6. **Latin:** Courses counted for the degree must be taken for a letter grade. This track is declared on Axess. Beginning courses in Latin, if required, may be counted towards the total of 60 units. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Students must complete at least 60 units of approved courses including:
   a) Classics majors seminar (CLASSGEN 176)
   b) a minimum of 31 units in Latin courses at the 100 level or higher. It is recommended that one of these courses be CLASSLAT 175A, although this course should not be taken until students have completed three years of Latin.
   c) at least one course in each of the following groups:
      1) history or archaeology
      2) literature in translation
      3) religion or philosophy
   d) the introductory sequence CLASSGRK 1,2,3, or 51,52, or one 100-level course in Greek (recommended).
   e) one course in each of the following areas:
      1) history and archaeology
      2) literature in translation
      3) religion, philosophy, and ancient science
   f) PHIL 81. Philosophy and Literature
   g) two related courses in Classics or Philosophy. Students may double count a Classics course in philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.

7. **Latin with Philosophy and Literature:** Courses counted for the degree must be taken for a letter grade. This track is not declared on Axess. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Students must complete at least 65 units of approved courses including:
   a) Classics majors seminar (CLASSGEN 176)
   b) one course in Classics in each of the following areas: history and archaeology; literature in translation; and religion, philosophy, and ancient science
   c) 31 units in Latin courses at the 100 level or higher.
   d) Writing in the Major (WIM) in the Philosophy Department (one introductory Philosophy course)
   e) one course in each of the following areas:
      1) aesthetics, ethics, and social and political philosophy (PHIL 170 series)
      2) philosophy of language, mind, metaphysics, and epistemology (PHIL 180 series)
      3) history of philosophy (above 100 level)
   f) PHIL 81. Philosophy and Literature
   g) two related courses in Classics or Philosophy. Students may double count a Classics course in philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.
   h) Philosophy and literature capstone seminar in the PHIL 194 series.

8. **Greek and Latin:** Courses counted for the degree must be taken for a letter grade. This track is declared on Axess. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Students must complete at least 60 units of approved courses including:
   a) Classics majors seminar (CLASSGEN 176)
   b) 30 units in Greek courses and the same number in Latin. It is recommended that students take either or both CLASSGRK or CLASSLAT 175A, although these courses should not be taken until students have completed three years of the respective language.
   d) it is recommended that students take a course in ancient history.

**Note 1:** University credit earned by placement tests or advanced placement work in secondary school is not counted towards any major program in the department; work done in other universities or colleges is subject to department evaluation.

**Note 2:** A letter grade is required in all courses taken for the major. No course receiving a grade lower than ‘C’ is counted toward fulfilling major requirements.

---

**MINORS**

The undergraduate director meets with each student who opts for a minor to discuss curriculum choices and assigns the student an adviser in the relevant field. Students are required to work closely with their advisers to create a cohesive curriculum within each area. Students may organize their curriculum according to different principles: for example, they may wish to focus on a specific historical period (Classical Athens, Imperial Rome), or on a specific theme or topic (women in antiquity). After consulting with the adviser, each student must submit (in writing) a “Proposed Curriculum” to the undergraduate director. Students may proceed with the minor when the undergraduate director has approved the proposal. Courses offered in Greek and Latin above the 100 level may count toward the minor, provided the subject matter is suitable. Students who minor in Classics are required to take the Majors Seminar (CLASSGEN 176), which is writing intensive. Students may choose among three minors in Classics:

1. **Classical Languages:** students are required to take a minimum of five courses in Greek or in Latin plus the majors seminar (CLASSGEN 176). Students wishing to combine Greek and Latin may only do so if courses for one of the two languages are all above the 100 level; for example, CLASSGRK 1, 10, plus CLASSLAT 103, 111, 175.

2. **History:** students are required to take a minimum of five courses in history, art history, and archaeology plus the majors seminar (CLASSGEN 176). Courses offered in Greek and Latin that focus on historical topics or authors may count toward the minor.

3. **Literature and Philosophy:** students are required to take a minimum of five courses in classical literature or philosophy, including classical science, plus the majors seminar (CLASSGEN 176). Courses offered in Latin and Greek that focus on philosophical or literary topics or authors may count toward the minor.

**HONORS PROGRAMS**

A minimum grade point average (GPA) of 3.3 in Classics courses is required for students to enroll in the honors program. To be considered for honors in Classics, the student must select a professor who can supervise his or her honors thesis. Together with the supervisor, the student writes a two- to three-page proposal at the beginning of the senior year. The proposal should outline the project in detail, list relevant courses that have been taken, and name the supervisor. The department gives approval only if it is satisfied that the student has a sufficient basis of knowledge derived from department course work in the general areas the thesis covers (i.e., course work in Art, Greek and/or Latin language, History, Literature, Philosophy, etc.). If the proposal is approved, the student may sign up for undergraduate thesis (CLASSGEN 199) during one or two quarters of the senior year for a maximum of 6 units a term, up to an overall total of 10 units. Honors are awarded only if the essay receives a grade of ‘B+’ or higher from the supervisor and a second reader.

**HUMANITIES**

For majors in Classics with appropriate interests, the honors program in Humanities is available, a description of which is found under the “Interdisciplinary Studies in Humanities” section of this bulletin.

**DIGITAL HUMANITIES MODULE**

The Classic department, in collaboration with the Humanities Lab, also offers a digital humanities module that can be combined with any of the department’s major programs. Students who are interested in digital humanities should contact the department’s Director of Undergraduate Studies who facilitates coordination with the Humanities Lab. Students planning to combine a Classics major and the digital humanities module must fulfill the following requirements in addition to the general Russian major requirements:

1. **CS 105 or equivalent**
2. **Participate in the Humanities Lab Gateway core seminar (4 units)**
3. **Complete the Humanities Lab Practicum (2 units) in the junior year**
4. **Complete one digital project, in lieu of the course’s main writing requirement, in a course offered in the Slavic department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.**
Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project.

OVERSEASt STUDIES

Funding—Students whose record in Classics indicates that they are fully qualified may apply for funding from the Department of Classics. Students must submit a proposal to the undergraduate director, which should include an itemized list of expenses based on the fees charged by the program (that is, room, board, tuition, and other expenses). Limited funding is available each year; preference is shown to students with strong records.

Programs—

1. Rome: Classics majors are encouraged to apply for the Intercollegiate Center for Classical Studies (ICCS) in Rome which is managed by Duke University for about 50 constituent colleges and universities. It is open to Stanford majors in Classics, History, and Art History. All courses receive full credit at Stanford and may be applied to the respective major. Students interested in this program should consult the undergraduate director and the ICCS representative in the Department of Classics as early as possible in their career at Stanford to plan their course preparation and application. Competition is strong and applicants are expected to have taken one or more courses in Roman history and at least two years of Latin before they arrive in Rome. Brochures are available at the department office.

Other programs offer a quarter, semester, or summer session in Rome. Interested students are urged to visit Bechtel International Center.

2. Greece: students are encouraged to apply for the summer session at the American School of Classical Studies in Athens. The school is recommended principally for Classics majors with at least two years of ancient Greek. A student wishing to apply should prepare by taking courses in Greek history, archaeology, and art; beginning modern Greek is strongly recommended. Applicants should see the undergraduate director early in the academic year. Other programs offer a quarter, semester, or summer session in Greece. Interested students are urged to visit Bechtel International Center.

GRADUATE PROGRAMS

MASTER OF ARTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

Students who have completed an undergraduate major in Classics (in Greek, Latin, or Greek and Latin) or its equivalent may be accepted as candidates for the M.A. degree in Classics and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students with an undergraduate major in Classics (Ancient History or Classical Studies) or without an undergraduate major in Classics may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing at least 25 units of graduate courses and 20 units of work at the 140 level or above.

2. Satisfactory completion of one Greek course at the 100 level (if the undergraduate major has been Latin) or one Latin course at the 100 level (if the undergraduate major has been Greek). This requirement is waived for students with an undergraduate major in Classics (Greek and Latin).

3. Passing an examination testing the candidate’s ability to translate into English from a selected list of Greek and/or Latin authors.

4. Satisfactory completion of the 275A,B sequence in at least one language (Latin or Greek).

5. Writing a thesis, or passing of an examination on a particular author or topic, or having written work accepted by the graduate committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent.

6. A reading examination in French or German; these examinations are administered every quarter.

7. Completion of a Program Proposal for a Master’s Degree form in the first quarter of enrollment.

Candidates for the Ph.D. degree may also (on the recommendation of the department) become candidates for the M.A. degree. In their case, requirement ‘3’ above is waived provided that they have completed some work beyond the course requirements listed under requirements ‘1’ and ‘2’ above.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin. There are four specializations within the Classics Ph.D. program: language and literature; classical archaeology; ancient history; and ancient philosophy.

1. Language and Literature—Candidates for the Ph.D. degree in Classics with specialization in language and literature must fulfill the following requirements:

   1. Complete 135 units of academic credit or equivalent in study beyond the bachelor’s degree at the end of the fourth year.

   2. This includes:

      a) Greek and Latin survey sequence (CLASSGEN 207-208)
      b) Greek and Latin syntax sequence (CLASSGRK 275A,B and CLASSLAT 275A,B)
      c) semantics of grammar sequence (CLASSGEN 205A,B)
      d) twelve graduate seminars, nine of which must be Classics seminars, and one of the remaining three of which must be outside the department.

   The other two seminars may be in Classics, from other departments (with Director of Graduate Studies approval), and/or directed readings. However, no more than two directed readings can be taken. Classics seminars are generally offered for 4-5 units. In some cases, instructors allow a student to complete a seminar for 4 units without requiring a written paper but with completion of all other requirements.

   3. Examinations:

      a) Students must take Greek and Latin translation exams at the end of each survey sequence (the end of the first and second years). These exams are based on the Greek and Latin reading lists available on the Classics Department web site at: http://www.stanford.edu/dept/classics. Greek and Latin survey courses cover less than half of the material on which the translation exams test, and students need to prepare much of the work on their own. It is possible to take both exams in the same year if the student chooses. However, students are obligated to take the exam in the language which the survey has covered that year. The exam consists of a choice of six of eight passages, and students are allowed three hours. A grade of ‘B’- or higher, on every passage, is required to pass. If a student does not attain a ‘B’-, the exam must be retaken later in the summer before registering for the Autumn Quarter, in order to continue in the program. The exam can only be retaken once.

      b) Students must pass modern language translation exams in both German and French. Italian or modern Greek may be substituted in place of French, with consent of the graduate director. Students arrange with the student services officer to take the exam. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.

      c) At the beginning of Autumn Quarter of the third year, students take general examinations in four of the following fields: Greek literature, Latin literature, ancient philosophy, Greek history, and Roman history. Students select the fields in consultation with the graduate director no later than June of the second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent); students need to confer with the professor overseeing the exam. General examinations must be taken by October of the third year.

      d) The University oral examination, which is a defense of the candidate’s dissertation
4. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.

5. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

6. A typical program for a graduate student in Classics is as follows. First year: at least three graduate (200) level courses in Latin and/or Greek literature, direction of one such course to be taken as early as possible in the candidate’s Stanford career. Second year: at least five graduate seminars in classical archaeology, a course on archaeological theory and a course on archaeological methods. Third year: at least one further course outside the Classics department, no later than the end of the first quarter of the fourth year.

II. Classical Archaeology — Candidates for the Ph.D. degree in Classics with a specialization in classical archaeology must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor’s degree at the end of the candidate’s fourth year.

2. These must include:
   a) at least three graduate (200) level courses in Latin and/or Greek literature
   b) History of Classical Archaeology (CLASSART 201), to be taken as early as possible in the candidate’s Stanford career
   c) the interdepartmental graduate core sequence in archaeology. The Archaeology Center announces the courses which fulfill this requirement. The core sequence currently comprises a seminar in archaeological theory and a course on archaeological methods.
   d) at least one further course outside the Classics department
   e) at least five graduate seminars in classical archaeology
   f) at least three graduate seminars in ancient history
   g) Students may petition to count independent study courses in place of up to two required courses, but no more.
   h) Students who enter the program with only one ancient language at the level needed for graduate study are strongly encouraged to take additional course work to reach graduate (200 and above) level in another language.
   i) Students are urged to enroll in or audit other undergraduate courses that may fill gaps in their undergraduate training
   j) All students are expected to take part in archaeological fieldwork in the classical world areas.
   k) At least three consecutive quarters of course work must be taken at Stanford.

3. Examinations:
   a) As soon as students arrive, they must take a diagnostic exam in either Greek or Latin. Depending on performance, students may be required to enroll in undergraduate language classes in that language to improve their skills to the level required for graduate work.
   b) reading examinations in two of the following languages: French, German, Italian, and modern Greek. Candidates may petition to substitute a different modern language for one of these, if their area of specialization requires it. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.
   c) a translation examination from Latin or Greek into English. This examination must be taken either at the end of the first year or at the end of the second year. A grade of "B" or higher on every passage is required to pass. If a student does not attain a "B-", the exam must be retaken later in the summer before registering for Autumn Quarter, in order to continue in the program. The exam can only be retaken once.
   d) general examinations in Greek archaeology and Roman archaeology, and two of the following fields: Greek literature, Latin literature, ancient philosophy, Greek history, Roman history. Candidates select the fields in consultation with the graduate director no later than the first week of Spring Quarter of the second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent). General examinations must be taken by October of the third year.
   e) the University oral examination, which is a defense of the candidate’s dissertation.

4. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.

5. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

III. Ancient History — Candidates for the Ph.D. degree in Classics with specialization in ancient history must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor’s degree at the end of the fourth year. This includes:
   a) in the Autumn Quarter of the first year. Approaches to History (HISTORY 304), offered in the History department
   b) two prosenarim. These introduce students to primary sources of evidence for ancient history that require special training: papyrology, epigraphy, paleography, numismatics, and archaeology. The department should offer one each year, but students may also fulfill this requirement by doing a directed reading, or (with the approval of the ancient history track adviser) by taking a course at another university with which Stanford has an exchange agreement.
   c) three skills courses relevant to the individual student’s chosen research approach. For example, a student could take classes in economics, demography, legal history, or anthropology. The skills courses can also be used to learn other ancient or modern languages, either by course work or directed reading. Students need to consult with their advisers and the graduate director.
   d) 10 graduate seminars: These normally have course numbers in the 200s, 300s, or 400s. Most of these are taken in the department, but students may also take seminars outside the department or at another university with which Stanford has an exchange agreement. Approval from the ancient history adviser and the graduate director must be obtained prior to exercising this option. While only two of the ten seminars can be replaced by directed readings, up to three additional seminars may be taken outside the department.
The graduate director assigns a dissertation proposal director to each candidate, in consultation with the graduate director and the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.

4. Candidates are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

IV. Joint Program in Ancient Philosophy

This specialization is jointly administered by the departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers or classicists.

Graduate students admitted by the Classics department receive their Ph.D. from the Classics department. This specialization includes training in ancient and modern philosophy. Each student in the program is advised by a committee consisting of one professor from each department.

All candidates for the Ph.D. degree in Classics with specialization in ancient philosophy must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor’s degree at the end of the fourth year. This includes:
   a) all the requirements listed for the language and literature specialization in the graduate program in Classics (see “I” above).
   b) three courses in the Philosophy department (including 100/200 and two courses at the 200 level or higher). These include:
      1. one course in logic which can be fulfilled at any level
      2. one course in aesthetics, ethics, or political philosophy
      3. one course in metaphysics, epistemology, philosophy of mind, or philosophy of science.
   c) at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Philosophy department.
   d) All courses taken in the Philosophy department count for seminar credit (i.e., as contributing to the 12 seminar requirement in the Language and Literature track in the Classics department).

2. Examinations: The requirements are the same as those listed in the language and literature specialization, except that one of the four areas of general examination must be taken in ancient philosophy.

3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.

4. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

PH.D. MINOR

For a graduate minor, the department recommends at least 20 units in Latin or Greek at the 100 level or above, and at least one course at the graduate (200) level.

CLASSICS AND A MINOR FIELD

The Ph.D. in Classics may be combined with a minor in another field, such as anthropology, history, humanities (see below), or classical linguistics (see below). Requirements for the minor field vary, but might be expected to involve about six graduate-level courses in the field and one written examination, plus a portion of the University oral exam. Such a program is expected to take five years. The department encourages such programs for especially able and well prepared students. The following timetable would be typical for a five-year program:
First Year: course work, almost entirely in Classics. One translation exam taken in June. One or both modern language exams taken.
Second Year: course work, both in Classics and the minor field. Second translation exam completed. French and German exams completed.
Third Year: course work, both in Classics and the minor field. General examinations in Classics.
Fourth Year: remaining course work, both in Classics and the minor field. General examination in the minor field. Preparation for dissertation.
Fifth Year: dissertation, University oral examination.

GRADUATE PROGRAM IN HUMANITIES

The Department of Classics participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Classics and Humanities. For a description of that program see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COMPARATIVE LITERATURE

The Department of Classics cooperates closely with the graduate program in the Department of Comparative Literature. Interested students should consult the chair of the department.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Comparative Literature, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages. For courses in modern Greek language with the subject code SPECLANG, see the “Language Center” section of this bulletin.

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Classics department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Classics are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 31A,B. Ancient Empires — A decisive place and period in world history: the Mediterranean basin from 800 B.C. to 400 A.D. Great Empires (Assyria, Persia, Macedonia, and Rome) were carved out in war and changed the course of human development. Why did these empires arise when and where they did, how did they work, and what is their legacy? Their economic, religious, and artistic achievements balanced against genocide, enslavement, and warfare using evidence from ancient literature and archaeology, and tracing the roles of religion, property, and freedom. What they mean for the world today. GER: I Hum-2,3
IHUM 31A: 5 units, Win (Morris, I)
IHUM 31B: 5 units, Spr (Scheidel, W)

GREEK

UNDERGRADUATE

Students whose major work is in another department and who wish to fulfill a departmental foreign language requirement by taking Greek should consult their department advisers to determine the precise nature of that department’s requirements.

Courses in Greek have the subject code CLASSGRK. Classics majors and minors must take courses for letter grade.

CLASSGRK 1,2,3. Beginning Greek — No knowledge of Greek is assumed. Classics majors and minors must take course for letter grade.
3-5 units, 1: Aut, 2: Win, 3: Spr (Porta, F)
CLASSGRK 10. Intensive Beginning Greek — Equivalent to CLASSGRK 1, 2, and 3. Goal is to read easy classical or New Testament Greek by the end of the quarter. Short readings in philosophical Greek. Classics majors and minors must take course for letter grade.
8-9 units, Sum (Staff)

INTERMEDIATE/ADVANCED

Students are admitted to these courses by completing CLASSGRK 3 or 10, or on the basis of previous work in secondary school or elsewhere. Usually two to three years of secondary school Greek qualifies a student for 101, three to four years for 111. Students with previous knowledge of Greek should consult the Undergraduate Director in Classics to determine the course for which they are best suited.

Students whose major work is in another department and who wish to fulfill a departmental foreign language requirement by taking Greek should consult their department advisers to determine the precise nature of that department’s requirements. Most departments are satisfied if part of the series 101, 102, 103 is completed.

CLASSGRK 101. Intermediate Greek: Plato — Focus is on Plato’s Crito. Grammar and syntax. Classics majors and minors must take course for letter grade. May be repeated for credit.
5 units, Aut (McCall, M)
CLASSGRK 102. Intermediate Greek: Greek Tragedy — Euripides’ Medea with attention to questions of poetic form, dramatic structure, theatrical performance, myth, and history. Classics majors and minors must take course for letter grade. May be repeated for credit.
3-5 units, Win (Balsley, K)
CLASSGRK 103. Intermediate Greek: Homer — Selections from the Iliad. Focus is on reading Homeric poetry with fluency and rapid comprehension. Style, meter, poetic techniques, and cultural background. Classics majors and minors must take course for letter grade. May be repeated for credit.
3-5 units, Spr (De Vivo, J)

CLASSGRK 111. Advanced Greek: Lyric Poetry — Invectives, love songs, drinking songs, elegies, and choral odes from 700-500 B.C.E. Readings include Sappho, Alcaeus, Archilochus, Mimnermus, Alcman, Solon, and Pindar. Classics majors and minors must take course for letter grade. May be repeated for credit.
3-5 units, Aut (Peponi, A)
CLASSGRK 112. Advanced Greek: Scientific Writings — Reading texts from Greek mathematics, physics, biology, and other areas. The relationship between form and meaning in the presentation of scientific information. Classics majors and minors must take course for letter grade. May be repeated for credit.
3-5 units, Win (Netz, R)
CLASSGRK 175A,B. Greek Syntax: Prose Composition — (First-year graduate students register for 275A, B.) Review of Greek grammar and instruction in Greek prose composition skills. Begins 6th week of Winter Quarter and continues through Spring Quarter. Prerequisite for undergraduates: three years of Greek. Classics majors and minors must take course for letter grade.
A: 2 units, Win (Staff); B: 4 units, Spr (Kamen, D)

LATIN

UNDERGRADUATE

Students whose major work is in another department and who wish to fulfill a departmental foreign language requirement by taking Latin should consult their department’s advisers to determine the precise nature of those requirements. Most departments are satisfied if part of the series 101, 102, 103 is completed.

Courses in Latin have subject code CLASSLAT.

CLASSLAT 1,2,3. Beginning Latin: Vocabulary and Syntax — Vocabulary and syntax of the classical language, preparing students for readings including Cicero, Caesar, and Catullus. No previous knowledge of Latin is assumed. Classics majors and minors must take course for letter grade.
3-5 units, 1: Aut, 2: Win (Lain, N); 3: Spr (Tomaso, V)
CLASSLAT 10. Intensive Beginning Latin — Equivalent to CLASSLAT 1, 2, 3; or 51 and 52. Goal is to read easy Latin prose and poetry by the end of the quarter. Classics majors and minors must take course for letter grade.

8-9 units, Sum (Staff)

INTERMEDIATE/ADVANCED

Students are admitted to these courses by completing CLASSLAT 3 or 10, or on the basis of previous work in secondary school or elsewhere. Usually two to three years of secondary school Latin qualifies a student for 101, three to four years for 111. Students with previous knowledge of Latin should consult the Undergraduate Director in Classics to determine the course for which they are best suited. Students whose major work is in another department and who wish to fulfill a departmental foreign language requirement by taking Latin should consult their department’s advisers to determine the precise nature of those requirements. Most departments are satisfied if part of the series 101, 102, 103 is completed. CLASSLAT 101. Intermediate Latin: Portrayals of Rome — Readings introducing major literary genres and figures of the period. Focus is on physical, moral, and societal aspects of Rome. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Aut (Janda, S)

CLASSLAT 102. Intermediate Latin: Sallust’s War with Catiline — The world in its entirety; its literary significance. Classics majors and minors must take course for letter grade. May be repeated for credit.

5 units, Win (Braud, S)

CLASSLAT 103. Intermediate Latin: Virgil — Readings from the Aeneid; its literary, artistic, and cultural background. Classics majors and minor must take course for letter grade. May be repeated for credit.

3-5 units, Spr (Afsoonmis, J)

CLASSLAT 111. Advanced Latin: Livy — Preface, exemplary episodes, battle scenes, and speeches with stylistic analysis in relation to Livy’s practice of history and its reception. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Aut (Ceserani, G)

CLASSLAT 112. Advanced Latin: Cicero’s Catilinarian Orations — Cicero as the cornerstone of classical Latin prose. Grammar, style and historical context in his speeches in prosecution of Catiline. What elements of his style may be considered classical, and why? How his involvement with the Catilinarian conspiracy affected his perspective and reputation. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Win (Parker, G)

CLASSLAT 113. Advanced Latin: Elegiac Poetry — The genre of love elegy as practiced by Propertius, Ovid, and Tibullus; its antecedents and related forms in classical literature. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Spr (Haas, C)

CLASSLAT 175A,B/275A,B. Latin Syntax — (First-year graduate students register for 275A,B.) Intensive review of Latin syntax. Begins Autumn Quarter and continues through 5th week of Winter Quarter. See CLASSGEN 205A/B for supplemental course. Prerequisite for undergraduates: three years of Latin. Classics majors and minors must take course for letter grade.

A: 4 units, Aut; B: 2 units, Win (Devine, A)

GRADUATE

These courses have subject code CLASSGEN.

2 units, Aut, Win (Devine, A)

CLASSGEN 207A,B,C/208A,B,C. Survey of Greek and Latin Literature — First course in a required two-year sequence. Focus is on the origins, development, and interaction of Greek and Latin literature, history, and philosophy. Greek and Latin material taught in alternate years. All major genres of Latin literature through Cicero. The social contexts of their production and consumption.

CLASSGEN 207A. Survey of Greek and Latin Literature: Republican Latin

4-5 units, Aut (Parker, G)

CLASSGEN 207B. Survey of Greek and Latin Literature: Augustan Age Latin

4-5 units, Win (Barchiesi, A)

CLASSGEN 207C. Survey of Greek and Latin Literature: Imperial Latin

4-5 units, Spr (Braud, S)

CLASSGEN 208A. Survey of Greek and Latin Literature: Archaic Greek

4-5 units, alternate years, not given this year

CLASSGEN 208B. Survey of Greek and Latin Literature: Classical Greek

4-5 units, alternate years, not given this year

CLASSGEN 208C. Survey of Greek and Latin Literature: Hellenistic and Late Greek

4-5 units, alternate years, not given this year

COURSES IN TRANSLATION

UNDERGRADUATE

CLASSGEN 6N. Antigone: From Ancient Democracy to Contemporary Dissent — (Same as DRAMA 12N.) Stanford Introductory Seminar. Preference to freshmen. Tensions inherent in the democracy of ancient Athens; how the character of Antigone emerges in later drama, film, and political thought as a figure of resistance against illegitimate authority; and her relevance to contemporary struggles for women’s and workers’ rights and national liberation. Readings and screenings include versions of Antigone by Sophocles, Anouilh, Brecht,Fugard/Kani/Ntshona, Paulin, Glowacki, Gurney, and von Trotta. GER:DB-Hum, EC-Gender

4 units, Aut (Rehm, R)

CLASSGEN 16. Eureka! Archimedes and His Science — The legends and reality of the life of one of the most important scientists in history. Archimedes’ major discoveries in pure and applied science. No background in Greek or science required. GER:DB-Hum

3-5 units, Win (Netz, R)

CLASSGEN 17N. Odysseus of Many Turnings — Stanford Introductory Seminar. Preference to freshmen. Odysseus, the archaic Greek hero, through three millennia of fiction, poetry, art, and philosophy in the Old and New Worlds. Themes include initiation, seduction, wisdom, patriarchy, poetry, and death. Readings include: the Odyssey, Shakespeare’s Troilus and Cressida, Sophocles’ Ajax and Philoctetes, and Derek Walcott’s Omeros; selections from Virgil, Seneca, Joyce, Adorno; and modern poets such as George Seferios and Constantine Cavafy. Films include Gaze of Ulysses, Bloom, and O Brother, Where Art Thou? GER:DB-Hum

4-5 units, Aut (Martin, R)

CLASSGEN 18. Greek Mythology — The heroic and divine in the literature, mythology, and culture of archaic Greece. Interdisciplinary approach to the study of individuals and society. Illustrated lectures. Readings in translation of Homer, Hesiod, Herodotus, and the poets of lyric and tragedy. GER:DB-Hum

3-5 units, Aut (Hunt, P)

CLASSGEN 20N. Mapping the Mediterranean — Stanford Introductory Seminar. Preference to freshman. How the Mediterranean has been represented, visually and textually, and the contexts in which such representations evolved. The roles of polytheistic and monotheistic religions in cartography. From the ancient period including Homer’s Iliad to the times of Gerhardus Mercator, 1512-94. How the time span from Homer to
Mercator reveals the changes that make it necessary to examine the idea of the map. GER:DB-Hum
4-5 units, Aut (Parker, G)

CLASSGEN 24N. Sappho: Erotic Poetess of Lesbos — Stanford Introductory Seminar. Preference to freshmen. Sappho, the archaic poetess from the Greek island of Lesbos, as the most influential woman poetess in Western civilization. Readings include all of the surviving fragments in English. Traditions and writings referring to or fantasizing about her life and circle, from ancient to contemporary times. Knowledge of Greek poetry or culture not required. GER:DB-Hum, EC-Gender
3-5 units, Win (Pepone, A)

CLASSGEN 34. Ancient Athletics — The cultural history of ancient athletics, including funeral games described in Homer and Virgil. The balance between soul and body sought by ancient philosophers including Plato. Striving for excellence, finding glory without seeking it, and aiming for self-mastery in athleticism and intellectual training. Scholar-athletes at Nemea, Delphi, and Isthmia; city-state festivals hosted by Athens and Sparta.
3-5 units, Win (Hunt, P)

CLASSGEN 35. Becoming Like God: An Introduction to Greek Ethical Thought — The claim by Socrates, Plato, and Aristotle that people should identify wisdom as becoming like gods. Their rejection of Greek religion and morality, differing ethical theories, conceptions of happiness, and new conceptions of ethics. Ethical and political choices that involve justice and courage, and how Socrates, Plato, and Aristotle respond to them. Do they offer useful solutions to current ethical problems? GER:DB-Hum, EC-EthicReas
3-5 units, Win (Nightingale, A)

CLASSGEN 53N. Are We Our Bodies? — (Same as COMPLIT 53N.) Preference to freshmen. Is the mind a bodily entity, or is it separate from the body, a purely rational or spiritual entity? If people identify with their minds, what are the ethical obligations to the bodily world? Do intellectual faculties make people superior to nonhumans? Do human beings have the right to control the natural world and use it for human purposes? If minds are bodily entities, how does this affect ethics and values? GER:DB-Hum, EC-EthicReas
3-4 units, Spr (Nightingale, A)

CLASSGEN 102. The River Nile: Ancient Representations of the River — Why the Nile fascinated ancient Greeks and Romans. Sources include ancient texts and images, from Herodotus through early Christianity, and their social contexts. 18th- and 19th-century uses of ancient geographies and attempts to locate the sources of the Nile. GER:DB-Hum
4-5 units, Win (Parker, G)

CLASSGEN 105. The Ends of the Earth, Ancient and Modern — How the ancient Greeks and Romans imagined far away places and peoples. To what extent do ancient travel experiences resonate in modern times? Greek and Roman travels and encounters with foreign peoples and exotic places. Sources include ancient texts in English such as Homer’s Odyssey and Tacitus’ descriptions of Britain and Germany, and visual representations. GER:DB-Hum, EC-GlobalCom
4-5 units, Win (Ceserani, G)

CLASSGEN 114/214. The Paradox of Seneca — (Graduate students register for 214; same as PHIL 114/214.) Millionaire or ascetic, principled Stoic or compromised courtier, advocate of detachment or addict of bloodthirsty tragedies: the contradictory facets of the philosopher Seneca, tutor to the young Nero. His views on living and dying well, passion and philosophy, and nature and civilization. Readings in English from his prose writings and tragedies. GER:DB-Hum
3-5 units, Spr (Bobonich, C; Braund, S)

CLASSGEN 117. Gender, Violence, and the Body in Ancient Religion — The sex-gender system of ancient Greece. How did polarization of the sexes become a master metaphor for power struggles between husbands and wives, among men, and among parts of the self? How did religious activity, including drama, mitigate or intensify the stresses of living in a society polarized along gender lines? GER:DB-Hum, EC-Gender
3-4 units, Spr (Gleason, M)

CLASSGEN 133. Invention of Science — Does science have to be the way is it? Does it have to be at all? The creation of science in the ancient Greek world; its invention of concepts such as nature, rationality, and proof; and its invention of fields from biology to geometry. Comparison with the Chinese invention of a different kind of science. The extent to which contemporary science is still Greek science. GER:DB-Hum
3-5 units, Aut (Netz, R)

5 units, Win (Rehm, R)

CLASSGEN 163. Texts in History: Classics from Greece to Rome — (Same as DRAMA 161/261.) Priority to students in the Humanities honors program. Ancient texts situated in their intellectual and cultural contexts. Readings include Homer’s Iliad and Odyssey; plays of Aeschylus, Sophocles’ Antigone, Euripides’ Medea, Thucydides’ Peloponnesian War, Plato’s Symposium, Aristotle’s Poetics, Virgil’s Aeneid, Seneca’s Trojan Women and Agamemnon, and Augustine’s On Christian Doctrine. GER:DB-Hum
5 units, Aut (Rehm, R)

CLASSGEN 176. Majors Seminar: Desire in Antiquity — Verbal and visual representations of desire in Greece and Rome. How Greeks and Romans experienced, theorized, and fantasized about this aspect of their private and social life. GER:DB-Hum, WIM
3-5 units, Win (Pepone, A)

CLASSICS/HISTORY

CLASSHIS 22N. Ancient and Modern Slavery — Stanford Introductory Seminar. Preference to freshmen. Greeks and Romans created the largest slave societies in premodern history. How did slavery shape classical civilization and define perceptions of human nature; how does it compare to later slave systems? Focus is on comparison of ancient and modern slavery. GER:DB-Hum
3-5 units, Spr (Scheidel, W)

CLASSHIS 50Q. Rome, Europe, and China: Convergence and Divergence — Stanford Introductory Dialogue. Preference to sophomores. How states and cultures in eastern and western Eurasia developed over the past 3,000 years; present-day relevance. Recent scholarship, including current faculty research. GER:DB-SocSci
5 units, Win (Scheidel, W)

CLASSHIS 60. The Romans — How did a tiny village create a huge empire and shape the world, and why did it fail? Roman history, imperialism, politics, social life, economic growth, and religious change. GER:DB-Hum
3-5 units, Win (Scheidel, W)

CLASSHIS 101. The Greeks — Greek history from the palaces of the late Bronze Age through Alexander the Great’s conquest of Persia, surveying economics, society, culture, and technology. Why Greek culture combined unusual freedom for ordinary men with large-scale chattel slavery and extreme gender ideologies; the origins and practices of democracy; and relations with non-Greek peoples. Focus is on ancient sources and archaeological remains. GER:DB-Hum
4-5 units, alternate years, not given this year

CLASSHIS 105. History and Culture of Ancient Egypt — From 3000-30 B.C.E. Emphasis is on long-term social and economic development. GER:DB-Hum, EC-GlobalCom
3-5 units, Spr (Manning, J)

CLASSHIS 131. Science and Technology in Ancient Egyptian Society — (Same as STS 120.) From 3000 B.C.E. to the Roman period. What was the source of technological change and innovation in Egypt? Why
is the ancient Egyptian legacy important for later developments? What was the balance between changes internal and external to Egypt? Topics: ancient texts concerned with science, technology, mathematics, astronomy, medicine; Egyptian material culture and building techniques; the economic role of technology; Alexandrian science and its legacy. GER:DB-Hum 3-4 units, Spr (Manning, J)

CLASSART 132. Ethics of Political Animals — (Same as ETHICSOC 132X, POLISCI 132.) The ancient Greek conception of ethics as arising from human social and political nature. Problems related to values, identity, and responsibility. Topics include civic friendship, equality, reciprocity, integrity, dignity, and legal obedience. GER:DB-Hum, EC-EthicReas 5 units, Spr (Ober, J)

CLASSART 133/333. History of Political Thought I — (Graduate students register for 333; same as POLISCI 130A/330A.) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:DB-Hum 5 units, Win (Ober, J)

CLASSART 150. Ancient Greece in the Modern West: History, Politics, and Classics — How ancient Greece become central to the definition of modernity; how ancient Greek ideas and ideals shaped modern life over the last 250 years; how modern perspectives changed perception of the ancients. Sources include ancient and modern historians, travel and antiquarian writings, French and American revolutionary debates, archaeological images, and modern visual imagery. May be repeated for credit. GER:DB-Hum 4-5 units, Aut (Ceserani, G)

CLASSART 21Q. Eight Great Archaeological Sites in Europe — Stanford Introductory Seminar. Preference to sophomores. Focus is on excavation, features and finds, arguments over interpretation, and the place of each site in understanding the archaeological history of Europe. Goal is to introduce the latest archaeological and anthropological thought, and raise key questions about ancient society. The archaeological perspective foregrounds interdisciplinary study: geophysics articulated with art history, source criticism with analytic modeling, statistics interpretation. A Web site with resources about each site, including plans, photographs, video, and publications, is the basis for exploring. GER:DB-Hum, WRITE-2 3-5 units, Aut (Shanks, M)

CLASSART 61. Archaeologies of the Greek Past — From the collapse of the Bronze Age palaces to the conquests of Alexander the Great. How material culture helps reconstruct ancient Greek society. Why the Greeks built temples. The influence of the Near East on Greek culture. Archaeology and class, gender, and ethnic relations. Is there an archaeology of Greek democracy? Complements ARTHIST 101, CLASSHIS 101, 102. GER:DB-Hum 3-5 units, Aut (Staff)

CLASSART 81. Introduction to Roman Archaeology — The Roman past, 8th century B.C.E. to 5th century C.E., interpreted through its material remains including imperial palaces, temples, provincial towns, and garbage pits. Material evidence on key areas of Roman life and history: cultural identity, economics, religion, ancient state formation, the emperor’s image, sex and gender, Roman encounters with non-Romans, and military life. Relationship between literary and archaeological evidence. Sites include Rome, Pompeii, Athens, Ephesus, Vindolanda and Hadrian’s Wall, Palmyra and the provinces of Africa, Asia Minor, Britain, and Gaul. GER:DB-Hum 3-5 units, Win (Staff)

CLASSART 101/201. Archaic Greek Art — (Graduate students register for 201; same as ARTHIST 101/301.) The development of Greek art and culture from proto-geometric beginnings to the Persian Wars, 1000-480 B.C.E. The genesis of a native Greek style; the orientalizing phase during which contact with the Near East and Egypt transformed Greek art; and the synthesis of East and West in the 6th century B.C.E. GER:DB-Hum 4 units, Aut (Maxmin, J)

CLASSART 102/202. Classical and 4th-Century Greek Art — (Graduate students register for 202; same as ARTHIST 102/302.) The formation of the classical ideal in 5th-century Athenian art, and its transformation and diffusion in the 5th and 4th centuries against changing Greek history, politics, and religion. GER:DB-Hum 4 units, not given this year

CLASSART 105. The Body in Roman Art — Ancient and modern ideas about the body as ideal and site of lived experience. Themes include representation, portrayal, power, metamorphosis, and replication. Works that exemplify Roman ideas of heroism and power versus works portraying nude women, erotic youth, preserved corpses, and suffering enemies. Recommended: background in ancient Mediterranean art, archaeology, history, or literature. GER:DB-Hum 4-5 units, Spr (Trimble, J)

CLASSART 109. Greek Art in Context — (Same as ARTHIST 203.) The cultural contexts in which art served religious, political, commercial, athletic, sympotic, and erotic needs of Greek life. 5 units, Aut (Maxmin, J)

CLASSART 110. Appropriations of Greek Art — (Same as ARTHIST 204A.) The history of the appropriation of Greek art by Rome, the Renaissance, Lord Elgin, and Manet. 5 units, Spr (Maxmin, J)

CLASSART 113/213. Ten Things: Science, Technology, and Design — (Graduate students register for 213; same as STS 112.) Connections among science, technology, society and culture by examining the design of a prehistoric hand axe, Egyptian pyramid, ancient Greek perfume jar, medieval castle, Wedgewood teapot, Edison’s electric light bulb, computer mouse, Sony Walkman, supersonic aircraft, and BMW Mini. Interdisciplinary perspectives include archaeology, cultural anthropology, science studies, history and sociology of technology, cognitive science, and evolutionary psychology. GER:DB-SocSci 4-5 units, Win (Shanks, M)

CLASSART 126. Alpine Archaeology — What distinguishes archaeological research in high montane environments with year-round cold temperatures from other archaeological contexts and fieldwork? Comparison with other global field methodologies. Emphasis is on Gallo-Roman, Celtic, and medieval finds. Required for students participating in Stanford’s late summer dig in the Grand-St-Bernard pass in the Alps. GER:DB-Hum 3-5 units, Spr (Hunt, P)

CLASSART 150/250. Archaeological Field Work in the Mediterranean — (Graduate students register for 250.) Required for students taking part in Stanford’s excavation at Monte Polizzo, Sicily. The history and archaeology of Sicily from 1000 B.C.E. to the present. Excavation techniques and recording system in use at Monte Polizzo. GER:DB-Hum 3 units, Spr (Staff)

CLASSART 198S. Digital Humanities — (Same as HUMNTIES 198S.) How digital technologies are involved in rethinking research and learning in the arts and humanities. Topics include: visualization, simulation and gaming, authoring, collaborative research, publication and dissemination, interactivity, and information management. Examples of cutting-edge research. Project-based. GER:DB-Hum 4-5 units, Spr (Shanks, M)

INDIVIDUAL STUDY

CLASSGEN 160. Directed Readings (Undergraduate) 1-15 units, Aut, Win, Spr, Sum (Staff)

CLASSGEN 199. Undergraduate Thesis: Senior Research 1-6 units, Aut, Win, Spr, Sum (Staff)

CLASSGEN 260. Directed Reading in Classics 1-15 units, Aut, Win, Spr, Sum (Staff)

CLASSGEN 360. Dissertation Research in Classics 10 units, Aut, Win, Spr, Sum (Staff)
GRADUATE SEMINARS

Graduate seminars vary each year. The following are given this year.

GENERAL (CLASSGEN)
CLASSGEN 209. Seneca’s De Clementia and Its Context — The Stoic treatise written to guide the young Nero on his accession to emperor, as a work of literature and political philosophy, and in the context of other contemporaneous Latin works including Seneca’s Apocolocyntosis and Calpurnius Siculus’ Eclogues. The methodology of preparing a philological commentary on a Latin text.
4-5 units, Aut (Braud, S)

CLASSGEN 212. Mimesis in Greek Poetry and Philosophy — Mimesis as the cornerstone of Greek thought on artistic representation, poetry, performance, and the visual arts, and relationships among them; its influence on Western theory. The concepts of mimesis as used by poets and philosophers themselves. Focus is on semantics and implications of the term in lyric and dramatic poetry and the philosophies of Plato and Aristotle. The notion of fictionality, and its conceptualization in philosophical texts.
4-5 units, Spr (Nightingale, A; Peponi, A)

CLASSGEN 213. The Poetics of Ancient Science — Science as a literary genre as an integral part of ancient civilization, with attention to its cognitive, semiotic, and aesthetic properties. Examples from classical, hellenistic, and late ancient sources.
3-5 units, Aut (Netz, R)

CLASSGEN 216. Homer and Greek Religion — (Same as HISTORY 311.) The relationship between poetic representation and archaeological record; development of polis ideology; ritual, topography, and language as religious expressions; and the meaning of religion as a cultural category.
4-5 units, Aut (Martin, R; Morris, I)

CLASSGEN 217. Homeric Text and Language — Homeric grammar and syntax, and diction and verse. Relative chronology, formulaic variation and diction systems, differences in speech versus narrative passages, the role of archaisms and innovations, and contrasts with other hexameter poetry in Greek. Fulfills archaeology track literature requirement.
4-5 units, Win (Martin, R)

CLASSGEN 218. The Lyric Poems of Horace — The four books of Carmina and the Carmen Saeculare. Tools for interpretation. The relationship between performance and text; meter and music; presence of Greek models and their functions; praise and political admonition; choral and individual voice; landscape; and symposium culture.
4-5 units, Win (Barchiesi, A)

CLASSGEN 321. Classical Seminar — (Same as HUMNTIES 321.) The dialogue between literature and philosophy in Roman cultures. Homer, Greek tragedy, Plato, Aristotle, Lucretius, Virgil, Augustine, Nietzsche’s Birth of Tragedy, and Walcott’s Omeros.
3-5 units, Aut (Nightingale, A)

HISTORY (CLASSHIS)
CLASSHIS 210. The Remaking of Classics — Redefinition, reconfiguration, and enrichment by new perspectives on the study of classical antiquity over the last two centuries. The main currents of thought that have shaped the field, focusing on competing approaches to themes such as people, power, beliefs, and letters. Guest moderators.
4-5 units, Win (Ceserani, G; Scheidel, W)

CLASSHIS 431. Collective Action in Democratic Athens — (Same as POLISCI 431.) How can a collectivity reap the social benefits of cooperation in the face of the tendency of self-seeking individuals to defect? The problem is pressing in democracies, which require cooperation by diverse persons, and in highly competitive environments such as the classical Greek city states. Focus is on the organizational design of classical Athens as a state; how political institutions served to organize useful social and technical knowledge.
5 units, Spr (Ober, J)

ART AND ARCHAEOLOGY (CLASSART)
CLASSART 309. New Directions in Roman Archaeology — Past, present, and future developments in Roman archaeology, including research trends, sites and projects, the impact of theoretical developments, and the relationship of changing methods to research design and interpretation. What this field has been and why, questions currently driving the field, and new directions for students’ research and fieldwork.
5 units, Aut (Trimble, J)

COGNATE COURSES
See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

ARTHIST 3. Introduction to the History of Architecture
5 units, Spr (Beischer, T)

ARTHIST 105A/305A. Islamic Art around the Mediterranean
4 units, Win (Staff)

ARTHIST 106/306. Byzantine Art and Architecture, 300-1453 C.E.
4 units, Win (Pentcheva, B)

ARTHIST 107/307. Age of Cathedrals
4 units, Aut (Pentcheva, B)

ARTHIST 410. Aesthetics of the Icon
5 units, Win (Pentcheva, B)

ARTHIST 507. Medieval Image Theory
5 units, Aut (Pentcheva, B)

ARTHIST 512. The Time of the Object
5 units, Win (Lee, P)

CASA 108. History of Archaeological Thought — (Same as ARCH- LGY 103.)
5 units, Aut (Meskell, L)

CASA 158. Sex, Death, and the Body in Ancient Egypt
5 units, Win (Meskell, L)

CASA 172/272. Object Lessons
3-5 units, Aut (Meskell, L)

CASA 360. Archaeological Methods and Research Design
5 units, Spr (Hodder, I)

CASA 373. Introduction to Archaeological Theory
5 units, Win (Hodder, I)

ENGLISH 112A. Wicked Witches of the West: Dangerous Women in Greek and Shakespearean Tragedy
5 units, Aut (Friedlander, L)

ENGLISH 170A/270A. Introduction to Critical Theory: Literary Theory and Criticism Since Plato
5 units, Win (Kaufman, R)

FRENGEN 181. Philosophy and Literature — (Same as ITALGEN 181, PHIL 81.)
4 units, Win (Anderson, L; Landy, J)

HISTORY 135/335. History of European Law, Medieval to Contemporary
5 units, Win (Hergoz, T)

HISTORY 203A/303A. Theories of the State from the Ancient World to the Present
5 units, Win (Baker, K; Sheehan, J)

HISTORY 205B/305B. Quantitative Methods in Historical Research
5 units, Win (Klein, H)

HISTORY 305. Graduate Workshop in Teaching
1 unit, Spr (Kollmann, N; Roberts, R)
PHIL 10. God, Self, and World: An Introduction to Philosophy
5 units, Win (Perry, J)

PHIL 20. Introduction to Moral Philosophy — (Same as ETHICSOC 20.)
5 units, Spr (Seidman, J)

PHIL 30. Introduction to Political Philosophy — (Same as ETHICSOC 30, POLISCI 3.)
5 units, Win (Stone, P)

PHIL 107/207. Plato and Heraclitus
3 units, Spr (Moravcsik, J)

PHIL 194C. Undergraduate Seminar
4 units, Win (Wood, A)

PHIL 194D. Certainty and Language
4 units, Spr (Dunlop, K)

COMMUNICATION

Emeriti: (Professors) Henry S. Breitrose, Richard A. Brody, Donald F. Roberts; (Professors, Teaching) Ronald Alexander, Marion Lewenstein, James Risser

Chair: James Fishkin

Director, Institute for Communication Research: James Fishkin

Director, John S. Knight Fellowships for Professional Journalists: James R. Bettinger

Director, Media Studies: Jeremy Bailenson

Director, Undergraduate Studies: Fred Turner

Deputy Director, John S. Knight Fellowships for Professional Journalists: Dawn E. Garcia

Acting Director, Journalism: Ann Grimes

Professors: James Fishkin, Theodore L. Glasser, Shanto Iyengar, Jon Krosnick, Clifford Nass, Byron B. Reeves

Associate Professor: Marcilyena Morgan

Assistant Professors: Jeremy Bailenson, Fred Turner

Lecturers: John Markoff, Howard Rheingold, James Wheaton, Gregg Zachary

Courtesy Professors: Jan Krawitz, Lawrence Lessig, Walter W. Powell, Kristine M. Samuelson

Visiting Professors: Joel Brinkley, Ann Grimes

Visiting Associate Professors: Robert Ruskin, Beth Noveck

Visiting Hearst Professional in Residence: Glenn Frankel

Department Offices: McClatchy Hall, Building 120, Room 110

Mail Code: 94305-2050

Phone: (650) 723-1941

Web Site: http://communication.stanford.edu

Courses given in Communication have the subject code COMM. For a complete list of subject codes, see Appendix.

The Department of Communication engages in research in communication and offers curricula leading to the B.A., M.A., and Ph.D. degrees. The M.A. degree prepares students for a career in journalism. The department also offers students who are completing a B.A. in another department, a co-terminal program with an M.A. emphasis in Media Studies. The Ph.D. degree leads to careers in university teaching and research-related specialties.

The Institute for Communication Research offers research experience primarily to advanced Ph.D. students.

The John S. Knight Fellowships program brings outstanding mid-career journalists to the University for study for an academic year. The John S. and James L. Knight Foundation sponsors twelve U.S. journalists. They are joined by eight International Fellows sponsored by the Shinyoung Foundation, the Lyle and Corrine Nelson International Fellowship Fund, the Knight Foundation, the Hearst Foundation, the Fulbright Program, the Koura Foundation, and others.

ADMISSION

Prospective Undergraduates — Write to the University’s Office of Undergraduate Admissions, Stanford University, Stanford, California 94305-3020.

Prospective Coterminal Students — Applications are available online at http://registrar.stanford.edu/shared/publications.htm#Coterm.

Prospective Graduate Students — Online applications are preferred and can be submitted on the web at http://gradadmissions.stanford.edu.

The department requires that applicants for graduate admission submit a complete list of subject codes, see Appendix.

The GRE should be taken no later than early December application deadline.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

PREPARATION

Before declaring the major, students must have completed or be concurrently enrolled in one of the following: COMM 1A (formerly COMM 1) or COMM 1B COMM 106 COMM 108

Students interested in declaring the major should see the student services administrator in Building 120, Room 110B, during scheduled office hours. Students are required to take at least 60 units (approximately 12 courses), not counting statistics, to complete the major.

PROGRAM OF STUDY

The undergraduate curriculum is intended for liberal arts students who wish to develop an understanding of communication in society, drawing on the perspective of the social sciences. Undergraduates majoring in Communication are expected to become acquainted with the fundamental concepts, theoretical approaches, and methods of the field, and to acquire advanced knowledge in one or more of the sub-areas of communication institutions, processes, and effects.

While the department does not attempt to provide comprehensive practical training at the undergraduate level, the curriculum provides a diverse range of internship opportunities including professional print journalism, some of which are funded by the department’s prestigious Rebele Internship Program.

The department is committed to providing students with analytical and critical skills for future success in graduate programs, professional schools, or immediate career entry.

The major is structured to provide several levels of study: a core curriculum, intended to expose students to a broad-based understanding of communication theory and research, and a number of intermediate-level options and electives. Majors also have the opportunity to do advanced research in the form of senior projects and honors theses.

All undergraduate majors are required to complete a set of core communication courses which include COMM 1A (formerly COMM 1), Media Technologies, People, and Society (5 units) or COMM 1B, Media, Culture, and Society (5 units); COMM 120, Digital Media in Society (WIM, 5 units); COMM 106, Communication Research Methods (5 units); and COMM 108, Media Processes and Effects (5 units). Core courses are usually given only once each year.

The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 or PSYCH 10) prior to registration in COMM 106, Communication Research Methods, in preparation for courses in methodology and advanced courses in communication processes and effects. It is recommended that this be done as soon as possible so as not to prevent registration in a course requiring statistical understanding. The Statistics course does not count toward the 60 units to complete the Communication major.
In addition to the core courses and the statistics requirement, undergraduate majors select courses from the areas described below. Many of the courses require core courses as prerequisites.

**Area I: Communication Processes and Effects** — Area I Emphasizes the ways in which communication scholars conduct research in, and consider the issues of, human communication. These studies aim to provide expert guidance for social policy makers and media professionals. A minimum of two courses must be taken from COMM 146, 149, 160, 162, 166, 169, 170, 172.

**Area II: Communication Systems/Institutions** — Area II considers the roles and interaction of institutions such as broadcasting, film, journalism, constitutional law, and business within communication and mass communication contexts. A minimum of two courses must be taken from COMM 104, 116, 120, 125, 131, 136, 148.

**Options** — The Communication curriculum is designed to provide a theoretical base that can be effectively applied to numerous environments. The potential options listed below are not required, but are examples of how to focus your interests.

1. Communication Technologies
   a) Department of Communication (COMM):
      120. Digital Media in Society
      166. Virtual People
      169. Computers and Interfaces: Psychology and Design
      172. Psychological Processing of Media
   b) Affiliated department offerings (elective credit toward the major):
      1) Computer Science (CS)
         105. Introduction to Computers
         106A. Programming Methodology
         147. Introduction to HCI
         201. Computers, Ethics, and Social Responsibility
      2) Science, Technology, and Society (STS)
         101. Science, Technology, and Contemporary Society

2. Communication and Public Affairs
   a) Department of Communication (COMM)
      125. Perspectives on American Journalism
      136. Democracy and the Communication of Consent
      160. The Press and the Political Process
      162. Analysis of Political Campaigns
      170. Communication and Children
   b) Affiliated department offerings (elective credit toward the major)
      1) Department of Political Science (POLISCI)
         123. Politics and Public Policy
      2) Department of Psychology (PSYCH)
         75. Cultural Psychology
         167. Seminar on Aggression
         180. Social Psych. Perspectives on Stereotyping and Prejudice
      3) Public Policy Program (PUBLPOL)
         104. Economic Policy Analysis
         194. Technology Policy

3. Media Practices and Performance
   a) Department of Communication (COMM)
      120. Digital Media in Society
      125. Perspectives on American Journalism
      131. Media Ethics and Responsibilities
      160. The Press and the Political Process
   The remainder of the 60 required units may be fulfilled with any elective Communication courses, or crosslisted courses in other departments.

   To be recommended for the B.A. degree in Communication, the student must complete at least 60 units (approximately twelve courses) in the department. No more than 10 units of transfer credit or Summer Session may be applied to meet department requirements. Communication majors must receive a letter grade for all Communication courses unless they are offered only for satisfactory/no credit (S/NC), and maintain a grade point average (GPA) of 2.0 (C) in courses towards the major.

**MINORS**

**PREPARATION**

Before declaring the minor, students must have completed or be concurrently enrolled in one of the following:
- COMM 1A (formerly COMM 1) or COMM 1B
- COMM 106
- COMM 108

Students interested in declaring the minor should apply via Axess. Students are required to take 36 units (approximately 8 courses), not counting statistics, to complete the minor.

**PROGRAM OF STUDY**

The minor is structured to provide a foundation for advanced course work in communication through a broad-based understanding of communication theory and research.

The minor in Communication consists of three introductory Communication core courses that include COMM 1A (formerly COMM 1), Media Technologies, People, and Society (5 units) or COMM 1B, Media, Culture, and Society (5 units); COMM 106, Communication Research Methods (5 units); and COMM 108, Media Processes and Effects (5 units).

In addition to the three core courses, the minor requires a minimum of five intermediate-level elective courses in the department. The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 or PSYCH 10) prior to registration in COMM 106, Communication Research Methods. It is recommended that the course in statistics be taken as early as possible, preferably in the Autumn Quarter of the junior year. The Statistics course does not count toward the 36 units to complete the Communication minor.

Students interested in declaring a minor must do so no later than registration day in the Autumn Quarter of the junior year. Core courses are usually offered only once annually, and they constitute a sequence:

- Prerequisite: introductory statistics course (for example, PSYCH 10)
- Core Courses: COMM 1A (formerly COMM 1) or COMM 1B, 106, 108

**Area I: Communication Processes and Effects:** a minimum of one course from COMM 146, 149, 160, 162, 166, 169, 170, 172

**Area II: Communication Systems/Institutions:** a minimum of one course from COMM 104, 116, 120, 125, 131, 136, 148

Plus elective courses amounting to 15 units.

Some courses are not given every year. Refer to the Time Schedule for details.

**HONORS PROGRAM**

The honors program provides undergraduates the opportunity to undertake a significant program of research in an individual professor/student mentoring relationship. The aim is to guide students through the process of research, analysis, drafting, rethinking, and redrafting, which is essential to excellence in scholarship. Working one-on-one with a faculty adviser, seniors earn 15 Communication units, culminating in an honors thesis. In order to be eligible for the honors program, interested majors must have:

1. successfully completed both a research methods and statistics course,
2. selected an adviser, and
3. submitted an application to the department by the end of their junior year.

An application may be picked up outside Room 110, Building 120.

Students are expected to make steady progress on their honors thesis throughout the year. Students who fail to submit a satisfactory draft Autumn Quarter will be dropped from the program.

A final copy of the honors thesis must be read and approved by the adviser and submitted to the department by the eighth week of Spring Quarter (exact date to be arranged). It becomes part of a permanent record held by the department. Honors work may be used to fulfill communication elective credit but must be completed and a letter grade submitted prior to graduation. A student failing to fulfill all honors requirements may still receive independent study credit for work completed and it may be applied toward fulfilling major requirements.
The designation “with honors” is awarded by the Department of Communication to those graduating seniors who, in addition to having completed all requirements for the Communication major:
1. complete an honors thesis
2. maintain a distinguished GPA in all Communication course work
3. are recommended by the Communication faculty

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

The Department of Communication offers students who are completing a B.A. in another department, a coterminous program with an M.A. emphasis in Media Studies; see “Media Studies Program” below for more information.

Applications for coterminous study must be submitted at least four quarters in advance of the expected master’s degree conferral date. Applicants must have earned a minimum of 120 units toward graduation as shown on the undergraduate unofficial transcript. This includes allowable advanced placement (AP) and transfer credit. Applications may be submitted no later than December 1, 2006 for admission beginning in either Winter or Spring Quarter 2006-07 or Autumn Quarter 2007-08. There is no rolling admission in the Communication department. Requirements include: Application for Admission to Coterminous Master’s Program form, preliminary program proposal, statement of purpose, three letters of recommendation from Stanford professors, and a current Stanford transcript. GRE scores are not required. Coterminous applications are submitted directly to the department. Review procedures and the Graduate Admissions Committee determine criteria.

For University coterminous degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

MASTERS OF ARTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The department awards a terminal M.A. degree in Journalism. Applicants for this program, and for doctoral work, are evaluated for admission on different criteria. A student may complete more than one M.A. degree in the department, but course work applied to the requirements for one M.A. degree may not be applied to a second. All work to fulfill graduate degree requirements must be in courses numbered 100 or above.

Students who complete an M.A. degree and who desire entry into the Ph.D. program must file a Graduate Program Authorization Petition application that may be picked up at the Registrar’s Information Windows or at http://registrar.stanford.edu/publications/#GradStud. Such students are considered alongside all other doctoral applicants.

The M.A. degree in Media Studies is only available to current Stanford University undergraduates who are majoring in another department. See more information on subsequent pages for additional description.

JOURNALISM

Stanford’s Graduate Program in Journalism focuses on the knowledge and skills required to report, analyze, and write authoritatively about public issues. The curriculum combines a sequence of specialized reporting and writing courses with seminars and courses devoted to deepening the students’ understanding of the roles and responsibilities of American news media in their coverage of public issues.

The program emphasizes preparation for the practice of journalism and a critical perspective from which to understand it. The program’s objective is twofold: (1) to graduate talented reporters and writers to foster public understanding of the significance and consequences of public issues and the debates they engender; and (2) to graduate thoughtful journalists to respond openly and eloquently when called on to explain and defend the methods of their reporting and the quality of their writing.

CURRICULUM

The curriculum includes several required courses, examples of which are shown below, and a master’s project:
216. Journalism Law
217. Digital Journalism
220. Digital Media in Society
225. Perspectives on American Journalism
231. Media Ethics And Responsibilities
273. Public Issues Reporting I
274. Public Issues Reporting II
289. Journalism M.A. Project
291. Graduate Journalism Seminar

Additionally, students are usually required to take two specialized writing courses, chosen from a list of four or five, and one to four approved electives from among graduate-level courses in the Department of Communication, or from among courses on campus that deal substantively with issues of public importance. The M.A. degree in Communication (Journalism) requires a minimum of 49 units.

Except for the Graduate Journalism Seminar and the Journalism Project, all courses must be taken for a letter grade. To remain in good academic standing, students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.

JOURNALISM PROJECT

The master’s project, a requirement for graduation, is intended as an opportunity for students to showcase their talents as writers and reporters. It is also an opportunity to undertake an in-depth critique of an area of journalism in which the author has a special interest. Work on the project usually begins during the Winter Quarter and continues through the Spring Quarter. It represents a major commitment of time, research, and writing. Although it is not a requirement that the project be published, it must be judged by a member of the faculty to be of a quality acceptable for publication. At a minimum, the project should demonstrate the rigor and discipline required of good scholarship and good journalism; it should offer ample evidence of students’ ability to gather, analyze, and synthesize information in a manner that goes beyond what ordinarily appears in daily newspapers.

MEDIA STUDIES

The Media Studies coterminous master’s program provides a broad introduction to scholarly literature in mass communication. This one-year program is designed for current Stanford students without prior academic work in communication, who wish academic preparation for teaching. Media Studies students need to satisfy four basic requirements:

1. Required Units and GPA: students must complete a minimum of 45 units in Communication and related areas, including items 2 and 3 below. All courses, except for the Media Studies M.A. Project, must be taken for a letter grade if offered, and courses in related areas outside the department must be approved by the student’s adviser. To remain in good academic standing, students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.
2. Core Requirements: students must complete COMM 206, 208, and a statistics course. Typically, the statistics requirement is met with STATS 160 or 190. Other courses occasionally are approved as a substitute before the student is admitted to the program. The Statistics course does not count toward the 45 units.
3. Six Media Studies Courses: students must complete a minimum of 6 additional communication courses from the following list of department courses concerned with the study of media. While the department also offers graduate-level courses teaching media-related skills (e.g., COMM 277), these courses are intentionally excluded from the list. Not all the listed courses are offered every year and the list may be updated from one year to the next. However, its intent is to include only courses in media studies, not media skills. In addition to the core requirements and a minimum of 6 courses listed below, students may select additional courses from the list and any related course approved by the student’s adviser.

211. Media Technologies, People, and Society
216. Journalism Law
217. Digital Journalism
3. Demonstrate proficiency in tools required in the area of research
2. Pass the general qualifying examinations by the end of the second
1. Complete all departmental course requirements with grades of 'B+' or

In order to fulfill University residency requirements, Ph.D. candidates are required to:

- Complete all departmental course requirements with grades of ‘B+’ or above. Currently these courses include COMM 206, 208, 311, 314 or 318, 317, and 319. Students are also required to take two quarters of statistics or one quarter of statistics and an advanced methods course.
- Pass the general qualifying examinations by the end of the second academic year of study.
- Demonstrate proficiency in tools required in the area of research specialization. Identified with the advice of the faculty, such tools may include detailed theoretical knowledge, advanced statistical methods, computer programming, a foreign language, or other technical skills.
- Complete at least two pre-dissertation research projects (the Major Project and the Complementary Project).
- Teach or assist in teaching at least two courses, preferably two different courses, at least one of which is ideally a core undergraduate course (COMM 1A, 1B, 106, and 108).
- Complete a dissertation proposal and proposal meeting approved by the dissertation committee.
- Pass the dissertation oral examination, which is a defense of the dissertation. Because the multifaceted nature of the department makes it possible for the Ph.D. student to specialize in areas that draw on different related disciplines, the plan of study is individualized and developed between the faculty adviser and the student. Ph.D. candidacy is valid for five years.
- Other requirements and details of the requirements can be found in the document, “Official Rules and Procedures for the Ph.D. in the Department of Communication,” available from the student services administrator of the department.

**PH.D. MINOR**

Candidates for the Ph.D. degree in other departments who elect a minor in Communication are required to complete a minimum of 20 units of graduate courses in the Department of Communication, including a total of three theory or research methods courses, and are examined by a representative of the department. A department adviser in consultation with the individual student determines the particular communication theory and methods courses.

**THE INSTITUTE FOR COMMUNICATION RESEARCH**

The Institute is an office of project research for the faculty of the Department of Communication and operates under grants to faculty from government, industry, and non-profit organizations. Research assistantships are often available to qualified Ph.D. students in Communication.

**COURSES**

WIM indicates that the course satisfies the Writing in the Major requirements.

**PRIMARILY FOR UNDERGRADUATES**

COMM 1A. Media Technologies, People, and Society — (Graduate student register for 211.) Open to non-majors. The concepts and contexts of communication. A topics-structured orientation emphasizing the field and the scholarly endeavors represented in the department. GER:DB-SocSci 5 units, Aut (Nass, C)

COMM 1B. Media, Culture, and Society — The institutions and practices of mass media, including television, film, radio, and digital media, and their role in shaping culture and social life. The media’s shifting relationships to politics, commerce, and identity. GER:DB-SocSci 5 units, Win (Iyengar, S; Turner, F)

COMM 12SI. Global Noise: Appropriation, Localization, and Racial Identification of World Hip Hop 2 units, Aut (Morgan, M)

COMM 104. Reporting, Writing, and Understanding the News — Techniques of news reporting and writing. The value and role of news in democratic societies. GER:DB-SocSci 5 units, Aut (Brinkley, J). Win (Frankel, G)
COMM 106. Communication Research Methods — (Graduate students register for 206.) Conceptual and practical concerns underlying commonly used quantitative approaches, including experimental, survey, content analysis, and field research, in communication. GER:DB-SocSci
5 units, Spr (Danielson, D)

COMM 107. The First Amendment in the Digital Age — (Graduate students register for 207.) Interdisciplinary. History and general principles. The First Amendment and computer code; regulation of the Internet as a conduit for speech; regulation of content in new communications networks, including obscenity, defamation, and privacy; and the public forum in an era of private networks. Freedom of the press in light of blogging and citizen journalism, and the impact of new technologies on fair use. Relationship between technology design and free expression: do technologies strengthen free expression? Legal, policy, and technological solutions that promote the values of free speech.
5 units, Win (Noveck, B)

COMM 108. Media Processes and Effects — (Graduate students register for 208.) The process of communication theory construction including a survey of social science paradigms and major theories of communication. Recommended: 1 or PSYCH 1. GER:DB-SocSci
5 units, Aut (Noveck, B)

COMM 109. Research Practicum in Media Effects — Topic and instructor change each year. May be repeated for credit. Prerequisite: 106 and 108 or consent of instructor.
5 units, not given this year (Roberts, D)

COMM 110. Journalism Law — (Undergraduate section; see 216.) 5 units, Aut (Wheaton, J)

COMM 111. Digital Journalism — (Undergraduate section; see 217.) 5 units, Win (Rheingold, H)

COMM 111Q. Theories of Film Practice — Stanford Introductory Seminar. Preference to sophomores. How theory connects with practice in the production of film and television. Film and television from the perspectives of practitioners who have theorized about their work in directing, editing, screenwriting, cinematography, and sound, and social scientists whose research has explored similar issues empirically. WRITE-2
4 units, Win (Breitrose, H)

COMM 120. Digital Media in Society — (Graduate students register for 220.) Contemporary debates concerning the social and cultural impact of digital media. Topics include the historical origins of digital media, the cultural contexts of their development and use, and the influence of digital media on our conceptions of self, community, and state. GER: DB-SocSci, WIM
5 units, Spr (Turner, F)

COMM 125. Perspectives on American Journalism — (Graduate students register for 225.) Issues, ideas, and concepts in the development of American journalism, emphasizing the role of the press in society, the meaning and nature of news, and professional norms that influence conduct in and outside the newsroom. Prerequisite: 1 or junior standing. GER:DB-SocSci
5 units, Aut (Glasser, T)

COMM 131. Media Ethics and Responsibilities — (Graduate students register for 231.) The development of professionalism among American journalists, emphasizing the emergence of objectivity as a professional and the epistemological norm. An applied ethics course where questions of power, freedom, and truth autonomy are treated normatively so as to foster critical thinking about the origins and implications of commonly accepted standards of responsible journalism. GER:DB-SocSci
5 units, Win (Glasser, T)

COMM 136. Democracy and the Communication of Consent — (Graduate students register for 236.) Focus is on competing theories of democracy and the forms of communication they presuppose, combining normative and empirical issues, and historical and contemporary sources. Topics include representation, public opinion, mass media, small group processes, direct democracy, the role of information, and the prospects for deliberative democracy. GER:DB-SocSci
5 units, not given this year (Fishkin, J)

COMM 146. Language and Discourse: Race, Class, and Gender — (Graduate students register for 246.) Theories concerning the discursive construction of identity and representation of cultures. Relationships between power and powerful speech. How language mediates and constructs identity; how it is associated with race, class and gender; and how people resist and manipulate these associations. Sources include conversation, public and popular culture, education, literature, and film.
5 units, not given this year (Morgan, M)

COMM 148. Hip-Hop and Don’t Stop: Introduction to Modern Speech Communities — (Graduate students register for 248.) Focus this year is hip-hop and the media. Hip-hop as a global phenomenon with social influences beyond the music and entertainment industries. The development of standards. Hip-hop in the U.S. and its role as a cultural, political, social, and artistic resource for youth. Perspectives include cultural and linguistic anthropology, and media studies. Guest lecturer.
5 units, Spr (Morgan, M)

COMM 149. Ethnography of Modern Speech Communities — (Graduate students register for 249.) Concepts and analytical techniques in the social sciences that privilege observation, participation, video recording, and transcription of spontaneous interaction rather than experimental tasks or introspection. Interconnections among communications, social sciences, linguistics, and sociocultural anthropology. Focus is on details of everyday activities in communities and interactive environments. Topics include language socialization, literacy, music, and the visual arts, the power of language, miscommunication, and universal and culture-specific properties of human communication.
5 units, Spr (Morgan, M)

COMM 160. The Press and the Political Process — (Graduate students register for 260; same as POLISCI 323R.) The role of mass media and other channels of communication in political and electoral processes. GER:DB-SocSci
5 units, not given this year (Iyengar, S)

COMM 162. Analysis of Political Campaigns — (Graduate students register for 262; same as POLISCI 323S.) Seminar. The evolution of American political campaigns, and the replacement of the political party by the mass media as intermediary between candidates and voters. Academic literature on media strategies, the relationship between candidates and the press, the effects of campaigns on voter behavior, and inconsistencies between media campaigns and democratic norms. Do media-based campaigns enable voters to live up to their civic responsibility? Has the need for well-financed campaigns increased the influence of elites over nominations? Have citizens become disengaged? GER:DB-SocSci
5 units, Aut (Iyengar, S)

COMM 166. Virtual People — (Graduate students register for 266.) The concept of virtual people or digital human representations; methods of constructing and using virtual people; methodological approaches to interactions with and among virtual people; and current applications. Viewpoints including popular culture, literature, film, engineering, behavioral science, computer science, and communication.
5 units, Win (Bailenson, J)

COMM 169. Computers and Interfaces — (Graduate students register for 269.) Interdisciplinary. User responses to interfaces and design implications of those responses. Theories from different disciplines illustrate responses to textual, voice-based, pictorial, metaphorical, conversational, adaptive, agent-based, intelligent, and anthropomorphic interfaces. Group design project applying theory to the design of products or services for developing countries. GER:DB-SocSci
5 units, Win (Nass, C)
COMM 170. Communication and Children I — (Graduate students register for 270.) Developmental approach to how children come to use and process mass media, what information they obtain, and how their behavior is influenced by the media. Prerequisite: 1, PSYCH 1, or SOC 1. GER:DB-SocSci
   5 units, Win (Roberts, D)

COMM 172. Psychological Processing of Media — (Graduate students register for 272.) The literature related to psychological processing and the effects of media. Topics: unconscious processing; picture perception; attention and memory; emotion; the physiology of processing media; person perception; pornography; consumer behavior; advanced film and television systems; and differences among reading, watching, and listening. GER:DB-SocSci
   5 units, Spr (Reeves, B)

COMM 177F. Specialized Writing and Reporting: Literary Journalism — (Same as 277F.)
   5 units, Win (Bettinger, J)

COMM 177G. Specialized Writing and Reporting: Covering a Business Beat — (Same as 277G.)
   5 units, Win (Grimes, A)

COMM 177R. Specialized Writing and Reporting: Covering Silicon Valley — (Same as 277R.)
   5 units, Spr (Zachary, G; Markoff, J)

COMM 177T. Specialized Writing and Reporting: Journalism as Biography — (Same as 277T.)
   5 units, not given this year

COMM 190. Senior Project — Research project. Prerequisite: senior standing.
   5 units, Aut, Win, Spr (Staff)

COMM 195. Honors Thesis — Qualifies students to conduct communication research. Student must apply for department honors thesis program during Spring Quarter of junior year.
   5 units, Aut, Win, Spr (Staff)

COMM 199. Individual Work — For students with high academic standing. May be repeated for credit.
   1-5 units, Aut, Win, Spr, Sum (Staff)

PRIMARILY FOR MASTER’S STUDENTS

COMM 206. Communication Research Methods — (Graduate section; see 106.)
   4 units, Spr (Danielson, D)

COMM 207. The First Amendment in the Digital Age — (Graduate section; see 107.)
   4 units, Win (Noveck, B)

COMM 208. Media Processes and Effects — (Graduate section; see 108.)
   4 units, Aut (Bailenson, J)

COMM 211. Media Technologies, People, and Society — (Graduate section; see 1A.)
   4 units, Aut (Nass, C)

COMM 216. Journalism Law — (Undergraduates register for 116.) Laws and regulation impacting journalists. Topics include libel, privacy, news gathering, protection sources, fair trial and free press, theories of the First Amendment, and broadcast regulation. Prerequisite: Journalism M.A. student or advanced Communication major.
   4 units, Aut (Weaton, J)

COMM 217. Digital Journalism — (Undergraduates register for 117.) Seminar and practicum. The implications of new media for journalists. Professional and social issues related to the web as a case of new media deployment, as a story, as a research and reporting tool, and as a publishing channel. Prerequisite: Journalism M.A. student or consent of instructor.
   4 units, Win (Rheingold, H)

COMM 220. Digital Media in Society — (Graduate section; see 120.)
   4 units, Spr (Turner, F)

COMM 225. Perspectives on American Journalism — (Graduate section; see 125.)
   4 units, Aut (Glasser, T)

COMM 231. Media Ethics and Responsibilities — (Graduate section; see 131.)
   4 units, Win (Glasser, T)

COMM 236. Democracy and the Communication of Consent — (Graduate section; see 136.)
   4 units, not given this year (Fishkin, J)

COMM 238. Democratic Theory: Normative and Empirical Issues — (For undergraduates and M.A. students; Ph.D. students, register for 338.) Decision processes that make a normative claim to resolve questions of public choice, at any of these levels of choice: first principles, constitutions, public policies, or particular outcomes. Topics include democratic theory, the theory of justice and issues of deliberation in small groups, public consultations, conventions, juries, and thought experiments popular in contemporary political theory. Readings include Madison, de Tocqueville, Mill, Marx, Rawls, Nozick, Ackerman, and Schudson. Preference to graduate students. Prerequisite: consent of instructor.
   1-5 units, not given this year (Fishkin, J)

COMM 239. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives — The social and psychological processes involved in asking and answering questions via questionnaires for the social sciences; optimizing questionnaire design; open versus closed questions; rating versus ranking; rating scale length and point labeling; acquiescence response bias; don’t-know response options; response choice order effects; question order effects; social desirability response bias; attitude and behavior recall; and introspective accounts of the causes of thoughts and actions.
   4 units, Spr (Krosnick, J)

COMM 244. Democracy, Press, and Public Opinion — (For undergraduates and M.A. students; Ph.D. students, register for 344.) The democratic tradition provides conflicting visions of what a democracy is or might be, offering different views of the role of the press and citizens in engaging public issues. Focus is on democratic theory with empirical work on public opinion and the role of the media. Topics include campaigns, the effects of new technology, competing strategies of public consultation, public journalism, and possibilities for citizen deliberation. Prerequisite: consent of instructor.
   1-4 units, not given this year (Fishkin, J)

COMM 246. Language and Discourse: Race, Class, and Gender — (Graduate section; see 146.)
   4 units, not given this year (Morgan, M)

COMM 248. Hip-Hop and Don’t Stop: Introduction to Modern Speech Communities — (Graduate section; see 148.)
   4 units, Spr (Morgan, M)

COMM 249. Ethnography of Modern Speech Communities — (Graduate section; see 149.)
   4 units, Spr (Morgan, M)
COMM 260. The Press and the Political Process—(Graduate section; see 160; same as POLISCI 323R.)
4 units, not given this year (Iyengar, S)

COMM 262. Analysis of Political Campaigns—(Graduate section; see 162; same as POLISCI 323S.)
4 units, Aut (Iyengar, S)

COMM 266. Virtual People—(Graduate section; see 166.)
4 units, Win (Bailenson, J)

COMM 268. Experimental Research in Advanced User Interfaces—(For undergraduates and M.A. students; Ph.D. students, register for 368.) Project-based course involves small groups designing and implementing an experiment concerning voice and agent user interfaces. Each group is involved in a different, publishable research project. Prerequisite: consent of instructor.
1-5 units, Win, Spr (Nass, C)

COMM 269. Computers and Interfaces—(Graduate section; see 169.)
4 units, Win (Nass, C)

COMM 270. Communication and Children I—(Graduate section; see 170.)
4 units, Win (Roberts, D)

COMM 272. Psychological Processing of Media—(Graduate section; see 172.)
4 units, Spr (Reeves, B)

COMM 273. Public Issues Reporting I—Reporting and writing on government and public policies and issues; their implications for the people and the press. Required for journalism M.A. students.
4 units, Aut (Grimes, A)

COMM 274. Public Issues Reporting II—Student teams study one major public policy issue that has broad societal impact. Students report and write individually, and as a team produce a body of journalism that advances the understanding of a new issue each year, published on a web site and offered for publication to newspapers and other media outlets. Prerequisites: 273, Journalism M.A. student.
4 units, Win (Brinkley, J)

COMM 277F. Specialized Writing and Reporting: Literary Journalism—(Undergraduates register for 177F.) Using the tools of literature to tell the true stories of journalism. Characterization, narrative plotting, scene-setting, point of view, tone and style, and the techniques of reporting for literary journalism, interviewing, and story structure. Prerequisite: 104 or consent of instructor.
4 units, Win (Bettinger, J)

COMM 277G. Specialized Writing and Reporting: Covering a Business Beat—(Undergraduates register for 177G.) How to write news and feature stories about companies and personalities in the business world. Prerequisite: 104 or consent of instructor.
4 units, Win (Grimes, A)

COMM 277R. Specialized Writing and Reporting: Covering Silicon Valley—Undergraduates register for 177R.) Techniques to write and report about Silicon Valley technologies. Visits from professional writers. Prerequisite: 104 or consent of instructor.
4 units, Spr (Zachary, G; Markoff, J)

COMM 277T. Specialized Writing and Reporting: Journalism as Biography—(Undergraduates register for 177T.) How journalistic techniques, such as interviews and public record searches, can be used in writing biographies and profiles. The limits and challenges of such methods, and the opportunities and ethical dilemmas. Prerequisite: 104 or consent of instructor.
4 units, not given this year

COMM 289. Journalism Master’s Project
4 units, Spr (Staff)

COMM 290. Media Studies M.A. Project—Individual research for coterminal Media Studies students.
1 unit, Aut, Win, Spr, Sum (Staff)

COMM 291. Graduate Journalism Seminar—Required of students in the graduate program in Journalism. Forum for current issues in the practice and performance of the press. Journalists in or visiting the Bay Area are often guest speakers. May be repeated for credit.
1 unit, Aut (Grimes, A), Win (Garcia, D), Spr (Bettinger, J)

COMM 299. Individual Work
1–4 units, Aut, Win, Spr (Staff)

PRIMARILY FOR DOCTORAL STUDENTS

COMM 308. Graduate Seminar in Political Psychology—For students interested in research in political science, psychology, or communication. Methodological techniques for studying political attitudes and behaviors.
1–3 units, Aut, Win, Spr (Krosnick, J)

1 unit, Aut, Win, Spr (Krosnick, J)

1-5 units, Aut (Luskin, R)

COMM 314. Doctoral Research Methods II B—Part of the doctoral research methods sequence. Focus is on the logic of qualitative research methods and modes of inquiry relevant to the study of communication and meaning. Prerequisite: Communication Ph.D. student, or consent of instructor.
1-5 units, Spr (Glasser, T)

COMM 317. Doctoral Research Methods I—Approaches to social science research and their theoretical presuppositions. Readings from the philosophy of the social sciences. Research design, the role of experiments, and quantitative and qualitative research. Cases from communication and related social sciences. Prerequisite: consent of instructor.
1-5 units, Spr (Fishkin, J)

COMM 318. Doctoral Research Methods II—Prerequisite: consent of instructor.
1-5 units, Win (Krosnick, J)

COMM 319. Doctoral Research Methods III—Prerequisite: consent of instructor.
1-5 units, Spr (Luskin, R)

COMM 320G. Advanced Topics in New Media and American Culture—Primarily for Ph.D. students. Prerequisite: 220 (formerly 219) or consent of instructor.
1-5 units, Spr (Turner, F)

COMM 325G. Comparative Studies of News and Journalism—Focus is on topics such as the roles and responsibilities of journalists, news as a genre of popular literature, the nexus between press and state, and journalism’s commitment to political participation.
1-5 units, Win (Glasser, T)

COMM 326. Advanced Topics in Human Virtual Representation—Topics include the theoretical construct of person identity, the evolution of that construct given the advent of virtual environments, and methodological approaches to understanding virtual human representation. Prerequisite: consent of instructor.
1-5 units, Spr (Bailenson, J)
COMM 331G. Communication and Media Ethics — Limited to Ph.D. students. Advanced topics in press ethics and responsibility. Prerequisite: 231 or consent of instructor.
1-3 units, not given this year (Glasser, T)

COMM 336G. Democracy, Justice, and Deliberation — (Same as 236G; see 236G.)
1-5 units, not given this year (Fishkin, J)

COMM 338. Democratic Theory: Normative and Empirical Issues — (Same as 238; see 238.)
1-5 units, Win (Fishkin, J; Luskin, R)

COMM 344. Democracy, Press, and Public Opinion — (Same as 244; see 244.)
1-4 units, not given this year (Fishkin, J)

COMM 347. Research in Political Psychology — Multi-methodological. Public preferences about government policies; the impact of the mass media on public opinion; party identification formation and change; voter decision making; determinants of voter turnout; issue public membership and its effects; measurement of public opinion; and the interface of democratic governments with their constituents.
2-4 units, not given this year (Krosnick, J)

COMM 348. Gender, Culture, and Communication — The field of gender and communication and principal questions in feminist theory in the context of linguistics, media studies, and sociolinguistics. Historiographical and theoretical perspectives on feminism and technology. International and multicultural focus. Areas include discourse and interaction, gender and culture, communication theory, gender and media, cultural studies, political economy, and symbolic communication. How everyday interactions, media, film, popular culture, and journalism incorporate gender and sexuality and perpetuate stereotypes of men, women, and sexuality. Prerequisite: consent of instructor.
1-5 units, not given this year (Morgan, M)

COMM 349. Ethnography of Communication — Ethnographic methods and the study of discourse and interaction. The impact of ethnography on research and field methods; how results validate knowledge across disciplines. The relationship of ethnography of communication to disciplines such as anthropology, linguistics, communications, and sociology. Focus is on the integration of ethnography and other research techniques for the documentation of communication and its role in the establishment and management of social encounters. Prerequisite: consent of instructor.
1-5 units, Spr (Morgan, M)

COMM 360G. Political Communication — Limited to Ph.D. students. Advanced topics. Prerequisite: 260 or consent of instructor.
1-5 units, not given this year (Iyengar, S)

COMM 361. Field Experimentation in Political Communication Research — The design of large-scale field experiments. Recent developments in analysis of experimental data including matching, propensity scores, and other techniques that address the problem of selection bias. Prerequisite: consent of instructor.
4 units, not given this year (Iyengar, S)

COMM 368. Experimental Research in Advanced User Interfaces — (Same as 268; see 268.)
1-5 units, Win, Spr (Nass, C)

COMM 370G. Communication and Children — Limited to Ph.D. students. Prerequisite: 270 or consent of instructor.
1-5 units, Win (Roberts, D)

COMM 372G. Seminar in Psychological Processing — Limited to Ph.D. students. Advanced topics. Prerequisite: 272 or consent of instructor.
1-5 units, Win (Reeves, B)

COMM 374G. Freedom and Control of Communication — The meaning of freedom of public communication in democratic communities, focusing on the tensions between freedom and control, rights and opportunities, individual liberty and political equality.
1-5 units, not given this year (Glasser, T)

COMM 379. History of the Study of Communication — The origins of communication/media theory and research emphasizing the rise of communication as a separate field of study. The influence of schools of thought concerning the scope and purpose of the study of communication. Readings include foundational essays and studies. Prerequisite: Ph.D. student or consent of instructor.
1-5 units, not given this year (Glasser, T)

COMM 380. Curriculum Practical Training — Practical experience in the communication industries. Prerequisites: graduate standing in Communication, consent of instructor. Meets requirements for Curricular Practical Training for students on F-1 visas. 380 May be repeated four times for credit.
1-5 units, Aut, Win, Spr, Summer (Staff)

COMM 397. Complementary Project — Individual research for Ph.D. candidates.
1-6 units, Aut, Win, Spr, Summer (Staff)

COMM 398. Major Research Project — Individual research for Ph.D. candidates.
1-6 units, Aut, Win, Spr, Summer (Staff)

COMM 399. Advanced Individual Work
1-9 units, Aut, Win, Spr, Summer (Staff)

OVERSEAS STUDIES
Courses approved for the Communication major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

FLORENCE
COMM 53. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema — (Same as ARTHIST 160Y, ITALGEN 191F, HISTORY 235V.) GER:DB-Hum
5 units, Win (Campani, E)
COMPARATIVE LITERATURE

Emeriti: (Professors) Joseph Frank, John Freccero, René Girard, Herbert Lindenberger, Mary Pratt, Richard Rorty; (Courtesy Professors) W. B. Carnochan, Gerald Gillespie, Marjorie G. Perloff

Chair: Russell Berman
Director of Admissions: Russell Berman
Director of Graduate Studies: Seth Lerer
Director of Undergraduate Studies: David Palumbo-Liu
Chair of Curriculum Committee: Andrea Nightingale

Professors: John Bender (English, Comparative Literature), Russell Berman (German Studies, Comparative Literature), Margaret Cohen (French and Italian, Comparative Literature), Amir Eshel (German Studies, Comparative Literature), Roland Greene (English, Comparative Literature), Hans U. Gumbrecht (French and Italian, Spanish and Portuguese, Comparative Literature), Seth Lerer (English, Comparative Literature), Franco Moretti (English, Comparative Literature), Elisabeth Mudimbe-Boyi (French and Italian, Comparative Literature), Andrea Nightingale (Classics, Comparative Literature), David Palumbo-Liu (Comparative Literature), Patricia Parker (English, Comparative Literature), Ramón Saldívar (English, Comparative Literature), Jeffrey T. Schnapp (French and Italian, Comparative Literature; on leave)

Associate Professor: Monika Greenleaf (Slavic Languages and Literature, Comparative Literature)
Lecturer: Ann Gelder (Spring)
Consulting Professor: David G. Halliburton, John Wang
Visiting Professor: Abbas M. Milani (Autumn)
Visiting Associate Professor: Eelco Runia (Winter, Spring)
Visiting Lecturer: Jessie Labov (Humanities Fellow)

Courses given in Comparative Literature have the subject code COMPLIT. For complete list of subject codes, see Appendix.

The Department of Comparative Literature offers courses in the history and theory of literature through comparative approaches. The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy. Several major options are available for each degree, some of them offered in cooperation with other departments.

Comparative Literature provides students the opportunity to explore characteristics of literary writing in reflective and probing ways that go beyond the framework of a single national literary history. Familiarity with a specific national or linguistic literary tradition becomes an indispensable base for comparative scholarship across geopolitical and disciplinary boundaries. Along with the traditional model of comparative literature that juxtaposes two or more national literary cultures, the department supports teaching and research that examine literary phenomena with additional tools of inquiry. This can involve enhanced consideration of literary theory, the relationship between literature and philosophy, or the enrichment of literary study with other disciplinary methodologies. Comparative Literature also encourages the study of aspects of literature that surpass national boundaries, such as transnational literary movements or the dissemination of particular genres. In each case, students emerge from the program with enhanced verbal and writing skills, a command of literary studies, the ability to read deeply, analytically, and critically, and a more global knowledge of literature.

UNDERGRADUATE PROGRAM

BACHELOR OF ARTS

The undergraduate major in Comparative Literature is designed for students who combine the drive and ability to master foreign languages with a strong commitment to literary study. In all cases, students must do a substantial portion of their work in at least one foreign language. The major enables these students to pursue carefully constructed programs involving the in-depth study of literature in one or more languages not their own; and the study of their literature of specialization, its theory, and its practice in relation to other literatures, communications media, and disciplines.

The major is distinguished from those in the national literatures by its comparative scope, by the requirement of seminars that focus on fundamental theoretical questions regarding the nature of literature and literary inquiry; and by its requirement that the students’ programs of study be structured around the exploration of a single literary genre, historical epoch, or theoretical problem. It differs from the interdisciplinary majors in English and Modern Thought and Literature (MTL) by its requirement that every student’s program be anchored in the study of a literature other than that of his or her native language and, with specific regard to MTL, by its chronological scope.

The comparative aspect of each student’s program of specialization is fulfilled according to which of the three available options that the student elects to follow. These options are declared to the department; they are not declared on Axess, and they do not appear on the transcript or the diploma.

Option A: The Literary Studies option integrates in-depth work in a primary literature with extensive work in a second language (in the original language) and complementary course work in an outside field.

Option B: The Interdisciplinary option integrates in-depth work in a primary literature with the focused study of literature in relation to other arts (film, music, painting, etc.), intellectual disciplines (anthropology, history, linguistics, philosophy, etc.), or comparative work in area studies.

Option C: Interdisciplinary option with special concentration in the study of Philosophical and Literary Thought. This option integrates in-depth work in a primary literature with a systematic and articulated study of philosophy and its relations to literature.

An honors program is available in Comparative Literature for all three of these options (see below) that integrates substantial in-depth work in a primary literature with extensive work in a second language (in the original language) or discipline, but also requires the writing of a senior honors paper.

In all three options, students work closely with the department’s Director of Undergraduate Studies in designing an individually tailored program of specialization involving two related areas of study. Individual study plans require considerable advance planning and must meet the approval of the Director of Undergraduate Studies.

Declaring the Major—As soon as a student knows that he or she would like to declare the Comparative Literature major (and no later than Autumn Quarter of the junior year), he or she should obtain a worksheet for the appropriate option (see below) from the Comparative Literature office. The completed worksheet (with prospective courses for future years) should be handed to the Director of Undergraduate Studies with an updated official transcript and the student’s advising file. The director should sign the worksheet, indicating his or her approval of the feasibility of the proposed program. This worksheet needs to be updated at least once during each academic year.

Advising—When a student declares Comparative Literature, he or she may choose to declare the Director of Undergraduate Studies as his or her adviser since the director approves credit for all course work (including course work abroad). The adviser may also be a member of the core Comparative Literature faculty. If this occurs, the student must meet periodically with the Director of Undergraduate Studies to monitor his/her progress in the major and for all questions regarding the major’s requirements.

Overseas Campuses and Abroad Programs—The Department of Comparative Literature encourages time abroad, both for increased proficiency in language and the opportunity for advanced course work. Course work done at campuses other than Stanford is counted toward the major at the discretion of the Director of Undergraduate Studies and is contingent upon the University’s acceptance of classes for units. To that
end, students abroad must make an effort to save all notes, papers, correspondence, etc., to increase the chance of acceptance.

**Honors College**—The Department of Comparative Literature encourages all honors students to enroll in the honors college during the weeks preceding the beginning of every academic year. Applications to the college are available from the department administrator. The honors college is coordinated by the Division of Literatures, Cultures, and Languages (DLCL).

**Writing in the Major (WIM)**—In 2006-07, the WIM requirement for Comparative Literature should be met through COMPLIT 101.

**REQUIREMENTS**

**CORE FOR OPTIONS A, B, AND C**

All majors in Comparative Literature (including honors) are required to complete the following courses, the first as near as possible to the date of declaration and the second during the senior year. Together, these core seminars ensure that majors have been introduced to the framing propositions and principal methods of the discipline. More specifically these courses are designed to lead students to inquire about the historical standing of such concepts as the literary, the aesthetic, criticism, genre, text, and theory.

1. COMPLIT 101, Seminar on Literature and the Institution of Literary Study (5 units), provides students with an introduction to the comparative study of literature, to the history of poetic theory, and to the historical development of literary fields. It is concerned with addressing foundational questions such as: what kind of knowledge is literary knowledge and how has this knowledge been codified and categorized with respect to other forms of knowledge? Fulfills the Writing in the Major requirement for Comparative Literature majors.

2. COMPLIT 199, Senior Seminar on Literary Theory (5 units), offers advanced students of comparative literature the opportunity for in-depth study of the evolution of modern literary theory and, particularly, of contemporary theoretical perspectives regarding the study of literary artifacts.

**OPTION A—LITERARY STUDIES**

Literary works are shaped by a complex interplay of historical forces and constraints, including contacts between differing cultures and traditions; the evolution of literary genres, practices, and conventions; shifts in media and technologies of reproduction and diffusion; and the imitation of model authors. By combining in-depth work in a primary literature with work in a second literature, this option emphasizes the study of such phenomena. It requires:

1. Courses using materials in the original language:
   a) five courses which make up an intellectually coherent program, in the literature of the first language A.
   b) three courses are in the literature of language B. These course selections must be coordinated with the courses selected in the literature of language A in order that, taken together, they form a cohesive program of study focused on one of:
      1) a specific literary genre
      2) a historical epoch
      3) a theoretical question
   
   *Note:* if either A or B is the student’s native language, further work must be done in a third language to the extent of at least one course in its literature. Literature courses usually begin after two years of college-level study. Bilingual students may count either tongue as native and the other as acquired. If language A, B, or C is Chinese, Japanese, Russian, or another language in which two years of language study does not constitute sufficient basis for literary study, some of the advanced work required for the major may be completed in translation or fulfilled through work in an advanced language course. An appropriate program should be approved following consultation with the department’s Director of Undergraduate Studies.

2. Three cognate courses supplementing a student’s work in the two chosen literatures and lending it further intellectual shape according to the criteria noted above. One course from the COMPLIT 100 series (but neither 101 or 199), or another course offered by the Department of Comparative Literature may be counted under this rubric.

3. One course, usually in translation, in a literature distant from the literatures of the student’s concentration that can provide an outside perspective on the student’s area of specialization.

4. Students in this option must also write at least one seminar paper that is comparative in nature. This paper should bring together material from courses taken in their primary and secondary literatures and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member, COMPLIT 194), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). It may be based on, though not identical to, a paper submitted for a requirement for a class. General guidelines for length require approximately 18-20 pages. The paper must be submitted to the Director of Undergraduate Studies and receive his or her approval no later than the end of Winter Quarter in the senior year of study.

**OPTION B—INTERDISCIPLINARY**

Literary creation is a complex human enterprise that intersects with a wide array of other fields of human endeavor and creation. Option B is designed to promote the focused study of intersections between literature and the arts (including film, music, and painting), and other disciplines (including anthropology, feminist studies, history, history of science, linguistics, and philosophy). It requires:

1. Five courses using materials in the original language, and making up an intellectually coherent program in the literature of a language other than the student’s native tongue. Bilingual students may satisfy this requirement in either of their original languages or in a third language.

2. Six courses (chosen as a function of the courses noted above) in:
   a) a single discipline or closely related cluster of disciplines
   b) the cultural history of a single historical epoch
   c) one or more of the fine arts; media or film studies
   d) area studies

   This course work must be shaped around the literature courses selected in item 1. It must either treat cogent analytical or thematic issues in the chosen discipline, or be directly relevant to the chosen historical specialization. Students who chose option ‘2d’ must select courses that include work outside a single area studies focus or that have a genuinely comparative aspect. Each of these six courses must be approved in advance by the Director of Undergraduate Studies.

3. At least two of the eleven courses in items 1 and 2 shall be taught by Comparative Literature faculty.

4. One course, usually in translation, on a literature distant from the student’s two concentrations. The intention here is, as above, to offer an outside perspective on the student’s field of specialization.

5. Students in this option must also write at least one seminar paper that is interdisciplinary in nature. This paper should bring together material from courses taken in their primary literature and in another discipline and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member in COMPLIT 194), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). Though it may draw on previous course work, the paper must be an original composition; general guidelines for length require 18-20 pages. It must be submitted to the Director of Undergraduate Studies and receive his or her approval no later than the end of Winter Quarter in the fourth year of study.

Students who choose the interdisciplinary option should be aware that it requires careful advance planning given that many course offerings are offered in alternate years.

**OPTION C—PHILOSOPHICAL AND LITERARY THOUGHT**

Undergraduates may major in Comparative Literature with a special degree field in interdisciplinary studies at the intersection of literature and philosophy. Students in this option take courses alongside students from other departments that also have specialized options associated with the program for the study of Philosophical and Literary Thought. Each student in this option is assigned an adviser in Comparative Literature, and student
schedules and course of study must be approved in writing by the adviser, the Director of Undergraduate Studies of Comparative Literature, and the Director of Undergraduate Studies of the program.

A total of 65 units must be completed for this option, including the following requirements:

1. Five courses using materials in the original language and making up an intellectually coherent program in the literature of a language other than the student's native tongue. Bilingual students may satisfy this requirement in either of their original languages or in a third language. The coherence of this program must be approved in writing by the Director of Undergraduate Studies of Comparative Literature.

2. Philosophy and Literature Gateway Course (4 units): COMPLIT 181 (enroll in PHIL 81, FRENGEN 181, OR ITALGEN 181). This course should be taken as early as possible in the student's career, normally in the sophomore year.

3. Philosophy Writing in the Major (5 units): PHIL 80. Prerequisite: introductory philosophy class.

4. Aesthetics, Ethics, Political Philosophy (ca. 4 units): one course from the PHIL 170 series.

5. Language, Mind, Metaphysics, and Epistemology (ca. 4 units): one course from the PHIL 180 series.

6. History of Philosophy (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.

7. Related Courses (ca. 8 units): two upper division courses relevant to the study of philosophy and literature as identified by the committee in charge of the program. A list of approved courses is available from the undergraduate adviser of the program in philosophical and literary thought.

8. One course, typically in translation, in a literature distant from that of the student's concentration and offering an outside perspective on that literary tradition.

9. Capstone Seminar (ca. 4 units): in addition to COMPLIT 199, students take a capstone seminar of relevance to philosophy and literature approved by the undergraduate adviser of the program in philosophical and literary thought. The student's choice of a capstone seminar must be approved in writing by the Director of Undergraduate Studies of Comparative Literature and by the Director of Undergraduate Studies of the program.

10. Seminar Paper Requirement: students must write at least one seminar paper that is interdisciplinary in nature. This paper brings together material from courses taken in philosophy and literature, and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). Though it may draw on previous course work, the paper must be an original composition, 18-20 pages in length. It must be submitted to the Director of Undergraduate Studies and receive approval no later than the end of Winter Quarter in the fourth year of study.

At least two of the courses counted toward requirements 1, 2, 7, 8, and 9 must be taught by Comparative Literature faculty. Transfer units may not normally be used to satisfy requirements 2, 3, 4, 5, 6 and 9. Units devoted to acquiring language proficiency are not counted toward the 65-unit requirement.

**DIGITAL HUMANITIES MODULE**

The Comparative Literature department, in collaboration with the Humanities Lab, also offers a digital humanities module that can be combined with any of the department's major programs. Students who are interested in digital humanities should contact the department's Director of Undergraduate Studies who facilitates coordination with the Humanities Lab. Students planning to combine the Comparative Literature major and the digital humanities module must fulfill the following requirements in addition to the general major requirements:

1. CS 105 or equivalent
2. Participate in the Humanities Lab Gateway core seminar (4 units)
3. Complete the Humanities Lab Practicum (2 units) in the junior year
4. Complete one digital project, in lieu of the course's main writing requirement, in a course offered in the department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.

Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project.

**MINORS**

The undergraduate minor in Comparative Literature (CL) represents an abbreviated version of the major. In all cases, students must do a substantial portion of their work in at least one foreign language.

All minors in Comparative Literature are required to complete COMPLIT 101, Seminar on Literature and the Institution of Literary Study (5 units). This provides an essential introduction to the framing propositions and principal methods of the discipline.

In addition, all minors must complete two courses in the literature of a language other than their native tongue. All materials in each course must be in the original language.

1. **Literary Studies Option:** integrates in-depth work in a primary literature with work in a second literature. Requirements are:
   a) two courses in a second literature (this may include courses in translation, as well as courses in English and/or American literature).
   b) one additional course in Comparative Literature.

2. **Interdisciplinary Option:** integrates in-depth work in the primary literature with the focused study of literature in relation to another art or intellectual discipline. Requirements are:
   a) two courses in a single discipline, or the cultural history of a single historical epoch.
   b) one additional course in Comparative Literature.

The minor is modeled primarily on the structure and progression of the major (with the appropriate reduction in course and unit requirements, as stipulated by the Committee on Undergraduate Studies). It retains the distinction between the two CL options and enables students to design a course of study built around the core CL seminar.

The Director of Undergraduate Studies is responsible for evaluating all requests and individual study plans for the minor.

**MINOR IN LITERATURE**

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through Comparative Literature. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

**MINOR IN MODERN LANGUAGES**

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through Comparative Literature. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

**HONORS PROGRAM**

The honors option is reserved for exceptionally motivated students who wish to undertake an even more intensive and extensive program of study leading to the writing of a senior honors paper. The program allows for either a literary studies or an interdisciplinary emphasis and it requires:

1. Six courses, using materials in the original language and making up an intellectually coherent program, in the literature of language A. For the interdisciplinary emphasis, these courses must be in the literature of a language other than the student’s native tongue.

2. Emphasis:
   a) For a literary studies emphasis: three courses using materials in the original language, in the literature of language B.

   *Note: Option A’s rules regarding students’ native languages, bilingualism, and special exemptions for students studying Chinese, Japanese, Russian, or another language in which two years of lan-
Literature may elect to nominate the thesis in question for University rather than quantity is the key criterion. As a rule of thumb, however, or theoretical scope and should reflect the student’s chosen emphasis. Qual developed in seminars and courses, but must be of appropriate comparative

6. During Winter Quarter of the senior year, the student must enroll in a 5-unit independent study (COMPLIT 195) with his or her faculty tutor for purposes of drafting the honors paper. At the end of the quarter, a completed draft must be submitted to the tutor. If it meets his or her approval as is, two copies must then be forwarded to the honors committee, which decides on the basis of the paper’s quality whether or not the student is awarded honors. If the faculty tutor feels that the paper still requires rewriting at the end of Winter Quarter, the student may complete revisions during Spring Quarter for purposes of final submission. In order to be considered for honors in Comparative Literature, two copies of the final paper must be submitted to the honors committee no later than the fifth week of Spring Quarter. Completion of honors course work, independent research, and the finished thesis earns a total of 10-12 units of credit.

Honors papers may be considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but must be of appropriate comparative or theoretical scope and should reflect the student’s chosen emphasis. Quality rather than quantity is the key criterion. As a rule of thumb, however, they run in the range of 40-70 pages.

Honors Awards — The two readers of any honors thesis in Comparative Literature may elect to nominate the thesis in question for University-wide awards if they feel that it is deserving. In addition, the department honors committee evaluates on a competitive basis the honors theses completed in a given year and nominates one for University-wide awards competitions.

GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The Ph.D. program is designed for a small group of students whose linguistic background, breadth of interest in literature, and curiosity about the problems of literary scholarship and theory (including the relation of literature to other disciplines) make this program more appropriate to their needs than the Ph.D. in one of the individual literatures. Students take courses in at least three literatures (one may be that of the native language), to be studied in the original. The program is designed to encourage familiarity with the major approaches to literary study prevailing today.

Before starting graduate work at Stanford, students should have completed an undergraduate program with a strong background in one literature and some work in a second literature studied in the original language. Since the program demands an advanced knowledge of two non-native languages and a reading knowledge of a third non-native language, students should at the time of application have an advanced enough knowledge of one of the three to take graduate-level courses in that language when they enter the program. They should be making enough progress in the study of a second language to enable them take graduate courses in that language not later than the beginning of the second year, and earlier if possible. Applicants are expected to take an intensive course in the third language before entrance.

A considerable part of a student’s work consists of individual study toward the oral examinations, for which each student devises reading lists in consultation with the graduate adviser. These examinations are centered on the study of particular periods, genres, and problems of literary study.

Students are admitted under a fellowship plan which attempts to integrate financial support and completion of residence requirements with their training as prospective university teachers. Tenure as a fellow, assuming satisfactory academic progress, is for a maximum of four or five years. The minimum teaching requirement is the same regardless of financial support. (For specific teaching requirements, see below.) Five years of support are normally available, from a combination of fellowships and teaching assistantships, to Ph.D. candidates admitted to the Comparative Literature Department who are making satisfactory progress toward the degree.

APPLICATION PROCEDURES

Competition for entrance into the program is keen. The program is kept small so that students have as much opportunity as possible to work in individual projects under faculty supervision throughout the period of study. No more than 16 students are in residence at any one time. The department does not plan to admit more than three or four new students for the class entering in September. Completed applications are due January 3. Because of the special nature of comparative literature studies, the statement of purpose included in the application for admission should contain the following information besides the general plan for graduate work called for on the application:

1. A detailed description of the applicant’s present degree of proficiency in each of the languages studied, indicating the languages in which the applicant is prepared to do graduate work at present and outlining plans to meet additional language requirements of the program.

2. A description of the applicant’s area of interest (for instance, theoretical problems, genres, periods) within literary study and the reasons for finding comparative literature more suitable to his or her needs than the study of a single literature. Applicants should also indicate what they think will be their primary field.

All applicants should arrange to have the results of the general section of the Graduate Record Examination sent to the Department of Comparative Literature.
Recommendations should, if possible, come from faculty in at least two of the literatures in which the student proposes to work.

Applicants must submit a copy of an undergraduate term paper which they consider representative of their best work.

DEGREE REQUIREMENTS

Residence — A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. The student must take 135 units of graduate work, in addition to the doctoral dissertation, of which at least 72 units must be within the department. At least three consecutive quarters of course work must be taken at Stanford.

Languages — Students must know three non-native languages, two of them sufficiently to qualify for graduate courses in these languages and the third sufficiently to demonstrate the ability to read a major author in this language. Only the third language may be certified by examination. The other two are certified by graduate-level course work specified below. Language preparation must be sufficient to support graduate-level course work in at least one language during the first year and in the second language during the second year. Students must demonstrate a reading knowledge of the third non-native language no later than the beginning of the third year.

Literatures made up of works written in the same language (such as Spanish and Latin American) are counted as one. One of the student’s three literatures usually is designated as the primary field, the other two as secondary fields, although some students may offer two literatures at the primary level (six or more graduate courses).

Teaching — Fellows, whatever their sources of financial support, are ordinarily required to undertake a total of five quarters of supervised apprenticeships and teaching at half time. Fellows must complete whatever pedagogy courses are required by the departments in which they teach. The department’s minimum teaching requirement is a total of three quarters.

Minimum Course Requirements — Students are advised that the range and depth of preparation necessary to support quality work on the dissertation, as well as demands in the present professional marketplace for coverage of both traditional and interdisciplinary areas of knowledge, render these requirements as bare minimums. The following are required:

1. COMPLIT 369
2. COMPLIT 396L
3. A sufficient number of courses (six or more) in the student’s primary field to assure knowledge of the basic works in one national literature from its beginnings until the present.
4. At least two additional complementary courses, with most of the reading in the original, in each of two different national literatures. Students whose primary field is a non-native language are required to take two courses in one additional literature not their own.

Minimum course requirements must be completed before the student is scheduled to take the University oral examination. These requirements are kept to a minimum so that students have sufficient opportunity to seek out new areas of interest. A course is an offering of 3-5 units. Independent study may take the place of up to two of the required courses, but no more; classroom work with faculty and other students is central to the program.

Examinations — Three examinations are required. The third and last is the University oral examination. Students’ reading lists for each examination must be approved by an examination committee and by the graduate adviser. The examinations consist of the following, each of which takes the form of an oral colloquy between the student and a committee of faculty members with interests in the subject areas:

1. First One-Hour Examination: on a literary genre to consist of (a) a knowledge of a substantial number of literary works in a single genre, the list to include works from a number of centuries and from at least three national literatures, and (b) a grasp of the theoretical problems involved in dealing with this genre and with the question of genre in general. The examination must be taken no later than the beginning of the student’s second year of graduate work (or the third quarter of the first year for students who enter with a year of previous graduate work).
2. Second One-Hour Examination: on literary criticism and theory, to consist of the exploration of a specific problem proposed and defined by the student. The problem must be sufficiently wide-ranging to demand the reading of critical texts from a variety of periods. The examination must be taken no later than the first quarter of the student’s third year of graduate work (or the third quarter of the second year for students who enter with a year of graduate work). Students may elect to take this section of the examination before the genre section, in which case it must be taken at the earlier time.
3. University Oral Examination: on a literary period, to consist of in-depth knowledge of a period of approximately a century, in three or more literatures with primary emphasis on a single national literature or, in occasional cases, two national literatures. The reading list covers chiefly the major literary texts of this period but may also include some studies of intellectual backgrounds and modern critical discussions of the period. Students must demonstrate a grasp of how to discuss and define this period as well as the concept of periods in general. This examination is not to be on the dissertation topic, on a single genre, or on current criticism, but rather on a multiplicity of texts from the period. Students whose course work combines an ancient with a modern literature have the option of dividing the period sections into two wholly separate periods.

Qualifying Procedures — The qualification procedures for students in Comparative Literature take place during the quarter in which the student takes the first Ph.D. examination. Ordinarily, this is the beginning of the second year, but students who enter with a year of graduate work elsewhere must take the examination no later than the third quarter of the first year. Any student may elect to take the examination during the third quarter of the first year.

Students are judged qualified to proceed to the Ph.D. on the basis of the first part of the Ph.D. examination as well as other aspects of their work (for example, performance in courses, ability to do original research) that predict strong promise for their dissertations and future careers as scholars and critics. As soon as the student has completed the qualifying procedures, the chair recommends him or her for admission to candidacy for the Ph.D. At this time the student is also recommended for the Master of Arts degree in Comparative Literature if he or she has completed 45 units of work at Stanford and has not already completed an M.A. before entering the program.

Colloquium — The colloquium normally takes place in the quarter following the University oral examination. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student lasting no more than five minutes, and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation adviser during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project’s relation to prior scholarship on the topic, and lay out a complete chapter by chapter plan.

It is the student’s responsibility to schedule the colloquium no later than the first half of the quarter after that quarter in which the student passed the University Oral Examination. The student should arrange the date and time in consultation with the department administrator and with the three examiners. The department administrator schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.
PH.D. MINOR

This minor is designed for students working toward the Ph.D. in the various foreign language departments. Students working toward the Ph.D. in English are directed to the program in English and Comparative Literature described among the Department of English offerings. Students must have:

1. A knowledge of at least two foreign languages, one of them sufficient to qualify for graduate-level courses in that language, the second sufficient to read a major author in the original language.
2. A minimum of six graduate courses, of which three must be in the department of the second language, and three in the Department of Comparative Literature, the latter to include a seminar in literary theory or criticism. At least two of the three courses in comparative literature should originate in a department other than the one in which the student is completing the degree. Except for students in the Asian languages, students must choose a second literature outside the department of their major literature.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

GENERAL

These courses are aimed at freshmen and sophomores who are non-majors (and/or potential majors) and provide an entry point to the discipline of Comparative Literature.

All majors are required, as soon as possible after declaration, to complete COMPLIT 101. During the senior year, majors enroll in 199.

COMPLIT 10N. Shakespeare and Performance — Stanford Introductory Seminar. Preference to freshmen. How literature serves as a medium across which we encounter others. What happens when people are not only other readers but also other authors. What happens when the boundary between reading and writing is blurred, confused, refracted; how this enables a particular aesthetic and ethics. Introduction to literary texts which incorporate issues of culture, history, and ethics. Sources include Barthes, Woolf, Coetzee, Daf, Shammas, and Ozeki. GER:DB-Hum 3-5 units, Spr (Palumbo-Liu, D)

COMPLIT 41Q. Ethnicity and Literature — Stanford Introductory Seminar. Preference to sophomores. What is meant by ethnic literature? How is ethnic writing different from non-ethnic writing, or is there such a thing as either? How does ethnicity as an analytic perspective affect the way literature is read by ethnic peoples? Articles and works of fiction; films on ethnic literature and cultural politics. How ethnic literature represents the nexus of social, historical, political, and personal issues. GER:DB-Hum, EC-AmerCul 3-5 units, Aut (Palumbo-Liu, D)

COMPLIT 53N. Are We Our Bodies? — (Same as CLASSGEN 53N.) Preference to freshmen. Is the mind a bodily entity, or is it separate from the body, a purely rational or spiritual entity? If people identify with their minds, what are the ethical obligations to the bodily world? Do intellectual faculties make people superior to nonhumans? Do human beings have the right to control the natural world and use it for human purposes? If minds are bodily entities, how does this affect ethics and values? GER:DB-Hum 3-4 units, Spr (Nightingale, A)

COMPLIT 101. Introduction to Comparative Literature: Literary Theory — History of academic literary studies and the emergence of literary theory since the early 19th century. The most important discourses that have shaped the discussion of the phenomenon of literature during the 20th century. Readings from Richter’s anthology, The Critical Tradition. WIM; GER:DB-Hum 5 units, Aut (Gumbrecht, H)

COMPLIT 194. Independent Research 1-5 units, Aut, Win, Spr (Staff)

COMPLIT 195. Honors Research — Autumn and Winter should total 10 units between two quarters. Winter and Spring must be the same grade. 1-10 units, Aut, Win, Spr (Staff)

COMPLIT 199. Senior Seminar on Literary Theory — Advanced literary theory and critical practice including antecedents in canonical theory and iterations today. Topics for this year: world literature as a problem for comparative literature; and the debate about the nature of comparative literature as a discipline. Prerequisite: senior Comparative Literature major or consent of instructor. GER:DB-Hum 5 units, Aut (Greene, R)

UNDERGRADUATE/GRADUATE

COMPLIT 115/215. Nabokov and Modernism — (Same as SLAVGEN 156/256.) Nabokov’s stories, novels, and a film script in the context of: modernist writers such as Bergson, Proust, and Joyce; media including painting, film, and photography; and philosophical thought. Critical approaches that elude the author’s control. Readings include Bend Sinister, Lolita, Pale Fire, Speak Memory, and Ada. GER:DB-Hum 3-5 units, Spr (Greenleaf, M)

COMPLIT 119/219. Dostoevsky and His Times — (Same as SLAVGEN 151/251.) Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture, literary criticism, and intellectual history. GER:DB-Hum 4 units, Win (Frank, J)
COMPLIT 101. Foundations of Renaissance Literature — Syntactical, metrical, and rhetorical structures of selected works from the Italian, French, English, and Spanish literatures of the Renaissance. Readings include Dante, Petrarch, Boccaccio, Chaucer, Rabelais, Ariosto, and Cervantes. 3-5 units, Win (Boyi, E)

COMPLIT 102. English and Italian Renaissance Literature — The poetry, drama, and prose of the English and Italian Renaissance. Readings include Chaucer, Spenser, Shakespeare, Sidney, Webster, Marlowe, and Dante. 3-5 units, Win (Labov, J)

COMPLIT 120. Of Beauties and Beasts: Tales of Transformation from Antiquity to the Present — Representative texts from the literary traditions initiated by Ovid’s Metamorphoses, concerning transformation: human to animal, man to woman, beast to beauty, nose to man. A conceptual toolbox for understanding the social and cultural function of narratives about transformation across time and place. Theoretical readings from history, mythology, psychology, and literary studies. 5 units, Spr (Pojarska, E)

COMPLIT 125. Underground Literatures and Unofficial Cultures — The concept of underground literature, beginning with samizdat literature in Cold War Europe. Forms of cultural expression beyond print important to the Soviet-era underground such as radio, film, and graphic art; historical precursors to samizdat; the role of unofficial culture, such as indie and zine publishing in the U.S., in non-authoritarian societies; and how new media have been used to foster unofficial culture in repressive societies since 1989

COMPLIT 130. Fantastic Baubles: Aesthetics and Ideology in Renaissance Poetry — Lyric poetry of the 16th century in light of contemporaneous Renaissance literary theories; the interpretive world for which these texts were created. Readings include poems, commentaries, and treatises including: Wyatt, Sidney, Spenser, and Shakespeare in English; Garcilaso de la Vega, San Juan de la Cruz, Góngora, and Quevedo in Spanish; and Scève, Labé, du Bellay, and Ronsard in French.

COMPLIT 141. Literature and Society: Introduction to Francophone Literature from Africa and the Caribbean — (Same as FRENLIT 133.) Major African and Caribbean writers. The issues raised in literary works which reflect changing aspects of the societies and cultures of Francophone Africa and the French Caribbean: meeting the challenge of acculturation and the search for identity; tradition competing with modernity; the use of oral tradition and writing; women’s role and status; writers’ social responsibility. Visual material; readings from fiction, poetry, plays, and criticism. In French. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, EC-GlobalCom

COMPLIT 142. The Literature of the Americas — (Same as ENGLISH 172E) Representations of the creation of an American new world experience, myths of America as utopia, and critiques of notions of the self and the nation to which such myths give rise in political, historical, literary, and mass media forms. Readings include Columbus, Bernal Díaz del Castillo, Aztec codices, Sor Juana, Tocqueville, Fenimore Cooper, Whitman, Machado de Assis, Mario de Andrade, Martí, Neruda, Williams, Rufio, Faulkner, Morrison, and Sandra Cisneros. GER:DB-Hum, EC-AmerCul

COMPLIT 143. Contemporary France: Immigration, Culture, and Politics — (Same as FRENLIT 135.) France as a place of migration and exile for people from all over the world: workers, writers, artists, political exiled, and students. Focus is on N. African immigration and its impact on literature, politics, and culture in contemporary France. Topics include: secularism and religion, insertion and integration, and nationality and citizenship. Films and readings include Azouz Begag, Yasmina Benguigui, Nina Bouraoui, Paul Smaïl, Dominique Schnapper, Michèle Winock, and Benjamin Stora. GER:EC-GlobalCom

COMPLIT 144. Arab Minorities in a Transnational Context: Fictions of Race, Ethnicity, Periphery — The transnational formation of Arab cultural identities through literary texts. The invention of Arabness in the context of a secular cultural program after postcolonial independence, the racialization of Arabness and Islam in the Arab diaspora, and the cultural provincialization of the Arab world under the signs of globalization.

COMPLIT 148. Introduction to Asian American Cultures — Asian American cultural production (film, drama, poetry, fiction, music) in sociohistorical context. Topics include ethnicity, race, class, and gender, and the political economy of ethnic culture in the U.S. GER:DB-Hum, EC-AmerCul

COMPLIT 149. What is Nobel Literature? Reading, Assessing, and Interpreting the Nobel Novels on the World Stage — Recent Nobel laureates in literature: Gabriel García Márquez, Nadine Gordimer, Toni Morrison, Kenzaburo Oe, and V.S. Naipaul. These writers come from different locations, yet each participates in a global conversation about the human condition. The impact of their identities upon their thought and writing. How the Nobel prize is awarded. The role of literature in the world, and analytical skills for reading literary texts. GER:DB-Hum, EC-GlobalCom

COMPLIT 152. Chrétien de Troyes — (Same as FREGEN 205.) Verse romances seen as the origin of the modern Western novel, including Ivan, Lancelot, and Perceval. Historical analysis, courtly culture, and the literary tradition that they produced. Source is a bilingual edition of Chrétien’s complete works in medieval and modern French.

COMPLIT 157. Imitation of Life — What happens when authors create human characters, and when readers create them from authors’ words? How do readers decide whether a character seems real, and what if the characterization is a bit off from their sense of reality? What are the relationships between external and internal characterizations, and how does each strategy foster or frustrate the sense of a human presence? When is characterization an impersonation, and what are the ethical and aesthetic concerns of speaking in another person’s voice whether the other is fictional or a self-portrait?

COMPLIT 219A. Henrich von Kleist — Major literary and critical works. The era in which von Kleist worked. His language, topics, and obsessions which have resisted categorizations and survived the effects of temporal distance. The conditions for the emergence of Kleist’s prose style. Readings in German and English. Undergraduates require consent of instructor.

COMPLIT 222. The Contemporary Novel — (Same as GERGEN 290/A) Anglo-American and European novels; how they address central aspects of the contemporary condition: memory, ethnicity, and political violence. Theoretical contributions on the intersection of the arts and literature, and politics. Readings include Kadare, Pamuk, Houllebecq, Smith, Barthes, Fish, Rorty, Jameson, Butler, White, Appiah, Bhahba, and Zizek.

COMPLIT 225. Encyclopedia as Literature — The history and theories of the encyclopedia, including Voltaire, Diderot, and D’Alembert’s collective authorship of the Encyclopédie, the development of a literary mode based on the encyclopedia form by Borges, Eco, Kis, and Pavic, current toolkits for sifting and distilling information such as the database, search engine, and Wikipedia. The essay as a form, the notion of anti-authoritarian dissidence, and debates over access to information and open source systems. How to read an encyclopedia and its the entries as literature. The status of the literary knowledge thereby gained.

COMPLIT 230B. The Novel in Europe: The Bourgeois Age, 1848-1900 — (Same as ENGLISH 230B.) New forms that make sense of historical novelties and address new segments of the reading public during the period when the industrial world consolidates in western Europe. Authors include Dickens, Flaubert, Dostoeyvsky, Zola, Doyle, and Stevenson.
COMPLIT 240. Introduction to Old Norse — (Same as ENGLISH 200.) The literary language of medieval Scandinavia known as Old Norse or Old Icelandic. Goal is to gain a reading knowledge to explore poetry and prose. N. European mythology, historical and social change, and the narrative and imagistic artistry of medieval Scandinavian culture. Learned, courtly, and ecclesiastical contexts; narratives of violence, power, and moral argument. Texts to be read in Old Norse include Hrafnkels Saga, Gylfaginning, and Haendismal. Background reading in translation from major works of the tradition including Snorri Sturluson’s Edda and Njal’s Saga. Recommended: course work in German, Old English, or historical linguistics.
4-5 units, Win (Lerer, S)

COMPLIT 241. Comparative Fictions of Ethnicity — How authors create fiction informed by the notions of ethnicity, difference, and social ideologies. Focus is on narratives written by racial and ethnic minorities whose representation reveals how they came to write and how they sense themselves to be written by historical, social, and cultural forces. How ideas such as identity, national character, ethnicity, and gender evolved. Novels from settings including the U.S., Middle East, and Asia. Authors include Sandra Cisneros, John Wideman, Zora Neale Hurston, Toshio Mori, Nieh Hualing, Anton Shammas, and N. Scott Momaday.
5 units, Win (Palambo-Liu, D)

COMPLIT 243. Literature and History in the Israeli Novel — In what modes and to what effects does literature engage with history? How did major Israeli writers after the establishment of the state of Israel discuss the recent past including the Holocaust, the birth of the Palestinian refugee problem, and the Arab-Israeli wars? Readings include Agnon, Yishar, Yehoshua, Oz, Grossman, Castel-Bloom, Govrin, Gutfreund, and literary theory about history and literature, Israeli historiography, cultural-political discourse, and post-Zionism.
3-5 units, Spr (Eschel, A)

COMPLIT 246. Rethinking Identities in the Era of Globalization — (Same as FREN 278.) Cultural issues faced by postcolonial societies and new visions proposed by writers and thinkers to meet the challenge of globalization and preserve the local. Emphasis is on questions of difference, language, nation and identities, and identity construction. Theoretical and fictional readings include Derrida, Glissant, Kristeva, Malouf, Morejon, Senghor, and Serres. May be repeated for credit.
3-5 units, alternate years, not given this year

COMPLIT 249. Tradition and Modernity in Contemporary Iranian Literature — Modern Iranian literary texts in light of narrative theory and cultural alterity. Formal aesthetic aspects and social historical contexts. The problem of censorship in Iranian literary history. Were the sources of Iranian and Muslim modernity derived from the West or as an indigenous development? GER:DB-Hum
5 units, Aut (Milani, A)

COMPLIT 251. Space and the Modern Sublime — (Same as FREN 231.) The power of space in producing modern notions of the sublime in philosophy, literature, and art. The role of global exploration in producing terrifying European encounters with nature and unknown peoples that the sublime transforms into art. Sublime spaces such as sea, desert, mountains, and city; the Romantic interiorization of the sublime into the psyche; mimesis, memory, and technology. Sources may include explorer writings; Burke, Kant, Lyotard, Deleuze and Guattari, Freud, the Shelleys, Coleridge, Hugo, Baudelaire, Rimbaud, and Irigaray; and artists such as Gericault, Turner, Delacroix, and Friedrich.
3-5 units, Win (Cohen, M)

COMPLIT 255A. Moved by the Past — How experience intrudes on the present, impacting emotion or eliciting action. The presence of the past and its capacity to move. Sources include: readings by Balzac, Barthes, Sebald, and Wordsworth; monuments including the Vietnam Veterans Memorial in Washington and the Berlin Holocaust Memorial; and films such as Cavani’s Night Porter.
3 units, Win (Runia, E)

COMPLIT 255B. Beginnings and Mutations — Transgressive deeds can create new realities without prior conceptualization: innovation without theoretical anticipation. Literary and other texts that question the primacy of the word and conscious intention in the creative process. Authors include Stendhal, Musil, Conrad, Ibsen, and Weber. Processes in the visual arts through works by Kandinsky and Pollock.
3-5 units, Spr (Runia, E)

COMPLIT 256. Heidegger and Poetry in an Age of Technology: Rilke, Trakl, and Char — (Same as FREN 282, GERGEN 282.) Heidegger’s thinking on language and poetry. The technological transformation of language into univocal information and the resources of poetry for an ambiguous resistance. Parallel consideration of philosophy’s relation to poetry. Readings from Rilke, Trakl, and Char.
3-5 units, Spr (Mitchell, A)

COMPLIT 259. Self-Reflexivity Historicized, or the Emergence of the Second-Order Observer — (Same as FREN 259.) The origin of self-reflexivity as a habit and institution typical of intellectuals. Focus is on historical case studies from Western literatures and cultures since the Renaissance, based on a conceptual apparatus concerning the second-order observer, mainly derived from the work of Niklas Luhmann. Readings in original and translation include Descartes, Rousseau, Schlegel, Hegel, Gracián, and de Goya.
3-5 units, Win (Gumbrecht, H)

COMPLIT 320A. Epic and Empire — (Same as ENGLISH 314.) Focus is on Virgil’s Aeneid and its influence, tracing the European epic tradition (Ariosto, Tasso, Camoes, Spenser, and Milton) to New World discovery and mercantile expansion in the early modern period.
5 units, Win (Parker, P)

COMPLIT 320B. Beginnings and Mutations — Transgressive deeds can create new realities without prior conceptualization: innovation without theoretical anticipation. Literary and other texts that question the primacy of the word and conscious intention in the creative process. Authors include Stendhal, Musil, Conrad, Ibsen, and Weber. Processes in the visual arts through works by Kandinsky and Pollock.
3-5 units, Win (Runia, E)

COMPLIT 329. Novel of the Americas — (Same as ENGLISH 309A.) The possibility of identifying aesthetic visions of an American imaginary in terms not defined by nationalist ideologies but open to the consequences of transnational forces. How America has been invented as a category in geographical and sociocultural terms. Readings include Willa Cather’s Death Comes for the Archbishop, Faulkner’s Absalom, Absalom, Mariano Azuela’s The Underdogs, Toni Morrison’s Beloved, Alejo Carpentier’s The Kingdom of this World, and Silko’s Almanac of the Dead.
5 units, Win (Saldívar, R)

COMPLIT 330. The Bourgeois — (Same as ENGLISH 363.) Interdisciplinary. Goal is to define the ruling class of modern times. Social history (Weber, Hirschmann, Marx); literary texts (Defoe, Goethe, Gaskell); and Henrik Ibsen who produced an intransigent criticism of the bourgeois ethos.
5 units, Aut (Moretti, F)

COMPLIT 331. Algeria, My Mother — (Same as FREN 341.) The representation of Algeria through authors from both shores of the Mediterranean. Literature and Algerianism. Politics and the Algerian war. Memory and mourning. Readings include Louis Bertrand, Frantz Fanon, Pierre Bourdieu, Benjamin Stora, Assia Djebar, Jean Pélégri, Albert Camus, Jacques Derrida, and Nina Bouraoui.
3-5 units, Spr (Boyi, E)

COMPLIT 333. The Bible and Literature — (Same as ENGLISH 300B.) Readings from Genesis to Revelation; other texts include Dante, medieval drama, Shakespeare, Spenser, Renaissance lyric, Milton, 19th- and 20th-century poetry, and British, American, African American, and African novels. Topics: citations in radical and hegemonic political contexts; the influence on prototypes of race/gender difference; the relation between biblical eschatology and literary structures; and Song of Songs and the history of lyric.
5 units, Spr (Parker, P)

COMPLIT 354. The Frankfurt School — Major thinkers of the Frankfurt School emphasizing their contributions to the aesthetics and epistemology of modernity. Thinkers include Georg Lukács, Theodor Adorno, Max Horkheimer, and Walter Benjamin. Recommended: background in continental philosophy.
5 units, Win (Cohen, M)
COMPLIT 354A. Literature of Affiliation — Literature as a medium across which people encounter others. The formal or theoretical space of mediating. How that form is impacted by history, institutions, and language. What happens when the boundary between reading and writing is blurred; how does that enable a particular aesthetic and ethics? Works by Barthes, Said, Spivak, Ricoeur, Levinas, Henry James, Ruth Ozeki, and Nadine Gordimer.
5 units, Spr (Palumbo-Liu, D)

COMPLIT 356. Terrorism — (Same as GERGEN 353, LAW 360.) Interdisciplinary seminar. How to define terrorism and distinguish it from legitimate forms of political resistance. Is terrorism political or criminal? How has terrorism altered the perception of permissible restriction of civil liberties? How does terrorism affect societies?
3-5 units, Aut (Eshel, A)

COMPLIT 357. Surrealism to Structuralism — (Same as FRENGEN 357.) Authors such as Saussure, Breton, Bataille, Artaud, Lacan, Jakobson, Sartre, Merleau-Ponty, Beauvoir, Fanon, Foucault, Althusser, Cixous, Irigaray, and Barthes. Background reading in Hegel, Marx, and Freud, if necessary.
3-5 units, Aut (Cohen, M)

COMPLIT 359A. Philosophical Reading Group — (Same as FRENGEN 395, ITALGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.
1 unit, Aut, Win, Spr (Staff)

COMPLIT 369. Introduction to Graduate Studies: Criticism as Profession — (Same as GERLIT 369.) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative literatures, university structures, and career paths.
5 units, Aut (Staff)

COMPLIT 395. Research
1-15 units, Aut, Win, Spr (Staff)

COMPLIT 396L. Pedagogy Seminar I — (Same as ENGLISH 396L.) Required for first-year Ph.D students in English, Modern Thought and Literature, and Comparative Literature (except for Comparative Literature students teaching in a foreign language). Preparation for surviving as teaching assistants in undergraduate literature courses. Focus is on leading discussions and grading papers.
2 units, Aut (Jones, G)

COMPLIT 399. Dissertation
1-15 units, Aut, Win, Spr; Sum (Staff)

COGNATE COURSES
Comparative Literature majors are advised to consult the “Division or Literature, Culture, and Languages” section of this bulletin for additional cognate offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

CLASSGEN 17N. Odysseus of Many Turnings
4-5 units, Aut (Martin, R)

CLASSGEN 212. Mimesis in Greek Poetry and Philosophy
4-5 units, Spr (Nightingale, A; Peponi, A)

DLCL 189. Honors Thesis Seminar
5 units, Aut (Reichert, J)

DLCL 377. Topics in Literature and Culture
3-4 units, Aut (Bohrer, K)

FRENGEN 221. The History of the Book in Europe — (Same as ITALGEN 221.)
3-5 units, Win (Sussman, S; Mustain, J)

GERGEN 123. Modern Tyranny in Culture and Political Thought
3-5 units, Spr (McIntyre, S)

GERGEN 168A/268A. Freud and the Enterprise of Psychoanalysis
3-5 units, Win (Douvaldzi, C)

GERGEN 191A/291A. Oedipus, Hamlet, Moses: Archetypes of the Hero
3-5 units, Spr (Douvaldzi, C)

GERGEN 206/306. Narrative, Visuality, Memory
3-5 units, Spr (Douvaldzi, C)

GERLIT 196/296. Idealist and Romantic Aesthetics
3-5 units, Aut (Dornbach, M)

GERLIT 197/297. Theories of Art after Idealism
3-5 units, Win (Dornbach, M)

GERLIT 278/378. Modernity as Succession: Imitation, Emulation, Influence
3-5 units, Spr (Dornbach, M)

ITALGEN 260. The Fantastic Mode
3-5 units, Spr (Staff)

ITALGEN 263. Love Books of the Middle Ages — (Same as FRENGEN 263.)
3-5 units, Win (Harrison, R)

SLAVLIT 310. Civilizing Process: Paradigms of Society and Culture in Modern Russian Literature and Film
2-4 units, not given this year
Comparative Studies in Race and Ethnicity (CSRE)

**Director:** David-Palumbo-Liu  
**Curriculum Committee:** Lawrence Bobo, Vera Grant, Teresa LaFromboise, Purnima Mankekar, David Palumbo-Liu, Vered Shemtov, Yvonne Yarbro-Bejarano, Steven Zipperstein  
**Affiliated Faculty and Teaching Staff:** David Abernethy (Psychology), Anthony Antonio (Education), Rick Banks (Law), Lucius Barker (Political Science, emeritus), Donald Barr (Human Biology), Joel Beinin (History), Karen Biestman (Native American Studies), Lawrence Bobo (Sociology), Michele Elam (English), Albert Camarillo (History), Martin Carnoy (Education), Clayborne Carson (History), Gordon Chang (History), Karen Cook (Sociology), Irene Corso (Spanish and Portuguese), Loan Dao (Asian American Studies), Michele Dauber (Law), Linda Darling-Hammond (Education), Carol Delaney (Cultural and Social Anthropology, emeritus), Carolyn Duffey (Comparative Studies in Race and Ethnicity), Jennifer Eberhardt (Psychology), Paulla Ebron (Cultural and Social Anthropology), Penny Eckert (Linguistics), Harry Elam (Drama), James Ferguson (Cultural and Social Anthropology), Shelley Fisher-Fishkin (English), James Fishkin (Communication), Luis Fraga (Political Science), George Fredrickson (History, emeritus), Estelle Freedman (History), Vera Grant (African and African American Studies), David Grusky (Sociology), Akhil Gupta (Cultural and Social Anthropology), Miyako Inoue (Cultural and Social Anthropology), Shanto Iyengar (Communication), Gavin Jones (English), Terry Karl (Political Science), Pamela Karlan (Law), Matthew Kohrman (Cultural and Social Anthropology), Jan Krawitz (Art and Art History), Jon Krosnick (Communication), Teresa LaFromboise (Education), David Latin (Political Science), Liisa Malkki (Cultural and Social Anthropology), Purnima Mankekar (Cultural and Social Anthropology), Hazel Markus (Psychology), Barbaro Martinez-Ruiz (Art and Art History), Douglas McAdam (Sociology), Monica McDermott (Sociology), Raymond McDermott (Education), James Montoya (Comparative Studies in Race and Ethnicity), Cherríe Moraga (Drama), Marcyliena Morgan (Cultural and Social Anthropology), Joanna Mountain (Anthropological Sciences), Paula Moya (English), Norman Naimark (History), Na’ilah Nasir (Education), Sharon Nelson-Barber (Native American Studies), Hilton Obenchain (Undergraduate Advising and Research), Susan Olzak (Sociology), Amado Padilla (Education), José Palfoux (Chicana/o Studies), David Palumbo-Liu (Comparative Literature), Jack Rakove (History), Arnold Rampersad (English), Robert Reich (Political Science), John Rickford (Linguistics), Cecilia Ridgeway (Sociology), Richard Roberts (History), Aron Rodrigue (History), Michael Rosenfeld (Sociology), Ramón Saldívar (English), Joel Samoff (Center for African Studies), Stephen Sano (Music), Debra Satz (Philosophy), JoEllen Shively (Native American Studies), C. Matthew Snipp (Sociology), Paul Sniderman (Political Science), Sandra Soo-Jin Lee (Cultural and Social Anthropology), Claude Steele (Psychology), James Steyer (Comparative Studies in Race and Ethnicity), Ewart Thomas (Psychology), Jeanne Tsai (Psychology), Linda Uyechi (Music), Guadalupe Valdés (Education; Spanish and Portuguese), Richard White (History), Michael Wilcox (Cultural and Social Anthropology), Joy Williamson (Education), Bryan Wolf (Art and Art History), Sylvia Yanagisako (Cultural and Social Anthropology), Yvonne Yarbro-Bejarano (Spanish and Portuguese), Bob Zajonc (Psychology), Steven Zipperstein (History)

**Teaching Fellows:** Sapna Cheryan, Teresa Pellinen-Chavez, Victor Thompson

**Program Offices:** Building 240, Room 103  
**Mail Code:** 94305-2152  
**Phone:** (650) 723-8449  
**Email:** mibarra@stanford.edu  
**Web Site:** http://ccsre.stanford.edu

Courses given in CSRE have the subject code CSRE. For a complete list of subject codes, see Appendix.

**UNDERGRADUATE PROGRAMS**

**MAJORS**

**CORE CURRICULUM**

The Interdisciplinary Program in Comparative Studies in Race and Ethnicity (CSRE) provides students the opportunity to structure a major or minor in comparative ethnic studies or to focus their course work in a single ethnic studies area. Four majors and minors (Asian American Studies, Comparative Studies, Chicana/o Studies, and Native American Studies) are offered as part of CSRE. All courses taken for the major must be approved by the director of each study area.

Students who declare any of the five majors participate in a common curriculum of the CSRE consisting of at least two introductory core courses and a senior seminar. Individually designed majors in Jewish Studies may also enroll in the CSRE core curriculum.

There are two types of introductory, interdisciplinary core courses taught by senior CSRE-affiliated faculty: regular core courses that compare across racial and ethnic groups; and single-group core courses that focus on a specific racial or ethnic group.

**MINORS**

Students who wish to minor in the study areas must complete six courses (a minimum of 30 units) from the approved CSRE course list, two of which must be introductory core courses. Proposals for the minor must be approved by the director of each study area.

**DIRECTED READING AND RESEARCH**

Directed reading and research allows students to focus on a special topic of interest. In organizing a reading research plan, the student consults with the director of the major and one or more faculty members specializing in the area or discipline.

**SENIOR SEMINAR**

Research and the writing of the senior honors thesis or senior paper is under the supervision of a faculty project adviser. All CSRE-related students, even those who opt to write honors theses in other departments and programs, must enroll in CSRE 200X. Senior Seminar, offered in Autumn Quarter. The course takes students through the process of research including conceptualization, development of prospectus, development of theses, research, analysis, and writing. This course meets the Writing in the Major requirement (WIM). Those who opt to write senior papers are organized into tutorial groups in Autumn Quarter.

**RELATED PROGRAMS**

CSRE-related majors have several unique opportunities available to them. The program supports full-time paid summer internships for those who apply to work in a non-profit or government agency in a public policy-related area. The CSRE Public Policy/Leadership Institute is a two-week, pre-Autumn Quarter seminar that provides exposure to critical public policy issues and is taught by a leading faculty member. The residence-based institute provides room and board and all seminar materials for participants, including a visit to Sacramento to meet with policy makers. The CSRE program also sponsors quarterly career workshops and informal luncheons for all majors and minors.

**HONORS**

Majors in each of the study areas who meet academic qualifications (at least a grade point average of 3.5 in CSRE-related courses) may apply for honors. Majors are expected to participate in a Spring Quarter junior workshop in preparation for honors thesis research. Prizes for best undergraduate honors theses are awarded annually by the CSRE curriculum committee.
AFRICAN AND AFRICAN AMERICAN STUDIES (AAAS)
Director: Lawrence Bobo

Since 1997-98, AAAS has been a CSRE-related major. For major and minor descriptions and requirements, see the “African and African American Studies” section of this bulletin.

ASIAN AMERICAN STUDIES
Director: Purnima Mankekar

Asian American Studies (AAS) provides an interdisciplinary approach to understanding the historical and current experiences of persons of Asian ancestry in the United States. In using the term “Asian American,” the AAS faculty recognize that the term seeks to name a rapidly developing, complex, and heterogeneous population and that there is neither a single Asian American identity nor one community that comprises all Asian Americans. Asian Americans include those with ancestral ties to countries or regions in East Asia, South Asia, Southeast Asia, or the Philippines, among others.

AAS brings together courses that address the artistic, historical, humanistic, political, and social dimensions of Asian Americans and is an appropriate course of study for students interested in a variety of concerns related to Asian Americans, including: artistic and cultural contributions; current social significance; historical experiences; immigration, intellectual, and policy issues; relationships with other social groups; and the construction of the notion of Asian American as it addresses important theoretical and practical issues.

REQUIREMENTS

Asian American majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar in Autumn Quarter of the senior year. One single-group, core course that focuses on a non-Asian ethnic group may be counted toward the 15-unit core requirement.

Majors are required to take one foundational thematic course in Asian American Studies, such as COMPLIT 148, Introduction to Asian American Cultures. Majors must complete an additional 40 units of core work from an approved list. One course must have an international dimension, preferably a focus on Asia. Five other courses must have an Asian American focus and must be selected from social science and humanities departments. Majors must take two courses offering a comparative perspective on race and ethnicity. Students may obtain credit for their study of a related Asian language toward their degree. A total of 60 units of coursework is required for the major.

Students who wish to minor in Asian American Studies must complete two core introductory courses and four additional courses related to the thematic concentration. A total of 30 units of approved coursework are required for the minor.

CHICANA/O STUDIES
Director: Yvonne Yarbro-Bejarano

Chicana/o Studies is an interdisciplinary major focusing on the Mexican-origin population of the U.S., the second largest ethnic group in the nation. Students who major or minor in Chicana/o Studies have an opportunity to select courses in the humanities, social sciences, and courses offered by affiliated faculty in the School of Education.

REQUIREMENTS

Chicana/o Studies majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar in Autumn Quarter of the senior year. One single-group, core course that focuses on a non-Mexican origin group may be counted toward the 15-unit core requirement.

Majors are required to take CHICANST 180E/SPANLIT 180E, Introduction to Chicana/o Studies. Majors complete an additional 40 units of courses relevant to the thematic concentration and approved by the adviser. A total of 60 units of course work are required for the major.

Students who wish to minor in Chicana/o Studies must complete two core introductory courses, including CHICANST 180E/SPANLIT 180E, Introduction to Chicana/o Studies, and one additional course from the approved list available from the CSRE undergraduate program office, and four additional courses related to the thematic concentration. A total of 30 units of approved course work are required for each minor.

COMPARATIVE STUDIES IN RACE AND ETHNICITY
Director: David Palumbo-Liu

Comparative Studies in Race and Ethnicity, the largest of the five major/minors offered in the program, does not focus on a particular ethnic group.

Rather, a student in consultation with the adviser designs a curriculum in relation to a thematic concentration that compares various ethnic groups or explores topics that cut across group experiences in the United States and elsewhere in the world. For example, students may compare groups within the U.S., or compare groups in the U.S. to ethnic groups elsewhere, or study the diaspora of a single group or the sovereignty of indigenous peoples within and across different national contexts. Students in this major are able to take advantage of courses in over 22 fields offered by the affiliated faculty of CSRE.

REQUIREMENTS

All CSRE-related majors enroll in the 15-unit CSRE core curriculum, which consists of two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course may be counted toward the 15-unit core requirement.

Comparative Studies majors complete another 45 units of coursework relevant to the thematic concentration they have chosen in consultation with the adviser.

Students who wish to minor in Comparative Studies must complete six courses (a minimum of 30 units) from the approved course list.

TAUBE CENTER FOR JEISH STUDIES
Director: Steven Zipperstein
Associate Director: Vered Shemtov

Jewish Studies is an affiliated program of CSRE. For program and course descriptions, see the “Jewish Studies” section of this bulletin.

NATIVE AMERICAN STUDIES
Director: Teresa LaFromboise

Native American Studies provides an intensive approach to understanding the historical and contemporary experiences of Native American people. Attention is paid not only to the special relationship between tribes and the federal government, but to issues across national boundaries, including tribal nations within Canada, and North, Central, and South America. In using the term “Native American,” the NAS faculty recognize the heterogeneous nature of this population. Native Americans include the Alaska Native population, which comprises Aleuts, Eskimo, and other Native American people residing in Alaska.

The purpose of the Native American Studies major and minor is to introduce students to approaches in the academic study of Native American people, history, and culture. Students who major in Native American Studies have the opportunity of doing advanced work in related fields, including literature, sociology, education, and law. In addition to specialized course work on Native American issues, students also are expected to concentrate in a traditional discipline such as anthropology, history, or psychology to ensure a well rounded educational experience. The area of concentration and related course work should be selected in consultation with a faculty adviser in Native American Studies. All courses in the program promote the discussion of how academic knowledge about Native Americans relates to the historical and contemporary experiences of Native American people and communities.

REQUIREMENTS

Native American Studies majors must take the 15-unit CSRE core curriculum, including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course that
focuses on a non-Native American group may be counted toward the 15-unit core requirement.

Majors complete an additional 45 units of course work that satisfy three categories of their thematic concentration: Native American focus, comparative focus, and a methodology/research course. A total of 60 units of coursework are required for the major.

Students who wish to minor in Native American Studies must complete two core introductory courses and four additional courses related to the thematic concentration. A total of 30 units of approved course work are required for the minor.

THEMATIC CONCENTRATION IN IDENTITIES, DIVERSITY, AND AESTHETICS (IDA)

Students interested in focusing their study on how questions of race and diversity can be critically examined through the arts can choose a thematic concentration in Identities, Diversity, and Aesthetics (IDA) within any of the CSRE majors. This concentration is not declared on Axess; it does not appear on the transcript or diploma. A thematic concentration in IDA offers students a curriculum that integrates academic theory and artistic practice focused on issues of diversity including race and ethnicity and gender and sexuality. This area of study encourages new thinking in cultural theory and the arts because it cuts across traditional disciplines within the humanities, and moves beyond the boundaries between the humanities and other disciplines.

The IDA thematic concentration develops social, cultural, and practical knowledge and leadership through hands-on work with artists and the Institute for Diversity in the Arts and courses with Stanford faculty that use the arts as a lens for understanding the dynamic interrelationship of race, gender, and sexuality. The Institute for Diversity in the Arts offers performing arts workshops with professional artists working in culturally rooted, community-based art forms. Students learn techniques, historical significance, and social application of artistic processes from their origins to contemporary practice.

For details about the requirements for the thematic concentration in Identities, Diversity and Aesthetics, contact the CSRE undergraduate program office.

THEMATIC CONCENTRATION IN PUBLIC SERVICE

The Public Service thematic concentration is designed to ensure that CSRE students interested in public service have access to a structured curriculum providing a solid grounding in the theory and practice of public service that enables them to become future leaders in the sphere of public life. This concentration is not declared on Axess; it does not appear on the transcript or diploma. This thematic concentration can be completed within any of the majors within CSRE. Students should consult with the CCSRE undergraduate program director and the chair of African and African American Studies, Asian American Studies, Chicana/o Studies, or Native American Studies to ensure that the courses chosen for the Public Service thematic concentration also fulfill the requirements of the respective majors. Students who wish to pursue a thematic concentration in public service must organize their studies to include 15 credits of approved CSRE core courses, including CSRE 200X, CSRE Senior Seminar, in which students with a thematic concentration in public service may select a topic for their senior paper or honors thesis that reflects their interest in public or experience with a past internship.

In addition to the usual core requirements expected of all CCSRE majors, students who wish to pursue a thematic concentration in Public Service must take an additional 40 units organized around four subject matter areas: organization and leadership; inquiry and assessment; serving diverse communities; and service learning. They also must complete 5 units in a public service internship. Students interested in the Public Service thematic concentration should contact the CSRE Undergraduate Program Office for details about its requirements.

COURSES

CORE

COMPARATIVE LITERATURE

COMPLIT 241. Comparative Fictions of Ethnicity
5 units, Win (Palumbo-Liu, D)

COMPARATIVE STUDIES IN RACE AND ETHNICITY

CSRE 196C. Introduction to Comparative Studies in Race and Ethnicity — (Same as ENGLISH 172D, PSYCH 155.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER: DB-SocSci
5 units, not given this year

CSRE 200X. CSRE Senior Seminar — WIM
5 units, Aut (Palumbo-Liu, D; Thompson, V)

DRAM

DRAMA 169/269. Contemporary Dramatic Voices of Color
5 units, Win (Elam, H)

EDUCATION

EDUC 177/277. Education of Immigrant Students: Psychological Perspectives
4 units, Win (Padilla, A)

ENGLISH

ENGLISH 45/145. Writings by Women of Color
3-5 units, Win (Moya, P)

ENGLISH 172E. The Literature of the Americas — (Same as COMPLIT 142.)
5 units, Aut (Greene, R; Saldivar, R)

PSYCHOLOGY

PSYCH 75. Introduction to Cultural Psychology
5 units, Spr (Markus, H)

SOCIOLOGY

SOC 145/245. Race and Ethnic Relations
5 units, not given this year

SOC 147A/247A. Comparative Ethnic Conflict
5 units, Spr (Olzak, S)

THEMATIC FOR MAJORS AND MINORS

AFRICAN AND AFRICAN AMERICAN STUDIES

For courses in African and African American Studies with the subject code AFRICAAM, see the "African and African American Studies" section of this bulletin.

ASIAN AMERICAN STUDIES

ASNAMST 181P. Asian Americans in Film and Video — (Same as CSRE 181P.) The history and relevance of film and video production in Asian America. How Asian Americans have represented themselves through film and video. Themes, methods, and debates in Asian American cultural criticism through history and politics, race and ethnicity, gender and sexuality.
5 units, not given this year

ASNAMST 185D. Southeast Asian Migration and Community Formation — (Same as CSRE 185D.) The migration processes of communities from Laos, Vietnam, and Cambodia in the U.S. Colonialism, imperialism, globalization, and diaspora. S.E. Asian immigration and resettlement policies along the axes of political, social, and economic state agendas, and racial, gender, and class structures. Why S.E. Asians migrated to the U.S.; their relationships to their countries of origin.
5 units, Win (Doa, L)
CHICANA/O STUDIES

CHICANST 121C. Chicana/o Film Practices — (Same as CSRE 121C.) The ideological parameters of Chicano/a, including migration, labor, organized state violence, collectivism, familialism, spiritual practices, gender, and sexual politics. The cultural, aesthetic, and political dimensions of film form, including formal and textual analysis.
1-5 units, Aut (Duffy, C)

CHICANST 165G. American Dreams: Mexican Americans, Immigration since 1964, and the Middle Class — (Same as CSRE 165G.) How does the Mexican American population stand in relation to the attainment of middle-class status? Topics include immigration, religion, political participation, the labor market, marriage, and pan-ethnic identification. Introduction to sociological methodology. Final project.
5 units, Win (Campos, D)

CHICANST 180E. Introduction to Chicana/o Studies — (Same as CSRE 180E, SPANLIT 180E.) Historical and contemporary experiences that have defined the status of Mexican-origin people living in the U.S. Topics include the U.S.-Mexico border and the borderlands; immigration and anti-immigration sentiment; literary and cultural traditions; music; labor; historical perspectives on Mexicans in the U.S. and the Chicano movement; urban realities; gender relations; political and economic changes; and inter- and intra-group interactions. Sources include social science and humanities scholarship.
5 units, Spr (Yarbro-Bejarano, Y; Palafox, J)

CHICANST 181S. U.S.-Mexico Borderlands in Comparative Perspective — (Same as CSRE 181S.) The border as zone of political, social, economic, and cultural interaction, conflict, and interdependence from before the U.S.-Mexico War. Manifest destiny, the incorporation of the boundary into the capitalist world system, and contemporary boundary issues including the border industrialization program, urbanization and migration, and the function of borders in reinforcing global apartheid.
5 units, Spr (Palafox, J)

CHICANST 187C. Latino Children: Cultural and Social Contexts of Development — (Same as CSRE 187C.) Ecological contexts, including family, school, and society, that shape the psychosocial and educational outcomes of Latino children. Sources include developmental and cultural psychology, anthropology of education, and sociology.
5 units, not given this year

CHICANST 200R. Directed Research — May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

CHICANST 200W. Directed Reading — May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

COMPARATIVE STUDIES IN RACE AND ETHNICITY

CSRE 10. Topics in the Study of Race and Ethnicity — (Same as AF-RICAAM 10.) Guest speakers, panel presentations, film screenings, and artistic performances. Autumn Quarter theme is immigration. May be repeated for credit.
1-3 units, Aut, Win, Spr (Palumbo-Liu, D)

CSRE 145A. Poetics and Politics of Caribbean Women’s Literature — Mid 20th-century to the present. How historical, economic, and political conditions in Haiti, Cuba, Jamaica, Antigua, and Guadeloupe affected women. How Francophone, Anglophone, and Hispanophone women novelists, poets, and short story writers respond to similar issues and pose related questions. Caribbean literary identity in a multicultural and diasporic context; the place of the oral in the written feminine text; family and sexuality; translation of European master texts; history, memory, and myth; and responses to slave history, colonialism, neocolonialism, and globalization. GER:DB-SocSci, EC-Gender
5 units, Win (Duffy, C)

CSRE 190. Disciplinary Boundaries: Research Methods in the Academy — Faculty presentations from CASA, English, Psychology, Political Science, History, Sociology, and Drama. Collaborative research, and feminist ethnographic methods.
3 units, not given this year

CSRE 192. Race and Slavery in Brazil and the United States — Did race motivate enslavement or was racial profiling a product of slavery? Brazilian or American slavery and what it means to be a person of color in these countries today. Love, hatred, and endurance in two divided societies. Sources include historical narratives, literature, film, music and iconography.
5 units, not given this year

CSRE 198. Internship for Public Service — Restricted to CSRE comparative studies majors with a concentration in public service. Students consult with the CSRE undergraduate program director and CSRE affiliated faculty to develop an internship. Some group meetings. May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

CSRE 199. Pre-Honors Seminar — For students interested in writing a senior honors thesis. Conceptualizing and defining a manageable honors project, conducting interdisciplinary research, the parameters of a literature review essay, and how to identify a faculty adviser.
1 unit, Win (Thompson, V)

CSRE 200R. Directed Research — May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

CSRE 200W. Directed Reading — May be repeated for credit.
1-5 units, Aut, Win, Spr (Staff)

CSRE 200Y. CSRE Senior Honors Research — Faculty presentations from CASA, English, Psychology, Political Science, History, Sociology, and Drama. Collaborative research, and feminist ethnographic methods.
3 units, not given this year

CSRE 203A. The Changing Face of America: Civil Rights and Education Strategies for the 21st Century — For students with leadership potential who have studied these topics in lecture format. Race discrimination strategies, their relation to education reform initiatives, and the role of media in shaping racial attitudes in the U.S.
5 units, Spr (Montoya, J; Steyer, J)

NATIVE AMERICAN STUDIES

NATIVEAM 109A. Federal Indian Law — (Same as CSRE 109A.) Cases, legislation, comparative justice models, and historical and cultural material. The interlocking relationships of tribal, federal, and state governments. Emphasis is on economic development, religious freedom, and environmental justice issues in Indian country.
5 units, Aut (Biestman, K)

NATIVEAM 116. Language, Culture, and Education in Native North America — (Same as CSRE 116.) Communication and language in cross-cultural education, including literacy and interethnic communication in relation to native classrooms in the mainland U.S., Alaska, and nations and territories of the Pacific. Focus is on implications of social, cultural, and linguistic diversity for educational practice in bridging intercultural differences between schools and native communities. GER:DB-SocSci
5 units, Spr (Nelson-Barber, S)

NATIVEAM 117A. Diversity in Contemporary American Indian Cultures and Communities — (Same as CSRE 117A.) The social, political, and economic position of American Indians in contemporary American society. Demographic resurgence, changes in socioeconomic status, ethnic identification and political mobilization, and institutions such as tribal governments, states, and the Bureau of Indian Affairs. Topics include the aftermath of allotment, the Indian New Deal, postwar termination efforts, health and education, and current controversies such as conflicts over assertion of treaty rights and reservation casino operations. GER:DB-SocSci
5 units, Win (Shively, J)
NATIVEAM 200R. Directed Research
1-5 units, Aut, Win, Spr (Staff)

NATIVEAM 200W. Directed Reading
1-5 units, Aut, Win, Spr (Staff)

COGNATE COURSES
See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

AFRICAAM 101. African American Lecture Series
1-3 units, Aut, Win, Spr (Grant, V)

AFRICAAM 105. Introduction to African and African American Studies — (Same as HISTORY 150X.)
5 units, Win (Bobo, L; Carson, C)

AFRICAAM 112. Documenting a Community: Visual Storytelling and Environmental Portraits in East Palo Alto
3-5 units, Aut (Chakarova, M)

ARTHIST 195/395. Introduction to Black Atlantic Visual Traditions
4 units, Win (Martinez-Ruiz, B)

ARTHIST 292A. Researching Africa: Problem and Theory in African Art
5 units, Win (Martinez-Ruiz, B)

ARTHIST 294. Caribbean and Latin American Art: Empire, Identity, and Society
5 units, Aut (Martinez-Ruiz, B)

5 units, Aut (Wilcox, M)

CASA 113/213. Women in Islam: The Central Asian Case
5 units, Win (Kananbaeva, A)

CASA 115. Race and the American City
5 units, Spr (Roque, A)

CASA 117/217. Archaeology of the American Southwest: Contemporary Peoples, Contemporary Debates
5 units, Aut (Wilcox, M)

CASA 185/285. Environmental Ethics
3-5 units, Win (Gupta, A)

COMM 148/248. Hip-Hop and Don’t Stop: Introduction to Modern Speech Communities
4-5 units, Spr (Morgan, M)

COMPLIT 41Q. Ethnicity and Literature
3-5 units, Aut (Palumbo-Liu, D)

COMPLIT 144. Arab Minorities in a Transnational Context: Fictions of Race, Ethnicity, Periphery
3-5 units, Spr (Tanoukhi, N)

COMPLIT 148. Introduction to Asian American Cultures
3-5 units, Win (Palumbo-Liu, D)

DANCE 42. Dances of Latin America
2 units, Spr (Cashion, S)

DANCE 43. Afro-Peruvian Dance
1 unit, Aut (Cashion, S)

DANCE 168. Dance and Culture in Latin America
4 units, Spr (Cashion, S)

DRAMA 17N. From Inside the First World: Women of Color Playwrights Re-mapping the U.S. — (Same as SPANLIT 178N.)
3 units, Win (Moraga, C)

DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts
5 units, Win (Elam, H)

DRAMA 168/268. African American Drama: Traditions and Revisions
5 units, Aut (Diggs, S)

DRAMA 177/277. Playwriting
5 units, Win (Freed, A)

EDUC 115Q. Identities, Race, and Culture in Urban Schools
3 units, Spr (Staff)

EDUC 149/249. Theory and Issues in the Study of Bilingualism — (Same as SPANLIT 207.)
3-5 units, Aut (Valdes, G)

EDUC 193B. Peer Counseling in the Chicano/Latino Community
1 unit, Aut (Martinez, A)

EDUC 193C. Peer Counseling in the African American Community
1 unit, Aut (Edwards, S)

EDUC 193D. Peer Counseling: Asian American Community
1 unit, Spr (Brown, N)

EDUC 193N. Peer Counseling in the Native American Community
1 unit, Win (Simms, W)

EDUC 201. History of Education in the United States
3-4 units, Win (Williamson, J)

EDUC 201B. Education for Liberation
3-4 units, Aut (Williamson, J)

EDUC 233A. Counseling Interventions from a Multicultural Perspective
3 units, Aut (LaFromboise, T)

EDUC 306A. Education and Economic Development
5 units, Aut (Carnoy, M)

EDUC 340. Psychology and American Indian Mental Health
5 units, Spr (LaFromboise, T)

ENGLISH 140A. Imagining the Holocaust
5 units, Spr (Felstiner, J)

ENGLISH 152G. Harlem Renaissance
5 units, Spr (Elam, M)

ENGLISH 260G. Century’s End: Race, Gender, and Ethnicity at the Turn of the Century
3-5 units, Spr (Fishkin, S)

FEMST 120. Introduction to Queer Studies
4-5 units, Win (Rivers, D)

FEMST 208. Bernice Johnson Reagon and the Cultural Politics of Racial and Gender Justice
2 units, Win (Freedman, E)

HISTORY 59. Introduction to Asian American History
5 units, Aut (Chang, G)

HISTORY 107. Introduction to Feminist Studies — (Same as FEMST 101.)
5 units, Aut (Freedman, E)

HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle
4-5 units, Aut (Carson, C)

HISTORY 185B. Jews in the Modern World
5 units, Spr (Zipperstein, S)

5 units, not given this year

HISTORY 269G. History of the Native American West
4-5 units, Win (Wadewitz, L)

LINGUIST 150. Language in Society
4 units, Spr (Eckert, P)

LINGUIST 156. Language and Gender
4 units, Win (Eckert, P)

LINGUIST 256. Seminar in Sociolinguistics: Language and Identity
1-4 units, Win (Rickford, J)

3 units, Aut (Sano, S)

MUSIC 17Q. Perspectives in North American Taiko
4 units, Spr (Sano, S)

POLISCI 121. Urban Politics—(Same as URBANST 111.)
5 units, Win (Fraga, L)

POLISCI 131. Children’s Citizenship: Justice Across Generations—(Same as EDUC 158.)
5 units, not given this year

POLISCI 141. The Global Politics of Human Rights
5 units, not given this year

POLISCI 221T. Politics of Race and Ethnicity in the United States
5 units, not given this year

PSYCH 215. Mind, Culture, and Society
3 units, Win (Markus, H; Steele, C)

PSYCH 217. Topics and Methods in Cultural Psychology
1-3 units, Win (Staff)

SOC 46N. Race, Ethnic, and National Identities: Imagined Communities
3 units, Spr (Rosenfeld, M)

SOC 120/220. Interpersonal Relations
5 units, Aut (Ridgeway, C)

SOC 136/236. Law and Society
3-5 units, Win (Dauber, M)

SOC 139/239. American Indians in Contemporary Society
5 units, not given this year

SOC 140/240. Introduction to Social Stratification
5 units, Win (Sandefur, R)

SOC 141A/241A. Social Class, Race, Ethnicity, Health
4-5 units, Win (Barr, D)

SOC 142/242. Sociology of Gender
5 units, Win (Staff)

SOC 143/243. Prejudice, Racism, and Social Change
5 units, not given this year

SOC 144/244. Race and Crime in America
5 units, Spr (Bobo, L)

SPANLIT 193. The Cinema of Pedro Almodóvar
3-5 units, Spr (Yarbro-Bejarano, Y)

SPANLIT 281. Flor y Canto: Poetry Workshop—(Same as DRAMA 179F)
3-5 units, Spr (Moraga, C)

SPANLIT 289. The Body in Chicana/o Cultural Representations
5 units, Win (Yarbro-Bejarano, Y)

SPANLIT 389E. Race and Sex in Cultural Representations
3-5 units, Win (Yarbro-Bejarano, Y)

CULTURAL AND SOCIAL ANTHROPOLOGY

Chair: James Ferguson
Professors: James Ferguson, Ian Hodder, Lynn Meskell, Sylvia J. Yanagisako (on leave)
Associate Professors: Paulla Ebron, Akhil Gupta, Lisa Malkki, Purnima Mankekar
Assistant Professors: Miyako Inoue, Sarah S. Jain, Matthew Kohrman, Barbara Voss, Michael V. Wilcox
Lecturers: Amy Burce, Carolyn Duffey, Claudia Engel, Alma Kunanbaeva
Courtey Professors: Penelope Eckert, Raymond McDermott
Visiting Assistant Professor: Ewa Domanska
Affiliated Faculty: J. Gordon Brotherston, Susan Cashion, Jean-Pierre Dupuy, Ellen McLarney
Teaching Fellows: Kathy Coll, Laura Hubbard, Catherine Mathers, Ellen McLarney
Teaching Affiliates: Fernando Armstrong, Katrinka Reinhart, Angel Roque
Mail Code: 94305-2145
Phone: (650) 723-3421
Email: anthrocas@stanford.edu
Web Site: http://anthroCASA.stanford.edu

Courses given in Cultural and Social Anthropology have the subject code CASA. For a complete list of subject codes, see Appendix.

The courses offered in CASA are designed to: (1) provide undergraduates with instruction in cultural and social anthropology; (2) provide undergraduate majors in anthropology with a program of work leading to the bachelor’s degree; and (3) prepare candidates for advanced degrees in Cultural and Social Anthropology.

Cultural and Social Anthropology addresses issues in the comparative study of society and culture, including race, class, national origin, gender, sexual orientation, and religion as they are shaped by experiences of education, history, and migration through which people in past and contemporary societies have defined themselves in relation to others. The scope of the field includes American society and culture as well as those of other parts of the world, especially as they are drawn together and shape one another in increasingly transnational and global interactions.

The department offers approaches to the subfields and topics in anthropology that include archaeology, environmental anthropology, linguistics, medical anthropology, political economy, science and technology studies, and sociocultural anthropology. Methodologies for the study of micro- and macro-social processes are taught through qualitative and quantitative approaches. Training is offered in: ethnographic research; collection and interpretation of oral histories, surveys, and archival materials; analysis of material culture, including mapping, cataloguing, and interpretation of material objects; and methodologies in the performative arts, including...
visual and performance studies. The department provides students with training in theory and methods to enable them to pursue graduate study in any of the above mentioned subfields of anthropology. Students interested in the biological and evolutionary approaches to anthropology should consult the Department of Anthropological Sciences.

**UNDERGRADUATE PROGRAMS**  
**BACHELOR OF ARTS**

The Department of Cultural and Social Anthropology (CASA) offers a B.A. degree in Cultural and Social Anthropology and an honors program. The major provides students with expertise for understanding social and cultural transformations from an international and cross-cultural perspective. In addition to gaining an excellent foundation for graduate research and study, students majoring in Cultural and Social Anthropology can pursue careers in government, international business, international development agencies, international education, law, mass media, non-profit organizations, and public policy.

Within the major, students may include course offerings in other departments such as Anthropological Sciences, Classics, Economics, English, History, Political Science, Psychology, and Sociology, as well as course offerings in programs such as African Studies, American Studies, Anthropology, Comparative Studies in Race and Ethnicity, East Asian Studies, Feminist Studies, Latin American Studies, Public Policy, and Urban Studies.

To declare a major in Cultural and Social Anthropology, students should contact the department’s student peer adviser or student program coordinator. The department checklist for the major can be downloaded in pdf format from http://www.stanford.edu/dept/anthroCASA/programs/undergrad.html. Submit the checklist to the student program coordinator and apply for the major in Axess. The checklist must be approved by the faculty chair of the CASA committee on undergraduate degrees. Requirements for the major include:

1. A faculty adviser in Cultural and Social Anthropology.
2. A program of 65 units, with at least 40 units of Cultural and Social Anthropology course work. The remaining 25 units may be taken from courses in related departments, including Anthropological Sciences, or transferred from other anthropological study programs, such as overseas programs. The 65 units must form a coherent program of study and be approved by the student’s faculty adviser.
3. A grade of ‘B-’ or better in CASA 90, Theory in Cultural and Social Anthropology. This course is required of all CASA majors and should be taken within a year of declaring the major or before the end of the junior year. It introduces students to anthropological theory and prepares them for upper-division courses in the department.
4. The 40 units of Cultural and Social Anthropology course work required for the major must include at least one course from four of the six topical categories listed below:
   a) Archaeology
   b) Gender and Feminism
   c) Globalization and Transnationalism
   d) Linguistic and Symbolic Anthropology
   e) Race and Ethnicity
   f) Science, Technology, or Medicine
5. Students must choose a concentration, taking at least 15 units in three or more courses on one theme or topic. Concentrations can be defined by subject matter or cultural area. Some examples of themes for a concentration are: cultural studies, economic development, kinship, mass media, material culture, migration and immigration, political economy, popular culture, race and ethnicity, religion, urban cultures, or a particular culture area such as Japan, Europe, or South Asia. A student’s area of concentration must be approved by the major adviser.
6. A minimum of 15 units must be in CASA seminars numbered 100 or above.
7. Competence in a foreign language beyond the first-year level. Such competence is usually demonstrated by completing a 5 unit course at the second-year level with a grade of ‘B-’ or better. The requirement may be met by special examination administered through the Language Center.
8. 10 units from IHUM 27A,B (Introduction to the Humanities) may be counted towards the major. Students whose programs require non-English language study as part of a geographical or linguistics focus may ask their faculty adviser to approve up to 5 units from language courses toward the degree if such courses are at the second-year level and above, or are in a second non-English language. No more than 10 units of CASA 96, Directed Individual Study, may be counted towards the major, and may only be included among the 25 “related units” permitted for the major. All required units for the undergraduate degree program must be passed with a grade of ‘C’ or better, and not more than 10 (maximum of 5 units in Cultural and Social Anthropology and 5 units in related subjects) of the required 65 units may be taken for a “satisfactory/no credit” grade.

*Deadline for Declaring the Major* — Students must complete the declaration process, including planning form submission and Axess declaration, upon completion of 90 units or upon achieving junior class status.

 Majors are encouraged to develop field research projects under the supervision of a CASA faculty member. The department offers research grants to support individually-designed summer field research in cultural and social anthropology. The CASA research grant should be used to support field research as a supplement to other field research grants such as the UAR research grants. Eligibility for application to the research grants program requires that a student has completed a minimum of two CASA courses with a grade point average of 3.3 (B+) or better. One of the two courses may be completed in the quarter in which the grant application is submitted to the department. Michelle Z. Rosaldo grant applications for individually-designed summer field research projects are due by the end of the fifth week in Winter Quarter.

 Prospective majors may meet with the chair of the Undergraduate Committee or the undergraduate peer adviser for initial advice on choosing an appropriate faculty adviser in the department. In consultation with their faculty advisers, students must develop a coherent program of study for the major. Students are required to submit the application form for the major, including their completed proposed plan of study, to the student program coordinator, no later than the beginning of the Winter Quarter of the junior year. Required course work for the research grants program includes CASA 93, Prefield Research Seminar, and CASA 94, Postfield Research Seminar. Suggested course work for the research grants program includes CASA 92, Research Writers Workshop, CASA 95A, Research in Anthropology, and CASA 96, Directed Individual Study. Contact the student program coordinator for more information.

 Majors are required to meet with their faculty advisers at least once each quarter. Each student’s progress towards fulfilling the major requirements is recorded in a file kept in the student program coordinator’s office. It is the student’s responsibility to see that this file is accurate and up to date.

**MINORS**

To declare a minor in Cultural and Social Anthropology, students should contact the department’s student peer adviser or student program coordinator. The department checklist for the minor can be downloaded in pdf format from http://www.stanford.edu/dept/anthroCASA/programs/undergrad.html. Submit the checklist to the student program coordinator and apply for the minor in Axess. The checklist must be approved by the faculty chair of the CASA committee on undergraduate degrees. Requirements for the minor include the following:

1. A faculty adviser in Cultural and Social Anthropology.
2. 30 units of CASA course work. IHUM 27A,B may be applied to the 30 units. Only 5 units of directed individual study may apply towards the 30 units in the minor. All units for the minor must be passed with a grade of ‘C’ or better.
3. Up to 10 of the 30 units may be taken for instructor-elected, satisfactory/no credit grade.
4. At least 15 of the 30 units must be from CASA courses numbered 70 or above.
5. A minimum of 5 of the 30 units must be taken in a cultural area course approved by the program adviser on the undergraduate minor checklist.
Deadline for Declaring the Minor—Students must complete the declaration process, both planning form submission and Axess registration, by the last day of the quarter, two quarters prior to degree conferral, for example by the last day of Autumn Quarter if Spring graduation is intended.

SENIOR PAPER AND DEPARTMENTAL HONORS

The senior paper program in Cultural and Social Anthropology provides majors the opportunity to conduct original research under the guidance of a faculty advisor. The senior paper program is open to all majors in the department. Students must initiate their participation in the senior paper program by filing an application of intent with the student program coordinator. The application must include a description of the proposed project, a program of study, and a letter of approval from a faculty sponsor. Students are encouraged to apply to the senior paper program in their sophomore or junior year prior to initiating fieldwork or other research. The senior paper application of intent must be submitted no later than the second week of Autumn Quarter in the senior year.

All CASA majors are encouraged to write a senior paper. Majors should begin research for a senior paper during their junior year with guidance from their CASA faculty advisor. At the latest, department majors must submit an application of intent to write a senior paper to the student program coordinator no later than the end of the second week of Autumn Quarter in the senior year. Enrollment in CASA 95A, Research in Anthropology, is recommended during Autumn and Winter quarters. The Senior Paper Checklist must be completed, signed by the program advisor, and handed in to the student program coordinator by the end of the second week in Autumn Quarter in the senior year. Students must enroll in CASA 95B, Senior Paper, in the final quarter in the undergraduate degree program before graduating. The senior paper is submitted in the final quarter before graduation. For more information, see the student program coordinator.

All CASA majors are encouraged to write an honors paper. Majors should begin research for an honors paper prior to the last quarter of the junior year with guidance from their CASA faculty advisor. At the latest, department majors must submit an application of intent to write an honors paper to the student program coordinator no later than the end of Spring Quarter (or the third quarter) in the junior year. Department majors are eligible to apply for honors candidacy with a 3.5 GPA in the department major and a 3.0 GPA in overall course work. Enrollment in CASA 95A, Research in Anthropology, is recommended during Autumn and Winter quarters. The Honors Checklist and Timeline must be completed, signed by the program advisor, and handed in to the student program coordinator by the end of the second week in Autumn Quarter in the senior year. Students must enroll in CASA 95B, Senior Paper, in the final quarter in the undergraduate degree program before graduating. The senior paper is to be considered for departmental honors is submitted in the final quarter before graduation. Senior papers with a letter grade of ‘A-’ or better may be awarded departmental honors. For more information, see the student program coordinator.

GRADUATE PROGRAMS

University requirements for the degrees of Master of Arts and Doctor of Philosophy are described in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS

The Department of Cultural and Social Anthropology offers the M.A. degree to four groups of students: (1) Stanford undergraduates who are admitted to the coterminal program; (2) Stanford graduate students taking advanced degrees in other departments or schools at Stanford who are admitted to the terminal M.A. program; (3) Ph.D. students in Cultural and Social Anthropology who fulfill the M.A. requirements on the way to the Ph.D. degree; and (4) students who apply from outside Stanford for entry into the terminal M.A. program.

Applicants whose ultimate goal is the Ph.D. degree should apply directly to the Ph.D. program. Students accepted for the terminal M.A. degree program cannot transfer to the Ph.D. program; they must reapply on the same basis as other Ph.D. applicants and in competition with other Ph.D. applicants. Ph.D. students who decide to take the M.A. on the way to the Ph.D. are governed by separate requirements described in the department’s Guide to the Ph.D. Program.

COTERMINAL B.A./M.A. PROGRAM

The deadline for graduate applications to the coterminal M.A. degree program is March 13, 2007. Prospective applicants should refer to the department’s web site for information about application for graduate admission. Successful applicants for the M.A. program usually enter in Autumn Quarter. Applicants must submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level. Applicants should also submit three letters of reference, recent original transcripts, and a statement of purpose.

The department prerequisites for application to the coterminal M.A. program are listed below. Stanford undergraduates who are currently enrolled and interested in applying to the department’s coterminal graduate M.A. degree program are required to pass CASA 90, Theory in Cultural and Social Anthropology, and a minimum of 10 additional units of CASA course work with a grade of ‘A’ or better. An overall undergraduate GPA of 3.3 (B+) or better is required.

Graduate enrollment at Stanford for at least three quarters of full tuition for a minimum of 45 units is required of all candidates for the master’s degree, including coterminal students. Coterminal M.A. students in Cultural and Social Anthropology must take a minimum of 45 quarter units in Cultural and Social Anthropology course work beyond the undergraduate degree with a grade point average (GPA) of 3.0 (B) or better. 45 units constitute the University minimum for the M.A. degree. However, the department requires 60 units of course work for the coterminal M.A. degree. Of the required 60 units, 15 units may be accepted from previous undergraduate or other course work. Course work must be at or above the 100-level. 18 of the 45 units required from Cultural and Social Anthropology course work must be in courses designated primarily for graduate students (typically at least at the 200 level). Course work applied to the coterminal M.A. degree may not also be applied to the requirements for the undergraduate degree, or any other degree program.

Within the 45 units taken at Stanford, students must take CASA 290, History and Theory in Cultural and Social Anthropology or, if not given, CASA 301, History of Anthropological Theory, and two additional graduate-level seminars in the department. The remaining units may be made up of departmental courses selected in consultation with the faculty adviser to meet the needs and interests of the student.

The coterminal program may require more than one year of study. However, full-time students entering the program with appropriate background should complete the coterminal program in one calendar year. To provide a meaningful M.A. program within a one-year period, advance planning of course work with an adviser is required. All requirements for the master’s program must be completed within three years after the student’s first quarter of enrollment in the degree program.

Field or library research paper, read and approved by at least two departmental faculty members, must be presented. Coterminal students must submit an acceptable project/paper proposal for the master’s paper to their faculty adviser for approval no later than the end of the fourth week in the first quarter of the graduate degree program. In addition, an acceptable master’s degree program proposal, approved and signed by the program adviser and department chair, must be submitted no later than the end of the fourth week in the first quarter of the graduate degree program. Coterminal students should enroll in CASA 399, Masters Research Paper, or CASA 801, TGR Project, in the final quarter during which they will submit the M.A. paper.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.
The deadline for graduate applications to the terminal M.A. degree program is March 13, 2007. Prospective applicants should refer to the department web site for information about application for graduate admission. Successful applicants to the M.A. program may enter only in the following Autumn Quarter. Applicants must file a report of their Graduate Record Examination score electronically, and submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level. Applicants should also submit three letters of reference, recent original transcripts, and a statement of purpose.

Graduate enrollment at Stanford for three consecutive quarters of full tuition for at least 45 units is required of all candidates for the master’s degree. M.A. students in Cultural and Social Anthropology must take a minimum of 45 units in social and cultural anthropology course work beyond the undergraduate degree with a grade point average (GPA) of 3.0 (B) or better. 45 units constitute the University minimum for the M.A. degree. Courses must be at or above the 100 level, and 18 of the 45 units must be in courses designated primarily for graduate students, typically at least at the 200 level.

Within the 45 units taken at Stanford, students must take CASA 302, Anthropological Research Methods, and CASA 290, History and Theory in Cultural and Social Anthropology or, if not given, CASA 301, History of Anthropological Theory; three additional graduate-level seminars in the department (usually offered at the 200 level or above); and three courses from one of these department tracks:

1. Feminist Anthropology
2. Heritage and Museum
3. Race and Ethnicity
4. Science, Technology, and Medicine
5. Globalization and Transnationalism

The remaining units may be made up of departmental courses chosen in consultation with the faculty adviser to meet the needs and interests of the student.

The M.A. program usually requires more than one year of study. However, full-time students entering the program with appropriate background should complete the M.A. program in one calendar year. All requirements for the M.A. degree should be completed within three calendar years (consecutive) after the student’s first quarter of enrollment in the graduate M.A. degree program. The University allows no transfer units to the M.A. program. To provide a meaningful M.A. program within a one-year period, advance planning of course work with an adviser is required.

A field or library research paper, read and approved by at least two departmental faculty members, must be presented. For current Ph.D. students in the department who are pursuing a master’s degree on the way to the Ph.D., a paper completed for a department evaluation course may be submitted in fulfillment of this requirement. Terminal M.A. students may select a paper, written for one of the courses taken in Cultural and Social Anthropology, and present the extended paper to the faculty member responsible for the course in which the paper was written originally. Terminal M.A. students must submit an acceptable project/paper proposal for the master’s paper to their faculty adviser for approval not later than the end of the fourth week in the first quarter of the graduate degree program. In addition, an acceptable master’s degree program proposal, approved and signed by the program advisor and the department chair, must be submitted no later than the end of the fourth week of the first quarter of enrollment in the graduate degree program. Terminal M.A. students should enroll in CASA 399, Master’s Research Paper, or CASA 801, TGR Project, in the final quarter during which they will submit the M.A. paper.

DOCTOR OF PHILOSOPHY

The deadline for graduate applications to the Ph.D. degree program is January 9, 2007. Prospective applicants should reference the department web site for information about application for graduate admission. Successful applicants for the Ph.D. program may enter only in Autumn Quarter. It is department policy not to defer graduate admission. Applicants must file a report of their Graduate Record Examination score electronically and submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level. Applicants should also submit three letters of reference, recent original transcripts, and a statement of purpose. In addition to a clear statement of research interests in the statement of purpose, it is especially important for applicants choosing the Archaeology track to provide a detailed description of the area of specialization as well as the topical interests for dissertation research. The Ph.D. program includes a number of required courses and examinations. It also allows the student to develop a flexible program reflecting special interests, under the supervision of a faculty committee chosen by the student. Students are encouraged to plan for completion of all work for the Ph.D. in five years.

The Ph.D. requirements for students who matriculate beginning 2006-07 are as follows. Those matriculating in earlier academic years should consult the department’s Ph.D. Handbook or previous editions of this bulletin for their entering cohort year. Ph.D. students in Cultural and Social Anthropology must take a minimum of 135 quarter units with a minimum grade point average (GPA) of 3.0 (B). The maximum allowable number of transfer units is 45.

1. Pass in the first year, with a grade of ‘B+’ or better:
   a) at least three of the graduate-level courses in the department designated by the faculty as theory/evaluation courses, including CASA 301, History of Anthropological Theory, during Autumn Quarter; CASA 300, Reading Theory Through Ethnography (Anthropology track only), or CASA 373, Introduction to Archaeological Theory (Archaeology track only), during Winter Quarter.
   b) CASA 302, Anthropological Research Methods (Anthropology track only), or CASA 360, Archaeological Methods and Research Design (Archaeology track only), during Spring Quarter; or for the Archaeology track, a primary-level methods survey or advanced-level methods course relevant to research interests.
   c) for the Archaeology track: a course, to be decided on in consultation with the faculty adviser, that satisfies the department specialization requirement in a topical interest required of graduate Ph.D. students. Although it is suggested that the topical interest course requirement be completed during the first year in the Ph.D. degree program, it may also be completed at any time until the end of the third year.
   d) at least 45 units of completed course work overall.

2. Satisfy the department ethics requirement for review of ethics in Cultural and Social Anthropology. Courses approved this year follow. This list is subject to updating. See http://www.stanford.edu/dept/anthro-CASA/forms.html for updates after the publication of this bulletin.
   CASA 203. Laboratory Methods in Archaeology
   CASA 285. Environmental Ethics
   CASA 302. Research Methods
   CASA 325. Ethics and Anthropology
   CASA 360. Archaeology Methods and Research Design

3. Enroll in CASA 395, Introduction to Cultural and Social Anthropology: Faculty Research, during Autumn, Winter, and/or Spring quarters for 1-2 units for a total of no more than 5 units over the three quarters.

4. In the second year, pass with a grade of ‘B+’ or better:
   a) additional graduate-level theory/evaluation courses in the department for a total of six such courses with a grade of ‘B+’ or better over the first two years of the program.
   b) CASA 394, Proposal Writing Seminar (offered Spring Quarter).
   c) CASA 310, Intersections (offered Winter Quarter). This course requirement is usually completed during the second year in the Ph.D. program, but it may also be completed by the end of the third year.

5. At least 40 units of completed course work in the second year for a total of at least 85 units of course work by the end of the second year.

6. At the beginning of Autumn Quarter in the second year, attend the teaching assistantship training workshop.

7. Serve as a teaching assistant for one quarter, of a required minimum of two quarters, in the second year.

8. By the first day of finals week in Winter Quarter of the second year, recruit a total of four committee members for the qualifying written examinations for topic (two committee members made up of an adviser and a reader) and for area (two committee members made up of an adviser and a reader).
By the first day of finals week in Spring Quarter of the second year, confirm the qualifying written examination schedule. The written exam must be completed by the first day of finals week in the Winter Quarter of the third year and the oral exam must be completed no later than the beginning of the fourth week of Spring Quarter in the third year.

For those whose native language is English, pass, by the end of Spring Quarter of the second year, an examination in a language other than English in which there is a substantial body of general theoretical literature relevant to anthropology. For those whose native language is not English, demonstrate satisfactory command of English, as evidenced by successful completion of the first two years of graduate study. The examination may be taken through the Stanford Language Center, other Stanford language departments, or by appointment with the department’s language coordinator. The examination format must be approved in advance of the examination by the department’s language coordinator.

During Spring Quarter, enroll in CASA 394, Proposal Writing Seminar.

Upon completion of the above requirements, and upon recommendation of the CASA faculty, petition the University for candidacy by the end of Spring Quarter of the second year.

Upon completion of the above requirements, and upon recommendation of the Cultural and Social Anthropology faculty, request the Master’s Degree on the way to the Ph.D. degree program by the end of Spring Quarter of the second year.

In the third year, complete the following requirements:

a) during the Autumn Quarter, by December 8, 2006, submit three dissertation research grant proposals, including the approved dissertation proposal, the grant application, and the approved non-medical human subjects protocol, to the faculty adviser.

b) provide a statement to the departmental committee on higher degrees declaring the date planned for the oral examination and submit a declaration of the oral examination committee, inclusive of the external committee chair, the committee adviser, and the three committee members, to the student program coordinator by the first day of finals week in Autumn Quarter of the third year.

c) complete the qualifying written projects examinations for topic and area (two separate exams) by the first day of finals week in Winter Quarter, in the third year. The examinations may be scheduled as two separate four-hour exams scheduled approximately two days apart in a given week, or as two separate week-long exams (seven days for each examination) to be scheduled approximately one week apart in a given month.

d) by the end of the fourth week in Spring Quarter, schedule and pass the University oral examination in the form of an area/topic examination. During this exam, file the dissertation reading committee form and confirm the committee’s revisions for the dissertation proposal to begin fieldwork and dissertation research. Secure approval for the revised dissertation proposal before leaving for dissertation fieldwork.

In the fourth year, complete the following requirements:

a) conduct 9-12 months of dissertation field research with an approved and current non-medical human subjects protocol.

b) submit frequent field status reports to the dissertation reading committee.

In the fifth year, complete the following requirements:

a) during the fifth year and after returning from fieldwork, complete one or more teaching assistant quarters in the department. During each of Autumn, Winter and Spring quarters of the fifth year, students must attend a minimum of four of five class meetings of CASA 392, Dissertation Writers Seminar. Each quarter, chapter drafts of the dissertation must be handed in to the dissertation reading committee for review.

b) after submission of the penultimate draft of the dissertation and before the quarter preceding the quarter in which the dissertation will be submitted for Ph.D. degree, Ph.D. students may schedule and deliver an oral presentation of the dissertation in the department.

**PH.D. MINOR**

Prospective Ph.D. minors in Cultural and Social Anthropology should request an application from the student program coordinator. The requirements for a minor in Cultural and Social Anthropology are as follows:

1. Complete 30 units of courses in the Department of Cultural and Social Anthropology (CASA) at Stanford with a grade point average (GPA) of 3.0 or better. Course work for a minor cannot also be used to meet requirements for a master’s degree.

2. Enlist a faculty member within CASA at Stanford who will provide written consent to serve as the adviser for the minor and serve on the student’s oral examination and dissertation committees (see the student program coordinator for a listing of faculty and office hours).

3. In conjunction with the program adviser, determine a coherent course of study related to the Ph.D. program, including CASA 301, History of Anthropological Theory, two additional CASA theory or methods courses, and one CASA course in a geographical area. For a list of current theory courses, see the student program coordinator.

4. File the necessary paperwork with the student program coordinator. Please note that the department requirements, listed above, are more extensive than the University requirements.

**FINANCIAL SUPPORT**

The department endeavors to provide needed financial support (through fellowships, teaching and research assistantships, and tuition grants) to all students admitted to the Ph.D. program who maintain satisfactory degree progress. Applicants for the Ph.D. program must file a request for financial aid when applying to the program if they wish to be considered for support. Second-year students in the Ph.D. program are required to perform one teaching assistantship quarter. Second-year students who have not secured funding for the second year summer of pre-dissertation field research are advised to make at least two pre-dissertation field research funding applications for summer support. Third-year students in the Ph.D. program who have not secured outside funding are required to make at least three extramural applications for dissertation research funding by the end of Autumn Quarter of the third year. Fourth-year students must submit a department application for funding as a predoctoral research affiliate before leaving for fieldwork. Fifth-year students in the Ph.D. program are required to perform at least one quarter of teaching assistantship. Depending upon department need, fifth-year students may be asked to provide a second quarter of teaching assistantship. Fifth-year students in the Ph.D. program who have not secured extramural funding for the sixth year and beyond are advised to make at least two dissertation write-up funding applications and secure extramural funding for dissertation write up from the sixth year and beyond.

In order to be eligible for department funding of summer fieldwork and research, usually taken in either the first or second-year and again in the third-year of the Ph.D. degree program, first- through fifth-year students must submit the department’s application establishing eligibility for summer funding. No financial support is available to students enrolled for the M.A. degree.

**TEACHING CREDENTIALS**

For information concerning the requirements for teaching credentials, consult the “School of Education” section of this bulletin or address the inquiry to the Credential Administrator, School of Education.
COURSES

Undergraduates register in courses numbered in the 100s or below. Graduate students register in courses numbered in the 200s or above.

WIM indicates that the course satisfies the writing in the major requirements.

UNDERGRADUATE

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Cultural and Social Anthropology department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER: IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective Cultural and Social Anthropology majors are advised to consider satisfying their GER: IHUM2.3 requirements by registering for the following IHUM courses.

IHUM 27A,B. Encounters and Identities — The formation of ideas about individual and collective identities in S. Africa, W. Europe, and the U.S. Contemporary ideas about identity, including national, racial, ethnic, and gender identity; historical encounters and social transformations linking these areas. Challenging popular assumptions about the origins of identities through similarities and differences among ideas of individual and collective identity in different regions of the world. GER: IHUM-2.3

IHUM 27A: 5 units, Win (Ferguson, J)
IHUM 27B: 5 units, Spr (Burce, A)

INTRODUCTORY

Open to all students, these courses are introductory in the sense that prior knowledge is not assumed. Students who want a general introduction to human behavior and culture are advised to take CASA 1; those who are interested in introductory courses focused on specific areas of anthropological inquiry should choose from among the courses numbered 2 through 18.

CASA 1/201. Introduction to Cultural and Social Anthropology — Crosscultural anthropological perspectives on human behavior, including cultural transmission, social organization, sex and gender, culture change, technology, war, ritual, and related topics. Case studies illustrating the principles of the cultural process. Films. GER: DB-SocSci, EC-GlobalCom

CASA 4. Language and Culture — Language in relation to inequality and power. Focus is on the roles of linguistic practices in constituting and reproducing social relationships, institutional arrangements, and political interests and identities. How language is implicated in differing contexts of domination and struggle, including class, race, gender, and sexuality, using existing empirical studies of the language-power linkage. Student projects involve data collection, transcription, analysis, theoretical implications, and connections to existing literature. GER: DB-SocSci

CASA 8N. The Anthropology of Globalization — Stanford Introductory Seminar. Preference to freshmen. Anthropological approach to how cultural change, economic restructuring, and political mobilization are bound up together in the process of globalization. Is this a new world of planet-wide interconnections and prosperity and democracy, or a grim world of exploitative transnational corporations that exploit labor and markets to produce culturally homogeneous consumer goods? How new forms of social and political organization are restructuring a world that is culturally diverse, interconnected, and increasingly unequal. GER: DB-SocSci

CASA 9N. Anthropology of Food — Stanford Introductory Seminar. The production, consumption, and distribution of food, emphasizing culture as a means to examine topics such as ecological history, class, poverty, hunger, ethnicity, nationalism, capitalism, gender, race, and sexuality. Food as the most obvious and least explored window into the shaping of identities, desires, and needs in the contemporary world. GER: DB-SocSci

5 units, Aut (Malkki, L)

CASA 16. Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America — What does it mean to be a Native American in the 21st century? Beyond traditional portrayals of military conquests, cultural collapse, and assimilation, the relationships between Native Americans and American society. Focus is on three themes leading to in-class moot court trials: colonial encounters and colonizing discourses; frontiers and boundaries; and sovereignty of self and nation. Topics include gender in native communities, American Indian law, readings by native authors, and Indians in film and popular culture. GER: DB-SocSci, EC-AmerCul

5 units, Aut (Wilcox, M)

CASA 17. Anthropological Approaches to Rights — What are rights? How did people come to believe that they have them? Is the idea of rights a Western cultural concept; can it be the foundation of a universal or global politics? The relation between rights and equality. GER: DB-SocSci

5 units, not given this year

THEORY AND RESEARCH (UNDERGRADUATE AND MASTER’S)

CASA 88. Theories in Race and Ethnicity — Concepts and theories of race and ethnicity in the social sciences and cultural studies. U.S. based definitions, ideas, and problems of race and ethnicity are compared to those that have emerged in other areas of the world. GER: DB-SocSci

5 units, not given this year

CASA 90. Theory of Cultural and Social Anthropology — Preference to CASA majors. Anthropological interpretations of other societies contain assumptions about Western societies. How underlying assumptions and implicit categories have influenced the presentation of data in major anthropological monographs. Emphasis is on Karl Marx, Emile Durkheim, Max Weber, and anthropological analyses of non-Western societies. WIM

5 units, Win (Ebron, P)

CASA 92. Undergraduate Research Proposal Writing Workshop — Practicum. Students develop independent research projects and write research proposals. How to formulate a research question; how to integrate theory and field site; and step-by-step proposal writing.

1-3 units, Aut, Win (Roque, A)

CASA 93. Prefield Research Seminar — For CASA majors only; non-majors register for 93B. Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnography, and the use of documentary materials. Strategies of successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork. Prerequisites: two CASA courses or consent of instructor.

5 units, Spr (Inoue, M)

CASA 93B. Prefield Research Seminar: Non-Majors — Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnography, and the use of documentary materials. Strategies for successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork.

5 units, Spr (Burce, A)

CASA 94. Postfield Research Seminar — Goal is to produce an ethnographic report based on original field research gathered during summer fieldwork, emphasizing writing and revising as steps in analysis and composition. Students critique classmates’ work and revise their own writing in light of others’ comments. Ethical issues in fieldwork and ethnographic writing, setting research write-up concerns within broader contexts.

5 units, Aut (Burce, A)
CASA 95A. Research in Anthropology — Independent research conducted under faculty supervision, normally taken junior or senior year in pursuit of a senior paper or an honors project. May be taken more than one quarter for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

CASA 95B. Senior Paper — Taken in the final quarter before graduation. Independent study and work on senior paper for students admitted to the program. Prerequisite: consent of program adviser and instructor.

1-10 units, Aut, Win, Spr, Sum (Staff)

CASA 96. Directed Individual Study — Prerequisite: consent of instructor.

1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 103/203. Laboratory Methods in Archaeology — What do archaeologists do with the things they dig up, and how can they use artifacts to learn about past cultures? Hands-on experience cataloging, analyzing, and interpreting an archaeological collection. Students are exposed to standard methods in cataloging and curation, and in analysis of different types of artifacts, animal bone, and botanical remains. Individual or group analysis projects with reports that communicate the research findings.

