 2006-07

MPHA 260. Quantitative Chemical Biology — Current topics including protein and small molecule engineering, cell signaling sensors and modulators, molecular imaging, chemical genetics, combinatorial chemistry, in vitro evolution, and signaling network modeling. Prerequisites: undergraduate organic chemistry, and biochemistry or cell biology.
4 units (Chen, Bogyo, Wandless, Jackson) alternate years, not given 2006-07

MPHA 270. Research Seminar — Current research in pharmacology. Seminars are reviewed and discussed in a separate conference with a member of the faculty.
1-2 units, Aut, Win, Spr (Staff)

MPHA 280. Tutorial Program — Guided readings in the literature of any area of pharmacology. Review paper may be required. Primarily for students in pharmacology. May be repeated for credit.
1-18 units, Aut, Win, Spr, Sum (Staff)

MPHA 299. Directed Reading — May be repeated for credit.
1-18 units, Aut, Win, Spr, Sum (Staff)

MPHA 399. Research — Investigations sponsored by individual faculty members. May be repeated for credit.
1-18 units, Aut, Win, Spr, Sum (Staff)

NEUROBIOLOGY
Emeritus: Denis Baylor, Eric Shooter, Lubert Stryer
Chair: Eric I. Knudsen
Professors: Ben Barres, Eric I. Knudsen, Uel J. McMahan, William T. Newsome
Assistant Professors: Stephen Baccus, Thomas Clandinin, Tirin Moore, Jennifer Raymond
Department Offices: Fairchild Building, Second Floor
Mail Code: 94305-5125
Web Site: http://www.stanford.edu/dept/nbio/

Courses given in Neurobiology have the subject code NBIO. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAM
Graduate students in the Department of Neurobiology obtain the Ph.D. degree through the interdepartmental Neurosciences Ph.D. program. Accepted students receive funding for tuition and a living stipend. Applicants should familiarize themselves with the research interests of the faculty and, if possible, indicate their preference on the application form which is submitted directly to the Neurosciences Program.

Medical students also are encouraged to enroll in the Ph.D. program. The requirements of the Ph.D. program are fitted to the interests and time schedules of the student. Postdoctoral training is available to graduates holding Ph.D. or M.D. degrees, and further information is obtained directly from the faculty member concerned.

Research interests of the department include: mechanisms of visual transduction and information transmission in vertebrate retina; structure, function, and development of auditory and visual systems; integrative mechanisms and regeneration in the central and peripheral nervous system; mechanisms of ion channel function; and neuronal growth and differentiation.

COURSES

Course and lab instruction in the Department of Neurobiology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

The department offers a one quarter course (NBIO 200) on the structure and function of the nervous system, which is open to medical and graduate students and advanced undergraduates. Advanced courses are open to students who have completed the basic course.

NBIO 199. Undergraduate Directed Reading
1-18 units, Aut, Win, Spr (Baccus, Barres, Clandinin, Knudsen, McMahan, Moore, Newsome, Raymond)

NBIO 204. Computational Neuroimaging — (Same as PSYCH 204A.) Advanced seminar. For students working with functional magnetic resonance imaging (fMRI). The physiological basis of the signal measured using fMRI. Possibilities for experiment design and interpretation of the signal with respect to other physiological and behavioral measurements. Emphasis is on experimental design, software tools, and pulse sequences for fMRI experiments.
1-3 units (Wandell, Grill-Spector) alternate years, given 2006-07

NBIO 206. The Nervous System — Introduction to the structure and function of the nervous system, including neuroanatomy, neurophysiology, and systems neurobiology. Topics include the properties of neurons and the mechanisms and organization underlying higher functions. Framework for general work in neurology, neuropathology, clinical medicine, and for more advanced work in neurobiology. Lecture and lab components must be taken together.
8 units, Win (Baccus, Barres, Knudsen, Newsome, Raymond, Clandinin, Moore)

NBIO 215. Synaptic Transmission — (Enroll in MCP 215.)
5 units, Aut (Smith, Madison)

NBIO 216. Genetic Analysis of Behavior — (Same as MCP 216.)
Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.
4 units (Clandinin, Goodman) not given 2005-06

NBIO 218. Neural Basis of Behavior — Advanced seminar. The principles of information processing in the vertebrate central nervous system, and the relationship of functional properties of neural systems with perception and behavior. Emphasis is on the visual and auditory systems. Original papers, directed discussions, and student presentations. Prerequisite: 200 or consent of instructor.
4 units, Spr (Knudsen, Raymond) alternate years, not given 2006-07

2-4 units (Newsome) not given 2005-06

NBIO 221. Frontiers in Translational Medicine — For first-year MSTP and M.D./Ph.D. students only. Pathways for combining science and
NEUROSCIENCES PROGRAM

Director: William T. Newsome (Professor, Neurobiology)

Participating Faculty:
Anesthesia: Rona Giffard (Associate Professor), M. Bruce MacIver (Assistant Professor, Research), Sean Mackey (Assistant Professor), David Yeomans (Associate Professor)
Applied Physics: Mark Schnitzer (Assistant Professor)
Biological Sciences: Bruce Baker (Professor), Russell D. Fernald (Professor), William F. Gilly (Professor), H. Craig Heller (Professor), Ron Kopito (Professor), Liqun Luo (Assistant Professor), Susan McConnell (Professor), Robert M. Sapolsky (Professor), Mark Schnitzer (Assistant Professor), Kang Shen (Assistant Professor), Stuart Thompson (Professor)
Comparative Medicine: Paul S. Buckmaster (Assistant Professor), Linda C. Cork (Professor), Corinna Darian-Smith (Assistant Professor), Shaul Hestrin (Associate Professor)
Developmental Biology: Matthew P. Scott (Professor)
Electrical Engineering: Krishna Shenoy (Assistant Professor)
Genetics: Anne Brunet (Assistant Professor), David R. Cox (Professor)
Molecular and Cellular Physiology: Richard Aldrich (Professor), Miriam B. Goodman (Assistant Professor), Brian Kobilka (Professor), Richard S. Lewis (Professor), V. Daniel Madison (Associate Professor), Merritt C. Maduke (Assistant Professor), Stephen Smith (Professor), Richard Tsien (Professor)
Molecular Pharmacology: Helen Blau (Professor), Tobias Meyer (Professor), Daria Mobley-Rosen (Professor)
Neurobiology: Stephen Baccus (Assistant Professor), Ben Barres (Associate Professor), Tom Clandinin (Assistant Professor), Ricardo Dolmetsch (Assistant Professor), Eric I. Knudsen (Professor), U. J. McManus (Professor), Tirin Moore (Assistant Professor), William T. Newsome (Professor), Jennifer Raymond (Assistant Professor)
Neurology and Neurological Sciences: Robert S. Fisher (Professor), Ting-Ting Huang (Assistant Professor), John A. Huguenard (Associate Professor), William C. Mobjley (Professor), David A. Prince (Professor), Thomas A. Rando (Assistant Professor), Richard Reimer (Assistant Professor), Terence Sanger (Assistant Professor), Lawrence Steinman (Professor), Tony Wyss-Coray (Assistant Professor), Yanmin Yang (Assistant Professor)
Neurosurgery: Pak H. Chan (Professor), Theo Palmer (Assistant Professor), Gary K. Steinberg (Professor)
Pathology: Bingwei Lu (Assistant Professor), Raymond Sobel (Associate Professor)
Psychiatry and Behavioral Sciences: Karl Deisseroth (Assistant Professor), Craig Garner (Professor), Terrence A. Ketter (Associate Professor), Robert C. Malenka (Professor), Vinod Menon (Assistant Professor, Research), Emmanuel Mignot (Professor), Allan L. Reiss (Professor), Edith Sullivan (Professor, Research)
Psychology: Ian Gotlib (Professor), Kalanit Grill-Spector (Assistant Professor), James J. Gross (Associate Professor), Brian Knutson (Assistant Professor), Anthony Wagner (Assistant Professor), Brian Wandell (Professor), Jeffrey J. Wine (Professor)
Radiology: Gary H. Glover (Professor)

Courses given in the Neurosciences Program have the subject code NEPR. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAM
DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin. The interdepartmental Neurosciences Program offers instruction and research opportunities leading to a Ph.D. in Neurosciences. The requirements for a Ph.D. degree follow those of the University and in addition are tailored to fit the background and interests of the student. Accepted students receive an award covering tuition, a basic health plan, and a living stipend. Qualified applicants should, where possible, apply for the predoctoral fellowships in open competition, especially those from the National Science Foundation. December 16 is the deadline for receipt in the Neurosciences Program office of applications with all supporting material.

Applicants should familiarize themselves with the research interests of the faculty and indicate their preferences clearly on the application form. Since students enter with differing backgrounds, and the labs in which they may elect to work cover several different disciplines, the specific program for each student is developed individually with an advisory committee. All students are required to complete the basic introduction...
to neurobiology (NBIO 206 or equivalent). Students must also take five advanced courses, four of which must be distributed among four of the following core areas: systems and behavioral neuroscience, molecular and cellular neuroscience, developmental neuroscience, clinical neuroscience, and computational neuroscience. The fifth advanced course is chosen by the student in an area related to the student’s research interest, and may be selected from outside the Neurosciences core with prior approval from the Program Director and the student’s adviser.

Students usually rotate through several labs during their first year, although they may choose to begin thesis research on entry. After the first rotation, students may rotate both within and outside the Neurosciences Program. Required course work should be completed by the end of the second year. Passing of a comprehensive oral preliminary examination given by the student’s advisory committee is required for admission to Ph.D. candidacy. This examination is usually taken by the end of the second year. The student is required to present a Ph.D. dissertation, which is the result of independent investigation contributing to knowledge in an area of neuroscience, and to defend his or her dissertation in a University oral examination, which includes a public seminar.

Medical students may participate in this program provided they meet the prerequisites and satisfy all the requirements of the graduate program as listed above. The timing of the program may be adjusted to fit their special circumstances.

**COURSES**

Course and lab instruction in the Neurosciences Program conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/raf/8-2.html.

**NEPR 299. Directed Reading**
1-18 units, Aut, Win, Spr, Sum (Staff)

**NEPR 300. Professional Development and Integrity in Neuroscience**
—(Enroll in NBIO 300.)
1-2 units, Aut, Win, Spr (Raymond)

**NEPR 399. Research**
—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

**OBSTETRICS AND GYNECOLOGY**

Chair: Mary Lake Polan

Courses given in Gynecology have the subject code OBGYN. For a complete list of subject codes, see Appendix.

The Department of Obstetrics and Gynecology does not offer degrees; however, qualified medical, graduate, or undergraduate students with an interest in basic research in reproductive biology may apply to arrange individual projects under the supervision of the faculty. The focus for the Division of Reproductive Biology is the study of the molecular and cellular biology of male and female reproductive organs.

**COURSES**

**OBGYN 199. Undergraduate Research**
1-18 units, Aut, Win, Spr, Sum (Staff)

**OBGYN 202. Infertility: Mechanisms of Disease and Clinical Frontiers**
—(Same as DBIO 202.) Primary literature in basic and clinical science, and demonstrations of assisted reproductive technologies (ART). Techniques include in vitro fertilization including micromanipulation procedures such as intracytoplasmic sperm injection and the culture of blastocysts, using mouse gametes, and pre-embryos. Students observe procedures in the ART clinic. Recommended: DBIO 201 or consent of instructors.
3-4 units, Win (Porzig, Behr)

**PATHOLOGY**

Emeriti: (Professor) Richard L. Kempson; (Professor, Clinical) P. Joanne Cornbleet, Lawrence F. Eng, Luis Fajardo, Heinz Furtmayer, F. Carl Grumet

Chair: Stephen J. Galli

Associate Professors: Jeffrey D. Axelrod, Athena M. Cherry, Tina Cowan, James D. Faix, Susan A. Gable, Sharon M. Geaghan, Peter K. Jackson, Sabine Kohler, Teri A. Longacre, Sara A. Michie, Kent W. Nowels, Bruce Patterson, Donald P. Regula, Arend Sidow, Raymond A. Sobel, Jan Matthijs van de Rijn, Hannes Vogel, James L. Zehnder

Assistant Professors: Matthew Bogyo, David Cassarino, Andrew Connolly, Dean Felscher, Magali Fontaine, Tracey George, John P. Higgins, Neeraja Kambham, Christina Kong, Bingwei Lu, Yasodha Natkunam, Jonathan R. Pollack, Iris Schrijver, Uma Sundram

Acting Assistant Professors: Soheil Dadras, Erich Schwartz, Robert West

Courtesy Professor: Lucy Tompkins

Courtesy Assistant Professor: Donna Bouley, Robert Shafer

Clinician Educators: Susan Atwater, Carey D. Austin, David B. Bingham, Christopher A. Callahan, Barbara Egbert, Tracey George, Terri Haddix, Norman Lehman, Melanie Manning, Dorothy Nguyen, Christopher Park, Michael Petzar, Brent Tan Maureen Viele

Adjunct Clinical Faculty: Robert Archibald, Jerome S. Burke, Stephen Shi-Hua Chen, Seth Haber, Maie K. Herrick, Paul W. Herrmann, Charles Lombard, John E. McNeal, Judy Melinick, Lawrence Naiman, Mahendra Ranchod, Thomas W. Rogers, William Ruehl, Joshua Sickel, Sharon Van Meter

Department Offices: Medical Center, Lane Building, L-235

Mail Code: 94305-5324

Phone: (650) 723-5252

Web Site: http://pathology.stanford.edu

Courses given in Pathology have the subject code PATH. For a complete list of subject codes, see Appendix.

**PROGRAMS OF STUDY**

The Department of Pathology offers advanced courses in aspects of pathology. The department does not offer advanced degrees in pathology, but qualified graduate students who are admitted to the Biophysics Program, the Cancer Biology Program, or other interdepartmental programs may elect to pursue their thesis requirements in the department’s research laboratories. The discipline of pathology has served as a bridge between the preclinical and clinical sciences and is concerned with the application of advances in the basic biological sciences, both to the diagnosis of human disease and the elucidation of the mechanisms of normal molecular, cellular, and organ structure and function that manifest themselves in clinical disease. Accordingly, the department’s research interests extend from fundamental molecular biology to clinical-pathological correlations, with an emphasis on experimental oncology.

At present, investigation in the department includes basic studies in different areas utilizing molecular biological, biochemical, and genetic cell biological techniques: DNA replication in yeast and cultured eukaryotic cells, cell cycle control in animal cells and yeast, identification and pathogenetic role of chromosomal aberrations in human malignancies and mechanisms of activation of oncogenes in human and animal cells, lymphocyte and neutrophil-interactions with endothelial cells, cell type specification and signal transduction pathways leading to specific gene expression or modulation of cytoskeletal behavior; cytoskeletal architecture, cell-matrix interaction, developmental biology of hematopoietic stem cells and thymus, regulation of the immune system, and mechanisms of immunity and other responses in the central nervous system. In addi-
tion, a variety of studies focus on the development of novel diagnostic and immunotherapeutic treatment modalities and techniques for solid tumors, lymphomas, HIV, and genetic diseases. Research training in all of these areas is available for qualified medical and graduate students by individual arrangement with the appropriate faculty member. A summary of the research interests of the department faculty is available at http://pathology.stanford.edu.

COURSES

Course and lab instruction in the Department of Pathology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

PATH 199. Undergraduate Research

PATH 211. Advanced Immunology I.—(Enroll in MI 211, IMMUNOL 201.)

PATH 218. Computational Analysis of Biological Images

PATH 299. Directed Reading.—Prerequisite: consent of instructor. 1-18 units, Aut, Win, Spr, Sum (Staff)

PATH 233. The Biology of Small Modulatory RNAs.—(Same as GENE 233, MI 233.) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Requires paper proposing novel research. 2 units, Aut (Chen, Fire)

PATH 399. Research.—Department faculty are involved in active research programs at the Stanford Medical Center. Students interested in research at the molecular, cellular, and clinical-pathologic levels are encouraged to seek out faculty advisors. The department is equipped for modern research and maintains an active postdoctoral research training program. Prerequisite: consent of instructor. 1-18 units, Aut, Win, Spr, Sum (Staff)

Radiation Oncology

Chair: Gary M. Glazer

Associate Professors: Patrick D. Barnes, Christopher F. Beaulieu, Francis Blankenberg, Michael D. Bake, Bruce Daniel, Terry Desser, Huy M. Do, Debra M. Ikeda, Stephen Kee, Eric W. Olcott, Geoffrey D. Rubin, George M. Segall, Daniel M. Spielman, Daniel Y. Sze

Assistant Professors (Research): sandip Biswal, FranciCS P. Chan, Dominik Fleischmann, Joa Kn K. Frisoli, Garry E. Gold, Kathryn J. Stevens

Assistant Professors (Research): Kim Butts, Craig Levin

Consulting Assistant Professor: MarK Bednarski, Rebecca Fahrig, Sylvia Plevritis, Xiaoyuan Chen

Consulting Assistant Professor: Jarrett Rosenberg

Web Site: http://www.radiology.stanford.edu/

Courses given in Radiation Oncology have the subject code RADO. For a complete list of subject codes, see Appendix.

The Department of Radiation Oncology does not offer degrees; however, its faculty teach a variety of courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisories for study and research. Graduate students in the Biophysics Program and in the Cancer Biology Program may perform their thesis research in the department. Undergraduate students may also arrange individual research projects under the supervision of the faculty.

At the present time, the major areas of basic research investigation in the department include: DNA repair in mammalian cells after ionizing irradiation; studies of the mechanism of tumor hypoxia in animal tumors; development of new anti-cancer drugs to exploit tumor hypoxia; cytogenetic and molecular methods of predicting the sensitivity of individual tumors to cancer therapy; radiolabeled monoclonal antibodies for cancer detection and treatment; studies of oxygen levels in human tumors using polarographic electrodes; clinical trials of a new hypoxic cytotoxic agent (irinotecan); studies of the late effects of cancer therapy; and techniques of conformal and intensity modulated radiation therapy.

COURSES

Course and lab instruction in the Department of Radiation Oncology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

The following are open to undergraduates and graduate students.

RADO 101. Readings in Radiation Biology

1-18 units, Aut, Win, Spr (Staff)

RADO 199. Undergraduate Research

1-18 units, Aut, Win, Spr, Sum (Staff)

RADO 299. Directed Reading

Prerequisite: consent of instructor. 1-18 units, Aut, Win, Spr, Sum (Staff)

RADO 399. Research

Prerequisite: consent of instructor. 1-18 units, Aut, Win, Spr, Sum (Staff)

Radiology

Chair: Gary M. Glazer

Associate Professors: Patrick D. Barnes, Christopher F. Beaulieu, Francis Blankenberg, Michael D. Bake, Bruce Daniel, Terry Desser, Huy M. Do, Debra M. Ikeda, Stephen Kee, Eric W. Olcott, Geoffrey D. Rubin, George M. Segall, Daniel M. Spielman, Daniel Y. Sze

Assistant Professors (Research): sandip Biswal, FranciCS P. Chan, Dominik Fleischmann, Joa Kn K. Frisoli, Garry E. Gold, Kathryn J. Stevens

Assistant Professors (Research): Kim Butts, Craig Levin

Consulting Assistant Professor: MarK Bednarski, Rebecca Fahrig, Sylvia Plevritis, Xiaoyuan Chen

Consulting Assistant Professor: Jarrett Rosenberg

Web Site: http://www.radiology.stanford.edu/

Courses given in Radiology have the subject code RAD. For a complete list of subject codes, see Appendix.
This discipline focuses on the use of radiation, ultrasound, and magnetic resonance as diagnostic, therapeutic, and research tools. The fundamental and applied research within the department reflects this broad spectrum as it relates to anatomy, pathology, physiology, and interventional procedures. Original research and development of new clinical applications in medical imaging is supported within the Radiological Sciences Laboratory.

COURSES

The following courses are open to undergraduates and graduate students.

RAD 101. Readings in Radiology Research
1-18 units, Aut, Win, Spr (Staff)

RAD 199. Undergraduate Research
1-18 units, Aut, Win, Spr (Staff)

RAD 208. Experimental Nuclear Medicine—Computer applications in medicine, particularly in the use of radioisotopes as tracers. Recommended: some knowledge of physiology and calculus.
2 units, Win, Spr (Goris)

RAD 220. Introduction to Imaging and Image-Based Human Anatomy—(Same as BIOE 220.) The physics of medical imaging and human anatomy through medical images. Emphasis is on contrast mechanisms and the relative strengths of each imaging modality. Lab shows imaging and anatomy in real time. Recommended: basic biology, physics, and math.
3 units, Aut (Gold, K. Pauly)

RAD 221. Introduction to Radiologic Anatomy—Basic human anatomy through imaging examinations including radiography, computed tomography, ultrasound, and magnetic resonance imaging. How to recognize normal anatomy on imaging studies, spatial relationships, and three-dimensional thinking. Case studies of pathology.
2 units, Aut (Gold, Staff)

RAD 222. Multi-modality Molecular Imaging in Living Subjects—(Same as BIOE 222.) The molecular and cellular bases of life from an engineering perspective considering metabolism, information flow and feedback, signal transduction, and means for engineering these processes. Clinical motivations and practical applications.
4 units, Aut (Gambhir)

RAD 226. In Vivo Magnetic Resonance Spectroscopy and Imaging—Collections of identical independent nuclear spins are described by the classical vector model of magnetic resonance imaging (MRI); however, interactions among spins, as occur in many in vivo processes, require a more complete description. Physics and engineering principles of these in vivo magnetic resonance phenomena with emphasis on current research questions and clinical applications. Topics: quantum mechanical description of magnetic resonance, density matrix theory, product operator formalism, relaxation theory and contrast mechanisms, spectroscopic imaging, spectral editing, and multinuclear studies. Prerequisites: EE 369B or familiarity with magnetic resonance, working knowledge of linear algebra.
3 units, Win (Spielman)

RAD 227. Functional MRI Methods—(Same as BIOPHYS 227.) Functional magnetic resonance neuroimaging, including data acquisition, analysis, and experimental design. Journal club sections, Cognitive neuroscience and clinical applications. Prerequisites: basic physics, mathematics. Recommended: neuroscience.
3 units, Aut (Glover)

RAD 299. Directed Reading—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

GRADUATE PROGRAMS

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The graduate program in Structural Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program in which individuals are candidates for both Ph.D. and M.D. degrees.

The graduate program is intended to prepare students for careers as independent investigators in cell and molecular biology. The principal requirement of a Ph.D. degree is the completion of research constituting a complete list of subject codes, see Appendix.

The department offers course work and opportunities for research in structural biology. Courses fall into two categories: (1) a series of quarter courses that treat topics of current interest in structural biology and biophysics at an advanced level; and (2) INDE 216, Cells to Tissues, a course for medical students that includes lectures on structure-function relationships of mammalian cells and tissues and a lab on medical histology.

The emphasis of research in the department is on understanding fundamental cellular processes in terms of the structure and function of biological macromolecules and their assemblies. Techniques used include standard methods of biochemistry, cell culture, single-molecule fluorescence spectroscopy, genetic engineering, and three dimensional structure determination by x-ray diffraction, nuclear magnetic resonance spectroscopy and electron microscopy, coupled with the development of computational methods.

The requirements and recommendations for the Ph.D. degree include:

1. Training in physics or chemistry equivalent to that of an undergraduate physics or chemistry major at Stanford.
2. Completion of the following background courses or their equivalents at other institutions:
   a) CHEM 131, 171, 173, and 175
   b) BIOC 200, 201
3. Completion of the following courses or their equivalents:
   a) SBIO 241 and 242
   b) At least four additional graduate level courses in physical or biological science
   c) MED 255
4. Opportunities for teaching are available during the first nine quarters at the discretion of the advising committee.
5. The student must prepare a dissertation proposal defining the research to be undertaken including methods of procedure. This proposal should be submitted by Winter Quarter of the third year, and it must be approved by a committee of at least three members including the principal research adviser and at least one member from the Department of Structural Biology. The candidate must defend the dissertation proposal in an oral examination. The dissertation reading committee normally evolves from the dissertation proposal review committee.
6. The student must present a Ph.D. dissertation as the result of independent investigation and expressing a contribution to knowledge in the field of structural biology.

7. The student must pass the University oral examination, taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the research is presented by the candidate.

Applicants to the program should have a bachelor’s degree and should have completed at least a year of course work in biology, mathematics, organic chemistry, physical chemistry, and physics. Application forms must be received by the Department of Structural Biology no later than September 15 for fall admission and February 15 for spring admission.

Current topics of research in the department lie in the areas of gene expression; theoretical, crystallographic, and genetic analysis of protein structure; and cell-cell interaction. See http://med.stanford.edu/structuralbio/ for further information.

**COURSES**

Course and lab instruction in the Department of Structural Biology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

SBIO 199. Undergraduate Research
1-3 units, Aut, Win, Spr, Sum (Staff)

SBIO 201. Advanced Immunology I
(Enroll in MI 211, IMMUNOL 201.)
3 units, Win (Chien, Staff)

SBIO 228. Computational Structural Biology
(Same as BIOPHYS 228.) Online class. Interatomic forces and interactions such as electrostatics and hydrophobicity, and protein structure in terms of amino acid properties, local chain conformation, secondary structure, domains, and families of folds. How protein motion can be simulated. Bioinformatics introduced in terms of methods that compare proteins via their amino acid sequences and their three-dimensional structures. Structure prediction via simple comparative modeling. How to detect and model remote homologues. Predicting the structure of a protein from knowledge of its amino acid sequence.
3 units, Aut, Spr (Levitt)

SBIO 229. The Eukaryote Chromosome
The principles of chromosome structure and function including the structure, dynamics, and topological forms of DNA; units and hierarchies of DNA coiling in chromosomes; centromeres, telomeres, and basis of chromosome maintenance and sorting in mitosis; mechanism of gene activation with particular regard to enhancer, promoter, and terminator sequences; basis of sequence-specific protein-DNA interaction; and organization and assembly of the cell nucleus. Prerequisite: knowledge of basic biochemistry and cell biology.
3 units, Spr (Kornberg)

SBIO 241. Biological Macromolecules
The physical and chemical basis of macromolecular function. The forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies. Prerequisite: BIOC 200 or equivalent.
3-5 units, Aut (Puglisi, Weis, Block, Herschlag, Ferrell, McKay, Pande, Garcia)

SBIO 242. Methods in Molecular Biophysics
The potential utility of physical approaches to research, and how to evaluate literature that incorporates these methods. Experimental methods in molecular biology from theoretical and practical standpoints. Emphasis is on x-ray diffraction and nuclear magnetic resonance spectroscopy. Additional topics include fluorescence spectroscopy, circular dichroism, calorimetry, and separation methods.
3 units (Weis, Puglisi) not given 2005-06

**SBIO 274. Topics in Nucleic Acid Structure and Function** — Principles of nucleic acid structure and function. Methods for investigating nucleic acid structure. Limited to graduate students and postdoctoral fellows in structural biology. Prerequisite: consent of instructor.
2 units, Aut (Staff).

**SBIO 299. Directed Reading** — Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

**SBIO 399. Individual Research** — Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

**Surgery**

The following courses are open to undergraduates. For graduate and Medical School course offerings, see http://med.stanford.edu/.

Courses given in Surgery have the subject code SURG. For a complete list of subject codes, see Appendix.

**COURSES**

**SURG 67Q. Medical Experience in Foreign Lands** — Stanford Introductory Seminar. Preference to sophomores.
3 units, Win (Chase, Wang)

**SURG 68Q. Current Concepts in Transplantation** — Stanford Introductory Seminar. Preference to sophomores. Can tissues and organs be grown in a laboratory for transplantation to humans? Biological aspects of cell and organ transplantation, including issues that arise in the media. Diseases for which transplantation is a treatment, the state of the art in human transplantation, transplantation of animal tissue into humans (xenotransplantation), development of new tissue and organs in the laboratory (tissue engineering and cloning), and development of drugs and biological strategies to promote long-term survival of the tissue or organ (tolerance). Team-taught; sources include popular and scientific literature and presentations. WRITE-2
3 units, Spr (Krams, Martinez)

**SURG 69Q. It’s All in the Head: Understanding Diversity, Development, and Deformities of the Face** — (S,Sem)
3-4 units, Win (Helms)

**SURG 101. Regional Study of Human Structure** — Lectures in regional anatomy, dissection of the human body. The anatomy of the area through the dissection process. Enrollment limited to 32.
5 units, Win (Dolph, Gosling)

**SURG 199. Undergraduate Research**
1-18 units, Aut, Win, Spr, Sum (Staff)

**SURG 223. Basic Emergency Care/Travel and Wilderness Medicine** — Wilderness-related illnesses and injuries; framework for dealing with emergencies in the backcountry. Hands-on workshops. Topics include high altitude medicine, diving medicine, hypothermia, snake and spider envenomations, search and rescue, and travel medicine. Open to all students.
4 units, Spr (Weiss, Staff)

**SURG 267. International Health** — Fundamental issues in public health with an international perspective. Topics include: Colonialism and Development, Reproductive Health, Women’s Health Issues, Environmental Health, Maternal Child Health, Primary Health Care and its Evolution, Health Policy, Infectious Disease, Human Rights and Social Justice. Speakers from UCSF and Berkeley School of public health.
1 unit, Spr (Staff)
STANFORD INTRODUCTORY SEMINARS

Participating Faculty: Over 200 faculty from more than 60 departments take part in Introductory Seminars programs. See faculty listings in each department’s section of this bulletin for pertinent information.