GER:DB-SocSci
5 units, Win (Voss, B)

CASA 108. History of Archaeological Thought — Introduction to the history of archaeology and the forms that the discipline takes today, emphasizing developments and debates over the past five decades. Historical overview of culture, historical, processual and post-processual archaeology, and topics that illustrate the differences and similarities in these theoretical approaches. GER:DB-SocSci
5 units, Aut (Meskell, L)

CASA 150. Archaeological Methods — Methodological issues related to the investigation of archaeological sites and objects. Aims and techniques of archaeologists including: location and excavation of sites; dating of places and objects; analysis of artifacts and technology and the study of ancient people, plants, and animals. How these methods are employed to answer the discipline’s larger research questions. GER:DB-SocSci
5 units, Spr (Hodder, I)

GENERAL

AREA COURSES

5 units, Sum (Staff)

CASA 74. South Asian Histories and Cultures through Popular Film: Bollywood and Beyond — Indian cinema has been a site for the articulation of ideas about nation, class, caste, gender and sexuality, community, and diaspora. Focus is on Bollywood ﬁlms, and Indian cinema in general, as social, cultural, and political phenomena. How cinematic form, production and distribution networks, and audience reception mediate the emergence of postcolonial forms of identity and consciousness. Film screenings. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Mankekar, P)

5 units, not given this year

CASA 82/282. Medical Anthropology — Emphasis is on how health, illness, and healing are understood, experienced, and constructed in social, cultural, and historical contexts. Topics: biopower and body politics, gender and reproductive technologies, illness experiences, medical diversity and social suffering, and the interface between medicine and science. GER:DB-SocSci, EC-GlobalCom
4-5 units, Spr (Kohrman, M)

3-4 units, Win (Wilcox, M)

CASA 106. Tales of Cannibalism and Capital in Latin America — How agrarian, proletarian, and hunter-gatherer populations in Latin America have envisioned elements of capitalist modernity in terms of cannibalism, vampirism, and other violations of the bodies of the poor. Focus is on ethnographic research.
5 units, Aut (Reinhart, K)

CASA 120/220. Archaeology of Early China — The current rapid pace of unearthing remains of ancient societies. The formation of Chinese civilization from sites of early human occupation through the Chinese Bronze Age which display elements of Chinese civilization such as writing, architecture, warfare, philosophy, art, and cuisine. Sources include non-Chinese texts and Chinese archaeological sources. How archaeology sheds light on the past and present. Chinese language not required.
5 units, Aut (Reinhart, K)

CASA 127. Tibetan Ritual Life — The human life cycle, the calendar year, and pilgrimage as organizing principles to examine Buddhist and lay rituals that mark important occasions, bless people and places, ward off danger, heal wounds, alleviate suffering, predict the future, affirm Tibetan identity, and inspire political activism. Material culture of rituals including butter sculpture, thangka painting, and costumes; performance including monastic dance, chanting, instrumental music, song, and opera; and the meanings of rituals to those who participate in them. The role of ritual in human culture. GER:DB-Hum, EC-GlobalCom
5 units, not given this year

CASA 128. Cultural History of Japan — Since WWII. Transformation of religion, kinship, gender, education, work, leisure, ideology, and national identity as interconnected institutions. Tokugawa and prewar Japan as antecedents to postwar developments. GER:DB-SocSci
3-5 units, Spr (Befu, H)

CASA 128B. Globalization and Japan — Globalization theories in anthropology and sociology, and Japan in the context of these theories. Ethnographic cases of Japan’s global presence from the 15th century to the present. Processes of globalization in business management, popular culture, and expatriate communities. Japan’s multiculturalization through its domestic globalization. GER:DB-SocSci, EC-GlobalCom
3-5 units, Spr (Befu, H)

CASA 158. Sex, Death, and the Body in Ancient Egypt — The Egyptian life course from conception to death and burial focusing on New Kingdom materials. Egyptian ideology pertaining to the self, in which the individual is multifaceted and whose embodiment transcended death. Their concerns with questions about being and non-being, the meaning of death, the constitution of the body, the nature of the cosmos and humanity, and the basis of human society. Recent theoretical developments in anthropology, feminist theory, and studies of the body which explore hierarchies of difference in age, sex, class, ethnicity, and sexuality. GER:DB-SocSci
5 units, Win (Meskell, L)
CASA 171. Mythology, Folklore, and Oral Literature of Central Asia — Central Asian cults, myths, and beliefs from ancient time to modernity. Life crisis rites, magic ceremonies, songs, tales, narratives, taboos associated with childbirth, marriage, folk medicine, and calendrical transitions. The nature and the place of the shaman in the region. Sources include music from the fieldwork of the instructor and the Kyrgyz epoch Manas. The cultural universe of Central Asian peoples as a symbol of their modern outlook. GER:DB-SocSci 3-5 units, Spr (Kunanbaeva, A)

CASA 180. Ethnography of Africa — The politics of producing knowledge and about Africa through the genre of ethnography, from the colonial era to the present. The politics of writing and the ethics of social imagination. Sources include novels juxtaposed to ethnographies. GER: DB-SocSci 5 units, Spr (Malkki, L)

TOPIC COURSES

CASA 114. The Crusades and Their Legacies — Interdisciplinary. How Pope Urban II helped inaugurate and define an East/West dichotomy which still echoes discursively and literally today. The production of the divisions between East and West in the Crusade era, as seen by Europeans and Middle Easterners; the legacies of such divisions in the present. 5 units, not given this year

CASA 115. Race and the American City — How contemporary American notions of race and urban life intersect with and define one another. Contesting notions of identity, citizenship, inequality, multiculturalism, and difference. Readings in anthropology, sociology, social geography, and theory. Sites include Chicago, Los Angeles, and San Francisco. 5 units, Spr (Roque, A)

CASA 132. Science, Technology, and Gender — Why is engineering often seen as a masculine profession? What have women’s experiences been in entering fields of science and technology? How has gender been defined by scientists? Issues: the struggles of women in science to negotiate misogyny and cultural expectation (marriage, children), reproductive issues (surrogate motherhood, visual representations of the fetus, fetal surgery, breast feeding, childbirth practices), how the household became a site of consumerism and technology, and the cultural issues at stake as women join the ranks of scientists. GER:DB-SocSci, EC-Gender 3-5 units, Spr (Jain, S)

CASA 133. City and Sounds — How do people experience modern cities and urban public cultures through auditory channels? How does sound mediate and constitute urban space? How to listen to and write about culture through sound. Students carry out narrative interviews and sound fieldwork in the Bay Area. Readings include urban anthropology, semiotics, art history, social studies of science and technology, media studies, and musicology. 5 units, Spr (Inoue, M)

CASA 135X. Pilgrimage and Sacred Landscapes — (Same as RELIGST 235.) Perspectives include cultural, spiritual, psychological, medical, economic, and political. Christianity, Buddhism, Hinduism, Islam, Native American and secular; sources include Europe, Tibet, India, Native America, and the Middle East. Why do pilgrims often make their journeys as difficult and painful as possible? How do landscapes become sacred? What happens when places such as Jerusalem are intersections for groups with different belief systems? Contemporary U.S. destinations such as Graceland and the Vietnam Memorial; journeys of personal or non-parochial cultural significance. GER:DB-Hum 4 units, not given this year

CASA 158X. Culture and Learning — (Same as EDUC 287.) Learning in institutional settings in the U.S. and around the globe. Learning in families, in schools, on the job, and on the streets. Emphasis is on the cultural organization of success and failure in American schools. Tentative consideration of opportunities for making less inequality. 3-4 units, not given this year

CASA 172/272. Object Lessons — Human-object relations in the processes of world making. Objectification and materiality through ethnography, archaeology, material culture studies, and cultural studies. Interpretive connotations around and beyond the object, the unstable terrain of interrelationships between sociality and materiality, and the cultural constitution of objects. Sources include: works by Marx, Hegel, and Mauss; classic Pacific ethnographies of exchange, circulation, alienability, and fetishism; and material culture studies. GER:DB-SocSci 3-5 units, Aut (Meskell, L)

CASA 174. Cultures of Disease: Cancer — History, politics, science, and anthropology of cancer; political and economic issues of disease and health care in the U.S., including the ethics and economics of health care provision, the pharmaceutical industry, carcinogen production, and research priorities. 5 units, Win (Jain, S)

CASA 188. South Asian American Experiences in Cultural and Historical Perspective — Interdisciplinary. How narratives and histories about communities from the S. Asian subcontinent are constructed and situated within scholarly literature in Asian American studies. Transnational feminist perspectives on categories such as homeland and diaspora. Sources include literary texts, film, historical narrative, anthropological analyses, immigration histories, and state policy. GER:DB-SocSci 5 units, Spr (Mankekar, P)

ADVANCED UNDERGRADUATE AND GRADUATE SEMINARS

AREA SEMINARS

CASA 113/213. Women in Islam: The Central Asian Case — Roles of women in the Central Asian independent states in historical and modern perspectives. Traditional family and religious rituals, keeping an appropriate household, and women’s lore, craft, and art. Sources include instructor’s field data. GER:DB-SocSci 5 units, Win (Kunanbaeva, A)

CASA 117/217. Archaeology of the American Southwest: Contemporary Peoples, Contemporary Debates — Cultural diversity and archaeology from paleo-indians to the present. Focus is on cultural flarescences in areas such as the Mimbres Valley, Chaco Canyon, Mesa Verde, the Rio Grande, and the Hohokam in the Phoenix Basin. The development of agriculture, theories of social complexity and political economy, and the relationships between contemporary Native Americans, archaeologists, and the production of the past. GER:DB-SocSci 5 units, Aut (Wilcox, M)

CASA 118/218. Literature, Politics, and Gender in Africa — Intersections of gender, power, and desire; the politics of colonialism and Christianity; and nationalism and postcoloniality. Emphasis is on the politics of writing and critical imagination in historical and social context. Readings include novels and other texts by African writers. GER: DB-SocSci, EC-Gender 5 units, not given this year

CASA 119/219. The State in Africa — Postcolonial African states in historical and ethnographic context. Focus is on contemporary African states not as failures, but as the products of distinctive regional histories and political rationalities. GER:DB-SocSci 5 units, not given this year

CASA 137E/237E. Excavation at Catalhoyuk, Turkey — Archaeological field experience by participating in Stanford’s excavation at Catalhoyuk in Summer. Focus is on the urban character of this earliest of towns. Prepares students for the Summer dig. Prerequisite: consent of instructor. 3-5 units, Spr (Staff)

CASA 163/263. The Politics of Humanitarianism — Anthropological approaches to contemporary practices of humanitarian intervention. How social theory can inform the politics of humanitarianism, charity, and philanthropy. Focus is on Africa from the colonial era to the present. GER:DB-SocSci 5 units, not given this year

CASA 173/273. Nomads of Eurasia — The nomads of the Eurasian steppes, their lifestyles, and cultural history, including Mongolia, Kazakhstan, Kyrgyzstan, and Turkmenistan. Languages, traditional economics, art, the relationships between sedentary and nomadic peoples, and the early background and gradual Turkification and Islamization of Central Asia and Lameization of S. Siberia. Regional trade networks (the Silk Road) where nomads were the mediators in innovations, the Mongol empire and its fate, Imperial Russian expansion, and the incorporation of inner Asia into the USSR. GER:DB-SocSci 4-5 units, not given this year

CASA 178/278. Archaeology of the Middle East — The roles of memory, archives, and deep time in the periods before writing in the Middle East and Europe. Prehistoric societies and their relationships with their own pasts. These societies constructed complex histories well in advance of writing. GER:DB-SocSci 5 units, not given this year

CASA 179/279. Anthropology of the Middle East — The roles of memory, archives, and deep time in the periods before writing in the Middle East and Europe. Prehistoric societies and relationships with their own pasts. These societies constructed complex histories well in advance of writing. GER:DB-SocSci 5 units, not given this year

TOPIC SEMINARS

CASA 112/212. The Archaeology of Modern Urbanism — Case study approach. The archaeological evidence of urban life from first cities formed nearly 8,000 years ago through the archaeological remains of urban life in the San Francisco Bay Area. Focus is on the material and spatial aspects of urban cultures. Field trips to Bay Area archaeological sites and collections. GER:DB-SocSci 5 units, Aut (Voss, B)

CASA 134/234. Archaeology of Architecture — How archaeologists have approached the interpretation of architectural remains. Emphasis is on the cultural and social aspects of spatial arrangements in the past and includes ethnographic, ethnoarchaeological, and archaeological case studies. Technical and analytical strategies are integral to the interpretive process. The ways in which archaeological data are identified, analyzed, and deployed in social interpretation of structured space. GER:DB-Hum 5 units, not given this year

CASA 146/246. Masculinity: Technologies and Cultures of Gender — What is masculinity? How are masculinities invested with power and meaning in cultural contexts? How is anthropological attention to them informed by and extending inquiry across the academy in spheres such as culture studies, political theory, gender studies, history, and science and technology studies? Limited enrollment. GER:DB-SocSci 5 units, not given this year

CASA 151/251. Cultural Studies — Identity, community, and culture; their interactions and formation. GER:DB-SocSci 5 units, not given this year

CASA 152/252. Archaeology: World Cultural Heritage — Focus is on issues dealing with rights to land and the past on a global scale including conflicts and ethnic purges in the Middle East, the Balkans, Afghanistan, India, Australia, and the Americas. How should world cultural heritage be

CASA 155/255. Virtual Communities: Online Technologies and Ethnographic Practice — Theoretical and practical approaches to ethnographic projects involving online technologies. Focus is on virtual communities. The methodological implications of online ethnographic research: researcher roles, the notion of identities, human subject issues, distributed collaboration, and alternative representations. Conceptual implications such as interpreting online technologies as virtual environments for human interaction versus a cultural artifact, and the nature of the Internet as setting and technology for ethnography. GER:DB-SocSci 5 units, Aut (Engel, C)

CASA 157/257. Fundamentalism and Modernity — Why is fundamentalism becoming more popular around the world? Is fundamentalism a reaction against or an integral aspect of modernity? GER:DB-SocSci 3-5 units, not given this year

CASA 161/261. Modern Material Culture — How social experience is impacted by material culture from toys to theme parks. How consumers perceive themselves and others through commodities. The historical development of the relationship between goods and identity from the 18th century; how systems of inequality are reproduced and subverted through material consumption. How archaeological techniques can probe the technological, social, and ideological meaning of everyday minutiae. GER:DB-Hum 5 units, not given this year

CASA 185/285. Environmental Ethics — Crosscultural perspective. Application of environmental ethics to contentious or incommensurable beliefs or values. GER:DB-SocSci 3-5 units, Win (Gupta, A)

CASA 201X. Readings in Science, Technology, and Society — Focus is on anthropological approaches and contributions to the field. 5 units, not given this year

GRADUATE SEMINARS

Courses in this section numbered 300 through 380, except 302, satisfy the department’s evaluation course requirement.

CASA 300. Reading Theory Through Ethnography — Required of and restricted to first-year CASA Ph.D. students. Focus is on contemporary ethnography and related cultural and social theories generated by texts. Topics include agency, resistance, and identity formation, and discourse analysis. 5 units, Win (Gupta, A)

CASA 301. History of Anthropological Theory — Required of CASA Ph.D. students. The history of cultural and social anthropology in relation to historical and national contexts and key theoretical and methodological issues as these inform contemporary theory and practices of the discipline. Enrollment limited to 15. Prerequisite: consent of instructor. 5 units, Aut (Ferguson, J)

CASA 302. Anthropological Research Methods — Required of CASA Ph.D. students; open to all graduate students. Research methods and modes of evidence building in ethnographic research. Enrollment limited to 10. 5 units, Spr (Ebron, P)

CASA 310. Intersections — Themes of materiality and visuality, aesthetic and other forms of cultural production, and the meanings of creativity and convention. Ethnographic and archaeological material and case studies from worldwide cultural contexts. Prerequisite: consent of instructor. 5 units, Win (Malkki, L; Meskell, L)
CASA 313. Anthropology of Neoliberalism — How is the recent worldwide restructuring under the name neoliberalism understood as a social, cultural, and economic phenomenon? Focus is on interrogation of analytic categories, and ethnographic explorations of social and political processes.  
5 units, not given this year

CASA 322. From Biopolitics to Necropolitics and Beyond — Scholarship produced and informed by Michel Foucault. Focus is on the final period of Foucault’s life; how his discussions of biopolitics, subjectification, governmentality, and death have served as touchstones for recent empirical research. Key interventions initially made under these rubrics; how anthropologists and others have applied, challenged, and extended them.  
5 units, Win (Kohrman, M)

CASA 325. Ethics and Anthropology: Contemporary Debates — Anthropology as multidisciplinary: archaeological, biological, linguistic, and sociocultural. The historical development of ethics within anthropology and changes in epistemological frameworks. Topics include: theories of race and gender; human genomics and the new raciology of DNA; development and poverty; cultural evolution and the primitive; and rational choice theory and economic modeling. How these controversial topics are dealt with in the profession and how this information is disseminated in the public sphere. Case studies.  
5 units, Win (Wilcox, M)

CASA 326. Continental Philosophy and the Human Sciences: The Self and the Oppressive Other — (Same as FRENGEN 326.) Research seminar. Students work on papers for other classes, theses, and individual projects. Approaches to the self and the other; how to draw on and combine approaches for analyzing students’ own research materials. Students choose an epistemology and integrate approaches according to intellectual goals and field of study.  
5 units, Spr (Domanska, E)

CASA 327. Language and Political Economy — Theories of language: Saussure, Jakobson, Hymes, Marx, Foucault, Butler, and Derrida. The theorization of language in its linkages to power, social relations, and history. Prerequisites: Linguistics or Anthropology course work.  
5 units, Win (Inoue, M)

CASA 329. Image, Art, Power — The social imagination of beauty and ugliness, the good and the bad, the moral and the immoral, art and not-art; how people have engaged with art and the image in different parts of the world. Sources include anthropology, art history, and philosophy.  
5 units, Aut (Malikki, L)

CASA 331. The Anthropology of Technology — Iconic discipline-building works of the last three decades; readings that lay out and intervene in contemporary debates.  
5 units, Win (Jain, S)

CASA 334B. The Modern Tradition II: Gramsci, Lacan, and Derrida as Cultural Critique — (Same as MTL 334B.) Responses, refutations, elaborations, modifications to texts in critical theory such as Gramsci, Lacan, and Derrida, and postcolonial and feminist theory. Prerequisite: consent of instructor.  
3-5 units, Win (Mankekar, P)

CASA 336. Anthropology of Rights — Ideas of rights at the center of contemporary politics around the world. An anthropological perspective on how rights are invoked, claimed, and translated into institutional policies in ethnographic cases. The limitations of liberal notions of rights and innovative forms of politics emerging within and against rights talk.  
5 units, Spr (Ferguson, J)

CASA 337. Violence — How violence has been understood, bounded, and interpreted in anthropology.  
5 units, Spr (Jain, S)

CASA 341. Food and Globalization — Globalization through the history of food and cuisine. Commodities and cuisines, the movement of plants, technologies of production, and the mechanisms of distribution.  
5 units, Spr (Gupta, A)

CASA 343. Culture as Commodity — Focus is on theories of commodification, interests in tourism, national cultures as marketable objects, and how identities are constituted through production and consumption. The formation of global style and taste.  
5 units, not given this year

CASA 346A. Sexuality Studies in Anthropology — Current research on sexuality from perspectives including paleoanthropology, archaeology, ethnography, and linguistic anthropology. Readings paired with case studies that explore theoretical and methodological issues.  
5 units, not given this year

CASA 349. Anthropology of Capitalism — Issues in cultural theory and methodology through research on people who have greater material and cultural resources than those usually studied by anthropologists. How ideas about ideology, hegemony, identity, power, and practice are altered in studying those considered to be agents of power rather than the subaltern. Topics: global capitalism, masculinity, white racial subjectivity. Enrollment limited to 20.  
4-5 units, not given this year

CASA 350. Nationalism and Gender — The co-implication of discourses of nationalism and gender, focusing on nationalist movements and ideologies in newly-independent countries and Third World contexts. Themes: discourses and practices of nationalism with institutions such as the state, mass media, and the family; masculinity, femininity, and militarization; and questions of representation, historiography, location, and strategy.  
5 units, not given this year

CASA 352. Foucault: The Question of Method — Foucault as methodological exemplar for historical and social research. Emphasis on his historical studies of clinical medicine, prisons, and sexuality, and on applying his methods to empirical studies of topics such as colonialism, race, and liberal governmental rationality.  
5 units, not given this year

CASA 355. Cities in Global Perspective — Interdisciplinary approach to examining global cities. The concept of the global city, and the interdependent processes that help produce urban spaces. Situating the transformation of urban spaces within globalization and its differential effects; current explanatory frameworks that pay attention to multiple scales of spatial and economic articulation. Prerequisite: graduate standing.  
5 units, Aut (Ebron, P)

CASA 360. Archaeological Methods and Research Design — Methodological aspects of field and laboratory practice from traditional archaeological methods to the latest interdisciplinary analytical techniques. The nature of archaeological data and inference; interpretive potential of these techniques.  
5 units, Spr (Hodder, I)

CASA 362. Topics in Political Economy — Emphasis is on Marxist approaches. Topics: the development and articulation of capitalism, imperialism, colonialism, dependency, and world systems; 20th-century capitalism, post-Fordism, and postmodernism; the political economy of race, gender, and ethnicity; class relations and productive inequalities in the Third World; the discourse of development; and the cultural mediation of political economic transformation. The ethnographic material that employs these theories used to examine sociohistorical contexts.  
5 units, not given this year

5 units, not given this year

CASA 367. Advanced Topics: Medical Anthropology — Ad hoc reading group. May be repeated for credit. Prerequisite: consent of instructor.  
2 units, not given this year
CASA 372. Materiality — The relationships between people and things. The world of objects plays a major role in materialism and the anthropology of material culture. Approaches that break down subject-object opposition. New social and psychological approaches that explore the mutual constitution of people and things, and object and subject. Approaches in which objects are seen to have agency, and people are seen as entangled in object worlds. Authors include Hegel, Marx, Benjamin, Miller, Gell, and Latour.  
5 units, not given this year

CASA 373. Introduction to Archaeological Theory — The history of archaeological thought emphasizing recent debates. Evolutionary theories, behavioral archaeology, processual and cognitive archaeology, and approaches termed feminist and post-processual archaeology in the context of wider debate in adjacent disciplines. The application and integration of theory on archaeological problems and issues.  
5 units, Win (Hodder, I)

CASA 375. Archaeology and Globalism — The emergence of archaeology as a discipline in the context of the rise of the nation state. Global economies and other issues have created a new context for archaeology. How are archaeology and heritage responding? The idea of world heritage. The impact of postcolonialism. The commodification of the past: the past as theme park, as travel tourism or nostalgia, as exotic and other. Conflict between uses of the past for identity and as theme park; between heritage and resource or play. The impact of the Goddess, New Age, and other movements. Archaeology and human rights issues including forensic archaeology.  
4-5 units, not given this year

CASA 391A,B. Qualifying Project — Required of second- and third-year Ph.D. students writing the qualifying paper or the qualifying written examination.  
2-5 units, A: Topic, B: Area, Aut, Win, Spr (Staff)

CASA 392. Dissertation Writers Seminar — Required of fifth-year Ph.D. students returning from dissertation field research and in the process of writing dissertations and preparing for professional employment.  
1-3 units, Aut, Win, Spr (Voss, B)

CASA 393. Internship — Prerequisite: consent of instructor.  
1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 394. Proposal Writing Seminar — Required of second-year Ph.D. students in Cultural and Social Anthropology. The conceptualization of dissertation research problems, the theories behind them, and the methods for exploring them. Participants draft a research prospectus suitable for a dissertation proposal and research grant applications. Limited enrollment. Prerequisite: 212 or consent of instructor.  
5 units, Spr (Inoue, M)

CASA 395. Introduction to Cultural and Social Anthropology: Faculty Research — Required of first-year CASA Ph.D.. May be repeated for a total of 5 units of credit over three quarters.  
1-2 units, Aut, Win, Spr (Staff)

CASA 396. Research Apprenticeship — Supervised work on a research project with an individual faculty member.  
1-15 units, Aut, Win, Spr (Staff)

CASA 397. Directed Individual Study — Supervised work for a qualifying paper, examination, or project with an individual faculty member.  
1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 397A. Directed Individual Tutorial — Supervised study with an individual faculty member.  
1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 397B. Directed Individual Field Research — Supervised work for CASA Ph.D. students conducting pre-dissertation or dissertation field research with an individual faculty member.  
1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 398. Teaching Apprenticeship — Supervised work for a teaching mentor participating in an undergraduate course; not the same as teaching assistantship.  
1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 399. Master’s Research Thesis — Supervised work for terminal and coterminal master’s students writing the master’s project in the final quarter of the degree program.  
1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 444. Cultural and Social Anthropology Colloquium — Required of CASA graduate students.  
1 unit, Aut, Win, Spr (Staff)

CASA 445. Cultural and Social Anthropological Symposium — Current topics and trends in cultural and social anthropology, cultural archaeology, and archaeology.  
1 unit, Aut, Win, Spr (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

AMSTUD 183. Border Crossings and American Identities  
5 units, Aut (Duffey, C)

CSRE 145A. Caribbean Women’s Literature  
5 units, Win (Duffey, C)

DANCE 168. Dance and Culture in Latin America  
4 units, Spr (Cashion, S)

FEMST 120. Introduction to Queer Studies  
4-5 units, Win (Rivers, D)

FRENGEN 256E. Political Anthropology from Rousseau to Freud  
3-5 units, Spr (Dapuy, J)

HISTORY 277F/377F. Marranos, Conversos, and Crypto-Jews in Latin America, 16th-20th Centuries  
5 units, Win (Staff)

LINGUIST 156. Language and Gender  
4 units, Win (Eckert, P)

RELIGST 207. Gender in Islamic Scripture  
4 units, Spr (McLarney, E)

OVERSEAS STUDIES

Courses approved for the Cultural and Social Anthropology major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

FLORENCE

CASA 101. Investigating Culture: An Introduction to Cultural Anthropology  
5 units, Win (Yanagisako, S)

KYOTO

CASA 149. An Enduring Kyoto — (Same as ANTHSCI 125X.)  
2 units, Aut (Befu, H)
DRAMA

Emeriti: (Professors) Wendell Cole, Helen W. Schrader, Carl Weber; (Associate Professor) William S. Eddelman; (Senior Lecturer) Patricia Ryan

Chair: Harry J. Elam, Jr.

Drama Division

Professors: Jean-Marie Apostolidès (French and Italian, Drama), Harry J. Elam, Jr., Peggy Phelan (Drama, English), Alice Rayner, Rush Rehm (Drama, Classics)

Assistant Professors: Ehren Fordyce, Branislav Jakovljevic

Professor (Teaching): Michael F. Ramsaur

Associate Professor (Teaching): Janice Ross

Senior Lecturer: Conni Strayer

Lecturers: Maya Arad, Jeffrey Bihr, Soyica Diggs, Alison Duxbury, Erik Flatmo, Daniel Klein, Kathryn Kostopoulos, Ben Yalom

Visiting Professors: Stan Lai, Freddie Rokem

Artists in Residence: Amy Freed, Cherrie Moraga

Institute for Diversity in the Arts and Black Performing Arts Division

Division Director: Harry J. Elam, Jr.

Associate Director (IDA): Georgina Hernandez

Director (CBPA): Robert Moses

Steering Committee: Suzanne Abel (Haas Center for Public Service), Jan Barker Alexander (Black Community Service Centers), Elena Becks (Staff), Enrique Chagoya (Associate Professor, Studio Art), Regina Covington (King Papers), Alice Endamne (Black Arts Quarterly), Diane Frank (Lecturer, Dance), Vera Grant (African and African American Studies), Tony Kramer (Senior Lecturer, Dance), Barbara Martinez-Ruiz (Associate Professor, Art History), Julia Melancon (Staff), Cindy Ng (Asian American Activities Center), Janice Ross (Associate Professor, Teaching, Drama), Stephen Sano (Associate Professor, Teaching, Music), Laura Selznick (VPUE), Yvonne Yarbro-Bejarano (Professor, Chicana/o Studies), Patience Young (Cantor Arts Center)

Dance Division

Director: Tony Kramer

Senior Lecturers: Susan Cashion, Tony Kramer

Lecturers: Kristine Elliott, Hala Fauzi, Diane Frank, Aleta Hayes, Rika Onizuka, Richard Powers, Ronnie Reddick

Artist in Residence: Robert Moses

Mail Code: Drama, 94305-5010; Dance, 94305-8125

Web Site (Dance): http://www.stanford.edu/dept/dance/

Courses given in Drama have the subject code DRAMA. Courses given in Dance have the subject code DANCE. For a complete list of subject codes, see Appendix B.

DRAMA DIVISION

The Department of Drama bases its undergraduate and graduate programs on the integration of theory and performance. The faculty commit themselves to the idea that artists must be able to analyze their creative work and that scholars must approach their own specializations creatively. The department prepares students for continued work at the graduate level, either in the academy or in conservatory programs that educate artists for careers in the theater within a comprehensive liberal arts education. The Ph.D. program, which demands that its candidates work as both scholars and theater artists, prepares the students to pursue a career in university teaching and research, and to undertake further work in professional and university theaters.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The requirements for the B.A. degree in Drama are designed to integrate the critical and historical study of drama with the study and experience of performance. The major provides aesthetic and critical opportunities for students to develop special aptitudes. For example, a student may elect an emphasis in acting, directing, design, or critical theory, or may combine areas of emphasis. Examples of how students can structure course work to take advantage of such an emphasis are available from the major adviser. Students are encouraged to declare a major in their sophomore year.

The core program of Drama courses required of all majors is:

1. Performance/Literature/History: four of the following: 160, 161, 162, 163, 164, 165, 166, 167, 168, 169
2. Stage Management Project: 134 or 34 plus two of 39A, B, C, or D
3. Senior Project: Drama majors must complete an approved senior project in the area of their specialization: a minimum of 2 units in DRAMA 200 or 205.

Two years of a college-level foreign language are recommended. All majors, in addition to completing the core described above, are required to complete one of the following seven specializations:

1. Acting:
   a) DRAMA 120A, B, Fundamentals of Acting; DRAMA 121M, Movement; DRAMA 121V, Voice and Stage Speech
   b) The student must have completed at least 4 units of DRAMA 29 and acted in at least two department productions.
   c) DRAMA 28, Makeup for the Stage
   d) 2 units of studio class in Dance
   e) three additional acting classes
   f) one course in dramatic literature
   g) 5 units of approved electives in Drama or Dance
   h) one of DRAMA 39A, B, C, or D
2. Directing:
   a) DRAMA 170A, Introduction to Directing; 170B, Advanced Directing; and 171, Undergraduate Theater Workshop
   b) one course in dramatic literature
   c) DRAMA 30, Introduction to Theatrical Design
   d) DRAMA 31, Introduction to Lighting and Production
   e) one course in acting
   f) one of 39A, B, C, or D
   g) nine units of approved electives in Drama
3. Playwriting/Dramaturgy:
   a) DRAMA 177, Playwriting
   b) DRAMA 178, Intensive Playwriting
   c) DRAMA 170A, Introduction to Directing; 170B, Advanced Directing; and 171, Undergraduate Theater Workshop
   d) DRAMA 176, Undergraduate Dramaturgy Project
   e) one course in dramatic literature
   f) one course in acting
   g) one of 39A, B, C, or D
   h) four units of approved electives in Drama
4. Design:
   a) DRAMA 30, Introduction to Theatrical Design
   b) DRAMA 31, Introduction to Lighting and Production
   c) two of 131, 132, 133, or 135
   d) two units each: 39A, B, and C
   e) two of 231, 232, 233, or 235
   f) one course in acting
   g) nine units of approved electives in Drama or Art
5. Technical Production/Stage Management:
   a) DRAMA 30, Introduction to Theatrical Design
   b) DRAMA 31, Introduction to Lighting and Production
   c) one of 131, 132, 133
   d) two units each: 39A, B, and C
   e) DRAMA 34, Stage Management
   f) one course in acting
   g) DRAMA 136, Drafting or MUSIC 19
   h) DRAMA 135, Sound Design for Theater
   i) nine units of approved electives in Drama
6. Dance:
   a) DANCE 158, The Body in Motion
   b) one of: DANCE 102, Duets Project; DANCE 103, Marriage of Text and Movement; DANCE 105, Contemporary African Styles
and Dancemaking; DANCE 106, Essence of Contemporary Dance Performance; DANCE 169, Choreography, Creation, Staging, and Reconstruction

c) one additional dance theory class from DANCE 166, 168, 197, or 242, or DRAMA 160

d) DRAMA 31, Introduction to Lighting and Production

e) one of DRAMA 39A,B,C, or D

f) ten classes of studio work: at least one dance class from modern, jazz, world, ballet, social dance and improvisation plus contact, and acting; and two classes of Dance Performance: 100, 102, 103, 105, 106, 169

g) three units of approved electives in Music and Art

7. Performance Theory and Cultural Studies:

a) ENGLISH 163, Shakespeare

b) one course in acting

c) one of 39A,B,C, or D

d) three courses in dramatic literature

e) an ethnic drama class

f) six units of course work in dramatic literature, criticism, theater history, history, art history to be determined in consultation with the undergraduate adviser

SENIOR PROJECT

Work for this project normally begins in Spring Quarter of the junior year and is completed by the end of the senior year. The student must do a senior project in his or her area of specialization: Acting, Directing, Playwriting/Dramaturgy, Design, Technical Production/Stage Management, Dance, or Performance Theory and Cultural Studies. The project can be a creative or research project, or a combination of both. The student has the option of writing an essay associated with the project. Students receive credit for senior projects through DRAMA 200, Senior Project, or DRAMA 205, Senior Project: Acting.

Students pursuing senior projects should consult with both the Department of Drama undergraduate adviser and a faculty adviser in the project’s specialty area. These consultations should take place early in the junior year. Students must petition approval of senior projects through the Department of Drama undergraduate adviser. Projects are typically approved by the department faculty at the end of Spring Quarter of the junior year or the end of Autumn Quarter of the senior year.

The proposal should include an outline of the courses the student has taken and grades received in the area requirements, and should describe the courses in which the student plans to enroll as part of the project. It should describe in detail the purpose and methods involved in the project; a bibliography, if appropriate; and a one-to-two page abstract of the associated essay if an essay is part of the project.

MINORS

For students wishing to minor in Drama, the following core requirements must be met:

1. The three quarter sequence in Performance/Literature/History: three of the following: DRAMA 160, 161, 162, 163, 164, 165, 166, 167, 168, 169.

2. Stage Management Project: 134, or 34 plus two of 39A,B,C, or D.

3. A practical production class in technical theater or performance: one of 29, 39A,B,C, or D.

4. Elective courses totaling a minimum of 15 units from the specified courses in any one of the seven specializations listed above would constitute a minor concentration in: Acting, Directing, Playwriting/Dramaturgy, Design, Technical Production/Stage Management, Dance, or Performance Theory and Cultural Studies.

HONORS PROGRAMS

DRAMA

For a limited number of students, the department confers the degree of Bachelor of Arts with Departmental Honors in Drama. To be considered for departmental honors, students must meet the following requirements in addition to the other requirements of the Drama major:

1. Application involves a written submission (including transcript) establishing the student’s work-to-date in the department and outlining the area of research that the student wishes to pursue. No students are admitted to the honors program with a grade below “B-” in a course (departmental or otherwise) that constitutes part of their Drama major.

2. Students must complete the Drama core requirements by the end of their junior year, earlier if possible. Only in exceptional circumstances can this requirement be waived; transfer from another university, extended overseas study, or temporary withdrawal from the major due to illness might constitute extenuating circumstances.

3. Students also must have completed half of the courses in their specialization by the end of their junior year.

4. Students must complete 4 units in the Honors Colloquia (described below), beginning Spring Quarter of their junior year and continuing the following three regular quarters. Each quarter’s colloquium is offered for 1 unit, S/NC. In extenuating circumstances (overseas study, for example), an honors program student may substitute other equivalent work for one quarter of the colloquium, with the approval of the honors adviser.

5. GPA in courses counting towards the major must be 3.5 by the time of graduation.

6. By the end of the seventh week of the quarter in which they plan to graduate, all students in the honors program must submit an honors thesis (described below), to be read and evaluated by their thesis committee.

7. On the basis of a student’s work in the Drama core, in the area of specialization, on the senior project, in the honors colloquia, and on the honors thesis, the faculty determines and confers honors on graduating students who have successfully completed the honors program.

8. Failure to meet any of these requirements, or to make satisfactory progress on the honors thesis, leads to dismissal from the honors program.

HONORS COLLOQUIA AND THESIS

The honors colloquia aim to engage honors program students in an ongoing discussion of important issues in the field, with particular focus on the students’ areas of specialization and research. The honors program adviser convenes the colloquia three times per quarter and sets the agenda for meetings and discussion. The colloquia offer venues for honors students to discuss their work in the department (their senior projects, for example), and to present and discuss their research for their honors thesis. The honors thesis represents an extended engagement with an important issue or subject, determined by the student, the honors program adviser, and the student’s senior project adviser. It typically consists of a long essay (7,500-10,000 words) presenting the student’s research on the subject. As an honors thesis may deal with issues related to the student’s senior project, or with issues related to the student’s specialization, the honors program adviser, the senior project adviser, and another faculty member constitute the student’s honors thesis committee. They read and evaluate the thesis, and make recommendations to the faculty at large regarding its strengths and weaknesses. In the case of an honors program student whose senior project does not involve production or performance but takes written form, the requirements for the honors thesis change. In discussions with the student’s honors committee, the student develops a performance/production-based project that provides the equivalent of a written honors thesis.

HUMANITIES

An honors program in Humanities is available for Drama majors who wish to supplement their major with related and carefully guided studies. See the “Interdisciplinary Studies in Humanities” section of this bulletin for a description of the honors program. Students who enroll in this program may offer HUMNTIES 160 and two seminars from 190-198 in fulfillment of the departmental elective requirement.
GRADUATE PROGRAMS
DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of the bulletin.

All graduate study in the Department of Drama leads to the Ph.D. degree. The doctoral program in Drama aims to integrate practical theater work with the critical and historical study of dramatic literature and theory. All candidates are expected to function both as scholars and as theater directors. The curriculum offers a two-year practical concentration in directing along with the study of critical and performance theory, aesthetics, history, and literature. The goal of the program is to give students a thorough knowledge of the field that leads to original and significant scholarly work grounded in practice as well as an inventive directorial practice that is based on solid scholarly analysis.

The following department requirements are in addition to the University’s basic requirements for the doctorate.

1. Units and Course Requirements—
   a) a minimum of 135 units of graduate courses and seminars in support of the degree. These units are in addition to units for the doctoral dissertation.
   b) one quarter introductory seminar: DRAMA 302, Research Methods in Drama.
   c) a coherent program of eight additional graduate seminars within the Department of Drama to be worked out with the adviser. These must include at least one seminar in each of the following fields:
      1. intersections of theory and performance (designated by suffix A in course number)
      2. theater history (designated by suffix B in course number)
      3. dramatic literature (designated by suffix C in course number)
   d) The six workshops in directing: DRAMA 370, 371, 372A, 372B, 373, 374. In the first two years, students take 370, Concepts of Directing; 371, Visual Aesthetics for the Director; 372A,B, Projects in Directing; and 373, Directing and Dramaturgy. 372A,B consists of the conceptual development, design, and production of a short play in a multi-form space. In the second year, students take 374, Graduate Directors’ Performance Project, to stage a more fully developed production chosen in consultation with the faculty.

2. Language Requirement—The candidate must demonstrate reading knowledge of one foreign language in which there is a major body of dramatic literature. The language requirement may be fulfilled in any of the following ways:
   a) achievement of a sufficiently high score (70th percentile) on the foreign language examination prepared by the Educational Testing Service (ETS). Latin and Greek are not tested by ETS.
   b) a reading examination given each quarter by the various language departments, except for Latin and Greek.
   c) pass with a grade of ‘B’ or higher a course in literature numbered 100 or higher in a foreign language department at Stanford.

3. Teaching Requirement—Four quarters of supervised teaching at half time are a required part of the Ph.D. program. The requirement is normally met by teaching three courses during the fourth year and one course during the fifth year.

4. Examinations—Candidates must complete three examinations (one comprehensive and two qualifying) by the end of the first three years of study at Stanford.
   a) The comprehensive examination is taken over the first weekend in December of the first year. The exam is based on texts given to the student by the department before the beginning of the first year. Students study these texts independently. For the exam, they should be able to identify and compare plays and playwrights from the list of texts in terms of dramatic genres, styles, and periods, and to address comparatively and analytically critical issues of texts and performance.
   b) The first qualifying exam, which must be completed before advancement to candidacy at the end of the second year, consists of three 25-35-page essays written in consultation with a faculty adviser. These essays should demonstrate mastery of the field such that a student would be able to teach an introductory class in the area. Reading lists for each period should be approved by the end of the first year. Each essay should cover a different period of dramatic literature and theater history. These essays should not duplicate any written work from seminars. After approval by the adviser, the graduate studies committee reads and evaluates these essays, one in each of Autumn, Winter, and Spring quarters. For the first qualifying examination, choose from the following periods of Western drama:
      Classical
      Medieval and Renaissance
      17th, 18th, and early 19th century
      Modern: 1870-1980
      Contemporary: 1980 to the present
   c) The second qualifying examination is a departmental oral with three faculty members, at least two from the Department of Drama. This oral is based on a 40-page review of the literature for the dissertation that the student creates in conjunction with the dissertation reading committee.

5. Satisfactory Progress, Annual Review — The program and progress of each student must be evaluated by the Graduate Studies Committee at the end of each academic year. At the end of the first year, the departmental graduate studies committee evaluates the work of each student in classes, seminars, examinations, and performance. Production planning in the Spring of each year for the following season is contingent upon students making satisfactory progress. Continuation in the program depends upon the recommendation of this faculty group. At the end of the second year, the committee reviews the student’s work in consideration of advancement to candidacy. At the end of the third year, students are expected to have developed an approved dissertation prospectus. Funding is contingent upon satisfactory progress. Any student not making satisfactory progress is subject to having funding suspended.

6. Application for Candidacy—By the end of the second year of residence, the following requirements or appropriate equivalents must be completed:
   a) DRAMA 302, Research Methods in Drama; and five seminars
   b) The directing workshop series (DRAMA 370-374), including the successful production of at least one work in public performance
   c) A foreign language
   d) At least two examinations
      Based on its evaluation of the student’s progress, the graduate studies committee certifies the student’s qualifications for candidacy. Upon favorable action, the student files a formal application for candidacy, as prescribed by the University, by the end of Summer Quarter of the second year.

7. Research Assistantship—Generally, the third year is devoted to graduate study and research assistantships with faculty members.

8. Dissertation Prospectus—The dissertation prospectus must be approved by the candidate’s adviser and by the departmental graduate studies committee by the end of Spring Quarter of the third year.

9. University Oral Examination—The University oral examination, to be taken during the fourth year, covers the area of the dissertation. The examining committee consists of four faculty members, at least two of whom must be from the Department of Drama, as well as one faculty chair from outside the department who does not share an appointment with the department of any of the examiners.

10. Dissertation—Normally, the Ph.D. program is completed in five years. The first two years should be devoted to full-time graduate study, and the third, fourth, and fifth years to research, teaching, and writing the dissertation. Following formal admission to candidacy (typically at the end of the second year), the dissertation must be completed and approved within five years from the quarter in which candidacy is granted. A candidate taking more than five years is required to restate candidacy by repassing the written examinations on dramatic literature.
APPLICATION AND FELLOWSHIPS

Applicants for the Ph.D. program may write directly to the Department of Drama for information. Online graduate applications are available at http://gradadmissions.stanford.edu/. In addition to the required statement of purpose, all applicants must submit a statement detailing their practical theater experience, a sample of their written critical work, and a statement on directing. An invitation to interview may be extended by the end of January. Graduate students in the Department of Drama begin study in the Autumn Quarter of each academic year; there are no mid-year admissions. All graduate students must be degree candidates. All admissions materials must be submitted to the Department of Drama, Memorial Auditorium 144, 551 Serra Mall, Stanford, CA 94305-5010 by December 12.

The Department of Drama awards a number of fellowships to students in the Ph.D. program.

For more information, write to the address above, telephone (650) 723-2576, fax (650) 723-0843, email radavies@stanford.edu, or see http://www.stanford.edu/dept/drama/ to download the latest information in .pdf format.

JOINT PH.D. IN DRAMA AND HUMANITIES

The Department of Drama participates in the Graduate Program in Humanities (GPH) leading to a joint Ph.D. degree in Drama and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

INSTITUTE FOR DIVERSITY IN THE ARTS AND BLACK PERFORMING ARTS DIVISION

The Institute for Diversity in the Arts (IDA) is an interdisciplinary program in the humanities that involves students in the study of culture, identity and diversity through artistic expression.

The Committee on Black Performing Arts (CBPA) and the Institute for Diversity in the Arts (IDA) merged in Autumn 2005. The mission of IDA/CBPA is to engage artists, students, and the local community collaboratively to create performance and visual art that examines the intersections among race, diversity, and social action through programming that includes artist residencies, classes, workshops, public performances, a lecture series, symposia, and a literary journal, the Black Arts Quarterly. The division produces annual student productions, and is a resource for student organizations promoting artistic expression through the exploration of the impact of ethnic representation in the arts, literature, media, and pop culture.

The programs prepare students for work in areas including the arts and community development. Students have gone on to graduate-level critical studies, M.F.A. programs, public service, arts administration, and teaching.

Students can pursue an IDA concentration through the Comparative Studies in Race and Ethnicity major. Students can emphasize Black performance through the African and African American Studies major.

DANCE DIVISION

The Dance Division aims to develop trained bodies, inquiring minds, and aesthetic imaginations through movement as well as dance scholarship. The program emphasizes informed and active engagement in dance by stimulating a range of intelligences that honor somatic wisdom.

Since its inception in 1920, dance at Stanford University has positioned itself responsively to the changing needs of the University and society. It offers a range of studio and lecture courses aimed at enhancing the understanding of dance as a way to create and communicate knowledge and meaning. The program encourages students to make connections between dance, other disciplines, culture, and society.

UNDERGRADUATE PROGRAMS

Students who wish to major in Drama with a specialization in Dance, or minor in Dance, should see the undergraduate adviser, Susan Cashion, in the Dance Division.

MINORS

For students wishing to minor in Dance, the following core requirements must be met and a program of study arranged in consultation with the minor adviser in Dance.

1. Studio Classes — A minimum of eight classes. There must be a concentration of at least three classes chosen from a particular dance form such as world, modern, jazz, ballet, or social, and the attainment of intermediate or advanced level; at least two classes in a style other than the concentration; and three additional classes. The studio dance classes are from series in: modern dance (DANCE 40, 45, 140, 141); world dance (DANCE 42, 43, 55); jazz (DANCE 44, 58, 59, 144, 145); social dance (DANCE 46, 146, 147, 156, 166); ballet (DANCE 48, 148, 149); and acting (any class).

2. Theory Courses — A minimum of three of the following: DANCE 158, The Body in Motion; DRAMA 160, Performance and Movement; DANCE 168, Dance and Culture in Latin America; DANCE 191, Independent Research; DANCE 197A,B, Dance in Prisons; DRAMA 184Q, The Dancing Couple as a Lens on American Culture, 1890-1950

3. Performance Practice — DRAMA 39D, Stage Management Project; and one of the following: DANCE 100, Student Choreography: Studio to Stage; DANCE 102, Duets Project; DANCE 103, Marriage of Text and Movement; DANCE 105, Contemporary African Styles and Dance-making; DANCE 106, Essence of Contemporary Dance Performance; DANCE 169, Choreography: Creation, Staging, and Reconstruction

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Drama department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Drama are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 25A,B. Art and Ideas: Performance and Practice — Issues in aesthetics and performance through examples from the classical age to the present. Concepts of art and practice intersecting with topics such as imitation, instruction through pleasure, the creative process, perception, social analysis, and embodiment as a form of knowledge. Texts and performances from drama, dance, music, visual arts, and performance art practices that reflect aesthetic ideas.

IHUM 25A: 5 units, Win (Ross, J)
IHUM 25B: 5 units, Spr (Rayner, A)

DRAMA DIVISION

Registration for most drama classes takes place at the first class meeting; further registration information is printed in the Time Schedule each quarter. Some class sizes are limited and require advanced registration in the Department of Drama, Room 144, Memorial Auditorium.

INTRODUCTORY

DRAMA 1. Production Processes — All aspects of production in conjunction with the shows of the Stanford Summer Theater.
1-5 units, Sum (Rehm, R)

DRAMA 12N. Antigone: From Ancient Democracy to Contemporary Dissent — (Same as CLASSGEN 6N.) Stanford Introductory Seminar. Preference to freshmen. Tensions inherent in the democracy of ancient Athens; how the character of Antigone emerges in later drama, film, and political thought as a figure of resistance against illegitimate authority; and her relevance to contemporary struggles for women’s and workers’ rights and national liberation. Readings and screenings include versions

350 | Stanford Bulletin, 2006-07
DRAMA 103. Improvising — The improvisational theater techniques that teach spontaneity, cooperation, team building, and rapid problem solving, emphasizing common sense, attention to reality, and helping your partner. Based on TheatreSports by Keith Johnstone. Readings, papers, and attendance at performances of improvisational theater. Limited enrollment.

1-3 units, Aut (Klein, D)

DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts — Students work with a visiting artist on art projects concerning diversity, culture, and race. Workshop. Service learning within a community population to probe diversity and social change through the arts. GER:DB-Hum

5 units, Win (Elam, H)

DRAMA 120A,B. Acting: The Fundamentals — For students who intend to begin serious actor training. First quarter: the basic vocabulary of objective and action. Theater games and improvisation develop the ability to act

4 units, Win (Ramsaur, M)

DRAMA 35. Introduction to Sound for the Theater — Lecture/lab. The practical handling of shop equipment used in theatrical production. Prerequisite: 36A or consent of instructor.

1-2 units, Aut (Duxbury, A)

DRAMA 36A. Introduction to Woodworking — Techniques for building furniture and theatrical projects.

1-2 units, not given this year

DRAMA 36B. Scene Shop Techniques — Lecture/lab. Practical handling of shop equipment used in theatrical production.

1-2 units, Aut (Duxbury, A)

DRAMA 39A, B, C, D. Theater Performance: Crew — Participation in the design and technical areas of department productions. Students commit to a specific show and receive credit for preparation and construction as a member of a running crew in a specific area.

1-3 units, Aut, Win, Spr (Staff)

DRAMA 39A. Theater Performance: Scenery and/or Property

1-3 units, Aut, Win, Spr (Staff)

DRAMA 39B. Theater Performance: Lighting/Sound

1-3 units, Aut, Win, Spr (Staff)

DRAMA 39C. Theater Performance: Costumes/Makeup

1-3 units, Aut, Win, Spr (Staff)

DRAMA 39D. Theater Performance: Prosser Stage Management

1-3 units, Aut, Win (Duxbury, A)

DRAMA 42. Costume Construction — Lecture/lab.

2-3 units, Win (Strayer, C)

DRAMA 77. Playwriting Workshop — Individual or small group work in play development extending from earlier classes. May be repeated for credit.

2-4 units, Aut (Freed, A)

INTERMEDIATE

Primarily for the major, but open to all undergraduates who have the necessary prerequisites.

DRAMA 103. Improvising — The improvisational theater techniques that teach spontaneity, cooperation, team building, and rapid problem solving, emphasizing common sense, attention to reality, and helping your partner. Based on TheatreSports by Keith Johnstone. Readings, papers, and attendance at performances of improvisational theater. Limited enrollment.

3 units, Aut, Win (Klein, D)

DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts — Students work with a visiting artist on art projects concerning diversity, culture, and race. Workshop. Service learning within a community population to probe diversity and social change through the arts. GER:DB-Hum

5 units, Win (Elam, H)
with focus, intention, and energy. Basics of characterization and transformation. Second quarter: the actor’s spontaneity and imagination are used to reveal the life of a play, working with dramatic texts. Approaches to the actor’s craft include character biography and moment-to-moment truthful playing. Experiences including from Strasberg, Meisner, Chaikin, and Linklater. Scene and monologue work from primarily naturalistic plays. Outside rehearsal time required. Must be taken in sequence. Prerequisite: 120A or consent of instructor.

A: 3 units, Aut (Kostopoulos, K), Win (Bihr, J)
B: 3 units, Spr (Kostopoulos, K)

**DRAMA 121C. Acting: The Craft of Comedy** —The basics of comedy playing, from its origins in the utterly truthful to its destination in the over-the-top. Characterization, mask, and exaggeration; class work on non-verbal scenes. The mechanics of comedy, timing, and clowning developed through improvisation and in-class exercises designed to free the imagination. Texts may include scenes from Georges Feydeau, Woody Allen, Moss Hart, and Alan Ayckbourn.

3 units, alternate years, not given this year (Freed, A)

**DRAMA 121M. Movement for Actors** —Kinesthetic awareness and physical presence of the performer in relationship to others through techniques of focus, spatial intent, task, and choreographic improvisation.

3 units, alternate years, not given this year

**DRAMA 121V. Voice and Speech for the Stage** —Goal is to strengthen, support, and vary the voice through breath, resonance, articulation, and projection. Speech work includes phonetics, text analysis, and verbal action as it relates to dramatic material.

2 units, alternate years, not given this year

**DRAMA 121W. Actors Who Write, Writers Who Act** —The development of dramatic scripts for solo performance and multi-character plays. Work happens on its feet, with writing deadlines and an informal workshop environment in which students present scripts, with support and feedback in dramaturgy, and help with performance and staging issues.

3 units, not given this year (Freed, A)

**DRAMA 121Y. Physical Approaches to Acting** —Techniques in contemporary theater emphasizing physical acting styles to make performances more compelling. Techniques and styles including viewpoints, Suzuki, buffoonery, methods of physical improvisation, and focused writing exercises. Innovation and ensemble collaboration in the creation process.

3 units, Spr (Yalom, B)

**DRAMA 125. Acting Shakespeare** —Formal training in skills needed to perform Shakespeare.

3 units, Aut (Kostopoulos, K)

**DRAMA 128. Being a Performer, Creating a Performance** —For directors, dance makers, actors, and dancers. Process-oriented composition lab. The place of movement in the world; how it operates in the theater. How dance and movement translate into art forms such as music and visual arts. Short, individual-student, movement-based performance at end of quarter.

2 units, Aut (Hayes, A)

**DRAMA 131. Lighting Design** —Lecture/lab. Practical and aesthetic aspects of lighting: electricity, light sources, color instrumentation, control, drafting, plotting, and the aesthetic principles of lighting design, interpretation, and concept. Prerequisites: 30, 31, or consent of instructor.

4 units, not given this year (Ramsaur, M)

**DRAMA 132. Costume Design** —A visual analysis of the historical styles of costume design, interpreted for the modern theater and developed by the student in various presentational media. Prerequisite: 30 or consent of instructor.

4 units, Spr (Strayer, C)

**DRAMA 133. Stage Scenery Design** —Creations of increasing complexity involve text analysis, historical and artistic style, visual research, spatial organization, drafting, sketching, model building, and director-designer collaboration. Prerequisite: 30, or consent of instructor.

4 units, Win (Flantino, E)

**DRAMA 133C. CAD for Designers** —Fundamentals of computer-aided design software. 2- and 3-dimensional drawing conventions; the use of line weight, color, composition, and graphic style. Creation of construction documents for real-world applications. Students create their own symbol library.

3 units, alternate years, not given this year

**DRAMA 133F. Design, Space, and Documentation** —Art installation, theater, dance, film, and music video projects through studio techniques including drafting and model making. Emphasis is on design projects in unconventional spaces.

2-3 units, not given this year

**DRAMA 133P. Scenic Painting** —Techniques of painting for the stage.

2-3 units, Spr (Flantino, E)

**DRAMA 134. Stage Management Project** —For students stage managing a Department of Drama production.

2-9 units, Aut, Win, Spr, Sum (Staff)

**DRAMA 135. Sound Design** —All aspects of sound for the theater from equipment, acoustics, and editing to the creation of theatrical sound effects, live and recorded.

4 units, Win (Duxbury, A)

**DRAMA 140. Projects in Theatrical Production** —(Graduate students register for 240.) Assistant directing; stage, costume, lighting, and sound design; technical production, stage managing, or other work in connection with Department of Drama productions. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

**DRAMA 150. Chekhov and Before** —(Graduate students register for 250.) Chekhov’s dramatic masterpieces in light of his Russian predecessors. Authors include Griboyedov, Gogol, Turgenev, and Ostrovsky; Chekhov’s early plays and vaudevilles.

4 units, not given this year (Arad, M)

**DRAMA 151. Adaptation: Turning into Drama** —(Graduate students register for 251.) Adaptation in theater: from script to production, from book to stage and screen, from one period and culture to another. The adaptations that a single author, Chekhov, has undergone: different productions of his plays and different dramatizations of his prose.

4 units, not given this year (Arad, M)

**DRAMA 155D. Performances of Race, Race-ing Performance** —(Graduate students register for 255D.) Representation and performance of race in plays and films. Can race be performed, and under what circumstances? What actions, gestures, or movements signify race? How does language contribute to the performance of race? What histories allow performances to be read as racial? How does appearance inform understanding of a performance? GER:DB-Hum

5 units, Spr (Diggs, S)

**DRAMA 156F. Female Performers** —(Graduate students register for 256F.) The portrayal of women performers in modern drama and cinema, including nai ve youths, cynical ladies past their prime, divas who serve the arts, and women of dubious calling. Issues include gender, race, and class, and their relation to performance. GER:DB-Hum

4 units, Win (Arad, M)

**DRAMA 156M. Israeli Film and Theater, 1948-2006** —(Graduate students register for 256M.) The representation of dramatic conflict and identity in a society that lives through daily political strife and struggles to define its identity. Themes include the performance of gender in a militarized society, tensions between religion and secularity, and issues of multiculturalism. GER:DB-Hum

5 units, Aut (Arad, M)

**DRAMA 157H. Urban Rituals: Anna Halprin’s 1960s Participatory Dance Theater** —(Graduate students register for 257H.) The reconstruction and restaging of Halprin’s Ten Myths, an influential work of audience participation theater from the early 60s, with Anna Halprin in residence. 4-5 units, Aut (Ross, J)
DRAMA 158D. Comedy on the Western Stage—(Graduate students register for 258D.) Emphasis is on comedy of social protest, performance structure, and the role of the comic body. Humor theory. Works from: Greek and Roman antiquity; medieval, Renaissance, and 20th-century France; Elizabethan and 19th-century England; and 18th- and 20th-century Italy.
5 units, Aut (Dauge, M)

DRAMA 160. Performance, Dance History, and Gender—(Graduate students register for 260; same as DANCE 160.) Shifting gender identities in western theatrical dance from the mid-18th to mid-20th centuries. The birth and development of theatrical dance. Changing notions of gender construction and the body in performance. GER:DB-Hum, EC-Gender, WIM
4 units, Win (Ross, J)

DRAMA 161. Performance and Politics—(Graduate students register for 261; same as CLASSGEN 161.) Ancient Greek tragedy which developed simultaneously with democracy. The theater of Bertolt Brecht, Friedrich Duerrenmatt, Peter Weiss, Howard Barker, Naomi Wallace, Anna Deavere Smith, and Tony Kushner. Films by Tomás Gutiérrez Alea, Lina Wertmüller, Mike Nichols, Barbara Kopple, John Sayles, and Michael Moore. The politics of popular music. GER:DB-Hum, WIM
5 units, Aut (Rehm, R)

DRAMA 161R. Texts in History: Classics from Greece to Rome—(Same as CLASGEN 163, HUMNTIES 161.) Priority to students in the Humanities honors program. Ancient texts situated in their intellectual and cultural contexts. Readings include Homer’s Iliad and Odyssey, plays of Aeschylus, Sophocles’ Antigone, Euripides’ Medea, Thucydidies Peloponnesian War, Plato’s Symposium, Aristotle’s Poetics, Virgil’s Aeneid, Seneca’s Trojan Women and Agamennon, and Augustine’s On Christian Doctrine. GER:DB-Hum
5 units, Aut (Rehm, R)

DRAMA 162. Performance and the Text—(Graduate students register for 262.) Formal elements in Greek, Elizabethan, Noh, Restoration, romantic, realistic, and contemporary world drama; how they intersect with the history of performance styles, character, and notions of action. Emphasis is on how performance and media intervene to reproduce, historicize, or criticize the history of drama. GER:DB-Hum, WIM
5 units, alternate years, not given this year (Rayner, A)

DRAMA 163. Performance and America—(Graduate students register for 263.) Dramas by women, men, Asian Americans, Latino Americans, and African Americans are examined with regard to the role of dramatic performance within contemporary American society, and as an affective and effective arena for inducing social change. GER:DB-Hum, EC-AmerCul, WIM
5 units, not given this year (Elam, H)

DRAMA 164. Performance and Gender—(Graduate students register for 264.) The intersectionality of race, sex, gender, and class in the formation of gendered performance. Readings from the work of Judith Butler, Eve Sedgwick, David Savran, Judith Halberstam, and David Eng. Case studies include: M. Butterfly, The Crying Game, Paris is Burning, Angels in America, and American Idol. GER:DB-Hum, WIM
5 units, not given this year (Phelan, P)

DRAMA 165. Theater History: Classical to 1900—(Graduate students register for 265.) A dramaturgical, historical, and design approach to the study of drama, theater, and performance. GER:DB-Hum
4 units, not given this year

DRAMA 166. Twentieth-Century Theater History: Production Research and Design—(Graduate students register for 266.) A dramaturgical, historical, and design approach to the study of drama, theater, and performance. GER:DB-Hum
4 units, Spr (Sack, D)

DRAMA 167. Avant Garde Theater—(Graduate students register for 267.) From its origins in the early 19th century to the present. GER:DB-Hum
5 units, Win (Jakovljevic, B)

5 units, Aut (Diggé, S)

DRAMA 169. Contemporary Dramatic Voices of Color—(Graduate students register for 269.) Crossculturally contemporary African American, Asian American, Latino American, and Native American drama. Sources include articles on culture and cultural theory, ethnic theater, and dramatic criticism. The position of the plays in contemporary discourses on American culture, cultural diversity, and the politics of identity. GER:DB-Hum, WIM
5 units, Win (Elam, H)

DRAMA 170A. Introduction to Directing—Practices of stage composition, work with the actor, approaches to character, and techniques of storytelling. Prerequisite: consent of instructor.
4 units, Aut (Salata, K)

DRAMA 170B. Advanced Directing—Deconstructing and constructing. Tools for analyzing text and developing directorial concepts, and putting them into practice. Class exercises culminate in a short theater piece written and directed by the student. Prerequisite: 170A or consent of instructor.
4 units, Win (Lai, S)

DRAMA 171. Undergraduate Theater Workshop—Undergraduate directors present one act plays in workshop performances. Credit available for actors and directors. Prerequisite: 170A/170B or consent of instructor.
1-4 units, Spr (Duxbury, A; Lai, S)

DRAMA 172. Late Postmodern Experimental Theater—(Graduate students register for 272.) History and theory behind artists such as Richard Foreman, Robert Wilson, The Wooster Group, Forced Entertainment, Goat Island, and Societas Raffaello Sanzio. Assignments include critical writing, creative writing, and mise-en-scène. GER:DB-Hum
4-5 units, not given this year (Fordyce, E)

DRAMA 173. Studies in Creativity—(Graduate students register for 273.) For potential artists in all fields. Key components of creativity. Sources include classic texts by artists and scholars, Twelve Lessons in Creativity, and workshop exercises to enhance personal creativity, develop creative regimens, and work through bottlenecks. Final project.
3-5 units, not given this year (Lai, S)

DRAMA 176. Dramaturgy Project—(Graduate students register for 276.) Serve as a dramaturg on any department production. Research the production’s text source, the writing of program notes, the compilation and editing of the playbill, and possible adapting/editing of the performance text or translating text from a foreign language.
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 177. Playwriting—(Graduate students register for 277.) The autobiographical monologic and poetic possibilities in performance art explored to learn the elements of playwriting. GER:DB-Hum
5 units, Win (Moraga, C)

DRAMA 178. Intensive Playwriting—(Graduate students register for 278.) Goal is to develop new material for the stage or complete a play-in-progress. Focus is on essential elements of playwriting, emphasizing the process of revision, and culminating in public readings of highlights of plays-in-progress. Prerequisite: experience in playwriting or consent of instructor.
5 units, Spr (Moraga, C)
DRAMA 179A. Teatro America Workshop: The Theater of Native/Chicano America—(Same as SPANLIT 287.) A Chicana feminist and indigenist approach to the theory and practice of performance. Introduction to writing for the stage. Readings include plays, stories, and performance texts by Chicana/a and Native American writers. Public performance. Prerequisite: consent of instructor. GER:DB-Hum
3 units, Spr (Díaz-Sánchez, M)

DRAMA 179F. Flor y Canto: Poetry Workshop—(Same as SPANLIT 281.) Poetry reading and writing. The poet as philosopher and the poet as revolutionary. Texts: the philosophical meditations of pre-Columbian Aztec poetry known as flor y canto, and reflections on the poetry of resistance born out of the nationalist and feminist struggles of Latin America and Aztlán. Required 20-page poetry manuscript. GER:DB-Hum
3-5 units, Spr (Moraga, C)

DRAMA 180Q. Noam Chomsky: The Drama of Resistance—Stanford Introductory Seminar. Preference to sophomores. Chomsky’s ideas and work which challenge the political and economic paradigms governing the U.S. Topics include his model for linguistics; cold war U.S. involvements in S.E. Asia, the Middle East, Central and S. America, the Caribbean, and Indonesia and E. Timor; the media, terrorism, ideology, and culture; student and popular movements; and the role of resistance. GER:DB-Hum
3 units, Aut (Rehm, R)

DRAMA 184Q. The Dancing Couple as a Lens on American Culture, 1890-1950—Preference to sophomores. Race, identity, gender redefinition, and the public body through the lens of social and theatrical dancing couples. The structure of domestic partnerships as mirrored on the social dance floor and theatrical and Hollywood stage. Sources include anti-dance treatises, African American dance spaces, dance marathons of the 20s and 30s, Savoy Lindy hop, Irene and Vernon Castle, Fred Astaire and Ginger Rogers, precision dance, gay square dance, and same sex and gender switch tango. Live demonstrations.
4 units, Spr (Powers, R; Ross, J)

DRAMA 188Q. From Brecht to Müller: German Theater and Performance since World War II—Stanford Introductory Seminar. Preference to sophomores. History and aesthetics of theater in the German-speaking countries of Central Europe: the Fascist-Nationalist tradition of the Third Reich; Brecht’s influence; developments of the 60s: political stagnation of the 70s and 80s; and the end of the Cold War.
3-5 units, Aut (Weber, C)

DRAMA 189Q. Mapping and Wrapping the Body—Stanford Introductory Seminar. Preference to sophomores. The concepts behind gender boundaries and clothing systems. GER:DB-Hum
3 units, Aut (Eddelman, W)

DRAMA 190. Special Research—Individual project on the work of a playwright, period, or genre. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 191. Independent Study—Individual supervision of off-campus internship. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

ADVANCED COURSES

Courses numbered 200 through 299 are designed for advanced undergraduates and graduates.

DRAMA 200. Senior Project—See “Undergraduate Programs” for description.
2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 201A,B,C,D. Honors Colloquium—See “Undergraduate Programs” for description.
1 unit, Aut, Win, Spr, Sum (Staff)

DRAMA 202. Honors Thesis—See “Undergraduate Programs” for description. May be repeated for credit.
2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 203. Advanced Improvisation—Further development of improvisational skills.
3 units, Aut (Klein, D)

DRAMA 205. Senior Project: Acting—Collaborative work on a project culminating in a production.
2-5 units, Spr (Kostopoulos, K)

DRAMA 210A,B. Actor in Performance—Preference to Drama majors and minors and to students interested in further training in the performing arts. Taught in the professional conservatory tradition, with the creation of an acting ensemble. Skill building in acting, movement, voice, and speech. How to analyze and play the dramatic action of the text. Guest teachers from professional theater complement and expand the work of the ensemble. Limited enrollment. Prerequisite: interview with instructor.
4-5 units, A: Aut (Freed, A), B: Win (Kostopoulos, K)

DRAMA 210C. Actor in Performance: Ensemble Workshop in Today’s Theater—Actors apply themselves to performance challenges of plays from the U.S. and UK theater today: Stephen Adly Guirgis, Richard Greenberg, Philip Ridley, Kia Cothron, Diana Son, Winsome Pinnock, and emerging student playwrights. Final presentation of an adapted contemporary script chosen to suit the casting needs of the ensemble.
4-5 units, Spr (Freed, A)

DRAMA 213. Stanford Improv Ensemble—By audition only, for members of the improvisation troupe. Special project work. Prerequisite: 103.
1-2 units, Aut, Win, Spr (Klein, D)

DRAMA 231. Advanced Scene Design—Individually structured class in lighting mechanics and design through experimentation, discussions, and written reports. Prerequisite: 131 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 232. Advanced Costume Design—Individually structured tutorial for costume designers. May be repeated for credit. Prerequisite: 132 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 233. Advanced Stage Design—Fast-paced, individually structured workshop. May be repeated for credit. Prerequisite: 133 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 234. Advanced Stage Management Project—For students stage managing a Department of Drama production. Prerequisite: 134.
2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 235. Advanced Sound Design—Individually structured tutorial for sound designers. May be repeated for credit. Prerequisite: 135 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 240. Projects in Theatrical Production—(Same as 140; see 140.)
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 250. Chekhov and Before—(Same as 150; see 150.)
4 units, not given this year (Arad, M)

DRAMA 251. Adaptation: Turning into Drama—(Same as 151; see 151.)
4 units, not given this year (Arad, M)

DRAMA 255D. Performances of Race, Race-ing Performance—(Same as 155D; see 155D.)
5 units, Spr (Diggs, S)

DRAMA 256F. Female Performers—(Same as 156F; see 156F.)
4 units, Win (Arad, M)

DRAMA 256M. Israeli Film and Theater, 1948-2006—(Same as 156M; see 156M.)
5 units, Aut (Arad, M)

DRAMA 257H. Urban Rituals: Anna Halprin’s 1960s Participatory Dance Theater—(Same as 157H; see 157H.)
4-5 units, Aut (Ross, J)
DRAMA 258D. Comedy on the Western Stage — (Same as 158D; see 158D.)
5 units, Aut (Daube, M)

DRAMA 260. Performance, Dance History, and Gender — (Same as 160; see 160; same as DANCE 160.)
4 units, Win (Ross, J)

DRAMA 261. Performance and Politics — (Same as 161; see 161; same as CLASSGEN 161.)
5 units, Aut (Rehm, R)

DRAMA 262. Performance and the Text — (Same as 162; see 162.)
5 units, alternate years, not given this year (Rayner, A)

DRAMA 263. Performance and America — (Same as 163; see 163.)
5 units, not given this year (Elam, H)

DRAMA 264. Performance and Gender — (Same as 164; see 164.)
5 units, not given this year (Phelan, P)

DRAMA 265. Theater History: Classical to 1900 — (Same as 165; see 165.)
4 units, not given this year

DRAMA 266. Twentieth-Century Theater History: Production Research and Design — (Same as 166; see 166.)
4 units, Spr (Sack, D)

DRAMA 267. Avant Garde Theater — (Same as 167; see 167.)
5 units, Win (Jakovljevic, B)

DRAMA 268. African American Drama: Traditions and Revisions — (Same as 168; see 168.)
5 units, Aut (Diggs, S)

DRAMA 269. Contemporary Dramatic Voices of Color — (Same as 169; see 169.)
5 units, Win (Elam, H)

DRAMA 272. Late Postmodern Experimental Theater — (Same as 172; see 172.)
4-5 units, not given this year (Fordyce, E)

DRAMA 273. Studies in Creativity — (Same as 173; see 173.)
3-5 units, not given this year (Lai, S)

DRAMA 276. Dramaturgy Project — (Same as 176; see 176.)
2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 277. Playwriting — (Same as 177; see 177.)
5 units, Win (Moraga, C)

DRAMA 278. Intensive Playwriting — (Same as 178; see 178.)
5 units, Spr (Moraga, C)

DRAMA 290. Special Research — Individual project on the work of a playwright, period, or genre.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 299. Prospectus Writing — Workshop. How to develop a prospectus for the dissertation. May be repeated for credit.
1-3 units, Aut (Kendall, A)

GRADUATE

Open to advanced undergraduates with consent of instructor.

DRAMA 300. Theories of Drama and Performance — Seminar. Critical theory including readings from Marx, Freud, and Nietzsche.
5 units, not given this year

DRAMA 301. From Theory to Criticism — Performance theory in readings from Austin, Derrida, Butler, Schechner, Turner, Phelan, Auslander, Foster, Roach, and Diamond.
5 units, not given this year (Phelan, P)

5 units, Aut (Elam, H)

DRAMA 303A. Theory/Theater — How theater has provided the ground for epistemological concerns with questions of being, events, human action, and ethics, from classical Greek thought to postcolonialism. Theoretical work including Aristotle, Artaud, Anzaldúa, Brecht, Bhabha, DuBois, and Derrida. Theater practices including perspectival staging and postmodern performance.
3 units, Win (Rayner, A)

DRAMA 316V. Seminar: The Avant Garde — Theoretical paradigms of avant garde practices past and present.
3-5 units, Win (Jakovljevic, B)

3-5 units, Aut (Rokem, F)

DRAMA 320. Basic Approaches to Teaching Acting — Workshop. The pedagogy of acting to prepare graduate student teachers for introductory classes in acting.
1-3 units, Aut (Freed, A)

DRAMA 321. Proseminar — Skills for the academic profession including abstract, conference presentation, and dissertation or book chapter.
1-3 units, not given this year (Phelan, P)

3-5 units, Spr (Fordyce, E)

DRAMA 327. Concepts of Directing — Directorial definitions of time, space, movement, and the performer/spectator relationship. Experimentation with texts from literary and other sources, including works from the realistic tradition in drama, using a multi-form performance space.
5 units, Aut (Weber, C)

DRAMA 328. Directing and Dramaturgy — Dramaturgy, directorial methods, and visual concepts in the production of plays from the Elizabethan tradition to postmodernist texts. Work on the text is tested in the staging of scenes.
3-5 units, Aut (Weber, C)

DRAMA 329. Directing and Production — Production of a full-length play, selected in consultation with faculty. Project is designed by graduate students, sometimes in collaboration with undergraduate design students, under the supervision of design faculty. Four to five weeks rehearsal. Public performance.
3-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 330. Main Stage Production — Production of a full-length play as part of the Department of Drama season. Public performance.
3-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 336. Graduate Directors’ Dramaturgy Project — Serve as a dramaturg on any department production. Work includes research on the production’s text source, the writing of program notes, and the compilation and editing of the playbill. Possible adapting/editing of the performance text, and translating text from a foreign language.
2 units, Aut, Win, Spr, Sum (Staff)
DRAMA 377. Graduate Directors’ Staged Reading Project — Presentation of a new or newly adapted work for the stage, in a mode employed in professional theater for the development of new plays. Two to four rehearsals. Public performance.
  2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 380. Graduate Colloquium — Topics concerning theory and practice in the theater such as the relationship between the director and designer. May be repeated for credit. Autumn: directing and scene design; the design process from the director’s point of view. Winter: directing and lighting design; the creative possibilities of stage lighting. Spring: directing and the creative process; assimilation of academic, theatrical, and creative skills; creative tools for collaboration with actors, designers, and directors.
  2-3 units, Aut (Flatmo, E), Win (Ramsaur, M), Spr (Lai, S)

DRAMA 390. Tutorial
  1-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 399. Dissertation Research
  1-9 units, Aut, Win, Spr, Sum (Staff)

INSTITUTE FOR THE ARTS AND BLACK PERFORMING ARTS DIVISION

The following are core courses. See also course listings in the “Comparative Studies in Race and Ethnicity” and “African and African American Studies” sections of this bulletin.

DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts
  5 units, Win (Elam, H)

DRAMA 169/269. Contemporary Dramatic Voices of Color
  5 units, Win (Elam, H)

DANCE DIVISION

Registration for most dance classes takes place at the first class meeting; further registration information is printed in the Time Schedule each quarter. Some class sizes are limited and require advanced registration in the Dance office in Roble Gym. Series classes (I, II, III) should be taken in order or with consent of instructor.

INTRODUCTORY

Open to all students. No previous dance experience needed.

DANCE 40. Introduction to Dance and Movement: Liquid Flow — Body expression, articulation, and anatomical basics through contemporary art dance. Emphasis is on development of awareness of the body in space. Exploration of improvisation and creativity. May be repeated for credit.
  2 units, Aut, Win (Hayes, A), Spr (Kramer, A)

DANCE 42. Dances of Latin America — Dances of Argentina, Brazil, Chile, Colombia, Cuba, Mexico, Peru, and Puerto Rico. May be repeated for credit.
  2 units, Spr (Cashion, S)

DANCE 43. Afro-Peruvian Dance — Dances include festejo and zamacueca. May be repeated for credit.
  1 unit, Aut (Cashion, S)

DANCE 44. Jazz Dance I — Basic techniques emphasizing current jazz style. Historical jazz steps enhance understanding of contemporary jazz forms. May be repeated for credit.
  2 units, Aut, Win, Spr (Kramer, A)

DANCE 45. Improvisation Plus Contact — The development of improvisation skills as a creative performance practice and as a basis for choreography; techniques of contact improvisation. May be repeated for credit.
  2 units, Win, Spr (Kramer, A)

DANCE 46. Social Dances of North America I — Introduction to the partner dances found in American popular culture: waltz, swing, tango, club two step, cha cha, merengue, and salsa. Fee. May be repeated for credit. (AU)
  1 unit, Aut, Win, Spr (Powers, R)

  2 units, Aut (Elliott, K)

DANCE 55. Middle Eastern Dance — Emphasis on traditional Egyptian forms. May be repeated for credit.
  1 unit, Win (Fauzi, H)

DANCE 58. Beginning Hip Hop — Steps and styling in one of America’s 21st-century vernacular dance forms. May be repeated for credit.
  1 unit, Aut (Reddick, R)

DANCE 59. Intermediate-Advanced Hip-Hop — Steps and styling in one of America’s 21st-century vernacular dance forms. May be repeated for credit.
  1 unit, Aut (Reddick, R)

INTERMEDIATE

Open to all undergraduates with dance experience.

DANCE 140. Intermediate Modern Dance — Intermediate technique. Improvisation and composition in directed studies. May be repeated for credit.
  2 units, Aut, Win, Spr (Moses, R)

DANCE 146. Social Dances of North America II — Intermediate survey of dances in American popular culture: Lindy hop, Viennese waltz, cross-step waltz, foxtrot, and hustle. May be repeated for credit.
  2 units, Win (Powers, R)

DANCE 147. Living Traditions of Swing — Swing dancing: the early Lindy of the 20s; 6- and 8-count Lindy hop, shag, Big Apple. Partnering and improvisation. Swing’s cross-cultural influences and personal creativity. May be repeated for credit.
  2 units, Win (Powers, R)

DANCE 148. Intermediate Ballet — Continuation of 48, repeating the fundamentals with increased complexity and introducing additional movement vocabulary. May be repeated for credit.
  2 units, Aut, Win, Spr (Onizuka, R)

ADVANCED

Open to all undergraduates with dance experience.

DANCE 141. Advanced Modern Dance — Intermediate/advanced technique. Complex movement combinations emphasizing performance demands. May be repeated for credit.
  2 units, Aut, Win, Spr (Frank, D)

DANCE 149. Advanced Ballet — Professional-level class in a supportive environment. Comprehensive classical ballet technique including pointe work if the student desires. May be repeated for credit.
  2 units, Aut, Win, Spr (Elliott, K)

DANCE 156. Social Dances of North America III — Advanced survey of the partner dances found in American popular culture: hustle, waltz, redowa, tango, cha cha, salsa, samba. May be repeated for credit. Pre-requisite: 146 or equivalent experience.
  2 units, Win (Powers, R)

PERFORMANCE

DANCE 23. Public Performance — For students participating in Dance Division performances. May be repeated for credit.
  1 unit, Aut, Win, Spr (Kramer, A)
DANCE 27. Faculty Choreography — Rehearsal and performance of faculty choreography. Selection by audition. May be repeated for credit.
   2 units, Aut, Win, Spr (Kramer, A)

DANCE 57. Guest Artist — Students perform the work of a visiting artist. Audition required. May be repeated for credit.
   2 units, Aut, Win, Spr (Staff)

DANCE 100. Student Choreography: Studio to Stage — Student choreography is mentored to develop composition and performance skills. Required for participation in certain faculty- and student-directed productions. May be repeated for credit.
   2 units, Win, Spr (Frank, D; Kramer, A)

DANCE 102. Duets Project — Rehearsal experiences and techniques embedded in the reconstruction of repertory by three artists whose collective works represent differing approaches to the choreographic process. May be repeated for credit.
   2 units, Win (Frank, D)

DANCE 103. Marriage of Text and Movement — Nonclassical modes of choreographic development in relation to written and spoken text. Students create works from existing material by use of developing structures. May be repeated for credit.
   2 units, Aut (Moses, R)

   2 units, Aut (Hayes, A)

DANCE 106. Essence of Contemporary Dance Performance: African Styles on Stage — Contemporary dance technique and repertory based on African diaspora movement styles. Focus is on articulation of expression, enhancement of stage presence, and awareness of individual movement strengths. May be repeated for credit.
   2 units, Win (Hayes, A)

DANCE 111. Participatory Dance of 1960s: Restaging Anna Halprin’s Myths — Studio lecture course. Focus is on the quarter-long residency of dance and theater artist, Anna Halprin. Participants incorporate narratives from residents of local senior centers to recreate three of Halprin’s works from 1967’s 10 Myths which helped to launch the participatory theater and dance experimentation that gave rise to postmodern dance.
   2 units, Aut (Ross, J; Frank, D)

DANCE 115. Women’s Bodies at the Intersection of Science, Technology, and Art — Interdisciplinary project exploring medical images of the body and its representation in dance and technology, emphasizing video.
   2 units, Win (Frank, D)

DANCE 169. Choreography: Creation, Staging, and Reconstruction — Skills and criteria for the choreographic process. Invention, staging, and reconstruction. The creative process and practical considerations in making a dance work.
   2 units, not given this year

THEORY

DANCE 133. History of the Waltz — From Vienna in 1800. Redowa and mazurka, waltz variations, the 20th-century hesitation waltz, Parisian valse musette, and 30s Boston and waltz swing. Studio technique with performance practice for stage.
   2 units, alternate years, not given this year

DANCE 134. Ballet Folklórico — The history of Ballet Folklórico including its roots in Mexican folk and N. American modern dance, Guadalajara choreographic narratives, and U.S. performance ensembles. GER: EC-GlobalCom
   3 units, alternate years, not given this year

DANCE 158. The Body in Motion — Approaches and methods in body therapy; body maintenance and conditioning, the Laban movement system, body-mind centering. GER:DB-Hum
   3 units, alternate years, not given this year

DANCE 160. Performance, Dance History, and Gender — (Same as DRAMA 160/260.) Shifting gender identities in western theatrical dance from the mid-18th to mid-20th centuries. The birth and development of theatrical dance. Changing notions of gender construction and the body in performance. WIM for Drama. GER:DB-Hum, EC-Gender
   4 units, Win (Ross, J)

DANCE 166. History of Social Dance in Western Culture — Movement and historic social dance from the past five centuries, including studio technique and history. Performance practices for stage, including deportment, body language, and demeanor distinctive to each era. GER:DB-Hum
   2 units, Spr (Powers, R)

DANCE 168. Dance and Culture in Latin America — Dance forms of Latin America as aspects of human behavior. Emphasis is on cultural influences (European, African, and indigenous) that have shaped the ritual and social dance forms of Argentina, Brazil, Chile, Cuba, Mexico, and Puerto Rico. May be repeated for credit. GER:DB-Hum, EC-GlobalCom
   4 units, Spr (Cashion, S)

DANCE 190. Special Research — Topics related to the discipline of dance. May be repeated for credit.
   1-5 units, Aut, Win, Spr, Sum (Staff)

DANCE 191. Independent Research — Individual supervision of off-campus internship. Prerequisite: consent of instructor.
   1-18 units, Aut, Win, Spr, Sum (Staff)

DANCE 197A,B. Dance in Prisons: The Arts, Juvenile Justice, and Rehabilitation in America — Participatory seminar. The nexus of art, community, and social action, using dance to study how the performing arts affect self-construction, perception and experiences of embodiment, and social control for incarcerated teenagers in Santa Clara Juvenile Hall. GER:DB-Hum
   4 units, A: Win, B: Spr (Ross, J)

ADVANCED THEORY

Courses numbered 200 through 299 are designed for advanced undergraduates and graduate students.

DANCE 290. Special Research — Individual project on the work of any choreographer, period, genre, or dance-related topic. May be repeated for credit.
   1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

ENGLISH 163. Shakespeare
   5 units, Aut, Win (Orgel, S)

ENGLISH 344A,B. Shakespeare, Marlowe, Jonson
   5 units, A: Aut, B: Win (Orgel, S)
OVERSEAS STUDIES

Courses approved for the Drama major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

**DRAMA 101A. Contemporary Theater** — (Same as GERLIT 195.)
GER:DB-Hum
5 units, Spr (Kramer, K)

**DRAMA 158F. Live Art and Performance in Berlin**
3 units, Win (Fordyce, E)

OXFORD

**DRAMA 129F. Workshop in Shakespearean Production** — (Same as ENGLISH 84Z.)
2 units, Aut (Friedlander, L)

SANTIAGO

**DANCE 42X. Dances of Latin America**
2 units, Win (Cashion, S)

**DANCE 168. Dance and Culture in Latin America**
4 units, Win (Cashion, S)

EAST ASIAN STUDIES

Director: Chaofen Sun

Affiliated Faculty and Staff:

**Anthropological Sciences:** Melissa Brown (on leave), Arthur P. Wolf

**Art and Art History:** Jean Ma, Melinda Takeuchi, Richard Vinograd

**Asian Languages:** Fumiko Arao, Adil Atawulla, Kazuko M. Busbin, Steven Carter, Yin Chuang, Marina Chung, Richard Dasher, Silk Lee Dennig, Michelle DiBello, Albert E. Dien (emeritus), Momoe Saito Fu, Hee-sun Kim, Sonam Topgyal Lama, Indra Levy, Mark Lewis, Nina Lin, Hisayo O. Lipton, Momoyo Kubo Lowdermilk, Yoshiko Matsumoto, Kiyomi Nakamura, James Reichert, Yu-hwa Liao Rozelle, Chaofen Sun, Melinda Takeuchi, Yoshiko Tomiyama, Ban Wang (Visiting Professor), Huazhi Wang, John C. Y. Wang, Hong Zeng, Youping Zhang, Yiqun Zhou, Qi Zhu

**Business:** Hau Lee, Bruce McKern, Kenneth Singleton

**Comparative Literature:** David Palumbo-Liu

**Cultural and Social Anthropology:** Harumi Befu (emeritus), Miyako Inoue, Matthew Kohrman

**East Asian Studies:** Weifang Min, E. Anthony Zaloom

**Economics:** Masahiko Aoki (emeritus), Ronald McKinnon

**Education:** Jennifer Adams

**Electrical Engineering:** Richard Dasher

**History:** Gordon Chang, Peter Duus (emeritus), Harold L. Kahn (emeritus), Mark Lewis, Mark Mancall, Yumi Moon, Thomas Mullaney, Matthew Sommer (on leave), Jun Uchida, Kären Wigen (on leave)

**Linguistics:** Peter Sells

**Political Science:** John W. Lewis (emeritus), Phillip Lipsky, Lyman Miller, Daniel Okimoto, Jean C. Oi (on leave)

**Religious Studies:** Carl Bielefeldt, Bernard Faure (on leave), Paul Harrison (Acting Professor), Fabrizio Pregadio, Lee H. Yarlely, Michael Zimmermann

**Sociology:** Gi-Wook Shin, Andrew Walder, Xueguang Zhou

Center Offices: Building 50, Room 51L, Main Quad
Mail Code: 94305-2034
Phone: (650) 723-3362, 723-3363; fax: (650) 725-3350
Web Site: http://ceas.stanford.edu

The Center for East Asian Studies (CEAS) coordinates all University instructional, research, and special activities related to China, Japan, and Korea. Faculty and students who share a common interest in the study of East Asia are brought together by the center from a broad range of academic concerns covering nearly every discipline and historical period. CEAS belongs to the Division of International and Comparative Area Studies in the School of Humanities and Sciences, and collaborates with the Walter H. Shorenstein Asia-Pacific Research Center (http://aparc.stanford.edu/).

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major in East Asian Studies enables students to obtain a comprehensive understanding of East Asia broadly conceived, which is the vast area stretching from Japan through Korea and China to the contiguous areas of the Central Asian land mass. Majors in East Asian Studies begin or continue the mastery of Chinese, Japanese, or Korean. Within the humanities or social sciences, they may focus on a particular sub-region, for example, Japan, South China, Hong Kong and Taiwan; or western China and Central Asia; or a substantive issue involving the region as a whole, such as environmental protection, public health, rural development, historiography, cultural expression, or religious beliefs. The major seeks to reduce the complexity of a region to intellectually manageable proportions and illuminate the interrelationships among the various facets of a society.

Potential majors must submit a Student Proposal for a Major in East Asian Studies form not later than the end of the first quarter of the junior year for approval by the East Asian Studies undergraduate committee.

Majors must complete at least 75 units of course work on China, Japan, and/or Korea. Courses to be credited toward major requirements must be completed with a grade of ‘C’ or better. Requirements are:

1. **Language:** proficiency in Chinese, Japanese, or Korean language at the second-year level or above, to be met either by course work or examination. Students who meet the requirement through examination are still expected to take an additional 15 units of language at a higher level, or literature courses taught in the language, or the first year in an additional Asian language. No more than 30 units of language courses are counted toward the major.

2. **Gateway Courses:** a minimum of three gateway courses, one in each area. The gateway courses are:
   a) **Art, Literature and Religion**
      - ARTHIST 2. Asian Art and Culture
      - CHINGEN 91. Traditional East Asian Civilization: China
      - JAPANGEN 92. Traditional East Asian Civilization: Japan
      - RELIGST 18. Introduction to Zen Buddhism
      - RELIGST 46. Introduction to Daoism
   b) **History**
      - HISTORY 92A. Historical Roots of Modern East Asia
      - HISTORY 191. East Asia in the Early Buddhist Age
      - HISTORY 198. History of Chinese Modernity
   c) **Contemporary Social Sciences**
      - ANTHSCI 1. Marriage and Kinship
      - ANTHSCI 128B. Globalization and Japan
      - POLSCI 148S: The U.S. and Asia During the Cold War
      - SOC 111. State and Society in Korea
      - SOC 117A. China Under Mao

3. **Substantive Concentration:** additional courses on East Asia, one of which must be a seminar.

4. **Capstone Essay:** completion of a paper of approximately 7,500 words, written either in a directed reading course or for one of the courses in item 3 above, which should be built upon the student’s thematic interest. A 1-unit Spring Quarter course is required for all majors, in which they discuss and work through their capstone essays or senior honors theses.

5. At least one quarter overseas in the country of focus.

Majors are encouraged to distribute their course work among at least three disciplines and two subregions in Asia. The subregions need not be traditionally defined. Examples include China, Japan, or Korea; or, in recognition of the new subregions which are emerging: South China, Hong Kong, and Taiwan; or Central Asia, Xinjiang, and Mongolia. At least four courses must have a thematic coherence built around a topic such as: Buddhism’s impact on East Asian cultures.
Culture and society of modern Japan
Ethnic identities in East Asia
Fine arts and literature in late imperial China
Foreign policy in East Asia
Social transformation of modern China
Traditional Japanese civilization

An East Asian Studies course that satisfies the University Writing in the Major requirement (WIM) should be completed before beginning the senior essay. This year, CHINGEN 133, JAPANGEN 138, and HISTORY 256 satisfy the WIM requirement.

The courses for the major must add up to at least 75 units and all must be taken for a letter grade.

MINORS
The goal of the minor in East Asian Studies is to provide the student with a broad background in East Asian culture as a whole, while allowing the student to focus on a geographical or temporal aspect of East Asia. The minor may be designed from the following, for a total of six courses. All courses should be taken for a letter grade.

1. Three gateway courses, one in each area (see above for listing of gateway courses).
2. One undergraduate seminar and two other courses from among those listed each quarter as approved for East Asian Studies majors, including literature courses but excluding language courses.

Applications for the minor are due no later than the second quarter of the junior year.

HONORS PROGRAM
 Majors with a grade point average (GPA) of 3.25 or better in all courses related to East Asia may apply for the honors program no later than the final quarter of the junior year. Application entails submitting an honors prospectus to the student’s adviser for approval. Admission is granted by the CEAS undergraduate committee, acting on the adviser’s recommendation. Honors requirements are satisfactory completion of:

1. An honors thesis of high quality of approximately 10,000 words to be submitted in lieu of the senior capstone essay.
2. 5 to 10 units of directed individual study in connection with the thesis project.
3. One advanced level colloquium or seminar dealing with China, Japan, or Korea.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM
The center admits a limited number of Stanford undergraduates to work for a coterminal M.A. degree in East Asian Studies. Applications must be submitted by January 9 of the junior year. Applicants are expected to meet the same standards as those seeking admission to the M.A. program: they must submit a written statement of purpose; a Stanford transcript; three letters of recommendation, at least two of which should be from members of the department of concentration; and scores from the General Test of the Graduate Record Exam. In addition, applicants must provide a list of courses they intend to take to fulfill degree requirements. The decision on admission rests with the M.A. admissions committee of the Center for East Asian Studies. Students must meet all requirements for both B.A. and M.A. degrees. They must complete a total of 15 full-time quarters or the equivalent, or three full quarters after completing 180 units for a total of 225 units.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

CEAS OVERSEAS PROGRAMS
Internships — Undergraduates of any major may apply for summer internship opportunities in China, Japan, and Korea. Host organizations include government and non-profit organizations, and media, financial, and electronic companies. Applications are due in February.

Language Study — CEAS provides undergraduate fellowships for language study in China, Japan, or Korea; students must simultaneously apply to a pre-approved language program abroad. Applications are due in February.

For more information about CEAS overseas programs, contact Denise Chu at denisech@stanford.edu or see http://ceas.stanford.edu.

DISTINGUISHED PRACTITIONERS
Eminent professionals whose work in East Asia brings real-life knowledge to the classroom serve as visiting lecturers through the CEAS Distinguished Practitioners from East Asia program. Teaching this year are: Dr. Weifang Min, Executive Vice President of Peking University (EASTASN 184C, Reforming Higher Education in a Changing China); and Anthony Zaloom, international attorney (EASTASN 183C, Doing Business in China).

ACADEMIC THEME HOUSE
The East Asian Studies Theme House, or EAST House, is an undergraduate residence that houses 60 students and offers them opportunities to expand their knowledge, understanding, and appreciation of Asia. EAST House is located on campus at Governor’s Corner. Assignment is made through the regular undergraduate housing draw.

BING OVERSEAS STUDIES PROGRAMS
Beijing — Stanford undergraduates can live and study at Peking University through the Stanford Program in Beijing. Classes are taught in English by the Stanford faculty-in-residence and Peking University professors. Students are considered enrolled in Peking University and may participate in athletic and musical activities on campus, including Chinese art and calligraphy, tai-chi, and wu shu.

Kyoto — Students interested in the study of Japanese language, history, culture, and social organization can attend one or two quarters at the Kyoto Center for Japanese Studies which is supported by a consortium of 13 American universities including Stanford. The Bing Overseas Studies Program also offers a Spring Quarter program focused on Japanese organizations and the political economy of research, development, and production of high technology and advanced industries at the Stanford Center in Technology and Innovation (SCTI). An internship in a Japanese firm, laboratory, or agency follows the SCTI training program.

Overseas Seminars — Three-week seminars led by Stanford faculty are offered in late summer, with destinations and study topics changing each year. For more information about Bing Overseas Studies Programs, contact the Overseas Studies office at Sweet Hall, or see http://osp.stanford.edu.

GRADUATE PROGRAMS

MAJOR OF ARTS
University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The M.A. program in East Asian Studies is designed both for students who plan to complete a Ph.D. but who have not yet decided on the particular discipline in which they prefer to work, and for students who wish to gain a strong background in East Asian Studies in connection with a career in nonacademic fields such as business, law, education, journalism, or government service. Students interested in pursuing professional careers are encouraged to plan for additional training through internships or graduate professional programs, in conjunction with obtaining an M.A. in East Asian Studies

The master’s degree program allows a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. The director of the center assigns faculty advisers to all students. Members of the staff and faculty are available for academic and career planning. The M.A. program is normally completed in two academic years, but students can shorten this time by receiving credit for prior language work or by attending summer sessions. Students are urged to complete the degree requirements within one year if their background makes it possible.
Applicants must submit scores for the General Test of the Graduate Record Examination. Foreign applicants are also required to take the Test of English as a Foreign Language. Applications for admission and financial aid should be made online; see http://gradadmissions.stanford.edu/.

The requirements for the M.A. in East Asian Studies are as follows:

Language Requirement — Students must complete the equivalent of Stanford’s first three years of language training in either Chinese, Japanese, or Korean. Students entering the program without any language preparation should complete first- and second-year Chinese, Japanese, or Korean within the first year of residence at Stanford. This will necessitate completing a summer language program. Language courses taken at Stanford must be for letter grades.

The language requirement may be satisfied in part or in full by placing into an appropriate Stanford language class through the language proficiency exam given by the Language Center. Students who fulfill this minimum three-year language requirement before completing other requirements are encouraged to continue language study, or take courses in which Chinese or Japanese are used, for as long as they are in the program. Language courses beyond the third-year level may be applied to the Area Studies requirement discussed below.

Students in the M.A. program are eligible to apply for the Inter-University language programs in Beijing and Yokohama. Work completed in one of these programs may be counted toward the M.A. degree’s language requirement.

Area Studies Requirement — Students must complete the 1-unit core course, EASTASN 330, and an additional nine courses numbered 100 or above related to East Asia. (Chinese and Japanese language courses numbered 100-199 are considered to be at the third-year level and do not count toward the courses required for the degree.) The nine courses must be 3 or more units, taken for a letter grade. At least 23 units must be designated primarily for graduate students (typically at the 200-300 levels).

An integral part of the program is training in research and a demonstration of research capability in a discipline. Three courses, one of which must be seminar, colloquium, or advanced course in which a research paper on China, Korea, or Japan is written, must be within a single department. The six additional area courses may be taken in departments of the student’s choosing. Some theory-oriented or methodological courses may be used to meet part of these requirements provided they are demonstrably useful for understanding East Asian problems. Credit toward the area studies requirement is not given for courses taken before entering the M.A. program. Students in this program may, however, take courses for exchange credit at the University of California, Berkeley, with the approval of their adviser and the Office of the Registrar.

M.A. Thesis Requirement — A master’s thesis, representing a substantial piece of original research, should be filed with the center’s program office as part of the graduation requirements. With the adviser’s approval, the master’s thesis requirement may be satisfied by expanding a research paper written for an advanced course.

DUAL DEGREE PROGRAMS

EAST ASIAN STUDIES AND LAW

This program grants an M.A. degree in East Asian Studies and a Doctor of Jurisprudence (J.D.) degree. It is designed to train students interested in a career in teaching, research, or the practice of law related to East Asian legal affairs. Students must apply separately to the East Asian Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student’s background and level of training in Chinese, Japanese, or Korean.

EAST ASIAN STUDIES AND BUSINESS

This program grants an M.A. degree in East Asian Studies and a Master of Business Administration degree. Students must apply separately to the East Asian Studies M.A. program and the Graduate School of Business and be accepted by both. Completing this combined course of study requires approximately three academic years (perhaps including summer sessions), depending on the student’s background and level of training in Chinese, Japanese, or Korean.

DOCTORAL PROGRAMS

Stanford does not offer a Ph.D. in East Asian Studies. However, there are more than 100 doctoral students with a specialization on China, Korea, or Japan within various departments and schools of the University. The departments that offer an East Asian concentration are: Anthropological Sciences, Art and Art History, Asian Languages, Comparative Literature, Cultural and Social Anthropology, History, Linguistics, Political Science, Religious Studies, and Sociology. It is also possible to specialize in East Asia within some of the doctoral programs of the professional schools of Business, Education, and Law. Inquiries should be directed to the individual department or school concerned.

POSTDOCTORAL PROGRAMS

The Center for East Asian Studies offers two postdoctoral fellowships in Chinese Studies each year. Two postdoctoral fellowships in Japanese Studies are available from the Freeman-Spogli Institute of International Studies. The Walter H. Shorenstein Asia-Pacific Research Center has a postdoctoral program in contemporary Korean Studies.

FINANCIAL AID

Students in graduate programs who plan to do work in Chinese, Japanese, or Korean language, and area studies courses, may be eligible for Foreign Language and Area Studies (FLAS) fellowships and are encouraged to apply for them at the time of application to Stanford. Recipients of FLAS fellowships must be American citizens or permanent residents. For further information, see http://ceas.stanford.edu.

COURSES

The courses listed below deal primarily with China, Japan, and/or Korea. Many other theoretical and methodological courses within the departments at Stanford are taught by faculty who are East Asian specialists; these courses often have a substantial East Asian component and may be found under the department listings in this bulletin.

EAST ASIAN LANGUAGES

For courses in Chinese, Japanese, and Korean language instruction with the subject codes CHINLANG, JAPANLNG, and KORLANG, see the “Language Center” section of this bulletin. For courses in Classical Chinese with the subject code CHINLIT, see the “Asian Languages” section of this bulletin.

UNDERGRADUATE

EASTASN 5. East House Seminar — May be repeated for credit.
1 unit, Aut, Spr (Sun, C)

EASTASN 150T. Introduction to Tibetan Culture and History — The formation of Tibetan culture and history through the 20th century. Geography, the spread of Tibetan civilization and culture, emergence of the Tibetan Empire, introduction of Buddhism into Tibet, and development of the Dalai Lama institution.
5 units, Spr (Tsonga, Y)

EASTASN 182K. U.S.-Korean Relations
3 units, not given this year

3-5 units, Win (Zaloom, A)
EASTASN 184C. Reforming Higher Education in a Changing China—China’s comprehensive higher education reforms in the context of its socioeconomic transition since the late 70s. Topics include interactions between universities and the economic sector, new human resource needs, reforms in higher education governance and finance, curriculum and teaching, university-industry relationships, and comparison to other countries. 5 units, Aut (Min, W)

ADVANCED

EASTASN 191. Journal of East Asian Studies
1 unit, Aut, Win, Spr (Sun, C)

EASTASN 198. Senior Colloquium in East Asian Studies
1 unit, Spr (Sun, C)

EASTASN 199. Directed Reading
1-9 units, Aut, Win, Spr, Sum (Staff)

EASTASN 330. Core Seminar: Issues and Approaches in East Asian Studies—For East Asian Studies M.A. students only.
1 unit, Aut (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

ASIAN LANGUAGES

See the “Asian Languages” section of this Bulletin for courses in Chinese General Studies (CHINGEN), Chinese Literature (CHINLIT), Japanese General Studies (JAPANGEN), Japanese Literature (JAPANLIT), and Korean Studies (KORGEN).

OTHER COGNATE COURSES

ANTHSCI 7. Marriage and Kinship
4-5 units, Spr (Wolf, A)

ANTHSCI 128B/228B. Globalization and Japan—(Same as CASA 128B.)
3-5 units, Spr (Befu, H)

ANTHSCI 203. Topics in the Anthropology of China and Taiwan
3-5 units, not given this year

ANTHSCI 210. Examining Ethnographies
5 units, Aut (Wolf, A)

ARTHIST 2. Asian Art and Culture
5 units, Win (Vinograd, R)

ARTHIST 182/382. Arts of China, 900-1500: Cultures in Competition
4 units, Aut (Vinograd, R)

ARTHIST 281A. Making Art History in Republican China
5 units, Aut (Vinograd, R)

ARTHIST 287A. The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime
5 units, Win (Staff)

CASA 77/277. Japanese Society and Culture
5 units, not given this year

CASA 82/282. Medical Anthropology
4-5 units, Spr (Kohrman, M)

CASA 113/213. Women in Islam: The Central Asian Case
5 units, Win (Kunanbaeva, A)

CASA 120/220. Archaeology of Early China
5 units, Aut (Reinhart, K)

CASA 171. Mythology, Folklore, and Oral Literature of Central Asia
3-5 units, Spr (Kunanbaeva, A)

CASA 173/273. Nomads of Eurasia
4-5 units, not given this year

ECON 113. Technology and Economic Change
5 units, Aut (Moser, P)

ECON 124. Contemporary Japanese Economy
5 units, Win (Staff)

EDUC 306B. Politics, Policy Making, and Schooling Around the World
3-4 units, Spr (Adams, J)

EDUC 309X. Educational Issues in Contemporary China
3-4 units, Spr (Adams, J)

EE 402T. Entrepreneurship in Asian High Tech Industries
1 unit, Spr (Dasher, R)

FILMSTUD 132/332. East Asian Cinema
4 units, Spr (Ma, J)

HISTORY 62N. The Atomic Bomb in Policy and History
4-5 units, Spr (Bernstein, B)

HISTORY 90Q. Buddhist Political and Social Theory
4-5 units, Aut (Mancall, M)

HISTORY 92A. The Historical Roots of Modern East Asia
5 units, Spr (Miller, L)

HISTORY 92N. Comparative Colonialism
5 units, Aut (Uchida, J)

HISTORY 92S. Lives of the Samurai
5 units, Aut (Goldsmith, B)

HISTORY 93S. Silk Road or Great Wall: Early Imperial China in Eurasia
5 units, Win (Staff)

HISTORY 103E. History of Nuclear Weapons—(Same as POLISCI 116.)
5 units, Spr (Holloway, D)

HISTORY 191. East Asia in the Early Buddhist Age
5 units, Win (Lewis, M)

HISTORY 194B. Japan in the Age of the Samurai
5 units, not given this year

HISTORY 195. Introduction to Korean History and Culture
5 units, not given this year

HISTORY 195C. Modern Japanese History
5 units, Win (Staff)

HISTORY 198. The History of Chinese Modernity
5 units, Aut (Mullaney, T)

HISTORY 205/309F. Historical Geography: Maps in the Early Modern World
5 units, not given this year

HISTORY 256/356. U.S.-China Relations: From the Opium War to Tiananmen
5 units, Win (Chang, G)

HISTORY 291A/391A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times
5 units, Spr (Mullaney, T)

HISTORY 291E/391E. Maps, Borders, and Conflict in East Asia
5 units, not given this year

HISTORY 292D/392D. Japan in Asia, Asia in Japan
5 units, Spr (Uchida, J)

HISTORY 293J. Korean History and Culture through Film
5 units, not given this year

Economics

Honorary Emeritus (Professor): Anne O. Krueger

Chair: Timothy F. Bresnanah

Professors: B. Douglas Bernheim, Michael J. Boskin, Timothy F. Bresnanah, Lawrence Gouldner, Ayner Greif, Robert E. Hall, Peter J. Hammond, Han Hong, Matthew O. Jackson, Peter Klenow, Mordecai Kurz, Thomas E. MaCurdy, Paul R. Milgrom, John H. Pencavel, Ilya Segal, John B. Shoven, Robert Staiger, John B. Taylor, Frank Wolak, Gavin Wright

Associate Professors: Jonathan Levin, Mark McClellan, Luigi Pistaferrri

Assistant Professors: Ran Abramitzky, Manuel Amador, Nicholas A. Bloom, Giacomo DeGiorgi, Liran Einav, Doireann Fitzgerald, Peter Hansen, Nir Jaimovich, Seema Jayachandran, Jakub Kastl, Aprajit Mahajan, Petra Moser, Muriel Niederle, Michele Tertilt

Senior Lecturer: Geoffrey Rothwell

Lecturers: Doru Cojoc, Gregory Rosston, Derek Stimel

Visiting Professors: Ove Granstrand, Jurgen Schroeder, T.N. Srinivasan

Acting Instructors: Alex Gould, Derek Gurney, Erik Snowberg, Mark Tendall

Mail Code: 94305-6072

Phone: (650) 725-3266

Web Site: http://www-econ.stanford.edu/

Courses given in Economics have the subject code ECON. For a complete list of subject codes, see Appendix B.

The department’s purpose is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. There is training for the general student as well as for those who plan careers as economists in civil service, private enterprise, teaching, or research.

The undergraduate program provides an excellent background for those going on to graduate work in the professional schools (for example, business and law) and may also be structured to prepare students for a Ph.D. program in economics. The department’s curriculum is an integral part of Stanford’s programs in International Relations, Public Policy, and Urban Studies.

The primary objective of the graduate program is to educate students as research economists. In the process, students also acquire the background and skills necessary for careers as university teachers and as practitioners of economics. The curriculum includes a comprehensive treatment of modern theory and empirical techniques. Currently, 20 to 25 students are admitted each year.

The faculty represent a wide spectrum of interests and conduct research on a broad range of topics. Most fields of economics are covered, including behavioral economics, comparative institutional analysis, econometrics, economic development, economic history, experimental economics, industrial organization, international trade, labor, macro- and microeconomic theory, mathematical economics, and public finance.

Undergraduate Programs

Bachelor of Arts

The total number of units required for the major is 80. Students are encouraged to complete the core courses 1-5 below, as early as possible. Ideally, students should complete the core during the sophomore year, before taking upper division courses. Courses may not be taken before the prerequisites are completed. The required number of field courses is four. There is great flexibility in the choice of electives, including upper-division math and statistics.

Of the 80 units required for the major, at least 55 must be taken at Stanford in California. Students cannot declare Economics as their major or minor until they have completed ECON 50 with a grade of "B" or better.

Requirements for the Economics Major

(80 Units)

1. ECON 1A, B (10 units): elementary economics.

2. ECON 102A (5 units): introduction to statistical methods. It is recommended that students satisfy this basic statistics requirement before proceeding with the rest of the program. Prerequisite: MATH 41 or equivalent.

3. ECON 50 (5 units, grade of ‘B’ or better): basic price theory. Prerequisites: ECON 1A or 1, and MATH 51 (letter grade required).

4. ECON 51 and 52 (10 units): intermediate micro- and macroeconomics. Prerequisites: ECON 50 and 1A for 51; 1B for 52.

5. ECON 102B (5 units): econometrics. Prerequisites: ECON 50 and 102A. Material in ECON 102B is used in a number of field courses. Students are strongly advised to design their program of study so that ECON 102B is not taken in their senior year but early in their program.

Field Courses (must be taken at Stanford in California; 20 units)—Four courses must be chosen from among ECON 111, 118, 121, 126, 140, 141, 145, 149, 150, 154, 157, 160, 165 (5 units each).

Writing in the Major Course (5 units)—This requirement is fulfilled by ECON 101. This course should be taken only after completing ECON 51 and 52, 102B, and at least two field courses.

Electives (20 units)—Choose from Economics courses numbered from 100 through 198, excluding 190 and 191. Up to 10 units may be satisfied by MATH 113, 114, 115, 136, 151, 171, 175; or STATS 200, 206, 207, 217, 218, 237.

A maximum of 10 units of transfer credit or of ECON 139D, Directed Reading, may be taken under this section. Suitable transfer credit must be approved in writing by the Associate Director of Undergraduate Studies. Advanced undergraduate majors with strong quantitative preparation may enroll in graduate (200-level) courses with permission of the Director of Undergraduate Studies and the course instructor. Some courses offered by Overseas Studies may be counted towards this requirement. The department does not give credit for internships.

Other Requirements

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit, and 55 of the 80 units required for the major must be taken at Stanford in California.

Advanced placement credit cannot be used to skip ECON 1A, B. Students who PLAN to declare Economics as a major or a minor can petition to the Director of Undergraduate Studies to waive the ECON 1A, B requirement for graduation and for prerequisites to other Economics courses.

A grade point average (GPA) of 2.0 (C) or better must be received for all units applied toward the preceding requirements.

To use transfer credit in partial satisfaction of the requirements, the student must obtain written consent from the department’s Associate Director of Undergraduate Study, who establishes the amount of credit to be granted toward the department requirements (see the Information Book for Economics Majors). Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics major.

Course prerequisites are enforced. Students taking courses to satisfy prerequisites in another department or institution must petition for transfer credit approval in order to satisfy course prerequisites.

The time limit for satisfactory completion of a course is one year from the date an “incomplete” is given, although instructors may set a shorter time limit. Students are responsible for seeing that all grades of incomplete are cleared within the time limit.
SAMPLE PROGRAMS

Sample listings of upper-division economics electives may be examined in the department’s Information Book for Economics Majors, available in the Economics Building, room 136. Sample programs are provided for the following areas of emphasis: (1) liberal arts, (2) pre-business, (3) quantitative, (4) international, (5) political economy and regulation, and (6) preparation for graduate school in economics.

MINORS (35 UNITS)

The minor in Economics has two main goals. The first is to acquaint students with the rudiments of micro- and macroeconomic theory that are required of all majors. The second is to allow students to build basic competence in the application of this theory to two fields of economics of their choosing, and the opportunity to specialize further in any one of these fields by taking one additional advanced course in the Department of Economics.

COURSE WORK

1. ECON 1AB (formerly ECON 1) (10 units): principles of economics.
2. ECON 50 (5 units, grade of ‘B’): basic price theory. Prerequisites: ECON 1A or 1, and MATH 51.
3. ECON 51 and 52 (10 units): intermediate micro- and macroeconomics. Prerequisite: ECON 50.
4. Two field courses (must be taken at Stanford in California; 10 units) may be chosen from the following list: ECON 102A, 102B, 111, 118, 121, 126, 140, 141, 145, 149, 150, 154, 157, 160, 165.

OTHER REQUIREMENTS

If the candidate’s major requires basic Economics courses (items 1 through 3), then only half of the units from those courses apply toward the economics minor. To attain the overall 35 units required by the minor, the student must take additional Economics courses under items 4 and 5.

At least 20 out of the 35 units for the minor must be taken at Stanford. Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics minor.

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit. A grade point average (GPA) of 2.0 or better must be received for all units applied toward the minor.

HONORS PROGRAM

The honors program offers an opportunity for independent research, creativity, and achievement. It is designed to encourage a more intensive study of economics than is required for the normal major, with course and research work of exceptional quality. Honors students may participate in an Honors Research Symposium during Spring Quarter, with those nominated for prizes making oral presentations. The honors program requires:

1. Completing all requirements for the major.
2. Achieving a grade point average (GPA) of at least 3.5 for the 80 units required of the Economics major. See details in the Information Book for Economics Majors.
3. Complete ECON 102B and at least two lecture courses most relevant for the proposed topic of the honors thesis by the end of the junior year. (These can be included in the basic 80 units.)
4. Candidates must write an honors thesis in their senior year for at least one unit and up to 10 units of credit (ECON 199D). The thesis must be of very high quality and written under the direction of a member of the department or its affiliated faculty. Units of 199D do not count toward the course work requirements for the basic economics major, or in the computation of the GPA requirement for honors. Students who take ECON 199D for 10 units may apply 5 of those units to meet the Writing in the Major (WIM) requirement. Such students complete the major with at least 85 units overall.

Juniors interested in the honors program should attend an informational meeting scheduled by the honors program director during the first week of each quarter. At this meeting, students receive information on organizing an honors project and are given details on honors programs. Prospective candidates for the honors program should submit an application to the director no later than the end of the first month of the third quarter before graduation (typically Autumn Quarter of the senior year). Also required, later in the same quarter, is a three-page thesis proposal that must be approved by the thesis adviser.

GRADUATE PROGRAMS

Graduate programs in economics are designed to ensure that students receive a thorough grounding in the methodology of theoretical and empirical economics, while at the same time providing specialized training in a wide variety of subfields and a broad understanding of associated institutional structures. Toward these ends, the program is arranged so that the student has little choice in the curriculum at the outset but considerable latitude later on.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics.

MASTER OF ARTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The department does not admit students who plan to terminate their graduate study with the M.A. degree. Students may (but need not) elect this degree in preparation for the Ph.D. degree. A master’s option is also available to Ph.D. candidates from other departments.

Admission—Prospective students must have completed the Stanford requirements for a B.A. in Economics or approximately equivalent training. Since students are required to take some of the same courses as Ph.D. candidates, similar preparation in mathematics and statistics generally is expected. Prospective applicants should submit their credentials together with a plan of study to the Director of Graduate Study for approval.

Requirements — A master’s program must satisfy these criteria:

1. Completing, at Stanford, at least 45 units of credit beyond those required for the bachelor’s degree, of which at least 40 units must be in the Department of Economics. Students must complete ECON 202 and at least three other 200-level courses. They must receive a grade of ‘B-’ or better in ECON 202. Undergraduate courses must be numbered 105 or higher. No seminar courses numbered 300 or above can be counted.
2. Demonstrating competence in empirical methodology by receiving a grade of ‘B-’ or better in both ECON 270 and 271, or by receiving a grade of ‘B-’ or above in each of ECON 102A, B, and C.
3. Submitting two term papers (or a thesis of sufficient quality). At least one of these papers must be deemed to represent graduate-level work. Normally, this means that it is written in connection with a 200-level course. A maximum of 10 units of credit can be earned for a thesis toward the 45-unit degree requirement.
4. A grade point average (GPA) of 3.0 must be maintained for all master’s level work. All courses must be taken for a letter grade.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

Admitted students must be adequately prepared in calculus, linear algebra, and statistics (see above). When deemed appropriate, a student may be required to complete the necessary background preparation at Stanford. All students take a common core curriculum at the outset and later branch out into the desired fields of specialization. Well-prepared students should anticipate spending, with some overlap, approximately two years in course work and another two years in seminars, independent
study, and dissertation research. The goal is to complete the program in four years, although some types of research programs may require at least five years to complete. The department has a strong commitment to guiding students through the program expeditiously.

Questions and petitions concerning the program and the admissions process should be addressed to the Director of Graduate Study, who has responsibility for administering the graduate program.

Specific requirements are best discussed in two stages, the first consisting of requirements for admission to candidacy and the second involving further requirements for earning the degree.

Admission to Candidacy for Ph.D. — A student may apply for admission to candidacy when the following minimal requirements are met:

1. Successful results on comprehensive examinations in core economics (the examinations based on material from ECON 202, 203, 204; and 210, 211, 212), and econometrics (the examination based on material from ECON 270, 271, 272).
2. Completing the requirements in two additional fields of specialization from the list below or, if approved in advance by the Director of Graduate Study, in one such field together with a substantial amount of work toward a second field taught in a related department. Advanced fields include econometrics, economic development, economic history, industrial organization, international economics, labor economics, microeconomic theory, monetary theory, and advanced macroeconomics, and public finance.

   Each field listed above can be satisfied by completing two courses, although students in some fields may be advised to add a third course, which can then be counted toward the distribution requirement discussed later. All courses (or comprehensive exams, when offered) must be passed with a grade ‘B’ or better.
3. Completing a candidacy paper, normally written in conjunction with one of the special fields selected above.

   It is expected that the student will meet, and indeed exceed, the above standard by the beginning of the third year of residency. When this is not possible for any reason, the Director of Graduate Study should be consulted as early as possible during the second year. Once it is deemed that the above standards have been met, the student should complete the Application for Candidacy for Degree of Doctor of Philosophy. After approval, candidacy remains valid for five years (although it can be terminated earlier by the department if progress is deficient); it can be renewed or extended beyond this period only under unusual circumstances.

Further Requirements for the Ph.D. Degree —

1. Distribution Requirement: Students must complete four other graduate-level courses meeting the following requirements:
   a) at least one course from the area of economic history, unless history is one of the two fields of specialization.
   b) courses in at least two fields other than the two fields of specialization. Distribution courses cannot be crosslisted in those fields.
   c) with advance approval of the Director of Graduate Study, some of these distribution courses may be drawn from related fields taught in other departments. However, including courses taken to meet either the specialization or distribution requirements, no more than two courses in total may be taken outside the Economics department.
2. Teaching Experience: each student must serve as a teaching assistant for at least one quarter. It is strongly recommended that this requirement be satisfied before the final year of residence.
3. Seminar Participation: each student is expected to participate in at least two all-year research seminars by the end of the fourth year of residence. Normally, participation in a seminar requires one or more oral presentations and the submission of a research paper (which, however, need not be completely separate from dissertation research).
4. Ph.D. Dissertation: the process involves selecting a topic, choosing an appropriate adviser, submitting a prospectus (signed by the adviser) outlining the proposed research, selecting a three-member reading committee (usually all from the Department of Economics, although exceptions can be made under certain circumstances), passing the University oral examination at which these three faculty (and two other members of the Academic Council) ask questions about the completed research, and submitting a final draft of the work signed by all members of the reading committee. The student is advised to initiate this process as early as possible.

PH.D. MINOR

To be recommended for the Ph.D. degree with Economics as a minor subject, a student must qualify in three fields of economics, at least one of which must be in the core economics sequence. The standard of achievement in these fields is the same for minor as for major candidates, including the department’s comprehensive examinations where appropriate.

JOINT DEGREE PROGRAMS WITH THE SCHOOL OF LAW

The Department of Economics and the School of Law offer a joint program leading to the Ph.D. in Economics and the J.D. degree in Law. See the Stanford University bulletin Law School for descriptions of its participation in the joint program.

To qualify, the student’s program objectives must clearly justify such a joint program. Decisions are made by the Director of Graduate Study. A student’s program in economics must satisfy the same standards as a Ph.D. degree in Economics taken with a minor in Law. It is expected that dissertation research will cross department lines and that members of the dissertation committee will be drawn from both faculties.

Students normally spend the first year full time either in Economics or in Law and the second year full-time in the other department. After the second year, courses in economics and law may be pursued simultaneously.

Other joint programs may be arranged; for example, the Ph.D. in Economics combined with one or two years of study in the School of Law, leading either to the nonprofessional Master of Legal Studies (M.L.S.) degree or the nonprofessional Master of Jurisprudence (J.M.). See the bulletin Law School for the requirements. Conversely, a student taking the J.D. in the School of Law may apply for an M.A. in Economics.

FELLOWSHIPS AND ASSISTANTSHIPS

The department awards a number of fellowships for graduate study. Many first-year and a few second- or third-year students are awarded full fellowships, including a stipend and tuition. All students whose records justify continuation in the program may be assured support for the second through fourth years in the form of employment as a teaching or research assistant. These half-time appointments provide a stipend and tuition allowance. Entering students are not normally eligible for research or teaching assistantships.

Applications should be submitted before January 1 to the department admissions committee.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

ECON 1A. Introductory Economics A — The economic way of thinking and the functioning of a market economy. The behavior of consumers and firms, markets for goods and inputs, and principles of international exchange. Applications and policy issues in economics. GER:DB-SocSci 5 units, Aut (Clerici-Arias, M), Win (Wright, G)

ECON 1B. Introductory Economics B — Aggregate economic relationships, including output, employment, inflation, interest rates, and exchange rates. Short-run fluctuations and long-run growth. Issues in monetary and fiscal policy. GER:DB-SocSci 5 units, Win, Spr (Johnson, P)

ECON 11N. Understanding the Welfare System — Stanford Introductory Seminar. Preference to freshmen. Welfare reform legislation and the devolution revolution. The transfer of responsibility for antipoverty programs to the states. How recent reforms change the welfare system and who is likely to be affected. Food stamps, AFDC, TANF, SSI, and Medicaid. Income transfer programs such as earned income tax credit and income taxes, and labor market regulations such as minimum wages and

ECON 102C. Advanced Topics in Econometrics — Identification and estimation of the effect of human capital variables on earnings (e.g., the return to education, tenure), and identification and estimation of labor supply models, focusing on microeconomic data. Topics: instrumental variable estimation, limited dependent variable models (probit, logit, and tobit models), and panel data techniques (fixed effect and random effect models, dynamic panel data models).

ECON 103. Applied Econometrics — The construction and use of econometric models for analyzing economic phenomena. Students complete individual projects and core material. Topics vary with the instructor. Limited enrollment. Prerequisites: 52, 102B.

ECON 104. Money, Interest Rates, and Financial Markets — Money, interest rates, banks and other financial institutions at both micro and macro levels. Micro: alternative financial instruments, the determination of interest rates, the yield curve, and the role of banks and other capital market institutions in the intermediation process. Supply of money, regulation, and supervision. Macro: the choice of monetary policy by the central bank, the impact of monetary policy making institutions on this choice and the various channels through which monetary policy affects inflation and real variables in the economy. Emphasis is on the institutional structure of Federal Reserve System and the conduct of monetary policy in the U.S. Prerequisites: 50, 52.

ECON 105. Money, Interest Rates, and Financial Markets — Money, interest rates, banks and other financial institutions at both micro and macro levels. Micro: alternative financial instruments, the determination of interest rates, the yield curve, and the role of banks and other capital market institutions in the intermediation process. Supply of money, regulation, and supervision. Macro: the choice of monetary policy by the central bank, the impact of monetary policy making institutions on this choice and the various channels through which monetary policy affects inflation and real variables in the economy. Emphasis is on the institutional structure of Federal Reserve System and the conduct of monetary policy in the U.S. Prerequisites: 50, 52.

ECON 106. World Food Economy — The interrelationships among food, populations, resources, and economic development. The role of agricultural and rural development in achieving economic and social progress in low-income nations. Emphasis is on the public sector decision making as it relates to food policy.

ECON 107. Technology and Economic Change — Economic causes and consequences of technological change. Historical experience of advanced industrial countries and more recent experience of less developed economies. Topics: origins of modern industry in the U.S. and Europe; technology and the growth of large-scale organizations; late-comers to industrialization such as Japan and newly industrializing countries; economic growth and slowdown in mature industrial countries; and present concerns and future prospects such as the influence of technology on employment, civilian spillover from military R&D, and coping with rapid technological change. Prerequisites: 51, 52, 102B.

ECON 108. European Economic History — Economic changes and growth in W. Europe from antiquity to the present. The transformation of Europe from an economically and culturally backward part of the world to the center of the world economy pre-WW1. Topics: the role of technics and sciences, variations of the extent of market activities, institutional changes, international politics, demography. GER:DB-SocSci

ECON 110. Economic Policy Analysis — Economic policy analysis, writing, and oral presentation. Topics vary with instructor. Limited enrollment. Prerequisites: 51 and 52, 102B, and two field courses. Some sections require additional prerequisites. WIM

ECON 111. Money and Banking — Money, interest rates, banks and other financial institutions at both micro and macro levels. Micro: alternative financial instruments, the determination of interest rates, the yield curve, and the role of banks and other capital market institutions in the intermediation process. Supply of money, regulation, and supervision. Macro: the choice of monetary policy by the central bank, the impact of monetary policy making institutions on this choice and the various channels through which monetary policy affects inflation and real variables in the economy. Emphasis is on the institutional structure of Federal Reserve System and the conduct of monetary policy in the U.S. Prerequisites: 50, 52.

ECON 112. Money and Banking — Money, interest rates, banks and other financial institutions at both micro and macro levels. Micro: alternative financial instruments, the determination of interest rates, the yield curve, and the role of banks and other capital market institutions in the intermediation process. Supply of money, regulation, and supervision. Macro: the choice of monetary policy by the central bank, the impact of monetary policy making institutions on this choice and the various channels through which monetary policy affects inflation and real variables in the economy. Emphasis is on the institutional structure of Federal Reserve System and the conduct of monetary policy in the U.S. Prerequisites: 50, 52.

ECON 113. Technology and Economic Change — Economic causes and consequences of technological change. Historical experience of advanced industrial countries and more recent experience of less developed economies. Topics: origins of modern industry in the U.S. and Europe; technology and the growth of large-scale organizations; late-comers to industrialization such as Japan and newly industrializing countries; economic growth and slowdown in mature industrial countries; and present concerns and future prospects such as the influence of technology on employment, civilian spillover from military R&D, and coping with rapid technological change. Prerequisites: 51, 52, 102B.

ECON 114. World Food Economy — The interrelationships among food, populations, resources, and economic development. The role of agricultural and rural development in achieving economic and social progress in low-income nations. Emphasis is on the public sector decision making as it relates to food policy.

ECON 115. European Economic History — Economic changes and growth in W. Europe from antiquity to the present. The transformation of Europe from an economically and culturally backward part of the world to the center of the world economy pre-WW1. Topics: the role of technics and sciences, variations of the extent of market activities, institutional changes, international politics, demography. GER:DB-SocSci

ECON 116. World Food Economy — The interrelationships among food, populations, resources, and economic development. The role of agricultural and rural development in achieving economic and social progress in low-income nations. Emphasis is on the public sector decision making as it relates to food policy.

ECON 117. Diagnosing the California Electricity Crisis — Did California’s deregulation plan cause the crisis? How was the plan flawed? What was the role of federal regulators? What were the conditions in the California electricity supply industry that allowed such an economic disaster? What was the impact of political factors? What can be done to prevent another such crisis? Methods include quantitative economic analysis and qualitative political economy.

ECON 118. Money and Banking — Money, interest rates, banks and other financial institutions at both micro and macro levels. Micro: alternative financial instruments, the determination of interest rates, the yield curve, and the role of banks and other capital market institutions in the intermediation process. Supply of money, regulation, and supervision. Macro: the choice of monetary policy by the central bank, the impact of monetary policy making institutions on this choice and the various channels through which monetary policy affects inflation and real variables in the economy. Emphasis is on the institutional structure of Federal Reserve System and the conduct of monetary policy in the U.S. Prerequisites: 50, 52.

ECON 120. Economic Policy Analysis — Economic policy analysis, writing, and oral presentation. Topics vary with instructor. Limited enrollment. Prerequisites: 51 and 52, 102B, and two field courses. Some sections require additional prerequisites. WIM

ECON 121. Money and Banking — Money, interest rates, banks and other financial institutions at both micro and macro levels. Micro: alternative financial instruments, the determination of interest rates, the yield curve, and the role of banks and other capital market institutions in the intermediation process. Supply of money, regulation, and supervision. Macro: the choice of monetary policy by the central bank, the impact of monetary policy making institutions on this choice and the various channels through which monetary policy affects inflation and real variables in the economy. Emphasis is on the institutional structure of Federal Reserve System and the conduct of monetary policy in the U.S. Prerequisites: 50, 52.

ECON 122. Money and Banking — Money, interest rates, banks and other financial institutions at both micro and macro levels. Micro: alternative financial instruments, the determination of interest rates, the yield curve, and the role of banks and other capital market institutions in the intermediation process. Supply of money, regulation, and supervision. Macro: the choice of monetary policy by the central bank, the impact of monetary policy making institutions on this choice and the various channels through which monetary policy affects inflation and real variables in the economy. Emphasis is on the institutional structure of Federal Reserve System and the conduct of monetary policy in the U.S. Prerequisites: 50, 52.

ECON 123. Technology and Economic Change — Economic causes and consequences of technological change. Historical experience of advanced industrial countries and more recent experience of less developed economies. Topics: origins of modern industry in the U.S. and Europe; technology and the growth of large-scale organizations; late-comers to industrialization such as Japan and newly industrializing countries; economic growth and slowdown in mature industrial countries; and present concerns and future prospects such as the influence of technology on employment, civilian spillover from military R&D, and coping with rapid technological change. Prerequisites: 51, 52, 102B.

ECON 124. World Food Economy — The interrelationships among food, populations, resources, and economic development. The role of agricultural and rural development in achieving economic and social progress in low-income nations. Emphasis is on the public sector decision making as it relates to food policy.

ECON 125. European Economic History — Economic changes and growth in W. Europe from antiquity to the present. The transformation of Europe from an economically and culturally backward part of the world to the center of the world economy pre-WW1. Topics: the role of technics and sciences, variations of the extent of market activities, institutional changes, international politics, demography. GER:DB-SocSci
ECON 116. American Economic History — From colonial times to the present. The application of economic analysis to historical issues, and the role of historical context in economics. Topics: American economic growth in international perspective; the economics of slavery and regional divergence; the origins and consequence of the American system of technology and business organization; recent U.S. economic performance in historical perspective. Prerequisite: 1. GER:DB-SocSci, EC-AmerCul
5 units, Spr (Wright, G)

ECON 117. Economic History and Modernization of the Islamic Middle East — From the rise of Islam to the present. Transformation of region from economically advanced to underdeveloped. Role of religion in economic successes and failures. Current obstacles to development. Topics: Islamic economic institutions; innovation and change; political economy of modernization; comparisons with other regions; and economic consequences of Islamism.
5 units, not given this year

ECON 118. Development Economics — The economic problems and policy concerns of developing countries. Theories of growth and development; inequality and poverty; credit and labor markets; population growth and fertility choice; migration; sustainable development and globalization. Emphasis on economic models rather than case studies. Prerequisites: 50, 52, 102B. GER:EC-GlobalCom
5 units, Aut (Jayachandran, S)

ECON 120. Socialist Economies in Transition — Privatization, restructuring, and institutional change in E. Europe and the former Soviet Union. Analysis of property rights, corporate governance, incentives, and resource allocation in socialist and transitional economies. Emphasis is on liberalization and privatization policies (including mass and voucher programs) as the primary instruments to induce changes in behavior. Prerequisite: 50. Recommended: 51.
5 units, Win (Gathmann, C)

ECON 121. Development Economics, with Special Reference to East Asia — Macroeconomic aspects of economic development: structural transformation, resource utilization, mobilization, and allocation; the sources of economic growth; intersectoral transfers; the role of the external sector; money and finance in development; stabilization in closed and open economies; strategies for economic development; intangible capital; and endogenous technical progress. Illustrations from the economic development of E. Asia, including Japan, China, Hong Kong, S. Korea, Singapore, Taiwan, Indonesia, Malaysia, Philippines, Thailand. Prerequisite: 52. GER:EC-GlobalCom
5 units, not given this year

ECON 122. Economic Development of Latin America — The debt crisis in the early 80s. Trade liberalization and inflation stabilization experiences in the late 80s. Microeconomic structural reform efforts including privatization and regulation in the 90s. Recent financial and institutional reforms and future challenges.
5 units, Spr (Gil, F)

ECON 123. Regulation and Competition in Latin America — The economics and workings of public intervention and control of markets in Latin America. Topics: natural monopoly regulation; institutions and regulatory commitment; infrastructure concessions; regulation and competition in network industries such as telecoms and electricity; liberalization of markets and competition policy; and antitrust with a weak judiciary.
5 units, Win (Galetovic, A)

ECON 124. Contemporary Japanese Economy — Comparative and historical perspective. Micro and institutional aspects, such as firms, the employment system, corporate governance and financial institutions, and the macro economy. Elementary applications of macro- and microeconomics. Prerequisite: 50. GER:EC-GlobalCom
5 units, Aut (Staff)

ECON 126. Economics of Health and Medical Care — (Same as BIO-MEDIN 156/256.) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisite: ECON 50 and ECON 102A or equivalent statistics, or consent of instructor. Recommended: ECON 51.
5 units, Aut (Bhattacharya, J)

ECON 135. Finance for Non-MBAs — (Same as FINANCE 221, MS&E 245G.) For graduate students and advanced undergraduates. The foundations of finance; applications in corporate finance and investment management. Financial decisions made by corporate managers and investors with focus on process valuation. Topics include criteria for investment decisions, valuation of financial assets and liabilities, interactions between risk and return, market efficiency, and the valuation of derivative securities. Major corporate financial instruments including debt, equity, and convertible securities. Equivalent to core MBA finance course, FINANCE 220. Prerequisites: 51, or ENGR 60, or equivalent; ability to use spreadsheets, and basic probability and statistics concepts including random variables, expected value, variance, covariance, and simple estimation and regression.
4 units, Win (Admati, A)

ECON 136. Auctions and Market Design — Competitive bidding for asset purchases and procurement of industrial needs; bidder entry decisions; design of mechanisms for complicated resource allocation problems. Prerequisites: 51, 160.
5 units, not given this year

ECON 137. Information and Incentives — Incentives in situations where one part has more information than another. A part may have better information about things that it controls (moral hazard), or about things that are outside of its control (adverse selection). The general structure of incentive problems and the design of contracts and institutions to deal with such problems. Applications: executive and employee compensation, sharecropping, financial contracts and credit rationing, insurance, markets with unobservable quality, monopolistic price discrimination, regulation of natural monopolies, income taxation and redistribution, the provision of public goods, and auctions.
5 units, Spr (Lara, Y)

5 units, not given this year

ECON 139D. Directed Reading
1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 140. Introduction to Financial Economics — Modern portfolio theory and corporate finance. Topics: properties of various financial instruments including financial futures, mutual funds, the capital asset pricing model, and models for pricing options and other contingent claims. Prerequisites: 51, 102A.
5 units, Win (Kurz, M), Spr (Shoven, J), Sum (Gould, A)

ECON 141. Public Finance and Fiscal Policy — What role should and does government play in the economy? What are the effects of government expenditure, borrowing, and taxation? Policy topics: budget surpluses/deficits; tax reform; social security, public goods, and externalities; fiscal federalism; public investment; and cost-benefit analysis. Prerequisites: 51, 52.
5 units, Aut (Boskin, M), Spr (Cojoc, D)
ECON 142. Political Economics — Formal theories of collective choice and political institutions. Topics include social choice, the interaction between public institutions and the economy, the effects of lobbying and interest groups on politics, the role of information in determining legislative structure, and elections as a mechanism for controlling versus selecting politicians. Topics that may be covered include the role of political institutions in developing nations and campaign finance reform in the U.S. Prerequisites: ECON 51, MATH 51.
5 units, Spr (Snowberg, E; Daley, B)

5 units, Aut (Hammond, P)

5 units, Win (Pencavel, J)

ECON 147. Economics of Human Resources — Investments in human capital including education, on-the-job training, government training, and health. The effects of human capital accumulation on wages and wage growth and on wage differentials by gender and race. Sample selections and experimental data. Poverty and inequality. Optional research project for public policy organization on labor market/human resources issues. Prerequisite: 51.
5 units, Spr (De Giorgi, G)

ECON 148. Urban Economics — The economics of urban areas. Costs and benefits of cities, city location, land rent and land use, suburbanization, zoning, poverty, housing and segregation, homelessness, local government finance, transportation, schools, and crime. Prerequisites: 50, 102A.
5 units, not given this year

5 units, not given this year

ECON 150. Economic Policy Analysis — (Same as PUBLPOL 104.) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisites: ECON 51 and 102A.
5 units, Spr (Kessler, D)

ECON 153. Economics of the Internet — Applications of microeconomic theory to Internet businesses: auctions, online transactions, entry barriers, valuation, pricing of facilities, policy for broadband communications, network economics, standards, economics of information. Prerequisites: 51 and one of 102B, 103, 104, 113, 135, 137, 140, 149, 157, or 160.
5 units, Aut (Hanson, W)

ECON 154. Economics of Legal Rules and Institutions — (Same as PUBLPOL 106.) The design and consequences of legal rules. Common ideas that run through law including individual rationality, economic ef-
ficiency, conventional and Coasian analyses of externalities, enforcement, costs, and market consequences of legal restrictions on contract terms. Private versus public enforcement of law; the tradeoff between certainty and severity of punishment; the choice between ex post and ex ante sanctions; and the choice between property and liability rules. Applications to property, intellectual property, contract, criminal, tort, family, and environmental law. Prerequisite: ECON 51.
5 units, Win (Owen, B)

5 units, Spr (Gurney, D)

ECON 157. Imperfect Competition — The interaction between firms and consumers in markets that fall outside the benchmark competitive model. How firms acquire and exploit market power. Game theory and information economics to analyze how firms interact strategically. Topics include monopoly, price discrimination, oligopoly, collusion and cartel behavior, anti-competitive practices, the role of information in markets, anti-trust policy, and e-commerce. Sources include theoretical models, real-world examples, and empirical papers. Prerequisite: 51.
5 units, Spr (Makler, C)

ECON 158. Antitrust and Regulation — The history, economics, and legal background of the institutions under which U.S. industry is subject to government control. Topics: antitrust law and economics; the economics and practice of public utility regulation in the communications, transportation, and energy sectors; and the effects of licensing. Emphasis is on the application of economic concepts in evaluating the performance and policies of government agencies. Prerequisite: 51.
5 units, Win (Rosston, G)

ECON 160. Game Theory and Economic Applications — Mathematical introduction to game theory and its applications to economics. Topics: strategic and extensive form games, Nash equilibrium, subgame-perfect equilibrium, Bayesian equilibrium, and perfect Bayesian equilibrium. The theory is applied to repeated games, auctions, and bargaining. Examples from economics and political science. Prerequisites: 51 and course in calculus, or consent of instructor.
5 units, Win (Hammond, P)

ECON 162. Monetary Economics — Dynamic analysis of the role of money and monetary policy in the macro economy, using calculus. Topics: the exchange process and the role of money; inside and outside money; inflation and the inflation tax; international monetary systems; the indeterminacy of floating exchange rates; policies to fix the exchange rate and inflationary incentives; currency crises and speculative attacks; money and interest-bearing government debt; the government’s budget constraint and the coordination of monetary and fiscal policies; hyperinflations and stabilize; the effect of the national debt on consumption, savings, investment, and output; time consistency of government policies. Prerequisite: 52.
5 units, Aut (Leeson, R)

ECON 165. International Economics — Comparative advantage in production and trade among nations; trade policy; increasing returns, imperfect competition and trade; the international monetary mechanism; domestic monetary, fiscal, and exchange rate policies and their relationship to foreign trade; global financial crises and trade. Prerequisites: ECON 1A,B or 1, and 51, 52.
5 units, Aut (Fitzgerald, D), Win (Staiger, R), Sum (Staff)

ECON 167. European Monetary and Economic Integration — The economics of the European Community and the internal market. Analysis of current competition, transportation, and factor market policies, including the problems of agriculture and unemployment. Fiscal har-
monization and mercantilist rivalry. European Monetary Union (EMU): genesis, implementation, and consequences of a common currency and central bank. Foreign exchange and foreign trade. Prerequisites: 51, 52, or equivalents.

5 units, Win (Schroeder, J)

ECON 168. Path Dependence and Economic Analysis — Historically contingent change in the economy; theoretical and applied research on path-dependent phenomena and their implications for economic policy. Topics: self organization in economics; relationships between micro level irreversibilities, branching processes, positive feedback dynamics and the generation of emergent properties at the macroeconomic level; non convexities, lock-in to suboptimal equilibria, and the economics of QWERTY. Historical antecedents and modern formalizations of historical economics, applications of paradigmatic models of non-ergodic stochastic processes. Case studies. Research papers required. Prerequisites: two upper-level economics courses in applied fields. Limited enrollment.

5 units, not given this year

ECON 169. International Financial Markets and Monetary Institutions — (Graduate students register for 269.) How nations are linked financially through money, capital, and exchange markets, emphasizing policy issues including the role of the International Monetary Fund, monetary and exchange rate policy, prevention and resolution of financial crises in emerging markets, current account imbalances, and capital mobility. Development and use of macroeconomic models of international financial linkages and microeconomic models of hedging, optimal selection of currencies for invoice and trade credit, and parity relationships in futures, swaps, and options markets. Prerequisite: 165.

5 units, Spr (Taylor, J)

ECON 171. Intermediate Econometrics II — (Graduate students register for 271.) Linear regression model, relaxation of classical-regression assumptions, simultaneous equation models, linear time series analysis. Limited enrollment. Prerequisite: 270.

5 units, Aut (Hansen, P; Mahajan, A)

2-5 units, Win (MacCurdy, T)

ECON 178. Neuroeconomics — (Graduate students register for 278; same as PSYCH 278.) Techniques from neuroscience and psychology to study how the brain makes economic decisions; implications for the social sciences, especially economics and political science. Topics include: brain processes related to reward, control, and attention; role of emotion in decision making; morality; emotion in social encounters; bargaining and strategic thinking; decision making and probability assessment in risky situations; intertemporal decision making; and addiction. Prerequisite: graduate background in neuroscience or economics, or consent of instructor.

5 units, not given this year

ECON 179. Experimental Economics — Methods and major subject areas that have been addressed by laboratory experiments. Focus is on a series of experiments that build on one another. Topics include decision making, two player games, auctions, and market institutions. How experiments are used to learn about preferences and behavior, trust, fairness, and learning. Final presentation of group projects. Prerequisites: 50, 51, 102A.

5 units, not given this year

ECON 181. Optimization and Economic Analysis — The development of optimization techniques, including calculus, linear and nonlinear programming, the calculus of variations, and control theory. Emphasis is on concepts and results rather than techniques and proofs. Examples: static and dynamic theories of the household and the firm, and problems in aggregative planning and control. Prerequisites: 51 and 102A, and MATH 51 or equivalent.

5 units, Aut (Lara, Y)

ECON 190. Introduction to Financial Accounting — (Same as 90; see 90.)

5 units, Aut (Beyer, A), Win (Stanton, F)

ECON 191. Introduction to Cost Accounting — (Same as 91; see 91.)

5 units, Spr (Stanton, F)

ECON 198. Junior Honors Seminar — (Same as PUBLPOL 197.) Primarily for students who expect to write an honors thesis. Weekly sessions discuss writing an honors thesis proposal (prospectus), submitting grant applications, and completing the honors thesis. Readings focus on writing skills and research design. Students select an adviser, outline a program of study for their senior year, and complete a prospectus by the end of the quarter. Seniors working on their theses also may enroll and present their research to the seminar participants. Seniors are required to make substantial progress on their thesis by the end of the quarter. Enrollment limited to 25.

5 units, Win, Spr (Rothwell, G)

ECON 199D. Honors Thesis Research — In-depth study of an appropriate question and completion of a thesis of very high quality. Normally written under the direction of a member of the Department of Economics (or some closely related department). See description of honors program. Register for at least 1 unit for at least one quarter. Meets first week of Autumn Quarter (see Stanford Daily for details).

1-10 units, Aut, Win, Spr, Sum (Rothwell, G)

PRIMARILY FOR GRADUATE STUDENTS

ECON 239D. Directed Reading

1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 299. Practical Training — Students obtain employment in a relevant research or industrial activity to enhance their professional experience consistent with their degree programs. At the start of the quarter, students must submit a one page statement showing the relevance of the employment to the degree program along with an offer letter. At the end of the quarter, a three page final report must be supplied documenting work done and relevance to degree program.

1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 400. Ph.D. Dissertation

1-15 units, Aut, Win, Spr, Sum (Staff)

A. CORE ECONOMICS

ECON 202. Core Economics: Modules 1 and 2 — (Non-Economics graduate students register for 202N.) Open to advanced undergraduates with consent of instructors. Theory of the consumer and the implications of constrained maximization; uses of indirect utility and expenditure functions; theory of the producer, profit maximization, and cost minimization; behavior under uncertainty; partial equilibrium analysis and introduction to models of general equilibrium. Limited enrollment. Prerequisite: thorough understanding of the elements of multivariate calculus and linear algebra.

2-5 units, Aut (Levin, J; Segal, I)

ECON 202N. 202 For Non-Economics Ph.D. Students — Core Economics modules 1 and 2 for non-Economics Ph.D. students.

2-5 units, not given this year

2-5 units, Win (Bernheim, D)

ECON 203N. 203 For Non-Economics Ph.D. Students

2-5 units, not given this year
ECON 204. Core Economics: Modules 9 and 10—The theory of contracts, emphasizing contractual incompleteness and the problem of moral hazard. Incentive regulation. Competition with imperfect information, including signaling and adverse selection. The theory of resource allocation over time, competitive equilibrium, and intertemporal efficiency. Limited enrollment. Prerequisite: 203.
2-5 units, Spr (Jackson, M)

2-5 units, Aut (Jaimovich, N)

ECON 211. Core Economics: Modules 11 and 12—Capital asset pricing models, equilibrium with securities, pricing of securities, and arbitrage. Overlapping generations models with incomplete market structure and sunspots. Foundations of Bayesian dynamic learning. Investment theory and empirics, including adjustment costs and the q theory; consumption theory and empirics, focusing on the life-cycle model; and the labor market. Limited enrollment. Prerequisite: 210.
2-5 units, Win (Amador, M)

ECON 212. Core Economics: Modules 4 and 8—Monetary theory: economic fluctuations, the role of money (overlapping generations, cash in advance, money in the utility function), dynamic impact of changes in money on the economy, natural rate of unemployment and job creation/destruction, exchange rate determination, international transmission of money, dynamic stochastic general equilibrium models. Macroeconomic policy: rationale for central bank independence, time inconsistency, the impact of public debt, rules versus discretion, interest rate versus money rules, international monetary policy coordination, rational expectations, economic policy evaluation. Limited enrollment. Prerequisites: 203, 211.
2-5 units, Spr (Taylor, J)

ECON 301. Microeconomic Workshop
1-10 units, Aut, Win, Spr (Hammond, P; Kurz, M)

ECON 305. Economic Applications Workshop
1-10 units, Aut, Win, Spr (McCurdy, T; Pencavel, J; Pistaferri, L; Wolak, F; McClellan, M; Bloom, N)

ECON 310. Macroeconomic Workshop
1-10 units, Aut, Win, Spr (Hall, R; Klenow, P; Taylor, J; Tertilt, M; Kurz, M; Amador, M; Jaimovich, N)

B. ECONOMIC DEVELOPMENT

To receive credit for this field, students must complete 214 and 217, and submit a paper from one of these courses. Students wishing to do research in the field are advised to take courses in international economics, such as 266, and in comparative institutional analysis.

ECON 214. Development Economics: Microeconomic Issues—Microeconomic analysis of markets and institutions in developing countries. Topics: the role of the household; models of savings, credit, and risk; adjustment to aggregate shocks; occupational choice, credit constraints, and credit market imperfections; health and nutrition; new technology; and education. Emphasis is on empirical tests of and evidence for theoretical models.
2-5 units, Aut (Jayachandran, S)

ECON 216. Development Economics and Growth: Macroeconomics—The historical experience of economic development; patterns of economic growth; sources of economic growth; models of economic development (two-gap models, dual economy models, open economy models, new growth models), savings and capital accumulation; the role of money and finance; inflation; taxation; stabilization in closed and open economies with incomplete and/or imperfect markets; human and other forms of intangible capital; infrastructural capital and externalities; income distribution; numerical general equilibrium models.
2-5 units, Win (Mahajan, A, De Giorgi, G)

2-5 units, not given this year

ECON 220. Political Economy I—Positive and normative theories of political economy. Positive topics include direct democracy, electoral competition, legislative policy making, agenda setting, lobbying, comparative constitutions, and intergenerational politics, with applications to income taxation, redistribution, and the size of government. Normative topics include social choice theory with and without interpersonal comparisons, Pareto efficiency with public goods, potential Pareto improvements, welfare measurement, cost benefit analysis, and analysis of economic policy reform.
2-5 units, Aut (Bernheim, D; Hammond, P)

ECON 221. Political Economy II—Continuation of 220. Positive and normative theories of political economy. Focus is on how the structure of political institutions affect societal welfare and economic outcomes. Topics include: measurement of the welfare of a society; constitutional design; models of strategic voting behavior; asymmetries of information and voting behavior; lobbying; vote buying, and political influence; the politics of federations of states; and political decision making regarding economic policies such as taxes, redistribution, and public good provision. Prerequisite: 220.
2-5 units, Win (Jackson, M)

ECON 267. Special Topics in International Economics—The level and growth effects of trade and trade liberalization in neoclassical and endogenous growth models. Empirical evidence (country specific and cross country) on the effects of trade liberalization on growth, poverty, and inequality within and between countries. Implications for national and international policies. Multilateral versus preferential trade liberalization including the Doha round of multilateral trade negotiations.
2-5 units, Spr (Fitzgerald, D)

ECON 315. Development Workshop
1-10 units, Aut, Win, Spr (Mahajan, A; Jayachandran, S; De Giorgi, G)

C. ECONOMIC HISTORY/INSTITUTIONS

The requirement for the field is one research paper on a subject approved by one of the faculty teaching any of the following courses.

ECON 224. Science, Technology, and Economic Growth—Upper-division undergraduates may enroll with consent of instructor. The roles played by the growth of scientific knowledge and technical progress in the development of industrial societies. Emphasis is on the interactions between science and technology, and the organizational factors which have influenced their effectiveness in contributing to productivity growth.
2-5 units, Win (David, P)

ECON 225. Economics of Technology and Innovation—The feedback structure of how technological change affects economic transformations and how scientific progress and economic change shape technological progress; conceptual and formal approaches for analyzing these relationships. Forecasting, economic history, and current techno-economic developments.
2-5 units, not given this year

ECON 226. U.S. Economic History—The American economy from colonial times to the present. The role of economic history as a distinctive intellectual approach to the study of economics. Topics: American growth record and its determinants, the origins and character of U.S. technology, slavery, the Great Depression, recent U.S. performance in historical perspective.
2-5 units, not given this year
ECON 227. European Economic History — Economic growth and development in W. Europe from the 11th-20th centuries, emphasizing the formative period up to the 19th century. Emphasis is on the experiences of Britain, France, Germany, and Italy. The interrelations between the growth and distribution of output, demographic trends, technological and organizational changes in trade and industry, and the changing formal and informal institutions governing political and economic activity.
2-5 units, Win (Greif, A)

ECON 228. Institutions and Organizations in Historical Perspective — Emphasis is on the formative period from the 11th to 18th centuries. Formation, function, and evolution of institutions; alternative conceptual frameworks such as neoclassical, transaction cost economics, institutionalism, and Marxism and neo-Marxism; game theory, mechanism design, and contract theory. Institutions related to trade organization, the organization of production, feudalism, mercantilism, and the state.
2-5 units, Aut (Greif, A)

ECON 229. Topics in Economic History — Emphasis is on institutions and organizations, such as risk-sharing organizations, and property rights, such as patent laws and their effects on technological change and economic growth. Topics include: competing hypotheses for cross-country differences in long-term growth; the importance of institutions to economic growth; formation, function, and persistence of institutions and organizations; role of patent laws in creating incentives for innovation; informal networks as a mechanism to trade property rights; causes and effects of institutional change; tests of contract theory in history; and long-term migration and its effect on economic development.
2-5 units, Aut (Abramitzky, R; Moser, P)

ECON 325A,B,C. Economic History Workshop
1-10 units, A: Aut, B: Win, C: Spr (Greif, A; Wright, G; Abramitzky, R; David, P; Moser, P)

D. MONETARY THEORY AND ADVANCED MACROECONOMICS
Requirements for this field are completion of 233 and 234.

2-5 units, 233; Aut (Amador, M; Jaimovich, N), 234: Win (Klenow, P), 235: Spr (Bloom, N)

E. PUBLIC FINANCE
To receive credit for the field, students must complete 241 and 242 by passing the final examinations, and submit an acceptable research paper on a topic approved by the instructor for either course. Students may take Public Finance as a field and still count 243 and/or 244 toward satisfying their distribution requirements.

2-5 units, not given this year

2-5 units, not given this year

ECON 243. Economics of Environment — Open to upper-division undergraduates with consent of instructor. Sources of environmental problems in market economies and policy options for addressing these problems. Topics: choice of policy instruments (taxes, standards, tradeable permits), environmental risk assessment, valuation of non-marketed commodities (environmental amenities, biodiversity), environmental policy making under uncertainty, the optimal mix of corrective and distortionary tax instruments, and the dynamics of economic growth in the presence of non-reproducible natural resources.
2-5 units, Spr (Goulder, L)

ECON 244. Psychology and Economics — Experimental and field evidence related to the psychological mechanisms behind static choice, intertemporal choice, choice under risk and uncertainty, choice in social situations, and hedonics. Models of economic choice based on these findings, and how they improve the explanatory and predictive value of standard theories. Prerequisites: 204, 271, or consent of instructor.
2-5 units, not given this year

ECON 341. Workshop on the Economics of the Public Sector — Issues in measuring and evaluating the economic performance of government tax, expenditure, debt, and other policies; their effects on private economic activity, saving, investment, labor supply; alternative policies and methods of evaluation. Workshop format combines student research, faculty presentations, and guest speakers. Prerequisite: 241 or consent of instructor.
1-10 units, Aut, Win, Spr (Boskin, M; Shoven, J)

ECON 343. Workshop in Environmental and Natural Resources Economics — Economic analyses of environmental and natural resource problems and policies. Presentations by faculty and graduate students.
1-10 units, Aut, Win, Spr (Goulder, L)

F. ECONOMICS OF LABOR
To receive credit for this field, students must complete two from 246, 247, and 248.

2-5 units, Aut (Pencavel, J)

ECON 247. Labor Economics II — The economics and econometrics of program evaluation. The impact of public policies on labor demand, labor supply, human capital and wage determination. Social, natural, and quasi-experiments.
2-5 units, Win (Pistaferri, L)

ECON 345. Applications Workshop
1-10 units, Aut, Win, Spr (MacCuddy, T; Pencavel, J; Pistaferri, L; Wolak, F; Bloom, N; McClellan, M)

G. ECONOMICS OF INDUSTRY
To receive credit for the field, students must complete 257 and 258 and submit one research paper, the subject of which has been approved in advance by one of the faculty teaching 257, 258, or 260.

ECON 250A. Natural Resource and Energy Economics — First part of two course sequence. Issues in provision and management of non-renewable and renewable natural resources, and energy products and services. Theory and empirical methods related to: market structure, pricing, and performance of important energy and resource industries; sources of market failure in these industries; and alternative regulatory approaches. Prerequisites: 202, 203, 204, 270, 271, and 272, or equivalents with consent of instructor.
2-5 units, not given this year

ECON 250B. Environmental Economics — Second of two course sequence. Sources of environmental problems in market economies; policy options for addressing these problems. Topics include: alternative environmental policy instruments such as taxes, standards, and tradable permits; valuation of non-marketed commodities such as environmental amenities and biodiversity; and environmental policy making under uncertainty. Applications include global climate change and green tax reform. Prerequisites: 202, 203, 204, 270, and 271, or equivalents with consent of the instructor.
2-5 units, not given this year

ECON 283. Advanced Topics in Contracts and Organization — Recent developments and promising research. Topics change from year to year, and may include: reputational concerns and implicit contracts in long-term relationships, property rights and the hold-up problem, multilateral contracting, communication requirements of allocation problems, communication without full commitment. Prerequisite: 282 or consent of instructor.

2-5 units, not given this year

ECON 284. Topics in Dynamic Financial Economics — Dynamic general equilibrium asset pricing and financial volatility. Characteristics of real and financial volatility, the equity risk premium, the term structure of interest rates, and the forward premium. The role of dynamic learning and diversity of beliefs in the propagation of economic volatility, and the relationship of such diversity to money non-neutrality, the real effect of monetary shocks, and real business cycles theories; implications for problems of time consistency in monetary policy, rules versus discretion and alternative monetary rules. Recent papers presented by students. Prerequisites: 204 or equivalent, basic probability theory, or consent of instructor.

2-5 units, not given this year

ECON 285. Market Design — (Same as MGTECON 602.) Analysis of rules that govern the operation of markets with and without the assistance of prices. Emphasis is on markets in which complicated preferences and constraints, limitations on the use of cash, or variations in contract details among bidders decisively impair the performance of simple market rules. Matching markets such as the National Resident Matching Program and airline slot exchanges, asset auctions such as the spectrum auctions, electricity markets, and Internet procurement services.

2-5 units, not given this year (Bulow, J; Skrzypacz, A)

ECON 286. Game Theory and Economic Application — Solution concepts for non-cooperative games, repeated games, games of incomplete information, reputation, and experiments. Standard results and current research topics. Prerequisite: 203 or consent of instructor.

2-5 units, Spr (Levin, J)

ECON 287. General Equilibrium Theory — Existence, efficiency, and Walrasian equilibrium in exchange economies. Production, financial markets, incomplete markets, sequence economies with infinitely-lived agents. Prerequisites: 204 or consent of instructor.

2-5 units, not given this year

ECON 288. Computational Economics — Computational approaches to solving economic problems. Overview of numerical analysis. Economic problems in computationally tractable forms, and the use of numerical analysis techniques to solve them. Examples of problems solved numerically (general equilibrium models, optimal taxation, dynamic programming, economic growth, life-cycle models, intervention in commodity markets, Bayesian econometrics, equilibria of dynamic and repeated games, and nonlinear rational expectations equilibria with asymmetric information). Prerequisite: equivalent of first-year graduate core economics sequence.

2-5 units, not given this year

ECON 290. Multiperson Decision Theory — (Same as MGTECON 608.) Recent research papers on economic applications of decision theory, game theory, and mechanism design. Applications include market design and analyses of incentives and strategic behavior in markets, and topics such as auctions, bargaining, contracting, and computation.

4 units, Spr (Wilson, R)

ECON 292. Comparative Analysis of Organizations and Institutions — Game theoretic; classic and evolutionary analysis of institutions as multiple equilibria. Norms, social embeddedness, organizations as conventions, contract enforcement and corporate governance mechanisms, and states. Institutional complementaries and diachronic institutional linkage.

5 units, not given this year

ECON 385. Mathematical Economics Workshop
1-10 units, Aut, Win, Spr (Hammond, P; Kurz, M)

ECON 391. Microeconomic Theory Seminar — Game theoretic (classic and evolutionary analysis of institutions as multiple equilibria). Norms, social embeddedness, organizations as conventions, contract enforcement and corporate governance mechanisms, and states. Institutional complementaries and diachronic institutional linkage. May be repeated for credit.

1-10 units, Aut, Win, Spr (Segal, I; Levin, J; Milgrom, P; Niederle, M; Bernheim, D; Hammond, P; Kurz, M; Jackson, M)

OVERSEAS STUDIES

Courses approved for the Economics major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

ECON 161X. The German Economy in the Age of Globalization — GER:DB-SocSci
4-5 units, Win (Klein, I)

FLORENCE

ECON 130X. The Euro, the Dollar, and the Developing Countries in a World of Globalization — GER:DB-SocSci, EC-GlobalCom
5 units, Spr (Yotopoulos, P)

KYOTO

ECON 124X. The Political Economy of Japan — (Same as POLISCI 240P) GER:DB-SocSci
4-5 units, Spr (Hayashi, T)

MOSCOW

ECON 120X. Economic Reform and Economic Policy in Modern Russia — GER:DB-SocSci
5 units, Aut (Mau, N)

OXFORD

ECON 131X. British Postwar Economic Policy
4 units, Win (Forder, J)

PARIS

5 units, Spr (Le Cacheux, J)

5 units, Aut (Le Cacheux, J)

SANTIAGO

5 units, Spr (Munoz, O)

ECON 128X. Latin America in the International Economy — GER:DB-SocSci
5 units, Win (Di Filippo, A)

5 units, Aut (Di Filippo, A)
The Department of English seeks to teach and promote understanding of the significance and history of British and American literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis.

Students declaring a major in English Literature during Autumn Quarter 2002 and thereafter must choose a total of twelve 5-unit courses. At least one of these courses must be in American literature and at least one must be in British literature after 1750. The twelve courses must be chosen to fulfill the following six categories of requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in Critical Methods.
6. Five additional elective courses, only one of which may be a creative writing course, chosen from among those offered by the Department of English. Students must select three of these courses from one of the following concentrations:
   a) a specific genre: drama, film, lyric poetry, or prose fiction
   b) a specific historical period: literature before 1750, literature between 1750 and 1900, or literature after 1900
   c) one of the following areas of interest: gender and sexuality; language and rhetoric; literary theory; race and ethnicity; or single authors

Consult the English Department for a list of the courses under each of these concentrations for 2006-07. In lieu of one of these concentrations, students may take three courses from another well-defined area of interest with the approval of their adviser and the Director of Undergraduate Studies.

In place of one of these five elective courses, students may choose one upper-division course in a foreign literature read in the original language.

At least one of the courses satisfying the major must be a major’s seminar, which is any of the 5-unit seminar courses offered in the English department or an English seminar offered in the Stanford in Oxford program at St. Catherine’s College.

Students are urged not to postpone satisfying this requirement until late in their major career. Undue tardiness may result in a delay of degree conferral. Students are encouraged to take seminar format courses in both the junior and senior years.

Students may apply as many as four English courses taken at other approved universities towards the English major. Approval of such courses towards the major is at the discretion of the Director of Undergraduate Studies. Requests for transfer credit, including course syllabi and official transcript, should be submitted to the undergraduate student services coordinator, and to the Office of the University Registrar’s external credit evaluation section.

PREPARATION FOR THE MAJOR

The following departmental requirements are in addition to the University’s basic requirements for the bachelor’s degree. With the exception of the course in Poetry and Poetics or any other when taken to satisfy the Writing in the Major (WIM) requirement, any two of the requisite courses may be taken on a satisfactory/no credit basis at the discretion of the instructor.

MAJOR PROGRAMS OF STUDY

Because the Department of English recognizes that the needs and interests of literature students vary, it has approved several major programs of study. Each of these has different objectives and requirements; students should consider carefully which program of study corresponds most closely to their personal and intellectual objectives. Students who have declared a major before Autumn Quarter 2002 may choose to follow the department’s previous guidelines for the major. Please consult the departmental web site or the undergraduate English coordinator for details about requirements for the major before Autumn 2002.

MAJOR IN ENGLISH LITERATURE

This program provides for the interests of students who wish to understand the range and historical development of British and American literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis.

Students declaring a major in English Literature during Autumn Quarter 2002 and thereafter must choose a total of twelve 5-unit courses. At least one of these courses must be in American literature and at least one must be in British literature after 1750. The twelve courses must be chosen to fulfill the following six categories of requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in Critical Methods.
6. Five additional elective courses, only one of which may be a creative writing course, chosen from among those offered by the Department of English. Students must select three of these courses from one of the following concentrations:
   a) a specific genre: drama, film, lyric poetry, or prose fiction
   b) a specific historical period: literature before 1750, literature between 1750 and 1900, or literature after 1900
   c) one of the following areas of interest: gender and sexuality; language and rhetoric; literary theory; race and ethnicity; or single authors

Consult the English Department for a list of the courses under each of these concentrations for 2006-07. In lieu of one of these concentrations, students may take three courses from another well-defined area of interest with the approval of their adviser and the Director of Undergraduate Studies.

In place of one of these five elective courses, students may choose one upper-division course in a foreign literature read in the original language.

At least one of the courses satisfying the major must be a major’s seminar, which is any of the 5-unit seminar courses offered in the English department or an English seminar offered in the Stanford in Oxford program at St. Catherine’s College.

Students are urged not to postpone satisfying this requirement until late in their major career. Undue tardiness may result in a delay of degree conferral. Students are encouraged to take seminar format courses in both the junior and senior years.

Students may apply as many as four English courses taken at other approved universities towards the English major. Approval of such courses towards the major is at the discretion of the Director of Undergraduate Studies. Requests for transfer credit, including course syllabi and official transcript, should be submitted to the undergraduate student services coordinator, and to the Office of the University Registrar’s external credit evaluation section.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The English Major is designed to provide students with both an understanding of the development of literatures in English and an appreciation of the variety and richness of literary texts. It offers a rigorous training in interpretive thinking and precise expression.

ENGLISH

Emeriti: (Professors) George H. Brown, W. B. Carnochan, George G. Dekker, Charles N. Fifer, Albert J. Gelpi, Barbara C. Gelpi, David Halliburton, Shirley Heath, John L’Heureux, Herbert Lindenberger, John Loftis, Diane W. Middlebrook, Thomas C. Moser, Nancy H. Fucker, Marjorie G. Perloff, Ronald A. Rebholz, Lawrence V. Ryan, Wilfred H. Stone, Elizabeth C. Traugott, Wesley Trimpol; (Associate Professor) Sandra Drake; (Professor—Teaching) Larry Friedlander
Chair: Ramón Saldívar
Director of Creative Writing Program: Eavan Boland
Director of Program in Writing and Rhetoric: Andrea A. Lunsford
Professors: John B. Bender (English, Comparative Literature), Eavan Boland, Terry Castle, W. S. Di Piero (on leave Autumn), J. Martin Evans, John Felstiner, Kenneth W. Fields, Shelley Fisher Fishkin, Jay W. Fliegelman, Roland Greene (English, Comparative Literature), Seth Lerer (English, Comparative Literature), Andrea A. Lunsford (on leave Winter, Spring), Franco Moretti (English, Comparative Literature), Stephen Orgel, Patricia A. Parker (English, Comparative Literature), Peggy Phelan (English, Drama; on leave) Robert M. Polhemus, Arnold Rampersad (on leave), David R. Riggs (on leave), Ramón Saldívar (English, Comparative Literature), Elizabeth Tallent, Tobias Wolff
Associate Professors: Michele Elam, Ursula Heise, Gavin Jones, Paula Moya, Jennifer Smith, Blakey Vermeule, Alex Woloch (on leave)
Assistant Professors: Brett Bourbon, Denise Gigante, Nicholas Jenkins, Robert Kaufman, Siianne Ngai, Judith Richardson, Christopher Rovey
Senior Lecturer: Claude Reichard
Lecturers: Christine Alfano, Andrew Altschul, Shane Book, Valerie Breilinski, Evan Horowitz, Adam Johnson, Tom Kealey, Annette Keogh, David MacDonald, Sara Michas-Martin, Joyce Moser, Hilton Oebenzer, Jeff O’Keefe, Nora Pierce, Linda Paulson, Eric Puchner, Bruce Snider, Edward Steidle, Malena Watrous, Michael Wyatt
Acting Professors: Helen B. Brooks, Carol Shloss
Courtesy Professor: Bryan Wolf
Visiting Professors: Leigh Gilmore, David Morris, Robert Pinsky
Visiting Assistant Professor: Kaiama Glover
Department Offices: Building 460, Room 201
Mail Code: 94305-2087
Phone: (650) 723-2635
Web Site: http://english.stanford.edu

Courses given in English have the subject code ENGLISH. For a complete list of subject codes, see Appendix.

The Department of English seeks to teach and promote an understanding of the significance and history of British and American literatures and to foster an appreciation of the richness and variety of texts in the language. In the undergraduate program, it offers rigorous training in interpretive thinking and precise expression, teaching students to invent ideas, organize them, draw deductions and make connections to new ideas, and articulate them in eloquent and convincing ways. The English graduate program features the study of imaginative language, rhetoric, and the poetic and narrative arts and it focuses on the roles that imaginative writing and representations play in almost every aspect of human experience. Completing the B.A., M.A., or Ph.D. curriculum prepares students of English to adapt, to think, and communicate inventively, and to be cultured and humane in their approach to life.

UNIVERSITY OF SANTA CLARA
**Foreign Language Requirement**—There is no foreign language requirement for English majors beyond the university requirement, but students who plan to study English at the graduate level should be aware that advanced reading skills in one or more foreign languages enhance their chances of admission to and success in most Ph.D. programs.

**EMPHASIS IN THE ENGLISH MAJOR**

**English with a Creative Writing Emphasis**—This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or fiction. Students declaring an English major with a Creative Writing Emphasis during Autumn Quarter 2006 and thereafter must take a total of thirteen 5-unit courses offered through the Department of English and the Program in Creative Writing and fulfill the seminar requirement. The thirteen courses must be chosen to fulfill the following requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in Critical Methods.
6. One course in 20th-century literature.
7. Majors with the Creative Writing Emphasis must take five courses designed for the fiction or the poetry concentration. Fiction writers must first take ENGLISH 90, Fiction Writing, then two quarters of 190, Intermediate Fiction Writing, or 290A, Advanced Fiction Writing. Fiction writers must also take ENGLISH 146, Development of the Short Story, and ENGLISH 92, Reading and Writing Poetry. Poetry writers must first take ENGLISH 92, Reading and Writing Poetry, then two quarters of 192, Intermediate Poetry Writing, or 292, Advanced Poetry Writing. In addition to the WIM course, ENGLISH 160, Poetry and Poetics, poetry writers must take one other course in poetry to be approved by a professor in the Creative Writing program, and English 90, Fiction Writing. Courses taken to satisfy one of the six requirements above cannot also satisfy a Creative Writing requirement. ENGLISH 198 or tutorials taken elsewhere (such as tutorials in the Overseas Studies Program) may not be substituted for required courses. Admission to ENGLISH 290A and 292 is by consent of the instructor and is based on the quality of the student’s work.

**English with Interdisciplinary Emphasis**—This program is intended for students who wish to combine the study of one broadly defined literary topic, period, genre, theme, or problem with an interdisciplinary program of courses relevant to that inquiry. Students are required to fulfill the language and seminar requirements listed under the major in English. Students declaring an English major with an interdisciplinary emphasis during Autumn Quarter 2002 and thereafter must choose a total of fourteen 5-unit courses. These courses must fulfill the following requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in Critical Methods.
6. Three additional elective courses chosen from among those offered by the Department of English. Students must select two of these courses in relation to their interdisciplinary focus.
7. Four courses related to the area of inquiry from disciplines such as anthropology, the arts (including the practice of one of the arts), classics, comparative literature, European or other literature, feminist studies, history, modern thought and literature, political science, and African American studies. These courses should form a coherent program and must be relevant to the focus of the courses chosen by the student to meet the requirement. Each of these courses must be approved in advance by the interdisciplinary program director. In addition, students in the interdisciplinary program must write at least one interdisciplinary paper. This may be a senior honors essay (197), a senior independent essay (199), an individual research paper (194 or 198), or a paper integrating the material in two courses the student is taking in two different disciplines.

**ENGLISH AND PHILOSOPHY**

This new track is for students who wish to explore interdisciplinary studies at the intersection of literature and philosophy while acquiring knowledge of the English language literary tradition as a whole.

Students choosing the English and Philosophy track must complete sixteen courses for a minimum of 70 units, of which at least eight 5-unit courses must be within the English department. At least one course must be in each of American literature and British literature after 1750. At least one course must be an English department seminar. Students must fulfill the following requirements:

**Literature**—
1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750-1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in critical methods.

**Philosophy**—
1. Philosophy Writing in the Major: PHIL 80. Prerequisite: introductory philosophy course.
2. Aesthetics, Ethics, Political Philosophy: a course from PHIL 170 series.
3. Language, Mind, Metaphysics, and Epistemology: one course from PHIL 180 series.
4. History of Philosophy: two courses in the history of philosophy, numbered above PHIL 100.

**Literature and Philosophy**—
1. Gateway course in philosophy and literature (PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
2. Two upper division courses of special relevance to the study of philosophy and literature. A list of approved courses is available from the Director of Undergraduate Studies in English.
3. Capstone seminar of relevance to the study of philosophy and literature, drawn from a list approved by the Director of Undergraduate Studies in English.

**MINORS**

Both the Department of English and the Creative Writing program offer a distinct minor.

**English Literature**—The minor in English Literature offers some flexibility for those students who want to pursue specific interests within British and American literature, while still requiring certain courses that ensure coverage of a variety of periods, genres, and methods of studying literature. In order to graduate with a minor in English, students must complete the following program of seven 5-unit courses, at least one of which must be a seminar:

1. ENGLISH 160. Poetry and Poetics
2. One course from each of the following historical periods:
   a) British literature to 1750
   b) British literature from 1750 to 1900 or American literature before 1900
   c) 20th-century British or American literature
3. One course in Shakespeare
4. Two elective courses

One of the two elective courses may be a course in Creative Writing.

**Creative Writing**—The minor in Creative Writing offers a structured environment in which students interested in writing fiction or poetry develop their skills while receiving an introduction to literary forms. Students choose a concentration in either fiction or poetry. All courses must be taken for a letter grade.

1. ENGLISH 94. Introduction to the Creative Writing Minor
2. Four writing workshops, three in the chosen concentration, one outside.
   a) Fiction minors must first take ENGLISH 90, Fiction Writing, or ENGLISH 94A, Creative Nonfiction, then one or two quarters
of 190, Intermediate Fiction Writing, or 290A Advanced Fiction Writing. The fourth writing course must be ENGLISH 92, Poetry Writing.

b) Poetry minors must first take ENGLISH 92, Poetry Writing, then one or two quarters of 192, Intermediate Poetry Writing, or 292, Advanced Poetry Writing. The fourth writing course must be ENGLISH 90, Fiction Writing.

3. One literature course: fiction minors must take ENGLISH 146, The Development of the Short Story; poetry minors must take ENGLISH 160, Poetry and Poetics.

**INTERDEPARTMENTAL MAJORS**

*English and French Literatures* — This major provides a focus in British and American literature with additional work in French literature. The program of each student must be approved by the Director of Undergraduate Studies in English and by the Department of French and Italian.

Students declaring a major in English and French during Autumn Quarter 2002 and thereafter must choose a total of thirteen 5-unit courses, at least one of which must be a seminar. In addition, at least one of the courses must be in American literature and at least one must be in British literature after 1750. These courses are to be selected from the following categories.

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
5. One course in Critical Methods.
6. Two elective courses.
7. A coherent program of four courses in French literature, read in the original.

*English and German Literatures* — Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in German literature, read in the original, with approval by the departments involved as specified above.

*English and Italian Literatures* — Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in Italian literature, read in the original, with approval by the departments involved as specified above.

*English and Spanish or Spanish American Literatures* — Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in Spanish literature, read in the original, with approval by the departments involved as specified above.

**ADVANCED WORK**

**INDIVIDUAL RESEARCH**

Students taking 100- or 200-level courses may, with the consent of the instructor, write a follow-up 5-unit paper based on the course material and due no later than the end of the succeeding quarter (register for 194). The research paper is written under the direct supervision of the professor; it must be submitted first in a preliminary draft and subsequently in a final version.

**INTEGRATED WORK**

Students taking (either simultaneously or consecutively) two or three courses which have a clear thematic or historical relationship to each other may, with the consent of the relevant instructors, write one large-scale paper of 7,000-10,000 words integrating the material in the courses in question.

**SENIOR INDEPENDENT STUDY**

Independent study is open, on approval by the department, to seniors majoring in English literature who wish to work throughout the year on a critical or scholarly essay of about 10,000 words. In rare circumstances, advisers may nominate exceptional students for honors if the student’s thesis is outstanding and the program of study has been approximately equivalent to that required of regular honors students.

**HONORS PROGRAM**

Students who wish to undertake a more extensive program in English literatures, including the Honors Seminar and independent research, are invited to apply for the honors program in the Winter Quarter of the junior year. All outstanding students are encouraged to engage in an honors thesis project.

Admission is selective. Provisional admission is announced in March. Permission to continue in the program is contingent upon submission, by May 15 of the junior year, of a Senior Honors Essay proposal with a bibliography.

In the Autumn Quarter of the senior year, students take a 5-unit honors seminar on critical approaches to literature. The senior-year seminar is designed to introduce students to the analysis and production of advanced literary scholarship. Students who are studying at Oxford or at other institutions may be exempted from this seminar on request and with the approval of the director of the honors program.

In Winter Quarter of the senior year, honors students take a 3-unit essay workshop focused on the process of researching and writing the essay.

In the senior year, honors students complete the senior honors essay for 10 units under supervision of a faculty adviser.

The deadline for submitting the honors essay is May 15.

Students in the honors program complete all the requirements of the major and the following:

Senior seminar and workshop, 8 units total
Senior Honors Essay, 10 units

**Note** — For other opportunities for extended essay projects, see Senior Independent Essay and ENGLISH 194 and 199.

**HONORS PROGRAM IN HUMANITIES**

An honors program in Humanities is available for English Literature majors who wish to supplement the major with a related and carefully guided program of studies. See the “Interdisciplinary Studies in Humanities” section of this bulletin for a description of the program. Students wishing to take the Comparative Literature option within the honors program in Humanities should see the “Comparative Literature” section of this bulletin.

**THE ENGLISH MAJOR AND THE OVERSEAS CAMPUSES**

The flexibility of the English major permits students to attend an overseas campus in any quarter, but it is advisable, and in some cases essential, that students spend their senior year at Stanford if they wish to participate in the Honors Program or a special in-depth reading course. For more information on Stanford overseas programs, see the “Overseas Studies” section of this bulletin.

Students should consult their advisers and the undergraduate program officer to make sure that they can fulfill the requirements before graduation. The Stanford Program in Oxford usually offers courses which apply toward both University requirements and area requirements for the English major. In either case, students should save the syllabi from their courses if they wish to apply to use them to fulfill an English major requirement.

**VISITING STUDENTS**

Students who do not wish to become candidates for a graduate degree, but who are qualified to meet the standards of admission to a master’s or Ph.D. program, may apply to Graduate Admissions for admission as nonmatriculated students for a period of not more than three consecutive quarters. Each quarter, they may take up to three English courses numbered 101 to 299, or two such courses and (with the consent of the instructor) one English course numbered above 300.
GRADUATE PROGRAMS

For University regulations governing advanced degrees, see the “Graduate Degrees” section of this bulletin.

Eligibility—Students with a bachelor’s degree of acceptable quality may apply to pursue graduate work toward an advanced degree in English at Stanford. (Formal application for candidacy is a separate step taken somewhat later.) Students whose previous preparation is in a field other than English are expected to make up deficiencies. Credits for previous graduate work at Stanford or elsewhere more than five years old may be reevaluated or rejected.

Graduate students are admitted as candidates for only the Ph.D. or the M.A. in English and American Literature. The M.A. program is a terminal, one-year program without financial aid.

MASTER OF ARTS

Candidates may earn the master’s degree in English and American Literature by satisfying the following requirements:

1. Successful completion with a 3.0 (B) grade point average (GPA) of at least nine courses (a minimum of 45 units), two of which must be 300-level courses. Ordinarily, graduate students enroll in courses numbered 200 and above. They may take no more than two courses numbered 101-199 without the consent of the Director of Graduate Studies. The master’s student may take no more than 10 units of directed reading and research (ENGLISH 398). Interested students should consult their faculty adviser or the graduate program adviser for further details.

During the first two weeks of the first quarter, candidates for the master’s degree in English and American Literature should consult the adviser designated by the Director of Graduate Studies in order to draw up a three quarter study plan. The student’s program consists of five required courses: ENGLISH 296; two courses in literature before 1800 and two courses in literature after 1800; plus four elective courses representing a mixture of survey and specialized courses chosen to guarantee familiarity with a reasonable proportion of the works on the reading list for doctoral candidates. Students whose undergraduate transcripts do not show courses in the following areas should take courses in these areas as part of their M.A. program: Medieval, Renaissance, 18th century, 19th century, 20th century (the latter two in either British or American literature). Normally, no more than two courses taken outside the department may count toward the degree, but the graduate studies committee considers exceptions. No creative writing courses may be used to fulfill the requirements.

Candidates who can demonstrate unusually strong preparation in the history of English literature may undertake a 40 to 60-page master’s thesis. Such candidates may register for up to 10 units of ENGLISH 399 with the faculty member who supervises the thesis work. Candidates who write a master’s thesis may petition to be excused from up to 10 units of the requirements described above. The additional 35 units normally consist of the five required courses and two elective courses. These courses are chosen by the student and approved by the adviser and the Director of Graduate Studies.

2. Demonstration of a reading knowledge of one foreign language. (For ways of fulfilling this requirement, see the section below on language requirements for the Ph.D.)

COTERMINAL BACHELOR’S AND MASTER’S DEGREES IN ENGLISH LITERATURE

Students in the major who are interested in further postgraduate work in English may apply for Stanford’s coterminal master’s program. Candidates for a coterminal master’s degree must fulfill all requirements for the M.A. in English (including the language requirement), as well as general and major requirements for the B.A. in English. A minimum GPA of 3.7 in the major is required of those applying for the coterminal master’s degree. Students must also take the GRE exam in the year in which they apply. No courses used to satisfy the B.A. requirements (either as General Education Requirements or department requirements) may be applied toward the M.A. No courses taken more than two quarters prior to admission to the coterminal master’s program may be used to meet the 45-unit University minimum requirement for the master’s degree.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

COTERMINAL PROGRAM WITH SCHOOL OF EDUCATION

Students interested in becoming middle school and high school teachers of English may apply for admission to the Coterminal Teaching Program (CTP) of the Stanford Teacher Education Program (STEP) in the School of Education. CTP students complete a special curriculum in English language, composition, and literature that combines a full English major with supplemental coursework in subjects commonly taught in California public schools and a core program of foundational courses in educational theory and practice. They are then admitted to STEP for a fifth year of pedagogical study and practice teaching. Students who successfully complete the curriculum requirements are able to enter STEP without the necessity of taking either the GRE or the usual subject matter assessment tests. At the end of five years, CTP students receive a B.A. in English, an M.A. in Education, and a California Secondary Teaching Credential. Students normally apply to the Coterminal Teaching Program at the end of their sophomore year or at the beginning of their junior year. For complete program details and for information on how to apply, consult the Director of Undergraduate Studies in English or the CTP coordinator in the School of Education.

DOCTOR OF PHILOSOPHY

University regulations regarding the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin.

The following department requirements, dealing with such matters as residence, dissertation, and examinations, are in addition to the University’s basic requirements for the doctorate. (Students should consult the most recent edition of The Ph.D. Handbook; copies are available in the English graduate studies office.)

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the bachelor’s degree. Candidates are required to complete at least 135 units of graduate work in addition to the doctoral dissertation. At least three consecutive quarters of graduate work, and the final course work in the doctoral program, must be taken at Stanford.

A student may count no more than 65 units of non-graded courses toward the 135 course units required for the Ph.D., without the written consent of the Director of Graduate Studies. A student takes at least 70 graded units (normally fourteen courses) of the 135 required total units (396L, 397A, 398, and 399 do not count toward the 70 graded units). No more than 10 units (normally two courses) may come from 100-level courses.

This program is designed to be completed in five years. Five quarters of supervised teaching, two as a teaching assistant in a literature course, one as a teaching apprentice, and two as the instructor of a Program in Writing and Rhetoric (PWR) course, are a requirement of the Ph.D. program.

In the first quarter of their first year, students take a 2-unit seminar in pedagogy as preparation for their initial teaching assistantship. In the first quarter of their second year, students take a pedagogy seminar and an apprentice teaching program. The seminar and apprentice teaching program constitute a 50-percent teaching appointment. Apprentice teachers attend the classes and conferences of a senior mentor/instructor for two to three weeks. While teaching during the second and third quarters of the second year, students continue to participate in a series of PWR pedagogy workshops and visit one another’s classrooms.
ENGLISH AND AMERICAN LITERATURE

All students are expected to do course work across the full range of English and American literature. Students would be required to fulfill the following requirements. Note: fulfillment of requirements 1, 2, and 3 must be through Stanford courses; students will not be excused from these three requirements or granted credit for course work done elsewhere.

1. ENGLISH 396, Introduction to Graduate Study for Ph.D. Students (5 units), a course that introduces students to the methods of literary study, and ENGLISH 396L, Pedagogy Seminar I, for first year students (2 units).
2. Graduate-level (i.e., at least 200-level) course work in English literature before 1700, and English and American literature after 1700 (at least 5 units of each).
3. Graduate-level (i.e., at least 200-level) course work in some aspect of literary theory (e.g., courses in literary theory itself, narrative theory, poetics, rhetoric, cultural studies, gender studies; at least 5 units).
4. Students concentrating in British literature are expected to take at least one course (5 units) in American literature; students concentrating in American literature are expected to take at least one course (5 units) in British literature.
5. Of all courses taken, a minimum of six courses for a letter grade must be graduate colloquia and seminars, of which at least three must be graduate seminars. The colloquia and seminars should be from different genres and periods, as approved by the adviser.
6. Completion, in Autumn Quarter of the second year, of a pedagogy seminar which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during Winter and Spring quarters. There are no units associated with this work.
7. The remaining units of graded, graduate-level courses and seminars should be distributed according to the adviser’s judgment and the candidate’s needs. A student may receive graduate credit for no more than two 100-level courses in the Department of English.
8. Consent of the adviser if courses taken outside the Department of English are to count toward the requirement of 70 graded units of course work.
9. An oral qualifying examination based on a reading guide, to be taken at the end of the summer after the first year of graduate work. The final decision as to qualification is made by the graduate studies committee in consideration of the student’s overall record for the first year’s work in conjunction with performance on the examination. Note: A student coming to the doctoral program who has done graduate work at another university must petition in the first year at Stanford for transfer credit for course work completed elsewhere. The petition should list the courses and grades, and describe the nature and scope of course work, as well as the content, contact hours, and writing requirements. A syllabus must be included. The Director of Graduate Studies considers the petition in conjunction with the student’s overall performance.

ENGLISH AND COMPARATIVE LITERATURE

The Ph.D. program in English and Comparative Literature is designed for students wishing an extensive knowledge of the literature, thought, and history of Europe and that of at least one foreign country, for one period. Approximately half of the student’s course work and reading is devoted to this period, with the remainder of the time given to other periods of English and American literature since 1350.

This degree, administered by the Department of English, is to be distinguished from the Ph.D. in Comparative Literature. The latter program is intended for students unusually well prepared in foreign languages and involves advanced work in three literatures, one of which may be English. Interested students should contact a Department of English adviser, but faculty from Comparative Literature may also provide useful supplementary information.

The requirements are as follows:

1. Qualifications: see item 9 under requirements of the Ph.D. program in English literature. For qualifications in the doctoral program in English and Comparative Literature, candidates are not held responsible for literature before 1350, but instead include on their reading list a selection of works from a foreign literature read in the original language.
2. A knowledge of the basic structure of the English language and of Chaucer. This requirement may be met by examination, or by taking 10 units of courses chosen from among those offered in linguistics, English philology, and early and middle English literature including Chaucer. No particular courses are required of all students.
3. A 5-unit course, ENGLISH 396, Introduction to Graduate Study, and a 2-unit course, ENGLISH 396L, Seminar in Pedagogy I.
4. Completion, in Autumn Quarter of the second year, of a pedagogy seminar, which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during winter and spring quarter. There are no units associated with this work.
5. A knowledge of one foreign language sufficient to take graduate-level literature courses in a foreign-language department and an advanced reading knowledge of a second language.
6. A minimum of 45 units in the history, thought, and literature of one period, in two or more languages, one of which must be English and one foreign. Students normally include at least two courses in a foreign literature read in the original language and two courses listed under Comparative Literature or Modern Thought and Literature. As many as 20 units of this requirement may be satisfied through courses in reading and research. A student may receive graduate credit for no more than two 100-level courses in the Department of English.
7. A minimum of six courses for a letter grade from graduate colloquia and graduate seminars, of which three must be graduate seminars and of which at least four must be in the Department of English. Among these courses, students should take one in literary theory or criticism. These colloquia and seminars should be in different genres and periods as approved by the adviser.
8. A University oral examination covering the field of concentration (as defined by the student and the student’s adviser). This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study. However, those who spend the third year studying abroad may take this examination after their return early in the fourth year.

LANGUAGE REQUIREMENTS

All candidates for the Ph.D. degree (except those in English and Comparative Literature, for whom special language requirements prevail) must demonstrate a reading knowledge of two foreign languages. Candidates in the earlier periods must offer Latin and one of the following languages: French, German, Greek, Italian, or Spanish. In some instances, they may be required to offer a third language. Candidates in the later period (that is, after the Renaissance) must offer either French, German, or Latin as one language and may choose the second language from the following: Greek, Latin, French, German, Italian, Spanish, Russian, or another language relevant to the student’s field of study. In all cases, the choice of languages offered must have the approval of the candidate’s adviser. Any substitution of another language must be approved by the Director of Graduate Studies.

The graduate studies committee does not accept courses taken as an undergraduate in satisfaction of the language requirement for doctoral candidates. For students coming to doctoral work at Stanford from graduate work done elsewhere, satisfaction of a foreign language requirement is determined by the Director of Graduate Studies based on the contact hours, syllabus, reading list, etc. Transfer is not automatic.

The candidate must satisfy one language requirement by the end of the first year (that is, before registration in the following year), and the other by the end of the third year.
Foreign language requirements for the Ph.D. may be fulfilled in any of the following ways:

1. A reading examination given each quarter by the various language departments, except for Latin and Greek.
2. For Latin and Greek, an examination by the Department of English. The Latin examination is given before registration in the Autumn Quarter in order to permit those who need the course to register for Latin 3. It is also given in the eighth week of the Winter and Spring quarters, along with other department examinations for languages not tested by the Educational Testing Service.
3. Passage with a grade of ‘B’ or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford. As an alternative for Latin, French, Italian, German, and Spanish, passage of CLASSLAT 51 and 52, FRENLANG 50, ITALLANG 50, GERLANG 52, and SPANLANG 50, respectively, with a grade of ‘B’ or higher.

CANDIDACY

Students are expected to file for candidacy after successful completion of qualifying procedures and, in any event, by the end of the second year of doctoral study. Candidacy is valid for five years, and may be extended, subject to satisfactory progress.

DISSERTATION

As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work.

Immediately after the dissertation topic has been approved by the adviser, the candidate should file a formal reading committee form as prescribed by the University.

The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.

JOINT PH.D. IN ENGLISH AND HUMANITIES

The Department of English participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in English and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

PH.D. IN MODERN THOUGHT AND LITERATURE

Stanford also offers a Ph.D. degree in Modern Thought and Literature. Under this program, students devote approximately half of their time to a modern literature from the Enlightenment to the present, and the other half to interdisciplinary studies. Interested students should see the “Modern Thought and Literature” section of this bulletin and consult the chair of the program.

CREATIVE WRITING FELLOWSHIPS

The Creative Writing Program each year offers five two-year fellowships in poetry and five two-year fellowships in fiction. These are not degree-granting fellowships. Information is available in the Creative Writing office, (650) 725-1208.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

NUMBERING SYSTEM

Pre-1750:
100-110 Lecture Courses
111-119 Seminar Courses
1750-1900:
120-129 Lecture Courses
130-139 Seminar Courses
Post-1900:
140-149 Lecture Courses
150-159 Seminar Courses

Required Courses:
160-169
Themes and Topics:
170-179 Lecture Courses
180-189 Seminar Courses
Courses for Advanced Undergraduates and Graduate Students:
200-289
Graduate Colloquia:
300-313
Graduate Seminars:
314-389
Writing Courses, Workshops, Individual Study:
90-99, 190-199, 290-299, 390-399

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by English department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in English are advised to consider satisfying their IHUM-2,3 requirements by registering for the following IHUM courses.

IHUM 37A.B. Literature into Life: Alternative Worlds—The genres of poetry, drama, and fiction from the Renaissance to the present day, focusing on the relationship between art and life. How does literature come alive on the page? What goes into a vivid representation of lived social experience? How do writers respond to historical crises? Parallel cases from art and music. GER:IHUM-2,3

IHUM 37A: 5 units, Win (Steidle, E)
IHUM 37B: 5 units, Spr (Felstiner, J)

INTRODUCTORY (FOR NON-MAJORS)

Classes for students whose major is undeclared, or who are not majoring in English.

ENGLISH 4B. Medieval Women: Faith, Love, and Learning—(English majors and others taking 5 units, register for 104B.) Writings of and about medieval women in connection with courtly love and Arthurian literature, religious and mystical writing, visual culture, and early debates about the roles of women. How women forged literary identities in the face of opposition. Readings from the courtly poets, Marie de France, Chrétien’s Lancelot, Heloise and Abelard, male and female mystics, and Christine de Pisan. Readings in English. GER:DB-Hum 3 units, Win (Summit, J)
3 units, Spr (Evans, M)

ENGLISH 20. Masterpieces of English Literature II: From the Enlightenment to the Modern Period — (English majors and others taking 5 units, register for 120.) From the 18th to the 20th centuries. Topics include the rise of the novel, lyric and dramatic poetry, Romanticism, realism, Modernism, characterization, narrative voice, and the influence of history on literature. GER:DB-Hum
3 units, Aut (Horowitz, E)

ENGLISH 21. Masterpieces of American Literature — (English majors and others taking 5 units, register for 121.) From the Puritans to contemporary literature. Emphasis is on how Americans have defined their identity in relation to changing environments, including the wilderness encountered by first settlers, the 19th-century frontier, the early 20th-century metropolis, and the transnational and virtual spaces of the late 20th century. Readings include nonfiction by Edwards, Thoreau, and Emerson, poetry by Whitman, William Carlos Williams, and Denise Levertov, and novels by Willa Cather, John Dos Passos and Leslie Marmon Silko. GER:DB-Hum
3 units, Aut (Heise, U)

ENGLISH 42B. The Films of Woody Allen — (English majors and others taking 5 units, register for 142B.) Allen as one of the most influential, prolific, and controversial filmmakers. His comic vision, attitudes towards sex and gender relations, and cultural importance. The development of his career and work. GER:DB-Hum
3 units, Spr (Polhemus, R)

ENGLISH 45. Writings by Women of Color — (English majors and others taking 5 units, register for 145.) Novels, poems, and essays. Themes include family relations, identity formation, racism and colorism, gender and sexuality, spirituality, and globalization. Rhetorical and aesthetic strategies and the associated development of a method of cultural analysis. GER:DB-Hum, EC-Gender
3 units, Win (Moya, P)

ENGLISH 47. Masterpieces of Contemporary Literature — (English majors and others taking 5 units, register for 147.) British and American contemporary experimental and realist fiction. Focus is on fiction investigating love and war. GER:DB-Hum
3 units, Spr (Bourbon, B)

ENGLISH 60. Poetry and Poetics — (English majors and others taking 5 units, register for 160.) Introduction to the reading of poetry, with emphasis on how the sense of poems is shaped through diction, imagery, and technical elements of verse. GER:DB-Hum
3 units, Aut (Jenkins, N), Win (Lerer, S), Spr (Boland, E)

INTRODUCTORY SEMINARS

ENGLISH 52N. Top Ten Books — Stanford Introductory Seminar. Preference to freshmen. The books most frequently taught in U.S. English departments including classics by Nathaniel Hawthorne and F. Scott Fitzgerald and recent works by minority writers such as Toni Morrison and Maxine Hong Kingston. Cultural and historical contexts, and the aesthetic and social factors that canonize these literary supertexts. GER:DB-Hum
3 units, Win (Jones, G)

ENGLISH 53N. Winners of the Nobel Prize in Literature — Stanford Introductory Seminar. Preference to freshmen. The nature of meritorious contemporary fiction and the cultural politics and economics of prize winning. The actual process of selection; what should be taken into account in making judgments about an award such as the Nobel Prize. Writers such as John Coetzee, Günter Grass, Toni Morrison, Elfriede Jelinek, V.S. Naipaul, Gao Xingjian, José Saramago, and Gabriel García Márquez. GER:DB-Hum
3 units, Win (Shlos, C)

ENGLISH 62N. Eros in Modern American Poetry — Stanford Introductory Seminar. Preference to freshmen. Anne Carson, treating love from Sappho to Socrates, shows how the Greeks derived their philosophy from the erotic poetic tradition. Readings include: Carson’s own poetry, which locates erotic desire in the larger context of the desire for knowledge; classic Japanese haiku masters such as Basho; and William Carlos Williams, Louise Bogan, and C.K. Williams. GER:DB-Hum
3 units, Win (Fields, K)

ENGLISH 64N. Growing Up in America — Stanford Introductory Seminar. Preference to freshmen. How do race, class, gender, sexuality, and geography affect a person’s experience of belonging to this country? The diversity of childhood and young adult experiences of people who have grown up in America. Fictional and autobiographical narratives and their rhetorical and aesthetic strategies. GER:DB-Hum
3 units, Aut (Moya, P)

3 units, Spr (Tallent, E)

ENGLISH 68N. Mark Twain and American Culture — (Same as AMSTUD 68N.) Stanford Introductory Seminar. Preference to freshmen. Mark Twain defined the rhythms of American prose, the contours of its moral map, and its promise, failures, foibles, and flaws. Focus is on how his work provides a window on his time and speaks to the present. Sources include his travel books, journalism, short stories, and novels. GER:DB-Hum
4 units, Aut (Fishkin, S)

ENGLISH 69Q. Sources of Global Challenges Today. Possibilities for Global Solutions: A Literary Exploration — Stanford Introductory Seminar. Preference to sophomores. Concerns central to literary study, comparative study in race and ethnicity, and African and African American Studies as expressed in fiction from Africa, the Caribbean, the U.S., and Hawai‘i. Issues include: relations between the West and the Muslim world; class and race in the U.S.; the shift of world populations from rural society to the metropolis; international immigration and refugee situations; and how women’s lives are impacted by society, and how they shape and change it. Opportunities for dialogue with members of local ethnic and religious communities. GER:DB-Hum
3-5 units, Aut (Drake, S)

ENGLISH 77N. Living in the Past: Italy in the Anglo-American Imagination — Stanford Introductory Seminar. Preference to freshmen. Italy as metaphor. English and American images of Italy, its people, and its culture from the Renaissance to the present. GER:DB-Hum
3 units, Aut (Evans, M)

ENGLISH 82Q. Shakespeare’s Plays — Stanford Introductory Seminar. Preference to sophomores. Eight representative plays; sonnets. Student papers provide topics for discussion. Students direct and perform scenes from the plays studied. GER:DB-Hum
5 units, Win (Rebholz, R)
ENGLISH 83Q. Playwriting: A Workshop in Craft — Stanford Introductory Seminar. Preference to sophomores. The fundamentals of crafting a stage play, including genre, dialogue, characterization, and plot. Professional models for such craft elements, and newer approaches. Students develop a dramatic idea into a more polished version of a scene or short one-act play to demonstrate the elements of stagecraft.

4 units, Aut (DiPirro, K)

ENGLISH 84N. Workshop in Shakespeare and Performance — Stanford Introductory Seminar. Preference to sophomores. Textual and performance analysis and scene work of five major Shakespearean works. Film viewings reveal how different visions of a play emerge through the process of theatrical production and contrast Shakespeare's techniques with modern ones. No background in acting or theater required. GER: DB-Hum

3 units, Win (Friedlander, L)

PRE 1750
Lecture courses: 100-109 Seminar courses: 110-119

ENGLISH 102. Chaucer — Chaucer's verbal art in the context of medieval literary traditions, focusing on The Canterbury Tales. GER: DB-Hum

5 units, Spr (Lerer, S)

ENGLISH 104B. Medieval Women: Faith, Love, and Learning — (Same as 4B; see 4B.) GER:DB-Hum

5 units, Win (Summit, J)

5 units, Aut (Wyatt, M)

ENGLISH 107A. Eighteenth-Century Satire — Satire as a cultural universal. The commitment and intensity of 18th-century British satire, by turns funny, brutal, scabrous, and melancholy. How satire tends to focus on sex and power. The role of satire in contemporary American culture: when does speech become too hot to handle? Authors include Horace, Juvenal, Swift, Pope, Johnson, Burney, Voltaire, and Orwell. GER:DB-Hum

5 units, Win (Vermeule, B)

ENGLISH 109. Masterpieces of English Literature I: Chaucer, Shakespeare, Milton, and their Contemporaries — (Same as 9; see 9.) GER:DB-Hum

5 units, Spr (Evans, M)

ENGLISH 112A. Wicked Witches of the West: Dangerous Women in Greek and Shakespearean Tragedy — Workshop. Women who fascinate, control, and frighten men in classical and Elizabethan drama. The presentation of women in three pairs of Greek and Elizabethan plays and in two 20th-century works. Theatrical styles of each period through doing scenes, watching films, and the history of theater. No background in performing required. GER:DB-Hum

5 units, Aut (Friedlander, L)

ENGLISH 113C. The Two Elizabets — Parallel issues in the reigns of Elizabeth I (1558-1603) and Elizabeth II (1953-present) through the written cultures of their periods, and critical essays from disciplines and sources including film and music. Themes include insularity, language, religion, politics, class, gender, the other, popular culture, and critics. GER:DB-Hum

5 units, Aut (Wyatt, M)

ENGLISH 115A. Shakespeare and Modern Critical Developments — Approaches include gender studies and feminism, race studies, Shakespeare's geographies in relation to the field of cultural geography, and the importance of religion in the period. GER:DB-Hum

5 units, Spr (Parker, P)

5 units, Spr (Evans, M)

ENGLISH 116C. Restoration Literature — The 1660 return of the court after the Civil War and the flowering of literature and culture much of which focused on the king as charismatic and fascinating, yet embittered, lazy, dissolute, and promiscuous. The ambivalence provoked by the Stuart court. Literature that focuses on the figure of Satan, such as Paradise Lost. Why Satan becomes such a powerful figure in the culture's imagination. Issues such as transgression, sexuality, regicide, and heroism. GER:DB-Hum

5 units, Win (Vermeule, B)

1750-1900
Lecture courses: 120-129 Seminar courses: 130-139

ENGLISH 120. Masterpieces of English Literature II: From the Enlightenment to the Modern Period — (Same as 20; see 20.) GER: DB-Hum

5 units, Aut (Horowitz, E)

ENGLISH 121. Masterpieces of American Literature — (Same as 21; see 21.) GER:DB-Hum

5 units, Aut (Heise, U)

ENGLISH 122. Jane Austen into Film — (Same as 22; see 22.) GER: DB-Hum

5 units, Win (Shloss, C)

ENGLISH 123. American Literature and Culture to 1855 — (Same as AMSTUD 150.) Major issues in early American cultural and literary history; developments in the fine and domestic arts; and methodological issues central to American Studies. Texts include Cotton Mather and Melville. GER:DB-Hum, EC-AmerCul

5 units, Win (Fliegelman, J)

ENGLISH 124. The Eighteenth-Century British Novel — Authors include Behn and Sterne. GER:DB-Hum

5 units, Aut (Castle, T)

ENGLISH 126F. Two Victorian Autobiographies: David Copperfield and Jane Eyre — How these female and male narratives of orphanhood make heroic selves of the authors' alter egos; how Brontë and Dickens tell the story of a cast-off child who journeys through writing toward an articulate authority. The novels as fictional autobiography, gendered versions of the 19th-century trope of orphanhood, and parts of the time in which they were written. GER:DB-Hum

5 units, Spr (Paulson, L)

ENGLISH 134A. Gothic and Historical Fiction in Nineteenth-Century Britain — Gothic templates and historical contexts in romance novels by authors including Scott, Austen, and Charlotte Brontë. GER:DB-Hum

5 units, Win (Dekker, G)

ENGLISH 134C. Detectives, Criminals, and Monsters — The role of monsters and criminals in 19th-century literature, and how the hero, often a detective, turns out to be the villain or tracks the monster to his own house. Detective stories by Edgar Allan Poe and Arthur Conan Doyle, gothic novels including Frankenstein to Dracula, and films including Nosferatu and Apocalypse Now. GER:DB-Hum

5 units, Aut (Horowitz, E)

ENGLISH 135. Victorian Poetry — Rhythms, stanzas, topics, words, and ideas produced by poets including Alfred Tennyson, Matthew Arnold, Christina and Dante Gabriel Rossetti, Robert Browning, Thomas Hardy, and Gerald Manley Hopkins. Social contexts including science, masculinity, religion, history, aestheticism, gender, and sexuality. GER:DB-Hum

5 units, Spr (Gigante, D)
ENGLISH 135E. William Blake: Poet and Painter — (Same as HUMN'TIES 194G.) Introduction to the illuminated poetry of William Blake, romantic visionary, poet, artist, religious renegade, political revolutionary, philosopher, mythological historiographer, social misfit, and critic. GER:DB-Hum
5 units, Spr (Gigante, D)

ENGLISH 135G. The Brontes — The novels and lives of Charlotte, Anne, and Emily Bronte in the context of mid-Victorian culture. Readings include Jane Eyre, Villette, Tenant of Wildfell Hall, and Wuthering Heights. GER:DB-Hum
5 units, Spr (Alfano, C)

ENGLISH 136. Romantic Poetry and Poetics — Major Romantic writers including William Blake, William Wordsworth, Samuel Taylor Coleridge, Percy Bysshe Shelley, and John Keats. Focus is on form such as the lyrical ballad, ode, epic romance, and closet drama. GER:DB-Hum
5 units, Aut (Gigante, D)

5 units, Aut (Rovee, C)

ENGLISH 138C. Huckleberry Finn and American Culture — (Same as AMSTUD 138C.) From publication to the present, Mark Twain’s Adventures of Huckleberry Finn has generated widespread disagreement over what it is, what it does, and why it should be valued. The literature, history, and popular culture that shaped the novel, and that it helped shape. Topics include vernacular traditions in American literature, the history of racism in American society, and the role of African American voices in shaping the text. GER:DB-Hum
5 units, Win (Fishkin, S)

POST 1900
Lecture courses: 140-149
Seminar courses: 150-159

ENGLISH 140A. Imagining the Holocaust — Literature, music, art, and photography that emerged from the European Jewish catastrophe. Sources include Elie Wiesel, Primo Levi, Dan Pagis, Paul Celan, Charlotte Salomon, Bernard Malamud, Philip Roth, and Cynthia Ozick. Guest lecture by Holocaust survivor. GER:DB-Hum
5 units, Spr (Felsiner, J)

ENGLISH 141. British Literature and Culture of the 1930s — A period shadowed by economic crisis and impending war. Sources include: novels by Woolf, Isherwood, Bowen, and Waugh; poetry by Auden, Spender, and Eliot; documentary and dramatic films; and painting and photography. GER:DB-Hum
5 units, Spr (Jenkins, N)

ENGLISH 142. American Film: The Western — The American western movie as a perennial force complementing American film noir. Films by classic directors such as Boetticher, Hawks, Ford, Altman. Representation of male roles in western movies. GER:DB-Hum
5 units, Aut (Fields, K)

ENGLISH 142B. The Films of Woody Allen — (Same as 42B; see 42B.) GER:DB-Hum
5 units, Spr (Polhemus, R)

ENGLISH 144. British Modernism — How modernist poems and novels attempt to link the grammar of sentences to the sense and nonsense of lives, minds, and social worlds. The complex and fantastic linguistic, psychological, and social worlds of modernist literature as revealing the sense of people’s lives or as entrapments in aesthetic extravagance. GER:DB-Hum
5 units, Aut (Bourbon, B)

ENGLISH 145. Writings by Women of Color — (Same as 45; see 45.) GER:DB-Hum, EC-Gender
5 units, Win (Moya, P)

ENGLISH 145E. Golden States: California in Film and Fiction — Mythologies of California in the writings of authors such as Mark Twain, Nathaniel West, General Vallejo, Ambrose Bierce, John Steinbeck, Sui Sin Far, Walter Mosley, Robinson Jeffers, and Allen Ginsburg, and in movies such as Sunset Boulevard, A Star is Born, The Maltese Falcon, Rebel Without a Cause, Chinatown, L.A. Confidential, and Pulp Fiction. GER:DB-Hum
5 units, Spr (Moser, J)

ENGLISH 146. Development of the Short Story: Continuity and Innovation — Required for Creative Writing emphasis and minor. Writers include Gogol, Flaubert, Chekhov, Woolf, and Munro with the majority of texts Modernist or earlier. Emphasis is on the conversation among writers, how texts influence each other, and imaginative leaps resulting in innovations in form. Writers’ rendering of gender and sexual orientation. No previous experience in English courses required. GER:DB-Hum
5 units, Win (Tallent, E)

ENGLISH 147. Masterpieces of Contemporary Literature — (Same as 47; see 47.) GER:DB-Hum
5 units, Spr (Bourbon, B)

5 units, Win (Di Piero, S)

ENGLISH 150C. W.H. Auden — His plays, film scripts, opera libretti, essays, lyrics, and longer poems in the context of 20th-century poetic and cultural history. His impact on later writers, and redeploys of Auden and his writing at moments in British popular culture such as the Princess of Wales’ funeral. GER:DB-Hum
5 units, Win (Jenkins, N)

ENGLISH 150E. Contemporary American Lyric Poetry — Why today’s American poets often think that lyric genre, form, or modality enables access to and creation of a literary-aesthetic experience unique for its potential contributions to cognitive, ethical, and political agency. Poets include Hass, Graham, Ginsberg, Ashbery, Baraka, Guest, Palmer, Howe, and Mackey. Criticism and theory. Prerequisite: background in 19th-20th century poetry. GER:DB-Hum
5 units, Spr (Kaufman, R)

ENGLISH 151. American Imaginations — Major American poets of the modern period, emphasizing the pattern making idiosyncrasies of each poet. Poets may include: William Carlos Williams, Marianne Moore, Elizabeth Bishop, Lorine Niedecker, and Robert Hayden. GER:DB-Hum
5 units, Win (Di Piero, S)

ENGLISH 151A. Poetry after Postmodernism: Robert Duncan and his Legacies — Late modernist or postmodernist? Readings in Duncan’s poetry and prose, and his fellow poets and critics, emphasizing how they understand their work in relation to earlier modernism and incipient postmodernism. How they influenced contemporary poetry and art in light of the question in current American culture of what comes after postmodernism. GER:DB-Hum
5 units, Win (Kaufman, R)

ENGLISH 152C. Harlem Renaissance — African American cultural and literary expression during the 20s and 30s concerning relationships between the talented tenth and the folk, the new Negro and modernity, art and politics, white patronage and black creativity, racial expression and class aspiration, American patriotism and black cultural nationalism, racial memory and Africa, passing and colorism, racial uplift and sexual transgression, and race pride and religious apostasy. Sources include poetry, prose, and aesthetic and political manifestos, graphic arts, and music. GER:DB-Hum
5 units, Spr (Elam, M)
ENGLISH 153G. Technology, Ecology, and the Imagination of the Future—(Same as STS 114.) Seminar. Literary visions of the future from the 60s to the present. How such texts imagine new and existing technologies in interrelation with the evolution of natural ecosystems. The development of wild habitats, alterations of the human body, and visions of the future city. The role of images and stories about globalization. Literary, scientific, and technical texts. GER:DB-Hum
5 units, Spr (Heise, U)

ENGLISH 154E. Twentieth-Century Irish Literature—Plays, poems, short stories, and novels. Writers include James Joyce, WilliamYeats, Mary Lavin, Kate O’Brien, William Trevor, Seamus Heaney, and Samuel Beckett. How the writer can sustainer imagine inherent freedom and literary experiment in the face of a turbulent history. GER:DB-Hum
5 units, Spr (Boland, E)

REQUIRED COURSES

Lecture courses: 160-169; there are no required seminar courses.

ENGLISH 160. Poetry and Poetics—(Same as 60; see 60.) GER-DB-Hum, WIM
5 units, Aut (Jenkins, N), Win (Lerer, S), Spr (Boland, E)

ENGLISH 163. Shakespeare—Major plays emphasizing theatrical representation of extreme characters. GER:DB-Hum
5 units, Aut, Win (Orgel, S)

THEMES AND TOPICS

Lecture courses: 170-179
Seminar courses: 180-189

ENGLISH 170A. Introduction to Critical Theory: Literary Theory and Criticism Since Plato—(Graduate students register for 270A.) The history of attempts to define, locate, or engage the literary; to understand it in relation to philosophy, history, politics, sexuality, gender, race, psychology, and language; and to understand how literature, art, and the aesthetic realm contribute to objective knowledge and ethical and sociopolitical agency. GER:DB-Hum
5 units, Win (Kaufman, R)

ENGLISH 172E. The Literature of the Americas—(Same as COMPLIT 142.) Representations of the creation of an American new world experience, myths of America as utopia, and critiques of notions of the self and the nation to which such myths give rise in political, historical, literary, and mass media forms. Readings include Columbus, Bernal Díaz del Castillo, Aztec codices, Sor Juana, Toqueville, Fenimore Cooper, Whitman, Machado de Assis, Mario de Andrade, Marti, Neruda, Williams, Rulfio, Faulkner, Morrison, and Sandra Cisneros. GER:DB-Hum, EC-AmerCul
5 units, Aut (Greene, R; Saldívar, R)

ENGLISH 173. American Comedy and Satire: Topics in Laughter and Ethics—Theories and history of American comedy and satire with focus on ethical dimensions. The ability of what Mark Twain called the assault of laughter to dethrone power, pretension, and social inequality. Theories of laughter by thinkers including Kant, Bakhtin, and Bergsons. Fiction, film and performance, including works by Mark Twain, Charlie Chaplin, and Kurt Vonnegut. GER:DB-Hum
5 units, Spr (Obenzinger, H)

ENGLISH 180D. Writing the Unhomely: The Afro-Caribbean Experience—The metaphorical yet tangible Afro-Caribbean experience of the unhomely: the forced uprooting of the middle passage, the sociopolitical and historical unrootedness in the New World, the voluntary uprooting of migration to Europe and the U.S. The idea of home and the homeland in fictional and theoretical texts of the Anglocphone and Francophone Caribbean diaspora. GER:DB-Hum
5 units, Spr (Glover, K)

ENGLISH 181A. Adventures in Religious Poetry—(Same as RELIGST 181A.) Poetry manifesting religious themes from Western and Chinese traditions. GER:DB-Hum
5 units, Win (Yearley, L; Fields, K)

ENGLISH 182A. Global Literary Citizenship—The relationship between national literary traditions and transnational critical practices; changing markets for literature and the forces of globalization that shape them; cultural phenomena such as taste, book reviewing and literary prizes; the evolution of literary value and its production; and the intimate and personal experience of reading in a global public sphere. Sources include recent fiction. GER:DB-Hum
5 units, Aut (Gilmore, L)

ENGLISH 182E. Photography and Literature—(Same as HUMNTIES 194R.) How issues raised by birth of photography and photography’s prehistory are manifested in 19th-century literature. Readings in photographic theory by Marx, Benjamin, Barthes, Sontag, and Batchen; poems by Wordsworth, Browning, and Tennyson; and novels by Shelley, Dickens, and Wilde. GER:DB-Hum
5 units, Spr (Rovee, C)

ENGLISH 183A. The Paranoid Imagination: Case Studies in Literature, Theory, and Film—Preference to majors. The idea of a paranoid aesthetic in postwar American culture and modernity in general. Novels by Himes, Pynchon, and Delillo; theoretical texts about modernity, abstract systems, risk, technology, and environmental illness by cultural analysts such as Anthony Giddens, Fredric Jameson, Michel Foucault, Richard Hofstadter, Bruce Robbins, and Kathleen Woodward. GER:DB-Hum
5 units, Spr (Ngai, S)

ENGLISH 183B. Problems in Literature and Ethics—The study of literature as an education in how to picture and understand human situations. Because literary fictions represent persons, events, and actions, they concern what philosophy calls ethics. How fictions and poems can reveal the possibilities and troubles of people’s lives and help them to think about how to live. How ways of reading can be modes of practical reasoning. GER:DB-Hum
5 units, Spr (Bourbon, B)

ENGLISH 183C. Feminist Theory and Twentieth-Century Culture—Major theoretical writings with a focus on internal debates within feminism. Writers include Laura Mulvey, Mary Ann Doane, Linda Williams, Susan Gubar, Denise Riley, Audre Lorde, Monique Wittig, Judith Butler, Rita Felski, Barbara Johnson, and Rey Chow. GER:DB-Hum
5 units, Spr (Ngai, S)

ENGLISH 183D. The Author as Problem—Preference to English majors. Changing concepts of the author in theories of literary interpretation including T.S. Eliot and Stanley Fish. Authorship as a lens for examining modern ideas about property, originality, reproducibility, anonymity, and personhood in works by or about writers perceived as controversial: Henry James, Sylvia Plath, Philip Roth, Araki Yasusada, J.M. Coetzee, and Richard Powers. GER:DB-Hum
5 units, Win (Ngai, S)

5 units, Win (Castle, T)
ENGLISH 184C. Texts in History: Medieval to Early Modern — (Same as HUMNTIES 162.) Priority to students in the Humanities honors program. The impact of change from the Middle Ages to the early modern world; how historical pressures challenged conceptions of artistic form, self, divine, and the physical universe. Interdisciplinary methods of interpretation. Texts include: Aristotle, On the Soul; Attar, The Conference of the Birds; Dante, Inferno; Chaucer, Canterbury Tales; Christine de Pizan, The Book of the City of Ladies; Letters of Columbus; Machiavelli, The Prince; Luther, The Bondage of the Will; Montaigne, Essays; Marlowe, Doctor Faustus; poems by John Donne and Lady Mary Wroth; Shakespeare, Othello; and works of art. GER:DB-Hum
5 units, Win (Brooks, H)

ENGLISH 185A. Illness Narratives — (Same as HUMBHO 176.) Interdisciplinary. How the experience of illness is constituted at the intersection of biology and culture. The concept of narrative medicine as a context for examining fiction and nonfiction by patients including Virginia Woolf and William Styron, and by physicians including William Carlos Williams and Rafael Campo. Classic essays from medical journals or contemporary theorists. The intertwined perspectives of biology and culture in the context of unseen forces such as the healthcare expenditure and uneven access to it. GER:DB-Hum
5 units, Win (Morris, D)

ENGLISH 186A. American Hauntings — Cultural, psychological, social, and political dynamics of hauntings in American literature, from the early national period to the late 20th century. Sources include ghost stories and other instances of supernatural, emotional, or mental intervention. Authors include Charles Brockden Brown, Washington Irving, Edgar Allan Poe, Nathaniel Hawthorne, Louisa May Alcott, Charlotte Perkins Gilman, Charles Chesnutt, Henry James, Edith Wharton, Toni Morrison, and Stephen King. GER:DB-Hum
5 units, Spr (Richardson, J)

UNDERGRADUATE WORKSHOPS AND DIRECTED READING

ENGLISH 194. Individual Research — See section above on Undergraduate Programs, Opportunities for Advanced Work, Individual Research.
5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 195. Ad Hoc Undergraduate Seminar — Undergraduates (at least three) who wish, in the following quarter, to study a subject or an area not covered by regular courses may plan an informal seminar and approach a member of the department to supervise it. As syllabus should be submitted to the director of undergraduate advising at least two weeks before the end of the quarter. No more than 5 units of credit are given for 195 and/or 198 in one quarter. 195 may not be used to fulfill departmental area or elective requirements without permission. Students may be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 196A. Honors Seminar: Critical Approaches to Literature — Required of students in the English honors program.
5 units, Aut (Summit, J)

ENGLISH 197. Seniors Honors Essay — In two quarters.
1-10 units, Aut, Win, Spr (Staff)

ENGLISH 198. Individual Work — Undergraduates who wish to study a subject or an area not covered by regular courses may, with consent, enroll for individual work under the supervision of a member of the department. 198 may not be used to fulfill departmental area or elective requirements without consent. Group seminars are not appropriate for 198.
1-5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 199. Senior Independent Study — Open, with department approval, to seniors majoring in English who wish to work throughout the year on a 10,000 word critical or scholarly essay; see note under “Honors Program” above. Applicants submit a sample of their expository prose, proposed topic, and bibliography to the Director of Undergraduate Studies before preregistration in May of the junior year. Each student accepted is responsible for finding a department faculty adviser.
1-10 units, Aut, Win, Spr (Staff)

CREATIVE WRITING

ENGLISH 28B. The Occasions of Poetry
5 units, Win (Pinsky, R)

ENGLISH 29. Reading for Writers
5 units, Spr (Staff)

ENGLISH 90. Fiction Writing — Problems of narrative and imaginative writing. Prerequisite: PWR 1.
5 units, Aut (Altschul, A; Brelinski, V; O’Keefe, J; Watrous, M), Win (Altschul, A; Brelinski, V; O’Keefe, J), Spr (Altschul, A; Brelinski, V; O’Keefe, J; Pierce, N)

ENGLISH 92. Reading and Writing Poetry — Issues of poetic craft. How elements of form, music, structure, and content work together to create meaning and experience in a poem. How may be repeated for credit.
5 units, Win (Pinsky, R), Spr (Altschul, A; Brelinski, V; O’Keefe, J)

ENGLISH 94A. Creative Nonfiction — Historical and contemporary as a wide genre including travel and nature writing, memoir, biography, journalism, and the personal essay. Students use creative means to express factual content.
5 units, Win (Johnson, A), Spr (Snider, B)

ENGLISH 94B. New Media Writing — How technology is changing the conversation about creativity, including the writer in the new age, and changes in literary process and product. The Works Progress Administration Writers’ Project which foreshadowed new media. How technologies are changing the act of writing, and what is gained or lost with hypertext, voice-to-text, and shared author software. Do new media just change the surface of the literary process, or re-imagine the center of it?
5 units, Win (Johnson, A; Kealey, T)

ENGLISH 94C. Fiction Writing for Film — Workshop. For screenwriting students. Story craft, structure, and dialogue. Assignments include short scene creation, character development, and a long story. How fictional works are adapted to screenplays, and how each form uses elements of conflict, time, summary, and scene. Prerequisite: 90.
5 units, Win (Kealey, T)

ENGLISH 94D. Fiction Writing for Film — Workshop. For screenwriting students. Story craft, structure, and dialogue. Assignments include short scene creation, character development, and a long story. How fictional works are adapted to screenplays, and how each form uses elements of conflict, time, summary, and scene. Prerequisite: 90.
5 units, Win (Kealey, T)

ENGLISH 95. Form and Theory of the Novel — Seminar. For writers. How form and technique reveal the writer’s world view. How writers connect detail, description, action, dialog, and thought to create scenes. How the balance of these elements creates an author’s voice. How scenes build tension, create empathy, propel story, reveal character, explore setting, and raise or contest ideas. Tradition, conventions, design, narrative strategy, research, and historical perspective. Guest instructors from Stanford’s Jones Lecturers in fiction.
5 units, Spr (Johnson, A; Kealey, T)

ENGLISH 96. New Media Writing — How technology is changing the conversation about creativity, including the writer in the new age, and changes in literary process and product. The Works Progress Administration Writers’ Project which foreshadowed new media. How technologies are changing the act of writing, and what is gained or lost with hypertext, voice-to-text, and shared author software. Do new media just change the surface of the literary process, or re-imagine the center of it?
5 units, Win (Johnson, A; Kealey, T)

ENGLISH 97. Poetry Reading and Writing — May be taken twice. Lottery. Priority to last quarter/year in school, majors in English with Creative Writing emphasis, and Creative Writing minors. Prerequisite: 90.
5 units, Win (Pinsky, R), Spr (Altschul, A; Brelinski, V; O’Keefe, J; Watrous, M), Win (O’Keefe, J), Spr (Altschul, A; Brelinski, V; O’Keefe, J; Pierce, N)

ENGLISH 99A. Directed Reading in Creative Writing — Workshop. For screenwriting students. Story craft, structure, and dialogue. Assignments include short scene creation, character development, and a long story. How fictional works are adapted to screenplays, and how each form uses elements of conflict, time, summary, and scene. Prerequisite: 90.
5 units, Win (Kealey, T)

ENGLISH 99B. Directed Reading in Creative Writing — Workshop. For screenwriting students. Story craft, structure, and dialogue. Assignments include short scene creation, character development, and a long story. How fictional works are adapted to screenplays, and how each form uses elements of conflict, time, summary, and scene. Prerequisite: 90.
5 units, Win (Altschul, A; Michas-Martin, S)
ENGLISH 192. Intermediate Poetry Writing—May be taken twice. Lottery. Prior to last quarter/year in school, majors in English with Creative Writing emphasis, and Creative Writing minors. Prerequisite: 92.
5 units, Aut (Snider, B), Win, Spr (Michas-Martin, S)

ENGLISH 290A. Advanced Fiction Writing—Workshop critique of original short stories or novel. Prerequisites: manuscript, consent of instructor, and 190-level fiction workshop.
5 units, Aut (MacDonald, D), Spr (Tallent, E)

ENGLISH 292. Advanced Poetry Writing—Promising student poets write poetry in an atmosphere of mutual aid. Students chosen by instructor.
5 units, Spr (Snider, B)

ENGLISH 390. Graduate Fiction Workshop—For Stegner fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.
3 units, Aut (L’Heureux, J), Win (Tallent, E), Spr (Wolff, T)

ENGLISH 392. Graduate Poetry Workshop—For Stegner fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.
3 units, Aut (Fields, K), Win (Boland, E), Spr (Di Piero, S)

ADVANCED UNDERGRADUATE/GRADUATE

ENGLISH 200. Introduction to Old Norse—(Same as COMPLIT 240.)
The literary language of medieval Scandinavia known as Old Norse or Old Icelandic. Goal is to gain a reading knowledge to explore poetry and prose. N. European mythology, historical and social change, and the narrative and imagistic artistry of medieval Scandinavian culture. Learned, courtly, and ecclesiastical contexts; narratives of violence, power, and moral argument. Texts to be read in Old Norse include Hræfnið’s Saga, Gylfaginning, and Hamdismal. Background reading in translation from major works of the tradition including Snorri Sturluson’s Edda and Njáls’s Saga. Recommended: course work in German, Old English, or historical linguistics.
4-5 units, Win (Lerer, S)

ENGLISH 223E. Whitman and Dickinson
5 units, Aut (Fliegelman, J)

ENGLISH 230B. The Novel in Europe: The Bourgeois Age, 1848-1900—(Same as COMPLIT 230B.)
New forms that make sense of historical novelties and address new segments of the reading public during the period when the industrial world consolidates in western Europe. Authors include Dickens, Flaubert, Dostoevsky, Zola, Doyle, and Stevenson.
5 units, Aut (Moretti, F)

ENGLISH 251. Donne and His Contemporaries—Donne’s dramatic realism and poetic innovations in the context of contemporary poets, including Jonson, Herbert, and Marvell; his influence on modern poets such as Browning, Eliot, and Rich. How major intellectual and cultural changes in Donne’s lifetime left their mark on his writing.
5 units, Aut (Brooks, H)

ENGLISH 252. English Renaissance Literature in the European Context—The impact of translation from classical and contemporary continental languages in the elaboration of England’s native literary culture. Italian and French poetic models in English; Hoby/Castiglione, The Courtier; Golding/Ovid, The Metamorphoses; North/Plutarch, The Lives of the Noble Grecians and Romans; Harington/Ariosto, Orlando Furioso; Florio/Montaigne, The Essays; Shelton/Cervantes, Don Quixote; The King James Bible. No knowledge of foreign languages required.
5 units, Win (Wyatt, M)

ENGLISH 260G. Century’s End: Race, Gender, and Ethnicity at the Turn of the Century—How race, gender, and ethnicity were constructed in America from 1890-1914. Works by Anna Julia Cooper, Charlotte Perkins Gilman, Mark Twain, Ida B. Wells, Theodore Dreiser, Paul Laurence Dunbar, W.E.B. Du Bois, Abraham Cahan, and James Weldon Johnson. The cultural and historical context that shaped them through contemporary archival materials.
5 units, Spr (Fishkin, S)

ENGLISH 262. The Other America: Writing in and of the Caribbean—Socio-aesthetic concerns in the literature of the Caribbean. Focus is on novels of 20th-century Francophone and Anglophone Afro-Caribbean writers. Constructs such as pan-Africanism, postcolonialism, and tropicalizing discourses. The relationship between Caribbean writers and European literary culture with respect to social and cultural conceptions of the modern. How Caribbean writers represent their landscapes, histories, and themselves.
5 units, Spr (Glover, K)

ENGLISH 270A. Introduction to Critical Theory: Literary Theory and Criticism Since Plato—(For graduate students; see 170A.)
5 units, Win (Kaufman, R)

ENGLISH 277B. The Novels of Virginia Woolf—Six major novels of Virginia Woolf and her place in the modernist pantheon.
5 units, Win (Castle, T)

ENGLISH 279G. Joseph Conrad—Conrad’s fictions as a way of asking what justifications are adequate for modern literature and for people’s lives. The ethical crisis attending the modernist sense that nothing matters, and the countervailing sense that a peculiar attention to words can be the means of redeeming what people believe to matter.
5 units, Aut (Bourbon, B)

ENGLISH 293. Literary Translation—Seminar and workshop. For undergraduates and graduate students. The art and practice of literary translation; its tradition, principles, and questions. Final project is a translation and commentary on work of the student’s choosing. Recommended: knowledge of a foreign language and experience in imaginative writing.
3-5 units, Win (Felstiner, J)

ENGLISH 296. Introduction to Critical Theory: Literary Theory and Criticism Since Plato—Required colloquium for incoming M.A. students. Contemporary theoretical movements. Topics such as the role of the intellectual in American life, the place of theory and politics in literary study, and what it means to be an academic writer. How different methodological approaches have been fruitful or not in analyzing specific texts.
5 units, Aut (Vermeule, B)

GRADUATE COLLOQUIA

ENGLISH 300B. The Bible and Literature—(Same as COMPLIT 343.)
Readings from Genesis to Revelation; other texts include Dante, medieval drama, Shakespeare, Spenser, Renaissance lyric, Milton, 19th- and 20th-century poetry, and British, American, African American, and African novels. Topics: citations in radical and hegemonic political contexts; the influence on prototypes of race/gender difference; the relation between biblical eschatology and literary structures; and Song of Songs and the history of lyric.
5 units, Spr (Parker, P)

ENGLISH 304. The Great Age of the English Essay: Addison to DeQuincey—How this characteristic form of 18th-century literature was responsible for the making of the middle class and forging its taste and values through personal reflections, social critique, and a multiplicity of styles including the confessional and the parodic. The context of Enlightenment and Romantic culture including politics, print culture, social life, and manners.
5 units, Aut (Gigante, D)

5 units, Spr (Fiegelman, J)

ENGLISH 308B. Gilded Age American Literature—American literature between the Civil War and WWI in relation to major cultural and literary developments such as regionalism, realism, and naturalism, and major political and social questions such as industrialism and economic inequality, race and black civil rights, the increased agitation for women’s suffrage, and mass migration from southern and eastern Europe.
5 units, Win (Jones, G)
ENGLISH 309A. Novel of the Americas — (Same as COMPLIT 329.) The possibility of identifying aesthetic visions of an American imaginary in terms not defined by nationalistic ideologies but open to the consequences of transnational forces. How America has been invented as a category in geographical and sociocultural terms. Readings include Willa Cather’s *Death Comes for the Archbishop*, Faulkner’s *Absalom, Absalom*, Mariano Azuela’s *The Underdogs*, Toni Morrison’s *Beloved*, Alejo Carpentier’s *The Kingdom of this World*, and Silko’s *Almanac of the Dead*.
5 units, Win (Saldívar, R)

5 units, Spr (Kaufman, R)

ENGLISH 311A. The Literature of the First World War — British and American novels, poems, and stories written during or in the decade after WWI. Works by Robert Graves, Wilfred Owen, Siegfried Sassoon, Vera Brittain, Rebecca West, Edward Blunden, Ernest Hemingway, and Virginia Woolf. Films may include Renoir’s *Grand Illusion*, Attlenborough’s *Oh What a Lovely War*, and Tavernier’s *Life and Nothing But*.
5 units, Aut (Castle, T)

SEMINARS

ENGLISH 314. Epic and Empire — (Same as COMPLIT 320A.) Focus is on Virgil’s *Aeneid* and its influence, tracing the European epic tradition (Ariosto, Tasso, Camoes, Spenser, and Milton) to New World discovery and mercantile expansion in the early modern period.
5 units, Win (Parker, P)

ENGLISH 334A. The Modern Tradition I — (Same as MTL 334A.) Preference to first-year graduate students in Modern Thought and Literature and English. Kant’s 18th-century development of the critique of reason; how it set the stage for the themes and problems that have preoccupied Western thinkers. Focus is on texts that extend and problematize the critique of reason. Writers include Kant, Hegel, Marx, Nietzsche, Weber, Freud, Lukács, and Heidegger.
5 units, Aut (Moya, P)

ENGLISH 344A, B. Shakespeare, Marlowe, Jonson — Two quarter sequence. The intersection of poetry and theater in the work of three major Elizabethan dramatists. First quarter includes focusing on a topic appropriate to a scholarly article or dissertation; second quarter focus is on how to write such a paper. Students are required to register for both quarters..
5 units, A: Aut, B: Win (Orgel, S)

5 units, Aut (Vermeule, B)

ENGLISH 357F. Poetry and Culture in America: Postwar to Cold War — What happened to poetry in English in the wake of high modernism and in the aftermath of global war. Works and controversies from 1945-50 established the form and purview of Anglo-American poetry for the next 25 years. Writers include Eliot, Pound, Auden, Stevens, and Bishop.
5 units, Win (Jenkins, N)

ENGLISH 362. Writing Together: Collaboration Then and Now — The tradition of writing collaboratively, including medieval women collaborating with their scribes, collaborations in the 18th and 19th centuries, and the work of contemporary women writers. What forces worked to repress, silence, or erase such collaboration. Is the time now ripe for a renewed flowering of collaboratively produced works?
5 units, Aut (Lansford, A)

ENGLISH 363. The Bourgeois — (Same as COMPLIT 330.) Interdisciplinary. Goal is to define the ruling class of modern times. Social history (Weber, Hirschmann, Marx); literary texts (Defoe, Goethe, Gaskell); and Henrik Ibsen who produced an inquisitive criticism of the bourgeois ethos.
5 units, Aut (Moretti, F)

5 units, Spr (Richardson, J)

ENGLISH 366F. Media Theory — Theoretical approaches to media technologies, aesthetics, and literature in the 20th century including: debates about technology; Benjamin, Brecht, and Adorno on technique and politics; McLuhan, Debord, and Baudrillard on visual media and spectacle theory; and electronic textuality, hypertext, and the relationships among technology, ideology, and media. Sources include theoretical and literary readings in media including print, video, and electronic text.
5 units, Spr (Heise, U)

ENGLISH 370. Middle English Literature — Social, historical, and material contexts. Topics may include: the manuscript culture of the Middle Ages and its impact on the English book; the relationship between political and social conflict and the rise of literary genres such as lyric, romance, and dream vision; emerging vernacular self-consciousness in medieval England and development of a literary language in the context of regional dialect variety and the maintenance of Latin and French. Primary archival work and current literary criticism.
5 units, Spr (Lerer, S)

ENGLISH 372A. Sixteenth-Century Poetry and Poetics — 16th-century English poetry in a continental context. Emphasis is on lyric poetry. Generic experimentation from standpoints such as: Petrarchism; the plain style; psalters, religious lyrics, and contrafacta; Puritan voices; and Ovidian narrative. Contemporaneous theories of poetics; elated questions of gender, politics, and religion.
5 units, Spr (Greene, R)

ENGLISH 375. Henry James — The late novels and novellas, emphasizing class, sexuality, aesthetics, and the relationship between form and representation in the representation of complex structures of feeling. Secondary readings include recent work in feminist and queer studies and narrative theory.
5 units, Win (Ngat, S)

ENGLISH 381B. Race Theory in the Post-Race Era — Theoretical contours, literary implications, and political stakes in the debate between renewed claims for the political and experiential saliency of race versus claims that race is over, what cultural critics term as post-race, against race, beyond race, or the raceless era. Why theorize about race in the moment of its eclipse?
5 units, Win (Elam, M)

ENGLISH 384G. Dickens and Eliot — Close readings of novels and critical historical, biographical, aesthetic, feminist, and psychological approaches.
5 units, Spr (Polhemus, R)

WORKSHOPS AND DIRECTED READING

ENGLISH 394. Independent Study — Preparation for qualifying examination and for the Ph.D. oral examination.
1-10 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 395. Ad Hoc Graduate Seminar — Three or more graduate students who wish in the following quarter to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a member of the department to supervise it.
1-5 units, Aut, Win, Spr, Sum (Staff)
ENGLISH 396. Introduction to Graduate Study for Ph.D. Students — For incoming Ph.D. students. The major modes of research, criticism, and theory at work in the discipline of English studies.

5 units, Aut (Jones, G)

ENGLISH 396L. Pedagogy Seminar I — (Same as COMPLIT 396L.) Required for first-year Ph.D students in English, Modern Thought and Literature, and Comparative Literature (except for Comparative Literature students teaching in a foreign language). Preparation for surviving as teaching assistants in undergraduate literature courses. Focus is on leading discussions and grading papers.

2 units, Aut (Jones, G)

ENGLISH 397A. Pedagogy Seminar II — Apprenticeship for second-year graduate students in English, Modern Thought and Literature, and Comparative Literature who teach in the Program in Writing and Rhetoric. Each student is assigned as an apprentice to an experienced teacher and sits in on classes, conferences, and tutorials, with eventual responsibility for conducting a class, grading papers, and holding conferences. Meetings explore rhetorical theories and philosophies of composition, and the teaching of writing. Each student designs a syllabus in preparation for teaching PWR 1.
1 unit, Aut (Lunsford, A)

ENGLISH 398. Research Course — A special subject of investigation under supervision of a member of the department. Thesis work is not registered under this number.
1-18 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 398R. Revision and Development of a Paper — Students revise and develop a paper under the supervision of a faculty member with a view to possible publication.
5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 399. Thesis
1-10 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES
See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

ARTHIST 132/332. American Art and Culture, 1528-1860
4 units, Spr (Wolf, B)

ARTHIST 232. Rethinking American Art
5 units, Aut (Wolf, B)

COMPLIT 157. Imitation of Life
3-5 units, Spr (Gelder, A)

PHIL 81. Philosophy and Literature — (Same as FRENGEN 181, ITALGEN 81.)
4 units, Win (Anderson, L; Landy, J)

PWR 193. Writing the Honors Thesis
1-5 units, Win, Spr (Staff)

SLAVGEN 156/256. Nabokov and Modernism — (Same as COMPLIT 115/215.)
3-5 units, Spr (Greenleaf, M)

OVERSEAS STUDIES
Courses approved for the English major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

OXFORD
ENGLISH 114Z. Close Readings in English Literature, 1509-1642 — (Same as OSPOXFRD 114Z.) GER:DB-Hum
5 units, Aut (van Es, B)

ENGLISH 116Z. Close Readings in English Literature, 1642-1740 — (Same as OSPOXFRD 116Z.) GER:DB-Hum
5 units, Win (Bullard, P)

ENGLISH 135Z. Jane Austen’s England — (Same as OSPOXFRD 25.)
5 units, Win (Rovee, C)

ENGLISH 154Z. Romantic Literature, 1740-1832 — (Same as OSPOXFRD 154Z.) GER:DB-Hum
5 units, Spr (Plaskitt, E)

ENGLISH 163X. Shakespeare: Critical Commentary — (Same as OSPOXFRD 163X.) GER:DB-Hum
5 units, Aut, Win (Groves, B)

ENGLISH 174X. The Rise of the Novel — (Same as OSPOXFRD 44.)
GER:DB-Hum
5 units, Spr (Plaskitt, E)

ENGLISH 185Z. The Idea of the Museum: History, Theory, Politics — (Same as OSPOXFRD 33.)
5 units, Win (Rovee, C)
PROGRAM IN ETHICS IN SOCIETY

Director: Eamonn Callan (Education)
Steering Committee: Eamonn Callan (Education), Joshua Cohen (Philosophy, Political Science, Law), John Ferejohn (Political Science), Barbara Fried (Law School), Agnieszka Jaworska (Philosophy), Scotty McLennan (Dean of Religious Life), Josiah Ober (Classics, Political Science), Rob Reich (Political Science), Eric Roberts (Computer Science), Debra Satz (Philosophy), on leave), Brent Sockness (Religious Studies), Allen Wood (Philosophy), Lee Yearley (Religious Studies)
Affiliated Faculty: Kenneth Arrow (Economics, emeritus), Donald Barr (Sociology), Barton Bernstein (History), Michael Bratman (Philosophy), Albert Camarillo (History), Nadeem Hussain (Philosophy), David Kennedy (History), Tamar Schapiro (Philosophy), David K. Stevenson (Pediatrics), Sylvia Yanagisako (Cultural and Social Anthropology, on leave)

Mail Code: 94305-2155
Phone: (650) 723-0997
Email: joanberry@stanford.edu
Web Site: http://ethicsinsociety.stanford.edu

Courses given in Ethics in Society have the subject code ETHICSOC. For a complete list of subject codes, see Appendix B.

The Program in Ethics in Society is designed to foster scholarship, teaching, and moral reflection on fundamental issues in personal and public life. The program is grounded in moral and political philosophy, but it extends its concerns across a broad range of traditional disciplinary domains. The program is guided by the idea that ethical thought has application to current social questions and conflicts, and it seeks to encourage moral reflection and practice in areas such as business, international relations, law, medicine, politics, and science.

Current and planned initiatives of the program include:

1. Supporting and fostering ethics research.
2. Supporting innovative teaching focusing on the ethical dimensions relevant to the different disciplines across the curriculum.
3. Establishing a yearly faculty-graduate seminar focusing on topics in ethics and public life.
4. Ethics@Noon, a weekly discussion by faculty, students, and staff on topics of ethical concern.

The program also sponsors several annual public lecture series, including the Tanner Lectures in Human Values and the Wesson Lectures in Problems of Democracy.

Students interested in pursuing studies that bring moral and political theory to bear on issues in public life should consult the director. There are many course offerings at Stanford that address moral and political questions. Not all of these courses are crosslisted with the Program in Ethics in Society. Students should consult the director to determine whether such courses may be applied toward an Ethics in Society honors program or minor.

UNDERGRADUATE PROGRAM
HONORS

The honors program in Ethics in Society is open to majors in every field and may be taken in addition to a department major. Students should apply for entry at the end of Spring Quarter of the sophomore year or no later than the beginning of the Autumn Quarter of the junior year. Applicants should have a cumulative grade point average (GPA) of 3.3 (B+) or higher. They should also maintain this minimum average in the courses taken to satisfy the requirements. Required courses must be taken for a letter grade.

Requirements—
1. Required courses (at least one of a or b must be taken at the 100 level):
   b) ETHICSOC 30. Introduction to Political Philosophy; or ETHICSOC 171. Justice. Normally taken in sophomore year.
   c) ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice. Normally taken after the moral and political philosophy courses listed above.

2. One 4- or 5-unit undergraduate course on a subject approved by the honors adviser, designed to encourage students to explore those issues in Ethics in Society that are of particular interest to them. Courses of relevance to the Program in Ethics in Society are offered by members of the program committee and by other departments. Students may also take a course with the honors thesis in mind. To promote a broad interdisciplinary approach, this elective should normally be outside the Department of Philosophy. Students are not restricted to choosing from the cognate courses listed below.

3. ETHICSOC 190. Honors Seminar.
4. ETHICSOC 200A, B. Honors Thesis. On a subject approved by the honors adviser, with the work spread over two quarters. To receive honors in Ethics in Society, students must receive a grade of ‘B+’ on their thesis.

A typical student takes ETHICSOC 20 or 170 and 30 or 171 in the sophomore year. Upon admission to the honors program as a junior, he or she takes ETHICSOC 190 in the Winter Quarter, ETHICSOC 77 in the Spring Quarter, and requirement 2 (the optional subject) at any time during the junior year, or possibly Autumn Quarter of the senior year. The honors thesis is normally written during the Autumn and Winter quarters of the senior year. Courses taken to fulfill the Ethics in Society honors requirement may be double-counted for Philosophy and other majors; Ethics in Society minors may not double count courses.

MINORS

The Ethics in Society minor is open to students in any department who wish to explore moral issues in personal and public life. The minor also includes the possibility of pursuing classes around the theme of citizenship.

Students must declare the minor on Axess no later than the last day of Autumn Quarter of their senior year, although they are strongly advised to declare sooner. The student should discuss the minor with an adviser chosen from the Ethics in Society faculty list, and prepare a draft proposal that includes a list of courses planned to fulfill the requirements and the name of the faculty adviser.

A minor in Ethics in Society requires six courses for a minimum of 25 and a maximum of 30. Required courses must be taken for a letter grade.

Requirements—
1. Three Ethics in Society courses:
   a) ETHICSOC 20. Introduction to Moral Theory; or ETHICSOC 170. Ethical Theory
   b) ETHICSOC 30. Introduction to Political Philosophy; or ETHICSOC 171. Justice
   c) ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice

2. Two courses at the 100 level or above that address some dimension of moral or political theory or practice.

3. One course at the 200 level or above that addresses a moral or political problem, in either theory or practice.

The 100-level and 200-level courses should be focused around a central theme such as biomedical ethics, ethics and economics, ethics and politics, or environmental ethics. The courses at the 100 and 200 level are normally taken after completion of ETHICSOC 20 or 170 and 30 or 171.

Subject to the approval of the Director of the Ethics in Society Program, a course covering similar subject matter in another department or program may be substituted for ETHICSOC 20/170 or 30/171. No course credited to the Ethics in Society minor may be double-counted toward major requirements.
CITIZENSHIP OPTION

The citizenship option for the minor introduces students to the theory, history, and practice of citizenship in democracies. When a student declares the minor in EIS on Axess, no notation is made of the citizenship option, and this notation does not appear on transcripts or the diploma. All students taking the citizenship option must take ETHICSOC 198, Community Engagement Internship. In addition to the courses listed in (1 above, students must take a total of three additional classes from two of the following categories. Students may petition to have other relevant courses counted towards the minor.

1. Citizenship and Government Action
   a) ETHICSOC 133. Ethics and Politics of Public Service
   b) POLISCI 142T. Social Protection Around the World
   c) PUBLPOL 101. Politics and Public Policy
   d) PUBLPOL 164. Comparative Public Policy

2. Citizenship and Entrepreneurship
   a) ETHICSOC 108. Ethics and the Professions
   b) ME 206A. Entrepreneurial Design to Extreme Affordability
   c) PUBLPOL 180. Social Innovation
   d) PUBLPOL 195. Business and Public Policy
   e) URBANST 131. Social Innovation and the Social Entrepreneur

3. Citizenship and Education
   a) EDUC 167. Educating for Equity and Democracy
   b) EDUC 179B. Youth Empowerment and Civic Engagement
   c) EDUC 220C. Education and Society
   d) EDUC 247. Moral Education
   e) EDUC 304. The Philosophical and Educational Thought of John Dewey

4. Global Citizenship and Nongovernmental Organizations
   a) POLISCI 143. Nongovernmental Organizations and Development in Poor Countries
   b) POLISCI 232. Civil Society and the Nonprofit Sector
   c) PUBLPOL 183. Philanthropy and Social Innovation

GRADUATE STUDIES

The program’s main provisions for graduate students are seminars on topics in applied ethics.

COURSES

ETHICSOC 20. Introduction to Moral Philosophy — (Same as PHIL 20.) What is the basis of moral judgment? What makes rights actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous character? Answers to classic questions in ethics through the works of traditional and contemporary authors. GER:DB-Hum, EC-EthicReas
   5 units, Spr (Seidman, J)

ETHICSOC 30. Introduction to Political Philosophy — (Same as PHIL 30, POLISCI 13.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER: DB-Hum, EC-EthicReas
   5 units, Win (Stone, P)

ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice — (Same as PHIL 77.) Ideally, social policies are informed by ethical thought and reflection, but doing good in the world requires the active translation of moral theory and political philosophy into action. What kinds of empirical data are relevant to social decision making, and how should they be collected, evaluated, and integrated into normative analysis? What assumptions about human nature are in play? How should diverse cultural values be addressed? Case studies from biomedical science, business, and government.
   4 units, Spr (Staff)

ETHICSOC 78. Medical Ethics — (Same as PHIL 78.) Introduction to moral reasoning and its application to problems in medicine: informed consent, the requirements and limits of respect for patients’ autonomy, surrogate decision making, euthanasia and physician-assisted suicide, and abortion. GER:DB-Hum, EC-EthicReas
   4 units, Spr (Jaworska, A)

ETHICSOC 108. Ethics and the Professions — Ethical challenges facing professionals in society. Readings and case studies. Individual moral obligations in relation to obligations as professionals. Topics: conflict of interest, client/professional privilege, and use of confidential information. Focus is on medicine, law, engineering, and ethical issues common to all professions.
   4 units, not given this year

ETHICSOC 133. Ethics and Politics of Public Service — (Same as POLISCI 133.) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connects service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci
   5 units, not given this year

ETHICSOC 170. Ethical Theory — (Same as PHIL 170/270.) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER:DB-Hum, EC-EthicReas
   4 units, Spr (Jaworska, A)

ETHICSOC 171. Justice — (Same as PHIL 171, PHIL 271, POLISCI 136S.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas
   5 units, Aut (Cohen, J)

ETHICSOC 190. Ethics in Society Honors Seminar — (Same as PHIL 178.) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.
   3 units, Win (Reich, R)

ETHICSOC 198. Community Engagement Internship — Opportunities for students to engage in community work via the Haas Center for Public Service. Students work with Haas Center staff to design an internship involving community-based research or supported by a Haas Center fellowship or community service work/study, or to serve for an academic year as a tutor in one of the Haas Center’s several K-12 programs in East Palo Alto. May be repeated for credit.
   3-5 units, Aut, Win, Spr, Sum (Staff)

ETHICSOC 199. Independent Studies in Ethics in Society — May be repeated for credit.
   1-15 units, Aut, Win, Spr, Sum (Staff)

ETHICSOC 200/A.B. Ethics in Society Honors Thesis — Limited to Ethics in Society honors students, who must enroll once in A and once in B.
   1-5 units, Aut, Win, Spr, Sum (Staff)

The Program in Feminist Studies is an interdisciplinary undergraduate program offering students the opportunity to investigate the significance of gender and sexuality in all areas of human life from the study of women and medicine to the study of transgender issues. Feminist analysis assumes that gender is a central factor in the organization of society, and that definitions of gender, sex, and sexuality do not stem from nature but are social constructions. As such, they vary across time and place, have strong ideological underpinnings, and serve political ends. The courses offered by the program use feminist perspectives to expand and reevaluate the assumptions at work in traditional disciplines in the study of individuals, cultures, social institutions, policy, and other areas of scholarly inquiry.

The Program in Feminist Studies coordinates the courses offered on women, gender, sexuality, and feminism throughout the University and facilitates the undergraduate major and minor in Feminist Studies. In addition, it encourages feminist analysis and teaching at Stanford, both in courses within the program and those housed within departments.

The program committee awards the annual Michelle Z. Rosaldo and Francisco Lopes prizes for the best undergraduate work on women, gender, or feminism. The prizes are awarded in two divisions: a thesis division for senior honors theses and master’s papers written by undergraduates in coterminal degree programs, and an essay division. The Rosaldo prizes are awarded for the best work in the social sciences and the Lopes prizes for the best work in the humanities. Submissions are due in the Feminist Studies office April 2 for essays and May 14 for theses. Essays and theses completed later in Spring or Summer Quarter may be submitted for consideration the following year.

UNDERGRADUATE PROGRAMS

Curriculum guidelines and forms for the major, minor, and honors are available at the Feminist Studies office in Serra House or at http://feminist.stanford.edu. Students interested in majoring, minoring, or doing honors in Feminist Studies should consult the program administrator.

BACHELOR OF ARTS

The major in Feminist Studies may be taken as a single major, as one of multiple majors, or as a secondary major. If taken as one major of multiple majors, none of the 62 units counted toward the major in Feminist Studies may overlap with units counted toward the major in another department or program. If taken as a secondary major, up to 30 of the units counted toward the Feminist Studies major may also be counted as fulfilling the major requirements in another department or program if that department or program consents. A maximum of 10 of the 62 units for the major may be taken on a credit/no credit or satisfactory/no credit basis; a maximum of 10 may be taken as independent study or directed reading. FEMST core courses must be taken for a letter grade.

The major should normally be declared by the beginning of a student’s junior year. Majors should choose two faculty advisers from the list of resource faculty, one of whom is usually the director of the Feminist Studies program. Faculty advisers work closely with the student in helping design an appropriate program of study. A proposal explaining the rationale for the plan of study and signed by both advisers must be submitted to the program office to declare the major.

CURRICULUM

The major in Feminist Studies includes a total of at least 12 courses at the 100 level or above for 62 units. The courses are divided among the core and the focus, plus electives (cognate courses for Feminist Studies) to reach the total course requirement.

THE CORE

1. FEMST 101. Introduction to Feminist Studies. This course must be taken before 102 and 103.
2. FEMST 102. Feminist Theory. There may be several offerings. Students should consult the Feminist Studies website to see which courses fulfill the theory requirement in a given year.
3. FEMST 103. Feminist Methodologies.
4. FEMST 104A, 104B Practicum
5. One Feminist Studies course in the social sciences. Courses that fulfill this requirement can be found among courses listed under Anthropological Sciences, Communication, Cultural and Social Anthropology, Education, History, Human Biology, Law, Medicine, Political Science, Psychology, and Sociology.
6. One Feminist Studies course in the humanities. Courses that fulfill this requirement can be found among courses listed in English, Linguistics, Philosophy, Religious Studies, the arts, and languages.

THE FOCUS

Every student designs a thematic focus consisting of at least five courses. These focuses are not declared on Axess; they do not appear on the transcript or diploma.

1. At least three of the focus courses should be Feminist Studies courses or be selected from the list of interdepartmental offerings.
2. At least one course should be a major survey, methodology, or theory course offered by a department or interdepartmental program as an initiation into the practice of study in the field.
The focus should be designed in consultation with the student’s advisers. The following are examples of common focuses, but students are also encouraged to develop new focuses:

Crosscultural Perspectives on Gender
Feminism and the Arts
Feminist Perspectives on Science, Technologies, and Health
Gender and Education
Gender and Popular Culture
Gender in Language and Symbol
Medieval Gender Studies
Queer Studies
Women and Health
Women and Modernity
Women and Religion
Women and Work

WRITING IN THE MAJOR

Majors in Feminist Studies may satisfy the Writing in the Major (WIM) requirement 2006-07 by taking FEMST 253, Women and the Creative Imagination in Spring Quarter. Contact Professor Valerie Miner (vminer@stanford.edu) before enrolling in the course.

PRACTICUM

A practicum is required in order to bring together theory and practical experience. The practicum should involve field research, community service, or other relevant experience such as a public service internship. Students plan their practicum during Winter Quarter of the junior year in FEMST 104A, Junior Seminar and Practicum (1 unit). The practicum is normally done over the summer between junior and senior year, and may be taken for additional units. It is followed by FEMST 104B, Senior Seminar and Practicum (1 unit), in Autumn Quarter of the senior year.

MINORS

Students interested in minoring in Feminist Studies should consult the program administrator. The minor proposal should be drafted in consultation with a faculty adviser selected from the Feminist Studies resource faculty list.

The minor in Feminist Studies consists of at least six courses, for a minimum of 30 and a maximum of 36 units. None of the units for the minor may count towards the student’s major. The minor in Feminist Studies should be declared by the Winter Quarter of a student’s junior year.

Requirements —
1. FEMST 101. Introduction to Feminist Studies. This must be taken before 102 or 103.
2. FEMST 102. Feminist Theory, or FEMST 103. Feminist Methodologies

FOCUS

A four-course thematic focus may be designed by the student or may follow one of the suggested clusters listed above. One course within the thematic focus should address crosscultural issues.

HONORS CERTIFICATION

FEMINIST STUDIES MAJORS/MINORS

Admission — The honors program offers an opportunity to do independent research for a thesis of superior academic quality. It is open to students with a grade point average (GPA) of 3.3 or better in course work in Feminist Studies. Students must apply for honors certification by the end of the junior year. To apply, students should design a project in consultation with their proposed thesis adviser and the Feminist Studies honors tutor. A proposal describing the project and the number of units to be awarded must be submitted to the director of the program for final approval. See the Feminist Studies web site for details.

Requirements —
1. In addition to the normal requirements for the major, students enroll in FEMST 105 for 10-15 units towards the preparation of the honors thesis, and one unit of directed research with the director of the program (Autumn, Winter, and Spring quarters for a total of 3 units), which is granted for satisfactory attendance at meetings conducted by the honors tutor throughout the year.
2. Throughout the senior year, students work with faculty advisers and the Feminist Studies honors tutor. The final thesis must be submitted by May 31 and be of acceptable quality to the student’s faculty advisers. Creative projects of high intellectual caliber are eligible if they contain a section of scholarly analysis.

MAJORS IN OTHER DEPARTMENTS

Honors certification in Feminist Studies for majors in other departments or programs, as distinguished from honors for students pursuing a major in Feminist Studies, is intended to complement study in any major.

Admission — Honors certification is open to students majoring in any field with a GPA of 3.3 or better.

As a prerequisite, students must have completed the following courses with a grade of (B+) or better:
1. FEMST 101 and a core theory course
2. or three Feminist Studies courses related to the topic of their proposed honors research.

To apply, students must first consult the Director of the Program in Feminist Studies outlining the plan for course work, the rationale for the program, and an honors project. Students must apply for honors by the end of the junior year. The chair acts as one of the student’s faculty advisers, along with the faculty member(s) who advise the thesis.

Requirements — Students enroll in FEMST 105 for 10-15 units, and 1 unit of directed research with the director of the program (Autumn, Winter, and Spring quarters for a total of 3 units), which is granted for satisfactory attendance at meetings conducted by the honors tutor throughout the year. The final thesis must be submitted by May 31, and must be of acceptable quality to the student’s faculty advisers. Creative projects of high intellectual caliber are eligible if they contain a section of scholarly analysis. For more information, see the Feminist Studies web site.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Courses listed as cognate courses pay significant attention to gender difference, the situation of women in Western or non-Western cultures, or the role of sex/gender systems in social organization. Updated listings, including courses not offered 2006-07, are available at the Feminist Studies office and at http://feminist.stanford.edu.

FEMINIST STUDIES COURSES

FEMST 101. Introduction to Feminist Studies — (Same as HISTORY 107.) How gender inequality is created and perpetuated, and how feminist theory and movements respond to gender inequality. Topics: theories of inequality; history of feminism; international and multicultural perspectives on feminism; women’s work, health, and sexuality; creativity; spirituality; and movements for social change. GER:DB-SocSci, EC-Gender
5 units, Aut (Freedman, E)

FEMST 103/203. Feminist Theories and Methods Across the Disciplines — (Graduate students register for 203; same as PHIL 153.) The interdisciplinary foundations of feminist thought, and the nature of disciplines and of interdisciplinary work. The challenges of feminism for scholarship and research, taught by a Feminist Studies resource faculty member from the discipline in question.
4-5 units, Aut (Longino, H)

FEMST 104A. Junior Seminar and Practicum — Restricted to and required of Feminist Studies majors. Preparation for practicum projects. How to identify goals, submit grant proposals, and negotiate ethical issues in feminist praxis. The relationship between potential projects and their academic focus in the major.
1 unit, Win (Coll, K)
FEMST 104B. Senior Seminar and Practicum — For Feminist Studies majors only. Students present oral reports on the relation of the practicum to their academic work, submit a draft and revised written analysis of the practicum, and discuss applications of feminist scholarship.
2 units, Aut (Coll, K)

FEMST 105. Honors Work
1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 108. Internship in Feminist Studies — For non-majors. Augments course work in Feminist Studies with a supervised field, community, or lab experience in law offices, medical research and labs, social service agencies, legislative and other public offices, or local and national women’s organizations. One unit represents approximately three hours work per week during a 10-week quarter. Required paper. See application form on the Feminist Studies web site. Prerequisites: course in Feminist Studies, consent of program office, written consent of faculty sponsor.
1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 120. Introduction to Queer Studies — Gay, lesbian, bisexual, transgender, transsexual, and queer political movement and theory; sexual identities and feminism; sexual identities and cultural representation; alternative family practices; queer theory in academia. Film screenings, guest speakers, and community field trips. GER:EC-Gender
4-5 units, Win (Rivers, D)

FEMST 139. Rereading Judaism in Light of Feminism — During the past three decades, Jewish feminists have asked new questions of traditional rabbinic texts, Jewish law, history, and religious life and thought. Analysis of the legal and narrative texts, rituals, theology, and community to better understand contemporary Jewish life as influenced by feminism. GER:EC-Gender
4-5 units, Spr (Karlin-Neumann, P)

4-5 units, Spr (Rivers, D)

FEMST 140M. Race and Feminism in Contemporary American Visual Culture — The intersection of race and feminism in visual art and culture. How race and gender motivate artists and scholars. How images help understanding of race and gender; and how anti-racist and feminist discourses help understand of everyday images. Artists include sculptors, muralists, graffiti artists, knitters, filmmakers, craftspeople, painters, and photographers.
5 units, Aut (Niedzielski-Eichner, N)

3-5 units, Win (Zamora, M)

FEMST 140R. The Invention of Homosexuality: The Origins of Lesbian and Gay Identities, 1880-1940 — The formation of modern gay and lesbian identities. How imaginative literature explored and helped to codify sexual identities otherwise configured in negative and pathological terms. Sources include fictional, medical, and legal texts.
3 units, Win (Hunter, M)

FEMST 147. Gender and Leadership — Are there male and female styles of leadership? Can women really have it all in terms of career, partnership, and children? Are femininity and success dichotomous terms? Is there still a glass ceiling, even for Stanford students? Are new modes of thinking required for a new generation of issues and challenges relevant to gender and leadership? Students’ own leadership philosophies and capacities.
2 units, Aut (Harrison, L)

FEMST 166. Feminist Theories of Knowledge — (Same as PHIL 184F/284F.) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power.
4 units, Spr (Longino, H)

FEMST 188N. Imagining Women: Writers in Print and in Person — Stanford Introductory Seminar. Preference to sophomores. Contemporary literature through recent texts and conversations with the authors including Stanford faculty and visiting writers. Analytical and creative writing. Writing experience not necessary.
4-5 units, Aut (Miner, V)

FEMST 195. Directed Reading — May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 208. Bernice Johnson Reagon and the Cultural Politics of Racial and Gender Justice — The musical and political career of the political activist, cultural scholar, and performer Bernice Johnson Reagon, in residence at Stanford, March 5-8. Her political and musical contributions to movements for racial and gender justice. Prerequisite: consent of instructor.
2 units, Win (Freedman, E)

FEMST 244. History of Women and Medicine in the United States — Women’s bodies in sickness and health and encounters with lay and professional healers from the 18th century to the present. Historical construction of thought about women’s bodies and physical limitations; sexuality; birth control and abortion; childbirth; adulthood and menopause and aging. Women as healers, including midwives, lay physicians, the medical profession, nursing.
5 units, Aut (Horn, M)

FEMST 253. Women and the Creative Imagination — Interdisciplinary. The lives of women artists in different cultures and generations. Students write about art forms, the role of artists in the academy, and their social responsibilities. Similarities and differences among artists. WIM
4-5 units, Spr (Miner, V)

FEMST 260/360. Seminar in Women’s Health: Women and Disabilities — (Graduate students register for 360.) Topics include the diversity of women’s experiences of disabilities, visible and invisible disabilities, women’s strengths, women’s psychological and physical health, and feminist approaches to the study of disabilities. Limited enrollment. Prerequisite: consent of instructor. GER:DB-SocSci, EC-Gender
5 units, Spr (Krieger, S)

COGNATE COURSES
See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

OVERSEAS STUDIES

Courses approved for the Feminist Studies major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

FLORENCE

FEMST 135F. Women in Italian Cinema: Maternity, Sexuality, and the Image—(Same as ITALGEN 135F.) GER:DB-Hum, EC-Gender
4 units, Spr (Campani, E)

FINANCIAL MATHEMATICS

Director: Tze Leung Lai

Core Faculty:
Business: D. Duffie, J. M. Harrison, K. Singleton
Economics: T. Amemiya, P. Hansen, M. Kurz, J. Shoven
Electrical Engineering: T. Cover
Management Science and Engineering: K. Giesecke, D. Luenberger, J. Primbs
Mathematics: S. Brendle, A. Dembo, P. Diaconis, V. Durrleman, G. Papanicolaou

Steering Committee:
A. Dembo, V. Durrleman, K. Giesecke, T. Lai, A. Owen, G. Papanicolaou,
J. Primbs, K. Singleton

This is an interdisciplinary program that aims to provide a master’s level education in applied and computational mathematics, statistics, and financial applications to individuals with strong mathematical skills.

The departments of Mathematics and Statistics, in close cooperation with the departments of Economics, and Management Science and Engineering, as well as the Graduate School of Business, provide many of the basic courses.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The program requires that the student take 45 units of work. Of these 45 units of work, 12 courses must be taken from the offerings provided on the lists of required and elective courses. These courses must be taken for a letter grade, but students may elect to take one of the 12 courses credit/no credit. An overall grade point average (GPA) of 2.75 is required. There is no thesis requirement.

Ordinarily, four quarters are needed to complete all requirements.

Admission—To be eligible for admission, students are expected to have taken the following courses or their equivalent:
1. Linear algebra at the level of MATH 103.
2. Advanced calculus (real analysis) at the level of MATH 115.
3. Basic ordinary and partial differential equations at the level of MATH 131 and 132 (basic partial differential equations).
4. Probability at the level of STATS 116; theory of statistics at the level of STATS 200; and stochastic processes at the level of STATS 217 or, preferably, MATH 136.
5. Computer programming at the level of CS 106A.

Some of these courses are offered as summer courses and may be taken by candidates lacking the required background.

Candidates for admission must take the general Graduate Record Examination and preferably the subject test in Mathematics. Information about this exam can be found at http://www.gre.org.

Requirements—For the M.S. degree in Financial Mathematics, students must fulfill six of the following required courses:

1. In stochastic processes and statistics:
   a) MATH 236. Introduction to Stochastic Differential Equations
   b) STATS 241. Statistical Modeling in Financial Markets
2. In differential equations, simulation, and computing:
   a) MATH 220B. Partial Differential Equations of Applied Mathematics
   b) MATH 239. Computation and Simulation in Finance
3. In finance and economics:
   a) MATH 180. Introduction to Financial Mathematics or MS&E 242H. Investment Science Honors or FINANCE 620 (offered by GSB; contact GSB for description)
   Financial Markets I
   b) MATH 238/STATS 250. Mathematical Finance

Courses that are equivalent to the above and have been taken previously may be waived by the adviser, in which case they must be replaced by elective courses in the same subject area.

In addition, students must take at least six approved elective courses from a list that can be found on the web site at http://finmath.stanford.edu/

With the approval of the instructor, credit can be obtained for practical training in industry. Students must sign up for STATS 297 and write a detailed report in order to receive credit.

A seminar in Financial Mathematics is an integral part of the program and an opportunity to interact with leading academic and industry speakers (for credit, enroll in STATS 239).

Any remaining units required to complete the 45 total must be taken from the following options:

1. Courses from the approved list of electives with emphasis on computation, information technology, or finance.
2. STATS 200, 217, 218; MATH 131, 132, 202; or ECON 140.
3. Additional practical CS courses.

The requirements must be met within two years of entering the program, or four academic quarters for those already at Stanford.

COURSES

The following are required core courses.

GRADUATE SCHOOL OF BUSINESS

4 units, Aut (Staff)

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 242H. Investment Science Honors—Concepts of modern quantitative finance and investments. Basic concepts under uncertainty including arbitrage, term structure of interest rates, and bond portfolio immunization. A situation of uncertainty in one period. Topics: arbitrage; theorems of asset pricing; pricing measures; derivative securities; applications and estimating of financial risk measures; mean-variance portfolio analysis; and equilibrium and the capital asset pricing model. Group projects involving financial market data. Prerequisites: basic probability, statistics, and economics such as MS&E 120, 121, MATH 51, ENGR 60, or equivalents. No prior knowledge of finance required.
3 units, Aut (Giesecke, K)

MATHEMATICS

MATH 222. Financial Mathematics — Black-Scholes pricing of European options, implied volatility, optimal stopping and American options. Prerequisite: 238 or equivalent. 4 units, Win (Jovanovic, D)

MATH 224. Financial Mathematics II — Optimal stopping and American options. Prerequisite: 238 or equivalent. 3 units, Aut (Jovanovic, D)

MATH 220B. Partial Differential Equations of Applied Mathematics — Parabolic and elliptic partial differential equations. Eigenvalue problems, Green’s functions, properties of harmonic functions, potential theory, Fourier series and Fourier transform. Prerequisite: 220A or 131. 3 units, Win (Liu, T)

MATH 236. Introduction to Stochastic Differential Equations — Brownian motion, stochastic integrals, and diffusions as solutions of stochastic differential equations. Functionals of diffusions and their connection with partial differential equations. Random walk approximation of diffusions. Prerequisite: 136 or equivalent and differential equations. 3 units, Win (Papanicolaou, G)

MATH 239. Computation and Simulation in Finance — Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent. 3 units, Spr (Durrleman, V)

STATISTICS

FRENCH AND ITALIAN

Emeriti: (Professors) John G. Barson, Marc Bertrand, Robert G. Cohn, John Freccero, René Girard, Ralph M. Hester, Pauline Newman-Gordon, Roberto B. Sangiorgi, Leo Weinstein
Chair: Joshua Landy
Directors of Graduate Studies: Hans U. Gumbrecht (French), Carolyn Springer (Italian)
Directors of Undergraduate Studies: to be announced (French), Carolyn Springer (Italian)

Professors: Jean-Marie Apostolidès, Margaret Cohen, Jean-Pierre Dupuy, Hans U. Gumbrecht, Robert Harrison, Elisabeth Mudimbe-Boyi, Jeffrey T. Schnapp, Michel Serres
Associate Professors: Joshua Landy, Carolyn Springer
Assistant Professors: Cécile Alduy, Dan Edelstein, Laura Wittman
Senior Lecturers: Maria Devine, Nelee Langmuir
Lecturers: John Mustain, Kathy Richman, Sarah Sussman

Courtesy Professors: Paula Findlen, Michael Marrinan

Visiting Professors: Karl Bohrer, Remo Ceserani

Department Offices: Building 260, Room 122-123
Mail Code: 94305-2010
Department Phone: (650) 723-4183
Email: fren-ital@stanford.edu

Web Site: http://www.stanford.edu/dept/fren-ital/

Courses given in French and Italian have the subject codes FRENGEN, FREN, ITALGEN, and ITALLIT. For courses in French or Italian language instruction with the subject code FRENLANG or ITALLANG, see the “Language Center” section of this bulletin. For a complete list of subject codes, see Appendix B.

FRENCH SECTION

The French section provides students with the opportunity to pursue course work at all levels in French language, literature, cultural and intellectual history, theory, film, and Francophone studies. It understands the domain of “French Studies” in the broadest possible sense: as encompassing the complex of cultural, political, social, scientific, commercial, and intellectual phenomena associated with French-speaking parts of the world, from France and Belgium to Canada, Africa, and the Caribbean.

Three degree programs are available in French: a B.A. (with two concentrations), a terminal M.A., and a Ph.D. (with various possible minors and combined degrees).

A curator for Romance Languages oversees the extensive French collection at Green Library. The Hoover Institute on War, Revolution, and Peace also includes a wealth of materials on 20th-century France and on French social and political movements.

A distinguished group of visiting faculty and instructors contributes regularly to the life of the French section. The section maintains frequent contacts with the École Normale Supérieure, the Institut d’Études Politiques, the École Polytechnique, and other prestigious institutions.

France-Stanford Center for Interdisciplinary Studies — The France-Stanford Center for Interdisciplinary Studies, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, addressing historical and contemporary issues from a broad range of perspectives. Its programs bring faculty and students from across Stanford’s departments and schools together and in contact with colleagues in France to explore issues of common intellectual concern. The center invites to campus French-speaking scholars who offer courses or give lectures or seminars in various University centers and programs. It currently facilitates internships for Stanford students in computer science and engineering in Sophia-Antipolis, France’s new high-tech center near Nice.
Stanford Overseas Studies Program in Paris offers undergraduates the opportunity to study in France during the Autumn, Winter, and Spring quarters. It provides a wide range of academic options, including course work at the Stanford center and at the University of Paris, independent study projects, and internships. In addition, the program promotes a high degree of interaction with the local community through volunteer employment, homestays, and internships. The minimum language requirement for admission into Stanford in Paris is one year of French at the college level.

Courses offered in Paris may count toward fulfillment of the requirements of the French major or minor. Specialized offerings at the Stanford home campus and in Paris encourage engineering students to study abroad and to coordinate internships through the department to work in France. Students should consult with the Director of Undergraduate Studies before attending the program, and after returning, in order to ensure that course work and skills acquired abroad can be coordinated appropriately with their degree program. Detailed information, including program requirements and curricular offerings, may be obtained from the “Overseas Studies” section of this bulletin, the Stanford in Paris web site http://osp.stanford.edu/program/paris, or the Overseas Studies Program Office in Sweet Hall.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The French section offers a major and a minor in French. Students are encouraged to pursue a course of study tailored to their individual needs and interests. For some students, a degree in French serves as a stepping stone to entering international business or law; for others, it provides training as a translator or teacher; for others, it serves as preparation for graduate studies in French, History, or Comparative Literature.

The French literature, culture, and civilization specialization allows students to combine their work in French with work from another field such as African studies, linguistics, art history, music, economics, history, education, medicine, international relations, political science, or other foreign languages and literatures. The literature and philosophy specialization offers students the opportunity to pursue interdisciplinary studies at the intersection of literature and philosophy in a structured manner and alongside similarly interested students from a variety of humanistic disciplines.

Students who complete the department’s two quarter IHUM sequence are eligible for 5 units towards the French major or minor. Students enrolled in the French language discussion section of the IHUM sequence receive, in addition to these 5 units, an additional 4 units (2 per quarter), assuming that they complete the written work in French.

Prerequisites — Before declaring a French major, a student must be proficient in written and spoken French at a second-year college level. Such proficiency must be demonstrated either:

1. by having completed the entire language sequence up to and including FRENLANG 23;
2. by having scored a 5 or better on either the French language or the French literature Advanced Placement (AP) exams; or
3. by having demonstrated equivalent proficiency on the departmental placement exam offered at the beginning of each academic quarter.

Students not meeting at least one of these criteria are required to complete the portion of the language sequence as deemed necessary by the department before beginning to take courses toward the major.

REQUIREMENTS

The French major requires a minimum of 56 units, all courses of which must be taken for a letter grade and must be selected in accordance with the following requirements:

1. Advanced language (ca. 4 units): FRENLANG 126, Stylistics and Textual Analysis
2. Introductory series on French and Francophone literature and culture (ca. 12 units): three courses must be taken from the FRENLIT 130, 131, 132, 133 sequence. A 130-level course fulfills the Writing in the Major requirement.
3. Research Seminar (2 units): a majors-only seminar, DLCL 189, must be taken in the Autumn Quarter of the senior year. This course prepares and assists students as they undertake either their senior project (see below) or honors thesis. It also familiarizes them with research resources in the department and University and helps students think critically about their research topics. By the end of the course, students must have chosen an adviser, generally a faculty member in the department, who offers support and feedback throughout the development of the senior project or honors thesis.
4. Ancien Régime courses (ca. 8 units): at least two courses must concern the period before July 1789. Courses fulfilling this requirement within the department must be drawn from the 140 level or above. Courses chosen from outside the department must be preapproved by the Director of Undergraduate Studies.
5. Upper-level French courses (ca. 8 units): at least two additional courses must be taken with the department. In total, at least 32 units of course work must be taken within the department. No more than three courses numbered lower than 130 may be counted towards the major.
6. Remaining courses (ca. 22 units): the student is encouraged to use the remaining five or more courses to develop a specialized knowledge of a specific domain related to either the senior project or the honors thesis. These courses must show obvious internal consistency and relevance to the chosen focus, and must be approved by the Director of Undergraduate Studies. Where possible, students are encouraged to complete their written work in French.
7. One course, for a maximum of 4 units, may be drawn from individual work (199).

Senior Project — In order to demonstrate the quality of his or her scholarly work and command of written French, each major not writing an honors thesis (see “Honors Program” below) is required to submit a senior project to the project adviser before May 15 of the senior year. The project consists of a research paper with a target length of 20 pages and must be written in French.

The senior project is not graded and no credit is offered for it. However, acceptance of the senior project by the project adviser is a condition for graduation from the department. A paper deemed unsatisfactory by the project adviser is returned to the student for rework and resubmission by an agreed-upon date.

Students are advised to begin thinking about their senior projects as early as their junior year, even if they are in Paris. While in Paris, students should avail themselves of the unique resources the city has to offer for research on their chosen topic.

FRENCH AND PHILOSOPHY

The French and Philosophy major specialization requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. Advanced language (ca. 4 units): FRENLANG 126, Stylistics and Textual Analysis.
2. Introductory Series on French and Francophone Literature and Culture (ca. 12 units): three courses must be taken from the FRENLIT 130, 131, 132, 133 sequence.
3. Philosophy Writing in the Major (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. Philosophy and Literature Gateway Course (4 units): FRENGEN 181 (same as PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
5. Aesthetics, Ethics, Political Philosophy (ca. 4 units): one course from the PHIL 170 series.
6. Language, Mind, Metaphysics, and Epistemology (ca. 4 units): one course from the PHIL 180 series.
7. History of Philosophy (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
8. Upper Division French Courses (ca. 12 units): at least three courses numbered FRENLIT/FRENGEN 140 or higher.
9. Related Courses (ca. 8 units): two upper division courses relevant to the student’s chosen area of specialization. One course (4 units) may be FRENLIT 199, Individual Work.
**MINOR IN MODERN LANGUAGES**

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of French and Italian and the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

**CROSSDISCIPLINARY STUDIES**

**FRENCH AND LINGUISTICS**

Linguistics majors may elect to specialize in the French language. In addition to 50 units in Linguistics, of which two courses (LINGUIST 110 and 160) may be replaced by comparable courses in French, students opting for a French Language specialization must take three courses in the introductory series devoted to French and Francophone literature and culture (FRENLIT 130-133). For full details, contact the Department of Linguistics.

**HONORS PROGRAM**

 Majors are eligible to apply to the honors program if they have maintained an average grade point average (GPA) of 3.5 in five upper-division French courses. The honors program candidate must fulfill all regular requirements for the major, save the senior project, from which he or she is exempt. Instead, the student undertakes the writing of a research paper no shorter than 50 pages in length, written in French or English, on a specialized topic. No later than the end of the Spring Quarter of the junior year, the student must submit to the Director of Undergraduate Studies an “Application for Honors in French,” the central portion of which must contain an outline of the proposed honors essay. If it is in need of revisions, the Director of Undergraduate Studies helps the student through the revision process until the proposal is granted his or her approval. (The Director of Undergraduate Studies also helps the student identify an appropriate adviser for the essay.) Students may enroll for 2 units of credit in FRENLIT 198 for the drafting or revision of the thesis proposal in Spring Quarter of the junior year. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in FRENLIT 198 while composing the thesis during Winter Quarter. A total of 10-12 units are awarded for successful completion of honors course work, independent study, and the finished thesis. All honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15 of the terminal year. If an essay is found deserving of grade of ‘A-’ or better by the thesis adviser, honors are granted at the time of graduation.

**Honors College**—The Department of French and Italian encourages all honors students to enroll in the honors college run by the Division of Literatures, Cultures, and Languages. The college meets at the end of every summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted by the Spring Quarter of the same calendar year. For more information, contact the undergraduate student services officer.

**COTERMINAL BACHELOR’S AND MASTER’S PROGRAM**

Each year the department admits a very small number of highly motivated undergraduates to its coterminous B.A. and M.A. degree in French. Applications must be submitted by January 31 of the senior year to the department chair and must include: a written statement of purpose, two letters of recommendation from faculty at Stanford, and a transcript. Students accepted into the coterminous program must have been undergraduate French majors and must meet all requirements that apply to both degrees.

For University coterminous degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#coterm.
LA MAISON FRANÇAISE
La Maison Française, 610 Mayfield, is an undergraduate residence that serves as a campus French cultural center, hosting in-house seminars as well as social events, film series, readings, and lectures by distinguished representatives of French and Francophone intellectual, artistic, and political life.

GRADUATE PROGRAMS

Admission to the M.A. and Ph.D. Programs—Applications and admissions information may be obtained from Graduate Admissions in the Registrar’s Office, or at http://gradadmissions.stanford.edu. Applicants should read the general regulations governing degrees in the “Graduate Degrees” section of this bulletin. They should have preparation equivalent to an undergraduate major in French and should also have reached a high level of speaking and writing proficiency in French. Previous study of a language other than French is also highly desirable. Recent Graduate Record Examination (GRE) results are required, as is a writing sample representative of the applicant’s best undergraduate work.

MASTER OF ARTS

The terminal M.A. in French provides a flexible combination of language, literature, cultural history, and methodology course work designed to enhance the preparation of secondary school, junior college, or college teachers.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a grade point average (GPA) of 3.3, as well as pass the master’s examination at the end of their training. To fulfill the requirements in a single year, enrollment must be for an average of 12 units per quarter.

Applications for admission to the Masters of Arts program must be received by March 29 of the prior academic year. Candidates for this degree are not eligible for financial aid or for teaching assistantships.

REQUIREMENTS

The basic program of 45 units requires the following course work:
1. One teaching methodology course, ordinarily APPLING 201, The Learning and Teaching of Second Languages, the second-language-pedagogy course offered by the Stanford Language Center.
2. A cultural history course (to be taken either inside or outside the Department of French and Italian).
3. All remaining units are to be taken in advanced French literature courses (200 level or above), three of which must be concerned with the prerevolutionary period of French cultural history.

EXAMINATION

The terminal M.A. examination is normally administered two weeks before the end of the Spring Quarter by the three members of the examination committee, selected each year by the Director of Graduate Studies. It consists of two parts:
1. The written exam (two hours) tests the candidate’s general knowledge of French literature and is based on the same reading list as that for the Ph.D. qualifying exam (see below).
   The exam requires that the candidate answer four questions (out of six) in a manner that demonstrates his/her ability to synthesize and draw parallels between periods, genres, and systems of representation on the basis of the standard reading list. At least one question must be answered in French and two in English. Use of a dictionary is allowed.
   If the student’s performance on the exam is deemed a “pass” by two out of three of the members of the examining committee, the student is then permitted to go on to the oral examination (which is ordinarily taken later the same week).
   Should the candidate fail the M.A. written exam, he/she is given a second chance at the end of the Spring Quarter.
2. The oral exam (90 minutes) assumes as its point of departure the student’s answers on the written exam. It examines the candidate’s knowledge and understanding of French literary history on the basis of the standard reading list.

At the conclusion of the oral exam, the examination committee meets in closed session and discusses the student’s performance on the written and the oral portions of the examination. If it is judged adequate, the M.A. degree is granted. In no event may the master’s written and oral exams be taken more than twice.

DOCTOR OF PHILOSOPHY

The Department of French and Italian provides students with the opportunity to pursue advanced work in French language, literature, cultural history, theory, and Francophone studies within a uniquely flexible interdisciplinary framework. Unlike conventional Ph.D. programs, it encourages students to construct a highly individualized course of study, integrating specialization in a particular literary period or area with work in such fields as art history, classics, film studies, the history of science and technology, linguistics, literary theory, music, and philosophy. The program is founded on the belief that such a balance between period/area specialization and interdisciplinary breadth is not only desirable but essential in a field such as French Studies. Students in the Ph.D. program are normally admitted as French Fellows on a four- to five-year fellowship plan that integrates their financial support with rigorous training as scholars and as prospective university faculty.

Students admitted to the program work closely with the Director of Graduate Studies in structuring a plan consistent with their needs and interests. Aside from the benefits of the program’s flexible structure, a number of unique resources are available to students. The French section’s exchange program with the Ecole Normale Supérieure provides candidates (selected on a competitive basis) with the opportunity to pursue dissertation research in Paris.

ADVISING

Given the interdisciplinary nature of the Ph.D. program in French and the opportunity it affords each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Director of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the first year of study, each student must choose a faculty adviser whose expertise is appropriate to his or her own area of research and interests.

Entering graduate students are also paired with a faculty mentor as a function of their stated research interests at the time of admission. The role of the mentor is to advise the student on an informal basis regarding the student’s academic program and plans.

REQUIREMENTS

A candidate for the Ph.D. degree in French must complete at least 135 units of graduate-level study and teach five language courses in the section. 72 of the 135 units must be taken within the department.

Students entering with a master’s degree or previous graduate work may receive credit as determined on a case-by-case basis, up to a maximum of 45 units. Fellowship funding, teaching, and other requirements are adjusted according to University regulations.

REQUIRED/RECOMMENDED COURSES

Three courses are required:
1. FRENGEN 369, Introduction to Graduate Studies: Fragments of a Material History of Literature, a 5-unit seminar offered in the Autumn Quarter of each year, designed to acquaint students with the theoretical and methodological concerns of literary study. This course must be taken in the first quarter of study.
2. Definition and Inquiry: FRENGEN 201E, New Methods and Sources in French and Italian Studies, a three-unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.
3. APPLING 201, The Learning and Teaching of Second Languages, the second-language pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.
**Distribution of Elective Courses**—Apart from these requirements, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. Of the 135 minimum units of graduate course work required for the Ph.D., at least 72 units must be taken within the Department of French and Italian.

**Language Requirements**—Attaining a native or near-native fluency in French is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree. In addition, candidates are required to achieve a high level of proficiency in one additional foreign language, with the language in question to be determined by the student and his or her adviser as a function of the student’s area of specialization. Such proficiency may be demonstrated either by successfully completing a third-year level or above undergraduate course or, better, a graduate seminar in the language in question; or by passing an exam that establishes a third-year or above level of competence in writing, reading, and speaking. (In no case is passage of a standard reading competence exam considered sufficient.) In the case of ancient Greek and Latin, a high level of proficiency means a level superior to a second year collegiate level of proficiency in reading and writing.

The second foreign language requirement should be completed as soon as possible, but in any case not later than the end of the third year for students who entered the program without an M.A., and not later than the end of the second year for students who entered the program with a master’s degree. Completion of the language requirements is a prerequisite for taking the University Oral Examination.

**EXAMINATIONS**

There are three examinations: the 90-minute qualifying exam, the special topic exam, and the University oral examination.

**Qualifying Examination**—The first oral examination, which normally takes place at the end of Spring Quarter of the first year of study, tests the student’s knowledge of the French language and of French literature. The student is responsible for scheduling the exam one month in advance. The date and time chosen must be determined in consultation with the examining committee (see below).

The exam is based on a standard reading list covering major works from all periods of French literature, from the Middle Ages to the contemporary scene. The list may be expanded to reflect a student’s particular interests, but not abridged.

Half of the exam takes place in English, half in French (with the student free to choose which portion transpires in which language).

The exam consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given either in English or in French and should engage, in a succinct and synthetic manner, an issue or set of issues of broad relevance to French literary history about which the student has been thinking as he or she has been preparing the exam. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion.

2. A 70-minute question and answer period in which the examining committee follows up on the candidate’s presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in French. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit.

The examining committee consists of two faculty members selected by the student, as well as the Director of Graduate Studies.

Two weeks before the exam, the student must also submit a graduate seminar paper which he or she considers representative of the quality of his or her graduate work at Stanford. On the basis of this paper, the results of the qualifying examination, and an evaluation of the student’s overall progress, the members of the student’s examining committee vote for or against admission to candidacy for the Ph.D. The terminal master’s degree may be awarded to students who have completed the qualifying procedure, but whose work is judged insufficient for admission to candidacy for the Ph.D. If the overall case for or against promotion to candidacy is deemed uncertain, students may be asked either to retake the qualifying exam, to submit a new paper, or they may be admitted to candidacy on a probationary basis. Subject to approval by the Director of Graduate Studies and department chair, students already holding an advanced degree in French Studies, when admitted to the French Ph.D. program, may be excused from the qualifying exam. However, they must present a formal request for a waiver to the Director of Graduate Studies upon their arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the qualifying exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

**Special Topic Examination**—The second oral examination, which normally takes place at the end of Spring Quarter of the second year of study, concerns a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his or her adviser and the Director of Graduate Studies. Students should design this research project so that it has the breadth and focus of a book they might write or a seminar they might teach. The proposed topic should be discussed with the Director of Graduate Studies before the end of the quarter preceding the quarter in which they plan to take the exam. The student and the Director of Graduate Studies choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student’s adviser.) In addition to these two members, the examination committee includes the Director of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee.

At the beginning of the quarter in which he or she takes this examination, the student discusses research plans with committee members, who offer suggestions on the project and on the reading list. In general, the reading list should be between one and two single-spaced pages in length. In the course of the quarter, the student should regularly consult with committee members to discuss his or her progress. The actual examination lasts one hour. The candidate must present a tentative reading list to the members of the committee about twelve weeks before the examination and a final reading list at least one week before the examination. This list, to be headed by a title describing the topic of the examination, may be divided into two parts: core works that the student has found to be central to his or her topic, and works that fill out the periphery of the topic. Two copies of the final reading list must be given to the student services officer for the Division of Languages, Cultures, and Literatures: one for the student’s file and one for a special file which subsequent students can consult. The examination assumes the form of an oral colloquy between the student and the examining committee. It concentrates on the conclusions to which the student’s research has led him or her, and aims to determine the student’s overall mastery of the research topic in question. At the beginning of the examination, the student presents a talk of no longer than 20 minutes (not to be written out, but to be presented from notes) reviewing the results of his or her reading and outlining the major features and implications of the chosen topic. The remainder of the hour is devoted to a discussion between the student and the committee regarding the problems the student raised in the talk and the reading list itself.

The following procedures are applicable to both the qualifying and special topic exams:

1. The committee meets briefly at the end of the exam and immediately informs the student as to whether he or she has passed the examination.

2. In the week after the examination, the student is expected to meet individually with members of the committee to discuss strengths and weaknesses revealed during the qualifying exam or colloquy.

3. The Director of Graduate Studies places a brief letter describing each one-hour oral exam in the student’s file, a copy of which is also be furnished to the student.
The University Ph.D. examination follows most of the same procedures outlined above. Normally students put one, and at most two, full-time quarters of study into preparation for the exam. The University oral exam should virtually always be taken at the end of Spring Quarter of the third year of study. Students must complete minimum course requirements (as listed in this bulletin) and all language and course requirements before the quarter in which they take the University oral examination.

Early in the quarter before they intend to take the University Ph.D. examination, students must discuss the scope and nature of the period to be covered, as well as the dissertation proposal, with the Director of Graduate Studies. The reading list should include works in all genres relevant to the period covered. The amount of non-literary or crossdisciplinary material on the reading list varies according to the period and the research interests of the student. Students ordinarily cover about a century of writing in great depth. As with the preceding examinations, the Director of Graduate Studies and the student determine the committee’s makeup.

The governing principle is that the University oral examination in French must be a period examination rather than one on the specific concerns of the dissertation proposal, which is dealt with separately in a later colloquium. It follows from this basic principle that the examination covers the major authors and genres in the student’s period of choice. The lists may well include critical and scholarly works or texts from outside the traditional domain of French literary studies (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student’s field.

The aim of the University oral is to establish the student’s credentials as a specialist in the period of his or her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student’s research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work will prove relevant, but they should also remember that the examination is the central means of certifying their expertise in a literary period.

The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee and the student services officer for the Division of Literatures, Cultures, and Languages no later than two weeks preceding the examination. Students must submit the Request for University Oral Exam form to the student services officer at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. dissertation reading committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the foreign language the student presents to meet the language requirements. The two-hour examination consists of the following two parts:

1. Forty minutes: a 20-minute talk by the candidate followed by a 20-minute question and answer period concerning the talk. Working with the committee members, the candidate’s adviser will prepare three or more questions to be presented to the candidate at 8:00 a.m. on the day of the examination. These questions concern broad topics pertinent to the candidate’s reading list and period of specialization, including concerns relevant, but by no means limited to, the student’s projected dissertation. The candidate chooses one of the questions and develops a 20-minute talk in response. Students must not read from a prepared text, but rather must speak from notes. They are free to consult any necessary materials while preparing the talk. The candidate is questioned for 20 minutes on the talk, with the dissertation adviser starting the questioning.

2. One hour, 20 minutes: questions on the area of concentration. Each member of the committee, except for the chair, is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications.

The University oral examination is a formal University event. It represents the last occasion for the faculty to evaluate a student’s overall preparation as a candidate for the Ph.D. After the University orals, only the colloquium on the dissertation prospectus and certification of the final dissertation by the student’s reading committee stand in the way of conferral of the Ph.D. The examination, therefore, is a uniquely significant event and is designed to evaluate the student’s preparation as a specialist in a given sector of French studies, but within a broader context than that provided by a single course, examination, or even the dissertation itself.

Dissertation

The doctoral dissertation should demonstrate the ability to carry out research, organize, and present the results in publishable form. The scope of the dissertation should be such that it could be completed in 12 to 18 months of full-time work.

Colloquium on the Dissertation Proposal — The colloquium normally takes place in the quarter following the University oral examination; in most cases this means early in Autumn Quarter of the student’s fourth year of study. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student (lasting no more than ten minutes), and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double-spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project’s relation to prior scholarship on the topic, and lay out a complete chapter-by-chapter plan.

It is the student’s responsibility to schedule the colloquium no later than the first half of the quarter subsequent to the quarter in which the student passed the University oral examination. The student should arrange the date and time in consultation with the student services officer and with the three examiners. The student services officer schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

Joint Degrees and Minors

A candidate may also take a joint degree in French and Humanities, as described in the “Interdisciplinary Studies in Humanities” section of this bulletin. Minors are possible in Comparative Literature, Italian, Linguistics, Modern Thought and Literature, and other departments offering related courses such as Art and Art History, History, Music, Philosophy, and Spanish.

Students interested in a joint degree or a minor should design their course of study with their adviser(s). Joint degrees and minors usually require 24 additional units. With careful planning, students may complete course work for the Ph.D. and the minor in a total of nine quarters.

Ph.D. Minor in French Literature — The department offers a minor in French Literature. The requirement for a minor in French is successful completion of 24 units of graduate course work in the French section with a grade point average (GPA) of 3.0 or above. Interested students should consult the graduate adviser.
ITALIAN SECTION

The Italian section offers a variety of graduate and undergraduate programs in Italian language, literature, culture, and intellectual history. Course offerings range from small and highly specialized graduate seminars to general courses open to all students on authors such as Dante, Boccaccio, and Machiavelli.

On the undergraduate level, a number of options are available. In addition to the Italian major, students may choose from a minor in Italian, an honors program in the Humanities (see the “Interdisciplinary Studies in Humanities” section of this bulletin), an honors program in Italian, and two extended majors: one in Italian and French literature, and one in Italian and English literature.

On the graduate level, programs of study leading to the M.A. degree and the Ph.D. degree are offered in Italian literature. Joint programs for the Ph.D. degree with the graduate programs in Comparative Literature, Humanities, and Modern Thought and Literature are also available.

Special collections and facilities at Stanford offer the possibility for extensive research in Italian studies and related fields. These include the undergraduate and graduate libraries and the Hoover Institution for the Study of War, Revolution, and Peace. Collections in Green Research Library are especially strong in the Medieval, Renaissance, and contemporary periods; the Italian section is one of the larger constituents of the Western European collection at the Hoover Library; and the Music Library has excellent holdings in Italian opera.

Stanford in Italy—Stanford in Florence affords undergraduates with at least three quarters of Italian the opportunity to take advantage of the unique intellectual and visual resources of the city and to focus on two areas: Renaissance History and Art, and Contemporary Italian and European Studies. The program is structured to help integrate students as fully as possible into Italian culture through homestays, Florence University courses, the Language Partners Program, research, internship and public service opportunities, and by conducting some of the program’s classes completely in Italian. Many of the courses offered in Florence may count toward the fulfillment of requirements for the Italian major or minor. Students are encouraged to consult with the Italian undergraduate adviser before and after a sojourn in Florence to ensure that their course selections meet Italian section requirements. Information on the Florence program is available in the “Overseas Studies” section of this bulletin, the Stanford in Florence web site http://osp.stanford.edu/program/florence, or at the Overseas Studies office in Sweet Hall.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Italian major offers students the opportunity to develop an in-depth knowledge of Italian literature, language, and civilization through a highly flexible program combining course work in Italian with work in such fields as art history, classics, comparative literature, economics, English, French, history, international relations, music, philosophy, and political science. All Italian majors are required to have completed three second-year language courses (or the equivalent taken at the Florence campus): ITALLANG 21. Second-Year Italian, First Quarter ITALLANG 22. Second-Year Italian, Second Quarter ITALLANG 23. Second-Year Italian, Third Quarter

Completion of the department’s two quarter Great Works IHUM sequence (see above) entitles a student to 5 units towards the Italian major or minor. Students considering an Italian major should consult with the Italian undergraduate adviser as early as possible (even before completing the language requirement) in order to ensure a maximum of flexibility in designing a course of study suited to individual needs and cultural interests.

Italian majors must complete 60 units of course work above the 100 level.

The remaining requirements for the major are:

1. A minimum of 32 units of Italian courses (selected from courses numbered 100 and above).

2. Of these courses, at least one on Dante is required, as well as at least one in each of the following areas: (a) the Middle Ages; (b) the early modern period; and (c) the modern period. A Dante course may fulfill the Middle Ages requirement.

3. The intermediate-level survey sequence (ITALLIT 127, 128, 129).

4. One advanced language course beyond the level of ITALLANG 114.

Of the 60 units required for the major, up to 28 units of course work in related fields may be taken outside the department.

ITALIAN AND PHILOSOPHY

A second option is now possible within the Italian major, offering students the opportunity to combine studies in literature and philosophy. Students take most of their courses alongside students from departments specializing in the intersection of literature and philosophy.

The Italian and Philosophy major track requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. Italian Survey Sequence (ca. 12 units): ITALLIT 127, 128, 129.

2. Advanced Language Course (ca. 4 units): ITALLANG 114 and above.

3. Philosophy Writing in the Major (5 units): PHIL 80. Prerequisite: introductory philosophy class.

4. Philosophy and Literature Gateway Course (4 units): ITALGEN 181 (same as PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.

5. Aesthetics, Ethics, Political Philosophy (ca. 4 units): one course from the PHIL 170 series.

6. Language, Mind, Metaphysics, and Epistemology (ca. 4 units): one course from the PHIL 180 series.

7. History of Philosophy (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.

8. Upper Division Italian Courses (ca. 12 units): at least three courses numbered ITALLIT/ITALGEN 100 or higher.

9. Related Courses (ca. 8 units): two upper division courses relevant to the student’s chosen area of specialization.

10. Capstone Seminar (ca. 4 units): to be selected from a set of seminars chosen by the undergraduate adviser of the program philosophico and literary thought. This course must be taken in the student’s senior year.

The capstone seminar and the two related courses must be approved by both the undergraduate adviser of Italian and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. No more than 24 units may be drawn from courses offered overseas. Substitutions, including transfer credit, will not normally be permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NS; the remainder must be taken for a letter grade.

EXTENDED MAJORS

Requirements for both extended majors are essentially identical to those of the Italian major with a concentration in Italian literature.

Italian and English Literatures—In addition to the 32 units required for the B.A. in Italian, candidates must complete four English literature courses numbered 100 and above related to the field of concentration in Italian Studies.

Italian and French Literatures—In addition to the 32 units required for the B.A. in Italian, candidates must complete four French literature courses numbered 100 and above related to the field of concentration in Italian Studies.

DIGITAL HUMANITIES MODULE

The French and Italian department, in collaboration with the Humanities Lab, also offers a digital humanities module that can be combined with any of the department’s major programs. Students who are interested in digital humanities should contact the department’s Director of Undergraduate Studies who facilitates coordination with the Humanities Lab. Students planning to combine the Italian major and the digital humanities module must fulfill the following requirements in addition to the general major requirements:
1. CS 105 or equivalent
2. Participate in the Humanities Lab Gateway core seminar (4 units)
3. Complete the Humanities Lab Practicum (2 units) in the junior year
4. Complete one digital project, in lieu of the course’s main writing requirement, in a course offered in the department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.

Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project.

MINORS

Students considering a minor in Italian are encouraged to design a course of studies that fosters their understanding of the interaction between Italian and their second area of expertise. A minimum of 24 units of undergraduate work beyond the Italian 3 level must be completed.

Requirements for the minor include two intermediate language courses (chosen from ITALLIT 21, 22, and 23); all three of the introductory series on Italian literature and culture (ITALLIT 127, 128, 129); and a minimum of one advanced course in language or literature numbered 114 and above. All courses must be chosen in consultation with the Director of Undergraduate Studies, who is responsible for evaluating all requests and individual study plans for the minor.

MINOR IN LITERATURE

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of French and Italian and the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of French and Italian and the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

HONORS PROGRAMS

ITALIAN

Italian majors with a grade point average (GPA) of 3.3 (B+) or better in all Italian courses are eligible for department honors. Students interested in the honors program should consult the Italian undergraduate adviser early in their junior year. In addition to the requirements listed above, the student must submit to the Italian faculty a proposal for the honors essay by the end of Spring Quarter of the junior year. During the quarter, students may enroll in ITALLIT 198 while drafting and revising the proposal and conducting preliminary research. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in ITALLIT 198 while composing the thesis during Winter Quarter. A total of 10-12 units are awarded for successful completion of honors course work, independent study, and the finished thesis.

HUMANITIES

An honors program in the Humanities is available for Italian majors who wish to supplement their studies with a carefully structured program of humanistic studies. See the “Interdisciplinary Studies in Humanities” section of this bulletin for further information.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

Each year the department admits a small number of highly motivated undergraduates to its coterminal B.A. and M.A. degree in Italian. Applications must be submitted by January 31 of the senior year to the department chair and must include: a written statement of purpose, two letters of recommendtion from faculty at Stanford, and a transcript. Students accepted into the coterminal program must have been undergraduate Italian majors and must meet all requirements that apply to both degrees.

LA CASA ITALIANA

La Casa Italiana, 562 Mayfield, is an undergraduate residence devoted to developing an awareness of Italian language and culture. It works closely with the Italian Cultural Institute in San Francisco and with other local cultural organizations. It often hosts visiting representatives of Italian intellectual, artistic, and political life. A number of departmental courses are regularly taught at the Casa, which also offers in-house seminars. Assignment is made through the regular undergraduate housing draw.

GRADUATE PROGRAMS

Admission to the Program — Candidates are expected to be proficient in the Italian language and to have done significant course work in Italian literature and/or Italian studies on the undergraduate level. Candidates with a broad humanistic and linguistic background are especially encouraged to apply. Contact Graduate Admissions in the Registrar’s Office, 630 Serra Street, Suite 120, or see http://gradadmissions.stanford.edu, for application information. Recent Graduate Record Examination (GRE) results are required.

MASTER OF ARTS

TERMINAL PROGRAM

The M.A. in Italian provides a combination of language, literature, civilization, and general courses designed to prepare secondary school, junior college, or college teachers. It is preferred that applicants have an undergraduate degree in Italian or in a related field. Knowledge of a second Romance language is desirable.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a GPA of 3.3 (B+), and pass a comprehensive oral examination (see “Qualifying Examination” section below for the Ph.D.). To fulfill the requirements in one year (four quarters), students should enroll for an average of 12 units per quarter.

The basic course program (45 units) is nine graduate courses in Italian, one of which may be in a related field. The option of substituting a master’s thesis for two literature courses is available.

Reading knowledge of a second Romance language is required. French is recommended.

Requirements for the completion of the M.A. include a comprehensive literature and language oral examination, which is given before the end of Spring Quarter or at the beginning of the following Autumn Quarter. Before taking the exam, a candidate for the degree must submit to the Italian faculty a sample graduate seminar paper representative of the quality of his or her graduate work. On the basis of this paper, the results of the comprehensive examination, and the student’s overall progress, members of the department vote for or against awarding of the M.A. degree.

Applications for admission must be received by May 31. Candidates for this degree are not eligible for financial aid or teaching assistantships.

DOCTOR OF PHILOSOPHY

Stanford’s Ph.D. program in Italian offers the opportunity for advanced work in Italian literature and studies within a flexible interdisciplinary framework. It is independent of the Ph.D. program in French and aims to encourage students to bring broad methodological and interdisciplinary concerns to bear on the study of Italian literature. While it places primary emphasis on developing a command of Italian literature as a whole, it allows students to construct a highly individualized course of study, integrating specialization in a particular literary period with work in such fields as art history, classics, comparative literature, feminist studies, film, French, history, history of science, linguistics, literary theory, Medieval or Renaissance studies, philosophy, and religion. The program is founded on the belief that balance between period specialization and interdisciplinary breadth is essential in a small field such as Italian studies, particularly given the diversity of the Italian literary canon which extends over many disciplines.
Students admitted into the Ph.D. program in Italian work closely with the adviser in structuring a plan of study appropriate to needs and interests. Such a plan usually involves a mix of teaching and courses taken within the Italian program, courses taken in other departments, and independent work under supervision of a member of the Italian faculty, thus integrating financial support with training as scholars and prospective university teachers. Assuming satisfactory academic progress, fellowships are typically offered for three or four years. Graduate-level work completed elsewhere may be counted as fulfilling part of the requirements for the degree. Students in the fifth year normally apply for outside fellowships or part-time teaching positions in the department.

Aside from the benefits of the program’s structure and fellowship plan, a number of unique resources are available to Ph.D. students in Italian at Stanford. During their years of study, students may be permitted to take courses, pursue dissertation research, and do independent work at the Stanford campus in Florence under supervision of a member of the Italian faculty. The Florence center, located in a palazzo along the Arno, is near important Florentine libraries and archives and the University of Florence. Graduate students also have at their disposal the resources of La Casa Italiana, a residential theme house which serves as an Italian cultural center and hosts such events as colloquia, lectures, and film series.

REQUIREMENTS

A candidate for the Ph.D. degree in Italian must complete at least 135 units of graduate-level study and teach five language courses in the section. 72 of the 135 units must be taken within the department. Students entering with a master’s degree or previous graduate work may receive credit as determined on a case-by-case basis, up to a maximum of 45 units. Fellowship funding, teaching, and other requirements are adjusted according to University regulations.

Required/Recommended Courses — Three courses are required:

1. ITALGEN 369, Introduction to Graduate Studies: Fragments of a Material History of Literature, a 5-unit seminar, offered in Autumn Quarter, and an independent reading assignment to acquaint students with the theoretical and methodological concerns of contemporary literary study. This course must be taken in the first quarter of study.

2. Definition and Inquiry: ITALGEN 201E, New Methods and Sources in French and Italian Studies, a 3-unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.

3. APPLLING 201, The Learning and Teaching of Second Languages, the second-language pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.

Apart from the above requirements, students are granted considerable freedom in structuring a course of study appropriate to individual needs. During the first year, most course work is usually done within the Italian section in order to ensure an adequate preparation for the qualifying examination. In the second and third years, the students’ programs normally consist of a combination of course work done inside and outside the Italian section, supplemented by tutorials and independent work pursued under supervision of the Italian faculty.

Language Requirements — As soon as possible, but not later than the end of the third year, the candidate must have passed reading examinations in two additional foreign languages. If the candidate’s period of concentration is earlier than the Romantic period, one of these must be Latin; if Romantic or later, French. Completion of the language requirement is a prerequisite for taking the University oral examination.

EXAMINATIONS

There are three examinations: the 90-minute qualifying exam, the special topic exam, and the University oral examination.

Qualifying Examination — The first oral examination, which normally takes place at the end of Spring Quarter of the first year of study, tests the student’s knowledge of the Italian language and of Italian literature. The student is responsible for scheduling the exam one month in advance. The date and time chosen must be determined in consultation with the examining committee (see below).

The exam is based on a standard reading list covering major works from all periods of Italian literature, from the Middle Ages to the late 20th-century. The list may be expanded to reflect a student’s particular interests, but not abridged.

Half of the exam takes place in English, half in Italian (with the student free to choose which portion transpires in which language).

The exam consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given either in English or in Italian and should engage, in a succinct and synthetic manner, an issue or set of issues of broad relevance to Italian literary history which the student has been thinking about as he or she has been preparing the exam. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion.

2. A 70-minute question and answer period in which the examining committee follows up on the candidate’s presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in Italian. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit.

The examination committee for the qualifying examination is made up of the members of the Italian faculty, including the student’s faculty adviser who chairs the examination.

Two weeks before the exam, the student must also submit a graduate seminar paper in which the student considers representative of the quality of his or her graduate work at Stanford.

On the basis of this paper, the results of the qualifying examination, and an evaluation of the student’s overall progress, the members of the student’s examining committee vote for or against admission to candidacy for the Ph.D. The terminal master’s degree may be awarded to students who have completed the qualifying procedure, but whose work is judged insufficient for admission to candidacy for the Ph.D. If the overall case for or against promotion to candidacy is deemed uncertain, students may be asked either to retake the qualifying exam, to submit a new paper, or they may be admitted to candidacy on a probationary basis. Subject to approval by the Director of Graduate Studies and department Chair, students already holding an advanced degree in Italian Studies, when admitted to the Italian Ph.D. program, may be excused from the qualifying exam. However, they must present a formal request for a waiver to the Director of Graduate Studies upon their arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the qualifying exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

Special Topic Examination — The second oral examination, which normally takes place at the end of Spring Quarter of the second year of study, concerns a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his or her adviser and the Director of Graduate Studies. Students should design this research project so that it has the breadth and focus of a book they might write or a seminar they might teach. The proposed topic should be discussed with the Director of Graduate Studies before the end of the quarter preceding the quarter in which they plan to take the exam. The student and the Director of Graduate Studies choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student’s adviser.) In addition to these two members, the examination committee includes the Director of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee.

At the beginning of the quarter in which he or she takes this examination, the student discusses plans for the section with committee members, who offer suggestions on the project and on the reading list. In general, the reading list should be between one and two single-spaced pages in length.

In the course of the quarter, the student should regularly consult with committee members to discuss his or her progress. The actual examination
The University Ph.D. examination follows central means of certifying their expertise in a literary period. It is understandable that some students, by their interest of the student. Students ordinarily cover about a century of writing for the period covered. The amount of “non-literary” or cross-disciplinary material on the reading list varies according to the period and the research interests of the student. Students ordinarily cover a century of writing in great depth. As with the preceding examinations, the Director of Graduate Studies and the student determine the committee’s makeup.

The governing principle is that the University oral examination in Italian must be a period examination rather than one on the specific concerns of the dissertation proposal, which is dealt with separately in a later colloquium. It follows from this basic principle that the examination covers the major authors and genres in the student’s period of choice. The lists may well include critical and scholarly works or texts from outside the traditional domain of Italian literary studies (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student’s field.

The aim of the University oral is to establish the student’s credentials as a specialist in the period of his or her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student’s research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and major genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work will prove relevant, but they should also remember that the examination is the central means of certifying their expertise in a literary period.

The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee and the student services officer for the Division of Literatures, Cultures, and Languages no later than two weeks preceding the examination. Students must submit the Request for University Oral Exam form to the student services officer at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. dissertation reading committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the two foreign languages the student presents to meet the language requirements. The two-hour examination consists of the following two parts:

1. Forty minutes: a 20-minute talk by the candidate followed by a 20-minute question and answer period concerning the talk.

Working with the committee members, the candidate’s adviser prepares three or more questions to be presented to the candidate at 8:00 a.m. on the day of the examination. These questions concern broad topics pertinent to the candidate’s reading list and period of specialization, including concerns relevant, but by no means limited to, the student’s projected dissertation. The candidate chooses one of the questions and develops a 20-minute talk in response. Students must not read from a prepared text, but rather must speak from notes. They are free to consult any necessary materials while preparing the talk. The candidate is questioned for 20 minutes on the talk, with the dissertation adviser starting the questioning.

2. One hour, 20 minutes: questions on the area of concentration.

Each member of the committee, except for the chair, is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical context. The University oral examination is a formal University event. It represents the last occasion for the faculty to evaluate a student’s overall preparation as a candidate for the Ph.D. After the University orals, only the colloquium on the dissertation prospectus and certification of the final dissertation by the student’s reading committee stand in the way of conferral of the Ph.D. The examination, therefore, is a uniquely significant event and is designed to evaluate the student’s preparation as a specialist in a given sector of Italian studies, but within a broader context than that provided by a single course, hour examination, or even the dissertation itself.

The fourth and (if necessary) fifth years of graduate study are devoted to writing and researching the doctoral dissertation. The dissertation should demonstrate the ability to carry out research, organize, and present the results in publishable form. The scope of the dissertation should be such that it could be completed in 12 to 18 months of full-time work.

Colloquium on the Dissertation Proposal — The colloquium normally takes place in the quarter following the University oral examination; in most cases this means early in Autumn Quarter of the student’s fourth year of study. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student (lasting no more than ten minutes), and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double-spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation,
describe its methodology and the project’s relation to prior scholarship on the topic, and lay out a complete chapter-by-chapter plan.

It is the student’s responsibility to schedule the colloquium no later than the first half of the quarter subsequent to the quarter in which the student passed the University oral examination. The student should arrange the date and time in consultation with the student services officer and with the three examiners. The student services officer schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

JOINT DEGREES AND MINORS

A joint degree program in Humanities and Italian Literature is described in the “Interdisciplinary Studies in Humanities” section of this bulletin. Minors are possible in a wide variety of related fields. Joint degree programs and minors frequently require 24 additional units of work, making completion of all course requirements in nine quarters difficult if careful advance planning is not done.

Ph.D. Minor in Italian Literature — The section offers a minor in Italian Literature. The requirement for a Ph.D. minor is a minimum of 24 units of graduate course work in Italian literature. Students interested in a minor in Italian should consult the graduate adviser.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

FRENCH SECTION

Note — Changes in course offerings after this bulletin has gone to print are sometimes necessary. Students are advised to consult the department bulletin board regularly.

Undergraduate courses in Literature and Culture (130-199)
Courses for Advanced Undergraduates and Graduates (200-299)
Graduate Seminars (300-399)

FRENCH LANGUAGE COURSES

The following courses in French language instruction represent a typical sequence for three years of French language study. Majors and prospective majors should consult the requirements for a B.A. in French above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at La Maison Française, see the “Language Center” section of this bulletin.

FRENLANG 1,2,3. First-Year French
3-5 units, Aut, Win, Spr (Ashaoali, O; Howard, H; Shashko, T; Tsethlikai, K; Wampole, C; Staff)

FRENLANG 22,23. Second-Year French
4-5 units, Aut, Win, Spr (Howard, H; Teuff, B; Shashko, T; Tsethlikai, K; Staff)

FRENLANG 120. Advanced French Oral Communication
3 units, Aut, Win, Spr (Staff)

FRENLANG 121. Introduction to French Texts
3-4 units, Aut (Palumbo-Liu, S)

FRENLANG 124. Advanced French Grammar
3-4 units, Aut, Win (Tsethlikai, K)

FRENLANG 125. French Phonetics
3-4 units, Spr (Palumbo-Liu, S)

FRENLANG 126. French Stylistics and Textual Analysis
3-4 units, Spr (Blanchard, M)

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by French and Italian department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in French or Italian are advised to consider satisfying their IHUM requirements by registering for the following IHUM courses.

IHUM 2.3. Epic Journeys, Modern Quests — Great religious, philosophical, and literary texts that have addressed timeless questions about human identity and the meaning of human life. Focus is on the epic tradition in the ancient and classical worlds and its transformations or abandonment in modernity. Compares conceptions of the afterlife. How traditions about the afterlife are created and appropriated. The diminished importance of the dead and increased emphasis on the power of the living in literary genres. GER: IHUM-2.3

IHUM 2: 5 units, Win (Harrison, R; Edelstein, D)

IHUM 3: 5 units, Spr (Landy, J; Edelstein, D)

GENERAL (IN ENGLISH)

These courses, with the subject code FREN.Gen, do not require knowledge of French and are open to all students.

FREN.GEN 48N. Machiavelli and Sons — Stanford Introductory Seminar. Preference to freshmen. The apparent paradox between Machiavelli’s ambiguous masterpiece The Prince, and his Discourses on Livy which lie at the origin of the modern republican tradition in Europe. Resituating Machiavelli within his time; what makes a republic. The history of Machiavelli’s reception and latter-day emulators including Harrington, Rousseau, and Madison.

5 units, Aut (Edelstein, D)

FREN.GEN 181. Philosophy and Literature — (Same as ITAL.GEN 181, PHIL 81.) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DLCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER: DB-Hum

4 units, Win (Anderson, L; Landy, J)

FREN.GEN 190Q. Parisian Cultures of the 19th and Early 20th Centuries — Stanford Introductory Seminar. Preference to sophomores. Political, social, and cultural events in Paris from the Napoleonic era and the Romantic revolution to the 30s. The arts and letters of bourgeois, popular, and avant garde cultures. Illustrated with slides. GER: DB-Hum

4 units, Spr (Bertrand, M)

FREN.GEN 192E. Images of Women in French Cinema: 1930-1990 — The myth of the feminine idol in French films in historical and cultural context. The mythology of stars as the imaginary vehicle that helped France to change from traditional society to modern nation after 1945. Filmmakers include Renoir, Truffaut, and Nelly Kaplan. The evolution of the role of women in France over 60 years. Lectures in English; films in French with English subtitles. GER: DB-Hum, EC-Gender

3-5 units, alternate years, not given this year

FREN.GEN 201E. New Methods and Sources in French and Italian Studies — (Same as ITAL.GEN 201E.) Based on student interest. Changes in research methods: the use of digitized texts, resources, and databases available through Stanford Library’s gateways. Emphasis is on strategies for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the level of
students’ knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.

- 1-4 units, not given this year

FRENGEN 205. Chrétien de Troyes — (Same as COMPLIT 222.) Verse romances seen as the origin of the modern Western novel, including Yvain, Lancelot, and Perceval. Historical analysis, courtly culture, and the literary tradition that they produced. Source is a bilingual edition of Chrétien’s complete works in medieval and modern French.

3-5 units, Aut (Gumbrecht, H)

FRENGEN 221. The History of the Book in Europe — (Same as ITALGEN 221.) From 1450 to present. The printed book from its invention to the 20th century; focus is on France, Italy, and England. Topics include: the manuscript tradition; printing and typography; the scholar-printers of the Renaissance; illustration; readers and reading; marginalia; newspapers, pamphlets, and ephemera; the emergence of the novel; Modernism; and Futurism. Course held in Stanford Libraries’ Special Collections.

3-5 units, Win (Mustain, J; Sussman, S)

FRENGEN 231. Space and the Modern Sublime — (Same as COMPLIT 251.) The power of space in producing modern notions of the sublime in philosophy, literature, and art. The role of global exploration in producing terrifying European encounters with nature and unknown peoples that the sublime transforms into art. Sublime spaces such as sea, desert, mountains, and city; the Romantic interiorization of the sublime into the psyche; mimesis, memory, and technology. Sources may include explorer writings; Burke, Kant, Lyotard, Deleuze and Guattari, Freud, the Shelleys, Coleridge, Hugo, Baudelaire, Rimbaud, and Irigaray; and artists such as Gericault, Turner, Delacroix, and Friedrich.

3-5 units, Win (Cohen, M)

FRENGEN 235E. French Social Thought from Durkheim to Bourdieu — The originality, importance, and relevance of distinctive features of French social thought: reflexive French human sciences where the focus is on the social conditions in which such sciences are possible; epistemological and ontological issues as opposed to empirical realities and the notions of collective representations, social hypocrisy, the collective unconscious, and collective self-deception; and the indispensable role of religious mental structures for the understanding of social cohesion. Readings of Bourdieu, Durkheim, Mauss, Lacan, Lévi-Strauss.

3-5 units, not given this year

FRENGEN 256E. Political Anthropology from Rousseau to Freud — A confrontation between ways of accounting for society in an individualistic framework: the social contract; political economy; individualistic sociology; society as crowd; mass psychology; and sociopolitical institutions. Creating a typology of the ways in which a given anthropology constrains conceptions of the social and political order. Writers include Rousseau, Hume, Smith, Constant, Tocqueville, Marx, Durkheim, Weber, and Freud.

3-5 units, Spr (Dupuy, J)

FRENGEN 258E. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S. — (Same as STS 211.) Nanoethics as a new discipline that accompanies the rise of nanotechnology research in the U.S. and Europe. Differing approaches to the ethics of science and technology in the case of a fledgling technology.

3-5 units, alternate years, not given this year

FRENGEN 259. Self-Reflexivity Historicized, or the Emergence of the Second-Order Observer — (Same as COMPLIT 259.) The origin of self-reflexivity as a habit and institution typical of intellectuals. Focus is on historical case studies from Western literatures and cultures since the Renaissance, based on a conceptual apparatus concerning the second-order observer, mainly derived from the work of Niklas Luhmann. Readings in original and translation include Descartes, Rousseau, Schlegel, Hegel, Gracián, and de Goya.

3-5 units, Win (Gumbrecht, H)

FRENGEN 263. Love Books of the Middle Ages — (Same as ITALGEN 263.) Love as a central theme in the Middle Ages of literature, natural philosophy, theology, and psychology. Literary works that probe the nature of love. Abelard and Heloise, History of His Calamities and Personal Letters; Andreas Capellanus, The Art of Courtly Love; Christine de Pizan, The Book of the Duke of True Lovers; Dante, Vita Nuova; Chaucer, Troilus and Criseyde; Boccaccio, The Decameron; and Shakespeare, Anthony and Cleopatra.

3-5 units, Win (Harrison, R)

FRENGEN 282. Heidegger and Poetry in an Age of Technology: Rilke, Trakl, and Char — (Same as COMPLIT 256, GERGEN 282.) Heidegger’s thinking on language and poetry. The technological transformation of language into univocal information and the resources of poetry for an ambigious resistance. Parallel consideration of philosophy’s relation to poetry. Readings from Rilke, Trakl, and Char.

3-5 units, Spr (Mitchell, A)

FRENGEN 288. Decadence and Modernism from Mallarmé to Marinetti — (Same as ITALGEN 288.) How the notion of decadence, initially a term of derision, shapes and underlies the positive terms of Symbolism and Modernism. Readings include theories of decadence and examples of Symbolist and Modernist texts that attempt to exorcise decadent demons, such as lust, mysticism, and the retreat into artificiality. Authors include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d’Annunzio, Valry, Ungaretti, Marinetti, and Breton.

3-5 units, not given this year

FRENGEN 326. Continental Philosophy and the Human Sciences: The Self and the Oppressive Other — (Same as CASA 326.) Research seminar. Students work on papers for other classes, theses, and individual projects. Approaches to the self and the other; how to draw on and combine approaches for analyzing students’ own research materials. Students choose an epistemology and integrate approaches according to intellectual goals and field of study.

5 units, Spr (Domanska, E)

FRENGEN 345. Digital Encyclopedia — (Same as HISTORY 435.) The Encyclopédie of Diderot and d’Alembert as a monument of the Enlightenment that is rarely read or studied. Its social and political history. The online, digitized version of the Encyclopédie, its complex network of entries and ideas, and new research possibilities in the humanities made available by digitization.

5 units, Spr (Baker, K; Edelstein, D)

FRENGEN 353. Realism in France, 1830-34 — Practices of the novel in the first years of modern French realism; the realist novel as part of a historically located generic system. The usefulness of genre as a category of literary analysis, the semi-autonomy of literature as part of a social formation, how to make sense of forgotten literature including its challenge to norms of literary value, and materialist models for understanding literary production. Authors may include Stendhal, Balzac, Hugo, Sand, Paul de Kock, Eugène Sue, Edouard Corbière, Madame Charles Reybaud, and Théophile Gautier. Critical readings include Bourdieu, Jameson, Macherey, and Moretti.

3-5 units, not given this year

FRENGEN 357. Surrealism to Structuralism — (Same as COMPLIT 357.) Authors such as Saussure, Breton, Bataille, Artaud, Lacan, Jakobson, Sartre, Merleau-Ponty, Beauvoir, Fanon, Foucault, Althusser, Cixous, Irigaray, and Barthes. Background reading in Hegel, Marx, and Freud, if necessary.

3-5 units, Aut (Cohen, M)

FRENGEN 395. Philosophical Reading Group — (Same as COMPLIT 359A, ITALGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.

1 unit, Aut, Win, Spr (Gumbrecht, H; Harrison, R)
LITERATURE, THOUGHT, AND CULTURE

Courses in this section have the subject code FRENLIT.

UNDERGRADUATE

FRENLIT 130. Authorship, Book Culture, and National Identity in Medieval and Renaissance France—Readings: epics (La Chanson de Roland), medieval romances (Tristan; Christien de Troyes’ Yvain), post-Petrarchan poetics (Du Bellay, Ronsard, Labé), and prose humanists (Rabelais, Montaigne). Prerequisite: FRENLIT 126 or consent of instructor. WIM
4 units, not given this year

FRENLIT 131. Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France—The literature, culture, and politics of France from Louis XIV to Rousseau. How this period produced the political and philosophical foundations of modernity. Readings include Bodin, Hobbes, Racine, Lafayette, Locke, Voltaire, Diderot, Rousseau, and Beaumarchais. Prerequisite: FRENLIT 126 or consent of instructor. GER:DB-Hum, WIM
4 units, Win (Apostolidès, J)

FRENLIT 132. Introduction to 19th- and 20th-Century French Literature: Literary and Social Movements—Romanticism; the development of literary novel within the context of changes in French society. The development of literary classification and the position of the engaged intellectual. Authors include Balzac, Hugo, Sand, Baudelaire, Colette, Sartre, Duras, and Queneau. Prerequisite: FRENLIT 126 or consent of instructor. GER:DB-Hum, WIM
4 units, Aut (Richman, K)

FRENLIT 133. Literature and Society: Introduction to Francophone Literature from Africa and the Caribbean—(Same as COMPLIT 141.) Major African and Caribbean writers. The issues raised in literary works which reflect changing aspects of the societies and cultures of Francophone Africa and the French Caribbean: meeting the challenge of acculturation and the search for identity; tradition competing with modernity; the use of oral tradition and writing; women’s role and status; writers’ social responsibility. Visual material; readings from fiction, poetry, plays, and criticism. In French. Prerequisite: FRENLIT 126 or consent of instructor. GER:DB-Hum, EC-GlobalCom, WIM
3-5 units, Spr (Boyó, E)

FRENLIT 135. Contemporary France: Immigration, Culture, and Politics—(Same as COMPLIT 143.) France as a place of migration or exile for people from all over the world: writers, artists, political exiled, and students. Focus is on N. African immigration and its impact on literature, politics, and culture in contemporary France. Topics include: secularism and religion, insertion and integration, and nationality and citizenship. Films and readings include Azouz Begag, Yasmina Benguigui, Nina Bouraoui, Paul Smaïl, Dominique Schnapper, Michèle Winock, and Benjamin Stora. GER:EC-GlobalCom
4 units, Aut (Boyó, E)

FRENLIT 198. Honors—Open to juniors with consent of adviser; 10-12 units total credit for completion of honors essay and associated course work. May be repeated for credit.
3-12 units, Aut, Win, Spr (Staff)

FRENLIT 199. Individual Work—Restricted to French majors with consent of department. Normally limited to 4-unit credit toward the major. May be repeated for credit.
1-12 units, Aut, Win, Spr (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

Note—The prerequisite for the following courses taught in French is one course from the 130 series or equivalent.

FRENLIT 221. Give Me Libertinage or Death: The Politics of Pleasure—How revolutionary was the pursuit of happiness, or libertinage, a current in early modern culture illustrated by the phrase from the Declaration of Independence? This concept and practice from the perspectives of political context and cultural history; the revolutionary quality of libertine texts from the late-17th century to the French Revolution. French revolutionary culture: was Baudelaire correct in stating that the revolution was made by the voluptuous?
3-5 units, not given this year

FRENLIT 222. The Political Unconscious of the Ancien Régime—The lasting influence in Europe of absolutism. Topics include political theories, the importance of court life, art as a political tool, modifications in human sensibility, literature, and social transformations.
3-5 units, Win (Apostolidès, J)

FRENLIT 223. Literature of Commitment: French Novels of the 19th and 20th Centuries—Sartre’s idea of la littérature engagée as a starting point. The interplay of aesthetic and political aspects of the novel; the literary categories of realism, idealism, and the roman à thèse. Novels including by Sand, Tristan, Zola, Vallès, Nizan, Roumain, Sartre, and Wittig; and critical readings on the novel.
3-5 units, Spr (Richman, K)

FRENLIT 255. Céline: The Most Revolting Rebel—The novels of Louis-Ferdinand Céline. Céline as social critic, literary innovator, visionary, mystic, and pariah. Readings include Voyage au bout de la nuit, Mort à crédit, Guignol’s band, and D’un château l’autre. In French.
3-5 units, Win (Picherit, H)

FRENLIT 256. Mind and Body in 20th-Century French Fiction—How fiction articulates the tensions among the sensuous, the sensual, the embodied, and the aspiration to purity, abstraction, and transcendence. Focus is on questioning dichotomies such as nature/culture, masculine/feminine, sacred/profane, and written word/voice. Authors include Gide, Camus, Butor, Duras, and Tournier.
3-5 units, not given this year

FRENLIT 278. Rethinking Identities in the Era of Globalization—(Same as COMPLIT 246.) Cultural issues faced by postcolonial societies and new visions proposed by writers and thinkers to meet the challenge of globalization and preserve the local. Emphasis is on questions of difference, language, nation and identities, and identity construction. Theoretical and fictional readings include Derrida, Glissant, Kristeva, Malouf, Morejon, Senghor, and Serres. May be repeated for credit.
3-5 units, alternate years, not given this year

FRENLIT 293A. Topics in French Literature and Philosophy—Five-week course. May be repeated for credit.
2 units, Aut (Serres, M)

FRENLIT 293B. Topics in French Literature and Philosophy—Five-week course. May be repeated for credit.
2 units, Spr (Serres, M)

FRENLIT 341. Algeria, My Mother—(Same as COMPLIT 341.) The representation of Algeria through authors from both shores of the Mediterranean. Literature and Algerianism. Politics and the Algerian war. Memory and mourning. Readings include Louis Bertrand, Frantz Fanon, Pierre Bourdieu, Benjamin Stora, Assia Djebar, Jean Pélégri, Albert Camus, Jacques Derrida, and Nina Bouraoui.
3-5 units, Spr (Boyó, E)
GRADUATE
FREN LIT 399. Individual Work — For students in French working on special projects or engaged in predissertation research.
1-12 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES
French majors are advised to consult the “Division or Literature, Culture, and Languages” section of this bulletin for additional cognate offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

DCL 189. Honors Thesis Seminar
5 units, Aut (Reichert, J)

DCL 377. Topics in Literature and Culture
3-4 units, Aut (Bohrer, K)

PHIL 195F. Shared Experience and the Experimental Actor
4 units, Spr (Scotland-Stewart, L)

ITALIAN SECTION
Note — Changes in course offerings are sometimes necessary after this bulletin has gone to print. Students are advised to consult the department bulletin board on a regular basis.

Undergraduate courses in Literature and Culture (130-199)
Courses for Advanced Undergraduates and Graduates (200-299)
Graduate Seminars (300-399)

ITALIAN LANGUAGE COURSES
The following courses in Italian language instruction represent a typical sequence for three years of Italian language study. Majors and prospective majors should consult the requirements for a B.A. in Italian above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at La Casa Italiana, see the “Language Center” section of this bulletin.

ITAL A 1,2,3. First-Year Italian
5 units, Aut, Win, Spr (Cellinese, A; Feinsod, H; Green, D; Staff)

ITAL A 21,22,23. Second-Year Italian
3-4 units, 21: Aut, 22: Win (Cellinese, A), 23: Spr (Staff)

ITAL A 114. Advanced Stylistics and Composition — WIM
3-4 units, Win (Baldocchi, M)

ITAL A 115. Academic and Creative Writing — WIM
3-4 units, Spr (Baldocchi, M)

GENERAL (IN ENGLISH)
These courses, with the subject code ITAL AGEN, do not require knowledge of Italian and are open to all students.

ITAL AGEN 181. Philosophy and Literature — (Same as FREN AGEN 181, PHIL 81.) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum
4 units, Win (Anderson, L; Landy, J)

ITAL AGEN 201E. New Methods and Sources in French and Italian Studies — (Same as FREN AGEN 201E.) Based on student interest. Changes in research methods: the use of digitized texts, resources, and databases available through Stanford Library’s gateways. Emphasis is on strategies for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the level of students’ knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.
1-4 units, not given this year

ITAL AGEN 221. The History of the Book in Europe — (Same as FREN AGEN 221.) From 1450 to present. The printed book from its invention to the 20th century; focus is on France, Italy, and England. Topics include: the manuscript tradition; printing and typography; the scholar-printers of the Renaissance; illustration; readers and reading; marginalia; newspapers, pamphlets, and ephemera; the emergence of the novel; Modernism; and Futurism. Course held in Stanford Libraries’ Special Collections.
3-5 units, Win (Mustain, J; Sussman, S)

ITAL AGEN 247. Petrarch and Boccaccio — Their respective roles as founders of European Petrarchism and modern Italian prose. Petrarch’s Canzoniere and My Secret Life and Boccaccio’s Decameron. Readings in Italian and translation.
3-5 units, not given this year

ITAL AGEN 260. The Fantastic Mode — Narratives of the haunted house in exemplary texts from the European tradition of the 19th century including Hoffmann, Gautier, Maupassant, Arrigo Boito, Dickens, and James). More recent implementations of the mode in the texts of Cortázar, Tabuchi, and Byatt. In English.
3-5 units, Spr (Ceserani, R)

ITAL AGEN 263. Love Books of the Middle Ages — (Same as FREN AGEN 263.) Love as a central theme in the Middle Ages of literature, natural philosophy, theology, and psychology. Literary works that probe the nature of love. Abelard and Heloise, History of His Calamities and Personal Letters; Andreas Capellanus, The Art of Courly Love; Christine de Pizan, The Book of the Duke of True Lovers; Dante, Vita Nuova; Chaucer, Troilus and Criseyde; Boccaccio, The Decameron; and Shakespeare, Anthony and Cleopatra.
3-5 units, Win (Harrison, R)

ITAL AGEN 288. Decadence and Modernism from Mallarmé to Mann — (Same as FREN AGEN 288.) How the notion of decadence, initially a term of derision, shapes and underlies the positive terms of Symbolism and Modernism. Readings include theories of decadence and examples of Symbolist and Modernist texts that attempt to exorcise decadent demons, such as lust, mysticism, and the retreat into artificiality. Authors include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d’Annunzio, Valry, Ungaretti, Marinetti, and Breton.
3-5 units, not given this year

ITAL AGEN 395. Philosophical Reading Group — (Same as COMPLIT 359A, FREN AGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation on the basics, independent study, or a syllabus split over two quarters. Students' knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.
1 unit, Aut, Win, Spr (Gambrecht, H; Harrison, R)

LITERATURE, THOUGHT, AND CULTURE
Courses in this section have the subject code ITALIT.

UNDERGRADUATE
ITALIT 127. Inventing Italian Literature: Dante, Boccaccio, Petrarcha — The origins of Italian literature. Poetry such as 13th-century love lyrics, Dante’s Vita Nuova, and Petrarcha’s Canzoniere; prose such as stories from Boccaccio’s Decameron. GER:DB-Hum
4 units, Aut (Lummus, D)

ITALIT 128. The Italian Renaissance and the Path to Modernity — The literature, art, and history of the Renaissance and beyond. Readings from the 15th through 18th centuries include Moderata Fonte, Machiavelli, Ariosteo, Tasso, Galileo, and Goldoni. Prerequisite: 21 or equivalent. GER:DB-Hum
4 units, Win (Springer, C)
**ITALLIT 129. Modern Italian History and Literature** — The history of the Italian nation and national literary identity in the 19th and 20th centuries. Focus is on the Risorgimento and the romantic lyric, futurism, feminism, fascism, and resistance. Authors include Foscolo, Leopardi, Verga, D’Annunzio, Aleramo, Marinetti, Pirandello, Ungaretti, and Montale. Prerequisite: 21 or equivalent. GER:DB-Hum
4 units, Spr (Springer, C)

**ITALLIT 198. Honors** — Open to juniors and seniors with consent of adviser; 9-12 total units for completion of honors essay.
3-12 units, Aut, Win, Spr (Staff)

**ITALLIT 199. Individual Work**
1-12 units, Aut, Win, Spr (Staff)

**ADVANCED LITERATURE**

**ITALLIT 249. Love and Death in the Decameron** — The Black Death as the greatest natural disaster in European history, killing more than a quarter of Europe’s population in four years. How the plague occasioned one of the masterpieces of western literature, Boccaccio’s *Decameron*, which explores a parallel universe ruled not by death, but by love, a physical, sensual force that subverted the idealized conventions of medieval courtly love.
4 units, Spr (Springer, C)

**ITALLIT 289. Italian Postmodernism** — Was there an epochal change in the history of Italian society as in other countries in the course of the 20th century? How should scholars name and describe this new cultural landscape? Multidisciplinary perspective with readings in the history of culture, sociology, and literary and art history. Writers include Eco, Calvino, and Tabucchi. In Italian.
3-5 units, Spr (Ceserani, R)

**ITALLIT 299. Individual Work**
1-12 units, Aut, Win, Spr, Sum (Staff)

**GRADUATE**

**ITALLIT 365. Italian Romanticism** — The complexities and contradictions of Italian Romanticism as reflected in the major works of Foscolo (Sonetti, Sepolcri, Ultime lettere di Jacopo Ortis) and Leopardi (Canti, Operette morali). Prerequisite: advanced reading knowledge of Italian.
3-5 units, Aut (Springer, C)

**ITALLIT 399. Individual Work** — For graduate students working on a special project or predissertation research. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

**Cognate Courses**

Italian majors are advised to consult the “Division or Literature, Culture, and Languages” section of this bulletin for additional cognate offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

**DLCL 189. Honors Thesis Seminar**
5 units, Aut (Reichert, J)

**DLCL 377. Topics in Literature and Culture**
3-4 units, Aut (Bohrer, K)

**PHIL 195F. Shared Experience and the Experimental Actor**
4 units, Spr (Scotland-Stewart, L)

**Overseas Studies**

Courses approved for the French or Italian major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

**Paris**

**FRENLIT 186F. Contemporary African Literature in French** — (Same as AFRICAAM 186F, OSPPARIS 186F.) GER:DB-Hum, EC-Global-Com
4 units, Win (Diop, P)

**Florence**

**ITALGEN 134F. Modernist Italian Cinema** — (Same as ARTHIST 161Y, STS 125V, OSPFLOR 134F.) GER:DB-Hum
5 units, Aut (Campani, E)

**ITALGEN 135F. Women in Italian Cinema: Maternity, Sexuality, and the Image** — (Same as FEMST 135F, OSPFLOR 67.) GER:DB-Hum, EC-Gender
4 units, Spr (Campani, E)

**ITALGEN 150F. High Renaissance and Maniera** — (Same as ARTHIST 112Y, OSPFLOR 54.) GER:DB-Hum
5 units, Spr (Verdon, T)

**ITALGEN 191F. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema** — (Same as ARTHIST 160Y, COMM 53, HISTORY 235V, OSPFLOR 49.) GER:DB-Hum
5 units, Win (Campani, E)

**ITALLIT 246F. Is the Hero Serious or Facetious? Romances of Chivalry in Sixteenth-Century Europe** — (Same as OSPFLOR 15.)
5 units, Aut (Sberlati, F)
GERMAN STUDIES

Emeriti: (Professors) Theodore M. Andersson, Gerald Gillespie, Walter F. W. Lohne, Katharina Mommsen, Kurt Müller-Vollmer
Chair: to be announced
Professors: Russell A. Berman, Elizabeth Bernhardt, Amir Eshel, Orrin W. Robinson III
Assistant Professor: Charitini Douvaldzi
Senior Lecturers: William E. Petig, Kathryn Strachota
Acting Assistant Professor: Marton Dornbach
Affiliated Academic Staff: Henry Lowood (Curator, Germanic Collections)
Director of Graduate Studies: Russell A. Berman
Director of Undergraduate Studies: Charitini Douvaldzi
Visiting Lecturers: Lorenz Jäger, Sean McIntyre, Andrew Mitchell
Department Office: Building 260, Room 211
Mail Code: 94305-2030
Phone: (650) 723-3266
Email: germanstudies@stanford.edu
Web Site: http://www.stanford.edu/dept/german/

Courses given in German Studies have the subject code GERGEN and GERLIT. For courses in German language instruction with the subject code GERLANG, see the “Language Center” section of this bulletin. For a complete list of subject codes, see Appendix.

The department’s goal is to provide students with the linguistic and analytic facility to explore the significance of the cultural traditions and political histories of the German-speaking countries of Central Europe. At the same time, the interdisciplinary study of German culture, which can include art, history, literature, media theory, philosophy, and political science, encourages students to evaluate broader and contradictory legacies of modernity, such as how the literary, artistic, and cultural responses to the belated and rapid modernization of Germany allow for reflection on the modern condition in general.

Similarly, the German experience of national identity and political unification sheds light on wider issues of cultural cohesion and difference, as well as on the causes and meaning of phenomena such as racial prejudice, anti-Semitism, and the Holocaust. In general, an education in German Studies offers students the opportunity to combine studies in literature and philosophy. Students take appropriate courses in philosophy, linguistics, or the influence of German thought on other fields in the humanities, or the history of thought, continental philosophy, and linguistics.

By carefully planning their programs, students may fulfill the B.A. requirements for a double major in German Studies and another subject. An extended undergraduate major in English and German literature is available, as are coterminal programs for the B.A. and M.A. degrees in German Studies, and joint programs for the Ph.D. degree with Comparative Literature, Interdisciplinary Studies in Humanities, Linguistics, and Modern Thought and Literature.

Special collections and facilities at Stanford offer possibilities for extensive research in German Studies and related fields pertaining to Central Europe. Facilities include the Stanford University Libraries and the Hoover Institution on War, Revolution, and Peace. Special collections include the Hildebrand Collection (texts and early editions from the 16th to the 19th century), the Austrian Collection (with emphasis on source material of the time of Maria Theresa and Joseph II, the Napoleonic wars, and the Revolution of 1848), and the Stanford Collection of German, Austrian, and Swiss Culture. New collections emphasize culture and cultural politics in the former German Democratic Republic. The Hoover Institution has a unique collection of historical and political documents pertaining to Germany and Central Europe from 1870 to the present. The department also has its own reference library. Extensive use is made of the language lab as well as the department’s own audio-visual equipment, films, tapes, and slides.

The Republic of Austria has endowed the Distinguished Visiting Professorship in Austrian Studies. The professorship rotates on a yearly basis through several departments.

Haus Mitteleuropa, the German theme house at 620 Mayfield, is an undergraduate residence devoted to developing an awareness of the culture of Central Europe. A number of department courses are regularly taught at the house, and there are in-house seminars and conversation courses. Assignment is made through the regular undergraduate housing draw.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Majors must demonstrate basic language skills, either by completing GERLANG 1, 2, 3, First-Year German, or the equivalent such as an appropriate course of study at the Stanford in Berlin Center. Students then enroll in intermediate and advanced courses on literature, culture, thought, and language. Requirements for the B.A. include at least three courses at the 130-139 level (introductory surveys on topics in German literature, thought, linguistics, and culture). Every major is expected to complete at least one Writing in the Major (WIM) course. Including GERLANG 1, 2, 3, the total requirement for the B.A. is a minimum of 60 units of work; the German and Philosophy option requires 65 units. With the approval of the Director of Undergraduate Studies, appropriate courses offered by other departments can be accepted toward this total, up to a maximum of 25 units.

Internships—Internships in Germany are arranged through the Overseas Studies program. In addition, students may consult with the department to arrange local internships involving German language use or issues pertaining to Germany or Central Europe. Interns who prepare papers based on their experience enroll in GERLIT 298.

Extended Major in English and German Literatures—Students may enter this program with the consent of the chairs of both departments. See the “English” section of this bulletin.

Multiple Majors—Students can combine a major in German Studies with a major in any other field. By carefully selecting courses in such disciplines as history, international relations, or economics, students can prepare themselves exceptionally well in the area of Central Europe. Multiple majors are especially recommended for students spending one or more quarters at the Stanford in Berlin Center.

GERMAN AND PHILOSOPHY

The German and Philosophy major option offers students the opportunity to combine studies in literature and philosophy. Students take most of their courses from departments specializing in the intersection of literature and philosophy. This option is not declared in Axess; it does not appear on the transcript or diploma.

The German and Philosophy major option requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. 35 units in German Studies, including:
   a) three courses at the 130 level
   b) a WIM course

2. PHIL 81, the gateway course in philosophy and literature, preferably in the sophomore year.

3. Requirements in Philosophy:
   a) PHIL 80. Prerequisite: introductory philosophy class
   b) a course in the PHIL 180 series
   c) a course in the PHIL 170 series
   d) two courses in the history of philosophy numbered above 100

4. Two additional elective courses of special relevance to the study of philosophy and literature as identified by the committee in charge of the program. In German, these courses include the GERLIT 241-243 series, Deutsches Geistesgeschichte, and other advanced seminars in German thought and literature. Students must consult with their advisers, the Director of Undergraduate Studies, and undergraduate adviser of the program in philosophical and literary thought.
5. Capstone: in place of a standard capstone course in the major, students take a capstone seminar approved through the program in philosophical and literary thought. The student’s choice of capstone seminar must be approved in writing by the Director of Undergraduate Studies and the undergraduate adviser of the program in philosophical and literary thought.

6. Units devoted to meeting the department’s language requirement are not counted toward the 65-unit requirement.

The capstone seminar and the two related courses must be approved by both the German Studies Director of Undergraduate Studies and the undergraduate adviser of the program in philosophical and literary thought administered through the DCLL. Substitutions, including transfer credit, are not normally permitted for items 2, 3a, and 3d, and are not permitted under any circumstances for items 2, 3a, and 5. Up to 10 units taken in the Philosophy Department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

MINORS
The department offers two minor options.

German Language and Culture—Students may choose to minor in German Language and Culture if they are particularly interested in developing a strong ability in the German language, or in pursuing linguistic issues pertinent to German. Students satisfy the requirements for the minor in German Language and Culture by completing 35 units of course work, including at least three courses at the 100-129 level in either GERLANG or GERLIT, taught in German. Study at the Stanford in Berlin Center for at least one quarter is highly recommended.

German Cultural Studies—Students who wish to study German literature, culture, or thought, without necessarily acquiring facility in the German language, may pursue a minor in German Cultural Studies. Students meet the requirements for the minor in German Cultural Studies by completing 35 units of course work in German literature, culture, and thought in translation, including at least three courses at the 130 or 140 level.

MINOR IN LITERATURE
An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of Spanish and Portuguese and the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES
An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of Spanish and Portuguese and the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

HONORS
Majors with a minimum grade point average (GPA) of 3.3 in German courses are eligible for departmental honors. Students interested in the honors program should consult the undergraduate adviser early in their junior year. The essay topic is chosen in consultation with a faculty member of the department and opportunities to start research projects are offered at the Stanford in Berlin Center. In addition to the requirements listed above, the student must submit a proposal for the honors essay to the German faculty by the end of Spring Quarter of the junior year. During this quarter, students may enroll for 2 units of credit in GERLIT 298 for the drafting or revision of the thesis proposal. In Autumn Quarter of the senior year, the student must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in GERLIT 298 while composing the thesis during Winter Quarter. A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis.

STANFORD IN BERLIN
All undergraduates interested in Germany are urged to enroll in the Berlin program, which is open for academic study during the Autumn, Winter, and Spring quarters. The program also offers internships in German industry, government, and cultural organizations year round. Through the Center, students with at least two years of college-level German can also take courses at the Freie Universität, Technische Universität, or Humboldt Universität. Most students live in homes with German hosts.

Most credits earned in Berlin can be applied to the undergraduate major in German Studies. All students who are planning to study at Stanford in Berlin or engage in an internship are encouraged to consult with their major Director of Undergraduate Studies and the Overseas Studies office about integrating work done abroad into their degree program. Returning interns who wish to develop a paper based on their experience should enroll in GERLIT 298. More detailed information is available at the Overseas Studies Program in Sweet Hall or with the faculty adviser in the department.

COTERMINAL PROGRAMS
Students may elect to combine programs for the B.A. and M.A. degrees in German Studies. For details, see the “Undergraduate Degrees” section of this bulletin.

For University cotermpinal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS
The University requirements for the M.A. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS
This program is designed for those who do not intend to continue studies through the Ph.D. degree. Students desiring the M.A. degree must complete a minimum of 45 units of graduate work. If students enroll for three quarters for a minimum of 15 units per quarter, they can fulfill the M.A. requirements in one year. The program normally includes at least one course in each of the three areas of concentration: language and linguistics, literature, and thought.

In addition, students must take graduate-level courses in German and/or approved courses in related fields such as art history, comparative literature, linguistics, history, or philosophy.

M.A. candidates must take an oral examination toward the end of their last quarter.

DOCTOR OF PHILOSOPHY
The requirements for the Ph.D. include: (1) a minimum of 36 graduate units during the first year of graduate study and a minimum of 9 units per quarter during the six quarters following the first year; (2) a reading knowledge of one language other than English and German, normally French; (3) a master’s oral examination, unless the student already has an M.A. upon entering the program; (4) a qualifying paper; (5) a qualifying examination; (6) the University oral examination; and (7) a dissertation. Students in Medieval Studies must also have a reading knowledge of Latin.

During the first year of work, the student should select courses that provide an introduction to the major areas of the discipline. During Spring Quarter of the first year, all students, except those admitted with a master’s degree, must take an oral M.A. examination. During the one-hour examination, the student is questioned by three faculty members from German Studies, chosen by the student, on work undertaken in specific graduate courses.

By July 1 of the summer following the first year of graduate study, students should present as a qualifying paper an example of their course work. Although ordinarily not meant to represent an original contribution to scholarship, it should demonstrate the candidate’s ability to grasp complex subject matter with sufficient competence to organize materials and to present arguments in a clear and concise manner commensurate
with scholarly standards. The paper is submitted to the department chair, who passes it on for approval by the student’s faculty adviser and a second reader appointed by the chair in consultation with the Director of Graduate Studies.

Students who enter the program with a master’s degree from another institution must submit, in lieu of a qualifying paper, a master’s thesis or a major research paper as evidence of ability to pursue advanced scholarly work.

At the end of the sixth quarter of study (and only if the qualifying paper has been accepted), the student takes a one-hour oral qualifying exam with two faculty members from German Studies, the student’s chosen adviser, and another faculty member appointed by the chair. The purpose of this examination is to demonstrate a broad familiarity with the literature of the major periods, movements, and some major figures. Only after completion of the qualifying procedure will the department approve the student’s admission to candidacy. A student who fails the qualifying examination may retake it once at the beginning of the seventh quarter.

After passing the qualifying exam, the student should consult with appropriate faculty members in order to develop a dissertation topic. It is important to consider scholarly significance, access to resources, and feasibility of completion within a reasonable period. The student then prepares a preliminary statement describing the topic (no more than five pages), which is circulated to prospective committee members for discussion at a meeting normally held during the eighth quarter. The purpose of this meeting is to provide the student with feedback and guidance in the preparation of the formal prospectus.

The University oral examination in the Department of German Studies is based on the dissertation prospectus. The prospectus, normally 25 pages plus bibliography, elaborates on the topic, the proposed argument, and the organization of the dissertation. It must be distributed to the committee members and the outside chair at least two weeks before the formal University oral examination. Students should plan this examination for the end of the third year or the end of the subsequent summer. The examination lasts approximately two hours, permitting each of the four examiners a 25-minute question period and reserving an optional ten minutes for questions from the chair of the examination.

Students, regardless of their future fields of concentration, are expected to acquire excellence in German and thorough knowledge of the grammatical structure of German. The department expects Ph.D. candidates to demonstrate teaching proficiency in German; GERLIT 200, Teaching of Second Language Literatures (not given 2005-06), is required. The teaching requirement is five quarters during the second and third years of study. The fifth and final quarter of teaching may be postponed until the student has worked extensively on the dissertation and may be devoted to a literary topic related to the dissertation. Such courses are subject to departmental review procedures.

The department expects candidates to demonstrate research skills appropriate to their special areas of study. The requirement can be fulfilled in the capacity of either a University Fellow or a Research Assistant.

Graduate students are also advised to start developing skills in the teaching of literature by participating in the teaching of undergraduate literature courses. Students can earn up to 3 units of graduate credit for practice teaching in literature.

Regular attendance at the departmental colloquium is mandatory. Each student is expected to make a formal presentation at the colloquium for public discussion.

INTERDISCIPLINARY PROGRAMS

The department participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in German Studies and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

Students may work toward a Ph.D. in German Studies with minors in such areas as comparative literature, modern thought and literature, linguistics, or history. Students obtaining a Ph.D. in such combinations may require additional training.

GERMAN LANGUAGE COURSES

The following courses in German language instruction represent a typical sequence for three years of German language study. Majors and prospective majors should consult the requirements for a B.A. in German Studies above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at the Haus Mitteleuropa, see the “Language Center” section of this bulletin.

GERLANG 1,2,3. First-Year German

- 3 units, Aut, Win, Spr (Engel, A; Goppelsroder, F; Petig, W; Utter, A; Zhang, X; Staff)

GERLANG 21,22. Intermediate German

- 4 units, 21: Aut (Petig, W), 22: Win (Petig, W)

GERLANG 100. Hundert Deutsche Jahre: One Hundred German Years

- 3-4 units, Spr (Strachota, K)

GERLANG 101,102. Advanced Language Study

- 3-4 units, 101: Aut (McQueen, K), 102: Spr (Staff)

GENERAL (IN ENGLISH)

These courses, with the subject code GERGEN, do not require knowledge of German and are open to all students.

UNDERGRADUATE

GERGEN 18N. Thomas Mann’s Death in Venice—(Same as COMP-LIT 18N.) Stanford Introductory Seminar. Preference to freshmen. The philosophical treatment of the problem of authorship and the relationship between knowledge and passion in a work of art. Mann’s novella contrasted as a document of modernism with Nietzsche’s Birth of Tragedy and Plato’s Phaedras. The relevance of the text’s questioning of the proximity of writing and democracy on the eve of WW I. In English.

- 4 units, Aut (Berman, R)

GERGEN 38A. Introduction to Germanic Languages— (Same as GERLIT 138.) The oldest attested stages of the Germanic language family, including Gothic, Old Norse, Old Saxon, Old English, Old Frisian, Old Low Franconian (Old Dutch), and Old High German. The linguistic interrelationships, prehistory, Germanic tribal groupings, and literature.

GER:DB-Hum

- 3 units, Win (Robinson, O)

GERGEN 104Q. Resistance Writings in Nazi Germany—Stanford Introductory Seminar. Preference to freshmen. The letters and diaries of individuals who resisted Nazi oppression and paid with their lives. Readings include the Scholl diaries, Bonhoeffer’s letters and his Ethics, and letter exchanges from other crucial figures. No knowledge of German required; students may read texts in original if able.

GER:DB-Hum

- 3 units, Aut (Bernhardt, E)

- 3-5 units, Spr (McIntyre, S)
4 units, Spr (Berman, R)

GERGEN 141. Fables of Retreat — Modern anti-heroes who assert themselves through feats of retardation and retreat. Writers include Rousseau, Tieck, Emerson, Thoreau, Melville, Dostoevsky, and Kafka.
3-5 units, Spr (Dornbach, M)

GERGEN 164. Between War and Revolution: Twentieth-Century Berlin — Berlin as a microcosm of German culture, from the metropolis of the roaring 20s to the fall of the Wall. Topics: war, revolution, modernization, americanization, culture versus civilization. National Socialism, democracy and Communism, terrorism, and reuniification. Sources include literary and cinematic works which capture cultural and historical turning points of German history. Texts include Theodor Fontane, Thomas Mann, Alfred Döblin, Bertold Brecht, Anna Seghers, Heinrich Böll, and Ulrich Plenzdorf. In English.
3-5 units, Win (Sieg, C)

ADVANCED UNDERGRADUATE AND GRADUATE

GERGEN 168A/268A. Freud and the Enterprise of Psychoanalysis — Psychoanalysis at the juncture of its multiple meanings as a therapeutic practice, a theory of the functioning of the human mind, a method of textual interpretation, a cultural critique, and a genealogy that accounts for the origins of morality, religion, art, and other social institutions. Readings include Freud’s major works, and Nietzsche, Ferenczi, Lacan, Laplanche, de Certeau, Kristeva, and Irigaray. GER:DB-Hum
3-5 units, Win (Douvaldzi, C)

GERGEN 191A/291A. Oedipus, Hamlet, Moses: Archetypes of the Hero — Texts that provided psychoanalysis with its foundational myths. Oedipus, Moses, and Hamlet as archetypes of the hero related to moments of emerging modernity: from mythos to logos, polytheism to monotheism, and action to thought. The interplay among knowledge, recognition, and desire; the role of sameness and alterity in the constitution of personal, familial, and national identities; and the relation between violence and the construction of history. Readings include: Exodus, Sophocles, Shakespeare, Freud, Aeschylus, Euripides, Cavafy, Hofmannsthal, and Wolf; theoretical and critical essays by Laplanche, Lyotard, Lacan, de Certeau, Kofman, Assmann, Said, and Cavell. GER:DB-Hum
3-5 units, Spr (Douvaldzi, C)

GERGEN 206/306. Narrative, Visuality, Memory — Moments in the history of the relationship between the verbal and the visual: the classical arts memoriae; the ekphrasis debates of the 18th century; the emergence of a new visuality and mnemonic art as structuring principles for modernist narrative. Authors include Plato, Aristotle, Cicero, Augustine, Winckelmann, Lessing, Diderot, Goethe, Moritz, Flaubert, Rilke, Joyce, and Proust.
3-5 units, Spr (Douvaldzi, C)

3-5 units, Win (Berman, R)

GERGEN 282. Heidegger and Poetry in an Age of Technology: Rilke, Trakl, and Char — (Same as COMPLIT 256, FRENGLIT 282.) Heidegger’s thinking on language and poetry. The technological transformation of language into univocal information and the resources of poetry for an ambiguous resistance. Parallel consideration of philosophy’s relation to poetry. Readings from Rilke, Trakl, and Char.
3-5 units, Spr (Mitchell, A)

GERGEN 290A/390A. The Contemporary Novel — (Same as COMPLIT 224/324.) Anglo-American and European novels; how they address central aspects of the contemporary condition: memory, ethnicity, and political violence. Theoretical contributions on the intersection of the arts and literature, and politics. Readings include Kadare, Pamuk, Houellebecq, Smith, Barthes, Fish, Rorty, Jameson, Butler, White, Appiah, Bhabha, and Zizek.
3-5 units, Win (Eshel, A)

GRADUATE

GERGEN 353. Terrorism — (Same as COMPLIT 356, LAW 360.) Interdisciplinary seminar. How to define terrorism and distinguish it from legitimate forms of political resistance. Is terrorism political or criminal? How has terrorism altered the perception of permissible restriction of civil liberties? How does terrorism affect societies?
3-5 units, Aut (Eshel, A; Weiner, A)

LITERATURE, THOUGHT, AND CULTURE

Courses in this section ahve the subject code GERLIT.

UNDERGRADUATE

At this level, students have several options depending on their interests. After completing GERLANG 3 or the equivalent, students may register for courses at the GERLIT 120-level, which consider special topics in German culture while advancing language learning. Alternatively, GERLANG 21, 22, and 101 emphasize a systematic review of the language, while GERLANG 21W, 22W, and 105 study the language of business and international relations. GERLANG 100, 110, and 111 develop German language skills in the context of media such as film, television, and newspapers. Language instruction courses with the subject code GERLANG are listed in the “Language Center” section of this bulletin.

GERLIT 123N. The Brothers Grimm and Their Fairy Tales — Stanford Introductory Seminar. Preference to freshmen. Historical, biographical, linguistic, and literary look at the Kinder- and Hausmärchen of Jacob and Wilhelm Grimm. Readings from the fairy tales, plus materials in other media such as film and the visual arts. Small group performances of dramatized fairy tales. In German. Prerequisite: GERLANG 3 or equivalent. GER:DB-Hum, WIM
4 units, Spr (Robinson, O)

GERLIT 135. Literature and the Limits of Self-Determination: Introduction to 19th-Century German Prose — Works registering a heightened sense of the precarious position of the modern individual including Goethe, Kleist, Buechner, Nietzsche, Freud, Mann, and Kafka. In German; attention to improvement of linguistic skills. WIM
4 units, Win (Dornbach, M)

GERLIT 137. Between Yesterday and Tomorrow: German Postwar Film and the Culture of Defeat — (Same as 237.) Postwar Germany as an example of a culture of defeat. Is it a coincidence that the three most successful German films of the postwar years are about political corruption, prostitution, and juvenile crime? Focus is on commercial films: against the myth-making Heimat- and Wirtschaftswunderfilmen in favor of those concerning generational conflict, masculinity, and longing for decadence in an arrested society. Emphasis is on oral proficiency and advanced writing skills. In German. WIM
3-5 units, Win (Bach, U)
GERLIT 139. Love, Marriage and Passion in German Literature of the 19th and 20th Centuries—(Same as 339.) The thesis that love relationships, in shifting social, cultural, and communication contexts, reflect and determine the dominant value system of a society. How the concepts of romantic, passionate, and pragmatic love evolved and competed with one another in texts by Goethe, Schlegel, Keller, Sacher-Masoch, Fontane, and Böll. In German.
3-5 units, Aut (Bach, U)

GERLIT 196. Idealist and Romantic Aesthetics—(Same as 296.) The emergence of the modern idea of art as an autonomous domain. The systematic aspirations of German idealism and the anti-systematic spin-offs in the literary avant garde of the Romantic movement. Writings by Kant, Schiller, Schlegel, Novalis, Schelling, and Hegel. In English.
3-5 units, Aut (Bach, U)

GERLIT 197. Theories of Art after Idealism—(Same as 297.) Key responses to the failure of idealism to integrate artistic creation and aesthetic experience into a philosophical system. Works by Schopenhauer, Kierkegaard, Nietzsche, Dilthey, and Lukács.
3-5 units, Win (Dornbach, M)

GERLIT 199. Independent Reading—36 hours of reading per unit, weekly conference with instructor. May be repeated for credit. Prerequisites: consent of instructor.
1-10 units, Aut, Win, Spr, Sum (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

GERLIT 237. Between Yesterday and Tomorrow: German Postwar Film and the Culture of Defeat—(Same as 137; see 137.)
3-5 units, Win (Bach, U)

GERLIT 257. Gothic—Introduction to the grammar, texts, and history of this earliest extensivly-documented Germanic language, a relative of German and English. Issues surrounding the Germanic parent language.
4 units, Spr (Robinson, O)

GERLIT 278. Modernity as Succession: Imitation, Emulation, Influence—(Same as 278; see 278.) Is originality compatible with the capacity to be inspired by precursor authors? How writers from the 18th century to the present attempted to resolve this problem by distinguishing creative emulation from literalistic imitation. Writings by Edward Young, Winckelmann, Kant, Hölderlin, Schelling, Nietzsche, Gadamer, and Harold Bloom. In English.
3-5 units, Spr (Dornbach, M)

GERLIT 290. Present Passats: History and Memory in Culture and Politics—(Same as INTNLREL 106.) Theoretical, comparative, and interdisciplinary approach to historical representation and remembrance. Focus is on the uses and abuses of remembering and historiographic accounting for the recent past in culture and politics. Examples include post-WW II Germany and post-1948 Israel. How the memory of 9/11 is played out in contemporary American discourse, including political debates, literature, and popular culture.
5 units, Win (Eshel, A)

GERLIT 296. Idealist and Romantic Aesthetics—(Same as 196; see 196.)
3-5 units, Aut (Dornbach, M)

GERLIT 297. Theories of Art after Idealism—(Same as 197; see 197.)
3-5 units, Win (Dornbach, M)

GERLIT 298. Individual Work—Open only to German majors and to students working on special projects, including written reports for internships. Honors students use this number for the honors essay. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

GERLIT 339. Love, Marriage and Passion in German Literature of the 19th and 20th Centuries—(Same as 139; see 139.)
3-5 units, Aut (Bach, U)

GERLIT 369. Introduction to Graduate Studies: Criticism as Profession—(Same as COMPLIT 369.) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, and comparative literatures, university structures, and career paths.
5 units, Aut (Berman, R)

GERLIT 378. Modernity as Succession: Imitation, Emulation, Influence—(Same as 278; see 278.)
3-5 units, Spr (Dornbach, M)

GERLIT 399. Independent Study
1-15 units, Aut, Win, Spr, Sum (Staff)

GERLIT 400. Dissertation Research—For graduate students in German working on dissertations only.
1-12 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

German majors are advised to consult the “Division of Literature, Culture, and Languages” section of this bulletin for additional offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

COMPLIT 219A. Henrich von Kleist
3-5 units, Win (Gumbrecht, H)

COMPLIT 240. Introduction to Old Norse—(Same as ENGLISH 200.)
4-5 units, Win (Lerer, S)

DLC 377. Topics in Literature and Culture
3-4 units, Aut (Bohrer, R)

Drama 12N. Antigone: From Ancient Democracy to Contemporary Dissent—(Same as CLASSGEN 6N.)
4 units, Aut (Rehm, R)

Drama 161/261. Performance and Politics—(Same as CLASSGEN 161.)
5 units, Aut (Staff)

Drama 188Q. From Brecht to Müller: German Theater and Performance since World War II
3-5 units, Aut (Weber, C)

English 140A. Imagining the Holocaust
5 units, Spr (Felstiner, J)

English 170A. Introduction to Critical Theory: Literary Theory and Criticism Since Plato—(Same as ENGLISH 270A.)
5 units, Win (Kaufman, R)

English 309N. Modern Poetry and Frankfurt School Aesthetics
5 units, Spr (Kaufman, R)

Frengen 181. Philosophy and Literature—(Same as ITALGEN 181, PHIL 81.)
4 units, Win (Anderson, L; Landy, J)

Frengen 259. Self-Reflexivity Historicized, or the Emergence of the Second-Order Observer—(Same as COMPLIT 259.)
3-5 units, Win (Gumbrecht, H)

History 136B. European Thought and Culture in the 20th Century
5 units, Spr (Robinson, P)
MUSIC 16N. Music, Myth, and Modernity: Wagner’s Ring Cycle and Tolkien’s Lord of the Rings
3 units, Spr (Grey, T)

MUSIC 17N. The Operas of Mozart
3 units, Win (Berger, K)

MUSIC 312A. Aesthetics and Criticism of Music, Ancients and Moderns: Plato to Nietzsche
4 units, Win (Berger, K)

MUSIC 312B. Aesthetics and Criticism of Music, Contemporaries: Heidegger to Today
4 units, Spr (Berger, K)

PHIL 103. 19th-Century Philosophy
4 units, not given this year

PHIL 127/227. Kant’s Ethical Theory
4 units, Aut (Wood, A)

PHIL 228. Fichte’s Ethics
4 units, Spr (Wood, A)

PHIL 233. Husserl
4 units, Aut (Follesdal, D)

PHIL 332. Nietzsche
4 units, Spr (Anderson, L)

RELIGST 278/378. Heidegger, the Self, and God
4 units, Aut (Sheehan, T)

SLAVGEN 122/222. Yiddish Story
5 units, Aut (Safran, G)

OVERSEAS STUDIES

These courses are approved for the German major and taught at the campus indicated. Course descriptions can be found in the “Overseas Studies” section of this bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

BERLIN

GERGEN 173. Wotan’s Demise: Discourses of the Threatened Environment in Historical Perspective—(Same as OSPBER 77.)
4-5 units, Spr (Tempel, S)

GERGEN 174. Sports, Culture, and Gender in Comparative Perspective—(Same as OSPBER 174.) GER:DB-SocSci, EC-Gender
4-5 units, Spr (Junghanns, W)

GERGEN 177A. Culture and Politics in Modern Germany—(Same as OSPBER 177A.) GER:DB-SocSci, EC-Gender
4-5 units, Aut (Kramer, K)

GERLIT 195. Contemporary Theater—(Same as DRAMA 101A, OSPBER 101A.) GER:DB-Hum
5 units, Spr (Kramer, K)

HISTORY

Emeriti: (Professors) Carl N. Degler, Peter Duus, Terence Emmens, George M. Fredrickson, Harold L. Kahn, George H. Knoles, Richard W. Lyman, Mark Mancall, Peter Paret, Paul Seaver, Rixford K. Snyder, Peter Stansky, David B. Tyack, Lyman P. Van Slyke; (Senior Lecturer) Joseph J. Corn

Chair: Aron Rodrigue

Associate Professors: Jessica Riskin, Matthew H. Sommer, Amir Weiner, Karen E. Wigen

Assistant Professors: David R. Como, Robert Crews, James P. Daughton, Zephyr Frank, Sean Hanretta, Kathryn Miller, Thomas S. Mullaney, Priya Satia, Jun Uchida, Caroline Winterer

Professor (Teaching): Herbert Klein

Senior Lecturers: Katherine Iolluck, Martin W. Lewis

Acting Assistant Professors: Jovana Knezevic, Yumi Moon, Margaret O’Mara

Courtesy Professors: Lawrence Friedman, Avner Greif, Gavin Wright

Department Office: Building 200, Room 113

Mail Code: 94305-2024

Phone: (650) 723-2651

Web Site: http://history.stanford.edu/

Courses given in History have the subject code HISTORY. For a complete list of subject codes, see Appendix.

History courses teach the analytical, interpretive, writing knowledge and skills necessary for understanding the connections between past and present. History is a pragmatic discipline in which the analysis of change over time involves sifting the influences and perspectives that affect the course of events, and evaluating the different forms of evidence historians exploit to make sense of them. Teaching students how to weigh these sources and convert the findings into persuasive analysis lies at the heart of the department’s teaching. Graduates with a history major pursue careers and graduate study in law, public service, business, writing, and education.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Department of History offers several tracks to the B.A. in History. These tracks are not declared on Axess; they do not appear on the transcript or the diploma.

The General History track emphasizes breadth of study among historical areas and periods as well as concentration in one selected field. The two tracks with interdisciplinary emphasis (Literature and the Arts, and History of Science and Medicine) combine the study of history with the methods and approaches of other disciplines, and involve substantial course work outside of History. Two new tracks with interdisciplinary emphasis are being introduced this year: History and Law, and Public History/Public Service.

All History majors require the following:

1. Completion of a minimum of 58 units and at least 12 courses of at least 3 units each, to include:
   a) one Sources and Methods seminar
   b) two 200-level undergraduate colloquia
   c) at least one other small group course, to be chosen among the department’s undergraduate colloquia, research seminars, or Stanford Introductory Seminars.

2. Courses comprising the 58 units must be taken for a letter grade, and the student must maintain a grade point average (GPA) in History courses of 2.0 or higher.
3. At least six courses must be taken from regular faculty members of the Department of History.

4. History’s Writing in the Major requirement is satisfied by completing one of the following: a WIM-option colloquium or seminar; an Honors thesis in History; or a 15-page research paper in History written under faculty direction (HISTORY 299W). Work on the research paper must begin no later than Winter Quarter of the senior year (at least two quarters prior to graduation).

5. At least six quarters of enrollment in the major. Each candidate for the B.A. in History should declare a major by the Autumn Quarter of the third year of study (earlier, if possible).

One Directed Writing (299W) or Directed Research (299S) taken for 3-5 units and for a letter grade may be applied toward the twelve courses required for the B.A. in History. A maximum of five transfer courses may be applied toward the major. Advanced placement credits do not fulfill any major requirements.

Completion of the major requires planning. In Spring Quarter of the junior year, following consultation with faculty advisers, History majors are required to complete a departmental Degree Progress Review and submit it to the History office.

The department also encourages students to acquire proficiency in foreign languages and study at one of Stanford’s overseas programs. Such studies are not only valuable in themselves; they can provide an opportunity for independent research and a foundation for honors essays and graduate study.

For information on specific History courses’ satisfaction of major requirements, refer to the Department of History course information web site at http://history-db.stanford.edu/courses/.

THE GENERAL HISTORY TRACK

In pursuing the above requirements for all History majors, the student in the General History track is required to satisfy breadth and concentration requirements.

1. Breadth: to ensure chronological and geographical breadth, at least two courses must be completed in a premodern chronological period and in each of three geographical fields: Field I (Africa, Asia, and Middle East); Field II (the Americas); and Field III (Europe, including Western Europe, Eastern Europe, and Russia). Courses fulfilling the premodern chronological period may also count for Fields I-III.

2. Concentration: to develop some measure of expertise, students must complete four courses in one of the following fields of concentration: the United States, the Middle East, international history, comparative empires and cultures; or a thematic subject treated comparatively, such as war and revolution, work, gender, family history, popular culture, or high culture. The proposed concentration must be approved by the major adviser; a proposal for a thematic concentration must have the approval of both the adviser and the department’s undergraduate studies committee. At least one and preferably two of these four courses should be an undergraduate colloquium or seminar.

Certain Introduction to the Humanities (IHUM) courses taught by History faculty in a Winter-Spring sequence count toward the General History major.

HISTORY TRACKS WITH INTERDISCIPLINARY EMPHASIS (HMIE)

These tracks are designed for several types of students: students interested in other disciplines who want to focus on the historical aspects of the subject matter covered by that discipline; students in History who want to understand how interdisciplinary approaches can deepen their understanding of history; and students primarily interested in developing interdisciplinary approaches to historical scholarship by combining the careful attention to evidence and context that motivates historical research with the analytic and methodological tools of science and the humanities. In pursuing the above requirements for all History majors, students in HMIE are required to complete their twelve courses for the major as follows:

Gateway Course (one course)—Students are required to take the appropriate gateway course for their interdisciplinary track. This introduces students to the application of particular interdisciplinary methods to the study of history. See the section on each HMIE for the gateway course appropriate to that major.

Methodological Cluster (three courses)—This cluster is designed to acquaint students with the ways in which interdisciplinary methods are employed in historical scholarship, by practicing historians and scholars in other disciplines whose work is historical. This program of study must provide methodological coherence and must be approved in advance by the student’s adviser. See the section on each HMIE for the appropriate historical methods courses.

Geographic Cluster (four courses)—History is embedded in time and place. This cluster is designed to emphasize that the purpose of studying methodology is to more fully understand the history of a particular region of the world. Students select a particular geographic region, as specified in the History major, and complete four courses in that area.

Interdisciplinary Cluster (four courses)—These courses, taken outside the Department of History, acquaint students with the methods and approaches of another discipline appropriate for the interdisciplinary study of history. This program of study must provide methodological coherence and must be approved in advance by the student’s adviser. See the section on each HMIE for appropriate interdisciplinary courses.

HMIE track does not mandate the breadth or concentration requirements of the General History track. Introduction to the Humanities courses taught by History faculty may apply to HMIEs only insofar as their content is specifically appropriate to the particular methodological or geographic cluster. Courses preapproved for the clusters in interdisciplinary tracks are listed on the History advising web site.

HISTORY, LITERATURE, AND THE ARTS

The History, Literature, and the Arts track is designed for the student who wishes to complement his or her work in History with study in literature, particularly in a foreign language. For the purposes of this major, literature is defined broadly, including art, drama, films and poetry, memoirs and autobiography, novels, as well as canonical works of philosophy and political science. It appeals to students who are interested in studying literature primarily in its historical context, or who want to focus on both the literature and history of a specific geographical area while also learning the language of that area.

Gateway Course—HISTORY 239E, History, Literature, and Arts in Great Britain (Autumn Quarter), gives students a broad introduction to the study of literary texts in history.

Methodological Cluster—This cluster teaches students how historians, in particular, analyze literary texts as documentary sources. Students choose three courses from among the preapproved HLA Methodology curriculum; other courses must be approved by the HLA coordinator. These courses need not be in the student’s geographic concentration.

Geographic Cluster—Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological courses required above.

Interdisciplinary Cluster—Four courses, taken outside the Department of History, must address the literature and arts, broadly defined, of the area chosen for the geographic concentration. The student’s adviser must pre-approve all courses in this cluster; these courses may not be double-counted towards a minor or major other than History.

General Requirements—Among the history courses taken, students must include a Sources and Methods seminar, two 200-level courses, and one other small group class. In addition, the Writing in the Major (WIM) requirement must be completed.
HISTORY, SCIENCE, AND MEDICINE

The History, Science, and Medicine (HS&M) track is a collaborative program of the Department of History, the Program in the History and Philosophy of Science, and the Stanford School of Medicine. The major is designed for: (1) students who wish to complement their work in science and/or premedical study with a History track that focuses on science and medicine; (2) students in the humanities and social sciences whose interest in science and medicine is primarily historical and contextual. This major allows students who are contemplating medical school to study the history of medicine and the medical humanities while fulfilling the premedical curriculum.

Gateway Course (1 course) — Students fulfill this requirement by taking the gateway course for HS&M that is offered annually: HISTORY 232G, When Worlds Collide: The Trial of Galileo (Spring Quarter).

Methodological Cluster (3 courses) — These History courses focus on the history of science, technology, and medicine. Courses must be approved by the student’s advisor. The choice of courses depends on the student’s particular interests (for example, premodern science, medical history and literature, history of technology, medical anthropology).

Geographic Cluster (4 courses) — Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East or Africa. These four courses must be taken in addition to the three methodological cluster courses. Courses in the history of science, technology, and medicine that have a geographic focus may be used to fulfill this requirement, but cannot be double-counted in the methodological cluster.

Interdisciplinary Cluster (4 courses) — These courses are taken outside the Department of History. The cluster can be defined in any of four ways:
1. two medical humanities courses plus two complementary science courses
2. two courses about science (e.g., anthropology of science, sociology of science, philosophy of science) plus two complementary science courses
3. four courses in medical humanities
4. two courses in medical humanities and two about science. In all instances, the Interdisciplinary Cluster must be approved in advance by the student’s advisor.

Medical Humanities Course in the Medical School — Majors in the Medical Humanities field of the track in History, Science, and Medicine are expected to take at least one course in the School of Medicine.

General Requirements — Among history courses taken, students must include a Sources and Methods seminar, two 200-level courses, and one other small group class. In addition, the Writing in the Major (WIM) requirement must be completed.

HISTORY AND LAW

The History and Law (HL) interdisciplinary track is for students who wish to explore the intersections between historical and legal studies. The HL curriculum focuses on the role of legal institutions, policies, and structures in various societies. HL track majors enroll in at least three History department courses that focus on issues of law in civil societies and four courses that provide a geographic concentration. In addition, students enroll in four courses outside History that provide disciplinary or interdisciplinary perspectives on the role of law in shaping societies.

Core Courses (3 courses) — Students enroll in at least three History department courses, including courses outside History taught by faculty affiliated with the department, that focus on how law, policies, constitutions, and legal structures affect the development of various societies. These courses include, but are not limited to, the following: HISTORY 57, The Constitution: A Short History; HISTORY 135, History of European Law; HISTORY 222, Honor, Law, and Modernity; HISTORY 245G, Law and Colonialism in Africa; HISTORY 251G, Topics in Constitutional History; HISTORY 293, Law and Society in Late Imperial China; and HISTORY 352B, History of American Law (same as LAW 318; open to undergraduates with consent of instructor; semester-long).

Geographical Cluster (5 courses) — Students choose five History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.

Interdisciplinary Cluster (4 courses) — Students choose four courses from outside the History department including courses offered in the School of Law and the School of Education. The faculty coordinator must pre-approve all courses in this cluster.

Small Group Requirements — Students must enroll in one source and methods course and at least two 200-level small group courses while completing the three core courses and the five-course geographical cluster. The Writing in the Major (WIM) requirement must be completed in a History department WIM-designated course.

PUBLIC HISTORY/PUBLIC SERVICE

The Public History/Public Service (PH/PS) interdisciplinary history track is designed for students who wish to include in their course of studies the application of historical study in:
1. public settings such as museums and heritage sites, national and state parks, public agencies, and private foundations, and
2. public service settings in nonprofit organizations, public agencies, and educational institutions.

PH/PS majors enroll in a gateway course on public history and public service and in History department courses that provide a geographic concentration. In addition, students consult with the PH/PS faculty coordinator to select a cluster of service-learning courses, listed annually by the Hass Center for Public Service, that provide interdisciplinary and methodological perspectives on public service. PH/PS majors must also complete an internship through a regularly offered service-learning course or through a summer internship or fellowship.

Gateway Course (1 course) — HISTORY 201, Introduction to Public History and Public Service, provides grounding in the theory and practice of public service and exposure to the types of public history practiced in venues such as museums, historical sites, parks, and nonprofit organizations including local historical societies.

Geographical Cluster (4 courses) — Students select four History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.

Interdisciplinary Cluster (4 courses) — Students select four courses from outside the History department drawn from the annual listing of service-learning and theory/practice courses provided by the Hass Center for Public Service. The faculty coordinator must pre-approve all courses in this cluster.

Methodological Cluster (2 courses) — Students must enroll in one Sources and Methods course and one additional 200-level small group course. The Writing in the Major (WIM) requirement must be completed in a History department WIM-designated course.

Public Service/Service-learning Internship (1 course) — Students must engage in at least one quarter internship through a service-learning course or through a full-time public service or public history summer internship or fellowship. This internship must be pre-approved by the faculty coordinator.

MINORS

Candidates for the minor in History must complete six courses, at least three of which must have a field or thematic focus. The department ordinarily defines fields in terms of geography or chronology, but it also invites students to pursue thematic topics that can be examined in broadly comparative terms. Students completing the minor may choose to concentrate in such fields as African, American, British, Asian, European (medieval, early modern, or modern), Russian, and East European history, comparative empires and cultures, or such thematic topics as the history of gender, the family, religion, technology, or revolution. Students may also petition to have a concentration of their own design count toward the minor.
All six courses must be of at least 3 units each and must be taken for a letter grade. The student must maintain a grade point average (GPA) in History courses of 2.0 (C) or higher. Two of the six courses must be small-group in format (Stanford Introductory Seminars, Sources and Methods Seminars, departmental colloquia, and research seminars). History courses taken at overseas campuses may count toward the minor, but at least three of the six courses must be taken from Stanford faculty. One History course from Introduction to the Humanities may count toward the minor, but not for the field concentration. One directed writing (299W) or directed research (299S) course may count toward the minor, if taken for 3-5 units and for a letter grade. A maximum of three transfer courses may be used toward the minor. Advanced placement credits do not fulfill any minor requirements.

Students must declare the minor in History no later than the Autumn Quarter of the senior year. They do so via Axess under Declare Major/Minor. Minor declarations are then approved by the Department of History and confirmation is sent via email to the student.

HONORS PROGRAM

For a limited number of majors, the department offers a special program leading to honors in History. Students accepted for this program, in addition to fulfilling the general requirements stated above, begin work on an essay in Spring Quarter of the junior year and complete the essay by mid-May of the senior year. In addition to the Junior Honors Colloquium, 299H, students normally take 11 to 15 units of Senior Research, to be distributed as best fits their specific project. For students in the honors program, Senior Research units (299A, B, C) are taken in addition to the twelve required courses in History.

To enter this program, the student must be accepted by a member of the department who agrees to advise the research and writing of the essay, and must complete the Junior Honors Colloquium (299H). An exception to the latter requirement may be made for those studying overseas Winter Quarter of the junior year, but such students should consult with the director of the honors program, if possible, prior to going overseas. Under exceptional circumstances, students are admitted to the program in the Autumn Quarter of the senior year.

In considering an applicant for such a project, the adviser and director of the honors program take into account general preparation in the field of the project and expect a GPA of at least 3.3 (B+) in the student’s previous work in history and in the University. Students completing the thesis with a grade of ‘B+’ or higher are eligible for honors in History. To enter the honors program, apply at the Department of History office.

Outstanding honors essays may be considered for the University’s Golden Medals, as well as for departmental James Birdsall Weter prizes.

SECONDARY (HISTORY) TEACHER’S CREDENTIAL

Applicants for the Single Subject Teaching Credential (Secondary) in the social studies may obtain information regarding this program from the Credential Administrator, School of Education.

COTERMINAL B.A. AND M.A. PROGRAM

The department each year admits a limited number of undergraduates for coterminal B.A. and M.A. degrees in History. Coterminal applications are accepted during Autumn Quarter for admission in Spring Quarter; check with the History office for the application deadline. Applicants are responsible for checking their compliance with University coterminal requirements listed in the “Undergraduate Degrees and Programs” section of the this bulletin. Applicants must meet the same general standards as those seeking admission to the M.A. program; they must submit a written statement of purpose, a transcript, GRE test scores, and three letters of recommendation, at least two of which should be from members of the Department of History faculty. To be competitive, coterminal applicants should have a 3.75 GPA in their undergraduate history major (or equivalent if they are entering without a History major.) The decision on admission rests with the department faculty upon recommendation by the Graduate Admissions Committee. Students must meet all requirements for both degrees. They must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three courses that fall within a single Ph.D. field.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

ADMISSION

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Guide to Graduate Admission, available from Graduate Admissions, the Registrar’s Office, 630 Serra Street, Suite 120, or at http://gradadmissions.stanford.edu.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

MASTER OF ARTS

University requirements for the M.A. degree are described in the “Graduate Degrees” section of this bulletin.

The department requires the completion of nine courses (totaling not less than 45 units) of graduate work; seven courses of this work must be Department of History courses. Of the seven, one must be a seminar and four must be either graduate colloquia or graduate seminars. Directed reading may be counted for a maximum of 10 units. A candidate whose undergraduate training in history is deemed inadequate must complete nine courses of graduate work in the department. The department does not recognize for credit toward the M.A. degree any work that has not received the grade of ‘A’ or ‘B’.

Terminal M.A. Program — Applicants who do not wish to continue beyond the M.A. degree are admitted to this program at the discretion of the faculty in individual fields (U.S., modern Europe, and so on). Students admitted may not apply to enter the Ph.D. program in History during the course of work for the M.A. degree.

M.A. in Teaching (History) The department cooperates with the School of Education in offering the Master of Arts in Teaching degree. For the general requirements, see the “School of Education” section of this bulletin. For certain additional requirements made by the Department of History, contact the department office. Candidates must possess a teaching credential or relevant teaching experience.

DOCTOR OF PHILOSOPHY

Students planning to work for the doctorate in history should be familiar with the general degree requirements of the University outlined in the “Graduate Degrees” section of this bulletin. Those interested in applying for admission to the M.A. and Ph.D. programs should contact the graduate program coordinator in the History department. Online applications are available in September of the year prior to intended enrollment. The application filing deadline is December 5, 2006. Applicants must file a report of their general scores on the Graduate Record Examination and submit a writing sample of 10-25 pages on a historical topic. Successful applicants for the M.A. and Ph.D. programs may enter only in Autumn Quarter.

Upon enrollment in the graduate program in History, the student has a member of the department designated as an adviser with whom to plan the Ph.D. program. Much of the first two years of graduate study is spent taking courses, and, from the outset, the student should be aware that the ultimate objective is not merely the completion of courses but preparation for general examinations and for writing a dissertation.

Admission to the Department of History in the graduate division does not establish any rights respecting candidacy for an advanced degree. At the end of the first year of graduate study, students are evaluated by the faculty and given a progress report. A decision as to whether the student
is admitted to candidacy for the Ph.D. is normally made by the start of the student’s third year.

After the completion of certain further requirements, students must apply for acceptance for candidacy for the doctorate in the graduate division of the University.

REQUIREMENTS
1. In consultation with the adviser, students select an area of study from the list below in which to concentrate their study and later take the University oral examination. The major concentrations are:
   - Europe, 300-1500
   - Europe, 1400-1800
   - Europe since 1700
   - Jewish History
   - Russia
   - Eastern Europe
   - Middle East
   - East Asia before 1600
   - China since 1600
   - Japan since 1600
   - Africa
   - Britain and the British Empire since 1460
   - Latin America
   - The United States (including colonial America)
   - History of Science, Medicine, and Technology

2. The department seeks to provide a core colloquium in every major concentration. Students normally enroll in this colloquium during the first year of graduate study.

3. Students are required to take two research seminars, at least one in the major concentration. Normally, research seminars are taken in the first and second years.

4. Each student, in consultation with the adviser, defines a secondary concentration. This concentration should represent a total of four graduate courses or their equivalents, and it may be fulfilled by working in a historical concentration or an interdisciplinary concentration. The historical concentrations include:
   - One of the concentrations listed above (other than the student’s major concentration).
   - One of the concentrations listed below, which falls largely outside the student’s major concentration:
     - The Ancient Greek World
     - The Roman World
     - Europe, 300-1000
     - Europe, 1000-1400
     - Europe, 1400-1600
     - Europe, 1600-1789
     - Europe, 1700-1871
     - Europe since 1848
     - England, 450-1460
     - Britain and the British Empire, 1460-1714
     - Britain and the British Empire since 1714
     - Russia to 1800
     - Russia since 1800
     - Eastern Europe to 1800
     - Eastern Europe since 1800
     - Jewish History
     - Middle East to 1800
     - Middle East since 1800
     - Africa
     - China before 1600
     - China since 1600
     - Japan before 1600
     - Japan since 1600
     - Latin America to 1825
     - Latin America since 1810
     - The United States (including Colonial America) to 1865
     - The United States since 1850
     - The History of Science, Medicine, and Technology

5. Each student, before conferral of the Ph.D., is required to satisfy the department’s teaching requirement.

6. There is no University or department foreign language requirement for the Ph.D. degree. A reading knowledge of one or more foreign languages is required in concentrations where appropriate. The faculty in the major concentration prescribes the necessary languages. In no concentration is a student required to take examinations in more than two foreign languages. Certification of competence in commonly taught languages (that is, French, German, Italian, Portuguese, Russian, and Spanish) for candidates seeking to fulfill the language requirement in this fashion is done by the appropriate language department of the University. Certification of competence in other languages is determined in a manner decided on by faculty in the major concentration. In either case, certification of language competence must be accomplished before a student takes the University oral examination.

7. The student is expected to take the University oral examination in the major concentration in the third graduate year.

8. The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

JOINT PH.D. IN HISTORY AND HUMANITIES
The Department of History participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in History and Humanities. See the “Interdisciplinary Studies in Humanities” section of this bulletin.

FINANCIAL SUPPORT
Students who are admitted with financial support are provided multiple years of support through fellowships, teaching and research assistantships, and tuition grants. Applicants should indicate on the admissions application whether they wish to be considered for such support. No separate application for financial aid is required.

U.S. citizens and permanent resident aliens who are interested in area language studies in East Asia, Africa, and the republics of the former Soviet Union may request a Foreign Language and Area Studies (FLAS) fellowship application from the FLAS coordinator of the respective programs offering the FLAS (CEAS, CAS, CREEES). The FLAS application deadlines are in January.

RESOURCES
The above section relates to formal requirements, but the success of a student’s graduate program depends in large part on the quality of the guidance received from faculty and on the library resources available. Prospective graduate applicants are advised to study the list of History faculty and the courses this faculty offers. As to library resources, no detailed statement is possible in this bulletin, but areas in which library resources are unusually strong are described following.

The University Library maintains strong general collections in almost all fields of history. It has a very large microtext collection, including, for instance, all items listed in Charles Evans’ American Bibliography, and in the Short Title Catalogues of English publications, 1474-1700, and virtually complete microfilmed documents of the Department of State to 1906. It also has a number of valuable special collections including the
The rich collection of the Hoover Institution on the causes, conduct, and results of WW I and WW II are being augmented for the post-1945 period. The materials include government documents, newspaper and serial files, and organization and party publications (especially the British and German Socialist parties). There are also important manuscript collections, including unpublished records of the Paris Peace Conference of 1919 and the Herbert Hoover archives, which contain the records of the Commission for Relief in Belgium, the American Relief Administration, the various technical commissions established at the close of WW I for reconstruction in Central and Eastern Europe, the personal papers of Herbert Hoover as United States Food Administrator, and other important personal papers. Other materials for the period since 1914 relate to revolutions and political movements; international relations; international organizations and administration including the publications of the United Nations, as well as principal international conferences. The Hoover Institution also possesses some of the richest collections available anywhere on the British labor movement; Eastern Europe, including the Soviet Union; East Asia (runs of important newspapers and serials and extensive documentary collections, especially for the period of WW II); and Africa since 1860, especially French-speaking Africa, the former British colonies, and South Africa.

COURSES
See the Time Schedule and http://history.stanford.edu/courses/ for updated information.
Courses are listed in the following order:
Introductory Undergraduate
Undergraduate (by Area or Theme)
Graduate (by Area or Theme)
Overseas Studies Program Courses in History

INTRODUCTORY UNDERGRADUATE
Introductory undergraduate History courses are listed in the following subsection order:
Introduction to the Humanities (IHUM)
Introductory Lectures: 1-99
Stanford Introductory Seminars: 1N-99N, 1Q-99Q
Sources and Methods Seminars: 1S-99S

IHUM (INTRODUCTION TO THE HUMANITIES)
The following Introduction to the Humanities courses are taught by History faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1-HUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in History are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 4A,B. Mass Violence from Crusades to Genocide — The evolution, varieties, causes, and logic of mass violence in premodern and modern history; how mass violence shaped historical trends. What accounts for the persistence of mass violence in history? Do religions, ethnicity, and modernity foment or restrain mass violence? Is there a common pattern of mass violence throughout the centuries? Geographic focus is Europe; comparisons with societies which the Europeans encountered such as the Aztec empire, the Islamic world, and the African colonies. GER: IHUM-2,3
IHUM 4A: 5 units, Win (Buc, P)
IHUM 4B: 5 units, Spr (Weiner, A)

IHUM 5A,B. Worlds of Islam: Global History and Muslim Societies — Chronological and geographical overview of times and places in which Islam has been the dominant cultural framework. Elements of the Muslim faith and its related political, social, and cultural practices from the 7th-century rise of Islam to the recent past. Geographic range includes the historic Arab heartland of Islam, Africa, Persia, the Ottoman Empire, and Central Asia. GER: IHUM-2,3
IHUM 5A: 5 units, Win (Beinin, J; Rodrigue, A; Hanretta, S; Crews, R)
IHUM 5B: 5 units, Spr (Rodrigue, A; Hanretta, S; Crews, R; Satia, P)

IHUM 6A,B. World History of Science — The broad sweep of global science, from the prehistoric roots of the oldest known technologies, the events of the Scientific Revolution, through recent triumphs in the physical and life sciences. History as unavoidably selective. How science transforms and is transformed by human engagements with technology, religion, art, politics, and moral values. GER: IHUM-2,3
IHUM 6A: 5 units, Win (Proctor, R)
IHUM 6B: 5 units, Spr (Proctor, R)

INTRODUCTORY LECTURES
HISTORY 31. Science, Technology, and Art: The Worlds of Leonardo — (Same as STS 125/225.) The intersections among science, technology, and society, and an interdisciplinary introduction to Renaissance studies. Why does this 15th-century artist, engineer, and inventor continue to fascinate and inspire innovative, interdisciplinary work? The world of the historical Leonardo, looking at his range of interests and accomplishments (including Mona Lisa, human anatomies, flying machines), and the culture of invention that shaped him. Students think with Leonardo, reconstructing some of his projects. The persistence of the Renaissance as a touchstone for innovation in the 21st century, examining the myth of Leonardo. GER: DB-Hum
5 units, Win (Findlen, P)
5 units, Aut (Chang, G)

5 units, not given this year (Carson, C)

HISTORY 70. Culture, Politics, and Society in Latin America — Introduction to the political and social history of Latin America. Emphasis is on interactions among institutional change, social structure, and political movements, emphasizing the environment and cultural values. GER: DB-SocSci, EC-GlobalCom
5 units, Spr (Frank, Z)

HISTORY 92A. The Historical Roots of Modern East Asia — China and Japan before and during the transition to modernity. From the 17th century when E. Asia was populous, urbanized, economically advanced, and culturally sophisticated to the early 20th century when European and America dominated the Pacific, while China was in social and political upheaval and Japan had begun its march to empire. Films; mandatory discussions. GER:DB-SocSci, EC-GlobalCom
5 units, Spr (Miller, L)

STANFORD INTRODUCTORY SEMINARS
See http://introsems.stanford.edu/ for applications and information.

HISTORY 20N. Russia in the Early Modern European Imagination — Stanford Introductory Seminar. Preference to freshmen. The contrast between the early modern image of Europe as free, civilized, democratic, rational, and clean against the notion of New World Indians, Turks, and Chinese as savage. The more difficult, contemporary problem regarding E. Europe and Russia which seemed both European and exotic. Readings concerning E. Europe and Russia from the Renaissance to the Enlightenment; how they construct a positive image of Europe and conversely a negative stereotype of E. Europe. GER:DB-Hum, EC-GlobalCom, WRITE-2
5 units, Spr (Kollmann, N)

4 units, Aut (Stansky, P)

HISTORY 32N. The English Revolution — Stanford Introductory Seminar. Preference to freshmen. The English Civil War and the 11-year period in which it became a republic ruled not by a hereditary king but by a lord protector. During this revolutionary period, English men and women wrote about freedom and liberty in terms of the individual and the state, and of religion and society. The meaning of these writings which sketched for the first time in premodern Europe what democracy and a democratic republic might entail. GER:DB-Hum
4-5 units, Spr (Como, D)

HISTORY 33N. The French Revolution — Stanford Introductory Seminar. Preference to freshmen. The political culture of the pre-Revolutionary period. The course of the Revolution from the 1789 Declaration of the Rights of Man and of the Citizen through the 1793 Reign of Terror. Efforts to found a democratic order, and the political dynamic that led from the proclamation of liberty to the exercise of despotism in its name. The political culture of the Revolution in terms of relationships among language, political action, and violence. Its significance for modern history.
5 units, Win (Baker, K)

5 units, Win (Sheehan, J)

4 units, Win (Robinson, P)

HISTORY 37N. The Second World War as Experience and Memory — Stanford Introductory Seminar. Preference to freshmen. The impact of WW II on soldiers and civilians as recorded in memoirs, letters, and novels.
5 units, Aut (Sheehan, J)

HISTORY 38N. The Body — Stanford Introductory Seminar. Preference to freshmen. Cultural and social meanings of the body. How medicine, media, law, and culture construct changing ideals of the body. How to apply historical and feminist analyses to understand change and the difference that gender makes in the social and cultural construction of the body. Emphasis is on shifting historical ideals for female and male bodies, and the changing importance of body image in popular culture. Readings include girls’ diaries, women’s sports, masculinity in the media, sexual violence, and performing the body. GER:DB-Hum, EC-Gender
5 units, Spr (Freedman, E)

HISTORY 44N. The History of Women and Gender in Science, Medicine, and Engineering — Stanford Introductory Seminar. Preference to freshmen. Women’s participation in science; women as objects of scientific research; gender in the culture of the sciences; and how gender analysis has changed science theory and practice. GER:DB-Hum, EC-Gender
4 units, Win (Schiebinger, L)

HISTORY 48Q. South Africa: Contested Transitions — Stanford Introductory Seminar. Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet. GER:DB-Hum
3 units, Win (Samoff, J)

HISTORY 62N. The Atomic Bomb in Policy and History — Preference to freshmen. Emphasis is on declassified files from WWII and recent interpretations. Why did the U.S. drop A-bombs on Japan? Were there viable alternatives, and, if so, why were they not pursued? What did the use of the A-bombs mean then and later? How have postwar interpreters explained, and justified or criticized, the A-bombings? Approaches from history, international relations, American studies, political science, and ethics address the underlying conceptions, the roles of evidence, the logic and models of explanation, ethical values, and cultural/social influences. GER:DB-SocSci
4-5 units, Spr (Bernstein, B)
HISTORY 90Q. Buddhist Political and Social Theory—Stanford Introductory Seminar. Preference to sophomores. Contemporary Buddhist political theory and its historical and textual roots, emphasizing Tibetan, Thai, and Sri Lankan Buddhism. Topics: society and politics in Buddhist thought, Buddhist spiritual practice as social and political practice, sovereignty, the individual and society, Buddhist economic theory and practice, Buddhism and the state, Buddhist political and social theory in difference, between Vajrayana (Tibetan) and Theravada (S.E. Asian) Buddhist social theory. GER:DB-SocSci, EC-GlobalCom

4-5 units, Aut (Mancall, M)

HISTORY 92N. Comparative Colonialism—Stanford Introductory Seminar. Preference to freshmen. The history of colonialism including the age of exploration, high imperialism, and decolonization. Focus is on encounters between colonizers and colonized in Asia, Africa, and Latin America. Topics include: early exploration and missionary activity; role of science, cartography, and medicine; processes of assimilation and discrimination; impact of exploitation and development; resistance and collaboration; relationship between colonial men and indigenous women; and decolonization and legacies of colonialism. GER:DB-Hum, EC-GlobalCom

5 units, Aut (Uchida, J)

COGNATE COURSES

CLASSGEN 20N. Mapping the Mediterranean
4-5 units, Aut (Parker, G)

CLASSHIS 22N. Ancient and Modern Slavery
3-5 units, Spr (Scheidel, W)

EDUC 94Q. Catastrophe as Curriculum: Teaching and Representing the Holocaust—(S,Dial)
1-2 units, Spr (Wineburg, S)

SOURCES AND METHODS SEMINARS

Sources and methods seminars introduce the processes of historical investigation and interpretation by providing experience in interpreting documents, constructing a coherent story from them, interpreting their implications, and discovering how it is possible to agree on facts while disagreeing on meaning.

HISTORY 22S. Pogroms: Ethnic Violence in Eastern Europe—What causes ethnic riots? Why did attempts to overthrow the Tsarist government lead to outbursts of antisemitic violence? The history of anti-Jewish violence in E. Europe, 1648-1945. Topics include the development of urban pogroms, antisemitism, Western perceptions, historical memory, Jewish responses, and the origins of Zionism. Memoirs, essays, short stories, and poems as historical sources.

5 units, Win (Koss, A)

HISTORY 31S. The Awful and Awesome Clock: The French and Time in the Nineteenth Century—French modifications in their relations to time including scientists embracing theories of evolution and relativity, politicians promising progress, and individuals entering a world of speed, efficiency, and anticipation. How the new outlooks on and organizations of time liberated and constrained people’s lives and elicited mixed feelings toward modernity. Sources include scientific and political treatises, pamphlets, memoirs, tourist guides, advertisements, and literary and artistic media.

5 units, Spr (Chapin, E)

HISTORY 33S. Resistance in Hitler’s Europe: History, Memory, Gender—What resistance entailed in Nazi-occupied Europe? What prompted some to resist while others accommodated the occupiers? What were the consequences of women’s mass participation in underground activities and guerilla warfare? Europe’s resistance movements and their postwar memorialization. Emphasis is on France, and S. and E. Europe. Sources include memoirs, diaries, speeches, newspaper articles, resistance circulars, propaganda, photographs, and film.

5 units, Win (Batinic, J)

HISTORY 36S. Representations of Violence in Europe, 1914-1962—How does war affect art and art affect war? How visual art, literature, and music function as observer or participant, critic or supporter, propaganda or resistance in conflicts from WW I to wars of decolonization. What genres and media reveal about politics, society, culture, ideas, and gender in war? Sources include fiction, memoirs, poetry, film, paintings, posters, and music. Artists include Wilfred Owen, George Orwell, Pablo Picasso, Dmitri Shostakovich, and Primo Levi.

5 units, Spr (Vanderpool, D)

HISTORY 37S. Alcohol, Drugs, and Sex in the British and French Empires, 1823 to the Present—The history of bodily pleasure in European empires. Why Europeans often linked their colonies with sensuality and excess and what this reveals about European cultures and societies. Sources include journals, novels, Parliamentary papers, official colonial legislative documents, paintings, films, and French hip-hop music, which feature alcohol, drugs, and non-Victorian sexual encounters.

5 units, Win (Zientek, A)

HISTORY 40S. Dinosaurs, Sea Serpents, and Abominable Snowmen: Unknown Animals in Modern History—What determines the certainty that dinosaurs once existed while lake monsters do not, and why determined this certainty? Focus is on case studies, including mastodons, sea serpents, the mountain gorilla, the Loch Ness monster, the yeti, and the Flores hobbit people. How studying these controversies helps historians to understand wider social and cultural patterns, and how people’s perceptions of the animals are affected by historical circumstances.

5 units, Aut (Roberts, P)

HISTORY 42S. Climate Science in the 20th Century: A History—The scientific and political history of climate change from its 19th-century scientific origins to its 21st-century political complexities. Why, despite consensus among the scientific community that human activities are causing global warming, few measures have been taken to confront the problem. What enables climate change contrarians to keep the climate debate open?

5 units, Spr (Howe, J)

HISTORY 52S. The Ku Klux Klan and the Anti-Coolie League: Racist Movements in 19th-Century America—Anti-Black and anti-Chinese movements in the South and West. Why these movements arose; who participated; and how they affected the lives of Blacks and Chinese. Topics include racial anxieties, sexual fears, labor competition, legal and extra-legal violence, and unexpected intersections between the movements. Sources such as historical documents including congressional hearings transcripts, literature, political cartoons, newspapers, and court documents.

5 units, Spr (Lew, E)

HISTORY 53S. What Went Down on the Farm: Stanford Campus as a Laboratory for Environmental History—Environmental history is made from earth and trees, maps and dreams, plans and problems, and a world made and a world that might have been. The 8,400-acre Stanford campus and surrounding community from foothills to bay as laboratory, archives and venue for hands-on techniques to uncover the past, understand the present, and think about the future anywhere. Sources include archaeology, ecology, University business files, letters, photographs, trees, buildings, and the land.

5 units, Win (Christensen, J)

5 units, Spr (Zimmerman, K)
HISTORY 86S. The Jews of Islam in Modern Times — Jewish communities of N. Africa, the Middle East, and S.E. Europe. Topics include culture, language, and identity, and their encounter with empire, westernization, and nationalism. Sources include memoirs, diaries, films, travelogues, press, correspondence, and contemporary histories.

5 units, Aut (Danon, D)

HISTORY 92S. Lives of the Samurai — The evolution of a military society in Japan. Focus is on the social institutions necessary to field a premodern army. Tactics and strategy, tools of warfare, social organization, status of women, and supporting economy. Interpretation of paintings, artifacts, maps, and translated excerpts from epic poems and legal documents. GER:DB-Hum

5 units, Aut (Goldsmith, B)

HISTORY 93S. Silk Road or Great Wall: Early Imperial China in Eurasia — Interactions between ancient Chinese empires and their neighboring peoples since the establishment of the first Chinese empire in 221 B.C.E. to the 9th century C.E. Themes include the imperial ideology of world order, imperial expansion and defense, diplomacy, transcontinental trade along the Silk Road, and the introduction of foreign religions such as Buddhism. Readings in English.

5 units, Win (Hsieh, M)

UNDERGRADUATE

Lecture courses (100-199) are surveys of geographical regions and time periods.

Colloquia (200-299) are small-group courses on historical themes, primarily for juniors and seniors majoring in history. Admission is by consent of the instructor. Courses with a suffix "H" are for honors students only.

Undergraduate research seminars (200S-299S) provide opportunities to research and write a paper using primary sources.

Suffixes A,B,C,D indicate a course sequence. Unless otherwise stated, undergraduate courses are not take an entire sequence. Other letter suffixes, and numbers without suffixes, denote stand-alone courses.

Undergraduate courses are listed in the following subsection order:

International, Global, and Thematic: 100-109, 200-209

Europe Survey: 110A,B,C

Ancient and Medieval Europe: 111-119, 211-219

Eastern Europe, Russia, and Eurasia: 120-129, 220-229

Early Modern and Modern Europe: 130-139, 230-239

History of Science and Technology: 140-144, 240-244

Africa: 145-149, 245-249

United States Survey: 150A,B,C

United States: 151-169, 251-269

Latin America: 170-179, 270-279

Middle East: 180-184, 280-284

Jewish History: 185-189, 285-289

Asia: 190-198, 290-298

Individual Work: 299

INTERNATIONAL, GLOBAL, AND THEMATIC

HISTORY 102. The History of the International System — World politics and international relations from the dominance of empires and nation states at the turn of the century to the present. The influence of communism, fascism, and anti-imperialism, and the emergence of society as a factor in international relations. Questions of sovereignty versus the new world order. GER:DB-SocSci, EC-GlobalCom, WIM

5 units, Spr (Sheehan, J)

HISTORY 103E. History of Nuclear Weapons — (Same as POLISCI 116.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci

5 units, Spr (Holloway, D)

HISTORY 106A. Global Human Geography: Asia and Africa — (Same as INTNLREL 161A.) Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering Asia, Africa, and central Africa. Use of maps to depict geographical patterns and processes. GER:DB-SocSci

5 units, Aut (Lewis, M)

HISTORY 106B. Global Human Geography: Europe and Americas — (Same as INTNLREL 161B.) Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.

5 units, Win (Lewis, M)

HISTORY 107. Introduction to Feminist Studies — (Same as FEMST 101.) How gender inequality is created and perpetuated, and how feminist theory and movements respond to gender inequality. Topics: theories of inequality; history of feminism; international and multicultural perspectives on feminism; women’s work, health, and sexuality; creativity; spirituality; and movements for social change. GER:DB-SocSci, EC-Gender

5 units, Aut (Freedman, E)

HISTORY 201. Public Service and History — Gateway course for the History and Public Service interdisciplinary track. How public service and the study of history are connected. Opportunities available to students in applying history to public service. Theory and practice of public service.

5 units, Win (Camarillo, A)

HISTORY 202. International History and International Relations Theory — (Same as 306E, POLISCI 316.) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system. GER:DB-SocSci

5 units, Win (Holloway, D)

HISTORY 203A. Theories of the State from the Ancient World to the Present — (Same as 303A.) The development and contemporary condition of thinking about the state. Philosophic, rhetorical, and historical contexts. Aristotle’s Politics; early modern theorists such as Machiavelli, Hobbes, and Rousseau; transformations of the idea through the French Revolution by Sieyes and Hegel; and problematizations of the ideas in the last century by Schmidt and Foucault.