SIS Offices: 4th Floor, Sweet Hall, 590 Escondido Mall
Mail Code: 94305-3091
Phone: (650) 723-4338
Email: fsp@vpue.stanford.edu
Web Site: http://introsems.stanford.edu/

Stanford Introductory Seminars provide opportunities for first- and second-year students to work closely with faculty in an intimate and focused setting. These courses aim to intensify the intellectual experience of the freshman and sophomore years by allowing students to work with faculty members in a small-group setting; introducing students to the variety and richness of academic topics, methods, and issues which lie at the core of particular disciplines; and fostering a spirit of mentorship between faculty and students. See “Freshman and Sophomore Programs” in the Undergraduate Education section of this bulletin for more information.

COURSES

SOPHOMORE COLLEGE

Sophomore College offers sophomores the opportunity to study intensively in small groups with Stanford faculty for several weeks before the beginning of Autumn Quarter. It is a chance for students to immerse themselves in a subject and collaborate with peers, upper-class sophomore college assistants, and faculty in constructing a community of scholars. Students are also encouraged to explore the full range of Stanford’s academic resources in workshops and individually. At its best, Sophomore College is characterized by an atmosphere of intense academic exploration. Each Sophomore College course enrolls 12 to 14 students, who live together in a Stanford residence and receive 2 units of academic credit for the work done in the course. Eligible students have been enrolled for no more than three academic quarters, have completed at least 36 units of academic work by the end of the Spring Quarter preceding the college, are sophomores in the Autumn Quarter during which the college is offered, and are in good academic standing. Students must also have an on-campus housing assignment for the ensuing academic year. Transfer students are not eligible. Admitted students who are found to have academic standing problems after the completion of Spring Quarter may have their admission revoked. Tuition, room, the remainder of board costs, books, and class-required travel are covered by Sophomore College. Each student pays a $500 fee toward the cost of board; this fee is included in the Autumn Quarter University bill. Students are also responsible for travel to campus, phone, network activation, and other personal expenses. Courses are announced in March; applications are due in April. For more information or to apply, see http://soco.stanford.edu/. September 2005 courses are listed here.

ANTHROPOLOGICAL SCIENCES

ANTHSCI 10SC. Darwin, Evolution, and Galápagos — Lessons from the study of flora and fauna in Galápagos from Darwin’s time to today. Adaptation, sexual selection, speciation, and adaptive radiation. The challenges the Galápagos Islands pose for conservation.
2 units, Aut (Durham)

BIOLOGICAL SCIENCES

BIOSCI 10SC. Natural History, Marine Biology, and Research — The biology of Monterey Bay and the coastal mountains and redwood forests of Big Sur. Literary, artistic, and political history. Topics: conservation, sanctuary, and stewardship of the oceans and coastal lands. Meetings with conservationists, authors, environmentalists, politicians, land-use planners, lawyers, scientists, and educators.
2 units, Aut (Thompson)

CIVIL AND ENVIRONMENTAL ENGINEERING

CEE 10SC. Green Buildings — What makes a building green and why the study of such buildings is an important, emerging field. Greenness has to do with efficient use of energy, water, and construction materials to provide healthful and enjoyable spaces in which to live and work. Focus is on energy efficiency and architectural features that enable a building to provide a significant fraction of its own heating, cooling, and electrical needs.
2 units, Aut (Masters)

COMPUTER SCIENCE

CS 10SC. The Intellectual Excitement of Computer Science — Intellectual tradition of computer science. Topics include analysis of algorithms, computability, cryptography, hardware design, and artificial intelligence.
2 units, Aut (Roberts)

DRAMA

DRAMA 10SC. Social Protest Drama and the Politics of Hip Hop Performance — Theater as a social weapon. Focus is on the 60s and 70s. How performances were shaped by their time and whether they transcend their historic context. Chicano and Black social protest theater. Past versus contemporary uses of social protest performance. Potential of Hip Hop performance as mechanism of social protest. Assignments include creating a social protest manifesto and a performance piece.
2 units, Aut (H. Elam)

ECONOMICS

ECON 11SC. The Reform of Social Security — The largest U.S. federal government program in the context of individual and national saving, its current structure, and reform alternatives. Demographics, finance, investments, taxes, labor supply, and the life-cycle model of consumption and saving. The rate of return on private equities, the performance of mutual funds, and the impact of fertility, mortality, productivity growth, and immigration.
2 units, Aut (Shoven)

ENGLISH

ENGLISH 13SC. Learning Theater: From Audience to Critic at the Oregon Shakespeare Festival — Ten days and six plays at the Oregon Shakespeare Festival in Ashland. Details of the plays, interpretation, production, and acting, and their value as entertainment and challenge.
2 units, Aut (Friedlander, Paulson)

ENGLISH 15SC. Mixed Race in the New Millennium — Current controversies over mixed race identification. Political and aesthetic implications. Literary and pop cultural images in literature, performance, the Internet, and visual media. Legal leverage and national recognition gained in the last decade. Organizations, web sites, and affinity and advocacy groups, and their rhetoric and graphics.
2 units, Aut (M. Elam)

ETHICS IN SOCIETY

ETHICSCS 10SC. The Meaning of Life: Moral and Spiritual Inquiry through Literature — Short novels and plays as the basis for reflection on ethical values and life’s purpose. Why are people here? What is the balance between work and personal life? What can death teach about life? What is the meaning of success, and the nature of love? How free are people to seek their destinies? What obligations does one have to others?
2 units, Aut (McLennan)
GEOLGICAL AND ENVIRONMENTAL SCIENCES
GES 12SC. Environmental and Geological Field Studies in the Rocky Mountains — Geologic origin from three billion years ago to the recent, paleoclimatology and glacial history, long- and short-term carbon cycle and global climate change, and environmental issues related to changing land-use patterns and increased demand for natural resources. Small groups analyze data to prepare reports and maps.
  2 units, Aut (Chamberlain)

GERMAN LITERATURE
GERLIT 12SC. Ghost Stories: Why the Dead Return and What They Want from Us — Anxiety about mortality and wisdom about the cultural place of the past in the enduring genre of the ghost story from classical literature to popular film. Memory and regret, mourning and forgetting. Classic authors such as Hoffmann, Poe, James, Joyce, and Ibsen, and more recent authors such as Paul Auster, Marie Darrieusse, Catherine Lim, and Toni Morrison.
  2 units, Aut (Berman)

HISTORY
HISTORY 14SC. Homelessness in America — The historical, social science, social commentary, and policy literature on poverty and homelessness. How students can make societal contributions through public service component at a local shelter for homeless families.
  2 units, Aut (Camarillo)

HISTORY 15SC. Early Russian Culture: Belief and Lived Experience — Russia, from 1400 to 1700, as a non-secular society. Sources include icons, frescoes, saints’ lives, handbooks of social ethics, political theory, court cases, and folklore. The difficulty of studying lived experience. Medieval worldviews, the place of religion in premodern life, and the tensions between official culture and actual practice.
  2 units, Aut (Kollmann)

HISTORY 16SC. Spinning the Western Past: Washington, D.C., and the Manufacturing of American Memory — The capital’s status as a repository of American memory and factory for an official version of the American past; its peculiar relation to the American West. The creation, meanings, contestations, and implications of this official mobilization of history. Projects using the new Museum of the American Indian, the Smithsonian, paintings and sculptures at the Capitol and other public buildings, and interviews.
  2 units, Aut (White)

MECHANICAL ENGINEERING
ME 11SC. The Art and Science of Measuring Fluid Flows — The roles of fluid flows in natural systems such as swimming protozoa and planet-forming nebulae, and technologies such as biomolecular assay devices and jet engines. The analytical background for fluid sciences. Phenomena such as shock waves and vortex formation that create flow patterns while challenging engineers. Visualization and measurement techniques to obtain full-field flow pattern information. The physics behind these technologies. Field trips; lab work.
  2 units, Aut (Eaton)

MUSIC
MUSIC 10SC. Sound, Digital Sound, and Massive Sound Media — Principles of sound production, hearing, and digital audio. Given the use of audio streaming and compression, and reliance on loudspeakers for the consumption of sound, are all aspects of sound being preserved? Team assignments in sound analysis, music recording, and instrument, and an individual topic for a web-based report.
  2 units, Aut (Chafe)

POLITICAL SCIENCE
POLISCI 10SC. American Foreign Policy in the 21st Century — The substance of U.S. foreign policy, and the political considerations that influence the making and conduct of American diplomacy. Topics include the prospects for conflict and cooperation among the great powers, regional security, peacekeeping and peacemaking, international terrorism, the proliferation of weapons of mass destruction, the global economy, and the domestic politics of U.S. foreign policy.
  2 units, Aut (Blacker)

POLISCI 12SC. Race, Ethnicity, and the Future of California — California is now the most racially and ethnically diverse state in the nation. The challenges facing Californians in light of population trends. How has public policy responded? Focus is on population growth, education, immigration, political participation, and economic growth. Preparation of a policy proposal to the California governor.
  2 units, Aut (Fraga)

POLISCI 15SC. Constitutionalism — How does a constitution differ from other law? How are written constitutions different from unwritten constitutions? What are the functions performed by constitutions in different countries? What is the role of judicial review? Materials organized historically and comparatively, and include the English and S. African constitutions, and the ongoing EU constitutional convention.
  2 units, Aut (Casper)

POLISCI 16SC. How European Empires Shaped the Modern World — How the postcolonial world is influenced by European occupation. Why were Europeans so extroverted? How did Europe govern overseas territories for so long? The movement to political independence. Moral evaluation of the colonial project. Primary documents, historical overviews, and works analyzing imperialism, colonialism, and nationalism.
  2 units, Aut (Abernethy)

RELIGIOUS STUDIES
RELIGST 12SC. Just Who Are We? Science Fiction and the Futuristic Self — In alternate worlds, souls migrate, minds enter machines, and machines become human: the ethical implications of such possibilities. Changing perceptions of the self and what they mean for allocating the rights of personhood. Sources include Isaac Asimov, Frank Herbert, Orson Scott Card, Sheri Tepper, Greg Bear, and C. J. Cherryh. Literature, film, and philosophy.
  2 units, Aut (Gelber)
FRESHMAN SEMINARS AND SOPHOMORE SEMINARS AND DIALOGUES

Freshman and Sophomore Seminars and Dialogues are offered in many disciplines throughout the academic year. Freshman preference seminars are given for 3-4 units to a maximum of 16 students, and generally meet twice weekly. Although preference for enrollment is given to freshmen, sophomores and first-year transfer students may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars and dialogues, similarly, give preference to sophomores and first-year transfer students, but freshmen may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars are given for 3-5 units to a maximum of 14 students, while sophomore preference dialogues take the form of a directed reading, and are given for 1-2 units to a maximum of 5 students.

All seminars require a brief application. See the Time Schedule, the Stanford Introductory Seminars course catalogue published each September, or http://introsems.stanford.edu/. Due dates for 2005-06 applications for both freshman and sophomore preference courses are: Autumn Quarter, 5 p.m., September 23; Winter Quarter, noon, December 9; Spring Quarter, noon, March 17.

For course descriptions, see course listings in the teaching department section of this bulletin. F = preference to freshmen; S = preference to sophomores; Dial = dialogue; Sem = Seminar.

AERONAUTICS AND ASTRONAUTICS

AA 113N. Structures: Why Things Don’t (and Sometimes Do) Fall Down — (F,Sem) GER:DB-EngrAppSci
3 units, Win (Springer)

AA 115N. The Global Positioning System: Where on Earth are We, and What Time is It? — (F,Sem) GER:DB-EngrAppSci
3 units, Aut (Enge)

3 units, Aut (Kenny, Springer)

AMERICAN STUDIES

AMSTUD 68N. Mark Twain and American Culture — (F,Sem) GER:DB-Hum
4 units, Aut (Fishkin)

AMSTUD 114Q. Visions of the 1960s — (S,Sem) GER:DB-Hum, EC-AmerCul
5 units, Aut (Gillam)

ANESTHESIA

ANES 113Q. Disease-Oriented Approach to Human Physiology — (S,Sem)
3 units, Spr (Rosenthal)

ANTHROPOLOGICAL SCIENCES

ANTHSCI 50Q. Language and the Brain — (S,Sem)
5 units, Spr (Fox)

APPLIED PHYSICS

APPPHYS 79Q. Energy Choices for the 21st Century — (S,Sem)
3 units, Aut (Fox, Geballe)

ART AND ART HISTORY

ARTHIST 61Q. Comics: A Lively Art — (S,Sem)
4 units, Aut (Bukatman)

FILMSTUD 10Q. Comics: A Lively Art — (S,Sem)
5 units, Win (Bukatman)

BIOCHEMISTRY

BIOC 118Q. Genomics, Bioinformatics, and Medicine — (S,Sem) GER:DB-EngrAppSci
3 units, Spr (Braultag)

BIOENGINEERING

BIOE 70Q. Medical Device Innovation — (S,Sem)
3 units, Spr (Doshi, Mandato)

BIOLOGICAL SCIENCES

BIOSCI 6N. Climate Change: Drivers, Impacts, and Solutions — (F,Sem) GER:DB-NatSci
3 units, Win (Field)

BIOSCI 10N. Light and Life — (F,Sem)
3 units, Aut (Elrad)

BIOSCI 13N. Environmental Problems and Policy — (F,Sem) GER:DB-NatSci
3 units, Spr (Ehrlich)

BIOSCI 16N. Island Ecology — (S,Sem) GER:DB-NatSci
3 units, Spr (Vitousek)

BIOSCI 17N. Light, Pigments, and Organisms — (F,Sem) GER:DB-NatSci
3 units, Win (Elrad, Zare)

BIOSCI 19N. Diversity, Gender, and Sexuality — (F,Sem) GER:DB-NatSci, EC-Gender
3 units, Win (Roughgarden)

BIOSCI 22N. Infection, Immunity, and Global Health — (S,Sem) GER:DB-NatSci
3 units, Spr (Jones)

BIOSCI 26N. Maintenance of the Genome — (F,Sem) GER:DB-NatSci
3 units, Spr (Hanawalt)

BIOSCI 28N. Molecular Basis of Cancer — (S,Sem) GER:DB-NatSci
3 units, Win (Fang)

BIOSCI 31Q. Ants: Behavior, Ecology, and Evolution — (S,Sem)
3 units, Spr (Gordon)

BIOSCI 35N. Nobel Prize Winning Research in Biology and Medicine — (F,Sem)
3 units, Spr (Shen)

BIOSCI 106Q. The Heart of the Matter — (S,Sem) GER:DB-NatSci
3 units, Win (Myers, Simon)

CHEMICAL ENGINEERING

CHEMENG 60Q. Environmental Regulation and Policy — (S,Sem) GER:DB-EngrAppSci
3 units, Aut (Robertson, Libicki)

CHEMENG 70Q. Masters of Disaster — (S,Sem) GER:DB-EngrAppSci
3 units, Aut (Robertson, Moalli)

CHEMISTRY

CHEM 17N. Light, Pigments, and Organisms — (F,Sem) GER:DB-NatSci
3 units, Win (Elrad, Zare)

CHEM 22N. Naturally Dangerous — (F,Sem)
2 units, Spr (Collman)

CHEM 23N. Chemistry and Biology in Biotechnology — (F,Sem) GER:DB-NatSci
3 units, Aut (Khosla)

CHEM 24N. Nutrition and History — (F,Sem)
2 units, Spr (Huestis)

CHEM 27N. Lasers: The Light Fantastic — (F,Sem) GER:DB-NatSci
3 units, Win (Moerner)

CIVIL AND ENVIRONMENTAL ENGINEERING

4 units, Aut (Walters)
CEE 46Q. Fail Your Way to Success—(S,Sem) GER:DB-EngAppSci
3 units, Spr (Clough)

CEE 51Q. Pangea, Germs, and Arsenic—(S,Sem) GER:DB-NatSci
3 units, Win (Brown, Spormann, Ernst)

CEE 80N. The Art of Structural Engineering—(F,Sem) GER:DB-EngAppSci
4 units, Win (Billington)

CLASSICS ART/ARCHAEOLOGY
CLASSART 21Q. Eight Great Archaeological Sites in Europe—(S,Sem) GER:DB-Hum
3-5 units, Aut (Shanks)

CLASSICS GENERAL
CLASSGEN 3N. Introduction to the Writing Systems of Ancient Egypt—(F,Sem)
3-4 units, Spr (Manning)

CLASSGEN 22N. Technologies of Civilization: Writing, Number, Money—(F,Sem) GER:DB-Hum
3-4 units, Spr (Netz)

CLASSGEN 27N. The Invention of Travel, Ancient and Modern—(F,Sem) GER:DB-Hum
4-5 units, Win (Ceserani)

CLASSGEN 33N. Women Poets in Antiquity—(F,Sem)
3-5 units, Win (Peponi)

CLASSGEN 50N. Journeys of the Mind—(F,Sem) GER:DB-Hum
3-4 units, Win (Braund)

COMMUNICATION
COMM 118Q. Theories of Film Practice—(S,Sem) WRITE-2
4 units, Win (Breitrose)

COMM 123N. Documentary Film: Voice and Vision—(F,Sem)
4 units, Aut (Krawitz)

COMM 123Q. Autobiographical Storytelling in Documentary Film—(S,Dial)
2 units, Win (Krawitz)

COMPARATIVE LITERATURE
COMPLIT 10N. Shakespeare and Performance—(F,Sem) GER:DB-Hum, EC-Gender
3 units, Spr (Parker)

COMPLIT 20N. Travel: Real and Imagined Worlds—(F,Sem) GER:DB-Hum
3-4 units, Win (Boyí)

COMPLIT 11Q. Shakespeare, Playing, Gender—(S,Sem) GER:DB-Hum, EC-Gender
3 units, Win (Parker)

COMPLIT 40N. Reading Across Literature—(F,Sem) GER:DB-Hum, EC-GlobalCom
5 units, Spr (Palumbo-Liu)

COMPLIT 41Q. Ethnicity and Literature—(S,Sem) GER:DB-Hum, EC-AmerCul
3-5 units, Win (Palumbo-Liu)

COMPLIT 50N. Journeys of the Mind—(F,Sem) GER:DB-Hum
3-4 units, Spr (Nightingale)

COMPARATIVE MEDICINE
COMPMED 81N. Comparative Anatomy and Physiology of Mammals—(F,Sem)
3 units, Win (Boley)

COMPMED 85N. Animal Models in Biomedical Research—(F,Sem)
3 units, Win (Green, Tobwani)

COMPUTER SCIENCE
CS 26N. Motion Planning for Robots, Digital Actors, and Other Moving Objects—(F,Sem) GER:DB-EngAppSci
3 units, Spr (Latombe)

CS 54N. Great Ideas in Computer Science—(F,Sem) GER:DB-EngAppSci
3 units, Win (Roberts)

3 units, Aut (Boneh)

CS 73N. Business on the Information Highways—(F,Sem)
3 units, Spr (Wiederhold, Barr, Tessler)

CS 74N. Digital Dilemmas—(F,Sem) GER:DB-EngAppSci
3 units, Aut (Dill)

CULTURAL AND SOCIAL ANTHROPOLOGY
CASA 9N. The Anthropology of Food—(F,Sem)
3-4 units, Spr (Gupta)

DRAMA
DRAMA 11N. The Dancing Couple as a Lens on American Culture, 1890-1950—(F,Sem)
4 units, Aut (Ross, Powers)

DRAMA 17N. From Inside the First World: Women of Color Playwrights Re-mapping the U.S.—(F,Sem) GER:DB-Hum, EC-AmerCul
3 units, Aut (Moraga)

DRAMA 180Q. Noam Chomsky: The Drama of Resistance—(S,Sem) GER:DB-Hum
3 units, Win (Rehm)

DRAMA 188Q. From Brecht to Müller: German Theater and Performance since World War II—(S,Sem)
3-5 units, Aut (Weber)

DRAMA 189Q. Mapping and Wrapping the Body—(S,Sem) GER:DB-Hum
3 units, Aut (Eddelman)

ECONOMICS
ECON 11N. Understanding the Welfare System—(S,Sem)
2 units, Aut (MaCurdy)

ECON 93Q. Global Capital Markets—(S,Sem)
3 units, Win (Marotta)

EDUCATION
EDUC 92Q. Leadership, Ethics, and the Law—(S,Sem)
3-5 units, Aut (Davis)

EDUC 95Q. Exploring School Reforms—(S,Dial)
2 units, Win (Tyack)

ELECTRICAL ENGINEERING
EE 14N. Things about Stuff—(F,Sem) GER:DB-EngAppSci
3 units, Aut (Lee)

EE 15N. The Life of an Engineering Project—(F,Sem) GER:DB-EngAppSci
3 units, Win (Goldsmith, Le)
EE 16N. From Science Fiction to Science and Engineering — (F,Sem) 
GER:DB-EngrAppSci 
3 units, Aut (Vuckovic)

EE 17N. Engineering the Micro and Nano Worlds: From Chips to Genes — (F,Sem) GER:DB-EngrAppSci 
3 units, Spr (Maluf, Pease)

ENGLISH

ENGLISH 54N. Orwell: Literature and Political Engagement — (F,Sem) GER:DB-Hum 
3 units, Spr (Woloch)

ENGLISH 56N. Mixed Race in the New Millennium — (F,Sem) GER:DB-Hum 
3 units, Aut (H. Elam)

ENGLISH 65N. Contemporary Women Fiction Writers — (F,Sem) GER:DB-Hum 
3 units, Spr (Tallent)

ENGLISH 68N. Mark Twain and American Culture — (F,Sem) GER:DB-Hum 
4 units, Aut (Fishkin)

ENGLISH 70N. Shakespeare on Film — (F,Sem) GER:DB-Hum 
3 units, Win (Riggs)

ENGLISH 73N. Conflict and Resolution in the Novel — (F,Sem) GER:DB-Hum 
3 units, Win (Shloss)

ENGLISH 82Q. Shakespeare’s Plays — (S,Sem) GER:DB-Hum 
5 units, Win (Rebholtz)

ENGLISH 83Q. Playwriting: A Workshop in Craft — (S,Sem) GER:DB-Hum 
4 units, Aut (DiPirro)

ENGLISH 86N. Wicked Witches of the West and their Children: Dangerous Women in Greek and Shakespearean Tragedy — (F,Sem) GER:DB-Hum, EC-Gender 
3 units, Aut (Friedlander)

ENGLISH 87Q. The Graphic Novel: Literature Lite? — (S,Sem) GER:DB-Hum 
5 units, Win (Lunsford)

FRENCH GENERAL

FRENGEN 20N. Travel: Real and Imagined Worlds — (S,Sem) GER:DB-Hum 
3-4 units, Win (Boyi)

FRENGEN 47Q. Albert Camus: Novelist and Philosopher — (F,Sem) GER:DB-Hum 
4 units, Spr (Apostolidès)

FRENGEN 190Q. Parisian Cultures of the 19th and Early 20th Centuries — (S,Sem) GER:DB-Hum 
4 units, Spr (Bertrand)

GENETICS

GENE 104Q. Law and the Biosciences — (S,Sem) WRITE-2 
3 units, Spr (Greely)

GENE 106Q. The Heart of the Matter — (S,Sem) GER:DB-NatSci 
3 units, Win (Myers, Simoni)

GENE 109Q. Genomics: A Technical and Cultural Revolution — (S,Sem) 
3 units, Win (Altman)

GEOLOGICAL AND ENVIRONMENTAL SCIENCES

GES 43N. Environmental Problems — (F,Sem) GER:DB-NatSci 
3 units, Win (Loague)

GES 45N. The Ocean Around Us — (F,Sem) 
3 units, Aut (Paytan)

GES 48N. Volcanoes of the Eastern Sierra Nevada — (F,Sem) 
2 units, Spr (Mahood)

GES 50Q. The Coastal Zone Environment — (S,Sem) GER:DB-NatSci 
3 units, Win (Ingle)

GES 51Q. Pangea, Germs, and Arsenic — (S,Sem) GER:DB-NatSci 
3 units, Win (Brown, Spormann, Ernst)

GES 52Q. Geologic Development of California — (S,Sem) GER:DB-NatSci 
5 units, Spr (Ernst)

GES 53Q. In the Beginning: Theories of the Origin of the Earth, Solar System, and Universe — (S,Sem) GER:DB-NatSci 
3 units, Win (McWilliams)

GES 54Q. California Landforms and Plate Tectonics — (S,Sem) GER:DB-NatSci 
3 units, Aut (Miller)

3 units, Spr (Bird)

GES 56Q. Changes in the Coastal Ocean: The View From Monterey and San Francisco Bays — (S,Sem) GER:DB-NatSci 
3 units, Spr (Dunbar)

GES 57Q. How to Critically Read and Discuss Scientific Literature — (S,Sem) 
3 units, Win (Paytan)

GEOPHYSICS

GEOPHYS 30Q. The 1906 San Francisco Earthquake — (S,Dial) 
2 units, Win (Beroza)

3 units, Aut (Zebker)

GERMAN GENERAL

GERGEN 104Q. Resistance Writings in Nazi Germany — (S,Sem) GER:DB-Hum 
3 units, Aut (Bernhardt)

GERGEN 121N. Memory and the Modernist Novel — (F,Sem) GER:DB-Hum 
4 units, Spr (Douvaldzi)

GERGEN 122N. Virtue and Terror: Kant, Rousseau, and the French Revolution — (F,Sem) 
4-5 units, Win (Strum)

GERMAN LITERATURE

GERLIT 123N. The Brothers Grimm and Their Fairy Tales — (F,Sem) GER:DB-Hum, WIM 
4 units, Spr (Robinson)

GERLIT 133Q. Modernism and Fiction — (S,Sem) GER:DB-Hum 
4 units, Aut (Berman)

HEALTH RESEARCH AND POLICY

HRP 89Q. Introduction to Crosscultural Issues in Medicine — (S,Sem) 
3 units, Win (Corso)

HISTORY

HISTORY 20N. Early Modern European Views of Eastern Europe and Russia — (F,Sem) GER:DB-Hum, EC-GlobalCom, WRITE-2 
5 units, Spr (Kollmann)

The primary mission of the Stanford Institute for Economic Policy Research (SIEPR) is to encourage and support research on economic policy issues in areas such as economic growth, technology policies, environmental and telecommunication regulation, tax reform, international trade, and monetary policy. SIEPR pursues four interrelated goals in support of this mission: (1) facilitating graduate student and faculty research on economic policy issues; (2) building a community of scholars conducting policy research; (3) disseminating research findings broadly; and (4) linking academics at Stanford with decision makers in business and government.

SIEPR is a University-wide research institute, involving economists from the schools of Business, Engineering, Law, Humanities and Sciences, as well as the Hoover Institution and the Institute for International Studies. Affiliated faculty and students maintain appointments in their home departments while working on SIEPR projects. In addition, scholars visiting from other institutions may apply for affiliation with SIEPR.

Much of the research at SIEPR takes place in its three research centers and six programs. The Stanford Center for International Development (SCID; Roger G. Noll, Director) fosters research on the economic problems of developing economies and economics in transition, as well as analyzing the political aspects of economic policy reform and historical episodes of reform. For more information about this center call (650) 725-8730. The Center on Employment and Economic Growth (CEEG; Tim Bresnahan, Director) is focusing on the relationship between long-term economic growth, the economic success of individuals and families in their jobs and careers, and the role played by higher education and how it can supply workers and technology in the work force. The program on regulation is part of this center. The Center for Public and Private Finance (CPPF; John B. Shoven and Michael J. Boskin, co-Directors) encompasses work on macroeconomics and monetary policy, tax and budget policy, and finance.

Separate research programs within SIEPR and their directors are the California Policy Program (Thomas MaCurdy); the Energy, Natural Resources, and the Environment Program (James L. Sweeney); the Knowledge Networks and Institutions for Innovation Program (Paul A. David); the Program on the Japanese Economy (Masahiko Aoki); and the Program on Market Design (Susan Athey and Paul Milgrom).