5 units, Win (Baker, K; Sheehan, J)

HISTORY 204E. Origins of Totalitarianism — Modern revolutionary and totalitarian politics. Sources include monographs on the medieval, Reformation, French Revolutionary, and Great War eras. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities. GER:DB-SocSci

5 units, not given this year (Weiner, A)

HISTORY 204G. War, Culture, and Society in the Modern Age

5 units, Aut (Weiner, A)

HISTORY 205. Historical Geography: Maps in the Early Modern World — (Same as 309F.) Historians have recently generated a body of spatially attuned work, probing territorial identities, human-environmental interaction, the use and misuse of maps, and the spatial patterning of social life. Focus is on cartography in the early modern period, and recent studies from Asian, European, and N. American contexts that highlight cartography’s role in exploration, empire building, and boundary making in the early modern world. GER:DB-Hum

5 units, not given this year (Wigen, K)

HISTORY 205B. Quantitative Methods in Historical Research — (Same as 305B.) Latest techniques applied to research issues in current historical debates. Preparation of data, processing, statistical procedures to examine theoretical historical issues, and how to present quantitative materials in historical writing. Mathematical or statistical training not required.

5 units, Win (Klein, H)
HISTORY 206. History and Geography of Contemporary Global Issues—(Same as INTNLREL 163.) The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of The New York Times and The Economist. Topics vary according to what is happening in the world. Student presentations. GER:DB-Hum
5 units, Spr (Lewis, M)

HISTORY 207. Biography and History—(Same as 308.) The relationship between biographical and historical writing, primarily in Europe and America. Problems of methodology, evidence, dispassion, and empathy. Texts: biographies, critical literature on biographical work, and novels (A. S. Byatt’s Possession, Bernard Malamud’s Dubin’s Lives) that illuminate the intellectual underpinnings of biographical labor. GER:DB-Hum
5 units, not given this year (Zipperstein, S)

HISTORY 208. Private Lives, Public Stories: Autobiography in Women’s History—Changing contexts of women’s lives and how women’s actions have shaped and responded to those contexts. GER:DB-Hum, EC-Gender
5 units, not given this year (Lougee Chappell, C)

HISTORY 209. Identify Yourself: Practices of Individual and Collective Identification in the Modern World—Transnational perspective. Changes in how modern states register the individual and collective identities of their people. Censuses, passports, national ID cards, and other demographic technologies as deployed by modern states to emancipatory ends such as political representation, and coercive ends such as taxation, surveillance, and state-sanctioned genocide.

HISTORY 126. History of the Balkans, 1804 to the Present — Topics include: the central role of nationalism in shaping relations among Balkan peoples and with foreign powers; struggles for independence from Ottoman and Habsburg imperial rule, culminating in the Balkan Wars of 1912-13; WW I; interwar fascist movements; the civil war between collaboration and resistance movements and genocide during WW II; communist period; and post-communist transition. Focus is on war, emphasizing war against civilians through ethnic cleansing and genocide, and women in warfare. Sources include historical and imaginative literature and film.

5 units, Spr (Knezevic, J)

HISTORY 220G. Demons, Witches, and Priests: Religion and Popular Culture in Russia — (Same as 320G.) 19th and early 20th centuries. Peasants, parish priests, witches, possessed persons, cults and sects, old believers, saints, and women’s religious communities. Namely Christian, and members of the Orthodox Church, Russians embraced beliefs and customs that combined teaching from Church and folk traditions.

5 units, Aut (Kollmann, J)

HISTORY 221A. Men, Women, and Power in Early Modern Russia, 1500-1800 — Social values, gender relations, and social change in an era of rapid change; challenges to established norms by new constructions of deviance (witchcraft, religious revolt, and revolt) and standards of civility; encounters with non-Russians and the construction of national consciousness. Social values as political ethos: patrimonial autocracy and the reality of female rule in the late 17th and 18th century. GER:DB-Hum, EC-Gender, WIM

5 units, Win (Kollmann, N)

HISTORY 221B. The Woman Question in Modern Russia — Russian radicals believed that the status of women provided the measure of freedom in a society and argued for the extension of rights to women as a basic principle of social progress. The social status and cultural representations of Russian women from the mid-19th century to the present. The arguments and actions of those who fought for women’s emancipation in the 19th century, theories and policies of the Bolsheviks, and the reality of women’s lives under them. How the status of women today reflects on the measure of freedom in post-Communist Russia. GER:DB-SocSci, EC-Gender

5 units, Aut (Jolluck, K)

HISTORY 221C. Love, Marriage, and Family in Early Modern Europe and Russia — Family structures, marriage customs, and the place of love in life and marriage in the early modern period. Sources include W. Europe (France, England, Germany, Italy), central Europe (Poland) and Russia, providing for sharp contrasts in the status of women, the nature of marriage, and emergence of private life. Readings include historical monographs and primary sources including dowry agreements, litigations, Reformation tracts, and memoirs. GER:DB-Hum, EC-Gender

5 units, not given this year (Kollmann, N)

HISTORY 221D. Women’s Activism in War and Peace — (Same as 321D.) Theoretical issues, historical origins, changing forms of women’s activism in response to war throughout the 20th century, and contemporary cases, such as the Russian Committee of Soldiers Mothers, Bosnian Mothers of Srebrenica, Serbian Women in Black, and the American Cindy Sheehan. Focus is on the U.S. and Eastern Europe, with attention to Israel, England, and Argentina.

5 units, Spr (Jolluck, K)

HISTORY 222. Honor, Law, and Modernity — How Europe evolved from medieval to modern; focus is on standards for conflict resolution emphasizing insults to honor. How attitudes towards the self and society, and the state’s relationship to individuals, changed from the 16th to 18th centuries in Europe and Russia. Traditional concepts of honor and patterns of settling disputes contrasted to early modern concepts of honor, private life, civility, and crime and punishment. GER:DB-Hum

5 units, not given this year (Kollmann, N)

HISTORY 223. Art and Ideas in 19th-Century Russia — (Same as 323.) Why did so many artistic, intellectual, and revolutionary figures including Pushkin, Tolstoy, Dostoevsky, Mussorgsky, Tchaikovsky, and Lenin emerge from autocratic imperial Russia? How did the czarist state and society shape their work? Focus is on Russia’s cultural engagement with Europe and Asia through literature, music, painting, architecture, and political thought. Controversies in 19th-century thought and culture surrounding conservatism, Westernization, Slavophilism, socialism, nihilism, populism, revolutionary terrorism, empire, anti-Semitism, national identity, and revolutionary change. GER:DB-Hum

5 units, not given this year (Crews, R)

HISTORY 224. Violence, Islam, and the State in Central Asia — (Same as 324.) The uses of violence in projects of empire and national state formation that have competed with Islamic and other political alternatives to shape modern Central Asia from the British and Russian imperial eras through the flight of the Taliban. Shared experiences and geopolitics of the former Soviet republics and Afghanistan. Themes include colonial wars and imperial competition, state formation, mass mobilization, women’s emancipation, cultural revolution, developmentalism, anti-Soviet jihad, the Taliban movement, and contemporary Islamist, nationalist, and regionalist contests for the state. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year (Crews, R)
HISTORY 224A. Modern Russia, Iran, and Afghanistan — 1800 to the present. The history of interactions between Russia and its Muslim neighbors, and how events in Iran and Afghanistan shaped Russia and the surrounding region. Russian expansion, competition for the Caucasus and the Caspian regions, state modernization, socialist revolutions, the Islamic Republic, the Taliban, and the post-9/11 contest for hegemony in the Caucasus, the Middle East, and Central Asia.

5 units, Aut (Crews, R)

HISTORY 225. Class and Ethnicity in Modern Eurasia — (Same as 325.) Class and ethnicity in the shaping of the political, social, religious and cultural landscape. The decline and collapse of the Habsburg and Russian Empires; the emergence of nation states and multinational unions such as the USSR, the EU, and the CIS; contested borders and sovereignty; and the impact of revolutionary regimes and movements.

5 units, Spr (Weiner, A; Crews, R)

HISTORY 226E. The Creation and Destruction of Yugoslavia — From the genesis of the Yugoslav idea in the 19th century to the Balkan wars of the 90s; formation of the Yugoslav kingdom during WW I, Yugoslavism, disintegration during WW II occupation, collaboration and resistance movements, the Communist revolution, the Tito-Stalin split, life in socialist Yugoslavia, dissent within Tito’s regime, the rise of nationalism in socialist Yugoslavia, and the disintegration of Yugoslavia and ethnic cleansing and genocide in the Balkan Wars of the 90s.

5 units, Aut (Knezevic, J)

HISTORY 226G. Civilians and War in Modern Europe — (Same as 326G.) From the French Revolution to the present, including the French Revolutionary wars, the Franco-Prussian War, the Balkan wars of 1912-13, WW I and II, the Spanish Civil War, fascist and communist totalitarian regimes, and the Balkan wars of the 90s. Civilians as participants, victims, and bystanders under various conditions of war, including the mobilization of society for total war, occupation, siege, collaboration and resistance, ethnic cleansing, and genocide.

5 units, Win (Knezevic, J)

HISTORY 226H. Nationalism in the Habsburg Empire, 1848-1918 — (Same as 326H.) Was nationalism responsible for the demise of the Habsburg Empire? Works on nationalism by Benedict Anderson, Miroslav Hroch, Ernst Gellner, and Rogers Brubaker. The genesis and growth of national movements in the Empire, especially the Czechs, Hungarians, Romanians, and South Slavs, and the challenges they posed to Habsburg rule. Effects of national movements on German minorities and Jews. How the Habsburg monarchy adapted to preserve itself in the face of the nationalist challenge.

HISTORY 136D. European Intellectual History: Culture and Society, 1750-1860 — The principal intellectual and cultural movements of the Enlightenment, Romantic, and liberal-bourgeois periods in Western European society. The interplay of political and economic thought, literature and art, and philosophy and social critique in the shaping of the modern concepts of individualism, the state, artistic expression, and social order. Authors include Voltaire, Rousseau, Stendhal, Kant, Goethe, Hegel, Marx, Mill, and Flaubert.

5 units, Aut (Oberle, E)

HISTORY 137. The Holocaust — The emergence of modern racism and radical anti-Semitism. The Nazi rise to power and the Jews. Anti-Semitic legislation in the 30s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry. GER:DB-Hum

5 units, Win (Staff)
HISTORY 139. Modern Britain and the Empire—From American Independence to the latest war in Iraq. Topics include: the rise of the modern British state and economy; imperial expansion and contraction; the formation of class, gender, and national identities; mass culture and politics; the world wars; and contemporary racial politics. Focus is on questions of decline, the fortunes and contradictions of British liberalism in an era of imperialism, and the weight of the past in contemporary Britain. GER:DB-Hum
5 units, Win (Satia, P)

HISTORY 213D. British Cultural History, 1851-1951—Colloquium. How Britain redefined itself as a nation and empire during a century that began with a promise of plenty, saw the growth of mass consumption, and ended in an age of austerity. Material, literary, and visual culture; gender; violence; crime; consumption; and the transformations of total war. GER:DB-Hum
5 units, not given this year (Satia, P)

HISTORY 232E. The Scientific Revolution—What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes and Newton, the early Royal Society, and less well-known contemporaries. The new meanings in this period of observing, collecting, experimenting, and philosophizing and the ramifications in relationship to the political, religious, and cultural events of early modern Europe. GER:DB-Hum
5 units, not given this year (Findlen, P)

HISTORY 232G. When Worlds Collide: The Trial of Galileo—(Same as 332G.) Gateway course for History of Science and Medicine track. The 1633 condemnation by the Catholic Church of Galileo for believing the sun to be the center of the universe, and its 1992 admission that Galileo was right. What do these events reveal about the relationship between science and religion? Why has the Galileo affair been one of the most discussed episodes in Italian history and the history of science? Documents from Galileo’s life and trial and related literature on Renaissance Italy. Historians’ interpretations of the trial in relation to its documentation. GER:DB-Hum, WIM
5 units, Spr (Findlen, P)

HISTORY 233C. Two British Revolutions—(Same as 333C.) Current scholarship on Britain,1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II.
5 units, Win (Como, D)

HISTORY 233F. Political Thought in Early Modern Britain—1500 to 1700. Theorists include Hobbes, Locke, Harrington, the Levellers, and lesser known writers and schools. Foundational ideas and problems underlying modern British and American political thought and life. GER:DB-Hum
5 units, Spr (Como, D)

HISTORY 234. Paris and Politics, 1600-2006—The emergence of the modern city of lights. Paris as a mirror of French politics: top down, capital to country, center to periphery, noble to bourgeois to people. Sources include maps, art, music, essays, and memoirs.
5 units, not given this year (Lougee Chappell, C)

HISTORY 236. The Ethics of Imperialism—How the 19th century, defined by liberty, equality, progress, and universal human ideals, also witnessed Europe’s colonial expansion; how Europeans justified the acquisition of territories and colonial subjects. The ethical underpinnings of empire. Focus is on primary source material. Case study on the settlement of Australia; how European ideals justified inequality, violence, and genocide. The breakdown of liberal justifications of imperialism and shifts in support for empire. The modern human rights movement and the legacy of imperialism. The ethics of contemporary globalization and American imperialism. GER:DB-Hum
5 units, not given this year (Daughton, J)

HISTORY 236E. Cultures of Violence in Twentieth-Century Europe—(Same as 336E.) Political, social, and cultural factors that made the 20th century the most violent in history; the triumph of European civilization and an age of catastrophe. The social and political uses of and intellectual and cultural responses to violence. How people witnessed, coped with, survived, and remembered violent episodes. State violence, and political, ethnic, and religious conflict. Topics include: colonialist violence, the WW I and II, the Holocaust, the Russian Revolution and Stalinism, decolonization, the IRA, and the former Yugoslavia. GER:DB-SocSci
5 units, not given this year (Daughton, J)

HISTORY 239D. Capital and Empire—(Same as 339D, HUMNTIES 191S.) Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Walmart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development.
5 units, Spr (Satia, P)

HISTORY 239E. History and the Arts in 20th-Century Britain—Novels, poetry, buildings, images, and music. The works in themselves and what they reveal about the society that produced them. Emphasis is on Bill Brandt’s photographs. GER:DB-Hum, WIM
5 units, Aut (Stansky, P)

HISTORY 239F. Empire and Information—(Same as 339F.) How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable. Students present original research findings and may continue research for a second quarter. GER:DB-SocSci
5 units, Win, Spr (Roberts, R)

HISTORY 249. History without Documents—(Same as 349.) Can history be written about places and times for which are are no written sources, or for people in literate societies who left no written traces? Practical training in historical methods for non-documentary sources, including oral traditions and history, archaeology, ecological sources, historical linguistics, ethnography, rituals, myths, songs, and art. GER:DB-Hum, WIM
5 units, Spr (Hanretta, S)

United States Survey
HISTORY 150A. Colonial and Revolutionary America—Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution. GER:DB-SocSci, EC-AmerCul
5 units, Aut (Winterer, C)

HISTORY 150B. 19th-Century America—Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture. GER:DB-SocSci, EC-AmerCul
5 units, Win (Staff)

HISTORY 150C. The United States in the Twentieth Century—Major political, economic, social, and diplomatic developments in the U.S. Themes: the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities; the world wars; and historical approaches. Course studies of class and race in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 50s and 60s); the changing status of women since WW II; shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy in WW I and II, and the Cold War. GER: DB-Hum, DB-SocSci, EC-AmerCul
5 units, Spr (Camarillo, A; Chang, G)
THE UNITED STATES
See also 38N, 52S, 62N, 107, and 201.

5 units, Win (Carson, C; Bobo, L)

5 units, Aut (Brock, E)

HISTORY 154. 19th-Century U.S. Cultural and Intellectual History, 1790-1860—How Americans considered problems such as slavery, imperialism, and sectionalism. Topics include: the political legacies of revolution; biological ideas of race; the Second Great Awakening; science before Darwin; reform movements and utopianism; the rise of abolitionism and proslavery thought; phrenology and theories of human sexuality; and varieties of feminism. Sources include texts and images. GER:DB-Hum, EC-AmerCul
5 units, not given this year (Winterer, C)

HISTORY 158. The United States Since 1945—Focus is on foreign policy and politics with less attention to social and intellectual history. Topics include nuclear weapons in WW II, the Cold War, the Korean and Vietnam wars, Eisenhower revisionism, the Bay of Pigs and Cuban missile crisis, civil rights and the black freedom struggle, the women’s movement, the Great Society and backlash, welfare policy, conservatism and liberalism, the 60s anti-war movement, Watergate and the growth of executive power, Iran-Contra and Reagan revisionism, Silicon Valley, the Gulf War, the Clinton impeachment controversy, 2004 election, and 9/11 and Iraq war. GER:DB-SocSci, EC-AmerCul
4-5 units, Win (Bernstein, B)

HISTORY 161. U.S. Women’s History, 1890s-1990s—The transformation of Victorian womanhood in the late 19th century, including the workforce participation of immigrant and black women, educational and professional opportunities for middle class white women, impact of wars and depression on 20th-century women’s lives, and rebirth of feminism. GER:DB-SocSci, EC-Gender
5 units, not given this year (Freedman, E)

HISTORY 165. Mexican American History through Film—Focus is on the 20th century. Themes such as immigration, urbanization, ethnic identity, the role of women, and the struggle for civil rights. GER:DB-Hum
4-5 units, not given this year (Camarillo, A)

HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle—Focus is on political thought and protest movements after 1930. Individuals who have shaped and been shaped by modern African American struggles for freedom and justice. Sources include audiovisual materials. Research projects required for fifth unit. GER:DB-SocSci, EC-AmerCul
4-5 units, Aut (Carson, C)

HISTORY 251. Creating the American Republic—(Same as 352.) Concepts and developments in the late 18th-century invention of American Constitutionalism; the politics of constitution making and ratifying; emergence of theories of constitutional interpretation including originalism; early notions of judicial review. Primary and secondary sources. GER:DB-SocSci
5 units, not given this year (Rakove, J)

HISTORY 252. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis—(Same as 355.) Primary documents and secondary literature. GER:DB-SocSci
5 units, not given this year (Bernstein, B)

HISTORY 252G. Environmental History of Urban America—(Same as 352G.) The American city’s roots in nature; how environment, ideas of nature, and cities have shaped each other. Topics include: early reactions to urbanization and industrialization; relationships between cities and hinterlands; creation of parks and suburbs; challenges posed by pollution, public health, and environmental justice; and consequences of contemporary urban sprawl. GER:DB-Hum
5 units, Aut (Rawson, M)

HISTORY 254. Popular Culture and American Nature—Despite John Muir, Aldo Leopold, and Rachel Carson, it is arguable that the Disney studios have more to do with molding popular attitudes toward the natural world than politicians, ecologists, and activists. Disney as the central figure in the 20th-century American creation of nature. How Disney, the products of his studio, and other primary and secondary texts see environmentalism, science, popular culture, and their interrelationships. GER:DB-Hum
5 units, not given this year (White, R)

HISTORY 255. Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice—The religious and political thought of Martin Luther King, Jr., using the documentary resources of the King Institute at Stanford. His social gospel Christianity and prophetic message of radical social transformation. Readings include the forthcoming The Papers of Martin Luther King, Jr., Volume VI: Advocate of the Social Gospel.
5 units, Aut (Carson, C)

HISTORY 256. U.S.-China Relations: From the Opium War to Tiananmen—(Same as 356.) The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past. GER:DB-SocSci, EC-GlobalCom, WIM
5 units, Win (Chang, G)

HISTORY 257. The Politics and Ethics of Modern Science and Technology—The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university. GER:DB-Hum
5 units, not given this year (Bernstein, B)

HISTORY 258. History of Sexuality in the U.S.—(Formerly 265A; same as 358.) Priority to History and Feminist Studies majors; a limited number of graduate students may be admitted. Readings on the social construction of sexuality, primarily U.S., in the 19th and 20th centuries. Topics: reproduction, sexual identities, and race and sexuality. Prerequisite: consent of instructor. GER:DB-SocSci, EC-Gender
5 units, Spr (Freedman, E)

HISTORY 259A.B. Poverty and Homelessness in America—Student internship with the Emergency Housing Consortium, the primary agency providing shelter for homeless people in Santa Clara and San Mateo counties. Prerequisite: interview with instructor. GER:DB-SocSci
A: 5 units, B: 3 units, not given this year (Camarillo, A)

HISTORY 260. Race and Ethnicity in the American Metropolis: A Case Study of Los Angeles—Contemporary history of ethnic and racial groups in urban America. Historical and social science literature focusing on groups in the Los Angeles area. Topics include immigration, poverty, education, demographic changes, political participation, conflict and cooperation, and cultural life in the modern, multicultural metropolis. GER:DB-SocSci, EC-AmerCul, WIM
5 units, Spr (Camarillo, A)
HISTORY 264. California History — The myths and realities about California’s past, focusing on the 20th century. The origins of California’s diverse society. Social, political, economic, demographic, and cultural dimensions of the state’s history. GER:DB-SocSci
5 units, not given this year (Camarillo, A)

5 units, not given this year (Chang, G)

HISTORY 267E. The Suburban West — (Same as 367F.) How and why the Western U.S. suburbanized after WW II. The political, technological, cultural, and environmental effects of this transformation. Topics include the role of the Cold War defense complex, construction of the highway system and the rise of automobile culture, water and land use policy, architecture and planning of suburbs, and the effect of suburbanization on national politics. GER:DB-SocSci
5 units, not given this year (O’Mara, M)

HISTORY 267F. Cities in the North American West, 1840-1940 — Political, social, economic, and environmental forces shaping development of the major metropolitan areas of the Rocky Mountain and Pacific from Mexican pueblos to Gold Rush boomtowns to shipping capitals and military metropolises. Comparison with cities in other regions of the U.S. Topics include immigration and migration patterns, local politics, architecture and city planning, urban infrastructure, and relationships to the natural environment. GER:DB-SocSci
4-5 units, not given this year (O’Mara, M)

HISTORY 268. The Other Wests — GER:DB-Hum
5 units, not given this year (White, R)

HISTORY 268D. The American West in Fiction and Film — (Same as 368D.) The American West as an enduring myth that continues to shape American identity today. The evolution of the imagined West through classic fiction and film that helped to create and popularize the myth. Topics include: the significance of the frontier; the western hero; the landscape of the West; and the construction of gender and race.
5 units, Aut (Rawson, M)

HISTORY 268E. Politics and Politicians in the American West — (Same as 367G.) Elected officials from Western states including Leland Stanford, Lyndon Johnson, Barry Goldwater, and Arnold Schwarzenegger as dominant figures on the national political stage. Political biography as a tool to survey the political history of the West from the Gilded Age to the present. The social, economic, and environmental characteristics of the West that shaped the careers of these politicians, and the effect of Western political culture upon national electoral politics and policy.
5 units, not given this year (O’Mara, M)

HISTORY 268F. U.S. National Parks: History, Policy, and Context
4 units, Win (Kennedy, R)

HISTORY 269G. History of the Native American West — From pre-contact to the present. The diversity of native communities, their histories prior to contact, and their economic and cultural exchanges with newcomers. Challenges and questions associated with researching and writing ethnohistory. Topics include the impact of disease, the fur trade, intermarriage, violence, urban migrations, museum displays, the American Indian Movement, and contemporary issues confronting native peoples.
4-5 units, Win (Wadewitz, L)

HISTORY 269H. Burgers, Fries, and Fruit Pies: How the West Fed America — Types of foods produced in the West and related social, economic, cultural, and environmental issues. Changing production processes and the workforces involved, work conditions, trade issues, and the evolution of regulatory controls. Cattle ranching, meat packing, agriculture, fishing, and fish farms.
4-5 units, Spr (Wadewitz, L)

HISTORY 276G. Demographic History of the U.S. — (Same as 376G.) From the pre-Colombian period to the present. Trends in fertility, mortality, migration, marriage, family, and racial and ethnic composition. Urbanization, suburbanization, and internal and international migration. The influence of class, race, gender, and ethnicity. GER:DB-SocSci
5 units, not given this year (Klein, H)

LATIN AMERICA

See also 70 and 71S.

HISTORY 273. The European Expansion — The relationship between European monarchical and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.
5 units, not given this year (Hertzog, T)

HISTORY 273A. The Comparative Histories of the Hispanic Caribbean — (Same as 373A.) Cuba, the Dominican Republic, and Puerto Rico from the colonial period through the present. Social, economic, political, cultural, and demographic transformations in comparative perspective.
5 units, Aut (Staff)

HISTORY 275. Slavery in the Americas — (Same as 375.) Recent research and debate on the economy and demography of slavery, and the nature of slave life and culture. Focus is on Brazil, Cuba, and the U.S. in the 19th century. Readings from principal scholars in the field.
5 units, Aut (Staff)

HISTORY 275f. Social Change in Latin America Since 1900 — (Same as 375F, LATINAM 201/301.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fullfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master’s students. GER:DB-SocSci
5 units, Win (Klein, H)
HISTORY 276. Modern Brazil — (Same as 376.) From independence in 1822 to the present. Social and cultural history. Literary and historical sources. 5 units, Win (Frank, Z)

HISTORY 277F. Marranos, Conversos, and Crypto-Jews in Latin America, 16th-20th Centuries — (Same as 377F.) Sources include cases brought before the Spanish and Portuguese inquisitions in the Old and New World from the 16th-18th centuries, and results of field work conducted in contemporary Brazil among present-day Marranos. Marranism and the emergence of modernity in the West. The roles of history in anthropology and anthropology in history. 5 units, Win (Staff)

HISTORY 277H. Political Citizenship and the Formation of the Latin American Republics — (Same as 377H.) Construction of public opinion; development of public spheres; debates on education, ethnicity, and taxation; and the figure of the citizen in arms and role of militias in the polity. Comparisons with other areas of the world. 5 units, Spr (Staff)

HISTORY 278. Problems of Governance and Economic Growth in Mexico: From the Aztecs to NAFTA — Political and economic institutions of Mexico. Emphasis is on the origins and economic consequences of authoritarianism. GER:DB-SocSci 5 units, not given this year (Haber, S)

HISTORY 278A. Logic of Authoritarian Government — (Same as 378A, POLISCI 346S.) If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments. 5 units, Win (Haber, S)

HISTORY 279. Latin American Development: Economy and Society, 1800-2000 — (Same as 379.) The newly independent nations of Latin America began the 19th century with economies roughly equal to, or even ahead of, the U.S. and Canada. What explains the economic gap that developed since 1900? Why are some Latin American nations rich and others poor? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice. GER:DB-SocSci, EC-GlobalCom 5 units, not given this year (Rodrigue, A)

MIDDLE EAST

See also 224A and IHUM 5A,B.

HISTORY 181B. The Middle East in the 20th Century — Formerly 187B.) The history of the Middle East since WW I, focusing on the eastern Arab world, Egypt, the Fertile Crescent, and the Arabian Peninsula (the mashriq), with some attention to Turkey, Iran, and Israel. GER:DB-SocSci, EC-GlobalCom 5 units, Spr (Weiss, M)

HISTORY 181C. Social and Cultural History of Modern Shi’ism — The influence of Shi’ism in colonial and postcolonial Middle Eastern countries such as Iran, Iraq, Lebanon, and Saudi Arabia. Survey of Islamic history and the doctrinal differences among Muslim sects. 5 units, Win (Staff)

HISTORY 281. Economic and Social History of the Modern Middle East — (Same as 381.) The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market are combined with possible case studies of Egypt, Iraq, and Palestine. GER:DB-SocSci 4-5 units, not given this year (Beinin, J)

HISTORY 284G. Crisis, Reform, and Statebuilding in the 19th-Century Ottoman Empire — Central moments and processes. Established views of the sick man of Europe, and recent studies of how 18th-century crises did not lead to terminal decline but to reforms that strengthened key realms of Ottoman state and society and paved the way for post-WW I changes in emerging Middle Eastern and Balkans states. Sources include historical monographs, primary sources, and historical fiction. 5 units, Aut (Downes, B)

JEWS HISTORICAL

See also 22S, 86S, 137, 229, and 277F.

HISTORY 185B. Jews in the Modern World — Possible themes: the restructuring of Jewish existence during the Enlightenment and legal emancipation at the end of the 18th century in W. Europe, the transformation of Jewish life in E. Europe under the authoritarian Russian regime, colonialism in the Sephardic world, new ideologies (Reform Judaism and Jewish nationalism), the persistence and renewal of anti-semitism, the destruction of European Jewry under the Nazis, new Jewish centers in the U.S., and the State of Israel. GER:DB-Hum, EC-GlobalCom 5 units, Spr (Zipperstein, S)

HISTORY 285E. Tradition in Crisis: Orthodox Judaism in Modern Times — (Same as 385E.) The recent resurgence of Orthodoxy, once thought to be a dying trend in Judaism. How Orthodoxy developed new ways to meet the challenge of modern times. Mid-18th century to the present. 5 units, Aut (Staff)

HISTORY 286. Jews and Muslims — (Same as 386.) The history of Jewish communities in the lands of Islam and their relations with the surrounding Muslim populations from the time of Muhammad to the 20th century. Topics: the place of Jews in Muslim societies, Jewish communal life, variation in the experience of communities in different Muslim lands, the impact of the West in the Modern period, the rise of nationalism, and the end of Jewish life in Muslim countries. GER:DB-Hum 5 units, not given this year (Rodrigue, A)

HISTORY 287E. The Transformation of Central European Jewry: Germany and Austria-Hungary, 1700-1880 — (Same as 387E.) The history of the Jews of the Habsburg Empire who constituted the second largest Jewish community in Europe in the modern era. Topics include: Habsburg Jewish modernization that distinguished it from its neighbors to the west such as Germany and France and to the east such as the Russian Empire; political, social, and cultural problems; court Jews; the enlightened absolutism of Joseph II; unique aspects of Habsburg Haskala, Reform, and Orthodoxy; the revolutions of 1848; religious schisms; the economic rise of Habsburg Jewry; and the metropolitan Jewries of Vienna and Budapest. 5 units, Aut (Staff)

COGNATE COURSES

RELIGST 264. Hasidism and Modernity 4 units, Win (Staff)

ASIA

See also 92A, B, 92S, and 93S.

HISTORY 191. East Asia in the Early Buddhist Age — Evolution of cities in imperial China through early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative examination of cases from European history. GER:DB-Hum, EC-GlobalCom 5 units, Win (Lewis, ME)

HISTORY 193. Late Imperial China — From the Tang-Song transition until the collapse of imperial order. The rise of absolutism and gentry society, and concomitant shifts in culture, gender relations, and the economy. The threat of steppe nomadism which produced the Mongol and Manchu
conquest dynasties. The last imperial dynasty, the Qing, which solved traditional problems but was confronted by new ones. How simultaneous disasters of internal rebellion and Western imperialist invasion destroyed the old order. GER:DB-Hum
5 units, not given this year (Sommer, M)

HISTORY 194B. Japan in the Age of the Samurai — From the Warring States Period to the Meiji Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community. GER:DB-Hum
5 units, not given this year (Wigen, K)

HISTORY 195. Introduction to Korean History and Culture — Ancient kingdoms to early modern dynasties: challenges of the modern transition, 1700s to mid-1900s; and contemporary issues. Topics include archeological records, philosophical and religious traditions, literature and the performing arts, international relations, socioeconomic change, immigration and Asian American experiences, gender issues, and popular and youth cultures. GER:DB-Hum, EC-GlobalCom
5 units, not given this year

HISTORY 195C. Modern Japanese History — Japan’s modern transformation from the late 19th century to the present. Topics include: the Meiji revolution; industrialization and social dislocation; the rise of democracy and empire; total war and US occupation; economic miracle and malaise; Japan as soft power; and politics of memory. Readings and films focus on the lived experience of ordinary men and women across social classes and regions. GER:DB-Hum, EC-GlobalCom
5 units, Win (Staff)

HISTORY 197. Southeast Asia: From Antiquity to the Modern Era — The history of SE Asia, comprising Indonesia, the Philippines, Malaysia, Singapore, Thailand, Vietnam, Burma, Cambodia, and Laos, from antiquity to the present. The spread of Indian cultural influences, the rise of indigenous states, and the emergence of globally linked trade networks. European colonization, economic transformation, the rise of nationalism, the development of the modern state, and the impact of globalization.
5 units, Win (Lewis, ME)

HISTORY 198. The History of Chinese Modernity — Major historical transformations in 20th-century China. Key temporal, spatial, and categorical concepts through which historical agents in China framed their actions and imbued them with meaning including nationhood, citizenship, gender, ethnicity, and revolution.
5 units, Aut (Mullaney, T)

HISTORY 291A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times — (Same as 391A.) The interplay in Asia between antiquity and modernity, civilization and nation state, and national versus colonial science. The recent excavation of artifacts and places associated with Asian civilization such as the terracotta warriors in China and Angkor Wat in Cambodia. How Asian states have grappled with modernity and colonialism as they simultaneously dug up their ancient pasts.
5 units, Spr (Mullaney, T)

HISTORY 291E. Maps, Borders, and Conflict in East Asia — (Same as 391E.) The nature of borders and border conflicts in N.E. Asia from the 17th to the early 20th century. Focus is on contact zones between China, Russia, Korea, and Japan. The geopolitical imperatives that drove states to map their terrain in variable ways. Cultural, diplomatic, and imperial contexts. European pressures and contributions to E. Asian cartography; the uses of maps in surveillance, diplomacy, identity, and war. Student projects focus on a contested border zone. GER:DB-SocSci
5 units, not given this year (Wigen, K)

HISTORY 292D. Japan in Asia, Asia in Japan — (Same as 392D.) How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia. GER:DB-SocSci
5 units, Spr (Staff)

HISTORY 293. Law and Society in Late Imperial China — (Same as 392B.) Connections between legal and social history. Ideology and practice, center and periphery, and state-society tensions and interactions. Readings introduce the work of major historians on concepts and problems in Ming-Qing history. GER:DB-Hum
5 units, not given this year (Sommer, M)

HISTORY 293J. Korean History and Culture through Film — Focus is on the last 1,000 years of Chinese history. Focus is on theoretical questions fundamental to women’s studies. How has the category of woman been shaped by culture and history? How has gender performance interacted with bodily disciplines and constraints such as medical, reproductive, and cosmetic technologies? How relevant is the experience of Western women to women elsewhere? By what standards should liberation be defined? Readings include primary sources in translation including fiction, memoirs, and oral histories of the Maoist era. GER:DB-Hum, EC-Gender
5 units, not given this year (Sommer, M)

HISTORY 295J. Chinese Women’s History — (Same as 395J.) The history of SE Asia, comprising Indonesia, the Philippines, Malaysia, Singapore, Thailand, Vietnam, Burma, Cambodia, and Laos, from antiquity to the present. The spread of Indian cultural influences, the rise of indigenous states, and the emergence of globally linked trade networks. European colonization, economic transformation, the rise of nationalism, the development of the modern state, and the impact of globalization.
5 units, Win (Lewis, ME)

HISTORY 297E. Meiji Japan — (Same as 397E.) The Meiji Restoration; founding of the state; modernization as westernization; rendering of traditions; the role of the imperial institution; popular rebellions; transformations of the samurai class and consciousness; religious movements; political dissent and repressions; gender; social problems; autobiographies; the births of cultural, historical consciousness, and modern sciences; Sino-Japanese and Russo-Japanese wars, and imperialist transformations in the late Meiji. Primary and secondary source material.
5 units, Win (Staff)

HISTORY 298A. Modernizing Women in Japan — (Same as 398A.) Women as objects and agents of experiments in social change in the modern world. Focus is on issues raised by modernizing Japanese women from the late 19th- to the 20th-centuries. Sources include film, fiction, journalism, essays, diaries, and secondary works. Research paper using primary sources. Recommended: coursework on Japan or gender. GER:DB-Hum, EC-Gender
5 units, not given this year (Wigen, K)

INDIVIDUAL WORK

HISTORY 299A,B,C. Senior Research — WIM
1-5 units, Aut, Win, Spr (Staff)

HISTORY 299H. Junior Honors Colloquium
5 units, Win (Winterer, C)

HISTORY 299M. Undergraduate Directed Research: Martin Luther King, Jr., Research and Education Institute — May be repeated for credit.
1-4 units, Aut, Win, Spr (Staff)
HISTORY 299S. Undergraduate Directed Research and Writing — May be repeated for credit. WIM
1-5 units, Aut, Win, Spr, Sum (Staff)

HISTORY 299W. Undergraduate Directed Writing — May be repeated for credit. WIM
1-5 units, Aut, Win, Spr, Sum (Staff)

HISTORY 299X. Design and Methodology for International Field Research — (Same as 399A.)
1 unit, Spr (Kollmann, N; Roberts, R)

GRADUATE

Graduate History courses are listed in the following subsection order:
Required Colloquia, Workshops, and Seminars: 300-305, 400-405
Ancient and Medieval Europe: 311-319, 411-419
Eastern Europe, Russia, and Eurasia: 320-329, 320-329
Early Modern and Modern Europe: 330-339
History of Science and Technology: 340-344, 440-444
Africa: 345-349, 445-449
United States: 351-369, 451-469
Latin America: 370-379, 470-479
Middle East: 380-384, 480-484
Jewish History: 385-389, 485-489
Asia: 390-398, 490-498
Individual Study: 399, 499

REQUIRED COLLOQUIA, WORKSHOPS, SEMINARS

HISTORY 304. Approaches to History — Required of first-year History Ph.D. students.
5 units, Aut (Baker, K)

HISTORY 305. Graduate Workshop in Teaching — Teaching, lecturing, and curriculum development.
1 unit, Spr (Kollmann, N; Roberts, R)

INTERNATIONAL, GLOBAL, AND THEMATIC

See also 399A.

HISTORY 303A. Theories of the State from the Ancient World to the Present — (Same as 203A.)
5 units, Win (Baker, K; Sheehan, J)

HISTORY 305B. Quantitative Methods in Historical Research — (Same as 205B.)
5 units, Win (Klein, H)

HISTORY 306E. International History and International Relations Theory — (Same as 202, POLISCI 316.)
5 units, Win (Holloway, D)

HISTORY 307A. Legal History Workshop — (Same as LAW 372.)
Faculty and students from the Law School and the History Department discuss research in the field of legal history. Guest speakers. Secondary literature relevant to the speaker’s research.
5 units, Win (Herzog, T; Kessler, A)

HISTORY 307E. Origins of Totalitarianism — Modern revolutionary and totalitarian politics. Sources include monographs on the medieval, Reformation, French Revolutionary, and Great War eras. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities.
5 units, not given this year (Weiner, A)

HISTORY 308. Biography and History — (Same as 207.)
5 units, not given this year (Zipperstein, S)

HISTORY 309E. History Meets Geography — Focus is on developing competence in GIS computer applications and applying it to historical problems. Previous experience with GIS not required. Recommended: complete the GIS tutorial in Branner Library before the course starts.
5 units, Spr (Frank, Z)

HISTORY 309F. Historical Geography: Maps in the Early Modern World — (Same as 205.)
5 units, not given this year (Wigen, K)

ANCIENT AND MEDIEVAL EUROPE

HISTORY 311. Homer and Greek Religion — (Same as CLASSGEN 216.) The relationship between poetic representation and archaeological record; development of polis ideology: ritual, topography, and language as religious expressions; and the meaning of religion as a cultural category.
4-5 units, Aut (Martin, R; Morris, I)

HISTORY 312. Holy Wars: Medieval Perspectives — (Same as 212.)
5 units, Spr (Buc, P)

HISTORY 313. Core Colloquium in Medieval European History
4-5 units, Aut (Buc, P)

HISTORY 316. Medieval Antisemitism — (Same as 216.)
5 units, not given this year (Buc, P)

HISTORY 317B. Spain in the Middle Ages: Islam, Judaism, and Christianity in Coexistence and Conflict — (Same as 217B.)
5 units, Win (Staff)

HISTORY 414A. Medieval History
4-5 units, not given this year (Miller, K)

HISTORY 414B. Medieval History
5 units, not given this year (Miller, K)

EASTERN EUROPE, RUSSIA, AND EURASIA

HISTORY 320G. Demons, Witches, and Priests: Religion and Popular Culture in Russia — (Same as 220G.)
5 units, Aut (Kollmann, J)

HISTORY 321A. Early Modern Russian Historiography
5 units, Aut (Kollmann, N)

HISTORY 321B. Imperial Russian Historiography
5 units, not given this year (Crews, R)

HISTORY 321C. Historiography of the Soviet Union — Major schools of interpretation of the Soviet phenomenon through works representative of a specific school, in chronological order, from the first major interpretation of the Soviet polity by Trotsky to postmodernist theories.
5 units, Win (Weiner, A)

HISTORY 321D. Women’s Activism in War and Peace — (Same as 221D.)
5 units, Spr (Jolluck, K)

HISTORY 322. Topics in Early Modern Russian History
5 units, not given this year (Crews, R)

HISTORY 323. Art and Ideas in 19th-Century Russia — (Same as 223.)
5 units, not given this year (Crews, R)

HISTORY 323B. Research Methodologies in Early Modern Russian History
5 units, not given this year (Kollmann, N)

HISTORY 324. Violence, Islam, and the State in Central Asia — (Same as 224.)
5 units, not given this year (Crews, R)

HISTORY 325. Class and Ethnicity in Modern Eurasia — (Same as 225.)
5 units, Spr (Weiner, A; Crews, R)

HISTORY 326G. Civilians and War in Modern Europe — (Same as 226G.)
5 units, Win (Knezevic, J)

HISTORY 326H. Nationalism in the Habsburg Empire, 1848-1918 — (Same as 226H.)
5 units, Spr (Knezevic, J)
HISTORY 327. East European Women and War in the 20th Century—(Same as 227.)
5 units, not given this year (Jolluck, K)

HISTORY 328. Circles of Hell: Poland in World War II—(Same as 228.)
5 units, not given this year (Jolluck, K)

HISTORY 329. Poles and Jews—(Same as 229.)
5 units, Win (Jolluck, K)

HISTORY 421A. Early Modern Russia
5 units, not given this year (Kollmann, N)

HISTORY 422A,B. Research Seminar on the History of the Russian Empire
4-5 units, not given this year (Crews, R)

HISTORY 424A,B. The Soviet Civilization—Socialist visions and practices of the organization of society and messianic politics; the Soviet understanding of mass violence, political and ethnic; and living space. Primary and secondary sources. Research paper or historiographical essay.
4-5 units, not given this year (Weiner, A)

HISTORY 425A,B. Graduate Research Seminar: Modern Eastern Europe—May be repeated for credit.
4-5 units, not given this year (Naimark, N)

EARLY MODERN AND MODERN EUROPE
See also 303A, 307A, and 387E.

HISTORY 330. Core Colloquium on Early Modern Europe: Europe and the Other—How Europeans treated those considered different during the medieval and the early modern period, inside and outside Europe. Religious heretics, peasants, women, Jews, and the inhabitants and authorities of foreign lands in the Old and Worlds. Goal is to link the construction of otherness to the formation of Europe.
5 units, Aut (Herzog, T)

HISTORY 331B. Core Colloquium on Modern Europe: The 19th Century—The major historical events and historiographical debates of the long 19th century from the French Revolution to WW I.
4-5 units, Aut (Daughton, J)

HISTORY 331C. Core Colloquium on Modern Europe—The historiography of 20th-century Europe. Topics include WW I, the Russian Revolution, National Socialism, and the EU.
4-5 units, not given this year (Sheehan, J)

HISTORY 331D. Core Colloquium on Modern Europe: Intellectual History
4-5 units, not given this year (Robinson, P)

HISTORY 332A. Power, Art, and Knowledge in Renaissance Italy—What were the defining features of the society that produced the idea and art of the Renaissance? The world of Leonardo, Machiavelli, and Michelangelo. The intersections of history, politics, art, and literature in the 15th and 16th centuries. The relationship between the Renaissance and the Reformation.
5 units, Win (Findlen, P)

HISTORY 332F. The Scientific Revolution—(Same as 2132F.)
5 units, not given this year (Findlen, P)

HISTORY 332G. When Worlds Collide: The Trial of Galileo—(Same as 232G.)
5 units, Spr (Findlen, P)

HISTORY 333. Religion and Politics in Early Modern England—English political and religious culture from the end of the Wars of the Roses to the Civil Wars of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the civil war.
5 units, not given this year (Como, D)

HISTORY 333C. Two British Revolutions—(Same as 233C.)
5 units, Win (Como, D)

HISTORY 334. Enlightenment Seminar—(Same as HUMNTIES 324.)
The Enlightenment as a philosophical, literary, and political movement. Themes include the origins and limits of knowledge and moral sentiment, the basis of citizenship, social engagement and political legitimacy, and relationships among religion, secularism, and the natural sciences. May be repeated for credit.
3-5 units, Aut (Riskin, J)

HISTORY 335. History of European Law, Medieval to Contemporary—(Same as 135.)
5 units, Win (Herzog, T)

HISTORY 335F. Europe and the Colonial Experience
5 units, not given this year (Daughton, J)

HISTORY 336. Modern France
5 units, not given this year (Daughton, J)

HISTORY 336E. Cultures of Violence in Twentieth-Century Europe—(Same as 236E.)
5 units, not given this year (Daughton, J)

HISTORY 338A. Modern Britain: Facing Europe and Empire, Part I—Influential approaches to problems in British, European, and imperial history. The 19th-century British experience and its relationship to Europe and empire. National identity, the industrial revolution, class formation, gender, liberalism, and state building. Goal is to prepare specialists and non-specialists for oral exams.
5 units, not given this year (Satia, P)

HISTORY 338B. Modern Britain: Facing Europe and Empire, Part II—Themes include empire and racism, the crisis of liberalism, the rise of the welfare state, national identity, the experience of total war, the politics of decline, and modernity and British culture.
5 units, Aut (Satia, P)

HISTORY 339D. Capital and Empire—(Same as 239D, HUMNTIES 191S.)
5 units, Spr (Satia, P)

HISTORY 339F. Empire and Information—(Same as 239F.)
5 units, not given this year (Satia, P)

HISTORY 430. Graduate Research Seminar: Early Modern Europe
4-5 units, Spr (Findlen, P)

HISTORY 432A. Graduate Research Seminar: The French Revolution
4-5 units, not given this year (Baker, K)

HISTORY 433A,B. European History
4-5 units, Win, Spr (Sheehan, J)

HISTORY 434A,B. Modern European History
4-5 units, not given this year (Robinson, P)

HISTORY 435. Digital Encyclopedia—(Same as FRENCH 345.)
The Encyclopédie of Diderot and d’Alembert as a monument of the Enlightenment that is rarely read or studied. Its social and political history. The online, digitized version of the Encyclopédie, its complex network of entries and ideas, and new research possibilities in the humanities made available by digitization.
5 units, Spr (Baker, K)

HISTORY 438. European History Workshop—All European history graduate students in residence register for this weekly workshop, at which dissertation chapters and prospectuses, papers, and grant proposals by students and faculty are read and discussed.
1 unit, Spr (Robinson, P)
HISTORY OF SCIENCE AND TECHNOLOGY
See also 332F and 334.

HISTORY 341G. History of the Senses—(Same as 241G, STS 134, STS 234.)
5 units, Spr (Riskin, J)

HISTORY 343G. Tobacco and Health in World History—(Same as 243G.)
5 units, Aut (Proctor, R)

HISTORY 344L. Theory and Practice of Feminism in Science—(Same as 244L.)
5 units, not given this year (Schiebinger, L)

HISTORY 443A. Human Origins: History, Evidence, and Controversy—(Same as 243S.)
5 units, not given this year (Proctor, R)

HISTORY 444C. The History of the Body in Science, Medicine, and Culture—(Same as 244C.)
5 units, Spr (Schiebinger, L)

AFRICA

HISTORY 345A. Core Colloquium: Precolonial Africa
4-5 units, Aut (Roberts, R)

HISTORY 345B. Core Colloquium African History: The Colonial Period
4-5 units, not given this year (Roberts, R)

HISTORY 347E. Health and Society in Africa—(Same as 245E.)
5 units, not given this year (Roberts, R)

HISTORY 348. Islam in Africa—(Same as 248.)
4-5 units, not given this year (Hanretta, S)

HISTORY 348D. Law and Colonialism in Africa—(Same as 245G.)
4-5 units, Win (Roberts, R)

HISTORY 349. History without Documents—(Same as 249.)
5 units, Spr (Hanretta, S)

HISTORY 445A.B. Research Seminar in African History—Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.
4-5 units, not given this year

HISTORY 447A.B. Intellectual and Cultural History in Modern Africa—(Same as 247S.)
4-5 units, not given this year (Hanretta, S)

HISTORY 448A.B. African Societies and Colonial States—(Same as 248S.)
5 units, A: Win, B: Spr (Roberts, R)

THE UNITED STATES

HISTORY 347. The Politics and Ethics of Modern Science and Technology—The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university.
5 units, not given this year (Bernstein, B)

HISTORY 352. Creating the American Republic—(Same as 251.)
5 units, not given this year (Rakove, J)

HISTORY 352B. History of American Law—(Same as LAW 318.) From the colonial period to the present. Topics include: slavery and race relations; the evolution of criminal justice and correctional systems; the growth of the legal profession; and the role of the legal system in the development of the economy. The relationship between developments in law and in the larger society. Undergraduates by consent of instructor.
5 units, Win (Friedman, L)

HISTORY 352G. Environmental History of Urban America—(Same as 252G.)
5 units, Aut (Rawson, M)

HISTORY 353A. Special Topics in American History: Comparative Colonialism, North and South America—Comparative methodologies in the study of history. May be repeated for credit.
5 units, Aut (Herzog, T; Winterer, C)

HISTORY 353B. Special Topics in American History: Gender, Race, and Sexuality—Historical writing about intersections of gender, race, and sexuality from late 18th to mid-20th century. Topics include the social construction of masculinities, racialization of sexual violence and disease, symbolic role of gender during the Cold War, and emergence of categories of identity such as homosexuality and transexuality. May be repeated for credit.
5 units, Win (Friedman, E)

HISTORY 353C. Special Topics in American History: U.S. Foreign Policy from the Atlantic Charter to the Neocons—May be repeated for credit.
5 units, Spr (Bernstein, B)

HISTORY 355. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis—(Same as 252.)
5 units, not given this year (Bernstein, B)

HISTORY 356. U.S.-China Relations: From the Opium War to Tiananmen—(Same as 256.)
5 units, Win (Chang, G)

HISTORY 358. History of Sexuality in the U.S.—(Formerly 265A; same as 258.)
5 units, Spr (Friedman, E)

HISTORY 365. New Research in Asian American History—(Same as 265.)
5 units, not given this year (Chang, G)

HISTORY 367F. The Suburban West—(Same as 267E.)
5 units, not given this year (O’Mara, M)

HISTORY 367G. Politics and Politicians in the American West—(Same as 268E.)
5 units, not given this year (O’Mara, M)

HISTORY 368D. The American West in Fiction and Film—(Same as 268D.)
5 units, Aut (Rawson, M)

HISTORY 376G. Demographic History of the U.S.—(Same as 276G.)
5 units, not given this year (Klein, H)

HISTORY 452A.B. U.S. Cultural and Intellectual History: 1750-1900—Major methods and issues. Goal is to produce a research paper based on primary sources suitable for inclusion in a doctoral dissertation or submission to a peer-reviewed scholarly journal. Topics include: compiling primary and secondary source bibliographies; primary and secondary source issues; and how to articulate an argument. Students produce a prospectus by the end of Winter Quarter. Spring Quarter meetings to discuss outlines, drafts, and problems, culminating in presentation of papers in scholarly conference format.
4-5 units, not given this year (Winterer, C)

HISTORY 455A.B. The Pacific World—Graduate research seminar. Focus is on movements across borders. Students produce a scholarly essay or dissertation chapter of publishable quality.
4-5 units, not given this year

5 units, not given this year (White, R)
HISTORY 460. America in the World — Ways to place American history in an international context. Comparative, transnational, diplomatic, and world systems are approaches to complete a research paper based on research into primary materials. Historical methodologies, research strategies, and essay projects.
5 units, Win (Chang, G)

HISTORY 461A.B. U.S. Women’s Family and Sexual History
4-5 units, not given this year (Freedman, E)

HISTORY 463A.B. Race, Ethnicity, and Class in the 20th Century
4-5 units, not given this year (Camarillo, A)

LATIN AMERICA

5 units, Aut (Staff)

HISTORY 375. Slavery in the Americas — (Same as 275.)
5 units, Aut (Staff)

HISTORY 375F. Social Change in Latin America Since 1900 — (Same as 275F, LATINAM 201/301.)
5 units, Win (Klein, H)

HISTORY 376. Modern Brazil — (Same as 276.)
5 units, Win (Frank, Z)

HISTORY 377F. Marranos, Conversos, and Crypto-Jews in Latin America, 16th-20th Centuries — (Same as 277F.)
5 units, Win (Staff)

HISTORY 377H. Political Citizenship and the Formation of the Latin American Republics — (Same as 277H.)
5 units, Spr (Staff)

HISTORY 378A. Logic of Authoritarian Government — (Same as 278A.)
5 units, Win (Haber, S)

HISTORY 378E. Political Economy of Development — (Same as POLISCI 440B.) Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.
5 units, Win (Haber, S)

HISTORY 379. Latin American Development: Economy and Society, 1800-2000 — (Same as 279.)
5 units, not given this year (Frank, Z)

MIDDLE EAST

HISTORY 381. Economic and Social History of the Modern Middle East — (Same as 281.)
4-5 units, not given this year (Beinin, J)

HISTORY 383. The New Global Economy, Oil, and Islamic Movements in the Middle East — The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market combined with case studies of Egypt, Iraq, and Palestine.
5 units, Win (Beinin)

HISTORY 481. Research Seminar on the Modern Middle East
3-5 units, not given this year (Beinin, J)

HISTORY 484. Ottoman/Turkish History
4-5 units, not given this year (Rodrique, A)

JEWS AND MUSLIMS
HISTORY 376. Modern Israel
5 units, not given this year (Zipperstein, S)

HISTORY 386. Jews and Muslims — (Same as 286.)
5 units, not given this year (Rodrique, A)

4-5 units, not given this year

HISTORY 387E. The Transformation of Central European Jewry: Germany and Austria-Hungary, 1700-1880 — (Same as 287E.)
5 units, Aut (Staff)

HISTORY 486A. Graduate Research Seminar in Jewish History
4-5 units, Spr (Zipperstein, S)

ASIA

HISTORY 390. Han Chinese and the Global White: The Production of Ethnoracial Majorities, East and West
5 units, Win (Mullaney, T)

HISTORY 391A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times — (Same as 291A.)
5 units, Spr (Mullaney, T)

HISTORY 391E. Maps, Borders, and Conflict in East Asia — (Same as 291E.)
5 units, not given this year (Wigen, K)

HISTORY 392B. Law and Society in Late Imperial China — (Same as 293.)
5 units, not given this year (Sommer, M)

HISTORY 392C. Key Topics in Qing History — Graduate colloquium. Goal is to provide the foundation of a field in Qing history for Ph.D. oral examinations; M.A. students also welcome. Issues include: the ethnic dimension of Qing imperialism; the imperial state’s relationship with the peasantry; economic and demographic dynamics; and the impact of Western imperialism.
5 units, not given this year (Sommer, M)

HISTORY 392D. Japan in Asia, Asia in Japan — (Same as 292D.)
5 units, Spr (Staff)

HISTORY 395J. Chinese Women’s History — (Same as 295J.)
5 units, not given this year (Sommer, M)

HISTORY 396A. Graduate Research Seminar in Jewish History
5 units, not given this year (Rodrique, A)

HISTORY 397E. Meiji Japan — (Same as 297E.)
5 units, Win (Staff)
HISTORY 398A. Modernizing Women in Japan — (Same as 298A.)  
5 units, not given this year (Wigen, K)

HISTORY 492. Society in Ancient and Medieval China — Proseminar on conducting research in ancient or medieval China. Focus is on the theme of the emotions of the period. Sources include theoretical and comparative materials in secondary literature and primary sources. Students present research paper to class.  
5 units, not given this year (Lewis, ME)

HISTORY 492A. The Family in Early China — Proseminar on conducting research.  
4-5 units, not given this year (Lewis, ME)

HISTORY 492B. Proseminar on Research in Early China: Origins of Technical Medicine in the Han Dynasty — How medicine as a technical, text-based art monopolized by specialists was established under the Han Dynasty in competition with practices aimed at nourishing life and securing longevity.  
4-5 units, Spr (Lewis, ME)

HISTORY 494. The Body in Early China  
5 units, not given this year (Lewis, ME)

HISTORY 495A,B. Qing Legal Documents — How to use Qing legal documents for research. Winter: sample documents that introduce the main genres including: the Qing code and commentaries; magistrates’ handbooks and published case collections; and case records from Chinese archives. Spring: class meets occasionally; students complete research papers. Prerequisite: advanced reading ability in Chinese.  
4-5 units, not given this year (Sommer, M)

HISTORY 496A. Research Seminar in Modern China: Shanghai through Visual and Textual Records — The use of historical sources such as guide books, photographs, maps, novels, and movies from the Republican era to examine Shanghai. Issues of methodology, interpretation, and historical narrative. Primary sources in English and Chinese.  
4-5 units, not given this year

INDIVIDUAL STUDY

HISTORY 399A. Design and Methodology for International Field Research — (Same as 299X.)  
1 unit, Spr (Kollmann, N; Roberts, R)

HISTORY 399W. Graduate Directed Reading  
1-10 units, Aut, Win, Spr, Sum (Staff)

HISTORY 499X. Graduate Research — Units by arrangement. May be repeated for credit.  
1-10 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

These courses are approved for the History major and taught overseas at the campus indicated. Students should discuss with their major advisors which courses would best meet individual needs. Descriptions are in the “Overseas Studies” section of this bulletin or at the Overseas Studies office, 126 Sweet Hall.

BEIJING

HISTORY 194V. Discovering Modern Chinese History in Beijing — (Same as OSPBEIJ 44.)  
4 units, Spr (Zhao, D)

HISTORY 198V. Wartime China: Chinese Nationalism and the Anti-Japanese War — (Same as OSPBEIJ 45.)  
5 units, Spr (Plum, M)

BERLIN

PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

Co-chairs: Michael Friedman (Philosophy), Paula Findlen (History)
Committee-in-Charge: Barton Bernstein (History), Joe Corn (History), Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History)
Program Committee: Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Londa Schiebinger (History)
Professors: Keith Baker (History), Barton Bernstein (History), Paula Findlen (History), Michael Friedman (Philosophy), David Holloway (History, Institute for International Studies, Political Science), Reviel Netz (Classics), Robert Proctor (History), Londa Schiebinger (History, Clayman Institute for Gender Research), Richard White (History), Helen Longino (Philosophy)
Associate Professors: Jessica Riskin (History)
Assistant Professors: Sarah Jain (Cultural and Social Anthropology), Caroline Winterer (History)
Professor (Research): Rega Wood (Philosophy)
Senior Lecturer: Joseph Corn (History)
Lecturer: Tom Ryckman (Philosophy), Margo Horn (Feminist Studies)
Other Affiliation: Henry Lowood (Stanford University Libraries), Audrey Shafer (Anesthesiology), Larry Zaroff (Anesthesiology)
Fellow: Claudia Brosseder
Mail Code: 94305-2024
Email: rogers@stanford.edu
Web Site: http://HPST.stanford.edu

The Program in History and Philosophy of Science and Technology (HPST) is an interdisciplinary program focusing on historical and contemporary aspects of science, medicine, and technology. Graduate degrees at the doctoral level are offered through the departments of History and Philosophy; master’s degrees are offered through affiliated departments and programs, principally Classics, Cultural and Social Anthropology, English, and Modern Thought and Literature. The program’s courses span the period from antiquity to the late 20th century, with emphasis on: ancient science; Renaissance science; the scientific revolution; Enlightenment and transatlantic science; history of medicine and the body; history and philosophy of biology; history and philosophy of modern physics; history of the philosophy of science in the modern period; and gender, science, and technology. These courses are designed for students looking for a humanistic perspective on the sciences and for those trying to understand the relationship of the sciences to humanistic knowledge.

Stanford has unique resources for the history and philosophy of science. Situated in the heart of Silicon Valley at an institution with a long and distinguished tradition in many sciences, the University is surrounded by archives for the recent history of science and technology. Stanford University Libraries has rich holdings in Special Collections for the Scientific Revolution, as well as the modern and contemporary study of science and technology. The University is in close proximity to the California Academy of Sciences, the Exploratorium, the Computer History Museum, and the Tech Museum. Graduate students can take advantage of faculty, classes, and archives at UC Berkeley through Stanford's exchange program.

The core of the community is the colloquium series which brings together faculty and students several times a quarter to discuss the work of invited speakers on topics of broad concerns to science and technology studies.

UNDERGRADUATE DEGREES

Students who wish to pursue the history and philosophy of science and technology should consider a major in one of the following: the Department of History which offers an interdisciplinary track in History, Science, and Medicine; the Department of Philosophy which offers a degree field in History and Philosophy of Science; or the Program in Human Biology where a student can craft their own area of concentration in the History of Science and Medicine. Course work in science, technology, and medicine or in ancient science and philosophy can be arranged with the departments of Cultural and Social Anthropology and Classics respectively. Alternatively, students may consult with a member of the committee-in-charge to construct an Individually Designed Major. The major must conform to the requirements for Individually Designed Majors; see the “Individually Designed Majors” section of the bulletin.

GRADUATE DEGREES

Students can pursue a Ph.D. specializing in the history and philosophy of science and technology through the departments of History and Philosophy. Students can pursue an M.A. specializing in the history and philosophy of science and technology through any of the participating departments and programs. In addition, students may also participate in the HPST program on a non-degree basis. Students should consult departmental descriptions for the details of graduate degree requirements specific to their main department. They are also encouraged to design an interdisciplinary component in their program of studies, drawing on the most relevant classes across the humanities, sciences, and engineering which allow them to connect their discipline-specific work to a broader understanding of science and technology as historical and contemporary phenomena. Prospective students should work closely with their advisers in developing this aspect of their program of studies.

COURSES

INTRODUCTORY

HPS 60. Introduction to Philosophy of Science—(Same as PHIL 60.) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:DB-Hum
5 units, Aut (Longino, H)

HPS 61. Philosophy and the Scientific Revolution—(Same as PHIL 61.) The relationship between the scientific revolution of the 17th century that resulted in the birth of modern science and the contemporaneous intellectual developments constituting the birth of modern philosophy. Readings focus on Galileo and Descartes. GER:DB-Hum
5 units, not given this year (Friedman, M)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

HISTORY 44N. The History of Women and Gender in Science, Medicine, and Engineering
4 units, Win (Schiebinger, L)

PHIL 16N. Values and Objectivity
3 units, Aut (Ryckman, T)

CLASSGEN 16. Eureka! Archimedes and his Science
3-5 units, Win (Netz, R)

SCIENCE IN HISTORY

This sequence is designed to introduce students to fundamental aspects of the history of science from antiquity to the 20th century. Students concentrating in the history of science are advised to take most or all of this sequence as a core foundation.
COGNATE COURSES
HISTORY 40S. Dinosaurs, Sea Serpents, and Abominable Snowmen: Unknown Animals in Modern History
5 units, Aut (Roberts, P)

HISTORY 42S. Climate Science in the 20th Century: A History
5 units, Spr (Howe, J)

CLASSGEN 133. Invention of Science
3-5 units, Aut (Netz, R)

HISTORY 232F/332F. The Scientific Revolution
5 units, not given this year (Findlen, P)

MEDICINE IN HISTORY
This sequence is designed to introduce students to fundamental aspects of the history of medicine from antiquity to the 20th century. Students concentrating in the history of medicine are advised to take most or all of this sequence as a core foundation.

COGNATE COURSES
HISTORY 243G/343G. Tobacco and Health in World History
5 units, Aut (Proctor, R)

PHILOSOPHICAL PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY
This sequence is designed to introduce students to fundamental aspects of the philosophy of science. Students concentrating in the philosophy of science are advised to take HPS 60 above as a starting point, and combine a number of the electives listed below in conjunction with courses in the other concentrations that address their specific interests.

COGNATE COURSES
PHIL 107/207. Plato and Heraclitus
3 units, Spr (Moravcsik, J)

PHIL 115/215. Foundations of Medieval Psychology
3-5 units, Aut (Wood, R)

PHIL 163/263. Significant Figures in Philosophy of Science
4 units, Win (Ryckman, T)

PHIL 164/264. Central Topics in the Philosophy of Science: Theory and Evidence
4 units, not given this year

PHIL 165/265. Philosophy of Physics
4 units, Aut (Ryckman, T)

PHIL 167A/267A. Philosophy of Biology
4 units, not given this year

PHIL 167B/267B. Philosophy, Biology, and Behavior
4 units, not given this year

PHIL 184F/284F. Feminist Theories of Knowledge — (Same as FEMST 166.)
4 units, Spr (Longino, H)

PHIL 189. Philosophical Applications of Cognitive Science
4 units, not given this year

PHIL 224. Kant’s Philosophy of Physical Science
4 units, not given this year (Friedman, M)

PHIL 360. Core Seminar in Philosophy of Science
4 units, Spr (Longino, H)

PHIL 365. Seminar in Philosophy of Science: Structural Realism
4 units, not given this year (Ryckman, T)

ADVANCED
HISTORICAL PERSPECTIVES ON SCIENCE
The following courses focus on specific episodes in or approaches to the history of science.

HPS 152. Witchcraft, Magic and the Occult in Early Modern Europe and the Americas — What was the witch craze about, and how was it related to magic? Farmers and townspeople, and prominent European intellectuals of the age, who wrote about magic and witchcraft. How Old World ideas translated to Spanish Latin America and New England. How and why European concepts of magic and witchcraft reshaped in the New World.
5 units, Spr (Brosseder, C)

COGNATE COURSES
CLASSGEN 213. The Poetics of Ancient Science
3-5 units, Aut (Netz, R)

HISTORY 232G/332G. When Worlds Collide: The Trial of Galileo
5 units, Spr (Findlen, P)

HISTORY 241G/341G. History of the Senses — (Same as STS 134/234.)
5 units, Spr (Riskin, J)

STS 125/225. Science, Technology, and Art: The Worlds of Leonardo — (Same as HISTORY 31.)
5 units, Win (Findlen, P)

5 units, not given this year (Proctor, R)

CONTEMPORARY PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY
The following courses focus on contemporary cultural and social science approaches to science, technology, and medicine.

HPS 199. Directed Reading
1-15 units, Aut, Win, Spr, Sum (Staff)

HPS 201. HPST Colloquium — Several meetings per quarter to discuss the work of speakers on topics of broad concerns to science and technology studies. Required of students in the program. See http://hpst.stanford.edu/colloquia.html for times and locations. May be repeated for credit.
1 unit, Aut, Win, Spr (Staff)

HPS 299. Graduate Individual Work — May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES
CASIA 132. Science, Technology, and Gender
3-5 units, Spr (Jain, S)

FEMST 244. History of Women and Medicine in the United States
5 units, Aut (Horn, M)

HISTORY 141. Minds and Worlds from Aristotle to Newton to Einstein
5 units, Spr (Riskin, J)

HISTORY 241S. Science and Culture Wars
5 units, Win (Riskin, J)

HISTORY 244C/444C. The History of the Body in Science, Medicine, and Culture
5 units, Spr (Schiebinger, L)

HISTORY 244L/344L. Theory and Practice of Feminism in Science
5 units, not given this year (Schiebinger, L)

HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts
4 units, Aut (Zaroff, L)

STS 145. History of Computer Game Design: Technology, Culture, and Business
4 units, not given this year (Lowood, H)
The Program seeks: (a) to provide a broad and rigorous introduction to the biological and behavioral sciences and their interrelationships, and (b) to explore how this knowledge, in conjunction with studies in other fields, can be applied to analyze and formulate health, environmental, and other public policies that influence human welfare. To achieve these goals, all students complete a 30-unit core sequence, normally in the sophomore year, that provides the foundation for the major. Also, during the sophomore year, students consult with student advisers to choose a faculty adviser and complete the declaration process. Together they plan a roadmap of course work designed to help each student focus on an area of interest within Human Biology. Early planning and subsequent refining of an individualized course of study, in consultation with student and faculty advisers, is a strength and requirement of the program. The curriculum draws on faculty from across the University. To complete a B.A. in Human Biology, students must take courses from within the program and from other University departments. Most Human Biology majors go on to advanced training in professional schools, or graduate programs in the behavioral, natural, and social sciences, including coterminal master’s degree programs in other University departments. Additional information about the major may be obtained from the program’s offices or at http://humbio.stanford.edu.

UNDERGRADUATE PROGRAMS
BACHELOR OF ARTS

The B.A. in Human Biology (HUMBIO) requires a minimum of 84 units in the major divided among four levels of courses:

1. **Fundamental Program:** at least 38 units, to include
   - Human Biology Core (30 units)
   - Statistics (4-5 units)
   - Internship (HUMBIO 197; 4 units)

   The Human Biology Core refers to HUMBIO 2A and 2B, 3A and 3B, and 4A and 4B. See “Required Core” below for more information. HUMBIO 4B fulfills the policy requirement of the major. Statistics may be selected from courses such as STATS 60 or 141, PSYCH 10, SOC 181B, and BIOSCI 141. For questions about other statistics courses that might fulfill this requirement, see the program office. The core and statistics courses must be taken for a letter grade by majors. The internship requirement, an independent field experience project, is graded satisfactory/no credit only.

2. **Foundation Courses:** 20-unit minimum. Total units vary, depending on the focus of study selected by the student for the area of concentration. They may include introductory-level courses from across the University and lab courses. A maximum of 10 premed units (from the chemistry, physics, and calculus series, and biology lab courses) are allowed.

3. **Area of Concentration:** a minimum of five courses totaling at least 20 units. This in-depth area of study enables the student to focus on educational and post-baccalaureate goals. Courses are non-introductory, theory-based, and are usually numbered over 100. Three or more departments must be represented in the concentration. Each course must be taken for a minimum of 3 units. Final approval of the concentration rests with the student advisers and faculty adviser. All area of concentration courses must be taken for a letter grade. Examples of numerous possible areas of concentration are available in the program’s student advisers’ office or at http://humbio.stanford.edu/undergraduate_areas.html.

4. **Upper-Division Courses:** students must take three Human Biology upper-division courses numbered 100 to 189. These courses should be used to explore subjects outside the area of concentration. One upper-division course may be taken satisfactory/no credit. Each course must be taken for a minimum of 3 units. All non-laboratory advanced HUMBIO courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement, including those listed as cognate courses from another department.

A prospective major must consult with the student and faculty advisers to obtain detailed information about the program and guidance in the development of an individual course of study. At the time the major...
is declared, the student must submit a written statement (3-5 pages) of academic and long-term goals and the proposed list of courses satisfying the requirements for the major. The proposal is then reviewed by the student advisers who help identify an appropriate faculty adviser. Final approval of the proposed course of study rests with the faculty adviser. It is important to declare early, preferably by the end of Spring Quarter of the sophomore year, but not later than the end of Autumn Quarter of the junior year; students must petition the director to declare later than Autumn Quarter of the junior year. Petitions to declare late require additional documentation and are less likely to be approved.

Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

MINORS

A minor in Human Biology provides an introductory background to the relationship between the biological and social aspects of humanity’s origin, development, and prospects. Many of the major problems facing human civilization today involve both biological and social aspects. Scientific approaches to these problems are essential, but they must be broadly conceived, integrating what we know of the biological with an understanding of the social and cultural setting in which they exist. Students with a minor in Human Biology will have a strong background in the integration between the biological and social aspects of humans. To minor in Human Biology, students must take the core curriculum (HUMBIO 2A, 2B, 3A, 3B, 4A, and 4B) and one additional upper-division course (for example, any course offering by Human Biology numbered 100-189). These must be taken for a minimum letter grade of ‘C-’. Courses that count towards the fulfillment of major requirements may not be counted towards the minor. Students declaring a minor in Human Biology must do so no later than two quarters prior to their intended quarter of degree conferral (for example, a student must declare a minor before the end of the Autumn Quarter to graduate the following Spring Quarter).

HONORS PROGRAM

The honors program in Human Biology affords qualified majors the opportunity to work closely with faculty on an individual research project, culminating in an honors thesis. Students may begin honors research from a number of starting points including: topics introduced in the core or upper-division courses; independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences. Students may apply to the honors program once they have completed the Human Biology core, have an overall Stanford grade point average (GPA) of 3.2, and meet other requirements detailed in the honors handbook. Interested students should consult resources in the Human Biology office including the Human Biology Honors Handbook, the honors program application available from the student services office, and appointments during office hours with the Human Biology honors chair. Courses of interest to honors students include: HUMBIO 193, Research in Human Biology, and HUMBIO 194, Honors. Most honors projects involve a total of 10-15 units of course work in HUMBIO 193 and 194. Admission to the honors program is by application in April of the junior year. Students planning to undertake honors begin research or preparation as early as completion of the sophomore year. The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Each honors student then presents a brief summary of honors research at the Human Biology Honors Symposium in May. Human Biology also holds a Summer Honors College just prior to Autumn Quarter each year for students who have applied to the honors program. Students apply to Summer Honors College in April of the junior year. For applications, contact the program office.

STOREY HOUSE

Storey House, 544 Lasuen Mall, is an undergraduate residence for the Human Biology Academic Theme House, devoted to developing an intellectual community among Human Biology majors at Stanford, and allowing faculty and students to become acquainted and share their Human Biology interests and research. Its goals are to foster intellectual discussion in the residential lives of the students living in Storey House, mentoring relationships between upperclassmen and core students in the house, and stimulating events for all Human Biology majors facilitated by academic theme associates. Assignment is made through the regular undergraduate housing draw.

STUDENT ADVISERS

Human Biology has an advising program comprising faculty and student advisers. Before declaring Human Biology as their undergraduate major, each student must meet with one of six student advisers who assist them in developing a coherent study plan based on an individualized area of concentration, and the selection of foundation, concentration, and upper-division courses. They also assist students in selecting an appropriate faculty adviser and a suitable internship for their area of concentration and career goals. Student advisers offer drop-in services during scheduled office hours every weekday and some evenings. The student advisers also sponsor events including the Internship Faire, the Advising Extravaganza, and Beyond Hum Bio. To maintain high standards of advising that respond to the needs of individual students, student advisers meet weekly with the program’s faculty advising chairs and the student services coordinator to review the program’s policies and specific student inquiries and petitions concerning the program.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. AU indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

The faculty and staff of Human Biology prepare a student handbook, on the web at http://humbio.stanford.edu/, that provides a detailed description of the Human Biology major and outlines possible areas of concentration. It reflects the most up-to-date information for the academic year and is the definitive guide for Human Biology majors.

REQUIRED CORE

Required core sequences (2A,B, 3A,B, and 4A,B) introduce the biological and social sciences, and most importantly, relationships between the two. Classes meet throughout the academic year. Students must register concurrently for the A and B series and take the core in sequence. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are not permitted to enroll. Majors must earn a minimum letter grade of ‘C-‘ in core courses.

HUMBIO 2A,B. Genetics, Evolution, and Ecology: Culture, Evolution, and Society

HUMBIO 2A. Genetics, Evolution, and Ecology — Introduction to the principles of classical and modern genetics, evolutionary theory, and population biology, Topics: micro- and macro-evolution, population and molecular genetics, population dynamics, and community ecology, emphasizing the genetics of the evolutionary process and applications to human populations. GER: DB-NatSci

5 units, Aut (Boggs, C; Durham, W)

HUMBIO 2B. Culture, Evolution, and Society — Introduction to the evolutionary study of human diversity. Hominid evolution, the origins of social complexity, social theory, and the emergence of the modern world system, emphasizing the concept of culture and its influence on human differences. GER: DB-SocSci

5 units, Aut (Klein, R; Wolf, A)
HUMBIO 3A.B. Cell and Developmental Biology: Behavior and Its Development

HUMBIO 3A. Cell and Developmental Biology — The principles of the biology of cells: principles of human developmental biology, biochemistry of energetics and metabolism, the nature of membranes and organelles, hormone action and signal transduction in normal and diseased states (diabetes, cancer, auto-immune diseases), drug discovery, immunology, and drug addiction. GER: DB-NatSci
5 units, Win (Fuller, M; Kaiser, D; Nusse, R; Scott, M; Talbot, W)

HUMBIO 3B. Behavior and Its Development — (Formerly 4B.) Research and theory on human behavior and life span development. How biological factors and cultural practices influence cognition, emotion, motivation, personality, and psychopathological disorders in childhood, adolescence, and adulthood. GER: DB-SocSci
5 units, Win (Lyons, D; Fernald, A)

HUMBIO 4A.B. The Human Organism: Environmental and Health Policy Analysis

HUMBIO 4A. The Human Organism — Organ system physiology: the principles of neurobiology and endocrinology, and the functions of body organs. The mechanisms of control, regulation, and integration of organ systems function. GER: DB-NatSci
5 units, Spr (Heller, C; Fernald, R)

HUMBIO 4B. Environmental and Health Policy Analysis — (Formerly 3B.) Connections among the life sciences, social sciences, public health, and public policy. The economic, social, and institutional factors that underlie environmental degradation, the incidence of disease, and inequalities in health status and access to health care. Public policies to address these problems. Topics include pollution regulation, climate change policy, biodiversity protection, health care reform, health disparities, and women’s health policy. WIM
5 units, Spr (Gould, L; Barr, D)

ADDITIONAL INTRODUCTORY OFFERINGS

HUMBIO 2C. Introductory Chemistry Seminar — For students who need a refresher course in basic chemistry and biochemistry, who have not previously enrolled in chemistry classes, or who do not have an extensive chemistry background. Preparation for biochemistry in the Human Biology core.
1 unit, Aut (Siegel, R)

HUMBIO 3Y. Practicum in Child Development — Practical experience at Bing Nursery School for 3.5 hours per week. Pre- or corequisite: 3B. (AU)
1 unit, Win (Fernald, A)

HUMBIO 6. Human Origins — (Same as ANTHSCI 6/206.) The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them. GER: DB-NatSci
5 units, Win (Klein, R)

HUMBIO 14. Introduction to Anthropological Genetics — (Same as ANTHSCI 14.) How genetic methods address anthropological questions. Examples include the evolutionary relationships between humans and the apes, the place of the Neanderthals in human evolution, the peopling of the New World, ancient DNA, the genetics of ethnicity, forensic genetics, genomics, behavioral genetics, and hereditary diseases. GER: DB-NatSci
3-5 units, Spr (DeGusta, D)

HUMBIO 21. Introduction to Brain and Behavior — (Same as BIOSCI 20.) Evolutionary principles to understand how the brain regulates behavior, described in physiological terms, and is influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities. GER: DB-NatSci
3 units, Aut (Fernald, R), alternate years, not given next year

HUMBIO 25. Human Ecology of the Amazon — (Same as ANTHSCI 25.) The diversity of peoples and cultures in the Amazon Basin and the ecosystems in which they live. Themes in ecological anthropology of Amazonia including limiting factors, the protein debate, indigenous knowledge and resource management, and anthropogenic modification. Ethnographic, historical, and archeological evidence. GER:DB-GlobCom
5 units, not given this year

HUMBIO 27. Traditional Chinese Medicine — The philosophy and history behind traditional Chinese medicine. Concepts such as Qi, Yin/Yang, meridians, Chinese organs, and the 5 elements. How these concepts are applied through techniques such as acupuncture, herbal medicine, Qi gong, and massage. How traditional Chinese medicine is understood from a scientific standpoint. Political and socioeconomic implications. Observation of an acupuncturist. Readings on the integration of Eastern and Western medicine and on traditional Chinese medicine.
1 unit, not given this year (Siegel, R)

HUMBIO 42C. Alternative Spring Break: AIDS and HIV in San Francisco — (Formerly 142C.) Preparation for the alternative Spring Break trip in which students visit and volunteer at HIV support organizations. Background on HIV and its impact on the San Francisco community.
1 unit, not given this year (Siegel, R)

HUMBIO 42G. Post-Field Seminar: A Practical Next Step for Students Returning from Abroad — (Formerly 142G.) Forum for students who have recently worked abroad for two months or longer to share what they learned through international research, internship, or volunteer work. Lecture component connects international experiences with at-home activism and helps students explore directions for future work, either domestically or internationally, that builds on their experiences abroad. Students create a final product to benefit the community in which they worked and/or be used as an educational tool locally. Focus is on a practical next step for students interested in international development and related fields.
1 unit, Aut (Siegel, R)

HUMBIO 82A. Qualitative Research Methodology — Goal is to develop knowledge and skills for designing and conducting qualitative research studies including purposes, conceptual contexts, research questions, methods, validity issues, and interactions among these facets. Each student designs a qualitative research study.
3 units, Win (Wolf, J)

HUMBIO 82B. Advanced Data Analysis in Qualitative Research — For students writing up their own qualitative research. Students prepare a complete draft presenting their own qualitative research study including results, with reports drafted section by section, week by week. Class provides feedback, guidance, support.
1-3 units, Aut (Wolf, J)

STANFORD INTRODUCTORY SEMINARS

HUMBIO 84Q. Social Justice, Responsibility, Health — Stanford Introductory Seminar. Preference to sophomores. Reducing health disparities among segments of the US population is an over-arching goal of the Centers for Disease Control and Prevention (CDC). Evidence for and cause of existing health disparities; criteria for calling a health disparity unjust; and assignment of responsibility for maintaining or recovering good health.
4 units, Aut (Heaney, C)

HUMBIO 86Q. Love: An Exploration — Stanford Introductory Seminar. Preference to sophomores. Biological, psychological, religious, social and cultural perspectives on the concept of love. How love is conceptualized across cultures; love as the basis of many religions; different kinds of love; the biology of love; love as sickness; love and sex; the languages of love including art, literature, music, and poetry. Emphasis is on writing. Oral presentation.
3 units, Spr (Murray, A)
HUMBIO 87Q. Women and Aging — (Same as MED 87Q.) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER: EC-Gender
3 units, Win (Winograd, C)

HUMBIO 88Q. Neuroethics: Neurotechnology, Free Will, and the Privacy of Human Thought — Stanford Introductory Seminar. Preference to sophomores. Focus is on neurotechnology and pharmacology for imaging and manipulating the brain. Free will, moral responsibility, and the privacy of human thought. What can be done versus what should be done with pioneering neurotechnologies in research, clinical medicine, and in the public arena including education, athletics, and law.
3 units, Spr (Illes Van Der Loos, J)

HUMBIO 91Q. Neuroethology: The Neural Control of Behavior — Stanford Introductory Seminar. Preference to sophomores. Animal behavior offers insights about evolutionary adaptations. The origins of the study of animal behavior and its development to the present. Discussion of original research papers. The use and misuse of parallels between animal and human behavior. Possible field trips to observe animals in their natural habitat. GER: DB-NatSci
3 units, Aut (Fernald, R)

3 units, Aut (Heller, G)

HUMBIO 95Q. Gender, Culture, and HIV/AIDS — Stanford Introductory Seminar. Preference to sophomores. Issues include biological, social, cultural, psychological, economic, and political aspects of HIV/AIDS. Introduction to research methods and grant-proposal writing skills. Student presentations. Prerequisite: PWR 1. GER: EC-Gender, WRITE-2
4 units, Win (Brown, N)

HUMBIO 96Q. The Death Penalty: Policy, Philosophy, and Controversy — Stanford Introductory Seminar. Preference to sophomores. Students participate in forensic research and case investigation, including DNA evidence, psychological and physiological development, mental and physical disabilities, and witness interviews. The philosophy, structure, and application of capital punishment in the U.S. Goal is to examine, understand, and challenge the issues involved in the death penalty from the perspective of involvement in a real case. Course not taught from a preconceived belief or political or philosophical agenda except to involve students in an intellectual challenge of policy and philosophy.
3-4 units, Spr (Abrams, W)

HUMBIO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine — (Same as ORTHO 97Q.) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women’s issues, fitness and health, and sports science. Case studies.
3 units, Spr (Matheson, G)

HUMBIO 99Q. Becoming a Doctor: Readings from Medical School, Medical Training, Medical Practice — Stanford Introductory Seminar. For students considering medicine as a career. Goal is to acquaint students with medical school, training in medicine and surgery, and the practice of medicine and surgery. Topics include: how to pick a medical school and a residency; how medicine affects family life, especially children; the differences between surgical and medical specialties; the advantages and disadvantages among academic/teaching, pure research, group practice, HMO, hospital staff, or private practice; malpractice concerns; and financial considerations.
4 units, Aut (Zaroff, L)

ADVANCED

Open to non-majors with the proper prerequisites. Human Biology majors have preference when enrollment is restricted. Courses numbered 100 through 189 fulfill the Human Biology upper-division requirement.

HUMBIO 112. Conservation Biology — (Formerly 119; same as BIOSCI 144.) Principles and application of the science of preserving biological diversity. Topics: sources of endangerment of diversity; the Endangered Species Act; conservation concepts and techniques at the population, community, and landscape levels; reserve design and management; conflict mediation. Case studies and local field trips. 3 units if taken without field trips. Prerequisites: BIOSCI 101, or HUMBIO 2A with consent of instructor. GER: DB-NatSci
3-4 units, Win (Boggis, C; Launer, A)

HUMBIO 114. Environmental Change and Emerging Infectious Diseases — (Formerly 179; same as ANTHSCI 179/279.) The changing epidemiological environment. How human-induced environmental changes, such as global warming, deforestation and land-use conversion, urbanization, international commerce, and human migration, are altering the ecology of infectious disease transmission, and promoting their re-emergence as a global public health threat. Case studies of malaria, cholera, hantavirus, plague, and HIV. GER: DB-SocSci
3-5 units, not given this year

HUMBIO 116. Controlling Climate Change in the 21st Century — (Same as BIOSCI 147/247, EARTHSYS 147/247.) The science, economics, and environmental diplomacy of global climate change. Topics: the science of climate change, climate change and global environmental law; global economic approaches to carbon abatement, taxes, and tradable permits; joint implementation, consensus, and division in the EU; gaining the support of China, other developing countries, and U.S. corporations; alternative energy and energy efficiencies for less carbon-intensive electric power and transport. GER: DB-NatSci
3 units, Win (Schneider, S; Mustardrea, M)

HUMBIO 117. Human Behavioral Ecology — (Formerly 161; same as ANTHSCI 163/263.) Theory, method, and application in anthropology. How theory in animal behavioral ecology is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting. GER: DB-SocSci
3-5 units, not given this year

HUMBIO 118. Ecological Anthropology — (Formerly 134; same as ANTHSCI 164/264.) Dynamics of culturally inherited human behavior and its relationship to social and physical environments. Topics include a history of ecological approaches in anthropology, subsistence ecology, sharing, risk management, territoriality, warfare, and resource conservation and management. Case studies from Australia, Melanesia, Africa, and S. America. GER: DB-SocSci
3-5 units, not given this year

HUMBIO 119. Demography: Health, Development, Environment — (Formerly 137; same as BIOSCI 102.) Demographic methods and their application to understanding and projecting changes in human infant, child, and adult mortality and health, fertility, population, sex ratios, and demographic transitions. Progress in human development, capabilities, and freedoms. Relationships between population and environment. Prerequisites: numeracy and basic statistics. GER: DB-SocSci
3 units, Spr (Tidjaparker, S)

HUMBIO 120. Health Care in America: The Organizations and Institutions that Shape the Health Care System — (Formerly 160.) Focus is on key organizations and institutions that shape U.S. health policy and health care delivery. How to assess options for health care reform.
4 units, Aut (Barr, D)
HUMBIO 120A. American Health Policy — (Formerly 160A.) Issues in health care policy making, the evolution of current systems, and theories underlying efforts for change. The national search for solutions to the problems of the uninsured, and the feasibility, options, and ramifications of universal health insurance in light of past experience and stakeholder views. Student presentations. Prerequisites: 120 (formerly 160) or consent of instructor. GER:DB-SocSci
3 units, Spr (Heller, G; Lee, P)

HUMBIO 120W. Federal Health and Environmental Programs — (Formerly 160W.) Priority to students going to Stanford in Washington during Winter Quarter. The role of federal agencies and Congress in health policy making, and the agencies’ role in implementation of health and environmental policies. Emphasis is on federal policies, but includes federal-state relations. Enrollment limited to 25.
3 units, Aut (Lee, P)

HUMBIO 121. Economics of Health Improvement in Developing Countries — (Same as MED 262.) Application of economic paradigms and empirical methods to health improvement in developing countries. Emphasis is on unifying analytic frameworks and evaluation of empirical evidence. How economic views differ from public health, medicine, and epidemiology; analytic paradigms for health and population change; the demand for health; the role of health in international development. Prerequisites: background in economics and statistics, and consent of instructor.
5 units, Win (Miller, N)

HUMBIO 122. International Health Policy: Comparative National Health Care Systems — The structure and policies of national health care systems in Europe, Canada, China, and Japan. How other countries have addressed issues of organization, finance, and allocation of scarce health care resources. Limited enrollment. Prerequisites: 120 (formerly 160) or consent of instructor.
4 units, Win (Lee, P; Heller, G)

HUMBIO 123. Obesity in America: Clinical and Public Health Implications — (Formerly 133.) Interdisciplinary clinical, research, and policy approaches. The prevalence, predictors, and consequences of obesity and diabetes; biological and physiological mechanisms; clinical treatments including medications and surgery; and the relevance of behavioral, environmental, economic, and policy approaches to obesity prevention and control. Case studies.
3 units, Win (Kiernan, M; Stafford, R)

3 units, Spr (Endemann, G)

HUMBIO 125. Current Topics and Controversies in Women's Health — (Formerly 150.) Interdisciplinary. Focus is on the U.S. Topics include: health research; bioethical, legal, and policy issues; sex and gender differences; scientific and cultural perspectives; social influences; environmental and lifestyle effects on health; and issues related to special populations.
3 units, Spr (Jacobson, M)

HUMBIO 126. Promoting Health Over the Life Course: Multidisciplinary Perspectives — (Formerly 148.) Disease prevention and health promotion topics pertinent to different stages of the life span with focus on nutrition, physical activity, obesity, and other risk factors. Focus is on scientific investigation, the application of behavioral science to risk reduction strategies, and the importance of health promotion as a social and economic imperative.
3 units, Aut (Allex, W; Stefanick, M)

HUMBIO 127A. Community Health: Assessment and Planning I — Major determinants of health in a community. Working with community partners to identify health issues and plan programs and policies to prevent disease and promote health. Service learning component involving students in community health assessment techniques.
4 units, Win (Heaney, C)

HUMBIO 127B. Community Health: Assessment and Planning II — (Formerly 117B.) Continuation of 127A. Service learning course with emphasis on conducting community health assessment and planning projects in collaboration with community-based organizations. Prerequisite: 127A.
4 units, Spr (Heaney, C)

HUMBIO 128. Community Health Psychology — (Formerly 178; same as PSYCH 101.) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management.
4 units, Spr (Heaney, C)

HUMBIO 129. Critical Issues in International Women’s Health — (Formerly 169.) Women’s lives, from childhood through adolescence, reproductive years, and aging. Economic, social, and human rights factors, and the importance of women’s capacities to have good health and manage their lives in the face of societal pressures and obstacles. Emphasis is on life or death issues of women’s health that depend on their capacity to negotiate or feel empowered, including maternal mortality, violence, HIV/AIDS, reproductive health, and sex trafficking. Organizations addressing these issues.
4 units, Aut (Murray, A)

HUMBIO 130. Human Nutrition — (Formerly 120.) The study of food, and the nutrients and substances therein. Their action, interaction, and balance in relation to health and disease. Emphasis is on the biological, chemical, and physiological processes by which humans ingest, digest, absorb, transport, utilize, and excrete food. Dietary composition and individual choices are discussed in relationship to the food supply, and to population and cultural, race, ethnic, religious, and social economic diversity. The relationships between nutrition and disease; eating disorders; ethnic diets; vegetarianism; nutritional deficiencies; nutritional supplementation; phytochemicals; and food safety. Prerequisite: Human Biology core or consent of instructor.
4 units, Win (Staff)

HUMBIO 132. Functional Anatomy of Exercise — (Formerly 112; same as ORTHO 132.) Interdisciplinary approach. Anatomy of the body’s major joints in the context of exercise and movement. Emphasis is on adaptations that occur with intensity and nature of exercise, age, and disease. Histology and properties of bone, muscle, tendons, ligaments, and other connective tissue. Physiology, pathology, and biomechanics. Enrollment limited to 40.
4 units, Spr (Garza, D)

HUMBIO 133. Human Physiology — (Same as BIOSCI 112/212.) The functioning of organ systems emphasizing mechanisms of control and regulation. Topics: structure and function of endocrine and central nervous systems, cardiovascular physiology, respiration, salt and water balance, exercise, and gastrointestinal physiology. Prerequisite: Biological Sciences or Human Biology core. GER: DB-NatSci
4 units, Win (Garza, D)
HUMBIO 135. Exercise Physiology — (Formerly 155.) How body systems respond to the stress of acute exercise and adapt to chronic exercise training. How the cardiovascular system adapts to optimize oxygen delivery and utilization, how muscles generate force and hypertrophy in response to training, how metabolic/biochemical pathways are regulated to support the increased energy demand of exercise. Theories on the causes of fatigue and muscle soreness, and on what limits human performance. Applied topics such as the effects of aging, gender, and environmental conditions (high altitude, heat, cold) on exercise capacity will also be discussed. Prerequisite: Human Biology Core, Biology Core, or equivalent; or consent of instructor.

4 units, Aut (Friedlander, A)

HUMBIO 135S. Applied Topics in Exercise Physiology and Metabolism — (Formerly 155S.) Reading and discussion of scientific research on student-selected topics. Emphasis is on study design. Student presentations. Summary paper. Enrollment limited to 12. Prerequisites: 135 and consent of instructor.

3 units, Spr (Friedlander, A)

HUMBIO 136. Neural Basis of Human Movement — How the central nervous system transforms planned movements into muscle activations, how these processes adapt through experience and learning, and how they are affected in health and disease. Focus is on how to read and critique the classical and current research literature and to contextualize findings in relation to human behaviors such as posture, reaching, and locomotion. The relevance of motor control issues in relation to enhancing sports performance, human factors, ergonomics, and medical rehabilitation.

3 units, Spr (Patten, C)

HUMBIO 139. Sports Medicine — (Formerly 159; same as ORTHO 239.) Sports, exercise, health, and medicine throughout the human performance continuum. Exercise as therapy; injuries and illnesses that result from sports and exercise. Sources include physiology, nutrition, psychology, and biomechanics. Medical problems exacerbated or caused by exercise and sport; maximizing performance in elite athletes; and population-based issues such as exercise and its relationship to health, women’s issues, drugs in sport, and aging. Prerequisite: medical school enrollment, upper-division Human Biology standing, or consent of instructor.

4 units, Win (Garza, D; Matheson, G)

HUMBIO 141. Human Developmental Biology and Medicine — (Formerly 156; same as DBIO 156.) The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryo transfer; gene and cell therapy; gametogenesis; pattern formation in the nervous system and limb development; gene and grand multiple pregnancies; prematurity, in utero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the developmental biology of humans. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.

4 units, not given this year

HUMBIO 142. Adolescent Development — (Formerly 126.) Adolescence from sociological, psychological, and psychiatric perspectives. Topics: physical, physiological, and cognitive development; identity; peer group; parent/child relations; impact of school; vocational development; and problem outcomes (eating disorders, violence, and teen pregnancy). Prerequisite: 3B or PSYCH 1, or consent of instructor.

4 units, Win (Medoff, L)

HUMBIO 142A. Seminar on Problem Behavior in Adolescence — (Formerly 132.) Risk, protective factors, treatments, and intervention programs designed to ameliorate or prevent these problems. Externalizing behaviors (violence, delinquency, drug abuse, risk taking), internalizing problems (depression, eating disorders, suicide), and sexuality-related problems (teen pregnancy, date violence, STDs/HIV). Enrollment limited to 20. Prerequisite: 126 or consent of instructor.

4 units, Spr (Feldman, S)

HUMBIO 143. Adolescent Sexuality — (Formerly 123.) Developmental perspective. Issues related to scientific, historical, and cultural perceptions; social influences on sexual development; sexual risk; and the limitations and future directions of research. Sexual identity and behavior, sexually transmitted diseases including HIV, pregnancy, abortion, gay and lesbian youth, sex education and condom availability in schools, mass media, exploitative sexual activity, and difficulties and limitations in studying adolescent sexuality. Legal and policy issues, gender differences, and international and historical trends. Research project, including original data collection. Limited enrollment. GER:EC-Gender

3 units, Spr (Brown, N)

HUMBIO 144. Boys' Psychosocial Development — (Formerly 108.) From early childhood through adolescence. Emphasis is on how boys’ lives and experiences are embedded within their interpersonal relationships and social and cultural contexts. Interdisciplinary approach including perspectives from fields such as psychology, sociology, anthropology, family studies, and education. GER:EC-Gender

4 units, Win (Chu, J)

HUMBIO 145. Birds to Words: Cognition, Communication, and Language — (Same as PSYCH 137/239A.) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults. GER:DB-SocSci

5 units, Spr (Fernald, A)

HUMBIO 146. The Anthropology of Death and Dying — (Formerly 106; same as ANTHSCI 175/275.) Death as a biocultural process. Funerary practices and attitudes toward dying in different societies. Issues include hospice care, palliative care, and euthanasia. Instructor is an anthropologist and registered nurse with hospice experience. GER:DB-SocSci

5 units, not given this year

HUMBIO 149. Aging: From Biology to Social Policy — (Same as ANTHSCI 171.) What people can expect when they join the ranks of the elderly. Issues include social security, medical care, lifespan, and the cultural, social, and economic consequences of a large elderly population in the U.S. and other countries. Films, service learning component. GER:DB-SocSci

5 units, Spr (Barnett, C)

HUMBIO 152P. HIV Prevention in East Africa Prefield Seminar — (Formerly 142P.) HIV risk reduction in Swahili-speaking Africa. Practical aspects of the biology of HIV, cultural issues, language, international field work, and educational and research methodologies. Open to students planning to travel in the region to work on service or other projects.

3 units, Spr (Siegel, R)

HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges — (Formerly 103; same as MI 103.) Parasitic and other pestilence of public health importance. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs in historical context to understand public health policy initiatives aimed at halting disease transmission. Focus is on World Health Organization tropical disease targets including: river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiasis, and intestinal helminthes. Guest lecturers with expertise in disease control.

4 units, Spr (Smith, D)

HUMBIO 154. Cancer Epidemiology — Epidemiological methods relevant to human research in cancer. The concepts of risk; case-control, cohort, and cross-sectional studies; clinical trials; bias; confounding; interaction; screening; and causal inference. Social, political, economic, and ethical controversies surrounding cancer screening, prevention, and research.

4 units, Win (Fisher, P)
HUMBIO 155A. Humans and Viruses — (Formerly 115A; same as MI 115B.) Concepts in biology and the social sciences, focusing on emerging infections, viral classification, transmission and prevention, vaccination and treatment, eradication of disease, viral pathogenesis, mechanisms of virally-induced cancer, and viral evolution. Topics: molecular biology of genetic shift and drift in influenza virus, cellular tropism of HIV, developmental biology of virally-induced birth defects, clinical aspects of infantile diarrhea, social aspects of the common cold, policy issues of blood antibody tests, factors in pathogenesis and transmission of prions. Prerequisites: Human Biology core or consent of instructor.

6 units, alternate years, not given this year

HUMBIO 155B. The Vaccine Revolution — (Formerly 115B; same as MI 115B.) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in the area of vaccine development and emerging infections. Journal club format: students select articles from primary scientific literature, write formal summaries, and synthesize it into a literature review on a specific topic. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 10. Prerequisite: 115A.

6 units, Win (Siegel, R)

HUMBIO 157. The Stem Cell: Science, Ethics, and Politics — The biology of stem cells. Their role in human development and potential for treating disease. Guest lectures by biologists, ethicists, and legal scholars. Prerequisites: Biology or Human Biology Core or consent of instructor.

3 units, Win (Nusse, R; Weissman, I; Scott, C)

HUMBIO 158. The Human Genome and Disease — (Formerly 114; same as BIOSCI 109A/209A.) The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. GER: DB-NatSci

3 units, Win (Heller, R)

HUMBIO 160. Human Behavioral Biology — (Same as BIOSCI 150/250.) Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness. GER: DB-NatSci

6 units, alternate years, not given this year

HUMBIO 163. Neural Systems and Behavior — (Same as BIOSCI 163/263.) The field of neuroethology and its vertebrate and invertebrate model systems. Research-oriented. Readings include reviews and original papers. How animal brains compare; how neural circuits are adapted to species-typical behavior; and how the sensory worlds of different species represent the world. Prerequisites: BIOSCI 42, HUMBIO 4A, or equivalents. GER: DB-NatSci

4 units, alternate years, not given this year

HUMBIO 171. The Death Penalty: Human Biology, Law, and Policy — (Formerly 166.) Combines academic study with direct student involvement. Students participate in forensic research and case investigation, including DNA evidence, psychological and physiological development, mental and physical disabilities, and witness interviews. The philosophy, structure, and application of capital punishment in the U.S. Goal is to examine, understand, and challenge the issues involved in the death penalty from the perspective of involvement in a real case. Course not taught from a preconceived belief or political or philosophical agenda except to involve students in an intellectual challenge of policy and philosophy. May be repeated for credit.

3 units, Spr (Abrams, W)

HUMBIO 172A. Children, Youth, and the Law — (Formerly 102A.) The legal rights of children and adolescents in the U.S. and how those rights are defined, protected, and enforced through the legal process within the context of the developmental needs of children and youth and competing societal interests. Topics: the origins and definitions of children’s rights; adoption; custody; the juvenile justice system (abused, neglected, and dependent children, status offenders such as runaways and truants, and minors accused of crimes); education; informed consent; health care; protection from harm and child welfare; due process; privacy, freedom of expression, and exercise of First Amendment rights. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both.

5 units, Win (Abrams, W)

HUMBIO 172B. Children, Youth, and the Law — (Formerly 102B.) How the legal rights of children and adolescents in America are defined, protected, and enforced through the legal process within the context of their developmental needs and competing societal interests. Topics: origins and definitions of children’s rights; adoption; custody; the juvenile justice system; education; informed consent; health care; protection from harm and child welfare; due process; and privacy and freedom of expression. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both.

5 units, alternate years, not given this year

HUMBIO 173. Science, Business, Law: How Scientific Discovery and Innovation are Protected and Brought to Market — The interaction of science, business and law: how scientific ideas are protected by law; the rights of those who invent, develop, and finance scientific discovery; and how ideas are commercialized and brought to market. What kinds of research, discovery, and innovation are protected; who has rights that can be protected; what kinds of rights can be protected, and the kinds of protections that apply; how inventions are commercialized; and the success and failure of businesses based on scientific discovery.

3 units, Aut (Abrams, W)

HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts — The differences between disease as pathology and as the patient’s experience. Topics include: patient-doctor relationships; medical technology; the changing focus on illness; gender issues; love, sex, and illness; mental illness; sick children; and death and dying.

4 units, Aut (Zaroff, L)

HUMBIO 175S. The Literature of Health Care: Novels and Theater of Illness — Illness and disease through novels and plays by authors including Shakespeare, Miller, Sophocles, Hemingway, and Camus. How sickness involves the patient, family, community, and state.

4 units, Spr (Zaroff, L)

HUMBIO 176. Illness Narratives — (Same as ENGLISH 185A.) Interdisciplinary. How the experience of illness is constituted at the intersection of biology and culture. The concept of narrative medicine as a context for examining fiction and nonfiction by patients including Virginia Woolf and William Styron, and by physicians including William Carlos Williams and Rafael Campo. Classic essays from medical journals or contemporary theorists. The intertwined perspectives of biology and culture in the context of unseen forces such as the healthcare expenditure and uneven access to it. GER:DB-Hum

3 units, Aut (Morris, D)

HUMBIO 178. Medical Anthropology — (Formerly 168; same as ANTHSCI 170.) The crosscultural study of the health beliefs and healing systems around the world. How social processes shape human health. GER:DB-SocSci, EC-GlobalCom

3 units, not given this year
HUMBIO 180. Human Osteology — (Same as ANTHSCI 133A/233A.) The human skeleton. Focus is on identification of fragmentary human skeletal remains. Analytical methods include forensic techniques, archaeological analysis, paleopathology, and age/sex estimation. Students work independently in the laboratory with the skeletal collection. GER: DB-NatSci
5 units, Win (DetGusta, D)

HUMBIO 181. The Evolution of Human Diet — (Same as ANTHSCI 173A/273A.) Human dietary choices and their consequences from ecological, epidemiological, and evolutionary perspectives. Topics include foraging theory, human community ecology, evidence for evolutionary design in physiological and motivational systems relating to feeding and nutrition, epidemiology of nutritional disorders, subsistence economies and modes of production, reduction diets, and health diets. GER:DB-SocSci
5 units, not given this year

HUMBIO 182. Evolution of Human Disease — (Same as ANTHSCI 172/272.) Seminar. Understanding human health and disease from an evolutionary perspective. Topics: Darwinian medicine, genes and disease, aging, infectious diseases, mental illness, and cancer. Prerequisites: 2A, B, upper division standing, or consent of the instructor. GER:DB-SocSci
5 units, not given this year

HUMBIO 183. Astrobiology and Space Exploration — (Formerly 107.) Evolution in the context of space and time, focusing on the emergence of life, intelligence, and civilization on Earth and possibly elsewhere. The biological, psychological, sociological, and philosophical issues of human space exploration. Integrates information from astrophysics, biochemistry, chemistry, evolutionary biology, geology, paleontology, physiology, psychology, and sociology. Guest lectures by scientists and astronauts from NASA Ames Research Center, Stanford, SETI, and Bay Area universities. Enrollment limited to 30. Prerequisite: one year college-level mathematics, physics, chemistry, biology, or psychology; or consent of instructor.
3-4 units, Win (Rothschild, L)

HUMBIO 186. Biological Clocks — (Formerly 182; same as BIOSCI 135.) The biological basis for endogenous timekeeping in organisms from flies to human beings. How biological clocks are constructed at the molecular, tissue, and behavioral levels; how these clocks interact with other physiological systems and allow animals to anticipate changes in their environment. Applications of circadian rhythm principles to treating human disorders and diseases such as cancer. Prerequisite: Biological Sciences or Human Biology core, or consent of instructor. GER: DB-NatSci
3 units, Spr (Staff)

HUMBIO 187. Human Diversity: A Linguistic Perspective — (Same as ANTHSCI 112.) The diversity and distribution of human language and its implications for the origin and evolution of the human species. The origin of existing languages and the people who speak them. Where did current world languages come from and how can this diversity be used to study human prehistory? Evidence from related fields such as archaeology and human genetics. Topics: the origin of the Indo-European languages, the peopling of the Americas, and evidence that all human languages share a common origin. GER:DB-SocSci, EC-GlobalCom
3 units, Spr (Rahlen, M)

HUMBIO 189. Darwin Inquiry Project — (Formerly 115D.) Topics related to Darwin’s life including his time in South America and his mystery illness. The intellectual foundations and individual characteristics associated with the development of the theory of evolution. Student presentations. Limited enrollment. Prerequisites: application; consent of instructor. Recommended: prior knowledge of the subject.
3-5 units, Aut (Siegel, R)

HUMBIO 193. Research in Human Biology — Independent research conducted under faculty supervision, in junior or senior year, normally but not necessarily in pursuit of an honors project. May be repeated for credit. Prerequisite: application available in student services office.
1-5 units, Aut, Win, Spr (Staff)

HUMBIO 194. Honors — Completion of the honors project, normally taken in the student’s final quarter. First component: the honors thesis, a final paper providing evidence of rigorous research, fully referenced, and written in an accepted scientific style. Second component: participation in the honors symposium, including a 10-minute oral presentation followed by a brief question and answer session. Prerequisites: 193 or 199, and acceptance into the honors program.
1-10 units, Aut, Win, Spr (Staff)

HUMBIO 197. Human Biology Internship — Limited to and required of Human Biology majors. The internship is a supervised field, community, or lab experience of student’s choosing, pre-approved by Human Biology faculty and student advisers, and initiated at least three quarters prior to graduation. May be repeated for credit. Prerequisite: Human Biology Core.
1-4 units, Aut, Win, Spr (Staff)

HUMBIO 198. Senior Tutorial in Human Biology — Reading for Human Biology majors in exceptional circumstances and under sponsorship of Human Biology associated faculty. Students must apply through Human Biology student services before registering. Reading list, paper, and evaluation required.
1-5 units, Aut, Win, Spr (Staff)

HUMBIO 200. Teaching of Human Biology — For upper division undergraduates and graduate students. Practical experience in teaching Human Biology or serving as an assistant in a lecture course.
1-5 units, Aut, Win, Spr (Staff)

COGNATE COURSES
See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

BIOSCI 146. Population Studies
1 unit, Win (Feldman, M)

BIOSCI 149/249. Principles of Sleep Research
4 units, Win (Heller, C)

DBIO 202. Assisted Reproductive Technologies — (Same as OB-GYN 202.)
1-5 units, Win (Porzig, E)

EDUC 369. Human Cognitive Abilities — (Same as PSYCH 133.)
3-4 units, Win (Shavelson, R)

ME 280. Skeletal Development and Evolution
3 units, Spr (Carter, D)

PHIL 60. Introduction to Philosophy of Science — (Same as HPS 60.)
5 units, Aut (Longino, H)

PHIL 78. Medical Ethics — (Same as ETHICSOC 78.)
4 units, Spr (Jaworska, A)

POLISCI 131. Children’s Citizenship: Justice Across Generations — (Same as EDUC 158.)
5 units, not given this year

POLISCI 133. Ethics and Politics of Public Service — (Same as ETHICSOC 133.)
5 units, alternate years, not given this year

SOC 141A/241A. Social Class, Race, Ethnicity, Health
4-5 units, Win (Barr, D)
OVERSEAS STUDIES

Descriptions of these courses are in the “Overseas Studies” section of this bulletin or at the Overseas Studies office, 126 Sweet Hall. Students overseas are encouraged to participate in a wide range of internships and independent research as well.

AUSTRALIA

HUMBIO 111X. Coral Reef Ecosystems — (Same as BIOSCI 109Z, CEE 168X, EARTHSYS 120X.) GER:DB-EngrAppSci
3 units, Aut (Ward, S; Fine, M; Anthony, K)

HUMBIO 112X. Coastal Resource Management — (Same as BIOSCI 110Z, CEE 168Y, EARTHSYS 121X.) GER:DB-EngrAppSci
3 units, Aut (Johnstone, R; Chiffings, T)

HUMBIO 113X. Coastal Forest Ecosystems — (Same as BIOSCI 11lZ, CEE 168Z, EARTHSYS 122X.) GER:DB-EngrAppSci
3 units, Aut (Pole, M; Duke, N)

OXFORD

4 units, Win (Senior, J)

PARIS

HUMBIO 120X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time — (Same as PUBLPOL 111P.) GER:DB-SocSci
4-5 units, Win (Fessler, J)

HUMBIO 177X. Erotic Art and Literature in 18th-Century France
3 units, Spr (Katchadourian, H)

PROGRAM FOR INDIVIDUALLY DESIGNED MAJORS

The Individually Designed Major program (IDM) is overseen by the School of Humanities and Sciences, located in Building 1. See also the “School of Earth Sciences” and the “School of Engineering” sections of this bulletin for IDM’s in these curriculum areas.

This program is intended for currently registered undergraduates in good academic standing interested in pursuing an area of scholarly inquiry that falls outside the purview of an established academic department or program of the University. Students submit proposals for consideration by the Curriculum Committee. These should be intellectually coherent majors designed by the students themselves, with the assistance of faculty members of their choice. IDM students are required to complete a capstone requirement either as an honors project or a senior project. Information about proposal procedures, and the procedure for an honors project, is available at the Undergraduate Advising and Research, Sweet Hall, first floor, and the School of Humanities and Sciences (Building 1).

In designing a major, the student consults with three faculty members (all must be Academic Council members and be from three separate departments); one of the faculty members is selected as the student’s primary adviser. In helping the student design the major and in signing the proposal requesting approval from the Curriculum Committee, the faculty members are committing themselves to act as a regular academic advisory group for the student until graduation. The committee does not consider proposals without the approval of the faculty advisory group.

APPLICATION PROCEDURE AND CURRICULUM COMMITTEE REVIEW

The program is administered by the curriculum committee and the dean’s office in the School of Humanities and Sciences. Applications are due by the fifth week of the Spring Quarter of the sophomore year.

The committee acts in lieu of a regular department of the University.

This role involves certifying the scholarly merit of the program and includes the obligation to consider, approve, and recommend changes in each proposed major.

In carrying out its role, the committee reserves the right to reject proposals that, in its opinion, lack scholarly merit or are not clearly interdisciplinary. Occasionally, the committee must reject a proposal that, though of considerable academic merit, requires resources not available at Stanford. The committee also reserves the right to recommend additions to a student’s faculty advisory group.

ADVISING AND PROPOSAL

Students who are interested in the program and have met with an adviser at Undergraduate Advising and Research, are directed to the dean’s office in the School of Humanities and Sciences to speak with the Assistant Dean for Student Affairs. The final stage of the process is the application review by the Curriculum Committee.

The proposal should begin with a statement that describes the major, articulates the motivation for and the justification and ultimate goal of the major, and shows how the courses listed relate to and fulfill the major’s goal. This statement should be followed by a list of the proposed core courses to be counted toward the major and, as far as possible, the sequence in which they are to be taken. The proposal must be signed by the selected faculty advisory group; their signatures certify that they endorse the major as described in the proposal and agree to serve as the student’s permanent advisory group. The proposal must be accompanied by a letter of recommendation from each of the three advisers giving separate appraisals of the academic viability of the proposed major. The proposal must also include a current copy of the student’s unofficial transcript.

These requirements are in addition to the general guidelines discussed under “The Major” section of this bulletin. The monitoring of the requirements and subsequent changes to the original proposal must be approved by the Senior Associate Dean for Graduate and Undergraduate Studies.

THE GUIDELINES

To establish the IDM program as being fully equivalent to a Stanford B.A. or B.S. degree in an established department or program, the Senate of the Academic Council has approved specific requirements. The criteria for approval of proposals submitted include:

1. Each major shall consist of at least 75 units, all in courses at or above the 100 level (or their equivalent).
2. A maximum of 5 units of these 75 units may be taken on a credit/no credit basis.
3. A maximum of 8 units of these 75 units may be taken in practical or directed reading.
4. None of the 75 units can count towards another major or other special program.
5. Students are required to take a core sequence and WIM course in the department of one of their advisers.
6. There is a grade point requirement of 3.5.
7. The proposed major must constitute a coherent academic program that fulfills the student’s objectives and achieves a clear academic goal.
8. The proposed major must be comparable in quality and in academic rigor to degrees obtained by students in other degree-granting programs offered at Stanford.
9. The proposed major must achieve both breadth and depth within the academic discipline(s), involve interdisciplinary study, and be compatible with a liberal arts education.
10. The proposed major must not duplicate or be achievable through a major already offered by another degree-granting program or department.
11. Students must present evidence that demonstrates their ability to do independent work.
12. Students proposing individually designed majors must have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee.
INTERDISCIPLINARY STUDIES IN HUMANITIES

Director: Gregory Freidin (on leave Autumn, Winter)
Acting Director: Helen Brooks (Autumn, Winter)
Associate Director: Helen Brooks (Spring)

Steering Committee: (Chair, Autumn, Winter) Helen Brooks (English, Interdisciplinary Studies in Humanities); (Chair, Spring) Gregory Freidin (Slavic Languages and Literatures), Lanier Anderson (Philosophy), Callin Creighton (Humanities Honors Program student representative), Dan Edelstein (French and Italian), Colin Garretson (Graduate Program in Humanities student representative), Heather Hadlock (Music), Lisa Malkki (Cultural and Social Anthropology), Hilton Obeninger (English, VPUPE), Fabrice Palumbo-Liu (Humanities Honors Program student representative), Linda Paulson (English), Rush Rehm (Drama), Jessica Riskin (History), Stephanie Schmidt (Graduate Program in Humanities student representative), James Sheehan (History), Brent Sockness (Religious Studies), Rega Wood (Philosophy)

Department Offices: Building 250, Room 251F
Mail Code: 94305-2020
Department Phone: (650) 723-3413
Email: idstudies.moore@stanford.edu
Web Site: http://www.stanford.edu/group/HSP/GPH/

Courses given in Interdisciplinary Studies in Humanities have the subject code HUMNTIES. For a complete list of subject codes, see Appendix.

The office of Interdisciplinary Studies in Humanities administers the following programs:
1. Honors Program in Humanities
2. Interdisciplinary Major in Humanities
   a) Interdisciplinary Major
   b) Interdisciplinary Major for Premeds
   c) Interdisciplinary Major in Digital Humanities
   d) Interdisciplinary Major in Philosophical and Literary Thought
3. Graduate Program in Humanities
   a) Master of Arts
   b) Joint Ph.D.
4. American Studies (see the “American Studies” section of this bulletin)
5. Medieval Studies (see the “Medieval Studies” section of this bulletin)
6. Program in Modern Thought and Literature (see the “Modern Thought and Literature” section of this bulletin)

UNDERGRADUATE PROGRAMS

To declare the major in Humanities, a student must first have been accepted into the Humanities Honors Program. See the “Honors Program” section below.

BACHELOR OF ARTS
THE MAJOR IN INTERDISCIPLINARY STUDIES IN HUMANITIES

A student who is a member of the Humanities Honors Program may choose to pursue the B.A. degree in Humanities through one of four concentration options: (1) the standard student designed thematic concentration; (2) the concentration designed for students who also plan to complete the established premedical curriculum for careers in the health sciences; (3) the concentration in digital humanities; or (4) the concentration in philosophical and literary thought. For all options, the B.A. degree conferred is in Humanities. Each student chooses a field that reflects the focus of study, which is noted on the transcript after degree conferral. Students who complete a thesis with a grade of ‘B’ or higher receive Honors in Humanities which is noted on the transcript and on the diploma. More detailed information may be found in the Procedures and Guidelines documents, available at the program office. Admission information and recommended academic schedule follow below.

Unlike science disciplines, the humanities focus on the formation of ideas in the world of arts and letters, including literature, philosophy, history, and social thought. The goal of the program is to introduce students to disciplinary approaches and their intersections. Students who choose to major in Interdisciplinary Studies in Humanities have the opportunity to arrange their courses by thematic subject matter, genre, or historical period.

Each applicant to the major submits a study plan and statement of purpose which outlines the rationale for a particular field of study. The study plan should be worked out in consultation with the student’s faculty mentor. Students who wish to major in Humanities should receive approval of their fields from the program before the end of the junior year.

Students may complete fields in the following; these fields are declared on Axess and appear on the transcript but not on the diploma.

1. Culture and Politics
2. Digital Humanities (see below)
3. Early Modern Studies
4. Ecology, Philosophy, and Literature
5. Film, Literature, and Society
6. Medieval Studies
7. Modern Thought and Literature
8. Performance, Culture, and Society
9. Philosophical and Literary Thought (see below)
10. Philosophy and the Visual Arts

REQUIREMENTS FOR THE MAJOR

With the exception of the premed option, each program of study must include at least 12 courses for a minimum of 60 units over and above the requirements of the Humanities honors program (30 units). However, students may count one of the core seminars taken for the honors program (see below) as one of the courses toward the major if appropriate to the area of concentration.

INTERDISCIPLINARY MAJOR AND RECOMMENDED ACADEMIC SCHEDULE

The program of study for the thematic concentration includes:

1. A statement of purpose designating the field and outlining the rationale for the program of study.
2. Six courses in one of the three areas: literary, historical, or philosophical study.
3. Three courses in each of the other two areas above.
4. The requirements for the Humanities honors program.

If additional courses are needed to make up the 60 unit minimum, the student may take those courses in any of the three categories. Each program of study must be signed by a Stanford faculty member who has agreed to act as the student’s academic adviser; the proposed program must then be approved by the director. Changes in the study plan must be approved by the student’s adviser and kept on file in the program office.

For some fields, such as film studies or modern thought and literature, specific courses or types of courses may be strongly recommended. Consult the student handbook for such recommendations.

INTERDISCIPLINARY MAJOR FOR PREMeds

The Interdisciplinary Major in Humanities offers an option for students who are preparing to attend medical school, but who wish to focus their studies in the humanities. This program of study gives students a coherent way to organize interdisciplinary interests by theme, nationality, or historical period. In addition, students choosing this track take all the courses usually required by medical schools (two years of organic and inorganic chemistry with labs, one year of physics, one year of biology with labs, and one or two courses to provide proficiency in quantitative skills as determined by a premed adviser), as well as course work in various humanities disciplines (eight courses and a minimum of 40 units) distributed as follows:

1. A statement of purpose choosing one of the fields listed above.
2. Four courses in the student’s chosen field. Generally these four courses address different aspects of literature, history, and philosophy.
Three courses in medical ethics, history or philosophy of science, science, and the humanities.

One course in the arts.

The courses recommended by Undergraduate Advising and Research to fulfill medical school entrance requirements.

The requirements for the Humanities honors program.

INTERDISCIPLINARY MAJOR IN DIGITAL HUMANITIES

The development of new technologies has produced new topics for scholarly discussion in the humanities as well as new forms of cultural expression. The Interdisciplinary Major in Humanities offers a track for students who wish to concentrate study in the new field of Digital Humanities with the following course requirements:

1. A statement of purpose outlining a narrowly defined field of study and approved by a digital humanities adviser.
2. HUMNTIES 198 as one of the core seminars for the Humanities honors program.
3. CS 105, Introduction to Computers, or CS 106A, Programming Methodology, or equivalent.
4. Seven humanities courses relevant to the student’s focus as articulated in the statement of purpose.
5. Three computer science or technology courses relevant to the student’s focus; one course should have a technical focus, and one should deal with societal issues.
6. HUMNTIES 201, Digital Humanities Practicum, in preparation for the student’s honors project.
7. The requirements for the Humanities honors program.

INTERDISCIPLINARY MAJOR IN PHILOSOPHICAL AND LITERARY THOUGHT

The concentration in philosophical and literary thought is available in association with the crossdisciplinary Program for the Study of Philosophical and Literary Thought. Students wishing to major in Humanities with this focus must consult with the director of that program, as well as the director or associate director of Interdisciplinary Studies in Humanities. Students prepare a program of study including at least 12 courses in literary, philosophical, and historical study, of which six courses are in philosophical or literary thought, and three in each of the other two categories. Requirements:

1. A statement of purpose defining a focus in philosophical or literary thought.
2. PHIL 81, Philosophy and Literature Gateway, which can be counted toward the course requirements for philosophical study or toward the requirements for literary study.
3. PHIL 80, Mind, Matter, and Meaning
4. Courses in philosophical study normally include at least one course from the PHIL 170 sequence and one course from the PHIL 180 sequence.
5. Courses in literary study should focus on one national literature.
6. Courses in historical study should include at least one course in the history of philosophy.
7. The requirements of the Humanities honors program.
8. Students in this track are strongly encouraged, where possible, to select one or two Interdisciplinary Core Seminars which are approved as courses of special relevance for philosophical and literary thought.

Interested students should consult the director of undergraduate studies in the Program for the Study of Philosophical and Literary Thought for a listing of courses of special relevance to the study of philosophy and literature (which includes some of the HUMNTIES interdisciplinary core seminars).

HONORS PROGRAM

The Honors Program in Humanities aims to heighten a sense of the relations among various humanistic disciplines, and to study issues in intellectual and cultural history through aesthetic, literary, historical, religious, social, and ethical perspectives.

ADMISSION

As an extradepartmental honors program, the Humanities Honors Program is open to any qualified undergraduate at Stanford, regardless of major. Interested students may obtain information from the program office. Students are encouraged to register for the program at the earliest opportunity and to take the Core Colloquium in the sophomore year. However, students may join the program as late as the junior year under certain circumstances (e.g., transfer students). Students enrolled in the crossdisciplinary majors affiliated with the Program for the Study of Philosophical and Literary Thought, whether through the Philosophy major or one of the literature majors, are encouraged to write their honors essays through the Humanities honors program. Students must meet the following entrance requirements before being admitted to the program:

1. Completion of at least two quarters of the Area One requirement, except in the case of transfer students, who will be granted exception.
2. A grade point average (GPA) of at least 3.3 (B+) in all course work in the humanities. Such course work includes any Area One sequence and all Program in Writing and Rhetoric sections; all courses in the departments of Art and Art History, Drama, and Music (except studio or performance courses); all courses in the departments of Asian Languages, Classics, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese (except first-year language courses); all courses in the departments of Comparative Literature, History, Philosophy, and Religious Studies; and all courses in the programs in Feminist Studies and Modern Thought and Literature.

REQUIREMENTS

1. Completion of HUMNTIES 100, Honors Core Colloquium: Humanities, 3 units, preferably in the sophomore year.
2. Two different seminars in the series 160-163 or 190-198: 8-10 units, sophomore or junior year. Both seminars must be completed by the end of the tenth quarter of undergraduate study in order for students to remain members in good standing.
3. At least one survey course in intellectual or cultural history, 4-5 units, in a field relevant to the anticipated topic of the senior essay, choosing from the 160-163 series or among courses in history, philosophy, religious studies, literature, and the arts. Students should consult the course list in the program office.
4. In order to develop the requisite knowledge and methodological background to write a Humanities honors essay, students must take, during their sophomore and junior years, the required Humanities honors courses and additional humanities courses in disciplines germane to their honors essays.
5. Enrollment in 200A, one unit each, Winter and Spring quarters of the junior year.
6. An honors essay on a topic approved by the Steering Committee (usually 5 units Autumn Quarter and 5 units Winter Quarter, senior year).
7. A minimum GPA of 3.3 (B+) in all courses taken for the Honors Program, as well as an overall minimum GPA of 3.0 (B) in all course work in order to remain in the program.

GRADUATE PROGRAMS

University requirements for the M.A. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS

The Master of Arts program within the Graduate Program in Humanities is designed to broaden the student’s academic background and cultural knowledge through a series of seminars that study intellectual history from the classical period to the modern era. Students gain added depth by taking four advanced courses within a defined field of study.

Application is made through the Interdisciplinary Studies in Humanities office. Application procedures and deadlines are available on the web at http://gradadmissions.stanford.edu. The M.A. program in Humanities is ideally completed as a half-time, two-year program, but under some circumstances it may be completed in one year as a full-time program. The department does not offer financial aid for the master’s program.
REQUIREMENTS
1. Complete the five Interdisciplinary Studies in Humanities seminars (321-325).
2. Complete four graduate-level courses in an approved concentration to be determined in consultation with the director. At least one of these must be a graduate-level research seminar for which a research paper is required. Under “Statement of Purpose” on the application form, the candidate must indicate the field of study (for example, art history, early modern studies, philosophy, etc.) from which the graduate-level courses are drawn. The candidate must also note his or her qualifications for undertaking graduate study in that designated field. Once admitted, the student submits a proposed program of study to the director, specifying the particular courses to be taken. The proposed program is approved on its own merits to ensure that the chosen graduate courses are suited to the M.A. in Humanities.
3. Satisfactory completion of 298, the (Spring Quarter) Graduate Program in Humanities Symposium, or prior completion of the Symposium Paper by special permission.
   The minimum number of units for the M.A. degree is 45. Additional elective units may be taken at the option of the student.
   Undergraduates wishing to pursue the M.A. as part of a coterminal program should speak with the program administrator about the application procedures for coterminal students.
   For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.html#Coterm.

JOINT PH.D.
The Graduate Program in Humanities (GPH) provides graduate students in different disciplines an opportunity to broaden their knowledge of intellectual and cultural history by focusing on texts and ideas which have been central to all humanistic disciplines from the ancient world to the present. The program’s seminars usually focus on specific topics or issues in the context of historical, literary, philosophical, religious, and other disciplinary and theoretical orientations. The program provides a unique opportunity to study highly influential texts with a view to their relevance to the student’s own disciplinary field.

GPH members must be students earning the Ph.D. in an academic department at Stanford. Doctoral students who complete the requirements for their departments and the GPH are awarded joint doctoral degrees.

Students may register for the program at any time, usually during the first quarter of graduate study. Members of the program are given first preference in registration for all of its offerings. Students complete the five GPH seminars (321-325). The course of study culminates in the GPH student symposium, which is developed and organized by the students in the program.

Although students in the GPH generally complete the program course work in their first two years of graduate study, requirements of some participating departments may necessitate completion of the GPH over three years. In some instances, one or more of the GPH seminars may fit within the requirements of the student’s home department.

The following are participating departments in the program: Art and Art History, Classics, Comparative Literature, English, French and Italian, German, History, Modern Thought and Literature, Music, Philosophy, Religious Studies, Slavic Languages and Literatures, and Spanish and Portuguese. Doctoral students from other departments may participate with permission of their home departments and approval of the Director of Interdisciplinary Studies in Humanities.

COURSES
See quarterly Time Schedule for changes in listings.

HUMNTIES 100. Honors Core Colloquium: Humanities — Required of all students in the Humanities Honors Program. Introduction to Interdisciplinary Studies in Humanities through the study and application of a range of theoretical approaches to a major literary text. This year, the course focuses on Hamlet, including film adaptations. Experience in both disciplinary and interdisciplinary analysis and writing is designed to help prepare students to write their honors essays in Humanities. GER: DB-Hum
3 units, Win (Brooks, H)

HUMNTIES 161-163. Interdisciplinary Seminars: Texts in History — Students in the Humanities honors program may count any of these seminars toward the core seminar requirement or toward the requirement to complete one survey course in intellectual or cultural history.

HUMNTIES 161. Texts in History: Classics from Greece to Rome — (Same as CLASSGEN 163, DRAMA 161R.) Priority to students in the Humanities honors program. Ancient texts situated in their intellectual and cultural contexts. Readings include Homer’s Iliad and Odyssey, plays of Aeschylus, Sophocles’ Antigone, Euripides’ Medea, Thucydides’ Peloponnesian War, Plato’s Symposium, Aristotle’s Poetics, Virgil’s Aeneid, Seneca’s Trojan Women and Agamemnon, and Augustine’s On Christian Doctrine. GER:DB-Hum
5 units, Aut (Rehm, R)

HUMNTIES 162. Texts in History: Medieval to Early Modern — (Same as ENGLISH 184C.) Priority to students in the Humanities honors program. The impact of change from the Middle Ages to the early modern world; how historical pressures challenged conceptions of artistic form, the self, the divine, and the physical universe, fostering interdisciplinary methods of interpretation. Texts include: Aristotle, On the Soul; Attar, The Conference of the Birds; Dante, Inferno; Chaucer, Canterbury Tales; Christine de Pizan, The Book of the City of Ladies; Letters of Columbus; Machiavelli, The Prince; Luther, The Bondage of the Will; Montaigne, Essays; Marlowe, Doctor Faustus; poems by John Donne and Lady Mary Wroth; Shakespeare, Othello; and works of art. GER:DB-Hum
5 units, Win (Brooks, H)

HUMNTIES 163. Texts in History: Enlightenment to the Present — Priority to students in the Humanities honors program. The relationship between intellectual history and literary creativity in the modern period. Texts include: Kant, What is Enlightenment?; Gibbon, Decline and Fall of the Roman Empire; Diderot, Rameau’s Nephew; Scott, The Highland Widow and The Two Drovers; Dostoevsky, Notes from Underground; Tolstoy, Hadji Murat; Turgenev, First Love; Nietzsche, On Truth and Lie; Ibsen, A Doll’s House and Ghosts; Joyce, Dubliners; Woolf, Mrs Dalloway; Kafka, The Metamorphosis; Freud, Civilization and Its Discontents; Beckett, Waiting for Godot; Wilson, Ma Rainey’s Black Bottom and Joe Turner’s Come and Gone; Goldstein, Mazel; and poetry. GER:DB-Hum
5 units, Spr (Thompson, B)

3. Participate in the GPH student symposium, usually at the end of the second year of GPH course work (298; registration for units is optional).
4. One quarter of interdisciplinary teaching. Students may apply to TA an undergraduate Humanities course, or may petition to count a departmental teaching assistantship if the course reaches beyond the scope of a single discipline.
5. Reading knowledge of at least one foreign language, ancient or modern, to be certified in the first two years of graduate work.
6. Passing the University oral examination according to the schedule prescribed by the major department with one GPH representative, approved by the director, as a member of the examining committee.
7. Submission of a Ph.D. dissertation acceptable to a committee which includes one representative of the GPH, approved by the director.
HUMNTIES 170. Media Studies Internship — Practical experience working with a film or media company for six to eight weeks. Students make arrangements with companies individually and receive the consent of the director of the Humanities honors program. Credit awarded for submitting a paper after completing the internship, focused on a topic relevant to the student’s studies.
2-3 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 175. Individual Work
1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 191-198. Interdisciplinary Core Seminars in Humanities — Students in the Humanities honors program must complete two different seminars from different areas before the end of the tenth quarter of undergraduate study. Other students may enroll if space allows and with the instructor’s consent.

HUMNTIES 191S, Capital and Empire — (Graduate students register for HISTORY 339D; same as HISTORY 239D/339D.) Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Walmart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development.
5 units, Spr (Satia, P)

HUMNTIES 193H. The Art of the Movies: Story, Drama, and Image — (Same as PHIL 193H.) A philosophical study of how movies coordinate and transform elements they borrow from older arts of literary narrative, live theater, and graphic illustration. Examples from the career of Alfred Hitchcock. GER:DB-Hum
4 units, Aut (Hills, D)

HUMNTIES 193Y. The Moral Status of Human Beings — (Same as PHIL 193Y.) The conviction that human beings have a unique moral status among animals, plants, and things, and that all humans have equal moral status is at the heart of ethics. Views which question these beliefs, attempts to defend them, and their implications for practical ethical issues such as abortion, euthanasia, new reproductive technologies, and the treatment of animals. GER:DB-Hum
5 units, Win (Jaworska, A)

HUMNTIES 194G. William Blake: Poet and Painter — (Same as ENGLISH 135E.) Introduction to the illuminated poetry of William Blake, romantic visionary, poet, artist, religious renegade, political revolutionary, philosopher, mythological historiographer, social misfit, and critic. GER:DB-Hum
5 units, Spr (Gigante, D)

HUMNTIES 194R. Photography and Literature — (Same as ENGLISH 182E.) How issues raised by birth of photography and photography’s prehistory are manifested in 19th-century literature. Readings in photographic theory by Marx, Benjamin, Barthes, Sontag, and Batten; poems by Wordsworth, Browning, and Tennyson; and novels by Shelley, Dickens, and Wilde. GER:DB-Hum
5 units, Spr (Rovee, C)

HUMNTIES 196Z. The Young Augustine — (Same as RELIGST 244.) Did the Middle Ages begin in Milan because of the conversion of the emperor’s court orator, Aurelius Augustinus, to neo-Platonic philosophy? Or was it to Christianity? Sources include The Confessions, and the dialogues he wrote in the months following his conversion. GER:DB-Hum
5 units, Win (Sheehan, T)

HUMNTIES 197B. Camera as Witness: International Human Rights Documentaries — (Same as INTNLREL 141B, SLAVGEN 197B.) Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers. GER:DB-Hum
5 units, Aut (Bojic, J)

HUMNTIES 197C. Camera as Witness: A Forum for Global Dialogue — (Same as INTNLREL 141C, SLAVGEN 197C.) Challenges facing filmmakers documenting the struggle for human rights including communication of complex situations to an international audience, interpreting foreign cultures and politics, and filmmaker roles as artists, activists, and journalists. Meetings with filmmakers. GER:DB-Hum
5 units, Win (Bojic, J)

HUMNTIES 198S. Digital Humanities — (Same as CLASSART 198S.) How digital technologies are implicated in rethinking research and learning in the arts and humanities. Topics include: visualization, simulation and gaming, authoring, collaborative research, publication and dissemination, interactivity, and information management. Examples of cutting-edge research. Project-based. GER:DB-Hum
4-5 units, Spr (Shanks, M)

HUMNTIES 200A, B, C. Senior Research — Limited to Humanities honors students. A critical essay of about 15,000 words. Students develop a proposal beginning in Winter Quarter of the junior year, and research a topic and write the essay during senior year with the guidance of a faculty member, taking a total of 5 units each of 200B and 200C, spread out during senior year as best suits their schedules. Deadline for submitting essays is the first working day on or after May 15.

HUMNTIES 200A. Research Proposal — Preliminary planning and study. Student drafts a proposal in Winter Quarter of the junior year to submit to the committee in charge for suggestions regarding focus and bibliography. After revisions, the student resubmits a fully developed proposal to the committee for final approval. 60 hours over two quarters are expected of students developing their essay proposals for 2 units, usually 1 unit each in Winter and Spring of the junior year. Students usually make revisions of some kind in either scope or formulation of the topic. Students overseas submit proposals and receive feedback by fax or email. WIM
1-2 units, Aut, Win, Spr (Staff)

HUMNTIES 200B. Senior Research — Regular meetings with tutor (thesis adviser). Prerequisite: 200A. WIM
1-5 units, Aut, Win, Spr (Staff)

HUMNTIES 200C. Senior Research — Regular meetings with tutor; submission of complete first draft at least two weeks before final deadline. Prerequisite: 200B. WIM
1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 201. Digital Humanities Practicum — For Humanities majors concentrating in digital humanities. Work related to the honors thesis under the supervision of a Stanford faculty or staff member usually affiliated with the Stanford Humanities Lab. Must be approved by the Director of Interdisciplinary Studies in Humanities.
2-5 units, Aut, Win, Spr (Staff)

HUMNTIES 203-205. Seminars in Digital Humanities — These seminars were developed for students interested in digital humanities but are not counted as core seminars for the Humanities honors program.

HUMNTIES 203. Introduction to Critical Foresight — The development of critical foresight for use in society, business, and personal life. Concepts, tools, and experiences for leading the development of viable futures. How to describe and manage coming changes. Topics include: assessing historical visions of the future; the development of foresight methods; modern purveyors of foresight; building viable futures that can be analytically supported; and how to develop more complex futures by mixing methods.
3-5 units, Aut (Cockayne, W)

HUMNTIES 204. Redesigning the Future — (Same as ME 209.) Project-based. Futures and foresight methods: how the future can be envisioned, designed, and communicated. Integration of analysis with experience, foresight with design thinking, and building prototypes for the future. The role of future human needs. In previous years, students have designed the future of the university experience. Student teams of three or four. Design experience or fabrication skills not required.
3 units, Win (Cockayne, W; Leifer, L)
HUMNTIES 205. Innovation and Critical Foresight — Tools required to analyze and develop far future innovations. Commonly applied critical foresight methods and tools; current predictions of future innovations. Topics include: S-curves, trends, markers, and triggers; examples of currently perceived future innovations and their foundations; leading thinkers; and exercises to develop high probability future innovations that can be analytically supported.

3-5 units, Spr (Cockayne, W)

GRADUATE

HUMNTIES 275. Individual Work
1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 298. Graduate Program in Humanities Symposium — Required of GPH doctoral and master’s students. Participation in the student-organized symposium; presentation of a paper informed by texts addressed in GPH seminars.
1-3 units, Spr (Brooks, H)

HUMNTIES 299. Interdisciplinary Teaching — For doctoral students in the GPH. Supervised teaching to satisfy the program teaching requirement.
1-2 units, Aut, Win, Spr (Brooks, H)

HUMNTIES 321. Classical Seminar — (Same as CLASSTGEN 321.) The dialogue between literature and philosophy in Greek and Roman cultures. Homer, Greek tragedy, Plato, Aristotle, Lucretius, Virgil, Augustine, Nietzsche’s Birth of Tragedy, and Walcott’s Omeros.
3-5 units, Aut (Nightingale, A)

HUMNTIES 322. Medieval Seminar — (Same as MEDVLST 322, RELIGST 338.) Medieval culture and ethical ideals extolled by medieval authors explicitly in philosophical and theological texts and implicitly in literary ones. Connections among ethics, cosmology, sacred history, anthropology, and soteriology in the medieval worldview. Medieval ethical beliefs as a window on medieval intellectual culture.
3-5 units, Win (Gelber, H)

HUMNTIES 323. Renaissance/Early Modern Seminar — Focus is on this period as it records the impact of major historical forces: the advent of printing; the reappropriation of classical thought; the expansion of trade; revolutions in religion; the exploration of uncharted realms of the self, the world, and the heavens; and the rise of historiography. Authors: Attar, de Pizan, Pico della Mirandola, Columbus, De Las Casas, Machiavelli, Luther, Montaigne, Marlowe, Donne, Shakespeare, and Galileo.
3-5 units, Spr (Brooks, H)

HUMNTIES 324. Enlightenment Seminar — (Same as HISTORY 334.) The Enlightenment as a philosophical, literary, and political movement. Themes include the origins and limits of knowledge and moral sentiment, the basis of citizenship, social engagement and political legitimacy, and relationships among religion, secularism, and the natural sciences. May be repeated for credit.
3-5 units, Aut (Riskin, J)

HUMNTIES 325. Modern Seminar — (Same as MUSIC 310H.) How the romantics saw aesthetic experience, especially music, as a means of reading the self and defining community and nation. These complementary functions of music, drama, and myth in modern culture epitomized in Wagner’s Tristan und Isolde and Die Meistersinger. Nietzsche and Mann’s notion that the conflicting claims of subjective and collective identity generate tensions that threaten the survival of culture. Primary readings include: stories and criticism of E.T.A. Hoffmann; Wagner’s music dramas; poetry and essays of Charles Baudelaire; Nietzsche’s Birth of Tragedy, Beyond Good and Evil, and The Case of Wagner; Mann’s Death in Venice and Doctor Faustus; and Adorno’s criticism.
3-5 units, Win (Grey, T)

DIVISION OF INTERNATIONAL COMPARATIVE AND AREA STUDIES

Director: Judith Goldstein
Executive Director: Tanya Boysen
Advisory Committee: Carl Bielefeldt (Religious Studies), Judith Goldstein (Political Science), Robert Gregg (Religious Studies), Stephen Haber (Political Science), Herbert Klein (History), Ian Morris (Classics)

Directors’ Committee: Keith Baker (History), Carl Bielefeldt (Religious Studies), Judith Goldstein (Political Science), Robert Gregg (Religious Studies), Linda Hass (Religious Studies), Herbert Klein (History), Nancy Kollmann (History), Abbas Milani (Hoover), Richard Roberts (History), Aron Rodrigue (History), Kenneth Schultz (Political Science), Stephen Sedman (Freeman Spogli Institute for International Studies), Chao Fen Sun (Asian Languages), Michael Zimmerman (Religious Studies), Steven Zipperstein (History)

Division Office: Encina Hall West, Room 216
Mail Code: 94305-6045
Web Site: http://ica.stanford.edu

The Division of International Comparative and Area Studies (ICA) supports research and teaching in the cultures and societies of the world, and studies the problems facing developing societies as they seek to end their poverty and social and economic inequalities. ICA promotes new centers of teaching excellence in traditional areas of historical and cultural concerns, as well as promoting interdisciplinary activities related to developing new ideas for dealing with fundamental issues of justice, equality, and growth within nation states, cultures, and regions.

The Division of International Comparative and Area Studies is comprised of research centers, degree granting programs, and religious and cultural centers: Center for African Studies*; Center for Asian Studies*; Center for Latin American Studies*; Center for Middle Eastern Studies*; Center for Russian, East European and Eurasian Studies*; Ford Dorsey Program in International Policy Studies*; International Relations*; Mediterranean Studies Forum; Moghadam Program in Iranian Studies; Asian Religions and Cultures; Stanford Center for Islamic Studies; Taube Center for International Studies; Encina Hall West, Room 212
Phone: (650) 725-6025
Mail Code: 94305-6045
Web Site: http://ica.stanford.edu

The Center for African Studies (CAS) coordinates an interdisciplinary program for undergraduates and graduate students. For further information, see the “Center for African Studies” section of this bulletin.

CENTER FOR AFRICAN STUDIES

Director: Richard Roberts
Web Site: http://africanstudies.stanford.edu

ASIAN RELIGIONS AND CULTURES

Director: Carl Bielefeldt
Office: Encina Hall West, Room 212
Phone: (650) 725-6025
Mail Code: 94305-6045
Web Site: http://ica.stanford.edu/?q=arc

Asian Religions and Cultures (ARC) is an interdisciplinary initiative dedicated to the enhancement of Stanford’s resources in Asian humanities. ARC consists of research, curricular support, and academic and public events. ARC seeks to involve many University constituencies, including some not specifically concerned with Asian studies, in the integration of Asian humanities into research and teaching. The initiative also looks beyond the University to develop programs of more general interest.
INTERNATIONAL, COMPARATIVE AND AREA STUDIES

CENTRAL FOR BUDDHIST STUDIES
Director: Michael Zimmermann
Office: Building 70, Room 71E
Phone: (650) 736-1301
Mail Code: 94305-2165
Web Site: http://ica.stanford.edu/?q=scbs

The Stanford Center for Buddhist Studies (SCBS) serves to coordinate, support, and develop the University’s resources for Buddhist Studies in scholarly research, academic communication, teaching, and public outreach. The center supports individual and team research projects for faculty, students, and visiting fellows. It houses a reference collection and reading room and sponsors lectures, conferences, symposia, workshops, and seminars. The center works closely with the Department of Religious Studies, the Asian Religions and Culture Initiative, the Buddhism in the Modern World Program, and the Group in Buddhist Studies at UC Berkeley.

CENTRAL FOR EAST ASIAN STUDIES
Director: Chao Fen Sun
Web Site: http://ceas.stanford.edu

The Center for East Asian Studies (CEAS) seeks to increase interdisciplinary communication among scholars whose research, teaching, or study focuses on East Asia. CEAS offers bachelor’s and master’s degree programs. It sponsors programs that link the University’s East Asia resources with civic groups, secondary schools, local colleges, and the public.

For further information, see the “Center for East Asian Studies” section of this bulletin.

FRANCE-STANFORD CENTER FOR INTERDISCIPLINARY STUDIES
Director: Keith Baker
Office: Building 260, Room 105
Phone: (650) 725-3029
Mail Code: 94305-2010
Web Site: http://ica.stanford.edu/?q=francestanford

The France-Stanford Center for Interdisciplinary Studies, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, addressing historical and contemporary issues of significance for France and the United States. The center brings together Stanford faculty and students and academics in France to advance collaborative research and foster interdisciplinary inquiry. Its programs include conferences, support for collaborative research projects, internships, exchanges, lectures, and seminars.

INTERNATIONAL POLICY STUDIES
Director: Ford J. Stedman
Web Site: http://ica.stanford.edu/?q=ips

Ford Doryse International Policy Studies (IPS) is a master’s program that seeks to train the next generation of policy analysts in analytical and policy skills and the substantive issues that face the world today.

For further information, see the “International Policy Studies” section of this bulletin.

INTERNATIONAL RELATIONS
Director: Kenneth Schultz
Web Site: http://ica.stanford.edu/?q=internationalrelations

International Relations (IR) is an interdisciplinary undergraduate major focusing on changing political, economic, and cultural relations within the international system in the modern era.

For further information, see the “International Relations” section of this bulletin.

PROGRAM IN IRANIAN STUDIES
Director: Abbas Milani
Office: Encina Hall West, Room 206
Phone: (650) 736-0501
Mail Code: 94305-6045
Web Site: http://ica.stanford.edu/?q=iranianstudies

The Hamid and Christina Moghadam Program in Iranian Studies at Stanford fosters the interdisciplinary study of Iran as a civilization, one of the oldest in the world. The program combines pedagogy, policy analysis, and research on all aspects of Iran’s past, present, and future. The program organizes lectures and student research conferences on Iran.

PROGRAM IN ISLAMIC STUDIES
Director: Robert Gregg
Office: Encina Hall West, Room 214
Phone: (650) 736-8169
Mail Code: 94305-6045
Web Site: http://www.stanford.edu/dept/islamic_studies/

The mission of the Sohaib and Sara Abbasi Program in Islamic Studies is to serve as a forum for interdisciplinary research and teaching in Islamic studies, complemented by seminars, colloquia and public lectures. The program seeks to illuminate Islamic history from its beginnings to the 21st century, the religion of Islam in its many aspects, and the diversity of Muslim cultures and societies, past and present, not only in the Middle East but also including South and Southeast Asia, Africa, Europe, and America. In addition to geographical breadth, the program promotes the use of scholarly resources from both the humanities and the social sciences. Participating faculty and students bring perspectives and methods from academic fields, including anthropology, art, economics, history, international relations, languages, law, literature, philosophy, political science, and religious studies.

CENTER FOR JEWISH STUDIES
Director: Steven Zipperstein
Web Site: http://www.stanford.edu/dept/jewishstudies/

The interdisciplinary Taube Center for Jewish Studies coordinates and promotes the study of all aspects of Jewish life. The center offers an undergraduate minor.

For further information, see the “Taube Center for Jewish Studies” section of this bulletin.

CENTER FOR LATIN AMERICAN STUDIES
Director: Herbert S. Klein
Web Site: http://las.stanford.edu/

The Center for Latin American Studies at Stanford University (CLAS) offers academic programs for students, coordinates academic conferences and lectures, and fosters interdisciplinary research for students and faculty through fellowships and funding opportunities. The center offers an undergraduate minor, an interdisciplinary honors certification for undergraduates, and a master’s degree.

For further information, see the “Center for Latin American Studies” section of this bulletin.

MEDITERRANEAN STUDIES FORUM
Director: Aron Rodrigue
Office: Encina Hall West, Room 206
Phone: (650) 736-0501
Mail Code: 94305-6045
Web Site: http://ica.stanford.edu/?q=mediterraneanstudies

The Mediterranean Studies Forum encourages scholars to explore the interplay among societies, cultures, and communities around the Mediterranean Basin from the Middle Ages to the present. Its focus is on all aspects of co-existence and conflict that have marked these encounters in the empires, port cities, nation states, and transregional and transnational social, religious, cultural, and economic contexts of N. Africa, the Levant, the Balkans, and southern Europe. It is also interested in the relations of the Mediterranean with other regions and areas of the world. The central goal
of the forum is to contribute to interfield and interdisciplinary dialogue among scholars of these areas through lectures, colloquia, workshops, conferences, and publications.

**CENTER FOR MODERN AND CONTEMPORARY EUROPEAN STUDIES**

*Director:* Aron Rodrigue  
*Office:* Encina Hall West, Room 206  
*Phone:* (650) 736-0501  
*Mail Code:* 94305-6045

The Center for Modern and Contemporary European Studies is a multidisciplinary institute committed to the examination of European society, culture, politics, diplomacy, and security. The center’s goal is to develop Stanford’s contribution to the study of Europe’s history and contemporary position as a global power by bringing together students and scholars from the humanities and the social sciences, policy makers, diplomats, and journalists. The center sponsors visiting professors, intellectuals, and dignitaries from Europe to teach undergraduate and graduate courses at Stanford on themes related to European history, culture, and current events.

**CENTER FOR RUSSIAN, EAST EUROPEAN AND EURASIAN STUDIES**

*Director:* Nancy S. Kollmann  
*Web Site:* [http://CREEES.stanford.edu](http://CREEES.stanford.edu)  
*Mail Code:* 94305-6045

The Center for Russian, East European and Eurasian Studies (CREEES) offers an undergraduate minor and a one-year master’s program in interdisciplinary area studies. For further information, see the “Center for Russian, East European and Eurasian Studies” section of this bulletin.

**CENTER FOR SOUTH ASIAN STUDIES**

*Co-Directors:* Carl Bielefeldt, Linda Hess  
*Center Office:* Encina Hall West, Room 212  
*Phone:* (650) 725-6025  
*Mail Code:* 94305-6045

The Center for South Asian Studies serves to coordinate and develop Stanford’s resources for the study of South Asia across all the disciplines in the School of Humanities and Sciences. It works closely with departments and other units of the University to increase faculty strength, support research, enhance the curriculum, build the library collection, and sponsor programs and events.

**COURSES**

ICA 100. *Current International Comparative and Area Issues* — Seminar series. Scholars present current methodological and substantive issues from different part of the world in an international and comparative context. May be repeated for credit.  
1-2 units, Aut, Win, Spr (Staff)

---

**INTERNATIONAL POLICY STUDIES**

**Director:** Stephen Stedman (Freeman Spogli Institute for International Studies)  
**Associate Director:** Martin W. Lewis (International Policy Studies)  
**Executive Committee Co-chairs:** Coit D. Blacker (Freeman Spogli Institute for International Studies), Judith L. Goldstein (Political Science)  
**Lecturers:** Chonira Aturupane, Gili Drori, John Dunlop, Keith Hansen, Moonhawk Kim, Peter Lorentzen, Kenneth McElwain

**Affiliated Faculty:** Jonathan Bendor (Business), Gordon Chang (History), Larry Diamond (Hoover Institution), Lynn Eden (Sociology), Walter P. Falcon (Freeman Spogli Institute for International Studies), James Fearn (Political Science), Larry Gould (Economics), Stephen H. Haber (Political Science), David J. Holloway (History, Political Science), Simon Jackman (Political Science), Timothy Josling (Freeman Spogli Institute for International Studies), Terry Karl (Political Science), Stephen D. Krasner (Political Science), Gail Lapidus (Freeman Spogli Institute for International Studies), Beatriz Magaloni (Political Science), Isabela Mares (Political Science), Michael McFaul (Political Science), Ronald I. McKinnon (Economics), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Roger G. Noll (Economics, emeritus), Jean Oi (Political Science), Daniel Okimoto (Political Science), Robert A. Packenham (Political Science), William Perry (Management Science and Engineering), Douglas Rivers (Political Science), Richard Roberts (History, Stanford), Scott D. Sagan (Political Science), Michael Tomz (Political Science), Andrew Walder (Sociology), Jeremy Weinstein (Political Science), Ann Wren (Political Science)

**Visiting Professor:** Richard Steinberg  
**Visiting Associate Professor:** Allison Danner

**Other Affiliation:** Christophe Crombez (Freeman Spogli Institute for International Studies), Jonathan Greenberg (Law), Katherine Jolluck (History), Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies)  
*Program Office:* Encina Hall West, Room 216  
*Mail Code:* 94305-6045  
*Phone:* (650) 723-4547  

Courses given in International Policy Studies have the subject code IPS. For a complete list of subject codes, see Appendix.

**GRADUATE PROGRAM**

**MASTER OF ARTS**

International Policy Studies (IPS) is an analytical interdisciplinary program focusing on international policy analysis. Its goal is to provide students with exposure to issues that they face in international business and public policy, and to develop skills and knowledge to address those issues. Students may focus on: the international economic system; developing relations, as well as calculus-based undergraduate courses in statistics, microeconomics, and macroeconomics. Stanford courses satisfying these
requirements are POLSCI 1 or IPS 204, and ECON 51, 52, and 102A. In addition, to fulfill the program requirements in one year, students must have completed one advanced undergraduate course in international economics, and one in either security studies or international political economy. Stanford courses that meet these requirements are ECON 165 and POLSCI 110A,B,C, or D.

Applicants from schools other than Stanford or applicants from Stanford who did not apply in their senior year should submit a graduate admission application including a statement setting forth relevant personal, academic, and career plans and goals; official transcripts; three letters of recommendation; Graduate Record Examination (GRE) scores; and a writing sample of at least ten pages. TOEFL scores are required of applicants for whom English is not their first language or who did not attend an undergraduate institution where English is the language of instruction. To apply or for information on graduate admission, see http://gradadmissions.stanford.edu. Applicants are expected to have a B.A. or B.S. degree from an accredited school. Applications for admission in Autumn Quarter must be filed with supporting credentials by January 9, 2007.

Undergraduates at Stanford may apply for admission to the cotermlar master’s program in IPS when they have earned a minimum of 120 units toward graduation, including AP and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The cotermland application requires the following supporting materials: two letters of recommendation from University faculty, a writing sample of at least ten pages, and a statement of relevant personal, academic, and career plans and goals. Applications must be filed together with supporting materials by January 9.

For University cotermland degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

DEGREE REQUIREMENTS

To receive the M.A. degree in International Policy Studies, students must complete the items below. These requirements entail 23 units of core courses and an additional 25 units from the cognate curriculum. These courses have the following prerequisites: ECON 51, 52, 102A or POLSCI 350A, and ECON 165; POLSCI 1 or IPS 204 and POLSCI 110A,B,C, or D.

Core —
1. Seminar requirement: IPS 200, Issues in International Policies (3 units)
2. Skills requirement: any three of the following courses (15 units) — IPS 205; POLSCI 350A,B,C, 352
3. International economics requirement (5 units): IPS 202, Topics in International Macroeconomics; or IPS 203, Issues in International Economics

Cognate Curriculum — Students must take 25 units of other IPS approved courses for their cognate. All students must take IPS 204 as part of the cognate curriculum. At least 15 units must be in one of the following areas of specialization and 10 units must be in two other areas of specializations (a complete list of the courses in these areas is available in the IPS program office):
- International Political Economy
- Conflict/Security Studies
- Political and Economic Development
- Public Organizations and Policy Implementation
- World Environmental Policy

Area Specialization — Students may earn an area specialization certificate by completing 15 additional units of coursework focusing on one region. Options include Asia, Eastern Europe/Russia, Latin America, and Western Europe. Area specialization units may not be counted toward the cognate curriculum requirement.

Master’s Thesis — Students are not required to write a master’s thesis; however, students may register for 10 units of thesis research under the guidance of a faculty member. Thesis proposals must be approved by the program director. Thesis units may not be counted toward the cognate curriculum requirement. Students should register for IPS 290.

In addition, students must meet the following deadlines:
1. Complete and file the IPS Program Proposal, available in the IPS office, no later than the second week of Autumn Quarter. Students should list all courses to be used to fulfill the IPS requirements, including the required IPS 200 course. Cotermland students must list unduplicated courses, that is, courses not counted toward an undergraduate degree.
2. Use Axess to file an Application to Graduate by the appropriate deadline.

Grade Requirements — All courses to be counted toward the degree, except for the core seminar, must be taken for a letter grade and receive a grade of ‘B’ or higher.

Financial Aid — Undergraduates may petition for a fifth year of financial aid as cotermland students. Note that these petitions can only be made if the undergraduate degree has not been conferred. University-based financial aid is not normally available for graduate students entering the IPS program.

COURSES

See the IPS degree requirements in the IPS program office or at http://ica.stanford.edu/q=ips for updated information on additional courses.

IPS 200. Contemporary Issues in International Policies — For IPS students only. Lecture series. Scholars present their analysis of major international public policy issues. May be repeated for credit.
1 unit, Aut, Win, Spr (Stedman, S)

IPS 202. Topics in International Macroeconomics — Topics: standard theories of open economy macroeconomics, exchange rate and stabilization policies, the economics of monetary unification and the European Monetary Union, and emerging markets financial and currency crises.
5 units, Aut (Aturupane, C)

IPS 203. Issues in International Economics — Topics in international trade and international trade policy: trade and growth, regionalism versus multilateralism, the political economy of trade policy, strategic trade policy, trade and labor, and trade and the environment.
5 units, Win (Aturupane, C)

IPS 204. Theories and Concepts in International Relations — Seminar. Theoretical approaches and empirical issues in the study of world affairs. Applications to problems of cooperation and conflict. Issues include violent conflicts, trade and finance, the environment and human rights, and normative theories of international relations surrounding these issues.
5 units, Aut (Kim, M)

IPS 205. Applied Game Theory for Political Economy — Solution concepts from non-cooperative game theory with applications in economics and political science. Imperfect information and signaling, off equilibrium path beliefs, and mechanism design. Emphasis is on application over formal proof. Prerequisite: background in non-cooperative game theory.
5 units, not given this year

IPS 207. Governance, Growth, and Development — The concept of governance and the economics of corruption. Neoclassical and endogenous growth theory and development. The relationship between governance and growth, and development; the resultant policy implications through theoretical and empirical research, and country case studies.
5 units, Spr (Aturupane, C)

IPS 219. The Role of Intelligence in U.S. Foreign Policy — How intelligence supports U.S. national security and foreign policies. How it has been used by U.S. presidents to become what it is today; organizational strengths and weaknesses; how it is monitored and held accountable to the goals of a democratic society; and successes and failures. Current intelligence analyses and national intelligence estimates are produced in support of simulated policy deliberations.
5 units, Spr (Hansen, K.)
IPS 220. Comparative Political Institutions — How the rules of the game affect political competition and policy output. How formal political institutions determine who gets into power and how much authority they have; how these institutions arise, what they do, and how they can be manipulated. Topics include the influence of electoral rules on partisan competition, why the difference between parliamentary and presidential systems matter, the costs and benefits of federalism, and principal-agent relationships among voters, elected representatives, and bureaucrats. Prerequisite: familiarity with statistical analysis.
5 units, Win (Mcelwain, K)

IPS 222A. The Political Economy of the European Union — EU institutions, the legislative process, policies, relations with the U.S., and enlargement and the future of the EU. History and theories of EU integration. Democratic accountability of the institutions, and the emerging party system. Principal policies in agriculture, regional development, the internal market, single currency, and competition. Emphasis is on policies that affect the relations with the U.S. including trade and security. Results of the EU’s constitutional convention.
5 units, Win (Crombez, C.)

IPS 225. Japanese Politics and Political Economy — How the postwar Japanese experience confirms or defies accepted wisdom in comparative and international politics. Why has a once-robust economy been flat for over a decade; is political mismanagement to blame? What are the causes and consequences of the LDP’s single-party dominance? Why has Japan not leveraged its economic weight into political power? Prerequisites: course in each of comparative politics and international relations.
5 units, Aut (Mcelwain, K)

IPS 230. Science, Technology, and Development — (Same as INTNLREL 130.) Global and sociological perspectives on science and technology expansion, comparing nations and regions. Social features such as gender equity; and social impact economic development strategies such as tech incubators, the triple helix model, and UN initiatives. Democratization, human rights, welfare of local populations, and national security. Policy issues, the digital divide, development debates, commodification of the public good, and notions of social change.
5 units, Aut (Drori, G)

IPS 231. Globalization and Organizations — (Same as INTNLREL 131.) How organizations act as the carriers of globalization processes by expanding worldwide, proliferating social procedures, establishing isomorphic structures, and diffusing cultural patterns. Political structures, international relations, commercial organizations, cultural institutions. Global organizational expansion, forms of organizational adaptation, notions of national sovereignty under global organizational expansion, and forms of national and international governance. Studies of global organizational fields including science, rights, environment, development, combining theoretical, comparative, and case study pieces.
5 units, Spr (Drori, G)

IPS 233. Introduction to Comparative and International Political Economy — Major theoretical approaches and empirical issues in international economic policies and outcomes. Review of economic theories underlying political conflicts. Topics include trade, monetary relations, sovereign debt, investment, migration and development. Comparison of developed and developing countries.
5 units, Spr (Mcelwain, K)

IPS 236. The Chinese Economy — China’s ongoing economic transformation. Microeconomic issues such as agricultural reform, rural enterprises, privatization, development of financial and goods markets, social welfare, role of foreign investment, and legal and institutional environment. Macroeconomic issues such as trade, financial openness, and inflation. Political economy considerations in policy formulation. Prerequisites: ECON 51, 52, 102B, or equivalents.
5 units, Spr (Lorentzen, P)

IPS 241A. Theories of International Law — Competing theories of international law, including approaches based on natural law, positivism, the Grotian tradition, realism, rational institutionalism, liberalism, social construction, and critical theory; evaluations based upon explanatory power, parsimony, and prescriptive implications. How international legal arguments are made through each theoretical perspective. Primary and secondary materials by international law theorists and political scientists. Term paper.
5 units, Win (Steinberg, R)

IPS 241B. International Criminal Justice — Focus is on the International Criminal Court, international criminal tribunals conducted at Nuremberg and Tokyo, and tribunals for the former Yugoslavia and Rwanda. Legal and political dimensions of the developing system of international criminal law. Policy questions surrounding international prosecutions and alternatives to prosecution.
5 units, Spr (Danner, A.)

IPS 249. The Economics and Political Economy of the Multilateral Trade System — The historical development of the multilateral trade system, the current agenda of the World Trade Organization, and prospects for trade liberalization. Emphasis is on the economic rationale for multilateral trade rules, the political problems facing countries in supporting further liberalization, and the challenges to the legitimacy of WTO procedures and practices. Issues include the greater participation of developing countries, the impact of new members, and the relationship between the WTO and other multilateral bodies. Guest speakers; student research paper presentations.
5 units, Win (Josling, T.)

IPS 266. Russia and Islam — Seminar. Focus is on 1985 to the present. The policies of Gorbachev toward the Muslim populace of the Soviet Union; how post-communist Russia under Yeltsin and Putin has dealt with its Muslim minorities; and the relationship of Russia to the newly independent states of Central Asia and the South Caucasus after the breakup of the USSR in 1991. The two major wars which Russia has fought with the secessionist Russian autonomous republic of Chechnya.
5 units, Win (Dunlop, J.)

IPS 290. Master’s Thesis — IPS students only. May be repeated for credit. 1-10 units, Aut, Win, Spr, Sum (Staff)

IPS 299. Directed Reading — IPS students only. May be repeated for credit. 1-5 units, Aut, Win, Spr, Sum (Staff)

IPS 314S. Decision Making in U.S. Foreign Policy — (Same as POLISCI 314S.) Priority to IPS students. Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies.
5 units, Spr (Blacker, C)

COGNATE COURSES
See respective department listings for course descriptions. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

CEE 171. Environmental Planning Methods
3 units, Win (Ortolano, L)

ECON 106. World Food Economy
5 units, Win (Falcon, W; Naylor, R)

ECON 155. Environmental Economics and Policy — (Same as EARTH-SYS 112.)
5 units, Spr (Gurney, D)

ECON 169/269. International Financial Markets and Monetary Institutions
5 units, Spr (Taylor, J)

ECON 214. Development Economics: Microeconomic Issues
2-5 units, Aut (Jayachandran, S)

ECON 216. Development Economics and Growth: Macroeconomics
2-5 units, Win (Mahajan, A)
ECON 224. Science, Technology, and Economic Growth
2-5 units, Win (David, P)

ECON 243. Economics of Environment
2-5 units, Spr (Goulder, L)

ECON 265. International Finance and Open Economy Macroeconomics
2-5 units, Aut (McKinnon, R)

ECON 266. International Trade
2-5 units, Win (Staiger, R)

HISTORY 256/356. U.S.-China Relations: From the Opium War to Tiananmen
5 units, Win (Chang, G)

MS&E 193/193W/293. Technology and National Security
3 units, Aut (Perry, W; Hecker, S)

MS&E 134/234. Organizations and Information Systems
4 units, Win (Fabrizi, B)

MS&E 249. Growth and Development
3 units, Sum (De La Grandville, O)

MS&E 250A. Engineering Risk Analysis
2-3 units, Win (Paté-Cornell, E)

MS&E 254. The Ethical Analyst
1-3 units, Spr (Howard, R)

MS&E 271. Global Entrepreneurial Marketing
4 units, Win, Spr (Kosnik, T; Novitsky, D; Ramfelt, L; Smith, L)

5 units, Win (Sagan, S)

POLISCI 141. The Global Politics of Human Rights
5 units, not given this year

POLISCI 340S. Political Economy of Post-Communism
5 units, Win (McFaul, M)

POLISCI 346S. The Logic of Authoritarian Government—(Same as HISTORY 278A/378A.)
5 units, Win (Haber, S)

POLISCI 348. Chinese Politics: The Transformation and the Era of Reform
5 units, Aut (Miller, L)

POLISCI 350A,B,C. Political Methodology
A: 5 units, Aut (Rivers, D); B: 5 units, Win (Jackman, S), C: 3-5 units, Spr (Jackman, S)

POLISCI 352. Introduction to Game Theoretic Methods in Political Science
3-5 units, Win (Fearon, J)

POLISCI 362. New Economics of Organization—(Same as OB 686.)
5 units, Spr (Weingast, B)

POLISCI 364. Politics and Organization
4 units, Win (Moe, T)

POLISCI 365. Organizational Decision Making
5 units, Win (Bendor, J)

SOC 111/211. State and Society in Korea
5 units, Win (Shin, G)

SOC 114/214. Economic Sociology
5 units, Aut (Granovetter, M)

SOC 117A/217A. China Under Mao
5 units, Spr (Walder, A)

SOC 160/260. Formal Organizations
5 units, Spr (Zhou, X)

INTERNATIONAL RELATIONS

Director: Kenneth Schultz (Political Science)
Faculty Committee: Coit D. Blacker (Freeman Spogli Institute for International Studies), James Fearon (Political Science), Judith L. Goldstein (Political Science), Stephen H. Haber (Political Science), Timothy Josling (Freeman Spogli Institute for International Studies), Michael McFaul (Political Science), Ronald I. McKinnon (Economics), Michael Tomz (Political Science)

Affiliated Faculty: Barton Bernstein (History), Gordon Chang (History), Larry J. Diamond (Hoover Institution), Peter Duus (History), Amir Esfahani (German Studies), Walter P. Falcon (Freeman Spogli Institute for International Studies), Zephyr Frank (History), Lawrence H. Goulder (Economics), David J. Holloway (History, Political Science), Terry L. Karl (Political Science), David M. Kennedy (History), Stephen D. Krasner (Political Science), Gail Lapidus (Freeman Spogli Institute for International Studies), Beatriz Magaloni (Political Science), Mark L. Mancall (History), Isabella Mares (Political Science), Robert McGinn (Management Science and Engineering), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Jean C. Oi (Political Science), Daniel I. Okimoto (Political Science), Robert Packenham (Political Science), William J. Perry (Freeman Spogli Institute for International Studies, Management Science and Engineering), Richard Roberts (History), Scott Sagan (Political Science), Debora M. Satz (Philosophy), James J. Sheehan (History), Andrew Walder (Sociology), Amir Weiner (History), Jeremy Weinstein (Political Science), Ann Wren (Political Science)

Other Affiliation: Gili S. Drori (International Relations), Katherine Jolluck (History), Pawel Lukwiski (International Relations), H. Lyman Miller (Hoover Institution), Bertrand Patenaude (Hoover Institution), Stephen Stedman (Political Science), Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies)

Program Office: Encina Hall West, Room 216
Mail Code: 94305-6045
Phone: (650) 723-4547
Web Site: http://ica.stanford.edu/?q=internationalrelations

Courses in International Relations have the subject code INTNLREL. For a complete list of subject codes, see Appendix.

International Relations (IR) is an interdisciplinary undergraduate major focusing on the changing political, economic, and cultural relations within the international system in the modern era. The program explores how global, regional, and domestic factors influence relations among actors on the world stage. Students are equipped with the foundational skills and knowledge necessary to analyze the choices and challenges that arise in this arena. IR majors pursue a course of study in world politics that includes courses in political science, economics, history, and languages, focusing on issues such as international security, international political economy, political and economic development, and democratization. As an integral part of the major, students must spend at least one quarter overseas and show two-year proficiency in a foreign language. Many IR students pursue careers in government, nongovernmental organizations, and business, or go on to graduate school in law, business, economics, or political science.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Requirements for the major (70 units) are:
1. IR core courses (numbers 1-5):
   1. POLISCI 1
   2. POLISCI 110A or 110B or 110C or 110D or HISTORY 158
   3. ECON (10 units), two of these five courses: ECON 1A, 1B, 50, 51, 52
   4. Two additional upper-division Economics courses from the IR approved course offerings lists
   5. At least one of the following skills classes: ECON 102A, POLISCI 150A, STATS 60

STANFORD BULLETIN, 2006-07 | 459
6. Complete either a functional specialization or an area specialization (see below for descriptions of specializations). Courses that are used in the core area (1-5 above) cannot also be counted for the specialization.
7. At least one course must be an upper-division seminar or colloquium.
8. At least one course designated as writing intensive (WIM) for International Relations.
9. No more than 20 units can be lower-division courses.
10. A minimum grade of "C" is required for courses to count towards major requirements.
11. Completion of one quarter study overseas either through the Stanford Overseas Studies Program or an approved non-Stanford program.
12. Proficiency in a foreign language through two years of course work (second-year, third-quarter) or a proficiency exam.

FUNCTIONAL SPECIALIZATION

The three functional specializations are:
1. Comparative Political and Historical Analysis (CPHA)
2. Comparative Culture and Society (CCAS)
3. Comparative and International Political Economy (CIPE)

Students must complete a total of seven courses (35 units) for their functional specialization. Four courses must be from the student’s functional area (CPHA, CCAS, CIPE); two courses from a second track; and the final course from the third track (4-2-1). Consult the updated course offering lists available in the International Relations office or on the web site for IR approved courses in each track.

AREA SPECIALIZATION

The area specializations are: Africa, Europe, Latin America, and Russia/East Europe. Students must complete a total of seven courses (35 units) with five courses directly related to their area specialization. Three of these five courses must be in one of the three tracks (CPHA, CCAS, CIPE), one course in a second track, and the final course in the third track. The ten remaining units must be fulfilled by comparative or further area course work.

Students must also demonstrate proficiency in a language, other than English, commonly spoken in the area chosen by completing two years of language study or by passing a second-year, third-quarter proficiency exam. Students can fulfill the overseas studies requirement by participating in an IR-approved Overseas Studies Program in the area of specialization.

Check the IR office for updated information about the area specialization requirements.

DECLARING THE MAJOR

The International Relations major must be declared no earlier than the beginning of sophomore year and no later than the end of the second quarter of the junior year. Students must submit an acceptable proposal to the director of the program and declare IR on Axess. Students completing a double major, or fulfilling International Relations as a secondary major, are also required to file a proposal by the end of the second quarter of the junior year.

MINORS

A minor in International Relations is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. Declaration of the minor must take place no later than the end of the second quarter of the junior year. To declare, complete the application for a minor on Axess.

Students complete the minor by taking seven unduplicated courses (35 units) from the IR curriculum, including the following:
1. POLISCI 1
2. Two of these four courses: POLISCI 110A, B, C, D
3. Four courses from one of the three tracks (CPHA, CCAS, CIPE), or four courses relating to the same geographic region (Africa, Europe, Latin America, and Russia/East Europe). Consult the updated course offering lists available in the International Relations office or on the web site.

HONORS PROGRAM

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students can select from the IR honors option or the CDDRL (Center on Democracy, Development, and the Rule of Law) option which focuses on issues of democracy, development, and the rule of law; for information on the CDDRL, see http://cddrl.stanford.edu/.

Students should submit their honors thesis proposal in the Spring Quarter of their junior year; check with IR office for the exact deadline.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students are required to enroll in INTNLREL 200A, International Relations Honors Field Research, in Spring Quarter of their junior year and consider participating in Honors College. CDDRL option students should enroll in INTNLREL 199, Honors Research: Democracy, Development, and the Rule of Law in Developing Countries. In their senior year, honors students must enroll in INTNLREL 200B in Autumn Quarter and in research units each quarter with their faculty adviser. Honors students present a formal defense of their theses in mid-May. Students must receive at least a grade of ‘B+’ in order to graduate with honors in International Relations.

GRADUATE PROGRAM

MASTER OF ARTS

It is possible for students majoring in International Relations to work simultaneously for a coterminal master’s degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to ensure that they fulfill the degree requirements in both fields. For information on the M.A. program in International Policy Studies, see the “International Policy Studies” section in this bulletin.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement for International Relations.

CORE

ECONOMICS

ECON 1A. Introductory Economics A
5 units, Aut (Clerici-Arias, M), Win (Wright, G)
ECON 1B. Introductory Economics B
5 units, Win, Spr (Staff)
ECON 50. Economic Analysis I
5 units, Aut (Abramitzky, R), Spr (Tendall, M)
ECON 51. Economic Analysis II
5 units, Win (Einav, L), Sum (Staff)
ECON 52. Economic Analysis III
5 units, Aut (Leeson, R), Spr (Klenow, P), Sum (Desmet, K)
ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists — GER:DB-Math
5 units, Aut (Tendall, M), Win (Gurney, D)

HISTORY

HISTORY 158. The United States Since 1945
4-5 units, Win (Bernstein, B)
POLITICAL SCIENCE

POLISCI I. Introduction to International Relations — GER:DB-SocSci
5 units, Aut (Schultz, K)

POLISCI 110B. Strategy, War, and Politics — GER:DB-SocSci
5 units, not given this year

POLISCI 110C/110X. America and the World Economy
5 units, Win (Goldstein, J)

POLISCI 110D/110Y. War and Peace in American Foreign Policy
5 units, Spr (Schultz, K)

POLISCI 150A/350A. Political Methodology I
5 units, Aut (Rivers, D)

STATISTICS

STATS 60/160. Introduction to Statistical Methods: Precalculus — (Same as PSYCH 10.) GER:DB-Math
5 units, Aut (Walther, G), Win (Thomas, E), Spr (Switzer, P), Sum (Richards, W)

ADDITIONAL OFFERINGS

The courses listed below fulfill the IR functional specialization track requirements in CPHA, CCAS, and CIPE, and can fulfill the area specialization option in Africa, Europe, Latin America, or Russia/East Europe. See http://ica.stanford.edu/?q=internationalrelations or the International Relations program office for specific course designations. For course descriptions and General Education Requirement (GER) information, see the respective department listings. Additional relevant courses may be offered; for updated information, visit the office or the web site.

COMPARATIVE POLITICAL AND HISTORICAL ANALYSIS (CPHA)

INTNLREL 114D. Democracy, Development, and the Rule of Law — (Same as POLISCI 114D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.
5 units, Aut (Stoner-Weiss, K; McFaul, M)

INTNLREL 131. Globalization and Organizations — (Same as IPS 231.) How organizations act as the carriers of globalization processes by expanding worldwide, proliferating social procedures, establishing isomorphic structures, and diffusing cultural patterns. Political structures, international relations, commercial organizations, cultural institutions. Global organizational expansion, forms of organizational adaptation, notions of national sovereignty under global organizational expansion, and forms of national and international governance. Studies of global organizational fields including science, rights, environment, development, combining theoretical, comparative, and case study pieces. WIM
5 units, Spr (Drori, G)

INTNLREL 140A. International Law and International Relations — What is the character of international legal rules? Do they matter in international politics, and if so, to what degree? The foundational theories, principles, and sources of public international law. Prominent theories of international relations and how they address the role of law in international politics. Practical problems such as human rights, humanitarian intervention, and enforcement of criminal law. International law as a dynamic set of rules, at times influenced by power, at other times constraining it, but always essential to studying international relations. WIM
5 units, Aut (Lutomski, P)

INTNLREL 163. History and Geography of Contemporary Global Issues — (Same as HISTORY 206.) The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of The New York Times and The Economist.

Topics vary according to what is happening in the world. Student presentations. GER:DB-SocSci, WIM
5 units, Spr (Lewis, M)

INTNLREL 167. Political and Economic Change in the Former Soviet Union — From Gorbachev to the present. The main institutions of the Soviet system and theories of its collapse. Reforms and the social impact of rapid systemic change. Topics include shock therapy such as privatization and economic liberalization, nationalism, crime, democratization and authoritarianism, and legislative reform. Comparison of the process of change in the former Soviet Union with democratic and market transitions in Latin America and elsewhere.
5 units, Win (Stoner-Weiss, K)

INTNLREL 205. Ethics, Technology, and International Relations — Applicability of ethical principles to the analysis of international affairs including border control, intervention, transborder diffusion of national cultural products, foreign aid, national and international cultural patrimony, and war and terrorism. The role of technology in challenging traditional thinking about ethical issues in international affairs. Emphasis is on the interplay of theory and practice. Case studies. Limited enrollment.
5 units, not given this year (McGinn, R)

HISTORY

HISTORY 102. The History of the International System — WIM
5 units, Spr (Sheehan, J)

HISTORY 103E. History of Nuclear Weapons — (Same as POLISCI 116.) GER:DB-SocSci
5 units, Spr (Holloway, D)

HISTORY 120C. 20th-Century Russian and Soviet History
5 units, Aut (Patenaude, B)

HISTORY 125. 20th-Century Eastern Europe
5 units, Win (Jollock, K)

HISTORY 137. The Holocaust
5 units, Win (Staff)

HISTORY 145B. Africa in the 20th Century
5 units, Spr (Roberts, R)

HISTORY 150C. The United States in the Twentieth Century
5 units, Spr (Camarillo, A; Chang, G)

HISTORY 158. The United States Since 1945
4-5 units, Win (Bernstein, B)

HISTORY 181B. The Middle East in the 20th Century
5 units, Spr (Weiss, M)

HISTORY 195C. Modern Japanese History
5 units, Win (Staff)

HISTORY 197. Southeast Asia: From Antiquity to the Modern Era
5 units, Win (Lewis, M)

HISTORY 202/306E. International History and International Relations Theory — (Same as POLISCI 316.)
5 units, Win (Holloway, D)

HISTORY 224A. Modern Russia, Iran, and Afghanistan
5 units, Aut (Crews, R)

5 units, not given this year

HISTORY 252/355. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis — GER: DB-SocSci
5 units, not given this year

HISTORY 256/356. U.S.-China Relations: From the Opium War to Tiananmen
5 units, Win (Chang, G)
**INTERNATIONAL POLICY STUDIES**

IPS 219. The Role of Intelligence in U.S. Foreign Policy  
5 units, Spr (Hansen, K)

IPS 220. Comparative Political Institutions  
5 units, Win (Mcelwain, K)

IPS 241A. Theories of International Law  
5 units, Win (Steinberg, R)

**MANAGEMENT SCIENCE AND ENGINEERING**

MS&E 193/193W/293. Technology and National Security  
5 units, Aut (Perry, W; Hecker, S)

**POLITICAL SCIENCE**

POLISCI 110B. Strategy, War, and Politics — GER:DB-SocSci  
5 units, not given this year

POLISCI 110D/110Y. War and Peace in American Foreign Policy —  
110D fulfills WIM.  
5 units, Spr (Schultz, K)

POLISCI 111D. British Politics  
5 units, Spr (Dorfman, G)

5 units, not given this year

POLISCI 112D. International Organization  
5 units, Aut (Major, S)

POLISCI 113F. The United Nations and Global Governance  
5 units, Spr (Stedman, S)

5 units, Win (Sagan, S)

POLISCI 140L. China in World Politics  
5 units, Spr (Miller, L)

POLISCI 142F. Politics of Central Asia in Comparative Perspective  
5 units, Aut (Erdem, E)

5 units, not given this year

5 units, not given this year

POLISCI 148/348. Chinese Politics: The Transformation and the Era of Reform  
5 units, Aut (Miller, L)

POLISCI 148S. The U.S. and Asia During the Cold War  
5 units, Win (Miller, L)

POLISCI 149S. Islam and the West  
5 units, Spr (Milani, A)

POLISCI 218. U.S. Relations in Iran  
5 units, Aut (Milani, A)

POLISCI 245D. The European Union  
5 units, Aut (Gates, A)

POLISCI 245F. Latin American Political Development  
5 units, Win (Etchemendy, S)

POLISCI 245R. Politics in Modern Iran  
5 units, Win (Milani, A)

POLISCI 346S. Logic of Authoritarian Government — (Same as HISTORY 278A/378A)  
5 units, Win (Haber, S)

**COMPARATIVE CULTURE AND SOCIETY (CCAS)**

INTNLREL 106. Present Pasts: History and Memory in Culture and Politics — (Same as GERLIT 290.) Theoretical, comparative, and interdisciplinary approach to historical representation and remembrance. Focus is on the uses and abuses of remembering and historiographic accounting for the recent past in culture and politics. Examples include post-WW II Germany and post-1948 Israel. How the memory of 9/11 is played out in contemporary American discourse, including political debates, literature, and popular culture.  
5 units, Win (Eshel, A)

INTNLREL 114D. Democracy, Development, and the Rule of Law — (Same as POLISCI 114D.) For description, see “Comparative Political and Historical Analysis” subsection above.  
5 units, Aut (Stoner-Weiss, K; McFaul, M)

INTNLREL 140C. The U.S., UN Peacekeeping, and Humanitarian War — The involvement of the U.S. and UN in major wars and international interventions since the 1991 Gulf War. The UN Charter’s provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan.  
5 units, Spr (Patenaude, B)

INTNLREL 141B. Camera as Witness: International Human Rights Documentaries — (Same as HUMNTIES 197B, SLAVGEN 197B.) Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers. GER:DB-Hum  
5 units, Aut (Bojic, J)

INTNLREL 141C. Camera as Witness: A Forum for Global Dialogue — (Same as HUMNTIES 197C, SLAVGEN 197C.) Challenges facing filmmakers documenting the struggle for human rights including communication of complex situations to an international audience, interpreting foreign cultures and politics, and filmmaker roles as artists, activists, and journalists. Meetings with filmmakers. GER:DB-Hum  
5 units, Win (Bojic, J)

INTNLREL 161A. Global Human Geography: Asia and Africa — (Same as HISTORY 106A.) Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes. GER:DB-SocSci  
5 units, Aut (Lewis, M)

INTNLREL 161B. Global Human Geography: Europe and Americas — (Same as HISTORY 106B.) Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.  
5 units, Win (Lewis, M)

INTNLREL 205. Ethics, Technology, and International Relations — For description, see “Comparative Political and Historical Analysis” subsection above.  
5 units, not given this year (McGinn, R)

**AFRICAN STUDIES**

AFRICAST 211. Education for All? The Global and Local in Public Policy Making in Africa  
5 units, Spr (Samoff, J)

**ECONOMICS**

ECON 143. Ethics in Economics Policy

5 units, not given this year

POLISCI 248T. Problems of Governance and Economic Growth in Mexico: From the Aztecs to NAFTA — (Same as HISTORY 278.) GER:DB-SocSci  
5 units, not given this year

SCIENCE, TECHNOLOGY, AND SOCIETY  
STS 279. Technology, Policy, and Management in Newly-Industrializing Countries  
2-4 units, Spr (Forbes, N)

1- AND 2-UNIT OPTIONS  
INTNLREL 110. South Asia: Politics, Economics, Culture, and Society — Lectures by Stanford faculty and guest speakers. May be repeated for credit.  
5 units, Aut (Staff)

INTNLREL 191. IR Journal  
1 unit, Aut, Win, Spr (Schultz, K)

INTNLREL 197. Directed Reading in International Relations — Open only to declared International Relations majors.  
3-5 units, Aut, Win, Spr, Sum (Staff)

INTNLREL 198. Senior Thesis — Open only to declared International Relations majors with approved senior thesis proposals.  
2-5 units, Aut, Win, Spr, Sum (Staff)

INTNLREL 199. Honors Research: Democracy, Development, and the Rule of Law in Developing Countries — Restricted to students in the CDDRL option of the International Relations honors program. Goal is to prepare students to do research and/or fieldwork to complete their thesis research. Main currents in democracy and development literature concerning how economic growth and democratization are related; how the rule of law supports these processes in countries undergoing change. Student presentations of thesis questions; student groups develop research problems and designs. May be repeated for credit.  
3-5 units, Spr (Stoner-Weiss, K)

INTNLREL 200A. International Relations Honors Field Research — For juniors planning to write an honors thesis during senior year. Initial steps to prepare for independent research. Professional tools for conceptualizing a research agenda and developing a research strategy. Preparation for field research through skills such as data management and statistics, references and library searches, and fellowship and grant writing. Creating a work schedule for the summer break and first steps in writing. Prerequisite: acceptance to IR honors program.  
3-5 units, Spr (Drori, G)

INTNLREL 200B. International Relations Honors Seminar — Second of two-part sequence. For seniors working on their honors theses. Professional tools, analysis of research findings, and initial steps in writing of thesis. How to write a literature review, formulate a chapter structure, and set a timeline and work schedule for the senior year. Skills such as data analysis and presentation, and writing strategies. Prerequisites: acceptance to IR honors program, and 199 or 200A.  
3 units, Aut (Drori, G; Stoner-Weiss, K)

OVERSEAS STUDIES  
The following courses taught overseas are approved for the International Relations major; consult the updated course offering lists available in the International Relations office or on the IR website for track information. For course descriptions and additional information, see the “Overseas Studies” section of this bulletin.

BEIJING  
OSPBEIJ 11. Chinese Society in the Post-Mao Era — (Same as SOC 118S.)  
5 units, Aut (Walder, A)

OSPBEIJ 14. Comparing the Chinese and American Legal Systems — (Same as POLISCI 246P)  
5 units, Aut, Spr (Zhang, Q)

OSPBEIJ 23. China’s Red Guard Movement, 1966-68 — (Same as SOC 115S.)  
5 units, Spr (Seto, K)

OSPBEIJ 34. Urbanization and Land-Use Change in China — (Same as EARTHSYS 139X, GES 136, URBANST 158V.)  
4 units, Spr (Seto, K)

OSPBEIJ 35. China’s Environment and Prospects for Sustainability — (Same as EARTHSYS 137X, GES 135, URBANST 159V.)  
4 units, Spr (Seto, K)

OSPBEIJ 45. Wartime China: Chinese Nationalism and the Anti-Japanese War — (Same as HISTORY 198V.)  
5 units, Spr (Plum, M)

OSPBEIJ 50. Chinese Economy — (Same as POLISCI 144P.)  
5 units, Aut (Zhu, T)
### BERLIN

**OSPBER 15. Shifting Alliances? The European Union and the U.S.**—(Same as POLISCI 245P.)

Web Site: http://ihum.stanford.edu

Courses given in Introduction to the Humanities Program have the subject code IHUM. For a complete list of subject codes, see Appendix.

Introduction to the Humanities offers courses which satisfy a three quarter General Education Requirement (GER) for first-year students. The purpose of the Introduction to the Humanities (IHUM) requirement is to build an intellectual foundation in the study of human thought, values, beliefs, creativity, and culture. Introduction to the Humanities courses enhance skills in analysis, reasoning, argumentation, and oral and written expression, thus helping to prepare students for more advanced work in the humanities, and for work in other areas.

The IHUM requirement may be satisfied in two ways:

- Introduction to the Humanities courses—a one quarter, interdisciplinary course followed by a two quarter, course sequence.
- The Program in Structured Liberal Education—a three quarter, residence-based program; see below or see the “Structured Liberal Education” section of this bulletin.
COURSES

Students enrolled in Introduction to the Humanities courses satisfy the first-year requirement by pairing a one quarter interdisciplinary course in Autumn Quarter with a two quarter sequence in Winter and Spring quarters. The Autumn Quarter courses develop skills in humanistic disciplines through close reading and critical investigation of a limited number of works as preparation for further work in the humanities and, specifically, for any one of the Winter-Spring sequences.

AUTUMN

IHUM 46. Visions of Mortality — Anyone reading this is alive, and so will someday die. Issues arising from these facts of life and death beginning with the most fundamental questions arising from first-person confrontation with thoughts of one’s own mortality. Is death bad for a person, and if so, why? What can the sadness or the indifference of death tell us about what makes life good? If death is the permanent end of existence, does this make human choices arbitrary, and life meaningless? GER: IHUM-1
5 units, Aut (Bobonich, C; Barrett, R)

IHUM 48. The Art of Living — The fundamental choice of deciding what is valuable to a person, and how to live one’s life: a life of reason and knowledge, of faith and discipline, of nature and freedom, of community and altruism, or of originality and style. How is it possible to live well and beautifully, what it takes to implement these ways of living, and what happens when they come under pressure from inside and out. GER: IHUM-1
5 units, Aut (Douvaldzi, C; Landy, J; Taylor, K)

IHUM 55. The Literature of Crisis — Most human lives contain major turning points or crises that transform an individual’s development. Classical, medieval, and Renaissance texts illustrating crises in the lives of authors and characters, and cultural crises that have altered the course of human history. Emphasis is on the conceptual framework to understand and cope with crisis, GER: IHUM-1
5 units, Aut (McCall, M; Evans, M)

IHUM 57. The Human and The Machine — Shifting boundaries between the mechanical and the human: how humans connect and interact with machines, and how they may be conceived, designed, and manipulated as machines. This history of thinking about people, society, and machines from Plato and his antecedents to contemporary dilemmas over biotechnology. Paradigms include ethical issues concerning biological and social engineering and creationist arguments for intelligent design that reveal the work of God. GER: IHUM-1
5 units, Aut (Shanks, M; Lowood, H)

IHUM 58. Technological Visions of Utopia — How changes since Thomas More’s Utopia was written, including advances in science and technology, have opened new possibilities for the good society. Focus is on works that consider how literary visions of society have evolved with the progress of science and technology. Readings include More and technologically determined visions of the late 20th century. GER: IHUM-1
5 units, Aut (Roberts, E; Heise, U)

IHUM 61. Race, Gender, and the Arts of Survival — How do men and women survive physically, intellectually, creatively, and spiritually? Survival as represented in works that model strategies to overcome physical deprivation including enslavement, castration, religious persecution, and gender discrimination. How to survive the constraints of gender, race, nation, and history: for what purpose and at what cost does one survive? Possibilities for effecting social and personal change. Genres include drama, fiction, epistolaries, and a slave narrative. GER: IHUM-1
5 units, Aut (Elam, H; Elam, M)

IHUM 63. Freedom, Equality, Difference — Which freedoms should a just society promote and which should be curtailed for the sake of justice? What equalities properly concern government and how can the achievement of equality be reconciled with respect for freedom? What roles should social and political institutions take in guaranteeing freedom and equality? Focus is on interdisciplinary inquiry including political philosophy, education, literature, history, and law. Abstract ideas and case histories, using one to shed light on the other. GER: IHUM-1
5 units, Aut (Callan, E; Palumbo-Liu, D; Perry, J)

IHUM 64. Journeys — Works spanning 2,300 years, diverse cultural and historical situations, and different forms and genres, which present essential aspects of the journey from birth to death. These texts trace moral, spiritual, and emotional passages within that one great journey, passages that challenge and transform people as they advance toward what poet Thomas Gray called the inevitable hour. GER: IHUM-1
5 units, Aut (Wolff, T; Yearley, L)

WINTER-SPRING SEQUENCES

IHUM 2,3. Epic Journeys, Modern Quests — Great religious, philosophical, and literary texts that have addressed timeless questions about human identity and the meaning of human life. Focus is on the epic tradition in the ancient and classical worlds and its transformations or abandonment in modernity. Compares conceptions of the afterlife. How traditions about the afterlife are created and appropriated. The diminished importance of the dead and increased emphasis on the power of the living in literary genres. GER: IHUM-2,3

IHUM 2: 5 units, Win (Harrison, R)
IHUM 3: 5 units, Spr (Landy, J; Edelstein, D)

IHUM 4A, B. Mass Violence from Crusades to Genocide — The evolution, varieties, causes, and logic of mass violence in premodern and modern history; how mass violence shaped historical trends. What accounts for the persistence of mass violence in history? Do religions, ethnicity, and modernity foment or restrain mass violence? Is there a common pattern of mass violence throughout the centuries? Geographic focus is Europe; comparisons with societies which the Europeans encountered such as the Aztec empire, the Islamic world, and the African colonies. GER: IHUM-2,3

IHUM 4A: 5 units, Win (Buc, P)
IHUM 4B: 5 units, Spr (Weiner, A)

IHUM 5A, B. Worlds of Islam: Global History and Muslim Societies — Chronological and geographical overview of times and places in which Islam has been the dominant cultural framework. Elements of the Muslim faith and its related political, social, and cultural practices from the 7th-century rise of Islam to the recent past. Geographic range includes the historic Arab heartland of Islam, Africa, Persia, the Ottoman Empire, and Central Asia. GER: IHUM-2,3

IHUM 5A: 5 units, Win (Beinin, J; Rodrigue, A; Hanretta, S; Crews, R)
IHUM 5B: 5 units, Spr (Rodrigue, A; Hanretta, S; Crews, R; Satia, P)

IHUM 6A, B. World History of Science — The broad sweep of global science, from the prehistoric origins of the oldest known technologies, the events of the Scientific Revolution, through recent triumphs in the physical and life sciences. History as unavoidably selective, how science transforms and is transformed by human engagements with technology, religion, art, politics, and moral values. GER: IHUM-2,3

IHUM 6A: 5 units, Win (Proctor, R)
IHUM 6B: 5 units, Spr (Proctor, R)

IHUM 23A, B. The Fate of Reason — The historical fate of Socrates’ proposal that only reason can provide answers to questions of what to believe and how to act. The fate of reason in cultural contexts including medieval Christian, Islamic, and Jewish. Themes include free will, personal identity, the authority of morality, and the tension between reason as power for improving life and as insufficient means for reaching important truths. GER: IHUM-2,3

IHUM 23A: 5 units, Win (Bobonich, C)
IHUM 23B: 5 units, Spr (Anderson, L)

IHUM 25A, B. Art and Ideas: Performance and Practice — Issues in aesthetics and performance through examples from the classical age to the present. Concepts of art and practice intersecting with topics such as imitation, instruction through pleasure, the creative process, perception, social analysis, and embodiment as a form of knowledge. Texts and performances from drama, dance, music, visual arts, and performance art practices that reflect aesthetic ideas. GER: IHUM-2,3

IHUM 25A: 5 units, Win (Ross, J)
IHUM 25B: 5 units, Spr (Rayner, A)
IHUM 27A, B. Encounters and Identities — The formation of ideas about individual and collective identities in S. Africa, W. Europe, and the U.S. Contemporary ideas about identity, including national, racial, ethnic, and gender identity; historical encounters and social transformations linking these areas. Challenging popular assumptions about the origins of identities through similarities and differences among ideas of individual and collective identity in different regions of the world. GER: IHUM-2, 3

IHUM 27A: 5 units, Win (Ferguson, J)
IHUM 27B: 5 units, Spr (Birce, A)

IHUM 28A, B. Poetic Justice: Order and Imagination in Russia — The difference between justice and law in 19th- and 20th-century Russian writers. Focus is on the notion of poetic justice: the artistic representation of order, whether divine, natural, or human. Goal is to heighten awareness of familiar narratives, mythologies, ideas, and images, and to convey a sense of a long-established national culture with its own dynamic vision. GER: IHUM-2, 3

IHUM 28A: 5 units, Win (Safran, G)
IHUM 28B: 5 units, Spr (Freidin, G)

IHUM 31A, B. Ancient Empires — A decisive place and period in world history: the Mediterranean basin from 800 B.C. to 400 A.D. Great empires (Assyria, Persia, Macedonia, and Rome) were carved out in war and changed the course of human development. Why did these empires arise when and where they did, how did they work, and what is their legacy? Their economic, religious, and artistic achievements balanced against genocide, enslavement, and warfare using evidence from ancient literature and archaeology, and tracing the roles of religion, property, and freedom. What they mean for the world today. GER: IHUM-2, 3

IHUM 31A: 5 units, Win (Morris, J)
IHUM 31B: 5 units, Spr (Scheidel, W)

IHUM 37A, B. Literature into Life: Alternative Worlds — The genres of poetry, drama, and fiction from the Renaissance to the present day, focusing on the relationship between art and life. How does literature come alive on the page? What goes into a vivid representation of lived social experience? How do writers respond to historical crises? Parallel cases from art and music. GER: IHUM-2, 3

IHUM 37A: 5 units, Win (Steidle, E)
IHUM 37B: 5 units, Spr (Felstiner, J)

IHUM 68A, B. Approaching Religion: Tradition, Transformation, and the Challenge of the Present — Challenges facing the world’s religions in responding to issues such as globalization, feminism, science, pluralism, and individualism. How Christianity, Islam, and Hinduism underwent transformations, struggling with the tension between making necessary changes and preserving tradition. Encounters between these religious traditions and the forces of contemporary social change. GER: IHUM-2, 3

IHUM 68A: 5 units, Win (Gregg, R; Sadeki, B)
IHUM 68B: 5 units, Spr (Eisen, A; Hess, L)

PROGRAM IN STRUCTURED LIBERAL EDUCATION

Track Chair: Mark Mancall (History)

Structured Liberal Education (SLE) offers students an intensive, three quarter, residence-based learning experience, which satisfies the IHUM requirement, both of the University Writing and Rhetoric requirements, and the General Education Requirement in the Humanities (GER:DB-Hum).

SLE encourages students to live a life of ideas in an atmosphere that stresses critical thinking and a tolerance for ambiguity. The residence hall is the informal setting for lectures and small-group discussions. SLE instructors work closely with students and participate in dorm life. SLE enhances the classroom experience with other residence-based educational activities: a weekly film series throughout the year and a student-produced play each quarter.

SLE students receive intensive and individualized writing instruction from a team of instructors and peer writing tutors. See the “Structured Liberal Education” section of this bulletin.

9 units, Aut, Win, 10 units, Spr (Mancall, M; Staff)

TAUBE CENTER FOR JEWISH STUDIES

Director: Steven Zipperstein
Associate Director: Vered Shemtov

Academic Advisory Committee: Zachary Baker (Stanford University Libraries), Joel Beinin (History), Arnold Eisen (Religious Studies), Amir Eshel (German Studies), John Felstiner (English), Charlotte Fonrobert (Religious Studies), Adriane Leveen (Religious Studies), Mark Mancall (History), Norman Naimark (History), Jack Rakove (History), Aron Rodrigue (History), David Rosenhan (Law, Psychology, emeritus), Gabriella Safran (Slavic Languages and Literatures), Vered Shemtov (African and Middle Eastern Languages and Literatures), Peter Stansky (History), Sam Wineburg (Education), Amir Weiner (History), Steven Zipperstein (History)

Offices: Building 240, Room 203
Mail Code: 94305-2190
Phone: (650) 723-7589
Email: jewish.studies@stanford.edu
Web Site: http://www.stanford.edu/dept/jewishstudies/

The Taube Center for Jewish Studies investigates all aspects of Jewish life in history, religion, literature, language, education and culture from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The Center annually sponsors the Donald and Robin Kennedy Undergraduate Award for the best undergraduate essay on any theme in Jewish Studies, the Dr. Bernard Kaufman Undergraduate Research Award in Jewish Studies to an undergraduate engaged in research on Jews in modernity, and it coordinates the annual Dorot Travel Grants for summer study in Israel.

Graduate students enroll in the program through the departments of English, History, Comparative Literature, or Religious Studies, or the School of Education, and must meet the requirements of those departments.

UNDERGRADUATE PROGRAMS

INIVIDUALLY DESIGNED MAJOR

The Individually Designed Major in Jewish Studies permits interested students to focus their attention on the broad field of Jewish Studies and, at the same time, to expand their knowledge of one or another related fields. Each major should complete at least 75 units, all in courses at or above the 100 level (or their equivalent). A maximum of 15 of these 75 units may be taken on a credit/no credit basis. A maximum of 5 of these 75 units may be taken in individual study or directed reading. Students must present evidence that demonstrates their ability to do independent work and have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee. Each major must obtain sponsorship from three faculty members, one of whom is the student’s primary adviser, and from one of the Directors of the Taube Center for Jewish Studies. Details about the written procedures and documents necessary for application for an individually designed major can be obtained at Undergraduate Advising and Research, Sweet Hall, first floor, (650) 723-2426.

REQUIREMENTS

The faculty members in Jewish Studies have designed the following structure for the major:

<table>
<thead>
<tr>
<th>Category</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>History and Society:</td>
<td></td>
</tr>
<tr>
<td>Students must take one course in each of the three periods:</td>
<td></td>
</tr>
<tr>
<td>biblical and ancient, medieval and contemporary</td>
<td>20</td>
</tr>
<tr>
<td>Religion:</td>
<td></td>
</tr>
<tr>
<td>Biblical, rabbinic, medieval, modern</td>
<td>20</td>
</tr>
<tr>
<td>Literature:</td>
<td></td>
</tr>
<tr>
<td>Hebrew, Holocaust, American Jewish, Yiddish, German Jewish, Russian Jewish</td>
<td>15</td>
</tr>
</tbody>
</table>
Hebrew Language (second year or beyond):
Students who demonstrate by examination that they have completed the equivalent of at least two years of university-level Modern Hebrew may apply the 12 units required in this category to more work in one or the other categories required by the major, with the approval of their primary adviser.