The Stanford Institute for the Environment helps societies around the world learn how to meet the demands of their populations for energy, food, water, and other vital needs while protecting the ability of the planet to meet the needs of people today and in the future. SIE brings together faculty, staff, and students from the seven schools and other institutes and centers at Stanford to conduct interdisciplinary research, education, and outreach to promote an environmentally sound and sustainable world. Through its work at the intersection of science, technology, and policy, and health, business, and the humanities, SIE fosters creative, working solutions to environmental challenges; works with public and private leaders to ensure the implementation of these solutions; trains and educates the next generation of environmental leaders and problem solvers; and engages the broader community to increase public understanding of environmental problems and solutions. The Institute currently concentrates its work in four focus areas: energy and global climate systems; freshwater; land use and conservation; and oceans and estuaries.

**ACADEMIC PROGRAMS AND CENTERS, AND INDEPENDENT RESEARCH LABORATORIES, CENTERS, AND INSTITUTES**

*Vice Provost and Dean of Research and Graduate Policy and Dean of the Independent Laboratories, Centers, and Institutes: Arthur Bienenstock*

*Associate Dean of Research: Ann M. Arvin*

*Associate Dean of Graduate Policy: Gail Mahood*

Independent Research Laboratories, Centers, and Institutes perform multidisciplinary research that extends beyond the scope of any one of the University’s organized schools.

The following laboratories, centers, and institutes report to the Vice Provost and Dean of Research and Graduate Policy:

- Stanford Institute for Economic Policy Research
- Geballe Laboratory for Advanced Materials
- Edward L. Ginzton Laboratory
- Global Climate and Energy Program
- W. W. Hansen Experimental Physics Laboratory
- Stanford Humanities Center
- Stanford Institute for the Environment
- Stanford Center for Innovations in Learning
- Stanford Institute for International Studies
- Kavli Institute for Particle Astrophysics and Cosmology
- Center for the Study of Language and Information
- Stanford Program for Bioengineering, Biomedicine, and Biosciences (BioX)
- Stanford Institute for the Quantitative Study of Society
- The Hoover Institution on War, Revolution and Peace and the Stanford Linear Accelerator Center (SLAC) report to the President and Provost. SLAC is independently operated under a contract with the Department of Energy.

Following is a description of the activities of these organizations and other academic programs and centers, including research activities, and where applicable, courses offered.

**STANFORD INSTITUTE FOR ECONOMIC POLICY RESEARCH**

*Director: John B. Shoven*

*Deputy Director: Gregory Rosston*

*Institute Office: 579 Serra Mall*

GEBALLE LABORATORY FOR ADVANCED MATERIALS

Director: Malcolm R. Beasley
Web Site: http://www-lam.stanford.edu

The Geballe Laboratory for Advanced Materials (GLAM) is an Independent Laboratory that reports to the Dean of Research. The Laboratory supports the research activities of a number of faculty members from the departments of Applied Physics, Chemical Engineering, Chemistry, Electrical Engineering, Materials Science and Engineering, Mechanical Engineering, and Physics. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for a broad spectrum of scientific research areas including high temperature superconducting materials and devices, mesoscopic devices, magnetic recording and storage media materials, electronic materials, opto-electronic materials, nanoscale materials and phenomena, nanoprobe devices, highly correlated electronic systems, computational materials science, condensed matter theory and physics, polymeric and biological materials, crystal growth, and thin film synthesis of complex oxides.

GLAM also provides advanced materials characterization and synthesis facilities for its members as well as for the Stanford materials research community at large. They include a focused ion beam (FIB), scanning electron microscopy (SEM), scanning probe microscopy (SPM), transmission electron microscopy (TEM), x-ray diffraction analysis (XRD), and x-ray photoelectron spectroscopy (XPS) for characterization and thin film deposition capabilities for synthesis of materials. These facilities are managed by professional staffs who also conduct research and development of new tools and techniques in areas related to advanced materials synthesis and characterization.

The Geballe Laboratory for Advanced Materials is housed in the Moore Materials Research Building and McCullough Building complex.

EDWARD L. GINZTON LABORATORY

Director: David A. B. Miller
Web Site: http://www.stanford.edu/group/ginzton/

The Ginzton Laboratory houses the research activities of a number of faculty members from the departments of Applied Physics, Electrical Engineering, and Mechanical Engineering. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for scientific research in the fields of photonic science and engineering, quantum science and engineering, and nanoscience and engineering, including fiber optics, laser physics and applications, mesoscopic devices, microelectromechanical and microacoustic devices and systems, optoelectronic devices and systems, photonics, nanophotonics and photonic crystals, scanning optical microscopy, quantum cryptography and computing, tunneling and force microscopy, and ultrafast and nonlinear optics.

W. W. HANSEN EXPERIMENTAL PHYSICS LABORATORY (HEPL)

Director: Robert L. Byer
Web Site: http://hepl.stanford.edu/

HEPL is an independent laboratory celebrating over 50 years of fundamental science and engineering research. HEPL faculty and students are engaged in research in accelerator physics, astrophysics, dark matter in the universe, free electron lasers, fundamental tests of relativity in space, gamma ray observations, gravitational wave detection, quantum condensed matter, and space based solar physics studies. Many of the programs involve satellite-based studies in fundamental physics and engineering.

HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

Director: John Raisian
Web Site: http://www-hoover.stanford.edu/

The Hoover Institution, founded in 1919 by Stanford alumnus Herbert Hoover, is a public policy research center devoted to the advanced study of politics, economics, and political economy, both domestic and foreign, as well as international affairs. Hoover fellows are the foundation of the research program. This varied and distinguished community of scholars strives to conceive and disseminate ideas defining a free society within the framework of three programs:

- American Institutions and Economic Performance focusing on interrelationships of U.S. political and legal institutions and economic activity, often referred to as political economy.
- Democracy and Free Markets focusing on political economy in countries around the world.
- International Rivalries and Global Cooperation focusing on interrelationships among countries, examining issues of foreign policy, security, and trade.

By collecting knowledge, generating ideas, and disseminating both, the Institution seeks to secure and safeguard peace, improve the human condition, and limit government intrusion into the lives of individuals, all of which are consistent with three prominent values: peace, personal freedom, and the safeguards of the American system.

STANFORD HUMANITIES CENTER

Director: John Bender
Associate Director: Elizabeth S. Wahl
External Faculty Fellows: Carlo Caballero (Music, University of Colorado), Johannes Fabian (Anthropology, University of Amsterdam), Sabine Frühstück (East Asian Languages and Cultural Studies, University of California, Santa Barbara), Steven Justice (English, University of California, Berkeley), Wendy Larson (East Asian Languages, University of Oregon), Jennifer Roberts (Art History, Harvard University), Robert Royalty (Philosophy and Religion, Wabash College), Steven Yao (English, Hamilton College)
Associate Fellow: Judith Lichtenberg (Philosophy, University of Maryland)

Humanities and International Studies Fellows: Marines Fornerino (Political Science, Universidad del Zulia, Venezuela), Alla Kassianova (International Relations, Tomsk State University, Russia)

Internal Faculty Fellows: Keith Michael Baker (History), David Holloway (History), Yoshiko Matsumoto (Asian Languages), Purnima Mankekar (Cultural and Social Anthropology), Robert Polhemus (English), Bryan Wolf (Art and Art History), Arnold Zwicky (Linguistics)

Geballe Dissertation Graduate Student Fellows: Ashwini Deo (Linguistics), Marcus Folch (Classics), Joanna Kleineitjew (English), Ya Chen Maya Ma (Art and Art History), Jehangir Malegam (History), Christen Smith (Cultural and Social Anthropology), Blake Stevens (Music), Roberta Strippoli (Asian Languages)

Web Site: http://shc.stanford.edu/
The Stanford Humanities Center promotes research and education in the humanities at Stanford and nationwide. In particular, it stresses work of an interdisciplinary nature, accomplished through the following programs: one-year residential fellowships for Stanford faculty, faculty members from other institutions, and Stanford graduate and undergraduate students; public presentations such as lectures, conferences, and publications; and a research workshop program sponsored by the Mellon Foundation that brings faculty and graduate students together regularly to advance ongoing research on topics of interdisciplinary interest.

Fellows are selected on the basis of an open competition. They pursue their own research and participate in a weekly seminar at the center throughout the year. Faculty fellows also contribute to the intellectual life of the Stanford community through activities such as giving departmental courses, participating in ongoing research workshops, or organizing conferences. Courses given by fellows in 2005-06 follow.

COURSES

ENGLISH
ENGLISH 300. The Pearl Poet
5 units, Win (Justice)

LINGUISTICS
LINGUIST 218. Seminar in Morphosyntax: A Cabinet of Curiosities
2-4 units, Aut (Zwicky)

STANFORD CENTER FOR INNOVATIONS IN LEARNING

Directors: Stig Hagstrom, Roy Pea
Executive Director: Sam Steinhardt
Center Offices: Wallenberg Hall (Building 160)
Web Site: http://scil.stanford.edu

The Stanford Center for Innovations in Learning (SCIL) conducts scholarly research to advance the science, technology, and practice of learning and teaching from early childhood through postsecondary education. The Center brings together teachers, scholars, and students from around the world to study how to improve formal and informal learning across cultural boundaries.

Established in 2002, SCIL is housed in the renovated Wallenberg Hall, a state-of-the-art testing ground for technology applications in the classroom. With the support of SCIL technical and advisory staff, more than 70 professors and instructors have taught courses in Wallenberg Hall.

SCIL provides an environment for conducting research and testing applications at the intersection of learning sciences, design, and technology. SCIL researchers focus on issues in learning and teaching, and on the ways in which innovative uses of technology can address those issues. Research projects typically involve collaboration among faculty, senior staff members, students from multiple disciplines, and scholars from other institutions and countries.

SCIL programs are multidisciplinary and collaborative in nature and include the recently launched LIFE Center (Learning in Informal and Formal Environments), a research endeavor funded by the National Science Foundation in 2004. Researchers in the LIFE Center are working toward the development of an integrated multidisciplinary science of learning. Engaging more than 40 faculty members and researchers from the learning sciences, psychology, education, communications, computer science, and developmental, cognitive, and social neuroscience, LIFE is a collaboration with the University of Washington and SRI International.

Media X, the industry-affiliates program that SCIL jointly sponsors with the Center for the Study of Language and Information (CSLI), brings together University faculty conducting interactive technology research with organizations committed to technical advancement and innovation.

In addition to its research work, SCIL provides year-round technical and advisory support to University instructors.

CENTER FOR THE INTERDISCIPLINARY STUDY OF SCIENCE AND TECHNOLOGY

Center Director: Michael Friedman, Robert McGinn
Executive Committee: Keith Baker, Paula Findlen, Michael Friedman, Robert McGinn, Eric Roberts
Phone: (650) 725-0119; 725-0714
Web Site: http://cisst.stanford.edu

The Center for the Interdisciplinary Study of Science and Technology (CISST) brings together faculty, undergraduate and graduate programs, and research initiatives concerned with understanding science and technology in an interdisciplinary context. It is concerned equally with the historical, philosophical, and cultural study of science, technology, and medicine, and with critical analysis of issues raised by scientific and technological innovations in contemporary society. CISST houses two major programs: HPST (History and Philosophy of Science and Technology) and STS (Science, Technology, and Society); see their respective sections in this bulletin for their programs. CISST also sponsors visiting scholars, postdoctoral researchers, workshops, and speakers, providing a bridge between the humanities and social sciences, and the sciences and engineering.

At the undergraduate level, CISST houses STS, an undergraduate major that grants both B.A. and B.S. degrees. The STS major is designed to foster understanding of issues raised by the natures, consequences, and social shaping of technology and science in the contemporary world. To this end, the STS curriculum combines interdisciplinary, humanistic, and social scientific studies of science and technology in society with attainment of either technical literacy or fundamental understanding in some area of engineering or science. CISST also offers an honors program in STS that is open not only to STS majors but also to students in other majors who wish to pursue a senior honors project that addresses a research question arising from the relations among science, technology and society. Prospective majors or honors students should consult the STS section in this bulletin.

CISST also publishes a selection of undergraduate research papers in STS in our electronic undergraduate journal, Techne (http://www.stanford.edu/group/STS/techne).

At the graduate level, CISST houses an interdisciplinary graduate program, the Program in History and Philosophy of Science and Technology (HPST), jointly administered by the History and Philosophy departments; it involves faculty and students in these and other departments in the humanities. Prospective students interested in applying to the graduate program should consult the “History and Philosophy of Science and Technology” section of this bulletin, and the admissions requirements of the department in which they wish to apply for a M.A. or a Ph.D.
STANFORD INSTITUTE FOR INTERNATIONAL STUDIES (SIIS)

Director: Coit Blacker
Web Site: http://siis.stanford.edu

The Stanford Institute for International Studies promotes individual and collaborative research on contemporary, policy-relevant issues that are international and interschool in character. Working in partnership with the seven schools at Stanford (Business, Earth Sciences, Education, Engineering, Humanities and Sciences, Law, and Medicine) and with the Hoover Institution, SIIS fosters excellence in research and teaching across disciplinary, school, and national boundaries. The priority areas of research are in the fields of international and regional peace and security; economic development and political change in East and Southeast Asia; the global environment challenge; and the delivery of health care in a comparative perspective.

Opportunities for undergraduate research include the Goldman Interschool Honors Program in Environmental Science, Technology, and Policy, and the CISAC Interschool Honors Program in International Security. The institute manages 10 undergraduate and graduate fellowship programs.

The constituent centers and programs within SIIS include the Asia-Pacific Research Center, the Center on Democracy, Development and the Rule of Law, the Center for Environmental Science and Policy, the Center for Health Policy, the Center for International Security and Cooperation, the European Forum, and the Stanford Japan Center—Research.

In the areas of public service and outreach, SIIS administers the Stanford Program on International and Cross-Cultural Education (SPICE), which develops internationally-oriented curricula for use by public school teachers.

The SIIS central office is located at 100 Encina Hall, telephone (650) 723-4581. For more information about particular SIIS programs, contact the programs directly (area code 650):

Center on Democracy, Development and the Rule of Law, 724-7197, http://cdrl.stanford.edu/, Michael McFaul, Director

Center for Environmental Science and Policy (CESP), 725-2066, http://cesp.stanford.edu/, Walter P. Falcon, Stephen Schneider, Co-Directors

Center for Health Policy (CHP), 723-1020, http://chp.cor.stanford.edu/, Alan M. Garber, M.D., Director

Stanford Program on International and Cross-Cultural Education (SPICE), http://spice.stanford.edu/, 723-1116

COURSES

IIS 195. Interschool Honors Program in Environmental Science, Technology, and Policy — Students from the schools of Humanities and Sciences, Engineering, and Earth Sciences analyze important problems in a year-long small group seminar. Combines research methods, oral presentations, preparation of an honors thesis by each student, and where relevant, field study. May be repeated for credit.

1-9 units, Aut, Win, Spr (Naylor, Falcon, Vitousek, Freyberg)

INTERSCHOOL HONORS PROGRAM IN INTERNATIONAL SECURITY

The Center for International Security and Cooperation (CISAC) coordinates a University-wide interschool honors program in international security. Students selected for the honors program fulfill individual department course requirements, attend a year-long seminar on international security research, and produce an honors thesis with policy implications. In order to qualify for the program, students must demonstrate sufficient depth and breadth of international security course work. Ideally, applicants to the program should have taken POLISCI 114S, International Security in a Changing World, MS&E 193, Technology and National Security, POLISCI 110B, Strategy, War, and Politics, and at least one related course such as ECON 150/PUBLPOL 104, Economic Policy Analysis, STS 110/MS&E 197/PUBLPOL 103B, Ethics and Public Policy, SOC 160, Formal Organizations, PUBLPOL 102/SOC 166, Organizations and Public Policy, and POLISCI 114T, Major Issues in International Conflict Management.

Information about and applications to this program may be obtained from the Center for International Security and Cooperation, E201 Encina Hall East, telephone (650) 723-0126.

COURSES

IIS 199. Interschool Honors Program in International Security — Students from different schools meet in a year-long seminar to discuss, analyze, and conduct research on international security. Combines research methods, policy evaluation, oral presentation, and preparation of an honors thesis by each student.

9-15 units, Aut, Win, Spr (Sagan, Cuellar, Kapur)

UNDERGRADUATE PROGRAMS

INTERSCHOOL HONORS PROGRAM IN ENVIRONMENTAL SCIENCE, TECHNOLOGY, AND POLICY

The Center for Environmental Science and Policy (CESP) coordinates a University-wide interschool honors program in environmental science, technology, and policy. Undergraduates planning to participate in the honors program are required to pursue studies in environmental sciences, technology, and policy, with a concentration in a single discipline. After completion of the prerequisite units, students join small group honors seminars to work with specific faculty members in the environmental field on an honors thesis that incorporates both scientific principles and the policy aspects of selected environmental issues.

Courses in environmental studies appear under the course listings of the schools of Earth Sciences, Engineering, and Humanities and Sciences. Information about and applications to this program may be obtained from CESP, E401 Encina Hall East; telephone (650) 723-5697.
CENTER FOR THE STUDY OF LANGUAGE AND INFORMATION (CSLI)

Director: Byron Reeves
Executive Director: Keith Devlin
Center Offices: Cordura Hall
Mail Code: 94305-4115
Web Site: http://www-csli.stanford.edu/

CSLI supports research at the intersection of the social and computing sciences. It is an interdisciplinary endeavor, bringing researchers together from academe and industry in the fields of artificial intelligence, computer science, engineering, linguistics, logic, education, philosophy, and psychology. CSLI’s researchers are united by a common interest in communication and information processing that ties together people and interactive technology.

The technologies of interest at CSLI are at the cutting edge of the information revolution. They include natural language processing, voice user interfaces, ubiquitous computing, collaborative work environments, handheld devices, information appliances, automatic language translation, conversational interfaces, machine learning, intelligent agents, electronic customer relationship management, and distance learning applications.

A primary goal of CSLI is to have a substantial and long-term intellectual impact on the academic and business communities involved with interactive technology. Our industry research partners and sponsors have a broad and facilitated access to ideas, faculty, students, and laboratories. Partners can share in the intellectual property of CSLI, and in the governance committees of the Center that establish research directions and funding priorities. CSLI accelerates knowledge transfer to products and services by involving executives and researchers in Stanford classrooms.

CSLI partners can meet Stanford students studying in over 20 different degree programs across campus.

Course work related to the research at CSLI can be found in the “Program in Symbolic Systems” section of this bulletin.

STANFORD INSTITUTE FOR THE QUANTITATIVE STUDY OF SOCIETY (SIQSS)

Director: Norman H. Nie
Center Offices: 417 Galvez Mall, Encina Hall West, first floor
Web Site: http://www.stanford.edu/group/siqss

Founded in 1998, the Stanford Institute for the Quantitative Study of Society (SIQSS) is a multidisciplinary research institute affiliated with Stanford University’s Office of Research and Graduate Policy. The Institute is devoted to producing and sponsoring high-quality empirical social science research about the nature of society and social change.

The central mission of SIQSS is to provide social knowledge for the larger society and to develop the empirical social sciences as a primary tool for understanding social reality. SIQSS seeks to fulfill this mission by undertaking large-scale, socially relevant, theoretically important, and methodologically sound social research. Examples of projects under way include unintended consequences of information and technology in society; education and its social outcomes; conducting the 2000 census under adversity; and an online scholarly journal, IT & Society at http://www.stanford.edu/group/siqss/itandsociety/.

Scholars participating in SIQSS research programs and activities are drawn from diverse disciplines throughout Stanford University and from other academic institutions. SIQSS currently supports quantitative research through the following: long-term institute-initiated research programs, Stanford faculty research grants and student research assistantships, Stanford faculty fellows, interdisciplinary seminars, and the American Empirical Series.

INSTITUTE FOR RESEARCH ON WOMEN AND GENDER

Director: Londa Schiebinger
Web Site: http://irwg.stanford.edu

Founded in 1974, the Institute for Research on Women and Gender is the nation’s oldest organization devoted to research on gender issues across the disciplines. Working with the media, policy makers, and university administrations, the Institute also serves as a conduit to put research into action. The Institute sponsors faculty research, interdisciplinary research seminars, and conferences that examine gender issues in all fields of study, with an emphasis in the next several years on women and gender in science and engineering.

SOCIAL SCIENCE HISTORY INSTITUTE (SSHI)

Director: Stephen Haber
Institute Office: 450 Serra Mall, Room 19
Web Site: http://sshi.stanford.edu

The goal of Social Science History Institute is to re-engineer the manner in which students in social science departments learn about historical institutions and data, and the manner in which students in history and related disciplines are trained in social science methods. Historians and social scientists share many of the same substantive interests (for example, the development of economies, political systems, and social structures), but they approach them with different and complementary methods and bodies of evidence. There is, however, a great deal of potential for historians and social scientists to draw on the strengths of each other’s methods to improve their own work and to foster increased interaction among the various disciplines that employ history as a laboratory to operationalize social science theories. The Social Science History Institute seeks to realize this potential by transplanting state-of-the-art research methods from classics, economics, history, political science, and sociology across the boundaries of each discipline. Toward this end, SSHI offers conferences and research support for faculty and graduate students.

STANFORD LINEAR ACCELERATOR CENTER (SLAC)

Director: Jonathan Dorfan
Web Site: http://www.slac.stanford.edu/

The Stanford Linear Accelerator Center is devoted to two major areas of research: theoretical and experimental elementary particle physics, particle astrophysics, cosmology, accelerator and beam physics, and detector instrumentation; and photon science based on the use of SPEAR3, an electron storage ring which produces intense beams of synchrotron radiation in the vacuum ultraviolet and x-ray wavelengths for research in biology, chemistry, material science, environmental science, medical science, and many areas of applied physics.
SLAC is located on 425 acres of Stanford property west of the main campus and is operated under a contract with the United States Department of Energy. A major new initiative, the Kavli Institute for Particle Astrophysics and Cosmology, is located on the SLAC campus. The Linac Coherent Light Source (LCLS), a state-of-the-art instrument for research in the photon sciences, and the Ultrafast Science Center are currently under construction on the SLAC campus.

SLAC is operated by Stanford as a national facility allowing qualified scientists from Stanford and other universities and research centers worldwide to participate in the research programs. Graduate students at Stanford may carry out Ph.D. research with members of the SLAC faculty; graduate students from other universities also participate in the research programs of visiting groups.

Research assistantships are available for qualified Stanford students by arrangement with individual faculty members. There are also opportunities for summer employment in the research groups at the center. Students interested in research in the areas of high energy physics, particle astrophysics, and accelerator physics should first contact Professor Rafe H. Schindler at the SLAC Graduate Studies Office. Students interested in research opportunities in photon science and SPEAR 3 should see http://www-ssrl.slac.stanford.edu.

STANFORD SYNCHROTRON RADIATION LABORATORY (SSRL)

Director: Keith O. Hodgson
Web Site: http://www-ssrl.slac.stanford.edu

SSRL, a division of the Stanford Linear Accelerator Center, is a National User Facility which provides synchrotron radiation, a name given to x-rays or light produced by electrons circulating in a storage ring at nearly the speed of light. These extremely bright x-rays can be used to investigate forms of matter ranging from objects of atomic and molecular size to man-made materials with unusual properties. The obtained information and knowledge is of great value to society, with impact in areas such as the environment, future technologies, health, and national security. Many of its 20 faculty hold joint appointments with campus departments.

SSRL has research programs in materials science, chemistry, structural biology, and ultrafast science, as well as accelerator physics and development of advanced sources of synchrotron radiation, especially ultra short pulse, x-ray free electron lasers. The lab is interdisciplinary with graduate students actively pursuing degrees from Stanford campus departments that include Applied Physics, Chemical Engineering, Chemistry, Earth Sciences, Electrical Engineering, Materials Science and Engineering, Physics, and Structural Biology.

Students interested in working at the facility should contact a member of the SSRL faculty, one of the assistant directors, or other members of the Stanford faculty who use SSRL in their research programs; see http://www-ssrl.slac.stanford.edu/faculty/.
During regular academic sessions, both libraries are open Monday through Thursday from 8 a.m. to 12 midnight, Friday from 8 a.m. to 6 p.m., Saturday from 9 a.m. to 9 p.m. (Meyer is open 1 p.m. to 9 p.m. on Saturday), and Sunday from 12 noon to 12 midnight. Library hours information, including hours for holidays, intersessions, and other libraries on campus, is available on the web at http://library.stanford.edu/libraries_/collections/Sarles_locations.html.

These libraries can seat more than 2,000 readers at one time in a variety of seating arrangements: carrels, lounge areas, tables, computer workstations, individual studies, and group study rooms. Readers can connect their laptops to the campus network in most library locations.

Major service units housed throughout Green Library include: the Information Center; the Humanities and Area Studies Reading Room; the Jonsson Social Sciences Reading Room; Foreign Language and Area Collections; Access Services; Current Periodicals, Newspapers, Media and Microtexts; and the Interlibrary Services Office. Green Library also houses reserves for most graduate and undergraduate courses in the humanities and social sciences, the Department of Special Collections, and the University Archives.

Throughout Green and Meyer, there are photocopy machines, telephones, and computers providing access to the online library catalog and the wealth of electronic resources available to the Stanford community.

BRANCH LIBRARIES

Humanities and Social Sciences Branch Libraries include the Art and Architecture Library, Cubberley Education Library, Music Library, and Archive of Recorded Sound.

LIBRARIES—COORDINATES

J. Hugh Jackson Library, Graduate School of Business
Director: Kathy Long

Lane Medical Library
Director: Debra Ketchell

Crown Law Library
Director: Paul Lomio

Stanford Linear Accelerator Center Library
Director of Technical Information Services: Patricia Kreitz

HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

Director: John Raisian
Web Site: http://www-hoover.stanford.edu/hila/

Since its founding by Herbert Hoover in 1919 as a special collection dealing with the causes and consequences of World War I, the Hoover Institution has become an international center for documentation, research, and publication on political, economic, social, and educational change in the 20th and 21st centuries.

The Hoover Library and Archives include one of the largest private archives in the world and have outstanding area collections on Africa, East Asia, Eastern Europe, Russia and the former Soviet Union, Latin America, the Middle East, North America, and Western Europe.

Holdings include government documents, files of newspapers and serials, manuscripts, memoirs, diaries, and personal papers of men and women who have played significant roles in the events of these centuries, the publications of societies and of resistance and underground movements, and the publications and records of national and international bodies, both official and unofficial, as well as books and pamphlets, many of them rare and irreplaceable. The materials are open to all Stanford students, faculty, and staff, to scholars from outside the University, and to the public at large.

INFORMATION TECHNOLOGY SYSTEMS AND SERVICES (ITSS)

Web Site: http://itss.stanford.edu

ITSS provides University leadership in the area of information technology. ITSS services can be divided into four categories:

- Computing and communication infrastructure capable of supporting the instructional, learning, research, and business activities of the University. This infrastructure includes campus-wide data, voice, and video communication facilities, and the distributed computing environment. These services tend to be less visible to end-users, but are the foundation upon which information technology services are delivered.
- Academic computing services to support instruction, research and learning activities. These include the Sweet Hall computing cluster and servers that support instructional computing.
- Business and administrative computing facilities to support administrative information systems. These include core business systems, such as student information, fund raising, general ledger, accounts payables, and payroll.
- Services and technical support for departmental networks and computing environments. These services include departmental consulting, training and support for office and departmental support staff, and technical support to manage departmental computing environments.

Daily operations at Stanford rely upon the hundreds of applications and miles of wiring for data and phone services that ITSS maintains and supports. It is expected that phones will ring, computers interconnect, and systems function. ITSS directs its energies toward ensuring that the infrastructure and applications portfolio meet current needs and to ensure that future needs will be met as well; improvements are made to wiring, more storage is added to servers, applications are changed to meet new requirements, out-of-date services are removed and new ones replace them. Running, maintaining, and continually improving these services, and doing it cost effectively, is the core business of Information Technology Systems and Services.

For more details about ITSS and its services, see http://itss.stanford.edu. For more information about the variety of information technology resources available at Stanford, see http://compcomm.stanford.edu. For assistance with technology services at Stanford, contact the Stanford IT Help Desk by phoning (650) 725-HELP(4357) or submit a request through http://helpsu.stanford.edu.
THE CONTINUING STUDIES PROGRAM

Dean and Associate Provost: Charles Junkerman
Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 725-2650; Fax: (650) 725-4248
Email: continuingstudies@stanford.edu
Web Site: http://continuingstudies.stanford.edu

The Continuing Studies Program provides adults from Stanford and the surrounding communities the opportunity to take classes on a part-time basis for intellectual enrichment, both personal and professional. Courses and events are offered in all four academic quarters, with over 350 courses planned for the 2005-06 academic year.

The faculty are primarily drawn from the ranks of the University’s distinguished professoriate. The program presents a wide variety of courses, with a central concentration in the liberal arts, including literature, history, art and architecture, and music.

Tuition discounts are available to University employees, Stanford students and faculty, Stanford Alumni Association members, educators, and those over age 65.

For a course catalogue, contact the Continuing Studies Program by mail, phone, or email as above.

The Continuing Studies Program also administers the Master of Liberal Arts Program and Summer Session.

MASTER OF LIBERAL ARTS PROGRAM

Associate Dean and Director: Linda Paulson
Participating Faculty: David Abernethy (Political Science), Clifford Barnett (Anthropology), Russell Berman (Comparative Literature and German), Marc Bertrand (French, emeritus), Eavan Boland (English), John Bravman (Material Sciences and Engineering), Bliss Carnochan (English), Clayborn Carson (History), Wanda Corn, (Art and Art History), George Dekker (English), Carol Delaney (Anthropology), Jerry Dorfman (Hoover Institute and Political Science), Arnold Eisen (Religious Studies), Michele Elam (English), Martin Evans (English), Anne Fernald (Psychology), Paula Findlen (History), Luis Fraga (Political Science), John Prencero (French and Italian), Larry Friedlander (English), Kenneth Fields (English), Hester Gelber (Religious Studies), Albert Gelpi (English), Barbara Gelpi (English), Monika Greenleaf (Slavic Languages), Robert Gregg (Religious Studies), Tom Grey (Music), Hans Ulrich Gumbrecht (French and Italian), Van Harvey (Religious Studies), Stephen Hinton (Music), Charles Junkerman (Continuing Studies Program), Nancy Kollmann (History), Marsh McCall (Classics), Robert McGinn (Management Science and Engineering, and Science, Technology, and Society), Mark Mancall (History), Joseph Manning (Classics), Diane Middlebrook (English), Thomas Moser (English), David Palumbo-Liu (Comparative Literature), Linda Paulson (English), Denis Phillips (Education, and, by courtesy, Philosophy), Jack Rakove (History), Ronald Rebolz (English), Rush Rehm (Drama), John Rick (Anthropological Sciences), John Rickford (Linguistics), Paul Robinson (History), Ramón Saldívar (English), Paul Seaver (History), Thomas Sheehan (Religious Studies), Robert Siegel (Microbiology and Immunology), Stephen Stedman (Stanford Institute for International Studies, and, by courtesy, Political Science), Thomas Wasow (Linguistics), Lee Yearley (Religious Studies), Erinle Young (Center for Biomedical Ethics), Steven Zipperstein (History)

Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 725-0061
Email: mlaprogram@stanford.edu
Web Site: http://mla.stanford.edu

Program Description—The Master of Liberal Arts (MLA) program aims to provide a flexible, interdisciplinary program for returning adult students who seek a broad education in the liberal arts. The underlying premise of the MLA program is that knowledge gained through an interdisciplinary course of study leads to intellectual independence and satisfaction not always found in discipline-based programs of study. The goals of the MLA program are to develop advanced critical thinking, to foster intellectual range and flexibility, and to cultivate an individual’s ability to find the connections among different areas of human thought: art, history, literature, music, philosophy, political science, science, and theology.

The program is designed with part-time students in mind: seminars meet in the evening, and students complete the degree in 4-5 years. All master’s seminars are taught by members of the Stanford faculty. Seminar size is limited to 20 students.

Degree Requirements—Candidates for the MLA degree must complete a minimum of 50 units of course work with at least a grade point average of 3.3 (B+). These units must include a three quarter foundation course (equal to 12 units total), one 4-unit core introductory seminar for second-year students, at least seven 4-unit MLA seminars, and a 4-unit master’s thesis. The remaining 2 units of required courses may be fulfilled by additional MLA seminars, relevant Continuing Studies Program course offerings, or by a summer session at Oxford. Students must also fulfill distribution requirements by taking at least 2 units of credit in each of the following areas: humanities; social science or social policy; and science, engineering, or medicine.

Foundation Course—During the Autumn, Winter, and Spring following admission to the program, there is a three quarter foundation course required of all students. The purpose of this course is to lay the groundwork for the interdisciplinary, intercultural studies the student will shortly undertake. The foundation course will introduce students to the broad framework of history, literature, philosophy, political science, and art.

Core Seminar—During the first quarter of the second year, new students take the core introductory seminar, The Plague: An Introduction to Interdisciplinary Graduate Study. This seminar aims to prepare students for interdisciplinary graduate work at Stanford. Students concentrate on writing a critical graduate paper, conducting library research, presenting the results of their research, and productively participating in a collaborative seminar.

MLA Seminars—Students are required to take at least seven MLA seminars of four units each. Each year, at least nine seminars are offered in the MLA program. Each MLA course requires a substantial seminar paper. Students are encouraged to use these papers as a way to investigate new fields of interest, as well as a way to develop different perspectives on issues in which they have an ongoing interest.

Master’s Thesis—The MLA program culminates in the master’s thesis. Students approaching the end of the program write a thesis, approximately 75-100 pages in length, that evolves out of work they have pursued during their MLA studies. The thesis is undertaken with the prior approval of the MLA program, and under the supervision of a Stanford faculty member. During the process of writing the thesis, students are members of a work-in-progress group, which meets regularly to provide peer critiques, motivation, and advice. Each student presents the penultimate draft of the thesis to a colloquium of MLA faculty and students, in preparation for revising and submitting the final draft to the adviser and to the MLA program.

Enrollment Requirements—MLA students must enroll for each academic year from the time of original matriculation until conferral of the degree. To remain active, students must either: (a) complete a minimum of two courses (eight units) in one academic year, defined as from the beginning of Autumn Quarter through the end of the following Summer Quarter
Quarter; or (b) be actively working on their theses and regularly attend a minimum of three-quarters of the work-in-progress meetings from the time the student enrolls in work-in-progress through graduation.

**Timeline for completion** — All requirements for the Master of Liberal Arts degree must be completed within five years after the student’s first term of enrollment in the program. If extraordinary circumstances prevent completion within five years, a student may submit a written petition for a maximum one-year extension to the Associate Dean and Director. This petition is reviewed by a committee which makes a recommendation to the Director; the final decision is at the discretion of the Director. To be considered, the petition must be submitted on or before May 1 of the student’s fifth year in the program.

**Registration** — Master of Liberal Arts students register for courses online through the Continuing Studies web site.

**COURSES**

101A. Foundations I — Required for first-year MLA students.
4 units, Aut (Steidle)

101B. Foundations II — Required for first-year MLA students.
4 units, Win (Steidle)

101C. Foundations III — Required for first-year MLA students.
4 units, Spr (Berman)

102. The Plague: An Introduction to Interdisciplinary Graduate Study
4 units, Aut (Paulson)

222. The Harlem Renaissance
4 units, Aut (Elam)

223. Modernism and Post-Modernism
4 units, Aut (Berman)

224. Contemporary Fictions
4 units, Win (Berman)

225. Belief and Doubt in the British Enlightenment
4 units, Win (Carnochan)

226. English Society and Culture in the Age of Shakespeare
4 units, Win (Seaver)

227. The Historical Jesus
4 units, Win (Sheehan)

228. Russia Encounters the West
4 units, Spr (Kollman)

229. Shakespeare and Music
4 units, Spr (Grey)

230. The Science of Stuff
4 units, Spr (Bravman)

231. Negotiating for the UN
4 units, Spr (Stedman)

232. Love and Death in the Middle Ages
4 units, Sum (Gelber)

233. Shakespeare through Performance VIII
4 units, Sum (Friedlander)

**SUMMER SESSION**

Associate Dean: Patricia Brandt
Director of Admission and Student Services: Teresa Nishikawa
Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 723-3109; Fax: (650) 725-6080
Email: summersession@stanford.edu
Web Site: http://summer.stanford.edu

Students attending Stanford Summer Session are enrolled in either a regular degree program, the Summer Visitor Program, or Summer College program for High School Students.

The regular degree program is for students who are candidates for a Stanford degree and who are continuing their academic work in Summer Quarter. Degree-seeking Stanford students should indicate on Axess during Spring Quarter that they intend to register for Summer Quarter. Separate application is not required.

The Summer Visitor Program is for students who are not presently candidates for a Stanford degree. It is open to students who are currently enrolled in or have graduated from another college or university. Qualified high school students who have completed at least their sophomore year may be admitted to the Summer College program.

Students in Summer Session, in general, enjoy the privileges of students in the regular degree programs except that work completed cannot be applied toward a Stanford degree or credential until the student has been admitted to regular standing. Admission as a summer visitor does not imply later admission to matriculated status. However, should the visitor matriculate at a later date through normal admission procedures, the summer work may, in most cases, be applied toward the requirements for a Stanford degree or credential.

For more information, contact Summer Session by email, mail, phone, or fax using the listings above. Information is updated annually in January and may also be found online at http://summer.stanford.edu.
UNDERGRADUATE EDUCATION

Vice Provost for Undergraduate Education: John Bravman
Web Site: http://undergrad.stanford.edu/

As the chief academic officer for undergraduate education, the Vice Provost initiates policies and programs, assesses and manages continuing programs, oversees curricular innovation, and coordinates the undergraduate activities of the three Schools (Humanities and Sciences, Earth Sciences, and Engineering) which offer undergraduate majors and minors. The Center for Teaching and Learning, Diversity Outreach, Freshman and Sophomore Programs, the Freshman Dean’s Office, Introduction to Humanities, New Student Orientation/Approaching Stanford, Program in Writing and Rhetoric, Stanford Writing Center, Undergraduate Advising, Undergraduate Research Programs, and Writing in the Major report to the Vice Provost of Undergraduate Education.

CENTER FOR TEACHING AND LEARNING

Associate Vice Provost for Undergraduate Education and Director: Michele Marincovich
Senior Associate Director (Science and Engineering): Robyn Wright Dunbar
Associate Director (Humanities): Mariatte Denman
Associate Director (Social Sciences and Technology): Marcelo Clerici-Arias
Academic Technology Specialist: Jeremy Sabol
Assistant Director for Academic Support: Adina Glickman
Administrators: Sruthi Naidu, Cristen Osborne, Linda Salser
Oral Communication Program Director: Doree Allen
Lecturers: Thomas Freeland, Jennifer Hennings, James Milojkovic, Joyce Moser, James Wagstaffe, Randall A. Williams

Department Offices: Sweet Hall, 4th floor
Mail Code: 94305-3087
Center Phone: (650) 723-1326
Email: TeachingCenter@stanford.edu
Web Site: http://ctl.stanford.edu

The Center for Teaching and Learning is a university-wide resource on effective teaching and public speaking for faculty, lecturers, and teaching assistants and on both effective learning and public speaking for undergraduates and graduate students.

SERVICES TO UNDERGRADUATES AND GRADUATE STUDENTS

CTL provides a wide range of resources for students who want to enhance their study approaches and clarify their learning strategies. Through courses, individual counseling, and workshops, CTL helps students build skills that are the foundation for continuous improvement and lifelong learning.

Free tutoring is available to undergraduates in several introductory subjects. See http://tutoring.stanford.edu for details on where and when tutors can be found. Students interested in and qualified for tutoring may apply to be tutors and, if accepted, may take CTL’s course on tutoring; the application process takes place in February.

SERVICES TO FACULTY, LECTURERS, AND TEACHING ASSISTANTS

CTL provides the Stanford community with services and resources on effective teaching. Our goals are: to identify and involve successful teachers who are willing to share their talents with others; to provide those who are seeking to improve their teaching with the means to do so; to acquaint the Stanford community with important innovations and new technologies for teaching; to prepare new teachers for their responsibilities; to contribute to the professional development of teaching assistants; to expand awareness of the role of teaching at research universities; and to increase the rewards for superior teaching.

CTL also has responsibility for helping teaching assistants (TAs) with their preparation for and effectiveness in teaching, and for helping departments with designing effective TA training programs. Programs include: videotaping, microteaching, and consultation; small group and other forms of mid-quarter evaluation; workshops and lectures; a handbook on teaching and a library of teaching materials; quarterly teaching orientations; an informative quarterly newsletter; and work with individuals, groups, and departments on their specific needs. For further details, see CTL’s teaching handbook or the CTL brochure, both available by calling (650) 723-1326, or see http://ctl.stanford.edu.

For questions or requests, email TeachingCenter@stanford.edu.

ORAL COMMUNICATION PROGRAM

The Oral Communication Program at CTL provides opportunities for undergraduates and graduate students to develop or improve their oral communication skills. Courses and workshops offer a comprehensive approach to speech communication, including training in the fundamental principles of public speaking and the effective delivery of oral presentations. The goal is to enhance students’ general facility and confidence in oral expression. The program also provides innovative, discipline-based instruction to help students refine their personal speaking styles in small groups and classroom settings. Those interested in individualized instruction or independent study are invited to visit the program’s Speaking Center in Sweet Hall, where trained student tutors, multimedia, and instructional resource materials are available on an ongoing basis. To schedule an appointment, see http://speakinghelp.stanford.edu. For further details, call (650) 725-4149 or 723-1326 or see http://ctl.stanford.edu.

COURSES

All courses listed with CTL promote acquisition of public speaking skills and/or teaching excellence.

CTL 53. Working Smarter—College-level strategies and skills in time management, reading, speaking, writing, and test preparation. Students explore learning preferences to develop strategies in different academic settings.

2 units, Spr (Allen, Hennings)

CTL 56. Building a Successful Academic Career—For freshmen in expanded advising programs. Techniques for honing academic skills for college, and applying those skills to better define intellectual identity in academic pursuits.

1 unit (Williams) not given 2005-06

CTL 60/160. Investigating Stanford’s Treasures—Private tours some of Stanford’s greatest resources led by Stanford experts; students interview the experts and introduce them to the class at the site. One hour of class discussion per week. Treasures may include Jasper Ridge Biological Reserve, Memorial Church, Special Collections, and the Martin Luther King, Jr., Papers Project.

1-2 units, Aut (Moser)

2 units, Spr (Allen, Hennings)
CTL 115/215. Voice Workshop—Focus is on breath, voice production, expansion of vocal range and stamina, and clarity of articulation. Geared toward public speaking including presentations, lectures, and job talks. May be taken in conjunction with CTL 117.
1-2 units, Aut, Win, Spr (Freeland)

CTL 116A. The Language of Film Noir: From Bogart to Pulp Fiction—The quintessential American film genre which combined femmes fatales, anti-heroes, lost dreams, violence, and a distinct style of expression. Film viewings, student oral presentations, and analyses of films.
1-2 units, Win (Moser)

CTL 116B. Screwballs and the Language of Laughter: American Comic Film from Chaplin to Present—A sampling of American comic masterpieces including silent movies, 30s screwball films, and works by Billy Wilder, Woody Allen, and contemporary film makers. Film viewings, student oral presentations, and analyses of films.
1-2 units (Moser) alternate years, given 2006-07

CTL 117/217. The Art of Effective Speaking—The principles and practice of effective oral communication. Through formal and informal speaking activities, students develop skills framing and articulating ideas through speech. Strategies for speaking extemporaneously, preparing and delivering multimedia presentations, formulating persuasive arguments, refining critical clarity of thought, and enhancing general facility and confidence in oral self-expression.
3 units, Win, Spr (Freeland, Allen)

CTL 118. Public Speaking: Romancing the Room—A practical approach to the art of public speaking. Emphasis is on developing skills in speech types including impromptu, personal experience, interviewing, demonstration, persuasive, and special occasion. Materials include videotape, texts of famous speeches, and a final dinner program of speeches. Students evaluate presentations by others. $55 materials fee.
3 units, Sum (Wagstaffe)

CTL 119. Oral Communication Tutor Training Practicum—Seminar. For students with a strong background in public speaking who wish to train as public speaking tutors for CTL’s Oral Communication Program. Readings, exercises, and supervised teaching refine speaking skills. Preparation to serve as a peer tutor in a variety of academic disciplines. Prerequisite: consent of instructor.
1-3 units, Aut (Allan, Hennings)

CTL 120. Peer Tutor Training—Goal is to help students become effective peer tutors for course material already mastered by articulating aims; developing practical tutoring skills including strategies for drop-in sessions; observing experienced tutors; discussing reading assignments; role playing; and reflecting on experiences as a peer tutor intern. Prerequisite: consent of instructor.
1 unit, Aut (Glickman)

CTL 125. From the Page to the Stage: The Performance of Literature—The oral interpretation of literature as performance art and mode of literary analysis. Focus is on contemporary and local expression including topics such as the Spoken Word Collective at Stanford, the ensemble performance of short works of fiction by San Francisco’s Word for Word Performing Arts Company, and the storytelling art of Awele Makeba which combines theater, oral history, and music. No performance experience necessary.
3 units (Allen) not given 2005-06

CTL 130. Beyond Stereotype Threat: Claiming a Rightful Place in an Academic Community—(Same as PSYCH 125.) Stereotype threat as mitigating the quality of a student’s test performance; its impact on academic success at Stanford. How to reduce the impact of stereotype threat on Stanford students.
2 units, Win (Glickman)

CTL 175. Intertextuality, Interpretation, and Performance—Literary and performance theories from the late 20th century to the present. The performative link between writing and speech. Students apply theories in critical writings, performances, and intertextual assemblages. How to find and refine one’s own voices in writing and vocality.
4 units, Spr (Freeland)

CTL 177. Performance of Power: Oratory and Authority from the Ancient World to the Postmodern—Speech as action has long been seen as essential to leadership. Theories and examples of oratory, from Aristotle to George W. Bush, assessing each as model of voice-activated authority. The impact of mass media technologies as they transform the public space of oratory. Offered only once, either Autumn or Winter.
4 units, Aut (Freeland)

CTL 199/299. Independent Study—Special study under lecturer direction, usually leading to a written report or an oral presentation. Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr, Sum (Staff)

CTL 201. Science Course Design—(Same as GES 201.) For students interested in an academic career and who anticipate designing science courses at the undergraduate or graduate level. Goal is to apply research on science learning to the design of effective course materials. Topics include syllabus design, course content and format decisions, assessment planning and grading, and strategies for teaching improvement.
2-3 units, Aut (Wright-Dunbar)

2 units, Spr (Allen, Hennings)

CTL 219. Oral Communication for Graduate Students—Graduate student speaking activities such as teaching (delivering lectures, guiding discussion, and facilitating small groups), professional presentations and conference papers, and preparing for oral exams and defenses. In-class projects, discussion, and individual evaluation assist students in developing effective techniques for improving oral communication skills.
1-3 units, Sum (Freeland)

CTL 225. Teaching Development Series—Teaching and academic career topics from CTL’s workshops series. Documented participation in a minimum of 10 hours required for credit. Offerings vary quarterly. See http://ctl.stanford.edu for current information. May be repeated for credit. Prerequisite: consent of instructor.
1 unit, Aut, Win, Spr, Sum (Staff)

FRESHMAN AND SOPHOMORE PROGRAMS

Assistant Vice Provost and Program Director: Sharon Palmer
Associate Director and Academic Technology Specialist: Dena DeBry
Assistant to the Dean of Freshman-Sophomore and Potter Colleges: Jenise Christensen
Academic Technology Specialist: Carlos Seligo
Oral Communication Lecturer: Joyce Moser
Administrators: Gari Gene, Mona Kitasoe, Jasmine Lu, Gary Matsumura

Department Offices: Sweet Hall, 4th floor
Phone: (650) 723-4338
Email: tsp@vpue.stanford.edu
Web Site: http://spf.stanford.edu/

Freshman and Sophomore Programs (FSP), a division of the office of the Vice Provost for Undergraduate Education, sponsors and supports Freshman-Sophomore and Potter Colleges, as well as Stanford Introductory Seminars, including Freshman Seminars, Sophomore Seminars and Dialogues, and Sophomore College. FSP also coordinates initiatives
that encourage faculty and students to build on relationships formed in introductory seminars by forming ongoing mentoring and research partnerships based on their shared intellectual interests. PSP is located on the fourth floor of Sweet Hall. For detailed information, see the web site or contact the office.

**FRESHMAN-SOPHOMORE COLLEGE AND POTTER COLLEGE**

The Freshman-Sophomore College at Sterling Quad is a residence for approximately 180 freshmen and sophomores interested in broad intellectual exploration of the liberal arts and sciences. Potter College is designed to create an interdisciplinary community of upper-class students engaged in intellectual exploration with a focus on writing, public speaking, honors, and research.

**STANFORD INTRODUCTORY SEMINARS**

Stanford Introductory Seminars (SIS) provide opportunities for first- and second-year students to work closely with faculty in an intimate and focused setting. These courses aim to intensify the intellectual experience of the freshman and sophomore years by allowing students to work with faculty members in a small group setting; introducing students to the variety and richness of academic topics, methods, and issues which lie at the core of particular disciplines; and fostering a spirit of mentorship between faculty and students. Over 200 faculty from more than 60 departments take part in the introductory seminars programs. The courses are given department credit and most count towards an eventual major in the field. Most also fulfill General Education Requirements (GERs).

Some faculty who have taught Freshman Seminars or Sophomore College volunteer to continue working with their students through a formal advising relationship during the students’ sophomore year.

**FRESHMAN SEMINARS AND SOPHOMORE SEMINARS AND DIALOGUES**

Freshman Seminars and Sophomore Seminars and Dialogues are offered in many disciplines throughout the academic year. Freshman preference seminars are typically given for 3–4 units to a maximum of 16 students, and generally meet twice weekly. Although preference for enrollment is given to freshmen, sophomores and first-year transfer students may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars and dialogues give preference to sophomores and first-year transfer students, but freshmen may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars are given for 3–5 units to a maximum of 14 students, while sophomore preference dialogues take the form of a directed reading, and are given for 1–2 units to a maximum of 5 students. All seminars require a brief application. For a list of introductory seminars offered in 2005-06, see the “Stanford Introductory Seminars” section of this bulletin. For an application or more information see the SIS annual course catalogue, published each September, or http://introsems.stanford.edu/.

**SOPHOMORE COLLEGE**

Sophomore College offers sophomores the opportunity to study intensively in small groups with Stanford faculty for several weeks before the beginning of Autumn Quarter. Students immerse themselves in a subject and collaborate with peers, upper-class sophomore assistants, and faculty in constructing a community of scholars. They are also encouraged to explore the full range of Stanford’s academic resources in workshops and individually. At its best, Sophomore College is characterized by an atmosphere of intense academic exploration. Each Sophomore College course enrolls twelve to fourteen students, who live together in a Stanford residence and receive two units of academic credit. Eligible students will have been enrolled for no more than three academic quarters; be sophomores in the Autumn Quarter during which the college is offered; be in good academic standing; and have completed at least 36 units of academic work by the end of the Spring Quarter preceding the college. Students must also have an on-campus housing assignment for the ensuing academic year. Transfer students are not eligible. Admitted students who are found to have academic standing problems after the completion of Spring Quarter may have their admission revoked. Tuition, room, the remainder of board costs, and class-required travel are covered by Sophomore College. Each student pays a $500 fee toward the cost of board; this fee is included in the Autumn Quarter University bill. Students are also responsible for travel to campus, phone, network activation one-time fee, and other personal expenses. Courses are announced in March, and applications are due in April. For a list of Sophomore College Seminars offered, please see the SIS section in this Bulletin. For more information or to apply, see the Sophomore College web site at http://soco.stanford.edu/.

**FRESHMAN DEAN’S OFFICE**

Assistant Vice Provost and Dean of Freshmen and Transfer Students: Julie Lythcott-Haims

Web Site: http://frosh.stanford.edu/

The Freshman Dean’s Office, a division of VPUE, is the primary resource for helping new undergraduates make the transition to Stanford. Programs under its umbrella include Approaching Stanford, New Student Orientation, Freshman and Transfer Advising, Expanded Advising Programs, and Frosh Council. Offices are located on the first floor of Sweet Hall and in 123 Meyer Library; phone (650) 72-FROSH (3-7674) and (650) 723-2426, or email frosh@stanford.edu. New students and their parents are encouraged to contact the Freshman Dean’s Office.

**UNDERGRADUATE ADVISING**

Faculty Director: Steven Zipperstein

Director: D. E. Lorraine Sterritt

Senior Associate Director: Roland Hsu

Program Offices: Sweet Hall, 1st floor

Phone: (650) 723-2426

Web Site: http://uap.stanford.edu/

The Office of Undergraduate Advising Programs (UAP) coordinates advising for students who have not declared a major. Freshmen are assigned to academic advisers according to their residence and their preliminary academic interest. Some freshmen receive enhanced academic support through participation in Expanded Advising Programs (EAP). Most sophomores who are undecided about their majors continue to work with their advisers from the first year. Some sophomores participate in the Sophomore Mentoring Program (SMP), which matches faculty mentors with students who have shared intellectual interests through a freshman seminar or sophomore college class. By the end of the sophomore year, undergraduates must declare a major. In junior and senior years, students are advised by faculty from the major department or program.

The UAP coordinates with faculty, staff, and students (peer mentoring staff) to address students’ intellectual and developmental goals. The UAP staff includes professional advisers in Sweet Hall, Wilbur and Florence Moore residence halls, and the Arillaga Family Recreation Center who meet with students individually to set academic goals and to devise strategies for achieving those goals. The staff also coordinates a comprehensive array of academic advising programs and services designed to support and supplement the undergraduate curriculum.

The UAP staff of professional advisers provides advising to all students, freshmen through seniors. These UAP advisers offer students help when the academic adviser is unavailable or when additional advice is needed. Professional staff work closely with academic departments to identify and support students with potential academic difficulty and who do not meet requirements for good academic standing. Other UAP services include: assistance with curriculum planning; help with choosing a major; information on designing an individually designed major (IDM); academic and personal counseling related to academic performance; advice regarding
plans to attend graduate or professional school; referrals to tutoring and learning skills, the Office of Accessible Education, and Counseling and Psychological Services. Reference guides to graduate and professional schools are available. The UAP is open Monday through Friday, 8:00 a.m. to 5:00 p.m. Students may make appointments or drop in to see an adviser.

**UNDERGRADUATE RESEARCH PROGRAMS**

_Director:_ Susie Brubaker-Cole  
_Associate Director for Honors Writing Programs:_ Hilton Obenize  
_Associate Directors for Student Services:_ Renee Courey, Brian Thomas  
_Program Office:_ Sweet Hall, fourth floor  
_Web Site:_ http://urp.stanford.edu

Undergraduate Research Programs (URP), a division of the office of the Vice Provost for Undergraduate Education (VPUE), seeks to foster undergraduate participation in the creation of new knowledge at Stanford. URP sponsors and supports a broad range of programs that encourage undergraduates to work closely and individually with faculty on research, advanced scholarship, and creative projects. Programs are designed to serve students who are new to research, as well as those with considerable research experience who are able to take on advanced, independent projects.

**STUDENT GRANT PROGRAMS**

URP offers research grants to currently registered Stanford undergraduates. Grants support faculty-mentored research projects, and are typically used to pay for the research supplies, travel, and room and board associated with such projects. For the 2005-06 academic year, students have access to five grant programs:

- **Quarterly Grants** provide for student projects that explore a topic of interest or contribute to the development of future intellectual pursuits. They are often used for smaller projects, preliminary research, and follow-up expenses associated with larger projects. Applications are considered in Autumn, Winter, and Spring quarters, and are usually due the fourth week of each quarter.

- **Major Grants** support larger projects that will normally span several quarters. Funded projects typically culminate in an honors thesis or some other substantial capstone product that demonstrates a focused and intellectually rigorous perspective on the topic of interest. Major Grant proposals are subjected to an intensive review process that includes critical input from faculty in the appropriate departments. Applications are considered only in the spring, and are usually due the first week of the spring quarter.

- **Chappell Lougee Scholarships** are available to sophomores pursuing projects in the humanities and social sciences. In addition to receiving a grant, recipients become members of a research and mentoring community that includes special events, preparation for a capstone project or honors, and fellowships and graduate school advising. Applications are usually due in the last week of classes in the Autumn Quarter.

- **Angel Grants** assist students in producing a finished public creative work such as an art exhibit, film, stage production, or concert. There is no deadline; applications are accepted on a rolling basis.

- **Conference Travel Grants** support students who have been invited to present their research at a professional or scholarly conference. The grants fund travel expenses to and from the conference, and normal conference registration. Students demonstrating financial need may also include conference-associated food and lodging in their budget. These applications are accepted on a rolling basis.

The application for any student grant consists of (1) a student-authored project proposal, including a line-item budget, and (2) a letter of support written by a qualifying member of the Stanford faculty. URP may also consult student transcripts as well as outside faculty reviewers. Proposals are judged on intellectual significance, rigor and feasibility of project design, and evidence of student preparedness.

Major Grant and Chappell Lougee Scholarship recipients may include a stipend within their budget if they are dedicating full-time to their project over the Summer Quarter. These students may also request additional funding to help meet the Financial Aid Office’s expected student contribution.

URP also provides considerable advising support for students considering a research grant. URP staff members offer proposal writing and project design consultation as well as advice on administrative policies. Students can view sample proposals at the URP office. For more information on student grant programs, see the URP web site at http://urp.stanford.edu/.