Ancillary Courses:
Ancient history, medieval history, modern European history, history of philosophy, Islam, Christianity

Total number of units required: 8-10

Students planning an Individually Designed Major in Jewish Studies are also urged to write an honors thesis. Students interested in majoring in Jewish Studies should discuss this with their adviser(s) when discussing the major itself. Up to 10 honors thesis units may be included in the major.

No course proposed for the major may be counted as fulfilling more than one required category in the proposed major. Transfer credits from other universities must be approved by the appropriate Stanford authorities.

MINORS
The Jewish Studies minor is open to students in any department who wish to enrich their studies through acquiring knowledge in Jewish history, thought, religion, literature, and society. Students must complete their declaration of the minor no later than the last day of the quarter four quarters before degree conferral. For example, a student graduating in Spring Quarter must declare the minor no later than the last day of Spring quarter of the junior year.

Students must complete six courses for a maximum of 36 units toward the minor. Courses of study should be discussed and approved by a Jewish Studies faculty member in the departments of English, History, or Religious Studies, or the Division of Cultures, Literatures, and Languages by the center directors. In addition to suggested introductory courses, students are also encouraged to take courses in Hebrew language as part of their Jewish studies minor, and are granted credit toward the minor for up to 5 units of language study. Any variations on the minor requirements must be approved in advance by one of the directors of the center.

Courses credited toward the minor must be distributed as follows:
1. Three introductory courses at the 100 level or below in the fields of history, religious studies, literature, or Hebrew language (for a maximum of 5 units) or one of the designated introductory courses offered through the Program in Comparative Studies in Race and Ethnicity.
2. Two courses at the 100 level or above from two of three areas of concentration (history, religious studies, or literature).
3. One seminar or undergraduate colloquium at the 200 level or above in one area of concentration (history, religious studies, or literature.)

No course credited toward the Jewish Studies minor may be double counted toward major requirements.

COURSES
JEWISH LANGUAGE COURSES
Modern Hebrew, Biblical Hebrew and Yiddish language courses are offered by the Language Center. For descriptions, course numbers and additional information, see the African, Jewish, and Middle Eastern language offerings in the “Language Center” section of this bulletin.

COGNATE COURSES
See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

AMELANG 170A. Biblical Hebrew
2-4 units, Aut (Wang, T; Porat, G)

AMELANG 171. The Bible in Modern Hebrew Literature
3-4 units, Spr (Shemtov, V)

AMELANG 173. Politics and Poetics in Israeli Literature
4-5 units, Win (Shemtov, V)

AMELANG 174. East West East in Israeli Literature: The Novels of Yoel Hoffman
2-4 units, Aut (Albeck-Gidron, R)

COMPLIT 243. Literature and History in the Israeli Novel
3-5 units, Spr (Eshel, A)

DRAMA 156M/256M. Israeli Film and Theater, 1948-2006
5 units, Aut (Arad, M)

ENGLISH 140A. Imagining the Holocaust
5 units, Spr (Felstiner, J)

FEMST 139. Rereading Judaism in Light of Feminism
4-5 units, Win (Karlin-Neumann, P)

GERLIT 290. Present Pasts: History and Memory in Culture and Politics—(Same as INTNLREL 106.)
5 units, Win (Eshel, A)

GERGEN 104Q. Resistance Writings in Nazi Germany
3 units, Aut (Bernhardt, E)

HISTORY 86S. The Jews of Islam in Modern Times
5 units, Aut (Danon, D)

HISTORY 137. The Holocaust
5 units, Win (Staff)

HISTORY 185B. Jews in the Modern World
5 units, Spr (Zipperstein, S)

HISTORY 229/329. Poles and Jews
5 units, Win (Jolluck, K)

HISTORY 277F/377F. Marranos, Conversos, and Crypto-Jews in Latin America, 16th-20th Centuries
5 units, Win (Staff)

HISTORY 285E/385E. Tradition in Crisis: Orthodox Judaism in Modern Times
5 units, Aut (Staff)

HISTORY 287E/387E. The Transformation of Central European Jewry: Germany and Austria-Hungary, 1700-1880
5 units, Aut (Staff)

HISTORY 385A. Core in Jewish History, 17th-19th Centuries
4-5 units, Aut (Rodrique, A)

HISTORY 385B. Core in Jewish History, 20th Century
4-5 units, Win (Zipperstein, S)

HISTORY 486A. Graduate Research Seminar in Jewish History
4-5 units, Spr (Zipperstein, S)

INTNLREL 106. Present Pasts: History and Memory in Culture and Politics—(Same as GERLIT 290.)
5 units, Win (Eshel, A)

RELIGST 4N. The Creation of Woman
3 units, Aut (Fonrobert, C)

RELIGST 112. Handmaids and Harlots: Biblical Women in Jewish and Christian Traditions
4 units, Aut (Levene, A; Pitkin, B)

RELIGST 185. Prophetic Voices of Social Critique
4 units, Spr (Levene, A)

RELIGST 221/321. The Talmud
4 units, Win (Fonrobert, C)

RELIGST 263. Judaism and the Body
4 units, Aut (Fonrobert, C)

RELIGST 264. Hasidism and Modernity
4 units, Win (Deutsch, N)

RELIGST 282. King David in the Bible and Beyond
4 units, Aut (Levene, A)

SLAVGEN 122/222. Yiddish Story
5 units, Aut (Sufran, G)
LANGUAGE CENTER

Director: Elizabeth Bernhardt
Associate Director: Joan Molitoris
Assistant Director: Patricia de Castries

African and Middle Eastern Languages
Senior Lecturers: Khalil Barhoum (Coordinator, and Minor Adviser: Arabic Language and Literature), Vered Shemtov (Jewish Language and Literature).
Lecturers: Narges Amini (Fulbright Scholar), Saleem Aweiss, Noura Bellalili (Fulbright Scholar), Estee Greif, Jon Leveitow, Sangai Mohochi, Gallia Porat, Ramzi Salti, Michael Wairungu (Fulbright Scholar), Ting Wang

Chinese Language
Coordinator: Chao Fen Sun (Associate Professor, Asian Languages)
Lecturers: Marina Chung, Michelle DiBello, Sik Lee Dennig, Nina Lin, Yu-hwa Liao Rozelle, Huazhi Wang, Yan Wang, Yan Yi (Fulbright Scholar), Hong Zeng, Youping Zhang, Qi Zhu

English for Foreign Students
Director and Senior Lecturer: Philip Hubbard (Linguistics)
Lecturers: Robert Elliott, Carole Mawson, Kenneth Romeo, Constance Rylance, Carol Shabrami, Keli Yerian

French Language
Lecturers: Olubunmi Ashaolu, Marianne Blanchard, Jane Dozer-Rabedeau, Heather Howard, Sylvie Palumbo-Liu, Tanya Shashko, Kenric Tselethikai (Coordinator)

German Language
Coordinator: Elizabeth Bernhardt (Director, Language Center)
Senior Lecturers: William E. Petig, Kathryn Strachota

Italian Language
Senior Lecturer: Maria Devine (on leave Autumn, Winter)
Lecturers: Marta Baldocchi, Anna Cellinese, Sara Gelmetti (Coordinator), Dawn Green, Alessandra McCarty, Giovanni Tempesta

Japanese Language
Coordinator: Yoshiko Matsumoto (Associate Professor, Asian Languages)
Senior Lecturer: Kazuko M. Bushin
Lecturers: Fumiko Arao, Momoe Saito Fu, Hisayo O. Lipton, Momoyo K. Lowdermilk, Kiyomi Nakamura, Yoshiko Tomiyama

Korean Language
Lecturer and Coordinator: Hee-Sun Kim

Portuguese Language
Senior Lecturer: Lyris Wiedemann (Coordinator)
Lecturers: Ana Isabel Delgado, Sean McIntyre

Slavic Language
Senior Lecturer: Rima Greenhill
Lecturer and Coordinator: Eugenia Khassina

Spanish Language
Senior Lecturer: Irene Corso
Lecturers: Amy Alexander, Vivian Brates, Loreto Catoira, Candy Guzman, Caridad Kenna, Alice Miano (Coordinator), Joan Molitoris (Associate Director, Language Center), Paul Niessler, Carimer Ortiz Cuevas, Consuelo Perales, Veronika Reinhold, Kara Sanchez, Ana M. Sierra, Maria Cristina Urruela, Hae-Joon Won, Ana Zaragoza

Special Language Program
Lecturers: Eisa Ayooobi (Fulbright Scholar), Cathy Haas, Qudsia Irshad (Fulbright Scholar), Aysha Pervaiz (Fulbright Scholar), Eva Pronas (Coordinator), Noor Rachmawaty (Fulbright Scholar)

Tibetan Language Program
Lecturer and Coordinator: Robert W. Clark

Courses given in the Language Center have one of the following subject codes: AMELANG, APPLLING, CHINLANG, EFSLANG, FRENLANG, GERLANG, ITALLANG, JAPANLANG, KORLANG, PORTLANG, SLAVLANG, SPANLANG, SPECLANG, and TIBETLANG. For a complete list of subject codes, see Appendix.

The Stanford Language Center was created to oversee all language instruction at Stanford. The center’s charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford’s language instruction; and to take leadership in research and development efforts in language learning. The Language Center is a unit within the Division of Literatures, Cultures, and Languages.

PROFICIENCY IN FOREIGN LANGUAGE NOTATION
A student who demonstrates levels of achievement equivalent to those expected at the end of the third quarter of the third year of study in a language may be awarded the notation “proficiency in” that language on the official transcript.

In order for a student to have the proficiency notation appear on the official transcript, the student must:
1. Inform the Language Center at least two quarters prior to graduation that he/she is requesting such a notation.
2. Schedule an Oral Proficiency Interview (OPI) through the Language Center. Since this is a formal oral proficiency interview, at least two quarters of lead time are essential for scheduling this interview. The interview will be conducted by a certified OPI rater. The formal interview lasts approximately one-half hour.
3. Submit to the Language Center an academic paper written in the foreign language in question of at least five pages (two pages in the Asian languages and Russian).
4. Ask one Stanford University Academic Council faculty member to write a letter on the student’s behalf, attesting to a high level of academic writing and composition skill in the foreign language.
5. Receive a rating of “advanced low” on the Foreign Service Institute/ American Council on the Teaching of Foreign Languages (FSI/ACT-FL) oral proficiency scale, except in the Asian Languages and Russian which require an ‘intermediate high’ rating.

UNDERGRADUATE PROGRAM
MINOR IN MIDDLE EASTERN LANGUAGES, LITERATURES, AND CULTURES

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to the Arabic and Hebrew languages, and to the cultures and civilizations of the Middle East. Contact the minors adviser before declaring at khalil@stanford.edu.

Students declaring a minor must do so no later than the last day of the fourth quarter before degree conferral. For example, students graduating in June (Spring Quarter) must declare the minor no later than the last day of Spring Quarter of their junior year. If a student is not able to meet this deadline, he or she may petition the Language Center director and request a revised declaration date, which may be granted at the director’s discretion.

The requirements for a minor in Middle Eastern Languages, Literatures, and Cultures are:
1. Completion of six courses in either Track A, Cultural Studies, or Track B, Language Studies.
2. Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/no credit.
3. All courses must be completed with a letter grade of ‘C’ or better.
4. Courses may not overlap with those taken for a major course of study.
5. Courses taken which also fulfill a GER count toward fulfilling both minor and GER requirements.
6. Students pursuing Track B, Cultural Studies, must complete the prerequisite of Beginning Arabic or Hebrew, or demonstrate equivalent competence.

**CULTURAL STUDIES TRACK**

Requirements are:

1. Successful completion of the prerequisite, Beginning Arabic or Hebrew, or a demonstrated equivalent competence.
2. Completion of one year of language study at the intermediate level (AMELANG 121A,B,C for Arabic, or AMELANG 129A,B,C for Hebrew).
4. Course work from GER courses may be used to fulfill the unit requirements for the minor.

**LANGUAGE TRACK**

Requirements are:

1. Successful completion of the prerequisite, Beginning Arabic or Hebrew, or a demonstrated equivalent competence.
2. Completion of one of the following courses in a language other than Arabic or Hebrew: AMELANG 121A,B,C, 129A,B,C, 132A,B,C.
4. Course work from GER courses may be used to fulfill the unit requirements for the minor.

**MINOR IN LITERATURE**

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

**MINOR IN MODERN LANGUAGES**

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

**GRADUATE PROGRAM**

**Ph.D. MINOR IN APPLIED LINGUISTICS**

The Ph.D. minor in Applied Linguistics has been designed to give students the opportunity to examine and explore language as it pertains to teaching, learning, translation, education, and language policies.

The Ph.D. minor requires the completion of no less than 30 units of unduplicated course work. Course work must include LINGUIST 201 (Foundations of Linguistic Analysis, 4 units). At least one additional Linguistics course must also be taken. Courses taken for the minor must be incremental units beyond those used to satisfy the major (with the exception of Linguistics 201 for Linguistics students). At least 20 of the 30 units must be at the 200 level or above. Students may also supplement their Applied Linguistics training with an array of courses from the departments of Cultural and Social Anthropology, Linguistics, and Spanish and Portuguese.

Overlapping applied linguistics concentrations are available in Learning, Teaching, and Translation of Second Languages; and in Educational and Policy Applications of Linguistics.

Some suggested courses relevant to each track are listed below the track description; a more complete listing of courses which are appropriate for the minor can be found on the Language Center’s website at http://language.stanford.edu/.

Students in either track should develop a program of study in consultation with an academic adviser and submit the proposed program of study for approval by the Applied Linguistics Steering Committee.

**THE LEARNING, TEACHING, AND TRANSLATION OF SECOND LANGUAGES TRACK**

This overall program concentration requires general reading in second language acquisition (SLA) and/or translation while offering students course work in the following areas:

1. Second language acquisition in instructed contexts
2. Elements of curricular design for university and college settings
3. The acquisition of second language literacy
4. The use of technology to enhance student performance
5. Linguistics and the teaching of foreign languages
6. Theoretical foundations in the translation of various languages

**EDUCATIONAL AND POLICY APPLICATIONS OF LINGUISTICS TRACK**

This concentration is oriented toward a combination of conceptual and research foci regarding language minority populations and their educational welfare. The education of women, low-income, and language minority populations receive primary attention within this concentration.

**COURSES**

Offerings in this section are ordered as follows:

**Applied Linguistics (APPLLING)**

African and Middle Eastern Languages (AMELANG)
Chinese (CHINLANG)
English for Foreign Students (EFSLANG)
French (FRENLANG)
German (GERLANG)
Italian (ITALLANG)
Japanese (JAPANLANG)
Korean (KORLANG)
Portuguese (PORTLANG)
Russian (SLA VLANG)
Spanish (SPANLANG)
Tibetan (TIBETLANG)

Students interested in general courses concerning languages, cultures, and literatures, or in advanced study of language and literature should consult the following departments and subject codes:

Asian Languages (CHINGEN, CHINLIT, JAPANGEN, JAPANLIT, KORGEN)
French and Italian (FRENGEN, FRENLIT, ITALGEN, ITALLIT)
German Studies (GERGEN, GERLIT)
Spanish and Portuguese (SPANLIT, PORTLIT)
Slavic Languages and Literatures (SLAVGEN, SLAVLIT)

**APPLIED LINGUISTICS (APPLLING)**

**APPLLING 201. The Learning and Teaching of Second Languages**

Learning perspective rather than traditional teaching methods. Focus is on instructional decision making within the context of student intellectual and linguistic development in university settings to different populations. Readings in second-language acquisition.

3 units, Spr (Bernhardt, E)

3 units, Win (Katz, J)

APPLING 203. Issues and Methods in the Teaching of Heritage Languages — (Same as SPANLIT 300) Teaching Spanish to students raised in Spanish-speaking homes. Issues include language variation in the Spanish-speaking world, English/Spanish bilingualism in the U.S., and second dialect acquisition. Techniques for developing the academic Spanish language skills of heritage students.

3-5 units, not given this year

APPLING 297. Directed Reading — Search for instructor on Axess. May be repeated for credit. Prerequisite: consent of instructor. (Staff)

1-4 units, Aut, Win, Spr (Staff)

AFRICAN AND MIDDLE EASTERN LANGUAGES AND LITERATURES (AMELANG)

The African and Middle Eastern Languages and Literatures Program offers classes in Arabic, Hebrew, Swahili, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2006-07 are listed below. Additional languages may still be offered upon request, provided funding is available. Requests for the 2007-08 academic year should be made by Spring Quarter of this year at the AME program office, Building 40, Room 42B.

All beginning-level, three-unit courses are offered on a S/NC basis only. Intermediate-level and four-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year’s sequence of language study. Most three-unit language courses are offered for a two-year, three quarter sequence:

All ‘A’ suffix courses are taught Autumn.
All ‘B’ suffix courses are taught Winter.
All ‘C’ suffix courses are taught Spring.

All beginning, intermediate, and advanced courses are 3 units except Arabic, Hebrew, and Swahili. In some circumstances, a beginning or intermediate course may be offered in alternate years.

Fulfilling the language requirement

Students can fulfill the language requirement by taking an African or Middle Eastern language. At least 12 units are needed to complete the requirement. Normally, the requirement is completed after the first quarter of intermediate-level language. In the case of African or Middle Eastern languages taught only at the beginning level, students may petition the Language Center to fulfill the requirement by taking a directed reading course in the fourth quarter. Contact patricia@stanford.edu for more information.

Those who have taken courses in the relevant language at another institution, or have previous knowledge of the language, can request to be tested. Tests are comprised of two parts, written and oral. Students must display first-year proficiency in the requested language to fulfill the requirement. Testing is guaranteed only for languages currently offered. Students planning to take a test must contact the AME program no later than the Spring Quarter of their sophomore year. To submit a request for testing is guaranteed only for languages currently offered.

Students planning to take a test must contact the AME program no later than the Spring Quarter of their sophomore year. To submit a request for testing is guaranteed only for languages currently offered.

AMELANG 100A,B,C. Beginning Amharic, First Quarter

3 units, A: Aut, B: Win, C: Spr (Tesfamariam, I)

AMELANG 101A,B,C. Intermediate Amharic

3 units, A: Aut, B: Win, C: Spr (Tesfamariam, I)

AMELANG 103A,B,C. Beginning Hausa

3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 106A,B,C. Beginning Swahili

4 units, A: Aut, B: Win, C: Spr (Mohochi, S)

AMELANG 107A,B,C. Intermediate Swahili

2-4 units, A: Aut, B: Win, C: Spr (Mohochi, S)

AMELANG 108A,B,C. Advanced Swahili

2-4 units, A: Aut, B: Win, C: Spr (Mohochi, S)

AMELANG 133A,B,C. The African Forum

1 unit, A: Aut, B: Win, C: Spr (Mohochi, S)

AMELANG 134A,B,C. Beginning Igbo

3 units, A: Aut, B: Win, C: Spr (Ajaelo, G)

AMELANG 135A,B,C. Intermediate Igbo

3 units, A: Aut, B: Win, C: Spr (Ajaelo, G)

AMELANG 137A,B,C. Intermediate Xhosa

3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 147A,B,C. Beginning Bambara

3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 153A,B,C. Beginning Twi

3 units, A: Aut, B: Win, C: Spr (Nyam, K)

AMELANG 156A,B,C. Beginning Zulu

3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 157A,B,C. Intermediate Zulu

3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 182A,B,C. Intermediate Fulani

3 units, A: Aut, B: Win, C: Spr (Camara, D)

AMELANG 186A,B,C. Beginning Yoruba

3 units, A: Aut, B: Win, C: Spr (Ashaolu, O)

AMELANG 187A,B,C. Intermediate Yoruba

3 units, A: Aut, B: Win, C: Spr (Ashaolu, O)

MIDDLE EASTERN LANGUAGE COURSES

AMELANG 144A,B,C. Beginning Persian

3 units, A: Aut, B: Win, C: Spr (Mohammadi, S)

AMELANG 184A,B,C. Beginning Turkish

3 units, A: Aut, B: Win, C: Spr (Ozisik, N)

AMELANG 185A,B,C. Intermediate Turkish

3 units, A: Aut, B: Win, C: Spr (Ozisik, N)

AMELANG 216A,B,C. Contemporary Language of Iran

3 units, A: Aut, B: Win, C: Spring (Amini, N)

ARABIC LANGUAGE AND LITERATURE COURSES

AMELANG 120A,B,C. Beginning Arabic — One-year sequence. Emphasis is on reading and writing standard Arabic (fusha).

5 units, A: Aut, B: Win, C: Spr (Aaweiss, S; Barhoum, K; Salti, R)

2-3 units, A: Aut, B: Win, C: Spr (Aaweiss, S; Salti, R)

AMELANG 122A,B,C. Advanced Arabic, First Quarter — Grammar and syntax. Complex texts and articles from the Arabic press. Oral reports, written assignments, and audiovisual aids including the Arabic Internet. Films and cultural productions.

2-3 units, A: Aut, B: Win, C: Spr (Bellali, N.)

AMELANG 143A,B,C. Advanced Arabic Conversation — May be repeated once for credit. Prerequisite: second-year year Arabic or consent of instructor.

2 units, A: Aut, B: Win, C: Spr (Salti, R)
AMELANG 161. The Contemporary Arab World and Culture through Literature — Readings from prominent authors dealing with topics such as gender and women, kinship and social concepts, nationalism, and religion. Texts delineating the cultural uniqueness of the Arab world include works by Naguib Mahfouz, Nawal El-Saadawi, Ghassan Kanafani, Tayyeb Salih, Etel Adnan, and short stories and poetry. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER:DB-Hum, EC-GlobalCom

4 units, Aut (Barhoum, K)

AMELANG 162. Arab Women Writers and Issues — Fiction and non-fiction work. The major cultural factors shaping their feminist attitudes. Readings: Fatima Mernissi, Nawal El-Saadawi, Etel Adnan, Fadía Faqir, Alîfa Rifaat, and Sahar Khalifeh. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER:DB-Hum, EC-Gender

4 units, Win (Barhoum, K)

AMELANG 163. The Arab World through Travel Literature — Popular colonialist and postcolonialist portrayals of Arab culture and Islam. Recent Western depictions of Arabs and Muslims in travel literature. Readings include Flaubert in Egypt, Guests of the Sheik, Justine, Covering Islam, Nine Parts of Desire, and Motoring with Mohammed. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER:DB-Hum, EC-GlobalCom

4 units, Spr (Barhoum, K)

AMELANG 195A,B,C. Readings in Arabic Literature — Short stories, poetry, literary criticism, Islamic texts, essays, and prose by notable Arab writers. Readings in Arabic. Prerequisite: two years of Arabic, native speaker, or equivalent.
2-4 units, not given this year

AMELANG 196A,B,C. Reading Arabic — For seniors and graduate students who need to acquire reading ability in Arabic for the Ph.D. of advanced research in their own field.

2-3 units, A: Aut, B: Win, C: Spr (Bellali, N)

AMELANG 197A,B,C. Egyptian Colloquial Arabic — Prerequisite: first-year Arabic.

2-3 units, not given this year

AMELANG 213A,B,C. Beginning Arabic: From Basic Script to Islamic Text
4 units, A: Aut, B: Win, C: Spr (Aweiss, S)

JEWISH LANGUAGE AND LITERATURE COURSES

AMELANG 50A,B,C. Reading Hebrew — Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.
2-4 units, not given this year

AMELANG 126. Reflection on the Other: The Jew in Arabic Literature, the Arab in Hebrew Literature — How literary works outside the realm of western culture struggle with questions such as identity, minority, and the issue of the other. How the Arab is viewed in Hebrew literature and how the Jew is viewed in Arabic literature. Historical, political, and sociological forces that have contributed to the shaping of the writer’s views. Arab and Jewish (Israeli) culture. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

AMELANG 127. Land and Literature — Israel has captured the imagination of writers throughout the generations. It has been portrayed as promised land, holy land, homeland, empty land, occupied land, and land of dreams. Ideological views and political events have shaped writers’ conception of Israel. Readings include poems and prose by Hebrew/Israeli authors in translation, and theoretical texts about place and literature. No knowledge of Hebrew required. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

AMELANG 128A,B,C. Beginning Hebrew

5 units, A: Aut (Porat, G; Greif, E), B: Win (Shtemtov, V; Greif, E), C: Spr (Shtemtov, V)

AMELANG 129A,B,C. Intermediate Hebrew
2-4 units, A: Aut (Porat, G); B: Win; C: Spr (Engel, A)

AMELANG 130A,B,C. Advanced Hebrew
1-4 units, not given this year

AMELANG 140A,B,C. Beginning Yiddish
2-4 units, A: Aut; B: Win; C: Spr (Levittow, J)

AMELANG 170A,B. Biblical Hebrew — The basic lexicon and grammar of Hebrew of the Tanakh or Old Testament. See RELIGST 170C for third part of this sequence (not given this year).

A: 2-4 units, Aut (Wang; T; Porat, G), B: not given this year

AMELANG 171. The Bible in Modern Hebrew Literature — The role of biblical myths in shaping Israeli identity and the development of a secular Hebrew literature. Readings include modern Hebrew poems and novels which offer new meanings to the stories of Genesis, Exodus, David, and the Song of Songs and make them relevant to the context of modern and postmodern Israeli culture. Readings in Hebrew and English. Prerequisite: intermediate Hebrew.

3-4 units, Spr (Shtemtov, V)

AMELANG 173. Politics and Poetics in Israeli Literature: Politics and Poetics in Israeli Literature: Amos Oz and other Contemporary Hebrew Writers — Offered in conjunction with Amos Oz’s visit as Stanford’s Writer in Residence. Literature and political essays by Oz and contemporary Hebrew authors who address the Israeli-Palestinian conflict. Approaches that deal with the intersection of theory and practice and politics and poetics in Israeli literature. No knowledge of Hebrew required. GER EC-GlobalCom

4-5 units, Win (Shtemtov)

2-4 units, Aut (Albeck-Gidron)

AMELANG 297. Directed Reading in African and Middle Eastern Languages — May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

AMELANG 395. Graduate Studies in African and Middle Eastern Languages — Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

CHINESE LANGUAGE COURSES

FIRST- AND SECOND-YEAR LANGUAGE

Students registering for the first time in a first- or second-year course must take a placement test if they have had any training in Chinese before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 20, 2006. Consult the Language Center or http://language.stanford.edu/ for further information.

CHINLANG 1,2,3. First-Year Modern Chinese — Conversation, grammar, reading, elementary composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements.

5 units, 1: Aut; 2: Win; 3: Spr (Zeng, H; Yi, Y; Zhang, Y)

CHINLANG 1B. First-Year Modern Chinese for Bilingual Students — For students with elementary comprehension and speaking skills who need work on conversation, grammar, reading, and composition.
3 units, 1B: Aut, 2B: Win, 3B: Sp (Rozelle, Y; Lin, N)

CHINLANG 5. Intensive First-Year Modern Chinese — Equivalent to 1,2,3 combined. Five weeks at Stanford and four weeks at Peking University.

7-8 units, Sum (Staff)
CHINLANG 6,7,8. Beginning Conversational Chinese — Three quarter sequence. Basic language skills in Mandarin to function abroad.
   2 units, 6: Aut; 7: Win; 8: Spr (Rozelle, Y)

   2 units, 10: Aut; 11: Win; 12: Spr (Lin, N)

CHINLANG 13A,B,C. Intermediate Southern Min (Taiwanese) Conversation — Vocabulary including business-related terms, grammatical structures, and spontaneous conversations. Prerequisite: 12 or consent of instructor.
   2 units, A: Aut; B: Win, C: Spr (Lin, N)

   2 units, 15: Aut; 16: Win; 17: Spr (Dennig, S)

CHINLANG 18,19,20. Intermediate Cantonese Conversation — Continuation of CHINLANG 17.
   2 units, 18: Aut; 19: Win, 20: Spr (Dennig, S)

CHINLANG 20A,B,C. Advanced Cantonese Conversation, First Quarter — Improving Cantonese through Hong Kong movies.
   2 units, A: Aut; B: Win, C: Spr (Dennig, S)

CHINLANG 21,22,23. Second-Year Modern Chinese — Grammar, reading, conversation, composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Prerequisite: 2 or equivalent.
   5 units, 21: Aut, 22: Win, 23: Spr (Chang, M)

CHINLANG 21B,22B,23B. Second-Year Modern Chinese for Bilingual Students, First Quarter — For students with advanced comprehension and speaking skills, but lacking equivalent knowledge of grammar, reading, and writing Chinese characters. Equivalent to 21,22,23.
   3 units, 21B: Aut, 22B: Win, 23B: Spr (Zhu, Q)

CHINLANG 25. Intensive Second-Year Modern Chinese — Equivalent to 21,22,23 combined. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 3 or equivalent.
   7-8 units, Sum (Staff)

CHINLANG 27,28,29. Intermediate Chinese Conversation — Prerequisite: 3 or consent of instructor.
   2 units, 27: Aut (Fang, J); 28: Win; 29: Spr (Zhang, Y)

CHINLANG 99. Language Specials — Prerequisite: consent of instructor.
   1-5 units, Aut, Win, Spr (Staff)

CHINLANG 101,102,103. Third-Year Modern Chinese — Written and spoken styles of modern Chinese. Reading and discussion of authentic writings on cultural topics; newspaper reports, radio, and TV broadcasts and films; online Chinese software and email network to facilitate study. Prerequisite: 23 or equivalent.
   5 units, 101: Aut; 102: Win, 103: Spr (Wang, H)

CHINLANG 101B,102B,103B. Third-Year Modern Chinese for Bilingual Students — For students with advanced listening and speaking abilities, but lacking equivalent knowledge in reading and writing. Equivalent to 101,102,103.
   3 units, 101B: Aut, 102B: Win, 103B: Spr (Wang, H)

CHINLANG 105. Intensive Third-Year Modern Chinese — Equivalent to 101,102,103 combined. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 23 or equivalent.
   7-8 units, Sum (Staff)

CHINLANG 121,122,123. Advanced Chinese Conversation — Prerequisite: 23 or equivalent.
   2 units, 121: Aut; 122: Win; 123: Spr (Chung, M)

CHINLANG 131,132,133. Business Chinese — Commercial, economic, and business-related vocabulary. Materials include formal business conversations, newspaper and journal articles, and TV news on trade and economic. Technical language and business etiquette. Student oral and written reports on their own research regarding recent economic developments, using sources in China. Prerequisite: 23 or equivalent.
   3-4 units, 131: Aut; 132: Win; 133: Spr (Wang, H)

CHINLANG 200. Directed Reading — May be repeated for credit. Prerequisite: consent of instructor.
   1-5 units, Aut, Win, Spr (Staff)

CHINLANG 211,212,213. Advanced Modern Chinese — Year-long sequence. Goal is to become functional speakers, readers, and writers of modern Chinese through articles and essays from newspapers, magazines, scholarly journals, and the Internet. Cultural and social science themes: students may take both themes for 5 units or one theme for reduced units. Prerequisite: three years of Chinese language.
   2-5 units, 211: Aut (Zhu, Q), 212: Win, 213: Spr (Zhu, Q; Wang, Y)

CHINLANG 221,222,223. Advanced Modern Chinese for Social Sciences Students — Goal is to become functional speakers, readers, and writers of modern Chinese through articles, essays, newspapers, magazines, and scholarly journals in social sciences. Prerequisite: three years of Chinese. 221: Aut, 222: Win, 223: Spr
   3 units, 221: Aut (Zhu, Q), 222: Win, 223: Spr (Zhu, Q; Wang, Y)

CHINLANG 394. Graduate Studies in Chinese Conversation — Prerequisite: consent of instructor.
   1-3 units, Aut, Win, Spr (Staff)

CHINLANG 395. Graduate Studies in Chinese — Prerequisite: consent of instructor.
   2-5 units, Aut, Win, Spr (Staff)

ENGLISH FOR FOREIGN STUDENTS

These courses, numbered from 690-698, represent offerings for non-native English-speaking graduate students in Autumn, Winter, and Spring quarters. Enrollment in one or more courses may be required of, or recommended to, current graduate students from other countries after they have taken the English placement examination. To enroll, students must go to http://www.stanford.edu/group/efs for directions on or before the first day of each quarter. Some courses are open to undergraduates by consent of the program: see http://www.stanford.edu/group/efs for a list.

During the Summer Session, courses in spoken and written English are offered. Two six-week intensive courses are also offered during the summer. Summer visitors must apply directly to the EFS program.

EFSLANG 690A. Interacting in English — Strategies for communicating effectively in social and academic settings. Informal and formal language used in campus settings, including starting and maintaining conversations, asking questions, making complaints, and contributing ideas and opinions. Simulations and discussions, with feedback on pronunciation, grammar, and usage. Enrollment limited to 14.
   1-3 units, Aut (Elliot, R), Win (Yerian, K), Spr (Elliot, R)

EFSLANG 690B. Academic Discussion — Skills for effective participation in classroom settings, seminars, and research group meetings. Pronunciation, grammar, and appropriateness for specific tasks. Feedback on language and communication style. Prerequisite: 690A or consent of instructor. Enrollment limited to 14.
   1-3 units, Aut (Yerian, K), Win (Rylance, C), Spr (Yerian, K)

EFSLANG 690C. Advanced Interacting in English — Communication skills for extended discourse such as storytelling and presenting supported arguments. Development of interactive listening facility and overall intelligibility and accuracy. Goal is advanced fluency in classroom, professional and social settings. Identification of and attention to individual patterned errors. Prerequisite: 690A or B or consent of instructor. Enrollment limited to 14.
   1-3 units, Aut, Win, Spr (Yerian, K)
**EFSLANG 691. Oral Presentation** — For advanced graduate students. Practice in academic presentation skills; strategy, design, organization, and use of visual aids. Focus is on improving fluency and delivery style, with videotaping for feedback on language accuracy and usage. Prerequisite: 695A or consent of instructor. Enrollment limited to 14.

*3 units, Aut (Elliott, R), Spr (Romero, K), Sum (Verian, K)*

**EFSLANG 692. Speaking and Teaching in English** — For non-native speakers who must teach in English. Focus is on developing clarity, intelligibility, and effectiveness through weekly presentations simulating actual teaching assistant responsibilities. Enrollment limited to 14.

*1-3 units, Aut (Rylance, C, Shabrami, C)*

**EFSLANG 693A. Listening Comprehension** — Strategies for effective listening in an academic setting, focusing on identifying key ideas in lectures. Practice in understanding words and phrases commonly encountered in classroom settings. Computer-based exercises for comprehension of rapid, natural speech. Enrollment limited to 14.

*1-3 units, Aut (Rylance, C), Win (Ryleane, C), Spr (Verian, K), Sum (Shabrami, C)*

**EFSLANG 693B. Listening and Communication** — Listening strategies and vocabulary for understanding English in academic and non-academic contexts. Discussion and interpretation improve comprehension of communicative intent. Computer-based and video exercises; individual project. Prerequisite: 693A or consent of instructor. Enrollment limited to 14.

*1-3 units, Aut (Ryleane, C, Shabrami, C)*

**EFSLANG 694. Communication Strategies in Professional Life** — For advanced graduate students. Task-based practice of language appropriate for professional settings in industry and related teamwork. Simulation of the roles of manager, applicant, subordinate, and coworker. Prerequisite: 693A, or consent of instructor. Enrollment limited to 14.

*1-3 units, Win, Spr (Shabrami, C)*

*1-3 units, Aut (Elliott, R; Mawson, C), Win (Elliott, R), Spr (Elliott, R; Mawson, C), Sum (Elliott, R)*

**EFSLANG 695B. Advanced Pronunciation and Intonation** — Continuation of 695A, focusing on American English sounds, stress, rhythm, and intonation patterns. Emphasis is on self-monitoring, integrated with short presentations. Biweekly tape assignments and tutorials. Prerequisite: 695A. Enrollment limited to 14.

*1-3 units, Aut (Mawson, C), Spr (Elliott, R; Mawson, C)*

**EFSLANG 696. Understanding American Humor** — Recognizing rhetorical devices, jokes, and character types common to spoken humor in the U.S. Listening practice with audio and video materials and colloquial spoken English, analysis of film and television transcripts, and crosscultural discussion. Prerequisites: 690B, 693B or consent of the instructor. Enrollment limited to 14.

*1-3 units, Win, Spr (Rylance, C)*

**EFSLANG 697. Writing Fundamentals** — Focus is on improving grammatical accuracy and vocabulary, building fluency, and learning the structure and conventions of English correspondence, reports, and short academic papers. Enrollment limited to 14.

*1-3 units, Aut (Romoe, K), Spr (Rylance, C)*

**EFSLANG 698A. Writing Academic English** — Preparation of graduate students to write academic papers; emphasis is on fluency, organization, documentation, and appropriateness for specific writing tasks required in course work. Enrollment limited to 14.

*1-3 units, Aut (Rylance, C), Win (Elliott, R), Spr, Sum (Shabrami, C)*

**EFSLANG 698B. Advanced Graduate Writing** — For graduate students experienced in English writing and currently required to write for courses and research. Class meetings and individual conferences. Prerequisite: 698A. Enrollment limited to 14.

*1-3 units, Aut, Win (Verian, K), Spr, Sum (Hubbard, P)*

**EFSLANG 698C. Writing and Presenting Research** — For graduate students completing major research projects. Revising and editing strategies for preparing papers, conference abstracts, and poster presentations. Adapting content and style to different audiences. Students present their research with participant feedback. Prerequisites: 698B and 691 or consent of instructor. Enrollment limited to 14.

*1-3 units, Aut, Win, Spr (Shabrami, C)*

**FRENLANG COURSES**

**FIRST- AND SECOND-YEAR FRENCH**

Students who have never studied French before should enroll in FRENLANG 1. Students with previous training in French must take a placement test. All entering students must take Part I (written) of the online placement test during the summer, followed by Part II (oral) to be administered on campus September 20, 2006, in order to be placed in an appropriate course for Autumn Quarter. Consult the Language Center or http://language.stanford.edu/ for further information.

**FRENLANG 3, 5B, and 41B, prepare students for intermediate-level proficiency in listening comprehension, speaking, reading, and writing in satisfaction of the University foreign language requirement. Students may continue with second-year French language courses (22 or 23) or higher-level courses upon completion of the first-year sequence and recommendation of the coordinator.

A grade of ‘C’ or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit, and must be taken in sequence.

**FRENLANG 1.2.3, First-Year French** — Authentic discourse appropriate to French and Francophone contexts.

*5 units, Aut, Win, Spr (Ashoua, O; Dozer-Rabedeau, J; Howard, H; Shoshko, T; Tsethlikai, K; Wampole, C; Staff)*

**FRENLANG 5A, Intensive First-Year French** — Completes first-year language sequence in two rather than three quarters. Recommended for students with previous knowledge of French who place into 5A on the placement test. 5B fulfills the University foreign language requirement. Prerequisite: French placement test and consent of instructor.

**5A: 5 units, Aut (Howard, H), Win (Ashoua, O)**

**5B: 5 units, Win (Howard, H), Spr (Ashoua, O)**

**FRENLANG 10. Beginning French Oral Communication** — For students who have completed 2 or equivalent. Emphasis is on speaking skills, vocabulary, and pronunciation. May be repeated once for credit.

*2 units, Aut (Dozer-Rabedeau, J), Win (Howard, H), Spr (Tsethlikai, K)*

**FRENLANG 15. Intermediate French Oral Communication** — For students who have completed the first-year language requirement. May be repeated once for credit.

*2 units, Aut (Dozer-Rabedeau, J), Win (Howard, H), Spr (Tsethlikai, K)*

**FRENLANG 155. Intermediate Conversation: French in Everyday Life** — Same content as 15. May be repeated once for credit. Prerequisite: one year of college French or equivalent.

*2 units, Sum (Staff)*

**FRENLANG 20A. France and Francophonie** — Second-year French conversation based on themes from the regions of France and the Francophone world. Topics include travel, food, and crosscultural comparisons. Students returning from study abroad programs are encouraged to enroll. May be repeated once for credit. Prerequisite: 22 or equivalent.

*2 units, Aut (Blanchard, M)*

**FRENLANG 20B. French Cinema** — Second-year French conversation based on films. Intermediate-level speaking skills and advanced-level functions. Themes include: French filmmakers, stars, and trends. Film viewing in and outside the class in French. May be repeated once for credit. Prerequisite: 22 or equivalent.

*2 units, Aut, Win (Blanchard, M)*
FRENLANG 20C. Contemporary French Language — Second-year French conversation. Intermediate-level speaking skills and advanced-level functions for formal and informal situations. Useful for students planning to travel or study abroad. May be repeated once for credit. Prerequisite: 22 or equivalent.

2 units, not given this year

FRENLANG 22, 23. Second-Year French — Two-quarter sequence. Proficiency-based. Advanced-level skills including past, present, and future narration, description, and defending points of view on social and cultural issues. Topics from cultural comparisons with French and Francophone contexts. Prerequisite: 3 or consent of coordinator.

4-5 units, Aut, Win, Spr (Dozer-Rabedeau, J; Howard, H; Shashko, T; Wampole, C; Tsethlikai, K; Staff)

3-4 units, not given this year

FRENLANG 41A, B. Intensive First-Year French — Accelerated. Written exercises, compositions, conversational practice, and daily work. Stanford graduate students restricted to 9 units register for 241A, B.

5 units, Sum (Staff)

FRENLANG 50. Reading French — For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of ‘B.’ Prerequisite: one year or reading proficiency in another Romance language.

4 units, Aut (Tsethlikai, K)

FRENLANG 50S. Reading French — Same content as 50.

2-4 units, Sum (Staff)

ADVANCED FRENCH

FRENLANG 120. Advanced French Oral Communication — Speaking skills and functions including narration, description, supporting opinions, and hypothesizing about current events and issues in France. May be repeated for credit after two quarters. Prerequisites: 23 or equivalent, and consent of the instructor.

3 units, Aut, Win, Spr (Blanchard, M)

FRENLANG 121. Introduction to French Texts — Readings of major literary figures and themes from medieval times to the present. Prerequisite: 23 or consent of coordinator. Recommended: 124.

3-4 units, Aut (Palumbo-Liu, S)

FRENLANG 122. Introduction to French Culture and Civilization — Discussion of French art, geography, history, political change, and social institutions. Prerequisite: 23 or equivalent.

3-4 units, alternate years, not given this year

FRENLANG 123. French Creative Writing — Advanced. Model texts introduce students to genres and styles; review of grammar and vocabulary. Discussion of original writing by students. Prerequisite: 23 or equivalent.

3-4 units, not given this year

FRENLANG 124. Advanced French Grammar — Required for students majoring or minoring in French. Recommended for students planning to take literature courses. Prerequisite: 23 or equivalent.

3-4 units, Aut, Win (Tsethlikai, K)

FRENLANG 125. French Phonetics — For majors and other students who plan to enroll in advanced courses. Study and practice of the French language sound system. Language lab. Prerequisite: 23 or equivalent.

3-4 units, Spr (Palumbo-Liu, S)

3-4 units, Spr (Blanchard, M)

FRENLANG 199. Language Specials — Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

FRENLANG 394. Graduate Studies in French Conversation — Prerequisite: consent of the instructor.

1-3 units, Aut, Win, Spr (Staff)

FRENLANG 395. Graduate Studies in French — Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

MAISON FRANÇAISE

Other in-house courses may be announced.

FRENLANG 60A. Beginning French Conversation — (AU)

1 unit, Aut, Win, Spr (de Castries, P)

FRENLANG 60B. Intermediate French Conversation — (AU)

1 unit, Aut, Win, Spr (de Castries, P)

FRENLANG 60C. Advanced French Conversation — (AU)

1 unit, Aut, Win, Spr (de Castries, P)

FRENLANG 60D. French Viticulture — See http://www.stanford.edu/class/frenlang60d/. Prerequisite: 21 or older. (AU)

1 unit, Aut, Win, Spr (de Castries, P)

FRENLANG 60E. French Cooking — (AU)

1 unit, Aut, Win, Spr (de Castries, P)

FRENLANG 60F. Filmmaking — (AU)

1 unit, Win (de Castries, P)

FRENLANG 60P. French House Projects — Prerequisite: consent of instructor. (AU)

1 unit, Win, Spr (de Castries, P)

FRENLANG 60T. Teaching French Conversation — (AU)

1 unit, Win, Spr (de Castries, P)

GERMAN LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in German before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 20, 2006. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST-YEAR GERMAN

GERLANG 1.2.3. First-Year German — Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which German is spoken.

5 units, Aut, Win, Spr (Engel, A; Goppelsroder, F; Petig, W; Utter, A; Zhang, X; Staff)

GERLANG 5A, B. Intensive First-Year German — Equivalent of 1.2.3 combined. Stanford graduate students restricted to 9 units register for 205A, B.

5 units, Sum (Staff)

GERLANG 10. Elementary German for Seniors and Graduate Students — Intensive. For students who need to acquire reading ability in German for the Ph.D. or for advanced research in their own field. 52 fulfills Ph.D. reading exam.

4 units, Win, Sum (Petig, W)

GERLANG 11P. Individually Programmed Beginning German — For those who wish to complete more or fewer than 5 units a quarter, have scheduling conflicts, or prefer to work independently. Self-paced work with text and tapes; instructor available for consultation on a regular basis. 3-unit minimum for beginners. Conversational practice available for additional unit.

1-12 units, Aut, Win (Strachota, K), Spr (Petig, W)
INTERMEDIATE GERMAN

At this level, students have several options depending on their interests. After completing 3 or equivalent, students may enroll in 120-level courses which consider topics in German culture while encouraging additional language learning. Alternatively, 21,22 emphasize a systematic review of the language. 21W,22W study the language of business and international relations, and 100-level courses develop advanced language skills along with cultural awareness.

GERLANG 21. Intermediate German I — Reading short stories; review of German structure. Discussions in German, short compositions, videos. 4 units, Aut (Petig, W)

GERLANG 22. Intermediate German II — Continuation of 21, with greater emphasis on reading and writing skills. Literary texts of major 20th-century writers in historical context. 4 units, Win (Petig, W)

GERLANG 221. Intermediate German — Reading short stories, and review of German structure. Discussions in German, short compositions, videos. Prerequisite: one year of college German; or two years high school German; or equivalent of GERLANG 4; or AP German. 4 units, Sum (Staff)

GERLANG 21W. Intermediate German I: German for Business and International Relations — Equivalent to 21, but focus is on business and the political and economic geography of Germany. Audiotapes and videos. For students planning to do a business internship in a German-speaking country. Prerequisite: 3. 4 units, Aut (Petig, W)

GERLANG 22W. Intermediate German II: German for Business and International Relations — Equivalent to 22, but continuation of 21W. Recommended for students planning to do a business internship in a German-speaking country. Prerequisite: 21 or 21W. 4 units, alternate years, not given this year

GERLANG 52. Readings in Humanities — For undergraduates and graduate students with a knowledge of German who want to acquire reading proficiency. Readings from scholarly works and professional journals. Recommended for students who need to pass the Ph.D. reading exam. Prerequisite: one year of German, or 10, or equivalent. 4 units, Spr (Petig, W)

GERLANG99. Language Specials — Prerequisite: consent of instructor. 1–12 units, Aut, Win, Spr, Sum (Staff)

GERLANG 100. Hundert Deutsche Jahre: One Hundred German Years — Hones German language skills while introducing the history and culture of Germany as experienced by ordinary people over the course of the 20th century. Themes include Germans and democracy, money, Hitler, books, the Wall, and food. Video series, parallel readings, discussion in German. Extra listening, reading, or speaking for fourth unit. 3-4 units, Spr (Strachota, K)

GERLANG 101,102. Advanced Language Study — Short fictional and expository readings, discussions, compositions. Review of grammatical structures. Vocabulary building with emphasis on common idiomatic expressions and troublesome lexical distinctions. 3-4 units, 101: Aut (McQueen, K), 102: Spr (Staff)

GERLANG 105. Advanced Business German — For students planning to work in a German-speaking country and for preparation of the International Business German exams. Case studies of typical business situations with accompanying videos, listening comprehension exercises, and class simulations. Business correspondence and reports in German. Prerequisite: 22 or equivalent. 4 units, Spr (Petig, W)

GERLANG 110. German Newspapers — For intermediate and advanced students. Articles from current newspapers and magazines, reading comprehension strategies with online news updates, and vocabulary. Writing practice if desired. May be repeated once for credit. 3-4 units, Win (Strachota, K)

GERLANG 111. Television News from Germany — For intermediate and advanced students. Current news reports and features for listening comprehension and vocabulary. Extra listening, speaking, or writing practice for fourth unit. 3-4 units, Aut (Strachota, K)

GERLANG 199. Individual Reading — Prerequisite: consent of instructor. 1-12 units, Aut, Win, Spr, Sum (Staff)

GERLANG 395. Graduate Studies in German — Prerequisite: consent of instructor. 2-5 units, Aut, Win, Spr (Staff)

GERLANG 399. Independent Study — Prerequisite: consent of instructor. 1-6 units, Aut, Win, Spr, Sum (Staff)

HAUS MITTELEUROPA

Other in-house courses may be announced.

GERLANG 20A. Beginning German Conversation — (AU) 1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20B. Intermediate German Conversation — (AU) 1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20C. Advanced German Conversation — (AU) 1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20K. Küche Mitt (German Cooking Class) — (AU) 1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20M. Mitt Movie Series — (AU) 1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20P. Theme Projects — (AU) 1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20T. Teaching German Conversation — (AU) 1 unit, Aut, Win, Spr (Robinson, O)

ITALIAN LANGUAGE COURSES

Students who have never studied Italian before should enroll in ITALLANG 1. Students who have had some training in Italian before entering Stanford must take a placement test. Part I (written) of the placement test must be taken online during the summer, followed by Part II (oral), to be administered on campus September 20, 2006. Consult the Language Center or http://language.stanford.edu/ for further information.

Completion of ITALLANG 2A, 3, or 41C fulfills the University foreign language requirement. Students may continue with second-year Italian (21 or 21A) or other higher level courses upon recommendation of the coordinator.

A grade of ‘C’ or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit, and must be taken in sequence.

FIRST- AND SECOND-YEAR ITALIAN

ITALLANG 1,2,3. First-Year Italian — All-in-Italian communicative and interactive approach. Emphasis is on the development of authentic discourse in appropriate cultural contexts. Reading and listening to authentic materials, written and oral presentations, and conversational practice. 2 fulfills the University language requirement.

5 units, Aut, Win, Spr (Baldocchi, M; Cellinese, A; Green, D; McCarty, A; Tempesta, G; Staff)

ITALLANG 1A,2A, Accelerated First-Year Italian, Part A — Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. 2 fulfills the University language requirement.

Prerequisite: placement tests and consent of instructor.

1A: 5 units, Aut, Win (Baldocchi, M; Gelmetti, S)

2A: 5 units, Win, Spr (Baldocchi, M; Gelmetti, S)
ITALLANG 20A,B. Intermediate Oral Communication: Italy Today — Second-year conversation based on movie clips, slide shows, and other authentic materials. Guest lectures on Italian culture including opera, pop music, wine, and food culture. Preview of the Florentine experience with Florence returnees sharing their experiences in Italy. Prerequisite: first-year Italian or consent of coordinator.

3 units, 20A: Aut, 20B: Win (Tempesta, G)

ITALLANG 41A,B,C. Intensive First-Year Italian — Accelerated. Covers 1-3 quarters of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Stanford graduate students restricted to 9 units register for 241A,B,C.

5 units, Sum (Staff)

ITALLANG 20C. Intermediate Oral Communication: Modern Short Stories — Second-year conversation. Sources also include clips of Italian TV news and conversation about current affairs. Prerequisite: first-year Italian or consent of coordinator.

3 units, Spr (Tempesta, G)

ITALLANG 21,22,23. Second Year Italian — Content-based, integrating culture and language in the development of authentic discourse. Sources include news and film clips, music and audio files, and literary texts. Reading, writing, listening, and speaking capability based on crosscultural understanding. Prerequisite for 21: 2A, 3, 41C, or consent of coordinator.

5 units, 21: Aut, 22: Win (Cellinese, A; Gelmetti, S), 23: Spr (Gelmetti, S)

ITALLANG 21A,22A. Accelerated Second-Year Italian — Completes second-year sequence in two rather than three quarters. Satisfies the foreign language requirement for students majoring in International Relations. Prerequisite: 2A, 3, or consent of coordinator.

21A: 4-5 units, Win (Alberti, G), Spr (Devine, M)
22A: 4-5 units, Aut (Baldocchi, M), Spr (Cellinese, A)

ITALLANG 24. Italian Language Through Cinema — Use of film sequences to improve communication skills and review language functions. Movie clips from new Italian cinema directors such as Benigni, Moretti, Salvatore, Soldini, and Tornatore. Emphasis is on speaking, conversation, debate, and essay writing. Prerequisite: 22A, 23 or equivalent, or consent of coordinator.

4 units, Spr (Gelmetti, S)

ITALLANG 50. Reading Italian — Accelerated. For graduate students seeking to meet the University reading requirement for advanced degrees; seniors require consent of instructor. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of ‘B.’ Prerequisite: one year of Italian or reading proficiency in another Romance language.

3 units, Spr (Devine, M)

THIRD-YEAR ITALIAN

ITALLANG 114. Advanced Stylistics and Composition — Goal is proficiency in written and spoken Italian. Literary and non-literary texts with textual and grammatical analysis, oral reports, translations, and weekly writing assignments. Prerequisite: 22A or 23 or consent of instructor. WIM

3-4 units, Win (Baldocchi, M)

ITALLANG 115. Academic and Creative Writing — Continuation of 114. Academic prose: formal structures and academic terminology. Creative prose: short stories, expressive language, and when and how to break the rules for effect. Prerequisite: 114 or consent of coordinator. WIM

3-4 units, Spr (Baldocchi, M)

ITALLANG 99. Language Specials — Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

ITALLANG 394. Graduate Studies in Italian Conversation — Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (Staff)

ITALLANG 395. Graduate Studies in Italian — Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

CASA ITALIANA

ITALLANG 126. La Casa Italiana Lounge — May be repeated for credit.

2 units, Aut, Win, Spr (Lammas, D)

JAPANESE LANGUAGE COURSES

Students registering for the first time in a course must take a placement test if they have had any training in Japanese before entering Stanford. All entering students must take Part I (written and listening) of the placement test online during the summer, followed by Part II (oral and written), to be administered on campus September 20, 2006 Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST- AND SECOND-YEAR JAPANESE

JAPANLANG 1,2,3, First-Year Modern Japanese — Foundation in grammar, reading, and composition. 150 Kanji characters introduced.

5 units, 1: Aut, 2: Win, 3: Spr (Busbin, K)

5 units, 7A: Aut, 8A: Win, 9A: Spr (Fu, M)

JAPANLANG 7B,8B,9B. First-Year Japanese Language, Culture, and Communication B — First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people, 300 kanji characters. See http://www.stanford.edu/group/japanese/1stB.htm.

5 units, 7B: Aut, 8B: Win, 9B: Spr (Lipton, H; Staff)

7-8 units, Sum (Staff)

JAPANLANG 17A,18A,19A. Second-Year Japanese Language, Culture, and Communication A — For students interested in studying or working in Japan. Continuation of 9A; Japanese language, culture, and communication.

3 units, 17A: Aut (Tomiyama, Y), 18A: Win, 19A: Spr (Arao, F)

JAPANLANG 17B,18B,19B. Second-Year Japanese Language, Culture, and Communication B — Goal is to express in spoken and written Japanese advanced concepts such as comparisons and contrasts of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include newspapers, essays, and novellas. Prerequisite: 9B. See http://www.stanford.edu/group/japanese/2ndB1.htm.

5 units, 17B: Aut, 18B: Win (Lowdermilk, M; Nakamura, K), 19B: Spr (Lowdermilk, M)

7-8 units, Sum (Staff)

JAPANLANG 21,22,23, Second-Year Modern Japanese, First Quarter — Continuation of 3. Expression of ideas, advanced grammatical patterns, 600 kanji characters, simple compositions, and enhanced understanding of Japanese culture. Goal is to read original source material. Prerequisite: 3 or equivalent.

5 units, 21: Aut, 22: Win, 23: Spr (Arao, F)

JAPANLANG 27,28,29. Intermediate Japanese Conversation — Develops oral proficiency through simple sentences patterns, audio tapes, and oral presentations. For the practical use of Japanese. Prerequisite: 3, 9B, or consent of instructor.

2 units, 27: Aut, 28: Win, 29: Spr (Busbin, K)
JAPANLNG 99. Language Specials — Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

THIRD-YEAR ADVANCED JAPANESE
JAPANLNG 101, 102, 103. Third-Year Modern Japanese — Beyond fundamental grammatical forms to reading and discussion of more complex material. Emphasis is on Japanese sentence structure in newspaper and journal articles, and readings from fiction, poetry, and essays. Polite language (keigo) skills. Videos of everyday Japanese spoken at normal speed develop listening skills. Prerequisite: 23 or equivalent.
5 units, 101: Aut; 102: Win; 103: Spr (Arato, F)

JAPANLNG 111, 112, 113. Business Japanese — Topics include cultural attitudes and approaches, work ethic, the stock market, import-export trade. Business letters, job interviews, and resume writing. May be repeated for credit. In Japanese. Prerequisite: 23, 29, or 19B, or consent of instructor.
3 units, 111: Aut, 112: Win (Staff), 113: not given this year

JAPANLNG 114, 115, 116. Japanese for Bilingual Students — For students with advanced-level comprehension and speaking skills who in need of supplemental study. Emphasis is on reading, writing Chinese (kanji) characters, and formal Japanese.
3 units, not given this year.

JAPANLNG 121, 122, 123. Advanced Japanese Conversation — Focus is on fine tuning grammatical points, explaining things in Japanese, and fluency. Audiovisual material and oral presentations. Prerequisite: 23, 29, 19B, or consent of instructor.
2 units, 121: Aut; 122: Win; 123: Spr (Lipton, H)

5 units, 127B: Aut; 128B: Win; 129B: Spr (Tomiyama, Y; Staff)

7-8 units, Sum (Staff)

JAPANLNG 200. Directed Reading — Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

JAPANLNG 211, 212, 213. Advanced Japanese — Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: 103, 129B, or equivalent.
3-5 units, 211: Aut; 212: Win; 213: Spr (Nakamura, K)

JAPANLNG 394. Graduate Studies in Japanese Conversation — Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

JAPANLNG 395. Graduate Studies in Japanese — Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

KOREAN LANGUAGE COURSES
Students registering for the first time in a first- or second-year course must take a placement test if they have had any training in Korean before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral and written), to be administered on campus September 20, 2006. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST- AND SECOND-YEAR KOREAN
KORL 1, 2, 3. Beginning Korean — Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.
5 units, 1: Aut; 2: Win; 3: Spr (Kim, H)

KORL 21, 22, 23. Intermediate Korean — More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture.
3 units, 21: Aut; 22: Win; 23: Spr (Kim, H)

ADVANCED
KORL 101, 102, 103. Advanced Intermediate Korean — Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: 23 or consent of instructor.
2-3 units, 101: Aut; 102: Win; 103: Spr (Kim, H)

KORL 111, 112. Medical Korean — Medical vocabulary; cultural attitude. Video clips, technical journal and prescription reading, and class simulations. Prerequisite: 23 or consent of instructor.
2-3 units, 111: Aut; 112: Spr (Kim, H)

KORL 130K. Korean Pronunciation and Intonation — Intelligibility and fluency. Lab assignments. Prerequisite: 3 or consent of instructor.
2-3 units, not given this year

KORL 141. Business Korean — Business-related vocabulary, cultural etiquette, and work ethics. Business letters, mock interviews, and resumes. Prerequisite: 23 or consent of instructor.
2-3 units, Win (Kim, H)

KORL 200. Directed Reading in Korean — Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

KORL 301, 302, 303. Advanced Korean — Advanced and intellectual speaking and writing skills. Vocabulary, discussion, and presentation based on readings on topics such as Korean culture, history, economy, politics, multimedia, newspaper articles, and magazines. Prerequisite: 103 or consent of instructor.
3-5 units, not given this year

KORL 395. Graduate Studies in Korean — Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

PORTUGUESE LANGUAGE COURSES
Because the Portuguese Language Program does not have a formal placement test, students registering for the first time in a first- or second-year course must see the coordinator for proper placement if they have had any prior training in Portuguese. Portuguese classes count towards a major or minor in Spanish, or a minor in Portuguese. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST- AND SECOND-YEAR PORTUGUESE
PORTL 1, 2, 3. First-Year Portuguese — Oral comprehension and proficiency in speaking. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 3 fulfills the University Foreign Language Requirement.
5 units, 1: Aut (McIntyre, S) 2: Win, (Delgado, A) 3: Spr (Staff)
PORTLANG 1A, 2A. Accelerated First-Year Portuguese — For students with two years of formal study of a Romance language, preferably Spanish. Goal is to use socially and culturally appropriate forms in conversations, providing and obtaining information, and expressing feelings, emotions, and opinions. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 2A fulfills the University’s foreign language requirement.

3-5 units, Aut (McIntyre, S; Wiedemann, L), Win (Delgado, A; McIntyre, S; Wiedemann, L)

PORTLANG 11A, 12A. Accelerated Second-Year Portuguese — Goal is to use socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Prerequisite: first-year sequence, equivalent, or consent of instructor.

11A: 3-5 units, Aut (Wiedemann, L), Win, Spr (Delgado, A)
12A: 3-5 units, Aut (McIntyre, S), Win, Spr (Delgado, A)

PORTLANG 50. Reading in Portuguese — For students with superior reading proficiency in Spanish or another Romance Language. Reading competence for research and courses in Luso-Brazilian studies. Literary, journalistic, and academic readings. Fulfills University reading requirement for advanced degrees.

3-4 units, Spr (Wiedemann, L)

PORTLANG 99. Language Specials — Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

ADVANCED PORTUGUESE

PORTLANG 101. Reading and Writing in Portuguese — Further development of reading comprehension and vocabulary. The distinction between formal and informal Portuguese. Prerequisite: 12A or consent of instructor.

3-4 units, Aut (Wiedemann, L)

PORTLANG 102. Composition and Writing Workshop — Further development of academic writing. May be used as workshop to write papers for another course. Prerequisite: 12A or consent of instructor.

3-4 units, Win (Wiedemann, L)

PORTLANG 103. Advanced Conversation: Brazil Today — Emphasis is on formal presentations and discussions. Contemporary issues in Brazil based on Brazilian newspaper and magazine articles, TV and online news, films, art exhibits, and scientific advances. Students prepare short presentations and lead subsequent discussions. May be repeated once for credit. Prerequisite: 12A or consent of instructor.

3 units, Spr (Wiedemann, L)

PORTLANG 297. Directed Reading — Prerequisite: consent of instructor.
1-4 units, Aut, Win, Spr (Staff)

PORTLANG 394. Graduate Studies in Portuguese Conversation — Prerequisite: consent of instructor.
1-3 units, Aut, Win, Spr (Staff)

PORTLANG 395. Graduate Studies in Portuguese — Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

SLAVIC LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Russian before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 20, 2006. Consult the Language Center or http://language.stanford.edu/ for further information.

FIRST- AND SECOND-YEAR RUSSIAN

SLAVLANG 1, 2, 3, First-Year Russian — Functionally-based communicative approach, including essential Russian grammar. Discussions of Russian culture and the Russian view of reality.

5 units, 1: Aut, 2: Win (Gruen, I; Khassina, E), 3: Spr (Khassina, E; Rouland, N)

SLAVLANG 5, 6, 7, Russian for Native Speakers — Self-paced. Reading and writing skills and communicating in formal and informal settings. Does not fulfill the University foreign language requirement.

2 units, 5: Aut, 6: Win (Khassina, E), 7: not given this year

SLAVLANG 51, 52, 53, Second-Year Russian — More difficult grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills.

5 units, 51: Aut, 52: Win (Khassina, E; Schupbach, R), 53: Spr (Khassina, E; Nekloudova, K)

SLAVLANG 55. Intermediate Russian Conversation — May be repeated for credit. Prerequisite: first-year Russian or equivalent placement.

2 units, Aut, Win, Spr (Greenhill, R)

SLAVLANG 99. Language Specials — Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

THIRD-YEAR AND ADVANCED RUSSIAN

SLAVLANG 111, 112, 113, Third-Year Russian — A snapshot of Russian life. Reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication.

4 units, 111: Aut, 112: Win, 113: Spr (Greenhill, R)

SLAVLANG 177, 178, 179. Fourth-Year Russian — Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: 113 or equivalent.

3 units, 177: Aut, 178: Win, 179: Spr (Greenhill, R)

SLAVLANG 181, 182, 183. Fifth-Year Russian — Language proficiency maintenance: appropriate for majors and non-majors with significant language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia.

3 units, 181: Aut, 182: Win (Greenhill, R) 183: Spr (Schupbach, R)

SLAVLANG 199. Individual Work — Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLANG 299. Individual Study 1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLANG 395. Graduate Studies in Russian — Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

SLAVIANSKII DOM

Other in-house courses may be announced.

SLAVLANG 60A. Beginning Russian Conversation — (AU)
1 unit, Aut (Safran, G)

SLAVLANG 60B. Intermediate Russian Conversation — (AU)
1 unit, Win (Safran, G)

SLAVLANG 60C. Advanced Russian Conversation — (AU)
1 unit, Spr (Safran, G)

SLAVLANG 60D. East European Breweries and Brewing — (AU)
1 unit, Win, Spr (Safran, G)

SLAVLANG 60F. Slavic Films Series — (AU)
1 unit, Win (Safran, G)

SLAVLANG 60P. Slav Dom Theme Projects — (AU)
1 unit, Aut, Win, Spr (Safran, G)

SLAVLANG 60T. Teaching Slavic Conversation — (AU)
1 unit, Aut, Win, Spr (Safran, G)
SPANISH LANGUAGE COURSES

Students who have never studied Spanish before should enroll in SPANLANG 1. Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Spanish before entering Stanford. All entering students who have not taken the Spanish Language Advanced Placement (AP) Exam and received a score of 4 or 5, or who have not taken the SAT II with a score of 630 or above, must take Part I (written) of the placement test online during the summer at http://language.stanford.edu/SPANISH, followed by Part II (oral), to be administered on campus September 20, 2006. Students who have passed the language AP exam with a 4 or 5 or the SAT II with a 630 or above are exempted from the written test, but must take the oral on September 20, 2006 in order to determine their correct placement. Students who have taken the Spanish Language Advanced Placement (AP) and received a score of 5 are eligible for 10 units of credit in Spanish. Consult the Language Center or http://language.stanford.edu/ for further information.

Completion of SPANLANG 2A, 3, or 4IC fulfills the University language requirement.

Students who grew up in homes where Spanish is spoken should take the placement assessment for the special series of courses (21B,22B,23B) designed for these speakers. The bilingual series fulfills the language requirement at Stanford. Potential home-background speakers should complete the questionnaire found at http://language.stanford.edu/HOMEBACKGROUND, and attend the assessment for potential home-background speakers administered on September 20, 2006.

A grade of ‘C’ or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit and must be taken in sequence. Second-year students may alternate between the cultural emphasis (11C,12C,13C) and international relations (11R,12R,13R) series if done so in sequence (11,12,13); however, a student may only take one of each level in these series.

FIRST- AND SECOND-YEAR SPANISH

SPANLANG 1,2,3, First-Year Spanish — Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish- and English-speaking world.

5 units, Aut, Win, Spr (Alexander, A; Brates, V; Catoira, L; Guzmán, C; Miano, A; Nissler, P; Reinhold, V; Sanchez, K; Urruela, M; Zaragoza, A; Staff)

SPANLANG 1A,2A, Accelerated First-Year Spanish — Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: written and oral placement tests.

1A: 5 units, Aut, Win (Brates, V; Nissler, P; Reinhold, V; Won, H)
2A: 5 units, Win, Spr (Brates, V; Nissler, P; Reinhold, V; Won, H)

SPANLANG 10, Beginning Oral Communication — For students who have completed or are currently taking 2 and who wish to devote additional class time to developing pronunciation, usable vocabulary, and speaking skills. May be repeated once for credit.

2 units, Aut, Win, Spr (Cano Brito, V; Corso, I)

SPANLANG 11C,12C,13C, Second-Year Spanish: Cultural Emphasis — Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.

4-5 units, Aut, Win, Spr (Alexander, A; Fernandez-Medina, N; Guzman, C; Kenna, C; Perales, O; Urruela, M; Zaragoza, A; Moltiorti, J; Staff)

SPANLANG 11R,12R,13R, Second-Year Spanish: Emphasis on International Relations — Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: one year of college Spanish or equivalent.

4-5 units, 11R: Aut (Brates, V; Sierra, A), 12R: Win, 13R: Spr (Perales, O; Sierra, A; Staff)

SPANLANG 15, Intermediate Oral Communication — Emphasis is on interaction in Spanish locally and globally. Regional vocabularies and cultures at home and abroad. Interaction with local native Spanish speakers and communities globally via the Internet. May be repeated once for credit.

3 units, Aut (Staff), Win (Cano Brito, V; Fernandez-Medina, N), Spr (Perales, O)

SPANLANG 19M, Spanish for Heritage and Foreign Language

Pre-Med and Public Health Students — For students who grew up in homes where Spanish is spoken or who possess a considerable command of Spanish. Focus is on developing the ability to provide information on health-related topics to Spanish speakers in the U.S. Students participate in the organization and delivery of information on preventive health care in a workshop setting to a Spanish-speaking community.

3-4 units, Spr (Sierra, A)

SPANLANG 21B,22B,23B, Second-Year Spanish for Heritage Language Students, First Quarter — Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, movies, radio, and television. Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers used in more formal settings.

3-5 units, 21B: Aut, 22B: Win (Weikel, K), 23B: Spr (Cano Brito, V)

SPANLANG 41A,B,C, Intensive First-Year Spanish — Goal is to engage in interactions with Spanish speakers in socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units register for 241A,B,C.

5 units, Sum (Staff)

SPANLANG 50, Reading Spanish — For students who have taken Spanish for at least one year or have superior reading proficiency in another Romance language. Emphasis is on academic texts. Fulfills University reading requirements for advanced degrees if students earn a grade of ‘B.’

3 units, Spr (Sierra, A)

SPANLANG99, Language Specials — May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

ADVANCED COURSES

SPANLANG 100, Advanced Oral Communication — For students who have completed second-year Spanish or who have oral skills above the intermediate level. Interactive activities require students to persuade, analyze, support opinions, and gather and interpret others’ points of view. Focus is on vocabulary enrichment and idiomatic expressions. Cultural, literary, political, and journalistic readings. May be repeated once for credit. Prerequisite: 13 or equivalent.

3 units, Aut, Win, Spr (Rondinel, S)

SPANLANG 101, The Structure of Spanish — Criteria and skills to analyze Spanish grammatical structure. Identification of word functions in sentences and texts, types of sentences, and terminology. Structure of nouns, adjectives, and verbs, and their relationship with meaning. The differences between Spanish grammar as a formal system and in everyday life. Prerequisite: 13C, 13R, 23B, or equivalent.

3-5 units, Aut, Win (Sierra, A)

SPANLANG 102, Composition and Writing Workshop — Individual development of the ability to write in Spanish. Emphasis is on style and diction, and on preparing and writing essays on literary topics. Non-Spanish majors or minors may choose topics more closely related to their studies for projects. Prerequisite: two years of college Spanish or equivalent. WIM

3-5 units, Win (Kenna, C)
FULFILLING THE LANGUAGE REQUIREMENT

Students who have already taken courses in the relevant language at another institution, or who have previous knowledge of the language, can request to be tested. Tests are comprised of written and oral parts. A student must display first-year level proficiency in the requested language in order to fulfill the requirement. Testing is guaranteed only for these languages currently offered. Students planning to take a test must contact the Special Language Program no later than the Spring Quarter of sophomore year. To submit a request for language testing, or to request a language, apply via the web at http://www.stanford.edu/dept/SLP.

BEGINNING-LEVEL, FIRST-YEAR COURSES

Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening, comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

INTERMEDIATE-LEVEL, SECOND-YEAR COURSES

Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions. Curricular objectives and enhanced understanding of the culture are built into the courses through a multimodal approach.

ADVANCED-LEVEL, THIRD-YEAR COURSES

Advanced-level, third-year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

For further information, consult the Special Language Program in Building 40, Room 41B.

AMERICAN SIGN LANGUAGE COURSES

4 units, A: Aut, B: Win, C: Spr (Haas, C)

4 units, A: Aut, B: Win, C: Spr (Haas, C)

CENTRAL ASIAN LANGUAGE COURSES

SPECLANG 115A,B,C. Beginning Uighur

3 units, A: Aut, B: Win, C: Spr (Ataullah, K)

SPECLANG 116A,B,C. Intermediate Uighur

3 units, A: Aut, B: Win, C: Spr (Ataullah, K)

SPECLANG 192A,B,C. Beginning Kazakh

3 units, A: Aut, B: Win, C: Spr (Kumanbaeva, A)

SPECLANG 193A,B,C. Intermediate Kazakh

3 units, A: Aut, B: Win, C: Spr (Kumanbaeva, A)

SPECLANG 229A,B,C. Beginning Pashto

3 units, A: Aut, B: Win, C: Spr (Irshad, Q)

SPECLANG 232A,B,C. Beginning Dari

3 units, A: Aut, B: Win, C: Spr (Ayoobi, E)
SPECLANG 238A,B,C. Beginning Uzbek
3 units, A: Aut, B: Win, C: Spr (Kunanbaeva, A)

EAST ASIAN LANGUAGE COURSES
SPECLANG 144A,B,C. Beginning Tagalog
3 units, A: Aut, B: Win, C: Spr (Penaranda, M)
SPECLANG 145A,B,C. Intermediate Tagalog
3 units, A: Aut, B: Win, C: Spr (Penaranda, M)
SPECLANG 150A,B,C. Beginning Vietnamese
3 units, not given this year (Ha, P)
SPECLANG 151A,B,C. Intermediate Vietnamese
3 units, A: Aut, B: Win, C: Spr (Ha, P)
SPECLANG 156A,B,C. Beginning Indonesian
3 units, A: Aut, B: Win, C: Spr (Kuchmaawaty, N)
SPECLANG 157A,B,C. Beginning Thai
3 units, A: Aut, B: Win, C: Spr (Staff)
SPECLANG 174A,B,C. Beginning Quechua
3 units, A: Aut, B: Win, C: Spr (Mihalik, A)
SPECLANG 176A,B,C. Advanced Vietnamese
3 units, A: Aut, B: Win, C: Spr (Dhillon, R)
SPECLANG 177A,B,C. Intermediate Thai
3 units, A: Aut, B: Win, C: Spr (Moore, R)
SPECLANG 224A,B,C. Advanced Vietnamese
3 units, A: Aut, B: Win, C: Spr (Pa, R)
SPECLANG 226A,B,C. Beginning Khmer
3 units, A: Aut, B: Win, C: Spr (Staff)

SOUTH ASIAN LANGUAGE COURSES
SPECLANG 152A,B,C. Beginning Hindi
3 units, A: Aut, B: Win, C: Spr (Malhotra, P)
SPECLANG 153A,B,C. Intermediate Hindi
3 units, A: Aut, B: Win, C: Spr (Malhotra, P)
SPECLANG 159A,B,C. Beginning Punjabi
3 units, A: Aut, B: Win, C: Spr (Dhillon, R)
SPECLANG 160A,B,C. Intermediate Punjabi
3 units, A: Aut, B: Win, C: Spr (Dhillon, R)
SPECLANG 162A,B,C. Beginning Tamil
3 units, A: Aut, B: Win, C: Spr (Staff)
SPECLANG 183A,B,C. Beginning Sanskrit
3 units, A: Aut, B: Win, C: Spr (Porta, F)
SPECLANG 218A,B,C. Beginning Urdu
3 units, A: Aut, B: Win, C: Spr (Pervaiz, A)

CREOLE LANGUAGE COURSES
SPECLANG 134A. Beginning Haitian Creole
3 units, Spr (Staff)

EUROPEAN LANGUAGE COURSES
SPECLANG 75. Greek Culture, Ideals, and Themes — Introduction to Greek culture and its global influence in a social historical context, through images from its past and institutions in contemporary Greek society. Limited enrollment. GER:DB-Hum, EC-GlobalCom
3-5 units, Spr (Moore, R)
SPECLANG 123A,B,C. Beginning Armenian
3 units, A: Aut, B: Win, C: Spr (Staff)
SPECLANG 129A,B,C. Beginning Ukrainian
3 units, A: Aut, B: Win, C: Spr (Jarboe, L)
SPECLANG 164A,B,C. Beginning Czech
3 units, A: Aut, B: Win, C: Spr (Dusatko, J)
SPECLANG 165A,B,C. Intermediate Czech
3 units, A: Aut, B: Win, C: Spr (Dusatko, J)
SPECLANG 167A,B,C. Beginning Polish
3 units, A: Aut, B: Win, C: Spr (Kieturakis, A)
SPECLANG 168A,B,C. Intermediate Polish
3 units, A: Aut, B: Win, C: Spr (Kieturakis, A)
SPECLANG 170A,B,C. Beginning Modern Greek
4 units, A: Aut, B: Win, C: Spr (Prionas, E)
SPECLANG 171A,B,C. Intermediate Modern Greek
4 units, not given this year (Prionas, E)
SPECLANG 172A,B,C. Modern Greek Language and Culture through Literature and Film — Accelerated acquisition of language skills through text and media. Vocabulary enrichment through multimedia, online materials. Alternates with 171A,B,C. 4 units, A: Aut, B: Win, C: Spr (Prionas, E)
SPECLANG 173A,B,C. Beginning Hungarian
3 units, A: Aut, B: Win, C: Spr (Mihalik, A)
SPECLANG 186A,B,C. Beginning Serbo-Croatian
3 units, A: Aut, B: Win, C: Spr (Medic, S)
SPECLANG 198Q. Modern Greece in Film and Literature — Stanford Introductory Seminar. Preference to sophomores. Cultural and literary highlights. Filmmakers include Karkoyannis, Dassen, Boulmetis, Angelopoulos, and Scorsese; readings from Eugenides, Gage, Kavafis, Kazantzakis, Samarakis, Seferis, and Elytis. GER:DB-Hum, EC-GlobalCom
3-5 units, Aut, Win, Spr (Moore, R)
SPECLANG 215A,B,C. Modern Greek for Heritage Language Learners
4 units, not given this year (Prionas, E)
SPECLANG 221A,B,C. Beginning Norwegian
3 units, A: Aut, B: Win, C: Spr (Staff)
SPECLANG 235A,B,C. Beginning Basque
3 units, A: Aut, B: Win, C: Spr (Staff)

NATIVE AMERICAN LANGUAGE COURSES
SPECLANG 138A,B,C. Beginning Navajo
3 units, A: Aut, B: Win, C: Spr (Staff)
SPECLANG 174A,B,C. Beginning Quechua
3 units, A: Aut, B: Win, C: Spr (Fajardo, J)

DIRECTED READING AND GRADUATE STUDIES
SPECLANG 297. Directed Reading — Prerequisite: consent of instructor. 1-4 units, Aut, Win, Spr, Sum (Staff)
SPECLANG 395. Graduate Studies in Special Language — Prerequisite: consent of instructor. 1-4 units, Aut, Win, Spr (Staff)

TIBETAN LANGUAGE PROGRAM
Because the Tibetan Language Program does not have a formal placement test, students registering for the first time must see the coordinator for proper placement if they have had any prior training in Tibetan. Completion of TIBETLNG satisfies the University Foreign Language Requirement. Consult the Language Center or http://language.stanford.edu/ for further information.

TIBETLNG 1,2,3. First-Year Tibetan, First Quarter — Grammar, reading, and composition. Tibetan culture and the Tibetan view of reality. 5 units, Aut, Win, Spr, Sum (Staff)
TIBETLNG 199. Individual Work — May be repeated for credit. Prerequisite: consent of instructor. 1-5 units, Aut, Win, Spr (Staff)
TIBETLNG 395. Graduate Studies in Tibetan — May be repeated for credit. Prerequisite: consent of instructor. 1-5 units, Aut, Win, Spr (Staff)
The Center for Latin American Studies (CLAS) supports research and teaching on Latin America by the faculty and students of Stanford in all fields of study. Field research, language training, and interdisciplinary approaches are stressed in the Latin American Studies program, which draws on the strength and diversity of its nationally recognized faculty affiliates and substantial library holdings on Latin America. These resources are enhanced by the Tinker Visiting Professorship in Latin American Studies and the Nabuco Visiting Chair in Brazilian Studies, which bring distinguished Latin American scholars to teach at Stanford each year.

The center's resources include funds used in support of student and faculty activities and classes in and about Latin America, visiting professors and scholars, and various forms of public outreach. CLAS also devotes resources to Iberian and Caribbean studies. The center offers a master's degree in Latin American Studies, an undergraduate honors program, and an undergraduate minor in Latin American Studies.

### UNDERGRADUATE PROGRAMS

Although the University does not offer a B.A. in Latin American Studies, it does offer a minor and an honors program. Stanford also has departmental and interdisciplinary degree programs in which a student may concentrate on Latin America. These include Anthropological Sciences, Cultural and Social Anthropology, History, Political Science, Spanish and Portuguese, and International Relations. Contact the respective departments for further information.

### MINORS

The minor in Latin American Studies is offered to students in any major who wish to develop a complementary concentration on the region. To pursue the minor, students must submit for approval an online proposal of course work no later than the second quarter of their junior year. The minor must be completed by the second quarter of the senior year. Requirements for the minor include:

1. Completion of 25 units as follows: a 5-unit course surveying Latin America such as HISTORY 70 or an approved substitute; 20 additional units at the 100 level or higher which together comprise a coherent focus on a theoretical problem or issue of the region such as culture and identity, political economy, or sustainable development. At least 10 of the 25 units must be completed at Stanford.
2. Demonstration of proficiency in either Spanish or Portuguese, equivalent to the requirement for the honors program.
3. Field experience in Latin America such as study abroad, summer research, or internship is recommended.

Units for a student’s major cannot be double-counted towards the minor. Upon satisfactory completion of all requirements, the center’s subcommittee on undergraduate programs authorizes the designation of the Minor in Latin American Studies on the student’s transcript.

### HONORS PROGRAM

The Honors Program in Latin American Studies is open to majors in any field. The aim of the honors program is to prepare students to pursue individualized research on Latin America, culminating in the preparation of an honors thesis written under the supervision of a faculty adviser. The honors program is particularly suited to the student who wishes to go on to graduate school or pursue employment in an institution emphasizing research and independent work. Although not required, students are encouraged to undertake independent field research in Latin America for their thesis. It is strongly recommended that students enroll in HISTORY 299X, Design and Methodology for International Field Research (1 unit), in the sophomore or junior year for an overview of research design and methods for international field research.

Admission to the honors program is by application by the end of the second quarter of the junior year. Applications are reviewed and approved by the CLAS director and associate director. Applicants must have a cumulative grade point average (GPA) of 3.3 (B+) or higher, and maintain this average in courses taken to satisfy the requirements. Courses must be taken for a letter grade where that option is available. Courses credited toward LAS honors may be double-counted toward the student’s major requirements.

To graduate with interdisciplinary honors in Latin American Studies a student must:

1. Complete a total of 35 units in courses certified for honors by the Center for Latin American Studies, distributed as follows:
   a) A survey course: HISTORY 70, Culture, Politics, and Society in Latin America. This is normally taken in the sophomore year.
   b) For breadth: two 4-5-unit courses at the 100 level or higher with a focus on the region. These courses are normally taken during the sophomore and junior years.
   c) For depth: one 4-5-unit course at the 100 level or higher with a focus on the region that explores an issue in depth of particular interest to the student, approved by the honors adviser.
   d) LATINAM 198, Honors Thesis (1-10 units), under the supervision of the student’s faculty honors adviser. Normally these units are spread over two or three quarters of the senior year and are devoted to the completion of the honors thesis.
e) LATINAM 201 (same as HISTORY 275F), Social Change in Latin America Since 1900 (5 units). This Winter Quarter honors seminar must be taken in the senior year.

f) Enough additional courses focusing on Latin America to bring the total to 35 units. These must be at the 100 level or higher, except that up to 5 units may also come from study of Spanish or Portuguese beyond the seventh quarter.

g) Of the courses applied to ‘b’ and ‘c’ above, 10 units may be completed in Overseas Studies and 5 units may be taken as directed individual study.

2. Fulfill the Foreign Language Requirement (see below).

3. Submit an honors thesis which meets standards of scholarly excellence and is approved by the thesis adviser. If graduating in June, participate in the LAS honors symposium at the end of May.

FOREIGN LANGUAGE REQUIREMENT

The minimum requirement for completion of either the minor or honors program is advanced proficiency in Spanish or Portuguese by any one of the following means:

1. Completion of seven quarters of college-level study of Spanish or Portuguese.

2. Completion of a course on Spanish or Portuguese language or literature, or on some other subject but taught in Spanish or Portuguese, at the 100-level or higher, with a letter grade of ‘B’ (3.0).

3. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Department of Spanish and Portuguese.

HONORS COLLEGE

The LAS honors college, sponsored along with many other departmental and interdisciplinary honors colleges by the Vice Provost for Undergraduate Education, is an intensive three-week residential program offered directly preceding Autumn Quarter. It affords returning LAS honors students who have completed field work a debriefing and a focused series of presentations by a member of the CLAS-affiliated faculty and other Stanford instructors on adviser interaction, data preservation, bibliographic resources, writing strategies, statistical analysis, organizational techniques for completing the thesis process, and opportunities to socialize with other honors students in the college, all without cost to the students. Ample time is provided for library research, individual faculty consultations, and data analysis. Applications for honors colleges are available in Spring Quarter prior to the senior year.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES

Undergraduates at Stanford may apply for admission to the coterminal master’s program in Latin American Studies when they have earned a minimum of 120 units toward graduation, including advanced placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The annual deadline for coterminal applications is January 9.

Coterminal applicants must submit: a 500-word statement of purpose; resume; 10-15 page double-spaced academic writing sample; three letters of recommendation; a Stanford transcript; and scores from the General Test of the Graduate Record Exam. Stanford coterminal applicants must have a minimum GPA of 3.5 and a working knowledge of Spanish or Portuguese at the third-year level.

For University coterminal degree program rules and application forms, see http://registrar.stanford.edu/shared/publications.html#Coterm.

Requirements for the master’s degree are summarized below.

SUMMER INTERNSHIP GRANT

Each summer, the center awards grants to a small number of undergraduates to undertake internships in Latin America. Applications include a proposal, academic transcript, and recommendations from a faculty sponsor and one other person knowledgeable about the applicant’s abilities. Students from all departments are eligible to apply.

GRADUATE PROGRAMS

MASTER OF ARTS

The Master of Arts in Latin American Studies is an interdisciplinary program. The curriculum consists of a core set of courses surveying the history, politics, society, and culture of the region, advanced language training, and in-depth course work. In consultation with a faculty adviser, students select a course of study suited to their individual interests. Students may obtain a dual professional degree concurrently with the M.A.

ADMISSION

The one-year master’s program in Latin American Studies is designed for students who have experience working, living, or studying in Latin America or Iberia and little prior course work on the region.

The application deadline is January 9. Applicants submit an online application, including a 500-word statement of purpose, resume, 10-15 page double-spaced academic writing sample, and three letters of recommendation; official transcripts; and Graduate Record Examination scores. Applicants must apply and be accepted independently to both programs.

Applicants must meet the University admission requirements, have a working knowledge of Spanish or Portuguese at the third-year level, and have experience working, living, or studying in Latin America or Iberia prior to admission.

CLAS takes a broad approach to evaluating applications for admission. As important as GRE scores and grades are the applicant’s essay, letters of recommendation, academic writing sample, and the experiences and goals conveyed through the personal statement and resume.

DEGREE REQUIREMENTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

A description of the M.A. program is also available online at http://www.stanford.edu/group/las/programs/ma.html.

The program requires completion of a minimum of 45 graduate units. Upon entering, each student is assigned a faculty adviser who works with the student to develop a customized program of study.

To receive the M.A. degree in Latin American Studies, students must complete the items below.

1. Core courses (15 units): one core five-unit course in each of three fields of specialization:
   a) Culture and Society CulSoc—LATINAM 301, Social Change in Latin America Since 1900
   b) Environment and Ecology Eco—ANTHSCI 262, Indigenous Peoples and Environmental Problems
   c) Political Economy PolEcon—POLISCI 245F, Latin American Political Development

   These fields (CulSoc, Eco, and PolEcon) are not declared on Axess; they do not appear on the transcript or the diploma.

2. Cognate courses (15 units): three courses, one from each of the three fields of specialization listed in ‘1’ above. See http://www.stanford.edu/group/las/programs/macognatecurriculum.html for more information. Cognate courses which fulfill this requirement are indicated in the cognate courses list below with the abbreviations CulSoc, Eco, and PolEcon.

3. Elective courses (10-15 units): three elective courses in one of the three fields of specialization (see ‘1’ above) from across the University’s offerings.

4. Language requirement: at least 3 units of course work on a second Latin American language. Students must take either an advanced third-year language course if they have both Spanish and Portuguese, or take a basic course in the language in which they do not possess competence.
5. **Seminar requirement:** enroll each quarter in LATINAM 200, a 1-unit seminar on Contemporary Issues in Latin American Studies, where invited scholars present lectures on major Latin American themes and topics, followed by questions and discussion.

6. **Thesis option:** students may elect to write a master’s thesis; they may register for up to 10 units of thesis research under the guidance of an Academic Council faculty member. Thesis units may be counted toward the elective field unit requirements.

7. **Grade requirements:** all courses to be counted toward the degree, except for LATINAM 200, must be taken for a letter grade and receive a grade of “B” or higher.

### FINANCIAL AID

The Center for Latin American Studies has several graduate fellowships as well as limited research and course assistantship positions with the Tinker Visiting Professors each quarter.

### DOCTORAL PROGRAMS

Although the University does not offer a Ph.D. in Latin American Studies, Stanford has several departmental programs through which a student may concentrate on Latin America. These include Anthropological Sciences, Cultural and Social Anthropology, History, Political Science, and Spanish and Portuguese. Contact the respective departments for admission information.

### COURSES

**LATINAM 197. Directed Individual Research** — For students engaged in special interdisciplinary work that cannot be arranged by department.

- 1-10 units, Aut, Win, Spr (Staff)

**LATINAM 198. Honors Thesis** — Restricted to those writing an honors thesis in Latin American Studies.

- 1-10 units, Aut, Win, Spr (Staff)

**LATINAM 200. Seminar on Contemporary Issues in Latin American Studies** — Required of Latin American Studies master’s students each quarter. Guest scholars present analyses of major Latin American themes and topics. May be repeated for credit.

- 1 unit, Aut, Win, Spr (Klein, H)

**LATINAM 201/301. Social Change in Latin America Since 1900** — (Same as HISTORY 275F/375F.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master’s students. GER:DB-SocSci

- 5 units, Win (Klein, H)

**LATINAM 398. Master’s Thesis** — Restricted to students writing a master’s thesis in Latin American Studies. May be repeated for credit.

- 1-10 units, Aut, Win, Spr (Staff)

### COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a minor or honors program. See “Degree Requirements” above for an explanation of the field codes CulSoc, Eco, and PolEcon.

**ANTHSCI 142. Incas and their Ancestors: Peruvian Archaeology** — CulSoc

- 3-5 units, Spr (Rick, J)

**ANTHSCI 144/244. Urbanism in the Prehispanic New World** — CulSoc

- 3-5 units, Spr (Robertson, I)

**ANTHSCI 147. Archaeology of Modern Times** — (Same as ARCHLGY 104.) CulSoc

- 5 units, Win (Rathje, W)

**ANTHSCI 155/255. Demography and Life History Theory** — Eco

- 5 units, Win (Jones, J)

**ANTHSCI 162/262. Indigenous Peoples and Environmental Problems** — Eco

- 3-5 units, Aut (Durham, W)

**ANTHSCI 162B/262B. Indigenous Peoples and Social Inclusion in Latin America** — CulSoc

- 3-5 units, Win (Staff)

**ANTHSCI 167C/267C. Managing the Commons: Evolving Theories for Sustainable Resource Use** — (Same as EARTHSYS 167C/267C.) Eco

- 5 units, Aut (Irvine, D)

**ANTHSCI 191A/291A. Communicating Science: Proposals, Talks, Articles** — Eco

- 4-5 units, Win (DeGusta, D)

**ANTHSCI 262C. Cultural Diversity, Ethnicity, and Governance in Indigenous Latin America** — CulSoc

- 3-5 units, Spr (Staff)

**ARTHIST 195/395. Introduction to Black Atlantic Visual Traditions** — CulSoc

- 4 units, Win (Martinez-Raiz, B)

- 5 units, Aut (Martinez-Raiz, B)

**BIOSCI 101. Ecology** — Eco

- 3 units, Aut (Vitousek, P; Dirzo, R)

**BIOSCI 117. Biology and Global Change** — (Same as EARTHSYS 111, GEOPHYS 117.) Eco

- 3 units, Win (Vitousek, P; Arrigo, K)

**BIOSCI 114/245. Behavioral Ecology** — Eco

- 4 units, Spr (Gordon, D)

**BIOSCI 147/247. Controlling Climate Change in the 21st Century** — (Same as EARTHSYS 147/247, HUMBIO 116.) Eco

- 3 units, Win (Schneider, S; Mastrandrea, M)

**BIOSCI 175. Tropical Ecology and Conservation** — Eco

- 5 units, Spr (Dirzo, R)

- 1 unit, Win (Vitousek, P; Ehrlich, P)

**CASA 185/285. Environmental Ethics** — Eco

- 3-5 units, Win (Gupta, A)

**CEE 171. Environmental Planning Methods** — Eco

- 3 units, Win (Ortolan, L)

**CHICANST 181S. U.S.-Mexico Borderlands in Comparative Perspective** — (Same as CSRE 181S.)

- 5 units, Spr (Palafox, J)

**COMPLIT 142. The Literature of the Americas** — (Same as ENGLISH 172E.) CulSoc

- 5 units, Aut (Greene, R; Saldivar, R)

**DRAMA 17N. From Inside the First World: Women of Color Playwrights Re-mapping the U.S.** — (Same as SPANLIT 178N.) CulSoc

- 3 units, Win (Moraga, C)

**ECON 101. Economic Policy Analysis** — PolEcon

- 5 units, Aut (Coco, D), Win (Gould, A), Spr (Hanson, W)

**ECON 106. World Food Economy** — PolEcon

- 5 units, Win (Staff)

**ECON 118. Development Economics** — PolEcon

- 5 units, Aut (Jayachandran, S)
ECON 122. Economic Development of Latin America — PolEcon
5 units, Spr (Staff)

ECON 123. Regulation and Competition in Latin America — PolEcon
5 units, Win (Staff)

ECON 126. Economics of Health and Medical Care — (Same as BIO-MEDIN 156/256.) Eco
5 units, Aut (Bhattacharya, J)

ECON 155. Environmental Economics and Policy — (Same as EARTH-SYS 112.) Eco
5 units, Spr (Staff)

ECON 165. International Economics — PolEcon
5 units, Aut (Fitzgerald, D), Win (Staiger, R), Sum (Desmet, K)

ECON 166. International Trade — PolEcon
2-5 units, Win (Staff)

ECON 214. Development Economics: Microeconomic Issues — PolEcon
2-5 units, Aut (Jayachandran, S)

ECON 216. Development Economics and Growth: Macroeconomics — PolEcon
2-5 units, Win (Mahajan, A)

ECON 220. Political Economy I — PolEcon
2-5 units, Aut (Bernheim, D; Hammond, P)

ECON 224. Science, Technology, and Economic Growth — Eco
2-5 units, Win (David, P)

ECON 243. Economics of Environment — Eco
2-5 units, Spr (Goulder, L)

HISTORY 101. Energy and the Environment — (Same as EARTH-SYS 101.) Eco
3 units, Win (Kovscek, A; Durlofsky, L; Gerritsen, M)

ENGLISH 309A. Novel of the Americas — (Same as COMPLIT 329.) CulSoc
5 units, Win (Saldívar, R)

FRENGEN 259. Self-Reflexivity Historicized, or the Emergence of the Second-Order Observer — (Same as COMPLIT 259.) CulSoc
3-5 units, Win (Gumbrecht, H)

GES 333. Water Policy Colloquium — (Same as CEE 333, IPER 333.) Eco
1 unit, Spr (Freyberg, D)

HISTORY 70. Culture, Politics, and Society in Latin America
5 units, Spr (Frank, Z)

HISTORY 201. Public Service and History — CulSoc
5 units, Win (Camarillo, A)

HISTORY 202/306E. International History and International Relations Theory — (Same as POLSCI 316.) CulSoc
5 units, Win (Holloway, D)

HISTORY 217B/317B. Spain in the Middle Ages: Islam, Judaism, and Christianity in Coexistence and Conflict — CulSoc
5 units, Win (Staff)

HISTORY 273A/373A. The Comparative Histories of the Hispanic Caribbean — CulSoc
5 units, Aut (Staff)

HISTORY 275/375. Slavery in the Americas — CulSoc
5 units, Aut (Staff)

HISTORY 276/376. Modern Brazil — CulSoc
5 units, Win (Frank, Z)

HISTORY 277F/377F. Marranos, Conversos, and Crypto-Jews in Latin America, 16th-20th Centuries — CulSoc
5 units, Win (Staff)

5 units, Spr (Staff)

HISTORY 299X/399A. Design and Methodology for International Field Research
1 unit, Spr (Kollmann, N; Roberts, R)

HISTORY 309E. History Meets Geography — CulSoc
5 units, Spr (Frank, Z)

HISTORY 330. Core Colloquium on Early Modern Europe: Europe and the Other — CulSoc
5 units, Aut (Herkog, T)

HISTORY 353A. Special Topics in American History: Comparative Colonialism, North and South America — CulSoc
5 units, Aut (Herkog, T; Winterer, C)

HUMBIO 112. Conservation Biology — (Same as BIOSCI 144.) Eco
3-4 units, Win (Baggs, C; Launer, A)

HUMBIO 118. Ecological Anthropology — (Same as ANTHSCI 164/264.) Eco
3-5 units, Win (Bird, R)

HUMBIO 129. Critical Issues in International Women’s Health — Eco
4 units, Aut (Murray, A)

HUMBIO 129S. International Health — Eco
4 units, Win (Staff)

HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges — (Same as MI 103.) Eco
4 units, Spr (Smith, D)

INTNLREL 161B. Global Human Geography: Europe and Americans — (Same as HISTORY 106B.) CulSoc
5 units, Win (Lewis, M)

IPER 235. Global Environmental Ethics — Eco
4-5 units, Win (Staff)

IPER 250. Ecological Principles for Environmental Problem Solving — Eco
3 units, Win (Staff)

LAW 611. International Conflict Resolution — (Same as MS&E 459, PSYCH 283.) PolEcon
1 unit, Win (Staff)

MED 243. Biomedical and Social Science Responses to the HIV/AIDS Epidemic — Eco
3 units, Spr (Katzenstein, D)
MED 262. Economics of Health Improvement in Developing Countries—(Same as HUMBIO 121.) Eco
5 units, Win (Miller, N)

POLISCI 113F. The United Nations and Global Governance—PolEcon
5 units, Spr (Stedman, S)

5 units, Win (Sagan, S)

POLISCI 140F. The Comparative Political Economy of Advanced Countries—PolEcon
5 units, Win (Etchemendy, S)

POLISCI 141. The Global Politics of Human Rights—PolEcon
5 units, Win (Staff)

POLISCI 245F. Latin American Political Development—PolEcon
5 units, Spr (Etchemendy, S)

PSYCH 185/285. Contemporary Issues in Peace Studies—(Same as POLISCI 311.) PolEcon
3 units, Spr (Holloway, D)

SOC 231. World, Societal, and Educational Change: Comparative Perspectives—(Same as EDUC 136/306D.) CulSoc
4-5 units, Win (Staff)

SPANLIT 107N. Latin American Women: Novels and Films—CulSoc
3-5 units, Win (Ruffinelli, J)

SPANLIT 114N. Lyric Poetry—CulSoc
3-5 units, Spr (Predmore, M)

SPANLIT 115N. Growing up Bilingual—CulSoc
3-5 units, Spr (Valdés, G)

SPANLIT 116N. New World Creation Narratives—CulSoc
3-4 units, Aut (Brotherston, J)

SPANLIT 123. The Struggle for Modernity—CulSoc
3-5 units, Spr (Sanjuan-Pastor, M)

SPANLIT 133. Honor, Treason, Religion, and Sex in Early Spain—CulSoc
3-5 units, Aut (Staff)

SPANLIT 136. Introduction to Modern Peninsular Spanish Literature—CulSoc
3-5 units, Win (Staff)

SPANLIT 140. Introduction to Methods of Literary and Cultural Analysis—CulSoc
3-5 units, Aut (Surwillo, L)

SPANLIT 160. Survey of Latin American Literature from Pre-Columbian times to Independence—CulSoc
3-5 units, Aut (Schroeder, P)

SPANLIT 161. Survey of Latin American Literature after Independence—CulSoc
3-5 units, Win (Schroeder, P)

3-5 units, Win (Hatoum, M)

SPANLIT 193. The Cinema of Pedro Almodóvar—CulSoc
3-5 units, Spr (Yarbro-Bejarano, Y)

SPANLIT 205. Spanish Dialectology—CulSoc
3-5 units, Spr (Valdés, G)

3-5 units, Win (Resina, J)

SPANLIT 215. The Novel in Franco Era—CulSoc
3-5 units, Win (Resina, J)

SPANLIT 218. Spanish Realism: Priests, Prose, and Anticlericalism—CulSoc
3-5 units, Spr (Surwillo, L)

SPANLIT 222. The Problem of Two Spains: Literature and Society in 19th-Century Spain—CulSoc
3-5 units, Aut (Predmore, M)

SPANLIT 223. Literature and Society in Early 20th-Century Spain—CulSoc
3-5 units, Win (Predmore, M)

SPANLIT 225E. Theater, Society, and Politics in 20th-Century Spain—CulSoc
3-5 units, Spr (Predmore, M), not given this year

3-5 units, Spr (Hatoum, M)

SPANLIT 255. Magical Realism: Gabriel García Márquez—CulSoc
3-5 units, Win (Ruffinelli, J)

SPANLIT 257/358. Chilean Novels and Chronicles: Roberto Bolaño and Pedro Lemebel—CulSoc
3-5 units, Spr (Ruffinelli, J)

SPANLIT 270. Poetry and Politics in Latin America—CulSoc
3-5 units, Spr (Ruffinelli, J)

SPANLIT 275. Cuban Cinema after the Revolution—CulSoc
3 units, Spr (Schroeder, P)

SPANLIT 281. Flor y Canto: Poetry Workshop—(Same as DRAMA 179F.) CulSoc
3-5 units, Spr (Moraga, C)

SPANLIT 321. Novel of Memory—CulSoc
3-5 units, Aut (Resina, J)

SPANLIT 347. Spanish Colonial Writing and Native Sources—CulSoc
3-5 units, Aut (Brotherston, J)

SPANLIT 389E. Race and Sex in Cultural Representations—CulSoc
3-5 units, Win (Yarbro-Bejarano, Y)
OVERSEAS STUDIES
Courses taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

SANITAGO
LATINAM 58X. Living Chile: A Land of Extremes — (Same as EARTHSYS 110X.) GER:DB-EngrAppSci
5 units, Aut (Poblete, V; Ginochio, R), Spr (Poblete, V)

LATINAM 118X. Artistic Expression in Latin America — (Same as SPANLIT 166S.)
5 units, Win (Albornoz, C)

LATINAM 141X. Politics and Culture in Chile — GER:DB-Hum, EC-GlobalCom
5 units, Spr (Subercaseaux, B)

LATINAM 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective — (Same as POLisci 243P.)
GER:DB-SocSci
5 units, Aut (Micco, S)

LINGUISTICS
Chair: Beth Levin
Professors: Joan Bresnan, Eve V. Clark, Penelope Eckert, Martin Kay (on leave), Paul Kiparsky, Beth Levin, Stanley Peters (on leave), John R. Rickford, Ivan A. Sag, Peter Sells, Thomas A. Wasow
Associate Professors: David Beaver (on leave), Daniel Jurafsky (Autumn, Winter), Christopher Manning
Assistant Professor: Arto Anttila
Senior Lecturers: Philip L. Hubbard, Beverley J. McChesney
Consulting Professors: Ronald Kaplan, Lauri Karttunen, Geoffrey Nunberg, Annie Zaenen
Consulting Associate Professors: Jared Bernstein, Cleo Condoravdi
Lecturers: Heriberto Avelino, Vivienne Fong, Graham Katz
Visiting Professor: Arnold Zwicky
Affiliated Faculty: Herbert H. Clark, James A. Fox, Kenji Hakuta, Miyako Inoue, Yoshiko Matsumoto, Orrin W. Robinson III, Richard D. Schupbach, Chao Fen Sun

Department Offices: Margaret Jacks Hall, Building 460
Mail Code: 94305-2150
Phone: (650) 723-4284
Email: linguistics@csli.stanford.edu
Web site: http://www-linguistics.stanford.edu

Courses given in Linguistics have the subject code LINGUIST. For a complete list of subject codes, see Appendix.

Linguistics concerns itself with the fundamental questions of what language is and how it is related to the other human faculties. In answering these questions, linguists consider language as a cultural, social, and psychological phenomenon and seek to determine what is unique in languages, what is universal, how language is acquired, and how it changes. Linguistics is, therefore, one of the cognitive sciences; it provides a link between the humanities and the social sciences, as well as education, and hearing and speech sciences.

The department offers courses at the undergraduate and graduate levels in the areas central to linguistic theory and analysis. Many of them deal with the analysis of structural patterns in the different components that make up language, including sounds (phonetics and phonology), meanings (semantics), words (morphology), sentences (syntax), and the way they vary and change over time. Other courses integrate the analysis of linguistic structure with phenomena that directly concern other disciplines. These include courses in computational linguistics, language acquisition, the philosophy of language, and sociolinguistics.

A variety of open forums provide for the discussion of linguistic issues, including colloquia and regularly scheduled workshops in child language, computational linguistics, phonology, semantics, sociolinguistics, and syntax. Faculty and visiting scholars in the department and the Center for the Study of Language and Information (CSLI), whose members are computer scientists, linguists, philosophers, and psychologists, participate extensively in the activities of the department.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major stresses the study of language both as a fundamental human faculty and as a changing social institution. At the core of the program is a set of departmental courses on the nature of human language; the major also draws on courses offered by other departments and programs.

The Linguistics major cuts across the humanities and the social and physical sciences. It provides a solid general education as a background for advanced studies in such disciplines as Anthropology, Communication, Computer Science, Education (Language, Literacy, and Culture), hearing and speech sciences, languages, Law, Linguistics, Philosophy, and Psychology.

REQUIREMENTS

Requirements for the B.A. include at least 50 units of course work in Linguistics and approved courses in related fields. Of the 50 units required for the major, no more than 12 may be below the 100 level. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis.

Core Courses — The core courses are:
LINGUIST 1. Introduction to Linguistics
LINGUIST 110. Introduction to Phonetics and Phonology
LINGUIST 120. Introduction to Syntax
LINGUIST 130A. Introduction to Linguistic Meaning, or 130B. Introduction to Lexical Semantics
LINGUIST 150. Language in Society, which fulfills the Writing in the Major requirement (WIM)
LINGUIST 160. Introduction to Language Change, or, in advance consultation with the Linguistics undergraduate studies chair, a course in historical linguistics or the history of a language

All majors must complete at least five core courses, including LINGUIST 150, Language and Society, which fulfills the Writing in the Major requirement (WIM).

Other Courses — Other courses counting toward the unit requirement should form a coherent program with emphases from among the areas of concentration listed below. Students should consult with the Linguistics undergraduate studies chair when declaring the major, and maintain regular contact during the remainder of their Stanford career. Each student’s major program must be approved by the Linguistics undergraduate studies chair, or approved department adviser.

Students in the major must also take:
1. At least two 200-level Linguistics courses, typically in their area of concentration.
2. LINGUIST 197, Undergraduate Research Seminar, in the junior year. (Special arrangements can be made for transfer students and others who start the major late.)

Other Requirements —
1. Foreign language: majors must have competence in at least one language other than English as part of their understanding of the field of linguistics and its study. This is usually demonstrated by the completion of six quarters of language study at Stanford or equivalent; level of proficiency is determined by the Language Center or the relevant language department.

Students may petition to be exempted from the Language Requirement if they have grown up speaking a language other than English and can use it for everyday purposes and for linguistic analysis.

2. Junior research paper: this requirement is typically fulfilled by providing an additional stage of revision on a research paper previously submitted for course credit.
subscribed in a Linguistics course. It must be approved by both the instructor of the course and the Linguistics undergraduate studies chair.

AREAS OF CONCENTRATION

Students select one of the following areas of concentration or develop one themselves in advance consultation with the Linguistics undergraduate studies chair. These areas of concentration are not declared on Axess, and they do not appear on the transcript or diploma.

General Linguistics — This concentration provides a broad education in Linguistics and is advisable for students interested in advanced degrees in Linguistics. All five core courses are required.

Language and Society — This concentration focuses on the social dimensions of language.

Language Structures — This concentration focuses on the cognitive aspects of language.

Language Specialization — This concentration focuses on linguistics as it pertains to a particular language. To date, Chinese, Japanese, and Spanish language specializations have been pre-approved. Other language specializations can be arranged on an ad hoc basis if appropriate courses are available in the relevant departments.

MINORS

Requirements for the minor include at least 28 units of course work (typically seven courses) in Linguistics and related fields, approved in advance by the Linguistics undergraduate studies chair. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis. The courses counting towards the minor must be incremental units beyond those needed to satisfy the student’s major course of study. The minor consists of:

1. LINGUIST 1. Introduction to Linguistics
2. Two out of the following five Linguistics core courses: LINGUIST 110. Introduction to Phonetics and Phonology, LINGUIST 120. Introduction to Syntax, LINGUIST 130A. Introduction to Linguistic Meaning, or LINGUIST 130B. Introduction to Lexical Semantics, LINGUIST 160. Introduction to Language Change, or, in advance consultation with the Linguistics undergraduate studies chair, a course in historical linguistics or the history of a language.
3. At least four other courses determined in advance consultation with the Linguistics undergraduate studies chair. Students are encouraged to take at least one 200-level Linguistics course. Students may also choose to do independent work with a faculty member of their choice.

HONORS PROGRAM

Students who wish to undertake a more intensive program of study, including independent research, should seek departmental honors. An application to pursue honors work should be presented to a Linguistics undergraduate adviser before the end of the junior year. Approval is given only to students who have maintained a grade point average (GPA) of 3.3 (B+) or better in the courses required for the major.

Honors students take a total of 60 units. These must include the 50 units for the major, 10 additional units of independent study and Honors Research and an honors thesis based on research conducted with a principal adviser who must be a member of the Linguistics faculty, and a secondary faculty adviser who may, with the approval of the Undergraduate Studies Committee, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in LINGUIST 199, Independent Study, to work closely with one of the advisers on the research project. In Winter and Spring quarters, honors students register in LINGUIST 198, Honors Research, with the principal adviser for close supervision of the honors thesis. The thesis must be submitted in final, acceptable, form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

COTERMINAL PROGRAM

The Department of Linguistics admits a very limited number of undergraduates to work for their coterminal degree in Linguistics. Students are required to submit to the department a complete application, which includes a statement of purpose, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree rest with the Graduate Admissions Committee of the Department of Linguistics. For further application information, see the department’s web pages.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

MASTER OF ARTS

The University’s basic requirements for the master’s degree are discussed in the “Graduate Degrees” section of this bulletin. The following are additional departmental requirements. Candidates should review the department’s “Guidelines for the M.A. and Ph.D. Degrees” for further particulars concerning these requirements.

1. Courses: candidates must complete a minimum of 45 units of graduate work in linguistics, including at least four courses in the student’s area of specialization. No more than two courses should be at the 100 level.

Individual programs should be worked out in advance with an adviser who should ascertain that the necessary courses in the area of specialization are offered over the course of the year of anticipated enrollment. The overall grade point average (GPA) must be at least 3.0 (B) for all degree program coursework.

2. Language: reading knowledge of a non-native language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language, or in-depth research on the structure of a non-native language.

3. Thesis or Thesis Project: a research paper supervised by a committee of three faculty (normally fulfilled by up to 6 units of LINGUIST 398, Directed Research).

DOCTOR OF PHILOSOPHY

The following requirements are in addition to the basic University requirements for the degree sought; see the “Graduate Degrees” section of this bulletin. Candidates should review the department’s “Guidelines for the M.A. and Ph.D. Degrees” for further particulars concerning these requirements.

1. Language: candidates must demonstrate the ability to read at least one foreign language in which a substantial linguistic literature is written, with sufficient facility to understand and to interpret linguistic research published in that language. (Particular areas of specialization may require additional research languages.)

In addition, each candidate must demonstrate an explicit in-depth knowledge of the structure of at least one language (normally neither the candidate’s native language nor the language used for the reading exam). This requirement is fulfilled by writing an original research paper on a language.

2. Courses: a minimum of 135 units of graduate work beyond the B.A. or B.S. exclusive of dissertation units or, beyond the M.A., 90 units exclusive of dissertation units. A basic course requirement detailed in the Ph.D. guidelines guarantees that each student covers a sufficient set of subareas within the field.

Candidates must maintain a satisfactory record in the number and distribution of units completed. The overall course work GPA must be at least 3.0 (B) and all of the basic courses should be completed with at least a ‘B.’

3. Research: the prospective Ph.D. candidate is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of the Autumn Quarter of the second year; the deadline for completion of the second qualifying paper is the end
of Spring Quarter of the second year. The subject matter of the two papers, although it may be related (for example, same language), must be clearly distinct. The requirement is fulfilled by LINGUIST 395A, B, Research Workshop (1-2 units each), and by oral discussion with a committee of at least three faculty members selected by the student and the faculty.

4. Candidacy: students must complete a prescribed portion of the basic course requirement (see item 2 above), one foreign language requirement (see item 1 above), and one qualifying paper (see item 3 above) by the end of their second year.

5. Teaching: at least three quarters serving as teaching assistant in a linguistics course.

6. Colloquia: two oral presentations exclusive of the oral presentation of the dissertation proposal (see item 7b below). This requirement is satisfied by class presentations, conference papers, or colloquium talks. Normally, both should be given during the first four years of study.

7. Dissertation: a) a written dissertation proposal is required by the end of the third year.
b) oral presentation of the dissertation proposal, preferably as a colloquium.
c) approval of the dissertation topic and appointment of a dissertation committee.
d) passing a University oral examination on the dissertation and related areas.
e) dissertation (up to 15 units of LINGUIST 399).

PH.D. MINOR

1. Courses: the candidate must complete 30 units of course work in linguistics at the 100 level or above, including LINGUIST 110, 120, and either 130A or 130B (100-level courses are waived if 200-level courses in the same area are taken), and at least three courses related to the area of specialization. Courses submitted for the minor must be incremental units beyond those used to satisfy the major. Individual programs should be worked out in advance with the student’s Ph.D. minor adviser in linguistics.

2. Research Project (optional): the candidate may elect to present a paper which integrates the subject matter of linguistics into the field of specialization of the candidate.

3. The linguistics adviser or designee serves on the candidate’s University oral examination committee and may require that up to one-third of the examination be devoted to the minor subject.

Ph.D. Minor in Applied Linguistics — The Department of Linguistics participates in the Applied Linguistics Minor. See the “Language Center” section of this bulletin for full details.

COGNITIVE SCIENCE

Linguistics is participating with the departments of Computer Science, Philosophy, and Psychology in an interdisciplinary program in Cognitive Science for doctoral students. The program is intended to provide an interdisciplinary education as well as a deeper concentration in linguistics. Students who complete the Linguistics and Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Linguistics. To receive this field designation, students must complete 30 units of approved courses, to be determined in consultation with the graduate studies adviser.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for majors, minors, and M.A. and Ph.D. minor candidates in Linguistics. Those with numbers 200 and above are primarily for graduate students, but with consent of instructor some of them may be taken for credit by qualified undergraduates. At all levels, the course numberings indicate a special area, as follows:

01-04 General
05-09 Phonetics
10-14 Phonology
15-19 Morphology
20-29 Syntax
30-39 Semantics, Pragmatics, Discourse
40-49 Language Acquisition, Psycholinguistics
50-61 Sociolinguistics, Language Variation, Change
62-73 Language and Culture, Structure of a Language
74-79 Methods, Mathematical Linguistics, Statistics
80-89 Computational Linguistics
90-93 Applied Linguistics
94-99 Directed Work, Theses, Dissertations

LINGUIST 1. Introduction to Linguistics — The cognitive organization of linguistic structure and the social nature of language use. Why language learning is difficult. Why computers have trouble understanding human languages. How languages differ from one another. How and why speakers of the same language speak differently. How language is used strategically. GER:DB-SocSci

4 units, Aut (Eckert, P; Sag, I)

LINGUIST 44N. Living with Two Languages — Stanford Introductory Seminar. Preference to freshmen. The nature of bi- and multilingualism with emphasis on the social and educational effects in the U.S. and worldwide, in individual versus society, and in child and adult. The social, cognitive, psycholinguistic, and neurological consequences of bilingualism. Participation in planning and carrying out a research project in language use and bilingualism. GER:DB-SocSci

3 units, Spr (Clark, E)

LINGUIST 47N. Languages, Dialects, Speakers — Stanford Introductory Seminar. Preference to freshmen. Variation and change in languages from around the world. The roots, historical development, and and linguistic and social structures of variation. How languages differ from each other, and how issues in linguistics connect to other social and cultural issues. The systematic study of language. GER:DB-SocSci

3 units, Aut (Anttila, A)

LINGUIST 56Q. What is the Opposite of Masculine? Gay Men and Masculinity — Stanford Introductory Seminar. Preference to sophomores. The linguistic and social worlds of gay men, and artistic representations of or for gay men. Relationships in American culture between the oppositions masculine/feminine, manly/unmanly, masculine/effeminate, and straight/gay. Course includes frank language and sexual images.

3 units, Spr (Zwicky, A)

LINGUIST 58Q. The Changing Practices of Letter Writing — Stanford Introductory Seminar. Preference to sophomores. The role of letter writing in negotiating the boundaries between public and private interaction. Focus is on how the role of letters has changed since the Middle Ages. How letters have shaped communities and cultural ideologies; effects of changing technologies such as printing and email, and of increases in literacy.

2 units, Win (Traugott, E)

LINGUIST 59N. Language in the U.S.A. — Stanford Introductory Seminar. Preference to freshmen. The nature of language variation in the U.S.; its social, historical, and political significance. Language attitudes and prejudices, including whether English should be the official language; rap and hip hop; the language of doctors and patients; and the Ebonics controversies. Social, regional, and ethnic varieties of American English such as Appalachian, and the nature and status of other languages including Spanish, Native and Asian American voices, and American Sign Language.

3 units, Win (Rickford, J)
3-5 units, Spr (Rickford, J)

LINGUIST 90. Teaching Spoken English — Practical approach to teaching English to non-native speakers. Teaching principles and the features of English which present difficulties. Preparation of lessons, practice teaching in class, and tutoring of non-native speaker.
3-4 units, Spr (Mawson, C)

LINGUIST 105/205A. Phonetics — (Graduate students register for 205A.) The study of speech sounds: how to produce them, how to perceive them, and their acoustic properties. The influence of production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: 110 or equivalent, or consent of instructor. GER:DB-SocSci
4 units, Win (Avelino, H)

LINGUIST 110. Introduction to Phonetics and Phonology — Differences in the sounds of the world’s languages and how these sounds are made by the human vocal tract. Theories that account for cross-linguistic similarities in the face of differences. GER:DB-SocSci
4 units, Spr (Scarf, R)

LINGUIST 120. Introduction to Syntax — Grammatical constructions, primarily English, and their consequences for a general theory of language. Practical experience in forming and testing linguistic hypotheses, reading, and constructing rules. GER:DB-SocSci
4 units, Aut (Wasow, T)

LINGUIST 124A/224A. Introduction to Formal Universal Grammar — (Graduate students register for 224A.) A formal model of universal grammar designed to explain crosslinguistic variation in syntactic structure: nonconfigurationality in Australian aboriginal languages, incorporation in native American languages and the Bantu languages of Africa, scrambling and head movement in European languages. Issues such as universal grammar design, and analytic problems from a variety of natural languages. Prerequisites: introduction to syntax and familiarity with logic or other symbolic systems, or consent of instructor. GER:DB-SocSci
4 units, not given this year

LINGUIST 125/225. Seminar in Syntax: Choosing a Variant — (Graduate students register for 225.) Cases where two or more expressions serving as alternatives seem to be in free variation, differing at most in stylistic value. The semantic, discourse function, syntactic, prosodic, and processing factors that favor the choice of one variant over the other. May be repeated for credit.
2-4 units, Aut (Zwicky, A)

LINGUIST 130A. Introduction to Linguistic Meaning — Linguistic meaning and its role in communication. How diagnostic tests can be used to categorize and separate semantic phenomena such as ambiguity and vagueness, entailment, and presupposition. How basic set theory and logic can be used to specify meanings and explain semantic phenomena. Pragmatic complications involving the assumptions and intentions of language users. Those who have not taken logic, such as PHIL 150 or 151, should also enroll in 130C. Prerequisites: 120, or consent of instructor. GER:DB-SocSci
4 units, Spr (Katz, G)

LINGUIST 130B. Introduction to Lexical Semantics — Issues in the study of word meaning. Focus is on the core semantic properties and internal organization of the four major word categories in natural languages: nouns, verbs, adjectives, and prepositions. GER:DB-SocSci
4 units, Win (Fong, V)

LINGUIST 130C. Logic Laboratory — Typically taken in conjunction with 130A/230A.
1 unit, Spr (Katz, G)

LINGUIST 133/233. Seminar in Semantics: Language and Space — (Graduate students register for 233.) How spatial notions are encoded in language, and how languages differ in their description of space. Focus is on the semantics of locative expressions, taking into account findings in language acquisition and linguistic anthropology. May be repeated for credit.
1-4 units, Spr (Fong, V)

LINGUIST 140/240. Language Acquisition I — (Graduate students register for 240.) Processes of language acquisition in early childhood; stages in development; theoretical issues and research questions. Practical experience in data collection. GER:DB-SocSci
4 units, Aut (Clark, E)

LINGUIST 144. Introduction to Cognitive Science — (Same as PHIL 190, PSYCH 130, SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci
4 units, Spr (Bresnan, J)

LINGUIST 150. Language in Society — How language and society affect each other. Class, age, ethnic, and gender differences in speech. Prestige and stigma associated with different ways of speaking and the politics of language. The strategic use of language. Stylistic practice; how speakers use language to construct styles and adapt their language to different audiences and social contexts. GER:DB-SocSci, WIM
4 units, Spr (Eckert, P)

LINGUIST 152/252. Pidgin and Creole Sociolinguistics — (Graduate students register for 252.) Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portuguese, Chinook, Motu, and Sango.
2-4 units, not given this year (Rickford, J)

LINGUIST 156. Language and Gender — The role of language in the construction of gender, the maintenance of the gender order, and social change. Field projects explore hypotheses about the interaction of language and gender. No knowledge of linguistics required. GER: DB-SocSci, EC-Gender
4 units, Win (Eckert, P)

LINGUIST 157. Innovations: Variation and Change — How do new types of expressions, vocabulary items, morphological forms, idioms, formulae, and syntactic constructions arise? How do they spread from person to person? What is their history as they compete with other expressions? Case studies of innovations as group projects. Prerequisite: 197 or consent of instructor.
3-4 units, Win (Zwicky, A)

LINGUIST 160. Introduction to Language Change — (Same as ANTH-SCI 110.) Variation and change as the natural state of language. Differentiation of dialects and languages over time. Determination and classification of historical relationships among languages, and reconstruction of ancestral stages. Types, rates, and explanations of change. Parallels with cultural and genetic evolutionary theory. Implications for the description and explanation of language in general. GER:DB-SocSci
4-5 units, not given this year

LINGUIST 171/271. Structure of Japanese — (Graduate students register for 271; same as JAPANLIT 177/277.) Linguistic analysis of the major grammatical structures of Japanese. Prerequisites: two years of Japanese. Recommended: course in linguistics.
2-4 units, not given this year (Sells, P)
LINGUIST 172/273. Structure of Korean — (Graduate students register for 273; same as KORGEN 172/273.) The major grammatical structures of Korean including noun phrases, verb phrases, and simple and complex sentences. Prerequisite: first-year Korean.
3-4 units, Spr (Sells, P)

LINGUIST 174/274A. Field Methods I — (Graduate students register for 274A.) Hands-on. The methods by which linguists gather raw linguistic data about a language and begin analyzing its structure. Working with a speaker of a language not previously studied by class participants, students develop a description of key aspects of its grammar and examine methodologies for obtaining, storing, and manipulating data.
2-4 units, Win (Avelino, H)

LINGUIST 180. Introduction to Computer Speech and Language Processing — Machine translation, web-based question answering, conversational agents, speech recognition and synthesis, parsing, computational semantics and pragmatics. Foundation for other language processing courses; focus is on using available online implementations of algorithms. Prerequisite: CS 106B or X. GER:DB-EngrAppSci
4 units, not given this year (Kay, M)

LINGUIST 182/282. Human and Machine Translation — (Graduate students register for 282.) The process of translation by professional and amateur translators, and by existing and proposed machine-translation systems; what each might learn from the others. Prerequisite: advanced knowledge of a foreign language. GER:DB-EngrAppSci
4 units, not given this year (Key, M)

LINGUIST 183/283. Programming and Algorithms for Natural Language Processing — (Graduate students register for 283.) Construction of computer programs for linguistic processes such as string search, morphological, syntactic, and semantic analysis and generation, and simple machine translation. Emphasis is on the algorithms that have proved most useful for solving such problems. GER:DB-EngrAppSci
3-4 units, not given this year (Kay, M)

LINGUIST 187/287. Grammar Engineering — (Graduate students register for 287.) Hands-on. Techniques for implementation of linguistic grammars, drawing on grammatical theory and engineering skills. The implementation of constraints in morphology, syntax, and semantics, working within a unification-based lexicalist framework. Focus is on developing small grammars for English and at least one other language. Prerequisite: basic syntactic theory or 120. No programming skills required.
1-4 units, Win (Flickinger, D; Oepen, S)

LINGUIST 191/291. Linguistics and the Teaching of English as a Second/Foreign Language — (Graduate students register for 291.) Methods and techniques for teaching languages, using concepts from modern linguistics and language acquisition theory. Focus is on teaching English, but the principles, methods, and techniques are applicable to any language. Optional 1-unit seminar in computer-assisted language learning. GER:DB-SocSci
4-5 units, Win (Hubbard, P)

LINGUIST 197. Undergraduate Research Seminar — Research goals and methods in linguistics and related disciplines. Students work on a small project to define a focus for their linguistic studies and prepare for honors research. Presentations; final paper.
2 units, Win (Levin, B)

LINGUIST 198. Honors Research
1-15 units, Win, Spr (Staff)

LINGUIST 199. Independent Study
1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 200. Foundations of Linguistic Theory — Theories that have shaped 20th-century linguistics; recurrent themes and descriptive practice.
4 units, Aut (Kiparsky, P)

LINGUIST 201. Advanced Introduction to Linguistics — Primarily for graduate students. The leading ideas of linguistic description and argumentation. Fundamental representational notions in phonology, syntax, and semantics, and the place of these notions in wider linguistic analysis.
4 units, not given this year (Zwicky, A)

LINGUIST 205A. Phonetics — (Graduate section; see 105.)
4 units, Win (Avelino, H)

LINGUIST 205B. Advanced Phonetics — Prerequisite: 205A.
2-4 units, Aut (Avelino, H)

LINGUIST 210A. Phonology — Introduction to phonological theory and analysis based on cross-linguistic evidence. Topics: phonological representations including features, syllables, metrical structure; phonological processes including assimilation and dissimilation; and phonological typology and universals.
4 units, Aut (Kiparsky, P)

LINGUIST 210B. Advanced Phonology — The phonological organization of the lexicon. Topics include lexical phonology, phonological subregularities, gradient phonotactics, and lexical frequency effects.
4 units, Spr (Anttila, A)

1-4 units, Win (Kiparsky, P)

LINGUIST 212. Seminar in Phonology — May be repeated for credit.
1-4 units, not given this year

LINGUIST 214. Phonology Workshop — May be repeated for credit.
1-2 units, Aut (Anttila, A), Win (Kiparsky, P), Spr (Anttila, A)

2-4 units, Win (Anttila, A)

LINGUIST 217. Morphosyntax — The role of morphology in grammar: how word structure serves syntax in the expression of meaning. Universal properties and typology of morphological categories; proposals towards their principled explanation in a restrictive theory of language.
2-4 units, not given this year (Kiparsky, P)

LINGUIST 218. Seminar in Morphosyntax — May be repeated for credit.
2-4 units, not given this year

LINGUIST 221A. Foundations of English Grammar — A systematic introduction to the formal analysis of English grammar using the framework of head-driven phrase structure grammar (HPSG). Topics: feature structure modeling, lexical and phrasal organization in terms of type hierarchies and constraint inheritance, clausal types, patterns of complementation, the auxiliary system, extraction dependencies, wh-constructions, and the syntax-semantics interface.
1-4 units, Spr (Sag, I)

LINGUIST 221B. Studies in Universal Grammar — Focus is on grammatical analysis of individual languages. Builds directly on the theoretical foundations presented in 221A. Topics vary each year.
1-4 units, not given this year (Sag, I)
LINGUIST 222A. Foundations of Syntactic Theory I—Focus is on the role of the verb and the lexicon in the determination of sentence syntax. Topics: the argument/adjunct distinction, subcategorization and argument structure, motivation for a lexicalist approach, principles governing argument expression, operations on argument structure and grammatical function changing rules, unbounded dependencies, and the approach to unbounded dependencies rooted in principles of lexical expression and subcategorization satisfaction.
2-4 units, Aut (Levin, B; Sells, P)

LINGUIST 222B. Foundations of Syntactic Theory II—The nature of unbounded dependency constructions and their treatment in modern grammatical theories. Filler-gap dependencies, island constraints, and the relation between grammar and processing. Prerequisite: 222A.
2-4 units, Win (Seg, I)

LINGUIST 223B. Reading Principles and Parameters Syntax—Reading seminar. Focus is on papers and books written in government-binding theory and the minimalist program. Mechanisms proposed and their significance in the research agendas of syntax of the past 25 years.
2-3 units, Win (Sells, P)

LINGUIST 224B. Advanced Topics in Lexical Functional Grammar—May be repeated for credit.
1-4 units, not given this year

LINGUIST 229A. Laboratory Syntax I—Hands-on use of methods for analyzing quantitative syntactic data, including clustering and classification, regression, and mixed models. Offered jointly by the syntax faculty. May be repeated for credit.
1-4 units, Aut (Bresnan, J)

LINGUIST 229B. Laboratory Syntax II—Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. Offered jointly by the syntax faculty. May be repeated for credit.
1-4 units, Win (Wasow, T)

LINGUIST 229C. Laboratory Syntax III—Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. Offered jointly by the syntax faculty. May be repeated for credit.
1-4 units, not given this year

LINGUIST 229D. Empirical Syntax Research Seminar—Recent work in syntax that employs data-rich methods like corpora and laboratory studies, emphasizing research by seminar participants. May be repeated for credit.
1-4 units, Aut (Bresnan, J), Win (Wasow, T), Spr (Bresnan, J)

2-4 units, Aut (Katz, G)

LINGUIST 230B. Semantics and Pragmatics—Expands on 230A. Standard approaches to formal semantics (Montague grammar, DRT, and basic dynamic semantics). Analyses of semantic phenomena in these framework. Prerequisites: 230A; or combination of 130 and PHIL 150 and 160.
2-4 units, Win (Katz, G)

LINGUIST 232A. Lexical Semantics—Introduction to issues in word meaning, focused primarily around verbs. Overview of the core semantic properties of verbs and the organization of the verb lexicon. Approaches to lexical semantic representation, including semantic role lists, proto-roles, and causal and aspectual theories of event conceptualization.
2-4 units, Spr (Levin, B)

LINGUIST 232B. Seminar in Lexical Semantics: Lexical Categories—Recent research. Topics include: the semantic underpinnings of lexical categories; criteria for recognizing lexical categories; and methodological issues facing investigations of lexical categories. Case studies of languages lacking full lexical category inventories. May be repeated for credit.
1-4 units, Win (Levin, B)

LINGUIST 232C. Lexical Semantics Research Seminar—May be repeated for credit. By arrangement.
1-2 units, Aut, Win, Spr (Levin, B)

LINGUIST 234. Discourse Analysis—The organization of language above the sentence level, and the manifestation of language in context. Practical experience in working with discourse data.
4 units, not given this year

LINGUIST 237. Seminar in Semantics: Events and Other Implicit Arguments—Reference to events and other abstract objects, such as degrees and times, which serve as implicit predicate arguments as the basis for semantic analysis of phenomena such as adverbial modification and anaphora, and temporal and aspectual interpretation and pluractionality. The status of such objects in the grammar. Trends in the field. May be repeated for credit.
1-4 units, Aut (Katz, G)

LINGUIST 241. Language Acquisition II: Pragmatics and Language Acquisition—May be repeated for credit.
1-4 units, Win (Clark, E)

4 units, Spr (Clark, E)

LINGUIST 247. Seminar in Psycholinguistics: Models of Human and Machine Speech and Language Processing—(Same as PSYCH 227.) Recent research emphasizing probabilistic models. Focus is on the relationship between human and machine models.
2-4 units, Win (Jurafsky, D)

LINGUIST 250. Sociolinguistic Theory and Analysis—Methods of modelling the patterned variation of language in society. Emphasis is on variation, its relation to social structure and practice, and its role in linguistic change. Intersection between quantitative and qualitative analysis, combining insights of sociology and linguistic anthropology with quantitative linguistic data. Prerequisite: graduate standing in Linguistics or consent of instructor.
4 units, not given this year (Eckert, P)

LINGUIST 251. Sociolinguistic Field Methods—Strengths and weaknesses of the principal methods of data collection in sociolinguistics.
4 units, Aut (Rickford, J)

LINGUIST 255. Seminar in Sociolinguistics: Experimental Sociolinguistics—Application of experimental techniques to sociolinguistic questions, emphasizing questions of variation. May be repeated for credit.
2-4 units, Aut (Eckert, P)

LINGUIST 256. Seminar in Sociolinguistics: Language and Identity—May be repeated for credit.
1-4 units, Win (Rickford, J)

LINGUIST 258. Analysis of Variation—The quantitative study of linguistic variability in time, space, and society emphasizing social constraints in variation. Hands-on work with variable data. Prerequisites: 105/205 and 250, or consent of instructor.
4 units, not given this year (Eckert, P)

LINGUIST 260A. Historical Morphology and Phonology—Sound change and analogical change in the perspective of linguistic theory. Internal and comparative reconstruction.
4 units, not given this year (Kiparsky, P)
LINGUIST 260B. Historical Morphosyntax—Morphological and syntactic variation and change. Reanalysis, grammaticalization. The use of corpora and quantitative evidence.
   2-4 units, Spr (Kiparsky, P)

LINGUIST 274A. Field Methods I—(Graduate section; see 174.)
   2-4 units, Win (Avelino, H)

LINGUIST 274B. Field Methods II—Continuation of 274A, with a focus on phonetic topics in a targeted language. Prerequisite: 274A or consent of instructor.
   2-4 units, Spr (Avelino, H)

LINGUIST 279. Quantitative and Probabilistic Explanation in Linguistics—Capturing the soft constraints inherent in linguistic systems, based on quantitative evidence obtained from linguistic corpora. Computer tools for collecting and modeling data. Emphasis is on syntax.
   3-4 units, not given this year (Manning, C)

LINGUIST 280. Natural Language Processing—(Same as CS 224N.) Methods for processing linguistic information and the underlying computational properties of natural languages. Syntactic and semantic processing from a linguistic and an algorithmic perspective. Focus is on modern quantitative techniques in NLP: using large corpora, statistical models for acquisition and interpretation, and representative systems. Prerequisites: CS 121/221 or LINGUIST 180, programming experience, familiarity with logic and probability.
   3-4 units, Spr (Manning, C)

LINGUIST 281. Speech Recognition and Synthesis—(Same as CS 224S.) Automatic speech recognition, speech synthesis, and dialogue systems. Focus is on key algorithms including noisy channel model, hidden Markov models (HMMs), Viterbi decoding, N-gram language modeling, unit selection synthesis, and roles of linguistic knowledge. Prerequisite: programming experience. Recommended: CS 221 or 229.
   2-4 units, Win (Jurafsky, D)

LINGUIST 285. Finite State Methods in Natural Language Processing—Theory and available technology for finite state language processing. Applications include tokenization, phonological and morphological analysis, disambiguation, and shallow parsing.
   3-4 units, not given this year (Karttunen, L)

LINGUIST 390. M.A. Project
   1-3 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 394. TA Training Workshop—For second-year graduate students in Linguistics
   1 unit, Aut (Sells, P)

LINGUIST 395A,B,C. Research Workshop—Restricted to students in the doctoral program. Student presentations of research toward qualifying papers. A: Spr , B: Spr , C: Sum
   1-2 units, A: Spr (Anttila, A), B: Spr (Wasow, T), C: Sum (Staff)

LINGUIST 396. Research Projects in Linguistics—Mentored research project for first-year graduate students in linguistics.
   2-3 units, Win (Staff)

LINGUIST 397. Directed Reading
   1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 398. Directed Research
   1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 399. Dissertation Research
   1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES
   See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

CS 276. Text Retrieval and Web Search
   3 units, Aut (Manning, C; Prabhakar, R)

PSYCH 131/262. Language and Thought
   4 units, Aut (Clark, H)

OVERSEAS STUDIES
   Courses taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BEIJING

   4 units, Aut (Patent, J)

LINGUIST 167. Language, Culture and Thought—(Same as OSPBEIJ 25.)
   4 units, Spr (Patent, J)
DIVISION OF LITERATURES, CULTURES, AND LANGUAGES

Division Head: Roland Greene
Division Offices: Building 260, Rooms 114-119
Mail Code: 94305-2005
Phone: (650) 724-1333; Fax: (650) 725-9306
Email: dlcl@stanford.edu
Web Site: http://dlcl.stanford.edu

The Division of Literatures, Cultures, and Languages consists of six academic departments (Asian Languages, Comparative Literature, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese) as well as the Language Center, which oversees language instruction at Stanford. All the departments of the division offer academic programs leading to B.A., M.A., and Ph.D. degrees. The division brings together scholars and teachers dedicated to the study of literatures, cultures, and languages from humanistic and interdisciplinary perspectives. The departments in the division are distinguished by the quality and versatility of their faculty, a wide variety of approaches to cultural tradition and expression, and the intense focus on the mastery of languages. This wealth of academic resources, together with small classes and the emphasis on individual advising, creates a superior opportunity for students who wish to be introduced to or develop a deeper understanding of non-English speaking cultures.

The division’s departments and the Language Center offer instruction at all levels, including introductory and general courses that do not require knowledge of a language other than English. These courses satisfy a variety of undergraduate requirements and can serve as a basis for developing a minor or a major program in the member departments. The more advanced and specialized courses requiring skills in a particular language are listed under the relevant departments, as are descriptions of the minor and major programs.

MINORS

The Division of Literatures, Cultures, and Languages offers two minors that draw upon courses in literature and language within the division’s departments and elsewhere in the University. Course work in these minors may not duplicate work counted toward language majors or other minors. Advanced Placement credit and transfer credit do not apply to the minors. All courses must be taken for a letter grade. By University policy, no more than 36 units may be awarded in these minors.

Prospective minors should obtain a Minor Declaration form from the DLCL office of undergraduate student services.

MINOR IN LITERATURE

The minor in Literature allows students from any major to develop skills in the interpretation and criticism of literature, while acquiring a familiarity with types of literature from different national traditions and periods. Students must complete 30 units of course work on literature or literary theory. Courses may be in the original language or in translation.

The courses must include a minimum of:
1. One course on literary theory or the history of criticism.
2. One course on literary theory prior to the eighteenth century.
3. One course on literature reflecting perspectives outside of the European traditions.
4. One course from each of three distinct national or linguistic traditions from among Arabic, Chinese, English (including Anglophone literatures broadly conceived), French, German, Greek, Hebrew, Italian, Japanese, Korean, Latin, Persian, Portuguese, Russian, Spanish, Yiddish, and other national or linguistic traditions when appropriate courses are available. The pre-eighteenth-century course and the non-European course may be counted toward fulfilling this requirement.
5. Courses from two different genres such as poetry, drama, and prose fiction. Theory does not count as a genre.
6. One course requiring a research paper.

Students must consult with the minor adviser for approval of courses to meet these requirements. Second-year foreign language courses are not normally counted unless the syllabus reflects a primary emphasis on the reading of literature. Students are encouraged to acquire second-language skills and to explore courses in related disciplines; such courses, however, are not counted toward the 30 units required for the minor in Literature.

Course work in the minor may not duplicate work counted toward specific language majors or minors. Neither Advanced Placement credit nor transfer credit may be applied to the minor. All courses applied to the minor must be Stanford courses. At least 25 units of the course work must be taken for a letter grade.

The DLCL office of undergraduate student services verifies course work for the minor. The minor in Literature must be approved by a divisional faculty member designated by the Division of Literatures, Cultures, and Languages.

MINOR IN MODERN LANGUAGES

The minor in Modern Languages is offered to students who want to supplement the course work in their major with course work in modern languages and literatures. The minor must be approved by the directors of undergraduate studies of the respective language departments. Students in any field qualify for the minor by meeting the following requirements:
1. A minimum of 20 units at the intermediate level (second year) or beyond in at least two languages other than English offered by the DLCL. Normally, this involves 12 units in each language.
2. At least one additional course whose subject code ends in -LIT or -GEN from each modern language in ‘1’ above. These courses should be taught by Academic Council members or other senior members of the faculty. In the case of Slavic or Asian languages, the course should be marked advanced.

Students are recommended to study, work, or intern abroad for at least eight weeks at a location where one of the languages is spoken.

COURSES

DLCL 99. Multimedia Course Lab—Designed to supplement the literature curriculum of existing undergraduate courses in DLCL departments in which a multimedia component may benefit collaborative or individual research projects. Taken for credit at the discretion of the instructor of the departmental literature course.
1 unit, Aut, Win, Spr (Chandler, Z)

DLCL 189. Honors Thesis Seminar—Prepares undergraduate majors in the division’s departments for planning, researching, and writing an honors thesis. Oral presentations and peer workshops. Research and writing methodologies, and larger critical issues in literary studies.
5 units, Aut (Reichert, J)

DLCL 308. Comparative Literature Colloquium—Participants discuss and critique work presented by graduate students and faculty in the DLCL. Work may include conference or seminar papers, thesis chapters, or works-in-progress. Feedback focuses on writing and argumentation, and more general responses to the subject matter. Meetings open to the public. May be repeated for credit.
2 units, Aut, Win, Spr (Berman, R)

DLCL 309. The Teaching of Literature—Prepares graduate students in DLCL departments to teach literature at the undergraduate level. Topics include: the opportunities and problems of transposing a research project into a feasible course; the logic of syllabi and reading lists; the structuring of a course from week to week; and other matters relevant to first-time teachers of literature. Supervised by the graduate affairs committee of the DLCL.
2 units, Win (Levy, I), Spr (Carter, S)
DLCL 310. The Development of a Dissertation from Prospectus to Defense — Meets regularly throughout the year to advise and support dissertation-level students as they prepare a prospectus, begin writing, submit chapters, and complete their projects. Focus of the workshop shifts from term to term as appropriate to the participants. Supervised by the graduate affairs committee of the DLCL.

2 units, Aut (Sifran, G), Win (Dowaldzi, C), Spr (Palumbo-Liu, D)

DLCL 311. Professional Workshop — Meets regularly throughout the year to discuss issues in the professional study of literature. Topics include the academic job market and the challenges of research and teaching at different types of institutions. Supervised by the graduate affairs committee of the DLCL.

2 units, Aut, Win, Spr (Staff)

DLCL 377. Topics in Literature and Culture — Topic this year is the aesthetics of evil, and its manifestations in literature and the arts as content and style. Works include: Aeschylus’ Oresteia; Euripides’ Bacchae; Poe’s The Imp of the Perverse; Kierkegaard’s Either/Or; Flaubert’s Salammbô; Baudelaire’s Les Fleurs du mal; Kafka’s Penal Colony; Bataille’s La littérature et le mal; and films of David Lynch, Val Lewton, and Jacques Tourneur.

3-4 units, Aut (Bohrer, K)

MATH AND COMPUTATIONAL SCIENCE

Director: Bradley Efron
Associate Director: Susan Holmes

Committee in Charge: Takeshi Amemiya (Economics), Gunnar Carlsson (Mathematics), Richard Cottle (Management Science and Engineering), Thomas M. Cover (Electrical Engineering, Statistics), Bradley Efron (Statistics), Peter W. Glynn (Management Science and Engineering), Gene Golub (Computer Science), J. Michael Harrison (Graduate School of Business), Susan Holmes (Statistics), Doron Levy (Mathematics), Parviz Moin (Engineering), Art Owen (Statistics), George Papanicolaou (Mathematics), Eric Roberts (Computer Science), David Rogosa (Education), Tim Roughgarden (Computer Science), David Siegmund (Statistics), Arthur F. Venezian Jr. (Management Science and Engineering)

Courses given in Math and Computational Science have the subject code MCS. For a complete list of subject codes, see Appendix.

This interdepartmental interschool undergraduate program provides a major for students interested in the mathematical and computational sciences, or in the use of mathematical ideas and analysis in problems in the social or management sciences. It provides a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of automatic computation, optimal decision making, probabilistic modeling, and statistical inference. It also provides an opportunity for elective work in any of Stanford’s mathematical science disciplines.

The program uses the faculty and courses of the departments of Computer Science, Management Science and Engineering, Mathematics, and Statistics. It prepares students for graduate study or employment in the mathematical and computational sciences or in those areas of applied mathematics which center around the use of computers and are concerned with the problems of the social and management sciences.

A biology option is offered for students interested in applications of mathematics, statistics, and computer science to the biological sciences (bioinformatics, computational biology, statistical genetics, neuroscience); and in a similar spirit, an engineering option.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE

The requirement for the bachelor’s degree, beyond the University’s basic requirements, is an approved course program of 72-77 units, distributed as follows:

Mathematics (MATH): 29-31 units
Math 111, Calculus A 5
and Math 112, Calculus A 5
Math 51, Linear Algebra and Differential Calculus of Several Variables A, W, S 5
or Math 51H, Honors Advanced Calculus A 5
Math 52, Integral Calculus of Several Variables A, W, S 5
or Math 52H, Honors Advanced Calculus W 5
or Math 53H, Honors Advanced Calculus S 5
Math 109, Applied Group Theory (WIM) A 3
or Math 110, Applied Number Theory and Field Theory (WIM) W 3
or Math 120, Modern Algebra (WIM) A, S 3
Math 113, Linear Algebra and Matrix Theory A, W 3

Computer Science (CS): 16-18 units
CS 103X, Discrete Structures (Accelerated) W 3-4
or CS 103A, Discrete Mathematics for Computer Science A, W 3
and CS 103B, Discrete Structures W, S 3
CS 106X, Programming Methodology and Abstractions (Accl.) A, W 3-5
or CS 106A, Programming Methodology A, W, S 3-5
and CS 106B, Programming Abstractions W, S 3-5

And two of the following (CS or CME):
CME 108, Introduction to Scientific Computing W 3-4
CS 107, Programming Paradigms A, S 3-5
CS 154, Introduction to Automata and Complexity Theory A, S 3-4
CS 161, Design and Analysis of Algorithms A, W 3-4

Management Science and Engineering (MS&E): 8-9 units

Both:
MS&E 111, Introduction to Optimization (same as ENGR 62) A, S 3-4
MS&E 121, Introduction to Stochastic Modeling W 4
or three of the following:
MS&E 211, Linear and Nonlinear Optimization A 3-4
MS&E 212, Mathematical Programming and Combinatorial Optimization S 3
MS&E 221, Stochastic Modeling W 3
MS&E 251, Stochastic Decision Models W 3

Statistics (STATS): (11 units)
STATS 116, Theory of Probability A, S 3-5
STATS 191, Introduction to Applied Statistics W, S 3-4
or STATS 203, Introduction to Regression Models and Analysis of Variance S 3
STATS 200, Introduction to Statistical Inference W 3

ELECTIVES (9 UNITS)

Three courses in mathematical and computational science, 100-level or above, at least 3 units each. At least one must be chosen from the following:

ECON 102C. Advanced Topics in Econometrics A 5
ECON 140. Introduction to Financial Economics S 5
ECON 160. Game Theory and Economic Applications S 5
(prequisite ECON 51)
ECON 179. Experimental Economics (not given 2006-07) S 5
EE 261. The Fourier Transform and its Applications A, S 3
MS&E 211. Linear and Nonlinear Optimization A 3-4
MS&E 212. Mathematical Programming and Combinatorial Optimization S 3
MS&E 221. Stochastic Modeling W 3
MS&E 251. Stochastic Decision Models W 3

MATH 111. Computational Commutative Algebra (not given 2006-07) A, S 3
MATH 115. Functions of a Real Variable A, W 3
MATH 116. Complex Analysis W 3
MATH 118. Numerical Analysis (not given 2006-07) W, S 3
MATH 131. Partial Differential Equations I A, W 3
MATH 132. Partial Differential Equations II S 3
MATH 135. Nonlinear Dynamics and Chaos S 3
MATH 136. Stochastic Processes W 3
PHIL 151. First-Order Logic W 4
STATS 202. Data Analysis A 3
STATS 217. Introduction to Stochastic Processes W 3
For Computer Science (CS), electives can include courses not taken as units under the CS list above and the following:

- CME 302. Numerical Linear Algebra A 3
- CS 108. Object-Oriented Systems Design A,W 3-4
- CS 140. Operating Systems and Systems Programming A,W 3-4
- CS 143. Compilers A,W 3-4
- CS 157. Logic and Automated Reasoning A 3-4
- CS 161. Design and Analysis of Algorithms A,W 3-4
- CS 190. Software Project (prerequisite CS 108) S 3
- CS 221. Artificial Intelligence: Principles and Techniques A 3-4
- CS 223A. Introduction to Robotics W 3
- CS 223B. Introduction to Computer Vision W 3
- CS 225A. Experimental Robotics S 3
- CS 228. Probabilistic Models in Artificial Intelligence W 3
- CS 229. Machine Learning A 3
- CS 243. Advanced Compiling Techniques W 3-4
- EE 275. Logic Design (not given 2006-07) 3
- EE 282. Computer Architecture and Organization S 3

With the adviser’s approval, courses other than those offered by the sponsoring departments may be used to fulfill part of the elective requirement. These may be in fields such as biology, economics, electrical engineering, industrial engineering, and medicine, that might be relevant to a mathematical sciences major, depending on a student’s interests.

1. At least three quarters before graduation, majors must file with their advisers a plan for completing degree requirements.
2. All courses used to fulfill major requirements must be taken for a letter grade with the exception of courses offered satisfactory/no credit only.
3. A course used to fulfill the requirements of one section of the program may not be applied toward the fulfillment of the requirements of another section.
4. The student must have a grade point average (GPA) of 2.0 or better in all course work used to fulfill the major requirement.

**MATHEMATICAL AND COMPUTATIONAL BIOLOGY OPTION**

Replace MATH 109/110 with either:

<table>
<thead>
<tr>
<th>Course Title</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOSCI 221. Methods of Theoretical Population Biology</td>
<td>A 4</td>
</tr>
<tr>
<td>or MATH 135. Nonlinear Dynamic Systems</td>
<td>S 3</td>
</tr>
</tbody>
</table>

Replace STATS 191/203 by

<table>
<thead>
<tr>
<th>Course Title</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>STATS/BIOSCI 141. Biostatistics</td>
<td>A,W 3-5</td>
</tr>
</tbody>
</table>

Take at least 2 courses from the Biological Sciences core:

- BIOSCI 41. Genetics and Biochemistry A 5
- BIOSCI 42. Cell Biology and Animal Physiology W 5
- BIOSCI 43. Plant Biology, Evolution, and Ecology S 5

Take a third course either from the core or

<table>
<thead>
<tr>
<th>Course Title</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>STATS 166. Statistical Methods in Computational Genetics (WIM)</td>
<td>A 3</td>
</tr>
<tr>
<td>BIOSCI 133. Genetics of Prokaryotes</td>
<td>A 3</td>
</tr>
<tr>
<td>BIOSCI 134. Replication of DNA</td>
<td>W 3</td>
</tr>
<tr>
<td>BIOSCI 136. Evolutionary Paleobiology (not given 2006-07)</td>
<td>A 4</td>
</tr>
<tr>
<td>or BIOSCI 203. Advanced Genetics</td>
<td>A 4</td>
</tr>
</tbody>
</table>

Honors students should take 3 of the following:

<table>
<thead>
<tr>
<th>Course Title</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>STATS 166. Statistical Methods in Computational Genetics (WIM)</td>
<td>A 3</td>
</tr>
<tr>
<td>ANTHSCI 180. Intro. to Anthropological Genetics</td>
<td>A 3</td>
</tr>
<tr>
<td>(not given 2006-07)</td>
<td></td>
</tr>
<tr>
<td>ANTHSCI 187. The Genetic Structure of Populations</td>
<td>A 5</td>
</tr>
<tr>
<td>(not given 2006-07)</td>
<td></td>
</tr>
<tr>
<td>ANTHSCI 188. Research in Anthropological Genetics</td>
<td>A,W 5</td>
</tr>
<tr>
<td>BIOSCI 113. Fundamentals of Molecular Evolution</td>
<td>W 4</td>
</tr>
<tr>
<td>BIOSCI 146. Population Studies</td>
<td>W 1</td>
</tr>
<tr>
<td>BIOSCI 221. Methods of Theoretical Population Biology</td>
<td>S 4</td>
</tr>
<tr>
<td>BIOSCI 183A/283A. Population Genetic Theory and Evolution</td>
<td>A 4</td>
</tr>
<tr>
<td>(not given 2006-07)</td>
<td></td>
</tr>
<tr>
<td>BIOSCI 183B/283B. Population Genetic Theory and Evolution</td>
<td>A 4</td>
</tr>
<tr>
<td>(not given 2006-07)</td>
<td></td>
</tr>
</tbody>
</table>

**MATHEMATICAL AND COMPUTATIONAL SCIENCE ENGINEERING OPTION**

Students in the Engineering option take the introductory courses for the Mathematics and Computational Sciences major with the following allowable substitutions.

The MATH 51-53 series may be replaced by:

<table>
<thead>
<tr>
<th>Course Title</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CME 100/ENGR 154. Vector Calculus for Engineers</td>
<td>A 5</td>
</tr>
<tr>
<td>CME 102/ENGR 155A. Ordinary Differential Equations for Engineers W</td>
<td>W 5</td>
</tr>
<tr>
<td>CME 104/ENGR 155B. Linear Algebra and Partial Differential Equations for Engineers S</td>
<td>S 5</td>
</tr>
<tr>
<td>MATH 115. Functions of a Real Variable</td>
<td>A,W 3</td>
</tr>
<tr>
<td>STATS 116 may be replaced by either one of the following:</td>
<td></td>
</tr>
<tr>
<td>STATS 110. Statistical Methods in Engineering and Physical Sciences A</td>
<td>4-5</td>
</tr>
<tr>
<td>or CME 106/ENGR 155C. Introduction to Probability and Statistics for Engineers W</td>
<td>W 3-4</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Course Title</th>
<th>Qtr. and Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>STATS 191/STATS 203 may be replaced by:</td>
<td></td>
</tr>
<tr>
<td>STATS 202. Data Analysis</td>
<td>A 3</td>
</tr>
</tbody>
</table>

Electives; take at least one course from the following list:

- MATH 106. Intro to Theory of Functions of a Complex Variable A 3
- MATH 108. Intro to Combinatorics Applications A 3
- MATH 116. Complex Analysis W 3
- MATH 118. Numerical Analysis (not given 2006-07) S 3
- MATH 132. Partial Differential Equations II S 3
- MATH 135. Nonlinear Dynamics and Chaos S 3
- MATH 139. Intro to the Mathematics of Medical Imaging (not given 2006-07) W 3
- PHIL 151. First-Order Logic A,W 4

Take at least two courses from the following list:

- ENGR 15. Dynamics AS 3
- ENGR 20. Introduction to Chemical Engineering S 3
- ENGR 25. Biotechnology S 3
- ENGR 30. Engineering Thermodynamics A,W 3
- ENGR 40. Introductory Electronics A S 5
- ENGR 50. Introductory Science Materials W S 4
- ENGR 105. Feedback Control Design W 3

Take three additional courses from a single engineering department, and two additional courses from any engineering department(s).

**MINORS**

The minor in Mathematical and Computational Science is intended to provide an experience of the four constituent areas: Computer Science, Mathematics, Management Science and Engineering, and Statistics. Four basic courses are required:

- CS 106X. Programming Methodology and Abstractions (Accelerated) or CS 106A,B. Programming Methodology
- MATH 51. Linear Algebra and Differential Calculus of Several Variables or MATH 103. Matrix Theory and its Applications
- ENGR 62. Introduction to Optimization or MS&E 121. Introduction to Stochastic Modeling

In addition to the above, the minor requires three courses from the following, two of which must be in different departments:

- CME 108. Introduction to Scientific Computing
- CS 107. Programming Paradigms
- CS 138. MATLAB and MAPLE for Science and Engineering Applications
- CS 154. Introduction to Automata and Complexity Theory
- EE 261. The Fourier Transform and its Applications
- ECON 102C. Advanced Topics in Econometrics
- ECON 160. Game Theory and Economic Applications (prerequisite ECON 51)
- MS&E 211. Linear and Nonlinear Optimization
- MS&E 212. Mathematical Programming and Combinatorial Optimization
- MS&E 221. Stochastic Modeling
- MS&E 251. Stochastic Decision Models
- MATH 103. Matrix Theory and Its Applications
- MATH 106. Functions of a Complex Variable
- MATH 108. Introduction to Combinatorics and its Applications
- MATH 109. Applied Group Theory
- MATH 110. Applied Number Theory and Field Theory
- MATH 115. Functions of a Real Variable or MATH 171. Fundamental Concepts of Analysis
- MATH 131. Partial Differential Equations I
- MATH 132. Partial Differential Equations II
- MATH 135. Nonlinear Dynamics and Chaos
- PHIL 151. First-Order Logic
HONORS PROGRAM

The honors program is designed to encourage a more intensive study of mathematical sciences than the B.S. program. In addition to meeting all requirements for the B.S., the student must:

1. Maintain an average letter grade equivalent in mathematical sciences courses of at least a 3.4.
2. Complete at least 15 units in mathematical sciences in addition to the requirements for the major listed above. These courses should form a sustained effort in one area and constitute a program approved by the committee in charge of the Mathematical and Computational Science Program.
3. Include in the above 15 units at least one of the following:
   a) an approved higher-level graduate course
   b) participation in a small group seminar
   c) at least 3 units of directed reading

Students interested in doing honors work should consult with their advisers by the last quarter of the junior year to prepare a program of study for submission to the committee in charge for approval. Honors work may be concentrated in fields outside the Mathematical and Computational Science programs such as biological sciences, medicine, physics.

COURSES

MCS 100. Mathematics of Sports—(Same as STATS 50.) The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 116. 3 units, Spr (Cover)
MAJORS

Students wishing to major in Mathematics must satisfy the following requirements:

1. Department of Mathematics courses (other than MATH 100) totaling at least 49 units credit; such courses must be taken for a letter grade. For the purposes of this requirement, STATS 116, PHIL 151, and PHIL 152 count as Department of Mathematics courses.

2. Additional courses taken from Department of Mathematics courses numbered 101 and above or from approved courses in other disciplines with significant mathematical content, totaling at least 15 units credit. At least 9 of these units must be taken for a letter grade.

3. A Department of Mathematics adviser must be selected, and the courses selected under items ‘1’ and ‘2’ above must be approved by the department’s director of undergraduate study, acting under guidelines laid down by the department’s Committee for Undergraduate Affairs. The Department of Mathematics adviser can be any member of the department’s faculty.

4. To receive the department’s recommendation for graduation, a student must have been enrolled as a major in the Department of Mathematics for a minimum of two full quarters, including the quarter immediately before graduation. In any case, students are strongly encouraged to declare as early as possible, preferably by the end of the sophomore year.

Students are normally expected to complete either the sequence 19, 20, 21 or the sequence 41, 42 (but not both). Students with an Advanced Placement score of at least 3 in BC math or at least 4 in AB math may receive 10 units credit and fulfillment requirement ‘1’ by taking at least 39 units of Department of Mathematics courses numbered 51 and above. Students with an Advanced Placement score of at least 3 in BC math or at least 4 in AB math may receive 5 units credit and fulfillment requirement ‘1’ by taking at least 44 units of Department of Mathematics courses numbered 42 and above.

Sophomore seminar courses may be counted among the choice of courses under item ‘1’. Other variations of the course requirements laid down above (under items ‘1’ and ‘2’) may, in some circumstances, be allowed. For example, students transferring from other universities may be allowed credit for some courses completed before their arrival at Stanford. However, at least 24 units of the 49 units under item ‘1’ above and 9 of the units under item ‘2’ above must be taken at Stanford. In all cases, approval for variations in the degree requirements must be obtained from the department’s Committee for Undergraduate Affairs. Application for such approval should be made through the department’s director of undergraduate study.

It is to be emphasized that the above regulations are minimum requirements for the major; students contemplating graduate work in mathematics are strongly encouraged to include the courses 116, 120, 121, 147 or 148, and 171 in their selection of courses, and in addition, take at least three Department of Mathematics courses over and above the minimum requirements laid out under items ‘1’ and ‘2’ above, including at least one 200-level course. Such students are also encouraged to consider the possibility of taking the honors program, discussed below.

To help develop a sense of the type of course selection (under items ‘1’ and ‘2’ above) which would be recommended for math majors with various backgrounds and interests, see the following examples. These represent only a few of a very large number of possible combinations of courses that could be taken in fulfillment of the Mathematics major requirements:

Example 1 — A general program (a balanced program of both pure and applied components, without any particular emphasis on any one field of mathematics or applications) as follows:

a) either MATH 19, 20, and 21, or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 103; 106; 109; 110; 111; 115

b) plus any selection of at least eight of the following courses, including three Department of Mathematics courses: MATH 108, 131, 132, 143, 146, 147, 148, 152, 161; CS 137; ECON 50; PHYSICS 41, 43, 45; STATS 115. These courses are from other departments as well. Some suitable courses in several departments which can be taken to fulfill part or all of requirement 2.

Example 2 — A theoretical program (recommended for those contemplating possible later graduate work, see also, the discussion of the honors program below), providing an introduction to the main areas of mathematics both broader and deeper than the general program outlined above:

1. The selection of courses under items ‘1’ and ‘2’ above must include at least one from each of the groups: algebra sequence 114, 121, 152, 156; analysis sequence 131, 132, 135, 151, 174A, B; 175; geometry/topology sequence 143, 145, 146, 147, 148; logic and set theory sequence PHIL 151, 152; MATH 161.

2. In addition, those contemplating eventual graduate work in Mathematics should consider including at least one graduate-level math course such as MATH 205A, 210A, or 215A or B. Such students should also consider the possibility of entering the honors program.

Example 3 — An applied mathematics program:

a) either MATH 19, 20, and 21, or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 103; 106; 109; 110; 111; 115; STATS 116

b) plus at least 15 units of additional courses in Applied Mathematics, including, for example, suitable courses from the departments of Physics, Computer Science, Economics, Engineering, and Statistics.

MINORS

To qualify for the minor in Mathematics, a student should complete, for a letter grade, at least six Department of Mathematics courses (other than MATH 100) numbered 51 or higher, totaling a minimum of 24 units. It is recommended that these courses include either the sequence 51, 52, 53 or the sequence 51H, 52H, 53H. At least 12 of the units applied toward the minor in Mathematics must be taken at Stanford. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

HONORS PROGRAM

The honors program is intended for students who have strong theoretical interests and abilities in mathematics. The goal of the program is to give students a thorough introduction to the main branches of mathematics, especially analysis, algebra, and geometry. Through the honors thesis, students may be introduced to a current or recent research topic, although occasionally more classical projects are encouraged. The program provides an excellent background with which to enter a master’s or Ph.D. program in Mathematics. Students completing the program are awarded a B.S. in Mathematics with Honors.

It is recommended that the sequence 51H, 52H, 53H be taken in the freshman year. Students who have instead taken the sequence 51, 52, 53 in their freshman year may be permitted to enter the honors program, but such entry must be approved by the Department of Mathematics Committee for Undergraduate Affairs.

To graduate with a B.S. in Mathematics with Honors, the following conditions apply in addition to the usual requirements for math majors:

1. The selection of courses under items ‘1’ and ‘2’ above must include all the math courses 106 or 116, 120, 171 and also must include seven or more additional courses, with at least one from each of the groups: algebra sequence 114, 121, 152, 153, 156; analysis sequence 131, 132, 135, 136, 151, 174A, B, 175; geometry/topology sequence 143, 145, 146, 147, 148; logic and set theory sequence PHIL 151, PHIL 152, and MATH 161.

2. Students in the honors program must write a senior thesis. In order to facilitate this, the student must, by the end of the junior year, choose an undergraduate thesis adviser from the Department of Mathematics.
faculty, and map out a concentrated reading program under the direction and guidance of the adviser. During the senior year, the student must enroll in MATH 197 for a total of 6 units (typically spread over two quarters), and work toward completion of the thesis under the direction and guidance of the thesis adviser. The thesis may contain original material, or be a synthesis of work in current or recent research literature. The 6 units of credit for MATH 197 are required in addition to the course requirements laid out under items ‘1’ and ‘2’ above and in addition to all other requirements for math majors.

In addition to the minimum requirements laid out above, it is strongly recommended that students take at least one graduate-level course (that is, at least one course in the 200 plus range), MATH 205A, 210A, and 215A or B are especially recommended in this context.

Students with questions about the honors program should see the director of undergraduate advising.

**BACHELOR OF SCIENCE IN MATHEMATICAL AND COMPUTATIONAL SCIENCE**

The Department of Mathematics participates with the departments of Computer Science, Management Science and Engineering, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the “Mathematical and Computational Science” section of this bulletin.

**GRADUATE PROGRAMS**

**MASTER OF SCIENCE**

The University’s basic requirements for the master’s degree are discussed in the “Graduate Degrees” section of this bulletin. Students entering Stanford in 2001 or later should pay particular attention to the University’s course requirements for graduate degrees. The following are specific departmental requirements:

- Candidates must complete an approved course program of 45 units of courses beyond the department requirements for the B.S. degree, of which at least 36 units must be Mathematics Department courses, taken for a letter grade. The Mathematics courses must include at least 18 units numbered 200 or above. The candidate must have a grade point average (GPA) of 3.0 (B) over all course work taken in Mathematics, and a GPA of 3.0 (B) in the 200-level courses considered separately. Course work for the M.S. degree must be approved during the first quarter of enrollment in the program by the department’s Director of Graduate Studies.

- For the M.S. degree in Financial Mathematics, see the “Financial Mathematics” section of this bulletin.

**TEACHING CREDENTIALS**

For information concerning the requirements for teaching credentials, see the “School of Education” section of this bulletin or address inquiries to Credential Secretary, School of Education.

**DOCTOR OF PHILOSOPHY**

The University’s basic requirements for the doctorate (residence, dissertation, examinations, etc.) are discussed in the “Graduate Degrees” section of this bulletin. The following are specific departmental requirements:

- To be admitted to candidacy, the student must have successfully completed 27 units of graduate courses (that is, courses numbered 200 and above). In addition, the student must pass qualifying examinations given by the department.

- Beyond the requirements for candidacy, the student must complete a course of study approved by the Graduate Affairs Committee of the Department of Mathematics and submit an acceptable dissertation. In accordance with University requirements, Ph.D. students must complete a total of 135 course units beyond the bachelor’s degree. These courses should be Department of Mathematics courses or approved courses from other departments. The course program should display substantial breadth in mathematics outside the student’s field of application. The student must receive a grade point average (GPA) of 3.0 (B) or better in courses used to satisfy the Ph.D. requirement. In addition, the student must pass the Department area examination and the University oral examination and pass a reading examination in one foreign language, chosen from French, German, or Russian.

- Experience in teaching is emphasized in the Ph.D. program. Each student is required to complete nine quarters of such experience. The nature of the teaching assignment for each of those quarters is determined by the department in consultation with the student. Typical assignments include teaching or assisting in teaching an undergraduate course or lecturing in an advanced seminar.

- For further information concerning degree programs, fellowships, and assistantships, inquire of the academic associate of the department.

**PH.D. MINOR**

The student should complete both of the following:

1. MATH 106 or 116, 131, 132
2. MATH 113, 114, 120 or 125

These courses may have been completed during undergraduate study, and their equivalents from other universities are acceptable.

In addition, the student should complete 21 units of 200-level courses in Mathematics. These must be taken at Stanford and approved by the Department of Mathematics’ Ph.D. minor adviser.

* A third coherent sequence designed by the student, subject to the approval of the graduate committee, may be considered as a substitute for items ‘1’ or ‘2’.

**COURSES**

WIM indicates that the course satisfies the Writing in the Major requirements.

**INTRODUCTORY AND UNDERGRADUATE**

The department offers two sequences of introductory courses in single variable calculus.

1. MATH 41, 42 present single variable calculus. Differential calculus is covered in the first quarter, integral calculus in the second.
2. MATH 19, 20, 21 cover the material in 41, 42 in three quarters instead of two.

There are options for studying multivariable mathematics:

1. MATH 51, 52, 53 cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize application. MATH 51 covers differential calculus in several variables and introduces matrix theory and linear algebra, 52 covers integral calculus in several variables and vector analysis, 53 studies further topics in linear algebra and applies them to the study of ordinary differential equations. This sequence is strongly recommended for incoming freshmen with 10 units of advanced placement credit.
2. MATH 51H, 52H, 53H cover the same material as 51, 52, 53, but with more emphasis on theory and rigor.

The introductory course in linear algebra is 103 or 113. There are no formal prerequisites for these courses, but appropriate mathematical maturity is expected. Much of the material in 103 is covered in the sequence 51, 52, 53.

**MATH 15. Overview of Mathematics** — Broad survey of mathematics; its nature and role in society. GER:DB-Math
3 units, Win (Devlin, K)

**MATH 19. Calculus** — The content of MATH 19, 20, 21 is the same as the sequence MATH 41, 42 described below, but covered in three quarters, rather than two. GER:DB-Math
3 units, Aut (Lee, B), Win, Sum (Staff)

**MATH 20. Calculus** — Continuation of 19. Prerequisite: 19. GER:DB-Math
3 units, Win (Lee, B), Spr (Staff)

**MATH 21. Calculus** — Continuation of 20. Prerequisite: 20. GER:DB-Math
4 units, Spr (Lee, B)
MATH 41. Calculus — Introduction to differential and integral calculus of functions of one variable. Topics: review of elementary functions including exponentials and logarithms, rates of change, and the derivative. Introduction to the definite integral and integration. Prerequisites: algebra, trigonometry. GER:DB-Math
5 units, Aut (Lucianovic, M)

MATH 41A. Calculus ACE — Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see http://soe.stanford.edu/edp/programs/ace.html. GER:DB-Math
6 units, Aut (Lucianovic, M)

MATH 42. Calculus — Continuation of 41. Methods of symbolic and numerical integration, applications of the definite integral, introduction to differential equations. Infinite series. Prerequisite: 41 or equivalent. GER:DB-Math
5 units, Aut (Thiem, F), Win (Lucianovic, M)

MATH 42A. Calculus ACE — Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see http://soe.stanford.edu/edp/programs/ace.html. GER:DB-Math
6 units, Aut (Thiem, F), Win (Lucianovic, M)

MATH 51. Linear Algebra and Differential Calculus of Several Variables — Geometry and algebra of vectors, systems of linear equations, matrices, vector valued functions and functions of several variables, partial derivatives, gradients, chain rule in several variables, vector fields, optimization. Prerequisite: 21, 42, or a score of 4 on the BC Advanced Placement exam or 5 on the AB Advanced Placement exam, or consent of instructor. GER:DB-Math
5 units, Aut (Brumfiel, G; Levy, D; Milanov, T; Pettet, A; Siefring, R), Win (Mazzeo, R; Milanov, T; Oprea, D; Shirikova, N), Spr (Klodginski, E; Lucianovic, M), Sum (Staff)

MATH 51A. Linear Algebra and Differential Calculus of Several Variables, ACE — Students attend MATH 51 lectures with different recitation sessions: four hours per week instead of two, emphasizing engineering applications. Prerequisite: application; see http://soe.stanford.edu/edp/programs/ace.html. GER:DB-Math
6 units, Aut (Levy, D), Win (Mazzeo, R), Spr (Lucianovic, M)

MATH 51H. Honors Multivariable Mathematics — For prospective Mathematics majors in the honors program and students from other areas of science or engineering who have a strong mathematics background. Three quarter sequence covers the material of 51, 52, 53, and additional advanced calculus and ordinary and partial differential equations. Unified treatment of multivariable calculus, linear algebra, and differential equations with a different order of topics and emphasis from standard courses. Students should know one-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on BC Advanced Placement exam, or consent of instructor. GER:DB-Math
5 units, Aut (Simon, L)

MATH 52. Integral Calculus of Several Variables — Iterated integrals, line and surface integrals, vector analysis with applications to vector potentials and conservative vector fields, physical interpretations. Divergence theorem and the theorems of Green, Gauss, and Stokes. Prerequisite: 51. GER:DB-Math
5 units, Aut ( Wieczorek, W), Win (Demanet, L; Wieczorek, W), Spr (Li, J)

MATH 52H. Honors Multivariable Mathematics — Continuation of 51H. Prerequisite: 51H. GER:DB-Math
5 units, Win (Simon, L)

5 units, Aut (Storm, P), Win (Cohen, R), Spr (Ione, E; Galatius, S), Sum (Staff)

MATH 53H. Honors Multivariable Mathematics — Continuation of 52H. Prerequisite: 52H. GER:DB-Math
5 units, Spr (Brendle, S)

MATH 80Q. Capillary Surfaces: Explored and Unexplored Territory — Stanford Introductory Seminar. Preference to sophomores. Capillary surfaces: the interfaces between fluids that are adjacent to each other and do not mix. Recently discovered phenomena, predicted mathematically and subsequently confirmed by experiments, some done in space shuttles. Interested students may participate in ongoing investigations with affinity between mathematics and physics.
3 units, Win (Finn, R)

MATH 88Q. The Mathematics of the Rubik’s Cube — Stanford Introductory Seminar. Preference to sophomores. Group theory through topics that can be illustrated with the Rubik’s cube: subgroups, homomorphisms and quotient groups, the symmetric and alternating groups, conjugation, commutators, and Sylow subgroups.
3 units, Spr (Bump, D)

UNDERGRADUATE AND GRADUATE

Unless stated, there are no prerequisites for the courses listed below. Where a prerequisite is stated, it may be waived by the instructor.

MATH 100. Mathematics for Elementary School Teachers — Mathematics and pedagogical strategies. Core mathematical content in grades K-6, classroom presentation, how to handle student errors, and mathematical issues that come up during instruction.
4 units, Spr (Milgram, R; Ma, L)

3 units, Aut (Nedelec, L), Win, Spr (Iyer, G), Sum (Staff)

MATH 106. Functions of a Complex Variable — Complex numbers, analytic functions, Cauchy–Riemann equations, complex integration, Cauchy integral formula, residues, elementary conformal mappings. Prerequisite: 52. GER:DB-Math
3 units, Aut (Oprea, D), Sum (Brumfiel, G)

MATH 108. Introduction to Combinatorics and Its Applications — Topics: graphs, trees (Cayley’s Theorem, application to phylogony), eigenvalues, basic enumeration (permutations, Stirling and Bell numbers), recurrences, generating functions, basic asymptotics. Prerequisites: 51 or 103 or equivalent. GER:DB-Math
3 units, Spr (Thiem, F)

MATH 109. Applied Group Theory — Applications of the theory of groups. Topics: elements of group theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics.
GER:DB-Math, WIM
3 units, Aut (Papikian, M)

MATH 110. Applied Number Theory and Field Theory — Number theory and its applications to modern cryptography. Topics: congruences, finite fields, primality testing and factorization, public key cryptography, error correcting codes, and elliptic curves, emphasizing algorithms. GER:DB-Math, WIM
3 units, Win (Carlsson, G)
MATH 111. Computational Commutative Algebra — Introduction to the theory of commutative rings, ideals, and modules. Systems of polynomial equations in several variables from the algorithmic viewpoint. Groebner bases, Buchberger’s algorithm, elimination theory. Applications to algebraic geometry and to geometric problems. GER:DB-Math
3 units, not given this year

MATH 113. Linear Algebra and Matrix Theory — Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization. GER:DB-Math
3 units, Aut (Vasy, A), Win (Coffey, J)

MATH 114. Linear Algebra and Matrix Theory II — Advanced topics in linear algebra such as: invariant subspaces; canonical forms of matrices; minimal polynomials and elementary divisors; vector spaces over arbitrary fields; inner products; Jordan normal forms; Hermitian and unitary matrices; multilinear algebra; and applications. Prerequisite: 51H or 113. GER:DB-Math
3 units, Spr (Papikian, M)

MATH 115. Functions of a Real Variable — The development of real analysis in Euclidean space: sequences and series, limits, continuous functions, derivatives, integrals. Basic point set topology. Honors math majors and students who intend to do graduate work in mathematics should take 171. Prerequisite: 51. GER:DB-Math
3 units, Aut (Iyer, G), Win (Ornstein, D), Sum (Brunsfel, G)

MATH 116. Complex Analysis — Analytic functions, Cauchy integral formula, power series and Laurent series, calculus of residues and applications, conformal mapping, analytic continuation, introduction to Riemann surfaces, Fourier series and integrals. Applications of complex analysis to electrostatics, hydrodynamics, and theoretical physics. Prerequisites: 52, and 115 or 171. GER:DB-Math
3 units, Win (Kerckhoff, S)

3 units, not given this year

MATH 120. Modern Algebra — Basic structures in algebra: groups, rings, and fields. Elements of group theory: permutation groups, finite Abelian groups, p-groups, Sylow theorems. Polynomial rings, principal ideal domains, unique factorization domains. GER:DB-Math, WIM
3 units, Aut (Young, M), Spr (Cohen, R)

MATH 121. Modern Algebra II — Continuation of 120. Fields of fractions. Solvable and simple groups. Elements of field theory and Galois theory. Prerequisite: 120. GER:DB-Math
3 units, Win (Vakil, R)

3 units, Aut (Nedelec, L), Win (Schoen, R)

3 units, Spr (Schoen, R)

MATH 135. Nonlinear Dynamics and Chaos — Topics: one- and two-dimensional flows, bifurcations, phase plane analysis, limit cycles and their bifurcations. Lorenz equations, fractals and strange attractors. Prerequisite: 51 and 53 or equivalent. GER:DB-Math
3 units, Spr (Demanet, L)

3 units, Aut (Ross, K), Win (Dembo, A)

MATH 138. Celestial Mechanics — Mathematically rigorous introduction to the classical N-body problem: the motion of N particles evolving according to Newton’s law. Topics include: the Kepler problem and its symmetries; other central force problems; conservation theorems; variational methods; Hamilton-Jacobi theory; the role of equilibrium points and stability; and symplectic methods. Prerequisites: 53, and 115 or 171. GER:DB-Math
3 units, not given this year

MATH 146. Analysis on Manifolds — Analysis on manifolds: surfaces equivalent to 143, 146, 147, or 148. GER:DB-Math
3 units, Win (Cohen, P)

MATH 147. Differential Topology — Smooth manifolds, transversality, Sard’s theorem, embeddings, degree of a map, Borsuk-Ulam theorem, Hopf degree theorem, Jordan curve theorem. Prerequisite: 115 or 171. GER:DB-Math
3 units, alternate years, not given this year

MATH 148. Algebraic Topology — Fundamental group, covering spaces, Euler characteristic, homology, classification of surfaces, knots. Prerequisite: 109 or 120. GER:DB-Math
3 units, Win (Douglas, C)

MATH 151. Introduction to Probability Theory — Counting; axioms of probability; conditioning and independence; expectation and variance; discrete and continuous random variables and distributions; joint distributions and dependence; central limit theorem and laws of large numbers. Prerequisite: 52 or consent of instructor. GER:DB-Math
3 units, Win (Liu, T)

MATH 152. Elementary Theory of Numbers — Euclid’s algorithm, fundamental theorems on divisibility; prime numbers, congruence of numbers; theorems of Fermat, Euler, Wilson; congruences of first and higher degrees; Lagrange’s theorem and its applications; quadratic residues; introduction to the theory of binary quadratic forms. GER:DB-Math
3 units, Spr (Soundararajan, K)
MATH 156. Group Representations — Group representations and their characters, classification of permutation group representations using partitions and Young tableaux, group actions on sets and the Burnside ring, and spherical space forms. Applications to geometric group actions and to combinatorics. Prerequisites: linear algebra (51 and 53, or 103 or 113) and group theory (109 or 120). GER:DB-Math
3 units, Spr (Thiem, F)

MATH 161. Set Theory — Informal and axiomatic set theory: sets, relations, functions, and set-theoretical operations. The Zermelo-Fraenkel axiom system and the special role of the axiom of choice and its various equivalents. Well-orderings and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor’s Alephs and cardinal arithmetic. Open problems in set theory. GER:DB-Math
3 units, Win (Young, M)

MATH 171. Fundamental Concepts of Analysis — Recommended for Mathematics majors and required of honors Mathematics majors. Similar to 115 but altered content and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisites: 51 and 52, or 51H and 52H. GER:DB-Math, WIM
3 units, Aut (Kerckhoff, S), Spr (Storm, P)

MATH 174A. Topics in Analysis and Differential Equations with Applications — For students planning graduate work in mathematics or physics, and for honors math majors and other students at ease with rigorous proofs and qualitative discussion. 174A Topics may include: geometric theory of ODE’s with applications to dynamics; mathematical foundations of classical mechanics including variational principles, Lagrangian and Hamiltonian formalisms, theory of integrable systems; theorems of existence and uniqueness; Sturm-Liouville theory. 174B Topics may include: introduction to PDEs including transport equations, Laplace, wave, and heat equations; techniques of solution including separation of variables and Green’s functions; Fourier series and integrals; introduction to the theory of distributions; mathematical foundations of quantum mechanics. Prerequisite: 53H or 171, or consent of instructor. GER:DB-Math
3 units, Win (Vasy, A)

MATH 174B. Honors Analysis — Continuation of 174A. Prerequisite: 174A.
3 units, not given this year

MATH 175. Elementary Functional Analysis — Linear operators on Hilbert space. Spectral theory of compact operators; applications to integral equations. Elements of Banach space theory. Prerequisite: 115 or 171. GER:DB-Math
3 units, Spr (Iyer, G)
3 units, Win (Liu, T)

MATH 220C. Asymptotic Methods—Asymptotics for integrals, Rayleigh-Schrödinger perturbation theory, boundary layers, multiple scales for oscillations, multiple scales and homogenization, and high frequency asymptotics (geometrical optics). Prerequisites: 220A and B.
3 units, not given this year

MATH 221. Mathematical Methods of Imaging—Mathematical methods of imaging: array imaging using Kirchhoff migration and beamforming, resolution theory for broad and narrow band array imaging in homogeneous media, topics in high-frequency, variable background imaging with velocity estimation, interferometric imaging methods, the role of noise and inhomogeneities, and variational problems that arise in optimizing the performance of imaging algorithms and the deblurring of images. Prerequisites: 220A and B.
3 units, Spr (Papanicolaou, G)

3 units, Win (Levy, D)

MATH 224. Topics in Mathematical Biology—Mathematical models for biological processes based on ordinary and partial differential equations. Topics: population and infectious diseases dynamics, biological oscillators, reaction diffusion models, biological waves, and pattern formation. Prerequisites: 53 and 131, or equivalents.
3 units, not given this year

MATH 228A,B. Ergodic Theory—Measure preserving transformations and flows, ergodic theorems, mixing properties, spectrum, Kolmogorov automorphisms, entropy theory. Examples. Classical dynamical systems, mostly geodesic and horocycle forms on homogeneous spaces of SL(2,R). May be repeated for credit. Prerequisites: 205A,B.
3 units, not given this year

MATH 229. Topics in Toric Varieties—Symmetric polynomials. Classical symmetric functions, Schur functions, unified treatment of topics in classical enumeration via the study of symmetric polynomials. Classical symmetric functions, Schur functions, Young tableaux, Schensted correspondence, character theory of the symmetric group, introduction to random matrix theory. Prerequisite: 210 or equivalent.
3 units, not given this year

3 units, Spr (Durrleman, V)

MATH 237. Stochastic Equations and Random Media—Topics in stochastic differential equations relevant for the analysis of processes in random environments emphasizing asymptotic methods and estimation methods. Examples from financial mathematics including stochastic volatility models, credit default models, and interest rate models that deal with the whole yield curve. Prerequisite: 236 or equivalent. Recommended: knowledge of financial mathematics.
3 units, Spr (Papanicolaou, G)

3 units, Win (Papanicolaou, G)

MATH 239. Computation and Simulation in Finance—Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.
3 units, Spr (Durrleman, V)

3 units, Spr (Durrleman, V)

MATH 244. Riemann Surfaces—Compact Riemann surfaces: topological classifications, Hurwitz’ formula, Riemann-Roch formula, uniformization theorem. Abel’s theorem, Jacobian varieties. Some elements of harmonic analysis are developed with applications. Emphasis is on methods generally applicable to algebraic curves. May be repeated for credit.
3 units, not given this year

MATH 245A. Topics in Algebraic Geometry: Moduli Theory—Intersection theory on the moduli spaces of stable curves, stable maps, and stable vector bundles. May be repeated for credit.
3 units, Aut (Oprea, D)

MATH 245B. Topics in Algebraic Geometry: Dessin d’Enfants—Grothendieck’s theory of dessin d’enfants, a study of graphs on surfaces and their connection with the absolute Galois group of the rational numbers. Belyi’s theorem, representations of the absolute Galois group as automorphisms of profinite groups, Grothendieck-Teichmuller theory, quadratic differentials, and the combinatorics of moduli spaces of surfaces. May be repeated for credit.
3 units, Win (Brunsfeld, G)

MATH 246. Symmetric Functions and Algebraic Combinatorics—Unified treatment of topics in classical enumeration via the study of symmetric polynomials. Classical symmetric functions, Schur functions, Young tableaux, Schensted correspondence, character theory of the symmetric group, introduction to random matrix theory. Prerequisite: 210 or equivalent.
3 units, not given this year

MATH 247. Topics in Group Theory—Topics include the Burnside basis theorem, classification of p-groups, regular and powerful groups, Sylow theorems, the Frattini argument, nilpotent groups, solvable groups, theorems of P. Hall, group cohomology, and the Schur-Zassenhaus theorem. The classical groups and introduction to the classification of finite simple groups and its applications. May be repeated for credit.
3 units, not given this year

MATH 248. Algebraic Number Theory—Introduction to modular forms and L-functions. May be repeated for credit.
1-3 units, not given this year
MATH 249A. Topics in Number Theory: Drinfeld Modules — Drinfeld modules and their modular varieties, and their role in the proof of the Langlands conjecture over function fields. May be repeated for credit. 3 units, Aut (Papikian, M)

MATH 249B. Topics in Number Theory: Additive Problems in Number Theory — For graduate students and advanced undergraduates. Results and techniques in additive number theory. Topics may include: the Freiman-Ruzsa theorem; Roth’s theorem on three term arithmetic progressions; Weyl’s equidistribution theorem; Vinogradov’s three primes theorem; Gowers’s recent proof of Szemerédi’s theorem; and sum-product theorems. May be repeated for credit. Prerequisites: analysis at the level of 171. Recommended: knowledge of Fourier series. 3 units, Win (Soundararajan, K)

MATH 249C. Topics in Number Theory: P-adic Analysis and Zeta Functions — For graduate students and advanced undergraduates. Dwork’s proof of the rationality of zeta functions of projective varieties over finite fields using analytic methods over p-adic numbers. Prerequisites: basic algebra and complex analysis (106, 113, 120, and 121). 3 units, Spr (Papikian, M)

MATH 254. Geometric Methods in the Theory of Ordinary Differential Equations — Topics may include: structural stability and perturbation theory of dynamical systems; hyperbolic theory; first order PDE; normal forms, bifurcation theory; Hamiltonian systems, their geometry and applications. May be repeated for credit. 3 units, Aut (Eliasberg, Y)

MATH 256A. Partial Differential Equations — The theory of linear and nonlinear partial differential equations, beginning with linear theory involving use of Fourier transform and Sobolev spaces. Topics: Schauder and L2 estimates for elliptic and parabolic equations; De Giorgi-Nash-Moser theory for elliptic equations; nonlinear equations such as the minimal surface equation, geometric flow problems, and nonlinear hyperbolic equations. 3 units, Aut (Guth, L)

MATH 256B. Partial Differential Equations — Continuation of 256A. 3 units, Win (Guth, L)

MATH 257A. Symplectic Geometry and Topology — Linear symplectic geometry and linear Hamiltonian systems. Symplectic manifolds and their Lagrangian submanifolds, local properties. Symplectic geometry and mechanics. Contact geometry and contact manifolds. Relations between symplectic and contact manifolds. Hamiltonian systems with symmetries. Momentum map and its properties. May be repeated for credit. 3 units, Aut (Ionel, E)

MATH 257B. Symplectic Geometry and Topology — Continuation of 257A. May be repeated for credit. 3 units, Win (Ionel, E)

MATH 258. Topics in Geometric Analysis — May be repeated for credit. 3 units, Win (Simon, L)

MATH 260. Topics in Analysis — May be repeated for credit. 3 units, Win (White, B)

MATH 263A,B. Lie Groups and Lie Algebras — Definitions, examples, properties. Semi-simple Lie algebras, their structure and classification. Cartan decomposition: real Lie algebras. Representation theory: Cartan-Stiefel diagram, weights. Weyl character formula. Orthogonal and symplectic representations. May be repeated for credit. Prerequisite: 210 or equivalent. 3 units, A: Win, B: Spr (Bump, D)

MATH 266. Computational Signal Processing and Wavelets — Theoretical and computational aspects of signal processing. Topics: time-frequency transforms; wavelet bases and wavelet packets; linear and nonlinear multiresolution approximations; estimation and restoration of signals; signal compression. May be repeated for credit. 3 units, Win (Levy, D)

MATH 270. Geometry and Topology of Complex Manifolds — Complex manifolds, Kahler manifolds, curvature, Hodge theory, Lefschetz theorem, Kahler-Einstein equation, Hermitian-Einstein equations, deformation of complex structures. May be repeated for credit. 3 units, Aut (Li, J)

MATH 272A. Topics in Partial Differential Equations — May be repeated for credit. 3 units, Win (Staff)

MATH 275. Topics in Singularity Theory — Topics may include: Jet spaces; Thom transversality theorem; h-principle type results in singularity theory with applications to topology; Thom-Boardman singularities; local classification problems and results in singularity theory; Picard-Lefschetz theory; theory of oscillating integrals; Frobenius manifolds. 3 units, not given this year

MATH 282A. Low Dimensional Topology — The theory of surfaces and 3-manifolds. Curves on surfaces, the classification of diffeomorphisms of surfaces, and Teichmuller space. The mapping class group and the braid group. Knot theory, including knot invariants. Decomposition of 3-manifolds: triangulations, Heegaard splittings, Dehn surgery. Loop theorem, sphere theorem, incompressible surfaces. Geometric structures, particularly hyperbolic structures on surfaces and 3-manifolds. 3 units, Aut (Kerckhoff, S)

MATH 282B. Homotopy Theory — Homotopy groups, fibrations, spectral sequences, simplicial methods, Dold-Thom theorem, models for loop spaces, homotopy limits and colimits, stable homotopy theory. 3 units, Win (Carlsson, G)

MATH 283. Topics in Algebraic and Geometric Topology — May be repeated for credit. 3 units, Aut (Galatius, S), Win (Kerckhoff, S), Spr (Rivin, J)

MATH 286. Topics in Differential Geometry — May be repeated for credit. 3 units, Win, Spr (Schoen, R)

MATH 290B. Finite Model Theory — (Same as PHIL 350B.) Classical model theory deals with the relationship between formal languages and their interpretation in finite or infinite structures; its applications to mathematics using first-order languages. The recent development of the model theory of finite structures in connection with complexity classes as measures of computational difficulty; how these classes are defined within certain languages that go beyond first-order logic in expressiveness, such as fragments of higher order or infinitary languages, rather than in terms of models of computation. 3 units, Win (Feferman, S)

MATH 292A,B. Set Theory — (Same as PHIL 352A,B.) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL160A,B, and MATH 161, or equivalents. 3 units, not given this year
MATH 295. Computation and Algorithms in Mathematics — Use of computer and algorithmic techniques in various areas of mathematics. Computational experiments. Topics may include polynomial manipulation, Groebner bases, computational geometry, and randomness. May be repeated for credit.
3 units, Win (Rivin, I)

MATH 355. Graduate Teaching Seminar — Required of and limited to first-year Mathematics graduate students.
1 unit, Win (Staff)

MATH 360. Advanced Reading and Research
1-9 units, Aut, Win, Spr, Sum (Staff)

MATH 361. Research Seminar Participation — Participation in a faculty-led seminar which has no specific course number.
1-3 units, Aut, Win, Spr, Sum (Staff)

MATH 380-391. Graduate Seminars — By arrangement. May be repeated for credit.
MATH 380. Seminar in Applied Mathematics
1-3 units, Aut, Win, Spr (Staff)
MATH 381. Seminar in Analysis
1-3 units, Aut, Win, Spr (Staff)
MATH 384. Seminar in Geometry
1-3 units, Aut, Win, Spr (Staff)
MATH 385. Seminar in Topology
1-3 units, Aut, Win, Spr (Staff)
MATH 386. Seminar in Algebra
1-3 units, Aut, Win, Spr (Staff)
MATH 387. Seminar in Number Theory
1-3 units, Aut, Win, Spr (Staff)
MATH 388. Seminar in Probability and Stochastic Processes
1-3 units, Aut, Win, Spr (Staff)
MATH 389. Seminar in Mathematical Biology
1-3 units, Aut, Win, Spr (Staff)
MATH 391. Seminar in Logic and the Foundations of Mathematics
1-3 units, Aut, Win, Spr (Staff)

MATH 395. Classics in Geometry and Topology — Original papers in geometry and in algebraic and geometric topology. May be repeated for credit.
3 units, Win (Douglas, C), Spr (Staff)

MATH 396. Graduate Progress — Results and current research of graduate and postdoctoral students. May be repeated for credit.
1 unit, Aut, Win, Spr (Staff)

MATH 397. Physics for Mathematicians — Topics from physics essential for students studying geometry and topology. Topics may include quantum mechanics, quantum field theory, path integral approach and renormalization, statistical mechanics, and string theory. May be repeated for credit.
1 unit, Aut, Win (Staff)

MATH 399. Directed Reading and Research
1-9 units, Aut, Win, Spr, Sum (Staff)

PHIL 151/251. First-Order Logic
4 units, Win (Pauly, M)

PHIL 152/252. Computability and Logic
4 units, Spr (Pauly, M)

PHIL 162/262. Philosophy of Mathematics
4 units, Spr (Mancosu, P)

STATS 116. Theory of Probability
3-5 units, Aut, Spr, Sum (Staff)

STATS 310A,B,C. Theory of Probability
2-4 units, A: Aut (Siegmund, D), B: Win (Dembo, A), C: Spr (Lai, T)

MEDIEVAL STUDIES

Director: Jennifer Summit
Committee in Charge: Philippe Buc, Hester Gelber, Hans Ulrich Gumbrecht, Robert P. Harrison, Nancy S. Kollmann, Seth Lerer, William Mahrt, Bissera Pentcheva, Jennifer Summit, Rega Wood
Affiliated Faculty: George H. Brown (English), Philippe Buc (History), Charlotte Fonrobert (Religious Studies), Hester Gelber (Religious Studies), Hans Ulrich Gumbrecht (French and Italian), Robert Harrison (French and Italian), Nancy S. Kollmann (History), Seth Lerer (English, Comparative Literature), Mark E. Lewis (History), William Mahrt (Music), Kathryn Miller (History, on leave), Bissera Pentcheva (Art and Art History), Orrin W. Robinson (German Studies), Jeffrey Schnapp (French and Italian), Jennifer Summit (English), Rega Wood (Philosophy)

Program Offices: Building 250, Room 251F
Mail Code: 94305-2020
Department Phone: (650) 723-3413
Email: idstudies.moore@stanford.edu
Web Site: http://www.stanford.edu/dept/medieval/

Courses given in Medieval Studies have the subject code MEDVLST. For a complete list of subject codes, see Appendix.

The Medieval Studies Program is administered through Interdisciplinary Studies in Humanities, but the degree is conferred by the Dean of Undergraduate Studies. The program is designed to provide students interested in pursuing the Medieval Studies major or minor with a broad understanding of the Middle Ages. Courses are offered in a variety of fields, including history, literature, art, and music.

A: 1 unit, Win (Staff)
C: 1-3 units, Aut, Win, Spr (Staff)

The major combines interdisciplinary breadth with a disciplinary focus. The interdisciplinary emphasis is provided by the Medieval Studies major or minor. Course requirements are designed to provide a broad understanding of the Middle Ages, with a focus on specific areas of interest.

The major requires a minimum of 60 units of course work from the Medieval Studies concentration for the Humanities major or minor. Students interested in pursuing the Medieval Studies major or minor should consult the Medieval Studies Program Office for information about the required courses.

Courses given in Medieval Studies have the subject code MEDVLST. For a complete list of subject codes, see Appendix.

The student should take a minimum of 60 units of course work from the Medieval Studies courses or appropriate alternatives approved by the director, including ten courses as follows:

1. The introductory course, MEDVLST 165, Introduction to Medieval Culture. This course provides an overview of the Middle Ages, with an emphasis on the cultural and intellectual life of the period.
2. Two upper-division courses, ideally with an interdisciplinary component, in any field dealing with the Middle Ages.
3. Four courses in one of the following categories:
   a) Literature: English, French, German and Scandinavian, Italian, Latin, Slavic, Spanish
   b) History
   c) Art History, Drama, Music
   d) Humanities, Philosophy, Religious Studies (certain Humanities courses may fulfill requirements within other categories)
4. Two courses in a second category from the above list.
5. One course in a third category from the above list.

Students doing the Medieval Studies concentration for the Humanities major should use these requirements as guidelines for developing their programs of study.

In addition to the ten courses, a language proficiency equal to two years of college-level study is suggested in Latin or one of the following: French, German, Italian, or Spanish.

Medieval Studies has a Writing in the Major (WIM) requirement. It can be fulfilled in one of three ways:

COGNATE COURSES

PHIL 151/251. First-Order Logic
4 units, Win (Pauly, M)

PHIL 152/252. Computability and Logic
4 units, Spr (Pauly, M)

PHIL 162/262. Philosophy of Mathematics
4 units, Spr (Mancosu, P)

STATS 116. Theory of Probability
3-5 units, Aut, Spr, Sum (Staff)

STATS 310A,B,C. Theory of Probability
2-4 units, A: Aut (Siegmund, D), B: Win (Dembo, A), C: Spr (Lai, T)
1. Through a course designated as WIM by a department contributing to the Medieval Studies major.
2. Through a paper in a Medieval Studies course.
3. Through an independent paper with a member of the Medieval Studies faculty.

Check with the program office regarding specific requirements for each of these options.

MINORS

An undergraduate minor in Medieval Studies is available through the program. Students interested in completing the minor should inquire about enrollment procedures at the office of Interdisciplinary Studies in Humanities.

Requirements are as follows:

1. Language: in addition to the University foreign language requirement, at least one quarter course in a classical and/or medieval vernacular language is recommended, which may count as one of the five required courses for the minor listed under item 2b.
2. The minor consists of six courses, which include:
   a) Medieval Studies 165, Introduction to Medieval Culture (core course). If 165 is not offered in a given year, students may petition to take a substitute course if necessary. Petitions should be directed to the Director of Medieval Studies.
   b) an additional five courses dealing directly with the Middle Ages. If the student’s major department or program offers medieval courses, he/she should take two of them for the Medieval Studies minor, but those courses may not also count for the major. At least three courses must be taken outside the student’s major, selected from two or more of the following categories:
      1) Language and Literature
      2) History
      3) Art History, Drama, Music
      4) Humanities, Philosophy, Religious Studies
      5) From among the Medieval Studies faculty listed above, the student chooses an adviser, who assists in the selection of courses and the design of the program.

Courses applied to the minor in Medieval Studies must be taken for a letter grade. Courses applied to the minor cannot also be applied to a student’s major or another minor.