**DEPARTMENTAL AND FACULTY-SPONSORED RESEARCH OPPORTUNITIES**

**DEPARTMENTAL AND RESEARCH CENTER PROGRAMS**

Departments, interdisciplinary programs, and Stanford research centers may apply through the URP office for VPUE Departmental Grants for Undergraduate Research to support programs that provide undergraduates with close mentorship and training in scholarship and research. Typically, departments pair students with a faculty member or faculty-led research group according to their mutual scholarly interests. Students conduct substantive, directed research on a particular aspect of the faculty’s research project, and they meet frequently with their faculty mentors to discuss progress and future directions for the project. The official request for proposals may be found on the faculty resources section of the URP web pages. Students should check with URP staff to determine which departments and centers currently sponsor research programs.

**FACULTY GRANTS FOR UNDERGRADUATE INDEPENDENT STUDY AND RESEARCH**

Individual faculty members may also apply through the URP office for VPUE Faculty Grants for Undergraduate Research. Faculty Grants provide funding for undergraduates to work closely with faculty on a directed research project. Typical student research activities include conducting literature reviews, developing and conducting research surveys, collecting and analyzing data, aiding in the development of course materials, and conducting laboratory experiments. Faculty determine student participation in this program, so students should contact departments and faculty for more information. Faculty may obtain the official request for proposals on the faculty resources section of the URP web site.

**SUMMER RESEARCH COLLEGE**

Summer Research College (SRC) is a residential program directed by URP for students engaged in faculty-mentored research endeavors on campus over the summer.

SRC aims to foster close intellectual and social contact among students and faculty in an interdisciplinary residential community. During the day, students work with their faculty advisers or research groups campus-wide. In the evenings and on weekends, they have opportunities to share in research discussions, dinners with faculty guests, social and cultural activities, and other informal gatherings with fellow researchers.

SRC is not a source of funding for student research; it is a residential program intended to enrich undergraduates’ summer research experience. Residents of SRC obtain funding through URP and non-URP funding programs. For more information about SRC, including registration procedures and college policies, see the URP web site at http://urp.stanford.edu.
HONORS PROGRAMS

Qualified undergraduates are encouraged to participate in honors programs offered by departments and interdisciplinary programs. These capstone programs, usually completed in the senior year, provide opportunities for students to engage in advanced research, analysis, and articulation with faculty guidance. Honors programs may require in-depth research or field work with an extended written thesis, laboratory work accompanied by a report, or a creative project. Some honors programs require a public oral and visual presentation of the project’s results. Each department and interdisciplinary program develops its own requirements for entry into its program and criteria for honors projects. Some honors programs require students to be majors, while other programs are available to any undergraduate with relevant preparation. Students are urged to check with each department and program to determine eligibility and other requirements. The URP sponsors the Golden and Firestone Honors Awards in recognition of the most exceptional student honors theses.

HONORS WRITING PROGRAMS

In addition to thesis writing support organized by departments and programs, URP offers writing consultation in the form of workshops during seminars, as well as consultation with graduate student assistants and faculty providing writing support for different honors programs. Students writing honors theses can also obtain individual editorial consultation at the URP Office. Editorial support is also offered for other advanced writing needs, such as revision of a paper for publication in a professional journal, and personal statements and essays for master’s and doctoral programs, and for national fellowship competitions (see Fellowships and Graduate School Applications Services below).

HONORS COLLEGE

The Honors College brings students writing honors theses to campus in September before the start of the regular school year for a program of group and major-based activities. By concentrating solely on the thesis for nearly three weeks, Honors College participants begin the senior year with a serious commitment to independent scholarship in an atmosphere of shared intellectual purpose. The college sponsors crossdisciplinary forums, such as writing workshops and methodology panels, as well as residential activities, such as cultural and social outings, and a celebratory concluding event to which students invite their research advisors. Students participating in Honors College receive room and board, and special access to computers.

FELLOWSHIPS AND GRADUATE SCHOOL APPLICATIONS SERVICES

URP staff provide practical advice to Stanford undergraduates and recent graduates on how to prepare and apply for master’s and doctoral programs. Along with the Overseas Resource Center, URP staff help students to compete for merit scholarships and post-baccalaureate fellowships. The URP offers workshops and individual consultations on choosing a graduate school and fellowship program, writing personal statements, soliciting letters of recommendation, and speaking in interviews. The URP office also administers campus nomination competitions for the Goldwater, Udall, Beinecke, Center for the Study of the Presidency, Jack Kent Cooke, Carnegie, and Truman scholarships.

STUDENT DISABILITY RESOURCE CENTER (SDRC)

The SDRC coordinates academic and other accommodations for undergraduates and graduate students who with disabilities including mobility impairments, chronic illness, sensory disabilities, learning disabilities, and psychological disabilities. The center’s goal is to enable students with disabilities to participate fully in the educational experience at Stanford while meeting the academic standards maintained by the university.

In accordance with the provisions of the Americans with Disabilities Act of 1990 and Section 504 of the Rehabilitation Act of 1973, the SDRC offers an array of accommodations and auxiliary aids and services to students with documented disabilities. Direct support services include, but are not limited to note-taking, Brailing, oral or sign language interpretation, stenocaptioning, books on tape or electronic text, examination accommodations, and special housing arrangements. During the academic year, the SDRC runs a golf cart service called DisGo Cart for use by students who have temporary and permanent mobility impairments or who use a wheelchair. To arrange for an on-campus ride call 725-2484 (5-CHUG).

ASSISTIVE LEARNING TECHNOLOGY CENTER (ALTEC)

ALTeC is the technology arm of the OAE. It provides resources to make information technology and education more accessible for those with disabilities, such as accessible PC and Mac computer workstations, speech recognition and screen reading software, alternative input devices, and numerous non-computer accommodations.
SCHWAB LEARNING CENTER

The Schwab Learning Center offers enhanced services specifically for students with learning differences (LD) and attention deficit hyperactivity disorder (ADHD). Among these services are screening assessments for learning differences, individual learning strategy sessions, and tutoring in various academic disciplines.

CENTER FOR UNIVERSAL DESIGN IN EDUCATION

Application of the principles of universal design for instruction (UDI) represents a new approach to teaching that promotes proactive design and use of inclusive instructional practices that benefit all students. The center seeks to advance the development of instructional methods, tools, and strategies that are flexible, customizable, and accessible to students from different backgrounds, learning styles, abilities, and disabilities in a variety of learning contexts.

CAREER DEVELOPMENT CENTER

Center Office: 563 Salvatierra Walk
Web Site: http://cardinalcareers.stanford.edu

Counseling Services — Monday, Tuesday, Wednesday, and Friday, 9 a.m. to 12 noon, 1 p.m. to 5 p.m., Thursday, 9 a.m. to 12 noon, 1 p.m. to 6 p.m.; (650) 725-1789.

Employment Services — Monday to Friday, 8:15 a.m. to 4:30 p.m.; (650) 723-9014.

Reference File Services — Monday to Friday, 9 a.m. to 12 noon, 1 p.m. to 3 p.m.; (650) 723-1548.

The Career Development Center (CDC) offers a wide range of services from counseling, workshops, and presentations to on-campus recruiting, job/internship databases, reference file services, library resources, and alumni networking, to help students make informed decisions and to plan for life after Stanford.

Services are open to undergraduates and graduate students, and all students are encouraged to visit in person or via the web. Programs and services are free to students; limited services are available to alumni and student spouses and domestic partners.

The following suggestions may assist in approaching and using the CDC to best benefit:

- Visit early in a Stanford career.
- Gather general career information through the career resource library, jobs/internship database, handouts, and alumni network.
- Inquire about individual counseling for all stages of career planning and development.
- Participate in workshops and other programs to clarify career goals.
- Use the Cardinal Recruiting Program as a convenient way to interview with employers; or use the Reference File Service to ease the management of applications for graduate school or employment.

COMMUNITY CENTERS

There are six ethnic and community centers that support students who seek services associated with a particular group or community. Each center has its own site and professional staff who advise and counsel students. In addition, the centers sponsor programs throughout the year that foster intellectual, personal, and cultural growth. Detailed information is available on the following web sites:

- Asian American Activities Center: http://www.stanford.edu/group/a3c/
- Black Community Services Center: http://www.stanford.edu/dept/BCSC/
- El Centro Chicano: http://www.stanford.edu/dept/elcentro/
- LGBT Community Resources Center: http://www.stanford.edu/QR/
- Native American Cultural Program: http://www.stanford.edu/dept/nacc/
- Women’s Center: http://www.stanford.edu/group/womenscntr/

GRADUATE LIFE OFFICE

Graduate Life Office: Escondido Village Office, 859 Escondido Road
Graduate Community Center: 750 Escondido Road

Web Site: http://glo.stanford.edu

The Graduate Life Office (GLO) works with students on and off campus and with student groups, including Community Associates (student residence staff), the Graduate Student Programming Board, and the Graduate Student Council, to create an inclusive environment through programs in the residences and campus-wide. The recently constructed Graduate Community Center (GCC) serves as a centrally-located focal point for meetings and activities in the graduate community.

The GLO staff also works with individual students who need information and support or who may be experiencing personal difficulties. Staff members are knowledgeable about and have access to support and resources available throughout the University.

HAAS CENTER FOR PUBLIC SERVICE

The Haas Center for Public Service connects academic study with community and public service to strengthen communities and develop effective public leaders. The Center aspires to develop aware, engaged, and thoughtful citizens who contribute to the realization of a more just and humane world.

To accomplish these objectives, the center collaborates with associated units at Stanford to implement programs in five areas of work. Through the center’s fellowship programs, undergraduates perform summer internships in nonprofit organizations, foundations and government agencies locally, nationally, and internationally. Postgraduate fellowships allow graduating seniors to work with a mentor in a nonprofit or public agency for a year. With support from the center, Stanford faculty members have created service-learning courses that involve Stanford students in providing direct service and community-based research efforts in collaboration with local schools and other partner agencies. The center’s Public Service Scholars Program supports seniors writing honors theses that combine academic research with public service. Faculty from Stanford’s School of Education collaborate with center staff to provide curriculum guidance and training for tutors and mentors at nearby schools, and courses and a lecture series on public leadership. A leadership development program brings students together with community and public leaders to enhance students’ skills. Another program trains Stanford students to bring results of scientific research to neighboring schools. The federally-supported Community Service Work-Study program, administered in conjunction with the University’s Financial Aid Office, allows students to satisfy work-study obligations year-round by working in community organizations and public agencies. Center staff provide leadership development through training, advising, and resources to Stanford in Government, Alternative Spring Break, and other student groups engaged in service.

The Haas Center also houses associated programs, including: Stanford in Washington (a unit of the School of Humanities and Sciences); the Institute for Diversity in the Arts (a program of the Committee on Black Performing Arts and the Drama department); and Volunteers in Asia (VIA), a nonprofit cultural and educational exchange program.

Students interested in public service fellowships, service-learning courses, community-based research, public and community service
BECHTEL INTERNATIONAL CENTER

Web Site: http://www.stanford.edu/dept/icenter/

The Bechtel International Center (I-Center) is a meeting place for students and senior research scholars at Stanford from throughout the world and for internationally oriented U.S. students, faculty, and short-term visitors on the campus. Through a variety of social, cultural, and educational programs, I-Center facilities are utilized to acquaint students and scholars with the life of the University and the community, and to bring them together in activities of mutual interest.

I-Center services include advisers, working closely with the University’s academic departments, include advising foreign students and scholars on matters such as immigration, referrals to counselors in personal matters relating to academic performance, psychological and cultural adjustment, promoting cultural exchanges, and advising spouses and families about opportunities and resources in the community.

The Overseas Resources Center, within the I-Center, provides the following services: advising on scholarships for study and research overseas, information on non-Stanford study abroad and passport photos, international student ID cards, and youth hostel membership cards.

JUDICIAL AFFAIRS AND STUDENT CONDUCT

In March 1996, President Gerhard Casper convened the Committee of 15 and requested a review of the student judicial system at the University under the then-existing Legislative and Judicial Charter of 1968. During the following year, the Committee of 15 conducted an extensive review of the existing charter and process and drafted a new charter to take its place. The Student Judicial Charter of 1997 was approved by the Associated Students of Stanford University, the Senate of the Academic Council, and the President of the University during Spring Quarter 1996-97 and Autumn Quarter 1997-98, replacing the earlier charter and becoming effective in January 1998. Cases of alleged violations of the University’s Honor Code, Fundamental Standard, and other student conduct policies now proceed through an established student judicial process based upon the Student Judicial Charter of 1997, which can be found in its entirety at the University’s Office of Judicial Affairs web site at http://judicialaffairs.stanford.edu. The web site also contains the policies, rules, and interpretations, as well as the University’s Student Conduct Penalty Code, applicable to those students found responsible for violating the Honor Code, the Fundamental Standard, or other University policy or rule.

When a violation of the Fundamental Standard, Honor Code, or other University policy or rule governing student conduct is alleged, or whenever a member of the University community believes such a violation has occurred, he or she should contact the Office of Judicial Affairs, at Tresidder Memorial Union, 2nd floor, phone (650) 725-2485, fax (650) 736-0247, or email judicial.affairs@stanford.edu.

The primary codes of conduct for students are the Fundamental Standard and Honor Code.

THE FUNDAMENTAL STANDARD

Students at Stanford are expected to know, understand, and abide by the Fundamental Standard, which is the University’s basic statement on behavioral expectations articulated in 1896 by Stanford’s first President, David Starr Jordan, as follows:

“Students are expected to show both within and without the University such respect for order, morality, personal honor, and the rights of others as is demanded of good citizens. Failure to do this will be sufficient cause for removal from the University.”

Actions that have been found to be in violation of the Fundamental Standard include:

- Physical Assault
- Property Damage
- Forgery
- Theft
- Sexual harassment or other sexual misconduct
- Misrepresentation in seeking financial aid, University housing, University meals, or other University benefits
- Driving on campus while under the influence of alcohol
- Misuse of computer equipment or email
- Sending threatening or obscene messages

There is no standard penalty which applies to violations of the Fundamental Standard. Penalties range from a formal warning to expulsion. Each case is fact specific; considerations include the nature and seriousness of the offense, the motivation underlying the offense, and precedent in similar cases.

THE HONOR CODE

The Honor Code is the University’s statement on academic integrity. It is essentially the application of the Fundamental Standard to academic matters. Provisions of the Honor Code date from 1921, when the honor system was established by the Academic Council of the University Faculty at the request of the student body and with the approval of the President. The Honor Code reads:

“A. The Honor Code is an undertaking of the students, individually and collectively:

1) that they will not give or receive aid in examinations; that they will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading;

2) that they will do their share and take an active part in seeing to it that others as well as themselves uphold the spirit and letter of the Honor Code.

“B. The faculty on its part manifests its confidence in the honor of its students by refraining from proctoring examinations and from taking unusual and unreasonable precautions to prevent the forms of dishonesty mentioned above. The faculty will also avoid, as far as practicable, academic procedures that create temptations to violate the Honor Code.

“C. While the faculty alone has the right and obligation to set academic requirements, the students and faculty will work together to establish optimal conditions for honorable academic work.”

Examples of conduct that have been found to be in violation of the Honor Code include:

- Copying from another’s examination paper or allowing another to copy from one’s own paper
- Unpermitted collaboration
- Plagiarism
- Revising and resubmitting a quiz or exam for regrading without the instructor’s knowledge and consent
- Representing as one’s own work the work of another
- Giving or receiving aid on an academic assignment under circumstances in which a reasonable person should have known that such aid was not permitted

internships for youth and education, or service organization leadership development should visit the Haas Center, see http://haas.stanford.edu, or call (650) 723-0992.
For more information please see the Interpretations and Applications of the Honor Code at: http://www.stanford.edu/dept/vpsa/judicialaffairs/guiding/honorcode.int.htm. The standard penalty for a first offense is a one quarter suspension from the University and 40 hours of community service. In addition, many faculty members issue a “No Pass” for the course in which the violation occurred.

OFFICE OF RESIDENTIAL EDUCATION

Web Site: http://www.stanford.edu/dept/resed/

The Office of Residential Education is responsible for developing the policies, programs, and staffing which support the intellectual, educational, and community-building activities in student residences. The Residential Education program provides Stanford undergraduates with a small community experience within a large research university. Programs extend the classroom into the residences and complement the academic curriculum with activities and experiences essential to students’ preparation for life in a global society. An extensive network of staff, including many that live in the residence halls, supports students during their undergraduate careers.

OFFICE OF STUDENT ACTIVITIES

Web site: http://www.stanford.edu/dept/OSA/

The Office of Student Activities supports student activities, nearly 600 student organizations, the ASSU, and sororities and fraternities through such as publications, workshops, one-on-one consultation, and major event planning support. The OSA also provides fundraising expertise for student groups and leadership opportunities for students.

VOLUNTARY STUDENT ORGANIZATIONS

At its March 1963 meeting, the Board of Trustees adopted the following policy:

“Students are encouraged to study, discuss, debate, and become knowledgeable about contemporary affairs. Expressing opinions or taking positions with respect to these matters is up to the individual students or to volunteer groups of students so constituted that they are authorized to speak for their members. This is not a function of student government at Stanford.

“3. All students are required to become members of the Associated Students of Stanford University, which represents them with respect to student affairs on the Stanford campus. The student government, under this policy, is not authorized to speak for students on other matters.

“4. Under such regulations as may be established from time to time by the President of the University, students may form voluntary organizations constituted to speak for their members with respect to matters outside the scope of student government, provided such organizations clearly identify themselves and, in any public statements, make it clear that they do not represent or speak for the University or the Associated Students.

“Any questions concerning the interpretation and application of this policy shall be resolved by the President of the University.”

Voluntary student organizations are those organizations: (1) in which membership is not mandatory and is nondiscriminatory, (2) in which membership is both open and limited to current Stanford students registered in a degree-granting program, (3) in which students make all organizational decisions, and (4) whose purposes and procedures are consistent with the goals and standards of the University. In order to use University facilities, the Stanford name, or to receive ASSU funding, all voluntary student organ-

izations must register with the University through the Office of Student Activities on the second floor of Tresidder Memorial Union.

As a condition of registration, each voluntary student organization must file and have approved each of the following:

1. A statement of purpose and organizational constitution.
2. A statement about membership eligibility.
3. Clear procedures for officer elections.
4. Identification of the authorized representative of the group, who must be a currently registered student, and at least five active members in the organization who are currently registered students.

Each voluntary student organization must renew its registration with the University annually, early in Autumn Quarter, by submitting new registration materials.

If a voluntary student organization that is registered with the University seeks to use University facilities for meetings open to more than its own members and to specifically invited guests, such meetings shall be subject to the regulations of the Committee on Public Events. All organization events held in University facilities must receive event approval from the Office of Student Activities and Stanford Events.

A voluntary student religious organization may hold open meetings in University facilities only with the approval of the Office of the Dean of the Chapel.

A registered voluntary student organization may advocate publicly a position on a public issue, provided the organization clearly identifies itself, and provided such an organization in any public statement makes clear it does not represent or speak for the University or for the Associated Students.

No student group may use University space or facilities or receive other University support for purposes of supporting candidates for public office. Groups may use public places such as White Plaza for tables, speeches, and similar activities; may have intermittent use of on-campus meeting rooms; and may request to reserve auditoriums and similar space for public events including speeches by political candidates as long as all University guidelines are followed.

TRESIDDER MEMORIAL UNION

Tresidder Memorial Union (TMU) is a center of community activity on the Stanford campus. It houses a variety of food services; meeting rooms for special occasions; a ticket office, a campus information center; branch offices and ATMs for the Stanford Federal Credit Union, and Wells Fargo; ATMs for Bank of America; a fitness center; and a hair styling shop. Tresidder Express carries groceries, magazines, and sundries.

TMU is also the home of the Associated Students of Stanford University (ASSU), the Dean of Students Affairs Office, Judicial Affairs, and the Office of Student Activities.

VADEN HEALTH CENTER

VADEN HEALTH CENTER: 866 Campus Drive
Web Site: http://vaden.stanford.edu

The Allene G. Vaden Health Center strictly protects the confidentiality of information obtained in medical care and counseling.
• Referral to specialists, primarily at Stanford Hospital and Clinics and Menlo Medical Clinic.
• Additional services (fees may apply): allergy injections, immunizations, travel services, physical exams for employment and scholarships, HIV testing, laboratory, X-rays, pediatric immunizations (academic year only), drug screening (academic year only).
• Pharmacy (650-498-2336, ext. 3) and physical therapy (650-723-3195) are available on site.

COUNSELING AND PSYCHOLOGICAL SERVICES (CAPS)

CAPS (650-723-3785) helps students who experience a wide variety of personal, academic, and relationship concerns. Services (without charge) include:
• Evaluation and brief counseling, including personal, couples and group therapy. Students requesting or requiring longer, ongoing therapy incur fees.
• Workshops and groups that focus on students’ social, personal, and academic effectiveness.
• Crisis counseling for urgent situations 24 hours a day.
• Consultation and outreach to faculty, staff, and student organizations.

YWCA SEXUAL ASSAULT CENTER AT STANFORD

The YWCA Sexual Assault Center at Stanford assists students, staff, faculty, and other Stanford campus affiliates who are victims of sexual assault. Located on the first floor of Vaden Health Center, it is open by appointment or drop-in office hours, Monday and Wednesday, 2:00-4:00 PM, and Tuesday and Thursday, 3:00-5:00 PM. The center also can be reached at its 24-hour telephone line (650) 725-9955.

HEALTH PROMOTION SERVICES

Health Promotion Services (650-723-0821) educates and supports students to help them make informed, healthy decisions about their lifestyle and behavior. Services include:
• Individual preventive counseling and resource referral concerning nutrition, weight management, eating and body image, alcohol, tobacco and other drug use, sexual assault and harassment, relationships, intimacy and gender issues, and sexual health.
• Health education speakers, programs, events and workshops at student residences, community centers, student organizations, and for new students (such as Real World: Stanford).
• Academic courses and internships.
• Student groups and volunteer opportunities including Peer Health Educators and anonymous HIV testing and counseling.

HEALTH INSURANCE

All registered students are required to have health insurance. Call (650) 723-2135 for more information. Cardinal Care, a University-sponsored plan for students, fulfills this requirement. Insured by The Chickering Group, an Aetna Company (medical), and ValueOptions (mental health), Cardinal Care features comprehensive, worldwide coverage. Services by referral at Stanford University Medical Center, and lowest costs when one initiates care at Vaden Health Center. Health insurance for spouses, domestic partners and children is available. Options for voluntary dental insurance are offered.

OTHER SERVICES AND PROGRAMS

BOOKSTORE

Web Site: http://www.stanfordbookstore.com

Organized in 1897, Stanford Bookstore, (650) 329-1217, located at 519 Lasuen Mall, provides a diverse selection of books, course materials, and supplies to the students, faculty, staff, and community in and surrounding Stanford. The bookstore carries over 120,000 titles, including a wide selection of books written by Stanford authors, making it one of the largest bookstores in the nation. The bookstore also carries a complete selection of Stanford logo apparel, gifts and souvenirs, periodicals, and a café that provides an enhanced shopping experience. The Computer Store, in the main branch, sells academically priced computer hardware and software. Other services include shipping of purchases, gift certificates, book buyback, fax service, postage stamp sales, an ATM machine, and Enterprise Rent-A-Car hotline. There are five branches in addition to the Stanford Bookstore that also serve the community: the Stanford Professional Bookstore Palo Alto, (650) 614-0280, which carries medical and technical books, supplies, stationery, medical instruments, bestsellers, and clothing; The Track House Sports Shop, (650) 327-8870, at the corner of Campus Drive and Galvez Street; Tresidder Express convenience store in Tresidder Union; the Stanford Shop, (650) 614-0295, at the Stanford Shopping Center; and the Bookshop, (650) 725-2775, at the Cantor Center for the Arts.

STANFORD CONFERENCE SERVICES

A conference is defined as any student or adult group that convenes for part of a day (including a luncheon), overnight, or for several days, outside the regular or summer academic sessions for registered students.

To make arrangements for holding a new conference from June 18 through Labor Day, contact Conference Services at (650) 723-3126, email conferenceinquiries@stanford.edu. For conferences occurring immediately after Labor Day through June 17, contact Non-Academic Facilities Scheduling in the Office of the University Registrar, (650) 723-6755, or email reg-events@stanford.edu. Policies concerning conferences are the responsibility of the offices of the President and the Provost.

External organizations interested in meeting at Stanford must obtain sponsorship from a University department. Conferences initiated by University departments or external organizations must demonstrate consistency with the University’s academic mission. The sponsoring department submits its proposal to the Director of Conferences for review in terms of available facilities and for the approval of the President’s Office.

On-campus residential housing and dining services are normally available from the Sunday following Commencement through Labor Day. Assistance with arrangements for tables, chairs, audiovisual aids, signage, and other equipment may be made through Conference Services. For more information, see http://conference.stanford.edu. During the academic year, housing arrangements for University-sponsored visitors can be made through the SLAC Guest House; see http://slacguesthouse.stanford.edu.

O Ombuds Office: Building 310, Room 104, Main Quad
O Phone: (650) 723-3682
O Email: rasch@stanford.edu
O Web Site: http://www.stanford.edu/dept/ocr/ombuds/
O School of Medicine Ombuds: Martha Mckee
O Email: marta.mcke@stanford.edu

The charge to the Ombuds office at Stanford is: “The Ombudsperson’s task is to protect the interests and rights of members of the Stanford community from injustices or abuses of discretion, from gross inefficiency, from unnecessary delay and complication in the administration of University rules and regulations, and from inconsistency, unfairness, unresponsiveness, and prejudice in the individual’s experience with University activities. The Ombudsperson’s office exists to receive, examine, and channel the complaints and grievances of members of the Stanford community, and to secure expeditious and impartial redress.”

Any troublesome matter in the University community may be discussed in confidence with the University Ombuds. Services of the office are available to students, staff, and faculty.

Although possessing no decision making authority, the Ombuds has wide powers of inquiry. The Ombuds refers matters to the proper person or office expeditiously and also provides conflict resolution services. For the role of the office of the Ombuds in cases of sexual harassment, see the “Non-Academic Regulations” section of this bulletin.

POLICE SERVICES
Department Office: Corner of Campus Drive and Serra Street
Phone: (650) 723-9633
Web Site: http://police.stanford.edu

The Stanford Department of Public Safety is a full service police department that operates 24 hours a day, 7 days a week. For police, fire, or ambulance response, dial 9-1-1, or 9-9-1-1 from a University phone. Emergency assistance can also be obtained by using one of the nearly 100 Blue Emergency Phone Towers strategically placed around campus.

The department is comprised of the following divisions:

The Field Services Division consists of sworn and non-sworn officers who patrol the campus and respond to calls for service. Sworn officers receive their police powers through the Santa Clara County Sheriff’s Office. Sworn officers have the legal authority to stop vehicles, make arrests, and enforce all laws. Non-sworn officers assist the sworn officers with security patrols, evidence collection, crime prevention presentations, and other assigned tasks.

Community Service Division: Community Service Officers (CSOs) enforce the parking rules and regulations on campus, and provide traffic control at special events, construction zones, and accident scenes. CSOs also provide building security during emergency or critical incidents.

The Support Services Division provides logistical, technical, and accounting support to the department. Special events are handled through this division as well. Special Events Personnel (SEPs) provide security at campus events including athletic events, concerts, student-sponsored events, and dignitary visits. SEPs are available for hire by groups needing security at their University events. Contact the special events office at (650) 723-4924, or email event_security@stanford.edu, for more information.

The Administrative Support Division supports the department through training, recruiting, payroll, human resources, and other business functions.

For additional safety information or to view the yearly crime statistics, see the Stanford Safety and Security Almanac, available free from Public Safety, or see http://police.stanford.edu.

OFFICE FOR RELIGIOUS LIFE

Phone: (650) 723-1762
Web Site: http://religiouslife.stanford.edu

The Office for Religious Life in Memorial Church nurtures spiritual, religious, and ethical life for the Stanford University community and beyond. Multifaith exploration and dialogue, central in Stanford’s history from its founding, is a vital part of both its ethos and education.

The Deans for Religious Life oversee and provide support for Stanford Associated Religious (S.A.R.), approximately thirty religious organizations invited to offer their spiritual services to the campus. The deans are committed to welcoming students of all genders and sexual orientations, all religious and non-religious traditions, and all cultural backgrounds. They strive to ensure that students, faculty and staff find lively, thoughtful and supportive contexts on Stanford’s campus, in which to pursue their spiritual journeys.

STANFORD ALUMNI ASSOCIATION

Web Site: http://www.stanfordalumni.org
Phone: (800) 786-2586 or (650) 723-2021

Established in 1892 by members of Stanford’s first graduating class, the Stanford Alumni Association oversees alumni activities and services, including reunions/homecoming, campus conferences, regional and class programming and events, Stanford Magazine, a web site, enrichment education, faculty-led travel, and alumni networking, mentoring, and volunteering.