COURSES

MEDVLST 322. Medieval Seminar — (Same as HUMNTIES 322, RELIGST 338.) Medieval culture and ethical ideals extolled by medieval authors explicitly in philosophical and theological texts and implicitly in literary ones. Connections among ethics, cosmology, sacred history, anthropology, and soteriology in the medieval worldview. Medieval ethical beliefs as a window on medieval intellectual culture.
3-5 units, Win (Gelber, H)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

ARTHIST 105A/305A. Islamic Art around the Mediterranean 4 units, Win (Fetvaci, E)

ARTHIST 106/306. Byzantine Art and Architecture, 300-1453 C.E. 4 units, Win (Pentcheva, B)

ARTHIST 107/307. Age of Cathedrals 4 units, Aut (Pentcheva, B)

ARTHIST 108/308. Virginity and Power: Mary in the Middle Ages 4 units, not given this year

ARTHIST 187/387. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868 — (Same as JAPANGEN 87.) 4 units, Spr (Takeuchi, M)

ARTHIST 206A. Visualizing History in the Islamic World 5 units, Spr (Fetvaci, E)

ENGLISH 4B/104B. Medieval Women: Faith, Love, and Learning — (Same as ENGLISH 104B.) 3-5 units, Win (Summit, J)

ENGLISH 102. Chaucer 5 units, Spr (Lerer, S)

FRENLIT 130. Authorship, Book Culture, and National Identity in Medieval and Renaissance France 4 units, not given this year

GERGEN 38A. Introduction to Germanic Languages — (Same as GERLIT 138.) 3 units, Win (Robinson, O)

GERLIT 257. Gothic 4 units, Spr (Robinson, O)

HISTORY 110A. Europe from Late Antiquity to 1500 5 units, Aut (Buc, P)

HISTORY 133A. Yorkist and Tudor England 5 units, Aut (Como, D)

HISTORY 135/335. History of European Law, Medieval to Contemporary 5 units, Win (Herzog, T)

HISTORY 216/316. Medieval Antisemitism 5 units, not given this year

HISTORY 232G/332G. When Worlds Collide: The Trial of Galileo 5 units, Spr (Findlen, P)

MUSIC 40. Music History to 1600 4 units, Aut (Markham, M)

MUSIC 140/240. Studies in Medieval Music 3-4 units, alternate years, not given this year

MUSIC 141/241. Studies in Renaissance Music 3-4 units, alternate years, not given this year

MUSIC 221A. History of Music Theory: Ancient Through Baroque 4 units, alternate years, not given this year

MUSIC 301A. Analysis of Music: Modal 4 units, Win (Mahrt, W)

PHIL 115/215. Foundations of Medieval Psychology 3-5 units, Aut (Wood, R)

PHIL 248. Medieval Latin Paleography 3-5 units, not given this year

RELIGST 84. Mystics, Pilgrims, Monks, and Scholars: Religious Devotion in Medieval Christianity 4 units, Spr (Pitkin, B)

RELIGST 172. Sex, Body, and Gender in Medieval Religion 4 units, not given this year

RELIGST 263. Judaism and the Body 4 units, Aut (Fonrobert, C)

RELIGST 271A. Dante’s Spiritual Vision 4-5 units, Aut (Yearley, L)

RELIGST 271B. Dante’s Spiritual Vision 4-5 units, Win (Yearley, L)

RELIGST 308. Medieval Japanese Buddhism 3-5 units, not given this year
MODERN THOUGHT AND LITERATURE

Director: Elisabeth Mudimbe-Boyi
Committee in Charge: Lanier Anderson, Jean-Pierre Dupuy, Shelley Fisher Fishkin, Gregory Freidin (on leave), Hans U. Gumbrecht, Andrea A. Lunsford, Purnima Mankekar, Barbaro Martinez-Ruiz, Paula Moya, Elisabeth Mudimbe-Boyi, Helen Stacy (Law)
Affiliated Faculty: Lanier Anderson (Philosophy), Eamonn Callan (Education), Jean-Pierre Dupuy (French and Italian), Paulla Ebron (Cultural and Social Anthropology), Dan Edelstein (French and Italian), Harry Elam (Drama), Michele Elam (English), Amir Eshel (German Studies), Shelley Fisher Fishkin (English), James Ferguson (Cultural and Social Anthropology), Gregory Freidin (Slavic Languages and Literatures), Theodore Glasser (Communication), Roland Greene (English, Comparative Literature), Hans U. Gumbrecht (French and Italian), Akhil Gupta (Cultural and Social Anthropology), Sean Hanretta (History), Ursula Heise (English), Robert Kaufman (English), Matthew Kohrman (Cultural and Social Anthropology), Joshua Landy (French and Italian), Helen Longino (Philosophy), Andrea A. Lunsford (English), Liisa Malkki (Cultural and Social Anthropology), Purnima Mankekar (Cultural and Social Anthropology), Barbaro Martinez-Ruiz (Art and Art History), Franco Moretti (English, Comparative Literature), Paula Moya (English), Elisabeth Mudimbe-Boyi (French and Italian), David Palumbo-Liu (Comparative Literature), Arnold Rappaport (English), Ramón Saldivar (English, Comparative Literature), Priya Satia (History), Debra Satz (Philosophy), Londa Schiebinger (History), Helen Stacy (Law), Richard White (History), Bryan Wolf (Art and Art History), Alex Woloch (English, on leave), Sylvia Yanagisako (Cultural and Social Anthropology, on leave), Yvonne Yarbro-Bejarano (Spanish and Portuguese), Steven Zipperstein (History)

Program Office: Building 250, Room 251F

Courses given in Modern Thought and Literature have the subject code MTL. For a complete list of subject codes, see Appendix.

The Program in Modern Thought and Literature is administered through the office of Interdisciplinary Studies in Humanities. The program admits students for the Ph.D. and a very limited number for a coterminal Bachelor’s and Master’s Program.

UNDERGRADUATE PROGRAMS

Although Modern Thought and Literature has no formal undergraduate degree granting program, undergraduates interested in completing a major in this field may do so through the undergraduate major in Interdisciplinary Studies in Humanities. This program is designed for students with a strong interest in literature or culture, but whose approach or focus deviates from the modern literary or cultural studies approach. Students may devise majors that incorporate modern literature (since the 18th century), cultural history, and critical theory. Students may also create interdisciplinary concentrations. For course guidelines, see the Handbook for the Major in Interdisciplinary Studies in Humanities. Students wishing to declare the major in Interdisciplinary Studies in Humanities must apply for admission to the Humanities honors program and for graduation with honors in Humanities.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

Each year, one or two undergraduates, who are exceptionally well prepared in literature and at least one foreign language and whose undergraduate course work includes a strong interdisciplinary component, may petition to be admitted to the program for the purpose of completing a coterminal M.A. degree. Admission to this program is granted only on condition that in the course of working on their master’s degree they do not apply to enter the Ph.D. program in Modern Thought and Literature. The deadline for application is early February.

To apply, applicants submit:
1. An unofficial grade transcript from Axess.
2. A Petition for Admission to the Coterminal Program from the Registrar’s Office.
3. A statement giving the reasons the student wishes to pursue this program and its place in his or her future plans. This statement should pay particular attention to the reasons why the student could not pursue the studies he or she desires in some other way.
4. A plan of study listing, quarter by quarter, each course by name, units, and instructor, to be taken in order to fulfill the requirements for the degree for a total of 45 units, including at least 20 units of advanced work in one literature, and at least 20 units in a coherent interdisciplinary program of courses taken in non-literature departments.
5. A writing sample of critical or analytical prose.
6. Two letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.html#Coterm.

REQUIREMENTS

The candidate for the M.A. must complete at least 45 units of graduate work, to be divided in the following manner:
1. The introductory seminar, MTL 334A, 5 units, or another graduate-level seminar offered by a member of the committee in charge and approved by the student’s graduate program adviser.
2. At least 20 units of advanced course work in literature, to be approved by the director.
3. At least 20 units of course work in a coherent and individually arranged interdisciplinary program, to be approved by the director.

By the end of the course of study, each candidate must also demonstrate a reading knowledge of at least one foreign language.

GRADUATE PROGRAMS

The Ph.D. in Modern Thought and Literature is an interdisciplinary program combining work in modern literary/cultural studies with work in one or more other modern disciplines.

The Ph.D. program is designed specifically for students who have a strong interest in literature or culture, but whose approach or focus requires an interdisciplinary program; for example, students interested in anthropological or philosophical approaches to literature and culture; gender studies; ethnic studies; or in topics such as legal humanities, popular culture, and social or cultural theory.

Modern Thought and Literature is intended for students who plan to teach and write in literature departments or in interdisciplinary programs in the humanities, cultural studies, or humanistic social sciences, or for students intending to formulate cultural policy.

Course work in the program is divided about evenly between advanced courses in literature departments and advanced courses in non-literary departments.

MASTER OF ARTS

The Master of Arts is available to students who are admitted to the doctoral program. Students are not admitted into the program for the purpose of earning a terminal Master of Arts degree. Candidates for the Ph.D. who satisfy the committee of their progress and satisfactorily complete 45 units of course work forming a coherent program of study, may apply for an M.A. in Modern Thought and Literature.
DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin.

A candidate for the Ph.D. degree in Modern Thought and Literature must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. He or she is expected to complete at least 18 courses of graduate work in addition to the dissertation. Students may spend one year of graduate study abroad.

Requirements for the Ph.D. in Modern Thought and Literature are:

2. A coherent program of eight courses of advanced work in literary studies to be worked out with the adviser, of which at least six must be regularly scheduled courses in literature. Courses in the teaching of composition (ENGLISH 396, 397), ad hoc graduate seminars (MTL 395), research courses (MTL 398), and thesis registration (MTL 802) may not be counted among these six courses; MTL 396L, 397, 399, 802 may not be counted toward these requirements under any circumstances.

3. Eight courses of advanced work in non-literature departments, the core of which is completion of either a departmental minor or an interdepartmental concentration, typically consisting of six courses. Departmental minors are available from the departments of Cultural and Social Anthropology, Art and Art History, Communication, History, Philosophy, Political Science, Religious Studies, and Sociology (see the relevant information in those sections of this bulletin). Approved interdepartmental concentrations have been established in popular culture, ethnic studies, feminist and gender studies, and science and technology studies (specific course requirements are available from the program office). Individually designed concentrations may be approved by petition to the director. In addition to the required six courses in a minor or a concentration, two additional courses from non-literature departments are chosen in consultation with each student’s academic adviser. Course restrictions noted above in item 2 also apply.

4. Qualifying Paper: this certifies that students are likely to be able to undertake the quality of research, sustained argumentation, and cogent writing demanded in a doctoral dissertation. The qualifying paper must be a substantial revision of a seminar paper written at Stanford during the first year and should embody a substantial amount of independent research, develop an intellectual argument with significant elements of original thinking, and demonstrate the ability to do interdisciplinary work. Each paper is evaluated by two or three readers (designated before the end of the first year of graduate study), one of whom must be a member of the Committee in Charge. Qualifying papers must be submitted to the program office no later than the end of the third week of the fifth quarter of enrollment, normally, winter of the second year.

5. Teaching, an essential part of the program, is normally undertaken in conjunction with the Department of English. Candidates are required to demonstrate competence in teaching.

6. Students must demonstrate, by the end of the third quarter of the first year, a reading knowledge of one foreign language and, by the beginning of the first quarter of the third year, a reading knowledge of one other foreign language. Reading knowledge means the ability to make a genuine scholarly use of the language: that is, to read prose of ordinary difficulty.

7. Candidacy: at the end of the second year, students apply for candidacy. The following qualifications are required before candidacy can be certified: the earlier submission of a satisfactory qualifying paper, demonstration of a reading knowledge of one foreign language; satisfactory progress in course work; a list of courses applicable to the degree, distinguishing between courses appropriate to the literary component and courses appropriate to the interdisciplinary component; designation of a departmental minor or an interdisciplinary concentration; and the submission of a statement outlining the scope and coherence of the interdisciplinary component of the program in relation to the literary component and noting the relevance of the course work to that program.

8. Annual Review: the program and progress of each student must be approved by the Committee in Charge at the end of each academic year.

9. University Oral Examination: this examination, covering the student’s areas of concentration, normally is taken in the third year of graduate study. It is a two-hour oral examination administered by four faculty members specializing in the student’s areas of concentration, and a chair from another department. The exam is based on a substantial reading list prepared by the student in conjunction with the faculty committee and designed to cover the areas of expertise pertinent to the student’s dissertation project.

10. Colloquium on the Dissertation Proposal: sometime after the University oral examination, or in conjunction with that examination, the dissertation committee assembles for up to one hour to discuss the dissertation proposal with the student. Prior to this meeting, the student should have consulted each member of the committee to discuss the proposal and compile a bibliography.

11. Dissertation: the fourth and fifth years are devoted to the dissertation, which should be a substantial and original contribution acceptable to the Committee on Modern Thought and Literature. The subject is drawn from the literature of specialization and the area of nonliterary studies.

HUMANITIES

The program participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Modern Thought and Literature and Humanities. For a description of the Humanities program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, and in the Division of Literatures, Cultures, and Languages. For other offerings, students should consult listings in the individual departments of interest. Consent of instructor is often required.

Students in the doctoral program in Modern Thought and Literature are advised to read through the offerings in English as well as offerings of the non-literature departments in which they wish to concentrate: for example, courses dealing with culture listed under Cultural and Social Anthropology, courses dealing with film under Communication or Art and History, courses in intellectual and cultural history under History. If the area of nonliterary interest is thematic rather than disciplinary, doctoral students should look under program listings such as Feminist Studies, African and African American Studies, or Comparative Studies in Race and Ethnicity.

MTL 300. Modern Thought and Literature Colloquium—Required of first-year graduate students in the program; open to all students in the program and to others by consent of instructor. Weekly meeting of students in the program to discuss interdisciplinary scholarship, writing, and issues pertaining to the requirements for the Ph.D. Presentations by affiliated faculty and by student panels.

1-3 units, Spr (Boyli, E)

MTL 334A. The Modern Tradition I—(Same as ENGLISH 334A.) Preference to first-year graduate students in Modern Thought and Literature and English. Kant’s 18th-century development of the critique of reason; how it set the stage for the themes and problems that have preoccupied Western thinkers. Focus is on texts that extend and problematize the critique of reason. Writers include Kant, Hegel, Marx, Nietzsche, Weber, Freud, Lukács, and Heidegger.

5 units, Aut (Moya, P)
MTL 334B. The Modern Tradition II: Gramsci, Lacan, and Derrida as Cultural Critique — (Same as CASA 334B.) Responses, refutations, elaborations, modifications to texts in critical theory such as Gramsci, Lacan, and Derrida, and postcolonial and feminist theory. Prerequisite: consent of instructor.

3-5 units, Win (Mankekar, P)

MTL 390. Qualifying Paper — Preparation and writing of the qualifying paper for the Ph.D. in Modern Thought and Literature.

1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 395. Ad Hoc Graduate Seminar — Graduate students (three or more) who wish to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a member of the faculty to supervise it. May be repeated for credit.

1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 396. Current Issues in Interdisciplinarity — Dimensions of the interdisciplinary experience at MTL and Stanford; the future of interdisciplinarity in the humanities and social sciences. Possible outcomes include a jointly authored academic publication by MTL students, assessment of current curricula, statement of purpose of MTL, and 2007-08 conference on interdisciplinarity. May be repeated for credit.

1-2 units, Aut, Win, Spr (Mudimbe-Boyঃ, E)

MTL 398. Research — Students pursue a special subject of investigation under supervision of a member of the committee or another faculty member. Thesis work is not to be performed under this number. May be repeated for credit.

1-15 units, Aut, Win, Spr, Sum (Staff)

MTL 399. Reading for Orals — Reading in preparation for the University Oral Examination. May be repeated for credit.

1-15 units, Aut, Win, Spr, Sum (Staff)
individual instruction, to participate in chamber music, or to play in departmental ensembles should note that auditions are held during registration week in Autumn Quarter. While there may be openings in some private studios and ensembles for qualified students during other quarters, it is to the student's advantage to audition in autumn, as most slots are filled for the entire year.

The department is housed in Braun Music Center, Dinkelspiel Auditorium, and The Knoll, including three concert halls for concert and recital productions, two rehearsal halls, a small chamber hall, and a state-of-the-art, heptagonal listening/research room. Pianos, organs, harpsichords, and a variety of early stringed and wind instruments are available for student use. In addition, advanced students may use fine old stringed instruments and bows from the Harry R. Lange Historical Collection (http://music.stanford.edu/DeptInfo/Langecol.html).

The Music Library (http://www-sul.stanford.edu/depts/music/index.html) contains a comprehensive collection of scores, books, and recordings with an emphasis on Western art music. In addition, the Department of Special Collections holds an invaluable collection of musical manuscripts and first and early editions, and the Archive of Recorded Sound has a superb collection of historical recordings of all types.

The Stanford Center for Computer Research in the Humanities and Sciences (CCRMA) is a multidisciplinary facility where composers and researchers work together using computer-based technology both as an artistic medium and as a research tool. Areas of ongoing interest at CCRMA include: composition, applications hardware, applications software, synthesis techniques and algorithms, physical modeling, real-time controllers, signal processing, digital recording and editing, psychoacoustics and musical acoustics, music manuscripting by computer, and real-time applications.

The CCRMA community consists of administrative and technical staff, faculty, research associates, graduate research assistants, graduate and undergraduate students, visiting scholars, visiting researchers and composers, and industrial affiliates. Center activities include academic courses, seminars, small interest-group meetings, summer workshops, and colloquia. Concerts of computer music are presented several times each year with an annual outdoor computer-music festival in July.

CCRMA houses studios, computing facilities, and a networked system of software that includes programs and tools for editing, viewing, synthesizing, and analyzing sound. For a detailed and up-to-date description of facilities available, see the CCRMA home page at http://ccrma.stanford.edu/.

The Center for Computer-Assisted Research in the Humanities (CCARH), located in Braun Music Center, conducts research focused on constructing computer databases for music and on creating programs that allow student and staff researchers to access, analyze, print, and electronically perform the music. For more information, see the CCARH home page at http://www.ccarh.org/.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major in Music is built around a series of foundation courses in theory, musicianship, and music history, in addition to performance and the proficiency requirements outlined below. Because of the sequence of courses, it takes more than two years to complete the requirements for the major. Prospective majors are urged to consult the undergraduate student services officer in the department as early as possible in order to plan a program that allows sufficient time for major course work, practice, and University requirements outside the major. Early planning is especially important for students wishing to double-major, for those contemplating overseas study during their undergraduate years, for those wishing to do an in-depth concentration in the Music major, and for those with particular musical talents and interests. All required courses for the B.A. in Music and in the Music, Science, and Technology specialization must be taken for a letter grade. Electives may be taken credit/no credit, but any courses taken towards concentration requirements must also carry a letter grade.

1. Students are required to include the following foundation courses in their programs:

a) Theory: MUSIC 21, 22, 23
b) History: MUSIC 40, 41, 42, and three from the series 140-148 (Writing in the Major (WIM) courses (two of which must be taken as 4-unit WIM courses)
c) Analysis: MUSIC 121 and two from 122A, B, or C

2. Additionally, Music majors must fulfill the following two performance requirements:

a) Instruction in instrumental and/or vocal performance: minimum of five quarters, comprising a minimum of 15 units.
b) Ensemble: five quarters (5 units minimum) of work in one or more of the department’s organizations or chamber groups. MUSIC 156, “sic”: Improvisation Collective, and MUSIC 157, Mariachi Band, do not satisfy this requirement. MUSIC 181 may count for up to two of the ensemble-unit requirements for the Music major. To fulfill the ensemble requirement, Music majors need to participate at least three quarters in the department’s traditional large ensembles (MUSIC 159–167), with the exception of students whose primary instrument is harp, keyboard, or guitar, who need to participate at least one quarter in the ensembles above, but who may fulfill the rest of the requirement with chamber music (171).

3. Majors are required to pass a Piano Proficiency examination as part of the music theory core (MUSIC 21, 22, 23). The examination is given in the first two weeks of MUSIC 21. Students who do not pass the Piano Proficiency examination are required to enroll in MUSIC 12 concurrently with the music theory core until they are able to pass. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight reading, and the performance of prepared pieces (consult the department undergraduate adviser for details).

4. Majors must also pass an Ear-Training Proficiency examination, which is part of the requirements to complete MUSIC 23. It may be taken by arrangement, demonstrating a student’s ability to hear music accurately and to perform it at sight.

RECOMMENDED SCHEDULE FOR THE MUSIC MAJOR

The following sample schedule shows how a student may include substantial work on a major in Music while also fulfilling the University General Education Requirements during the freshman and sophomore years. The schedule also includes foreign language study, which is strongly recommended for all Music majors and especially for those expecting to continue into graduate work in any area of music.

MUSIC, SCIENCE, AND TECHNOLOGY

The specialization in Music, Science, and Technology is designed for those students with a strong interest in the musical ramifications of rapidly evolving computer technology and digital audio, and in the acoustic and psychoacoustic foundations of music. The program entails a research project under faculty guidance and makes use of the highly multidisciplinary environment at CCRMA. This program can serve as a complementary major to students in the sciences and engineering.
1. Students in the program are required to include the following courses in their studies:
   a) Theory: 21, 22, 23, 121, 151 (WIM) (4 units each); 150 (3 units); 220A,B,C (4 units each); 250A (4 units)
   b) History: two from 40, 41, 42
   c) Applied: individual studies in performance (6 units) or 192A,B; and Ensemble or 192C (5 units)
   d) Research project: 220D (4 units)
2. Students in Music, Science, and Technology must also pass the Piano and Ear-Training Proficiency examinations required of all Music majors.

MINORS

Minors in Music and in the Music, Science, and Technology specialization provide the student with a core of essential Music courses in the disciplines that establish both a foundation for informed appreciation of music and a basis for more advanced study, should the student wish to pursue it. Students minoring in Music or in the Music, Science, and Technology specialization must also pass the Piano and Ear-Training Proficiency examinations required of Music majors.

MUSIC

Subject and Catalog Number | Units
--- | ---
MUSIC 21, 22, 23, Elements of Music | 12
MUSIC 40, 41, 42, Music-History Survey | 12
Choice of one (WIM):
MUSIC 140-148, Studies in Music History | 4
Two quarters:
MUSIC 159-171, Ensemble | 2
MUSIC 172-177, Individual Instruction | 6
Total | 36

MUSIC, SCIENCE, AND TECHNOLOGY

MUSIC 21, 22, 23, Elements of Music | 12
MUSIC 150, Musical Acoustics | 3
MUSIC 151, Psychophysics and Cognitive Psychology for Musicians (WIM) | 4
MUSIC 220A,B. Fundamentals of Computer-Generated Sound | 8
MUSIC 192A,B. Theory and Practice of Audio Recording | 6
MUSIC 192C. Session Recording (two quarters, 1 or 2 units/qtr.) | 3
Total | 36

CONCENTRATIONS

Concentrations are offered in performance, conducting, composition, or history and theory. In each concentration, 6 additional course units in the area of concentration beyond the basic requirements for the major are required. In addition, each concentrator registers for an independent project (198, 4 units) in the senior year under faculty supervision, leading to a senior recital, a composition, a conducting project, or a senior research paper. Students wishing to pursue the concentration in performance must demonstrate private-lesson-level proficiency on their instrument. Specific guidelines and information on the concentration tracks are available from the Department of Music office and students are urged to select this option no later than the middle of their junior year in order to complete all of the requirements in a timely manner.

HONORS PROGRAM

Honors in Music are awarded by the faculty to concentrators who have produced an independent project of exceptional quality and meet certain departmental standards in musicianship, scholarship, and academic standing. The conferral of honors is done solely through faculty consultation. Students do not petition for honors.

OVERSEAS STUDIES

Courses in Music are often available at Stanford overseas programs, especially in Berlin, Paris, and Oxford. See the Overseas Studies Program section of this bulletin immediately following this section for this year’s listings. Music majors and minors should talk to the Department of Music undergraduate administrator prior to going overseas.

GRADUATE PROGRAMS

University requirements for the M.A., D.M.A., and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin.

The following statements apply to all the graduate degrees described below, unless otherwise indicated.

Admission—Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers, according to the proposed field of concentration) when they return the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 12 application deadline. All components of the application are due by December 12. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see http://gradadmissions.stanford.edu/).

Department Examinations—All entering graduate students except those in the M.A./MST program are required to take: (1) a diagnostic examination testing the student in theory (counterpoint, harmony, and analysis) and (for musicologists only) the history of Western art music, and (2) a proficiency examination in sight-singing and piano sight-reading. These exams are given at the beginning of study in the department (usually the week before school begins).

None of Stanford’s required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of ‘A,’ ‘B,’ or ‘Satisfactory’ (a passing grade in an instructor-mandated credit/no credit course) in music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

MASTER OF ARTS

Residence—A minimum of 45 academic units is required for the master’s degree in Music.

MUSIC

Students in the doctoral programs who enter directly from the bachelor’s level may, upon completing 45 units and advancing to candidacy, be recommended for the M.A. degree. The Department of Music does not accept students for study only towards the M.A. degree except in the Music, Science, and Technology program, described below.

MUSIC, SCIENCE, AND TECHNOLOGY

This is a one-year program of 45 units focusing on the integration of music perception, music-related signal processing and controllers, and synthesis. The program is designed for students having an undergraduate engineering or science degree, or a degree that includes course work in engineering mathematics.

Required are:

Subject and Catalog Number | Units
--- | ---
MUSIC 151. Psychophysics and Cognitive Psychology for Musicians | 4
MUSIC 154. Composition and Performance of Instrumental Music with Electronics | 3
MUSIC 192A. Foundations of Sound-Recording Technology | 3
MUSIC 192B. Advanced Sound-Recording Technology | 3
MUSIC 220A. Fundamentals of Computer-Generated Sound | 4
MUSIC 220B. Computational Algorithms, Psychoacoustics, and Spatial Processing | 4
MUSIC 220C. Research Seminar in Computer-Generated Music | 4
MUSIC 250A. HCI Theory and Practice | 4
MUSIC 320. Introduction to Digital Audio Signal Processing | 4
MUSIC 420. Signal Processing Models in Musical Acoustics | 3
MUSIC 421. Audio Applications of the Fast Fourier Transform Elective | 3
Total | 45

DOCTORAL PROGRAMS

Residence—The candidate must complete a minimum of 135 academic units (see Residency under the “Graduate Degrees” section of this bulletin). Doctoral candidates working on Ph.D. dissertations or Doctor of Musical Arts (D.M.A.) final projects that require consultation with faculty members continue enrollment in the University under Terminal Graduate
Registra­tion (TGR), after they have reached the re­quired 135 ac­ademic units and have com­pleted their Spe­cial Area ex­am­i­na­tions.

For­eign Lan­guage Re­quire­ment — At the time of ad­vance­ment to can­di­dacy, all D.M.A. stu­dents, and Ph.D. stu­dents in the Com­puter­Based The­ory and Acous­tics pro­gram, are re­quired to have de­mon­strat­ed a rea­ding knowl­edge of one lan­guage other than En­glish and the abil­ity to trans­late into idi­om­at­i­cal En­glish. Ph.D. stu­dents in Mu­sin­co­logy are re­quired to de­mon­strate pro­fici­ency in Ger­man and a sim­i­lar com­pe­tence in a sec­ond lan­guage, cho­sen from French, Ita­lian, or Lat­in (or, on a case-by-case ba­sis, an­other lan­guage, if it has sig­nif­i­cant bear­ing on the can­did­ate’s field of study).

Qual­i­fy­ing Ex­am­i­na­tion — A writ­ten and oral ex­am­i­na­tion for ad­mis­sion to can­di­dacy is given just prior to the fourth quar­ter of re­side­n­ce for D.M.A. stu­dents and Ph.D. stu­dents in the Com­puter­Based Music The­ory and Acous­tics pro­grams; for Ph.D. stu­dents in Mu­sin­co­logy, the ex­ams are given just prior to the eighth quar­ter of re­side­n­ce. This ex­am tests knowl­edge of his­to­ry, the­ory, rep­er­toire, and an­a­lysis.

Teach­ing — All stu­dents in the Ph.D. or D.M.A. de­gree pro­grams, re­gardless of sour­ces of fi­nan­cial sup­port, are re­quired to com­plete six quar­ters of super­vised teach­ing at half time. Mu­sic 280 (in­clud­ing Mu­sin­co­logy) is a re­quired course for Teach­ing Assis­tants. Ad­di­tion­al quar­ters of teach­ing may be re­quired by the de­part­ment.

Basic Re­quire­ments — Doc­tor­al pro­grams in the De­part­ment of Mu­sic do not re­quire a mas­ter’s de­gree as a prereq­uisite. All stu­dents en­ter­ing di­rectly from the bache­lor’s de­gree level are re­quired to take the follow­ing course (which is, how­ever, re­quired of all stu­dents in mu­sin­co­logy, regard­less of enter­ing de­gree level):

DOCTOR OF MuSICAL ARTS IN COMPOSITION

The Doc­tor of Mu­sin­co­logy (D.M.A.) de­gree in Mu­sin­co­logy is given breadth through col­lab­or­a­tive stud­ies in other bran­ches of mu­sin­co­logy and in re­l­e­vant stud­ies out­side mu­sin­co­logy as seems de­sir­able.

Ex­am­i­na­tions — A writ­ten Spe­cial Area ex­am­i­na­tion in the can­did­ate’s field of con­cen­tra­tion, in­clud­ing a fi­nal pro­ject pro­posal, is re­quired to be com­pleted dur­ing the fourth quar­ter of study, no later than the last day of classes in Au­tu­m­n Quar­ter of that year. A pub­lic lec­ture/de­mon­stra­tion is also re­quired dur­ing the last quar­ter of re­side­n­ce. It should be one hour in length, treat­ing as­pects of the fi­nal pro­ject.

Re­quire­ments — Bes­ides those re­quire­ments listed above, can­did­ates are ex­pected to pro­duce a num­ber of works demonstrat­ing their abil­ity to com­pose in a vari­ety of forms and for the com­mon media: vocal, instru­men­tal, and elec­tronic mu­sin­co­logy. If pos­si­ble, the works sub­mit­ted are pre­sented in pub­lic per­for­mance pre­pared by the com­poser. An­nu­al pro­gress is re­viewed by the com­po­si­tion fac­ul­ty. The fi­nal pro­ject in com­pos­i­tion is an ex­tended work for in­stru­ments, voices, elec­tronic in­ter­faces, or a com­bi­na­tion of these. MUS­IC 323, Doc­tor­al Se­minar in Com­pos­i­tion (16 units), is a re­quired course.

DOCTOR OF PHILoSOphy

The Ph.D. in Mu­sin­co­logy can be pur­sued in two con­cen­tra­tions: Mu­sin­co­logy or Com­puter-Based Mu­sin­co­logy.

Ex­am­i­na­tions —

1. Spe­cial Ar­eas: a writ­ten and oral ex­am­i­na­tion test­ing the can­did­ate’s knowl­edge of mu­sin­co­logy and re­search in the stud­ent’s field of con­cen­tra­tion is com­pleted dur­ing the fourth quar­ter of study, no later than the last day of classes in Au­tu­m­n Quar­ter of that year. This in­cludes an oral de­fense of the dis­ser­ta­tion pro­posal. The ex­am­i­na­tion com­mit­tee com­prises pro­spec­tive rea­ders of the dis­ser­ta­tion.

2. Ph.D. Or­als: the Uni­ver­sity oral ex­am­i­na­tion, taken once the dis­ser­ta­tion is sub­stan­tially un­der­way, is an oral presen­ta­tion and de­fense of dis­ser­ta­tion re­search meth­ods and re­sults.

Re­quire­ments — Bes­ides those re­quire­ments listed above, other re­quire­ments by con­cen­tra­tion are:

MU­sin­co­logy

JOINT PH.D. IN MU­sin­co­logy AND Hu­man­i­ties

The de­part­ment par­tic­i­pates in the Grad­uate Pro­gram in Mu­sin­co­logy and Humanities lead­ing to a joint Ph.D. de­gree in Mu­sin­co­logy and Humanities. For a de­scrip­tion of the pro­gram, see the “I­n­ter­dis­ci­pl­i­nary Stu­dies in Hu­man­i­ties” sec­tion of this bul­let­in.

COURSES

WIM in­di­cates that the course satis­fies the Writ­ing in the Maj­or re­quire­ments. (AU) indi­cates that the course is sub­ject to the Uni­ver­sity Ac­tiv­ity Unit lim­i­ta­tions (8 units max­i­mum).

Many Mu­sin­co­logical courses have web pages linked to the Mu­sin­co­logy home page. Courses with web sites at press time are noted in their en­tries below.

GEN­ERAL

MUS­IC 2C. Men, Women, and Op­era — An in­tro­duc­tion to oper­a through the lenses of gen­der and sex­ual­ity. The de­mo­nized her­o­ines of Ital­ian tragic oper­as by Ver­di and Puc­cini; the battle of the sexes in Mozart’s comed­ies The Mar­riage of Fig­aro and Don Gio­vanni; and am­bi­g­uous rep­re­sent­a­tions of mal­es­culinity in seri­ous oper­a from Hand­el to Rossini, where her­oes were played by high-voiced men and crossdress­ing women. Lit­er­ary and his­to­rical back­ground; fem­i­nist and queer cri­ti­ques of oper­a’s misogyn­ist plots and stereotypes. Students att­end an oper­a per­for­mance. GER: DB-Hum, EC-Gender

3 units, Spr (Hudlock, H)

MUS­IC 8A. Rock, Sex, and Re­bell­i­on — De­vel­op­ment of crit­i­cal lis­ten­ing skills and mu­sin­co­logical para­me­ters through gen­res in the his­to­ry of rock mu­sin­co­logy. Focus is on com­pet­ing aes­thet­ic ten­den­cies and sub­cul­tural forces that shaped the music. Rock’s sig­nif­i­cance in Amer­i­can cul­ture, and the min­or­i­ty com­mu­ni­ties that have en­riched rock’s leg­acy as an ex­pres­sively di­verse form. Lectures, read­ings, lis­ten­ing, and video screen­ings. GER: DB-Hum, EC-Amer­i­can

3 units, Spr (Applebaum, M)

MUS­IC 9A. Tchaikov­sky, Strav­insky, Shostakovich, and Beyond: A His­to­ry of Rus­sian Mu­sin­co­logy — An in­tro­duc­tion to Rus­sian mu­sin­co­logy through clas­si­cal mu­sin­co­logy and fol­k­lo­re, in­clud­ing sacred, sec­ular, oral, and writ­ten mu­sin­co­logy. The vari­ety of Rus­sian mu­sin­co­logy in its his­tor­i­cal con­text, and how it is re­flected in the mu­sin­co­logy of Rus­sian com­posers in­clud­ing Glin­ka, Mussorg­sky, Rim­sky-Korsakov, Tchaikov­sky, Skryabin, Strav­insky, Prokofiev, and Shostakovich. Lis­ten­ing assign­ments in­clude field­work data and video record­ings. GER: DB-Hum, EC-GlobalCom

3 units, Spr (Zen­tsovsky, I)
MUSIC 11N-36N. Stanford Introductory Seminars

MUSIC 13Q. Classical Music and Politics: Western Music in Modern China — Stanford Introductory Seminar. Preference to sophomores. For students interested in social history, cultural studies, China studies, international relations, and music. From the Italian Jesuit, Matteo Ricci who presented a clavichord to the Chinese emperor, to the emergence of a modern generation of Chinese musicians. GER: DB-Hum, EC-GlobalCom 3 units, Spr (Cai, J)

MUSIC 14N. Women Making Music — Stanford Introductory Seminar. Women’s roles as composers and performers across history and cultures. Music from diverse cultures, styles, and eras as a medium for women to express individuality and build community. Women’s musical activities in folk and art music of Japan, India, Ireland, and Albania; women in popular music in America, Egypt, and Africa; female musicians of the medieval, Renaissance, Romantic, and contemporary eras. GER:DB-Hum, EC-Gender 3 units, Aut (Hadlock, H)

MUSIC 15Q. Topics in American Music — Stanford Introductory Seminar. American music as a central element in the quest for a national artistic expression that reflects the social order that forms it: pluralistic, multicultural, largely immigrant, democratic, and combining elements of its cultivated and vernacular traditions. Ballads, blues, band music, musical comedy, minstrel, missions music, American Indian music, country music, rags, rock, rhythm-and-blues, jazz, spirituals, swing, shape-notes. GER:DB-Hum, EC-AmerCul 3 units, Win (Cohen, A)

MUSIC 16N. Music, Myth, and Modernity; Wagner’s Ring Cycle and Tolkien’s Lord of the Rings — Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner’s operatic cycle and Tolkien’s epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner’s music dramas and the film version of Tolkien’s trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom 3 units, Spr (Grey, T)

MUSIC 17N. The Operas of Mozart — Stanford Introductory Seminar. Preference to freshmen. Four of Mozart’s mature operas, the earliest works in the operatic repertoire never to go out of fashion. What accounts for this extraordinary staying power? Focus on the history of their composition, performance, and reception, and their changing significance from Mozart’s time to the present. GER:DB-Hum 3 units, Win (Berger, K)

MUSIC 17Q. Perspectives in North American Taiko — Stanford Introductory Seminar. Preference to sophomores. Taiko, or Japanese drum, is a newcomer to the American music scene. Emergence of the first N. American taiko groups coincided with increased Japanese community, and identity. GER:DB-Hum, EC-AmerCul 4 units, Spr (Sano, S)

MUSIC 35N. The Music and Ideas of Charles Ives — Stanford Introductory Seminar. Preference to freshmen. The life and work of Charles Ives, and the polarized reception his compositions received. Music includes Ives’ Victorian songs and his symphonic works; his philosophical and political writings, historic recordings, oral and photographic histories, and live performances. Hands-on work with original manuscripts and editions. Recommended: ability to read music. GER:DB-Hum 3 units, Aut (Barth, G)

MUSIC 36N. Experimental Instruments — Stanford Introductory Seminar. The design of new, experimental musical instruments emphasizing sound-sculpture instruments and their sonic capabilities and visual appeal. Lab in the recently renovated CCMRA; students design and build their own instruments, and form a performing ensemble. Historical readings, the evolution of traditional instruments, concert events, museum visits and guest lecturers. Recommended: experience with music, visual art, or power tools. 4 units, Aut (Applebaum, M)

MUSIC 18A. Jazz History: Ragtime to Bebop, 1900-1940 — From the beginning of jazz to the war years. GER:DB-Hum, EC-AmerCul 3 units, Win (Berry, F)

MUSIC 18B. Jazz History: Bebop to Present, 1940-Present — Modern jazz styles from Bebop to the current scene. Emphasis is on the significant artists of each style. GER:DB-Hum, EC-AmerCul 3 units, Spr (Berry, F)

MUSIC 20A. Jazz Theory — Introduces the language and sounds of jazz through listening, analysis, and compositional exercises. Students apply the fundamentals of music theory to the study of jazz. Topics: scale theory, altered dominants, and substitute harmony. Prerequisite: 19 or consent of instructor. GER:DB-Hum 3 units, Aut (Nadel, J)

MUSIC 20B. Advanced Jazz Theory — Approaches to improvisation through listening and transcribing, and developing familiarity with important contributors to this music. Topics: scale theory, altered dominants, and substitute harmony. Prerequisite: 20A or consent of instructor. GER:DB-Hum 3 units, Win (Nadel, J)

MUSIC 20C. Jazz Arranging and Composition — Jazz arranging and composition for small ensembles. Foundation for writing for big band. Prerequisite: 20A or consent of instructor. 3 units, alternate years, not given this year

MUSIC 127. Instrumentation and Orchestration — Individual instruments, instrumental groups within the orchestra, and combinations of groups. Arrangements from piano to orchestral music. Score analysis with respect to orchestration. Practical exercises using chamber ensembles and school orchestra. Prerequisite: 23. GER:DB-Hum 3 units, Win (Jones, C)

FOUNDATION FOR B.A. MAJOR

Students with training in theory should take the placement exam given at the beginning of each quarter for admission to more advanced courses. Students must not assume that they may begin study with MUSIC 21.

MUSIC 19. Introduction to Music Theory — For non-music majors and Music majors or minors unable to pass the proficiency test for entry to MUSIC 21. The fundamentals of music theory and notation, basic sight reading, sight singing, ear training, keyboard harmony; melodic, rhythmic, and harmonic dictation. Skill oriented, using piano and voice as basic tools to develop listening and reading skills. GER:DB-Hum 3 units, Aut, Spr (Berger, T)

MUSIC 21, 22, 23. Elements of Music — Melody, harmony, counterpoint, and rhythm are studied through analysis, composition, and exercises in practical musicianship. Emphasis is on tonal theory with components in melody, counterpoint, and harmony. Analytical and practical musicianship skills are taught, with analysis and compositional projects in historical styles. Students with previous training in theory should take the placement exam given at the beginning of each quarter for admission to more advanced courses. Students must not assume that they may begin study with MUSIC 21.

MUSIC 21. Elements of Music I — Preference to majors. Introduction to tonal theory. Practice and analysis. Diatonic harmony focusing on melodic and harmonic organization, functional relationships, voice-leading, and tonal structures. Ear-training and keyboard-harmony skills; analytical methods and listening strategies. Concurrent enrollment in MUSIC 12 (Piano) or demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required. Enrollment limited to 40. Prerequisite: pass a basic musical skills proficiency examination on first day of class; students who do not pass may take MUSIC 19. GER:DB-Hum 4 units, Aut (Aquilanti, G), Win (Berger, T)
MUSIC 22. Elements of Music II — Preference to majors. Introduction to chromatic harmony focusing on secondary functions, modulations, harmonic sequences, mode mixture, and the Neapolitan, and augmented sixth chords. Analysis of musical forms and harmonizations complemented by harmonic and melodic dictation, sight singing, and other practical skills. Prerequisites: 21 or consent of instructor; demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required, or concurrent enrollment in MUSIC 12. GER:DB-Hum
4 units, Win (Aquilanti, G), Spr (Berger, T)

MUSIC 23. Elements of Music III — Preference to majors. Continuation of chromatic harmony, complex forms, and introduction to early 20th-century techniques. Satisfactory passage of ear-training proficiency exam, part of the course’s final, is a requirement for course completion and for continuation in the major sequence. Prerequisites: 22 or consent of instructor; demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required, or concurrent enrollment in MUSIC 12. GER:DB-Hum
4 units, Aut (Jones, C), Spr (Aquilanti, G)

MUSIC 40, 41, 42. Music History — The history of Western art music from Gregorian chant to the present, stressing major styles and genres in their intellectual and institutional settings. Pre- or corequisite: 23. GER: DB-Hum
MUSIC 40. Music History to 1600
4 units, Aut (Markham, M)
MUSIC 41. Music History 1600-1830
4 units, Win (Hadlock, H)
MUSIC 42. Music History Since 1830
4 units, Spr (Kenneaway, J)

MUSIC 121. Analysis of Tonal Music — Complete movements, or entire shorter works of the 18th and 19th centuries, are analyzed in a variety of theoretical approaches. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Win (Barth, G)

MUSIC 122A. Eighteenth-Century Counterpoint — Analysis and composition of two- and three-part inventions and three- and four-voice fugues. Use of keyboard, ear training, and sight singing. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Spr (Jones, C)

MUSIC 122B. Harmonic Materials of 19th Century — Analysis of 19th-century music, with compositional exercises based on 19th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Win (Ulman, E)

MUSIC 122C. Introduction to 20th-Century Composition — Contemporary works, with emphasis on music since 1945. Projects in free composition based on 20th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum
4 units, Aut (Ferneyhough, B)

COMPOSITION

MUSIC 123. Undergraduate Seminar in Composition — Current trends in composition. May be repeated for credit. Prerequisites: Music major; 23 or consent of instructor.
3 units, Aut (Ulman, E), Win (Applebaum, M)

MUSIC 125. Individual Undergraduate Projects in Composition — May be repeated for credit. Prerequisites: Music major and one quarter of 123.
1-3 units, Aut, Win, Spr (Staff)

MUSIC 323. Doctoral Seminar in Composition — Illustrated discussions of compositional issues and techniques. Students present their own work to the class, and individually to the instructor.
4 units, Aut (Applebaum, M), Win (Ferneyhough, B)

MUSIC 325. Individual Graduate Projects in Composition
1-5 units, Aut, Win, Spr, Sum (Staff)

HISTORY AND LITERATURE

MUSIC 140-148. Seminars in Music History — Specialized topics in music history are each offered at least once within any two-year period. Topics vary each year. May be repeated for credit. Music majors may repeat the same seminar in music history only once for credit towards the major and must turn in different papers the second time. Pre- or corequisite: 23. GER:DB-Hum, WIM
MUSIC 140/240. Studies in Medieval Music
3-4 units, alternate years, not given this year
MUSIC 141. Studies in Renaissance Music
3-4 units, alternate years, not given next year
MUSIC 142. Studies in Baroque Music
3-4 units, Spr (Hadlock, H), alternate years, not given next year
MUSIC 143. Studies in Classic Music
3-4 units, alternate years, not given this year
MUSIC 144. Studies in Romantic Music
3-4 units, alternate years, not given this year
MUSIC 145. Studies in Modern Music — May be repeated for credit.
3-4 units, Win (Ulman, E), alternate years, not given next year
MUSIC 148. Musical Shakespeare: Theater, Song, Opera, and Film — (Same as HUMNTIES 192G) The role of music in productions, adaptations, and interpretations of Shakespeare’s plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic and film adaptations. Incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include Romeo and Juliet, Othello, Macbeth, Hamlet, The Tempest, Midsummer Night’s Dream, and Twelfth Night. Pre- or corequisite: 23. GER:DB-Hum, WIM at 4- or 5-unit level only.
3-5 units, Aut (Grey, T), alternate years, not given next year

4 units, alternate years, not given this year

MUSIC 240-248. Seminars in Music History — For graduate students; topics as in 140-145. Participation in upper-class seminars, with additional in-depth research. Specialized topics in music history are each offered at least once within any two-year period. Topics vary each year. Pre- or corequisite: 23.
MUSIC 240. Studies in Medieval Music
3-4 units, alternate years, not given this year
MUSIC 241. Studies in Renaissance Music
3-4 units, alternate years, not given this year
MUSIC 242. Studies in Baroque Music
3-4 units, Spr (Hadlock, H), alternate years, not given next year
MUSIC 243. Studies in Classic Music
3-4 units, alternate years, not given this year
MUSIC 244. Studies in Romantic Music
3-4 units, alternate years, not given this year
MUSIC 245. Studies in Modern Music
3-4 units, Win (Ulman, E), alternate years, not given next year
MUSIC 248. Musical Shakespeare: Theater, Song, Opera, and Film — (Graduate section; see 148; same as HUMNTIES 192G.)
3-5 units, Aut (Grey, T), alternate years, not given next year

MUSIC 310. Research Seminar in Musicology — For graduate students. Topics vary each quarter. May be repeated for credit.
3-5 units, Aut (Mahrt, W), Win (Taruskin, R), Spr (Grey, T)
MUSIC 310H. Modern Seminar — (Same as HUMNTIES 325.) How the Romantics saw aesthetic experience, emphasizing music, as a means of reading the self and defining the individual subject, community and nation. These complementary functions of music, drama, and myth in modern culture epitomized in Wagner’s Tristan und Isolde and Die Meistersinger. Nietzsche and Mann’s notion that the conflicting claims of subjective and collective identity generate tensions that threaten the survival of culture. Primary readings include: stories and criticism of E.T.A. Hoffmann; Wagner’s music dramas; poetry and essays of Charles Baudelaire; Nietzsche’s Birth of Tragedy, Beyond Good and Evil, and The Case of Wagner; Mann’s Death in Venice and Doctor Faustus; and Adorno’s criticism.
3-5 units, Win (Grey, T)

MUSIC 312A.B. Aesthetics and Criticism of Music — For graduate students. Primary texts focusing on the nature, purposes, and uses of music and other arts. A: Ancients and Moderns: Plato to Nietzsche, B: Contemporaries: Heidegger to Today.
4 units, A: Win, B: Spr (Berger, K)

COMPUTER MUSIC AND APPLICATIONS

MUSIC 120. Auditory Remapping of Bioinformatics — Representation of data related to bioinformatics and medical imaging. Physiological and perceptual perspectives. Representations of complexity in sound and types of auditory display applied to representation of data sets. Term project involving developing tools for sonification and/or applying these tools to a representation problem. Recommended: basic knowledge and interest in music, computer programming, or one of the biological sciences.
1-3 units, Aut (Yeo, W)

3 units, Win (Rossing, T)

MUSIC 151. Psychophysics and Cognitive Psychology for Musicians — Concepts and experiments relevant to the use of sound, especially synthesized, in music. Listening to sound examples. Emphasis is on salience and the importance of various auditory phenomena in music. See http://ccrma.stanford.edu/. Prerequisite: basic knowledge of music. GER:DB-Hum, WIM
4 units, Spr (Berger, J)

MUSIC 154. Composition and Performance of Instrumental Music with Electronics — Aesthetic and analytical issues of mixed instrumental and electronic works. Focus is on one or a few works leading to a public performance at the end of the quarter. Prerequisite: experience in analysis of contemporary music and in electronic music.
1-3 units, Spr (Risset, J)

MUSIC 192. Theory and Practice of Audio Recording

MUSIC 192A. Foundations of Sound-Recording Technology — For upper division undergraduates and graduate students; preference given to Music majors with MST specialization. Topics: elementary electronics; the physics of sound transduction and microphone operation, selection, and placement; mixing consoles; connectors and device interconnection; grounding and shielding; principles of analog magnetic recording; operation maintenance of recording equipment; and principles of recording engineering. Enrollment limited. Prerequisite: 151; algebra, physics basics, and consent of instructor. GER:DB-EngrAppSci
3 units, Aut (Kadis, J)

MUSIC 192B. Advanced Sound Recording Technology — Topics: noise reduction techniques; dynamics and time-delay audio effects; the principles of digital audio; disk- and tape-based digital recorders; digital audio workstations and editing; advanced multitrack techniques; SMPTE and MIDI time code and device synchronization; MIDI sequencing and synchronization. See http://ccrma.stanford.edu/. Prerequisite: 192A. GER:DB-EngrAppSci
3 units, Win (Kadis, J)

MUSIC 192C. Session Recording — Independent engineering of recording sessions. May be repeated for credit. Prerequisites: 192A,B. 1-2 units, Aut, Win, Spr (Kadis, J)

MUSIC 220A. Fundamentals of Computer-Generated Sound — Techniques for digital sound synthesis, effects, and reverberation. Topics: summary of digital synthesis techniques (additive, subtractive, nonlinear, wavetable, spectral-modeling, and physical-modeling); digital effects algorithms (phasing, flanging, chorus, pitch-shifting, and vocoding); and techniques for digital reverberation. Majors (undergraduate or graduate) must take for 4 units. See http://ccrma.stanford.edu/.
2-4 units, Aut (Chafe, C)

MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing — The use of high-level programming language as a compositional aid in creating musical structures. Advanced sound synthesis techniques. Simulation of a reverberant space and control of the position of sound within the space. See http://ccrma.stanford.edu/. Prerequisite: 220A.
2-4 units, Win (Lopez-Lezcano, F)

2-4 units, Spr (Chafe, C)

MUSIC 220D. Research in Computer-Generated Music — Independent research projects in composition, psychoacoustics, or signal processing. May be repeated for credit. See http://ccrma.stanford.edu/. Prerequisite: 220C.
1-10 units, Aut, Win, Spr, Sum (Staff)

MUSIC 250A. HCI Theory and Practice — HCI issues as they relate to music applications in composition and performance. Project-oriented, examining issues from the technical and theoretical perspectives of computer science, haptics, and music theory. See http://ccrma.stanford.edu/.
3-4 units, Aut, Win (Verplank, W)

MUSIC 253. Musical Information: An Introduction — The kinds of musical information used in sound, graphical, and analytical applications. Emphasis is on independent concepts and principles in music representation and research objectives (repertory analysis, performance analysis, theoretical models, similarity, and stylistic simulation). Examples from Western art music. Prerequisites: one year of music theory or equivalent; methods courses in fields such as musical analysis, symbolic systems, information processing, sound engineering, or intellectual property issues.
1-4 units, Win (Selfridge-Field, E)

MUSIC 254. Applications of Musical Information: Query, Analysis, and Style Simulation — Participants explore the issues introduced in 253 in greater depth and take initiative for research projects related to a theoretical or methodological issue, a software project, or a significant analytical result. Prerequisite: 253 or consent of instructor.
1-4 units, Spr (Selfridge-Field, E)

MUSIC 318. Advanced Acoustics — Current topics. May be repeated for credit.
1-5 units, Win (Rossing, T)

MUSIC 319. Research Seminar on Computational Models of Sound Perception — All aspects of auditory perception, often with emphasis on computational models. Topics: music perception, signal processing, auditory models, pitch perception, speech, binaural hearing, auditory scene analysis, basic psychoacoustics, and neurophysiology. See http://ccrma.stanford.edu/courses/.
1-3 units, Aut, Win, Spr (Slaney, M)

3-4 units, Aut (Smith, J)

MUSIC 420. Signal Processing Methods in Musical Acoustics — Computational methods in musical sound synthesis and digital audio effects based on acoustic physical models. Topics: acoustic simulation with delay lines, digital filters, and nonlinear elements; comb filters; allpass filters; artificial reverberation; delay-line interpolation and sampling-rate conversion; phasing, flanging, and chorus effects; efficient computational models of strings, woodwinds, brasses, and other musical instruments. See http://ccrma.stanford.edu/courses/420/. Prerequisites: 320 or equivalent; PHYSICS 21 or equivalent course applying Newton’s laws of motion; and CS 106B or equivalent programming in C and C++.

3-4 units, Win (Smith, J)

MUSIC 421. Audio Applications of the Fast Fourier Transform (FFT) — Spectrum analysis and signal processing using the FFT with emphasis on audio applications. Topics: Fourier theorems; FFT windows; spectrum analysis; spectrograms; sinusoidal modeling; spectral modeling synthesis; FFT convolution; FIR filter design and system identification; overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and resynthesis. See http://ccrma.stanford.edu/courses/421/. Prerequisites: 420 or consent of instructor.

3-4 units, Spr (Smith, J)

MUSIC 422. Perceptual Audio Coding — History and basic principles: development of psychoacoustics-based data-compression techniques; perceptual-audio-coder applications (radio, television, film, multimedia/internet audio, DVD, EMD). In-class demonstrations: state-of-the-art audio coder implementations (such as AC-3, MPEG) at varying data rates; programming simple coders. Topics: audio signals representation; quantization; time to frequency mapping; introduction to psychoacoustics; bit allocation and basic building blocks of an audio codec; perceptual audio codecs evaluation; overview of MPEG-1, 2, 4 audio coding and other coding standards (such as AC-3). Prerequisites: knowledge of digital audio principles, familiarity with C programming. Recommended: 320, EE 261. See http://ccrma.stanford.edu/.

3 units, Win (Bosi-Goldberg, M)

MUSIC 423. Signal Processing Research — Graduate research seminar. Problems in music and/or audio signal processing. Presentation of research-in-progress by graduate students, visiting scholars, and CCRMA faculty. See http://ccrma.stanford.edu/courses/423/.

1-4 units, Aut, Win, Spr (Smith, J)

MUSIC 424. Signal Processing Techniques for Digital Audio Effects — Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of 320 or EE 261; Matlab and modest C programming experience. Recommended: 420 or EE 264; audio effects in mixing and mastering at the level of 192.

3-4 units, Spr (Berners, D; Abel, J)

PERFORMANCE GROUP INSTRUCTION

Note — Special fee of $100 per quarter for 12A, B, C (non-majors); 65A, B; 72, 73, 74, 75, 76, 77.

MUSIC 12A,B,C. Introductory Piano Class — (A = level 1; B = level 2; C = level 3)
I unit, Aut, Win, Spr, Sum (Zerlang, T)

MUSIC 65A,B. Voice Class I, II — Group (7 students to a section) beginning voice for the non-major (A = level 1; B = level 2).
I unit, Aut, Win, Spr (Giovannetti, C), Sum (Linduska, M)

MUSIC 65C. Voice Class (Majors and Ensemble Members) — For Music majors and non-majors who are members of departmental choral ensembles.
I unit, Aut, Win, Spr (Wait, G)

MUSIC 72-77. Small-Group, Intermediate-Level Instruction — Minimum enrollment required. May be repeated for credit.

MUSIC 72A. Intermediate Piano Class — For intermediate students. Prerequisites: 12C or equivalent, audition.
I unit, Aut, Win, Spr, Sum (Zerlang, T)

MUSIC 72B. Organ Class — For beginning organ students who have keyboard skills.
I unit, Aut, Win, Spr (Morgan, R)

MUSIC 72C. Harpsichord Class — For beginning harpsichord students who have keyboard skills.
I unit, Aut, Win, Spr (Thorburn, E)

MUSIC 72D. Jazz Piano Class — By invitation only; priority to majors and jazz-ensemble participants.
I unit, Aut, Win, Spr (Low, M)

MUSIC 73. Intermediate Voice Class — For intermediate students. Admission by audition.
I unit, Aut, Win, Spr (Giovannetti, C)

MUSIC 74A. Classical Guitar Class
I unit, Aut, Win, Spr (Ferguson, C)

MUSIC 74D. Harp Class
I unit, Aut, Win, Spr (Chauvel, M)

MUSIC 75B. Renaissance Wind Instruments Class
I unit, Aut, Win, Spr (Myers, H)

MUSIC 76. Brass Instruments Class
I unit, Aut, Win, Spr (Veregge, M)

MUSIC 77. Percussion Class
I unit, Aut, Win, Spr (Weckesser, M)

INDIVIDUAL INSTRUCTION

MUSIC 172/272-177/277. Individual Vocal and Instrumental Instruction — 270-level courses are for advanced students. Weekly lessons throughout the academic quarter. Special fee of $200 per quarter for majors and $400 for non-majors (fees remain the same for 1, 2, or 3 units). Prospective students must demonstrate, by audition with the appropriate instructor, a minimum proficiency on instrument. Minimum proficiency requirements for each instrument are posted on the bulletin board outside Braun 102 and at http://music.stanford.edu/Academics/Auditions.html. May be repeated for credit.

MUSIC 172/272. Keyboard Instruments
MUSIC 172A/272A. Piano — Private lessons and group master class weekly.
1-3 units, Aut, Win, Spr (Barth, G; Dahl, L; Schultz, T; Weldy, F; Arul, K)

MUSIC 172B/272B. Organ
1-3 units, Aut, Win, Spr (Morgan, R)

MUSIC 172C/272C. Harpsichord
1-3 units, Aut, Win, Spr (Thorburn, E)

MUSIC 172D/272D. Jazz Piano — By invitation only; priority to majors and jazz-ensemble participants.
1-3 units, Aut, Win, Spr (Low, M)
MUSIC 172E/272E. Fortepiano
1-3 units, Aut, Win, Spr (Barth, G)

MUSIC 172F/272F. Carillon
1-3 units, Aut, Win, Spr (Zerlang, T)

MUSIC 173/273. Voice
1-3 units, Aut, Win, Spr (Giovannetti, C; Wait, G; Schneider, A)

MUSIC 174/274. Stringed Instruments
MUSIC 174A/274A. Violin
1-3 units, Aut, Win, Spr (Kleymen, G; Harms, D; Nuttall, G; St. John, S; Fong, D; Sohn, L)

MUSIC 174B/274B. Viola
1-3 units, Aut, Win, Spr (Kleymen, G; Robertson, L; Harms, D)

MUSIC 174C/274C. Violoncello
1-3 units, Aut, Win, Spr (Harrison, S; Costanza, C)

MUSIC 174D/274D. Contrabass
1-3 units, Aut, Win, Spr (Moyer, B)

MUSIC 174E/274E. Viola Da Gamba
1-3 units, Aut, Win, Spr (Dornenburg, J)

MUSIC 174F/274F. Classical Guitar
1-3 units, Aut, Win, Spr (Ferguson, C)

MUSIC 174G/274G. Harp
1-3 units, Aut, Win, Spr (Chauvel, M)

MUSIC 174H/274H. Baroque Violin
1-3 units, Aut, Win, Spr (Martin, A)

MUSIC 174I/274I. Early Plucked Strings
1-3 units, Aut, Win, Spr (Staff)

MUSIC 175/275. Woodwind Instruments
MUSIC 175A/275A. Flute
1-3 units, Aut, Win, Spr (Blaisdell, F; Hawley, A; Holmes-Schaefle, M; Maestre, J)

MUSIC 175B/275B. Oboe
1-3 units, Aut (Hubbard, R), Win, Spr (Matheson, J)

MUSIC 175C/275C. Clarinet
1-3 units, Aut, Win, Spr (Brandenburg, M; Bell, C)

MUSIC 175D/275D. Bassoon
1-3 units, Aut, Win, Spr (Olivier, R)

MUSIC 175E/275E. Recorder/Renaissance Wind Instruments
1-3 units, Aut, Win, Spr (Myers, H)

MUSIC 175F/275F. Saxophone
1-3 units, Aut, Win, Spr (Stein, H)

MUSIC 175G/275G. Baroque Flute
1-3 units, Aut, Win, Spr (Staff)

MUSIC 176/276. Brass Instruments
MUSIC 176A/276A. French Horn
1-3 units, Aut, Win, Spr (Ragert, L)

MUSIC 176B/276B. Trumpet
1-3 units, Aut, Win, Spr (Johnson-Hamilton, J)

MUSIC 176C/276C. Trombone
1-3 units, Aut, Win, Spr (Kenley, M)

MUSIC 176D/276D. Tuba
1-3 units, Aut, Win, Spr (Clements, A)

MUSIC 177/277. Percussion
1-3 units, Aut, Win, Spr (Veregge, M)

PERFORMANCE PRACTICES
MUSIC 126. Introduction to Thoroughbass — The development of continuo techniques and skills for figured-bass realization. Performance and analysis of selected repertoire, using thoroughbass principles and exercises based on historical theoretical treatises. Prerequisite: 21.
1-3 units, Win (Berger, T)

MUSIC 130. Elementary Conducting
MUSIC 130A. Introduction to Conducting — Baton techniques and rehearsal procedures. The development of coordination of the members of the body involved in conducting; fluency in beat patterns and meters; dynamics, tempi, cueing, and use of the left hand in conducting. Prerequisites: 121 and diagnostic musicianship exam given first day of class; preference to students who have completed 122B.
3 units, Aut (Aquilanti, G)

MUSIC 130B. Elementary Orchestral Conducting — Prerequisites: 127 or previous orchestral performance experience, 130A.
3 units, Spr (Cai, J)

MUSIC 130C. Elementary Choral Conducting — Techniques specific to the conducting of choral ensembles: warm-ups, breathing, balance, blend, choral tone, isolation principles, recitative conducting, preparation, and conducting of choral/orchestral works. Prerequisite: 130A.
3 units, Win (Wait, G)

MUSIC 131. Intermediate Orchestral Conducting — Prerequisite: 130 A, B, or C, or orchestral conducting experience.
3 units, alternate years, not given this year

MUSIC 169A/269A. Seminar in Performance Practices — Performance techniques, theoretical principles, aesthetics, and musical resources of various historical periods. Graduate students must register for 4 units.
1-4 units, Win (Myers, H; Berger, T)

MUSIC 181. Solo Vocal Repertoire — Solo vocal repertoire for advanced vocal students. Song and operatic literature is studied and performed by class participants. Repertoire varies and/or spans more than one quarter, allowing students to repeat the course for credit.
1 unit, Aut, Win, Spr (Schneider, A)

MUSIC 182. Diction for Singers — The international phonetic alphabet and its application to German, French, and Italian vocal literature. Open also to pianists interested in vocal coaching and choral conducting.
1 unit, Win (Dahl, L)

MUSIC 183. Art Song Interpretation — For advanced singers and pianists as partners. Performance class in a workshop setting. Prerequisite: consent of instructor. Recommended: 170 for pianists or 182 for singers.
MUSIC 183A. German Art Song Interpretation — Including composers from Beethoven and Schubert to Wolf and Strauss.
1 unit, Spr (Dahl, L), alternate years, not given next year

MUSIC 183B. French Art Song Interpretation — Composers include Fauré, Debussy, Ravel, and Poulenc.
1 unit, alternate years, not given this year

MUSIC 230. Advanced Orchestral Conducting — May be repeated for credit. Prerequisite: 130B.
2-4 units, Aut, Win, Spr (Cai, J)

MUSIC 231. Advanced Choral Conducting — May be repeated for credit. Prerequisite: 130C.
2-4 units, Aut, Win, Spr (Sano, S)

ENSEMBLE
An audition is required for admission to any University musical ensemble; audition schedules are posted during the registration period in Autumn Quarter. Audition is by appointment in Winter and Spring quarters: contact the ensemble director. Membership is open to all students including those who do not register for credit, although these courses may be repeated for credit. Many Department of Music ensembles tour on a regular basis, usually after Commencement in June.

MUSIC 157A. “sic”: Improvisation Collective — Small ensemble devoted to learning trans-idiomatic improvisation techniques and composing inde-terminate pieces in a workshop setting. One major concert. Prerequisite: access to an instrument. Improvisational experience and conventional instrumental virtuosity not required.
1 unit, Win (Applebaum, M)

MUSIC 157B. Introduction to Mariachi Ensemble — Introduction to the practice of mariachi music, tradition, and history. Focus is on learning traditional sones, rancheras, huapangos, and boleros. Requirements:
ability to play and access to instruments (violin, trumpet, guitar, vihuela, and guitarron). (AU)
1 unit, Aut, Win, Spr (Staff)

MUSIC 159. Early Music Singers—Small choir specializing in Medieval, Renaissance, and early Baroque vocal music. One major concert per quarter.
1 unit, Aut, Win, Win, Spr (Mahrt, W)

MUSIC 160. University Orchestra—70- to 100-member ensemble performing major orchestral works; minimum one concert per quarter.
1 unit, Aut, Win, Spr (Cai, J)

MUSIC 161. University Bands
MUSIC 161A. Stanford Wind Ensemble—40- to 50-member ensemble performing transcriptions of symphonic music, brass band music, and repertoire composed specifically for symphonic band. One concert per quarter.
1 unit, Aut, Win, Spr (Aquilanti, G)

MUSIC 161B. Jazz Orchestra—Big band format. Repertoire drawn primarily from the contemporary jazz-ensemble literature. One formal concert per quarter.
1 unit, Aut, Win, Spr (Berry, F)

MUSIC 161C. Red Vest Band—A small ensemble of the Leland Stanford Junior University Marching Band open to members of the LSJUMB by audition and consent of instructor. Members perform at all men’s and women’s home basketball games and travel to some away and post-season games. Twice-weekly rehearsals focus on introduction of new student arrangements and the LSJUMB’s repertoire of rock, funk, and traditional styles.
1 unit, Win (Aquilanti, G)

MUSIC 162. Symphonic Chorus—100- to 150-voice ensemble, performing major choral masterworks with orchestra. One concert per quarter.
1 unit, Aut, Win, Spr (Sano, S)

MUSIC 163. Memorial Church Choir—Official choir of Memorial Church, furnishing music for Sunday services and special occasions in the church calendar.
2 units, Aut, Win, Spr (Wait, G)

MUSIC 165. Chamber Chorale—Select 24-voice chamber ensemble, specializing in virtuoso choral repertoire from all periods of Western art music.
1 unit, Aut, Win, Spr (Sano, S)

MUSIC 167. University Singers—Mixed-repertory chorus, performing choral repertoire from all periods of Western art music and other world cultures.
1 unit, Aut, Win, Spr (Morgan, R)

MUSIC 169. Stanford Taiko—Select North American taiko ensemble, performing traditional and contemporary repertoire for Japanese drums. Multiple performances in Winter and Spring quarters, also touring; instrument construction and maintenance. Admission by audition in Autumn Quarter only.
1 unit, Aut, Win, Spr (Sano, S; Uyechi, L)

MUSIC 170. Collaborative Piano—Performance class in a workshop setting. Techniques of collaboration with vocalists and instrumentalists in repertoire ranging from songs and arias to sonatas and concertos. Prerequisite: private-lesson proficiency level in piano, or consent of instructor.
1 unit, Aut (Dahl, L)

MUSIC 171. Chamber Music—Small combinations for strings, winds, and keyboard instruments. Open to students at the private-lesson-proficiency level to hone ensemble skills, preferably while taking private lessons. Selected string instrument participants are invited to participate in a chamber orchestra, led by members of the St. Lawrence String Quartet, without conductor. Winter Quarter: chamber orchestra in conjunction with chamber chorale performing choral sacred music of the Baroque period, led by members of the St. Lawrence. All new and returning students are required to audition.
1 unit, Aut, Win, Spr (Staff)

MUSIC 520. Graduate Proseminar—Required of first-year graduate students in music. Introduction to research in music, bibliographical materials, major issues in the field, philosophy, and methods in music history. Guest lecturers and individual research topics.
4 units, Aut (Berger, K; McBride, J)

1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 528. TA Training Course—Required for doctoral students serving as teaching assistants. Orientation to resources at Stanford, guest presentations on the principles of common teaching activities, supervised teaching experience. Students who entered in the Autumn should take 280 in the Spring prior to the Autumn they begin teaching.
1 unit, Spr (Lee, H; Losness, E)

MUSIC 530A. Medieval Notation
4 units, alternate years, not given this year

MUSIC 530B. Renaissance Notation
4 units, Aut (Mahrt, W)

MUSIC 530A. Analysis of Music: Modal
4 units, Win (Mahrt, W)
MUSIC 530B. Analysis of Music: Tonal
4 units, Aut (Berger, J)
MUSIC 530C. Analysis of Music: Post-Tonal—Current analytical trends, issues, and methods.
4 units, Spr (Ferneyhough, B)

MUSIC 5302. Research in Musicology—Directed reading and research.
1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 5321. Readings in Music Theory—Directed reading and research.
1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 5322. Directed Readings in German Language—Students create reading lists relevant to their studies in Music in conjunction with instructor. May be repeated for credit.
1 unit, Win (Kennaway, J)

MUSIC 5341. Ph.D Dissertation—May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

MUSIC 5399. D.M.A. Final Project—May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)
OVERSEAS STUDIES PROGRAM

Program Director: Norman Naimark

Stanford Program in Australia
Director, Centre for Marine Studies, University of Queensland: Ove Hoegh-Guldberg
Faculty: Kevin Arrigo, Kenneth Anthony, Tony Chiffings, Martin Crotty, Norman Duke, Miao Fine, Ron Johnstone, Michael Pole, Roger Shore, Selina Ward

Stanford Program in Beijing
Director: Jason D. Patent
Faculty: Li Chen, Haiyan Li, M. Colette Plum, Dingcheng Ren, Karen Seto, Andrew Waldner, Jingjing Xue, Qi Zhang, Dongmei Zhao, Tianbiao Zhu

Stanford Program in Berlin
Director: Karen Kramer
Faculty: Maria Biege, Ulrich Brückner, Ehren Fordyce, Dubravka Friesel-Kopecki, David Hannah, Wolf-D. Junghanns, Juliane Keller, Ingo Klein, Christa Maerker, Franz Neckenig, Eric Roberts, Sylke Tempel, Jochen Wohlfel

Stanford Program in Florence
Director: Ermelinda Campani
Faculty: Khaled Fouad Allam, Scott Delp, Paola Gaeta, Maria Gough, Charles Loverme, Giuseppe Mammarella, Leonardo Morlino, Lapo Pistelli, Stephen Quake, Fiorensa Quercioli, Filippo Rossi, Francesco Sberlati, Emanuela Scarpellini, Timothy Verdon, Luisa Vierucci, Sylvia Yanagisako, Pan Yotopoulos

Stanford Center for Technology and Innovation (SCTI) — Kyoto
Director: Terry MacDougall
Faculty: Toshiro Fujigawa, Toshihiko Hayashi, Bettina Langner-Teramoto, Leonard Ortolano, Mariko Uemiyi, Orie Yamada, Chihiro Yamaoka

Stanford Program in Moscow
Program Director: Alexander Abashkin
Faculty: Tatyana Boldyreva, Galina Filatova, Vladimir Kozlov, Liza Kurganova, Vladimir Mau, Sergei Medvedev, Andrei Melville, Nancy Tuma

Stanford Program in Oxford
Director: Geoffrey Tyack
Faculty: Katrin Auel, Ronald Barrett, Paddy Bullard, Helena Chance, John Darwin, James Forder, Beatrice Groves, Helen Kidd, Jan Krawitz, Robert McMahon, Amanda Palmer, Emma Plaskitt, Christopher Rovey, Trevor Rowley, John Senior, Bart van Es

Stanford Program in Paris
Director: Estelle Halevi
Faculty: James Daughton, Colette Deremble, Jean Paul Deremble, Papa Diop, Jean-Marie Fessler, Patrick Guedon, Sylvaine Guyot, Herant Katchadourian, Jacques Le Cacheux, Fabienne Maître, Sophie Maurer, Nonna Mayer, Florence Mercier, Elizabeth Molkou, Anne Muxel, Dominique Remy-Granger, Pauline Reychman, Marie-Christine Ricci, Sylvie Strudel, Paul Switzer, Fabrice Virgili

Stanford Program in Santiago
Director: Iván Jaksic
Faculty: Mabel Abad, César Albornoz, Andrés Bobbert, Susan Cashion, Germán Correa, Armando DiFilippo, James Fox, Luis Fraga, Claudio Fuentes, Edmundo Fuenzalida, Rosana Ginocchio, Sergio Micco, Oscar Muñoz, Veronica Poblete, Herman Pons, Bernardo Subercaseaux, Teresa Valdés

Program Offices: First Floor, Sweet Hall, 590 Escondido Mall
Mail Code: 94305-3089
Phone: (650) 723-3558
Email: study@osp.stanford.edu
Web Site: http://osp.stanford.edu

Courses given in the Overseas Studies Program have subject codes beginning with OSP. For a complete list of subject codes, see Appendix.

The Bing Overseas Studies Program (BOSP) provides opportunities for Stanford students to broaden their undergraduate education through study in another country and immersion in its culture. Regular programs in Australia, Beijing, Berlin, Florence, Kyoto, Moscow, Oxford, Paris, and Santiago offer courses in engineering, humanities, sciences, and social sciences with full Stanford credit. Many courses also count toward major requirements and/or fulfill General Education Requirements. Students may enroll for one or more quarters at most locations. Academic or paid internships are available at the Berlin, Florence, Kyoto-SCTI, Moscow, Paris, and Santiago programs. Research opportunities are available in various formats at different centers. Minimum academic and language prerequisites are specific to each program. See http://osp.stanford.edu for information on these requirements.

While studying overseas through BOSP, students remain registered at Stanford and pay regular tuition, along with the overseas fee which is based on Stanford room and board rates. Regular financial aid applies, and may be increased to cover additional costs. At most centers, students live in a homestay or with local students.

Overseas Studies also offers a limited number of special programs including, in 2006-07, seven three-week faculty-led seminars at overseas locations.

Overseas Studies, located on the first floor of Sweet Hall, has full-time staff members and student advisers to assist in planning for overseas study. The following information, while accurate at the time of printing, is subject to change. See http://osp.stanford.edu for updated information.

COURSES

(AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

International Relations has approved a number of Overseas Studies courses for major credit; these are listed in the “International Relations” section of this bulletin.

AUSTRALIA

OSPAUSTL 10. Coral Reef Ecosystems — (Same as BIOSCI 109Z, CEE 168X, EARTHSYS 120X, HUMBIO 111X.) Key organisms and processes, and the complexity of coral reef ecosystems. Students explore the Great Barrier Reef from the southern end which demonstrates the physical factors that limit coral reefs, to the northern reef systems which demonstrate key aspects of these high biodiversity ecosystems. Human-related changes. Emphasis is on research experiences and development of analytical skills. Two units only counted for Biological Sciences major.

GER:DB-EngrAppSci
3 units, Aut (Ward, S; Fine, M; Anthony, K)
OSPBEIJ 20. Coastal Resource Management — (Same as BIOSCI 110Z, CEE 168Y, EARTHSYS 121X, HUMBIO 112X.) Problem solving, research, communication, teamwork, and social assessment skills in sustainable coastal zone management. Issues include: ecosystem functions and values at risk under the proposed development in case study; environmental outcomes most desirable for the local stakeholders and how these are defined; features of the human communities and their function as they relate to the management options; tools or mechanisms for a sustainable management outcome. Taught by multidisciplinary team that includes Australian and developing country experts. Two units only counted for Biological Sciences major. GER:DB-EngrAppSci

3 units, Aut (Johnstone, R; Chiffings, T)

3 units, Aut (Pole, M; Duke, N)

OSPBEIJ 40. Australian Studies — Introduction to Australian society, history, culture, politics, and identity. Social and cultural framework and working understanding of Australia in relationship to the focus on coastal environment in other program courses. Field trips.

3 units, Aut (Crofty, M)

OSPBEIJ 50. Targeted Research Project — Prior to arriving in Australia, students establish a link with University of Queensland faculty to develop project ideas that combine personal interests and career goals with opportunities presented by the Australian Coastal Studies program, such as how mangrove roots find sediment rich zones of the shore, or the dynamics of ecotourism in southern and northern coastal Queensland. Project report and presentation in Australia.

4 units, Aut (Pole, M)

BEIJING

OSPBEIJ 11. Chinese Society in the Post-Mao Era — (Same as SOC 118S.) The rapid changes that have transformed urban and rural China since the early 80s. Topics: agricultural reform, migration and unemployment, poverty and wealth, inequality, the new middle class and business elite, and social conflict. Research paper on one of these topics. GER: EC-GlobalCom

5 units, Aut (Walder, A)

5 units, Aut (Zhu, T)

OSPBEIJ 21. History of Science and Technology in China — (Same as HPS 105V, STS 127V.) Characteristics and development of science in China in contrast to science that originated from Greek tradition. History of mathematics, astronomy, alchemy, and medicine in traditional China; social background of Chinese achievements in science and their impact on Chinese society and the World; intercourse between China and the West in science. GER:DB-EngrAppSci, EC-GlobalCom

4 units, Aut (Zhu, T)

OSPBEIJ 22. Language, Culture, and Meaning: Understanding Human Cognition in a Crosscultural Context — (Same as LINGUIST 165.) Introduction to cognitive linguistics including conceptual metaphor, metonymy, image schemas, frame semantics, and mental spaces. Theorists and empirical investigations. Using Beijing as an example, how cognition and culture interact, how all human beings are cultural, and how culture and language influence behaviors and expectations. GER:DB-SocSci, EC-GlobalCom

4 units, Aut (Patent, J)

OSPBEIJ 23. China’s Red Guard Movement, 1966-68 — (Same as SOC 115S.) Historical description of the origins and course of the student Red Guard movement during China’s Cultural Revolution. Broader issues about this period of Chinese history and features of Chinese society that made these events possible. Readings from social scientists; documentary and feature films. Simulation project with students adopting roles of university students in 1966. GER:EC-GlobalCom

5 units, Aut (Walder, A)

OSPBEIJ 25. Language, Culture and Thought — (Same as LINGUIST 167.) Principles of cognitive linguistics, including conceptual metaphor, metonymy, image schemas, frame semantics, and mental spaces. How cognition and culture interact through observation of everyday Beijing life; how culture influences behaviors and expectations. GER:DB-SocSci

4 units, Spr (Patent, J)

OSPBEIJ 34. Urbanization and Land-Use Change in China — (Same as EARTHSYS 139X, GES 136, URBANST 158V.) Globalization, decentralization, rural to urban migration, economic restructuring, and implications for continued economic development, social and political character, and environmental health and sustainability. Field trips to newly developed communities of Beijing; discussions with urban planners, mayors, factory managers, and developers.

4 units, Spr (Seto, K)

OSPBEIJ 35. China’s Environment and Prospects for Sustainability — (Same as EARTHSYS 137X, GES 135, URBANST 159V.) Environmental regulatory efforts and the relationship between the natural environment and economic development. Topics: air and water pollution, land use, energy, and greenhouse gases. Focus is on the concept of sustainability: sustainable resource use, sustainable development, and cultural sustainability. Field trips to power plants and factories; discussions with government officials.

4 units, Spr (Seto, K)

OSPBEIJ 44. Discovering Modern Chinese History in Beijing — (Same as HISTORY 194V.) From 1840 to the present. Focus is on Beijing as China’s political, economic, and cultural center. Latter part of the Qing dynasty as the root of China’s backwardness and Chinese elites’ initial efforts at self-strengthening; struggles of Chinese politicians and intellectuals to find a path to modernism; China’s peaceful rise during the reform eras. Field trips to historical sites in Beijing. GER:DB-SocSci, EC-GlobalCom

4 units, Spr (Zhao, D)

5 units, Spr (Plum, M)

5 units, Aut (Zhu, T)
CHINESE LANGUAGE PROGRAM

OSPBEIJ 2. Second-Year Modern Chinese—(Same as CHINLANG 21C.)  
5 units, Aut (Li, H)

OSPBEIJ 9. Chinese Language Tutorial—(Staff)  
2 units, Spr (Staff)

BERLIN

OSPBER 15. Shifting Alliances? The European Union and the U.S.—(Same as POLSCI 245P) The development of European integration, a model for global security and peace, and a possible replacement for the U.S. position as unilateral superpower. Competing arguments about the state of transatlantic relations. GER:DB-SocSci, EC-GlobalCom  
5 units, Win (Braeckner, U)

OSPBER 17. Split Images: A Century of Cinema—(Same as ARTHIST 163Y) 20th-century German culture through film. The silent era, Weimar, and the instrumentalization of film in the Third Reich. The postwar era: ideological and aesthetic codes of DEFA, new German cinema, and post-Wende filmmaking including Run Lola Run and Goodbye Lenin. Aesthetic aspects of the films including image composition, camera and editing techniques, and relation between sound and image. GER:DB-Hum, EC-GlobalCom  
4-5 units, Win (Kramer, K)

OSPBER 30. Berlin vor Ort: A Field Trip Module—The cultures of Berlin as preserved in museums, monuments, and architecture. Cityscape as narrative of its history from baroque palaces to E. German communism, 19th-century industrialism to the Sachsenhausen concentration camp. Competing political agendas and criteria of historical selection in monumentation and removal, renaming streets, and structuring the capital. The interface between sociopolitical life and artistic expression. In German. (AU)  
1 unit, Aut, Win, Spr (Neckenig, F)

3 units, Aut (Hannah, D)

OSPBER 35. Live Art and Performance in Berlin—(Same as DRAMA 158F) Aesthetics and politics of contemporary performance. How contemporary practitioners of theater, performance art, and dance in Berlin explore new interart forms, relationships to audiences, ways to represent reality, and ways to collapse the difference between representation and reality. Field trips to live events.  
3 units, Win (Fordyce, E)

OSPBER 37. Web Projects—Plan and develop a multimedia web project based on academic work associated with a concurrent course. Prerequisite: knowledge of web design or preparation on home campus.  
1 unit, Aut, Win, Spr (Staff)

OSPBER 38. Research Module—For continuing students. Research under the guidance of a local specialist in libraries, archives, research institutes, and/or in the field. Prerequisite: GERGEN 177A.  
3-4 units, Win, Spr (Staff)

OSPBER 44. Postwar German Art in Berlin Collections—(Same as ARTHIST 170Y) Art of established international German artists such as Joseph Beuys, Anselm Kiefer, and Sigmar Polke, and younger practitioners. Relationship of artmaking to historical forces. Issues surrounding public memorials. How conditions of post-Wende Berlin impact artists who work there. Field trips to collections, including the Marx Collection, Neue Nationalgalerie, Martin-Gropius-Bau, Flick Collection, and the Kunst-Werke Institute for Contemporary Art, and to contemporary art exhibitions in commercial galleries such as Deutsche Guggenheim and D.A.A.D.  
3 units, Aut (Hannah, D)

OSPBER 45. Computers, Ethics, and Social Responsibility—(Same as CS 201X) Ethical and social issues related to the development and use of computer technology. Ethical theory, and social, political, and legal considerations. Scenarios in problem areas: privacy, reliability and risks of complex systems, and responsibility of professionals for applications and consequences of their work. Prerequisite: 106A or equivalent. WIM  
3-4 units, Spr (Roberts, E)

OSPBER 55. Filmed Experience: Berlin at Eye-Level—(Same as FILMSTUD 133Y) Students produce short documentary or experimental videos arising from experiences and course work in Berlin. Screenings of films made in Berlin to develop awareness of the practical side of filmmaking: narration; camera angles; editing; equipment; and shooting schedules.  
5 units, Spr (Maerker, C)

OSPBER 66. Theory from the Bleachers: Reading German Sports and Culture—(Same as SOC 158S) German culture past and present through the lens of sports. Intellectual, societal, and historical-political contexts. Comparisons to Britain, France, and the U.S. The concepts of Körperkultur, Leistung, Show, Verein, and Haltung. Fair play, the relation of team and individual, production and deconstruction of sports heroes and heroines, and sports nationalism. Sources include sports narrations and images, attendance at sports events, and English and German texts.  
3 units, Win (Junghauns, W)

OSPBER 77. Wotan’s Demise: Discourses of the Threatened Environment in Historical Perspective—(Same as GERGEN 173) Wagner’s Ring as a parable for the dichotomy in German political, cultural, and social discourse from industrialization to the globalized present: organic, nature-respecting, sustainable development versus an alienated, nature-denying, destructive mechanization of the earth. Can globalization be green as currently discussed in the context of the Kyoto Protocol?  
4-5 units, Spr (Tempel, S)

OSPBER 88. Fascism: How Can it Happen?—How could a nation that seemed civilized and forward-looking descend into barbarism? What are the forces that led so much of Europe in that direction? Could it happen again anywhere in the world?  
3 units, Spr (Roberts, E)

OSPBER 101A. Contemporary Theater—(Same as DRAMA 101A, GERLIT 195) Texts of plays are supplemented by the theoretical writings of the respective playwrights and background reading in theater history and theory. Weekly theater trips, a tour of backstage facilities, attendance at a rehearsal, and discussions with actors, directors, or other theater professionals. In German. GER:DB-Hum  
5 units, Spr (Kramer, K)

OSPBER 105V. Industry, Technology, and Culture, 1780-1945—(Same as HISTORY 105V, STS 120V) From the steam engine to the modern factory, the engineer emerges as the hero of the innovative and the new in the modern world. The dialectical relationships among material, intellectual, and social culture using the example of modern materials, transport, and communications systems, the micro- and macrocosms discovered in physics, chemistry, and astronomy, and the revolutionizing influence of photography, film, and TV. GER:DB-Hum  
4 units, Win (Neckenig, F)
4 units, Spr (Neckenig, F)

OSPBER 115X. The German Economy: Past and Present. (Same as ECON 115X, POLISCI 111P.) The history of the German economy in: the Wilhelmine Empire, the Weimar Republic, the Third Reich, the postwar real socialism of the GDR, and the free market economy of the FRG. The processes of economic transition since unification and the current challenges faced by united Germany as Europe’s first economic power and the world’s second largest export nation. GER:DB-SocSci, EC-GlobalCom
4-5 units, Aut (Klein, I)

OSPBER 117V. The Industrial Revolution and its Impact on Art, Architecture, and Theory. (Same as ARTHIST 141Y, STS 117V.) The interlinking of architecture and painting with technological and scientific development. In a period of industrial revolution, the dominance of positivist thinking and empirical methods promotes in the cultural and artistic realm a response of euphoric acceptance or emphatic rejection. Artwork as a social, cultural, and spiritual symbol is a response to scientific and technological development, yet claims timeless validity. Topics: frictions between idealism and realism, photography and painting, historicism and functionalism, expression and dadaism, futurism and new sobriety, functionalism and Nazi classicism. GER:DB-Hum
5 units, Aut (Neckenig, F)

4-5 units, Aut, Win (Brueckner, U)

OSPBER 161X. The German Economy in the Age of Globalization. (Same as ECON 161X.) Germany’s role in the world economy: trade, international financial markets, position within the European Union; economic relations with Eastern Europe, Russia, the Third World, and the U.S. International aspects of the economic and environmental policies of the Red-Green Coalition Government. The globalization of the world’s economy and Germany’s competitiveness as a location for production, services, and R&D, focusing on the German car industry. GER:DB-SocSci, EC-GlobalCom
4-5 units, Win (Klein, I)

OSPBER 174. Sports, Culture, and Gender in Comparative Perspective. (Same as GERGEN 174.) Theory and history of mass spectator sports and their role in modern societies. Comparisons with U.S., Britain, and France; the peculiarities of sports in German culture. Body and competition cultures, with emphasis on the entry of women into sports, the modification of body ideals, and the formation and negotiation of gender identities in and through sports. The relationship between sports and politics, including the 1936 Berlin Olympic Games. GER:DB-SocSci, EC-Gender
5 units, Spr (Jungmanns, W)

OSPBER 177A. Culture and Politics in Modern Germany. (Same as GERGEN 177A.) Key paradigms of modern Germany: German romanticism, the belated state and national identity, National Socialism and the Holocaust, Germany divided and unified. Literary, analytical, and theoretical texts; newspaper articles; film and TV; oral history. GER:DB-SocSci, EC-Gender
4-5 units, Aut (Kramer, K)

OSPBER 178. European Modernism and the International Avant Garde, 1895-1945. (Same as ARTHIST 145Y.) How modern and avant garde artists have interrogated the nature of signification; and the avant garde’s relationship to revolutionary politics. Matisse’s Fauvism and Picasso’s Cubism in Paris, German Expressionism, Italian Futurism, De Chirico, Morandi, Pittura Metafisica, Berlin Dada, Mondrian and de Stijl in the Netherlands, Suprematism and Russian Constructivism, and Surrealism in 30s Paris. Field trips to Bologna and Venice.
5 units, Aut (Gough, M)

OSPBER 22B. BerlinerGeschichte(nz): Second-Year German. (Same as GERLANG 22B.) Readings in history, literature, politics, and economics.
5 units, Aut, Win, Spr (Friesel, D)

OSPBER 100B. Aktives Deutsch. (Same as GERLANG 100B.) Required for students enrolled in GERLANG 3B; open to students in other German language classes. Active use of German, including vocabulary from a variety of fields and disciplines, and discussion of current issues.
2 units, Aut, Win, Spr (Keller, J)

ON VIDEOTAPE

OSPBER 40B. Introductory Electronics. (Same as ENGR 40B.) GER:DB-EngrAppSci
5 units, Aut, Win, Spr (Staff)

FLORENCE

OSPFLOR 10. From Galileo to Fermi: Five Italian Physicists Who Changed the World. (Same as BIOPOL 120P.) Perspectives on environmental problems and international legal responses. The divide between European countries and the U.S. on global environmental problems, emphasizing global warming, sustainable development, and the greening of international trade. GER:DB-SocSci, EC-GlobalCom
4 units, Spr (Quake, S)

OSPFLOR 11. Global Environmental Problems. (Same as PUBLPOL 120P.) Opposite of Galileo to Fermi: How modern and avant garde artists have interrogated the nature of signification; and the avant garde’s relationship to revolutionary politics. Matisse’s Fauvism and Picasso’s Cubism in Paris, German Expressionism, Italian Futurism, De Chirico, Morandi, Pittura Metafisica, Berlin Dada, Mondrian and de Stijl in the Netherlands, Suprematism and Russian Constructivism, and Surrealism in 30s Paris. Field trips to Bologna and Venice.
5 units, Aut (Gough, M)

OSPFLOR 22. Investigating Culture: An Introduction to Cultural Anthropology. (Same as CASA 101.) How anthropologists approach the study of culture. Theories of culture, methods of analysis, and investigatory strategies. Concepts and methods for reflecting on personal ideas about culture, society, and the individual. Integration of theory and practice. Readings in cultural anthropology and Italian culture and society; ethnographic exercises to explore daily life in Florence.
5 units, Win (Yanagisako, S)
OSPFLOR 25. Technology and Art: Conservation, Crime, and Copies—(Same as BIOE 170.) How modern technologies such as lasers, mass spectrometry, and genetic engineering are used in the art world to restore great works of art, verify authenticity, and create reproductions. 4 units, Spr (Delp, S, Quake, S)

OSPFLOR 29. Extreme Drawing—(Same as ARTHIST 147Y.) Modern and contemporary drawings by artists and architects emphasizing the role of drawing in the projection of revolutionary urban environments and social spaces, and transgression of the medium’s traditional constraints. European emphasis with focus on Italian exemplars: the utopian 10s and 20s, and the dystopian 50s through 70s. Studio and museum visits. 5 units, Aut (Gough, M)

OSPFLOR 33. The Americanization of Italy—(Same as HISTORY 238V.) How cultural and social patterns from the U.S. shape everyday life in contemporary Italy. Popular culture and consumer culture as vehicles of penetration; role of supermarkets, malls, and new patterns of consumption. Are American models accepted or changed according to Italian culture? How global and local interact in this cultural encounter. 4 units, Win (Scarpellini, E)

OSPFLOR 41. The Contemporary Art Scene in Tuscany: Theory and Practice—(Same as ARTSTUDI 147Y.) The ever-changing and multifaceted scene of contemporary art through visual and sensorial stimulation. How art is thought of and produced in Italy today. Hands-on experience. Sketching and exercises on-site at museums and exhibits, plus workshops on techniques. GER:DB-Hum 3-5 units, Aut (Rossi, F)

OSPFLOR 42. Academic Internship—Mentored internships in banking, education, the fine arts, health, media, not-for-profit organizations, publishing, and retail. May be repeated for credit. (Campani.) 1-5 units, Win, Spr (Campani, E)

OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition—(Same as ARTHIST 113Y.) The city’s art and theories of how art should be presented. The history and typology of world-class collections. Social, economic, political, and aesthetic issues in museum planning and management. Collections include the Medici, English and American collectors of the Victorian era, and modern corporate and public patrons. GER:DB-Hum 4 units, Win (Verdon, T; Rossi, F)

OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema—(Same as ARTHIST 160Y, COMM 53, ITALGEN 191F, HISTORY 235V.) Structural and ideological attributes of narrative cinema, and theories of visual and cinematic representation. How film directors have translated history into stories, and war journals into visual images. Topics: the role of fascism in the development of Italian cinema and its phenomenology in film texts; cinema as a way of producing and reproducing constructions of history; film narratives as fictive metaphors of Italian cultural identity; film image, ideology, and politics of style. GER:DB-Hum 5 units, Win (Campani, E)

OSPFLOR 52. The Euro, the Dollar, and the Developing Countries in a World of Globalization—(Same as ECON 130X.) Operation of exchange networks that link countries and deliver outcomes, positive or negative. Free-market, free-trade, laissez-faire framework: the case of globalization with the dollar as the main instrument of financial intermediation; and the case of EU regionalization with the euro as the main instrument. Operational approach to the economic outcomes of these forms of globalization. GER:DB-SocSci, EC-GlobalCom 5 units, Spr (Yostopoulos, P)

OSPFLOR 54. High Renaissance and Maniera—(Same as ARTHIST 112Y, ITALGEN 150F.) The development of 15th- and early 16th-century art in Florence and Rome. Epochal changes in the art of Michelangelo and Raphael in the service of Pope Julius II. The impact of Roman High Renaissance art on masters such as Fra’ Bartolomeo and Andrea del Sarto. The tragic circumstances surrounding the early maniera: Pontormo and Rosso Fiorentino and the transformation of early Mannerism into the elegant style of the Medicean court. Contemporary developments in Venice. GER:DB-Hum 5 units, Spr (Verdon, T)

OSPFLOR 55. Academy of Fine Arts: Studio Art—(Same as ARTSTUDI 198F.) Courses through the Academia delle Belle Arti. Course details upon arrival. Minimum Autumn and Winter Quarter enrollment required: 1-3 units in Autumn. May be repeated for credit. 1-5 units, Aut, Win, Spr (Staff)

OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality, and the Image—(Same as FEMST 135F, ITALGEN 135F.) Film in the social construction of gender through the representation of the feminine, the female, and women. Female subjects, gaze, and identity through a historical, technical, and narrative frame. Emphasis is on gender, identity, and sexuality with references to feminist film theory from the early 70s to current methodologies based on semiotics, psychoanalysis, and cultural studies. Advantages and limitations of methods for textual analysis and the theories which inform them. Primarily in Italian. GER:DB-Hum, EC-Gender 4 units, Spr (Campani, E)

OSPFLOR 68. Italian Politics Between Europe and the Mediterranean—(Same as POLISCI 123P.) How and why a country’s internal and external geopolitical aspects are related to each other. How Italy’s European membership and Mediterranean position complement each other in reshaping fundamental aspects of Italian domestic and foreign policy. GER:DB-SocSci 5 units, Win (Morlino, L)

OSPFLOR 71. Becoming an Artist in Florence: Contemporary Art in Tuscany and New Tendencies in the Visual Future—(Same as ARTSTUDI 141Y.) Recent trends in art, Italian artistic production, and differences and dialogue among visual arts. Events, schools, and movements of the 20th century. Theoretical background and practical training. Work at the Stanford Center and at museums, exhibits, and out in the city armed with a sketchbook and camera. Emphasis is on drawing as the key to the visual arts. Workshops to master the techniques introduced. GER:DB-Hum 3-5 units, Spr (Rossi, F)

OSPFLOR 77. Italian Politics Between Europe and the Mediterranean—(Same as POLISCI 42P.) Institutional design of EU, forthcoming changes, and comparison of the old and new designs. Interactions between the EU, member states, organized interests, and public opinion. Major policies of the EU that affect economics such as competition or cohesion policies, market deregulation, and single currency. Consequences of the expansion eastwards. The role of institutions as a set of constraints and opportunities for the economic actors; relationships between political developments and economic change in the context of regional integration; lessons for other parts of the world. GER:DB-SocSci 5 units, Aut (Allam, K)

OSPFLOR 79. Migrations and Migrants: The Sociology of a New Phenomenon—(Same as SOC 114S.) Interdisciplinary approach to the study of immigration. Typology of forms of migration through politics put into action by the EU and within single nations. Related cultural and religious questions which elicit symbolic borders, territorialization of cultural identities, and the often spatial differentiation of immigrants and locals. The politics of integration and the instruments necessary to manage it. GER:DB-SocSci, EC-GlobalCom 5 units, Aut (Morlino, L)

OSPFLOR 84. Democratic Quality in the Contemporary World—(Same as POLISCI 43P.) Qualitative and quantitative assessment of the implementation of democracy and human rights worldwide. Theoretical notions related to democratic quality including rule of law, accountability, responsiveness, freedom, and equality. Tools for subversion, how political elites developed different modes to avoid responsibility and responsiveness in political activities. Case studies such as the post-communist countries or the Arab world, including assessment of democracy in the area. Assessment of American democracy. GER:DB-SocSci 5 units, Spr (Morlino, L)
OSPFLO 94. Photography in Florence — (Same as ARTSTUDI 70Y.) The functioning of the camera, exposure, and b/w film processing and printing. Emphasis is on perceptive imagery and the development of technical proficiency. 35mm camera required. Limited enrollment.

4 units, Win (Loverme, C)

4 units, Win (Vierucci, L)

OSPFLO 99. Form and Function: Anatomy and Biomechanics of Italian Renaissance Art — (Same as BIOE 80.) Anatomy, physiology, and biomechanics: how human beings and animals move. How knowledge of anatomy and physics gained during the Renaissance changed the way human form and movement were depicted in art. Student project.

4 units, Spr (Delp, S)

OSPFLO 106V. Italy: From Agrarian to Postindustrial Society — (Same as HISTORY 106V, POLISCI 145P.) Italian history from the Risorgimento to the present. Society, crises, evolution, values, and the relation to the political institution in different periods. The ideologies, political doctrines, and historical events which contributed to the formation of modern Italy’s predominant subcultures: Catholic and Socialist. In Italian. GER:DB-SocSci, EC-GlobalCom

4 units, Aut (Mammarella, G)

OSPFLO 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence — (Same as ARTHIST 111Y.) Lectures, site visits, and readings reconstruct the circumstances that favored the flowering of architecture, sculpture, and painting in Florence and Italy, late 13th to early 16th century. Emphasis is on the classical roots; the particular relationship with nature; the commitment to human expressiveness; and rootedness in the real-world experience, translated in sculpture and painting as powerful plasticity, perspective space, and interest in movement and emotion. GER:DB-Hum

4 units, Win (Verdon, T)

OSPFLO 134F. Modernist Italian Cinema — (Same as ARTHIST 161Y, ITALGEN 134F, STS 125V.) As the embodiment of modernity, cinema develops in the wake of modernism proper, but can be understood as one of its technological and aesthetic expressions. Topics: cinema’s archaeology in Futurist texts and theories with their nationalistic political flavor and their iconoclastic, radical, and interdisciplinary rethinking of the language and form of all the arts (Mannetti, Pirandello, D’Annuzio). GER:DB-Hum

5 units, Aut (Campani, E)

ITALIAN LANGUAGE PROGRAM

OSPFLO 35. Second-Year Italian, First Quarter — (Same as ITAL-LANG 21F.) Review of grammatical structures; grammar in its communicative context. Listening, speaking, reading, and writing skills practiced and developed through authentic material such as songs, newspaper articles, video clips, and literature. Insight into the Italian culture and crosscultural understanding.

4 units, Aut, Win, Spr (Quercioli, F)

OSPFLO 37. Second-Year Italian, Second Quarter — (Enroll in ITALLANG 22F.) Grammatical structures, listening, reading, writing, speaking skills, and insight into the Italian culture through authentic materials. Intermediate to advanced grammar. Content-based course, using songs, video, and literature, to provide cultural background for academic courses.

4 units, Win (Quercioli, F)

OSPFLO 66. Advanced Italian Conversation — (Enroll in ITAL-LANG 31F.) Refine language skills and develop insight into Italian culture using authentic materials. Group work and individual meetings with instructor.

4 units, Aut, Win, Spr (Quercioli, F)

KYOTO (STANFORD CENTER FOR TECHNOLOGY AND INNOVATION)

OSPKYOTO 21. Research Project — Independent research projects on significant aspects of Japanese culture, society, or public policy. Students interested in developing the project as a web page should take a home campus class on creating web pages or have equivalent experience.

2-3 units, Spr (Staff)

OSPKYOTO 24. Japan in Contemporary International Affairs — (Same as POLISCI 211P.) From the Meiji period to the present. WW II and its legacy as an issue in contemporary international relations; the transformation of the security environment and post-cold war Japanese diplomacy. Historical, strategic, political, economic and cultural dimensions of Japan’s foreign relations with other Asian nations and the U.S. GER:DB-SocSci

5 units, Spr (MacDougal, T)

OSPKYOTO 28. Kyoto: History of Urban and Architectural Space — (Same as ARTHIST 186Y.) Introduction to the culture of Kyoto and the Kansai area through the built environment and its historical and cultural background. Representative building styles of major periods of Japanese history, and the development of spatial expression of social status and culture, relation of inside and outside, ambiguity of space, and living with the seasons. GER:DB-Hum

4-5 units, Spr (Langner-Teramoto, B)

OSPKYOTO 35. Environmental Policy Design and Implementation in Japan, China, and the U.S.— (Same as CEE 171X.) Strategies for reducing air and water pollution involving traditional regulations, waste discharge taxes, and marketable permits to pollute. Information transfer programs such as those concerning transfer of environmentally friendly technologies. Interplay between regulators, polluters, and NGOs, and institutional and organizational contexts. How participants in the regulatory process interact, influence each other, and advance change. GER: DB-EngrAppSci

3 units, Spr (Ortolano, L)

OSPKYOTO 215X. The Political Economy of Japan — (Same as ECON 124X, POLISCI 240P.) Institutions and processes in the political organization of economic activity in modern Japan. The interaction of public and private sector institutions in the growth of Japan’s postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, government interaction, and public policy making. The transformation of Japanese industrial policy from the rapid growth of heavy and chemical industries to the promotion of high technology and communications industries. The international, political, and economic ramifications of the structure and importance of Japanese capitalism. GER:DB-SocSci

4-5 units, Spr (Hayashi, T)

JAPANESE LANGUAGE PROGRAM

OSPKYOTO 9K. First-Year Japanese Language, Culture, and Communication B — (Same as JAPANLNG 9K.)

5 units, Spr (Yamada, O)

OSPKYOTO 19K. Second-Year Japanese Language, Culture, and Communication B — (Same as JAPANLNG 19K.)

5 units, Spr (Yamaoka, C)

OSPKYOTO 129K. Third-Year Japanese Language, Culture, and Communication B — (Same as JAPANLNG 129K.)

5 units, Spr (Uemiy, M)
ON VIDEOTAPE
OSPKYOTO 32. Circuits II — (Same as EE 101B.) GER:DB-EngrAppSci
4 units, Spr (Staff)

OSPKYOTO 33. Digital Systems II — (Same as EE 108B.) GER:DB-EngrAppSci
4 units, Spr (Staff)

OSPKYOTO 40K. Introductory Electronics — (Same as ENGR 40K.)
GER:DB-EngrAppSci
5 units, Spr (Howe, R)

MOSCOW
OSPMOSC 57. Social Inequality in Socialist and Post-Socialist Societies — (Same as SOC 109S.)
The extent to which socialist societies eliminated social classes and inequalities in power and material well-being;
the nature of social inequalities in the Soviet era. Inequalities in power and material well-being in post-socialist and other transitional societies
such as China, and post-Soviet and E. European societies. Social inequalities associated with gender, age, nationality, ethnicity, family status, and
economic position. GER:DB-SocSci
3-5 units, Aut (Tuma, N)

OSPMOSC 60. Russian Politics and Institutions in a Comparative Perspective — (Same as POLISCI 118P.)
Historical developments from early periods through the Soviet era. Evolution of the political regime from
Yeltsin to Putin; transformation of political institutions and processes, political culture, and public attitudes.
GER:DB-SocSci, EC-GlobalCom
5 units, Aut (Melville, A)

OSPMOSC 61. Problems and Prospects of Post-Soviet Eurasia — (Same as POLISCI 143P.)
Processes shaping the former Soviet Union or the Commonwealth of Independent States, including Russia and the newly
independent states of Eastern Europe, the South Caucasus, and Central Asia. Economic and political models since the break-up of the USSR.
Changing geopolitics of post-Soviet Eurasia: political regimes, economic development, security, energy relationships, post-Soviet societies, religion,
and globalization. GER:DB-SocSci, EC-GlobalCom
5 units, Aut (Medvedev, S)

OSPMOSC 62. Economic Reform and Economic Policy in Modern Russia — (Same as ECON 120X.)
Reasons and logic for economic transformation, major components of postcommunist economic transformation
doctrine, and results of practical implementation. Mechanisms of economic policy decision making in modern Russia,
and patterns of and alternatives in economic development. GER:DB-SocSci, EC-GlobalCom
5 units, Aut (Maa, N)

OSPMOSC 65. Introduction to 20th-Century Russian History: Patterns and Key Events — (Same as HISTORY 122V.)
International and local contexts; historical stereotypes and myths. Development of Soviet society as the prolongation of the Imperial tradition and part of world history
where Russia used to act as the influential periphery. GER:DB-Hum
5 units, Aut (Kozlov, V)

OSPMOSC 66. Russia's Peoples and Places — (Same as SOC 108S.)
Population processes. Topics: Russia's low fertility and high morbidity and mortality; family patterns; urban growth and change; migration within,
into, and out of Russia; and variations in these phenomena across Russia and among its national subgroups. Consequences for social, economic, and
political life in Russia, and societal problems associated with population characteristics. GER:DB-SocSci
3-5 units, Aut (Tuma, N)

RUSSIAN LANGUAGE PROGRAM
OSPMOSC 10M. Intensive First-Year Russian — (Same as SLAV-LANG 10M.)
9 units, Aut (Boldyreva, T; Kurganova, L)

OSPMOSC 51M. Second-Year Russian — (Same as SLAV-LANG 51M.)
5 units, Aut (Kurganova, L)

OSPMOSC 111M. Third-Year Russian — (Same as SLAV-LANG 111M.)
5 units, Aut (Filatova, G)

OSPMOSC 177M. Fourth-Year Russian — (Same as SLAV-LANG 177M.)
5 units, Aut (Staff)

OXFORD
OSPOXFRD 11. Documentary: Voice and Vision — (Same as FILMSTUD 131Y.)
Focus is on British filmmakers. Films produced in the 30s and 40s under the Empire Marketing Board, the Free Cinema movement
of the 50s, and contemporary documentary approaches. Forms, strategies, and conventions of documentary film. Current theoretical debates and
dilemmas in documentary filmmaking; mutable boundaries of the genre. Film studies and practicum components.
4 units, Aut (Krivitz, J)

OSPOXFRD 15. British Architecture and the Renaissance: 1500-1850 — (Same as HISTORY 132V.)
The influence of classicism and the Renaissance. Insights into European art and architecture and the history of Britain from the Tudor era to the Industrial Revolution. Field trips; joint
study trips to London and Florence. GER:DB-Hum
4-5 units, Win (Tyack, G)

OSPOXFRD 21. The Making of the English Nation, 400-1066 — (Same as HISTORY 112V.)
The Anglo-Saxon period through archaeology, literature, legend, and historical documents. Excavations of the royal burial mounds at Sutton Hoo, Winchester, and Oxford. Literary texts: Bede's
Ecclesiastical History of the English People and Beowulf. Field trips to the British Museum, Winchester, and Oxford. GER:DB-Hum
3 units, Win (Rowley, T)

OSPOXFRD 22. Social Realism in British Film and Literature — (Same as FILMSTUD 130Y.)
Fundamentals of film theory and criticism; how to read a film considering practice and politics, and style and form;
and content as a springboard for analysis. Films that expose social problems related to class, race, drugs, dysfunctional family relationships, and economic conditions such as Nil by Mouth and Trainspotting. Language of film
criticism and analysis. Novelists include Jonathan Coe and Hanif Kureishi.
4 units, Aut (Krivitz, J)

OSPOXFRD 24. British and American Constitutional Systems in Comparative Perspective — (Same as POLISCI124P) Introduction to the study of constitutions and constitutional systems of government. The workings of the British and American systems of government. Comparative study of the most important constitutional issues facing Britain and the U.S. such as how suspected terrorists should be treated in a time of war. How
to think about fundamental constitutional questions. GER:DB-SocSci
4 units, Win (McMahon, R)

OSPOXFRD 25. Jane Austen's England — (Same as ENGLISH 135Z.)
Emphasis is on the significance of place in Northanger Abbey, Sense and Sensibility, Pride and Prejudice, Mansfield Park, Emma, and Persuasion.
Austen's life, historical contexts, and recent film versions. Field trips to Bath and Chawton.
5 units, Win (Rovee, C)

OSPOXFRD 33. The Idea of the Museum: History, Theory, Politics — (Same as ENGLISH 185Z.)
History, theory, and politics of a definitive institution of modernity. Historical rise, role of national museums, the museum’s sacralization of the viewing experience, and questions about art
and authenticity. Related phenomena, such as antiquarian shops, private collections, displays of the domestic interior, industrial exhibitions, waxworks, and Oxford as an open-air museum. Visits to nearby collections.
5 units, Win (Rovee, C)
OSPOXFRD 35. Modern UK and European Government and Politics—(Same as POLISCI 141P.) Background of main political systems in Europe and recent developments in European politics. Topics: Blair’s constitutional reforms; the consequences of the German reunification; Berlusconi’s rise to power in Italy; the extreme right in France and elsewhere; the single currency; the enlargement of the EU; and proposals for a constitution and their recent rejection by the French and Dutch electorates. GER:DB-SocSci
4 units, Aut (Auel, K)

OSPOXFRD 42. Comparative Health Care Systems: UK and U.S.—(Same as HUMBIO 122X.) Differences between UK and U.S. health care systems from modern and historical perspectives. Evolution, current problems, future developments. Case of Canada as point of comparison. Attempts to maximize health gains while controlling costs, one system on the public service ideal, the other on market principles. Social, cultural, and ethical issues related to the development of health care systems; opportunities to interact with NHS doctors, nurses, and administrators. GER:DB-SocSci
4 units, Win (Senior, J)

OSPOXFRD 44. The Rise of the Novel—(Same as ENGLISH 174X.) The many novels that flooded the literary market throughout the 18th century. Male canonical writers such as Richardson and Fielding, and novels written by women. Topics include satire, sensibility, and the contemporary suspicion of the novel form as morally pernicious. GER:DB-Hum
5 units, Spr (Plaskitt, E)

OSPOXFRD 45. British Postwar Economic Policy—(Same as ECON 131X.) Development of British economic policy making from 1945, focusing on political economy including: ideological motives of governments; political business cycle; and the influence of changing intellectual fashions. Policy areas: attitude to the pound; control of the business cycle; and the role of the state in the economy. Prerequisite: ECON 50.
4 units, Win (Forder, J)

OSPOXFRD 50. British Ethnography and Ethnographies of Britain—(Same as ANTHSCI 171X.) British culture through the lens of ethnography. Ethnographic methodology as established by British schools of sociology and social anthropology. Works of seminal British ethnographers, many from Oxford. Themes of socioeconomic class, symbolic belief systems, identity politics, and Britain’s popular subcultures of style. Individual field projects involving participant-observation among Oxford’s communities.
5 units, Spr (Barrett, R)

OSPOXFRD 55. The British Healthcare System—(Same as ANTHSCI 101X.) Britain’s National Health Service and its traditions of English medicine, through the framework of medical anthropology. Medicine and public health in Britain from the 18th century to present. Strengths and challenges of NHS; political and health parameters of current reforms. Comparison of NHS to other public and private healthcare systems around the world. Guest lecturers; field trips to clinics and public health settings.
5 units, Spr (Barrett, R)

OSPOXFRD 65. Oxford: The City as a Work of Art—Oxford’s role as patron of British art, architecture, and design from the 13th century to the present. Themes in the history of art, architecture, and design: medieval and gothic, renaissance, classical, modern and postmodern. Resources such as university and college buildings, museums, galleries, and private collections. The roles of patronage and collecting; the functioning of the arts.
2 units, Aut, Spr (Chance, H)

OSPOXFRD 70. The History of London—(Same as HISTORY 138V.) London’s physical growth, emphasizing characteristics which set it apart from other capitals, and its economic, social and political development, including the problems of poverty and the inner city, the provision of public services, and the growth of suburbs and public transport. Challenges facing London in modern times. Walking tours, especially less frequented areas. GER:DB-SocSci
5 units, Spr (Tyack, G)

OSPOXFRD 98. Creative Writing Workshop—Selection and combination: poetic language; metaphor and cohesion; setting and the pathetic fallacy; sentence variety; genres; dialogue; point of view; narrative positions; colors and senses; time management; plotting. Limited enrollment based on writing sample.
3 units, Aut, Win, Spr (Kidd, H)

OSPOXFRD 114Z. Close Readings in English Literature, 1509-1642—(Same as ENGLISH 114Z.) From the beginning of Henry VIII’s reign to the onset of the Civil War, excluding Shakespeare. The poetry, prose, and drama of the period in their literary, cultural, and historical contexts. Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine’s undergraduates. GER:DB-Hum
5 units, Aut (van Es, B)

OSPOXFRD 116Z. Close Readings in English Literature, 1642-1740—(Same as ENGLISH 116Z.) From the Civil War to the middle of the 18th century. The poetry, prose, and drama of the period in their literary, cultural, and historical contexts, and key texts. Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine’s undergraduates. GER:DB-Hum
5 units, Win (Bullard, P)

OSPOXFRD 117V. Social Change in Modern Britain—(Same as SOC 117V.) Changes in the social institutions, attitudes, and values in Britain over the past 20 years. Social changes occurring as a consequence of the Thatcher years of government. Changes to the British economy, the welfare state, National Health Service, the education system, the criminal justice system, gender relations, marriage, divorce, reproduction, and the family. The consequences in terms of British competitiveness, income distribution, wealth and poverty, social class, health and illness, educational attainment and skills development, crime, and family life. GER:DB-SocSci
4 units, Spr (Palmer, A)

OSPOXFRD 141V. European Imperialism and the Third World, 1870-1970—(Same as HISTORY 141V, POLISCI 148P.) European imperialism from its zenith in the late 19th century to the era of decolonization after WW II. The effects of Western imperialism in the Third World. The legacy of imperialism and decolonization to the modern world. GER:DB-SocSci
5 units, Spr (Darwin, J)

OSPOXFRD 154Z. Romantic Literature, 1740-1832—(Same as ENGLISH 154Z.) Restricted to students majoring in English and related subjects. Taught jointly for Stanford and second-year St. Catherine’s undergraduates. Authors include William Collins, Thomas Gray, and John Keats. GER:DB-Hum
5 units, Spr (Plaskitt, E)

OSPOXFRD 163X. Shakespeare: Critical Commentary—(Same as ENGLISH 163X.) For English majors or minors only. Topics include the use of soliloquy, epilogues, alteration of prose and verse, rhetoric, meta-theatricality. Close reading technique. Taught jointly with students from St. Catherine’s College. GER:DB-Hum
5 units, Aut (Groves, B)

PARIS
OSPPARIS 11. Cultures of Violence in 20th-Century Europe—(Same as HISTORY 237V.) Political, social, and cultural factors that made the 20th century the most violent in human history. Diplomatic, political, and social uses of, and the intellectual and cultural responses to violence. How men and women have witnessed, coped with, and survived violent episodes. Cases studies of state violence, and ethnic and religious conflict. Colonialism, WWI, the Holocaust, and decolonization. GER:DB-SocSci
5 units, Win (Daughton, J)

OSPPARIS 22. Immigration in France—(Same as SOC 115S.) Emphasis is on West African immigration. Historical, statistical, legal, and political perspectives. Living conditions of immigrants and their children. Ethnographic observations or interviews on a group-defined topic. GER:DB-SocSci
4 units, Spr (Maurer, S)
OSPPARIS 25. Literature and the City — (Same as FREN Lit 178 FS.) Subtle and hidden aspects of Paris through the eyes of France’s greatest writers, poets, and philosophers including Balzac, Baudelaire, Zola, and Aragon. Essays, poems, and novels that portray the historical, social, and political reality of the city better than textbooks or guides. GER: DB-Hum
4 units, Aut (Guyot, S)

OSPPARIS 30. Statistical Thinking — (Same as STATS 30.) Origins of probabilistic reasoning and its rapid development by French scientists during the 18th and 19th centuries. Games of chance and Bernoulli’s binomial probabilities. Laplace’s rules of statistical interference, Poisson’s probability models for rare events, and Gauss’s laws for measurement errors and the bell-shaped curve. Original sources and modern interpretations. GER: DB-Math
3 units, Aut (Switzer, P)

OSPPARIS 51. The Ancient World at the Louvre — Illustrated lectures and visits to the Louvre. History, art, and cultures of ancient civilizations and the archaeological background of excavations. Mesopotamia (Sumer, Babylon, Assur, Anatolia); Egypt; the classical world (Greece, Etruscans, Rome); Iran; and the Syro-Palestinian coast. What accounts for the greatness, and the rise and decline of these cultures? How are achievements transmitted to successor cultures? GER: DB-Hum
4 units, Spr (Katchadourian, H)

OSPPARIS 52. Erotic Art and Literature in 18th-Century France — (Same as HUMBio 177X.) Origins of Western erotic art in the Classical period and revival during the Renaissance, with overview of 18th-century France and cultural context for its art and literature. Authors include Watteau, Boucher, and Fragonard; authors include Prevost, de Laclos, and de Sade. What these works meant then and now; comparison with the American experience since the 60s and modern views on erotic art and pornography. GER: DB-Hum
3 units, Spr (Katchadourian, H)

OSPPARIS 55. The History and Legacy of French Imperialism, 1830-Present — (Same as HISTORY 236V.) The significance of colonialism and decolonization on the formation of the French nation and contemporary world politics. The history of French involvement in Algeria, W. Africa, and Indochina; the legacy of the colonial past in contemporary France, where people from the former empire populate French cities and shape French politics and culture. Sources include histories, memoirs, political treatises, and fiction. GER: DB-SocSci
5 units, Win (Daughton, J)

OSPPARIS 57. Human Rights in Comparative Perspective — (Same as POLISCI 143P.) Human rights arose from Enlightenment principles but their status in the American and French constitutions differ. Have European court decisions created a transatlantic human rights model giving more weight to Anglo-Saxon legal tradition? Philosophical, historical, and legal resources; recent case studies from both sides of the Atlantic. GER: DB-SocSci, EC-GlobalCom
4-5 units, Spr (Remy-Granger, D)

OSPPARIS 61. Paris by Numbers — (Same as STATS 99.) Parisian demographic trends over the past 100 years. Small teams assemble and interpret statistical sources of demographic change. Sample surveys as a means of learning about present-day Paris. Principles of survey design. Students design and execute small-scale surveys combining practical limitations in the Parisian environment and contact with respondents.
2-4 units, Aut (Switzer, P)

OSPPARIS 81. France During the Second World War: Between History and Memory — (Same as HISTORY 139V.) French politics and society from the causes of the collapse of the French Third Republic and the emergence of the French State at Vichy. The political and cultural measures of this regime in the shadow of Nazi Germany. Anti-Jewish laws and action; deportations by Vichy, the Germans, the French Fascists, and reactions to the fate of the Jews. Visions of the Resistance, the combat for liberation, and WW II in the collective memory of France. GER: DB-SocSci
5 units, Aut (Virgili, F)

5 units, Spr (Le Cacheux, J)

4 units, Spr (Halevi, E)

OSPPARIS 107Y. The Age of Cathedrals: Religious Art and Architecture in Medieval France — (Same as ARTHIST 107Y.) The major artistic and cultural movements that changed the face of France from the period of Suger in the 12th century through the reign of St. Louis in the 13th century. Monastic spirituality progressively gave way to an urban culture focused on man and secular knowledge, which developed during and sophisticated building techniques. The years 1150-1250 represented a period of architectural renaissance and l’Ile-de-France was its birthplace. GER: DB-Hum
4 units, Aut (Dereumble, C; Dereumble, J)

OSPPARIS 120X. French Painting — (Same as ARTHIST 123Y.) Changes in artistic aims and the interaction between artist and society throughout the period. Weekly field trips to Paris museums holding paint- ings of David, Ingres, Delacroix, Courbet, Daumier, Manet, Renoir, Monet, Degas, and others. GER: DB-Hum, DB-Hum
4 units, Win (Halevi, E)

OSPPARIS 122X. Europe: Integration and Disintegration of States, Politics, and Civil Societies — (Same as POLISCI 149P.) European integration is now an economic, social, and political reality. This integration has a history of mutation and a transformation of its very foundation. Topics: the evolution of welfare states, elites, political parties, and systems in Europe; lobbies, trade unions, voluntary associations, social movements, popular protest, citizenship, democracy. GER: DB-SocSci
4.5 units, Win (Strudel, S)

OSPPARIS 124X. Building the European Economy: Economic Policies and Challenges Ahead — (Same as ECON 127X.) Issues and challenges of European economic construction. The European Economic Community at the end of the 50s; European industrial, agricultural, social, and monetary economic policies. Topics: wider definitions of Europe, its relations with industrial and developing countries, and its challenges in confronting global economic crises. GER: DB-SocSci
5 units, Aut (Le Cacheux, J)

OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time — (Same as HUMBio 120X, PUBLPOL 111P.) Should health systems be organized or left to the free market? What is the role of the state in the delivery of health care? The evolution of the health profession, health policy, and reform in France and the U.S.; measures restraining professional autonomy such as prescription guidelines in the French Medical Convention. Is the solution to the increase of health expenditures and reduced access to health care the end of autonomy for the medical profession? GER: DB-SocSci
4.5 units, Win (Fessler, J)

OSPPARIS 186F. Contemporary African Literature in French — (Same as AFIRCAAM 186F, FREN Lit 186F.) Focus is on African writers and those of the diaspora, bound together by a common history of slave trade, bondage, colonization, and racism. Their works belong to the past, seeking to save an oral heritage of proverbs, story tales, and epics, but they are also contemporary. GER: DB-Hum, EC-GlobalCom
4 units, Win (Diop, P)
OSPPARIS 211X. Political Attitudes and Behavior in Contemporary France — (Same as POLISCI 241P.) The institutions of the Fifth Republic, the main political forces, and their evolution. Electoral behavior, taking into account other forms of political action such as the demonstrations for the defense of schools (1984) and the lycée students (1990), or the protest that followed the desecration of the Jewish cemetery in Carpentras. Attitudes and values are linked to voting choice. GER:DB-SocSci 4-5 units, Aut (Mayer, N; Muxel, A)

FRENCH LANGUAGE PROGRAM
OSPPARIS 22P. Intermediate French I — (Same as FRENLANG 22P.) 4 units, Aut, Win (Mercier, F), Spr (Molkou, E)
OSPPARIS 23P. Intermediate French II — (Same as FRENLANG 23P.) 4 units, Aut, Win (Maitre, F), Spr (Reychman, P)
OSPPARIS 124P. Advanced French I — (Same as FRENLANG 124P.) 4 units, Aut (Guedon, P)
OSPPARIS 125P. Advanced French II — (Same as FRENLANG 125P.) 4 units, Win (Molkou, E), Spr (Ricci, M)

ON VIDEO TAPE
See the “School of Engineering” section of this bulletin for course descriptions.

OSPPARIS 40P. Introductory Electronics — (Same as ENGR 40P.) GER:DB-EngrAppSci 5 units, Aut, Spr (Staff)

SANTIAGO
OSPSANTG 11. Dance and Culture in Latin America — (Same as DANCE 168.) Dance in its cultural context as a non-verbal form of communication, revealing cultural roots and historical traits. Mexico; the Black Atlantic including Cuba, Brazil, and Puerto Rico; and the Pacific Corridor including Peru, Chile, and Argentina. Ritual dance such as los voladores of Mexico and Candomble of Brazil, social forms such as Cuban dazon and Puerto Rican plena, and national dances including Mexican jarabes, Brazilian samba, Cuban rumba, Argentine tango, and Chilean cueca. Sources include videos, lectures, readings, and field trips. GER:EC-GlobalCom 4 units, Win (Cashion, S)

OSPSANTG 15. Dances of Latin America — (Same as DANCE 42X.) Movement class. Social dances, such as salsa, tejano, banda, samba, Cuban son, Argentine tango, and Chilean cueca. Azacarival dance, Brazilian bloco Afro; and ritual form Mexican matlachines. Social etiquette and gender roles prescribed by the cultural context. Field trips to Santiago nightclub and a festival site. 2 units, Win (Cashion, S)

OSPSANTG 34. Traces of Authority: The City of Santiago de Chile — (Same as URBANST 157V.) Relationships between acquisition, maintenance, and transmission of power in society, and the organization of public space in the city, using Santiago as example. Sources include downtown buildings, maps of the city, and pictures of older buildings. Comparison with American and European cities. GER:DB-SocSci 5 units, Aut (Fuentesalida, E)

OSPSANTG 58. Living Chile: A Land of Extremes — (Same as EARTH-SYS 110X, LATINAM 58X.) Physical, ecological, and human geography of Chile. Perceptions of the Chilean territory and technologies of study. Flora, fauna, and human adaptations to regional environments. Guest lectures; field trips; workshops. GER:DB-EngrAppSci 5 units, Aut, Spr (Ginocchio, R; Poblete, V)

OSPSANTG 62. Topics in Chilean History — (Same as HISTORY 276V.) Main themes of Chilean history: Spanish colonial background; independence in comparative perspective; construction of the republic in the 19th century; actors in the political process; the clash between authoritarian and democratic traditions in the 20th century. How Chileans have viewed their own history through conventional historical accounts, novels, and memoirs. GER:DB-Hum 4-5 units, Aut, Spr (Jaksic, I)

OSPSANTG 68. The Emergence of Nations in Latin America — (Same as HISTORY 275V.) Major themes of 19th-century Latin American history, including independence from Spain, the emergence of nation states, and the development of a new social, political, and economic order. GER:DB-Hum 4-5 units, Win (Jaksic, I)

OSPSANTG 70. Urban Politics in Latin America — (Same as POLISCI 223P.) Has the rise of democracy in Latin America been centered in the evolution of urban politics in its capital cities? The position of cities in the national systems of federalism; formal structure of government; history of urbanization; how city politics affected national politics; and whether the development of civil society and related electoral institutions had its origins in cities and their politics. Cities include Buenos Aires, Caracas, La Paz, Mexico City, and Santiago de Chile. GER:DB-SocSci 5 units, Spr (Fraga, L)

OSPSANTG 72. Language and Prehistory — (Same as ANTHSCI 111X.) Language classification and its implications for human prehistory. The role of linguistic data in analyzing prehistoric populations, cultures, contact, and migrations. Emphasis is on Chile and languages of Latin America. Comparison of linguistic and biological classifications. Reconstruction, proto-vocabularies, and culture. Archaeological decipherment and the origins and evolution of writing. Archaeological and genetic evidence for human migrations. (DA-A; HEP II, III.) 5 units, Aut (Fox, J)

OSPSANTG 104X. Modernization and Culture in Latin America — (Same as ANTHSCI 104X, SPANLIT 290Z.) Intellectual and cultural expressions of Latin American against the background of modernization viewed as a constant tension between rationalization and subjectification, change and identity preservation, and the logic of development or economic expansion and the logic of the culture. Readings include Morande, Cultura y modernización en América Latina and Sarlo, Una modernidad periférica. GER:DB-SocSci, EC-GlobalCom 5 units, Aut (Subercaseaux, B)

OSPSANTG 111. Social Heterogeneity in Latin America — (Same as SOC 111S, SPANLIT 164S.) Latin America is characterized by social heterogeneity and inequality. An interpretation of these phenomena, focusing on the social, ethnic, gender, political, and economic dimensions. Their historical roots and unfolding during the periods of industrialization, the 60s, 70s, and 80s, and the contemporary situation. GER:DB-SocSci 5 units, Aut (Vidélés, T)

OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century — (Same as POLISCI 242P.) Chile’s strides towards becoming a developed country have engendered high levels of alienation and disaffection among significant sectors of the population. The roots of this apparent paradox of modernization, focusing on newly emerging actors in the Chilean political scene: Mapuche organizations, women’s groups, the environmental movement, and new features of the established ones like trade unions and human rights activists. GER:DB-SocSci 5 units, Spr (Correa, G)

OSPSANTG 118X. Artistic Expression in Latin America — (Same as LATINAM 118X, SPANLIT 166S.) Elite, mass-media, and popular cultural changes in Chile under of economic and political liberalization. The reception of cultural meanings from the center of the world social system (U.S., EU, and Japan), reformulation to respond to local conditions, and export in the shape of cultural artifacts. Innovative elements rooted in the regional and local culture. GER: DB-SocSci, EC-GlobalCom 5 units, Win (Albornoz, C)
OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies — (Same as ECON 119X.) The Chilean economy in five stages, taking into account: the international economic position of Chile; internal economic structures closely related to the inherited historical conditions and to the changing international economic position of the country; and the economic strategies prevalent during the period and the concrete development policies conducted by government authorities. GER:DB-SocSci
5 units, Spr (Muñoz, O)

OSPSANTG 129X. Latin America in the International System — (Same as POLISCI 117P) Latin America’s role in world politics, with emphasis on the history of and models for explaining U.S.-Latin American relations. Latin America’s evolving relationship in the international system. GER:DB-SocSci
4-5 units, Win (Fuentes, C)

OSPSANTG 130X. Latin American Economies in Transition — (Same as ECON 129X.) Introduction to the main debates and approaches developed to understand and analyze the economies of Latin America. Recent processes of transition to market economies. Common characteristics among countries of the region; the differences and special traits of individual countries. Historical, analytical, and empirical perspectives on topics at the center of controversies and specific policy problems over several decades. Recommended: ECON 1, 51, and 52. GER:DB-SocSci
5 units, Aut (Di Filippo, A)

OSPSANTG 141X. Politics and Culture in Chile — (Same as LATINAM 141X.) The relationship between politics and culture in Chile during the 20th century, reflecting on the effects of such relationships on esthetics and identity. The possibility that, in Chile, culture has been pulled by politics and social praxis, a condition that has created a deficit in cultural thickness. The oligarchic regime around 1920, the welfare state around 1940, projects of social transformation around 1970, dictatorship around 1980, women writers and Mapuche poetry in contemporary Chile. GER:DB-Hum-Sci
5 units, Spr (Subercaseaux, B)

5 units, Win (Di Filippo, A)

OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective — (Same as LATINAM 221X, POLISCI 243P.) The dynamics of the Chilean transition. Topics: challenges faced by democratic governments in the 90s framed by the legacy of military rule, 1973-90; political culture; institutional traditions of democracy; and the Chilean process within the broader context of Latin American political development. GER:DB-SocSci
5 units, Aut (McCo, S)

SPANISH LANGUAGE PROGRAM

OSPSANTG 125, 13S. Accelerated Second-Year Spanish: Chilean Emphasis — (Same as SPANLANG 12S, 13S.) Intensive sequence integrating language, culture, and sociopolitics of Chile. Emphasis is on achieving advanced proficiency in oral and written discourse including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisites for 12S: one year of college Spanish, or 11 or 21B if taken more than two quarters prior to arriving in Santiago. Prerequisites for 13S: 11 or 21B within two quarters of arriving in Santiago, or 12 or 22B.
12S: 5 units, Aut, Win, Spr (Popp, J)
13S: 5 units, Aut, Win, Spr (Abad, M)

OSPSANTG 33. Spanish Language Tutorial — Prerequisite: two years of college Spanish or equivalent placement.
2 units, Aut, Win, Spr (Pons, H; Abad, M; Popp, J)

OSPSANTG 82. Composition and Writing Workshop for Students in Santiago — (Same as SPANLANG 102S.) Advanced. Writing as craft and process: brainstorming, planning, outlining, drafting, revising, style, fiction, and editing. Non-Spanish majors or minors choose topics related to their studies. Prerequisite: SPANLANG 13C, 13R, 13S, 23B, or equivalent. 3-5 units, Aut, Win, Spr (Bobbert, A)

SPECIAL PROGRAMS

In addition to courses at its established centers, the Overseas Studies Program offers courses in other locations around the world. Additional details can be found at http://osp.stanford.edu.

OSPGEN 62. St. Petersburg and Beyond — (Same as HISTORY 20V.) St. Petersburg’s culture through history, literature, and arts. Field trips to museums, palaces, the ancient city-state of Novgorod, and the monastic retreat on the Island of Valaam in Lake Ladoga. Location: St. Petersburg, Russian Federation.
2 units, Aut (Kollmann, N; Kollmann, J)

OSPGEN 63. Southeast Asia and the Singapore Exception — (Same as URBANST 12X.) Political economies of SE Asia and the special nature of Singapore. Why is this rich and modern city-state not a liberal democracy? Why has Singapore’s wealth not spawned a middle class demanding civil liberties in place of the long-ruling People’s Action Party which keeps winning elections? Location: Singapore.
2 units, Aut (Emmerson, D)

OSPGEN 64. A Decade of Majority Rule: Contested Transitions in South Africa — (Same as HISTORY 45V.) Efforts to transform S. Africa focusing on the space between the broken and the built. Comparative social history and public policy analysis. Three transition arenas: community reconstruction, HIV/AIDS and public health, and education. Location: Cape Town, S. Africa.
2 units, Aut (Samoff, J)

OSPGEN 65. The Pursuit of Peace: From the Enlightenment to the United Nations — (Same as FRENGEN 50G.) Enlightenment theories of tolerance, perpetual peace, popular sovereignty, and general will; focus is on the Geneva philosophers Rousseau and Voltaire. History of major international institutions in Geneva and their relation to Enlightenment ideas: Red Cross, League of Nations, and the UN and subsidiary institutions. Contemporary criticisms of international law and conventions and the viability of Enlightenment ideals in current times. Location: Geneva, Switzerland.
2 units, Aut (Edelstein, D)

OSPGEN 66. Issues of Development in Northern Tanzania — (Same as HUMBIO 55X.) Economic and cultural issues affecting development in northern Tanzania. Health and disease, education and technology, and conservation, tourism and land resource management. Field trips to rural clinics, NGO field sites, Ngorongoro Crater conservation area, and UN facility in Arusha. Location: Arusha, Tanzania.
2 units, Aut (Samoff, J)

OSPGEN 67. Workshop in Shakespearean Production — (Same as DRAMA 129F, ENGLISH 84Z.) Relationships among criticism, production, and performance of Shakespeare. Students attend Shakespeare productions in London and Stratford. Readings of the texts and hands-on experimentation with all phases of theatrical production, including scene work and performance. Location: Oxford, United Kingdom.
2 units, Aut (Friedlander, L)

OSPGEN 68. An Enduring Kyoto — (Same as ANTHSCI 125X, CASA 149.) Kyoto as political and cultural capital of Japan for a thousand years. Social, religious, and political institutions, literature, performing arts, architecture, landscape architecture, kimono, and tea ceremony. Kyoto’s modern transformation since Meiji Restoration. Development of the Kyoto School of philosophy. Location: Kyoto, Japan.
2 units, Aut (Befu, H)
PHILOSOPHY

Emeriti (Professors):  Fred Dretske, Solomon Feferman, Georg Kreisel, David S. Nivison, Patrick Suppes, James O. Urmson

Honorary Emeritus (Professor): Richard Rorty

Chair: Kenneth Taylor

Director of Graduate Study: Michael Bratman

Director of Undergraduate Study: Chris Bobonich

Professors: Michael Bratman, Joshua Cohen, John Etchemendy, Dagfinn Follesdal (Autumn), Michael Friedman (on leave), Helen Longino, Grigori Mints (on leave Spring), Julius Moravcsik (on leave Autumn), John Perry, Kenneth Taylor, Johan van Benthem (Spring), Thomas Wasow, Allen Wood

Associate Professors: Lanier Anderson, Chris Bobonich, Mark Crimmins, Graciela De Pierris, Debra Satz (on leave)

Assistant Professors: Nadeem Hussain (on leave), Agnieszka Jaworska, Krista Lawlor, Marc Pauly, Tamar Schapiro (on leave)

Professor (Research): Rega Wood (on leave Winter, Spring)

Lecturers: Katherine Dunlop, Thomas Ryckman

 Acting Assistant Professor: David Hills

 Courtesy Professors: Reviel Netz, Josiah Ober, Denis Phillips

Visiting Professor: Paolo Mancosu

Visiting Assistant Professors: Luca Ferrero, Jeffrey Seidman

Department Offices: Building 90

Mail Code: 94305-2155

Department Phone: (650)723-2547

Email: philosophy@csli.stanford.edu

Web Site: http://www-philosophy.stanford.edu

Courses given in Philosophy have the subject code PHIL. For a complete list of subject codes, see Appendix.

Philosophy concerns itself with fundamental problems. Some are abstract and deal with the nature of truth, justice, value, and knowledge; others are more concrete, and their study may help guide conduct or enhance understanding of other subjects. Philosophy also examines the efforts of past thinkers to understand the world and people’s experience of it.

Although it may appear to be an assortment of different disciplines, there are features common to all philosophical enquiry. These include an emphasis on methods of reasoning and the way in which judgments are formed, on criticizing and organizing beliefs, and on the nature and role of fundamental concepts.

Students of almost any discipline can find something in philosophy which is relevant to their own specialties. In the sciences, it provides a framework within which the foundations and scope of a scientific theory can be studied, and it may even suggest directions for future development. Since philosophical ideas have had an important influence on human endeavors of all kinds, including artistic, political, and economic, students of the humanities should find their understanding deepened by acquaintance with philosophy.

Philosophy is an excellent major for those planning a career in law, medicine, or business. It provides analytical skills and a breadth of perspective helpful to those called upon to make decisions about their own conduct and the welfare of others. Philosophy majors who have carefully planned their undergraduate program have an excellent record of admission to professional and graduate schools.

The Special Program in the History and Philosophy of Science enables students to combine interests in science, history, and philosophy. Students interested in this program should see the special adviser.

The joint major in Philosophy and Religious Studies combines courses from both departments into a coherent theoretical pattern.

The Tanner Memorial Library of Philosophy contains an excellent working library and ideal conditions for study.

Graduate students and undergraduate majors in philosophy have formed associations for discussion of philosophical issues and the reading of papers by students, faculty, and visitors. These associations elect student representatives to department meetings.

SCHOOL OF HUMANITIES AND SCIENCES

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

There are two ways of majoring in philosophy: the General Program and the Special Program in the History and Philosophy of Science. A student completing either of these receives a B.A. degree in Philosophy. There is also a major program offered jointly with the Department of Religious Studies. To declare a major, a student should consult with the Director of Undergraduate Study and see the undergraduate student services administrator to be assigned an adviser and work out a coherent plan. The department strongly urges proficiency in at least one foreign language.

GENERAL PROGRAM

1. Course requirements, minimum 55 units:
   a) preparation for the major; an introductory course (under 100) and 80. (PHIL 80 should normally be taken no later than the first quarter after declaring the major.) Students taking both quarters of the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track can count 5 units toward the introductory Philosophy requirement.
   b) the core, 24 additional Philosophy units, as follows:
      1) Logic: one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
      2) Philosophy of science: any course from 60, 61, 156, 163-168
      3) Moral and political philosophy: one from 170-173
      4) Metaphysics and epistemology: one from 180-189
      5) History of philosophy: 100 and 102 are required of each major
   c) one undergraduate philosophy seminar from the 194 series.
   d) electives: courses numbered 10 or above, at least 13 units of which must be in courses numbered above 99.

2. Units for Tutorial, Directed Reading (PHIL 196, 197, 198), The Dualist (PHIL 198), Honors Seminar (PHIL 199), or affiliated courses may not be counted in the 55-unit requirement. No more than 10 units completed with grades of “satisfactory” and/or “credit” may be counted in the 55-unit requirement.

3. A maximum of 10 transfer units or two courses can be used for the departmental major. In general, transfer courses cannot be used to satisfy the five area requirements or the undergraduate seminar requirement. Students may not substitute transfer units for the PHIL 80 requirement.

SPECIAL PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE

Undergraduates may major in Philosophy with a degree field in History and Philosophy of Science under the Department of Philosophy. Each participating student is assigned an adviser who approves the course of study. A total of 61 units are required for the sub-major, to be taken according to requirements 1 through 5 below. Substitutions for the listed courses are allowed only by written consent of the undergraduate adviser for History and Philosophy of Science. Students are encouraged to consider doing honors work with an emphasis on the history and philosophy of science. Interested students should see the description of the honors thesis in Philosophy and consult their advisers for further information.

1. Three science courses (for example, biology, chemistry, physics) for 12 units.

2. The following Philosophy (PHIL) core courses must be completed with a letter grade by the end of the junior year:
   a) one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
   b) 60 or 61
   c) 80

3. Three history of science courses.

4. Three philosophy of science courses, of which one must be PHIL 164.

5. Three additional courses related to the major, in philosophy or history, to be agreed on by the adviser.

6. At least six courses in the major must be completed at Stanford with a letter grade. Units for Tutorial, Directed Reading, or The Dualist (196, 197, 198) may not be counted in the requirement. No more than
10 units completed with grades of “satisfactory” and/or “credit” may be counted in the requirement.

7. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring a major. Transfer courses are strictly limited when used to satisfy major requirements.

SPECIAL OPTION IN PHILOSOPHICAL AND LITERARY THOUGHT

Undergraduates may major in Philosophy with a special option in philosophy and literature. This option is declared to the department; it is not declared on Axess, and it does not appear on the transcript or the diploma. Students in this option take courses alongside students from other major departments which also have a specialized option associated with the program for the study of philosophical and literary thought, with administrative staff in the DLCL. Each student in this option is assigned an adviser in Philosophy, and students’ schedules and overall course of study must be approved in writing by the adviser, and the Directors of Undergraduate Studies of Philosophy and of the program.

A total of 65 units must be completed for this option, including the following requirements:

1. Core requirements for the major in Philosophy, including
   a) an introductory course
   b) PHIL 80
   c) the core distribution requirements listed in section 1b of the general program above

2. Gateway course in philosophy and literature (PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.

3. Three courses in a single national literature, chosen by the student in consultation with the adviser and the program director of undergraduate studies. This normally involves meeting the language proficiency requirements of the relevant literature department.

4. Electives within Philosophy beyond the core requirements totaling at least 5 units, and drawn from courses numbered 100 or higher.

5. Two upper division courses of special relevance to the study of philosophy and literature, as identified by the committee in charge of the program. A list of approved courses is available from the program director of undergraduate studies.

6. Capstone seminar in the PHIL 194 series.

7. Capstone seminar of relevance to the study of philosophy and literature, as approved by the program committee. In some cases, with approval of the Philosophy Director of Undergraduate Study and the program director of undergraduate studies, the same course may be used to meet requirements 6 and 7 simultaneously. In any case, the student’s choice of a capstone seminar must be approved in writing by the Philosophy Director of Undergraduate Study and the program director of undergraduate studies.

Students are encouraged to consider doing honors work in a topic related to philosophy and literature, either through the Philosophy honors program, or through Interdisciplinary Studies in the Humanities.

The following rules also apply to the special option:

1. Units for Honors Tutorial, Directed Reading (PHIL 196, 197, 198), The Dualist (PHIL 198), Honors Seminar (PHIL 199) may not be counted toward the 65-unit requirement. No more than 10 units with a grade of “satisfactory” or “credit” may be counted toward the unit requirement.

2. A maximum of 15 transfer units may be counted toward the major, at most 10 of which may substitute for courses within Philosophy. Transfer credits may not substitute for PHIL 80 or 81, and are approved as substitutes for the five area requirements or PHIL 194 only in exceptional cases.

3. Courses offered in other departments may be counted toward requirements 3, 5, and 7, but such courses, including affiliated courses, do not generally count toward the other requirements. In particular, such courses may not satisfy requirement 4.

4. Units devoted to meeting the language requirement are not counted toward the 65-unit requirement.

MINORS

A minor in Philosophy consists of at least 30 units of Philosophy courses satisfying the following conditions:

1. IHUM 23A and B (The Fate of Reason) may be counted for a maximum of 5 units.

2. At least 10 units must be from courses numbered 100 or above.

3. The 30 units must include one of:
   a) a history of philosophy course numbered 100 or above
   b) two quarters of Area 1 (only 5 of the 10 units can count towards 30-unit requirement)

4. One course from any two of the following three areas (PHIL):
   a) Philosophy of science and logic: 60, 61, 156, 163-168; 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
   b) Moral and political philosophy: 20, 30, 170-172
   c) Metaphysics and epistemology: 10, 80, 180-189

5. Units for tutorials, directed reading, and affiliated courses may not be counted.

6. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring. The number of transfer units is generally limited to a maximum of 10.

7. No more than 6 units completed with grades of “satisfactory” or “credit” count towards the 30-unit requirement.

Students must declare their intention to minor in Philosophy in a meeting with the Director of Undergraduate Study. This formal declaration must be made no later than the last day of the quarter two quarters before degree conferral. The Permission to Declare a Philosophy Minor (signed by the Director of Undergraduate Study) lists courses taken and to be taken to fulfill minor requirements. This permission is on file in the department office. Before graduation, a student’s record is checked to see that requirements have been fulfilled, and the results are reported to the University Registrar.

HONORS PROGRAM

Students who wish to undertake a more intensive and extensive program of study, including seminars and independent work, are invited to apply for the honors program during Winter Quarter of the junior year. Admission is selective on the basis of demonstrated ability in philosophy, including an average grade of at least ‘A’-‘A’ in a substantial number of philosophy courses and progress towards satisfying the requirements of the major.

With their application, candidates should submit an intended plan of study for the remainder of the junior and the senior years. It should include at least 5 units of Senior Tutorial (196) during Autumn and/or Winter Quarter(s) of the senior year. Students who are applying to Honors College may use the same application for philosophy honors. In the quarter preceding the tutorial, students should submit an essay proposal to the Philosophy undergraduate director and determine an adviser.

Students applying for honors should enroll in Junior Honors Seminar (199) during the Spring Quarter of the junior year.

The length of this essay may vary considerably depending on the problem and the approach; usually it falls somewhere between 7,500 and 12,500 words. The honors essay may use work in previous seminars and courses as a starting point, but it cannot be the same essay that has been used, or is being used, in some other class or seminar. It must be a substantially new and different piece of work reflecting work in the tutorials.

A completed draft of the essay is submitted to the adviser at the end of the Winter Quarter of the senior year. Any further revisions must be finished by the fifth full week of the Spring Quarter, when three copies of the essay are to be given to the undergraduate secretary. The honors essay is graded by the adviser together with a second reader, chosen by the adviser in consultation with the student. The student also provides an oral defense of the thesis at a meeting with the adviser and second reader. The essay must receive a grade of ‘A-’ or better for the student to receive honors.

Honors tutorials represent units in addition to the 55-unit requirement. The Department of Philosophy cooperates with the honors component of the “Interdisciplinary Studies in Humanities” as described in that section of this bulletin.
JOINT MAJOR IN PHILOSOPHY AND RELIGIOUS STUDIES

The joint major in Philosophy and Religious Studies consists of 60 units of course work with approximately one third each in the philosophy core, the religious studies core, and either the general major or the special concentration. Affiliated courses cannot be used to satisfy this requirement.

No courses in either the philosophy or religious studies core may be taken satisfactory/no credit or credit/no credit.

In general, transfer units cannot be used to satisfy the core requirements. Transfer units and substitutions must be approved by the director of undergraduate studies in the appropriate department.

CORE REQUIREMENTS

1. Philosophy (PHIL) courses:
   a) 80
   b) 16 units, including at least one Philosophy course from each of the following areas:
      1) Logic and philosophy of science: 50 (formerly 57), 60, 61, 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169), 156, 162-168
      2) Ethics and value theory: 170-173
      3) Epistemology, metaphysics, and philosophy of language: 180-189
      4) History of philosophy: 100-103

2. Religious Studies courses: 20 units, including at least two courses in diverse religious traditions (for example, an Eastern and a Western or a literate and a preliterate tradition) and including at least one seminar.

   General Major Requirements — Five additional courses (approximately 20 units) divided between the two departments. No more than 5 of these units may come from courses numbered under 99 in either department. Each student must also take at least one undergraduate seminar in religious studies and one undergraduate seminar in philosophy.

   Special Concentration — With the aid of an adviser, students pursue a specialized form of inquiry in which the combined departments have strength; for example, American philosophy and religious thought, philosophical and religious theories of human nature and action, philosophy of religion. Courses for this concentration must be approved in writing by the adviser.

   Directed Reading and Satisfactory/No Credit Units — Units of directed reading for fulfilling requirements of the joint major are allowed only with special permission. No more than 10 units of work with a grade of ‘satisfactory’ count toward the joint major.

HONORS PROGRAM

Students pursuing a joint major in Philosophy and Religious Studies may also apply for honors by following the procedure for honors in either of the departments.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES

It is possible to earn an M.A. in Philosophy while earning a B.A. or B.S. This can usually be done by the end of the fifth undergraduate year, although a student whose degree is not in philosophy may require an additional year. Standards for admission to, and completion of, this program are the same as for M.A. applicants who already have the bachelor’s degree when matriculating. Applicants for the coterinal program are not, however, required to take the Graduate Record Exam. Information about applying is available from Graduate Admissions in the Registrar’s Office. The application deadline for Philosophy is January 10.

For University coterinal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

The department is prepared to direct and supervise individual study and research to supplement instruction offered in the courses listed below. In addition, advanced seminars not listed in the catalog are frequently organized in response to student interest. Candidates for advanced degrees are urged to discuss their entire program of study with their department advisers as early as possible.

Prospective graduate students should see http://gradadmissions.stanford.edu for information and application materials. Applicants should take the Graduate Record Examination by October of the year the application is submitted.

MASTER OF ARTS

University requirements for the M.A. are discussed in the “Graduate Degrees” section of this bulletin.

Four programs lead to the M.A. in Philosophy. One is a general program providing a grounding in all branches of the subject. The others provide special training in one branch.

Admissions — All prospective master’s students, including those currently enrolled in other Stanford programs, must apply for admission to the program. The application deadline is March 28 of the academic year preceding entry into the program. In exceptional circumstances, consideration may be given to applications received after the March 28 deadline but before April 30. No fellowships are available. Entering students must meet with the director of the master’s program and have their advisers’ approval, in writing, of program proposals. The master’s program should not be considered a stepping stone to the doctoral program; these two programs are separate and distinct.

Unit Requirements — Each program requires a minimum of 45 units in philosophy. Students in a special program may be allowed or required to replace up to 9 units of philosophy by 9 units in the field of specialization. Although the requirements for the M.A. are designed so that a student with the equivalent of a strong undergraduate philosophy major at Stanford might complete them in one year, most students need longer. Students should also keep in mind that although 45 units is the minimum required by the University, quite often more units are necessary to complete department requirements. Up to 6 units of directed reading in philosophy may be allowed. There is no thesis requirement, but an optional master’s thesis or project, upon faculty approval, may count as the equivalent of up to 8 units. A special program may require knowledge of a foreign language. At least 45 units in courses numbered 100 or above must be completed with a grade of ‘B-’ or better at Stanford. Students are reminded of the University requirements for advanced degrees, and particularly of the fact that for the M.A., students must complete three full quarters as measured by tuition payment.

GENERAL PROGRAM

The General Program requires a minimum of 45 units in Philosophy courses numbered above 99. These courses must be taken for a letter grade and the student must receive at least a ‘B-’ in the course. Courses taken to satisfy the undergraduate core or affiliated courses may not be counted in the 45 units. The requirement has three parts:

1. Undergraduate Core: students must have when they enter, or complete early in their program, the following undergraduate courses (students entering from other institutions should establish equivalent requirements with a master’s adviser upon arrival or earlier):
   a) Logic: 50 (formerly 57), 150 (formerly 159), or 151 (formerly 160A)
   b) Philosophy of science: any course from 60, 61, 163-167
   c) Moral and political philosophy: one from 170-173
   d) Metaphysics and epistemology: one from 80, 180-189
   e) History of philosophy: two history of philosophy courses numbered 100 or above

2. Graduate Core: students must take at least one course numbered over 105 from the following five areas (courses used to satisfy the undergraduate core cannot also be counted toward satisfaction of the graduate core). Crosslisted and other courses taught outside the Department of Philosophy do not count towards satisfaction of the core.
a) Logic and semantics
b) Philosophy of science and history of science
c) Ethics, value theory, and moral and political philosophy
d) Metaphysics, epistemology, and philosophy of language
e) History of philosophy

Each master’s candidate must take at least two courses numbered above 200 (these cannot be graduate sections of undergraduate courses). One may be a graduate core seminar (360, 370, 380, 381), but no student is admitted to a core seminar before completing undergraduate requirements in the area of the seminar and securing the approval of the instructor.

3. Specialization: students must take at least three courses numbered over 105 in one of the five areas.

SPECIAL PROGRAM IN SYMBOLIC SYSTEMS

Students should have the equivalent of the Stanford undergraduate major in Symbolic Systems. Students who have a strong major in one of the basic SSP disciplines (philosophy, psychology, linguistics, computer science) may be admitted, but are required to do a substantial part of the undergraduate SSP core in each of the other basic SSP fields. This must include the following three philosophy courses or their equivalents: 80; 151 (formerly 160A); and one from 181, 183, 184, 186. This work does not count towards the 45-unit requirement.

COURSE REQUIREMENTS

1. Four courses in philosophy at the graduate level (numbered 200 or above), including courses from three of the following five areas:
   a) Philosophy of language
   b) Logic
   c) Philosophy of mind
   d) Metaphysics and epistemology
   e) Philosophy of science

   At most two of the four courses may be graduate sections of undergraduate courses numbered 100 or higher.

2. Three courses numbered 100 or higher from outside Philosophy, chosen in consultation with an adviser. These courses should be from two of the following four areas:
   a) Psychology
   b) Linguistics
   c) Computer Science
   d) Education

   Remaining courses are chosen in consultation with and approved by an adviser.

SPECIAL PROGRAM IN THE PHILOSOPHY OF LANGUAGE

Admission is limited to students with substantial preparation in philosophy or linguistics. Those whose primary preparation has been in linguistics may be required to satisfy all or part of the undergraduate core requirements as described in the “General Program” subsection above. Those whose preparation is primarily in philosophy may be required to take additional courses in linguistics.

COURSE REQUIREMENTS

1. Philosophy of language: two approved courses in the philosophy of language numbered 180 or higher.

2. Syntactic theory and generative grammar: 384 and LINGUIST 231.

3. Logic: at least two approved courses numbered 151 (formerly 160A) or higher.

4. An approved graduate-level course in mathematical linguistics or automata theory.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the Ph.D. degree (residence, dissertation, examination, and so on) are discussed in the “Graduate Degrees” section of this bulletin. The requirements detailed here are department requirements.

All courses used to satisfy proficiency requirements must be passed with a letter grade of ‘B-’ or better (no satisfactory/no credit). At the end of each year, the department reviews the progress of each student to determine whether the student is making satisfactory progress, and on that basis to make decisions about probationary status and termination from the program where appropriate.

Any student in one of the Ph.D. programs may apply for the M.A. when all University and department requirements have been met.

PROFICIENCY REQUIREMENTS

1. Course requirements, to be completed during the first two years:
   a) four core graduate courses and seminars in philosophy of language (381); philosophy of mind, metaphysics, and epistemology (380); value theory (370); and philosophy of science (360)
   b) three of the four items listed below:
      1) three history courses, each consisting of an approved graduate-level course in the history of philosophy. Courses satisfying this seven-out-of-eight requirement must include at least one history course in ancient philosophy, one in modern.
      2) PHIL 151 (formerly 160A)
      c) PHIL 150 (formerly 159) or the equivalent
      d) A total of at least 49 units of course work in the Department of Philosophy numbered above 110, but not including Teaching Methods (PHIL 239) or affiliated courses. Units of Individual Directed Reading (PHIL 240) may be included only with the approval of the Director of Graduate Study.

2. Teaching Assistance: a minimum of five quarters of teaching assistance, usually during the second and third years. As part of the training for being a teaching assistant, Ph.D. students are required to take PHIL 239 during Spring Quarter of their first and second years.

3. Candidacy: to continue in the Ph.D. program, each student must be approved for candidacy during the sixth academic quarter (normally the Spring Quarter of the student’s second year). Students may be approved for candidacy on a conditional basis if they have only one or two outstanding deficiencies, but are not officially advanced to candidacy until these deficiencies have been removed. Approval for candidacy indicates that, in the department’s judgment, the student can successfully complete the Ph.D. In reaching this judgment, the department considers the overall quality of the student’s work during the first six quarters and the student’s success in fulfilling course requirements.

4. During the third year of graduate study, and after advancement to candidacy, a Ph.D. student should successfully complete at least three graduate-level courses/seminars, at least two of which must be in philosophy. Courses required for candidacy are not counted toward satisfaction of this requirement. Choice of courses/seminars outside philosophy is determined in consultation with a student’s adviser.

5. During the summer of their second year, students are required to attend a dissertation development seminar given by the department.

6. Dissertation work and defense: the third and fourth (and sometimes fifth) years are devoted to dissertation work.
   a) Dissertation Proposal: by Spring Quarter of the third year, students select a dissertation topic, a reading committee, and some possible thesis relative to that topic. The topic and thesis should be sketched in a proposal of three to five pages, plus a detailed, annotated bibliography indicating familiarity with the relevant literature. The proposal should be approved by the reading committee before the meeting on graduate student progress late in Spring Quarter.
   b) Departmental Oral: during Autumn Quarter of the fourth year, students take an oral examination, called the “Departmental Oral,” based on at least 30 pages of written work, in addition to the proposal. The aim of the exam is to help the student arrive at an acceptable plan for the dissertation and to make sure that the student, thesis, topic, and adviser make a reasonable fit. In cases where such an exam is deemed inappropriate by the reading committee, the student may be exempted by filing a petition with the Director of Graduate Study, signed by the student and the members of the reading committee.
   c) Fourth-Year Colloquium: no later than the Spring Quarter of the fourth year, students present a research paper in a seminar open to the entire department. This paper should be on an aspect of the student’s dissertation research.
SCHOOL OF HUMANITIES AND SCIENCES

4. Paperwork for the minor must be submitted to the department office at least one month before the student expects to defend the thesis in the University oral exam. If the student is given permission to go forward, the University orals take place approximately two weeks later. A portion of the exam consists of a student presentation based on the dissertation and is open to the public. A closed question period follows. If the draft is ready by Autumn Quarter of the fourth year, the student can request that the University oral count as the department oral.

SPECIAL GRADUATE PROGRAMS

The department recognizes that some students may need to spend a large amount of time preparing themselves in some other discipline related to their philosophical goals, or in advanced preparation in some area within philosophy. In such circumstances, the department may be willing to waive some of the Ph.D. requirements. Such an exemption is not automatic; a program must be worked out with an adviser and submitted to the department some time in the student's first year. This proposal must be in writing and must include:

1. The areas to be exempted (see below).
2. A program of additional courses and seminars in the special area (usually at least 12 units).
3. A justification of the program that considers both intellectual coherence and the student's goals.

The department believes there is plenty of room for normal specialization within the program as it stands, and that all students specialize to some extent. Thus, the intent is not to exempt courses on a one-to-one basis, but only to grant exemptions when a student plans an extensive and intensive study of some relevant area.

Special program students may be exempted from the following:

1. One additional item from the items listed above in requirement 1(a).
2. PHIL 150 (formerly 159); but in this case, a student must take PHIL 50 (formerly 57).

If a student's special program involves substantial course work outside of philosophy, the student may, with the approval of the adviser, petition the department to reduce requirement 1(d), the Philosophy unit requirement for the first two years. Normally this requirement is not reduced below 32 units.

PH.D. MINOR

To obtain a Ph.D. minor in Philosophy, students must follow these procedures:

1. Consult with the Director of Graduate Study to establish eligibility, and select a suitable adviser.
2. Give to the department academic assistant a signed copy of the program of study (designed with the adviser) which offers:
   a) 30 units of courses in the Department of Philosophy with a letter grade of 'B-' or better in each course. No more than 3 units of directed reading may be counted in the 30-unit requirement.
   b) At least one course or seminar numbered over 99 to be taken in each of these five areas:
      1) Logic
      2) Philosophy of science
      3) Ethics, value, theory, and moral and political philosophy
      4) Metaphysics, epistemology, and philosophy of language
      5) History of philosophy
   c) Two additional courses numbered over 199 to be taken in one of those (b) five areas.
3. A faculty member from the Department of Philosophy (usually the student's adviser) serves on the student's doctoral oral examination committee and may request that up to one third of this examination be devoted to the minor subject.
4. Paperwork for the minor must be submitted to the department office before beginning the program.

INTERDEPARTMENTAL PROGRAMS

GRADUATE PROGRAM IN HUMANITIES

The Department of Philosophy also participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Philosophy and Humanities. It is described in the “Interdisciplinary Studies in Humanities” section of this bulletin.

GRADUATE PROGRAM IN COGNITIVE SCIENCE

Philosophy participates with the departments of Computer Science, Linguistics, and Psychology in an interdisciplinary program in Cognitive Science. It is intended to provide an interdisciplinary education, as well as a deeper concentration in philosophy, and is open to doctoral students. Students who complete the requirements within Philosophy and the Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Philosophy. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of philosophy. The list of approved courses can be obtained from the Cognitive Science program located in the Department of Psychology.

SPECIAL TRACK IN PHILOSOPHY AND SYMBOLIC SYSTEMS

Students interested in interdisciplinary work relating philosophy to artificial intelligence, cognitive science, computer science, linguistics, or logic may pursue a degree in this program.

Prerequisites — Ideally, admitted students have covered the equivalent of the core of the undergraduate Symbolic Systems Program requirements as described in that section of this bulletin, including courses in artificial intelligence (AI), cognitive science, linguistics, logic, and philosophy. The graduate program is designed with this background in mind. Students missing part of this background may need additional course work. Aside from the required course work below, the Ph.D. requirements are the same as for the regular program.

Courses of Study — The program consists of two years of courses and two years of dissertation work. Students are required to take the following courses in the first two years:

1. Six Philosophy courses:
   a) two of the following: 360, 370, 380, 381
   b) one course in the history of modern philosophy
   c) two quarters of graduate logic courses from among 350A, 351A, 352A, 353A
   d) at least one additional seminar in the general area of symbolic systems: e.g., 354, 358
2. Five cognitive science and computer science courses:
   a) at least two courses in cognitive psychology
   b) two or three graduate courses in computer science, at least one in AI and one in theory
3. Three linguistics and computational linguistics courses:
   a) graduate courses on natural language that focus on two of the following areas: phonetics and phonology, syntax, semantics, or pragmatics
   b) one graduate course in computational linguistics, typically LINGUIST 239
4. At least two additional graduate seminars at a more advanced level, in the general area of the program, independent of department. These would typically be in the area of the student's proposed dissertation project.

The requirements for the third year are the same as for other third-year graduate students in philosophy: a dissertation proposal, creation of a dissertation committee, and at least three approved graduate courses and seminars. The dissertation committee must include at least one member of the Department of Philosophy and one member of the Program in Symbolic Systems outside the Department of Philosophy.

The requirement for the fourth year is the same as for the other graduate students in philosophy: a department oral on an initial draft of part of the dissertation, a fourth year colloquium, and a University oral exam when the dissertation is essentially complete.
JOINT PROGRAM IN ANCIENT PHILOSOPHY

This program is jointly administered by the Departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers (with a strong specialization in ancient languages and philology) or classicists (with a concentration in philosophy).

Students are admitted to the program by either department. Graduate students admitted by the Philosophy department receive their Ph.D. from the Philosophy department; those admitted by the Classics department receive their Ph.D. from the Classics department. For Philosophy graduate students, this program provides training in classical languages, literature, culture, and history. For Classics graduate students, this program provides training in the history of philosophy and in contemporary philosophy.

Each student in the program is advised by a committee consisting of one professor in each department.

Requirements for Philosophy Graduate Students:

These are the same as the proficiency requirements for the Ph.D. in Philosophy with the following exception: if the student has already taken two courses in modern philosophy, there is no need to take a course in modern philosophy to satisfy proficiency requirement 1.a.2.

One year of Greek is a requirement for admission to the program. If students have had a year of Latin, they are required to take 3 courses in second- or third-year Greek or Latin, at least one of which must be in Latin. If they have not had a year of Latin, they are then required to complete a year of Latin, and take two courses in second- or third-year Greek or Latin.

Students are also required to take at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Classics department and two of which must be in the Philosophy department.

GRADUATE DEGREES IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

See the description in the “History and Philosophy of Science and Technology” section of this bulletin.

GRADUATE FELLOWSHIPS AND ASSISTANTSHIPS

A limited amount of fellowship support is available for Ph.D. students in philosophy. Students request aid by checking the appropriate box on the application form. Details of this program may be obtained from the department. Note that a condition of financial aid may be teaching assistance that goes beyond the Ph.D. requirement.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. See the quarterly Time Schedule for revised listings.

INTRODUCTORY

These courses acquaint the student with some of the most important problems, positions, and methods in Philosophy. Some are designed to give general preparation for further work in Philosophy. Some apply the philosopher’s approach to particular problems and subjects encountered in other areas of study.

PHIL 10. God, Self, and World: An Introduction to Philosophy — Traditional philosophical problems including the existence of God, how and what one can know about the world, how to understand the nature of the mind and its relation to the body, and whether people have free will. Paradoxes. Readings include classical and contemporary texts. GER: DB-Hum
5 units, Win (Perry, J)

3 units, Aut (De Pierris, G)

PHIL 13N. What Is Truth? — Stanford Introductory Seminar. Preference to freshmen. This question can be answered precisely in some important cases. In some of those cases, truth can be established through proof. Successes in this quest for certified truth connected to successes of automation of reasoning. Recommended: 5 units AP in Mathematics, or 5 units in Stanford Mathematics courses with a grade of A. GER: DB-Hum
3 units, Win (Mints, G)

PHIL 14N. Belief — Stanford Introductory Seminar. Preference to freshmen. Is there anything wrong with believing something without evidence? Is it possible? The nature and ethics of belief, and belief’s relation to evidence and truth. How much control do believers have over their beliefs? GER: DB-Hum
3 units, Spr (Lawlor, K)

PHIL 16N. Values and Objectivity — Stanford Introductory Seminar. Preference to freshmen. What is meant by the objectivity of beliefs and attitudes? Can the commitment of science to truthfulness be free of particular perspectives and subjective influence? Is objectivity a matter of degree relative to the kind of inquiry undertaken? Readings from philosophy of science, moral philosophy, and philosophy of mind. GER: DB-Hum
3 units, Aut (Ryckman, T)

PHIL 20. Introduction to Moral Philosophy — (Same as ETHICSOC 20.) What is the basis of moral judgment? What makes rights actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous character? Answers to classic questions in ethics through the works of traditional and contemporary authors. GER: DB-Hum, EC-EthicReas
5 units, Spr (Seidman, J)

PHIL 30. Introduction to Political Philosophy — (Same as ETHICSOC 30, POLISCI 13.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER: DB-Hum, EC-EthicReas
5 units, Win (Stone, P)

PHIL 50. Introductory Logic — Propositional and predicate logic; emphasis is on translating English sentences into logical symbols and constructing derivations of valid arguments. GER: DB-Math
4 units, Aut (Alonso, F), Spr (Harp, R)

PHIL 60. Introduction to Philosophy of Science — (Same as HPS 60.) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerbend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER: DB-Hum
5 units, Aut (Longino, H)

PHIL 61. Philosophy and the Scientific Revolution — (Same as HPS 61.) The relationship between the scientific revolution of the 17th century that resulted in the birth of modern science and the contemporaneous intellectual developments constituting the birth of modern philosophy. Readings focus on Galileo and Descartes. GER: DB-Hum
5 units, not given this year

PHIL 77. Methodology in Ethics: Translating Theory into Practice— (Same as ETHICSOC 77.) Ideally, social policies are informed by ethical thought and reflection, but doing good in the world requires the active translation of moral theory and political philosophy into action. What kinds of empirical data are relevant to social decision making, and how should they be collected, evaluated, and integrated into normative analysis? What assumptions about human nature are in play? How should diverse cultural values be addressed? Case studies from biomedical science, business, and government.
4 units, Spr (Staff)

Stanford Bulletin, 2006-07 | 537
PHIL 78. Medical Ethics — (Same as ETHICSOC 78.) Introduction to moral reasoning and its application to problems in medicine: informed consent, the requirements and limits of respect for patients’ autonomy, surrogate decision making, euthanasia and physician-assisted suicide, and abortion. GER:DB-Hum, EC-EthicReas
4 units, Spr (Jaworska, A)

PHIL 80. Mind, Matter, and Meaning — Central topics in philosophy: free will and determinism, the relation of mind and body, and whether machines can think. Emphasis is on analytical writing skills. Prerequisite: introductory philosophy course. GER:DB-Hum, WIM
5 units, Aut (Lavello, K), Spr (Crimmins, M)

PHIL 81. Philosophy and Literature — (Same as FRENGEN 181, ITALGEN 181.) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DLCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum
4 units, Win (Anderson, L; Landy, J)

HISTORY OF PHILOSOPHY

100-103 are surveys of important figures and movements in Western philosophy. Other courses cover particular periods, movements, and figures in the history of philosophy. Prospective Philosophy majors should take as many as possible during the sophomore year.

PHIL 100. Greek Philosophy — Greek philosophical thought, covering Socrates, Plato, Aristotle, and the Hellenistic schools (the Epicureans, the Stoics, and the Skeptics). Topics: the nature of the soul, virtue and happiness, knowledge, and reality. GER:DB-Hum
4 units, Aut (Bobonich, C)

PHIL 102. Modern Philosophy, Descartes to Kant — Major figures in early modern philosophy in epistemology, metaphysics, and philosophy of mind. Writings by Descartes, Locke, Leibniz, Berkeley, Hume, and Kant. GER:DB-Hum
4 units, Win (Wood, A)

PHIL 103. 19th-Century Philosophy — Focus is on ethics and the philosophy of history. Works include Mill’s Utilitarianism, Hegel’s The Philosophy of World History, Marx’s Economic and Philosophic Manuscripts, Kierkegaard’s The Sickness Unto Death, and Nietzsche’s On the Genealogy of Morals. GER:DB-Hum
4 units, not given this year

PHIL 107/207. Plato and Heraclitus — (Graduate students register for 207.) Similarities and differences.
3 units, Spr (Moravcsik, J)

PHIL 114/214. The Paradox of Seneca — (Graduate students register for 214; same as CLASSGEN 114/214.) Millionaire or ascetic, principled Stoic or compromised courtier, advocate of detachment or addict of bloodthirsty tragedies: the contradictory facets of the philosopher Seneca, tutor to the young Nero. His views on living and dying well, passion and philosophy, and nature and civilization. Readings in English from his prose writings and tragedies.
3-5 units, Spr (Bobonich, C; Braund, S)

PHIL 115/215. Foundations of Medieval Psychology — (Graduate students register for 215.) Western medieval faculty psychology. Focus on Albert the Great and changes in his views on sensation and understanding and the faculties of sense, imagination, and intellect. Other texts by Albert’s student Thomas Aquinas and his predecessors, Richard Rufus and Roger Bacon. Changes in the comparative influence exerted by Avicenna and Averroes on the Western tradition of Aristotelian psychology. See http://rrp.stanford.edu/Albert/news. May be repeated for credit. GER:DB-Hum
3-5 units, Aut (Wood, K)

PHIL 117/217. Descartes — (Graduate students register for 217; formerly 121/221.) Descartes’s philosophical writings on rules for the direction of the mind, method, innate ideas and ideas of the senses, mind, God, eternal truths, and the material world. GER:DB-Hum
4 units, Aut (De Poiriers, G)

PHIL 118/218. British Empiricism, 1660s-1730s — (Graduate students register for 218.)
4 units, Spr (Dunlop, K)

PHIL 119/219. Rationalists — (Graduate students register for 219; formerly 143/243.) Developments in 17th-century continental philosophy. Descartes’s views on mind, necessity, and knowledge. Spinoza and Leibniz emphasizing their own doctrines and their criticism of their predecessors. Prerequisite: 102. GER:DB-Hum
4 units, not given this year

PHIL 122/222. Hume — (Graduate students register for 222; formerly 120/220.) Hume’s theoretical philosophy, in particular, skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self. GER:DB-Hum
4 units, not given this year

PHIL 125/225. Kant’s First Critique — (Graduate students register for 225.) The founding work of Kant’s critical philosophy emphasizing his contributions to metaphysics and epistemology. His attempts to limit metaphysics to the objects of experience. Prerequisite: course dealing with systematic issues in metaphysics or epistemology, or with the history of modern philosophy. GER:DB-Hum
4 units, Win (De Poiriers, G)

PHIL 126/226. Kant’s Ethical Theory — (Graduate students register for 226.) Kant’s moral philosophy based primarily on the Groundwork of Metaphysics of Morals, Critique of Practical Reason, and The Metaphysics of Morals. GER:DB-Hum
4 units, not given this year

PHIL 127/227. Kant’s Ethical Theory — (Graduate students register for 227.) Readings include Groundwork for the Metaphysics of Morals and The Metaphysics of Morals. GER:DB-Hum
4 units, Aut (Wood, A)

PHIL 130/230. Hegel’s Phenomenology of Spirit — (Graduate students register for 230; formerly 122/222.) The aims and parts of the execution of the philosophical project of Hegel’s first major work. Issues in epistemology, metaphysics, and ethics; and the relationship between the systematic and historical aspects of Hegel’s project. May be repeated for credit. Prerequisite: course in the history of modern philosophy. GER:DB-Hum
4 units, not given this year

PHIL 134/234. Phenomenology and Intersubjectivity — (Graduate students register for 234.) Readings from Husserl, Stein, Heidegger, Sartre, and Merleau-Ponty on subjects related to awareness of others. Topics include solipsism, collective experience, empathy, and objectification of the other. GER:DB-Hum
4 units, Aut (Scotland-Stewart, L)

PHIL 135/235. Existentialism — (Graduate students register for 235; formerly 132/232.) The existentialist preoccupation with human freedom. What constitutes authentic individuality? What is one’s relation to the divine? How can one live a meaningful life? What is the significance of death? Rethinking the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including social and political consequences in light of 20th-century fascism and feminism. GER:DB-Hum
4 units, not given this year

PHIL 136/236. History of Analytic Philosophy — (Graduate students register for 236; formerly 147/247.) Theories of knowledge in Frege, Carnap, and Quine. Emphasis is on conceptions of analyticity and treatment of logic and mathematics. Prerequisite: 50 and one course numbered 150-165 or 181-90. GER:DB-Hum
4 units, not given this year
PHIL 137/237. Wittgenstein — (Graduate students register for 237.) The main themes and claims in Wittgenstein’s later work concentrating on his views about meaning, mind, knowledge, the nature of philosophical perplexity, and the nature of philosophical progress in his Philosophical Investigations. Emphasis is on the relationship between the novel arguments of the Investigations and its ways of writing up the results of philosophical questioning. GER:DB-Hum
4 units, Win (Hills, D)

PHIL 143/243. Quine — (Graduate students register for 243; formerly 183/283.) The philosophy of Quine: meaning and communication; analyticity, modality, reference, and ontology; theory and evidence; naturalism; mind and the mental. GER:DB-Hum
4 units, not given this year

LOGIC AND PHILOSOPHY OF SCIENCE

PHIL 150/250. Basic Concepts in Mathematical Logic — (Graduate students register for 250; formerly 159.) The concepts and techniques used in mathematical logic, primarily through the study of the language of first order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability. GER:DB-Math
4 units, Win (Wason, T)

PHIL 150X. Basic Concepts in Mathematical Logic — Equivalent to the second half of 150. Students attend the first meeting of 150 and rejoin the class on October 30. Prerequisite: CS 103A or X, or PHIL 50.
2 units, Aut (Wason, T)

PHIL 151/251. First-Order Logic — (Graduate students register for 251; formerly 160A.) The syntax and semantics of sentential and first-order logic. Concepts of model theory, Godel’s completeness theorem and its consequences: the Löwenheim-Skolem theorem and the compactness theorem. Prerequisite: 150 or consent of instructor. GER:DB-Math
4 units, Win (Pauly, M)

PHIL 152/252. Computability and Logic — (Graduate students register for 252.) Approaches to effective computation: recursive functions, register machines, and programming styles. Proof of their equivalence, discussion of Church’s thesis. Elementary recursion theory. These techniques used to prove Godel’s incompleteness theorem for arithmetic, whose technical and philosophical repercussions are surveyed. Prerequisite: 151. GER:DB-Math
4 units, Spr (Pauly, M)

PHIL 153. Feminist Theories and Methods Across the Disciplines — (Same as FEMST 103/203.) The interdisciplinary foundations of feminist thought, and the nature of disciplines and of interdisciplinary work. The challenges of feminism for scholarship and research, taught by a Feminist Studies resource faculty member from one of the disciplines in question. GER:EC-Gender
4-5 units, Aut (Longino, H)

PHIL 154/254. Modal Logic — (Graduate students register for 254.) Syntax and semantics of modal logic, technical results like completeness, and correspondence theory. The interdisciplinary nature of modal logic: applications to philosophy, computer science, linguistics, mathematics, and economic game theory. Prerequisite: 150 (formerly 159) or preferably 151 (formerly 160A). GER:DB-Math
4 units, Aut (Pauly, M)

PHIL 156. Popper, Kuhn, and Lakatos — (Same as EDUC 214) These 20th-century philosophers of science raise fundamental issues dealing with the nature of scientific progress: the rationality of change of scientific belief, science versus non-science, role of induction in science, truth or verisimilitude as regulative ideals. Their impact in the social sciences and applied areas such as educational research. (SSPEP) GER:DB-Hum
3 units, not given this year

PHIL 157/257. Topics in Philosophy of Logic — (Graduate students register for 257.) Disputed foundational issues in logic; the question of what the subject matter and boundaries of logic are, such as whether what is called second-order logic should be counted as logic. What is the proper notion of logical consequence? May be repeated for credit. Pre- or corequisite: 151, or consent of instructor.
3 units, not given this year

PHIL 162/262. Philosophy of Mathematics — (Graduate students register for 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: 151 or consent of instructor.
4 units, Spr (Mancuso, P)

PHIL 163/263. Significant Figures in Philosophy of Science — (Graduate students register for 263.) Directed study of two or more thinkers, past or present, who have made a lasting impact on contemporary philosophy of science. Subjects for 2006-07 are Henri Poincaré, Pierre Duhem, and Gaston Bachelard.
4 units, Win (Ryckman, T)

PHIL 164/264. Central Topics in the Philosophy of Science: Theory and Evidence — (Graduate students register for 264.) The relation of theory to evidence and prediction, problems of induction, empirical under-determination of theory by evidence, and theory choice. Hypothetico-deductive, Bayesian, pragmatic, and inference to the best explanation models of explanation. The semantic approach to theories. GER:DB-Hum
4 units, not given this year

PHIL 165/265. Philosophy of Physics — (Graduate students register for 265.) Central topic alternates annually between space-time theories and philosophical issues in quantum mechanics. For 2006-07, absolute and relational theories of space, time, and motion. Newton’s critique of Descartes and debate with Leibniz. The principle of relativity and space-time formulations of Aristotelian, Galileian, and relativistic physics. Mach’s principle and the theory of general relativity. Einstein’s struggles with the principle of general covariance. Space-time substantivalism, and the meaning of background independence. May be repeated for credit if content is different. GER:DB-Hum
4 units, Aut (Ryckman, T)

PHIL 167A/267A. Philosophy of Biology — (Graduate students register for 267A.) Philosophical questions raised by evolutionary biology. The concepts of fitness and adaptation. How are hypotheses about adaptation to be tested? How should organisms be classified? How can the history of the phylogenetic branching process be inferred? Are there laws in evolutionary biology? Are theories in biology reducible to theories in physics? What does evolutionary biology contribute to the understanding of human mind and culture? GER:DB-Hum
4 units, Aut (Ryckman, T)

PHIL 167B/267B. Philosophy, Biology, and Behavior — (Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: evolutionary versus proximate causal explanations of behavior; genetic and other determinisms; and classification and measurement of behavior. Prerequisites: 167A; or one PHIL course and either one BIOSCI course or Human Biology core; or equivalent with consent of instructor.
4 units, not given this year

PHIL 168/268. Theories of Truth — (Graduate students register for 268.) The correspondence, coherence, pragmatist and deflationary theories of truth. Tarski’s semantic conception of truth and hierarchical truth definitions. The problems posed by the liar paradox for non-hierarchical theories. Formal theories of truth proposed since the 70s to deal with these problems.
4 units, Win (Feferman, S)
ETHICS, AESTHETICS, AND SOCIAL AND POLITICAL PHILOSOPHY

PHIL 170/270. Ethical Theory — (Graduate students register for 270; same as ETHICSOC 170.) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER: DB-Hum, EC-EthicReas
4 units, Spr (Jaworska, A)

PHIL 171/271. Justice — (Graduate students register for 271; same as ETHICSOC 171, POLISCI 136B.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, ensuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER: DB-Hum, EC-EthicReas
5 units, Aut (Cohen, J)

PHIL 172A. Promises — Philosophical issues and recent debates about promises. Promising as a central normative phenomenon. Disagreements among philosophers over the basis of promissory obligations and how they should be understood. Readings include Anscombe, Hume, Kolodny and Wallace, Rawls, Raz, Scanlon, Thomson, and Watson.
4 units, Win (Alonso, F)

PHIL 173A. Aesthetics: Metaphor across the Arts — What if a metaphor is an instructively compact work of art, or if finding a metaphor apt is an instructively simple case of finding something aesthetically valuable? What does this reveal about the nature of art and language? Introduction to the philosophical study of art and aesthetic value, organized around metaphor. Contemporary accounts of metaphor as a verbal device. Arguments for the existence of nonverbal metaphor in nonliterary arts. The power and appeal of metaphors drawn from art, art criticism, theoretical inquiry, and everyday life. GER: DB-Hum
4 units, Spr (Hills, D)

PHIL 173B/273B. Metaethics — (Graduate students register for 273B.) Can moral and ethical values be justified or is it just a matter of opinion? Is there a difference between facts and values? Are there any moral truths? Does it matter if there are not? Focus is not on which things or actions are valuable or morally right, but what is value or rightness itself. Contemporary metaethics. Prerequisites: 80 and an ethics course. GER: DB-Hum
4 units, Spr (Alonso, F)

PHIL 174/274. Freedom and the Practical Standpoint — (Graduate students register for 274.) Confronted with the question of how to act, people think of themselves as freely determining their own conduct. Natural science poses a challenge to this by explaining all events, including human actions, in terms of causal processes. Are people justified in thinking of themselves as free? Major philosophical approaches to this question: incompatibilism, compatibilism, and the two-standpoint view. GER: DB-Hum
4 units, Aut (Ferrero, L)

PHIL 175/275. Philosophy of Law — (Graduate students register for 275.) Philosophical foundations of law and the legal system. The justifiability of patterns of assigning legal responsibility within criminal law. Prerequisite: four courses in Philosophy including 80. GER: DB-Hum
4 units, Win (Bratman, M)

PHIL 175M/275M. Two Ethical Theories and Being a Person — (Graduate students register for 275M.) The distinction between the ethics of being a person and the ethics of rules as opposed to the distinction between Kantian ethics and utilitarianism or consequentialism. Comparison of these two types of ethics with respect to their relationship to agency and being a good person. Relations between Western ethics and those of other continents. GER: DB-Hum
4 units, not given this year

PHIL 176/276. Political Philosophy: The Social Contract Tradition — (Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Answers by political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant. GER: DB-Hum
4 units, Win (Hills, D)

PHIL 176B/276B. The Economic Individual in the Behavioral Sciences — (Graduate students register for 276B.)
4 units, not given this year

PHIL 177. Philosophical Issues Concerning Race and Racism — (Same as POLISCI 136.) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in racism? How should ethnic and racial identities be viewed to secure the conditions in which human justice can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance among competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion. GER: DB-Hum, EC-AmerCul
4 units, not given this year

PHIL 178. Ethics in Society Honors Seminar — (Same as ETHICSOC 190.) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.
3 units, Win (Reich, R)

PHIL 179M/279M. Philosophy of Friendship — (Graduate students register for 279M.) Interactions between individual and communal well-being.
4 units, Win (Moravcsik, J)

PHIL 179S/279S. Moral Psychology, Reasons for Action, and Moral Theory — (Graduate students register for 279S.) What sorts of considerations does an ethical agent take to be good reasons for action? Work in moral psychology to illuminate the theory of practical reasons, and the theory of practical reasons to test the prospects for systematic moral theory. Can any systematic moral theory be reconciled with the moral psychology of ordinary, morally respectable agents? Reading include Bernard Williams, Rosalind Hursthouse, Peter Railton, T.M. Scanlon, and Barbara Herman.
4 units, Win (Seidman, J)

EPISTEMOLOGY, METAPHYSICS, PHILOSOPHY OF MIND, AND PHILOSOPHY OF LANGUAGE

PHIL 181/281. Philosophy of Language — (Graduate students register for 281.) The study of conceptual questions about language as a focus of contemporary philosophy both for its inherent interest and because philosophers see questions about language as behind perennial questions in other areas of philosophy including epistemology, the philosophy of science, metaphysics, and ethics. Introduction to key concepts and debates about the notions of meaning, truth, reference, and language use, with relations to psycholinguistics and formal semantics. Readings from philosophers such as Frege, Russell, Wittgenstein, Grice, and Kripke. Prerequisites: 80 and background in logic.
4 units, Win (Crimmins, M)

PHIL 184/284. Theory of Knowledge — (Graduate students register for 284.) Competing theories of epistemic justification (foundationalism, coherenceism, and externalism) against the background of radical scepticism. Readings from contemporary sources. Prerequisite: 80 or consent of instructor. GER: DB-Hum
4 units, Spr (Lawlor, K)
PHIL 184F/284F. Feminist Theories of Knowledge — (Graduate students register for 284F; same as FEMST 166.) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power. GER: EC-Gender
4 units, Spr (Longino, H)

PHIL 186/286. Philosophy of Mind — (Graduate students register for 286.) Debates concerning the nature of mental states, their relation to physical states of the human body, how they acquire their content, how people come to know about them in themselves and others, and the roles they play in the explanation of human conduct.
4 units, Win (Perry, J)

PHIL 187/287. Philosophy of Action — (Graduate students register for 287.) What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is intention? What is it to act intentionally? What is it to act for a reason? Are the reasons for which one acts causes of one’s action? What is it to act autonomously? Readings include Davidson and Frankfurt. Prerequisite: 80. GER:DB-Hum
4 units, Spr (Bratman, M)

PHIL 188. Personal Identity — People seem to remain the same despite the changes they undergo during their lives. Why? The answer can influence one’s beliefs about whether people are essentially bodies or minds, and whether one’s own survival matters. Readings include John Locke, Thomas Reid, David Hume, Bernard Williams, and Derek Parfit. GER: DB-Hum
4 units, Aut (Ferrero, L)

PHIL 189. Philosophical Applications of Cognitive Science — The relevance of recent discoveries about the mind to philosophical questions in metaphysics, epistemology and philosophy of science, and ethics. Questions include: is there a right way to carve up the world into categories? Are the rules of logic objective, or just the way we happen to think? Is there such a thing as objective right and wrong?
4 units, not given this year

PHIL 190. Introduction to Cognitive Science — (Same as LINGUIST 144, PSYCH 130, SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci
4 units, Spr (Bresnan, J)

PHIL 193H. The Art of the Movies: Story, Drama, and Image — (Same as HUMNTIES 193H.) A philosophical study of how movies coordinate and transform elements they borrow from older arts of literary narrative, live theater, and graphic illustration. Examples from the career of Alfred Hitchcock. GER:DB-Hum
4 units, Aut (Hills, D)

PHIL 193Y. The Moral Status of Human Beings — (Same as HUMNTIES 193Y.) The conviction that human beings have a unique moral status among animals, plants, and things, and that all humans have equal moral status is at the heart of ethics. Views which question these beliefs, attempts to defend them, and their implications for practical ethical issues such as abortion, euthanasia, new reproductive technologies, and the treatment of animals. GER:DB-Hum
5 units, Win (Jaworska, A)

PHIL 194C. Undergraduate Seminar
4 units, Win (Wood, A)

PHIL 194D. Certainty and Language — Priority to majors. May be repeated for credit.
4 units, Spr (Danlop, K)

PHIL 195F. Shared Experience and the Experimental Actor — Practical acting workshop and seminar in philosophical topics concerning shared awareness and collective intention. Dramatic and philosophical readings include Genet, Merleau-Ponty, Zarelli, and Bratman.
4 units, Spr (Scotland-Stewart, L)

PHIL 196. Tutorial, Senior Year
5 units, Aut, Win, Spr, Sum (Staff)

PHIL 197. Individual Work, Undergraduate — May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

PHIL 198. The Dualist — Weekly meeting of the editorial board of The Dualist, a national journal of undergraduate work in philosophy. Open to all undergraduates. May be taken 1-3 quarters. (AU)
1 unit, Aut, Win, Spr (Angelides, A)

PHIL 199. Seminar for Prospective Honors Students — Open to juniors intending to do honors in philosophy. Methods of research in philosophy. Topics and strategies for completing honors project. May be repeated for credit.
2 units, Spr (Scotland-Stewart, L)

PRIMARILY FOR GRADUATE STUDENTS

PHIL 224. Kant’s Philosophy of Physical Science — Kant’s Metaphysical Foundations of Natural Science (1786), published between the first (1781) and second (1787) editions of the Critique of Pure Reason, in the scientific and philosophical context provided by Newtonian natural philosophy and the Leibnizian tradition. The place of this work in the development of Kant’s thought. Prerequisite: acquaintance with either Kant’s theoretical philosophy or the contemporaneous scientific context, principally Newton, Leibniz, and Euler.
4 units, not given this year

PHIL 228. Fichte’s Ethics — The founder of the German Idealist movement who adopted but revised Kant’s project of transcendental philosophy basing it on the principle of awareness of free self-activity. The awareness of other selves and of ethical relations to them as a necessary condition for self-awareness. His writings from 1793-98 emphasizing the place of intersubjectivity in his theory of experience.
4 units, Spr (Wood, A)

PHIL 233. Husserl — Husserl’s phenomenology. Main themes in his philosophy and their interconnections, including consciousness, perception, intersubjectivity, lifeworld, ethics, mathematics and the sciences, and time and space. Works in English translation.
4 units, Aut (Follesdal, D)

PHIL 239. Teaching Methods in Philosophy — For Ph.D. students in their first or second year who are or are about to be teaching assistants for the department. May be repeated for credit.
1-4 units, Spr (Staff)

PHIL 240. Individual Work for Graduate Students — May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

PHIL 241. Dissertation Development Seminar — Required of second-year Philosophy Ph.D. students; restricted to Stanford Philosophy Ph.D. students. Prerequisite: consent of instructor.
2-3 units, Sum (Anderson, L)

PHIL 242. The Philosophical and Educational Thought of John Dewey — (Same as EDUC 304.) Dewey’s pragmatic philosophy and educational thought; his debt to Darwin, Hegel, Peirce, and James; his educational writings including Democracy and Education; and his call for a revolution in philosophy in Reconstruction in Philosophy.
4 units, Aut (Phillips, D)
PHIL 248. Medieval Latin Paleography — The history of medieval scripts and medieval abbreviation. Dating and placing Latin European medieval manuscripts. Editing medieval texts in philosophy, psychology, physics, and theology. Class project: an anonymous commentary on Aristotle’s ethics preserved in a Florentine manuscript.
3-5 units, not given this year

PHIL 258. Minds and Machines — Readings on arguments concerning mechanical models of the mind including Turing machine models to which Gödel’s incompleteness theorems are relevant, and connectionist (neural net) models. Prerequisites: 151 (formerly 160A), 152, or equivalents. Recommended: 389.
4 units, not given this year

PHIL 307. Practical Reason in Plato and Aristotle — Aristotle’s notion that practical reason is central to ethical reflection and distinguished from philosophical understanding. What in Plato does the work of practical reason, and the shape of his resulting ethical theory. What problems Aristotle thinks Plato’s theory faces that require a conception of practical reason.
4 units, Win (Bobonich, C)

PHIL 318. Aristotle’s Ethics — Topics in Aristotle’s ethical theory and related parts of his psychology.
4 units, not given this year

PHIL 322. Hume — Hume’s theoretical philosophy emphasizing skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self.
4 units, Win (De Pierris, G)

PHIL 323. Kant’s Criticism of Metaphysics — Motivations and strategies of Kant’s criticisms of traditional metaphysics in the Critique of Pure Reason. Leibnizian and Wolffian versions of the concept containment theory of truth and the Wolffian ideal of a conceptual system of metaphysical knowledge. Kant’s analytic/synthetic distinction; its place in the rejection of metaphysics and arguments about the ideas of reason in the transcendental dialectic. Prerequisite: course on the first Critique, or consent of instructor.
4 units, not given this year

PHIL 332. Nietzsche — Preference to doctoral students. Nietzsche’s later works emphasizing The Gay Science, Beyond Good and Evil, and On the Genealogy of Morals. The shape of Nietzsche’s philosophical and literary projects, and his core doctrines such as eternal recurrence, will to power, and perspectivism. Problems such as the proper regulation of belief, and the roles of science, morality, art, and illusion in life.
4 units, Spr (Anderson, L)

PHIL 335. Topics in Aesthetics — May be repeated for credit.
4 units, not given this year

PHIL 350A. Model Theory — Language and models of the first order, predicate calculus, complete and decidable theories. Fraisse-Ehrenfeucht games. Preservation theorems. Prerequisites: 150,151, or equivalent.
3 units, not given this year

PHIL 350B. Finite Model Theory — (Same as MATH 290B.) Classical model theory deals with the relationship between formal languages and their interpretation in finite or infinite structures; its applications to mathematics using first-language languages. Recent development of the model theory of finite structures in connection with complexity classes as measures of computational difficulty; how these classes are defined within languages that go beyond first-order logic in expressiveness, such as fragments of higher order or infinitary languages, rather than in terms of models of computation.
3 units, Win (Feferman, S)

PHIL 351A. Recursion Theory — Theory of recursive functions and recursively enumerable sets. Register machines, Turing machines, and alternative approaches. Gödel’s incompleteness theorems. Recursively unsolvable problems in mathematics and logic. Introduction to higher recursion theory. The theory of combinators and the lambda calculus. Prerequisites: 151, 152, and 161, or equivalents.
3 units, not given this year

PHIL 351B. Constructive Mathematics — Effective and non-effective proofs. Background from constructive logic and computability. Elementary constructive analysis, recursive analysis. Constructive models. Foundational issues. May be repeated for credit. Prerequisites: 151, 152, or equivalents, and a calculus class.
3 units, Aut (Mints, G)

PHIL 352A. B. Set Theory — (Same as MATH 292A,B.) The basics of axiomatic set theory: the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL160A,B, and MATH 161, or equivalents.
3 units, not given this year

PHIL 353A. B. Proof Theory — Gentzen’s natural deduction and sequential calculi for first-order propositional and predicate logics. Normalization and cut-elimination procedures. Relationships with computational lambda calculi. Extensions to infinitary calculi; ordinal measures of complexity. Applications to the extraction of the constructive content of proofs in arithmetic and analysis. Extensions of Hilbert’s consistency program. Prerequisites: 151, 152 and 161, or equivalents.
3 units, not given this year

PHIL 354. Topics in Logic — Readings on uses of proof theory in analysis and number theory. Proof mining: extraction of bounds from non-effective proofs, uniformity results. May be repeated for credit. Prerequisites: 151, 152, or equivalents, and a 100-level MATH course.
3 units, Aut (Feferman, S; Mints, G)

PHIL 355. Logic and Social Choice — Topics in the intersection of social choice theory and formal logic. Voting paradoxes, impossibility theorems and strategic manipulation, logical modeling of voting procedures, preference vs. judgment aggregation, role of language in social choice, meta-theory of social choice. May be repeated for credit. Prerequisite: 151 or consent of instructor.
4 units, Win (Pauly, M)

PHIL 356. Applications of Modal Logic — Applications of modal logic to knowledge and belief, and actions and norms. Models of belief revision to develop a dynamic doxastic logic. A workable modeling of events and actions to build a dynamic deontic logic on that foundation.
3 units, not given this year

PHIL 358. Logic, Language, and Information — (Formerly 298.) Logical systems for analyzing information structures, communication, and other cognitive actions. Special topics: systems for information update; logic and game theory. Prerequisite: 169 or equivalent background in modal logic.
3 units, Spr (van Benthem, J)

PHIL 359. Advanced Modal Logic — Mathematical analysis of modal systems, including bisimulation and expressive power, correspondence theory, algebraic duality, completeness and incompleteness, and extended modal logics, up to guarded fragments of first-order logic, fixed-point logics, and second-order logic. Prerequisite: 151, 154/254, or equivalent background.
4 units, Spr (van Benthem, J)

PHIL 360. Core Seminar in Philosophy of Science — Limited to first- and second-year Philosophy Ph.D. students.
4 units, Spr (Longino, H)

PHIL 365. Seminar in Philosophy of Science: Structural Realism — This recent version of scientific realism and its differences with standard realism and antirealism. Historical antecedents in Hertz, Poincaré, Russell, Eddington, and Weyl.
4 units, not given this year
PHIL 370. Core Seminar in Ethics—Limited to first- and second-year students in the Philosophy Ph.D. program.
4 units, alternate years, not given this year

PHIL 372. Problems in Kantian Ethics—May be repeated for credit.
4 units, not given this year

PHIL 372C. Graduate Seminar: Global Justice—(Same as POLISCI 432.) The applicability of the idea of justice to global politics; the foundations and substance of human rights; problems of accountability, democracy, and the rule of law in global governance; and issues of distributive justice.
5 units, Spr (Cohen, J)

PHIL 374. Valuing—What is it to value something? How is valuing related to desiring, judging something to be valuable, caring, the emotions, or having policies? What is the relation between valuing and the will? Are there reasons for valuing things or pursuing what is valued? Readings from contemporary literature, including Bratman, Frankfurt, Harman, Helm, Raz, Scheffler, and Velleman. May be repeated for credit.
4 units, Aut (Jaworska, A)

PHIL 374C. Democracy and the Constitution—(Same as POLISCI 434.) Connections between democratic theory and constitutional theory. Sources include literature from political philosophy, constitutional law, and jurisprudence, and arguments about freedom of expression, campaign finance, legislative apportionment, and privacy. Readings from Scalia, Freyer, Ely, Ackerman, Dahl, Habermas, Dworkin, Przeworski, Riker, and Schumpeter. Non-Law enrollment limited to 10 chosen by lottery.
3 units, Win (Cohen, J)

PHIL 376. Agency and Personal Identity—How philosophical theories of agency interact with philosophical accounts of personal identity. Readings include David Velleman and Harry Frankfurt.
4 units, not given this year

PHIL 377. Topics in Democratic Theory—(Same as POLISCI 333.) Modern approaches to democratic theory including liberal, communitarian, republican, and participatory theories beginning with the works of Locke, Rousseau, and Mill. Writers: John Rawls, Ronald Dworkin, Jeremy Waldron, Joshua Cohen, Habermas, Petit, Iris Marion Young, Ian Shapiro, and Amy Gutman.
3-5 units, not given this year

PHIL 378. Problems in Medical Ethics—Focus is on recent philosophical work concerning the moral status of non-paradigmatic human beings such as fetuses or Alzheimer’s patients, and non-ideal conditions of decision making such as concretized emotions or exploitation. Prerequisite: 170 or equivalent.
4 units, not given this year

PHIL 379. Graduate Seminar in Metaethics—Theories about the meaning of ethical terms and the content of ethical judgments. Do these theories fit with best accounts of human agency and practical deliberation? Readings from recent literature. Prerequisites: 173B/273B, 181, 187/287 or equivalent.
4 units, not given this year

PHIL 380. Core Seminar in Metaphysics and Epistemology—Limited to first- and second-year students in the Philosophy Ph.D. program.
4 units, alternate years, not given this year

PHIL 381. Core Seminar in Philosophy of Language—Limited to first- and second-year students in the Philosophy Ph.D. program.
4 units, Aut (Crimmins, M)

PHIL 383. Philosophy of Mind Seminar: The Epistemology of Mind—First-person/third-person asymmetries in knowledge, especially of propositional attitudes. Topics include motivated belief, epistemic akrasia, and Moore’s paradox. May be repeated for credit.
4 units, Win (Lawlor, K)

PHIL 384. Seminar in Metaphysics and Epistemology—Language, metaphysics, and literature. The extent to which contemporary philosophy of language and its metaphysics provides tools for understanding issues that arise in literature, such as the status of fictional entities, the role of intention in literary interpretation, and metaphor. May be repeated for credit.
4 units, Aut (Sheehan, T)

PHIL 385B. Topics in Metaphysics and Epistemology—Readings from recent literature. Prerequisites: 173B/273B, 181, 187/287 or equivalent.
4 units, Aut (Sheehan, T)

PHIL 386. Subjectivity—Readings from Husserl and others in the phenomenological tradition, and recent work on intentionality and consciousness by philosophers and cognitive scientists.
4 units, not given this year

PHIL 386C. Subjectivity—Continuation of 386B.
4 units, Aut (Follesdal, D; Perry, J)

PHIL 387. Shared Agency—Contemporary work. May be repeated for credit.
4 units, Win (Bratman, M)

PHIL 387S. Practical Reasons and Practical Reasoning—Attempts to develop alternatives to Humean, instrumentalist conceptions of practical reasoning, and alternatives to Humean, non-cognitivist views of practical reasons. Readings include Aurel Kolnai, Bernard Williams, David Wiggins, Joseph Raz, Michael Bratman, Elijah Millgram, and T.M. Scanlon.
4 units, Spr (Seidman, J)

PHIL 388. Normativity—May be repeated for credit.
4 units, Spr (Taylor, K)

PHIL 450. Thesis
1-15 units, Aut, Win, Spr, Sum (Staff)

PHIL 470. Proseminar in Moral Psychology—Restricted to Philosophy doctoral students. May be repeated for credit.
4 units, Aut (Bratman, M)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

CLASSGEN 35. Becoming Like God: An Introduction to Greek Ethical Thought
3-5 units, Win (Nightingale, A)

CLASSGEN 133. Invention of Science
3-5 units, Aut (Netz, R)

CLASSGEN 212. Mimesis in Greek Poetry and Philosophy
4-5 units, Spr (Nightingale, A; Peponi, A)

FRENGEN 256E. Political Anthropology from Rousseau to Freud
3-5 units, Spr (Dupuy, J)

MATH 161. Set Theory
3 units, Win (Young, M)

POLISCI 130A/330A. History of Political Thought I—(Same as CLASSHIS 133/333.)
5 units, Win (Ober, J)

POLISCI 132. Ethics of Political Animals—(Same as CLASSHIS 132, ETHICSOC 132X.)
5 units, Spr (Ober, J)

POLISCI 436. Rational Choice
5 units, Spr (Stone, P)

RELIGST 244. St. Augustine’s Confessions and the Early Dialogues—(Same as HUMNTIES 196Z.)
5 units, Win (Sheehan, T)

RELIGST 278/378. God, the Self, and Heidegger
4 units, Aut (Sheehan, T)
PHYSICS

Emeriti: (Professors) Stanley S. Hanna, William A. Little, David M. Ritson, H. Alan Schwettman, Peter A. Sturrock (Applied Physics), Richard Taylor (SLAC); (Professor, Research) John P. Turneaure; (Professors, Courtesy) Robert Wagoner,* Mason R. Yearian

Chair: Stanley G. Wojcicki

Associate Chair: Patricia Burchat

Director of Graduate Study: Sarah Church

Director of Undergraduate Study: Roger R. Romani

Associate Professors: Tom Abel, Sarah Church, Kathryn Moler

Assistant Professors: Steve Allen, David Goldhaber-Gordon, Hari Manoharan, Risa Wechsler

Professors (Research): John A. Lipa, Phillip H. Scherrer, Todd I. Smith

Lecturers: John Beck, Alexander Kosovichev, Gregoriz M. Madejski, Rick Pam

Consulting Professor: Richard N. Zare

Consulting Professors: Gerald Fisher, Alan Title, Gareth Williams

Visiting Professor: Daniel Arovas, A. John Berlinsky, Catherine Kallin,

* Recalled to active duty.