The Stanford Alumni Association Student Outreach department provides students with networking forums, celebratory and social events, and awards to assist in meeting the needs of college life and transitions after graduation. The Alumni Association seeks to foster classmate and student/alumni connections and develop programs that leverage a community of 200,000 students, alumni, and faculty worldwide. Networking programs include Student-Alumni Connection Lunches and Dinners that take place at alumni homes and businesses and an Alumni Speaker Series that brings successful alumni to campus for conversations about how Stanford has impacted their lives. Award programs include: the J.E. Wallace Sterling Award which recognizes a graduating senior who has demonstrated service to the university and potential for continued service to the University; the Robert L. Pierce Memorial Award which provides funding to a student or student group for a creative project that serves the student community; and Cardinal Class Core, a program for graduating seniors who have demonstrated outstanding leadership and involvement as students and plan to become active alumni volunteers. Celebratory events include a Homecoming Tailgate for students and pre-Commencement events for graduating seniors including Senior Send-Off, Senior Dinner on the Quad, Senior Class Day Luncheon, and The Night Before Party.

STANFORD EVENTS

Stanford Events supports the mission and goals of Stanford University through open engagement of the campus community and the worldwide public. The department has three divisions: Public Events, Stanford Lively Arts, and the Stanford Ticket Office.

Public Events oversees, advises, and produces University events and ceremonies as designated by the President’s office such as: Commencement, Baccalaureate, the University President’s inaugurations, New Student Orientation Convocation, Community Day/Founders’ Celebration, and other high-profile university events. This division also serves in an advisory capacity to the schools, departments, and student groups on campus, and oversees University policy and procedure regarding campus
events. The Public Events office has final approval authority of Stanford facility and open space use for non-academic public events on campus. Information about University event planning, policies, procedures, and University facilities can be found at http://stanfordevents.stanford.edu, or (650) 723-2551.

Stanford Lively Arts, the University’s presenting program, annually brings to campus a full season of music, dance, and theater by world-famous artists and exceptional newcomers. It further research and creativity through world premiers, unique collaborations, and commissions. In addition to on-stage performances, Lively Arts extends and supplements the academic life of the University through master classes, extended residencies, workshops, lectures and demonstrations, and group discussions. Internationally acclaimed artists perform serious work with Stanford students in classrooms as well as in residence halls. Discounts on performances are available for faculty, staff, and students. For tickets and more information, see http://livelyarts.stanford.edu, or call (650) 725-ARTS (2787).

Stanford Ticket Office provides ticketing services for the arts and entertainment events of Stanford University. Tickets for Stanford Lively Arts, Stanford music and drama departments, Stanford Jazz Workshop/Festival, and the ASSU Concert Network are among the event tickets that are available through this office. For more information, see http://tickets.stanford.edu, or call (650) 725-ARTS (2787).

AWARDS AND HONORS

FACULTY AND STAFF AWARDS

KENNETH M. CUTHERBERTSON AWARD

The Kenneth M. Cuthbertson Award was established in 1981 for recognition of exceptional service to Stanford University. It was established by members of the faculty who wish to remain anonymous. All members of the Stanford community are eligible for the award; the sole criterion is the quality of the contribution that the recipients have made to the University. The award provides a way of honoring members of the staff and faculty for their efforts on behalf of the University.

Ordinarilly, one award is made each year. The award was first presented in 1981 to the person for whom it is named. Kenneth M. Cuthbertson was one of the early architects of Stanford’s long-term financial planning and fundraising program. His service to Stanford has set an enduring standard for those who will come after him. The award is made annually at the University Commencement Ceremony.

LOYD W. DINKELSPIEL AWARDS

The Lloyd W. Dinkelspiel Awards recognize distinctive and exceptional contributions to undergraduate education at Stanford University. The two principal awards are made to the faculty or staff members adjudged to have made the most distinctive contribution to the development and enrichment of undergraduate education in its broadest sense. Two awards are also made to graduating seniors who combine academic achievement with effective contributions to undergraduate student life. Preference is given to service in the School of Humanities and Sciences in the area of liberal education. The awards are made from an endowment fund established in memory of Lloyd W. Dinkelspiel, a Stanford alumnus and trustee. The awards are made annually at the University Commencement Ceremony.

WALTER J. GORES AWARDS

The Walter J. Gores Faculty Achievement Awards for excellence in teaching were established by bequest of Walter J. Gores, Stanford Alumnus of the Class of 1917 and a professor at the University of Michigan for 30 years. Teaching is understood in its broadest sense and includes, in particular, lecturing, leading discussions, tutoring, and advising at the undergraduate or professional levels. Any member of the teaching staff of the University is eligible for an award, including all faculty of professorial rank, instructors, lecturers, teaching fellows, and teaching and course assistants. Ordinarily, awards are made to a senior faculty member (associate or full professor) or senior lecturer; a junior faculty member or member of the teaching staff; and a teaching assistant (graduate or undergraduate student). The awards are made annually at the University Commencement Ceremony.

ALLAN COX MEDAL FOR FACULTY EXCELLENCE FOSTERING UNDERGRADUATE RESEARCH

The Allan Cox Medal for Faculty Excellence Fostering Undergraduate Research is awarded annually to a faculty member who has established a record of excellence directing undergraduate research over a number of years. It may also go to a faculty member who has done an especially outstanding job with just one or two undergraduates who demonstrated superior work. The medal was established in memory of the former professor of Geophysics and Dean of the School of Earth Sciences, a strong supporter of faculty-student research collaboration.

HERBERT HOOVER MEDAL FOR DISTINGUISHED SERVICE

David Starr Jordan’s firm belief that every academic degree should represent work actually done in or under the direction of the institution granting it has meant that, since its founding, Stanford has awarded no honorary degrees. As a means of recognizing extraordinary individuals who deserve special acknowledgment, the Stanford Alumni Association in 1962 voted to establish the Herbert Hoover Medal for Distinguished Service. The name pays tribute to the former President’s example of service to his University, to his country, and to the cause of world humanitarianism. Indeed, Mr. Hoover was the first award recipient. The gold medal is presented following selection by an anonymous committee appointed by the Chair of the Board of Directors of the Alumni Association. There have been 11 honorees.

STUDENT AWARDS

BOOTE PRIZE FOR EXCELLENCE IN WRITING

Awarded during the freshman year, the Boothe Prize recognizes excellence in writing. Students are selected for this honor on the basis of essays written for courses fulfilling the Introduction to the Humanities or Writing and Rhetoric requirements. The prize is named for Mr. and Mrs. D. Power Boothe, Jr., whose gifts to the University reflect their interest in the humanities.

PRESIDENT’S AWARD FOR ACADEMIC EXCELLENCE IN THE FRESHMAN YEAR

The President’s Award honors students who have exceptionally distinguished academic records that exemplify a strong program of study in the freshman year. Students eligible for the award normally have completed Writing and Rhetoric and Introduction to the Humanities requirements during their first year at Stanford.

DEANS’ AWARD FOR ACADEMIC ACHIEVEMENT

The Deans of Earth Sciences, Engineering, and Humanities and Sciences recognize from five to ten undergraduate students each year for their academic endeavors. Honorees are cited for noteworthy accomplishments which represent more than a high grade point average or success in course work. Faculty nominate students who have exceptional tangible achievements in classes or independent research, national academic competitions, a presentation or publication for a regional or national audience, or exceptional performance in the creative arts.

FIRESTONE MEDAL FOR EXCELLENCE IN RESEARCH

The Firestone Medal is awarded to seniors in recognition of excellence in undergraduate research. Departments in the School of Humanities and
EXCHANGE PROGRAMS AND CROSS-ENROLLMENT AGREEMENTS

Stanford has exchange programs and cross-enrollment agreements with a number of other colleges and universities. The purpose of these programs and agreements is to offer Stanford students courses and training that are not available in the Stanford curriculum.

EXCHANGE PROGRAMS UNDERGRADUATE

Stanford has exchange programs with four colleges and universities that allow students to exchange schools for a quarter/semester or for a year, depending on the school. These programs are best suited to students in their junior year, when the major area of study has been determined.

Stanford students register for zero units at Stanford during the quarter(s) in which they are attending another college or university and pay the regular Stanford tuition. Courses taken at the other institution are treated as transfer credit back to Stanford. Students should contact the External Credit Evaluation section of the Office of the University Registrar to determine whether the courses taken through an exchange program may qualify for credit toward a Stanford degree. Only the number of units accepted in transfer, not the course titles or the grades received, are recorded on the Stanford transcript.

Exchange programs are currently available at three historically black institutions: Howard University in Washington D.C.; and Morehouse College and Spelman College in Atlanta, Georgia. The exchange program at Dartmouth College in Hanover, New Hampshire, focuses on Native American Studies. Further information is available at the Undergraduate Advising Center.

GRADUATE

The Exchange Scholar Program is open to doctoral students in the fields of humanities, social sciences, and sciences who have completed one full year of study at one of the participating institutions. These students may apply to study at Stanford for a maximum of one academic year to take advantage of particular educational opportunities not available on the home campus. The participating institutions are Brown University, University of Chicago, Columbia University, Cornell University, Harvard University, Massachusetts Institute of Technology, Princeton University, University of Pennsylvania, and Yale University. Further information on the program may be obtained from the Office of the University Registrar, or the graduate dean’s office at participating institutions. Some institutions may place restrictions on specific departments.

Stanford also has separate exchange programs with the University of California, Berkeley, and the University of California, San Francisco. Further information may be obtained at the Office of the University Registrar.

CROSS-ENROLLMENT AGREEMENTS FOR ROTC

Stanford has cross-enrollment agreements for the Reserve Officers’ Training Corps (ROTC) with the Navy and Marine Corps ROTC program at the University of California at Berkeley, the Army ROTC program at Santa Clara University, and the Air Force ROTC program at San Jose State University. The purpose of these agreements is to allow Stanford students to engage in military training while working on their degrees from Stanford. Courses taken in ROTC programs are offered by and through UC Berkeley, Santa Clara, and San Jose State. The courses do not qualify to be used towards the 12-unit requirement for full-time registration status or satisfactory academic progress requirements for Stanford undergraduates. Certain ROTC courses may be eligible to be used as transfer credit if they qualify under Stanford’s transfer credit practices.
Normally, students who participate in ROTC training complete a four-year course of instruction at the respective institution that consists of two years of basic courses during the freshmen and sophomore years, and an advanced course of instruction during the junior and senior years. Students who accept ROTC scholarships are generally subject to a service obligation, depending on the regulation of the particular service.

Stanford students who are enrolled in ROTC programs under the cross-enrollment agreements are eligible to compete for scholarships to include full tuition and a monthly stipend (Navy and Air Force), or other varying amounts (Army). Students normally compete for national scholarships as high school seniors, although current Stanford students may be eligible to enroll in ROTC on a non-scholarship basis. Non-scholarship ROTC students are eligible to compete for scholarships, and individual services may offer additional scholarship programs to current qualifying undergraduate and graduate students. Interested students should contact the appropriate military professor at the host institution to obtain information on these programs and to initiate application procedures (see below).

Students who satisfactorily complete an ROTC program and are awarded a Stanford degree qualify for a commission as a Second Lieutenant in the U.S. Army, an Ensign in the U.S. Navy, a Second Lieutenant in the U.S. Marines, or a Second Lieutenant in the U.S. Air Force.

For questions concerning the ROTC programs, Stanford students should consult one of the following: Air Force ROTC, San Jose State University, San Jose, CA 95192-0051, telephone (408) 924-2960; Army ROTC, Department of Military Science, Santa Clara University, Santa Clara, CA 95053, telephone (408) 554-6836; Naval ROTC, 152 Hearst Gym, University of California, Berkeley, CA 94720-3640, telephone (510) 642-7602.

**COURSES**

**AIR FORCE ROTC**

The following are offered by San Jose State University:

**AS 001A,B. The Foundation of the United States Air Force** — Freshman year. Introduces students to the Air Force and AFROTC. The characteristics, missions, and organization of the Air Force. Officership and professionalism, career opportunities, military customs and courtesies, and communication skills. Required leadership lab.

**AS 002A,B. The Evolution of the United States Air and Space Power** — Sophomore year. Air and space power through historical study and analysis. The capabilities, function, and doctrinal employment of aerospace forces. Emphasis is on oral and written communication skills. Required leadership lab.

**AS 131A,B. Air Force Leadership Studies** — Junior year. Leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills. Application-level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion. Required leadership lab. Prerequisites: AS 001A,B, AS 002A,B, or as determined by department chair.

**AS 141A. National Security Affairs** — Senior year. The national security process, international and regional relations, advanced leadership ethics, and Air Force doctrine with focus on the military as a profession, officership, military justice, civilian control of the military, and current issues affecting military professionalism. Required leadership lab. Pre- or corequisites: AS 131A, or as determined by department chair.

**AS 141B. Preparation for Active Duty** — Senior year. The role of the Air Force officer in contemporary society emphasizing skills to facilitate a smooth transition from civilian to military life. Required leadership lab. Pre- or corequisites: AS 131A,B, or as determined by department chair.

**Leadership Laboratory (LLAB)** — Mandatory. Hands-on. Drill and ceremony; Air Force customs and courtesies; leadership and follower-ship skills. Guest speakers.

**ARMY ROTC**

**FRESHMAN YEAR**

**MILS 11. Basic Leadership I: Introduction to Leading Organizations** — Taught on Stanford campus. The Army’s theory of leadership through the primary field manual on leadership plus supplementary readings as assigned. Basic soldier skills. The Army’s physical fitness program. One 60-minute class per week; three 3-hour leadership labs required. One weekend field exercise away from the University.

**MILS 12. Basic Leadership II: Leadership Theory** — Taught on Stanford Campus. Review Army leadership theory from MILS 11 and survey other leadership theories. Comparative leadership theory. The Army’s formal ethical decision making process. Effective communication techniques. One 60-minute class per week. Three 3-hour leadership labs required. One evening military formal dinner.

**MILS 13. History of Military Leadership** — Taught on Stanford campus. How leadership is a central factor in preparing for and winning battles. How leaders succeed or fail. Leadership principles to train, prepare for, and conduct military operations. One 60-minute class per week. Three 3-hour leadership labs required. One weekend field training exercise away from the University.

**SOPHOMORE YEAR**

**MILS 21. Basic Leadership III: Leadership in Practice** — Taught on Stanford campus. Army leadership theory. Case studies of leadership. How personal leadership is critical to the success or failure of an organization. Ethical organizational climate. One 60-minute class per week. Five 3-hour labs per quarter. One weekend field training exercise away from the University.

**MILS 22. Battle Analysis** — Taught on Stanford campus. Analysis of military battles to understand the reasons for success or failure of both leaders and units in the battles. The principles of war, the role played by formal tactics in battle, the role of weapons systems and their improvements, and the role of leaders. Battles may include examples from the classical period, the American Civil War, WW II, and a modern American battle. One 60-minute class per week. Five 3-hour labs per quarter. One evening military formal dinner.

**MILS 23. Troop Leading Procedures** — Taught on Stanford campus. Plans and orders that enable small units to complete assigned tasks. Formal military decision making process. Planning techniques used to develop orders. Briefing plans and decisions. Review of basic soldier skills. One 60-minute class per week. Five 3-hour labs per quarter. One field training exercise away from the University.

**JUNIOR YEAR**

**MILS 131. Leading Small Organizations I** — Taught at Santa Clara University. Troop leading procedures and military decision making process in small unit planning and preparation. Advanced planning techniques and writing formal orders. Emphasis is on developing advanced skills needed for Army ROTC National Advanced Leader Camp. Three 60-minute classes or two 90-minute classes per week. Five 3-hour labs per quarter. One field training exercise away from the university. Prerequisites: MILS 11, 12, 13, 21, 22, and 23, or consent of department chair.

**MILS 132. Leading Small Organizations II** — Taught at Santa Clara University. How small organization leaders exercise control of their organizations. Emphasis is on planning strategies, problem solving, practical exercises, and preparation for the Army ROTC National Advanced Leadership Camp. Army risk assessment and risk management doctrine. Three 60-minute classes or two 90-minute classes per week. Five 3-hour labs per quarter. One evening military formal dinner. Prerequisite: MILS 131, or consent of department chair.
MILS 133. Leading Small Organizations III — Taught at Santa Clara University. Small unit tactical proficiency. Troop leading procedures and the military decision making process in the preparation of Patrol OPORD’s. How to call for, adjust, and integrate indirect fires into a scheme of maneuver. Conditions and procedures utilized at advance camp to prepare cadets to render optimal performance in the camp environment. Three 60-minute classes or two 90-minute classes per week. Five 3-hour labs per quarter. One field training exercise away from the University. Prerequisite: MILS 132, or consent of department chair.

SENIOR YEAR

MILS 141. Leadership Capstone I: Staff Management — Taught at Santa Clara University. First course in the Capstone to the Army ROTC program. Management of a small Army organization, the Army ROTC cadet battalion, through regular formal meetings and briefings. Assignment to an actual staff or leadership position within the battalion organization. Depending on the position assigned, students are responsible for management areas including budget, logistics, personnel, public affairs, training, and organization operations. Students must show proficiency in understanding Army leadership principles and methods as well as planning and procedures for leading small organizations. Two 90-minute seminars per week. Five 3-hour labs per quarter. One weekend field training exercise away from the University. Prerequisite: MILS 133, or consent of department chair.

MILS 142. Leadership Capstone II: Military Ethics — Taught at Santa Clara University. Second course in the Capstone to the Army ROTC program. Management of the Army ROTC cadet battalion. New position assignments. Introduction to just war theory. Two 90-minute seminars per week. Five 3-hour labs per quarter. One evening military formal dinner. Prerequisite: MILS 141.

MILS 143. Leadership Capstone III: Transition to Lieutenant — Taught at Santa Clara University. Final course in the Capstone to the Army ROTC program. The moral employment of forces and weaponry. Goal is to ensure a smooth transition into the Army as a second lieutenant. Two 90-minute seminars per week. Five 3-hour labs per quarter. One weekend field training exercise away from the University. Prerequisite: MILS 142.

NAVAL ROTC

The Department of Naval Science at UC Berkeley offers programs of instruction for men and women leading to active duty reserve commissions in the U.S. Navy or U.S. Marine Corps. Navy option students enrolled in one of the four-year programs normally complete the following courses during the first two years. Students should consult http://navsci.berkeley.edu/ for more information and changes to course offerings.

NS 1. Introduction to Naval Science — Freshman year.

NS 2. Sea Power and Maritime Affairs — Freshman year.

NS 3. Leadership and Management — Sophomore year.

NS 10. Ship Systems — Sophomore year.

NS 12A. Navigation and Naval Operations I — Junior year.

NS 12B. Navigation and Naval Operations II — Junior year.

NS 401. Naval Ship Systems — Senior year.

NS 412. Leadership and Ethics — Senior year.

In addition to the above courses, Navy option ROTC students are required to participate in weekly professional development laboratories (drill) at UC Berkeley and complete a number of other courses at Stanford including one year of calculus, physics, and English, and one quarter of computer science, and military history or national security policy.

In lieu of NS 401, NS 10, NS 12A and NS 12B, Marine option students participate in Marine Seminars and complete MA 154, History of Littoral Warfare, and MA 20, Evolution of Warfare, or a designated equivalent course. Marine option students also participate in the weekly professional development laboratories.
Nonacademic Regulations

STatement of Nondiscriminatory Policy

Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. It prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, national and ethnic origin, and any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs. The following person has been designated to handle inquiries regarding this policy: the Special Counselor to the President for Campus Relations, Building 170, Main Quad, Stanford University, Stanford, CA 94305-2100; (650) 725-8395 (voice), (650) 723-1216 (TTY), (650) 725-3577 (fax).

Americans with Disabilities Act/Rehabilitation Act Grievance Procedure

For information concerning policies and procedures for students with disabilities, see http://www.stanford.edu/dept/ocr/access/student.html, or the ADA Section 504 Compliance Officer, Diversity and Access Office, Building 310, Main Quad, Mail Code 2100, (650) 723-0755 (Voice), (650) 723-1216 (TTY), (650) 723-1791 (Fax); see also the Student Disability Resource Center at http://www.stanford.edu/group/DRC/.

Policy

The following is quoted from the policy:

I. Policy

Stanford University, in compliance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973 (Section 504), does not discriminate on the basis of disability in administration of its education-related programs and activities, and has an institutional commitment to provide equal educational opportunities for disabled students who are otherwise qualified.

Students who believe they have been subjected to discrimination on the basis of disability, or have been denied access to services or accommodations required by law, have the right to use this grievance procedure.

II. Applicability

The grievance procedure set forth below is applicable to undergraduate and graduate students of the University. In general, it is designed to address disputes concerning the following:

A. Disagreements regarding a requested service, accommodation, or modification of a University practice or requirement;
B. Inaccessibility of a program or activity;
C. Harassment or discrimination on the basis of disability;
D. Violation of privacy in the context of disability.

For disputes regarding certain specific academic accommodations or modification of academic requirements (such as reduction in the number of academic course units taken quarterly or yearly, requests for substitution of courses, or issues relating to academic standing), the alternate procedure set forth in Section V (C) of the Stanford University Policy and Procedure for Student Requests for Services and Accommodations should be followed. For questions regarding which procedure is applicable, contact the Compliance Officer at the Diversity and Access Office.

These two sets of procedures supplement the Statement on Student Academic Grievance Procedures (set forth in the Stanford Bulletin) for disability-related grievances.

III. Compliance Officers

Stanford University’s Compliance Officers are responsible for administering this grievance procedure as well as ensuring compliance with applicable laws. Rosa González is the designated Compliance Officer Diversity and Access Office, located in Building 310 in the Main Quad, (650) 723-0755 (Voice), (650) 723-1216 (TTY), (650) 723-1791 (Fax).

Additional Compliance Officers may be designated from time to time by the Provost from those faculty and staff members knowledgeable concerning disability issues and the legal mandates of state and federal disability statutes.

IV. Informal Resolution—Second Review

A. Prior to initiating the formal complaint procedure set forth below, and as a prerequisite to it, the student shall contact the Compliance Officer for assistance in resolving the matter informally within seven calendar days of the determination communicated by the DRC (if there was such a determination).

If the Compliance Officer is not successful in quickly achieving a satisfactory resolution (that is, generally within seven calendar days), the Compliance Officer will take the steps described in subparagraph ‘B’ below.

B. Second Review Panel: in accordance with the dispute resolution procedures outlined in Section VII of the Stanford University Policy and Procedure for Student Requests for Services and Accommodations, the Compliance Officer will convene an ad-hoc second review panel to review the issue(s) raised. The panel will consist of the following (or their designees): the Compliance Officer reviewing the request, the Director of the DRC, the Dean of Students, and (depending upon the issues) such other academic or administrative personnel as may be appropriate. This panel will review the request, investigate, and attempt to resolve the issues within seven calendar days of the request for or initiation of a second review. No formal report need be issued by the panel, but the panel will document the outcome of its review in a letter to the student. If the student is not satisfied with the panel’s disposition of the matter, the student may file a formal complaint in accordance with the procedure described below.

V. Formal Complaint

If the procedure set forth above for informal resolution does not yield a successful resolution, then the student may file a formal complaint in the following manner:

A. When to File Complaint: complaints shall be filed within ten calendar days of the end of the informal resolution process described above.
B. What to File: a complaint must be in writing and include the following:
   1. The grievant’s name, address, email address, and phone number
   2. A full description of the problem
   3. A statement of the remedy requested
   4. A copy of the letter from the Second Review Panel setting forth the outcome of the informal grievance procedure described above
C. Where to File Complaint: the complaint shall be filed with the Compliance Officer at the Diversity and Access Office, Building 310, Main Quad, Mail Code 2100; (650) 723-1791 (Fax).
D. Notice of Receipt: upon receipt of the complaint, the Compliance Officer reviews the complaint for timeliness and appropriateness for this grievance procedure, and provides the grievant with written notice acknowledging its receipt.
E. Investigation: the Compliance Officer or his or her designee (hereafter collectively referred to as the “grievance officer”) shall promptly initiate an investigation. In undertaking the investigation, the grievance officer may interview, consult with and/or request a written response to the issues raised in the grievance from any individual the grievance officer believes to have relevant information, including faculty, staff, and students.
F. Representation: the grievant and the party against whom the grievance is directed shall have the right to have a representative. The party shall indicate whether he or she is to be assisted by a representative and, if so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.
G. Findings and Notification: upon completion of the investigation, the grievance officer will prepare and transmit to the student, and to the
party against whom the grievance is directed, a final report containing a summary of the investigation, written findings, and a proposed disposition. This transmission will be expected within 45 calendar days of the filing of the formal complaint. The deadline may be extended by the Compliance Office for good cause. The final report shall also be provided, where appropriate, to any University officer whose authority will be needed to carry out the proposed disposition or to determine whether any personnel action is appropriate.

H. Final Disposition: the disposition proposed by the grievance officer shall be put into effect promptly. The grievant or any party against whom the grievance or the proposed disposition is directed may appeal. The appeal to the Provost (as set forth below) will not suspend the implementation of the disposition proposed by the grievance officer, except in those circumstances where the Provost decides that good cause exists making the suspension of implementation appropriate.

VI. Urgent Matters
Whenever the application of any of the time deadlines or procedures set forth in this grievance procedure creates a problem due to the nature of the complaint, the urgency of the matter, or the proximity of the upcoming event, the Compliance Officer will, at the request of the grievant, determine whether an appropriate expedited procedure can be fashioned.

VII. Remedies
Possible remedies under this grievance procedure include corrective steps, actions to reverse the effects of discrimination or to end harassment, and measures to provide a reasonable accommodation or proper ongoing treatment. As stated above, a copy of the grievance officer’s report may, where appropriate, be sent to University officer(s) to determine whether any personnel action should be pursued.

VIII. Appeal
Within ten calendar days of the issuance of the final report, the grievant or the party against whom the grievance is directed may appeal to the Provost the grievance officer’s determination.

An appeal is taken by filing a written request for review with the Compliance Officer at the Diversity and Access Office, Building 310, Room 112, Mail Code 2100; (650) 725-1791 (Fax).

The written request for review must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the proposed disposition. Furthermore, the appeal must be directed only to issues raised in the formal complaint as filed or to procedural errors in the conduct of the grievance procedure itself, and not to new issues.

The Compliance Officer shall forward the appeal to the Provost, and also provide copies to the other party or parties. The review by the Provost or his or her designee normally shall be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision or, conversely, were improper or extraneous criteria brought to bear on the decision?
2. Were there any procedural irregularities that substantially affected the outcome?
3. Given the proper facts, criteria, and procedure, was the decision a reasonable one?

A copy of the Provost’s written decision will be expected within 30 calendar days of the filing of the appeal and shall be sent to the parties, the Compliance Officer and, if appropriate, to the University officer whose authority will be needed to carry out the disposition. The deadline may be extended by the Provost for good cause. The decision of the Provost on the appeal is final.

TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

It is the policy of Stanford University to comply with Title IX of the Education Amendment of 1972 and its regulations, which prohibit discrimination on the basis of sex. The Title IX Compliance Officer is the Special Counselor to the President for Campus Relations and has been appointed to coordinate the University’s efforts to comply with the law. Anyone who believes that, in some respect, Stanford is not in compliance with Title IX and its regulations should contact the Title IX Compliance Officer, the Special Counselor to the President for Campus Relations, Building 170, Main Quad, Stanford University, Stanford, CA 94305-2100; (650) 725-8395 (voice), (650) 723-1216 (TTY), (650) 725-3577 (fax). Grievance procedures to address complaints of discrimination on the basis of sex are set forth in the “Student Non-Academic Grievance section” below.

STUDENT GRIEVANCES

A Stanford undergraduate or graduate student who believes that he or she has been subject to an improper decision on an academic matter may file a grievance pursuant to the Statement on Academic Grievance Procedures (see the “Academic Policies and Statements” section of this bulletin). For other types of grievances, students should review the section that follows on the Student Non-Academic Grievance Procedure, and consult concerning applicable procedures with the the Special Counselor to the President for Campus Relations, Building 170, Main Quad, Stanford University, Stanford, CA 94305-2100; (650) 725-8395 (voice), (650) 723-1216 (TTY), (650) 725-3577 (fax).

STUDENT NON-ACADEMIC GRIEVANCE PROCEDURE

POLICY

The following is quoted from the policy:

1. Applicability

a. It is perhaps inevitable in any university that some students may at times feel improperly treated, and that concerns about unfairness (including potential discrimination and harassment) may also at times arise.