Phone: (650) 723-4344

Web Site: http://www.stanford.edu/dept/physics

Courses in Physics have the subject code PHYSICS. For a complete list of subject codes, see Appendix.

The Russell H. Varian Laboratory of Physics, the nearby W. W. Hansen Experimental Physics Laboratory (HEPL), the E. L. Ginzton Laboratory, and the Geballe Laboratory for Advanced Materials (GLAM) together house a range of physics activities from general courses through advanced research. Ginzton Lab houses research on optical systems, including quantum electronics, metrology, optical communication and development of advanced lasers. GLAM houses research on novel and nanopatterned materials, from high-temperature superconductors and magnets to organic semiconductors, subwavelength photon waveguides, and quantum dots. GLAM also supports the materials community on campus with a range of characterization tools: it is the site for the new Stanford Nanocharacterization Lab (SNL) and the NSF-sponsored Center for Probing the Nanoscale (CPN). The Stanford Linear Accelerator Center (SLAC) is just a few miles from the Varian Laboratory. SLAC is a high-energy physics lab with a two-mile-long linear accelerator that can accelerate electrons and positrons up to 50 GeV, and produce highly polarized electron beams. The PEP-II asymmetric-energy electron-positron storage ring is used to study CP violation in the B meson system. The Stanford Synchrotron Radiation Laboratory (SSRL) uses intense x-ray beams produced with another smaller storage ring on the SLAC site. Construction of the world’s first X-ray free electron laser, called the Linac Coherent Light Source, has started at SLAC. The facility is expected to be operational in 2009.

The Ginzton Laboratory, HEPL, GLAM, SLAC, and SSRL are listed in the “Academic Programs and Centers, Independent Research Laboratories, Centers, and Institutes” section of this bulletin. Students may also be interested in research and facilities at two other independent labs: the Center for Integrated Systems, focused on electronics and nanofabrication; and the Clark Center, a new interdisciplinary biological sciences laboratory.

The Kavli Institute for Particle Astrophysics and Cosmology (KIPAC), formed jointly with the Stanford Linear Accelerator Center (SLAC), provides a focus for theoretical, observational, and instrumental research programs, including the Gamma Ray Large Area Space Telescope (GLAST) and the Large Synoptic Survey Telescope (LSST). Stanford is a member of the Hobby-Eberly Telescope Consortium, operating an innovative 9.2 meter-equivalent telescope at the McDonald Observatory in Texas. The CDMS (cryogenic dark matter search) experiment is operated in an underground laboratory on the Stanford campus and in the Soudan mine in Minnesota. These are research opportunities for students in this growing interdisciplinary field.

The Stanford Institute for Theoretical Physics is devoted to the investigation of basic structure of matter (string theory, M-theory, quantum cosmology, condensed matter physics).

The Physics Library, a center for the reading and study of physics and astronomy at all levels, includes print and electronic access to current subscriptions and back sets of important journals together with textbooks, dissertations, scholarly monographs, and the collected works of the most eminent physicists.

Course work is designed to provide students with a sound foundation in both classical and modern physics. Students who wish to specialize in astronomy, astrophysics, or space science should also consult the “Astronomy Course Program” section of this bulletin.

Three introductory series of courses include labs in which undergraduates carry out individual experiments. The Intermediate and Advanced Physics Laboratories offer facilities for increasingly complex individual work. Laboratories provide students with a sound basis for more advanced laboratory work, including the conception, design, and fabrication of laboratory equipment. Undergraduates are also encouraged to participate in research; most can do this through the honors program and/or the summer research program.

Graduate students find opportunities for research in the fields of astrophysics, particle astrophysics, cosmology, experimental particle physics, theoretical particle physics, intermediate energy physics, low temperature physics, condensed matter physics, materials research, atomic physics, laser physics, quantum electronics, coherent optical radiation, novel imaging technologies, and biophysics. Faculty advisers are drawn from many departments, including Physics, Applied Physics, Materials Science and Engineering, Electrical Engineering, and Biological Sciences. Opportunities for research are also available with the faculty at SLAC in the areas of theoretical and experimental particle physics, particle astrophysics, cosmology, and accelerator design.

The number of graduate students admitted to the Department of Physics is strictly limited. Students should submit applications by December 14 for the following Autumn Quarter. Graduate students may normally enter the department only at the beginning of Autumn Quarter.

UNDERGRADUATE PROGRAMS

The study of physics is undertaken by three principal groups of undergraduates: those including physics as part of a general education; those preparing for careers in professional fields that require a knowledge of physics, such as medicine or engineering; and those preparing for careers in physics or related fields, including teaching and research in colleges and universities, research in federally funded laboratories and industry, and jobs in technical areas. Physics courses numbered below 100 are intended to serve all three of these groups. The courses numbered above 100 meet the needs mainly of the third group, but also of some students majoring in other branches of science and in engineering.

ENTRY-LEVEL SEQUENCES

The Department of Physics offers three-year-long, entry-level physics sequences, the PHYSICS 20, 40 (formerly 50), and 60 series. The first of these is non-calculus-based, and is intended primarily for those who are majoring in the biological sciences. Such students with AP credit, particularly those who are considering research careers, may wish to consider taking the PHYSICS 20 or 40 series, rather than using AP placement. These introductory series provide a depth and emphasis on problem solving that is of significant value in biological research, which today involves considerable physics-based technology.

For those intending to major in engineering or the physical sciences,
or simply wishing a stronger background in physics, the department offers the PHYSICS 40 and 60 series. Either of these satisfy the entry-level physics requirements of any Stanford major. The 60 series is intended for those who have already taken a Physics course at the level of the 40 series, or at least have a strong background in mechanics, some background in electricity and magnetism, and a strong background in calculus. The PHYSICS 40 series begins with mechanics in Winter Quarter, electricity and magnetism in Spring Quarter, and light and heat in Autumn Quarter. While it is recommended that most students begin the sequence with mechanics (PHYSICS 41) in Winter Quarter, those who have had strong physics preparation in high school (such as a score of at least 4 on the Physics Advanced Placement C exam) may start the sequence with PHYSICS 45 in Autumn Quarter.

**BACHELOR OF SCIENCE**

A calculus-based entry-level series is required, either PHYSICS 61, 63, 64, 65, 67, or 41, 43, 44, 45, 46 (or preferably 67 rather than 44). Students who take the PHYSICS 40 series take PHYSICS 70, which covers the foundations of modern physics. This material is incorporated into the PHYSICS 60 series beginning in 2005-06. Students taking the PHYSICS 60 series in 2005-06 or after do not take PHYSICS 70; instead, they must take one advanced Physics elective (100-level or higher). In addition, the following more advanced courses are required: PHYSICS 105, 107 (WIM), 108, 110, 120, 121, 130, 131, 170, and 171; MATH 51, 52, 53, 131; one additional Mathematics course numbered 100 or higher, or PHYSICS 112, MATH 11H, 52H, and 53H may substitute for MATH 51, 52, and 53. It is strongly recommended that students intending to complete a Ph.D. in Physics also take PHYSICS 113, 134, and one or more of the following, depending upon their interests: PHYSICS 152, 153A,B, 160, 161, 172, 181, 204. PHYSICS 113 is designed to be taken in parallel with 110. The department advises the study of some computer science such as CS 106.

Mathematics and Physics courses taken to satisfy the department’s major requirements cannot be taken on a credit/no credit basis. Prospective Physics majors are also advised to take PHYSICS 59, Current Research Topics, in their freshman or sophomore year.

To decide which introductory sequence is appropriate, students contemplating majoring in Physics are urged to consult with the instructor of PHYSICS 61, 41 or 45, or the Director of Undergraduate Study, at the earliest possible date to see which sequence is the most suitable. Students who begin taking an entry-level Physics course after their freshman year and wish to major in Physics are generally advised to take the PHYSICS 61, 63, 65 sequence, provided they have previously taken MATH 41. For advanced placement advice, see http://registrar.stanford.edu/students/academics/adv_place.htm.

Undergraduates are offered help with physics problems in the department tutoring center, the Reference Frame, which is staffed Monday through Thursday.

**REQUIRED COURSES FOR MAJORS**

For sample schedules illustrating how to complete the Physics major, see http://www.stanford.edu/dept/physics/academics/undergrad.html/sample.

### ADVANCED SEQUENCE

| PHYSICS 130,131, Quantum Mechanics | A,W 8 |
| PHYSICS 134, Advanced Topics in Quantum Mechanics| | |
| PHYSICS 170,171, Statistical Mechanics | A,W 8 |
| and one advanced Mathematics elective (100 level or higher) or PHYSICS 112 | |

One advanced Physics elective (100 level or higher) required only for students who do take PHYSICS 70

* These courses are not required, but 113 and 134 are recommended for students who intend to complete a Ph.D. in Physics.

** Those wishing to do physics theory in graduate school may wish to take a collection of courses in the Department of Mathematics rather than PHYSICS 112.

### CONCENTRATIONS IN PHYSICS

The primary purpose of concentrations in the Physics major is to provide consistent and more formal advising to students who want to concentrate in a particular area of physics during their undergraduate education, or prepare for future studies (e.g., graduate studies) in a particular area of physics. Physics majors are not required to choose a concentration and a concentration does not add any formal requirements to the Physics major. Upon graduation, students will receive a certificate of completion of a concentration.

Students seeking further advice on a given concentration should contact the professor whose name appears next to the respective title of each section below.

#### A. APPLIED PHYSICS (Hari Manoharan)

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

**Solid State:**

PHYSICS 172. Physics of Solids
APPPHYS 270. Magnetism and Long Range Order in Solids
MATSCI 195. Waves and Diffraction in Solids

**Biophysics:**

APPPHYS 192. Introductory Biophysics
APPPHYS 231A. Introduction to Lasers

**Lab Methods:**

APPPHYS 207, 208. Laboratory Electronics, Analog and Digital
APPPHYS 304. Lasers Laboratory

#### B. ASTROPHYSICS (Roger Romani, Sarah Church)

Requirements:

PHYSICS 100. Introduction to Observational and Laboratory Astronomy
PHYSICS 160. Introduction to Stellar and Galactic Astrophysics
PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology

Plus one elective from below or an honors thesis:

PHYSICS 211. Continuum Mechanics
PHYSICS 260. Introduction to Astrophysics and Cosmology
PHYSICS 262. Introduction to Gravitation
PHYSICS 312. Basic Plasma Physics

**(prerequisites are PHYSICS 210 and PHYSICS 220)**

#### C. BIOPHYSICS (David Goldhaber-Gordon)

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

APPPHYS 192/292. Introductory Biophysics
BIOPHYS 202. Biochemistry
BIOPHYS 228. Computational Structure Biology
BIOSCI 141. Biostatistics
BIOSCI 132/232. Advanced Imaging Lab In Biophysics
BIOSCI 135/HUMBIO 132. Biological Clocks
BIOSCI 211. Biophysics of Sensory Transduction
BIOSCI 217. Neuronal Biophysics

CS 273. Algorithms for Structure and Motion In Biology
It is recommended that Physics majors interested in pursuing a career in biophysics consider a minor in Biological Sciences.

**D. GEOPHYSICS (Simon Klemperer, Geophysics)**

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

- GEOPHYS 102. Geosphere
- GEOPHYS 112. Exploring Geosciences with MATLAB
- GEOPHYS 140. Introduction to Remote Sensing
- GEOPHYS 150. General Geophysics and Physics of the Earth
- GEOPHYS 180. Geophysical Inverse Problems
- GEOPHYS 182. Reflection Seismology
- GEOPHYS 190. Near-Surface Geophysics
- GEOPHYS 262. Rock Physics
- GEOPHYS 288. Crustal Deformation

**E. THEORETICAL PHYSICS (Andrei Linde)**

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

- PHYSICS 153A,B. Introduction to String Theory
- PHYSICS 204. Advanced Seminar in Theoretical Physics
- PHYSICS 212. Statistical Mechanics
- PHYSICS 232. Special Topics in Quantum Mechanics
- PHYSICS 252. Introduction to High Energy Physics
- PHYSICS 260. Introduction to Astrophysics and Cosmology
- PHYSICS 262. Introduction to Gravitation
- PHYSICS 330,331,332. Quantum Field Theory
- PHYSICS 351,352. Elementary Particle Physics
- PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology
- PHYSICS 364. Advanced Gravitation

Notes to students taking this concentration:

1. No more than one of the courses should be taken for CR/NC.
2. Students should discuss the choice of courses with members of the Institute for Theoretical Physics and/or their major adviser.

**INDIVIDUALLY DESIGNED MAJOR PROGRAM IN TEACHING PHYSICAL SCIENCE**

This major, a joint effort of the Department of Physics and the Stanford Teacher Education Program, is designed for students to prepare themselves as high school teachers of physics and general science. Students complete 45-47 units of Physics and related Mathematics courses, 40-43 units of course work in other sciences such as the life sciences, chemistry, and geosciences, and in general issues of science, and 9-15 units of concentration and depth courses. Total program units: 94-105. Students interested in this program should consult Professor Patricia Burchat (burchat@stanford.edu, 725-5771), and Frederic Stout, coordinator of the STEP Coterminal Teaching Program in the School of Education (fstout@stanford.edu, 725-6321).

**CORE PHYSICS COURSES:**

*Subject and Catalog Number*  
*Units*

**Mechanics:**
- PHYSICS 41. Mechanics  
- PHYSICS 61. Mechanics and Special Relativity  
- Heat:  
  - PHYSICS 45. Light and Heat  
  - PHYSICS 46. Light and Heat Lab  
- PHYSICS 65. Thermodynamics and Foundations of Modern Physics  
- PHYSICS 67. Introduction to Laboratory Physics  

**Electricity and Magnetism:**
- PHYSICS 43. Electricity and Magnetism  
- PHYSICS 67. Introduction to Laboratory Physics  
- PHYSICS 63. Electricity, Magnetism, and Waves  
- PHYSICS 64. Electricity and Magnetism Lab  
- PHYSICS 105. Analog Electronics (Lab)  

**Wave Motion:**
- PHYSICS 107 Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis (WiMi)  
- Modern Physics (for students who take 40 series):  
- PHYSICS 70. Foundations of Modern Physics  

**Applications:**
- PHYSICS 59. Current Research Topics  
- Mathematics (Physics departmental requirement):  
  - MATH 51, 52, 53. Linear Algebra, Multivariable Calculus, and Ordinary Differential Equations  
  - and a course in Statistics (choose one):  
  - STATS 110. Statistical Methods in Engineering and the Physical Sciences  
  - STATS 116. Theory of Probability  
  - STATS 141. Biostatistics  
  - STATS 166. Statistical Methods in Computational Genetics  
- PHYSICS 191. Introduction to Applied Statistics  

**ADDITIONAL SCIENCE BREADTH COURSES**

**Life Sciences:**
- BIOSCI 41. Genetics, Biochemistry, and Molecular Biology  
- BIOSCI 42. Cell Biology and Animal Physiology  
- BIOSCI 43. Plant Biology, Evolution and Ecology  
- HUMBIO 2A, 2B, 3A, 3B, 4A, 4B

**Chemistry:**
- CHEM 31A and B, or 31X. Chemical Principles  
- CHEM 33. Structure and Reactivity  

**Geosciences:**
- GEOSCI 10. Introduction to Earth Systems  
- PHYSICS 15. The Nature of the Universe  
- PHYSICS 16. Cosmic Horizons  

**General Issues of Science:**
- STS 101. Science, Technology, and Contemporary Society  
- HUMBIO 25, 35, 4S  
- and EDUC 180. Directed Reading in History of Science  

**CONCENTRATION AND DEPTH COURSES**

3 courses (100 level or above) in a single area of concentration  
9-15  
Total units for general science 49-58  
Total units for the Physical Science program ................................................. 94-105

This individually designed major program in Physical Science includes all the elements of a Program of Subject Matter Preparation for Secondary Teachers of Physics and General Science that has been approved by the California Commission on Teacher Credentialing (CCTC). Students who complete the program are exempt from taking the CSET examination in Physics and General Science for admission to the Stanford Teacher Education Program (STEP) or any other accredited secondary teacher education program in California. Full details of the CCTC-approved program may be found at http://ed.stanford.edu/suse/programs-degrees/program-co-terminal-step.html. Note: the Stanford individually designed major program in Physical Science requires course work beyond the CCTC-approved program, specifically 9-15 units of depth courses in a field of concentration: Physics, Astrophysics, Biological Sciences, Chemistry, Earth Sciences, Human Biology, or Computational Mathematics. See the adviser in the Physics department or the School of Education for more details.

**MINORS**

Students who take the 20 or 40 series at Stanford in support of their major may count those units toward the minor. Those who have fulfilled Physics requirements at the 20 or 40 series level by enrollment at another accredited university, or through advanced placement credits, may count credits towards 21/22 and 23/24, or 41 and 43/44, respectively. 25/26, or 45/46 for a technical minor, must be taken at Stanford even if similar material has been covered elsewhere. With the 21/22/23/24 or 41/43/44 exception noted above, all courses for the minor must be taken at Stanford University for a letter grade, and a grade of "C" or better must be received for all units applied toward the minor. The minor declaration deadline is three quarters before graduation, i.e., beginning of Autumn Quarter if the student is graduating at the end of Spring Quarter.

**MINOR IN PHYSICS**

An undergraduate minor in Physics requires a minimum of 27 units with the following course work:

*Non-Technical*—For students whose majors do not require the PHYSICS 40 or 60 series:
Subject and Catalog Number | Units | PHYSICS 21, 22, 23, 24, 25, and 26 | 12. Any combination of Physics courses totaling 15 units or greater | 15 | Total | 37

Technical — For students whose majors require the PHYSICS 40 or 60 series:

Subject and Catalog Number | Units | PHYSICS 41, 43/44, 45/46 and PHYSICS 70 | 18

or PHYSICS 61, 63/64, 65/67 | 15

at least three PHYSICS courses numbered 100 or above | 9-12

Total | 27-30

MINOR IN ASTRONOMY

Students wishing to pursue advanced work in astrophysical sciences should major in physics and concentrate in astrophysics. However, students outside of physics with a general interest in astronomy may organize their studies by completing one of the following minor programs.

An undergraduate minor in astronomy requires the following courses:

Non-Technical — For students whose majors do not require the PHYSICS 40 series:

Subject and Catalog Number | Units | PHYSICS 21, 23, 25/26 10

PHYSICS 50 or 100 (Observatory Lab) 3-4

Choose two courses from the following:

PHYSICS 15, 16, 17 6

Total | 19-20 (9-10 in addition to the 20 series)

Technical — For students whose majors require the PHYSICS 40 series:

Subject and Catalog Number | Units | PHYSICS 41, 43, 45/46 | 13

PHYSICS 70 | 4

PHYSICS 100 (Observatory Lab) | 4

Choose two courses from the following:

PHYSICS 160,* 161,* 164* | 6

Total | 27 (14 in addition to the 40 series)

* With approval of the minor adviser and the chair of the Astronomy Course Program, 3 units of PHYSICS 169, Independent Study in Astrophysics, may be substituted for one course of astronomy (e.g., 160, 161, 164). This independent study can either be constituted as a directed reading program or participation in a research project. Students are also strongly encouraged to take the electricity and magnetism/optics lab of the appropriate Physics series (24, 44) for 1 additional unit.

To be accepted to the minor program, the student must obtain an adviser from the faculty in the Astronomy Course Program.

HONORS PROGRAM

The department offers a program leading to the degree of Bachelor of Science in Physics with Honors as follows:

1. Students must submit an Honors Program Proposal to the Undergraduate Program Coordinator once they find a physics project, either theoretical or experimental, in consultation with individual faculty members. Proposal forms are available from the Physics undergraduate office and must be submitted by November 1 of the academic year in which the student plans to graduate.

2. Credit for the project is assigned by the adviser within the framework of PHYSICS 205. The work done in the honors program may not be used as a substitute for regular required courses.

3. Both a written report and a presentation of the work at its completion is required for honors. By mid-May, each honors candidate is required to present his or her project at the department’s Honors Presentations. (This event is publicized and open to the general public. The expectation is that the student’s adviser, second reader, and all other honors candidates attend.)

4. The decision as to whether a given independent study project does or does not merit award of honors is made jointly by the student’s honors adviser and the second reader for the written thesis. This decision is based on the quality of the student’s honors work and other work in physics.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The department does not offer a coterminous degree program, or a separate program for the M.S. degree, but this degree may be awarded for a portion of the Ph.D. degree work.

University requirements for the master’s degree, discussed in the “Graduate Degrees” section of this bulletin, include completion of 45 units of unduplicated course work after the bachelor’s degree. Among the department requirements are a grade point average (GPA) of at least 3.0 (B) in courses 210 or 211, 220, 221, 230, 231, or their equivalents. Up to 6 of these required units may be waived on petition if a thesis is submitted.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin. The minimum department requirements for the Ph.D. degree in Physics consist of completing all courses listed below, and at least one quarter from each of two subject areas (among biophysics, condensed matter, quantum optics and atomic physics, astrophysics and gravitation, and nuclear and particle physics) chosen from courses with numbers above 232, except 290 and 294. The requirements in the following list may be fulfilled by passing the course at Stanford or passing an equivalent course elsewhere: 210 or 211, 220, 221, 230, 231, 290, 294. A grade point average (GPA) of at least 3.0 (B) is required in all the courses taken toward the degree.

All Ph.D. candidates must have math proficiency equivalent to the following Stanford math courses: 106, 113, 114, 131, 132.

Prior to making an application for candidacy, each student is required to pass a comprehensive qualifying examination on undergraduate physics. This closed book exam is given in the month of January immediately following the student’s arrival at Stanford. This is a written examination held over two days, covering particle mechanics, electricity and magnetism, quantum mechanics, statistical mechanics, thermodynamics, special relativity, and general physics. A thesis proposal must be submitted during the third year. In order to assess the direction and progress toward a thesis, an oral report and evaluation are required during the fourth year. After completion of the dissertation, each student must take the University oral examination (defense of dissertation).

Three quarters of teaching (including a demonstrated ability to teach) are a requirement for obtaining the Ph.D. in Physics.

Students interested in applied physics and biophysics research should also take note of the Ph.D. granted independently by the Department of Applied Physics and by the Biophysics Program. Students interested in astronomy, astrophysics, or space science should also consult the “Astronomy Course Program” section of this bulletin.

PH.D. MINOR

Minors in Physics must take at least six courses numbered 210 to 232 among the 20 required units. All prospective minors must obtain approval of their Physics course program from the Physics Graduate Study Committee at least one year before award of the Ph.D.

FELLOWSHIPS AND ASSISTANTSHIPS

The Department of Physics makes an effort to support all its graduate students through fellowships, teaching assistantships, research assistantships, or a combination of sources. Information on application procedures is mailed with the admission information.

TEACHING CREDENTIALS

For information on teaching credentials, consult the “School of Education” section of this bulletin or address an inquiry to the Credential Administrator, Office of Academic Services, Cubberley Building, School of Education. Also see the earlier section on the Individually Designed Major program in Teaching Physical Science.
There are four series of beginning courses. One course from the teen series (11, 15, 16, 17, 19) is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics. The 20 series (21, 22, 23, 24, 25, 26) is recommended for general students and for students preparing for medicine or biology. The 40 series (41, 43, 44, 45, 46; formerly the 50 series) is for students of engineering, chemistry, geology, mathematics, or physics. The advanced freshman series (61, 63, 64, 65, 67) is for students who have had strong preparation in physics and calculus in high school. Students who have had adequate background and wish to major in physics should take this introductory sequence.

The 20, 40, and 60 series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments correlated with the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the 40 and 60 series.

Courses beyond 99 are numbered in accordance with a three-digit code. The first digit indicates the approximate level of the course:
100 undergraduate courses
200 first-year graduate courses
300 more advanced courses
400 research, special, or current topics

The second digit indicates the general subject matter:
00 laboratory
10,20,30 general courses
40 nuclear physics
50 elementary particle physics
60 astrophysics, cosmology, gravitation
70 condensed matter physics
80 optics and atomic physics
90 miscellaneous courses

UNDERGRADUATE

WIM indicates that the course satisfies the Writing in the Major requirements.

PHYSICS 11N. The Basic Rules of Nature—Stanford Introductory Seminar. Preference to freshmen. The development by physicists of descriptions of the behavior of matter on microscopic scales and scales characteristic of the Universe as a whole, including quantum mechanics, particle physics, and general relativity. Promising approaches that physicists are using to shed light on remaining mysteries, including string theory and M theory. Discussions are semiquantitative. Prerequisite: high school physics or equivalent. GER: DB-NatSci
3 units, Spr (Shenker, S)

PHYSICS 15. The Nature of the Universe—The structure, origin, and evolution of the major components of the Universe: planets, stars, and galaxies. Emphasis is on the formation of the Sun and planets, the evolution of stars, and the structure and content of our galaxy. Topics: cosmic enigmas (dark matter, black holes, pulsars, x-ray sources), star birth and death, and the origins of and search for life in the solar system and beyond. GER: DB-NatSci
3 units, Sum (Staff)

PHYSICS 16. Cosmic Horizons—The origin and evolution of the universe and its contents: stars, galaxies, quasars. The overall structure of the cosmos and the physical laws that govern matter, space, and time. Topics include the evolution of the cosmos from its primeval fireball, the origin of the elements and the formation of stars and galaxies, exotic astronomical objects (black holes, quasars, supernovae, and gamma ray bursts), dark matter, inflationary cosmology and the fate of the cosmos. GER: DB-NatSci
3 units, Win (Linde, A)

PHYSICS 17. Black Holes—Newton’s and Einstein’s theories of gravitation and their relationship to the predicted properties of black holes. Their formation and detection, and role in galaxies and high-energy jets. Hawking radiation and aspects of quantum gravity. GER: DB-NatSci
3 units, Spr (Blandford, R)

PHYSICS 18N. Revolutions in Concepts of the Cosmos—Stanford Introductory Seminar. Preference to freshmen. Faculty led dialogue. The evolution of the concept of the cosmos and its origin, from the Copernican heliocentric model to the current view based on Hubble’s discovery of expansion of the Universe. Recent cosmological observations and the relevance of laboratory experiments in particle physics. One night of observations at the Stanford Observatory. Enrollment limited to 20 in one section. GER: DB-NatSci
2 units, Win (Abel, T)

PHYSICS 19. How Things Work: An Introduction to Physics—The principles of physics through familiar objects and phenomena, including gyroscopes, airplanes, refrigerators, lightning, radio, TV, microwave ovens, and fluorescent lights. Estimates of real quantities from simple calculations. Prerequisite: high school algebra and trigonometry. GER: DB-NatSci
3 units, Win (Fisher, I)

PHYSICS 21. Mechanics and Heat—For biology, social science, and premedical students. Introduction to Newtonian mechanics, fluid mechanics, theory of heat. Calculus is used as a language and developed as needed. Prerequisite: working knowledge of elementary algebra and trigonometry. GER: DB-NatSci
3 units, Aut (Linde, A)

PHYSICS 21S. Mechanics and Heat w/laboratory—Equivalent to 21 and 22. GER: DB-NatSci
4 units, Sum (Fisher, G)

PHYSICS 22. Mechanics and Heat Laboratory—Pre- or corequisite: 21. 1 unit, Aut (Linde, A)

PHYSICS 23. Electricity and Optics—Electric charges and currents, magnetism, induced currents; wave motion, interference, diffraction, geometrical optics. Prerequisite: 21. GER: DB-NatSci
3 units, Win (Woiciksi, S)

PHYSICS 24. Electricity and Optics Laboratory—Pre- or corequisite: 23. 1 unit, Win (Woicikci, S)

PHYSICS 25. Modern Physics—Introduction to modern physics. Relativity, quantum mechanics, atomic theory, radioactivity, nuclear reactions, nuclear structure, high energy physics, elementary particles, astrophysics, stellar evolution, and the big bang. Prerequisite: 23 or consent of instructor. GER: DB-NatSci
3 units, Spr (Burchat, P)

4 units, Sum (Fisher, G)

PHYSICS 26. Modern Physics Laboratory—Pre- or corequisite: 25. 1 unit, Spr (Burchat, P)

PHYSICS 28. Mechanics, Heat, and Electricity—For biology, social science, and premedical students. The sequence 28 and 29 fulfills, in ten weeks, the one-year college physics requirement with lab of most medical schools. Topics: Newtonian mechanics, fluid mechanics, theory of heat, electric charges, and currents. Calculus is used as a language and developed as needed. Prerequisite: working knowledge of elementary algebra and trigonometry. GER: DB-NatSci
6 units, Sum (Fisher, G)
PHYSICS 29. Electricity and Magnetism, Optics, Modern Physics — Magnetism, induced currents; wave motion, optics; relativity, quantum mechanics, atomic theory, radioactivity, nuclear structure and reactions, elementary particles, astrophysics, and cosmology. Prerequisite: 28. GER: DB-NatSci
   6 units, Sum (Fisher, G)

PHYSICS 41. Mechanics — (Formerly 53.) Vectors, particle kinematics and dynamics, work, energy, momentum, angular momentum; conservation laws; rigid bodies; mechanical oscillations and waves. Discussions based on use of calculus. Corequisite: MATH 19 or 41, or consent of instructor. GER: DB-NatSci
   4 units, Win (Susskind, L)

   1 unit, Win (Burchat, P)

PHYSICS 43. Electricity and Magnetism — (Formerly 55.) Electrostatics, Coulomb’s law, electric fields and fluxes, electric potential, properties of conductors, Gauss’s law, capacitors and resistors, DC circuits; magnetic forces and fields, Biot-Savart law, Faraday’s law, Ampere’s law, inductors, transformers, AC circuits, motors and generators, electric power, Galilean transformation of electric and magnetic fields, Maxwell’s equations; limited coverage of electromagnetic fields and special relativity. Prerequisites: 41 (formerly 53), and MATH 19 or 41. Corequisite: MATH 20 or 42, or consent of instructor. GER: DB-NatSci
   4 units, Spr (Osheroff, D)

PHYSICS 44. Electricity and Magnetism Lab — (Formerly 56.) Pre- or corequisite: 43.
   1 unit, Spr (Osheroff, D)

PHYSICS 45. Light and Heat — (Formerly 51.) Reflection and refraction, lenses and lens systems; polarization, interference, and diffraction; temperature, properties of matter and thermodynamics, introduction to kinetic theory of matter. Prerequisites: high school physics or 41 (formerly 53), and MATH 19 or 41, or consent of instructor. GER: DB-NatSci
   4 units, Aut (Michelson, P), Sum (Staff)

PHYSICS 45N. Advanced Topics in Light and Heat — Stanford Introductory Seminar. Preference to freshmen. Expands on the subject matter presented in 45 to include optics and thermodynamics in everyday life, and applications from modern physics and astrophysics. Corequisite: 45 or advanced placement.
   1 unit, Aut (Romani, R)

PHYSICS 46. Light and Heat Laboratory — (Formerly 52.) Pre- or corequisite: 45.
   1 unit, Aut (Michelson, P), Sum (Staff)

PHYSICS 50. Astronomy Laboratory and Observational Astronomy — Introduction to observational astronomy emphasizing the use of optical telescopes. Observations of stars, nebulae, and galaxies in laboratory sessions with 16- and 24-inch telescopes at the Stanford Observatory. No previous physics required. Limited enrollment. Lab. GER: DB-NatSci
   3 units, not given 2006-07

PHYSICS 59. Current Research Topics — Recommended for prospective Physics majors. Presentations of current research topics by faculty with research interests related to physics, often including tours of experimental laboratories where the research is conducted.
   1 unit, Aut (Gatta, R)

PHYSICS 61, 63, 65. Advanced Freshman Physics — For students with a strong high school mathematics and physics background contemplating a major in Physics or interested in a rigorous treatment of physics. The fundamental structure of classical physics including Newtonian mechanics, electricity and magnetism, waves, optics, and thermodynamics. Foundations of modern physics including special relativity, atomic structure, quantization of light, matter waves and the Schrödinger equation. Diagnostic quiz in calculus and conceptual Newtonian mechanics at first meeting to decide if course is appropriate; some students may benefit more from the 40 (formerly 50) series. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable); pre- or corequisite for 61: MATH 51; for 63: MATH 52; for 65: MATH 53. GER: DB-NatSci
   4 units, Aut (Goldhaber-Gordon, D)

PHYSICS 61N. Applications of Electromagnetism — Stanford Introductory Seminar. Preference to freshmen. Possible topics include tidal forces, gyroscopic effects, fractal dimension, and introduction to chaos. Corequisite: 61.
   1 unit, Aut (Gatta, R)

PHYSICS 64. Advanced Electromagnetism Laboratory — Experimental work in mechanics, electricity and magnetism. Corequisite 63.
   1 unit, Win (Allen, S)

PHYSICS 65. Thermodynamics and Foundations of Modern Physics — Required for Physics majors who completed the 40 series, or the PHYSICS 60 series prior to 2005-06. Special relativity, the experimental basis of quantum theory, atomic structure, quantization of light, matter waves, Schrödinger equation. Prerequisites: 41, 43. Corequisite: 45. Recommended: prior or concurrent registration in MATH 53. GER: DB-NatSci
   4 units, Aut (Kasevich, M)

PHYSICS 80N. The Technical Aspects of Photography — Stanford Introductory Seminar. Preference to freshmen. For those with some background in photography. How cameras record photographic images on film and electronically. The technical photographic processes which the photographer must understand in order to use cameras effectively. Camera types and their advantages, how lenses work and their limitations, camera shutters, light meters and the proper exposure of film, film types, depth of focus, control of the focal plane and perspective, and special strategies for macro and night photography. View cameras and range finder technical cameras. Students exploit the flexibility of these formats to take photographs around campus. Prerequisite: knowledge of elementary physics.
   3 units, Win (Osheroff, D)

   3 units, Aut (Dimopoulos, S)
3 units, Aut (Manoharan, H)

PHYSICS 100. Introduction to Observational and Laboratory Astronomy — For physical science or engineering students. Emphasis is on the quantitative measurement of astronomical parameters such as distance, temperature, mass, composition of stars, galaxies, and quasars. Observation using the 0.4m and 0.6m telescopes at the Stanford Observatory. Limited enrollment. Prerequisites: one year of college physics; prior or concurrent registration in 25, 65, or 70; and consent of instructor. GER: DB-NatSci
4 units, Win (Fetter, A)

PHYSICS 105. Intermediate Physics Laboratory I: Analog Electronics — Analog electronics, from Ohm’s Law and passive circuits to transistor and op amp circuits, with an emphasis on developing practical circuit design skills to prepare undergraduates for laboratory research. Course culminates in a short design project. Minimal use of math and physics, no prior electronics experience assumed beyond introductory physics. Prerequisite: PHYSICS 43 (formerly 55) or 63 or other introductory electricity and magnetism course.
3 units, Win (Kasevich, M)

PHYSICS 106. Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis — Experiments on lasers, Gaussian optics, and atom-light interaction, with emphasis on data and error analysis techniques. Students describe a subset of experiments in scientific paper format. Prerequisites: completion of 40 (formerly 50) or 60 series, 70, and 105. Recommended: 130, prior or concurrent enrollment in 120. WIM
4 units, Win (Kasevich, M)

3 units, Spr (Kapitulnik, A)

4 units, Spr (Gratta, G)

PHYSICS 112. Mathematical Methods of Physics — Theory of complex variables, complex functions, and complex analysis. Fourier series and Fourier transforms. Special functions such as Laguerre, Legendre, and Hermite polynomials, and Bessel functions. The uses of Green’s functions. Covers material of MATH 106 and 132 most pertinent to Physics majors. Prerequisites: MATH 50 or 50H series, MATH 131.
4 units, Win (Fetter, A)

PHYSICS 113. Computational Physics — Numerical methods for solving problems in mechanics, electromagnetic, quantum mechanics, and statistical mechanics. Methods include numerical integration; solutions of ordinary and partial differential equations; solutions of the diffusion equation, Laplace’s equation and Poisson’s equation with relaxation methods; statistical methods including Monte Carlo techniques; matrix methods and eigenvalue problems. Short introduction to MatLab, used for class examples; class projects may be programmed in any language such as C. Prerequisites: MATH 53, prior or concurrent registration in PHYSICS 110, 121. Previous programming experience not required.
4 units, Spr (Cabrera, B)

PHYSICS 120,121. Intermediate Electricity and Magnetism — Vector analysis, electrostatic fields, including multipole expansion; dielectrics. Special relativity and transformation between electric and magnetic fields. Maxwell’s equations. Static magnetic fields, magnetic materials. Electromagnetic radiation, plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation. Wave guides and cavities. Prerequisites: 43 (formerly 55) or 63; concurrent or prior registration in MATH 53 and 131 for 120 and 121, respectively. Recommended: concurrent or prior registration in 112.
4 units, 120: Win (Cabrera, B), 121: Spr (Robertson, N)

PHYSICS 130,131. Quantum Mechanics — The origins of quantum mechanics, wave mechanics, and the Schrödinger equation. Heisenberg’s matrix formulation of quantum mechanics, solutions to one-dimensional systems, separation of variables and the solution to three-dimensional systems, the central field problem and angular momentum eigenstates, spin and the coupling of angular momentum, Fermi and Bose statistics, time-independent perturbation theory. Prerequisites: 70, 110; pre- or corequisites: 120, 121, and MATH 131.
4 units, 130: Aut, 131: Win (Kahn, S)

4 units, Spr (Moler, K)

3 units, Win (Roodman, A)

4 units, not given this year

PHYSICS 153B. Introduction to String Theory II: Open Strings and D-branes — Emergence of gauge theory and connections to particle physics. String thermodynamics and black holes. T-duality, string compactification, and stringy modifications of geometry.
4 units, not given this year

PHYSICS 160. Introduction to Stellar and Galactic Astrophysics — Physics of matter under extreme conditions. Evolution and death of stars. White dwarfs, planetary nebulae, supernovae, neutron stars, pulsars, binary stars, x-ray stars, and black holes. Galactic structure: interstellar medium, molecular clouds, HI and HII regions, star formation and element abundances. Prerequisites: calculus and one year of college physics at the level of the PHYSICS 60 or 40 series and 70.
3 units, Win (Romani, R)

PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology — Observations of the distances and compositions of objects on cosmic scales: galaxies, galaxy clusters, quasars, and diffuse matter at high red shift. Big bang cosmology, physical processes in the early universe, the origin of matter and the elements, inflation, and creation of structure in the Universe. Observational evidence for dark matter and dark energy. Future of the Universe. Prerequisites: calculus and college physics at the level of the 40 series and 70.
3 units, Spr (Michelson, P)

PHYSICS 169A. Independent Study in Astrophysics and Honors Thesis: Selection of the Problem — Description of the problem, its background, work planned in the subsequent two quarters, and development of the theoretical apparatus or initial interpretation of the problem. 1-9 units, Aut (Staff)
PHYSICS 169B. Independent Study in Astrophysics and Honors Thesis: Continuation of Project — Substantial completion of the required computations or data analysis for the research project selected.
3-9 units, Win (Staff)

PHYSICS 169C. Independent Study in Astrophysics and Honors Thesis: Completion of Project — Completion of research and writing of a paper presenting methods used and results.
1-9 units, Spr (Staff)

PHYSICS 170, 171. Thermodynamics, Kinetic Theory, and Statistical Mechanics — The derivation of laws of thermodynamics from basic postulates; the determination of the relationship between atomic substructure and macroscopic behavior of matter. Temperature; equations of state, heat, and internal energy; entropy; reversibility; applications to various properties of matter; and absolute zero and low-temperature phenomena. Prerequisites: 45 (formerly 51) or 65, and MATH 53.
4 units, 170: Aut (Fetter, A), 171: Win (Zhang, S)

3 units, Spr (Fisher, I)

PHYSICS 190. Independent Study — Undergraduate research in experimental or theoretical physics under the supervision of a faculty member. Prerequisites: superior work as an undergraduate Physics major, and consent of instructor.
1-9 units, Aut, Win, Spr, Sum (Laughlin, R; Staff)

PHYSICS 204A. Seminar in Theoretical Physics — Topics of recent interest in theoretical physics: Bose-Einstein condensation, quantum and classical chaos, superfluidity in 2D, and protein folding. Work in the seminar may provide a basis for an honors project in theoretical physics. Prerequisite: 134 or consent of instructor.
3 units, Aut (Doniach, S)

PHYSICS 204B. Seminar in Theoretical Physics — Applications of the Renormalization Group; emphasis is on principles and intuitions.
3 units, Spr (Susskind, L)

PHYSICS 205. Undergraduate Honors Research — Experimental or theoretical project and thesis in Physics under supervision of a faculty member. Planning of the thesis project should begin no later than middle of the junior year. Successful completion of an honors thesis leads to graduation with departmental honors. Prerequisites: superior work in Physics as an undergraduate major and approval of the honors adviser.
1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

3 units, Spr (Kallosh, R)

PHYSICS 211. Continuum Mechanics — Elasticity, fluids, turbulence, waves, gas dynamics, shocks, and MHD plasmas. Examples from everyday phenomena, geophysics, and astrophysics.
3 units, Win (Blandford, R)

3 units, Spr (Peskin, M)

PHYSICS 216. Back of the Envelope Physics — Techniques to make order-of-magnitude estimates of physical effects. Goal is to sharpen physical intuition and promote a synthesis of physics through the application of undergraduate physics to problems, some not included in the standard curriculum. Techniques such as scaling and dimensional analysis. Applications include properties of materials, geophysics, astrophysics and cosmology, biomechanics, and particle physics. Prerequisites: undergraduate mechanics, statistical mechanics, electricity and magnetism, and quantum mechanics.
3 units, Aut (Madejski, G)

3 units, 220: Aut, 221: Win (Church, S)

3 units, Aut (Kivelson, S)

3 units, Win (Kivelson, S)

3 units, Spr (Kivelson, S)

PHYSICS 252. Introduction to High Energy Physics — See 152.
3 units, Win (Roodman, A)

PHYSICS 260. Introduction to Astrophysics and Cosmology — The observed properties and theoretical models of stars, galaxies, and the universe. Physical processes for production of radiation from cosmic sources. Observations of cosmic microwave background radiation. Newtonian and general relativistic models of the universe. Physics of the early universe, nucleosynthesis, baryogenesis, nature of dark matter and dark energy and inflation. Prerequisites: undergraduate physics, 121, and 171 or equivalent.
3 units, Aut (Petrosian, V)

PHYSICS 262. Introduction to Gravitation — Review of special relativity. Introduction to general relativity. Curvature, energy-momentum tensor, Einstein field equations. Newtonian limit of general relativity. Black holes, relativistic stars, gravitational waves, cosmology. Prerequisites: 121 or other courses including special relativity.
3 units, Win (Wagoner, R)
PHYSICS 275. Electrons in Nanostructures — The behavior of electrons in metals or semiconductors at length scales below 1 micron, smaller than familiar macroscopic objects but larger than atoms. Ballistic transport, Coulomb blockade, localization, quantum mechanical interference, and persistent currents. Topics may include quantum Hall systems, spin transport, spin-orbit coupling in nanostructures, magnetic tunnel junctions, Kondo systems, and 1-dimensional systems. Readings focus on the experimental research literature, and recent texts and reviews. Prerequisite: undergraduate quantum mechanics and solid state physics.

3 units, not given this year

PHYSICS 290. Research Activities at Stanford — Required of first-year Physics graduate students; suggested for junior or senior Physics majors for 1 unit. Review of research activities in the department and elsewhere at Stanford at a level suitable for entering graduate students.

1-3 units, Aut (Gratta, G)

PHYSICS 291. Practical Training — Opportunity for practical training in industrial labs. Arranged by student with the research advisor’s approval. A brief summary of activities is required, approved by the research advisor.

3 units, Sum (Staff)

PHYSICS 293. Literature of Physics — Intensive study of the literature of any special topic. Preparation, presentation of reports. If taken under the supervision of a faculty member outside the department, approval of the Physics chair required. Prerequisites: 25 units of college physics, consent of instructor.

1-13 units, Aut, Win, Spr, Sum (Zhang, S; Staff)

1 unit, Aut, Win, Spr (Pam, R)

PHYSICS 301. Astrophysics Laboratory — Seminar/lab. Astronomical observational techniques and physical models of astronomical objects. Observational component uses the 24-inch telescope at the Stanford Observatory and ancillary photometric and spectroscopic instrumentation. Emphasis is on spectroscopic and photometric observation of main sequence, post-main sequence, and variable stars. Term project developing observational equipment or software. Limited enrollment. Prerequisite: consent of instructor.

3 units, not given this year

PHYSICS 312. Basic Plasma Physics — For the nonspecialist who needs a working knowledge of plasma physics for space science, astrophysics, fusion, or laser applications. Topics: orbit theory, the Boltzmann equation, fluid equations, MHD waves and instabilities, EM waves, the Vlasov theory of ES waves and instabilities including Landau damping and quasilinear theory, the Fokker-Planck equation, and relaxation processes. Advanced topics in resistive instabilities and particle acceleration.

Prerequisite: 210 and 220, or consent of instructor.

3 units, Win (Kosovichev, A)

3 units, Spr (Kasevich, M)

PHYSICS 323. Laser Cooling and Trapping — Principles of laser cooling and atom trapping. Optical forces on atoms, forms of laser cooling, atom optics and atom interferometry, ultra-cold collisions, and introduction to Bose condensation of dilute gases. Emphasis is on the development of the general formalisms that treat these topics. Applications of the cooling and trapping techniques: atomic clocks, internal sensors, measurements that address high-energy physics questions, many-body effects, polymer science, and biology. Prerequisite: 231 or equivalent.

3 units, not given this year

3 units, Aut (Kallosh, R)

3 units, Win (Kallosh, R)

3 units, Spr (Silverstein, E)

3 units, not given this year

3 units, not given this year

PHYSICS 360. Physics of Astrophysics — Theoretical concepts and tools for modern astrophysics. Radiation transfer equations; emission, scattering, and absorption mechanisms: Compton, synchrotron and bremsstrahlung processes; photoionization and line emission. Equations of state of ideal, interacting, and degenerate gases. Application to astrophysical sources such as HII regions, supernova remnants, cluster of galaxies, and compact sources such as accretion disks, X-ray, gamma-ray, and radio sources. Prerequisites: 121, 171 or equivalent.

3 units, Win (Abel, T)

PHYSICS 361. Stellar and Galactic Astrophysics — Astronomical data on stars, star clusters, interstellar medium, and the Milky Way galaxy. Theory of stellar structure; hydrostatic equilibrium, radiation balance, and energy production. Stellar formation, Jean’s mass, and protostars. Evolution of stars to the main sequence and beyond to red giants, white dwarfs, neutron stars, and black holes. Supernovae and compact sources. Structure of the Milky Way: disk and spiral arms; dark matter and the halo mass; central bulge or bar; and black hole. Prerequisite: 221 or equivalent. Recommended: 260, 360.

3 units, Spr (Petrosian, V)
PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology — Observational data on the content and activities of galaxies, the content of the Universe, cosmic microwave background radiation, gravitational lensing, and dark matter. Models of the origin, structure, and evolution of the Universe based on the theory of general relativity. Test of the models and the nature of dark matter and dark energy. Physics of the early Universe, inflation, baryosynthesis, nucleosynthesis, and galaxy formation. Prerequisites: 210, 211, 260 or 360.

3 units, not given this year

3 units, not given this year

PHYSICS 364. Advanced Gravitation — Early universe cosmology. Topics at the interface between cosmology and gravity, particle theory, and speculative theories of physics at the Planck scale such as string theory. Inflationary cosmology and generation of density perturbations, models of baryogenesis, big bang nucleosynthesis, and speculations about the Universe at the Planck scale. Experiments in the near future that may extend or revise current notions.

3 units, Spr (Kachru, S)

3 units, Aut (Zhang, S)

3 units, not given this year

PHYSICS 450. LHC Physics: Theoretical Physics of Particles and Fields — Physics of high energy processes at hadron-hadron colliders. Parton model, measurement of parton distribution functions, use of the model to predict properties of quark and gluon collisions at high energy. Computation of parton-cross sections in perturbative QCD. W and Z boson production at hadron colliders. Phenomenology of the Higgs boson at hadron colliders. May be repeated for credit. Prerequisite: 331.

3 units, Aut (Peskin, M)

3 units, Win (Dimopoulos, S)

3 units, Spr (Dimopoulos, S)

PHYSICS 463. Special Topics in Astrophyiscs: Theoretical Cosmology — Content varies depending on participant interest. This year, topics include: large-scale structure formation, the formation and structure of dark matter halos, and N-body simulations; alternative dark matter models; galaxy clustering, the halo model, and halo occupation statistics; galaxy formation models and galaxy evolution; and constraints on cosmological parameters and galaxy formation from large surveys.

3 units, Spr (Wechsler, R)

PHYSICS 490. Research — Open only to Physics graduate students, with consent of instructor. Work is in experimental or theoretical problems in research, as distinguished from independent study of a non-research character in 190 and 293.

1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

APPPHYS 207. Laboratory Electronics

3 units, Win (Fox, J)

APPPHYS 208. Laboratory Electronics

3 units, Spr (Fox, J), alternate years, not given next year

APPPHYS 226. Physics of Quantum Information

3 units, Spr (Yamamoto, Y), alternate years, not given next year

APPPHYS 270. Magnetism and Long Range Order in Solids

3 units, Aut (Fisher, I)

APPPHYS 272,273. Solid State Physics

3 units, 272: Win, 273: Spr (Laughlin, R)

APPPHYS 315. Methods in Computational Biology

3 units, Win (Doniach, S), alternate years, not given next year

APPPHYS 383. Introduction to Atomic Processes

3 units, Win (Buckbaum, P)

APPPHYS 392. Topics in Molecular Biophysics

3 units, Spr (Doniach, S), alternate years, not given next year

EE 268. Introduction to Modern Optics

3 units, Aut (Hesselink, L)

GES 222. Planetary Systems: Dynamics and Origins

3-4 units, Aut (Staff)
POLITICAL SCIENCE

Chair: Terry M. Moe

Professors: David W. Brady, Joshua Cohen, James D. Fearon, John A. Ferejohn (on leave), Morris P. Fiorina (on leave Autumn, Spring), Judith L. Goldstein, Stephen H. Haber, David J. Holloway (on leave Autumn), Shanto Iyengar (on leave Spring), Terry L. Karl, Stephen D. Krasner (on leave), Jon A. Krosnick (on leave), David D. Laitin, Terry M. Moe, Josiah Ober, Jean C. Oi (on leave), Daniel I. Okimoto (on leave), Jack N. Rakove (on leave), Condoleezza Rice (on leave), Douglas Rivers, Scott D. Sagan, Paul M. Sniderman, Barry R. Weingast

Associate Professors: Luis R. Fraga, Simon D. Jackman, Isabela Mares (on leave), Michael A. McFaul, Kenneth A. Schultz

Assistant Professors: Alberto Díaz-Cayeros (on leave), Beatriz Magaloni (on leave), Rob Reich, Peter Stone, Michael R. Tomz (on leave), Jonathan Wand (on leave), Jeremy Weinstein, Anne T. Wren (on leave)

Professor (Research): Norman Nie

Lecturers: Ebru Erdem, Tammy Frisby, Andrea Gates, Solomon Major, Abbas Milani, Andrew R. Rutten, Mary Sprague, Kathryn Stoner-Weiss

Courtesy Professors: David P. Baron, Jonathan B. Bendor, Coit D. Blacker, Gerhard Casper, Larry Diamond, Gerald A. Dorfman, Jean-Pierre Dupuy, James Fishkin, Lawrence Friedman, Keith Krehbiel, Roger Noll, Stephen J. Stedman

Courtesy Associate Professor: Debra M. Satz

Visiting Professors: Andrea Gates, Josef Joffe, John Wallis

Visiting Associate Professor: H. Lyman Miller

Visiting Assistant Professor: Sebastian Etchemendy

Department Offices: Encina Hall West, Room 100

Mail Code: 94305-6044

Phone: (650) 723-1806

Web Site: http://polisci.stanford.edu

Courses given in Political Science have the subject code POLISCI. For a complete list of subject codes, see Appendix.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

To receive a B.A. in Political Science, a student must:

1. Submit an application for the Political Science major to the undergraduate administrator, and declare on Axess. Forms are available in Encina Hall West, Room 100. For additional information, drop by or phone (650) 723-1608. Students must complete their major declaration no later than the end of Autumn Quarter in junior year.

2. Complete 70 units including:
   a) 45 Political Science course units to complete the breadth requirements.
   b) a 5-unit methods requirement satisfied by POLISCI 150A, 150B, 150C, 151B, ECON 102A, or STATS 60. The list of courses satisfying the methods requirement is updated annually by the department. Students should consult the Bulletin for new courses that satisfy this requirement.
   c) 20 additional Political Science units including no more than 5 units of directed reading. 10 units of ECON 1A,B may substitute for two 5-unit POLISCI courses.
   d) no more than two 5-unit Stanford Introductory Seminar courses can be applied toward the 70-unit major requirement.

3. Satisfy breadth requirements (45 units): each student must take two from the following Political Science courses, one of which must be in the primary concentration, the other in the secondary concentration. These courses must be completed by the end of sophomore year.

POLISCI 1. Introduction to International Relations

4. Satisfy a depth requirement. Each major should declare a primary concentration in one subfield and take at least 30 units in this concentration, including the introductory course for that subfield.

5. Satisfy breadth requirements (45 units): each student must take two

6. Complete 70 units including:

7. Students may apply a maximum of 10 units from Stanford Summer Session or courses outside Stanford. Transfer students are allowed up to 20 units of transfer units or summer session. A maximum of 15 units may be applied towards breadth requirements and 5 towards other Political Science course units. All transfer cases require petitions which must be reviewed and approved by the Director of Undergraduate Studies.

8. Directed reading and Oxford tutorial units require a petition and may only be applied towards related course work units. These units may not be used to fulfill a breadth requirement, and no more than 10 units of directed reading and Oxford tutorial units combined may count toward the required 70 Political Science units.

9. Courses counting toward the 70-unit requirement must be taken for a letter grade, although units in excess of the required 70 may be taken on a credit/no credit basis. A minimum grade of ‘C’ is required for courses to count toward major requirements.

MINORS

Students must complete their declaration of the minor on Axess no later than the end of the junior year.

To receive a minor in Political Science, a student must complete a minimum of 30 unduplicated units. All units must be in courses listed or crosslisted in the Department of Political Science. A maximum of 5 units of directed reading may count if supervised by a member of the department.

All units are for a letter grade. A minimum grade point average (GPA) of 2.0 (C) is required for courses to count towards minor requirements.

Concentration—The student selects a subfield in which three courses are taken. One of these courses is the introductory course, the other two at a more advanced level (numbered above 100). Where a linked set of advanced courses is offered, as with the Political Theory 130A,B,C Series, the introductory course need not be taken.

The concentration corresponds to one of the subfields the department already has in place, namely, international relations, American politics, political theory, and comparative politics.

Distribution—Three courses must be in the area of concentration, as specified above, for 15 units. An additional 10 units of intermediate and advanced courses (100 level or above) must be in two additional subfields.

Transfer Work—A maximum of 10 units of work completed outside Stanford may be given Political Science credit toward the minor for transfer students. A maximum of 5 units of work completed in Stanford Summer Session or outside of Stanford for non-transfer students may be given Political Science credit toward the minor. All such cases must be individually reviewed and approved by the Director of Undergraduate Studies.
PRIZES

There are several annual prizes for undergraduate students: the Arnaud B. Leavelle Memorial Prize for the best paper in the History of Political Thought sequence (POLISCI 150A,B,C), a cash prize for the best thesis written in political theory, the Lindsay Peters, Jr., Memorial Prize for the outstanding student each year in POLISCI 2, and Cottrell Prizes for outstanding students in POLISCI 1, 3, and 4.

HONORS PROGRAM

The honors program offers qualified students an opportunity to conduct independent research, write a thesis summarizing their findings, and make a presentation of their work. During the process of research, analysis, thinking, drafting, rethinking, and redrafting, students work closely with a faculty adviser and their fellow students.

Applicants must have a 3.5 grade point average (GPA) in Political Science courses, and an adviser who must be a member of the academic council. Students are required to declare their intention to pursue honors on the Major Proposal form. Applications can be obtained from the department office.

Students pursuing honors must complete the following by the end of Spring Quarter of their junior year: Methods requirement (POLISCI 150A,B,C, 151B, STATS 60, or ECON 102A), WIM requirement, and a completed research paper from an advanced undergraduate seminar or directed reading. Students are required to enroll in one quarter of POLISCI 299Q, Junior Research Seminar, in their junior year. This credit/no-credit course is designed to help students find a manageable thesis topic and adviser.

Students who are accepted into the program should plan to make the thesis the focus of their senior year. They should enroll in POLISCI 299A,B,C, which covers research and writing directed by the student’s adviser. In addition, students must enroll in POLISCI 299R, a 3-unit Autumn Quarter seminar designed to develop research and writing skills. In the Winter Quarter, students must enroll in POLISCI 299S which is a credit/no credit tutorial in which students work with other students and tutors to finish their research.

Most students find themselves in one of two groups: (1) those who already have substantial background in their thesis topic, and can expect to complete the honors program in two or three quarters for a total of 10-15 units completed in POLISCI 299A,B,C; or (2) those who have little or no previous work on the topic, and can expect to complete the program in three quarters with 15 units of work.

To complete the honors program, students must:
1. Complete all requirements for the major.
2. Enroll in one quarter of POLISCI 299Q, 299R, and 299S.
3. Enroll in at least 10 units of POLISCI 299A, B, or C, senior project.
4. Complete a thesis of honors quality, for a grade of ‘B+’ or better.

Students cannot apply units from the POLISCI 299Q, Junior Research Seminar, POLISCI 299R, Senior Research Seminar, or POLISCI 299S, Senior Honors Tutorial, toward the 70-unit requirement for the major. However, students can apply up to 10 units from POLISCI 299A,B,C Senior Project, toward the 70-unit requirement.

GRADUATE PROGRAMS

Admission—Prospective graduate students should see http://gradadmissions.stanford.edu for application materials. Applicants are required to submit a recent sample of their writing (not to exceed 35 pages) and to take the General Test of the Graduate Record Examination. Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). The TOEFL requirements are waived for applicants who have recently completed two or more years of study in an English-speaking country. For details concerning these tests, see the Guide to Graduate Admission, available at http://registrar.stanford.edu/shared/publications.htm#GradStud. The application deadline is December 5. Admission is offered for the Autumn Quarter only. The department expects all students to pursue a full-time program except for time devoted to teaching or research assistantships.

MASTER OF ARTS

The M.A. degree may be pursued as part of a joint degree program with one of the University’s professional schools. Students interested in a joint degree should apply for admission to the M.A. program in Political Science during the Autumn Quarter of the first year in the Stanford professional school.

Doctoral candidates may elect to take the M.A. degree when they have met the following requirements:
1. Completion of at least three quarters of residency as a graduate student with 45 units of credit of which at least 25 units must be taken in Political Science graduate seminars of 300 level and above. Not more than 25 units of the 45-unit requirement may be taken in a single field.
2. At least two graduate seminars in each of two fields and at least one graduate seminar in a third field.
3. Of the remaining 20 units, not more than 10 units of work from related departments may be accepted in lieu of a portion of the work in Political Science. Not more than 10 units may be taken as directed reading.
4. Courses must be numbered above 300.
5. A grade point average (GPA) of 2.7 (B-) or better must be attained for directed reading and all course work.

The department does not offer a coterminal bachelor’s and master’s degree.

Doctoral candidates may pursue master’s degrees from other departments. Recent examples include but are not restricted to master’s degrees in Statistics and Economics. Students interested in this option should consult the relevant sections of this bulletin for both University and department requirements for master’s degrees.

MASTER OF ARTS IN TEACHING

The M.A. degree in Teaching is offered jointly by this department and the School of Education. The degree is intended for candidates who have a teaching credential or relevant teaching experience and wish to further strengthen their academic preparation. The program consists of a minimum of 25 units in Political Science courses and 12 units in the School of Education. The M.A. requires a minimum of 45 total units. A student’s program must be approved by the Director of Graduate Studies before the courses are taken. Detailed program requirements are outlined in the “School of Education” section of this bulletin.

DOCTOR OF PHILOSOPHY

The University’s basic requirements for the Ph.D. degree are discussed in the “Graduate Degrees” section of this bulletin.

Programs of study leading to the Ph.D. degree are designed by the student, in consultation with advisers and the Director of Graduate Studies, to serve his or her particular interests as well as to achieve the general department requirements. A student is recommended to the University Committee on Graduate Studies to receive the Ph.D. degree in Political Science when the following program of study has been completed:
1. The candidate for the Ph.D. degree must offer three of the following concentrations in political science: American politics, comparative politics, international relations, methodology, political organizations, and political theory. Upon petition, a special field (for example, public law, or urban politics) may be offered as a third concentration. Students concentrate on two of these areas by fulfilling, depending on the concentration, combinations of the following: written qualifying examinations, research papers, research design, or course work. The requirement for the third concentration may be satisfied by taking either a written examination in that area or by offering a minimum of 10 units with a grade point average (GPA) of 3.0 (B) or better in the third concentration from among the formal graduate-level courses in the six divisions of the department. The third concentration cannot be satisfied by courses taken as a requirement for a first or second concentration. A third concentration in theory requires two courses in addition to the 5 units necessary to fulfill the program requirement. Completion of special concentrations may require more than 10 units of course work. Students are not permitted to use the following combination of concentrations for the purposes of fulfilling the requirements for
the PhD: American politics, political organizations, and methodology. Students wishing to concentrate in American politics, political organizations, and methodology are not prohibited from doing so, but must add another field of concentration to their course of study.

2. The Ph.D. candidate is required to demonstrate competence in a language and/or skill that is likely to be relevant to the dissertation research. The level of competence needed for successful completion of the research is determined by the student’s adviser. All candidates must complete 5 units of statistical methods or its equivalent. Students who are in the concentration of international relations, American politics, or political organizations are required to take an additional 5 units of methods. Previous instruction can be counted towards this requirement only if approved by the Director of Graduate Studies.

3. Every Ph.D. candidate must complete at least five units of graduate-level instruction in political theory.

4. By the start of the fourth quarter in residence, each first-year graduate student submits to the student’s adviser a statement of purpose. This statement indicates the student’s proposed major concentrations of study, the courses taken and those planned to be taken to cover those fields, the student’s plan for meeting language and/or skill requirements, plans for scheduling of comprehensive examinations and/or research papers, and, where possible, dissertation ideas or plans. This statement is discussed with, and must be approved by, the student’s adviser. In the Autumn Quarter following completion of their first year, students are reviewed at a regular meeting of the department faculty. The main purposes of this procedure are, in order of importance: to advise and assist the student to realize his or her educational goals; to provide an incentive for clarifying goals and for identifying ways to achieve them; and to facilitate assessment of progress toward the degree.

5. Students must take the comprehensive exams in two major fields by the end of their second year in the program. Students are expected to have passed these examinations and to have faculty approval of their research paper by the end of their second year.

6. Upon completion of one research paper and two comprehensive exams in his or her two major concentrations, the student files an Application for Admission to Candidacy for the Ph.D. which details program plans and records. The University and the department expect that students be advanced to candidacy by the completion of their sixth quarter as a full-time student. Each second-year student is reviewed and considered for admission to candidacy in a meeting of the faculty that is typically held during the tenth week of Spring Quarter. Since completion of two comprehensive exams and a research paper are prerequisites for admission to candidacy, students should plan their first- and second-year studies so that these requirements are satisfied by the time of the faculty review meeting. In particular, students should submit their research paper to the relevant faculty readers no later than the start of Spring Quarter, since revisions of the paper are often required prior to obtaining faculty approval.

7. During the third year, a formal dissertation proposal is submitted by the student to a thesis committee of three faculty members, including the principal adviser. The dissertation proposal requires approval by the student’s dissertation adviser and the Director of Graduate Studies. Dissertation proposals must be approved by the end of the third year.

8. A candidate for the Ph.D. in Political Science is required to serve as a teaching assistant (TA) in the department for a minimum of three quarters.

9. Doctoral candidates who apply for the M.A. degree are awarded that degree on completion of the requirements outlined in the description of the M.A. program.

10. The candidate must pass the University oral examination on the area of the dissertation at a time, after the passing of the written comprehensive examinations, suggested by the candidate’s dissertation committee.

11. The candidate must complete a dissertation satisfactory to the Dissertation Reading Committee and the University Committee on Graduate Studies.

PH.D. MINOR
Candidates in other departments offering a minor in Political Science select two concentrations in political science in consultation with the Director of Graduate Studies and submit to her or him a program of study for approval. Written approval for the program must be obtained from the Director of Graduate Studies before application for doctoral candidacy. Students are required to complete at least 20 units in Political Science courses. Two of these courses, in separate concentrations of political science, must be 300 level and above. All grades must be a GPA of 3.0 (B) or better. Candidates may be examined in their concentrations in the general oral examination by a member of the Department of Political Science, chosen in consultation with the Director of Graduate Studies.

COURSES
WIM indicates that the course satisfies the Writing in the Major requirements.

Summer Quarter — During Summer Quarter, the Department of Political Science offers a variety of courses and seminars. Offerings depend upon available faculty.

The department uses the following course numbering system:

- 1–99 Introductory Courses
- 100–199 Intermediate Undergraduate Lecture Courses
- 200–299 Advanced Undergraduate Seminar Courses
- 300–400 Advanced Undergraduate/Graduate Courses
- 400–500 Graduate Courses

Course information is accurate when the Stanford Bulletin goes to press; however, students should be aware that there may be changes and should check the quarterly Time Schedule for up-to-date information.

INTRODUCTORY

POLISCI 1. Introduction to International Relations — Theories and uses of international relations for understanding historical and contemporary events. Topics include the causes of war, trade and development, the environment, humanitarian intervention, nuclear proliferation, and terrorism. GER: DB-SocSci
5 units, Aut (Schultz, K)

POLISCI 2. Introduction to American National Government and Politics — The role and importance of the ideal of democracy in the evolution of the American political system. American political institutions (the Presidency, Congress, and the Court) and political processes (the formation of political attitudes and voting) are examined against the backdrop of American culture and political history. The major areas of public policy in the current practice of the ideal of democracy. GER: DB-SocSci
5 units, Win (Fiorina, M; Frisby, T)

POLISCI 3. Introduction to Political Philosophy — (Same as ETHIC-SOC 30, PHIL 30.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER: DB-Hum, EC-EthicReas
5 units, Win (Stone, P)

POLISCI 4. Introduction to Comparing Political Systems — Politics in major regime types including democratic, authoritarian, and communist; how types of politics affect economic development and state/society relations. GER: DB-SocSci, EC-GlobalCom
5 units, Spr (Laitin, D)

5 units, Win (Fraga, L)
POLISCI 33Q. Legal Craft and Moral Intuitions — (Same as LAW 107Q.) Stanford Introductory Seminar. Preference to sophomores. The conflict between translating rules for social interaction into legal practices versus deciding what constitutes impermissible harm-causing, coercion, or discrimination. Approaches to this conflict through cases such as: can government forbid wetland development without compensating property owners; why might private nurses or Playboy bunnies but not flight attendants be selected on the basis of gender; why is gender equality in resource distribution provided for college athletes but not math graduate students? GER:DB-SocSci
5 units, Win (Goldstein, J)

POLISCI 35Q. Food and Politics — Topics include the politics of food production and distribution; organic and sustainable farming; federal farm and free trade policies; genetically-modified food; animal ethics; and the political context of famine and obesity. Community-based learning.
2 units, Win (Reich, R)

POLISCI 41Q. Building Democracy after Conflict: Iraq in Comparative Perspective — Stanford Introductory Seminar. Preference to sophomores. Problems of post-conflict situations, the conditions for building democracy and how they relate to post-conflict situations, and historical experiences such as Germany and Japan. Iraq as a principal case study.
5 units, Spr (Diamond, L)

POLISCI 46N. Contemporary African Politics — Stanford Introductory Seminar. Preference to freshmen. Focus is on the last decade. Patterns of economic collapse and recovery; shifts toward more democratic political systems; and increasing levels of political violence and civil conflict including warlordism and genocide. Trends across the continent, with emphasis on Liberia’s emergence from conflict and Uganda’s political and economic decline. Students design strategies for diplomatic engagement to be presented to former U.S. policy makers at the conclusion of course.
GER:DB-SocSci, EC-GlobalCom
5 units, Aut (Weinstein, J)

INTERMEDIATE UNDERGRADUATE LECTURES

INTERNATIONAL RELATIONS

Students interested in international relations are encouraged to take POLISCI 1. While not a formal prerequisite for many of the courses listed below, it provides background for more advanced work.

The courses in international relations offered in Political Science can be divided into those dealing with global political, military, and economic problems, and those dealing with the foreign relations of nations or geographic regions. Students concentrating in international relations are encouraged to select their courses from both groups.

Students interested in a major in international relations should refer to the “International Relations” section of this bulletin.

POLISCI 110A. Sovereignty and Globalization — The relationship between globalization and the viability of state sovereignty, the development of international institutions, and the international distribution of wealth and security. GER:DB-SocSci
5 units, not given this year

POLISCI 110B. Strategy, War, and Politics — Traditional and modern theories on the causes of war and sources of peace. Contrasting explanations for the origins of WWI and WWII; alternative theories of deterrence in the nuclear age; the causes of war in the Persian Gulf, ethnic conflicts, and terrorism in the post-Cold War era. GER:DB-SocSci
5 units, not given this year

POLISCI 110C. America and the World Economy — (Students not taking this course for WIM, register for 110X.) American foreign economic policy. Issues: the evolution of American tariff and trade policy, the development of mechanisms for international monetary management, and American foreign investment policy reflected in the changing political goals pursued by American central decision makers. Prerequisite: 1 or equivalent. GER:DB-SocSci, WIM
5 units, Win (Goldstein, J)

POLISCI 110X. America and the World Economy — (Same as 110C.) Does not fulfill WIM requirement. GER:DB-SocSci
5 units, Win (Goldstein, J)

POLISCI 110D. War and Peace in American Foreign Policy — (Students not taking this course for WIM, register for 110Y.) The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. GER:DB-SocSci, WIM
5 units, Spr (Schultz, K)

POLISCI 110Y. War and Peace in American Foreign Policy — (Same as 110D.) Does not fulfill WIM requirement. GER:DB-SocSci
5 units, Spr (Schultz, K)

POLISCI 111D. British Politics — The impact on the world’s oldest democracy of major changes in policies, politics, and the institution of government made over the last two decades by Margaret Thatcher and Tony Blair. GER:DB-SocSci, EC-GlobalCom
5 units, Spr (Dorfman, G)

POLISCI 112. Japanese Foreign Policy — (Graduate students register for 312.) The origins of WW II in the Pacific: Japan’s role in international security; the N. Korean nuclear crisis; Japan’s evolving security policies; and the U.S.-Japan trade conflict. GER:DB-SocSci, EC-GlobalCom
5 units, not given this year

POLISCI 112D. International Organization — Theoretical and applied issues concerning the administration, operation, and impact of international organizations. Topics include: the UN’s role as a peacekeeper; anti-globalization protestors; the expansion of international organizations; the role and obligations of the U.S.; and the normative implications and tradeoffs of effective supranational governance.
5 units, Aut (Major, S)

POLISCI 113F. The United Nations and Global Governance — The role of international institutions and organizations in the areas of health, environment, security, trade, development, and human rights. Evaluation, accountability, participation, legitimacy, and autonomy.
5 units, Spr (Stedman, S)

POLISCI 114D. Democracy, Development, and the Rule of Law — (Same as INTNLREL 114D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.
5 units, Aut (McFaul, M; Stoner-Weiss, K)

POLISCI 114S. International Security in a Changing World — The major international and regional security problems in the modern world. Interdisciplinary faculty lecture on the political and technical issues involved in nuclear proliferation, terrorism and homeland security, civil wars and insurgencies, and future great power rivalries. GER:DB-SocSci
5 units, Win (Sagan, S)

POLISCI 116. History of Nuclear Weapons — (Same as HISTORY 103E.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci
5 units, Spr (Holloway, D)

AMERICAN POLITICS

POLISCI 120A. American Political Sociology and Public Opinion: Who We Are and What We Believe — First of team-taught, intermediate-level, three-part sequence designed to introduce students to topics in American politics and government. The sociology of the U.S. and the political beliefs and values of Americans. Students may enroll for one,
two, or three quarters, but the course is cumulative so maximum benefit results from enrollment in the entire sequence. Completion of 2 is assumed but not required. GER:DB-SocSci

5 units, not given this year

POLISCI 120B. Parties, Interest Groups, the Media, and Elections — What are the public’s powers and constraints in influencing the political process? The role of parties in organizing the electorate and Congress and affecting electoral and policy outcomes. Influence of elections and interest groups in the political process, and their effect on the distribution of power. Media’s impact on political participation. GER:DB-SocSci

5 units, Win (Sprague, M)

POLISCI 120C. American Political Institutions: Congress, the Executive Branch, and the Courts — How politicians, once elected, work together to govern America. The roles of the President, Congress, and Courts in making and enforcing laws. Focus is on the impact of constitutional rules on the incentives of each branch, and on how they influence law. GER:DB-SocSci, WIM

5 units, Spr (Ratten, A)

POLISCI 121. Urban Politics — (Same as URBANST 111.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: 2 or consent of instructor. GER:DB-SocSci

5 units, Win (Fraga, L)

POLISCI 122. Introduction to American Law — (Same as AMSTUD 179, LAW 106.) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general. GER:DB-SocSci

3-5 units, Aut (Friedman, L)

POLISCI 123. Politics and Public Policy — How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: 2. Students taking this course may not take PUBLPOL 101 for credit. GER:DB-SocSci

5 units, Spr (Sprague, M)

POLISCI 124R. Judicial Politics and Constitutional Law: The Federal System — The impact of constitutional rules on policy making in the U.S. with a focus on structural issues such as separation of powers and federalism. Topics such as: the role of unelected judges in a democracy; the rule of law; and the constitutionality of the war in Iraq. Prerequisites: 2 or equivalent, and sophomore standing. GER:DB-SocSci, WIM

5 units, Aut (Ratten, A)

POLISCI 124S. Judicial Politics and Constitutional Law: Civil Liberties — The role and participation of courts, primarily the U.S. Supreme Court, in public policy making and the political system. Judicial activity in civil liberty areas (religious liberty, free expression, race and sex discrimination, political participation, and rights of persons accused of crime). Prerequisites: 2 or equivalent, and sophomore standing. GER: DB-SocSci

5 units, Win (Ratten, A)

POLITICAL THEORY

POLISCI 130A. History of Political Thought I — (Graduate students register for 330A; same as CLASSHIS 133/333.) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:DB-SocSci

5 units, Win (Ober, J)

POLISCI 130B. History of Political Thought II: Early Modern Political Thought, 1500-1700 — (Graduate students register for 330B.) The development of constitutionalism, Renaissance humanism and the Reformation, and changing relationships between church and states. Emphasis is on the relationships among political thought, institutional frameworks, and immediate political problems and conflicts. The usefulness of the history of political thought to political science. GER:DB-SocSci

5 units, not given this year

POLISCI 130C. History of Political Thought III: Freedom, Reason, and Power — (Graduate students register for 330C.) Classic works in political theory since the American and French revolutions. Readings include Kant, Hegel, Marx, Nietzsche, and Dewey. GER:DB-SocSci

5 units, Spr (Stone, P)

POLISCI 131. Children’s Citizenship: Justice Across Generations — (Same as EDUC 158.) The development of children into citizens, focusing on major social institutions responsible for their civic education: schools, families, communities, and civil society. How does each institution develop citizenship? What is the relationship between civic education and the reproduction of social equality or inequality? Do children’s rights differ from those of adults? Readings: political theorists on justice, feminist theorists on family and children, court cases on tensions between the state and community interest in education, and social critics on the practice of civic education. GER:DB-SocSci, EC-EthicReas

5 units, not given this year (Reich, R)

POLISCI 132. Ethics of Political Animals — (Same as CLASSHIS 132, ETHICSOC 132X.) The ancient Greek conception of ethics as arising from human social and political nature. Problems related to values, identity, and responsibility. Topics include civic friendship, equality, reciprocity, integrity, dignity, and legal obedience. GER:EC-EthicReas

5 units, Spr (Ober, J)

POLISCI 133. Ethics and Politics of Public Service — (Same as ETHICSOC 133.) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci

5 units, not given this year (Reich, R)

POLISCI 136. Philosophical Issues Concerning Race and Racism — (Same as PHIL 177.) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in racism? How should ethnic and racial identities be viewed to secure the conditions in which humanity can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance among competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion. GER:DB-SocSci

4 units, not given this year

POLISCI 136H. Justice — (Same as ETHICSOC 171, PHIL 171/271.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

5 units, Aut (Cohen, J)

POLISCI 138. Modern Political Ideologies — Prominent political ideologies that define the terms of contemporary political discourse including liberalism, conservatism, feminism, and anarchism through the intellectual debates generated by the French Revolution. Readings include Price, Burke, Godwin, Wollstonecraft, and Paine. GER:DB-Hum

5 units, not given this year
COMPARATIVE POLITICS

Undergraduate courses and seminars in comparative politics generally fall into two groups: those dealing with a particular country or region, and those dealing with major political problems or processes. Students are encouraged to take courses from both groups, and are also urged to do course work in more than one country or region.

POLISCI 140. Political Economy of Development — Emphasis is on the interplay between political economic processes, and national and international factors from Latin America, Africa, and Asia. Do governments provide the foundations for economic development? The role of the state in solving problems of violence and capital accumulation. GER: DB-SocSci, EC-GlobalCom
5 units, not given this year

POLISCI 140F. The Comparative Political Economy of Advanced Countries — Classical approaches to comparative political economy, emphasizing the interwar period in Europe, which focus on ideas, interest, or institutions as explanatory variables. Major contemporary political economy debates on the advanced countries, such as the types of welfare state and the varieties of capitalism literature. Students may not receive credit for both POLISCI 140F and IPS 233.
5 units, Win (Etchemendy, S)

POLISCI 140L. China in World Politics — The implications of the rise of China in contemporary world politics and for American foreign policy, including issues such as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions. GER: DB-SocSci, EC-GlobalCom
5 units, Spr (Miller, L)

5 units, Win (Karl, T)

POLISCI 141E. Elections in the U.S. and Canadian Wests: Innovation and Reform — How laws governing elections in western U.S. states and Canadian provinces affect representation, citizenship, and public policy. Emphasis is on the evolution of direct democracy, including the initiative and referendum processes, since state- and provincehood. Is there is a distinctive Western political culture?
5 units, Spr (Frisby, T)

POLISCI 142E. Politics of Central Asia in Comparative Perspective — Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Historical background, current issues, and the role of these countries in international politics. The Soviet legacy and Islam in society and politics.
5 units, Aut (Erdem, E)

POLISCI 142R. Representative Government in Europe — How electoral institutions, party systems, and structures of interest group representation differ across European countries, and between Europe and the U.S. How these variations influence the structure and content of ideological debate and mediate its influence on the policy making process. How European integration is altering the structure of citizen representation in EU member states.
GER: DB-SocSci
5 units, not given this year

POLISCI 142T. Social Protection Around the World — The political origin of and differences in major policies of social protection across developed and developing countries; recent challenges faced by these policies. Why some countries provide old-age or sickness benefits to all citizens, while others offer no protection during employment-related risks. Are these differences in policies and institutions driven by economic development alone? Prerequisite: 4.
5 units, not given this year

POLISCI 143. Nongovernmental Organizations and Development in Poor Countries — (Same as INTNLREL 143.) How nongovernmental organizations affect economic growth, equity, political stability, and prospects for democracy in poor countries. Do NGOs contribute to these goals? What is reasonable to expect from the NGO sector? Interactions among NGOs from wealthy and poor countries, governments, international financial institutions, and multinational corporations. GER: DB-SocSci
5 units, not given this year

POLISCI 144S. Democracies and Autocracies — The study of political regimes. The main characteristics of democratic versus authoritarian regimes. What determines that political order is established in the form of democracy or authoritarianism? How democracies and autocracies operate; how each regime achieves political order, adopts public decisions, and impacts economic performance. GER: DB-SocSci
5 units, not given this year

POLISCI 145. Politics and Development in Latin America — Political, economic, and social development in Brazil, Mexico, Cuba, and Argentina. Emphasis is on historical and comparative analyses and policy and theoretical issues such as ideologies of development, democracy and its alternatives, constraints on national autonomy, and civil-military, state-society, and state-market relations. GER: DB-SocSci, EC-GlobalCom
5 units, not given this year

POLISCI 147. Comparative Democratic Development — Social, cultural, political, economic, and international factors affecting the development and consolidation of democracy in historical and comparative perspective. Individual country experiences with democracy, democratization, and regime performance. Emphasis is on the third wave of democratization over the past three decades and contemporary possibilities for democratic change. GER: DB-SocSci, EC-GlobalCom
5 units, not given this year

POLISCI 148. Chinese Politics: The Transformation and the Era of Reform — (Graduate students register for 348.) For advanced undergraduates and beginning graduate students. The content, process, and consequences of reform in China from 1976 to the present. GER: DB-SocSci, EC-GlobalCom
5 units, Aut (Miller, L)

POLISCI 148R. Chinese Politics — The politics of the People’s Republic of China. The origins of the Communist Revolution, the institutionalization and consequences of communist rule, and attempts to reform the system since 1978. GER: DB-SocSci
5 units, not given this year

POLISCI 148S. The U.S. and Asia During the Cold War — International relations perspective. WW II and its impact on international relations; the efforts of Allied statesmen to design a stable postwar order; the Chinese civil war; the American occupation of Japan; the Korean War; S.E. Asian independence struggles; the American alliance system in the 50s, the Sino-Soviet alliance; Indo-Pakistani conflicts; the Vietnam War; strategic realignment in the 70s; and the legacy of the Cold War on the region’s international agenda and American policy priorities. The relevance of the region to the international system. GER: DB-SocSci, EC-GlobalCom
5 units, Win (Miller, L)

POLISCI 148T. Political Parties and Elections in Japan — Introduction to Japanese democracy focusing on electoral politics since the end of WW II. The establishment of one-party dominance, the mechanisms that sustained it, and events leading to the current Japanese political transformation. GER: DB-SocSci
5 units, not given this year

POLISCI 149S. Islam and the West — Changes in relative power and vitality of each side. The relationship in the Middle Ages revolved around power and domination, and since the Renaissance around modernity. Focus is on Muslims of the Middle East. GER: DB-SocSci
5 units, Spr (Miliani, A)
The evolution of relations between the U.S. and Iran. The years after WW II when the U.S. became more involved in Iran. Relations after the victory of the Islamic republic. The current state of affairs and the prospects for the future. Emphasis is on the sources and nature of ethnic violence. GER:DB-SocSci, WIM and why does it occur? Should elite machinations, the psychology of leadership be blamed? Case studies and theoretical work on the sources and nature of ethnic violence. GER:DB-SocSci, WIM

5 units, Aur (Fearon, J)

POLISCI 218. U.S. Relations in Iran — The evolution of relations between the U.S. and Iran. The years after WW II when the U.S. became more involved in Iran. Relations after the victory of the Islamic republic. The current state of affairs and the prospects for the future. Emphasis is on original documents of U.S. diplomacy (White House, State Department, and the U.S. Embassy in Iran). Research paper. GER:DB-SocSci

5 units, Aur (Milani, A)

POLISCI 219. Directed Reading and Research in International Relations — May be repeated for credit.

1-10 units, Aur, Win, Spr, Sum (Staff)

AMERICAN POLITICS

POLISCI 221. Tolerance and Democracy — The value of tolerance and its implications for the principles and practices of democracy. Tolerance as it is understood by political philosophers and by citizens. Readings include: John Stuart Mill On Liberty, Isaiah Berlin Two Concepts of Liberty, and modern studies of public opinion. Topics include: ideas and liberty; value pluralism; the interplay of authority and obedience; the role of political elites and mass publics in democratic societies; multiculturalism. Objectives: to promote critical thinking; to explore principal forms of value conflict in contemporary liberal democracies. GER:DB-SocSci

5 units, Spr (Sniderman, P)

5 units, not given this year

POLISCI 221F. Race and American Politics — How the issue of race has helped define the modern era of American politics. Major theories of political cleavage over public policies dealing with race.

5 units, Spr (Sniderman, P)

POLISCI 221S. Civic Capacity and Urban Youth — The logic and possibilities of mobilizing urban youth to overcome the decline in civic engagement across American society. Can youth be trained to be advocates for their interests in education or in local government? If youth are mobilized, can this serve as a catalyst to mobilize their parents and other adults? Class requirements include an internship of at least 7 hours per week in the John W. Gardner Center for Youth and their Communities.

GER:DB-SocSci, EC-AmerCul

5 units, not given this year

POLISCI 221T. Politics of Race and Ethnicity in the United States — Race and ethnicity issues used to understand current challenges to political development of the U.S. Focus is on political institutions and how current issues such as campaigning, affirmative action, and voting rights operate within parameters set by these institutions. National values underlying notions of identity, citizenship, justice, and public interest. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

POLISCI 221U. Latinos in American Politics — (Same as PUBLPOL 189.) Evolution of Latino participation in American politics from the mid-19th century to the present. Issues include conquest, immigration, the Chicano movement, national origin diversity, gender, political parties, and office holding. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

POLISCI 221V. California Politics: Past, Present, and Future — (Same as PUBLPOL 188.) Changing patterns of politics from the mid-19th century to the present. Emphasis is on the role of institutions in structuring the state’s politics. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

POLISCI 222R. Culture, Identity, and Diversity — The interplay of liberalism, pluralism, and diversity.

5 units, Win (Sniderman, P; Callan, E)

POLISCI 222D. Term Limits and American Democracy — Why voters place constitutional and statutory limits on the number of terms elected officials can serve in an office. Effects of term limits on elections and policy making in the U.S. Presidential, gubernatorial, and state legislature term limits, the congressional term limits movement, and the success of the movement in the American West.

5 units, Win (Frisby, T)
POLISCI 223S. The Imperial Temptation: U.S. Foreign Policy in a Unipolar World — How the collapse of the Soviet Union liberated the U.S. from the constraints of bipolarity. How current policy fits into earlier traditions such as Wilsonianism or realism. Normative questions; what is America’s proper role in the world? GER:DB-SocSci
5 units, Aut (Joffe, J)

POLISCI 224R. Democratic Citizenship: Can Ordinary Citizens Reason about Politics? — The tradition of skepticism about whether ordinary citizens can discharge the responsibilities of democratic citizenship. How this skepticism has been strengthened by recent research on public opinion and electoral behavior. Sources include the interplay of empirical and normative democratic theory. GER:DB-SocSci
5 units, not given this year

POLISCI 225D. Politics, Constitutions, and Building America — (Same as PUBLPOL 127, URBANST 168.) How Americans built their infrastructure; why financing infrastructure has changed. Sources include economic history, political history, public finance theory, and political economy theory.
5 units, not given this year

POLISCI 227R. Polarized Politics and Special Interest Groups — The influence of special interest groups on electoral competition and policy outcomes in the U.S., and the increasing partisan polarization among elites. How money spent by special interest groups affects the types of candidates who are elected, the agendas of the parties, and the votes of Congressmen. GER:DB-SocSci
5 units, not given this year

POLISCI 229. Directed Reading and Research in American Politics — May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

POLITICAL THEORY

POLISCI 231S. Contemporary Theories of Justice — Social and political justice and contemporary debates in political theory. Recent works that develop the principles of justice, and the political arrangements that best satisfy their requirements. Limited enrollment. GER:DB-SocSci, EC-EthicReas, WIM
5 units, Win (Reich, R)

POLISCI 232. Civil Society and the Nonprofit Sector — (Same as URBANST 121.) Development of the idea of civil society from early Enlightenment to the contemporary U.S. Historical and theoretical foundations. Contemporary features of the nonprofit sector including its legal, economic, political, and ethical dimensions. Structure and operation of modern philanthropy and challenges of the 21st century.
2-4 units, not given this year

POLISCI 235. Politics and Religion — Theories about the proper relationship between church and state. Court cases and policy debates.
5 units, Win (Stone, P)

5 units, Spr (Reich, R; Sievers, B)

POLISCI 239. Directed Reading and Research in Political Theory — May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

COMPARATIVE POLITICS

POLISCI 241D Political Systems Across Muslim Societies — The differing political and institutional contexts of Muslim societies, emphasizing relationships between religion and state. Case studies including Turkey, Iran, India/Pakistan, and the U.S. Prospects for democratic government in Muslim societies.
5 units, Spr (Erdem, E)

5 units, not given this year

POLISCI 242S. Politics of Welfare State Expansion and Reform — Major theories explaining the development of the welfare state and its impact on the organization of the political economy. The relative importance of institutional variables, social cleavages, partisanship, and ideology, and the role of economic openness in explaining cross-national differences in social policy. Recent politics of social policy adjustment, and existing differences among welfare states facing unfavorable economic and demographic developments and political pressures toward welfare state retrenchment.
5 units, not given this year

POLISCI 244. Latin American Political Development — Classical postwar approaches to Latin American development. Pressures for economic reform and liberalization that stemmed from the international economy after 1973. Business and organized labor as key actors in the political implementation of market-oriented adjustment. Recent trends in party system evolution, and the resurgence of the new left.
5 units, Win (Etchemendy, S)

POLISCI 245R. Politics in Modern Iran — Modern Iran has been a smithy for political movements, ideologies, and types of states. Movements include nationalism, constitutionalism, Marxism, Islamic fundamentalism, social democracy, Islamic liberalism, and fascism. Forms of government include Oriental despotism, authoritarianism, Islamic theocracy, and liberal democracy. These varieties have appeared in Iran in an iteration shaped by history, geography, proximity to oil and the Soviet Union, and the hegemony of Islamic culture. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Milani, A)
POLISCI 247S. Politics and Economic Policy in Advanced Industrial Democracies — The role of political ideology and government partisanship in influencing economic outcomes. How political parties interact with interest groups in the formation of economic strategies. How voters influence patterns of economic policy making. The cross-national impact of globalization and increasing openness of trade and capital markets. Constraints on domestic political actors by the development of supranational political organizations such as the EU. GER:DB-SocSci
5 units, not given this year

5 units, not given this year

POLISCI 247U. Electoral and Party Politics in Developed Democracies — Origins of modern parties and party systems, determinants of voting behavior, role of parties in electoral competition and government formation, effects of partisan governments and elections on political-economic outcomes, and shifts in electoral cleavages and party systems.
5 units, not given this year

POLISCI 248. Mexican Politics — Why did Mexico fail to eliminate poverty and destitution despite resources channeled to that end and a rhetoric of social justice inherited from the Revolution? The durability of the political regime, the peculiar characteristics of the Mexican process of democratization, and the regime’s incentives to redress ancestral problems of inequality and destitution. Emphasis is on crafting research projects on the political economy of Mexican development, and hypothesis testing with empirical data. GER:DB-SocSci, EC-Global
5 units, not given this year

POLISCI 248S. Latin American Politics — Fundamental transformations in Latin America in the last two decades: why most governments are now democratic or semidemocratic; and economic transformation as countries abandoned import substitution industrialization policies led by state intervention for neoliberal economic policies. The nature of this dual transformation. GER:DB-SocSci
5 units, not given this year

POLISCI 248T. Problems of Governance and Economic Growth in Mexico: From the Aztecs to NAFTA — (Same as HISTORY 278.) Political and economic institutions of Mexico. Emphasis is on the origins and economic consequences of authoritarianism. GER:DB-SocSci
5 units, not given this year

POLISCI 249. Directed Reading and Research in Comparative Politics — May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

RESEARCH

POLISCI 299A,B,C. Senior Project — Students conduct independent research work towards a senior honors thesis. See “Honors Program” above.
1-5 units, Aut, Win, Spr (Staff)

POLISCI 299Q. Junior Research Seminar — For students interested in writing a senior honors thesis. Focus is on finding a manageable topic and an adviser.
2 units, Aut, Win, Spr (Rutten, A)

POLISCI 299R. Senior Research Seminar — Required of students writing honors theses. Focus is on acquiring research skills and developing an appropriate research design.
3 units, Aut (Rutten, A)

POLISCI 299S. Senior Honors Tutorial — Required of students writing honors theses. Focus is on solving problems in writing a thesis such as keeping on schedule and rewriting drafts. Students work with other honors students and graduate student tutors.
2 units, Win (Rutten, A)

ADVANCED UNDERGRADUATE/GRADUATE INTERNATIONAL RELATIONS

POLISCI 310A. International Relations Theory, Part I — First of a three-part graduate sequence. History of international relations, current debates, and applications to problems of international security and political economy.
5 units, Aut (Fearon, J)

POLISCI 310B. International Relations Theory, Part II — Second of a three-part graduate sequence. History of international relations theory, current debates, and applications to problems of international security and political economy. Prerequisite: 310A.
5 units, Win (Goldstein, J)

POLISCI 310C. Research in International Relations — Third of a three-part graduate sequence. Focus is on developing research papers begun in 310A or B, and exploring active areas of research in the field. Prerequisite: 310B.
5 units, Spr (Sagan, S)

POLISCI 311. Contemporary Issues in Peace Studies — (Same as PSYCH 185/285.) Interdisciplinary. Challenges of pursuing peace in a world of conflict and regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Current research in social psychology, political science, international relations, and negotiation theory. Student involvement in real-world efforts to identify and overcome the barriers that impede a peace settlement. Prerequisite: consent of instructor.
3 units, Spr (Holloway, D)

POLISCI 311A,B,C. Workshop in International Relations — For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.
1-5 units, A: Aut; B: Win (Schultz, K; Goldstein, J), C: not given this year

POLISCI 312. Japanese Foreign Policy — (For graduate students; see 112.)
5 units, not given this year

POLISCI 312R. Domestic Politics and International Conflict — Theoretical and empirical research on the effects of domestic politics and political institutions on the incidence, outcome, and resolution of international conflict. Topics include the democratic peace, diversionary conflict, economic sources of war and peace, domestic influences on war outcomes, and the politics of resolving international rivalries.
5 units, not given this year

POLISCI 314S. Decision Making in U.S. Foreign Policy — (Same as IPS 314S.) Priority to IPS students. Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies.
5 units, Spr (Blacker, C)

POLISCI 316. International History and International Relations Theory — (Same as HISTORY 202/306E.) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system.
5 units, Win (Holloway, D)

POLISCI 318S. State Building — Past and present efforts by external actors to influence domestic authority structures. Topics may include: colonialism; protection of minority rights in the 19th and first half of the 20th century; U.S. intervention in the Caribbean and Central America; U.S. and Soviet intervention in Europe after WW II; Afghanistan; and Iraq. For Ph.D. students; others with consent of instructor.
5 units, not given this year

POLISCI 319. Directed Reading in International Relations — May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)
POLISCI 322. Campaign Finance and Elections —The strategies and behavior of special interest groups, parties, candidates, and voters in the U.S. Emphasis is on statistical models and empirical tests of formal models. Prerequisite: 350B; 351 sequence or 352; or equivalents.
5 units, not given this year

POLISCI 323R. The Press and the Political Process —(Same as COMM 160/260.) The role of mass media and other channels of communication in political and electoral processes.
4-5 units, not given this year

POLISCI 323S. Analysis of Political Campaigns —(Same as COMM 162/262.) Seminar. The evolution of American political campaigns, and the replacement of the political party by the mass media as intermediary between candidates and voters. Academic literature on media strategies, the relationship between candidates and the press, the effects of campaigns on voter behavior, and inconsistencies between media campaigns and democratic norms. Do media-based campaigns enable voters to live up to their civic responsibility? Has the need for well-financed campaigns increased the influence of elites over nominations? Have citizens become disengaged?
4-5 units, Aut (Iyengar, S)

POLISCI 326R. Urban Politics and Public Policy —Major theoretical approaches regarding democracy, participation, representation, economic development, and governance.
5 units, not given this year

POLISCI 329. Directed Reading and Research in American Politics —May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

POLITICAL THEORY

POLISCI 330A. History of Political Thought I —(For graduate students; see 130A; same as CLASSHIS 133/333.)
5 units, Win (Ober, J)

POLISCI 330B. History of Political Thought II: Early Modern Political Thought, 1500-1700 —(For graduate students; see 130B.)
5 units, not given this year

POLISCI 330C. History of Political Thought III: Freedom, Reason, and Power —(For graduate students; see 130C.)
5 units, Spr (Stone, P)

5 units, not given this year

POLISCI 333. Topics in Democratic Theory —(Same as PHIL 377.) Modern approaches to democratic theory including liberal, communitarian, republican, and participatory theories beginning with the works of Locke, Rousseau, and Mill. Writers: John Rawls, Ronald Dworkin, Jeremy Waldron, Joshua Cohen, Habermas, Petit, Iris Marion Young, Ian Shapiro, and Amy Gutman.
3-5 units, not given this year

POLISCI 339. Directed Reading and Research in Political Theory —May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

COMPARATIVE POLITICS

POLISCI 340R. Political Economics —How governments collect revenue, allocate spending, and obtain credit, as determined by variations in institutional and political conditions. The emphasis in a democracy on the provision of public goods and services and representative accountability vs. against the emphasis in less democratized settings on the extractive capacity of the state, the temporal horizons of rulers, and the purchase of political support with money.
5 units, not given this year

POLISCI 340S. Political Economy of Post-Communism —The sources of the collapse of the communist states in E. Europe and the former Soviet Union. The relationship between political reform and economic change, emphasizing democracy versus dictatorship, liberalization, stabilization and privatization, and the role of external actors in internal change in the region. Models and historical analogs for analyzing the emergence of post-communist politics.
5 units, Win (McFaul, M)

POLISCI 341T. Comparative Democratization and Regime Change —Issues of democracy, its definition, problems of transition and consolidation, and comparison. The relationship between democracy and the military, the economy, and the interstate system.
5 units, not given this year

POLISCI 343R. African Civil Wars in Comparative Perspectives: A Research Seminar —Taught jointly with Columbia University via videoconferencing. Topics include causes of civil war, patterns of recruitment and participation, organization of rebel groups, strategies of warring factions, bargaining in the context of peace processes, and civil war termination. Required research paper using original datasets from instructors. Prerequisites: econometric modeling and graduate course work in comparative politics, international relations, and statistics.
5 units, not given this year

POLISCI 344S. Comparative Political Institutions —Overview of existing political institutions and their impact on political-economic outcomes. The roles of political institutions and what determines their stability, how they are chosen, and which processes enable their transformation over time. The main variances in institutional settings, emphasizing the menu of democratic institutions, including parliamentary, semi-presidential, and presidential systems; electoral rules; bicameralism; federalism; and legislative-executive relations. The effect of political institutions on economic growth and political stability.
5 units, not given this year

POLISCI 344U. Political Culture —An approach to culture emphasizing equilibrium attributes through relationships among culture, choice, coordination, and common knowledge. Implications for the study of political processes and institutions.
5 units, not given this year

POLISCI 345R. Political Economy of Japan —Institutions and processes in the political organization of economic activity in Japan. The interaction of public and private sector institutions in the growth of Japan’s postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, and public policy making. Comparison of Japan’s political economy before the bursting of the bubble in 1990-91 with the current situation; why it fell into stagnation and why it has taken Japan so long to recover.
5 units, not given this year

POLISCI 345T. Elections, Electoral Systems, and Democracy in Japan 5 units, not given this year

POLISCI 346S. Logic of Authoritarian Government —(Same as HISTORY 278A/378A.) If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.
5 units, Win (Haber, S)

POLISCI 347S. Comparative Political Economy of Developed Democracies —Relative importance of government partisanship and ideology, social cleavages, and institutional structures in explaining patterns in economic policy and outcomes. How these political models compare with models emphasizing economic variables such as capital market integration, trade openness, or technological change.
3-5 units, not given this year
POLISCI 348. Chinese Politics: The Transformation and the Era of Reform — (For graduate students; see 148.)
      5 units, Aut (Miller, L)

POLISCI 349. Directed Reading and Research in Comparative Politics — May be repeated for credit.
      1-10 units, Aut, Win, Spr, Sum (Staff)

POLITICAL METHODOLOGY

POLISCI 350A,B,C. Political Methodology — (For graduate students; see 150A,B,C.)
      A: 5 units, Aut (Rivers, D)
      B: 5 units, Win (Jackman, S)
      C: 5 units, Spr (Jackman, S)

POLISCI 351A. Foundations of Political Economy — (Same as POLECON 680.) Emphasis is on formal models of collective choice, public institutions, and political competition. Topics include voting theory, social choice, institutional equilibria, agenda setting, interest group politics, bureaucratic behavior, and electoral competition.
      4 units, Aut (Hatfield, J)

POLISCI 351B. Economic Analysis of Political Institutions — (Same as POLECON 681.) Continuation of 351A. Application of microeconomic analysis and game theory to the study of political behavior and institutions. Techniques include information economics, games of incomplete information, sequential bargaining theory, repeated games, and rational expectations. Applications include agenda formation in legislatures, government formation in parliamentary systems, the implications of legislative structure, elections and information aggregation, lobbying, electoral competition and interest groups, the control of bureaucracies, interest group competition, and collective choice rules.
      4 units, Win (Shotts, K)

POLISCI 351C. Applied Formal Models: Governmental Decision Making — (Same as POLECON 682.) Applications of formal models to decision making in the U.S. national government, emphasizing the legislative branch. Topics include strategies of committees, roll call voting, the budget process, policy formation, effects of special rules, congressional-presidential relations, and congressional-agency relations.
      Prerequisites: 351A.B.
      4 units, Spr (Krehbiel, K)

POLISCI 352. Introduction to Game Theoretic Methods in Political Science — (For graduate students; see 152.)
      3-5 units, Win (Fearon, J)

POLISCI 353A,B,C. Workshop in Statistical Modeling — Theoretical aspects and empirical applications of statistical modeling in the social sciences. Guest speakers. Students present a research paper. Prerequisite: 350B or equivalent.
      1-5 units, not given this year

POLISCI 354F. Applied Bayesian Analysis — (Same as ANTHSCI 254.)
      Bayesian modeling in the social sciences emphasizing applications in political science, sociological science, sociology, and education testing. Topics include: Bayesian computation via Markov chain Monte Carlo; Bayesian hierarchical modeling; Bayesian models for latent variables and latent states (measurement modeling); dynamic models; and Bayesian analysis of spatial models. Implementation of Bayesian approaches (priors, efficient sampling from posterior densities), data analysis, and model comparisons. Final project. Prerequisites: exposure to statistical modeling such as 200-level STATS or POLISCI 150/350B,C, or ANTHSCI 292.
      3-5 units, Spr (Jones, J; Jackman, S)

POLISCI 355. Advanced Topics in Research Methods — Applications to American and comparative politics and international relations.
      1-5 units, not given this year

POLISCI 357. Sampling and Surveys — (For graduate students; see 157.)
      5 units, Win (Rivers, D)

POLITICAL ORGANIZATIONS

POLISCI 362. New Economics of Organization — (Same as OB 686.)
      Survey of economic approaches to organization, emphasizing theory and application, with attention to politics.
      5 units, Spr (Weingast, B)

POLISCI 364. Politics and Organization — A foundation for understanding organized activity as it reflects the organization of political life. Coverage of theories is eclectic and interdisciplinary. Emphasis is on political institutions and formal organizations generally, and the norms, expectations, and routines characteristic of informal political structure.
      4 units, Win (Moe, T)

POLISCI 365. Organizational Decision Making — Behavioral theories of organization. Emphasis is on the institutional applications of bounded rationality. Models of incrementalism; evolutionary models of change; organizational learning. The differences between predictions of theories of perfect rationality and those of imperfect rationality. Organizational responses (constructive and pathological) to constraints on information processing. Institutional contexts; public agencies and firms.
      5 units, Win (Bendor, J)

GRADUATE

      1 unit, Aut, Win, Spr (Krosnick, J)

POLISCI 411A,B,C. Research Seminar in International Security and Social Science — Advanced graduate students, faculty, and visitors present current research on contemporary problems in international security.
      1 unit, Aut, Win, Spr (Staff)

POLISCI 420A. Approaches to the Study of American Politics —
      Theories of American politics, focusing on Congress, the presidency, the bureaucracy, and the courts.
      5 units, Aut (Staff)

POLISCI 420B. Topics in American Political Behavior — For graduate students with background in American politics embarking on their own research. Current research in American politics, emphasizing political behavior and public opinion. Possible topics: uncertainty and ambivalence in political attitudes, heterogeneity in public opinion, the structure of American political ideology, political learning, the media as a determinant of public opinion, and links between public opinion and public policy.
      5 units, Win (Sniderman, P)

POLISCI 420C. American Political Institutions — Field seminar. Prerequisites: 420A.B.
      5 units, Spr (Moe, T)

POLISCI 422. Campaigns, Elections, and Public Opinion — Research seminar. Frontiers in mass political behavior. Sources include data sets from the 2004 election cycle. Prerequisite: 420B or equivalent.
      5 units, not given this year

POLISCI 422A,B. Research Seminar in American Political Institutions — Two quarter sequence. Recent work on American institutions including Congress, the courts, and administrative agencies. Some attention to issues of federalism.
      5 units, not given this year

POLISCI 423. Topics in Judicial Politics — Political aspects of law and courts within modern democratic institutional settings. Prerequisite: consent of instructor.
      1-5 units, not given this year
POLISCI 424. Introduction to Political Psychology — Current issues in public opinion and political psychology. The design and analysis of experiments embedded in survey research. Focus is on reviewing the research literature and analyzing relevant data sets.
5 units, not given this year

POLISCI 431. Collective Action in Democratic Athens — (Same as CLASSHIS 431.) How can a collectivity reap the social benefits of cooperation in the face of the tendency of self-seeking individuals to defect? The problem is pressing in democracies, which require cooperation by diverse persons, and in highly competitive environments such as the classical Greek city states. Focus is on the organizational design of classical Athens as a state; how political institutions served to organize useful social and technical knowledge.
5 units, Spr (Ober, J)

POLISCI 432. Graduate Seminar: Global Justice — (Same as PHIL 372C.) The applicability of the idea of justice to global politics; the foundations and substance of human rights; problems of accountability, democracy, and the rule of law in global governance; and issues of distributive justice.
5 units, Spr (Cohen, J)

POLISCI 434. Democracy and the Constitution — (Same as PHIL 374C.) Connections between democratic theory and constitutional theory. Sources include literature from political philosophy, constitutional law, and jurisprudence, and arguments about freedom of expression, campaign finance, legislative apportionment, and privacy. Readings from Scalia, Breyer, Ely, Ackerman, Dahl, Habermas, Dworkin, Przeworski, Riker, and Schumpeter. Non-Law enrollment limited to 10 chosen by lottery. 3 units, Win (Cohen, J)

POLISCI 435. Topics in the Philosophy of Social Science — Topics relevant to present-day political science practice including: the foundation of probability theory; theories of scientific progress; the scope and limits of rational choice theory; and interpretive social science.
5 units, not given this year

POLISCI 436. Rational Choice — The scope and limits of rational choice theory. Possible topics: explanatory and normative uses of rational choice; self-interest versus altruism; the nature of social norms; incommensurable choices; and bounded rationality.
5 units, Spr (Stone, P)

POLISCI 437. Legal Studies Workshop — (Same as LAW 497.)
3 units, Win (Fried, B)

POLISCI 440A. Theories in Comparative Politics — Required of Political Science Ph.D. students with comparative politics as first or second concentration; others by consent of instructor. Theories addressing major concerns in the comparative field including democracy, regime change, the state, revolutions, national heterogeneity, and economic performance.
5 units, Aut (Laitin, D)

POLISCI 440B. Political Economy of Development — (Same as HISTORY 378E.) Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.
5 units, Win (Haber, S)

POLISCI 440C. Methods in Comparative Politics — Required of Political Science Ph.D. candidates with comparative politics as a first or second concentration; others by consent of instructor. Current methodological standards in comparative politics. Students develop their own research design that meets these standards.
5 units, Spr (Laitin, D)

POLISCI 440D. Workshop in Comparative Politics — Faculty, guest speakers, and graduate students conducting research in comparative politics present work-in-progress. Graduate students may enroll for up to 5 total units apportioned by quarter. Auditors welcome. Graduate students whose major or minor field is comparative politics must make at least one presentation to the seminar.
1-5 units, Aut, Win, Spr (Laitin, D; Weinstein, J)

POLISCI 440E. Political Economy of Advanced Industrialized Democracies — Theories of comparative political economy organized as a progression from micro- to macro-level explanations. Sources of political cleavages over economic policies and the formation of political coalitions. Theories positing that differences in the organization of interest groups lead to systematic differences in economic outcomes. The economic and political consequences of differences in partisanism, political institutions, regime types, and the level of economic openness.
5 units, not given this year

POLISCI 441. Politics of Development — Theoretical understanding of how political processes and institutions are reflected in poverty and inequality; the creation of land, labor, and credit markets; and the configuration of fiscal, monetary, and trade policies. The politics of developing countries with emphasis on contrasts between Latin America and Africa.
5 units, not given this year

POLISCI 442. Qualitative and Field Methods — Qualitative methods for data gathering and analysis in political science. Theoretical literature on research design; challenges associated with analysis; techniques for fieldwork. Topics include case selection, levels of analysis, process tracing, ethical concerns in the field, participant observation, interviewing, archival research, survey design, and field experiments. Prerequisites: 440A,B,C.
5 units, Spr (Weinstein, J)

POLISCI 443R. Corporate Restructuring and Governance in Asia — The political economy of state-business relations and attempts at reform. Problems since the 1997 financial crisis, and reforms and restructuring Consequences for corporate governance. Cases studies.
5 units, not given this year

POLISCI 443S. Political Economy of Reform in China — Changes in property rights, markets, credit, and the role of the state in economic development. Comparative insights about reform in the Chinese communist system that distinguishes it from Eastern Europe and the former Soviet Union. Readings in Chinese and English.
5 units, not given this year

COGNATE COURSES
See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

COMM 238/338. Democratic Theory: Normative and Empirical Issues
1-5 units, Win (Staff)

COMM 239. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives
4 units, Spr (Krosnick, J)

EDUC 260X. Understanding Statistical Models and their Social Science Applications — (Same as STATS 209.)
3 units, Spr (Rogosa, D)

FRENGEN 256E. Political Anthropology from Rousseau to Freud
3-5 units, Spr (Dupuy, J)

HISTORY 92A. The Historical Roots of Modern East Asia
5 units, Spr (Miller, L)

HISTORY 150A. Colonial and Revolutionary America
5 units, Aut (Winterer, C)
HISTORY 203A/303A. Theories of the State from the Ancient World to the Present  
5 units, Win (Baker, K; Sheehan, J)

HISTORY 233F. Political Thought in Early Modern Britain  
5 units, Spr (Como, D)

HUMBIO 171. The Death Penalty: Human Biology, Law, and Policy  
3 units, Spr (Abrams, W)

IPS 220. Comparative Political Institutions  
5 units, Win (McElwain, K)

IPS 233. Introduction to Comparative and International Political Economy  
5 units, Spr (McElwain, K)

MS&E 193/193W/293. Technology and National Security  
3 units, Aut (Perry, W; Hecker, S)

PUBLPOL 102. Organizations and Public Policy  
5 units, Win (Bendor, J)

PUBLPOL 183. Philanthropy and Social Innovation  
5 units, Spr (Arrillaga, L)

SOC 117A/217A. China Under Mao  
5 units, Spr (Walder, A)

OVERSEAS STUDIES

Courses approved for the Political Science major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BEIJING

POLISCI 144P. Chinese Economy  
5 units, Aut (Zhu, T)

POLISCI 246P. Comparing the Chinese and American Legal Systems—GER:DB-SocSci  
5 units, Aut, Spr (Zhang, Q)

BERLIN

4-5 units, Aut (Brueckner, U)

5 units, Win (Brueckner, U)

FLORENCE

5 units, Aut (Morlino, L)

POLISCI 43P. Democratic Quality in the Contemporary World—GER:DB-SocSci  
5 units, Spr (Morlino, L)

POLISCI 123P. Italian Politics Between Europe and the Mediterranean—GER:DB-SocSci  
5 units, Win (Morlino, L)

POLISCI 145P. Italy: From Agrarian to Postindustrial Society—(Same as HISTORY 106V.) GER:DB-SocSci  
4 units, Aut (Mammarella, G)

4 units, Win (Vierucci, L)

KYOTO

POLISCI 211P. Japan in Contemporary International Affairs—GER:DB-SocSci  
5 units, Spr (MacDougall, T)

POLISCI 240P. The Political Economy of Japan—(Same as ECON 124X.) GER:DB-SocSci  
4-5 units, Spr (Hayashi, T)

MOSCOW

POLISCI 118P. Russian Politics and Institutions in a Comparative Perspective—GER:DB-SocSci  
5 units, Aut (Melville, A)

5 units, Aut (Trenin, D)

OXFORD

4 units, Aut (Auel, K)

5 units, Spr (Darwin, J)

POLISCI 244P. British and American Constitutional Systems in Comparative Perspective—GER:DB-SocSci  
4 units, Win (McMahon, R)

PARIS

POLISCI 143P. Human Rights in Comparative Perspective—GER:DB-SocSci  
4-5 units, Spr (Remy-Granger, D)

POLISCI 149P. Europe: Integration and Disintegration of States, Politics, and Civil Societies—GER:DB-SocSci  
4-5 units, Win (Strudel, S)

POLISCI 241P. Political Attitudes and Behavior in Contemporary France—GER:DB-SocSci  
4-5 units, Aut (Mayer, N; Muxel, A)

SANTIAGO

POLISCI 117P. Latin America in the International System—GER:DB-SocSci  
4-5 units, Win (Fuentes, C)

POLISCI 223P. Urban Politics in Latin America  
5 units, Spr (Fraga, L)

5 units, Spr (Correa, G)

POLISCI 243P. Political Transition and Democratic Consolidation: Chile in Comparative Perspective—(Same as LATINAM 221X.) GER:DB-SocSci  
5 units, Aut (Micco, S)
MORRISON INSTITUTE FOR POPULATION AND RESOURCE STUDIES

Faculty: (Director) Marcus W. Feldman (Biological Sciences); Carl Djerassi (Chemistry, emeritus), William Durham (Anthropological Sciences), Paul R. Ehrlich (Biological Sciences), Lawrence H. Gould (Economics, Institute for International Studies), Mary Lake Polan (Obstetrics and Gynecology), Shripad Tuljapurkar (Biological Sciences)

Institute Office: 371 Serra Mall (Gilbert 116)
Mail Code: 94305-5020
Phone: (650) 723-7518
Email: morrinst@stanford.edu
Web Site: http://www.stanford.edu/group/morrinst/

Although Stanford University does not have a degree program in population studies, it does have scholars of international reputation in specialties such as demographic history, demographic methods, economic demography, epidemiology, population biology, population genetics, and the sociology and anthropology of populations.

The Morrison Institute for Population and Resource Studies is an interdisciplinary group serving three major functions: (1) encouraging graduate work in population and resource studies through fellowship grants and supervision, (2) instituting courses and seminars in population and resource studies, and (3) bringing visiting faculty to Stanford to strengthen existing course offerings. The institute also organizes an interdisciplinary Colloquium on Population Studies to introduce upper-division undergraduates and graduate students to issues in population-related specialties.

COURSES

Many departments offer courses focusing on issues related to the study of populations and resource use. The following course is sponsored by the Morrison Institute.

BIOSCI 146. Population Studies — Series of talks by distinguished speakers introducing approaches to population and resource studies.
1 unit, Win (Feldman, M)

PSYCHOLOGY

Emeriti: (Professors) Gordon H. Bower, John H. Flavell, Albert H. Hastorf, Eleanor E. Maccoby, David L. Rosenhan, Roger N. Shepard, Carl Thoresen, Barbara Tversky, Robert B. Zajone, Philip G. Zimbardo; (Senior Lecturer) Lyn K. Carstensen
Chair: Laura L. Carstensen
Professors: Albert Bandura (on leave Spring), Laura L. Carstensen, Herbert H. Clark, Carol Dweck, Ian H. Gotlib, Leonard M. Horowitz, John D. Krombholz, Mark R. Lepper, Ellen M. Markman, Hazel R. Markus, James L. McClelland, Dale Miller, Lee D. Ross, David E. Rumelhart (on leave), Claude M. Steele (on leave), Ewart A. C. Thomas, Brian Wandell, Jeffrey J. Wine (on leave Autumn)
Associate Professors: Anne Fernald, James J. Gross, Anthony Wagner
Assistant Professors: Lera Boroditsky, Kalanit Grill-Spector (on leave), Susan C. Johnson, Natasha Kirkham, Brian Knutson, Benoît Monin, Michael Ramscar (on leave), Jeanne L. Tsai
Associate Professors (Teaching): Jennifer L. Eberhardt, Catherine Heaney
Lecturers: Jennifer Culver, Beverly Hartman, Janie Hong, Jeanne Lepper, Adrienne Lomangino
Courtesy Professors: William C. Dement, Gary H. Glover, Jon Krosnick, William T. Newsome, Richard J. Shavelson
Other Affiliation: Albert Ahumada, Jr., Donald Norman, Andrew B. Watson
Director, Bing Nursery School: Jeanne Lepper
Department Offices: Jordan Hall, Building 420
Mail Code: 94305-2130
Department Phone: (650) 725-2400
Web Site: http://psychology.stanford.edu/

Courses given in Psychology have the subject code PSYCH. For a complete list of subject codes, see Appendix.

The courses and research opportunities in the Department of Psychology introduce students to the corpus of data on, and explanations of, human nature and human behavior. Through the study of abnormal behavior, aging, child development, cognitive processes, decision making, emotion, group behavior, infancy, language, learning and memory, personality, social perception, visual perception, and other related topics, students are introduced to the properties of sensory, cognitive, and affective systems, and of their interrelationships; to the reciprocal effects of one person on another; and to the effects on behavior of the physical, social, and cultural environment. The research programs of the faculty and students focus on the study of basic psychological mechanisms and, where appropriate, on relating basic research to the analyses and solutions of important societal problems.

The department, housed in Jordan Hall, maintains shop facilities and many computer-equipped laboratories. Bing Nursery School, located on campus at 850 Escondido Road, provides a laboratory for child observation, training in nursery school teaching, and research. It was constructed with funding from the National Science Foundation and a special grant from Mrs. Anna Bing Arnold and Dr. Peter Bing.

The department provides (1) courses designed for the general student, (2) a major program leading to the degree of Bachelor of Arts, including options for honors and a specialization in one of four content area tracks, (3) a minor program, (4) a coterminous master’s degree program leading to the degree of Master of Arts, and (5) programs of graduate study and research leading to the degree of Doctor of Philosophy. Applications are not accepted for the master’s degree except as noted below.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

Major Requirements — All students declaring a major in Psychology must complete a minimum of 70 units of course work in Psychology, 60 of which must be taken in the Psychology department. The remaining 10 units must be pre-approved by the student services office or faculty
adviser. These courses should represent a coherent thematic focus. One way to achieve this focus is through a specialization track. All courses taken to satisfy the 70-unit requirement must be taken for a grade of ‘C’- or better (except for courses offered only on a satisfactory/no credit basis). All majors must take PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable Statistics course. Advanced placement (AP) credit may no longer be used toward the Psychology major requirements. Beyond these two required courses, students must complete at least five of the following ten core Psychology courses, with a minimum of two from each area A and B:

**Area A Courses:**
- BIOSCI 20. Introduction to Brain and Behavior (formerly PSYCH 20)
- PSYCH 30. Introduction to Perception
- PSYCH 45. Introduction to Learning and Memory
- PSYCH 55. Introduction to Cognition and the Brain

**Area B Courses:**
- PSYCH 60. Introduction to Developmental Psychology
- PSYCH 70. Introduction to Social Psychology
- PSYCH 75. Introduction to Cultural Psychology
- PSYCH 80. Introduction to Personality Psychology
- PSYCH 90. Introduction to Clinical Psychology
- PSYCH 95. Introduction to Abnormal Psychology

Students who declared a major in Psychology prior to the 2002-03 academic year may choose any five of the ten core courses. Students who declared a major in Psychology prior to the 2005-06 academic year may choose to adhere to the 55-unit major requirement, taking PSYCH 1 and 10, five core courses, and elective courses, totaling 55 units.

Students must take one Writing in the Major (WIM) course in Psychology, and should check the Stanford Bulletin yearly as these courses may change. The department also strongly recommends that all majors take at least one advanced seminar.

Students may count up to 10 units of research and independent study (including but not limited to PSYCH 194, 195, 281) toward the Psychology major. Students who are teaching assistants for a Psychology course or are enrolled in the senior honors program are allowed up to 15 units in independent study and research. Any units beyond the limit of 10 or 15 may be counted toward the 180 units required for graduation.

Summer Quarter Psychology courses are not equivalent to courses given during the regular academic year and, while applicable toward the 70 units needed for the major, may not be used to fulfill the core course requirement. Additionally, a course taken during the Summer Quarter cannot be used to replace the grade of a non-Summer Quarter course, even if the title and units of the two courses are the same.

**Beyond the Minimal Requirements** — The following recommendations may be helpful to students who wish to plan a program which goes beyond the minimal requirements listed above:

1. Within the general major, the student may take advanced undergraduate or graduate courses, including seminars. The student may also take advantage of widespread opportunities for directed research, working closely with individual faculty and graduate students.
2. The student may apply to the Senior Honors Program, described below.
3. The student may elect to pursue one of four specialization tracks: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience, described below.

The training obtained from the pursuit of any of these options is valuable not only for students considering graduate work in psychology, but also for those thinking of professional careers outside of psychology in fields such as business, counseling, education, law, or medicine.

**MINORS**

**Declaration** — Students who wish to declare a minor field of concentration in Psychology must do so no later than the deadline for their application to graduate.

**Requirements** — Completion of a minimum of 35 units in Psychology is required for the minor, including PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable statistics course. Advanced placement (AP) credit may no longer be used towards the Psychology minor. The minor must include three of ten core courses, with a minimum of one from each of two areas (A: BIOSCI 20; PSYCH 30, 40, 45, 50; and B: 60, 70, 75, 80, 90, 95) and elective Psychology courses of at least three units each, totaling 35 units.

Students who declared a Psychology minor prior to the 2002-03 academic year may choose any three of the ten core courses. Students who declared a Psychology minor prior to the 2005-06 academic year may choose to complete seven total courses: PSYCH 1 and 10, three core courses, and two elective courses. Independent study and research cannot be counted toward the minor. Summer Quarter Psychology courses are not applicable toward the 35 units needed for the minor. All courses used to fulfill the requirements of the minor must be passed with a grade of ‘C’- or better.

**TRANSFER CREDIT**

Evaluation of transfer credit for the Psychology major or minor is a three-step process. First, in order to submit an undergraduate petition for transfer credit, a student must already have declared Psychology as a major or minor. Second, Stanford credit for courses completed at other institutions must be granted by the External Credit Evaluation section of the Registrar’s Office. Those units can then be applied toward the 180 required for graduation. Third, the Psychology department evaluates the courses to determine if they can be applied toward Psychology major or minor requirements. To have a course evaluated, students must complete an undergraduate petition form (available from the student services office) and submit it with a course syllabus and a copy of the signed transcript from the External Credit Evaluation section showing the number of Stanford units granted for the course.

Psychology majors must complete at least 43 units of course work toward their major at Stanford. No more than 10 units of transfer credit may be counted toward the Psychology minor. Both majors and minors may use only one transfer course towards fulfilling the core course requirements. Additional courses may be used to fulfill the 70-unit requirement, but do not count as core courses.

**SPECIALIZATION TRACKS**

Students in the major program, including those in the senior honors program, may elect to specialize in one of four tracks: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience. Specialization tracks consist of a coherent set of courses leading to advanced undergraduate or even graduate level courses in an area. In the ideal case, the student who specializes would acquire an understanding of a range of psychological processes, as well as an appreciation of the significance of these processes in the chosen area of application. In this way, specialization could facilitate the student’s preparation for a professional career in, for example, medicine, business, or counseling, as well as for graduate work in Psychology.

Specialization in a track is optional, although students who do not wish to complete all the requirements for a track may still want to use the track as a guideline for an integrated program in Psychology. Students who choose to complete a specialization track must meet the requirements for the major plus the additional requirements designated for the track. Typically the courses required for a track include one or two required courses, four to six recommended courses in Psychology, one or two advanced seminars, and three or four courses in related disciplines. Psychology courses completed for the track count toward satisfying the major requirements. Courses from other departments listed for the tracks may count toward the 10 outside units for the major requirement, but must be pre-approved by the student services office or faculty adviser. The Mind, Culture, and Society track includes a two quarter research practicum; students are encouraged to apply for this track by Autumn Quarter of their junior year. Application forms are available from the student services office. There is no application for the other tracks, but all tracks must be declared on Axess and students must submit a transcript form that can be found at http://www-psych.stanford.edu/undergraduate_forms.html or at the student services office. Completion of a track is noted on a student’s transcript, but not on the diploma. Information about the required and recommended courses for each track is available from the student services office.
HONORS PROGRAM

The senior honors program is designed for exceptionally able Psychology majors who wish to pursue a year of intensive supervised independent research. Admission to the program is made at the end of the student’s junior year on the basis of (1) excellent academic performance, (2) previous research experience, and (3) two letters of recommendations by faculty and/or graduate students. An information meeting about the program is held in Winter Quarter. Applications are available late Spring Quarter and are to be turned in to the student services office with a current transcript and recommendations by June 1 prior to the student’s senior year.

Students interested in the program should involve themselves in research as early as possible and should acquire a broad general background in Psychology, including statistics, and a deep background in their chosen area. The honors program is particularly appropriate for students planning to go to graduate school in Psychology or in other social sciences, as well as in computer science, business, law, and medicine.

During Autumn Quarter of their senior year, honors program students participate in a weekly seminar. Initially, discussions are on general methods and issues in psychological research, but most of the sessions are devoted to discussions of students’ presentations of their proposed research. During the quarter, students meet with their advisers to develop their experimental program and begin data collection. At the end of Autumn Quarter, students turn in a written proposal. Winter and Spring quarters are devoted to completing the research, analyzing the data, and writing the thesis, which is submitted mid-May. Students give oral presentations of their projects at the annual Honors Convention, scheduled for the day between classes and exams. This convention is attended by undergraduates, graduate students, and faculty.

GRADUATE PROGRAMS

MASTER OF ARTS

The Department of Psychology normally offers a Master of Arts degree only to students concurrently enrolled in its Ph.D. program or to students currently pursuing Stanford B.A. or M.A. degrees. Admission to the program is by Psychology faculty nomination only. All applicants must satisfy University residency requirements for the degree and are responsible for consulting with their primary departments or the Financial Aid Office about the effects of the proposed program on their current funding. General University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

Stanford undergraduate students who would like advanced training in Psychology may apply for a coterminal M.A. degree in Psychology. To do so, students should consult with the student services officer in the department. Along with a coterminal program application, applicants must submit (1) a statement of purpose, (2) a preliminary program plan specifying the courses in which they intend to enroll to fulfill degree requirements, (3) at least two letters of recommendation from Stanford faculty members familiar with their academic work, (4) a current Stanford undergraduate transcript, and (5) a written nomination by a member of the Psychology faculty willing to serve as the student’s master’s degree adviser. This program is limited in size and admission is selective. Applicants must have earned a minimum of 120 units towards graduation as shown on the undergraduate transcript. The department’s deadline for the submission of an application to the coterminal program is January 10.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

In exceptional cases, students concurrently enrolled in another doctoral or professional program at Stanford may also apply for the M.A. degree. Such applicants also consult with the department’s student services officer.

Students must complete at least 45 units of Psychology courses for the degree. (For coterminal degree students, course work for the master’s degree may not duplicate courses taken for the undergraduate degree.) Of these 45 units, at least 27 must be in Psychology courses numbered 200 or above. Units from research, teaching, independent study, and lab courses, such as PSYCH 258, 269, 275, 281, 282, and 297, may not be counted toward these 27 units. Two of the graduate courses of at least 3 units each (one from Area A and one from Area B below) are required. In addition, at least one upper division statistics course is required. The course must be approved by the student’s adviser. It is recommended that all coterminal students enroll in PSYCH 196, Contemporary Psychology. In addition to the unit and course requirements, coterminal students are required to serve as teaching assistants for at least one Psychology course. Details about the teaching assistantships are available upon acceptance to the program.

All courses to be counted toward the master’s degree must be passed with a grade of “B-” or better (unless the course is offered only on a satisfactory/no credit basis). Units from research, teaching, practica, independent study, and lab courses, such as PSYCH 258, 269, 275, 281, 282, and 297, may be counted toward the remaining required 18 units. Psychology courses numbered in the 100-level and courses from other Stanford departments may be used to satisfy the remaining 18 units. Courses specifically for undergraduates (i.e., undergraduate honors courses) may not be counted toward the master’s program unit requirements. Demonstration of competence in the design and execution of psychological research is also required for receipt of the master’s degree. This demonstration entails completion of a master’s thesis. If the student is currently doing a senior honors thesis, this honors thesis may be accepted as proof of research competence provided the honors thesis is judged to be master’s level research by the student’s adviser and the department’s Committee on Graduate Studies. If the student has just completed an honors thesis in Psychology in the prior year, the student would be expected to continue independent research during the coterminal year and to submit thesis research in a written report which, together with the completed honors thesis, would constitute the master’s thesis. All students are required to make an oral presentation of their research during the Spring Quarter, and to present their thesis or written report by June 1.

Area A Courses:

202. Cognitive Neuroscience
205. Foundations of Cognition
210. Memory and Learning
214. Psycholinguistics
221. Applied Vision and Image Systems
228. Ion Transport
251. Affective Neuroscience
261. Emotion
261A. Learning and Cognition in Activity

Area B Courses:

211. Developmental Psychology
212. Social Psychology
213. Personality and Psychopathology
215. Mind, Culture, and Society
217. Topics and Methods in Cultural Psychology
259. Emotions: History, Theories, Research
271. Applications of Social Psychology

DOCTOR OF PHILOSOPHY

There are no specific course requirements for admission to the doctoral program. However, an applicant should have research experience as an undergraduate, as well as the equivalent of an undergraduate major in psychology. The major focus of the doctoral program is on research training, and admission is highly selective.

Applicants for admission must submit their scores on the general Graduate Record Examination as part of the application. GRE subject scores are strongly encouraged.

General University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

In addition to fulfilling Stanford University requirements for the degree, the following departmental requirements are stipulated.

First-Year Course Requirements—During the first year of graduate study, the student must take 207, Proseminar for First-Year Ph.D. Graduate Students, at least one approved graduate statistics course, and at least two core courses from the list following:
Students in each area may be required to take up to two additional non-core graduate courses in their area of specialization.

The student is expected to spend at least half of the time in research from the beginning of the first year of graduate study to the completion of the Ph.D. normally taking no more than 10 units of course work each quarter. At the end of the first year of graduate study, the student must file with the department a written report of the first-year research activities. The deadline for filing this report is June 1.

Second-Year Course Requirements — By the end of the second year of graduate study, the student must complete the core courses listed above and take a second approved graduate course in statistics.

Third-Year Major Area Paper — During the first week of Autumn Quarter of the fourth year, the student must turn in a Conceptual Analysis of the Dissertation Area (CADA). This paper provides a general framework for the research topic of the dissertation, addresses the central issues within the specialty area, and reviews the pertinent literature. Typically, the analysis has the kind of scope found in the opening chapters of the more traditional dissertations, but the exact format and scope of the paper is a joint decision made by student and adviser.

Prior to Autumn Quarter, the student should select two faculty members to read this paper and give feedback and commentary on it. These should be two faculty members most likely to serve later on the orals committee of the dissertation. A portion of the paper, revised as appropriate, can then become the first section of the actual dissertation proposal.

If the student should radically change the area of the dissertation research after the CADA has been written, the formal CADA procedure does not need to be repeated for the second dissertation topic. The student is still expected, however, to be knowledgeable about the literature and problems of any research topics being pursued for the dissertation.

Minor Requirements — The candidate must complete either a University minor satisfactory to the minor department, or elect to have the minor waived by selecting 12 upper-level units. These 12 units may be fulfilled by either (a) non-core graduate courses in Psychology, excluding any non-core graduate courses required by a particular area, or (b) graduate-level courses in other departments comparable in quality to Psychology’s graduate courses. If there is any question about comparability, students should consult the Graduate Education Committee before taking the course.

Dissertation Reading Committee — The candidate must select a dissertation reading committee satisfactory to the department. The minimum membership of this committee must be (1) the principal dissertation adviser, (2) a second member from within the department, and (3) a third member chosen from Psychology or another department.

Orals — The candidate must pass the University oral examination, which is based on the dissertation proposal, not on the completed dissertation. The reason for this policy is to permit the oral examination to serve the function of guiding and improving the proposed research. This function can best be served if the oral examination is scheduled early in the year in which the dissertation research is conducted. It is therefore expected that the oral examination be taken by the end of the Autumn Quarter of the fourth year.

Dissertation Requirements — The candidate must complete a dissertation satisfactory to the dissertation reading committee.

Ph.D. candidacy expires five years after admission to candidacy at the end of the second year of study. Reapplication requires department reexamination.

STUDENT EVALUATIONS

First-Year Evaluation — It is the department’s policy to evaluate the progress of each graduate student at the end of the first year of graduate study. As part of the procedure, each student is required to file with the department a report of the first-year research activities.

Students should discuss this report and the evaluation procedures with their adviser as early as possible in their first year. The report is due on June 1. If the student fulfills the academic promise displayed upon entrance, he or she is invited to continue to the doctorate.

The first-year evaluation is primarily based on three factors:
1. quality of research carried out in the first year
2. performance in courses (especially required courses)
3. recommendations of the adviser (including a commitment on the part of that adviser to continue in that role)

Second-Year Evaluation — A similar evaluation is conducted at the end of the second year of graduate training involving the same criteria as the first year; however, the student is not required to submit a paper. Students who do not make satisfactory progress during the second year may be dropped from the program.

THE DOCTORAL TRAINING PROGRAM

As indicated by the requirements described above, a student may concentrate in any one of several areas within psychology. Regardless of area, however, the training program places emphasis on the development of research competence, and students are encouraged to develop those skills and attitudes that are appropriate to a career of continuing research productivity. Two kinds of experience are necessary for this purpose: One is the learning of substantial amounts of technical information. A number of courses and seminars are provided to assist in this learning, and a student is expected to work out a program, with his or her adviser, to attain this knowledge in the most stimulating and economical fashion.

A second aspect of training is one that cannot be gained from the courses or seminars. This is firsthand knowledge of, and practical experience with, the methods of psychological investigation and study. These methods include ways of behaving with the people or animals being studied. Students are provided with whatever opportunities they need to reach those levels of competence representative of doctoral standing.

Continuing research programs, sponsored by members of the faculty, offer direct opportunities for experience in fields represented by the faculty’s many research interests.

Each student achieves competence in unique ways and at different rates. Each student and adviser share in planning a program leading to the objectives discussed. The student is expected to spend half of his or her time on research and normally takes no more than 10 units of course work per quarter.

TEACHING REQUIREMENT

The department views experience in supervised teaching as an integral part of its graduate program. Regardless of the source of financial support, all students serve as teaching assistants for five Psychology courses during their graduate study. Of the courses, two should be PSYCH 1, Introduction to Psychology, and/or PSYCH 10, Statistical Methods. Students are discouraged from participating in teaching during the first year of graduate study. Students typically progress from closely supervised teaching to more independent work. Some students may be invited to offer a supervised, but essentially independent, seminar during their final year of graduate study.

PH.D. MINOR

Candidates for the Ph.D. degree in other departments may elect a minor in Psychology. To obtain a minor, the student must complete 20 units of course work at the graduate level in the Department of Psychology, excluding PSYCH 275 (graduate-level research). Crosslisted graduate courses can be used to satisfy this requirement. All courses counting toward the Ph.D. minor must be passed with a grade of ‘B–’ or better (unless the course is offered only on a satisfactory/no credit basis).

COGNITIVE SCIENCE PROGRAM

Psychology participates, along with the departments of Computer Science, Linguistics, and Philosophy, and the School of Education, in an interdisciplinary program of cognitive science. The program is intended to provide students with an interdisciplinary education as well as a deeper concentration in psychology. Doctoral students in Psychology are eligible
to participate in the cognitive science program. Students who complete the requirements receive a special designation in cognitive science along with the Ph.D. in Psychology. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of psychology. For information or course approval, see the student services officer.

**PSYCHOLOGY COLLOQUIUM**

The Psychology Colloquium meets on most Wednesday afternoons at 3-45. Speakers from Stanford and other institutions present topics of current interest. Graduate students are expected to attend.

**COURSES**

WIM indicates that the course satisfies the Writing in the Major requirement.

**SUMMER SESSION**

The courses announced for the Summer Session are those regularly scheduled in the department curriculum. Additional courses may be announced by Stanford Summer Session at http://summer.stanford.edu.

**STANFORD INTRODUCTORY SEMINARS**

**PSYCH 7Q. Language Acquisition** — Stanford Introductory Seminar. Preference to sophomores. Debates concerning how biology guides linguistic development; theories about the nature and origins of human language abilities; and experimental research on the emergence of understanding in infancy.
- 3 units, Aut (Fernald, A)

**PSYCH 12Q. Self Theories** — Stanford Introductory Seminar. Preference to sophomores. The impact of people’s self theories, their beliefs in a fixed self versus a self that can be developed through motivation and performance in school, business, sports, and relationships. How self theories develop and can be changed. Readings include research articles and popular writings. GER:DB-SocSci
- 3 units, Win (Gross, J)

**PSYCH 13N. Culture and Social Relationships** — Stanford Introductory Seminar. Preference to freshmen. How does culture influence how people relate to others including romantic partners, family, friends, acquaintances, and strangers? The cultural norms, values, and structures that shape expectations of and interactions with others. GER:DB-SocSci
- 3 units, Win (Tsai, J)

- 3 units, Win (Knutson, B)

**PSYCH 17N. Language and Society: How Languages Shape Lives** — Stanford Introductory Seminar. Preference to freshmen. Do people who speak different languages think differently? What role does language play in politics, law, and religion? The role of language in individual cognition and in society. Breaking news about language and society; the scientific basis for thinking about these broad issues. GER:DB-SocSci
- 3 units, Aut (Boroditsky, L)

**PSYCH 21N. Conflict, Dispute, Resolution, and the Pursuit of Justice** — Stanford Introductory Seminar. Preference to sophomores. Topics include negotiation, human misunderstanding and conflict, and agreements. Emphasis is on psychological processes and barriers to dispute resolution, and strategies for overcoming those barriers.
- 3 units, Spr (Ross, L)

**PSYCH 22N. The Psychology of Everyday Morality** — Stanford Introductory Seminar. Preference to freshmen. How psychology applies the scientific method to understand moral behavior. When and why people do or do not act morally. Emphasis is descriptive versus normative; focus is on findings of social science, their implications and shortcomings, and psychological research. Sources include classic papers and recent empirical reports.
- 4 units, Spr (Monin, B)

**OPEN TO ALL STUDENTS**

**PSYCH 1. Introduction to Psychology** — Human behavior and mental processes including the nervous system, consciousness, learning, memory, development, emotion, psychopathology, interpersonal process, society, and culture. Current research. GER:DB-SocSci
- 5 units, Aut (Gross, J), Win (Monin, B), Spr (Kirkham, N)

**PSYCH 10. Introduction to Statistical Methods: Precalculus** — (Same as STATS 60/160.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math
- 5 units, Aut (Walther, G), Win (Thomas, E), Spr (Switzer, P), Sam (Richards, W)

**PSYCH 30. Introduction to Perception** — Perceptual psychology and sensory neuroscience, emphasizing vision and hearing. Topics include anatomy and physiology of the eye and ear, and of the visual and auditory areas of the brain, pitch and loudness perception, speech perception, color vision, depth and motion perception, and object and face recognition. Recommended: 1. GER: DB-NatSci
- 3 units, Aut (Wandell, B)

**PSYCH 45. Introduction to Learning and Memory** — The literature on learning and memory including cognitive and neural organization of memory, mechanisms of remembering and forgetting, and why people sometimes falsely remember events that never happened. Cognitive theory and behavioral evidence integrated with data from patient studies and functional brain imaging. Recommended: 1.
- 3 units, Spr (Wagner, A)

**PSYCH 55. Introduction to Cognition and the Brain** — Major topics in cognitive psychology and neuroscience, including empirical approaches to perception, language, learning, memory, knowledge representation, problem solving, and reasoning. WIM
- 4 units, Win (Boroditsky, L)

**PSYCH 60. Introduction to Developmental Psychology** — Psychological development from birth to adulthood, emphasizing infancy and the early and middle childhood years. The nature of change during childhood and theories of development. Recommended: 1. GER:DB-SocSci
- 3 units, Aut (Johnson, S)

**PSYCH 60A. Introduction to Developmental Psychology Section** — Guided observation of children age 2-6 at Bing Nursery School. Corequisite: 60.
- 2 units, Win (Hartman, B; Lomangino, A)

**PSYCH 70. Introduction to Social Psychology** — Theory and empirical research in social psychology: conformity, obedience, helping, and aggression; attitudes, persuasion, identity and roles; person perception, attribution, and social judgment; interpersonal and intergroup relationships, social conflict, prejudice, and stereotyping. Original research proposal. Recommended: 1. GER:DB-SocSci
- 4 units, Win (Boroditsky, L)

**PSYCH 75. Introduction to Cultural Psychology** — The cultural sources of diversity in thinking, emotion, motivation, self, personality, morality, development, and psychopathology. Recommended: 1. GER:DB-SocSci
- 5 units, Spr (Markus, H)

**PSYCH 80. Introduction to Personality Psychology** — Concepts and research methods, major theoretical approaches, and related empirical findings. The psychodynamic, trait, biological, humanistic, behavioral, social learning, cognitive, and cultural perspectives. Recommended: 1. GER:DB-SocSci
- 3 units, Spr (Tsai, J)

**PSYCH 90. Introduction to Clinical Psychology** — Topics include the history of clinical psychology, models and assessment of personality, behavior, cognition, psychopathology, and approaches to the treatment
of abnormal behavior. Emphasis is on current theory, research, issues in, and
the role of clinical psychology in contemporary society. Recommended: 1.
GER:DB-SocSci
3 units, Aut (Culver, J)

PSYCH 95. Introduction to Abnormal Psychology — The nature, origin, and
treatment of a variety of psychological disorders from various psycho-
logical and biomedical perspectives. Historical and current controversies
in the field. Recommended: 1. GER:DB-SocSci
3 units, Spr (Hong, J)

PSYCH 101. Community Health Psychology — (Same as HUMBIO
128.) Social ecological perspective on health emphasizing how individual
health behavior is shaped by social forces. Topics include: biobehavioral
factors in health; health behavior change; community health promotion;
and psychological aspects of illness, patient care, and chronic disease
management.
4 units, Spr (Heaney, C)

PSYCH 102. Longevity — (Same as NENS 202.) Interdisciplinary. Chal-
enges to and solutions for the young from increased human life expec-
tancy: health care, financial markets, families, work, and politics. Guest
lectures from engineers, economists, geneticists, and physiologists.
3 units, Win (Rando, T; Carstensen, L)

PSYCH 110. Research Methods and Experimental Design — Structured
research exercises and design of an individual research project. Prerequi-
site: consent of instructor. GER:DB-SocSci, WIM
5 units, Win (Lepper, M)

PSYCH 120. Cellular Neuroscience: Cell Signaling and Behavior —
(Same as BIOSCI 153.) Neural interactions underlying behavior. Pre-
requisites: 1 or basic biology. GER: DB-NatSci
4 units, not given this year

PSYCH 121. Ion Transport and Intracellular Messengers — (Graduate
students register for 228.) Ion channels, carriers, ion pumps, and their regu-
lation by intracellular messengers in a variety of cell types. Lab demon-
strations and hands-on introduction to techniques such as patch clamping.
Recommended: 120 or introductory course in biology or human biology.
1-3 units, Spr (Wine, J)

PSYCH 125. Beyond Stereotype Threat: Claiming a Rightful Place in an
Academic Community — (Same as CTL 130.) Stereotype threat
as mitigating the quality of a student’s test performance; its impact
on academic success at Stanford. How to reduce the impact of stereotype
threat on Stanford students.
2-3 units, Win (Glickman, A)

PSYCH 130. Introduction to Cognitive Science — (Same as LINGUIST
144, PHIL 190, SYMBSYS 100.) History, foundations, and accom-
plishments of the cognitive sciences, including presentations by leading
Stanford researchers in artificial intelligence, linguistics, philosophy, and
psychology. Overview of the issues addressed in the Symbolic Systems
major. GER:DB-SocSci
4 units, Spr (Bresnan, J)

PSYCH 131. Language and Thought — (Graduate students register for
262.) The psychology of language including: production and understand-
ing in utterances; from speech sounds to speaker’s meaning; children’s
acquisition of the first language; and the psychological basis for language
systems. Language functions in natural contexts and their relation to the
processes by which language is produced, understood, and acquired.
Prerequisite: 1 or LINGUIST 1. GER:DB-SocSci
4 units, Aut (Clark, H)

PSYCH 133. Human Cognitive Abilities — (Same as EDUC 369.) Psy-
chological theory and research on human cognitive abilities; their nature,
development, and measurement; and their importance in society. Persistent
controversies and new areas of research, recent perspectives on the nature-
nuke debate and the roles of genetics, health and education in shaping
HCAs. Prerequisite: PSYCH 1 or equivalent. (PSE) GER:DB-SocSci
3 units, Win (Shavelson, R)

PSYCH 134. Seminar on Language and Deception — Deceptive, explo-
itative, and other noncooperative uses of language. How is language
used to deceive or exploit? Where are these techniques practiced and why?
What are the personal, ethical, and social consequences of these practices?
Prerequisite: 131, LINGUIST 1, or PHIL 181. GER:DB-SocSci
3 units, Win (Clark, H)

PSYCH 137. Birds to Words: Cognition, Communication, and Lan-
guage — (Graduate students register for 239A; same as HUMBIO 145.)
Although the communicative abilities of animals are determined by their
genetic endowment, and human communicative skills dwarf those of other
species, the relation between language and genetics remains the subject
of debate. Is human language genetically specified? Or are human commu-
icative powers just one facet of human cognitive advantage? Focus
is on the nature and origins of language, using evidence from studies of
animals, children, and adults. GER:DB-SocSci
3 units, Win (Fernald, A)

PSYCH 141. Cognitive Development — Topics and issues on cognitive
development, developmental changes in memory, conceptual organiza-
tion, logical reasoning, and communication skills. Prerequisite: 1. GER:
DB-SocSci
3 units, Aut (Markman, E)

PSYCH 143. Developmental Anomalies — Developmental disorders and
impairments. What is the sparing of mental abilities in otherwise devastating
disorders (or vice versa) tell about the mind and its development in the
normal case? Examples of disorders and impairments: autism, congenital
blindness, deafness, mental retardation, attachment disorder, and Wil-
liams syndrome. Prerequisites: 60, 141. GER:DB-SocSci
3 units, Spr (Johnson, S)

PSYCH 145. Seminar on Infant Development — For students preparing
honors research. Conceptual and methodological issues related to research
on developmental psycholinguistics; training in experimental design; and
collection, analysis, and interpretation of data.
1-2 units, Win (Fernald, A)

PSYCH 146. Observation of Children — Learning about children through
guided observations at Bing Nursery School, Psychology’s lab
for research and training in child development. Physical, emotional, social,
cognitive, and language development. Recommended: 60. GER:
DB-SocSci
3-5 units, Aut (Hartman, B; Lomangino, A), Spr (Hartman, B)

PSYCH 147. Development in Early Childhood — Supervised experi-
ence with young children at Bing Nursery School. 3 units require 4 hours
per week in Bing classrooms throughout the quarter; 4 units require 7 hours
per week; 5 units require 10.5 hours per week. Seminar on developmental
issues in the Bing teaching-learning environment. Prerequisite: 60 or 146,
or consent of instructor.
3-5 units, Aut, Win, Spr (Winters, J)

PSYCH 149. The Infant Mind: Cognitive Development over the
First Year — How do babies learn so much in so little time? Emphasis is
on cognitive and perceptual development, and the relationship between
brain and behavior in infancy. Prerequisite: 1. Recommended: 60 or 141.
GER:DB-SocSci
3 units, not given this year

PSYCH 152. Mediation for Dispute Resolution — (Same as EDUC
131.) Mediation as more effective and less expensive than other forms of
settling disputes such as violence, lawsuits, or arbitration. How media-
tion can be structured to maximize the chances for success. Simulated
mediation sessions.
3 units, Aut (Krumholz, J)

PSYCH 155. Introduction to Comparative Studies in Race and Ethnic-
ity — (Same as CSRE 196C, ENGLISH 172D.) How different disciplines
approach topics and issues central to the study of ethnic and race relations
in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE.
Discussions led by CSRE teaching fellows. GER:DB-SocSci
5 units, not given this year
PSYCH 156. Applications of Social Psychology — (Graduate students register for 271.) The application of social psychological theory and research to evaluating the impact of social interventions, strategies, and shortcomings in personal and social decision making; the effects of mass media and other sources of social persuasion; conflict resolution and negotiation; applications in legal, medical, educational, and business settings. Prerequisites: 1 and 10, or consent of instructor.  1-4 units, not given this year

PSYCH 158. Emotions: History, Theories, and Research — (Graduate students register for 259.) Theoretical and empirical issues in the domain of emotions. The history of emotion theories, current approaches, and the interaction between emotion and cognition.  1-3 units, Aut (Zajonc, R)

PSYCH 161. Emotion — (Graduate students register for 261.) The scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas. GER:DB-SocSci  3 units, Win (Gross, J)

PSYCH 162. The Psychology of Gender — Research and theory on the socialization and psychological development of women and men. The biological, cultural, and social factors that influence gendered behavior. GER:EC-Gender  4 units, not given this year

PSYCH 163. Interpersonal Basis of Abnormal Behavior — The role of interpersonal problems and processes in producing forms of psychopathology including neurotic reactions and schizophrenia. Conventional empirical methods clarify the origin, nature, and treatment of emotional and personality disorders. Prerequisite: 90. GER:DB-SocSci  3 units, Win (Horowitz, L)

PSYCH 166. Seminar on Personal and Social Change — Social cognitive approaches to personal and social change. Applications of sociocognitive theory to the modification of psychological dysfunctions in familial, educational, medical, and organizational settings. Ethical and value issues in behavior change.  3 units, not given this year

PSYCH 167. Seminar on Aggression — The causes and modification of individual and collective aggression. Major issues in aggression: social labeling of injurious conduct, social determinants of aggression, effects of the mass media, institutionally sanctioned violence, terrorism, psychological mechanisms of moral disengagement, modification of aggressive styles of behavior, and legal sanctions and deterrence doctrines.  3 units, Win (Bandura, A)

PSYCH 168. Emotion Regulation — (Graduate students register for 268.) The scientific study of emotion regulation. Topics: historical antecedents, conceptual foundations, autonomic and neural bases, individual differences, developmental and cultural aspects, implications for psychological and physical health. Focus is on experimentally tractable ideas. GER:DB-SocSci  3 units, Spr (Gross, J)

PSYCH 171. Research Seminar on Aging — Two quarter practicum exposes students to multiple phases of research by participating in a laboratory focusing on social behavior in adulthood and old age. Review of current research; participation in ongoing data collection, analysis, and interpretation. Prerequisites: 1, research experience, and consent of instructor.  4 units, Aut, Win, Spr (Carstensen, L)

PSYCH 173. Mind, Culture, and Society Research Lab — For juniors in the Mind, Culture, and Society track. Offered over two quarters. Lecture series on current research topics. Research project in second quarter.  2-3 units, Win, Spr (Eberhardt, J)

PSYCH 177. Senior Seminar on Mind, Culture, and Society — For seniors in the Mind, Culture, and Society track. Seminar course on research conducted by seniors in the department. May be repeated for credit.  3 units, Aut (Markus, H)

PSYCH 178. Stigma and Marginality — (Graduate students register for 263.) The perceptions and strategies of the targets of prejudice and discrimination, with emphasis on race and ethnicity. Topics: social perceptions and the judgments of targets, racial identity, behavioral consequences of prejudice and discrimination, and legal/policy implications. Readings from social psychology, African American studies, sociology, and law. Limited enrollment. GER:DB-SocSci  3 units, not given this year

PSYCH 179. The Psychology of Everyday Morality — (Graduate students register for 270.) For graduate students, coterm, and senior Psychology majors. Traditional approaches focusing on how morality colors mundane human activities such as eating and on morality as defined by actors themselves rather than social scientists. Moral hypocrisy, food and disgust, taboo trade-offs, moral reproach, and prejudice with compunction. Limited enrollment. Prerequisite: 70 and consent of instructor.  4 units, Spr (Montin, B)

PSYCH 180. Social Psychological Perspectives on Stereotyping and Prejudice — (Graduate students register for 245.) Classic and contemporary social psychological approaches to prejudice and stereotyping. Emphasis is on how stereotypes are employed and maintained, and the influence of stereotyping and prejudice on behavior in domains including education, employment, politics, and law. Limited enrollment. GER:DB-SocSci  3 units, not given this year

PSYCH 185. Contemporary Issues in Peace Studies — (Graduate students register for 285; same as POLISCI 311.) Interdisciplinary. The challenges of pursuing peace in a world of conflict and regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Current research in social psychology, political science, international relations, and negotiation theory. Student involvement in real-world efforts to identify and overcome the barriers that impede a peace settlement. Prerequisite: consent of instructor. GER:DB-SocSci  3 units, Spr (Holloway, D)

PSYCH 189. Career and Personal Counseling — (Same as EDUC 134/234.) Methods of integrating career and personal counseling with clients and counselors from differing backgrounds. Practice with assessment instruments. Case studies of bicultural role conflict. Informal experience in counseling. (PSE)  3 units, Spr (Krumboltz, J)

PSYCH 190. Reading and Special Work — Independent study. May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.  1-6 units, Aut, Win, Spr, Sum (Dweck, C)

PSYCH 192. Career and Personal Counseling — Independent study. May be repeated for credit. Prerequisite: consent of instructor.  1-3 units, Aut, Win, Spr, Sum (Staff)

PSYCH 193. Special Laboratory Research — May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.  1-6 units, Aut, Win, Spr, Sum (Staff)

PSYCH 196. Contemporary Psychology: Overview of Theory, Research, Applications — Capstone experience for juniors and seniors that bridges course work with research opportunities. Lectures representing the department’s areas: social, personality, developmental, neuroscience, and cognitive psychology. Faculty present current research. Discussions led by advanced graduate students in the field represented by that week’s guest. Students write research proposals. Small grants available to students to conduct a pilot study of their proposed research. Limited enrollment. Prerequisite: consent of instructor. May be repeated for credit.  3 units, Aut (Thomas, E)

PSYCH 197. Advanced Research — Limited to students in senior honors program. Weekly research seminar, independent research project under the supervision of an appropriate faculty member. A detailed proposal is submitted at the end of Autumn Quarter. Research continues during Winter and Spring quarters as 198. A report demonstrating sufficient progress is required at the end of Winter Quarter.  1-4 units, Aut (Eberhardt, J)
**PSYCH 198. Senior Honors Research** — Limited to students in the senior honors program. Finishing the research and data analysis, written thesis, and presentation at the Senior Honors Convention. May be repeated for credit.
1-4 units, Win, Spr (Eberhardt, J)

---

**PRIMARILY FOR GRADUATE STUDENTS**

Undergraduates admitted only by consent of instructor.

**PSYCH 202. Cognitive Neuroscience** — Graduate core course. The anatomy and physiology of the brain. Methods: electrical stimulation of the brain, neuroimaging, neuropsychology, psychophysics, single-cell neurophysiology, theory and computation. Neuronal pathways and mechanisms of attention, consciousness, emotion, language, memory, motor control, and vision. Prerequisite: 207 or consent of instructor.
3 units, Spr (Winawer, J; Witthoft, N)

**PSYCH 204A. Computational Neuroimaging** — Advanced seminar. For students working with functional magnetic resonance imaging (fMRI). The physiological basis of the signal measured using fMRI. Possibilities for experiment design and interpretation of the signal with respect to other physiological and behavioral measurements. Emphasis is on experimental design, software tools, and pulse sequences for fMRI experiments.
1-3 units, Spr (Wandell, B)

**PSYCH 204B. Computational Neuroimaging: Analysis Methods** — Data analysis techniques for neuroimaging data using real and simulated datasets. Basic MR physics and BOLD signals. Topics include: linearity of the fMRI signal; time versus space resolution tradeoffs; and correlation analysis. Reverse engineering: can cognitive states be predicted from brain activation?
1-3 units, alternate years, not given this year

**PSYCH 205. Foundations of Cognition** — Topics: attention, memory, language, similarity and analogy, categories and concepts, learning, reasoning, and decision making. Emphasis is on processes that underlie the capacity to think and how these are implemented in the brain and modeled computationally. The nature of mental representations, language and thought, modular versus general purpose design, learning versus nativism. Prerequisite: 207 or consent of instructor.
1-3 units, not given this year

**PSYCH 207. Professional Seminar for First-Year Ph.D. Graduate Students** — Required of and limited to first-year Ph.D. students in Psychology. Major issues in contemporary psychology with historical backgrounds.
2-3 units, Aut (Carstensen, L)

**PSYCH 210. Foundations of Memory** — Memory and human cognition. Behavioral and neural data indicate that memory is not a unitary faculty but consists of multiple systems that support learning and remembering, each with its own processing characteristics and neurobiological substrates. What is known about memory emphasizing the cognitive and neural architectures of working, declarative, and nondeclarative memory.
3 units, Aut (Wagner, A)

**PSYCH 211. Developmental Psychology** — Prerequisite: 207 or consent of instructor.
1-3 units, Win (Markman, E; Dweck, C)

**PSYCH 212. Social Psychology** — Prerequisite: 207 or consent of instructor.
1-3 units, Aut (Lepper, M; Ross, L)

**PSYCH 213. Personality and Psychopathology** — Theory and research. Prerequisite: 207 or consent of instructor.
1-3 units, Spr (Horowitz, L)

**PSYCH 214. Psycholinguistics** — Prerequisite: graduate standing in Psychology or consent of instructor.
1-3 units, not given this year

**PSYCH 215. Mind, Culture, and Society** — Social psychology from the context of society and culture. The interdependence of psychological and sociocultural processes: how sociocultural factors shape psychological processes, and how psychological systems shape sociocultural systems. Theoretical developments to understand social issues, problems, and policy. Works of Baldwin, Mead, Asch, Lewin, Burner, and contemporary theory and empirical work on the interdependence of psychology and social context as constituted by gender, ethnicity, race, religion, and region of the country and the world. Prerequisite: 207 or consent of instructor.
3 units, Win (Markus, H; Steele, C)

**PSYCH 217. Topics and Methods in Cultural Psychology** — Conceptual and methodological issues in cultural psychology. Possible topics: the mechanisms by which culture influences psychological and social processes in monocultural and multicultural contexts; relations between culture and biology; measurement of culture; development of culturally appropriate instruments and tasks; and use of questionnaire, interview, observational, and physiological methods to study cultural influences on human behavior. May be repeated for credit.
1-3 units, Win (Tsai, J)

**PSYCH 218. Early Social Cognitive Development** — Current literature on social and cognitive development in infancy emphasizing the interface between the two domains. May be repeated for credit.
1-3 units, Win (Johnson, S)

**PSYCH 220. Topics in Cognitive Development** — Prerequisite: graduate standing in Psychology or consent of instructor.
1-3 units, not given this year

**PSYCH 221. Applied Vision and Image Systems** — The design and control of color imaging devices (display, printers, cameras, and scanners). Aspects of human vision relevant to software and hardware design. Topics: digital halftoning, color calibration, color metrics, flicker sensitivity, motion compensation, human spatial resolution, visual masking, JPEG principles, printer design, scanner design, and color software architecture. Lab.
1-3 units, Win (Wandell, B)

**PSYCH 223. Social Norms** — (Same as OB 630.) Research and theory on the origins and function of social norms. Topics include the estimation of public opinion, function of norms as ideals and standards of judgment, and impact of norms on collective and individual psychology. How to identify and formulate tractable research questions.
4 units, not given this year

**PSYCH 224. Learning Mechanisms** — The question of how learning mechanisms produce complex cognition. Topics encompass potential constraints on domain general learning mechanisms in cognition.
1-3 units, not given this year

**PSYCH 227. Seminar in Psycholinguistics: Models of Human and Machine Speech and Language Processing** — (Same as LINGUIST 247.) Recent research emphasizing probabilistic models. Focus is on the relationship between human and machine models.
2-4 units, Win (Jurafsky, D)

**PSYCH 228. Ion Transport and Intracellular Messengers** — (Undergraduates register for 121; see 121.)
1-3 units, Spr (Wine, J)

**PSYCH 230. Aping: Imitation, Control and the Development of the Human Mind** — Seminar. The idea that a childhood that prolongs a state of stimulus-bound helplessness beyond that of animals is the price human beings pay for the benefits of shared cognitive structures. How such structures enable social collaboration, language, and the transmission and sharing of knowledge. Sources include psychological data from animals and humans, and recent discoveries in neuroscience.
1-3 units, not given this year

**PSYCH 231. Graduate Seminar on Self-Efficacy** — The origins, mediating mechanisms, and effects of people’s beliefs in their ability to control events in their lives. Alternative theories of perceived control; the nature and structure of self-efficacy belief systems; major sources of efficacy beliefs; processes through which they affect human functioning; developmental analysis of efficacy beliefs over life course; the application of
self-efficacy theory to cognitive development, health functioning, clinical dysfunctions, organizational functioning, and athletic performance; the exercise of collective efficacy to accomplish social change.

PSYCH 232. Workshop on Neuroeconomics and the Neural Basis of Decision Making — The computational processes the brain uses to make economic decisions; the neural basis of these processes. How these processes shape economic behavior. Neuroeconomics combines experimental techniques from neuroscience, psychology, and experimental economics, such as electrophysiology, fMRI, eye tracking, and behavioral studies, and models from computational neuroscience and economics. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Win, Spr (Knutson, B)

PSYCH 234. Topics in Affective Disorders — Current research topics in the study of affective disorders. Topics: epidemiology and phenomenology of affective disorders, psychological theories of depression, gender differences in affective disorders, cognitive and social functioning of depressed persons, psychobiology of affective disorders, depression in children, postpartum depression, suicide issues in the treatment of depression, and cultural aspects of affective disorders. Prerequisite: graduate standing in Psychology or consent of instructor.

1-3 units, not given this year

PSYCH 239A. Birds to Words: Cognition, Communication, and Language — (Undergraduates register for 137; see 137; same as HUMBIO 145.)

3 units, Win (Fernald, A)

PSYCH 243. General Development Seminar — May be repeated for credit. Prerequisite: consent of instructors.

1-2 units, Win (Markman, E)

PSYCH 244. Psychology of Aging — Theory and research in gerontology. Normal and abnormal changes that occur in biological, cognitive, and psychological aging. Emphasis is on the environmental factors that influence the aging process. Prerequisite: graduate standing in Psychology or consent of instructor.

1-3 units, not given this year

PSYCH 245. Social Psychological Perspectives on Stereotyping and Prejudice — (Undergraduates register for 180; see 180.)

3 units, not given this year

PSYCH 249. Human Motivation — Current research and theory including questions concerning the nature of human motives, intrinsic motivation, self-regulation, the roles of affect and cognition, and lifespan and cultural influences on motivation. Prerequisite: graduate standing in Psychology or consent of instructors.

1-3 units, Spr (Lepper, M)

PSYCH 250. High-level Vision — Theories and ongoing research. Topics: behavioral studies pertaining to representation of objects; generalization and invariances; learning new categories; neuropsychological deficits; properties of high-level visual areas in monkeys and human beings; and theories and models of object and face recognition.

1-3 units, alternate years, not given this year

PSYCH 251. Affective Neuroscience — Theory and research. Comparative and human research approaches map affective function to neuroanatomical and neurochemical substrates. Prerequisite: consent of instructor.

3 units, Win (Knutson, B)

PSYCH 252. Statistical Methods for Behavioral and Social Sciences — (Same as NENS 202.) For students who seek experience and advanced training in empirical research. Analysis of data from experimental through factorial designs, randomized blocks, repeated measures; regression methods through multiple regression, model building, analysis of covariance; categorical data analysis through two-way tables. Integrated with the use of statistical computing packages. Prerequisite: 10 or equivalent.

1-6 units, Aut (Thomas, E)

PSYCH 253. Statistical Theory, Models, and Methodology — Practical and theoretical advanced data analytic techniques such as loglinear models, signal detection, meta-analysis, logistic regression, reliability theory, and factor analysis. Prerequisite: 252 or EDUC 257.

3 units, Spr (Thomas, E)

PSYCH 254. Frontiers of Personality — New findings from fields such as genetics, neuroscience, medicine, and health psychology. Readings from current science journals with an emphasis on the interdisciplinary integration and applications of personality research.

3 units, not given this year

PSYCH 255. Topics in Personality and Abnormal Psychology — Topic varies every year. This year’s topic is personality disorders. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Aut (Horowitz, L)

PSYCH 256. Topics in Language and Cognition — Perspectives from psychology, computational modeling, and neuroscience. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, not given this year

PSYCH 258. Graduate Seminar in Social Psychology Research — For students who are already or are planning to become involved in research on social construal and the role that it plays in a variety of phenomena, notably the origin and escalation of conflict.

1-3 units, not given this year

PSYCH 259. Emotions: History, Theories, and Research — (Undergraduates register for 158; see 158.)

1-3 units, Aut (Zajonc, R)

PSYCH 261. Emotion — (Undergraduates register for 161; see 161.)

3 units, Win (Gross, J)

PSYCH 261A. Learning and Cognition in Activity — (Same as EDUC 295.) Methods and results of research on learning, understanding, reasoning, problem solving, and remembering, as aspects of participation in social organized activity. Principles of coordination that support cognitive achievement and learning in activity settings in work and school environments.

3 units, Win (Pea, R)

PSYCH 262. Language and Thought — (Undergraduates register for 131; see 131.)

4 units, Aut (Clark, H)

PSYCH 263. Stigma and Marginality — (Undergraduates register for 178; see 178.)

3 units, not given this year

PSYCH 266. Current Debates in Learning and Memory — Memory is not a unitary faculty, but consists of multiple forms of learning and remembering. The cognitive and neural architectures of memory, focusing on the application of functional brain imaging (primarily fMRI and ERP).

3 units, Win (Wagner, A)

PSYCH 267. Human Memory: Facts, Fallacies, and Fragile Powers — Seminar. Applications of memory concepts in everyday life and in social and clinical settings. Topics include personal identity, childhood amnesia, autobiographical memory, emotions and memory, memory distortions, illusions, self-serving biases, recovery of repressed memories, false memories, implicit memories, and unconscious influences on social behavior, with applications to psychopathology.

1-3 units, Win (Bower, G)

PSYCH 268. Emotion Regulation — (Undergraduates register for 168; see 168.)

3 units, Spr (Gross, J)

PSYCH 269. Graduate Seminar in Personality Research — May be repeated for credit. Prerequisite: graduate standing in Psychology.

1 unit, Aut, Win, Spr (Gotlib, I)
PSYCH 270. The Psychology of Everyday Morality — (Undergraduates register for 179; see 179.)
4 units, Spr (Monin, B)

PSYCH 271. Applications of Social Psychology — (Undergraduates register for 156; see 156.)
1-4 units, not given this year

PSYCH 272. Special Topics in Psycholinguistics — May be repeated for credit. Prerequisite: consent of instructor.
1-3 units, Spr (Clark, H)

3 units, Aut (Boroditsky, L)

PSYCH 275. Graduate Research — Intermediate-level research with members of departmental faculty. Prerequisite: consent of instructor.
1-15 units, Aut, Win, Spr, Sum (Staff)

PSYCH 277. Topics in Cognitive Control — The processes that enable flexible behavior by biasing contextually relevant perceptual, mnemonic, and response representations or processing pathways. Cognitive control is central to volitional action, allowing work with memory, task/goal states, and overriding inappropriate responses. Current models of cognitive control, functional neuroimaging, and neuropsychological evidence.
1-3 units, not given this year

PSYCH 281. Practicum in Teaching — Enrollment limited to teaching assistants in selected Psychology courses. May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

PSYCH 282. Practicum in Teaching PSYCH 1 — Logistical TA training including: preparing for sections; creating, proctoring, correcting exams; grading an iterative writing assignment; office hours; review sessions; developing audiovisual expertise; communicating via coursework. Review of student evaluations with instructor to set goals and strategies. Second quarter focuses on pedagogical improvement. Limited to current PSYCH 1 TAs. May be repeated for credit.
1-2 units, Aut (Gross, J), Win (Monin, B), Spr (Kirkham, N)

PSYCH 283. International Conflict Resolution — (Same as LAW 611, MS&E 459.) Sponsored by the Stanford Center on International Conflict and Negotiation (SCICN). Interdisciplinary colloquium. Conflict, negotiation, and dispute resolution emphasizing international dimensions including conflicts involving states, peoples, and political factions. Lectures by SCICN faculty and affiliated scholars, guest lecturers, and practitioners from around the world.
1 unit, Win (Ross, L; Weiner, A)

PSYCH 285. Contemporary Issues in Peace Studies — (Undergraduates register for 185; see 185; same as POLISCI 311.)
3 units, Spr (Holloway, D)

PSYCH 290. Graduate Research Methods — Primary tool use for psychologists: basics of experiment design; computer-based experiments; web-based experiments; data analysis packages and data presentation; exploratory statistics; eye-tracking methods; psychophysiology methods; survey construction; corpus and discourse analysis; and perhaps hypnosis. Prerequisite: Ph.D. student in Psychology.
2 units, Win (Turan, B)

PSYCH 296. Methods in Personality and Social Psychology — Focus is on developing a set of methodological skills in personality and social psychology. Experimental survey and multivariate methods. Topics: archival and correlational studies; experimental and quasi-experimental design; formulating the research problem; going from abstract ideas to concrete instances; handling research artifacts; measuring and analyzing change data; observational techniques; organizing data: professional and ethical issues; triangulation; validity and reliability of measurement. Practicum format. Research proposal. Prerequisite: graduate standing in Psychology or consent of instructor.
1-3 units, not given this year

PSYCH 297. Seminar for Coterminal Master of Arts — Contemporary issues and student research. Student and faculty presentations.
1-2 units, Aut, Win, Spr (Thomas, E)

PSYCH 459. Frontiers in Interdisciplinary Biosciences — (Same as BIOC 459, BIOE 459, BIOSCI 459, CHEMENG 459, CHEM 459.) (Crosslisted in departments in the schools of H&S, Engineering, and Medicine; students register through their affiliated department; otherwise register for CHEMENG 459.) For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See http://www.stanford.edu/group/biox/courses/459.html. Recommended: basic mathematics, biology, chemistry, and physics.
1 unit, Aut, Win, Spr (Robertson, C)

COGNATE COURSES
See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

BIO SCI 150/250. Human Behavioral Biology — (Same as HUMBIO 160.)
6 units, alternate years, not given this year

COMM 239. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives
4 units, Spr (Krosnick, J)

EDUC 233A. Counseling Interventions from a Multicultural Perspective
3 units, Aut (LaFromboise, T)

EDUC 252. Introduction to Test Theory
3-4 units, not given this year

EDUC 340. Psychology and American Indian Mental Health
3-5 units, Spr (LaFromboise, T)

EDUC 353A. Problems in Measurement: Item Response Theory
3 units, alternate years, not given this year

HUMBIO 127A,B. Community Health: Assessment and Planning
4 units, A: Win, B: Spr (Heaney, C)

LINGUIST 140/240. Language Acquisition I
4 units, Aut (Clark, E)

LINGUIST 241. Language Acquisition II: Pragmatics and Language Acquisition
1-4 units, Win (Clark, E)

POLISCI 402. Methods of Analysis Program in the Social Sciences (MAPSS) Workshop — (Same as COMM 310.)
1 unit, Aut, Win, Spr (Krosnick, J)
The undergraduate Public Policy curriculum is intended to expose students to the basic concepts and tools used in evaluating public policy options and outcomes, and to prepare students for entry-level positions in organizations concerned with such analysis. Although the concepts and tools are of wider applicability, the institutional context is chiefly American. Economics and quantitative analyses are central to but not sufficient in fundamental human values that often animate the policy debate. After completing the core, students apply these skills by focusing their studies in one of several areas of concentration. The areas of concentration address specific fields of public policy, types of institutions, or a deeper development of the tools of policy analysis. Areas of concentration change as the Stanford curriculum evolves. A list of recommended courses for each current concentration is available in the program office. Students may, with the written consent of their adviser and the director of the program, propose their own area of concentration. These areas of concentration are not declared on Axess; they do not appear on the transcript or diploma.

Recent areas of concentration include:
- Advanced Methods of Policy Analysis
- Design of Public Institutions
- Development and Growth Policies
- Education
- Environment, Resources, and Population
- Health Care
- International Policies
- Law and the Legal System
- Science and Technology Policy
- Social Policy: Discrimination, Crime, Poverty
- Urban and Regional Policy

Completion of the program in Public Policy requires 87 units of course work.
1. 44 units of prerequisite courses: POLISCI 2; ECON 1A, B, 50, 51, 102A, 102B; MATH 51; and MS&E 180. ECON 50 must be completed with a grade of ’B’ or better. ECON 51 must be taken for a letter grade. A maximum of 10 units of the other prerequisite courses may be taken credit/no credit.
2. The 25-unit sequence of 5-unit core courses, which students should plan to complete by the end of their junior year (see below for 101, 102, 103A or B, 104, and 106). All core courses must be completed for a letter grade. A grade point average (GPA) of 2.0 (or higher) in the core courses is required.
3. Majors must complete at least 15 units of course work in an area of concentration. The post-core course work must be approved by a concentration adviser and the director. Concentration course work must be completed for a letter grade.
4. Seniors are required to participate in one quarter (3 units) of the Senior Seminar (PUBLPOL 200A, B, or C). Majors also must submit at least one research paper during the senior year and present it before the Senior Seminar. The senior paper may be a term paper for either the senior seminar or another course, or an honors thesis. Effective 2006-07, PUBLPOL 200B (Winter Quarter), is organized as a practicum in which small student teams analyze real world policy problems faced by Bay Area government agencies, and produce a report for use by the client. The senior seminar must be completed for a letter grade.
5. Students must complete the Public Policy core and their concentration area courses with a grade point average (GPA) of 2.0 or higher.
6. It is recommended that the major be declared by the end of sophomore year but no later than the end of Autumn Quarter of the junior year. Application forms are available in the Public Policy Program office and on the web site.

The Public Policy Program encourages students to participate in various Stanford internship programs, especially those available through the Haas Center for Public Service and Stanford in Washington.

MINORS

The Public Policy Program offers a minor that is intended to provide students with interdisciplinary training in applied social sciences. Students who pursue the minor are required to take the courses listed below for a total of 35 units in Public Policy and its supporting disciplinary departments. Because University rules prohibit double-counting courses, the requirements for a minor differ according to the student’s major requirements. All courses for the minor must be completed for a letter grade.

For students whose major department or program requires no courses in economics and political science, the requirements for a Public Policy minor are:

### UNDERGRADUATE PROGRAMS

#### BACHELOR OF ARTS

The core courses in the Public Policy Program develop the skills necessary to assess the performance of alternative approaches to policy implementation, evaluate the effectiveness of policies, understand the political constraints faced by policy makers, and appreciate the conflicts
HONORS PROGRAM

The Public Policy Program offers students the opportunity to pursue honors work during the senior year. To graduate with honors in Public Policy, a student must:

1. Apply for admission to the honors program no later than the end of Spring Quarter of the junior year.
2. Complete the requirements for the B.A. in Public Policy and achieve a grade point average (GPA) of 3.5 in the following courses: the Public Policy core; the student’s concentration area courses; the Senior Seminar; PUBLPOL 199, Senior Research; and PUBLPOL 105. Students are encouraged to complete PUBLPOL 105 by the end of Spring Quarter of the junior year and PUBLPOL 200A during Autumn Quarter. Courses not taken at Stanford are not included in calculating the GPA.
3. Submit an honors thesis by enrolling in at least 8 but no more than 15 units of PUBLPOL 199, Senior Research, during the senior year and receive a final grade on the senior thesis of at least a ‘B+’. The honors thesis must demonstrate mastery of relevant analytical tools and address a policy issue.

Students who intend to pursue honors work should plan their academic schedules so that most of the core courses are completed before the beginning of the senior year, and all of the core and concentration courses are completed by the end of Winter Quarter of senior year. This scheduling gives students both the time and the necessary course background to complete a senior research project in Spring Quarter. In addition, honors students are encouraged to enroll in PUBLPOL 197, Junior Honors Seminar, during Winter or Spring Quarter; this course focuses on developing a research plan and the research skills necessary to complete a thesis.

To apply, a student must submit a completed application to the Public Policy Program office with a brief description of the thesis. The student must obtain the sponsorship of a faculty member who approves of the thesis description and who agrees to serve as a thesis adviser. Students intending to write a thesis involving more than one discipline may wish to have two advisers, at least one of whom is a member of the Public Policy affiliated faculty.

The honors thesis must be submitted to both the thesis adviser and the Public Policy Program office. Graduation with honors requires that the thesis be approved by both the adviser and the Director of the Public Policy Program. The role of the director is to assure that the thesis deals with an issue of public policy and satisfies the standards of excellence of the program. However, the grade for the honors thesis is determined solely by the adviser. In order to be considered for University and department awards, the final thesis must be submitted to the program office by mid-May in both hard copy and electronic forms. All other theses must be submitted by the last Friday in May in both hard copy and electronic forms.

Members of the core faculty in Public Policy are available to provide assistance in selecting a senior thesis topic and adviser.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

PUBLPOL 101. Politics and Public Policy — How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Students taking this course may not take POLISCI 123 for credit. Prerequisite: POLISCI 2. GER:DB-SocSci 5 units, Win (Brady, D)

PUBLPOL 102. Organizations and Public Policy — Analysis of public organizations, emphasizing problems of effective management and incentives in a non-market environment. Prerequisite: ECON 1A. GER:DB-SocSci 5 units, Win (Bendor, J)

PUBLPOL 103A or B. Ethics and Public Policy

PUBLPOL 104. Economic Policy Analysis — (Same as ECON 150.) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisites: ECON 50 and 102A. 5 units, Spr (Kessler, D)

PUBLPOL 105. Quantitative Methods and Their Applications to Public Policy — Reviews material covered in prerequisites with applications of qualitative independent variable techniques to labor market data. Maximum likelihood estimation and qualitative dependent variable models with an application to voting models. Final papers estimate influence of quantitative and qualitative independent variables on Congressional voting probabilities. Prerequisites: PUBLPOL 102A.B. GER:DB-SocSci 5 units, Spr (Rothwell, G)

PUBLPOL 106. Economics of Legal Rules and Institutions — (Same as ECON 154.) The design and consequences of legal rules. Common ideas that run through law including individual rationality, economic efficiency, conventional and Coasian analyses of externalities, enforcement, costs, and market consequences of legal restrictions on contract terms. Private versus public enforcement of law; the tradeoff between certainty and severity of punishment; the choice between ex post and ex ante sanctions; and the choice between property and liability rules. Applications to property, intellectual property, contract, criminal, tort, family, and environmental law. Prerequisite: ECON 51. WIM 5 units, Win (Owen, B)
PUBLPOL 125. Law and Public Policy — How lawyers argue and judges decide cases versus other forms of rhetoric and decision making. Legal reasoning and dispute resolution within Anglo-American common law and in comparative perspective across diverse societies. The relationship between law and public policy on issues related to technology, culture, race, sexuality, civil liberties, terrorism, homeland security, and capital punishment. Sources include judicial opinions, interdisciplinary legal scholarship, ethnography, literature, and film. Prerequisite: POLISCI 2 or consent of instructor.
5 units, Aut (Greenberg, J)

PUBLPOL 126. Networking with Government to Achieve Social Change — (Same as GSBGEN 593.) The role of government in the change process, the values and mindsets of government leaders, assets and resources that public agencies bring to the change initiative, limits of government action, and leadership strategies for promoting collaboration between sectors. Guest speakers, case studies, team projects. Students develop business plans for a social innovation project.
2 units, Win (Benest, F)

PUBLPOL 127. Politics, Constitutions, and Building America — (Same as POLISCI 225D. URBANST 168.) How Americans built their infrastructure: why financing infrastructure has changed. Sources include economic history, political history, public finance theory, and political economy theory.
5 units, Win (Wallis, J)

PUBLPOL 145. Globalization and Labor Conditions — The politics and economics of alternative private and public policies aimed at improving labor conditions around the world. Do international trade, offshore outsourcing, international migration, and multinational corporations undermine working conditions and labor rights?
5 units, not given this year

PUBLPOL 146. Comparative Public Policy — Problems, answers, underlying political philosophies, and impacts of public policy choices in areas such as aging populations, health care costs, illegal immigration, terrorism, pollution, and competition from low-cost countries. Focus is on N. America and Europe. GER:DB-SocSci
3 units, not given this year

PUBLPOL 168. Global Organizations and Policy — Analytical tools derived from the social sciences to analyze global organizations and projects, and applied to the trade-offs between different designs of teams and organizations. Focus is on tribal mentality and how to design effective organizations and projects for policy implementation within and across institutional settings. Recommended: 102, MS&E 180, or SOC 160. GER:DB-SocSci
5 units, Win (Meyersson Milgrom, E)

PUBLPOL 182. Persuasive Policy: Shaping Policy Debates with Online Tools — The increasing reliance on web sites and other electronic tools to shape the policy debates, convince the undecided, and mobilize supporters. Techniques for translating policy documents into credible and persuasive content. Examples include the economic costs of the Iraq war, education policy choices in California, and global warming. Required participation in SIEPR policy forum. Prerequisite: ECON 1A,B (formerly ECON 1).
2 units, Aut (Hanson, W)

PUBLPOL 183. Philanthropy and Social Innovation — Philanthropy’s role in modern society and the translation of its vision and capital into social action. Topics: individual giving; philanthropic history and industry; foundation models and infrastructure; philanthropic strategy and grantmaking; accountability and board governance; global and corporate philanthropy; and public policy engagement. Readings: business school cases and industry articles. Guest speakers include individual donors and foundation presidents. Final project: students evaluate grant proposals and make funding recommendations. Enrollment limited to 15. GER: DB-Hum
5 units, Spr (Arrillaga, L)

PUBLPOL 184 Poverty and Policies in Developing Economies — Economic models of growth and poverty, differences in growth rates among countries, and the persistence of poverty. Models of physical and human capital accumulation, and recent theories of the importance of institutions, social capital, and political factors. The effectiveness of social policies in developing countries, emphasizing India, in the light of theories of growth and poverty, and in terms of immediate goals and long-term consequences. Policies include schooling and health, anti-poverty, banking, and political decentralization. Prerequisite: ECON 1A,B (formerly ECON 1).
5 units, Win (Kochar, A)

PUBLPOL 185. Managing Public Policy — The role of administration in the U.S. government. Major issues include political control of government agencies, role of the civil service, reinventing government, contracting out government services, budgeting, and human resource administration.
GER:DB-SocSci
5 units, not given this year

PUBLPOL 187. The Unintended Consequences of Technology — How human inventions impact other inventions, society, the individual, and history. Unintended social consequences of technologies such as railroads, telegraphs, telephones, automobiles, and jet travel. Group projects focus on the design of a national survey to gauge the social effects of Internet technology (IT) on how people spend their time, including the impact of Internet use on non-work activities such as sleep and time spent with family and friends. Practical and innovative techniques in statistical analysis. GER:DB-SocSci
3-4 units, Spr (Nie, N)

PUBLPOL 188. California Politics: Past, Present, and Future — (Same as POLISCI 221V.) Changing patterns of politics from the mid-19th century to the present. Emphasis is on the role of institutions in structuring the state’s politics. GER:DB-SocSci, EC-AmerCul
5 units, not given this year

PUBLPOL 189. Latinos in American Politics — (Same as POLISCI 221U.) Evolution of Latino participation in American politics from the mid-19th century to the present. Issues include conquest, immigration, the Chicano movement, national origin diversity, gender, political parties, and office holding. GER:DB-SocSci, EC-AmerCul
5 units, not given this year

PUBLPOL 194. Technology Policy — The evolution of U.S. technology policy and how policy is made. Topics: federal technology policy before and after WW II; the debate over using R&D programs to promote economic growth and competitiveness; the impact of federal policy on the development of the Internet and biotechnology; and stem-cell research and digital copyrights as examples of controversies over the social impact of technological activities. Prerequisites: POLISCI 2.
5 units, Win (Windham, P)

PUBLPOL 197. Junior Honors Seminar — (Same as ECON 198.) Primarily for students who expect to write an honors thesis. Weekly sessions discuss writing an honors thesis proposal (prospectus), submitting grant applications, and completing the honors thesis. Readings focus on writing skills and research design. Students select an adviser, outline a program of study for their senior year, and complete a prospectus by the end of the quarter. Seniors working on their theses also may enroll and present their research to the seminar participants. Seniors are required to make substantial progress on their thesis by the end of the quarter. Enrollment limited to 25.
5 units, Win, Spr (Rothwell, G)

PUBLPOL 198. Perspectives in Public Policy — Examine public policy in comparative and historical perspective. Topics include economic growth and development; government action and leadership; and the role of institutions, organizations, and ideas in policy change. Prerequisite: POLISCI 2.
5 units, Win (Greenberg, J)
SCHOOL OF HUMANITIES AND SCIENCES

PUBLPOL 198. Directed Readings in Public Policy
1-5 units, Aut, Win, Spr (Staff)

PUBLPOL 199. Senior Research — May be repeated for credit.
1-15 units, Aut, Win, Spr (Staff)

PUBLPOL 200A. Senior Seminar — Students conduct original research for oral presentations and a paper on a policy-related topic. Topic and methods of analysis determined by student in consultation with instructor. Goal is to improve analytical, research, writing, and communication skills. Prerequisites: core courses in Public Policy or consent of instructor.
3-5 units, Aut (Flaherty, C)

PUBLPOL 200B. Senior Seminar: Conducting Policy Analysis for Local Agencies — Students conduct original research for oral presentations and a paper on a policy-related topic. Topic and methods of analysis determined by student in consultation with instructor. Goal is to improve analytical, research, writing, and communication skills. Prerequisites: core courses in Public Policy or consent of instructor. GER:DB-SocSci
3-5 units, Win (Sprague, M)

PUBLPOL 231. Political Economy of Health Care in the United States — (Same as MGTECON 331, HRP 391.) The economic tools and institutional and legal background to understand how markets for health care products and services work. Moral hazard and adverse selection. Institutional organization of the health care sector. Hospital and physician services markets, integrated delivery systems, managed care, pharmaceutical and medical device industries. Public policy issues in health care, medical ethics, regulation of managed care, patients’ bill of rights, regulation of pharmaceuticals, Medicare reform, universal health insurance, and coverage of the uninsured. International perspectives, how other countries’ health care systems evolved, and what the U.S. can learn from their experiences.
4 units, Spr (Kessler, D)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

ECON 1A.B. Introductory Economics
5 units, A: Aut (Clerici-Arias, M), Win (Wright, G), B: Win, Spr (Staff)

ECON 51. Economic Analysis II
5 units, Win, Sum (Staff)

ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists
5 units, Aut (Tendall, M), Win (Staff)

ECON 102B. Introduction to Econometrics
5 units, Win (Mahajan, A), Spr (Staff)

EDUC 377. Comparing Institutional Forms — (Same as GSBGEN 346.)
4 units, Win (Powell, W)

MATH 51. Linear Algebra and Differential Calculus of Several Variables
5 units, Aut (Levy, D), Win (Oprea, D), Spr (Lucianovic, M), Sum (Staff)

MS&E 180. Organizations: Theory and Management
4 units, Aut (Eisenhardt, K), Spr (Hinds, P)

PHIL 30. Introduction to Political Philosophy — (Same as ETHICSOC 30, POLISCI 3.)
5 units, Win (Stone, P)

OVERSEAS STUDIES

Courses approved for the Public Policy major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

FLORENCE
PUBLPOL 120P. Global Environmental Problems
4 units, Spr (Gaeta, P)

PARIS
PUBLPOL 111P. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time — (Same as HUMBIO 120X.) GER:DB-SocSci
4-5 units, Win (Fessler, J)

RELIGIOUS STUDIES

Emeriti: (Professors) René Girard, Edwin M. Good, Robert C. Gregg, Van Harvey, David S. Nivison
Chair: Hester G. Gelber
Professors: Carl W. Bielefeldt, Arnold M. Eisen (on leave, Autumn, Winter), Bernard R. Faure (on leave), Hester G. Gelber, Thomas Sheehan, Lee Yearley
Associate Professors: Charlotte Fronrobert, Brent Sockness
Assistant Professors: Behnam Sadeki, Michael Zimmermann
Senior Lecturer: Adriane Leveen (on leave Winter)
Lecturers: Linda Hess, Ellen McFarney
Acting Professor: Paul Harrison
Acting Associate Professor: Fabrizio Pregadio
Acting Assistant Professor: Barbara Pitkin
Visiting Associate Professor: Nathaniel Deutsch
Affiliated Faculty: Jean-Pierre Dupuy (French and Italian), Maud Gleason (Classics), Jack Kollmann (Russian, East European and Eurasian Studies)

Department Offices: Building 70
Mail Code: 94305-2165
Phone: (650) 723-3322
Web Site: http://www.stanford.edu/dept/relstud/

The purpose of Religious Studies is to understand and interpret the history, literature, thought, and social structures of various religious traditions and cultures. The department offers courses at several levels, described below.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The goal of the Religious Studies undergraduate curriculum is to give students exposure to the set of phenomena called religion and the leading theories and methods by which religion is studied in the modern university. The department’s courses are designed to engage students existentially and to assist them in thinking about intellectual, ethical, and sociopolitical issues in the world’s religions. No less important, the department faculty seek to provide tools for understanding the complex encounters among religious ideas, practices, and communities, and the past and present cultures which have shaped and been shaped by religion. Courses therefore expose students to leading concepts in the field of religious studies such as god(s), sacrifice, ritual, scripture, prophecy, and priesthood; to approaches developed over the past century, including the anthropological, historical, psychological, philosophical, and phenomenological, that open religion to closer inspection and analysis; and to major questions, themes, developments, features, and figures in the world’s religious traditions. The department encourages and supports the acquisition of languages needed for engagement with sacred texts and interpretive traditions.
MAJORS

The curriculum for majors is designed to move students sequentially from foundational courses, through deeper investigations, culminating in integrative research courses. Thus, the introductory sequence is designed to lead to a wide array of courses which build on this foundation, with topics including: particular traditions such as Judaism or Buddhism; comparative studies such as nonviolence in Hinduism and Buddhism, or Muslim and Christian interpretations of scripture; specific topics such as mysticism, gender and religion, or theodicy; and distinctive approaches such as the philosophy of religion or ritual studies. Majors complete their careers with integrative courses which afford opportunity for research and consolidation of the knowledge and skills gained earlier.

A Bachelor of Arts in Religious Studies requires 60 units of course work. At least 44 units are taken in courses numbered above 100. Ten units out of the 60 may be taken for the grade of ‘CR/NC.’

1. At least eight of the 60 units must be courses at the introductory level.
   Students may satisfy this requirement by taking either:
   a) I r M 68A,B. Approaching Religion: Tradition, Transformation, and the Challenge of the Present (Winter/Spring sequence), or
   b) one course in each of the following categories: introduction to religious traditions (courses numbered 11-50) and academic approaches to the study of religion (courses numbered 51-99).
   In consultation with the Undergraduate Director, one Stanford Introductory Seminar in Religious Studies may be applied to this introductory requirement.

2. At least 29 units are to be taken in intermediate lecture and seminar courses numbered 100-289. Of these, at least two seminars are required from courses numbered above 200. Language courses relating to students’ study of religion within the department, such as Arabic, biblical Hebrew, New Testament Greek, Chinese, or Japanese, but not counted towards the University language requirement may, with departmental approval, be counted among these 29 units.

3. 15 units in integrative courses:
   a) Majors’ Seminar: RELIGST 290, Theories of Religion (5 units, fulfills WIM requirement)
   b) Senior Essay or Honors Thesis Research: RELIGST 297 (3-5 units; up to 10 units over two quarters)
   c) Senior Majors’ Colloquium: RELIGST 298 (5 units, Spring Quarter, graded S/NC)
   d) Completion of either a senior essay or honors thesis. See below concerning the difference between these options.

4. Each student, in consultation with his/her adviser, works out a focus of study centering either on a particular religious tradition or on a theme or problem which cuts across traditions such as ritual, ethics, scripture, religion.

SENIOR ESSAY

A 25-30 page essay on a topic chosen by the student and approved by the adviser upon receipt of a student’s proposal by the end of the third quarter prior to expected graduation. The character and content of the essay, which is meant to allow the student to call into play knowledge and skills learned in the course of the major, may take several forms. For example, a student may return to a subject studied earlier but now pursued with more questions or from a new perspective, or research a recent or new topic of interest in the field, or offer a carefully framed critical assessment of what has been learned in the major based on review of influential sources, theories, and methods of studying religion. The senior essay is read and graded by the student’s adviser and one other member of the Religious Studies faculty.

HONORS THESIS

A 40-80 page research paper on a topic chosen by the student and approved by the adviser upon receipt of a proposal in the fourth quarter prior to expected graduation. The paper, supported by mastery of primary and secondary scholarship, advances a well-reasoned, supportable thesis. Writers of honors theses must have a grade point average (GPA) of 3.5 in Religious Studies courses, and at least 3.2 overall, and are expected to have already demonstrated success in writing research papers. The honors thesis is read and graded by the student’s adviser and one other member of the Religious Studies faculty. Theses earning a grade of ‘B’ or above receive honors.

MINORS

A minor in Religious Studies requires a minimum of 30 graded units. Students must declare the minor no later than the last day of the quarter, two quarters before degree conferral.

Requirements for the minor include:

1. Two introductory courses. To satisfy this requirement, students take either:
   a) I r M 68A,B. Approaching Religion: Tradition, Transformation, and the Challenge of the Present (Winter/Spring sequence), or
   b) one course in each of the following categories: introduction to religious traditions (courses numbered 11-50) and academic approaches to the study of religion (courses numbered 51-99).
   In consultation with the Undergraduate Director, one Stanford Introductory Seminar in Religious Studies may be applied to this introductory requirement.

2. Five intermediate lecture and seminar courses, 100-289.

3. One course in directed reading (RELIGST 199) may count towards the minor.

4. Students may petition for other Stanford courses to fulfill minor requirements, but they must take courses from at least two Religious Studies faculty members.

5. Students are strongly encouraged to focus their program of study either in a religious tradition or in a theme which cuts across traditions. In consultation with their advisers, students may design the minor in Religious Studies to complement their major.

MAJOR IN RELIGIOUS STUDIES AND PHILOSOPHY

The departments of Religious Studies and Philosophy jointly nominate for the B.A. students who have completed a major in the two disciplines. See a description of this joint major under the “Philosophy” section of this bulletin, or in the guidelines available from the undergraduate director of either department.

GRADUATE PROGRAMS

MASTER OF ARTS

University regulations pertaining to the M.A. are listed in the “Graduate Degrees” section of this bulletin. The following requirements are in addition to the University’s basic requirements.

The student completes at least 45 units of graduate work at Stanford beyond the B.A. degree, including a required graduate seminar (304A or B). Residence may be completed by three quarters of full-time work or the equivalent.

The student’s plan of courses is subject to approval by the Graduate Director. No field of specialization is expected, but students may focus work in particular areas. Advanced and graduate courses in other departments may be taken. No thesis is required; a thesis, if elected, may count for as many as 9 units.

Each student demonstrates reading knowledge of at least one foreign language.

DOCTOR OF PHILOSOPHY

University regulations regarding the Ph.D. are found in the “Graduate Degrees” section of this bulletin. The following requirements are in addition to the University’s basic requirements.

Residence — Each student completes three years (nine quarters) of full-time study, or the equivalent, in graduate work beyond the B.A. degree, and a minimum of 135 units of graduate course work (excluding the dissertation).

Field of Study — The Ph.D. signifies special knowledge of a field of study and potential mastery of an area of specialization within it. The faculty of the department have established certain fields of study in which the department’s strengths and those of other Stanford departments cohere.
They are: East Asian religions, Christianity, Judaism, religious ethics, and modern Western religious thought. Students who wish to specialize in other fields must obtain early approval by the faculty.

**Stages of Advancement —**
1. In the first two years, the student refines an area of specialization within the chosen field of study in preparation for candidacy.
2. After attaining candidacy, the student concentrates on the area of specialization in preparation for the qualifying examination.
3. The student writes a dissertation and defends it in the University oral examination.

**Languages —** Each student demonstrates a reading knowledge of two foreign languages, including French or German. Each student also demonstrates reading knowledge of other ancient or modern languages necessary for the field of study, area of specialization, and dissertation topic.

**Courses —** Each student satisfactorily completes the two graduate seminars (304A,B), two quarters of the pedagogy seminar (391), and one reading seminar before the candidacy decision. Other courses are taken with the approval of a faculty advisor in consideration of the student’s field of study.

**Candidacy —** At the end of each academic year, the department’s faculty recommend second-year students for candidacy on the basis of all relevant information, and especially on the student’s candidacy dossier which includes the approved declaration of an area of specialization, certification for one foreign language, and two substantial papers written for courses during the previous two years.

**Paper-in-Field —** During the third year, under the supervision of their advisors, students prepare a paper suitable for submission to an academic journal in their field. The paper is read and approved by at least two faculty members in the department.

**Teaching Internship —** At least one teaching internship under the supervision of faculty members is undertaken at a time negotiated with the Graduate Director. Students receive academic credit for the required internship, which is a project of academic training and not of employment.

**Qualifying Examination —** To qualify for writing a dissertation, the student must successfully pass a comprehensive examination in the chosen field and the area of specialization. The student must complete the second language requirement before taking the qualifying examination.

**Dissertation —** The dissertation contributes to the humanistic study of religion and is written under the direction of the candidate’s dissertation adviser and at least two other members of the Academic Council. The University oral examination is a defense of the completed dissertation.

**PH.D. MINOR IN RELIGIOUS STUDIES**
Candidates for the Ph.D. in other departments may select a Ph.D. minor in Religious Studies. The minor requires at least 24 units in Religious Studies at the 200 level or above. Four of the 24 units should be in “Theories and Methods.”

**JOINT PH.D. IN RELIGIOUS STUDIES AND HUMANITIES**
Religious Studies participates in the Graduate Program in Humanities leading to the joint Ph.D. in Religious Studies and Humanities, described in the “Interdisciplinary Studies in Humanities” section of this bulletin.

**COURSES**

**INTRODUCTION TO THE HUMANITIES (IHUM)**
The following Introduction to the Humanities courses are taught by Religious Studies department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:1 requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Religious Studies are advised to consider satisfying their GER:IHUM-2,3 requirements by registering for the following IHUM courses.