In this regard (and although this grievance procedure is not limited to concerns of discrimination), Stanford University’s Statement of Non-Discriminatory Policy provides in part: “Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. It prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, national and ethnic origin, and any other characteristic protected by applicable law in the administration of its educational policies, admission policies, scholarships and loan programs, and athletic and other University-administered programs.”

b. At Stanford, there are a number of grievance procedures through which students can raise and seek redress for what they believe to be unfair, improper or discriminatory decisions, actions, or treatment. For example:

1. If the matter involves an academic decision, the Student Academic Grievance Procedure may be the applicable procedure.
2. If the matter involves a disability-related concern, the Student ADA/Section 504 Grievance Procedure may be applicable.
3. If the matter involves a student-athlete and his or her sport, the Student-Athlete Grievance Procedure may be applicable.

The purpose of the Student Non-Academic Grievance Procedure is to provide a process for students to seek resolution of disputes and grievances that may not fall within the scope of one of the other grievance processes, including those which may arise in a student’s capacity as a student-employee.
d. This procedure is available to undergraduate and graduate students at Stanford University. It is designed to address individual decisions or individual actions that affect the grievant personally in his or her capacity as a student. This is not a grievance procedure to address the concerns of student groups. Similarly and as a general proposition, dissatisfaction with a departmental, school or University policy or practice of broad or general application is not grounds for a grievance under this procedure; the Special Counselor to the President for Campus Relations may, in his or her discretion, entertain an appeal in exceptional circumstances, such as where (for example) the policy or practice is alleged to be contrary to law.

e. The Special Counselor to the President for Campus Relations, who is also responsible for ensuring the University’s compliance with applicable anti-discrimination laws including Title IX of the Education Amendments of 1972, is responsible for administering this Student Non-Academic Grievance Procedure.

1. The Special Counselor may be contacted at: Special Counselor to the President for Campus Relations, Building 170, Main Quad, Stanford University, Stanford, CA 94305-2100; (650) 725-8395 (voice), (650) 723-1216 (TTY), (650) 725-3577 (fax); http://www.stanford.edu/dept/ocr/.

2. The Special Counselor in his or her sole discretion can decide whether to refer a grievance brought under this procedure to another grievance process. In cases involving allegations of sexual harassment in particular, the Special Counselor may wish to consult with the Director of the Sexual Harassment Policy Office as to the most appropriate way to proceed; see Section 5.d below. In cases involving student employment, the Special Counselor may wish to consult with the University’s Department of Human Resources.

2. Informal Resolution

a. As a general proposition (and although particular circumstances may warrant an exception), the student should first discuss the problem and seek a solution with the individual(s) most directly involved.

b. If no resolution results (or if circumstances make discussion inappropriate with the person most directly involved), the student should then consult with the individual at the next (higher) administrative level in the department, school, residence or University administrative unit. Serious efforts should be made to resolve the issue locally at an informal level without resort to a formal grievance; such efforts may continue even after the formal process is underway.

3. Formal Grievance

a. If informal means of resolution prove inadequate, the student should set forth in writing the substance of the complaint, the grounds for it and the evidence on which it is based, and the efforts taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.

b. The grievance document should be submitted to the Special Counselor. A grievance should be filed in a timely fashion, i.e., normally within thirty days of the end of the academic quarter in which the action that is the subject of the grievance occurred. A delay in filing a grievance may be grounds for rejection of that grievance.

c. The Special Counselor shall promptly initiate a review, which should normally be completed within sixty days. The Special Counselor may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Special Counselor directs. The Special Counselor may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

d. In undertaking this review, the Special Counselor, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.

e. The Special Counselor (or his or her designee) shall issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any). Conduct meriting discipline shall be brought to the attention of the appropriate disciplinary process.

4. Appeal

a. If the student is dissatisfied with the disposition by the Special Counselor (or his or her designee), he or she may appeal to the Provost (Office of the President and Provost, Building 10, Stanford, CA 94305-2061; phone (650) 725-4074; fax (650) 725-1347. The appeal should be filed in writing with the Provost within ten days of the issuance of the decision by the Special Counselor (or his or her designee); a delay in filing the appeal may be grounds for rejection of that appeal.

b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost’s direction. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.

c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within thirty days. That decision is final.

5. General Provisions

a. Time Guidelines—The time frames set forth herein are guidelines. They may be extended by the Special Counselor or Provost, as applicable, in his or her discretion for good cause.

b. Advisers—A student initiating or participating in a grievance under this procedure may be accompanied by an adviser in any discussion with the Special Counselor, the Provost or their designees, or a grievance or grievance appeal officer under this procedure; any adviser must be a current Stanford faculty, staff member or student.

c. Ombuds—Students should be aware that the University Ombuds (http://www.stanford.edu/dept/ocr/ombuds/) and the School of Medicine’s Ombuds (http://www.med.stanford.edu/ombuds/) are available to discuss and advise on any matters of University concern and frequently help expedite resolution of such matters. Although they have no decision making authority, the Ombuds’ Offices have wide powers of inquiry.

d. Sexual Harassment—For further information and resources concerning sexual harassment, students should refer to the webpage of the Sexual Harassment Policy Office at http://harass.stanford.edu.

e. NoRetaliation—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.

OWNERSHIP AND USE OF STANFORD NAME AND TRADEMARKS

Stanford registered marks, as well as other names, seals, logos, and other symbols and marks that are representative of Stanford, may be used solely with permission of Stanford University. Items offered for sale to the public bearing Stanford’s names and marks must be licensed. For complete text of the currently applicable policy, including the University officers authorized to grant permission to use the Stanford name and marks, see Administrative Guide Memo 15.5, Ownership and Use of Stanford Name and Trademarks at http://adminguide.stanford.edu/15_5.pdf.

COPYRIGHT

Copyright laws protect original works of authorship and give the owners of copyrights the exclusive right to do and to authorize others to do certain things in regard to a copyrighted work, including: make copies, distribute the work, display or perform the work publicly, and create derivative works. Copyright laws apply to nearly all forms of captured content,
including traditional works like books, photographs, music, drama and sculpture. The laws also adapt to changes in technologies, and include in their scope modern forms of works like motion pictures, electronic media, software, multimedia works and some databases. Registration is not required to obtain a copyright, so if in doubt, assume a copyright applies.

Unless an exception to the copyright owner’s exclusive rights applies, you must obtain permission from the copyright owner to copy, distribute, display or perform a copyrighted work in any medium for any purpose. Be especially mindful of copyright principles when using the Internet. Just because a work is posted on the Internet does not mean that the owner of the copyright has given you permission to use it. And, you should not be posting material onto the Internet without copyright clearance.

Stanford has licenses with many publishers, which licenses permit copying of materials in accordance with the educational, research or administrative functions of the University. In addition, there are four major exceptions to the copyright owner’s exclusive rights, which permit copying without permission under limited circumstances. These are: the fair use exception, the library exception, the face-to-face teaching exception, and the distance-learning exception. For a more detailed explanation of these exceptions, the copyright laws and Stanford’s copyright policies, please review the Provost’s Copyright Reminder, http://www.stanford.edu/dept/ucomm/provost/copyright_reminder.html. It is each person’s responsibility to be aware of and abide by copyright law; violation may result in civil or criminal liability, and constitutes grounds for University discipline, up to and including discharge, dismissal and expulsion.

PEER-TO-PEER FILE SHARING

The use of file-sharing networks and software to download and share copyrighted works like software, music, movies, television programs, and books can violate copyright laws. Both the person who makes an illegal copy of a copyrighted work available and the person who receives or downloads an illegal copy have violated the law and Stanford policies. Under the Digital Millennium Copyright Act (DMCA), copyright owners are entitled to notify Internet service providers, such as Stanford, that IP addresses linked to the Stanford network are sharing copies of music and videos without authorization. The law requires the University to respond to such complaints by eliminating access to the infringing materials, and may further require Stanford to identify students, faculty, staff, or others who have violated copyright laws. The University will terminate access and will provide information as required by law. Furthermore, the University also will suspend or terminate computer access to the Stanford network, including termination of the SUNet ID, to members of the community who continue to violate copyright laws. Finally, the University will take action through the student, employee, or faculty disciplinary processes if necessary. For more information about file-sharing, please refer to Residential Computing’s online resource, File-Sharing and Copyright Law at http://rescomp.stanford.edu/info/dmca/.

DOMESTIC PARTNERS

In October 1990, Stanford University adopted a domestic partners policy. This policy, which implements the University’s nondiscrimination policy, makes services that have historically been available to married students available on an equal basis to students with same-sex or opposite-sex domestic partners. These services include access to student housing, a courtesy ID that provides access to University facilities, and the ability to purchase medical care at Vaden Health Service. A domestic partnership is defined as an established long-term partnership with an exclusive mutual commitment in which the partners share the necessities of life and ongoing responsibility for their common welfare.

SEXUAL HARASSMENT AND CONSENSUAL SEXUAL OR ROMANTIC RELATIONSHIPS

SUMMARY

Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

POLICY

The following is quoted from the policy:

1. In General
   a. Applicability and Sanctions for Policy Violations — This policy applies to all students, faculty and staff of Stanford University, as well as to others who participate in Stanford programs and activities. Its application includes Stanford programs and activities both on and off-campus, including overseas programs. Individuals who violate this policy are subject to discipline up to and including discharge, expulsion, and/or other appropriate sanction or action.
   b. Respect for Each Other — Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. It is expected that students, faculty, staff and other individuals covered by this policy will treat one another with respect.
   c. Prompt Attention — Reports of sexual harassment are taken seriously and will be dealt with promptly. The specific action taken in any particular case depends on the nature and gravity of the conduct reported, and may include intervention, mediation, investigation and the initiation of grievance and disciplinary processes as discussed more fully below. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.
   d. Confidentiality — The University recognizes that confidentiality is important. Sexual harassment advisers and others responsible to implement this policy will respect the confidentiality and privacy of individuals reporting or accused of sexual harassment to the extent reasonably possible. Examples of situations where confidentiality cannot be maintained include circumstances when the University is required by law to disclose information (such as in response to legal process) and when disclosure is required by the University’s outweighing interest in protecting the rights of others.
   e. Protection Against Retaliation — Retaliation and/or reprisals against an individual who in good faith reports or provides information in an investigation about behavior that may violate this policy are against the law and will not be tolerated. Intentionally making a false report or providing false information, however, is grounds for discipline.
   f. Relationship to Freedom of Expression — Stanford is committed to the principles of free inquiry and free expression. Vigorous discussion and debate are fundamental to the University, and this policy is not intended to stifle teaching methods or freedom of expression generally, nor will it be permitted to do so. Sexual harassment, however, is neither legally protected expression nor the proper exercise of academic freedom; it compromises the integrity of the University, its tradition of intellectual freedom and the trust placed in its members.

2. What Is Sexual Harassment?

Unwelcome sexual advances, requests for sexual favors, and other visual, verbal or physical conduct of a sexual nature constitute sexual harassment when:

- Unwelcome sexual advances, requests for sexual favors, and other visual, verbal or physical conduct of a sexual nature constitute sexual harassment when:

...
a. It is implicitly or explicitly suggested that submission to or rejection of the conduct will be a factor in academic or employment decisions or evaluations, or permission to participate in a University activity; or

b. The conduct has the purpose or effect of unreasonably interfering with an individual’s academic or work performance or creating an intimidating or hostile academic, work or student living environment.

Determining what constitutes sexual harassment depends upon the specific facts and the context in which the conduct occurs. Sexual harassment may take many forms—subtle and indirect, or blatant and overt. For example,

- It may be conduct toward an individual of the opposite sex or the same sex.
- It may occur between peers or between individuals in a hierarchical relationship.
- It may be aimed at coercing an individual to participate in an unwanted sexual relationship or it may have the effect of causing an individual to change behavior or work performance.
- It may consist of repeated actions or may even arise from a single incident if sufficiently egregious.

The University’s Policy on Sexual Assault (see Guide Memo 23.3, Sexual Assault, http://adminguide.stanford.edu/23_3.pdf) may also apply when sexual harassment involves physical contact.

3. What To Do About Sexual Harassment

Individuals seeking further information are directed to the following resources:

- The Sexual Harassment Policy Office (Main Quad, Bldg. 310, Room 104; (650) 723-1583 or 327-8259; email: harass@stanford.edu for information, consultation, advice, or to lodge a complaint. Note that anonymous inquiries can be made to the SHPO by phone during business hours.
- Any designated Sexual Harassment Adviser or resource person listed in 3.a or 5.a.

The following are the primary methods for dealing with sexual harassment at Stanford. They are not required to be followed in any specific order. However, early informal methods are often effective in correcting questionable behavior.

a. Consultation—Consultation about sexual harassment is available from the Sexual Harassment Policy Office, Sexual Harassment Advisers (including residence deans), human resources officers, employee relations specialists, counselors at Counseling and Psychological Services (CAPS) or the Help Center, chaplains at Memorial Church, ombudspersons and others. A current list of Sexual Harassment Advisers is available from the Sexual Harassment Policy Office and at http://harass.stanford.edu/index.html#Advisers. Consultation is available for anyone who wants to discuss issues related to sexual harassment, whether or not “harassment” actually has occurred, and whether the person seeking information is a complainant, a person who believes his or her own actions may be the subject of criticism (even if unwarranted), or a third party.

Often there is a desire that a consultation be confidential or “off the record.” This can usually be achieved when individuals discuss concerns about sexual harassment without identifying the other persons involved, and sometimes even without identifying themselves. Confidential consultations about sexual harassment also may be available from persons who, by law, have special professional status, such as:

- Counselors at Counseling and Psychological Services (CAPS), http://caps.stanford.edu/
- Counselors at the Help Center, http://www.stanford.edu/dept/helpcenter/
- Chaplains at Memorial Church

- The University Ombudsperson, http://www.stanford.edu/dept/ocr/ombudsperson/
- The Medical Center Ombudsperson, http://www.med.stanford.edu/ombuds/

In these latter cases, the level of confidentiality depends on what legal protections are held by the specific persons receiving the information and should be addressed with them before specific facts are disclosed. For more information see http://harass.stanford.edu/SHisources.html#CONRESOURCES.

For further information on confidentiality, see Section 1(d) above.

b. Direct Communication—An individual may act on concerns about sexual harassment directly, by addressing the other party in person or writing a letter describing the unwelcome behavior and its effect and stating that the behavior must stop. A Sexual Harassment Adviser can help the individual plan what to say or write, and likewise can counsel persons who receive such communications. Reprisals against an individual who in good faith initiates such a communication violate this policy.

c. Third Party Intervention—Depending on the circumstances, third party intervention in the workplace, student residence or academic setting may be attempted. Third party intervenors may be the Sexual Harassment Advisers, human resources professionals, the ombudspersons, other faculty or staff, or sometimes mediators unrelated to the University.

When third party intervention is used, typically the third party (or third parties) will meet privately with each of the persons involved, try to clarify their perceptions and attempt to develop a mutually acceptable understanding that can insure that the parties are comfortable with their future interactions. Other processes, such as a mediated discussion among the parties or with a supervisor, may also be explored in appropriate cases.

Possible outcomes of third party intervention include explicit agreements about future conduct, changes in workplace assignments, substitution of one class for another, or other relief, where appropriate.

d. Formal Grievance, Appeal, and Disciplinary Processes—Grievance, appeal, or disciplinary processes may be pursued as applicable.

1. Grievances and Appeals—The applicable procedure depends on the circumstances and the status of the person bringing the charge and the person against whom the charge is brought. Generally, the process consists of the individual’s submission of a written statement, a process of fact-finding or investigation by a University representative, followed by a decision and, in some cases, the possibility of one or more appeals, usually to Stanford administrative officers at higher levels. The relevant procedure (see below) should be read carefully, since the procedures vary considerably.

If the identified University fact-finder or grievance officer has a conflict of interest, an alternate will be arranged, and the Director of the Sexual Harassment Policy Office or the Director of Employee and Labor Relations can help assure that this occurs.

In most cases, grievances and appeals must be brought within a specified time after the action complained of. While informal resolution efforts will not automatically extend the time limits for filing a grievance or appeal, in appropriate circumstances the complainant and the other relevant parties may mutually agree in writing to extend the time for filing a grievance or appeal.

A list of the established grievance and appeal procedures is located at http://hrweb.stanford.edu/ehr/policies/list_grievance_procedures.html. Copies may also be obtained from the Sexual Harassment Policy Office, http://www.stanford.edu/group/SexHarass.

Copies of the following may be obtained from Employee and Labor Relations, 651 Serra Street:
• “Solving Workplace Problems at Stanford: Understanding the Staff Dispute Resolution Policy” (also at http://hrweb.stanford.edu/forms/staffresolution.pdf)
• “Solving Workplace Problems at Stanford: Information for Academic Staff – Librarians and Academic Staff – Research Associates”
• “The Dispute Resolution Process (A User’s Guide)”

2. Disciplinary Procedures—In appropriate cases, disciplinary procedures may be initiated. The applicable disciplinary procedure depends on the status of the individual whose conduct is in question. For example, faculty are subject to the Statement on Faculty Discipline http://www.stanford.edu/dept/provost/faculty/policies/handbook/ch4.html#statementonfacultydiscipline and students to the Fundamental Standard. For additional information related to student judicial affairs, see http://www.stanford.edu/dept/vpsa/judicialaffairs/

The individuals referenced in this section are available to discuss these options and differing methods for dealing with sexual harassment.

4. Procedural Matters
a. Investigations—If significant facts are contested, an investigation may be undertaken. The investigation will be conducted in a way that respects, to the extent possible, the privacy of all of the persons involved. In appropriate cases, professional investigators may be asked to assist in the investigation. The results of the investigation may be used in the third party intervention process or in a grievance or disciplinary action.

b. Recordkeeping—The Sexual Harassment Policy Office will track reports of sexual harassment for statistical purposes and report at least annually to the University President concerning their number, nature and disposition. The Sexual Harassment Policy Office may keep confidential records of reports of sexual harassment and the actions taken in response to those reports, and use them for purposes such as to identify individuals or departments likely to benefit from training so that training priorities can be established. No identifying information will be retained in cases where the individual accused was not informed that there was a complaint.

c. Indemnification and Costs—The question sometimes arises as to whether the University will defend and indemnify a Stanford employee accused of sexual harassment. California law provides, in part, “An employer shall indemnify [its] employee for all that the employee necessarily expends or loses in direct consequence of the discharge of his [or her] duties as such . . . .” The issue of indemnification depends on the facts and circumstances of each situation. Individuals who violate this policy, however, should be aware that they and/or their schools, institutes, or other units may be required to pay or contribute to any judgments, costs and expenses incurred as a result of behavior that is wrongful and/or contrary to the discharge of the employee’s duties. In general, see Administrative Guide Memo 15.7 (http://adminguide.stanford.edu/15_7.pdf).

5. Resources for Dealing with Sexual Harassment
a. Advice — Persons who have concerns about sexual harassment should contact the Sexual Harassment Policy Office, any Sexual Harassment Adviser at http://harass.stanford.edu/index.html#Advisers or one of the other individuals listed below. Reports should be made as soon as possible: the earlier the report, the easier it is to investigate and take appropriate remedial action. When reports are long delayed, the University will try to act to the extent it is reasonable to do so, but it may be impossible to achieve a satisfactory result after much time has passed.

Likewise, anyone who receives a report or a grievance involving sexual harassment should promptly consult with the Sexual Harassment Policy Office or with a Sexual Harassment Adviser.

There are a number of individuals specially trained and charged with specific responsibilities in the area of sexual harassment. In brief, they are:

• Sexual Harassment Advisers (http://harass.stanford.edu/index.html#Advisers) serve as resources to individuals who wish to discuss issues of sexual harassment, whether because they have been harassed or because they want information about the University’s policy and procedures. There is usually at least one Adviser assigned to each of the schools at the University and to each large work unit; most of the residence deans also have been appointed as Sexual Harassment Advisers. Advisers are also authorized to receive complaints.

• The Director of the Sexual Harassment Policy Office is responsible for the implementation of this policy. The Director’s Office also provides advice and consultation to individuals when requested; receives complaints and coordinates their handling; supervises the other Advisers; encourages and assists prevention education for students, faculty and staff; keeps records showing the disposition of complaints; and generally coordinates matters arising under this policy. Because education and awareness are the best ways to prevent sexual harassment, developing awareness, education and training programs and publishing informational material are among the most important functions of the Sexual Harassment Policy Office (http://harass.stanford.edu).

• As stated above, individuals with concerns about sexual harassment may also discuss their concerns informally with psychological counselors (for example through CAPS or the HELP Center), chaplains (through the Memorial Chapel), or University or Medical School ombudspersons. For more information, see http://harass.stanford.edu/Shissues.html#CONRESOURCES.

b. External Reporting — Sexual harassment is prohibited by state and federal law. In addition to the internal resources described above, individuals may pursue complaints directly with the government agencies that deal with unlawful harassment and discrimination claims, e.g., the U.S. Equal Employment Opportunity Commission (EEOC), the Office for Civil Rights (OCR) of the U.S. Department of Education, and the State of California Department of Fair Employment and Housing (DFEH). These agencies are listed in the Government section of the telephone book. A violation of this policy may exist even where the conduct in question does not violate the law.

6. Consensual Sexual or Romantic Relationships
a. In General — There are special risks in any sexual or romantic relationship between individuals in inherently unequal positions, and parties in such a relationship assume those risks. In the University context, such positions include (but are not limited to) teacher and student, supervisor and employee, senior faculty and junior faculty, mentor and trainee, adviser and advisee, teaching assistant and student, coach and athlete, and the individuals who supervise the day-to-day student living environment and student residents. Because of the potential for conflict of interest, exploitation, favoritism, and bias, such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the teacher-student context. They may, moreover, be less consensual than the individual whose position confers power or authority believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

Moreover, such relationships may harm or injure others in the academic or work environment. Relationships in which one party is in a position to review the work or influence the career of the other may provide grounds for complaint by third parties when that relationship gives undue access or advantage, restricts opportunities, or creates a perception of these problems. Furthermore, circumstances may change, and conduct that was previously welcome may become unwelcome. Even when both parties have consented at the outset to
a romantic involvement, this past consent does not remove grounds for a charge based upon subsequent unwelcome conduct.

Where such a relationship exists, the person in the position of greater authority or power will bear the primary burden of accountability, and must ensure that he or she—and this is particularly important for teachers—does not exercise any supervisory or evaluative function over the other person in the relationship. Where such recusal is required, the recusing party must also notify his or her supervisor, department chair or dean, so that such chair, dean or supervisor can exercise his or her responsibility to evaluate the adequacy of the alternative supervisory or evaluative arrangements to be put in place. Staff members may notify their local human resources officers. To reiterate, the responsibility for recusal and notification rests with the person in the position of greater authority or power. Failure to comply with these recusal and notification requirements is a violation of this policy, and therefore grounds for discipline.

b. With Students—At a university, the role of the teacher is multifaceted, including serving as intellectual guide, counselor, mentor and advisor; the teacher’s influence and authority extend far beyond the classroom. Consequently and as a general proposition, the University believes that a sexual or romantic relationship between a teacher and a student, even where consensual and whether or not the student would otherwise be subject to supervision or evaluation by the teacher, is inconsistent with the proper role of the teacher, and should be avoided. The University therefore very strongly discourages such relationships.

7. Policy Review and Evaluation

This policy went into effect on October 6, 1993, and was amended on November 30, 1995, and on May 30, 2002. It is subject to periodic review, and any comments or suggestions should be forwarded to the Director of the Sexual Harassment Policy Office.

RESOURCES

The following is a summary of resources concerning sexual harassment available to members of the Stanford Community:

A brochure containing the policy, a list of current sexual harassment advisers, confidential resources, and other helpful information is available online at http://harass.stanford.edu, and in printed form from the Sexual Harassment Policy Office at (650) 723-1583, Building 310, Main Quad, Room 104, MC: 2100. Copies of the University policy on sexual assault, which complements this sexual harassment policy, as well as all other documents mentioned in this section, are also available at the Sexual Harassment Policy Office. All faculty, staff, and students who have questions regarding this policy and its enforcement can consult with a Sexual Harassment Adviser or can be directed to the local Personnel Officer or Regional Human Resources Manager. Faculty members should contact their dean or department chair, and students should contact the Special Counselor and Dean of Student Affairs.

Sexual Harassment Policy Office—telephone: (650) 723-1583; email: Haras@stanford.edu.
Director: Laraine Zappert (Clinical Professor, Psychiatry and Behavioral Sciences)
Assistant Director: Nanette Andrews

SEXUAL ASSAULT

SUMMARY

The following summarizes the policy on Sexual Assault and provides information on resources available to members of the Stanford community.

55Background—Stanford University’s policy and procedures on sexual harassment are published in Administrative Guide Memo 23.2 and are republished annually in the Stanford Bulletin and elsewhere. The University’s Policy on Sexual Assault supplements them, describing Stanford University’s policy and procedures specifically concerning sexual assault. That policy has been enacted by Stanford University in accordance with California State Law, Assembly Bill 3098, Postsecondary Education: Student Safety, July, 1990.

Definition—For the purposes of the policy, “sexual assault” includes, but is not limited to, rape, forced sodomy, forced oral copulation, rape by a foreign object, sexual battery, or threat of sexual assault.

Policy—Sexual assault by force or coercion, including deliberate coercion through the use of drugs or alcohol, is absolutely unacceptable at Stanford University. Any member of the Stanford community who commits sexual assault at or on the grounds of the University, or at any of the University’s off-campus facilities or activities, or at the facilities or activities of any affiliated student organization, will face maximal institutional sanctions, in addition to any prosecutions external authorities may undertake. Stanford University is committed to providing information on services, resources, and treatment available to victims of sexual assault.

Notification—With the consent of the victim, charges of sexual assault received by University offices or personnel shall be communicated promptly to the Department of Public Safety, 711 Serra Street, telephone 9-911 for emergency response or (650) 723-9633 during normal business hours, or, in the case of a student, to the sexual assault response team at YWCA Sexual Assault Center at Stanford at Vaden Health Service, 866 Campus Drive, telephone 725-9955.

Legal Reporting Requirements—Health care professionals are expected to fulfill legally mandated reporting requirements.

Emergency Services Available to Victims—Victims of sexual assault are urged to seek immediate attention from emergency police, medical, and counseling services. On the Stanford campus and in the immediate vicinity, the following provide 24-hour response and will arrange for police assistance, medical assistance, emotional support services, and advocacy and support:

“911” Emergency Network: dial 9-911 from University phones or 911 from outside phones
Santa Clara Valley Medical Center, 751 South Bascom Avenue, San Jose, telephone (408) 885-5000
YWCA Sexual Assault Center at Stanford, for students, at the Vaden Health Service, telephone (650) 725-9955
Stanford University Hospital, 300 Pasteur Drive, Stanford, telephone (650) 723-5111

Non-Emergency Resources—Additional resources for students are available at Vaden Health Service at (650) 723-3785, including short-term counseling, referral to long-term therapy, follow-up pregnancy testing, and testing and treatment for sexually transmitted diseases. Additional services for faculty and staff are available at the University’s HELP Center, Galvez House (723-4577), including general counseling, information, support, and referral. The University ombudsperson (723-3682) is available to all in the Stanford community for general counseling, advice, and advocacy.

Ongoing Case Management Procedures—Both informal procedures and formal grievance procedures for case management of sexual assault charges are given in the University’s policy on Sexual Harassment appearing as Administrative Guide Memo 23.2 and published annually in the Stanford Bulletin. Victims are to be kept informed by those responsible for those procedures of the status of any disciplinary proceedings and the results of any disciplinary action or appeal, providing that the victim agrees in advance, in writing, to treat this information as confidential. The offices of the Dean of Students are available to help student victims deal with academic difficulties that may arise because of the victimization and its impact.
Information Requests and Confidentiality — The University offices responding to charges of sexual assault have established protocols for protecting confidentiality and for handling inquiries from the press, concerned students, and parents.

Information about Options — The University offices responding to charges of sexual assault will inform victims at a minimum, of the options of: criminal prosecution, civil prosecution, the disciplinary process, the appropriate grievance procedure, the availability of mediation, alternative housing assignments, and academic assistance alternatives.

POLITICAL ACTIVITIES

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 15.1, Political Activities, available at http://adminguide.stanford.edu/15_1.pdf.

SUMMARY

The following summarizes the policy on Political Activities:

Stanford University, as a charitable entity, is subject to federal, state, and local laws and regulations regarding political activities: campaign activities, lobbying, and the giving of gifts to public officials.

While all members of the University community are naturally free to express their political opinions and engage in political activities to whatever extent they wish, it is very important that they do so only in their individual capacities and avoid even the appearance that they are speaking or acting for the University in political matters.

In the limited circumstances where individuals must speak or act on behalf of the University in the political arena, they must do so in accordance with the provisions of this Guide Memo.

POLICY

The following is quoted from the policy:

1. Summary of Legal Requirements and Restrictions
   a. Campaign Activities: contributions of money, goods, or services to candidates for political office and in support of or opposition to ballot measure campaigns are subject to a wide variety of political laws. Depending on the jurisdiction and the campaign, political contributions may be prohibited or limited and, in nearly all cases, are subject to a complicated series of disclosure rules. Because of the University’s tax-exempt status, the University is legally prohibited from endorsing candidates for political office or making any contribution of money, goods, or services to candidates. It is important, therefore, that no person inadvertently cause the University to make such a contribution.

b. Lobbying: lobbying can generally be described as any attempt to influence the action of any legislative body (for example, Congress, state legislatures, county boards, city councils, and their staffs) or any federal, state, or local government agency. Laws regulating lobbying exist at the federal, state, and local levels but can differ widely in scope, depending on the jurisdiction. Some laws, for example, only regulate lobbying of the legislative branch. Others, however, also cover lobbying of administrative agencies and officers in the executive branch (for example, lobbying for federally-funded grants). To one degree or another, however, most lobbying laws require registration and reporting by individuals engaged in attempts to influence governmental action.

Tax-exempt organizations are permitted to lobby, and the University engages in lobbying on a limited number of issues, mostly those affecting education, research, and related activities. There is usually some threshold of time or money spent on lobbying that triggers registration and reporting requirements. Regardless of thresholds, however, no University employee — other than the following individuals, on matters under their jurisdiction — may lobby on behalf of the University without specific authorization:

- President
- Provost
- Deans of the Seven Schools
- Vice Provost and Dean of Research
- Vice President for Business Affairs and Chief Financial Officer
- Vice President for Faculty and Staff Services
- Director of the Stanford Linear Accelerator Center
- Director of the Hoover Institution
- General Counsel
- Director of Government and Community Relations

The Vice Provost and Dean of Research may grant permission to faculty members to lobby on behalf of the University for specific purposes. The Director of Government and Community Relations may grant permission to staff members to lobby on behalf of the University for specific purposes. All lobbying on behalf of the University should be coordinated with the Director of Government and Community Relations.

c. Giving of Gifts to Public Officials and Staff: almost all jurisdictions have strict rules on the extent to which gifts and honoraria may be given to public officials (both elected and non-elected officials and, often, staff). In some cases gifts and honoraria are prohibited; in others they are limited; and in most cases they are subject to detailed disclosure. In addition, in some jurisdictions such as California, gifts to both state and local public officials can result in a public official’s disqualification from participation in any governmental action affecting the interests of the donor. Meals, travel, and entertainment are the most common types of gifts, but gift rules can also apply in cases where public officials attend a reception or receive tickets to sporting or other events.

As a non-profit organization, the University generally does not give gifts to public officials and, in those limited cases where it does give such gifts, it must do so in accordance with all applicable laws and regulations. Therefore, any University employee who, on behalf of the University, wishes to make a gift to a public official must receive prior approval from the Director of Government and Community Relations before making such a gift.

d. Reporting of Political Activities: the University must report most of its political activities above certain thresholds. Therefore, any University employee engaging in such activities on behalf of the University should carefully review the remainder of this Guide Memo and should discuss the relevant activities in advance with the Director of Government and Community Relations.

2. Prohibited and Restricted Political Activities
   a. In General:
      1. No person may, on behalf of the University, engage in any political activity in support of or opposition to ballot measure campaigns. (Including giving or receiving funds or endorsements), nor shall any University resources be used for such purpose.
      2. No person may, on behalf of the University, lobby (or use University resources to lobby) any federal, state, or local legislative or administrative official or staff member unless specifically authorized to do so. Any lobbying activity, even when authorized, must be conducted in compliance with this Guide Memo, other applicable University policies, and applicable law.
      3. No person may, on behalf of the University, give a gift (or use any University resources to give a gift) to any federal, state, or local official or staff member, except in compliance with this Guide Memo, other applicable University policies, and applicable law.
      4. No person supporting candidates for public office or engaging in other political activities may use University space or facilities or receive University support, except in the limited ways described in section 3A, below.
      5. No person may use for lobbying activities federally-funded contract or grant money received by the University.

   Even the foregoing activities that are only restricted, rather than prohibited, may be subject to limitations imposed by law. Therefore, any person engaging in the activity, or contemplating doing so, should consult with the Director of Government and Community Relations.

b. Guidelines for Avoiding Prohibited Partisan Political Activities: the following guidelines should assist in preventing the involvement
or apparent involvement of the University in political activities in support of or opposition to any candidate for elective public office, that is, partisan political activities. Except in the limited circumstances set forth in section 3.b., below:

1. **Use of Name and Seal:** neither the name nor seal of the University or of any of its schools, departments, or institutions should be used on letters or other materials intended for partisan political purposes.

2. **Use of Address and Telephones:** no University office should be used as a return mailing address for partisan political mailings, and telephone service that is paid by the University, likewise, should not be used for partisan political purposes. (Obviously, a student’s dormitory room and telephone service that are personal to the student may be used for these purposes.)

3. **Use of Title:** the University title of a faculty or staff member or other person should be used only for identification and should be accompanied by a statement that the person is speaking as an individual and not as a representative of the University.

4. **Use of Services and Equipment:** University services, such as Interdepartmental Mail; equipment, such as duplicating machines, computers, and telephones; and supplies should not be used for partisan political purposes.

5. **Use of Personnel:** no University employee may, as part of his or her job, be requested to perform tasks in any way related to partisan political purposes.

3. **Permissible Activities**

   a. **In General:** as noted above, the federal, state, and local laws which limit the partisan political activities that can take place in University facilities and with University support in no way inhibit the expression of personal political views by any individual in the University community. Nor do they forbid faculty, students, or staff from joining with others in support of candidates for office or in furtherance of political causes. There is no restriction on discussion of political issues or teaching of political techniques. Academic endeavors which address public policy issues are in no way affected.

   Because the University encourages freedom of expression, political activities which do not reasonably imply University involvement or identification may be undertaken so long as regular University procedures are followed for use of facilities. Examples of permissible activities are:

   1. Use of areas, such as White Plaza, for tables, speeches, and similar activities.

   2. Use of auditoriums for speeches by political candidates, but subject to rules of the Internal Revenue Service, the Federal Election Commission, and the California Fair Political Practices Commission, and other applicable laws. Arrangements must be made with University Events and Services. (See also Guide Memo 82.1, Public Events, for more information.)

   To reiterate, because tax and political compliance laws impose restrictions, and even prohibitions, on certain political activities and on the use of buildings and equipment at a non-profit institution such as the University, any such activities must be in compliance with these legal requirements. Individuals taking political positions for themselves or groups with which they are associated, but not as representatives of the University, should clearly indicate, by words and actions, that their positions are not those of the University and are not being taken in an official capacity on behalf of the University.

   b. **Limited University Political Activities:** limited activities relating to specific federal, state, or local legislation or ballot initiatives are permissible where (1) the subject matter is directly related to core interests of the University’s activities; (2) the President has determined that the University should take a position; and (3) the individuals who speak or write on the University’s behalf are specifically authorized to do so.

4. **Responsibility for Interpretation:** the Director of Government and Community Relations, in consultation with the General Counsel, is the administrative officer responsible for interpretation and application of the above guidelines. Questions on whether planned activities are consistent with the University’s obligations should be directed to the Dean of Students, who will consult with the Director of Government and Community Relations and/or the General Counsel. All other questions on whether planned activities are consistent with the University’s obligations should be addressed directly to the Director of Government and Community Relations or the General Counsel.

### CAMPUS DISRUPTIONS

The University’s policy on campus disruption applies to students, faculty, and staff. It is published in its complete form on the Judicial Affairs Office web site at http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html.

#### POLICY

The following is quoted from the policy:

> Because the rights of free speech and peaceable assembly are fundamental to the democratic process, Stanford firmly supports the rights of all members of the University community to express their views or to protest against actions and opinions with which they disagree.

> All members of the University also share a concurrent obligation to maintain on the campus an atmosphere conducive to scholarly pursuits, to preserve the dignity and seriousness of University ceremonies and public exercises, and to respect the rights of all individuals.

> The following regulations are intended to reconcile these objectives.

> It is a violation of University policy for a member of the faculty, staff, or student body to:

1. Prevent or disrupt the effective carrying out of a University function or approved activity, such as lectures, meetings, interviews, ceremonies, the conduct of University business in a University office, and public events.

2. Obstruct the legitimate movement of any person about the campus or in any University building or facility.

> Members of the faculty, staff, and student body have an obligation to leave a University building or facility when asked to do so in the furtherance of the above regulations by a member of the University community acting in an official role and identifying himself or herself as such; members of the faculty, staff, or student body also have an obligation to identify themselves, when requested to do so by such a member of the University community who has reasonable grounds to believe that the person(s) has violated section (1) or (2) of this policy and who has so informed the person(s).

#### APPLICATION

The following are examples to illustrate the policy:

The policy has been applied to the following actions: refusal to leave a building which has been declared closed; obstructing the passage into or out of buildings by sitting in front of doorways; preventing University employees from entering their workplace; preventing members of a class from hearing a lecture or taking an examination; preventing the instructor from giving a lecture, by means of shouts, interruptions, or chants; preventing others from hearing a scheduled speaker by means of shouts, interruptions, or chants; refusing to leave a closed meeting when unauthorized to attend; and intruding upon or refusing to leave a private interview.

It should be understood that while the above are examples of extraordinarily disruptive behavior, the application of the policy also takes situational factors into consideration. Thus, for example, conduct appropriate at a political rally might constitute a violation of the Policy on Campus Disruption if it occurred within a classroom.

There is no “ordinary” penalty which attaches to violations of the Policy on Campus Disruption. Each case is fact-specific; considerations would include: the gravity of the offense, and prior similar misconduct. As a general rule, the more serious the offense, the less it matters that the violation had otherwise not done wrong.
USE OF THE MAIN QUADRANGLE AND MEMORIAL COURT

POLICY

The following is quoted from the policy:

The Main Quadrangle and Memorial Court are part of Stanford University’s academic preserve due to their locations at the heart of the campus. To protect and enhance their historic status, University policy limits activities primarily to established or traditional ceremonies and events.

 Unscheduled events or activities are prohibited.

 Requests for waivers to this policy must be submitted in writing to the Director of Public Events. Exceptions may be granted only in extraordinary cases.

RESOURCES

The following is a summary of resources available:

For instructions on use of the Main Quadrangle/Memorial Court, contact the Director of University Public Events at (650) 723-2551, http://stanfordevents.stanford.edu/. Note that other venues on campus (such as White Plaza) are made available for events other than scheduled “established or traditional ceremonies and events” including those that may involve amplified sound. For further information on the use of such other venues, contact the Office of Student Activities at (650) 723-2733, http://www.stanford.edu/dept/OSA/.

NOISE AND AMPLIFIED SOUND

POLICY

The following is quoted from the policy:

Stanford is not only an academic institution but a residential community as well. It is the responsibility of all faculty, students, and staff to moderate noise especially during an event or activity held on campus. Supporting the mission of the University and respecting those who are studying, researching, or otherwise carrying out academic-related activities is a Stanford priority. The campus must require a conducive atmosphere to ensure these endeavors are accomplished and supported. Disturbing noise in or around a residence or other campus buildings which infringe on the rights of other residents or members of the University community is considered a violation of this policy. As part of the event planning process, the event sponsor must obtain all appropriate approvals regarding the use of amplified sound during an event or activity.

RESOURCES

Information regarding whether and how the use of amplified sound is permitted is available from the following sources, which must be consulted for prior approval:

b. Registrar’s Scheduling Office: phone (650) 723-6755, or see http://registrar.stanford.edu/event/

PROHIBITION OF THE POSSESSION OF DANGEROUS WEAPONS ON CAMPUS

The University’s policy prohibiting weapons on campus is published in its complete form on the Judicial Affairs Office website http://stanford.edu/dept/vpsa/judicialaffairs/index.html.

POLICY

The following is quoted from the policy:

Except for authorized academic purposes, the knowing possession by any student on any Stanford campus of the following is prohibited: firearms, explosives, or any instrument or weapon of the kind commonly known as blackjack, slingshot, billy club, sandclub, sandbag, or metal knuckles.

Notwithstanding the paragraph above, a student who is a resident of a Stanford campus may store a weapon on such campus if both of the following conditions are met:

1. The student has complied with all state and federal regulations regarding the use and possession of said weapon, or, in the case of a foreign campus, with the laws of the country in which the campus is located.

2. The student stores such weapons with the Stanford Department of Public Safety (SDPS) or, in the case of a foreign campus, in a facility provided by the director of such campus.

Students may remove their weapons from storage only in accordance with regulations established by the SDPS or by the director of the foreign campus at which the weapon is stored. A student who is a resident of a Stanford campus may bring any of the above weapons on campus for purposes of storage only if the student has previously notified the SDPS of the intention to do so, but in no event more than six hours after arrival on the campus. When the student removes the weapon from storage, it must be taken off campus as soon as is practicable, but in no event more than one hour after such removal.

The term “Stanford campus” shall include all the lands and facilities of Leland Stanford Junior University, whether owned or leased, and whether located in the United States or abroad.

CONTROLLED SUBSTANCES AND ALCOHOL

SUMMARY

The following material summarizes the policy on Controlled Substances and Alcohol.

Student conduct is guided by the Fundamental Standard. Implicit in the Standard is the understanding that students are responsible for making their own decisions and accepting the consequences of those decisions.

In order to make informed decisions about alcohol and other drug use, students should educate themselves about the health and safety risks associated with their use, as well as about state and local laws on possessing, serving, and consuming alcohol. It is widely recognized that the misuse and abuse of drugs (“controlled substances”) and the abuse of alcohol are major contributors to serious health problems, as well as to social and civic concerns. Among the health risks associated with the use of illicit drugs and the abuse of alcohol are various deleterious physical and mental consequences including dependency, severe disability, even death. Information concerning the known effects of alcohol and specific drugs is available from the Alcohol and Other Drug Abuse Prevention Program at Vaden Student Health Service.

The goal of this University’s policy is to reduce the abuse and illegal use of alcohol and other drugs, and the human and material costs associated with it. The University, as an educational institution, approaches student conduct issues from a perspective that places emphasis on individual responsibility and development. Education about and prevention of alcohol and other drug-related problems will continue to be the primary emphasis and goal. However, the University expects students, as individuals and as members of groups, to conduct themselves in accordance with this and all other University policies governing student conduct.

* Controlled substances are those defined in 21 U.S.C. 812; they include, but are not limited to, substances as marijuana, heroin, cocaine, and amphetamines.

POLICY

The following is quoted from the policy:

It is the policy of the University to maintain a drug-free workplace and campus. The unlawful manufacture, distribution, dispensation, possession, and/or use of controlled substances or the unlawful possession, use, or distribution of alcohol is prohibited on the Stanford campus, in the
workplace, or as part of any of the University’s activities. The workplace and campus are presumed to include all Stanford premises where the activities of the University are conducted. Violation of this policy may result in disciplinary sanctions up to and including termination of employment or expulsion of students. Violations may also be referred to the appropriate authorities for prosecution.

This policy will be reviewed at least biennially.

APPLICATIONS

The following are examples to illustrate the policy:

No University funds or funds collected by the University may be used in a way that violates the alcohol policy. In student residences, house funds (funds collected by the University Bursar or other University offices) may not be used to buy alcohol because the majority of undergraduates are under the legal drinking age of 21. The decision to use student-collected funds to buy alcohol should be made lawfully, thoughtfully, fairly, and in a way that respects the views of all students. Students must not be required to contribute to a student-collected fund for the purposes of purchasing alcohol. No alcoholic beverages may be served at all-freshman house events in common area spaces (e.g., lounges, hallways, patios/outdoor areas).

Party planners are responsible for planning and carrying out events in compliance with this policy. At least one house or organization officer must assume responsibility for an event’s compliance with the policy, and their names must be made available to Stanford’s Department of Public Safety and the University upon request.

CONSEQUENCES OF VIOLATION

Educational and rehabilitative measures will be the preferred response to infractions of the Policy unaccompanied by more egregious misconduct. Penalties are calibrated according to the severity of the violation. Misbehavior associated with drug or alcohol use and abuse may result in one or more of the following University consequences:

Individuals who violate the University Residence Agreement may lose their University student housing privileges and/or be reported to the Judicial Affairs Office.

Individuals who violate the University’s terms and conditions for student organization recognition as defined in the Student Organization Handbook may be subject to expulsion from the student organization.

Student groups which violate the Policy may face suspension of social privileges, as well as the loss of University recognition, meeting space, and housing or other related privileges.

Students should understand that inebriation is never an excuse for misconduct, that the careless or willful reduction, through the use of alcohol or other intoxicants, of their own ability to think clearly, exercise good judgment, and respond to rational intervention may invoke more stringent penalties than otherwise might be levied.

Penalties will be imposed according to the facts and circumstances of each case. They can be imposed singly or in combination by the Office of Residential Education/Graduate Residences, the Office of Student Activities, the Dean of Students Office, and the Office of Judicial Affairs.

CIVIL LIABILITY

While the law regarding civil liability is complex, it is important to know that under some circumstances party hosts, sponsors, bartenders, or others might be held legally liable for the consequences of serving alcohol to underage drinkers or to obviously intoxicated persons. Social hosts or party planners could be sued and found personally responsible for damages to the injured party(ies) including:

Specific damages. These are damages which are measurable. For example, when bodily injury results in medical expenses or lost wages.

General damages. These are damages which cannot be specifically measured in terms of dollar amount. For example, pain and suffering resulting from bodily injury.

Punitive damages. These are damages which are intended to serve as an example to others and to discourage behavior which is deemed highly undesirable to society.

CRIMINAL LIABILITY

Stanford University is not a sanctuary from the enforcement of state and local laws. Students and others on campus who violate the law may be and have been arrested and prosecuted. Primary responsibility for law enforcement, including that related to alcohol, rests with law enforcement agencies, primarily the Stanford University Department of Public Safety. Uniformed officers who patrol the campus and respond to calls are deputized by the Sheriff of Santa Clara County and are fully empowered and authorized to stop vehicles, make arrests, and enforce all laws. Laws are subject to change; consequently, the following information is illustrative but must not be relied on as a complete and current citing of relevant laws. More information is available at the Stanford Department of Public Safety, 711 Serra Street.

Generally, it is a criminal offense:
1. To provide any alcoholic beverage to a person under 21.
2. To provide any alcoholic beverage to an obviously intoxicated person.
3. For any person under age 21 to purchase alcohol.
4. To be under the influence of alcohol or another drug in a public place and unable to exercise care for one’s own safety or that of others.
5. For persons under 21 to possess alcohol in any public place or any place open to the public (for example, public places in student residences).
6. To operate a motor vehicle while under the influence of alcohol or any other drug. Presumed to be driving under the influence (DUI) with a blood alcohol level (BAL) of 0.08% or higher.
7. To ride a bicycle while under the influence of alcohol, drugs, or both.
8. To have an open container of alcohol in a motor vehicle; and, for persons under 21 to drive a vehicle carrying alcohol or to possess alcohol while in a motor vehicle.
9. To have in one’s possession, or to use, false evidence of age and identity to purchase alcohol.
10. To possess an open container of alcohol in a public place or any place open to the public. Applies in Palo Alto jurisdiction.
11. To be in possession of an unregistered keg. All kegs sold must be registered at the time of purchase. Identification tags must be placed on all kegs in order to allow kegs to be traced if the contents are used in violation of the law.

WHERE TO GET HELP

In the event of a life threatening emergencies call 9-911 from on-campus and 911 from off-campus.

Campus Resources — (Area Code 650) Counseling and Psychological Services, 24 hours (723-3785); The Alcohol and Other Drug Abuse Prevention Program (723-3429); Stanford Alcohol and Drug Treatment Center (723-6682); Al Anon (650) 873-2356 or (408) 379-1051.

Community Resources — Alcoholics Anonymous (650) 592-2364.

HAZING POLICY

Hazing, as defined by California Education Code sections 32050 and 32051, is not permitted at Stanford University. No individual, recognized student organization, club, team, or any other Stanford-affiliated student group shall plan, engage in, or condone hazing activities, on or off the Stanford campus.
DEFINITION OF HAZING

Education Code section 32050 states: “... ‘hazing’ includes any method of initiation or preinitiation into a student organization or any pastime or amusement engaged in with respect to such an organization which causes, or is likely to cause, bodily danger, physical harm, or personal degradation or disgrace resulting in physical or mental harm, to any student or other person attending any ... college, university, or other education institution in this state; but the term ‘hazing’ does not include customary athletic events or other similar contests or competitions.”

Education Code section 32051 states: “No student, or other person in attendance at any ... private ... educational institution, shall conspire to engage in hazing, participate in hazing, or commit any act that causes or is likely to cause bodily danger, physical harm, or personal degradation or disgrace resulting in physical or mental harm to any fellow student or person attending the institution. The violation of this section is a misdemeanor, punishable by a fine of not less than one hundred dollars ($100), nor more than five thousand dollars ($5,000), or imprisonment in the county jail for not more than one year, or both.”

CONSEQUENCES OF A VIOLATION

Stanford University expects its students to conduct themselves in socially responsible and respectful ways. Thus, participation in hazing, either as an individual or as part of any student group, may result in disciplinary action up to and including expulsion, permanent loss of organizational recognition, or loss of eligibility to remain a member of any club, team, or other Stanford-affiliated student group. Consent, implied or expressed, is not a defense to any complaint or charge alleging a hazing violation.

One or more of the following may take institutional disciplinary action: the Organizational Conduct Board; Judicial Affairs; or another University office, such as the Vice Provost for Student Affairs. Institutional action may proceed whether or not a police investigation is undertaken or a criminal charge for hazing is filed by the District Attorney’s Office.

APPLICATIONS

Stanford’s hazing policy is not intended to prohibit student recruitment or new (or continuing) member activities that are positive and educational in nature, designed to instill a group ethos or unity. Its intent is to deter those behaviors that cause or are likely to cause harm to another student.

Some examples of hazing activities or events may be found online at http://osa.stanford.edu/publications/. See sections on hazing in the 2005-06 Student Organization Handbook (http://osa.stanford.edu/publications/soh/) or the Greek Guide (http://osa.stanford.edu/greek/). Questions should be directed to the Office of Student Activities, (650) 723-2733.

SMOKE-FREE ENVIRONMENT

Applicability — This policy applies to all academic and administrative units of Stanford University, including SLAC, and all campus student housing. This policy does not supersede more restrictive policies which may be in force in compliance with federal, state, or local laws or ordinances.

POLICY

The following is quoted from the policy:

1. Policy

It is the policy of Stanford University that the smoking of tobacco products in enclosed buildings and facilities and during indoor or outdoor events (and the selling of tobacco products) on the campus is prohibited.

2. Guidelines

a. Smoking-Prohibited Areas — Specifically, smoking is prohibited in classrooms and offices, all enclosed buildings and facilities, in covered walkways, in University vehicles, during indoor and outdoor athletic events, and during other University sponsored or designated indoor or outdoor events.

b. Ashtrays will not be provided in any enclosed University building or facility.

c. “Smoking Prohibited” signs will be posted.

b. Outdoor Smoking Areas — Smoking is permitted in outdoor areas, except during organized events. Outdoor smoking areas should be located far enough away from doorways, open windows, covered walkways, and ventilation systems to prevent smoke from entering enclosed buildings and facilities. To accommodate faculty, staff, and students who smoke, Vice Presidents, Vice Provosts, and Deans may designate certain areas of existing courtyards and patios as smoking areas in which case ashtrays must be provided. Costs associated with providing designated smoking areas and ashtrays will be absorbed by the specific academic or administrative unit(s).

3. Enforcement — This policy relies on the consideration and cooperation of smokers and non-smokers. It is the responsibility of all members of the University community to observe and follow this policy and its guidelines.

a. Smoking Cessation Information — Smoking cessation programs are available for faculty and staff through the Center for Research in Disease Prevention, and the Health Improvement Program (HIP). Students may contact the Health Promotion Program (HP) through the Student Health Center for smoking cessation information or programs.

b. Repeated Violations — Faculty, staff, and students repeatedly violating this policy may be subject to appropriate action to correct any violation(s) and prevent future occurrences.

4. Implementation and Distribution — Copies of this policy will be disseminated by the Manager of HR Policy/Staff and Labor Relations and the Vice Provost for Student Affairs to all faculty, staff, and students, and to all new members of the University community.

UNIVERSITY STATEMENT ON PRIVACY

Stanford University has an interest in ensuring that the privacy of its students, faculty, and staff is respected, and that no activities interfere with education, research, or residential life.

The University is private property; however, some areas of the campus typically are open to visitors. These areas include White Plaza, public eating areas (such as those at Tresidder Union), outdoor touring areas, and locations to which the public has been invited by advertised notice (such as for public educational, cultural, or athletic events). Even in these locations, visitors must not interfere with the privacy of students, faculty, and staff, or with educational, research, and residential activities. The University may revoke at any time permission to be present in these, or any other areas. Visitors should not be in academic or residential areas unless they have been invited for appropriate business or social purposes by the responsible faculty member, student, or staff member.

No commercial activity, including taking photos or similar audio or visual recordings that are sold to others or otherwise used for commercial purposes, may occur on the campus without the University’s permission. Requests for permission should be submitted to the Director of University Communications or, as appropriate, the Dean of Students, the Department of Athletics, or the Office of Public Events. Recognized student groups and official units of the University will be granted such permission so long as they do not violate privacy or property interests of others; so long as any sale of their products is predominantly on campus to students, faculty, and staff; and so long as they comply with applicable University policies and procedures.

Violaters of this policy may be subject to criminal and/or civil liability, as well as University disciplinary action.
COMPUTER AND NETWORK USAGE

POLICY

The following is quoted from the policy:

Users of Stanford network and computer resources have a responsibility not to abuse the network and resources. This policy provides guidelines for the appropriate and inappropriate use of information technologies.

SUMMARY

The following summarizes the policy on Computer and Network Usage:

In particular, the policy provides that users of University information resources must respect software copyrights and licenses, respect the integrity of computer-based information resources, refrain from seeking to gain unauthorized access, and respect the rights of other computer users.

This policy covers appropriate use of computers, networks, and information contained therein. As to political, personal and commercial use, the University is a non-profit, tax-exempt organization and, as such, is subject to specific federal, state, and local laws regarding sources of income, political activities, use of property, and similar matters. It also is a contractor with government and other entities, and thus must assure proper use of property under its control and allocation of overhead and similar costs. For these reasons, University information resources must not be used for partisan political activities where prohibited by federal, state, or other applicable laws, and may be used for other political activities only when in compliance with federal, state, and other laws, and in compliance with applicable University policies. Similarly, University information resources should not be used for personal activities not related to appropriate University functions, except in a purely incidental manner. In addition, University information resources should not be used for commercial purposes, except in a purely incidental manner or except as permitted under other written policies of the University or with the written approval of a University officer having the authority to give such approval. Any such commercial use should be properly related to University activities, take into account proper cost allocations for government and other overhead determinations, and provide for appropriate reimbursement to the University for taxes and other costs the University may incur by reason of the commercial use. Users also are required that the .edu domain on the Internet has rules restricting or prohibiting commercial use, and thus activities not appropriately within the .edu domain and which otherwise are permissible within the University computing resources should use one or more other domains, as appropriate.

The University’s Information Security Officer is authorized in certain limited circumstances to inspect or monitor private data (including email), such as when there is a reasonable cause to suspect improper use of computer or network resources.

For further information on the topic of peer-to-peer file sharing, see the section above on Copyright.

CHAT ROOMS AND OTHER FORUMS USING STANFORD DOMAINS OR COMPUTER SERVICES

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 66, Chat Rooms and Other Forums Using Stanford Domains or Computer Services, available at http://adminguide.stanford.edu/66.pdf.

POLICY

The following is quoted from the policy:

1. Definition

From time to time, University departments, faculty, students and others may host electronic communication forums, such as chat rooms, newsgroups, bulletin boards, or web sites, whereby various parties may contribute their thoughts on various subjects and where such communication is made available for others to read and comment upon. For purposes of this policy, these sites are collectively referred to as forums.

2. Establishment of Forums

a. Connection with University Activities—Forums that either use the Stanford.edu, Stanford.org, or other Stanford domains, or use University computing facilities, should be established only in connection with legitimate activities of the University.

b. University Role—Unless specifically sponsored by an academic administrative unit of the University, the University’s role in connection with these forums will be solely as a passive Internet service provider.

c. Terms of Use—In all cases, as a condition to establishing a forum, forum homepages (where they exist) and each individual forum page should contain a header that states: Subject to Terms of Use and all pages should include a link to the page maintained by the University entitled “Terms of Use.” The URL is http://www.stanford.edu/home/atoz/terms.html.

3. Operation of Forums

All forums shall be operated in compliance with the Terms of Use, as modified from time to time, and the University’s various policies regarding computer facilities and services.