**IHUM 68A.B. Approaching Religion: Tradition, Transformation, and the Challenge of the Present —** Challenges facing the world’s religions in responding to issues such as globalization, feminism, science, pluralism, and individualism. How Christianity, Islam and Hinduism underwent transformations, grappling with the tension between making necessary changes and preserving tradition. Encounters between these religious traditions and the forces of contemporary social change. GER:IHUM-2,3
- **IHUM 68A:** 5 units, Win (Gregg, R; Sadeki, B)
- **IHUM 68B:** 5 units, Spr (Eisen, A; Hess, L)

**INTRODUCTORY**

**RELISTG 4N. The Creation of Woman —** Stanford Introductory Seminar. Preference to freshmen. The biblical story of human creation and its Greek equivalent, the myth of the creation of Pandora as told by Hesiod and in later Roman literature; contemporary commentaries. How the master stories of Eve and Pandora have been used, interpreted, retold, and readapated in later settings. Historical and intellectual context, and the ideas about gender and women’s roles that they reflect and attempt to influence. Readings include New Testament selections, Jewish and Christian commentaries, the Qur’an, Kabbalah, art and film, and contemporary interpretations by Jewish, Christian, and Muslim feminists. GER:DB-Hum, EC-Gender
- **3 units, Aut (Fonrobert, C)**

**RELISTG 6N. The Life of the Buddha —** Stanford Introductory Seminar. Preference to freshmen. Who was the historical Buddha Gautama and what is known about him, and his time and society? The oldest texts attributed to him and what they reveal about him, and his ideas and spirituality. Sources include Indian literary works in translation, Buddhist art, and contemporary films about the Buddha’s life. GER:DB-Hum, EC-GlobalCom
- **3 units, Win (Zimmermann, M)**

**RELISTG 7N. The Divine Good: Secular Ethics and Its Discontents —** Stanford Introductory Seminar. What is the good and how does it orient human choice and activity? Is it natural to human beings, or in some way transcendent? How do people come to know it? Why do people often fail to do the good they know? What human capacities and dispositions enable its enactment or attainment? What resources does religion offer for its reparation? Classical and modern readings in moral theory emphasizing the difference that religious aspiration makes for moral reflection. GER:DB-Hum
- **4 units, Spr (Sockness, B)**

**RELISTG 10L. Lantana Humanities Seminar —** Required of priority residents in Lantana; open to others. May be repeated for credit.
- **1 unit, Aut (Pitkin, B; Sockness, B)**

**RELISTG 11L. Religious Classics of Asia: India’s Ramayana Epic —**
The Ramayana as one of the most important religious and cultural texts of India. Its heroes, Rama and Sita, as incarnations of the supreme God and Goddess and models for ideal manhood and womanhood. Textual and performative versions including Valmiki’s 2,000-year-old Sanskrit poem, medieval vernacular versions, rural women’s folk songs, and the TV serial of 1988-89. Ramayana traditions through the lenses of religion, literature, performance, popular culture, gender, and politics. GER:DB-Hum, EC-GlobalCom
- **3 units, not given this year**
RELIGST 12. Introduction to Hinduism — Historical study from earliest period to the present, including religious poetry, narrative, performance, concepts of self and liberation, yoga, ritual, God and gods, views of religion through history, region, class, caste, and gender. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 14. Introduction to Buddhism — The tenets of Buddhism with focus on its origin, intellectual developments, ethical foundations, and meditative practices. Translations of Buddhist texts from different periods and cultures. The spread of Buddhism throughout Asia and, since the last century, the West. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 15. Introduction to the World of the Hebrew Bible — Cultural and religious context including its interactions with Sumerian and Phoenician epic. Recent archaeological discoveries that shed light on Israelite religion. Theories of authorship and analysis of priestly and prophetic texts. GER:DB-Hum

4 units, not given this year

RELIGST 16. Introduction to South Asian Buddhism — Focus is on Buddhist intellectual developments from the time of its founder, the historical Buddha Shakyamuni, to contemporary forms in Nepal and Sri Lanka. Basic aspects of Buddhist ethics, ritual, and art. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 18. Introduction to Zen Buddhism — Classical Zen thought in China, and its background, origins, and development. GER:DB-Hum, EC-GlobalCom

4 units, Spr (Bielefeldt, C)

RELIGST 23. Introduction to Judaism — The historical development of Jewish religious thought and practice, from the biblical period to the present. Scriptural, liturgical, midrashic, legal, historical, and philosophical texts reflecting that development. The Sabbath, and annual festivals and sacred days. GER:DB-Hum

4 units, not given this year

RELIGST 24. Introduction to Christianity — The historical development of Christian religious thought and practice from Jesus to the present. Emphasis is on the formation of Christianity’s major teachings and their transformation and diverse expressions in the medieval, reformation, and modern periods. Readings focus on primary texts. GER:DB-Hum

4 units, not given this year

RELIGST 27. Introduction to Islam — Fundamental ideas, foundation texts, competing interpretive hegemonies, and historical compromises and syntheses that shaped and inform Islam. Readings from the Qur’ân, hadîth, and seminal theological texts in translation. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 35. Introduction to Chinese Religions — (Formerly 55.) Confucianism, Daoism, Buddhism, and the interchange among these belief systems and institutions. Set against the background of Chinese history, society, and culture, with attention to elite and popular religious forms. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

RELIGST 46. Introduction to Daoism — (Formerly 56.) Historical survey from origins to the present. Main schools, notions, communal rites, and individual practices, and the relation of Daoism to facets of Chinese culture. GER:DB-Hum

4 units, Win (Pregadio, F)

RELIGST 52. The Problem of God — (Formerly 32.) Monotheism is a belief for which people continue to live and die. Philosophical inquiry into the concept of God through its classic formulations, modern critics, and contemporary defenders. What has the idea of God meant to serious minds in the past? And in the modern or postmodern world? GER:DB-Hum

4 units, Aut (Sockness, B)

RELIGST 53. Jews and Judaism in America — Development of the Jewish religious tradition in 20th-century America and its role in the life of its ethnic community. Comparison to the role of the church in the life of the African American community. Historical, sociological, and theological works complemented by novels, poetry, films, and TV. GER:DB-Hum, EC-AmerCul

4 units, not given this year

RELIGST 62. Philosophy of Religion — (Formerly 42.) Classic and modern questions in the philosophy of religion traced through Western and Eastern traditions: the coherence of theism, relativism, verification and ethics of belief, and implications of science. Readings from traditional and modern texts. GER:DB-Hum

4 units, not given this year

RELIGST 82. Approaches to the Study of Religion: Christianity — Historical and contemporary Christianity from four viewpoints: ritual and prayer; sacred texts and creeds; ethics and life; and community governance. GER:DB-Hum

4 units, not given this year

RELIGST 84. Mystics, Pilgrims, Monks, and Scholars: Religious Devotion in Medieval Christianity — The variety and vitality of religious expression in medieval Christian Europe. How Christians sought God through mystical encounter, the structure of monastic life, visits to shrines, devotion to the saints, and the study of scripture and ancient Christian wisdom. Readings focus on primary texts. GER:DB-Hum

4 units, Spr (Pitkin, B)

UNDERGRADUATE LECTURES

RELIGST 101. Classical Islamic Theology — Approaches of premodern Muslim thought to questions about the nature and attributes of God and his relationship with the world. Political and social contexts. Readings in kalâm, falsafa, Qur’ân, and tafsîr.

4 units, Aut (Sadeki, B)

RELIGST 104. Views of the Human Body in Daoism — The human body as seen in Daoist traditions and related areas, particularly cosmology and medicine. Major sources including images and charts, and the views of the human being that they reflect. GER:DB-Hum

4 units, Spr (Pregadio, F)

RELIGST 107. Hindus and Muslims in South Asia — The history of Hindus and Muslims living together in S. Asia for over 1,000 years. Peace and conflict, composite cultures, and interdependent social worlds. Partition in 1947 and the creation of separate nations. Religion, arts, society, and politics. GER:DB-Hum, EC-GlobalCom

4 units, Win (Hess, L)

RELIGST 112. Handmaids and Harlots: Biblical Women in Jewish and Christian Traditions — Miraculous births, wandering in the wilderness, encounters with angels: stories of Hagar, Sarah, Hannah, and Mary, and how their tales are read and re-told by later Jews and Christians. Sources include the Hebrew Bible and New Testament, Jewish and Christian commentary, and religious iconography. GER:DB-Hum, EC-Gender

4 units, Aut (Leveen, A; Pitkin, B)

4 units, Win (Lin, I)

5 units, not given this year
RELGST 119. Gandhi and Nonviolence — Gandhi’s life; his advocacy and practice of nonviolence in political movements in India and S. Africa; Indian religious sources of ahimsa or nonviolence; political interpretations of the Bhagavad Gita; Gandhian theory of nonviolence; adaptations of Gandhian nonviolence for conflict resolution in the world; critiques of Gandhi. GER:DB-Hum, EC-GlobalCom
4 units, not given this year

RELGST 122. Radical Catholicism — Past, present, and future of Roman Catholicism in Europe and the Americas. Its roots in Second Temple Judaism and the Greco-Latin world, the structural crises of contemporary Catholicism in governance, spirituality, doctrines, and morals, and the possibility of radical change in those areas. GER:DB-Hum
4 units, not given this year

RELGST 123. Judaism in Late Antiquity — The religious world and literature of the rabbis who created the classical and normative literature of Judaism. Jewish diversity and sectarianism in the first century C.E.; responses to Roman imperialism and the destruction of Jerusalem, the emergence of the rabbinic movement, the rabbi and sage as new Jewish leader, rabbinc authority and the making of religious boundaries, heresy versus orthodoxy, and the role of the family in rabbinc religion. Readings include primary sources in English translation and contemporary scholarship. GER:DB-Hum
4 units, not given this year

RELGST 125. Catholic Reformation — Reform and renewal of Roman Catholicism in the 16th century through key figures and movements such as Erasmus, Ignatius of Loyola, Teresa of Avila, and the Council of Trent. GER:DB-Hum
4 units, not given this year

RELGST 126. Protestant Reformation — 16th-century evangelical reformers (Luther, Calvin) and reform movements (Lutheran, Reformed, Anabaptist) in their medieval context. GER:DB-Hum
4 units, not given this year

RELGST 127. Introduction to Classical Judaism — The genres of classical Jewish literature and the issues which shaped its worldview. Selections from rabbinc (Jewish sacred) texts in English translation: Midrash, Mishnah, and Talmud. Topics include the biblical background, the emergence and nature of rabbinc authority and its institutions, the religious importance of discipleship, the legitimacy of dissent, diaspora versus Israel, perceptions of other religions and cultures, the tension between commitment to family and commitment to religious life. GER: DB-Hum
4 units, not given this year

RELGST 128. Catholicism and the Third Vatican Council — The origins and current forms of the crisis of ethics, theology, and governance in the Catholic Church. Students plan a Third Vatican Council to address the issues.
4 units, Win (Sheehan, T)

RELGST 132. Jesus the Christ — How did Jesus of Nazareth, who never claimed to be Christ or divine, become the son of God after his death? Sources include the history of first-century Judaism and Christianity.
4 units, Aut (Sheehan, T)

RELGST 133. Reading the Bible Today — How did Israelites identify themselves? Did the Exodus happen? Why did Deborah have so much power? The influence of recent interpretations such as ethnic studies, literary approaches, feminist critique, and archeological discoveries on contemporary readings and reception of the biblical texts. GER:DB-Hum
4 units, not given this year

RELGST 135. From Monastery to Boardroom: the Diamond Sutra and its History — A key Mahayana Buddhist scripture, its teachings and uses in Buddhist society from its composition in India to its promotion as a resource for corporate success in 21st-century America. Buddhist discourses of merit, ritual practice, and spiritual realization, especially their Chinese expressions.
4 units, Aut (Harrison, P)

RELGST 136. Buddhist Yoga — Buddhist models of spiritual practice emphasizing issues in the interpretation of the contemplative path. GER: DB-Hum, EC-GlobalCom
4 units, not given this year

RELGST 138. Faith, Doubt, and Ethics — Comparative examination of five 20th-century theological classics from the Protestant, Jewish, and Roman Catholic traditions: Karl Barth’s Epistle to the Romans, Martin Buber’s I and Thou, Reinhold Niebuhr’s Moral Man and Immoral Society, Paul Tillich’s Courage to Be, Abraham Heschel’s Man is Not Alone, and Karl Rahner’s Foundations. GER:DB-Hum
4 units, not given this year

RELGST 141. Martin Luther — Religious radical, theological dissident, or social conservative? The religious reforms of Martin Luther in intellectual and historical context. Focus is on theology, ethics, biblical interpretation, and social reforms. GER:DB-Hum
5 units, not given this year

RELGST 148. Religion in the American City — Cities as centers of religious life since they were cradles of civilization. The role of cities in the emergence of distinctly American religious identities and communities. Topics include: the Nation of Islam’s rise in Detroit and Chicago; Lubavitcher Jews’ transformation of Crown Heights, Brooklyn, into sacred space; and creation of an immigrant Catholic geography in E. Harlem.
4 units, Win (Deutsch, N)

RELGST 150. Mahayana Buddhism in East Asia — The Lotus school of Mahayana, and its Indian sources, Chinese formulation, and Japanese developments.
4 units, not given this year

RELGST 152. The Great Clarity Tradition in Early Medieval Daoism — History, teachings, and methods of the Great Clarity (Taiqing) tradition of Daoism in China that developed in the third and fourth centuries C.E. Its integration into mainstream medieval Daoism, decline after new traditions arose in the latter half of the fourth century, and legacy to the later history of Daoism.
4 units, not given this year

4 units, not given this year

RELGST 156. Goddesses and Gender in Hinduism — India’s tradition of worshipping female forms of the divine, including Kali, Durga, Lakshmi, Saraswati, Radha, Sita, and local deities. Stories, histories, iconographies, theologies, arts, and practices associated with these goddesses. How the worship of goddesses impacts the lives of women. Readings include Is the Goddess a Feminist? GER:DB-Hum, EC-Gender
4 units, Spr (Hess, L)

RELGST 159. Music and Religion in South Asia — Music and religion have been closely related for millennia in the India subcontinent. Topics include theories of sound, mantra, music as yoga, guru-disciple relationship, devotional singing, gods and their relation to music, aesthetic theory, classical and folk forms, and Hindu and Muslim traditions. Practical instruction in music. GER:DB-Hum, EC-GlobalCom
4-5 units, not given this year

RELGST 169. Christianity in Late Antiquity — Communal struggles, personal rivalries, theological conflicts, and social controversies in the early church (2nd-6th centuries C.E.) that shaped Christianity and its history. Heresy and orthodoxy, hierarchy and charisma, gender and class, persecution and martyrdom, paganism and classical tradition, creeds and councils, asceticism and the body, church and state, eastern and western Christianity. GER:DB-Hum
4 units, not given this year
RELIGST 170C. Reading in Biblical Hebrew — Third of a three-quarter sequence. Readings and translation of biblical narratives emphasizing grammar and literary techniques. Prerequisite: AMELANG 170B.
4 units, not given this year

RELIGST 172. Sex, Body, and Gender in Medieval Religion — Anxiety about sex and the body increased markedly during the early years of Christianity, while the doctrine of the Incarnation put the human body at the center of religious concern. Ideals of virginity, chastity, ascetic self-denial of necessities like food, sleep, and freedom from pain were central to lay and clerical piety. The religious theory and practice associated with questions about sex, body, and gender in the Middle Ages as constructed in literature, mythology, ritual, mystic, and monastic texts. GER:DB-Hum, EC-Gender
4 units, not given this year

RELIGST 181A. Adventures in Religious Poetry — (Same as ENGLISH 181A.) Preference to majors. Poetry manifesting religious themes from Western and Chinese traditions. GER:DB-Hum
5 units, Win (Yearley, L.; Fields, K.)

RELIGST 185. Prophetic Voices of Social Critique — Judges, Samuel, Amos, and Isaiah depict and question power, strong leaders who inevitably fail, the societal inequities and corruption inevitable in prosperity, and the interplay between prophet as representative of God and the human king. How these texts succeed in their scrutiny of human power and societal arrangements through attention to narrative artistry and poetic force, and condemnation of injustice. Includes service-learning component in conjunction with the Haas Center. GER:DB-Hum
4 units, Spr (Levene, A)

UNDERGRADUATE DIRECTED READING

RELIGST 199. Individual Work — Prerequisite: consent of instructor and department. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

UNDERGRADUATE SEMINARS

RELIGST 201/301. Classical Islamic Law — (Same as LAW 586.) Emphasis is on methods of textual interpretation. History of premodern Islamic law, including origins, formation of schools of law, and social and political contexts.
3 units, Aut (Sadek, B)

RELIGST 204. Buddhist Philosophy and Religion in Comparative Perspective — Foundational Buddhist positions on human nature through the ways in which Buddhism has portrayed the boundaries of the human. Juxtaposition of Buddhist and Western philosophical/religious views of liberation, asceticism, body and mind, consciousness, language, epistemology and ethics. Sources include: Buddhist texts in translation such as the Buddhist Canon, Nagarjuna, and Vasubandhu; and Plato, Aristotle, Augustine, Descartes, Hume, Kant, and Berkeley. GER:DB-Hum
4 units, not given this year

RELIGST 207. Gender in Islamic Scripture — The current Western view of Muslim women as victims. Historical evidence of women’s religious and social activities. Attitudes toward the body involving sexuality, purity, fertility, and seclusion in a comparative context. How women’s economic power and participation in modern revivalist movements create new identities worldwide. Readings in translation include the Eve and Virgin Mary narratives in the Qur’an, feminist works on the ideal Muslim wife and mother, and biographies of women warriors, political leaders, religious scholars, and Sufi mystics.
4 units, Spr (McLarney, E)

RELIGST 210. Translating the Daode Jing — One of the most frequently translated works in world literature. Challenges faced by translators, support from commentaries and related sources, and assumptions underlying translations into Western languages. Recommended: classical Chinese. GER:DB-Hum
4 units, Win (Pregadio, F)

RELIGST 212. Chuang Tzu — The Chuang Tzu in its original setting and as understood by its spiritual progeny. Limited enrollment. GER:DB-Hum
5 units, not given this year

RELIGST 213. Daode Jing — Passages of the Daode jing (Scripture of the Way and its Virtue) and interpretation in major traditional commentaries. Topics include Daoist metaphysics, the ideal of sainthood, the view of rulership and society, and Daoist notions of non-action, spontaneity, and return to the Dao.
4 units, not given this year

3 units, not given this year

RELIGST 217A. Tibetan Ritual Life — (Same as CASA 127.) The human life cycle, the calendar year, and pilgrimage as organizing principles to examine Buddhist and lay rituals that mark important occasions, bless people and places, ward off danger, heal wounds, alleviate suffering, predict the future, affirm Tibetan identity, and inspire political activism. Material culture of rituals including butter sculpture, thangka painting, and costumes; performance including monastic dance, chanting, instrumental music, song, and opera; and the meanings of rituals to those who participate in them. The role of ritual in human culture. GER:DB-Hum,
5 units, not given this year

RELIGST 218/318. Buddhist Ethics: Nonviolence and Compassion — (Graduate students register for 318.) The position of ethics in Indian Buddhism, its relation to Buddhist soteriological goals, and changes since the founder. Themes include nonviolence (ahimsa), compassion, bodhisattva, the ascetic saint (arhat), and social activism. Readings of Buddhist literature in translation. GER:EC-GlobalCom
4 units, not given this year

4 units, Win (Fonrobert, C)

RELIGST 227/327. The Qur’an — (Graduate students register for 327.) Major themes, style, and organization of the Qur’an. Historical context, the development of the text, and relative chronology of passages. Classical interpretation (tafsîr).
4 units, Win (Sadek, B)

RELIGST 228/328. Buddhist Sanskrit Texts on Ethics — (Graduate students register for 328.) Translation and interpretation. Texts on Buddhist morality from the first half of the first millennium C.E. Prerequisite: reading competence in Sanskrit.
1-5 units, not given this year

RELIGST 232. God: A Biography — Readings in the Hebrew Bible illuminate a God who walks among human beings, appears on mountain top and in cloud, and can be challenged and conciliated. Genesis, Exodus, the prophet Ezekiel, and Job convey the dimensions in which the religious imagination encounters the Hebrew God. Recent works such as The God of Old, The Divine Symphony, and An Early History of God in which an ancient multidimensional approach to God re-emerges. GER:DB-Hum
4 units, not given this year

RELIGST 235. Pilgrimage and Sacred Landscapes — (Same as CASA 135X.) Perspectives include cultural, spiritual, psychological, medical, economic, and political. Christianity, Buddhism, Hinduism, Islam, Native American, and secular; sources include Europe, Tibet, India, Native America, and the Middle East. Why pilgrims’ journeys are often painful. How landscapes become sacred. What happens when places such as Jerusalem and the Vietnam Memorial; journeys of personal or non-parochial cultural significance. GER:DB-Hum
4 units, not given this year
RELIGST 244. The Young Augustine — (Same as HUMNTIES 196Z.) Did the Middle Ages begin in Milan in 386 because of the conversion of the emperor’s court orator, Aurelius Augustinus, to neo-Platonic philosophy? Or was it to Christianity? Sources include The Confessions and the dialogues he wrote in the months following his conversion. GER:DB-Hum 5 units, Win (Sheehan, T)

RELIGST 247. Chinese Buddhist Texts — From the first millennium C.E., including sutra translations, prefaces, colophons, and biographies. Prerequisite: reading competence in Chinese. 4 units, Win (Harrison, P)

RELIGST 250/350. Readings in Indian Buddhist Texts — (Graduate students register for 350.) Introduction to Buddhist literature through reading original texts in Sanskrit. Prerequisite: Sanskrit. 1-5 units, Aut (Zimmermann, M)

RELIGST 257. Readings in East Asian Religious Texts — Prerequisite: classical Chinese. 4 units, not given this year

RELIGST 258. Japanese Buddhist Texts — Readings in medieval Japanese Buddhist materials. Prerequisite: background in Japanese or Chinese. 4 units, Win (Bielefeldt, C)

RELIGST 260. Martin Buber: Philosopher, Theologian, Revolutionary — How Buber’s philosophy of dialogue influenced fields including sociology, education, Bible scholarship, psychology, political philosophy, and Jewish and Christian theology. Focus is on I and Thou, his retellings of Hasidic stories, Bible commentaries, and controversial approach to Zionism. His definition of what it means to be human and to live as part of a human community. 4 units, Aut (Safrin, C)

RELIGST 263. Judaism and the Body — Representations and discourses of the body in Jewish culture; theories of body and ritual. Case studies of circumcision, menstrual impurity, and infertility. Readings include classical texts in Jewish tradition and current discussions of these textual traditions. GER:DB-Hum 4 units, Aut (Fonrobert, C)

RELIGST 264. Hasidism and Modernity — The spread of Hasidism in the 18th and 19th centuries; how it transformed E. European Jewish society. The Hasidic movement’s relationship to modernity; its confrontation with the Jewish Enlightenment; and its connections to urbanization, technology, Zionism, capitalism, and other defining elements of the modern world. Primary and secondary sources. 4 units, Win (Deutsch, N)

RELIGST 269. God and Christ: The Evolution of Early Christian Doctrines — How the understandings of God as Trinity and of Jesus Christ as a divine and human being became creeds and orthodox teaching in the 4th-5th centuries. The debates over biblical interpretation, philosophy, and meanings of rituals such as baptism and eucharist that led to these doctrinal judgments. 4 units, Spr (Gregg, R)

RELIGST 270. Science and Religion — Relations between the fields via case studies drawn primarily from biology and Judaism highlighting similarities and differences. Current debates emphasizing genetics, the evolution of learning, communication, ritual and tradition, and the role of religious and scientific communities. GER:DB-Hum 4 units, not given this year

RELIGST 271A,B. Dante’s Spiritual Vision — Mysticism, poetry, ethics, and theology in Dante’s Divine Comedy. Supplementary readings from classical authors such as St. Augustine and St. Thomas, and from modern writers. Students may take 271A without B. GER:DB-Hum 4 units (undergraduates), 5 units (graduate students). A: Aut, B: Win (Yearley, L)

RELIGST 274/374. From Kant to Kierkegaard — (Graduate students register for 374.) The main currents of religious thought in Germany from Kant’s critical philosophy to Kierkegaard’s revolt against Hegelianism. Emphasis is on the theories of religion, the epistemological status of religious discourse, the role of history (especially the figure of Jesus), and the problem of alienation/reconciliation in seminal modern thinkers: Kant, Schleiermacher, Hegel, and Kierkegaard. GER:DB-Hum 5 units (undergraduates), 3-5 units (graduate students), not given this year

RELIGST 275/375. Kierkegaard and Religious Existentialism — (Graduate students register for 375.) Close reading of Kierkegaard’s magnum opus, Concluding Unscientific Postscript to Philosophical Fragments, in its early 19th-century context. GER:DB-Hum 5 units (undergraduates), 3-5 units (graduate students), Win (Sockness, B)

RELIGST 278/378. God, the Self, and Heidegger — (Graduate students register for 378.) What would it mean to own one’s own life without appeal to the supernatural? The death of God in 19th-century thought; the discovery of the existential self in Heidegger’s philosophy; and his method for coming to grips with one’s life. Prerequisite: consent of instructor. GER:DB-Hum 4 units, Aut (Sheehan, T)

RELIGST 279/379. Heidegger and the Holy — (Graduate students register for 379.) Heidegger’s philosophy as opening a new door onto the possibility of experiencing the sacred after the collapse of traditional metaphysical theology. A close reading of Being and Time as an introduction to the question of the holy. 4 units, not given this year

RELIGST 282. King David in the Bible and Beyond — David as puzzle and heroic, beloved of God yet adulterer and murderer. His story within the biblical corpus and later reimaginings in religious commentary, art, and literature. 4 units, Aut (Leveen, A)

RELIGST 290. Majors Seminar — Religious Studies through the fields and approaches represented by the faculty of the Stanford Department of Religious Studies. WIM 4 units, Win (Fonrobert, C)

RELIGST 297. Senior Essay/Honors Essay Research — Guided by faculty adviser. May be repeated for credit. Prerequisite: consent of instructor and department. 3-5 units, Aut, Win, Spr (Staff)

RELIGST 298. Senior Colloquium — For Religious Studies majors writing the senior essay or honors thesis. Students present work in progress, and read and respond to others. Approaches to research and writing in the humanities. 5 units, Spr (Pitkin, B)

GRADUATE SEMINARS, RESEARCH, AND TEACHING

RELIGST 304A.B. Theories and Methods — Required of graduate students in Religious Studies. Approaches to the study of religion. Prerequisite: consent of instructor. A: 4 units, alternate years, not given this year B: 4 units, Aut (Gelber, H)

RELIGST 308. Medieval Japanese Buddhism — Japanese religion and culture, including Buddhism, Shinto, popular religion, and new religions, through the medium of film. 3-5 units, not given this year

RELIGST 312. Buddhist Studies Proseminar — Research methods and materials for the study of Buddhism. May be repeated for credit. Prerequisite: reading knowledge of Chinese or Japanese. 1-5 units, Win (Zimmermann, M), Spr (Bielefeldt, C)
RELIGST 338. Medieval Seminar — (Same as HUMNTIES 322, MED-VLST 322.) Medieval culture and ethical ideals extolled by medieval authors explicitly in philosophical and theological texts and implicitly in literary ones. Connections among ethics, cosmology, sacred history, anthropology, and soteriology in the medieval worldview. Medieval ethical beliefs as a window on medieval intellectual culture.

3-5 units, Win (Gelber, H)

RELIGST 347. Research in Religion in Late Antiquity: Early Christian Platonism — Elements of Platonic thought in texts including: Gospel of John, Epistle to the Hebrews, Justin’s Second Apology, Origen’s On First Principles, and comparison of Philo’s and Gregory of Nyssa’s Life of Moses.

4 units, not given this year

RELIGST 358. Readings in Daoist Texts — Readings from primary sources. Prerequisite: classical Chinese.

4 units, Spr (Pregadio, F)

RELIGST 370. Comparative Religious Ethics — The difference that the word religious makes in religious ethics and how it affects issues of genre. Theoretical analyses with examples from W. and E. Asia. Prerequisite: consent of instructor.

4 units, not given this year

RELIGST 389. Individual Work for Graduate Students — May be repeated for credit. Prerequisite: consent of instructor.

1-15 units, Aut, Win, Spr, Sum (Staff)

RELIGST 390. Teaching in Religious Studies — Required supervised internship for Ph.Ds.

4 units, Aut, Win, Spr (Staff)

RELIGST 391. Pedagogy — Required of Ph.D. students. May be repeated for credit.

1 unit, Aut (Peskin, J)

RELIGST 392. Candidacy Essay — Prerequisite: consent of graduate director. May be repeated for credit.

1-15 units, Aut, Win, Spr (Staff)

RELIGST 395. Master of Arts Thesis

2-9 units, Aut, Win, Spr (Staff)

RELIGST 399. Recent Works in Religious Studies — Readings in secondary literature for Religious Studies doctoral students. May be repeated for credit.

1-2 units, not given this year

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

FRENGEN 256E. Political Anthropology from Rousseau to Freud

Courses given by the Center for Russian, East European and Eurasian Studies have the subject code REES. For a complete list of subject codes, see Appendix.

The Center for Russian, East European and Eurasian Studies (CREEES) coordinates the University’s teaching, research, and extracurricular activities related to the former Soviet Union and Eastern Europe, and administers two interdisciplinary academic programs: an undergraduate minor and an M.A. graduate degree program. Information on center programs and activities is available at http://CREEES.stanford.edu. CREEES and its degree programs are directed by the CREEES Steering Committee, composed of faculty members associated with the Center. The programs draw on the strengths of nationally recognized area faculty and research affiliates and significant library and archival collections at Stanford. The Center is a U.S. Department of Education Title VI National Resource Center for Russia and East Europe.

UNDERGRADUATE PROGRAMS

MINORS

The minor in Russian, East European and Eurasian Studies (REEES) is an interdisciplinary area studies program that allows the participat ing student significant opportunity to select REEES courses in various departments according to his or her interests.
REQUIREMENTS

1. Two core courses: one on Russia/Eurasia, one on Eastern Europe, to be chosen by the student from an annual list of qualifying courses issued by CREEES.

2. At least four additional REEES courses, totaling at least 20 units.

3. The student’s courses, core and additional, must be distributed among at least three departments. In addition to REEES courses in the departments of History, Political Science, and Slavic Languages and Literatures, REEES courses in departments such as Cultural and Social Anthropology, Economics, and Sociology, when offered, may qualify. The CREEES academic coordinator determines which courses qualify for the minor.

4. A capstone experience in REEES, including, but not limited to, one of the following:
   a) A departmental seminar course for advanced undergraduates
   b) Directed reading and research with a Stanford faculty member or a CREEES-approved resident or visiting scholar
   c) Participation in the Stanford Overseas Studies Program in Moscow.

   Foreign Language — The REEES minor has no language requirement, but students are strongly encouraged to attain working competence in Russian or another relevant language. Courses at the third-year level or above in Russian or another language of the former Soviet Union or Eastern Europe (excluding German) may be counted towards the REEES minor, up to a maximum of 3 units per academic quarter, 9 units total.

   Additional Information — The total number of courses applied to the REEES minor must be at least six, but the minor should total no more than 36 units. Courses counting towards the REEES minor may not be counted towards the student’s major. Courses taken at Stanford overseas campuses (particularly the Moscow campus) may count towards the REEES minor, with the approval in each case of the CREEES academic coordinator; at least three courses for the minor must be taken in residence at Stanford.

   Approval of CREEES Academic Coordinator — Students interested in pursuing the REEES minor should consult the CREEES academic coordinator. The minor is declared online using the Axess system. Students declaring the REEES minor must do so no later than three quarters prior to their intended quarter of degree conferral. Approval of minor declarations and certification of requirements are made by the academic coordinator.

   Students pursuing the REEES minor work with the CREEES academic coordinator, who is responsible for determining that requirements for the minor are satisfied.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES

To qualify for a coterminal M.A. degree in Russian, East European and Eurasian Studies, besides completing University requirements for the B.A. degree, a student must:

1. Submit a coterminal application for admission to the program no later than the quarter prior to the expected completion of the undergraduate degree, normally the Winter Quarter prior to Spring Quarter graduation. Students with advanced placement and transfer credit must apply at least four quarters before the expected master’s degree conferral date. Applications and instructions may be obtained at http://registrar.stanford.edu/shared/publications.htm#Coterm. The deadline for all coterminal applications to the M.A. program in Russian, East European, and Eurasian Studies is January 9, 2007.

2. Include in the application a program which outlines, by quarter, the schedule of courses the student plans to complete toward the M.A. degree. The student should seek the advice of the CREEES academic coordinator in drafting this schedule. The application also should include: (a) a current Stanford transcript; (b) a one-page statement of purpose; and (c) two letters of recommendation from Stanford professors. Applicants must have a grade point average (GPA) of at least 3.0 (B). Coterminal applicants must take the general test of the Graduate Record Examination and have the results sent to Graduate Admissions, Office of the University Registrar.

3. Complete 15 full-time quarters or the equivalent, or three quarters in full-time residence after completing 180 units; and complete, in addition to the 180 units required for the bachelor’s degree, a minimum of 48 units for the master’s degree.

The same courses may not be counted to meet both undergraduate and graduate requirements, and no courses taken before the junior year may be used to meet the course requirements for the master’s degree. Requirements for completion of the M.A. degree are summarized below; a more detailed description of the program and requirements is available from the center.

SLAVIC THEME HOUSE

Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence which houses 50 students and offers a wide variety of opportunities to expand knowledge, understanding, and appreciation of Russia, the former Soviet Union, and Eastern Europe.

OVERSEAS STUDIES PROGRAMS

Undergraduate students interested in the study of languages, history, culture and social organization of the countries of Russia, Eurasia, and Eastern Europe can apply to study at the Stanford centers in Moscow and Berlin. Participation in these programs is encouraged and easily integrated into the REEES minor. Information about these programs is available at http://osp.stanford.edu.

GRADUATE PROGRAMS

MASTER OF ARTS

CREEES offers a one-year intensive interdisciplinary master’s degree program in Russian, East European and Eurasian Studies for students with a strong prior language and area studies background. The program structure allows students the flexibility to pursue their particular academic interests, while providing intellectual cohesion through a required core curriculum that addresses historical and contemporary processes of change in the former Soviet Union and Eastern Europe. This core curriculum consists of three core courses and REES 200, Core Seminar Series. The program may be taken separately or coterminally with a B.A. degree program. The interdisciplinary M.A. program typically serves three types of students:

1. Those who intend to pursue careers and/or advanced degrees in such fields as business, education, government, journalism, or law, and who wish to establish competence in Russian, East European and Eurasian studies.

2. Those who intend to apply to a Ph.D. program involving Russian, East European and Eurasian studies and who need to enhance their academic skills and credentials.

3. Those who are as yet undecided on a career but who wish to continue an interest in Russian, East European and Eurasian studies.

ADVISING

The advising structure is two-tiered: each M.A. candidate works with the CREEES academic coordinator who advises on the program of course work and monitors the student’s progress toward completing the degree. Candidates are also assigned a faculty adviser from the Academic Council faculty, who provides intellectual and academic guidance.

ADMISSION

Applicants are encouraged to apply electronically; see http://gradadmissions.stanford.edu/ for a link to the electronic application and general information regarding graduate admission. In addition, prospective applicants are strongly encouraged to consult with the academic coordinator at CREEES regarding the application process.

To qualify for admission to the program, the following apply:

1. Applicants must have earned a B.A. or B.S. degree, or the equivalent.

2. Applicants must have completed at least three years of college-level Russian language study or the equivalent prior to beginning the program. Other languages of Eastern Europe or the former Soviet Union may be accepted on a case-by-case basis.
3. Applicants whose native language is not English are ordinarily expected to take the Test of English as a Foreign Language (TOEFL) and have the results sent to Graduate Admissions, Office of the University Registrar.

4. All applicants must take the General Test of the Graduate Record Examination and have the results sent to Graduate Admissions, Office of the University Registrar.

The deadline for submission of applications for admission and for financial aid is January 9, 2007. Admission is normally granted for Autumn Quarter, but requests for exceptions are considered.

The successful applicant generally demonstrates the following strengths: requisite foreign language study, significant course work in Russian, East European and Eurasian studies in multiple disciplines, outstanding grades in previous academic work, high GRE scores (particularly verbal and analytical writing), study or work experience in the region, strong letters of recommendation, and a persuasive statement of purpose explaining why and how the program fits the applicant’s academic and career goals.

DEGREE REQUIREMENTS

Candidates for the M.A. degree must meet University requirements for an M.A. degree as described in the “Graduate Degrees” section of this bulletin.

The M.A. program in REEES can ordinarily be completed in one academic year by a well-prepared student; longer periods of study are permitted. All course work qualifying for the 48-unit minimum (except REEES 200) must have a letter grade of ‘B’ or higher. ‘B-’ does not count for degree credit, nor does ‘S’ or ‘CR’.

1. Core courses: students must complete three, one quarter core courses. Each year, four to six courses, typically from the History, Political Science, and Slavic Languages and Literatures departments, are designated as M.A. core courses; students may select three of these to meet the core course requirement. Courses selected as core courses examine subject areas of fundamental importance within modern Russian, East European and Eurasian Studies, and address questions of research, methodology, and current scholarship.

2. Core seminar: 200, Current Issues in Russian, East European and Eurasian Studies, is required of all students in the M.A. program for a total of three academic quarters. The goal of this course is to survey current methodological and substantive issues in Russian, East European and Eurasian Studies, acquaint students with Stanford resources and faculty, and present professional development and career options.

3. Interdisciplinary course work: a minimum of five graduate courses in Russian, East European and Eurasian studies must be completed and distributed among at least three departments. All course work applied to the 48-unit minimum must deal primarily with Russian, Eurasian, or East European studies.

4. Language study: students in the program are expected to study Russian or another language of the former Soviet Union or Eastern Europe. Credit towards the 48-unit minimum (maximum 3 units per quarter, 9 units total) is allowed for advanced language work; in the case of Russian, “advanced” is defined as third-year Russian language instruction and above. Similar standards apply for other languages.

5. All course work qualifying for the 48-unit minimum (except REEES 200) must have a letter grade of ‘B’ or higher. ‘B-’ does not count for degree credit, nor does ‘S’ or ‘CR’."

6. All courses counting towards the 48-unit minimum must be approved by the CREEES academic coordinator, who ensures that planned course work satisfies requirements towards the degree. The CREEES director and steering committee determine the requirements.

A description of the M.A. program is also available on the web at http://CREEES.stanford.edu/GraduatePrograms.html and by request from the Center for Russian, East European and Eurasian Studies.

FINANCIAL AID

Subject to funding, CREEES may have a limited number of Foreign Language and Area Studies (FLAS) fellowships for U.S. citizens or permanent residents. Additional financial aid may also be available from CREEES. Applicants in the M.A. program have priority in the annual FLAS competition; in recent years CREEES has also awarded FLAS fellowships in the Graduate School of Business, the School of Medicine, and the School of Law. Consult the CREEES academic coordinator for further information about the application and award process. Applications for FLAS fellowships can be obtained at http://CREEES.stanford.edu/FellowshipsGrants.html.

DOCTORAL PROGRAMS

Since the University does not offer a Ph.D. in Russian, East European and Eurasian Studies, students wishing to pursue a REEES-related doctoral program must apply to one of the departments offering a Ph.D. with an emphasis on Russia, Eurasia, or Eastern Europe, such as the departments of History, Political Science, or Slavic Languages and Literatures.

COURSES

REEES 200, Current Issues in Russian, East European, and Eurasian Studies — Enrollment limited to REEES students. Scholars present analyses of methodologies, challenges, and current issues in the study of Russia, E. Europe, and Eurasia.

1 unit, Aut, Win, Spr (Kollmann, N)

COGNATE COURSES

The following courses deal at least in part with Russia, the former Soviet Union, or Eastern Europe. See the respective department listings for course descriptions. Additional relevant courses by resident or visiting faculty may be offered; for updated information, consult the quarterly Time Schedule or contact the Center for Russian, East European and Eurasian Studies. Students in the area studies M.A. program must have their course list approved each quarter by the academic coordinator prior to enrollment. For relevant language courses, see the “Language Center” section of this bulletin.

ARTHIST 410. Aesthetics of the Icon
5 units, Win (Pentcheva, B)

CASA 113/213. Women in Islam: The Central Asian Case
5 units, Win (Kunanbaeva, A)

CASA 171. Mythology, Folklore, and Oral Literature of Central Asia
3-5 units, Spr (Kunanbaeva, A)

ECON 120. Socialist Economies in Transition
5 units, Win (Gathmann, C)

FILMSTUD 230. Cinema and Ideology
5 units, Aut (Levi, P)

GERGEN 123. Modern Tyranny in Culture and Political Thought
3-5 units, Spr (McIntyre, S)

HISTORY 20N. Russia in the Early Modern European Imagination
5 units, Spr (Kollmann, N)

HISTORY 103E. History of Nuclear Weapons—(Same as POLISCI 116.)
5 units, Spr (Holloway, D)

HISTORY 120C. 20th-Century Russian and Soviet History
5 units, Aut (Patenaude, B)

HISTORY 122. Aristocracies and Absolutism: Early Modern Eastern Europe, 1400-1800
5 units, Aut (Kollmann, N)

HISTORY 125. 20th-Century Eastern Europe
5 units, Win (Jolluck, K)

HISTORY 126. History of the Balkans, 1804 to the Present
5 units, Spr (Staff)
HISTORY 137. The Holocaust  
5 units, Win (Staff)

HISTORY 185B. Jews in the Modern World  
5 units, Spr (Zipperstein, S)

HISTORY 204G. War, Culture, and Society in the Modern Age  
5 units, Aut (Weiner, A)

HISTORY 220G/320G. Demons, Witches, and Priests: Religion and Popular Culture in Russia  
5 units, Aut (Kollmann, J)

HISTORY 221A. Men, Women, and Power in Early Modern Russia, 1500-1800  
5 units, Win (Kollmann, N)

HISTORY 221B. The Woman Question in Modern Russia  
5 units, Aut (Jolluck, K)

HISTORY 221D/321D. Women’s Activism in War and Peace  
5 units, Spr (Jolluck, K)

HISTORY 224A. Modern Russia, Iran, and Afghanistan  
5 units, Aut (Crews, R)

HISTORY 225/325. Class and Ethnicity in Modern Eurasia  
5 units, Spr (Weiner, A; Crews, R)

HISTORY 226E. The Creation and Destruction of Yugoslavia  
5 units, Aut (Staff)

HISTORY 226G/326G. Civilians and War in Modern Europe  
5 units, Win (Staff)

HISTORY 229/329. Poles and Jews  
5 units, Win (Jolluck, K)

HISTORY 299X/399A. Design and Methodology for International Field Research  
1 unit, Spr (Kollmann, N; Roberts, R)

HISTORY 321A. Early Modern Russian Historiography  
5 units, Aut (Kollmann, N)

HISTORY 321C. Historiography of the Soviet Union  
5 units, Win (Weiner, A)

HUMNTIES 197B. Camera as Witness: International Human Rights Documentaries—(Same as INTNLREL 141B, SLAVGEN 197B.)  
5 units, Aut (Bojic, J)

INTNLREL 114D. Democracy, Development, and the Rule of Law—(Same as POLISCI 114D.)  
5 units, Aut (Stoner-Weiss, K; Roberts, R)

IPS 266. Russia and Islam  
5 units, Win (Staff)

MS&E 193/193W/293. Technology and National Security  
3 units, Aut (Perry, W; Hecker, S)

MUSIC 9A. Tchaikovsky, Stravinsky, Shostakovich, and Beyond: A History of Russian Music  
3 units, Spr (Staff)

5 units, Win (Sagan, S)

POLISCI 142F. Politics of Central Asia in Comparative Perspective  
5 units, Spr (Erdem, E)

POLISCI 240T. American Efforts at Promoting Democracy Abroad: Theory and Reality  
5 units, Spr (McFaul, M)

POLISCI 314S. Decision Making in U.S. Foreign Policy—(Same as IPS 314S.)  
5 units, Spr (Blacker, C)

POLISCI 340S. Political Economy of Post-Communism  
5 units, Win (McFaul, M)

PSYCH 185/285. Contemporary Issues in Peace Studies—(Same as POLISCI 311.)  
3 units, Spr (Holloway, D)

SLAVGEN 13N. Russia and the Russian Experience  
3-4 units, Win (Schupbach, R)

SLAVGEN 77Q. Russia’s Weird Classic: Nikolai Gogol  
3 units, Aut (Fleishman, L)

SLAVGEN 122/222. Yiddish Story  
5 units, Aut (Safra, G)

SLAVGEN 145/245. The Age of Experiment, 1820-50  
3-4 units, Aut (Greenleaf, M)

SLAVGEN 146/246. The Age of Transgression: The Great Russian Novel  
4 units, Win (Safra, G)

SLAVGEN 148/248. The Age of Dissent: A Survey of Russian Literature and Culture, 1930 to the Present  
3-4 units, Spr (Graham, S)

SLAVGEN 151/251. Dostoevsky and His Times—(Same as COMPLIT 119/219.)  
4 units, Win (Frank, J)

SLAVGEN 156/256. Nabokov and Modernism—(Same as COMPLIT 115/215.)  
3-5 units, Spr (Greenleaf, M)

SLAVGEN 169/269. Folklore: Theory and Practice  
3-4 units, Win (Graham, S)

SLAVLIT 129/229. Poetry as System: Introduction to Theory and Practice of Russian Verse  
4 units, Win (Fleishman, L)

SLAVLIT 187/287. Russian Poetry of the 18th and 19th Centuries  
3 units, Spr (Fleishman, L)

SLAVLIT 189/289. Literature from Old Rus’ and Medieval Russia  
4 units, Spr (Zhivov, V)

SLAVLIT 200A. Introduction to Library and Archival Research in Slavic Studies  
2-3 units, Aut (Fleishman, L)

SLAVLIT 211. Introduction to Old Church Slavic  
3 units, Win (Timberlake, A)

SLAVLIT 215. Russian Poetry after Brodsky  
3-4 units, Win (Sedakova, O)

SLAVLIT 225. Readings in Russian Realism  
4 units, Aut (Safra, G)

SLAVLIT 227. Boris Pasternak and the Poetry of the Russian Avant Garde  
3-4 units, Aut (Fleishman, L)

SLAVLIT 269. Pushkin: Tying and Untying the Threads of the Golden Age.  
3 units, Aut (Greenleaf, M)
Science, Technology, and Society

Emeriti: James Adams (Management Science and Engineering, Mechanical Engineering), Alex Inkeles (Sociology), Walter Vincenti (Aeronautics and Astronautics)
Director: Robert McGinn (Management Science and Engineering; Science, Technology, and Society)
Program Committee: Stephen Barley (Management Science and Engineering), Hank Greely (Law), Ursula K. Heise (English), Brad Osgood (Electrical Engineering), Eric Roberts (Computer Science), Scott Sagan (Political Science), Fred Turner (Communication)
Lecturers: Henry Lowood, Sonja Schmid, Rebecca Slayton
Consulting Professor: Naushad Forbes (Science, Technology, and Society)
Affiliated Faculty and Staff: Stephen Barley (Management Science and Engineering), Barton Bernstein (History), Scott Bukatman (Art and Art History), Thomas Byers (Management Science and Engineering), Jean-Pierre Dupuy (French), Paula Findlen (History), Hank Greely (Law), Ursula K. Heise (English), Sarah Jain (Cultural and Social Anthropology), Joseph Manning (Classics), Brad Osgood (Electrical Engineering), Robert Proctor (History), Jessica Riskin (History), Eric Roberts (Computer Science), Nathan Rosenberg (Economics), Scott Sagan (Political Science), Londa Schiebinger (History), Michael Shanks (Classics, Cultural and Social Anthropology), Gavin Wright (Economics)

Web Site: http://sts.stanford.edu

Courses given in Science, Technology, and Society have the subject code STS. For a complete list of subject codes, see Appendix.

Technology and science are activities of central importance in contemporary life, intimately bound up with society’s evolving character, problems, and potentials. If scientific and technological pursuits are to further enhance human well-being, they and their effects on society and the individual must be better understood by non-technical professionals and ordinary citizens as well as by engineers and scientists. Issues of professional ethics and social responsibility confront technical practitioners. At the same time, lawyers, public officials, civil servants, and business people are increasingly called upon to make decisions requiring a basic understanding of science and technology and their ethical, social, and environmental consequences. Ordinary citizens, moreover, are being asked with increasing frequency to pass judgment on controversial matters of public policy related to science and technology. These circumstances require education befitting the complex sociotechnical character of the contemporary era.

Science, Technology, and Society (STS) is an interdisciplinary program devoted to understanding the nature, consequences, and shaping of technological and scientific activities in modern and contemporary societies. Achieving this understanding requires critical analysis of the interplay of science and technology with human values and world views, political and economic forces, and cultural and environmental factors. Hence, students in STS courses study science and technology in society from a variety of perspectives in the humanities and social sciences. To provide a basic understanding of technology and science, STS majors are also required to achieve either literacy (B.A.,) or a solid grasp of fundamentals (B.S.) in some area of engineering or science.

General Information

STS courses may be used, individually or in groups, for purposes such as:
1. To satisfy University General Education Requirements
2. To satisfy the Technology in Society Requirement of the School of Engineering
3. To comprise parts of student-designed concentrations required for majors in fields such as Human Biology and Public Policy
4. To satisfy the requirements of the STS Honors Program complementing any major (see below)
5. To satisfy requirements for majors in STS (see below)
6. To satisfy requirements for a minor in STS (see below)

STS courses are particularly valuable for undergraduates planning further study in graduate professional schools (for example, in business, education, engineering, law, journalism, or medicine) and for students wishing to relate the specialized knowledge of their major fields to broad technology and science-related aspects of modern society and culture.

The STS Program is a unit of the Center for the Interdisciplinary Study of Science and Technology (CISST). For further information about CISST see the “Academic Centers” section of this bulletin.

Undergraduate Programs

Degree programs in STS are interdisciplinary curricula devoted to understanding the nature and significance of technology and science in modern society. Majors analyze phenomena of science and technology in society from ethical, aesthetic, historical, economic, and sociological perspectives. In addition, students pursuing the B.A. degree study a technical field in sufficient depth to obtain a grasp of basic concepts and methods, and complete a structured concentration on a theme, issue, problem, or area of personal interest related to science and technology in society. Those seeking the B.S. degree complete at least 50 structured units in technology, science, and/or mathematics. The particular technical courses chosen reflect the student’s special interest in science and technology in society. Specific requirements for the bachelor’s degree in STS are as follows:

Bachelor of Arts

1. STS Core (eight courses):
   a) Interdisciplinary Foundational course: STS 101 or 101Q
   b) Disciplinary Analyses (five courses with at least one in each category):
      1) philosophical/ethical perspectives: STS 110, 112, 114; PHIL 61
      2) historical perspectives: STS 120, 125, 128, 134; CLASSGEN 133; ECON 116; HISTORY 141, 232F
      3) social science perspectives: CASA 82, 132; COMM 120, 169; MS&E 181, 193; POLISCI 114S, 116
   c) Advanced courses (one course in each category):
      1) disciplinary analysis: STS 210, 211, 221, 222, 225, 234; CS 201; COMM 268; ECON 224, 226; HISTORY 232G, 243G, 244C; INTNLREL 205; ME 314; MS&E 281
      2) senior colloquium: STS 200
2. Technical Literacy (five courses):
   a) CS 105 or 106A or equivalent; and
   b) A four-course sequence (minimum of 12 units) in one field of engineering or science (sample sequences available in the STS office); or
   c) Four of the following Engineering Fundamentals courses: Engineering 10, 14, 15, 20, 25, 30, 31, 40, 50, 50M, 60, 62, 70A (see course descriptions in the “School of Engineering” section of this bulletin).
3. Thematic Concentration (minimum of 20 units, at least five courses, one each from among those designated on the appropriate concentration course list as foundational and advanced). Thematic concentrations are organized around an STS-related problem or area. The following thematic concentration topics have been pre-certified: the intersections of technology and science with aesthetics, development, history and philosophy, information and society, public policy, social change, and work and organizations.

Course lists for these concentration topics are available in the STS office. A student selecting one of the certified topics may include one or more courses not on the corresponding course list if they are germane to the concentration and meet the student’s special interests. Alternatively, the student may choose to design a thematic concentration topic and course package subject to program approval. Each thematic concentration, certified or self-designed, requires the signature of an appropriate faculty adviser. See the program director for details.
BACHELOR OF SCIENCE

The student pursuing the B.S. degree shall complete the STS Core and a structured package of at least 50 units of technical courses intended to enable students to understand socially significant technical phenomena in some field of engineering or science. Introductory courses in mathematics or physics (for example, MATH 19 or PHYSICS 19) are not normally counted as parts of this technical depth component.

The B.S. candidate follows one of two models in fulfilling the minimum 50-unit technical depth requirement:

1. **Focused Depth**: at least seven courses amounting to at least 25 units in a single field of science or engineering, with the remaining units (except for at most two stand-alone courses) grouped in sequences of at least three courses each in other fields of science or engineering. For example, a Focused Depth package might contain eight mechanical engineering, three physics, three mathematics, and three computer science courses, and one course each in electrical engineering and chemistry. At least four of the seven courses in the focused depth area must be advanced, that is, not normally taken in the first year of study in that field.

2. **Clustered Depth**: two or more clusters of at least five courses and 15 units each in different fields of science or engineering, with at most two stand-alone courses, and remaining courses, if any, in sequences of three or more courses. For example, a Clustered Depth package might contain five-course clusters in computer science, electrical engineering, and physics, three courses in civil engineering, and one course each in biology and chemical engineering. At least two courses in each cluster area must be advanced.

It is recommended that B.S. majors complete CS 106A or equivalent.

MINORS

Students planning careers in many technical and non-technical fields, including business, education, engineering, science, law, medicine, and public affairs, are faced with important STS issues in their professional practice. Therefore, a minor in STS is likely to prove practically valuable as well as intellectually stimulating.

Requirements — The STS minor requires successful completion of six courses satisfying the following requirements:

1. Foundational Course: STS 101 or 101Q
2. One disciplinary analysis course from each of the following three categories:
   a) Philosophical/Ethical Perspectives: STS 110, 112, 114, 115; PHIL 61
   b) Historical Perspectives: STS 120, 125, 128, 134; CLASSGEN 133; ECON 116; HISTORY 141, 232F
   c) Social Science Perspectives: CASA 82, 131; COMM 121, 169; ENGR 145; MS&E 181, 193; POLISCI 114S, 116; PUBLPOL 194
3. Two advanced courses, from one or two of the following categories, building on courses taken under requirements 1 and 2:
   a) Philosophical/Ethical Perspectives: STS 210, 211; CS 201; INTNLREL 205; ME 314
   b) Historical Perspectives: STS 221, 222, 225, 234; ECON 224, 226; HISTORY 232G, 243G, 244C
   c) Social Science Perspectives: STS 279; COMM 268; ECON 224, 226; EDUC 224; MS&E 281
4. At least one of the courses taken under requirements 1 to 3 should incorporate a weekly, small group discussion.
5. With at most one exception, all courses taken to satisfy STS minor requirement must be taken for a letter grade where available. The exception cannot be STS 101 or 101Q.
6. The six courses taken under requirements 1-3 should be chosen so as to realize a measure of intellectual coherence and interrelatedness.

Note — Students wishing to use a course not listed above to satisfy one of the requirements for a minor in STS may petition to do so. For details, inquire at the STS office, Building 370, Room 109.

HONORS PROGRAM

STS offers a limited number of students an opportunity to achieve honors through in-depth study of the interaction of science and technology with society. The honors program is open to students majoring in any field (including STS). Students accepted for this program carry out an honors project, typically beginning in Spring Quarter of junior year and finishing by the end of senior year. Students who want their theses to be considered for a Firestone Award must submit them to STS by May 21; all theses must be submitted to STS by June 7. STS thesis projects entail writing an honors thesis, although occasionally students have also chosen to produce a technical artifact or carry out some other work that itself represents original thinking. When a project results in a work other than an essay, students must also submit an accompanying scholarly exegesis of the work in question.

ADMISSION

Application for admission to the STS honors program is typically made during the last quarter of the student’s junior year. By the end of that quarter, interested students must have completed all courses required to satisfy honors requirements 1-5 listed below. Each applicant must also have submitted a formal proposal for her or his project to the STS Honors Committee, including the name of the primary thesis adviser. For proposal parameters, see the document STS Honors Program, available in the STS office. Students whose proposals are approved are encouraged to apply to attend Honors College in early September to get a running start on their theses. STS honors students are also encouraged to sign up for 1-5 units of credit per quarter in STS 195A,B,C for work on the honors project. While not required, doing so leaves the student sufficient time to finish the thesis in three quarters. Writing a senior honors thesis while simultaneously carrying a full academic load each quarter is a very difficult task to complete with distinction. STS majors pursuing honors take STS 200 for 2 units instead of 4 and do not write a research paper for this required course. However, failure to complete the thesis requires additional research work in STS 200.

REQUIREMENTS

For non-STS majors:

1. Foundational Course: STS 101 or 101Q
2. One Philosophical/Ethical Perspectives course: STS 110, 112, 114, 115, 210, 211; CS 201; INTNLREL 205; PHIL 61
3. One Historical Perspectives course: STS 120, 125/225, 128, 134/234, 221, 222; CLASSGEN 133; ECON 116, 224, 226; HISTORY 141, 232F, 232G, 243G, 244C
4. One Social Science Perspectives course: STS 218, 279; CASA 82, 131; COMM 120, 169; ECON 224, 226; MS&E 181, 193, 281; POLISCI 114S, 116
5. Honors Seminar: STS 190 (typically taken in the spring quarter of the junior year)
6. Honors Project: an original critical essay (or investigative project with accompanying explanatory essay) on an STS topic of general importance. Past honors projects are on file in the STS office library.

For STS majors:

1. Completion of STS core.
2. Requirements 5 and 6 above.

To earn honors, the project must receive a grade of at least 'B' on the completed thesis. The student not majoring in STS must also achieve a grade point average (GPA) of at least 3.4 in the courses taken to satisfy requirements 1-5 above. In the case of STS majors, the student must compile a GPA of at least 3.4 in the entire STS core. If all these requirements are met, the designation “Honors Program in Science, Technology, and Society” is affixed to the student’s permanent record and appears in the commencement program.
COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

See http://sts.stanford.edu for updated course scheduling information, course syllabi, faculty and staff information, and information about how to declare a major or a minor in STS.

INTRODUCTORY

STS 101. Science, Technology, and Contemporary Society — (Graduate students register for 201; same as ENGR 130.) Key social, cultural, and values issues raised by contemporary scientific and technological developments; distinctive features of science and engineering as sociotechnical activities; major influences of scientific and technological developments on 20th-century society, including transformations and problems of work, leisure, human values, the fine arts, and international relations; ethical conflicts in scientific and engineering practice; and the social shaping and management of contemporary science and technology. GER:DB-SocSci
4-5 units, Aut (McGinn, R)

STS 101Q. Technology in Contemporary Society — Stanford Introductory Seminar. Preference to sophomores. Introduction to the STS field. The natures of science and technology and their relationship, what is most distinctive about these forces today, and how they have transformed and been affected by contemporary society. Social, cultural, and ethical issues raised by recent scientific and technological developments. Case studies from areas such as information technology and biotechnology, with emphasis on the contemporary U.S. Unexpected influences of science and technology on contemporary society and how social forces shape scientific and technological enterprises and their products. Enrollment limited to 12. GER:DB-SocSci
4 units, Aut (McGinn, R)

PHILOSOPHICAL/EThICAL PERSPECTIVES

STS 110. Ethics and Public Policy — (Same as MS&E 197, PUBLPOL 103B.) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, EC-Ethic-Reas, WIM
5 units, Win (McGinn, R)

STS 112. Ten Things: Science, Technology, and Design — (Same as CLASSART 113/213.) Connections among science, technology, society and culture by examining the design of a prehistoric hand axe, Egyptian pyramid, ancient Greek perfume jar, medieval castle, Wedgewood teapot, Edison’s electric light bulb, computer mouse, Sony Walkman, supersonic aircraft, and BMW Mini. Interdisciplinary perspectives include archaeology, cultural anthropology, science studies, history and sociology of technology, cognitive science, and evolutionary psychology. GER: DB-SocSci
4-5 units, Win (Shanks, M)

STS 114. Technology, Ecology, and the Imagination of the Future — (Same as ENGLISH 153G.) Seminar. Literary visions of the future from the 1960s to the present. How such texts imagine new and existing technologies in interrelation with the evolution of natural ecosystems. The development of wild habitats, alterations of the human body, and visions of the future city. The role of images and stories about globalization. Literary, scientific, and technical texts. GER:DB-Hum
5 units, Spr (Heise, U)

STS 115. Ethical Issues in Engineering — (Same as ENGR 131.) Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; the ethics of whistle blowing; ethical conflicts of engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations; ethical issues arising from engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies, guest practitioners, and field research. Limited enrollment. GER:DB-Hum
4 units, Spr (McGinn, R)

COGNATE COURSES — PHILOSOPHICAL/EThICAL PERSPECTIVES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

PHIL 61. Philosophy and the Scientific Revolution — (Same as HPS 61.)
5 units, not given this year (Friedman, M)

HISTORICAL PERSPECTIVES

STS 120. Science and Technology in Ancient Egyptian Society — (Same as CLASSHIS 131.) From 3000 B.C.E. to the Roman period. What was the source of technological change and innovation in Egypt? Why is the ancient Egyptian legacy important for later developments? What was the balance between changes internal and external to Egypt? Topics: ancient texts concerned with science, technology, mathematics, astronomy, medicine; Egyptian material culture and building techniques; the economic role of technology; Alexandrian science and its legacy.
3-4 units, Spr (Manning, J)

STS 125. Science, Technology, and Art: The Worlds of Leonardo — (Graduate students register for 225; same as HISTORY 31.) The intersections among science, technology, and society, and an interdisciplinary introduction to Renaissance studies. Why does this 15th-century artist, engineer, and inventor continue to fascinate and inspire innovative, interdisciplinary work? The world of the historical Leonardo, looking at his range of interests and accomplishments (including Mona Lisa, human anatomies, flying machines), and the culture of invention that shaped him. Students think with Leonardo, reconstructing some of his projects. The persistence of the Renaissance as a touchstone for innovation in the 21st century, examining the myth of Leonardo. GER:DB-Hum, WIM
5 units, Win (Findlen, P)

STS 128. Science and Technology in WW II and What Happened Afterward — (Same as EE 45.) The efforts of engineers, mathematicians, and scientists during WWII. The effect on the postwar world in areas such as information, communication, transportation, materials, and medicine. Science and engineering in the war effort, and what became of them after the war, drawn from: encryption and computation; radar, communication, and electronics; control and optimization; materials; drugs and medicine. GER:DB-EngrAppSci
3 units, not given this year (Osgood, B)

STS 134. History of the Senses — (Graduate students register for 234; same as HISTORY 241G/341G.) Technological, medical, philosophical, and scientific history of the five senses, drawing upon readings from antiquity to the present. How physiologists and philosophers have explained the functioning of the senses; how doctors have tampered with them both to help and to hinder; and how technologies including medical devices, scientific instruments, and tools of the arts have continually transformed the nature and experience of sensation. GER:DB-SocSci, WIM
5 units, Spr (Risin, J)

STS 145. History of Computer Game Design: Technology, Culture, and Business — Entertainment media, computing technology, gaming technology, and business history. Topics: play in human culture; early computer games; the role of artificial intelligence research; the history of computer graphics and sound technology; the evolution of techniques of computer game design; video game machines; the microcomputer revolution; networked gaming; gadgets and games as factors in the evolution of software and hardware, marketing; gendering of game play; virtual worlds; simulation; video and computer game industries; and technology transfer such as military simulations. Enrollment limited to 90.
4 units, not given this year (Lowood, H)
**COGNATE COURSES—HISTORICAL PERSPECTIVES**

CLASSGEN 133. Invention of Science
- 3-5 units, Aut (Netz, R)

ECON 116. American Economic History
- 5 units, Spr (Wright, G)

HISTORY 141. Minds and Worlds from Aristotle to Newton to Einstein — WIM
- 5 units, Spr (Riskin, J)

HISTORY 232F/332F. The Scientific Revolution — WIM
- 5 units, not given this year

**SOCIAL SCIENCE PERSPECTIVES**

STS 160. Controversy and Closure: The Politics of Technical Expertise — What are the causes and consequences of global warming? Do birth control pills increase the risk of cancer? Was there prewar evidence of WMD in Iraq? How political institutions, culture, and technology shape techno-political advice and common assumptions about who counts as an expert.
- 4 units, Win (Slayton, R)

STS 161. Science on Stage — How popularization of science emphasizes and conceals aspects of scientific practice, identifies experts, and helps legitimize science with the public and state. Differences between expert and lay knowledge, the nature and significance of scientific literacy, and techniques of presenting or representing science and technology in popular culture. Goals of science popularization, and role of lay public in matters of science and technology. Merits and inadequacies of large-scale, quantitative surveys, and small-scale, qualitative case studies.
- 4 units, Win (Schmid, S)

STS 163. Risk in Contemporary Culture — How people perceive, assess, and handle risks. Concepts such as risk, uncertainty, probability, and safety. Approaches to risk assessment, management, and communication. Relationship between scientific experts and the public. Relationship of science to state agencies in the context of regulatory decision making for high risk technologies.
- 4 units, Spr (Schmid, S)

- 4 units, not given this year (Slayton, R)

STS 170. Technology in Modern Security Discourse — Technology’s central role in discussions of international security issues including nuclear proliferation or containment, ballistic missiles or anti-missiles, biological weapons or vaccines, and data mining or computer security. What uses can and should technology serve in diplomacy? Why are some weapons stigmatized while others are deemed acceptable? How does discourse itself become a weapon? The history of the technologies and the discourses about them.
- 4 units, Aut (Slayton, R)

**COGNATE COURSES—SOCIAL SCIENCE PERSPECTIVES**

CAS 82/282. Medical Anthropology
- 4-5 units, Spr (Kohrman, M)

CAS 132. Science, Technology, and Gender
- 3-5 units, Spr (Jain, S)

COMM 120/220. Digital Media in Society — WIM
- 4-5 units, Spr (Turner, F)

COMM 169/269. Computers and Interfaces
- 4-5 units, Win (Nass, C)

ENGR 145. High Technology Entrepreneurship
- 4 units, Win (Byers, T; Komisar, R)

MS&E 181. Issues in Technology and Work for a Post-Industrial Economy
- 3 units, Spr (Barley, S)

MS&E 193/193W/293. Technology and National Security — 193W fulfills WIM
- 3 units, Aut (Perry, W; Hecker, S)

- 5 units, Win (Sagan, S)

POLISCI 116. History of Nuclear Weapons — (Same as HISTORY 103E.)
- 5 units, Spr (Holloway, D)

PUBLPOL 194. Technology Policy
- 5 units, Win (Windham, P)

**HONORS AND INDEPENDENT STUDY**

STS 190. Honors Seminar — For juniors intending to pursue honors in STS or a related discipline. Goal is to identify a research problem and identify key components of honors research and thesis writing such as literature reviews, methodologies, theoretical frameworks, and writing standards.
- 4 units, Spr (Slayton, R)

STS 195A,B,C. Honors Research — For students in STS honors program. 195A for submission of proposal; 195B for continued study and writing; 195C for final work on project.
- 1-5 units, Aut, Win, Spr (Staff)

STS 199. Individual Work
- 1-5 units, Aut, Win, Spr (Staff)

**ADVANCED UNDERGRADUATE AND GRADUATE**

STS 200. Senior Colloquium — Analytical and theoretical texts treating the natures and interplay of science, technology, and society. Only STS majors writing senior honors theses may register for 2 units. Prerequisite: STS major with senior standing and four STS core courses, or consent of instructor.
- 2-4 units, Win (Riskin, J), Spr (Dupuy, J-P)

**PHILOSOPHICAL/ETHICAL PERSPECTIVES**

STS 201. Science, Technology, and Contemporary Society — (Same as 101, ENGR 130; see 101.)
- 4-5 units, Aut (McGinn, R)

STS 210. Ethics, Science, and Technology — Ethical issues raised by advances in science and technology. Topics: biotechnology including agriculture and reproduction, the built environment, energy technologies, and information technology. Prerequisite: 110 or another course in ethics. Limited enrollment. GER:DB-Hum
- 4 units, alternate years, not given this year (McGinn, R)

STS 211. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S. — (Same as FRENGEN 258E.) Nanoethics as a new discipline that accompanies the rise of nanotechnology research in the U.S. and Europe. Differing approaches to the ethics of science and technology in the case of a fledgling technology.
- 3-5 units, alternate years, not given this year (Dupay, J-P)

**COGNATE COURSES—PHILOSOPHICAL/ETHICAL PERSPECTIVES**

CS 201. Computers, Ethics, and Social Responsibility — WIM
- 3-4 units, not given this year

INTNLREL 205. Ethics, Technology, and International Relations
- 5 units, not given this year (McGinn, R)

ME 314. Good Products, Bad Products
- 3-4 units, Win (Beach, D)
HISTORICAL PERSPECTIVES

STS 221. The Politics and Ethics of Modern Science and Technology — (Same as HISTORY 257/347.) The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university. GER:DB-Hum
5 units, not given this year (Bernstein, B)

STS 222. The Role of the University in the Knowledge Economy — The industrial world has come to consist of knowledge economies; economic performance has come to depend upon the ability to advance knowledge in science and technology. University research activities are sources of commercial advantage. Many universities routinely take out patents, some of which are highly profitable. The historical forces and the social and economic policy implications behind the new economic importance of universities. Emphasis is on Stanford's role in Silicon Valley.
3 units, not given this year (Rosenberg, N)

STS 225. Science, Technology, and Art: The Worlds of Leonardo — (Same as 125, HISTORY 31; see 125.)
5 units, Win (Findlen, P)

STS 234. History of the Senses — (Same as 134, HISTORY 241G/341G; see 134.)
5 units, Spr (Riskin, J)

COGNATE COURSES — HISTORICAL PERSPECTIVES

ECON 224. Science, Technology, and Economic Growth
2-5 units, Win (David, P)

ECON 226. U.S. Economic History
2-5 units, not given this year

HISTORY 232G/332G. When Worlds Collide: The Trial of Galileo — WIM
5 units, Spr (Findlen, P)

HISTORY 243G/343G. Tobacco and Health in World History
5 units, Aut (Proctor, R)

HISTORY 244C/444C. The History of the Body in Science, Medicine, and Culture
5 units, Spr (Schiebinger, L)

SOCIAL SCIENCE PERSPECTIVES

STS 279. Technology, Policy, and Management in Newly-Industrializing Countries — Technology as the key to development and prosperity. Building technological capability in newly industrializing countries at the national and firm levels. Government intervention, the concept of technology leader and follower environments, technology transfer from leader countries, indigenous technological capability, human capital, culture and innovation, the role of small firms and new enterprises. How innovation is different in technology followers, organizing for shop floor innovation, building an innovation culture, the role of R&D, design, and technology strategy in followers. Cases from Korea, India, Brazil, Singapore, and other NICs.
2-4 units, alternate years, not given this year (Forbes, N)

COGNATE COURSES — SOCIAL SCIENCE PERSPECTIVES

COMM 268/368. Experimental Research in Advanced User Interfaces
1-5 units, Win, Spr (Staff)

ECON 224. Science, Technology, and Economic Growth
2-5 units, Win (David, P)

ECON 226. U.S. Economic History
2-5 units, not given this year

EDUC 224. Information Technology in the Classroom
3 units, not given this year

MS&E 281. Management and Organization of Research and Development
3 units, not given this year (Barley, S)

INDEPENDENT STUDY

STS 299. Advanced Individual Work
1-5 units, Aut, Win, Spr (Staff)

OVERSEAS STUDIES

Courses approved for the Science, Technology, and Society major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BEIJING

STS 127V. History of Science and Technology in China — (Same as HPS 105V.)
4 units, Aut (Ren, D)

BERLIN

STS 117V. The Industrial Revolution and its Impact on Art, Architecture, and Theory — (Same as ARTHIST 141Y.) GER:DB-Hum
5 units, Aut (Neckenig, F)

STS 119V. Architecture and the City, 1871-1990: Berlin as a Nucleus of Modernity — (Same as ARTHIST 110Y, HISTORY 229V, URBANST 143U.) GER:DB-Hum
4 units, Spr (Neckenig, F)

STS 120V. Industry, Technology, and Culture, 1780-1945 — (Same as HISTORY 105V.) GER:DB-Hum
4 units, Win (Neckenig, F)

FLORENCE

STS 125V. Modernist Italian Cinema — (Same as ARTHIST 161Y, ITALGEN 134F.) GER:DB-Hum
5 units, Aut (Campani, E)
SLAVIC LANGUAGES AND LITERATURES

Emeriti: (Professors) Joseph Frank, * Joseph A. Van Campen
Chair: Monika Greenleaf
Professors: Lazar Fleishman, Gregory Freidin, Richard D. Schupbach
Associate Professors: Monika Greenleaf, Gabriella Safran
Senior Lecturer: Rima Greenhill
Visiting Professors: Olga Sedakova, Alan Timberlake, Victor M. Zhivov
Director of Graduate Studies: Lazar Fleishman
Director of Undergraduate Studies: Gabriella Safran

* Recalled to active duty.

Department Offices: Building 40, Room 41C
Mail Code: 94305-2006
Phone: (650) 723-4438
Email: slavic@stanford.edu
Web Site: http://slavic.stanford.edu

Courses given in Slavic Languages and Literatures have the subject codes SLAVGEN, SLAVLANG, and SLAVLIT. For a complete list of subject codes, see Appendix.

Systematic study of Russian literature in this country developed against the backdrop of political tensions following the Bolshevik revolution in 1917. With the disintegration of the Soviet Union and the fall of Communism, new perspectives on the literatures and cultures of this region have opened up. The study of Russian and other Slavic languages continue to attract students seeking careers in diplomacy and teaching, but they now also offers gateways to a diverse world of cultures responding to it post-socialist challenge. It also prepares students for careers in business, law, human rights, policy, and academia.

The study of Slavic and East European literatures, arts, and cinema draw upon culture studies, literary theory, and other humanistic disciplines. Formerly invisible topics of study include smaller ethnic groups, gender, Eastern Orthodoxy and literature, and interactions between Slavs and Islam and Buddhism.

Slavic studies makes use of Stanford’s faculty and library resources, as well as the Center for Russian, East European and Eurasian Studies and the Hoover Institution and its Slavic and East European collections. Undergraduates are invited to study at Stanford’s Moscow campus.

The department’s graduate and undergraduate teaching and advising emphasizes language mastery; students are encouraged to reach out to other disciplines and turn unexpected corners in their own research.

The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Department of Slavic Languages and Literatures (Slavic) offers two tracks for undergraduate majors: Russian Language and Literature; and Russian Language, Culture, and History. These tracks are declared on Axess and appear on the transcript but not on the diploma. The department also offers a degree option in Russian and Philosophy. This option is not declared on Axess and does not appear on the transcript or the diploma.

Writing in the Major — Undergraduates are required by the University to pass at least one writing-intensive course in their field of concentration in order to graduate. Majors in any Slavic track may satisfy the writing requirement by passing SLAVGEN 146.

RUSSIAN LANGUAGE AND LITERATURE

The track in Russian Language and Literature is designed for those students who desire to gain command of the Russian language and to study the nation’s literary tradition. Emphasis is placed on the linguistic and philological study of literature, as well as the history of Russian literature and related media in the broader context of Russian culture. Students may explore historically related literary traditions (for example, English, French, German), as well as other related fields. The Russian Language and Literature track also welcomes students with an interest in Russian and Slavic linguistics. This track is declared on Axess; it appears on the transcript but not on the diploma.

Prerequisites — Completion of SLAVLANG 51, 52, 53, or the equivalent, as determined by the results of the department placement examination.

REQUIREMENTS

Candidates for the B.A. degree with a track in Russian Language and Literature must complete an additional 52 units according to the following distribution:

Russian Literature — The 20-unit core literature sequence consisting of: SLAVGEN 145, 146, 147 or 148; SLAVLIT 187, 188.

Electives — Students must take 20 units of electives embracing at least two of the following categories: (1) Russian language or linguistics; (2) Russian literature; and (3) historically related literatures. These courses are selected in consultation with the undergraduate director. With department permission, work in related academic fields may be applied toward the degree requirements. Students who have completed IJUM 28A,B, Poetic Justice: Order and Imagination in Russian Culture, with a grade ‘B’ or better may count these 10 units towards elective courses required for the major in Russian Languages and Literature or the major in Russian Language, Culture, and History.

Majors who concentrate in Russian Language and Literature must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major.

RUSSIAN LANGUAGE, CULTURE, AND HISTORY

The track in Russian Language, Culture, and History is for students who would like to obtain command of the Russian language and to pursue a broad, interdisciplinary study of Russian literature, other expressive media (including film), as well as cultural traditions and institutions. Emphasis is placed on the relation of the Russian literary tradition to disciplines that have enriched the historical understanding of Russian literature: primarily history, but also anthropology, communications, political science, and sociology. This track is declared on Axess; it appears on the transcript but not on the diploma.

Prerequisites — Completion of SLAVLANG 51, 52, 53, or the equivalent as determined by the results of the department placement examination.

REQUIREMENTS

Candidates for the B.A. degree with a concentration in Russian Language, Culture, and History must complete an additional 52 units according to the following distribution:

Russian Language — A minimum of 12 units from the following: SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183

19th-Century Russian Literature and History — A minimum of 8 units chosen from the following courses or the equivalent; students must choose one course from Slavic and one course from History.

SLAVGEN 145, 146
HISTORY 120B

20th-Century Russian Literature and History — A minimum of 8 units chosen from the following or the equivalent; students must choose one course from Slavic and one course from History.

SLAVGEN 147 or 148
HISTORY 120C

Electives — In order to complete the basic degree requirements, students must take 24 additional units of course work embracing at least two of the following categories: (1) Russian language; (2) Russian literature; and (3) Russian history. These courses are chosen in consultation with the under-
graduate department. With department permission, work in related academic fields (for example, anthropology, communications, political science, religion, sociology) may apply toward the degree requirements.

Majors with a concentration in Russian Language, Culture, and History must earn a GPA of 2.0 (C) or better in order to receive credit toward the major.

RUSSIAN AND PHILOSOPHY

The Russian and Philosophy option offers students the opportunity to gain a command of the Russian language and literary tradition, while gaining a background in philosophical thought, broadly construed. They take courses alongside students in other departments participating in the program in Philosophical and Literary Thought, with administrative staff in the DLCL. This option is not declared on Axess; it does not appear on the transcript or diploma.

Prerequisites — Completion of SLAVLANG 51, 52, 53, or the equivalent as determined by the results of the department placement examination.

Requirements

Candidates for the B.A. degree with a concentration in Russian and Philosophy must complete an additional 67 units according to the following distribution:

**Russian Language** — A minimum of 12 units selected from the following: SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183.

**Russian Literature** — A minimum of 16 units of Russian literature, including the following:
1. SLAVGEN 145 and 146
2. SLAVGEN 147 or 148
3. SLAVLIT 187 or 188

**Electives** — At least 12 units of electives in Russian language and literature, selected in consultation with the undergraduate director.

*Philosophy and Literature Gateway Course (4 units):* FRENGEN 181 (same as PHIL 81).

**Philosophy Writing in Major (5 units):** PHIL 80; prerequisite: introductory philosophy course.

**Philosophy Core** — 12 units, including the following:
1. *Value Theory:* a course in the PHIL 170 series
2. *Theories of Mind, Language, Action:* a course in the PHIL 180 series
3. *History of Philosophy:* a course from the PHIL 100-139 series

**Related Course** — An upper-division course of special relevance to philosophy and literature. A list of approved courses is available from the program director.

**Capstone Seminar** — To be taken in the senior year, and selected from a list of seminars approved by the director of the program in philosophical and literary thought.

Majors who concentrate in Russian and Philosophy must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major. Courses in other departments may not, in general, be counted toward the Russian language, Russian literature, and elective requirements, but may be counted toward the other requirements.

DIGITAL HUMANITIES MODULE

The Slavic department, in collaboration with the Humanities Lab, also offers a digital humanities module that can be combined with any of the department’s major programs. Students who are interested in digital humanities should contact the department’s Director of Undergraduate Studies who facilitates coordination with the Humanities Lab. Students planning to combine the Russian major and the digital humanities module must fulfill the following requirements in addition to the general Russian major requirements:
1. CS 105 or equivalent
2. Participate in the Humanities Lab Gateway core seminar (4 units)
3. Complete the Humanities Lab Practicum (2 units) in the junior year
4. Complete one digital project, in lieu of the course’s main writing requirement, in a course offered in the Slavic department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.

Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project.

MINORS

The Department of Slavic Languages and Literatures offers three undergraduate minor options in Slavic Languages and Literature.

The minor is designed for students who, while pursuing a major in another program, seek a comprehensive introduction to Russian culture, whether through (1) Russian language courses; or (2) a combination of minimal proficiency in Russian and courses in the history of Russian culture; or (3) courses on Russian literature in translation and, depending on the student’s interest, other forms of the country’s cultural expression and social institutions. Students seeking a Slavic minor are encouraged to take advantage of the Bing Overseas Studies Program in Moscow. Students who have chosen one of the minor programs in Russian may use 5 units of IHUM credit towards their electives.

RUSSIAN LANGUAGE

Prerequisites — The minor option in Russian Language requires completion of SLAVLANG 51, 52, 53, or a demonstrated equivalent competence as determined by the departmental Russian language placement examination.

Requirements — Candidates for the B.A. degree with a minor option in Russian Language must complete 24 units of Russian language and literature courses according to the following distribution: 12 to 15 units selected from SLAVLANG 111, 112, 113, 177, 178, 179, 181, 182, 183; the remaining 9-12 units should be chosen from SLAVLANG 145, 146, 147, 148, SLAVLIT 187, 188, other monograph courses offered by the department, or, with the approval of the department’s undergraduate adviser, in history, politics, linguistics, or other relevant programs.

RUSSIAN LANGUAGE, LITERATURE, AND CULTURE

Prerequisites — The minor option in Russian Language, Literature, and Culture requires completion of SLAVLANG 1, 2, 3, or the equivalent as determined by the departmental Russian language placement examination.

Requirements — Candidates for the B.A. degree with the minor option in Russian Language, Literature, and Culture must complete 28 units according to the following distribution:
1. A minimum of 16 units of courses on literature and culture selected from the following Slavic Languages and Literatures courses: two quarters in each of SLAVLANG 145, 146, 147, 148 sequence, Russian Literature in English Translation, or one quarter in each of SLAVLANG 145, 146, 147, 148 sequence and one quarter in SLAVLIT 187, 188 sequence, Russian Poetry (prerequisite: second-year Russian); and at least one monograph course focusing on a single writer.
2. 12 units of elective courses either in the Department of Slavic Languages and Literatures or, with the approval of the department’s undergraduate adviser, in History, Linguistics, Political Science, or other relevant programs.

RUSSIAN CULTURE

Candidates for the B.A. degree with the minor option in Russian Culture must complete 36 units according to the following distribution: a minimum of 20 units of courses on literature and culture selected from the following Slavic Languages and Literatures courses: three quarters in each of SLAVLANG 145, 146, 147, 148 sequence, Russian Literature in English Translation, and two monograph courses focusing on a single writer. In addition, one course in Russian history is selected from HISTORY 120B or 120C. No knowledge of Russian is required.

Electives — 11 units of elective courses either in the Department of Slavic Languages and Literatures or, with the approval of the Slavic department’s undergraduate adviser, in Art, History, Linguistics, Political Science, or other relevant programs.

The deadline for minor declarations in all options is no later than the last day of the third quarter before degree conferral.
MINOR IN LITERATURE

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of Slavic Languages and Literatures and the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of Slavic Languages and Literatures and the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

HONORS PROGRAM

Majors in any track or option with a grade point average (GPA) of 3.3 (B+) or better in their major courses are eligible to participate in the department’s honors program. Prospective honors students may enroll for 2 units of credit in SLAVLIT 199 in Spring Quarter of the junior year to conduct preliminary research and draft an honors proposal. In addition to the program requirements above, students must also complete the following:

1. Majors who propose a senior project in literature must take a course in literary or cultural theory; this requirement may be fulfilled by enrollment in DLCL 189 or in an advanced course related to the area of the student’s expected research. Students concentrating in Russian Language, Culture, and History and pursuing a project in cultural history must take a course in literary or cultural theory, a graduate seminar in the area of their topic, or DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. DLCL 189 is taken in Autumn Quarter of the senior year. Students concentrating in Russian Language and Literature who propose a senior project in Russian language select their course in consultation with the undergraduate director.

2. SLAVLIT 199, taken for 5 units of credit while composing the thesis during Winter Quarter. To qualify for honors, the candidate must receive a grade of ‘B’ or better on the thesis or project completed during this period. A total of 10-12 units may be awarded for completion of honors course work, independent study, and the finished thesis.

SLAVIC THEME HOUSE

Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence that offers opportunities for students to expand their knowledge, understanding, and appreciation of Russia, Eastern Europe, and Eurasia.

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

The department allows a limited number of undergraduates to work for coterminal B.A. and M.A. degrees in Slavic Languages and Literatures with a concentration on Russian. In addition to University requirements for the B.A. degree, the student must:

1. Submit an application for admission by January 31 of the senior year. Applicants must meet the same general standards as those seeking admission to the M.A. program. Applicants must submit: an application for admission; a written statement of purpose; a transcript; and three letters of recommendation, at least two of which should be from members of the Department of Slavic Languages and Literatures faculty.

2. Meet all requirements for both the B.A. and M.A. degrees. Applicants must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three graduate-level courses.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

GRADUATE PROGRAMS

MASTER OF ARTS

University requirements for the M.A. degree are discussed in the “Graduate Degrees” section of this bulletin.

Admission — The requirements for admission to the master’s degree program in Russian are:

1. A B.A. (or its equivalent) from an accredited college or university.
2. A command of the Russian language sufficient to permit the student to do satisfactory graduate work in an area of specialization.
3. A familiarity with Russian literature sufficient to permit the student to perform adequately in courses at the graduate level.

The applicant’s previous academic training in Russian language and literature normally serves as an indication of competence. Accordingly, the department does not ordinarily consider applications from students who have not had at least three years of college Russian and some undergraduate training in Russian literature of the 19th and 20th centuries.

Before registering for the first quarter’s work in the department, entering graduate students are required to take placement examinations in Russian. Students who fail to perform satisfactorily on such examinations must register for remedial courses in the areas in which they are deficient. Course work in third-year Russian and below carries no credit toward either the M.A. or the Ph.D. degree.

Course Requirements — Candidates for the M.A. who are not also candidates for the Ph.D. should plan course work that ensures adequate preparation for the M.A. final examination at the end of the third quarter of work. Ph.D. candidates should attempt to include as many of the department’s basic course offerings as possible in the first-year program to ensure sufficient time to complete the M.A. thesis during the fifth quarter of registration. In any case, course work should be planned in consultation with the graduate adviser, whose approval of the overall course load is required.

Candidates for the M.A. must complete a program of 45 units, of which 36 units must be selected from courses given by the department. The other 9 units may, with approval of the candidate’s adviser, be selected from courses in related fields. Of the 36 units in the department, a minimum of 9 may be in language and a minimum of 9 in literature. The remaining 18 units may be distributed in accordance with the needs and interests of the student, and with the advice and approval of the department adviser.

No credit toward the M.A. degree is allowed for first- or second-year courses in non-Slavic languages required for the Ph.D. degree.

The M.A. Thesis — A requirement for candidates for a Ph.D., the M.A. thesis represents a complete article-length research paper (6-9,000 words) that, in both form and substance, qualifies for submission to English-language professional publications in the Slavic field. The M.A. thesis must be submitted to the thesis adviser no later than the fifth quarter and approved no later than the sixth quarter of registration.

Final Examination — Students not enrolled in the Ph.D. program may either submit an M.A. thesis or take a final examination. In the latter case, regardless of the area of specialization, the student must demonstrate in a written examination: (1) command of the phonology, morphology, syntax, and lexicology of contemporary Standard Russian sufficient to teach beginning and intermediate courses at the college level; (2) an ability to read contemporary Standard Russian sufficient to assist students studying contemporary Russian poetry or literary prose; and (3) sufficient familiarity with Russian literature of either the 19th or 20th century to successfully handle survey courses dealing with the chosen period of specialization.

The examination should be taken at the end of the final quarter of required course work.
MASTER OF ARTS IN TEACHING

The degree of Master of Arts in Teaching is offered jointly by the department and the School of Education. It is intended for candidates with a teaching credential or relevant teaching experience who wish to further strengthen their academic preparation. Requirements for the degree are outlined in the “School of Education” section of this bulletin. The program includes 45 units, of which 25 must be in the teaching field and 12 in education. Specific language requirements are established in consultation with the department.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin. Students enrolled in the Ph.D. program in Slavic Languages and Literatures are expected to fulfill the following requirements:

1. **Minor or Related Fields:** during the course of study, students must develop substantial expertise in a field contiguous to the area of specialization. A candidate may elect to present a full minor or, in consultation with the graduate adviser, develop a special program in a related field.
   a) **Related Field:** a student is required to complete a sequence of basic courses (12 units) in a chosen discipline outside the Department of Slavic Languages and Literatures. The choice of patterns is one of the following:
      1) a sequence of three courses in one West European literature, selected in consultation with the adviser, or
      2) three basic courses in comparative literature chosen in consultation with the graduate adviser and the Department of Comparative Literature or the Department of German Studies.
      3) a sequences of three courses in another department, selected in consultation with the adviser.
   b) **Minor:** students electing a minor should take six graduate courses in that department with a minimum of 20 units at the graduate level, according to the minor requirements established by that department. Students considering minors should consult with their adviser, the chair of Slavic Languages and Literatures, and the chair of the minor department. Students who wish to enroll in the Graduate Program in the Humanities should apply there.

2. **Admission to Candidacy:** candidates should read carefully the general regulations governing the degree, as described in the “Graduate Degrees” section of this bulletin. No student is accepted as a candidate until the equivalent of the M.A. degree requirements, including the M.A. thesis described above, are completed. Admission to candidacy is determined early in the sixth quarter of graduate studies. The candidate by that time must have demonstrated commitment to graduate studies by completion of a minimum of 60 quarter units of credit with a grade point average (GPA) of 3.3 (B+) or better, and submission of a complete draft of an M.A. thesis. Failure to do so results in termination of enrollment for the Ph.D. The terminated student may, at the discretion of the faculty, be given the opportunity to take the M.A. written examinations. If successful, the student is then awarded the M.A. degree.

3. **Proficiency Test:** administered for all entering graduate students, this test determines whether the student’s knowledge of Russian language and literature falls below the department’s standard. Students who fail to meet the standard in this test are asked to complete appropriate courses in the first year of graduate study.

4. **Course Requirements:** before qualifying for the department oral and written examinations, a Ph.D. candidate is expected to accumulate at least 72 quarter units of credit for courses taken while in graduate school. No less than half of this course work (36 units) must be done in the Department of Slavic Languages and Literatures, including at least 24 units of credit for seminar-level courses. Entering graduate students must enroll in SLAVLIT 200.

5. **Foreign Languages:** a candidate must demonstrate reading knowledge of French or German, plus another language useful for the student’s area of concentration, by passing written examinations, or receiving a grade of ‘A-’ or better in a class.

6. **Examinations:** a candidate must pass the departmental general qualifying examinations which has written and oral parts. The written part covers the history of Russian literature from the medieval period through the twentieth century. The oral part follows shortly after completion of the comprehensive exams. The student makes a 20-minute presentation of a scholarly paper, possibly the master’s thesis. Each examiner questions the student on the presentation and related topics. Following the departmental examinations, a candidate must pass a University oral examination, which is a defense of a dissertation proposal covering content relevant to the area of study, rationale for the proposed investigation, and strategy to be employed in the research.

Continuation — Continuation in the Ph.D. program is contingent on: for first-year students, a high quality of performance in course work (decided by department evaluation); for second-year students, an M.A. thesis, which should be completed no later than the end of the second quarter of the second year.

Course Work, Breadth Requirements, and Overall Scheduling —

1. Candidates for the Ph.D. degree are allowed as much freedom as possible in the selection of course work to suit their individual program of study. However, candidates are held responsible for all of the areas covered by the general examinations, regardless of whether they have registered for the department’s offerings in a given field. For this reason, it is strongly recommended that before taking Ph.D. examinations, students complete seminar-level work directly related to the following broad areas:
   a) Russian poetry
   b) the Russian novel
   c) 20th-century Russian literature
   d) 19th-century Russian literature (the Age of Pushkin and after)
   e) 18th-century Russian literature (the early 1700s to the Age of Pushkin)
   f) Medieval Russian literature
   g) a monograph course on a major Russian author
   h) theory of literature

The department’s general qualifying examinations must be taken by the end of the first quarter of the third year of study; they may be taken during the second year if the student and the adviser feel this is appropriate. During the two quarters following the general qualifying examinations, the student should be concerned primarily with preparation for the departmental and the University oral examinations, which should take place no later than the end of the third quarter of the third year. The fourth and fifth years should be devoted to research and writing leading to completion of the Ph.D. dissertation.

2. Students possessing the equivalent of the Stanford M.A. are normally expected to adhere to the schedule for the second, third, and fourth years of work outlined under item 1 above.

3. Students in the Ph.D. program are required to do four quarters of teaching: three quarters of first-year Russian, and one quarter of literature as a teaching assistant to a faculty member, usually for one of the survey courses in translation: SLAVGEN 145, 146, 147, 148. Students are required to take a one quarter TA training course, APPLING 201, during their second year.

Non-Slavic Language Requirements — Credit toward either the M.A. or the Ph.D. degrees is not given for first- or second-year courses in non-Slavic languages. It is assumed that, on entering the program, the student has a reading knowledge of either German or French. The reading examination in German or French must be passed by the end of the first year of study. The reading examination in the second language of choice must be passed by the end of the second year of study. Both language examinations must be passed before the candidate takes the University oral examination, that is, before the end of the third year.

JOINT PH.D. IN SLAVIC LANGUAGES AND LITERATURES AND HUMANITIES

The Department of Slavic Languages and Literatures participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Slavic Languages and Literatures and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.
COURSES

WIM indicates that the course satisfies the Writing in the Major requirement. (AU) indicates that the course is subject to the University activity unit limitation (8 unit maximum).

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, and Spanish and Portuguese, in the Program in Modern Thought and Language, and in the Division of Literatures, Cultures, and Languages.

RUSSIAN LANGUAGE COURSES

The following courses in Russian language instruction represent a typical sequence for three years of Russian language study. Majors and prospective majors should consult the requirements for a B.A. in Russian above. For descriptions, other information, and additional courses including special emphasis, intensive, and summer courses, and for other Slavic languages under the SPECLANG subject code, see the “Language Center” section of this bulletin.

SLAVLANG 1,2,3, First-Year Russian
5 units, 1: Aut, 2: Win (Grenn, J), 3: Spr (Staff)

SLAVLANG 51,52,53, Second-Year Russian
5 units, 51: Aut (Khassina, E) 52: Win (Khassina, E; Schupbach, R), 53: Spr (Khassina, E)

SLAVLANG 111,112,113, Third-Year Russian
4 units, 111: Aut, 112: Win, 113: Spr (Greenhill, R)

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Slavic Languages and Literatures department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Slavic Languages and Literatures are advised to consider satisfying their IHUM-2,3 requirements by registering for the following courses.

IHUM 28A.B. Poetic Justice: Order and Imagination in Russia — The difference between justice and law in 19th- and 20th-century Russian writers. Focus is on the notion of poetic justice: the artistic representation of order, whether divine, natural, or human. Goal is to heighten awareness of familiar narratives, mythologies, ideas, and images, and to convey a sense of a long-established national culture with its own dynamic vision. GER:DB-Hum

IHUM 28A: 5 units, Win (Safran, G)
IHUM 28B: 5 units, Spr (Freidin, G)

GENERAL

This curriculum covers topics of general interest. Courses are open to all students and have no prerequisites. Some courses may be taken for graduate credit. Additional work in the original language may be arranged with individual instructors. The courses:
1. introduce students to the major authors and texts in the Russian literary and cultural tradition,
2. offer broad conceptual frameworks for understanding the material covered, and
3. demonstrate the dynamic interaction between cultural texts and a variety of contexts (literary, intellectual, and sociopolitical).

While these goals are pursued to some extent in all courses, the curriculum may be classified according to the following contextual emphasis to assist students in choosing courses according to their interests.

Literary Movements and Genres: SLAVGEN 145, 146, 147, 155, 156
Literature and Intellectual History: SLAVGEN 151, 190
Literature and Social History: SLAVGEN 141, 149

Media, Gender, Ethnicity: SLAVGEN 148, 152, 154, 161, 162, 163, 165, 166, 167, 168, 221

SLAVGEN 13N. Russia and the Russian Experience — Stanford Introductory Seminar. Preference to freshmen. The political and cultural history of Russia and the Russians: prominent persons, prominent events, and how they shape current attitudes and society. Short works by Russian authors. GER:DB-Hum
3-4 units, Win (Schupbach, R)

SLAVGEN 77Q. Russia’s Weird Classic: Nikolai Gogol — Stanford Introductory Seminar. Preference to sophomores. The work and life of Nikolai Gogol, the eccentric founder of Fantastic Realism. The relationship between romanticism and realism in Russian literature, and between popular Ukrainian culture and high Russian and W. European traditions in Gogol’s oeuvre. The impact of his work on 20th-century modernist literature, music, and art, including Nabokov, literature of the absurd, Shostakovich, Meyerhold, and Chagall. GER:DB-Hum
3 units, Aut (Fleishman, L)

SLAVGEN 122/222. Yiddish Story — The humor, drama, anger, and artistry of modern of E. European and American Yiddish writers including Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Chaim Grade, and Yankev Glatshytyn. In English. GER:DB-Hum, EC-GlobalCom
5 units, Aut (Safran, G)

SLAVGEN 123/223. Poles and Others: Literature and History in Modern Poland — The physical and cultural territories of the former Polish-Lithuanian Commonwealth have long been objects of contest. The 20th century witnessed two or three rebirths of Poland and one or two deaths; a belated modernization of Polish society; the final inclusion of Polish-speaking peasants and burghers in a Polish national identity; and the exclusion of Jews, Germans, Lithuanians, Belarusans, Ukrainians, and others from the state and participation in a partially shared culture. GER:DB-Hum
3-4 units, not given this year

SLAVGEN 133/233. Polies and Others: Literature and History in Modern Poland — The physical and cultural territories of the former Polish-Lithuanian Commonwealth have long been objects of contest. The 20th century witnessed two or three rebirths of Poland and one or two deaths; a belated modernization of Polish society; the final inclusion of Polish-speaking peasants and burghers in a Polish national identity; and the exclusion of Jews, Germans, Lithuanians, Belarusans, Ukrainians, and others from the state and participation in a partially shared culture. GER:DB-Hum
3-4 units, not given this year

SLAVGEN 141/241. Staging the Revolution: Russian Theater and Society, 1917-1937 — Between 1917 and 1937, artistic experimentation in the Russian theater coincided with political and social changes in Russian society. Modernist artists interpreted the revolution as an artistic possibility to demolish conventions of representation. Mass festivals, circus, and street performances replaced the old theater. In the time of the Great Terror and staged trials, theater and opera remained among the leading arts, but state patronage caused a major reorientation of artistic practices. Readings include plays by Mayakovsky, Bulgakov, Babel, Tretiakov, and Erdman. Readings in English. GER:DB-Hum
4 units, not given this year

SLAVGEN 145/245. The Age of Experiment, 1820-50 — The Russian leap into European culture after the Napoleonic Wars and the formative period of Russian literature. Readings seen as local literary developments and contemporary European trends including Pushkin’s Eugene Onegin, The Belkin Tales, and The Captain’s Daughter; Lermontov’s Hero of Our Time; and Gogol’s Petersburg Tales and Dead Souls. GER:DB-Hum, EC-GlobalCom
3-4 units, Aut (Greenleaf, M)

SLAVGEN 146/246. The Age of Transgression: The Great Russian Novel — Tolstoy’s War and Peace, Dostoevsky’s Demons, and Turgenev’s Fathers and Sons, written in decade following the emancipation of the serfs and the great legal reforms, ask how much one person can change history for good or ill. Chekhov’s Ward Number Six as an example of the deformation and adaptation of this tradition at the end of the age of realism. Historical and philosophical context and literary-critical techniques. GER:DB-Hum, EC-GlobalCom, WIM
4 units, Win (Safran, G)
SLAVGEN 147/247. The Age of War and Revolution: A Survey of Russian Literature and Culture, 1900-1950s.—First of two-part sequence. Russian modernism and the avant garde. The Russian Revolution, the era of the NEP, Soviet civilization, and the literature of opposition following Stalin’s death. All texts in English translation. GER:DB-Hum, EC-GlobalCom
3-4 units, Spr (Staff)

SLAVGEN 148/248. The Age of Dissent: A Survey of Russian Literature and Culture, 1953 to the Present—From the death of Stalin to post-communist Russia. Literature of the thaw and de-Stalinization, official and unofficial literature of dissent, samizdat, village and urban prose, literature of the new emigration, late Soviet underground, sots-art, perestroika, and post-communist literature and culture. Texts in English translation. For graduate credit for research paper, register for SLAVLIT 399. GER:DB-Hum, EC-GlobalCom
2-4 units, Spr (Staff)

SLAVLIT 151/251. Dostoevsky and His Times—(Same as COMPLIT 119/219.) Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture, literary criticism, and intellectual history. GER: DB-Hum
4 units, Win (Frank, J)

SLAVLIT 155/255. Anton Chekhov and the Turn of the Century—Chekhov’s art in its Russian literary, historical, philosophical, and political contexts. Short stories and major plays; supplemental readings for graduate students from Chekhov’s letters and works by his friends and contemporaries, such as Leskov, Tolstoy, Korolenko, and Gorky. GER:DB-Hum
4 units, not given this year

SLAVLIT 156/256. Nabokov and Modernism—(Same as COMPLIT 115, COMPLIT 215.) Nabokov’s stories, novels, and a film script in the context of: modernist writers such as Bergson, Proust, and Joyce; media including painting, film, and photography; and philosophical thought. Critical approaches that elude the author’s control. Readings include Bend Sinister, Lolita, Pale Fire, Speak Memory, and Ada. GER:DB-Hum
3-5 units, Spr (Greenleaf, M)

SLAVLIT 161/261. Poetess: The Grammar of the Self when the Poet is a Woman—(Same as COMPLIT 121/221.) Seminar. Lyrical works by women poets from the U.S., Russia, E. Europe, and Germany (Dickinson, Moore, Brooks and the Harlem Renaissance, Bishop, Akhmatova, Tsvetaeva, Sachs, Plath, Cisneros, Angelou, Graham, Howe, and Szymborska.) Theoretical and practical issues: breaking and entering the male preserve of high poetry; the interaction of written and oral, political, and performative modes of expression; representations of the feminine body and experience in the visual arts; and the development of a female lineage and modes of poetic legitimation, association, and inspiration. GER: DB-Hum, EC-Gender
4 units, not given this year

SLAVLIT 162/262. Gender Images in Film—Film creates permanent new images of femininity. One of its conscious prerequisites is the notion of social stereotypes. The development of enduring images of the film heroine, 1914-90, through a comparison of the Russian, American, and W. European cinema, and analytical approaches to them from feminist film theory. GER:EC-Gender
3 units, not given this year

SLAVLIT 163/263. Gender in Postwar Russian Culture—Issues of femininity and masculinity in Russian literature, film, and popular culture from the 40s to the present. Readings include fiction, memoirs, poetry, drama, and theoretical works in gender studies. GER:EC-Gender
3-4 units, not given this year

3-4 units, not given this year

SLAVLIT 169/269. Folklore: Theory and Practice—Genres, scholarship, and collection methods. Differences between and mutual influence of folklore and media such as literature and film. The folk origins of contemporary archetypes, narratives, and beliefs. Primary sources are Russian and Slavic folklore; comparative theoretical readings.
3-4 units, not given this year

SLAVLIT 177B. Camera as Witness: International Human Rights Documentaries—(Same as HUMNTIES 197B, INTNLREL 141B.) Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers. GER:DB-Hum
5 units, Aut (Bojic, J)

SLAVLIT 177C. Camera as Witness: A Forum for Global Dialogue—(Same as HUMNTIES 197C, INTNLREL 141C.) Challenges facing filmmakers documenting the struggle for human rights including communication of complex situations to an international audience, interpreting foreign cultures and politics, and filmmaker roles as artists, activists, and journalists. Meetings with filmmakers. GER:DB-Hum
5 units, Win (Bojic, J)

SLAVLIT 313. Visuality and Literacy Workshop—Relationships among visual arts, theater, and literature in the culture of modernity.
1-2 units, not given this year

ADVANCED UNDERGRADUATE AND GRADUATE

SLAVLIT 129/229. Poetry as System: Introduction to Theory and Practice of Russian Verse—The history and theory of Russian versification from the 17th to the 20th century. Prerequisite: reading knowledge of Russian. GER:DB-Hum
4 units, Win (Fleishman, L)

SLAVLIT 182. Pushkin’s Eugene Onegin—Russian literature’s central masterpiece. In Russian. (Fleishman)
4 units, not given this year

SLAVLIT 183/283. Readings in the Russian Press—For students at the fifth-year Russian level. Advanced language training based on Russian newspapers and magazines. Discussion of issues regarding the Russian media and reading articles of a typical Russian press format. (Staff)
4 units, not given this year

SLAVLIT 184/284. History of the Russian Literary Language—Major structural and semantic changes from the 10th to the 19th centuries. Recommended: 211, 212.
3-4 units, not given this year

SLAVLIT 185S/285S. Russian Poetry after Brodsky—Major poetic schools and poets of Russia today including Zhidanov, Khenzheev, Tsvetkov, Sedakov, Dragomoschenko, and Pazhchikov. In Russian.
3-4 units, not given this year

SLAVLIT 187/287. Russian Poetry of the 18th and 19th Centuries—Required of majors in Russian language and literature; open to undergraduates who have completed three years of Russian, and to graduate students. The major poetic styles of the 19th century as they intersected with late classicism, the romantic movement, and the realist and post-realist traditions. Representative poems by Lomonosov, Derzhavin, Zhukovskii, Pushkin, Baratynskii, Lermontov, Tiutchev, Nekrasov, Fet, Soloviev. Lectures/discussions in Russian.
3 units, Spr (Fleishman, L)
SLAVLIT 188/288. From Alexander Blok to Joseph Brodsky: Russian Poetry of the 20th Century.—Required of majors in Russian literature. Developments in 20th-century Russian poetry including symbolism, acmeism, futurism, and literature of the absurd. Emphasis is on close readings of individual poems. Discussions in Russian.

3-4 units, not given this year

SLAVLIT 189/289. Literature from Old Rus’ and Medieval Russia.—From earliest times through the 17th century. The development of literary and historical genres, and links among literature and art, architecture, and religious culture. Readings in English; graduate students read in original.

4 units, Spr (Zhibov, V)

SLAVLIT 194A/294A. Russia and The Other: A Cultural Approach.—Seminar for students returning from Moscow; required of Slavic majors working on honors thesis; recommended for Slavic majors and minors. Russian cultural identity and its emergence in literature and art dealing with the other (W. Europe; the Orient including Central Asia, Siberia and the Caucasus, and marginal groups including Jews, Gypsies, and American students of Russian). Works of literature and other cultural texts; introduction to literary analysis, cultural and social theory. Class presentation.

4-5 units, not given this year

SLAVLIT 194B/294B. Russia and The Other: A Cultural Approach.—For students who choose to develop their ideas further by doing additional research and writing a scholarly paper, possibly an honors thesis in Slavic literature or related field. Class presentation and research paper. Prerequisite: 194A.

4-5 units, not given this year

SLAVLIT 199. Individual Work for Undergraduates.—Open to Russian majors or students working on special projects. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLIT 200. Proseminar in Literary Theory and Study of Russian Literature.—Required for graduate students and honors undergraduates in Slavic; first-year Slavic graduate students must enroll during their first quarter. Introduction to graduate study in Russian literature and culture: profession, discipline, and approaches to the study of literature and culture. Theoretical readings, practical exercises in the analysis of verse and narrative, and recent monographs on Russian literature.

4 units, not given this year

SLAVLIT 200A. Introduction to Library and Archival Research in Slavic Studies.—Required of first-year Slavic graduate students. Major Western and Slavic language sources and search methodologies pertaining to Russian and E. European area studies. Tailored to students’ research interests.

2-3 units, Aut (Fleishman, L)

SLAVLIT 200B. Proseminar in Russian Literary Theory.—Corequisite: 305.

1 unit, not given this year

SLAVLIT 203. Academic Russian.—How to read and analyze secondary sources, formulate arguments, and present intellectual work in Russian. In Russian. Prerequisite: four years of Russian or equivalent.

3 units, not given this year

SLAVLIT 211. Introduction to Old Church Slavic.—The first written language of the Slavic people. Grammar. Primarily a skills course, with attention to the historical context of Old Church Slavic.

3 units, Win (Timberlake, A)

SLAVLIT 212. Old Russian and Old Church Slavic.—Continuation of 211. Readings in additional canonical Old Church Slavic texts, following the Church Slavic tradition as it develops in early Rus (Kiev, Novgorod). Selections from the Primary Chronicle, Boris and Gleb, The Life of Theodosius. The general issues of writing and the reception of Byzantine culture in early Rus.

3 units, not given this year

SLAVLIT 215. Russian Poetry after Brodsky.—The Bronze Age of Russian poetry in the 70s-80s as a time of enthusiasm for poetic diction and achievement, attempts to reclaim connections with Russian and European traditions, and avant garde experimentation. The new metaphysics, the problem of the poet’s self, new forms, and the limitations of the poetic domain. Poets include Leonid Aронов, Victor Krivulin, Elena Shvartz, Ivan Zhadanov, Petr Chegim, Gennadii Aigui, and Leonid Gubanov. Readings in Russian. Undergraduates require consent of instructor.

3-4 units, Win (Sedakova, O)

SLAVLIT 225. Readings in Russian Realism.—Open to graduate students and advanced undergraduates. Russian realist and naturalist prose emerged in a historical context that fostered specific ideas about the function and form of the literary word. Readings from Turgenev, Goncharov, Leskov, Saltykov-Shchedrin, Dostoevsky, Garshin, Tolstoy, Chekhov, Gorky, Bunin. Discussions in English.

4 units, Aut (Safran, G)

SLAVLIT 227. Boris Pasternak and the Poetry of the Russian Avant Garde.—The works of Pasternak and his contemporaries Vladimir Mayakovsk and Marina Tsvetaeva; cultural context and the features of Russian avant garde poetics. Readings in Russian.

3-4 units, Aut (Fleishman, L)

SLAVLIT 269. Pushkin: Tying and Untying the Threads of the Golden Age.—Graduate seminar. The formation of a simultaneously imperial and Enlightenment culture under Catherine the Great, and how Pushkin and his contemporaries realized its potentials and contradictions. Literary texts in light of other verbal discourses and artistic media; the field of 18th-century and imperial studies in Russia. Undergraduates require consent of instructor.

3 units, Aut (Greenleaf, M)

SLAVLIT 270. Pushkin.—Major poems and prose with detailed examination of his cultural milieu. Emphasis is on changes in the understanding of literary concepts relevant to this period of Russian literature (poetic genres, the opposition between poetry and prose, romanticism).

2-3 units, not given this year

SLAVLIT 271. Poema: Russia’s Long Narrative Poem.—Russian long narrative poems of the 19th and 20th centuries in literary and historical context.

3-4 units, not given this year

2-4 units, not given this year

SLAVLIT 299. Individual Work for Graduate Students.—For graduate students in Slavic working on theses or engaged in special work. Prerequisite: written consent of instructor.

1-12 units, Aut, Win, Spr, Sum (Staff)

SLAVLIT 305. Russian Critical Traditions.—The Russian intelligentsia invested its literature with esthetic and ethical value, and developed a critical apparatus that have inspired Western approaches to text. Readings in theorists from the 19th-20th centuries including positivists and formalists. Possible topics: 19th-century radicals, futurist manifestoes, formalists, Freudian and Marxist models, Bakhtin, and the Tartu semioticians. Readings in English. Prerequisite: some familiarity with the Russian canon.

3-4 units, not given this year
SLAVLIT 310. Civilizing Process: Paradigms of Society and Culture in Modern Russian Literature and Film — Texts representing theoretical models of society and culture in confrontation with works of Russian fiction and film. Emphasis is on Norbert Elias’s civilizing process and related theories. Topics: body and desire (Freud, Bakhtin); manners and civilizing process (Elias, Cudihy, Lottman); symbolic forms, ritual, and systems (Geertz, Zorin); identities and practices (de Certeau, Bourdieu); subcultures (Hebdige). Authors include Mayakovsky, Babel, Mandelstam, Bulgakov, Platonov, Zoshchenko, Erofeev, Pelevin, Trifonov, and Petrushevskaya; film makers: Mamin and Rogozkin. Recommended: knowledge of Russian.
2-4 units, not given this year

SLAVLIT 399. Advanced Research Seminar in Russian Literature — Follow-up to 200- or 300-series seminars, as needed. May be repeated for credit.
2-4 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES
Slavic majors are advised to consult the “Division or Literature, Culture, and Languages” section of this bulletin for additional cognate offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

DLCL 189. Honors Thesis Seminar
5 units, Aut (Reichert, J)

DLCL 377. Topics in Literature and Culture
3-4 units, Aut (Bohrer, K)

OVERSEAS STUDIES
Courses approved for the Slavic Languages and Literatures major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

Sociology

Chair: Karen Cook

Professors: Lawrence Bobo, Karen Cook, Paula England, Mark Granovetter, David Grusky, Michael T. Hannan, Douglas McAdam, Susan Olzak, Cecilia Ridgeway, C. Matthew Snipp, Nancy B. Tuma, Andrew Walder, Xueguang Zhou

Associate Professor: Gi-Wook Shin

Assistant Professors: Henning Hillmann, Monica McDermott, Michael Rosenfeld, Rebecca L. Sandefur

Associate Professor (Teaching): Donald Barr

Lecturers: Cynthia Brandt, Brian Colwell, Gili Drori

Courtesy Professors: Anthony Bryk, Glenn Carroll, Larry Diamond, Joanne Martin, Clifford J. Nass, Walter Powell, Francisco Ramirez

Courtesy Associate Professors: Michele Landis Dauber, Sean Reardon, Jesper Sorensen

Courtesy Assistant Professor: Daniel McFarland

Consulting Professors: George Bohrmstedt, Ruth Cronkite

Consulting Associate Professor: Annemette Sorensen

Visiting Associate Professors: Eva-Maria Meyersson Milgrom, Patricia Thornton

Department Offices: Building 120, Room 160
Mail Code: 94305-2047
Phone: (650) 723-3956
Web Site: http://www.stanford.edu/dept/soc/

Courses given in Sociology have the subject code SOC. For a complete list of subject codes, see Appendix.

Sociology seeks to understand all aspects of human social behavior, including the behavior of individuals as well as the social dynamics of small groups, large organizations, communities, institutions, and entire societies. Sociologists are typically motivated both by the desire to better understand the fundamental principles of social life as well as by the conviction that an understanding of these principles may aid in the formulation of more enlightened and effective social policy. Sociology thus provides a strong intellectual background for students considering careers in the professions or business. Students may pursue degrees in sociology at the bachelor’s, master’s (coterminal), or doctoral levels.

UNDERGRADUATE PROGRAMS

Sociology offers two programs leading to the B.A. degree: the general sociology major and the specialized major. Both are designed around a core curriculum, the intent of which is to ensure adequate coverage of basic sociological knowledge and to provide enough flexibility for tailoring the degree program to fit individual needs and interests. The general major consists of the core curriculum plus a selection of additional courses intended to provide breadth of exposure to the variety of areas encompassed by sociology. The specialized major consists of the core curriculum plus a concentrated set of courses in one area of sociology. Areas of concentration include Organizations, Business, and the Economy; Race and Ethnic Relations; Social Movements, Comparative Politics, and Social Change; Social Psychology and Interpersonal Processes; and Social Stratification and Inequality. If a specialized major is completed, the student’s transcript will reflect his or her specialized field of study. These programs and the requirements for each are described below.

CORE CURRICULUM AND GENERAL SOCIOLOGY MAJOR

To graduate with a B.A. in Sociology, students must complete a minimum of 60 units of course work in the major. All units applied to the major must be taken for a letter grade (except for SOC 190-193) and a grade point average (GPA) of 2.0 (C) or better must be achieved. Related
course work from other departments may fulfill part of this requirement, but such work must be approved in advance by a department adviser and must not exceed 15 units. All degree candidates must fulfill the following core requirements:

1. SOC 1. Introduction to Sociology. It is recommended that students take this course early in their program.
2. SOC 180. Methods for Sociological Research; or equivalent.
3. An introductory course in statistics such as SOC 181B, PSYCH 60, STATS 60, or equivalent.
4. SOC 170. Classics of Modern Social Theory, or equivalent course in social theory.
5. At least three foundation courses, each from a different area of concentration.
6. SOC 200. Junior/Senior Seminar for Majors. It is recommended that students take this course in Spring Quarter of the junior year or Autumn Quarter of the senior year. This course fulfills the Writing in the Major (WIM) requirement.

To complete the general Sociology major, students must also complete 20 additional units of work.

**SPECIALIZED SOCIOLGY MAJOR**

The department recognizes that some students may wish to engage in more in-depth study than that provided by the major in general Sociology. The specialized Sociology major permits students to pursue a more focused program in one of these five field designations: Organizations, Business, and the Economy; Race and Ethnic Relations; Social Movements, Comparative Politics, and Social Change; Social Psychology and Interpersonal Processes; and Social Stratification and Inequality. To complete the requirements for the B.A. degree in Sociology with a field designation, a student must complete all core curriculum requirements and complete 20 units of course work in the selected field of concentration. These fields are declared on Axess and appear on the transcript; they do not appear on the diploma.

**CONCENTRATION FIELDS**

Each field identifies a specialized area of inquiry, a set of skills within sociology, and basic preparation for a variety of careers. A brief description of each field follows.

**Organizations, Business, and the Economy** — Focus is on the arrangements which societies construct for the provision of material goods or services. A formal organization which provides goods or services for profit and sells them through a market is called a business, and the economic system is capitalism. Social needs are also met through government and not-for-profit organizations, such as garden clubs, hospitals, prisons, and the Red Cross. Some private and social needs are met outside of organizations, such as health care provided by family members and exchange of favors among friends. Courses stress the factors that determine whether needs that people define are met through markets or by non-market allocation, through organizations or by other means. They also investigate the environmental and technical factors that shape organization structure, the determinants of how efficiently organizations operate, and the interpersonal processes that shape individual behavior within organizations. Careers related to this field include management and administration in business or public settings, management consulting and analysis, and legal studies related to corporations, organizations, and business.

**Race and Ethnic Relations** — Focus is on issues surrounding the emergence, persistence, and dynamics of conflict and cooperation among race and ethnic groups in the United States and elsewhere. Course topics include racial identity, sources of prejudice and hostility, emergence of minority rights movements, indigenous peoples’ movements, ethnic genocide, ethnic collective violence, and cooperation among groups.

**Social Movements, Comparative Politics, and Social Change** — Focus is on the emergence, reproduction, and change of political systems and institutions, especially on why and how different political systems and social movements appear in different times and places, and how differences in political regimes and economic systems influence attempts to change these systems. The origins and significance of national and transnational social movements, transition to democracy, including revolution, nationalism, and other forms of collective action, in creating and sustaining these changes analyzed across countries and over time. Careers that are relevant to this field include law, public policy, government service, nonprofit and international nongovernmental organizations, business organizations (especially those with international interests), consulting, and managerial jobs.

**Social Psychology and Interpersonal Processes** — Focus is on the social organization of individual identity, beliefs, and behavior, and upon social structures and processes which emerge in and define interpersonal interactions. Processes studied include social acceptance and competition for prestige and status, the generation of power differences, the development of intimacy bonds, the formation of expectation states which govern performance in task oriented groups, and social pressures to constrain deviance. Foundation courses emphasize the effect of social processes on individual behavior and the analysis of group processes. This field provides training for careers with a significant interpersonal component, including advertising and marketing, business, education, law, management, medicine and health, or social work.

**Social Stratification and Inequality** — Focus is on forms of social inequality, including fields such as: the shape and nature of social inequalities; competition for power; allocation of privilege; production and reproduction of social cleavages; and consequences of class, race, and gender for outcomes such as attitudes, political behavior, and lifestyles. Many courses emphasize changes in the structure of social inequalities over time, and the processes which produce similarities or differences in stratification across nations. Topics include educational inequality, employment history, gender differences, income distributions, poverty, race, and ethnic relations, social mobility, and status attainment. Careers related to this field include administration, advertising, education, foreign service, journalism, industrial relations, law, management consulting, market research, public policy, and social service.

**CONCENTRATION FIELD COURSES**

Many of the department courses can be categorized as primarily oriented to one of the five fields of concentration; a few courses are relevant to more than one field. Within each field of concentration, one or more undergraduate foundation courses are identified which provide a general introduction to the field or some portion of it. Courses, classified by field, are as follows:

1. Organizations, Business, and the Economy
   - Foundation courses: 114 or 160
   - Other courses: 110, 115, 130, 161-169, 260-268
2. Race and Ethnic Relations
   - Foundation courses: 145 or 148
   - Other courses: 139, 141A, 143, 144, 146, 147
3. Social Movements, Comparative Politics, and Social Change
   - Foundation courses: 110 or 118 or 130
4. Social Psychology and Interpersonal Processes
   - Foundation courses: 120 or 121
   - Other courses: 125-128, 132, 142, 150, 220-227, 242
5. Social Stratification and Inequality
   - Foundation course: 140
   - Other courses: 132, 134, 139, 141, 141A-149, 150, 241, 241A-249

**MINORS**

The minor in Sociology is intended to familiarize students with the basic concepts and methods of the discipline. In addition to ensuring considerable breadth of exposure to the fundamental issues and approaches of the field of sociology, students are encouraged to obtain some depth of exposure to one of the specialized fields of study.
The requirements for a minor in Sociology are as follows:

<table>
<thead>
<tr>
<th>Subject and Catalog Number</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 1, Introduction to Sociology</td>
<td>5</td>
</tr>
<tr>
<td>SOC 180, Methods for Sociological Research</td>
<td>5</td>
</tr>
<tr>
<td>Two foundation courses, one each from two of the five concentration fields (see above)</td>
<td>10</td>
</tr>
<tr>
<td>Additional course work in the department, preferably in the fields of concentration associated with the foundation courses taken (consult listing of courses for each field described elsewhere in the Stanford Bulletin)</td>
<td></td>
</tr>
<tr>
<td>Total course work required</td>
<td>15</td>
</tr>
</tbody>
</table>

All courses qualifying for the minor must be taken for a letter grade, and a grade point average (GPA) of 2.0 (C) or better must be achieved.

**HONORS PROGRAM**

Students desiring to undertake an independent scholarly project under the direction of a faculty member are encouraged to apply for admission to the department’s honors program. To enter the program, the student must be accepted by a faculty member of the department who agrees to advise on the research and writing of the essay. It is possible in some cases for students to work with faculty advisers in other departments, but such arrangements must be approved by the chair of the undergraduate studies committee. Admission to the program requires a grade point average (GPA) of 3.5 or higher in courses taken within the major, and an overall GPA of 3.3 (B+) or higher in all undergraduate course work.

Work on the project can begin earlier, but ordinarily is initiated in connection with meeting the course requirements of SOC 200, Junior/Senior Seminar for Majors. Students are encouraged to begin designing their honors project in connection with this seminar, in consultation with the seminar leader and a faculty member who is willing to serve as sponsor for the honors project. If admitted to the program, the work can then be completed during Winter and Spring Quarters.

To formally enter the program, a student must complete an application form available from the department office. The form requires the endorsement of the faculty sponsor and is to be accompanied by a brief description of the project to be undertaken and a copy of the student’s undergraduate transcript. Prospective candidates must submit the copy of the completed application form to the chair of the undergraduate studies committee no later than the fourth quarter before graduation, typically Spring Quarter of the junior year.

Honors students may earn up to 12 units credit for work leading to the completion of the required honors thesis (excluding units associated with the Junior/Senior Seminar). To be eligible for honors degree, a grade of ‘A-’ or better must be earned on the honors thesis. If an ‘A-’ is not earned, the thesis credit counts towards meeting the standard major requirements.

Successful completion of honors in Sociology requires (1) completion of all requirements for the major; and (2) completion of a thesis of honors quality (a grade of ‘A-’ or higher). The thesis is due on or before the beginning of the End-Quarter period in the student’s final quarter before graduation. If the thesis has been sponsored by a faculty member outside the department, it must be submitted to both that sponsor and to the chair of the undergraduate studies committee, who appoints a departmental reader to evaluate the paper. Both the sponsor and the reader must agree that the paper merits honors. In every case, two copies of the final paper must be submitted. One is retained by the department and becomes a part of the department’s permanent collection.

**COTERMINAL BACHELOR’S AND MASTER’S PROGRAM**

Stanford undergraduate students who wish additional training in sociology (whatever their undergraduate major), and who have a good academic record (a GPA of at least 3.5 in previous undergraduate work is required), may apply to the coterminal master’s program as described in the “Undergraduate Degrees” section of this bulletin.

To apply for admission to the coterminal program, students should submit the coterminal application and the following: (1) a statement of purpose providing the rationale for the proposed program of study, (2) a proposed program that specifies at least 45 units of course work relevant to the degree program with at least 36 units in Sociology, (3) a current undergraduate transcript, and (4) two letters of recommendation from Stanford faculty familiar with the student’s academic work.

All 45 course units to be counted toward the graduate degree must be at or above the 100 level; at least 18 course units must be above the 200 level. Because the acquisition of research skills is an important component of graduate training in the social sciences, it is recommended that coterminal students take one or more research methodology courses, for example, SOC 280 or 281B.

All units applied to the coterminal master’s degree must be taken for a grade and an overall grade point average (GPA) of 3.0 (B) or better is required.

Most coterminal students propose programs that concentrate on one of the five fields of concentration offered by the department: Organizations, Business, and the Economy; Race and Ethnic Relations; Social Movements, Comparative Politics, and Social Change; Social Psychology and Interpersonal Relations; and Social Stratification and Inequality. This approach helps to ensure program coherence.

For University coterminal degree program rules and University application forms, see [here](http://registrar.stanford.edu/shared/publications.htm#Coterm).

**GRADUATE PROGRAMS**

University requirements for the M.A. and Ph.D. degree are described in the “Graduate Degrees” section of the bulletin.

**Admission**—Each applicant must submit results from the general Graduate Record Examination (GRE). Foreign students must take the TOEFL exam (a minimum score of 250 on the computer-based test or 600 on the paper-based test is required). Applicants must also submit a personal statement, writing sample, three letters of recommendation, and transcripts. For more information, see [here](http://gradadmissions.stanford.edu).

**MASTER OF ARTS**

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin. The department does not admit students who are candidates solely for the M.A. in Sociology. The M.A. degree is available to Ph.D. candidates in Sociology or from other departments and schools. In the latter instance, the usual admission requirements are waived and course requirements are determined in consultation with a Sociology adviser. Students must complete a minimum of 45 units with a grade point average (GPA) of 3.0 (B) or better. All 45 units must be taken in courses taught by Sociology faculty and must be taken for a grade whenever possible. Research and directed reading courses are acceptable, but must be approved in advance. All course work must be at the 100 level or above; 18 units must be above the 200 level. Interested students should contact the department for additional information and advance approval of their programs.

**DOCTOR OF PHILOSOPHY**

The curriculum and degree requirements are designed to provide students with the necessary knowledge and skills to become proficient as both scholars and teachers. The courses and requirements also provide faculty with essential information on the progress of each student and on areas of difficulty or deficiency requiring attention and improvement. Doctoral students in the department must take all required courses for a grade and are expected to earn a grade of B+ or better in each course. Any grade of B or below is considered to be less than satisfactory.

Students must complete the following department requirements for the Ph.D. degree in Sociology:

1. In order to receive a thorough introduction and orientation to the field of sociology, the department, and the faculty, each student must enroll in SOC 305, Graduate Proseminar. The proseminar is a one quarter course given during the Autumn Quarter of the first year of residence. One unit of credit is given for this course; grading is on a satisfactory/no credit basis. The proseminar leader also serves as the academic adviser for all first-year students. After the first year, students are allowed to select their academic adviser from among members of the department’s faculty.

2. As partial preparation for becoming an accomplished researcher, each student must complete three quarters of research experience, work-
As partial preparation for becoming an accomplished teacher, each student must complete three quarters of teaching apprenticeship in departmental courses, or in other courses by approval. Work as either a teaching assistant (TA) under the supervision of a faculty member or as a teaching fellow (TF) fulfills this requirement. All students are required to take a one quarter TA training course offered by the department during their first year. In addition, students are expected to take advantage of department and University teacher training programs during their first few years of residence. Students for whom English is a second language are expected to acquire sufficient facility in English to be an effective teacher.

4. In order to demonstrate command of a range of sociological literatures, students must take four broad survey courses. Each year the department specifies which courses meet this requirement, and will undertake to ensure that an adequate selection of such courses is offered. A list of courses that generally fulfill this requirement is listed in the requirements section below. Students should consult with their adviser to ensure that the combination of courses selected to meet this requirement exhibits sufficient breadth. This requirement is normally completed by the end of the second year of residency and must be met by the end of the third year of residency.

5. In order to obtain a thorough grounding in sociological theory, each student must take one course in classical sociological theory (SOC 370A or B or equivalent), and one course on the development of theory and research design (SOC 372 or equivalent).

6. In order to obtain a thorough grounding in research methods, each student must complete a series of required courses in methodology. Students with little background in statistics are encouraged to take SOC 281B or equivalent. See the requirements section below for specific course requirements.

7. In partial preparation for a career of writing scholarly papers, each student must complete a paper by May 15 of the second year of residency. This second-year paper may be on any sociological topic, and may address theoretical, empirical, or methodological issues. The paper is expected to reflect original work and is considered an important piece of evidence in the decision to advance to candidacy. A two-person committee that includes the primary adviser evaluates the paper. Although the reading committee is usually comprised of two regular faculty members in the department, emeritus and other faculty outside of the department may serve as a committee member with prior approval.

8. In order to demonstrate the ability to conduct independent scholarly work, each student must prepare a dissertation prospectus and pass the University oral examination. The oral exam is intended to evaluate the dissertation prospectus or a partial draft of the dissertation and to assess the student’s knowledge of the relevant theory and research in the area in which the project intends to contribute. This requirement must be completed by December 1 of the fourth year of residency.

9. Each student must complete a doctoral dissertation. Assessment of satisfactory completion is determined by the student’s doctoral committee members. All students are invited to present their dissertation findings at an informal department colloquium.

The faculty assumes the responsibility to provide students with timely and constructive feedback on their progress toward a degree. In order to evaluate student progress and to identify potential problem areas, the department’s faculty reviews the academic progress of each first-year student at the beginning of Winter and Spring quarters and again at the end of Spring Quarter. The reviews at the beginning of Winter and Spring

Quarter are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. The review at the end of Spring Quarter is more thorough: Each student’s performance during the first year is reviewed and discussed. Possible outcomes of the spring review include: (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residence or financial support. All students are given feedback from their advisers at the end of their first year of graduate work, helping them to identify areas of strengths and potential weakness.

At the end of the second year of residency, the faculty again review the progress of all doctoral students in the program. Students who are performing well, as indicated by their course work, teaching and research apprenticeship performance, and second-year paper, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are still on probation at this stage may be (1) advanced to candidacy; (2) retained on probation with specification of the steps still required to be removed from this status; or (3) terminated from the program.

At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student.

**REQUIREMENTS**

**SURVEY COURSES**

Students must complete four courses from the approved list, including:

- 308. Social Demography
- 310. Political Sociology
- 314. Economic Sociology
- 316. Historical and Comparative Sociology
- 318. Social Movements and Collective Action
- 320. Foundations of Social Psychology
- 322. Social Interaction, Social Structure, and Social Exchange
- 324. Social Networks
- 340. Social Stratification
- 342B. Gender and Social Structure
- 345. Comparative Race and Ethnic Relations
- 360. Foundations of Organizational Sociology
- 362. Organization and Environment
- 363A. Seminar on Organizational Theory
- 363B. Seminar on Organizations: Institutional Analysis

**RESEARCH METHODS**

The following course requirements apply to students who entered the Ph.D. program in 2005-06 or later. Students are also expected to complete one elective from a list of approved courses.

- 281A. Statistics (not required but recommended for students with little statistical background)
- 281B. Statistics (required for students with little statistical background)
- 381. Sociological Methodology I: Introduction
- 382. Sociological Methodology II: The General Linear Model
- 384. Sociology Methodology IV: New Models and Methods
- 385A. Research Practicum I
- 385B. Research Practicum II

The following course requirements apply to students who entered the Ph.D. program in 2004-05 or earlier.

- 281A. Statistics (recommended for students with little statistical background)
- 381A. Sociological Methodology I: Computer Assisted Data Analysis
- 382. Sociological Methodology II: The General Linear Model
- 388. Advanced Models for Analysis of Tabular Arrays or 389. Mixed Method Research Design

**THEORY**

370A. Sociological Theory: Social Structure, Inequality, and Conflict
or 370B. Sociological Theory: Social Interaction and Group Processes

372. Theoretical Analysis and Design

Students must complete additional course work sufficient to prepare them to write their second-year paper.

**PH.D. MINOR**

Sociology offers a minor for School of Education doctoral students. Students must complete a minimum of 30 graduate-level units with a grade point average (GPA) of 3.0 (B) or better. All 30 units for the minor are to be in courses taught by Sociology faculty with the following exception: 5 units may be taken in a statistics or methods course taught in another department. All units must be taken for a grade. Research and directed reading courses are acceptable, but must be approved in advance. The specific program must be approved by a Sociology adviser and filed with the Department of Sociology.

**JOINT PROGRAMS WITH THE SCHOOL OF LAW**

The School of Law and Department of Sociology conduct joint programs leading to either a combined J.D. degree with an M.A. degree in Sociology or a combined J.D. degree with a Ph.D. in Sociology.

Law students interested in pursuing an M.A. in Sociology apply for admission to the Department of Sociology during their first year of Law school. Once admitted to the Department of Sociology, the student must complete standard departmental master’s degree requirements as specified in this bulletin. Applications for the joint J.D./M.A. degree program must be approved by both the department and the Law school. Faculty advisers from each program participate in the planning and supervising of the student’s academic program.

The J.D./Ph.D. degree program is designed for students who wish to prepare themselves for research or teaching careers in areas relating to both legal and sociological concerns. Students interested in the joint degree program must be admitted to both the School of Law and the Department of Sociology. Interest in the joint degree program must be noted on each of the student’s applications. Alternatively, an enrolled student in either the Law School or the Sociology department may apply to the other program, preferably during their first year of study.

Upon admission, students are assigned a joint program faculty adviser who assists the student in planning an appropriate program and ensuring that all requirements for both degrees are satisfied. The faculty adviser serves in this capacity during the student’s course of study regardless of whether the student is enrolled in the School of Law or the Sociology department.

J.D./Ph.D. students may elect to begin their course of study in either the School of Law or the Department of Sociology. Students must be enrolled full-time in the Law school for the first year of Law school, and must enroll full time in the graduate school for the first year of the sociology program. After that time, enrollment may be in the graduate school or the Law school, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the Ph.D. degrees. Up to 36 semester (54 quarter) hours of approved courses may be counted toward both degrees, but no more than 24 semester (36 quarter) hours of courses that originate outside the Law school may count toward the Law degree. To the extent that courses under this joint degree program originate outside of the Law school but count toward the Law degree, the Law school credits permitted under Section 17(1) of the Law School Regulations for cross-registration in other schools or departments of Stanford University are reduced on a unit-per-unit basis, but not below zero. Students must complete the equivalent of 210 quarter units to complete both degrees. Tuition and financial aid arrangements normally are through the school in which the student is currently enrolled.

**COURSES**

Courses are open to all students without prerequisites, unless indicated. Courses numbered 200-299 are open to advanced undergraduates and graduate students. Courses numbered 300 and above are normally offered to matriculated doctoral students only.

**OPEN TO ALL STUDENTS**

**INTRODUCTORY**

SOC 1. Introduction to Sociology — Concepts, methods, and theoretical orientations. Sociological imagination illustrated by recent theory and research. Possible topics: the persistence of class cleavages; ethnic, racial, and gender inequalities; religious beliefs and the process of secularization; functions and dysfunctions of educational institutions; criminology and social deviance; social movements and social protest; production and reproduction of culture; rise of organizational society. GER:DB-SocSci

5 units, Aut (McAdam, D), Win (Sandefur, R)

SOC 15N. The Transformation of Socialist Societies — Stanford Introductory Seminar. Preference to freshmen. The impact of societal organization on the lives of ordinary people in socialist societies and in the new societies arising through the processes of political, economic, and social transformation. Do the concepts of democratization and marketization suffice to characterize ongoing changes? Enrollment limited to 16.

3 units, Win (Tuma, N)

SOC 22N. The Roots of Social Protest — Stanford Introductory Seminar. Preference to freshmen. The conditions under which social protest occurs and the emergence, success, and viability of contemporary social movements. Examples include women’s civil rights, ecology, and antinuclear movements and anti-globalization movements in the U.S. and elsewhere. Sociological theories to explain the timing, location, and causes of mobilization; how researchers evaluate these theories. Comparison of tactics, trajectories, and outcomes.

3 units, Spr (Olk, S)

SOC 26N. The Changing American Family — Stanford Introductory Seminar. Preference to freshmen. Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation and marriage: what do all these changes mean?

3 units, Aut (Rosenfeld, M)

SOC 32N. Law in Society — Stanford Introductory Seminar. Preference to freshmen. For students interested in law and social inequality. Major sociological perspectives on where the law comes from, what law and justice systems do, and how they work. Enrollment limited to 16. GER: DB-SocSci

3 units, Spr (Sandefur, R)

SOC 46N. Race, Ethnic, and National Identities: Imagined Communities — Stanford Introductory Seminar. Preference to freshmen. How new identities are created and legitimated. What does it mean to try on a different identity? National groups and ethnic groups are so large that one individual can know only an infinitesimal fraction of other group members. What explains the seeming coherence of groups? If identities are a product of the imagination, why are people willing to fight and die for them? Enrollment limited to 16.

3 units, Spr (Rosenfeld, M)

**SOCIAL MOVEMENTS, COMPARATIVE POLITICS, AND SOCIAL CHANGE**

SOC 109. Sociology of Terrorism — (Graduate students register for 209.) Multidisciplinary including psychology, sociology, political science, and economics. Comparison of terrorist organizations and movements across institutions, places, and times; their motives, tactics, financing, and organization. Emphasis is on suicide bombing. What mass media think they know and what they do not know.

5 units, Spr (Meyersson Milgrom, E)
SOC 110. Politics and Society — (Graduate students register for 210.) Themes of political sociology, origins and expansion of the modern state, linkages between state and society, the impact of the modern world system on national policies, the internal distribution of power and authority, and the structure of political group formation and individual participation in modern states. Emphasis is on modern empirical literature. GER:DB-SocSci
5 units, not given this year

SOC 111. State and Society in Korea — (Graduate students register for 211.) 20th-century Korea from a comparative historical perspective. Colonialism, nationalism, development, state-society relations, democratization, and globalization with reference to the Korean experience. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Shin, G)

SOC 117A. China Under Mao — (Graduate students register for 217A.) The transformation of Chinese society from the 1949 revolution to the eve of China’s reforms in 1978: the creation of a socialist economy, the reorganization of rural society and urban workplaces, the emergence of new inequalities of power and opportunity, and the new forms of social conflict during Mao’s Cultural Revolution of 1966-69 and its aftermath. GER:EC-GlobalCom
5 units, Spr (Walder, A)

SOC 118. Social Movements and Collective Action — (Graduate students register for 218.) Why social movements arise, who participates in them, the obstacles they face, and how to gauge movement success or failure? Theory and empirical research. Application of concepts and methods to a social movement such as civil rights, gay marriage equality, environmental justice, fair wages, anti-globalization, or pro-choice or anti-abortion. GER:DB-SocSci
5 units, Aut (Brandt, C)

SOC 119. Understanding Large-Scale Societal Change: The Case of the 1960s — (Graduate students register for 219.) The demographic, economic, political, and cultural roots of social change in the 60s; its legacy in the present U.S.
5 units, Aut (McAdam, D)

SOC 120. Education and Society — (Graduate students register for 230; same as EDUC 220C.) The effects of schools and schooling on individuals, the stratification system, and society. Education as socializing individuals and as legitimizing social institutions. The social and individual factors affecting the expansion of schooling, individual educational attainment, and the organizational structure of schooling. GER:DB-SocSci
4-5 units, Aut (Suarez, D)

SOC 121. Law and Society — (Graduate students register for 236.) Major issues and debates in the sociology of law. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; the law in action versus the law on the books; organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement. GER:DB-SocSci
3-5 units, Win (Dauber, M)

SOC 122. Homelessness: Its Causes, Consequences, and Policy Solutions — (Graduate students register for 237.) Homelessness as a social policy issue and concern within the local community. Service-learning format: students work with a local community partner to assess needs of local homeless, and evaluate policies and services delivery.
5 units, Aut (Barr, D)

SOC 123. American Indians in Comparative Historical Perspective — (Graduate students register for 238.) Demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty. GER:EC-AmerCul
5 units, not given this year (Snipp, C)

SOC 124. Comparative Ethnic Conflict — (Graduate students register for 247A.) Causes and consequences of racial and ethnic conflict, including nationalist movements, ethnic genocide, civil war, ethnic separatism, politics, indigenous peoples’ movements, and minority rights’ movements around the world.
5 units, Spr (Olzak, S)

SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES

SOC 105. Status, Friendship, and Social Pressure — Social processes that structure the individual’s experience in interpersonal situations, including group pressure on individual choices, social control of deviants, operation of status distinctions (sex and race), and formation of friendships and intimate relationships. Theoretical ideas, empirical research, and clinical strategies. Structured exercises and simulation gaming in section meetings. Enrollment limited to 30. GER:DB-SocSci
5 units, not given this year

SOC 106. Social Networks — (Graduate students register for 220.) Forming ties, developing norms, status, conformity, deviance, social exchange, power, and coalition formation; important traditions of research have developed from the basic theories of these processes. Emphasis is on understanding basic theories and drawing out their implications for change in a broad range of situations, families, work groups, and friendship groups. GER:DB-SocSci
5 units, Aut (Ridgeway, C)

SOC 110. Status, Friendship, and Social Pressure — Social processes that structure the individual’s experience in interpersonal situations, including group pressure on individual choices, social control of deviants, operation of status distinctions (sex and race), and formation of friendships and intimate relationships. Theoretical ideas, empirical research, and clinical strategies. Structured exercises and simulation gaming in section meetings. Enrollment limited to 30. GER:DB-SocSci
5 units, not given this year

SOC 111. State and Society in Korea — (Graduate students register for 211.) 20th-century Korea from a comparative historical perspective. Colonialism, nationalism, development, state-society relations, democratization, and globalization with reference to the Korean experience. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Shin, G)

SOC 117A. China Under Mao — (Graduate students register for 217A.) The transformation of Chinese society from the 1949 revolution to the eve of China’s reforms in 1978: the creation of a socialist economy, the reorganization of rural society and urban workplaces, the emergence of new inequalities of power and opportunity, and the new forms of social conflict during Mao’s Cultural Revolution of 1966-69 and its aftermath. GER:EC-GlobalCom
5 units, Spr (Walder, A)

SOC 118. Social Movements and Collective Action — (Graduate students register for 218.) Why social movements arise, who participates in them, the obstacles they face, and how to gauge movement success or failure? Theory and empirical research. Application of concepts and methods to a social movement such as civil rights, gay marriage equality, environmental justice, fair wages, anti-globalization, or pro-choice or anti-abortion. GER:DB-SocSci
5 units, Aut (Brandt, C)

SOC 119. Understanding Large-Scale Societal Change: The Case of the 1960s — (Graduate students register for 219.) The demographic, economic, political, and cultural roots of social change in the 60s; its legacy in the present U.S.
5 units, Aut (McAdam, D)

SOC 130. Education and Society — (Graduate students register for 230; same as EDUC 220C.) The effects of schools and schooling on individuals, the stratification system, and society. Education as socializing individuals and as legitimizing social institutions. The social and individual factors affecting the expansion of schooling, individual educational attainment, and the organizational structure of schooling. GER:DB-SocSci
4-5 units, Aut (Suarez, D)

SOC 136. Law and Society — (Graduate students register for 236.) Major issues and debates in the sociology of law. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; the law in action versus the law on the books; organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement. GER:DB-SocSci
3-5 units, Win (Dauber, M)

SOC 137. Homelessness: Its Causes, Consequences, and Policy Solutions — (Graduate students register for 237.) Homelessness as a social policy issue and concern within the local community. Service-learning format: students work with a local community partner to assess needs of local homeless, and evaluate policies and services delivery.
5 units, Aut (Barr, D)

SOC 138. American Indians in Comparative Historical Perspective — (Graduate students register for 238.) Demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty. GER:EC-AmerCul
5 units, not given this year (Snipp, C)

SOC 147A. Comparative Ethnic Conflict — (Graduate students register for 247A.) Causes and consequences of racial and ethnic conflict, including nationalist movements, ethnic genocide, civil war, ethnic separatism, politics, indigenous peoples’ movements, and minority rights’ movements around the world.
5 units, Spr (Olzak, S)
SOC 127. Bargaining, Power, and Influence in Social Interaction—(Graduate students register for 227.) Research and theoretical work on bargaining, social influence, and issues of power and justice in social settings such as teams, work groups, and organizations. Theoretical approaches to the exercise of power and influence in social groups and related issues in social interaction such as the promotion of cooperation, effects of competition and conflict, negotiation, and intergroup relations. Enrollment limited to 40. GER:DB-SocSci

5 units, Aut (Cook, K)

SOC 128. Sociology of the Life Course—(Graduate students register for 228.) Focus is on continuity and change in human lives, and how an individual’s life course is linked to the fate of larger social structures. Individual life patterns and trajectories in the domains of family, education, and work. Topics include the transition to adulthood and the impact of disruptive historical change on life courses. Applying the life course approach to an area of student interest such as political attitudes, criminal careers, or health outcomes.

5 units, not given this year

SOC 150. The Family—Theories of social psychology to study interactions within American families and between the family and other institutions. Topics: the nature and history of the family, state regulation of families, variations by class and ethnicity, family violence, gender roles, parenting, and divorce. GER:DB-SocSci

5 units, not given this year

SOC 155. The Changing American Family—(Graduate students register for 255.) Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change.

5 units, Spr (Rosenfeld, M)

SOCIAL STRATIFICATION AND INEQUALITY

SOC 132. Sociology of Education: The Social Organization of Schools—(Graduate students register for 332; same as EDUC 110/310.) Topics and case studies that elaborate on the embeddedness of classrooms and schools in social environments, spanning school processes such as stratification, authority, moral and technical specialization, curricular differentiation, classroom instruction, voluntary associations, social crowds, and peer influence. GER:DB-SocSci

4 units, Win (McFarland, D)

5 units, Aut (Barr, D)

SOC 139. American Indians in Contemporary Society—(Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history. GER:EC-AmerCul

5 units, not given this year (Snipp, C)

SOC 140. Introduction to Social Stratification—(Graduate students register for 240.) The main classical and modern explanations of the causes of social, economic, and political inequality. Issues include: power; processes that create and maintain inequality; the central axes of inequality in contemporary societies (race, ethnicity, class, and gender); the consequences of inequality for individuals and groups; and how social policy can mitigate and exacerbate inequality. Cases include technologically simple groups, the Indian caste system, and the modern U.S. GER: DB-SocSci

5 units, Win (Sandefur, R)

SOC 141. Controversies about Inequality—(Graduate students register for 241.) Debate format involving Stanford and guest faculty. Forms of inequality including racial, ethnic, and gender stratification; possible policy interventions. Topics such as welfare reform, immigration policy, affirmative action, discrimination in labor markets, sources of income inequality, the duty of rich nations to help poor nations, and causes of gender inequality. 5 units, Spr (Gusky, D)

SOC 141A. Social Class, Race, Ethnicity, Health—(Graduate students register for 241A.) Socioeconomic, racial, and ethnic differences in health status. Access to care of racial and ethnic minorities and those from lower social classes. Institutional factors such as government programs, and individual factors such as unconscious racial bias on the part of care providers or distrust of providers on the part of patients. The intersection of lower social class and ethnic minority status in health status and health care access. GER:DB-SocSci, EC-AmerCul

4-5 units, Win (Barr, D)

SOC 142. Sociology of Gender—(Graduate students register for 242.) Gender inequality in contemporary American society and how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes; arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations. GER:EC-Gender

5 units, Win (Ridgeway, C)

SOC 143. Prejudice, Racism, and Social Change—(Graduate students register for 243.) Ethno-racial attitudes and beliefs in the U.S. since 1965. Conflict including urban riots and cooperation including interracial dating, marriage, and mixed-race identity. Changes in racial prejudice and racism and their influence in domains of life such as jobs, housing, political power, and everyday interactions.

5 units, not given this year

SOC 144. Race and Crime in America—(Graduate students register for 244.) Theories of involvement in crime and deviance emphasizing youth gangs, poverty, the impact of racial residential segregation on involvement in crime, and the impact of high rates of incarceration. The role of the media in fostering fear of crime and racial stereotypes. Public policy questions such as post-incarceration disenfranchisement and reintegration.

5 units, Spr (Bobo, L)

SOC 145. Race and Ethnic Relations—(Graduate students register for 245.) The U.S. and elsewhere. Processes that render ethnic and racial boundary markers, such as skin color, language, and culture, salient in interaction situations. Why only some groups become targets of ethnic attacks. The social dynamics of ethnic hostility and ethnic/racial protest movements. GER:EC-AmerCul

5 units, not given this year

SOC 147. Crime and Incarceration—(Graduate students register for 247; same as URBNST 147.) The process of criminal justice in the U.S.; major theories of criminal deviance. How individuals and social groups are processed through the criminal court system; historical changes in correctional philosophy and organizational structure; inmate socialization; and changes in the social environment of U.S. prisons. GER:DB-SocSci

5 units, Aut (Colwell, B)

SOC 148. Racial Identity—(Graduate students register for 248.) The construction and meanings of racial identities in the U.S. Attention is on multiracial identities and the shifting boundaries of racial categories in contemporary America. GER:EC-AmerCul

5 units, not given this year
SOC 149. The Urban Underclass — (Graduate students register for 249; same as URBANST 112.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci
5 units, Aut (Rosenfeld, M)

ORGANIZATIONS, BUSINESS, AND THE ECONOMY

SOC 114. Economic Sociology — (Graduate students register for 214.) The sociological approach to production, distribution, consumption, and markets, emphasizing the impact of norms, power, social structure, and institutions on the economy. Comparison of classic and contemporary approaches to the economy among the social science disciplines. Topics: consumption, labor markets, organization of professions such as law and medicine, the economic role of informal networks, industrial organization, including the structure and history of the computer and popular music industries, business alliances, capitalism in non-Western societies, and the transition from state socialism in Europe and China. GER:DB-SocSci
5 units, Aut (Granovetter, M)

SOC 115. Topics in Economic Sociology — (Graduate students register for 215.) Discussion of topics initially explored in 114/214, with emphasis on countries and cultures outside N. America. Possible topics: families and ethnic groups in the economy, corporate governance and control, corporate strategy, relations among firms in industrial districts and business groups, the impact of national institutions and cultures on economic outcomes, transitions from state socialism and the role of the state in economic development. Possible case studies: the U.S., Germany, Italy, Britain, France, Brazil, Korea, India, Japan, and China. Prerequisite: 114/214 or 314. GER:DB-SocSci
5 units, Win (Granovetter, M)

SOC 160. Formal Organizations — (Graduate students register for 260.) The roles of formal organizations in production processes, market transactions, and social movements; and as sources of income and ladders of mobility. Relationships of modern organizations to environments and internal structures and processes. Concepts, models, and tools for analyzing organizational phenomena in contemporary societies. Sources include the literature and case studies. GER:DB-SocSci
5 units, Spr (Zhou, X)

SOC 161. The Social Science of Entrepreneurship — (Graduate students register for 261.) Who is likely to become an entrepreneur and where is entrepreneurship likely to occur? Classic and contemporary theory and research. Interaction with expert practitioners in creating entrepreneurial opportunities including venture and corporate capitalists. The role of culture, markets, hierarchies, and networks. Market creation and change, and factors that affect success of new organizations. Field projects on entrepreneurial environments such as technology licensing offices, entrepreneurial development organizations, venture capital firms, and corporate venturing groups. GER:DB-SocSci
5 units, Spr (Thornton, P)

SOC 165. Power, Gender, and the Professions — (Graduate students register for 265.) Alternative views of professions and professionals, combining theories of professions and gender. The institutionalization of professional power and professional structure in the 20th century. Changing professional roles in the face of increasing bureaucratization of professional work. The role of gender in professional work, and alternative explanations for gender-based differences. How these forces operate, particularly in the professions of medicine, law, and academe. GER:DB-SocSci
5 units, not given this year

SOC 167A. Asia-Pacific Transformation — (Graduate students register for 267A.) Post-WW II transformation in the Asia-Pacific region, with focus on the ascent of Japan, the development of newly industrialized capitalist countries (S. Korea and Taiwan), the emergence of socialist states (China and N. Korea), and the changing relationship between the U.S. and these countries. GER:DB-SocSci, EC-GlobalCom
5 units, not given this year

RACE AND ETHNIC RELATIONS

SOC 139. American Indians in Contemporary Society — (Graduate students register for 239.) For description, see “Social Stratification and Inequality” subsection above. GER:EC-AmerCul
5 units, not given this year (Snipp, C)

SOC 141A. Social Class, Race, Ethnicity, Health — (Graduate students register for 241 A.) For description, see “Social Stratification and Inequality” subsection above. GER:DB-SocSci, EC-AmerCul
4-5 units, Win (Barr, D)

SOC 143. Prejudice, Racism, and Social Change — (Graduate students register for 243.) For description, see “Social Stratification and Inequality” subsection above.
5 units, not given this year

SOC 144. Race and Crime in America — (Graduate students register for 244.) For description, see “Social Stratification and Inequality” subsection above.
5 units, Spr (Bobo, L)

SOC 145. Race and Ethnic Relations — (Graduate students register for 245.) For description, see “Social Stratification and Inequality” subsection above. GER:EC-AmerCul
5 units, not given this year

SOC 147. Crime and Incarceration — (Graduate students register for 247; same as URBANST 147.) For description, see “Social Stratification and Inequality” subsection above. GER:DB-SocSci
5 units, Aut (Colwell, B)

SOC 148. Racial Identity — (Graduate students register for 248.) For description, see “Social Stratification and Inequality” subsection above. GER:EC-AmerCul
5 units, not given this year

SOCIOLOGICAL THEORY

SOC 170. Classics of Modern Social Theory — (Graduate students register for 270.) Contributions of Marx, Weber, and Durkheim to contemporary sociology. Topics: the problem of social order and the nature of social conflict; capitalism and bureaucracy; the relationship between social structure and politics; the social sources of religion and political ideology; and the evolution of modern societies. Examples from contemporary research illustrate the impact of these traditions. GER:DB-SocSci
5 units, Win (McDermott, M)

RESEARCH METHODS

SOC 180. Introduction to Sociological Research — (Graduate students register for 280.) Focus is on strategies for designing research and analyzing data. GER:DB-SocSci
5 units, not given this year

SOC 180A. Foundations of Social Research — (Graduate students register for 280A.) Formulating a research question, developing hypotheses, probability and non-probability sampling, developing valid and reliable measures, qualitative and quantitative data, choosing research design and data collection methods, challenges of making causal inference, and criteria for evaluating the quality of social research. Emphasis is on how social research is done, rather than application of different methods.
5 units, Win (Sorensen, A)

SOC 180B. Evaluation of Evidence — (Graduate students register for 280B.) Methods for analyzing and evaluating data in sociological research: comparative historical methods, ethnographic observation, quantitative analysis of survey data, experimentation, and simulation. Emphasis is on application of these methods through small data analysis projects.
5 units, Spr (Hillmann, H)

SOC 181B. Sociological Methods: Statistics — (Graduate students register for 281B.) Statistical methods of relevance to sociology: contingency tables, correlation, and regression. GER:DB-Math
5 units, Aut (Johnson, J)
SOC 182. Designing Surveys for Social Science Research — Priority to undergraduates who have received UAR funds. Practical introduction to survey methods. Topics include causality, research design, sampling, and item and questionnaire format. Offered through the Methods of Analysis Program in the Social Sciences (MAPSS). Enrollment limited to 25.
3-5 units, Spr (Staff)

SOC 183. Qualitative Methods in Social Science Research — Priority to undergraduates who have received UAR funds. Goal is to prepare students to design and implement their own qualitative research projects. Topics include: articulating research questions and objectives; connecting research to theoretical concerns in the social sciences; formulating appropriate research strategies; and project design. Offered through the Methods of Analysis Program in the Social Sciences (MAPSS). Enrollment limited to 25.
3-5 units, Spr (Staff)

SOC 184. Data Management Analysis in Social Science — The logic and procedures of quantitative research methods and statistical analysis using SPSS. How to optimize actual practice; how to choose optimal statistical procedures; how to interpret data.
3-5 units, Aut (Staff)

SOC 200. Junior/Senior Seminar for Majors — Capstone course in which sociological problems are framed, linked to theories, and answers pursued through research designs. WIM
5 units, Aut (Mcdermott, M), Spr (Colwell, B)

SOC 201. Preparation for Senior Project — (Same as URBANST 201.) First part of capstone experience for Urban Studies majors pursuing an internship-based project. Individually arranged internship beginning in Winter Quarter, minimum 5 hours per week. Prospective students must consult with instructor early in Autumn Quarter to plan placement. Reflections and assignments culminate in a research proposal. Internship normally continues in Spring Quarter; research proposed in the final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research.
5 units, Win (Kahan, M)

SOC 202. Preparation for Honors Thesis — (Same as URBANST 202.) Primarily for juniors in Sociology or Urban Studies thinking about writing a senior honors thesis; sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. Students write a research prospectus and grant proposal for research funding. Urban Studies seniors writing an honors thesis register for 1 unit to present their work. For WIM credit, must be junior or sophomore registering for at least 3 units.
1-5 units, Win (McAdam, D)

INDIVIDUALIZED LEARNING EXPERIENCES, PRIMARILY FOR UNDERGRADUATE MAJORS

SOC 190. Undergraduate Individual Study
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 191. Undergraduate Directed Research — Work on a project of student’s choice under supervision of a faculty member. Prior arrangement required.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 192. Undergraduate Research Apprenticeship — Work in an apprentice-like relationship with faculty on an on-going research project. Prior arrangement required.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 193. Undergraduate Teaching Apprenticeship
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 196. Senior Thesis — Work on an honors thesis project under faculty supervision (see description of honors program). Must be arranged early in the year of graduation or before.
1-15 units, Aut, Win, Spr, Sum (Staff)

FOR ADVANCED/COTERMIAL UNDERGRADUATES AND MASTER’S STUDENTS

SOC 203. The Transnational Workplace — (Graduate students register for 303.) Experiential one-month workshop: October 24–November 24. Challenges posed by multicultural, transnational work environments. The structure of the multinational modern firm, transnational human resource practices, management profiles, and cultural intelligence. Students cooperate with graduate students in other universities worldwide to create virtual work teams and compose the final assignment for the seminar.
5 units, Aut (Drori, G)

SOC 209. Sociology of Terrorism — (For graduate students; see 109.)
5 units, Spr (Meyersson Milgrom, E)

SOC 210. Politics and Society — (For graduate students; see 110.)
5 units, not given this year

SOC 211. State and Society in Korea — (For graduate students; see 111.)
5 units, Win (Shin, G)

SOC 217A. China Under Mao — (For graduate students; see 117A.)
5 units, Spr (Walder, A)

SOC 218. Social Movements and Collective Action — (For graduate students; see 118.)
5 units, Aut (Brandt, C)

SOC 219. Understanding Large-Scale Societal Change: The Case of the 1960s — (For graduate students; see 119.)
5 units, Aut (McAdam, D)

SOC 230. Education and Society — (For graduate students; see 130; same as EDUC 220C.)
4-5 units, Aut (Suarez, D)

SOC 231. World, Societal, and Educational Change: Comparative Perspectives — (Same as EDUC 136/306D.) Theoretical perspectives and empirical studies on the structural and cultural sources of educational expansion and differentiation, and on the cultural and structural consequences of educational institutionalization. Research topics: education and nation building; education, mobility, and equality; education, international organizations, and world culture.
4-5 units, Win (Wotipka, C)

SOC 234. Research Seminar on Access to Justice — (For graduate students; see 334.)
5 units, Spr (Sandefur, R)

SOC 236. Law and Society — (For graduate students; see 136.)
3-5 units, Win (Dauber, M)

SOC 238. American Indians in Comparative Historical Perspective — (For graduate students; see 138.)
5 units, not given this year (Snipp, C)

SOC 247A. Comparative Ethnic Conflict — (For graduate students; see 147A.)
5 units, Spr (Olzak, S)

SOC 250. Social Psychology and Interpersonal Processes

SOC 220. Interpersonal Relations — (For graduate students; see 120.)
5 units, Aut (Ridgeway, C)

SOC 221. Social Psychology and Social Structure — (For graduate students; see SOC 121.)
5 units, not given this year

SOC 222. Sociology of Culture — (For graduate students; see 122.)
5 units, not given this year
SOC 223. Sex and Love in Modern Society — (For graduate students; see 123.)
5 units, Aut (England, P)

SOC 225. Sociology of Religion — (For graduate students; see 125.)
5 units, not given this year

SOC 226. Introduction to Social Networks — (For graduate students; see 126.)
5 units, Win (Hillmann, H)

(For graduate students; see 127.)
5 units, Aut (Cook, K)

SOC 228. Sociology of the Life Course — (For graduate students; see 128.)
5 units, not given this year

SOCIAL STRATIFICATION AND INEQUALITY
SOC 237. Homelessness: Its Causes, Consequences, and Policy Solutions — (For graduate students; see 137.)
5 units, Spr (Zhou, X)

SOC 239. American Indians in Contemporary Society — (For graduate students; see 139.)
5 units, not given this year (Staff)

SOC 240. Introduction to Social Stratification — (For graduate students; see 140.)
5 units, Win (Sandra, R)

SOC 241. Controversies about Inequality — (For graduate students; see 141.)
5 units, Spr (Grusky, D)

SOC 246. Social Theory in Comparative Perspective — (For graduate students; see 146.)
5 units, not given this year

SOC 248. Racial Identity — (For graduate students; see 147)
5 units, not given this year

SOC 249. The Urban Underclass — (For graduate students; see 149; same as URBANST 112.)
5 units, Aut (Rosenfeld, M)

ORGANIZATIONS, BUSINESS, AND THE ECONOMY
SOC 214. Economic Sociology — (For graduate students; see 114.)
5 units, Aut (Granovetter, M)

SOC 215. Topics in Economic Sociology — (For graduate students; see 115.)
5 units, Win (Granovetter, M)

SOC 216B. Global Projects: An Institutional Perspective — (Same as CEE 245B.)
1-2 units, Spr (Scott, W; Orr, R)

SOC 260. Formal Organizations — (For graduate students; see 160.)
5 units, Spr (Zhou, X)

SOC 261. The Social Science of Entrepreneurship — (For graduate students; see 161.)
5 units, Spr (Thornton, P)

SOC 265. Power, Gender, and the Professions — (For graduate students; see 165.)
5 units, not given this year

SOC 267A. Asia-Pacific Transformation — (For graduate students; see 167A.)
5 units, not given this year

RACE AND ETHNIC RELATIONS
SOC 239. American Indians in Contemporary Society — (For graduate students; see 139 in the “Social Stratification and Inequality” subsection above.)
5 units, not given this year (Staff)

SOC 241A. Social Class, Race, Ethnicity, Health — (For graduate students; see 141A in the “Social Stratification and Inequality” subsection above.)
4-5 units, Win (Barr, D)

SOC 243. Prejudice, Racism, and Social Change — (For graduate students; see 143 in the “Social Stratification and Inequality” subsection above.)
5 units, not given this year

SOC 244. Race and Crime in America — (For graduate students; see 144 in the “Social Stratification and Inequality” subsection above.)
5 units, Spr (Bobo, L)

SOC 245. Race and Ethnic Relations — (For graduate students; see 145 in the “Social Stratification and Inequality” subsection above.)
5 units, not given this year

SOC 247. Crime and Incarceration — (For graduate students; see 147 in the “Social Stratification and Inequality” subsection above.)
5 units, Aut (Colwell, B)

SOC 248. Racial Identity — (For graduate students; see 148 in the “Social Stratification and Inequality” subsection above.)
5 units, not given this year

SOCIOLOGICAL THEORY
SOC 270. Classics of Modern Social Theory — (For graduate students; see 170.)
5 units, Win (McDermott, M)

RESEARCH METHODS
SOC 257. Causal Inference in Quantitative Educational and Social Science Research — (Same as EDUC 257C.) Quantitative methods to make causal inferences in the absence of randomized experiment including the use of natural and quasi-experiments, instrumental variables, regression discontinuity, matching estimators, longitudinal methods, fixed effects estimators, and selection modeling. Assumptions implicit in these approaches, and appropriateness in research situations. Students develop research proposals relying on these methods. Prerequisites: exposure to quantitative research methods; multivariate regression.
3 units, Spr (Reardon, S)

SOC 280. Introduction to Sociological Research — (For graduate students; see 180.)
5 units, not given this year

SOC 280A. Foundations of Social Research — (For graduate students; see 180A.)
5 units, Win (Sorensen, A)

SOC 280B. Evaluation of Evidence — (For graduate students; see 180B.)
5 units, Spr (Hillmann, H)

SOC 281B. Sociological Methods: Statistics — (For graduate students; see 181B.)
5 units, Aut (Johnson, J)
PRIMARILY FOR DOCTORAL STUDENTS

300-level courses are limited to matriculated doctoral students; other students require consent of instructor.

GENERAL

SOC 300. Workshop: Teaching Development — For first-year Sociology doctoral students only. The principles for becoming an effective instructor, adviser, and mentor to undergraduates. Topics: ethics, course organization and syllabus development, test construction and grading, conflict resolution, common classroom problems, and University policies related to matters such as sexual harassment. Technologies and other topics related to making effective presentations, and campus resources to improve classroom performance. Roundtable discussions with faculty and advanced graduate students known for teaching excellence. Students may be asked to give a demonstration lecture.

2 units, Spr (Kakutani, T)

SOC 305. Graduate Proseminar — For first-year Sociology doctoral students only. Introduction and orientation to the field of Sociology.
1 unit, Aut (Grusky, D)

SOC 308. Social Demography — For graduate students and advanced undergraduates. Topics: models of fertility behavior, migration models, stable population theory, life table analysis, data sources, and measurement problems. How population behavior affects social processes, and how social processes influence population dynamics. Recommended: sociological research methods; basic regression analysis and log linear models.
4-5 units, not given this year

SOCIAL MOVEMENTS, COMPARATIVE POLITICS, AND SOCIAL CHANGE

SOC 303. The Transnational Workplace — (For graduate students; see 203.)
5 units, Aut (Drori, G)

SOC 309. Nations and Nationalism — The nation as a form of collective identity in the modern era. Major works in the study of nations and nationalism from comparative perspectives with focus on Europe and E. Asia.
4-5 units, Win (Shin, G)

SOC 310. Political Sociology — Theory and research on the relationship between social structure and politics. Social foundations of political order, the generation and transformation of ideologies and political identities, social origins of revolutionary movements, and social consequences of political revolution. Prerequisite: doctoral student.
4-5 units, Spr (Walder, A)

SOC 311A,B,C. Comparative Studies of Educational and Political Systems — (Same as EDUC 387A,B,C.) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, A: Aut, B: Win, C: Spr (Meyer, J; Wotipka, C)

SOC 312. Workshop on Political Sociology, Social Movements, and Collective Action — Recent research on the legislative process, national and international social movements and collective action, and the intersection of politics, organizations, and social movement activity. Graduate student presentations. May be repeated for credit.
1-5 units, not given this year

SOC 316. Historical and Comparative Sociology — Theory and research on macro-historical changes of sociological significance such as the rise of capitalism, the causes and consequences of revolutions, and the formation of the modern nation state and global world system. Methodological issues in historical and comparative sociology.
4-5 units, not given this year (Shin, G)

SOC 318. Social Movements and Collective Action — Topics: causes, dynamics, and outcomes of social movements; organizational dimensions of collective action; and causes and consequences of individual activism.
4-5 units, not given this year (McAdam, D)

SOC 334. Research Seminar on Access to Justice — (For graduate students; see 234.)
4-5 units, Spr (Sandefur, R)

SOC 337. Workshop on Korean Studies — For graduate students or undergraduates working on honors theses. Comparative and sociological perspectives.
2 units, not given this year

SOC 368. Workshop: Politics and Social Change — Market reform, privatization, regime change, and political movements in rapidly changing societies. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, not given this year

SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES

4-5 units, Aut (Ridgeway, C)

SOC 321. Workshop: Social Psychology — Current theories and research agendas, reviews of recent publications, presentations of ongoing research by faculty and students. May be repeated for credit. Prerequisite: consent of instructor.
2-5 units, not given this year

SOC 322. Social Interaction, Social Structure, and Social Exchange — Current theory and research on topics such as social cognition and identity, group processes, bargaining and negotiation, social justice, social dilemmas and exchange, and networks and collective action. The social exchange approach.
4-5 units, not given this year

SOC 323. Sociology of the Family — Sociological research on changing family forms. Topics include courtship, marriage, fertility, divorce, conflict, relationship skills and satisfaction, gender patterns, power relations within the family, and class and race differences in patterns.
4-5 units, Win (Englendorf, P)

SOC 324. Social Networks — How the study of social networks contributes to sociological research. Application of core concepts to patterns of relations among actors, including connectivity and clusters, duality of categories and networks, centrality and power, balance and transitivity, structural equivalence, and blockmodels. Friendship and kinship networks, diffusion of ideas and infectious diseases, brokerage in markets and organizations, and patronage and political influence in historical contexts.
4-5 units, Spr (Hillmann, H)

SOC 327. Frontiers of Social Psychology — Advanced topics, current developments, theory, and empirical research. Possible topics include social identity processes, status beliefs and processes, social exchange, affect and social cohesion, legitimacy, social difference and inequality, norms, and social dilemmas.
4-5 units, Spr (Ridgeway, C)

SOC 342B. Gender and Social Structure — The role of gender in structuring contemporary life. Social forces affecting gender at the psychological, interactional, and structural levels. Gender inequality in labor markets, education, household, and other institutions. Theories and research literature.
3-5 units, not given this year

SOCIAL STRATIFICATION AND INEQUALITY

SOC 332. Sociology of Education: The Social Organization of Schools — (For graduate students; see 132; same as EDUC 110/310.) Topics and case studies that elaborate on the embeddedness of classrooms and schools in social environments, spanning school processes such as stratification, authority, moral and technical specialization, curricular differentiation, classroom instruction, voluntary associations, social crowds, and peer influence.
4 units, Win (McFarland, D)

SOC 334. Research Seminar on Access to Justice — (For graduate students; see 234.)
4-5 units, Spr (Sandefur, R)

SOC 337. Workshop on Korean Studies — For graduate students or undergraduates working on honors theses. Comparative and sociological perspectives.
2 units, not given this year

SOC 368. Workshop: Politics and Social Change — Market reform, privatization, regime change, and political movements in rapidly changing societies. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, not given this year
SOC 336. Sociology of Law — Classical perspectives and contemporary developments in the sociological investigation of law and legal systems. Foundational works in the sociology of law, contemporary statements, and topics of interest to participants. Possible topics include: legal services markets; the effects of law on behaviors and attitudes; the workings of concrete components of legal institutions; and complex legal systems. May be repeated for credit.
4-5 units, not given this year

SOC 340. Social Stratification — Classical and contemporary approaches to the unequal distribution of goods, status, and power. Modern analytic models of the effects of social contact, cultural capital, family background, and luck in producing inequality. The role of education in stratification. The causes and consequences of inequality by race and gender. The structure of social classes, status groupings, and prestige hierarchies in various societies. Labor markets and their role in inequality. The implications of inequality for individual lifestyles. The rise of the new class, the underclass, and other emerging forms of stratification. Prerequisite: Ph.D. student or consent of instructor.
4-5 units, not given this year

RACE AND ETHNIC RELATIONS

SOC 342A. Race and Ethnic Relations — Presentations of current work by faculty, students, and guest speakers. Recent publications and contemporary issues. May be repeated for credit. Prerequisite: consent of instructor.
3-5 units, not given this year

SOC 344. Changing Ideologies of Race in the U.S. — Research by historians, social psychologists, political scientists, and sociologists on the content, roots, and social dynamics of racial identities and beliefs.
4-5 units, not given this year

SOC 345. Seminar in Comparative Race and Ethnic Relations — Factors that create, maintain, and diminish the salience of race and ethnic boundaries. Theoretical debates surrounding the emergence, persistence, and change in racial and ethnic boundaries, nationalism and sovereignty, and mobilization. Empirical evidence on race and ethnic tensions, conflict, and warfare. The relationship between democracy, immigration, and diversity.
4-5 units, Win (Olzak, S)

SOC 346. Workshop on Ethnography — Restricted to doctoral students. Student research employing ethnographic methods. May be repeated for credit.
2-5 units, Aut, Win, Spr (McDermott, M)

ORGANIZATIONS, BUSINESS, AND THE ECONOMY

SOC 314. Economic Sociology — Classical and contemporary literature covering the sociological approach to markets and the economy, and comparing it to other disciplines. Topics: consumption, labor, professions, industrial organization, and the varieties of capitalism; historical and comparative perspectives on market and non-market provision of goods and services, and on transitions among economic systems. The relative impact of culture, institutions, norms, social networks, technology, and material conditions. Prerequisite: doctoral student or consent of the instructor.
4-5 units, Aut (Granovetter, M)

SOC 314A. Social Norms and Corruption in the Economy — Social activity aimed at producing and distributing what consumers and businesses demand is governed by self-interest and a sense of what is socially and morally appropriate. The place of social norms in the economy, and their origin, nature, content, enforcement and consequences. Corruption, a pervasive phenomenon usually explained by incentives, but where norms play an important role. Prerequisite: SOC 114, 115, 214, 215, or 314, or consent of instructor.
4-5 units, Win (Granovetter, M)

SOC 318A. Historical Methods — Methodological problems in social science history and their solutions. Discrete methodological themes through key works in historical sociology, economic history, and related fields. Topics include: path dependence, periodization, the nature of historical events and event sequences, narrative explanation and general theory, microhistory, uses of prosopography and network analysis in historical research, spatial and temporal effects, and the idea of the longue durée. 4-5 units, Win (Hillmann, H)

SOC 335. Illegal Organizations and the State — The political economy of illegal organizations and their relationship to the state from contemporary and historical-comparative perspectives. When do state governments enforce the deterrence of illegal behavior? When do states redefine the boundary between legal and illegal behavior? When do they promote such activities to advance their own interests? Topics: state-sponsored terrorism; organized crime such as the Mafia as placeholder for government; violence and coercion in state building; organized corruption; sea piracy and privatizing as instruments in conflicts between states; weapon smuggling; and the production and distribution of narcotics.
4-5 units, not given this year

SOC 361. Social Psychology of Organizations — (Same as OB 671.) Social-psychological theories and research relevant to organizational behavior. Current research topics in micro-organizational behavior and their relationship to cognitive and social psychology and sociology. Topics include models of attribution, social comparison and justice, commitment, stereotyping informal relationships, groups, and leadership. Prerequisites: Ph.D. student, and a graduate-level social psychology course.
4 units, Spr (Staff)

SOC 362. Organization and Environment — (Same as OB 672.) Leading sociological approaches to analyzing relations of organizations and environments emphasizing dynamics. Theoretical formulations, research designs, and results of empirical studies. Prerequisite: Ph.D. student.
4 units, Aut (Staff)

SOC 363. Intersections of Social Psychology of Organizational Studies — (Same as OB 673.) How theories and methods change as levels of analysis change, emphasizing the meso level of analysis. Theory development processes. Topics vary from year to year, but may include: organizational routine; routines; power; emotions in organizations; diversity and demography; organizational identity and legitimacy; culture; contagion and diffusion. Prerequisites: Ph.D. student.
4 units, Aut (Martin, J)

SOC 363A. Seminar on Organizational Theory — (Same as EDUC 375A.) The social science literature on organizations assessed through consideration of the major theoretical traditions and lines of research predominant in the field.
5 units, Aut (Powell, W)

SOC 363B. Seminar on Organizations: Institutional Analysis — (Same as EDUC 375B.) Seminar. Key lines of inquiry on organizational change, emphasizing network, institutional, and evolutionary arguments.
3-5 units, Win (Powell, W)

SOC 366. Organizational Behavior and Analysis — (Same as EDUC 288X.) Principles of organizational behavior and analysis; theories of group and individual behavior; organizational culture; and applications to school organization and design. Case studies.
4 units, Aut (McFarland, D)

4-5 units, Aut (Scott, W)

SOC 369. Network Analysis of Formal and Informal Organizations — (Same as EDUC 316.) The educational applications of social network analysis. Introduction to social network theory, methods, and research applications in sociology. Network concepts of interactionist (balance, cohesion, centrality) and structuralist (structural equivalence, roles, duality) traditions are defined and applied to topics in small groups, social movements, organizations, communities. Applications to data on schools and classrooms.
4-5 units, not given this year
SOC 376. Perspectives on Organization and Environment — (Same as OB 674.) Topics in strategic management using theory and research from organizational sociology. Theoretical approaches including institutional sociology, organizational learning theory, organizational ecology, and theories of social structure and social networks. Competition and cooperation among organizations, organizational innovation and strategic change, and organizational survival and performance.
4 units, Win (Staff)

SOCIOTHERY

SOC 370A. Sociological Theory: Social Structure, Inequality, and Conflict — The traditions of structural analysis derived from the work of Marx, Weber, and related thinkers. Antecedent ideas in foundational works are traced through contemporary theory and research on political conflict, social stratification, formal organization, and the economy.
4-5 units, Win (Olzak, S)

SOC 370B. Social Interaction and Group Process — Analyses of social solidarity and group processes derived from thinkers such as Durkheim, Simmel, and Mead. Antecedent ideas in foundational works traced through contemporary theory and research on small group processes, social networks, group identification, and related subjects.
4-5 units, Spr (Zelditch, M)

SOC 372. Theoretical Analysis and Design — Theoretical analysis and the logical elements of design, including the systematic analysis of the logical structure of arguments, the relationship of arguments to more encompassing theoretical or metatheoretical assumptions, the derivation of logical implications from arguments, assessments of theoretically significant problems or gaps in knowledge.
4-5 units, Aut (Zelditch, M)

RESEARCH METHODS

SOC 374A,B,C. Research Workshop: Philanthropy and Civil Society — (Same as EDUC 374A,B,C.) Seminar. Open to Ph.D. students and undergraduates writing honors theses. Activities and institutions that define civil society, emphasizing the interactions between funding sources and nonprofit organizations. May be repeated for credit.
A: 1-3 units, Aut (Powell, W)
B: 2-3 units, Win (Powell, W)
C: 2-3 units, Spr (Powell, W)

SOC 380. Qualitative Methods — Emphasis is on observational and interview-based research.
4-5 units, Aut (McDermott, M)

SOC 381. Sociological Methodology I: Introduction — Basic math and statistics. Types of variables, how to recode and transform variables, and how to manage different types of data sets. Introduction to statistical packages and programming.
2-3 units, Aut (Aven, B)

SOC 382. Sociological Methodology II: The General Linear Model — The general linear model for discrete and continuous variables. Introduction to model selection, the principles of estimation, assessment of fit, and modeling diagnostics. Prerequisites: 281A,B, or equivalents.
3-6 units, Win (Tuma, N)

4-5 units, Spr (Zhou, X)

SOC 384. New Models and Methods in the Social Sciences — Emphasis is on identifying when new models and methods are appropriately applied. Topics such as network models, multilevel models, new Bayesian approaches, latent class models, mixed methods, new qualitative methods, growth models, geostatistical statistics and tools, survey-based experiments, new methods for estimating causal effects, Internet surveys, advanced discrete choice models, and diffusion models. Prerequisites: 382 and 383, or equivalent.
2-5 units, Sum (Staff)

SOC 385A,B. Research Practicum — Workshop on research methods. Ongoing student research, methodological problems, and possible solutions.
2-5 units, A: Win, B: Spr (Graskey, D)

SOC 387. Frontiers of Quantitative Sociological Research — Advanced topics in quantitative sociological research, especially recently-developed models and methods. Possible topics: robust regression methods, bootstrapping, local likelihood estimation, quantile regression, two-sided logit models, event count models, event sequence models, heterogeneous diffusion models, and models for change in social networks.
3-5 units, not given this year

SOC 388. Log-Linear Models — Analysis of categorical data with log-linear and negative binomial models. Measures of fit and hypothesis testing.
4-5 units, not given this year

SOC 389. Mixed Method Research Design and Analysis — Research designs that incorporate qualitative and quantitative analyses in a single project. The tension between thinking case-wise and variable-wise; how the focus on relationships between variables that is the hallmark of the quantitative approach can be brought into qualitative work.
4-5 units, Spr (England, P)

GRADUATE INDIVIDUAL STUDY

SOC 390. Graduate Individual Study — May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 391. Graduate Directed Research — May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 392. Research Apprenticeship — May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

SOC 393. Teaching Apprenticeship
1-15 units, Aut, Win, Spr, Sum (Staff)

SOC 394. Thesis
1-15 units, Aut, Win, Spr, Sum (Staff)

SOC 395. Research Internship — Graduate students integrate internship work into their academic program. Students register in the quarter following internship work and complete a research report outlining their work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets requirements for Curricular Practical Training for students on F-1 visas. Work completed cannot be counted toward the departmental research assistantship requirement.
1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

COMM 169/269. Computers and Interfaces
4-5 units, Win (Nass, C)

EDUC 197. Education and the Status of Women: Comparative Perspective
4-5 units, Aut (Wotipka, C)

EDUC 378X. Seminar on Social Change Processes and Organizations
3-4 units, Win (Meyerson, D)

FEMST 260/360. Seminar in Women’s Health: Women and Disabilities
5 units, Spr (Krieger, S)

HUMBIO 120. Health Care in America: The Organizations and Institutions that Shape the Health Care System
4 units, Aut (Barr, D)

HUMBIO 120A. American Health Policy
3 units, Spr (Heller, G; Lee, P)
OVERSEAS STUDIES

These courses are approved for the Sociology major and taught at the campus indicated. Course descriptions can be found in the “Overseas Studies” section of this bulletin or in the Overseas Studies Program office, 126 Sweet Hall.

BEIJING

SOC 115S. China’s Red Guard Movement, 1966-68
5 units, Aut (Walder, A)

SOC 118S. Chinese Society in the Post-Mao Era
5 units, Aut (Walder, A)

BERLIN

SOC 158S. Theory from the Bleachers: Reading German Sports and Culture
3 units, Win (Junghanns, W)

FLORENCE

5 units, Aut (Allam, K)

MOSCOW

SOC 108S. Russia’s Peoples and Places
3-5 units, Aut (Tuma, N)

SOC 109S. Social Inequality in Socialist and Post-Socialist Societies
3-5 units, Aut (Tuma, N)

OXFORD

SOC 117W. Social Change in Modern Britain—GER:DB-SocSci, EC-Gender
4 units, Spr (Palmer, A)

PARIS

SOC 115S. Immigration in France—GER:DB-SocSci
4 units, Spr (Maurer, S)

SANTIAGO

SOC 111S. Social Heterogeneity in Latin America—(Same as SPANLIT 164S.) GER:DB-SocSci, EC-Gender
5 units, Aut (Valdés, T)

CENTER FOR SPACE SCIENCE AND ASTROPHYSICS

Director: Robert V. Wagoner

Associate Directors: Umran S. Inan, Roger W. Romani, Philip H. Scherrer

Professors: Roger Blandford (Physics, SLAC), Elliot Bloom (SLAC), W. Gary Ernst (Geological and Environmental Sciences), Lambertus Hesselink (Electrical Engineering), Umran S. Inan (Electrical Engineering), Steven Kahn (Physics, SLAC), Tuan Kame (SLAC), Peter F. Michelson (Physics), Vahe Petrosian (Physics), Roger W. Romani (Physics), Norman H. Sleep (Geophysics), G. Leonard Tyler (Electrical Engineering)

Associate Professors: Tom Abel, Bruce B. Lusignan (Electrical Engineering), Howard Zebker (Electrical Engineering, Geophysics), Sarah Church (Physics)

Assistant Professors: Steve Allen (Physics, SLAC), Guenther Walther (Statistics), Risa Wechler (Physics, SLAC)

Professors (Research): C.-W. Francis Everitt (HEPL), Philip H. Scherrer (Physics)

Consulting Professors: Alan M. Title, Martin Walt (Electrical Engineering)

SLAC Staff Physicist: Grzegorz Madejski

Center Offices: Varian, Room 316
Mail Code: 94305-4060
Phone: (650) 723-1439
Email: danav@stanford.edu
Web Site: http://www.stanford.edu/group/CSSA/

The center is an interdepartmental organization coordinating research in space science and astrophysics. Its members are drawn from the Department of Geological and Environmental Sciences in the School of Earth Sciences; the departments of Aeronautics and Astronautics, Electrical Engineering, and Mechanical Engineering in the School of Engineering; the departments of Applied Physics, Physics, and Statistics in the School of Humanities and Sciences; the W. W. Hansen Experimental Physics Laboratory; and the Stanford Linear Accelerator Center. Its membership also includes all faculty and appropriate staff at the Kavli Institute for Particle Astrophysics and Cosmology, located at SLAC and the Physics department.

Research now in progress covers a wide array of investigations and is approached in a variety of ways, including experiments flown on rockets, satellites, and space probes; ground-based observations made from the Hobby-Eberly Telescope, the Wilcox Solar Observatory, and from national observatories; and theoretical research including computer modeling. Topics currently being studied include cosmology, gamma-ray astronomy, gravitation theory and experiments, including gravitational waves (LIGO, LISA), guidance and control, high-energy astrophysics, ionospheric and magnetospheric physics, microwave and infrared astronomy, planetary sciences, solar physics, solar-terrestrial phenomena, stellar structure, theoretical astrophysics, x-ray and extreme ultraviolet astronomy, and the study of life in the universe. Some of these projects involve opportunities for collaboration with scientists at the Lockheed-Martin Research Laboratory through the Stanford-Lockheed Institute for Space Research, the NASA Ames Research Center, and the SETI Institute.

Stanford is a member of the Universities Space Research Association, a consortium of universities which operates the Lunar Science Institute in Houston, Texas; the University Corporation for Atmospheric Research in Boulder, Colorado; and the San Diego Supercomputing Consortium.

Stanford is the lead institution for the GLAST gamma-ray observatory, Gravity Probe B, and the Solar Oscillations Investigation on the
Solar and Heliospheric Observatory spacecraft (SOHO). Stanford is also a member of the Hobby-Eberly Telescope Consortium which operates a 10-meter telescope at the McDonald Observatory of the University of Texas. Members are also involved in the design of the Large Synoptic Survey Telescope (LSST).

The facilities of the center are available to any interested and qualified student, who must be admitted by and registered in a department. The departments of Aeronautics and Astronautics, Applied Physics, Electrical Engineering, Mechanical Engineering, and Physics offer opportunities leading to an M.S. or Ph.D. degree for work in space science or astrophysics. The center also offers opportunities to undergraduates who may, for instance, participate in research projects in their junior or senior years, on a part-time basis during the school year or on a full-time basis during the summer. The Astronomy Course Program operates a small student observatory where students may gain practical experience in astronomical observing. The course list at the end of this entry includes courses of interest to undergraduates, as well as courses primarily of interest to graduate students.

Further information is available from the director.

SPANISH AND PORTUGUESE

Emeriti: (Professors) Bernard Gicovate, Mary Pratt, Isabel Magaña Schevill, Sylvia Wynter; (Professor, Teaching) María-Paz Haro
Chair: Michael P. Predmore (Autumn)
Professors: J. Gordon Brotherston (Autumn), Michael P. Predmore, Joan Ramón Resina, Jorge Ruffinelli, Guadalupe Valdés, Yvonne Yarbro-Bejarano
Assistant Professor: Lisa Surwillo
Senior Lecturers: Susan Cashion (by courtesy), Irene Corso, Lyris Wiedemann
Courtesy Professors: John Felstiner, Roland Greene, Hans U. Gumbrecht, Ramón Saldívar
Courtesy Associate Professors: James A. Fox, Paula Moya
Visiting Professor: Carlos Rincón
Visiting Associate Professor: Paul A. Schroeder
Spanish Language Program Coordinator: Alice Miano
Portuguese Language Program Coordinator: Lyris Wiedemann
Director of Undergraduate Studies: Lisa Surwillo
Graduate Advisers: Michael Predmore, Jorge Ruffinelli, Yvonne Yarbro-Bejarano
Department Offices: Building 260, Room 214
Mail Code: 94305-2014
Phone: (650) 723-4977
Email: span-port@stanford.edu
Web Site: http://span-port.stanford.edu

Courses given in Spanish and Portuguese have the subject codes SPANLIT and PORTLIT. For courses in Portuguese and Spanish language instruction with the subject codes PORTLANG and SPANLANG, see the “Language Center” section of this bulletin. For a complete list of subject codes, see Appendix.

The department is committed to four main educational purposes: (1) to provide students with expert training in the Spanish and Portuguese languages at all levels and to enable them to develop their skills in these languages according to their goals and interests; (2) to acquaint students with the literatures and cultures of the Spanish and Portuguese speaking world (Iberia, Latin America, the United States) in terms of both contemporary realities and 1,000 years of written and oral tradition; (3) to prepare undergraduates for advanced study in Iberian, Latin American, and Luso-Brazilian languages, literatures, and cultures and/or in language education; and (4) to provide doctoral students with advanced training as research scholars and teachers, in preparation for careers as university teachers or related roles.

The faculty represent a broad range of interests and approaches. In general, the department’s programs are characterized by: (1) a commitment to undergraduate and graduate teaching at the highest intellectual level; (2) a strong interdisciplinary focus that combines the study of literature with that of other forms of cultural expression; (3) a sociohistorical perspective on language, literature, and culture; (4) an effort to maintain a balance among Latin American, Iberian, and U.S. Latino/Chicano fields; and (5) language study tailored to a range of educational intellectual goals and native and non-native experience with the Spanish and Portuguese languages.

The department works with the Center for Latin American Studies, Comparative Studies in Race and Ethnicity, El Centro Chicano, the Overseas Studies program in Santiago, Chile, and overseas programs in Spain. It makes extensive use of the resources of the language laboratory and the Language Center. The University library maintains world class collections in Latin American and Iberian Studies and one of the largest research archives in the country in Chicano history and literature. The Hoover Library is a valuable resource for research topics in Spanish and Latin American intellectual history; it holds one of the largest and most important collections of Spanish Civil War materials in the world. Department faculty teach in the School of Education, Comparative Literature, Comparative Studies in Race and Ethnicity, Drama, Feminist Studies, Film Studies, Introduction to the Humanities Program, and Modern Thought and Literature. The department houses a Brazilian writer-in-residence program developed in cooperation with the Brazilian Ministry of Culture, and hosts visiting faculty from Spain and Latin America on a regular basis.

UNDERGRADUATE PROGRAMS:

BACHELOR OF ARTS

The major in Spanish is designed to enable students to develop a concentration in a particular area of interest, accompanied by basic work in two secondary areas. Students are normally expected to declare the major during the sophomore year, but it is possible to declare during the junior year as well, particularly after overseas study in Santiago, Chile, or in Spain.

The major in Spanish requires 50 units in addition to completion of one of the second-year language sequences, or equivalent:

SPANLANG 21B, 22B, 23B, Second-Year Spanish for Heritage Language, or a combination of the above second-year language courses.

Course work for the major is grouped under the following subject areas; students are required to take four courses in one of these areas, two courses in a second, and one in a third.

1. Latin American/Caribbean Studies (including Brazil)—This field includes the study of oral and textual aesthetic production of indigenous peoples and the intellectual and literary productions of the periods that followed the conquest: colonial, and 18th, 19th, and 20th centuries in the Hispanic and Portuguese countries that formed the Latin American continent. Students can choose areas of expertise, but they are also encouraged to take panoramic courses covering literary themes across the centuries and countries. The concentration on literature is predominant, but cinema is also an important cultural tool to understand how Latin Americans see themselves. SPANLIT 160 and 161 are required for students who choose this subject area as their primary emphasis within the major.

2. Iberian Studies (including Portugal)—This field is designed for students who want to acquire a command of the major languages and literatures of the Iberian Peninsula, Spanish, Portuguese, and Catalan, against the background of 1,000 years of literary and cultural history. Emphasis is on the study of language, literature, and film. Students are encouraged to take core introductory courses, special topics courses within the department, and related literary traditions in the Romance languages and other fields such as History and Art. SPANLIT 133 and 136 are required for students who choose this subject area as their primary emphasis within the major.

3. U.S. Latino/Chicano Studies—This field offers students the opportunity to study the cultural productions of Mexican and Latin American peoples living in the United States. Emphasis is on language, literature,
MINOR IN SPANISH

Requirements — 30 units of course work at the level of SPANLANG 11 or above, or in Portuguese at any level. Students must take at least three courses in one of the following subject areas; eligible courses change annually:

1. Latin American and Iberian studies: SPANLIT courses numbered 103-199; and SPANLIT courses numbered 213-279
2. U.S. Latino/Chicano studies: SPANLANG 21B, 22B, 23B; SPANLIT courses numbered 280-290
3. Advanced language: any combination of second-year Spanish and/or first- and second-year Portuguese, plus a selection of 100- and 200-level language courses; recommended: SPANLIT 207

MINOR IN PORTUGUESE

Requirements — 30 units of course work in Portuguese at any level, and in courses related to Portugal, Brazil, or other Lusophone cultures either within or outside the department. Courses not listed below must be approved by the Director of Undergraduate Studies to count toward the minor. Students must take at least two courses at the 100 level or higher related to Brazil or Portugal, choosing from one or more of the following subject areas:

1. Luso-Brazilian language, literature, and culture; suggested courses: PORTLANG 101, 102; PORTLIT 193Q; HISTORY 276
2. Latin American/Caribbean studies courses that include Lusophone components; suggested courses: SPANLIT 167, 240; CSRE 192
3. Iberian studies courses that include Lusophone components; suggested courses: SPANLIT 136, 218
4. U.S. Latino/Chicano studies that include Luso-Brazilian immigration groups, as available
5. Language in the Portuguese speaking world: any Portuguese language courses

Consult with the Coordinator of the Portuguese Language Program, Lyris Wiedemann, or the Director of Undergraduate Studies for more information on recommended courses. Minors must be approved by the Director of Undergraduate Studies. To apply for either of these minors or for more information, see undergraduate student services in the Division of Literatures, Cultures, and Languages.

MINOR IN LITERATURE

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of Spanish and Portuguese and the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of Spanish and Portuguese and the Language Center. Students should consult the “Division of Literatures, Cultures, and Languages” section of this bulletin for further details about the minor and its requirements.

HONORS PROGRAM

Spanish and Portuguese majors with a grade point average (GPA) of 3.3 (B+) or better in major courses may apply to the honors program in Spring Quarter of the junior year. Students should submit an application for the honors program and a proposal outline and may enroll for 2 units of credit in SPANLIT 199, Honors Thesis Seminar, for the drafting or revision of the thesis proposal and preliminary research. Honors students are encouraged to participate in the honors college coordinated by the Division of Literatures, Cultures, and Languages and offered at the end of the summer before the senior year. In Autumn Quarter of the senior year, students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in SPANLIT 199 while composing the thesis during Winter Quarter. Each honors student must write an honors essay of 20-25 pages under the direction of a faculty member who serves as adviser, and the completed thesis must be submitted by the end of Winter Quarter. A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis. Consult the undergraduate adviser for additional information on the honors program.
OVERSEAS STUDIES

All majors are strongly encouraged to study abroad. To transfer credits from non-Stanford programs abroad, consult the Office of the Registrar. Depending on course selections, up to 25 units of course work taken abroad may be applied toward the major and 15 units toward the minor in Spanish. Students planning study abroad, or returning from study programs, are encouraged to consult with the majors and minors coordinator or an undergraduate adviser to coordinate the course work from abroad with their degree program.

Both the department and Bechtel International Center maintain information on study abroad programs. Stanford sponsors the following options.

STANFORD IN SANTIAGO, CHILE

The Stanford Program in Santiago, Chile, requires one year of college Spanish to begin study in Autumn Quarter, one year plus one quarter to begin in Winter Quarter, and completion of two years to begin in Spring Quarter. Course work in Santiago is done entirely in Spanish, with the opportunity to attend classes at Chilean universities during Spring Quarter. Detailed information, including curricular offerings, is listed in the “Overseas Studies” section of this bulletin, or on the Bing Overseas Studies Program web site at http://osp.stanford.edu. Internships and research opportunities may be arranged for two quarter students.

BRAZIL AND PORTUGAL

The University maintains a relationship with the Universidade Estatal do Rio de Janeiro in Brazil at the graduate level. Students interested in study in Brazil or Portugal should contact Lyris Wiedemann.

SPAIN

The Department of Spanish and Portuguese recommends study in Spain with the Hamilton College Academic Year in Spain program, administered by the Department of Romance Languages of Hamilton College in cooperation with faculty members of Williams and Swarthmore colleges. It has its own facilities located on the outskirts of the University of Madrid campus. Two distinguishing features of this program are: (1) Spanish must be spoken at all times, both in and outside of class; all students are required to sign a pledge to this effect before their arrival in Madrid; (2) the arrangement of independent study projects in lieu of regular courses.

Another program recommended by the department is the Madrid campus of St. Louis University. This program has many of the features of the Hamilton College program. It has its own facilities located on the outskirts of the University of Madrid campus. This is the only U.S. overseas studies program in Spain that has received full accreditation by the Spanish authorities.

A third program recommended by the department is the Center for Cross-Cultural Studies, located in two privately-owned buildings close to the University of Seville where its students are encouraged to take classes. This program offers courses, internships, and a program of language exchange with student native speakers.

Students interested in study in Spain should consult Professor Predmore.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the “School of Education” section of this bulletin and the credentials administrator, School of Education.

COTERMINAL B.A. AND M.A.

The requirements for the coterminal B.A. are the same as those outlined below for the M.A. No course can count for both the B.A. and M.A. degrees. Contact Graduate Admissions at the Registrar’s Office for information.

For University coterminal degree program rules and application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

STEP COTERMINAL TEACHING PROGRAM

The Department of Spanish and Portuguese, in cooperation with the Stanford Teacher Education Program (STEP) of the School of Education, offers a special course of study for students interested in becoming teachers. By following this course of study in Spanish Language, Literatures, and Cultures and enrolling in the STEP Coterminal Teaching Program, students can, after 5 years, receive a B.A. in Spanish and Portuguese, an M.A. in Education, and a California Teaching Credential.

The Spanish Language, Literatures, and Cultures curriculum consists of approximately 50 quarter units in addition to demonstrated proficiency in the language, defined as listening, speaking, reading, and writing at a level equivalent to advanced on the ACTFL Oral Proficiency Interview. This course of study fulfills all the major requirements of the Department of Spanish and Portuguese and includes coursework in linguistics and language diversity studies, the history of the Spanish-speaking world, and Spanish literature and cultures.

Students enrolled in the STEP Coterminal Teaching Program are also expected to complete a series of core courses during their undergraduate years. These include one course in developmental psychology; one course in cognitive psychology; one course in the social foundations of education; one course on the role of race, class, and ethnicity in American society; a structured internship experience in a community-based organization serving youth and/or their families; and a teaching practicum offered by the School of Education.

For more information about this option, please consult Professor Valdés or the coordinator of the STEP Coterminal Teaching Program in CERAS 309; (650) 725-6321 or (650) 725-0652.

GRADUATE PROGRAMS

University requirements for the M.A. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

MASTER OF ARTS IN SPANISH AND PORTUGUESE

This terminal M.A. degree program is for students who do not intend to continue their studies through the Ph.D. degree. Students in this program may not apply concurrently for entrance to the Ph.D. program. Students must complete a minimum of 45 graduate-level units, 36 of which must have a grade point average (GPA) of 3.0 or above.

The requirements for the M.A. are:

1. One linguistics course (LINGUIST 203, 204, 205, 206, 207), one course in language pedagogy, and one course in literary or cultural theory
2. Two 200-or-above courses in Latin American or Latino/Chicano literature and culture
3. Two 200-or-above courses in Peninsular literature or Luso-Brazilian literature
4. Reading knowledge of one foreign language other than Spanish (preferably Portuguese for students concentrating in Spanish)
5. Independent study courses (SPANLIT 299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by permission of one of the graduate advisers, Yvonne Yarbro-Bejarano, Michael Predmore, or Jorge Ruffinelli.

In addition, students may take approved courses in related fields such as classics, comparative literature, education, history of art, linguistics, modern thought, and philosophy.

DOCTOR OF PHILOSOPHY

The requirements of the Ph.D. are:

1. 135 units of graduate-level coursework with a grade point average (GPA) of 3.0 (B) or above. Units completed toward the M.A. degree can be counted for the Ph.D.
2. One course in Spanish linguistics, one course on methods of teaching Spanish, and one course on introduction to literary theory
3. A reading knowledge of Portuguese and one other foreign language
4. The qualifying paper, the comprehensive examination, and the University oral examination, as described below
5. Teaching of three to five courses in the department
6. Completion of a dissertation

Independent study courses (299, 399) and crosslisted courses originating outside the department may not be used to fulfill requirements except by consent of the graduate adviser. For basic residency and candidacy requirements, see the “Graduate Degrees” section of this bulletin. For further information, consult the department’s Graduate Student Handbook.
PH.D. MINOR

For a minor in Spanish or Portuguese, the student must complete 25 units, with a grade point average (GPA) of 3.0 or above, selected from courses numbered 200 or higher.

Students who choose a minor in another department should consult with advisers in that department.

JOINT PH.D. PROGRAMS

The Department of Spanish and Portuguese participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Spanish and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, and Slavic Languages and Literatures, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

OVERVIEW

1. Stanford Introductory Seminars, freshman and sophomore preference
2. Literature, Culture, Linguistics, and Theory (120-399)
   a) Undergraduate Courses (130-199)
   b) Courses for Advanced Undergraduates and Graduates (200-299)
      Language, Linguistics, and Theory (200-212)
      Peninsular Literature (213-239)
      Latin American Literature (240-279)
      Latino/Chicano Literature (280-289)
      Individual Work (299)
3. Graduate Seminars (300-399)
   a) Linguistics, Methodology, and Literary Theory (300-313)
   b) Latin American Literature (340-369)
   c) Luso-Brazilian Literature (370-379)
   d) Chicano Literature (380-389)
   e) Individual Work (399)
   f) Dissertation Research (802)

Courses bearing the suffix “E” are taught in English and do not assume competence in another language. All other courses require some knowledge of Spanish or Portuguese, and may be given in those languages bilingually.

SPANISH AND PORTUGUESE LANGUAGE COURSES

The following courses in Spanish and Portuguese language instruction represent a typical sequence for three years of Spanish and Portuguese language study. Majors and prospective majors should consult the requirements for a B.A. in Spanish or Portuguese above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at the Yost House, see the “Language Center” section of this bulletin.

SPANLANG 1, 2, 3. First-Year Spanish

5 units, Aut, Win, Spr (Alexander, A; Nissler, P; Staff)

SPANLANG 11C, 12C, 13C. Second-Year Spanish: Cultural Emphasis

4-5 units, Aut, Win, Spr (Guzman, C; Kenna, C; Perales, O; Urruela, M; Won, H; Zaragoza, A; Staff)

SPANLANG 100. Advanced Oral Communication

3 units, Aut, Win, Spr (Rondinel, S)

SPANLANG 101. The Structure of Spanish

3-5 units, Aut (Sierra, A)

SPANLANG 102. Composition and Writing Workshop — WIM

3-5 units, Win (Kenna, C)
PORTLANG 1,2,3, First-Year Portuguese
5 units, 1: Aut (McIntyre, S) 2: Win, (Delgado, A) 3: Spr (Staff)

PORTLANG 11A,12A, Accelerated Second-Year Portuguese
11A: 3-5 units, Aut (McIntyre, S), Win, Spr (Delgado, A)
12A: 3-5 units, Aut (Wiedemann, L), Win, Spr (Delgado, A)

STANFORD INTRODUCTORY SEMINARS
3-5 units, Win (Raffinelli, J)

3-5 units, Win (Predmore, M)

SPANLIT 115N, Growing up Bilingual — Stanford Introductory Seminar. Preference to freshmen. How do people become bilingual? When and how do people use two languages in their everyday lives? What kinds of bilinguals are there? Intended for students who have grown up in bilingual communities or households, or who have studied Spanish formally for three or more years at the secondary level. Field project involving students studying in nearby Latin community.
3-5 units, Win (Valdés, G)

SPANLIT 116N, New World Creation Narratives — Stanford Introductory Seminar. Indigenous narratives from Middle America, Amazonia, and the Andes recount how the world began while detailing their own environments and realities. Readings in translation include Legends of the Suns, Popol Vuh, Watunna, Finding the Center, and The Huarochari Manuscript. What they say provides insight into the cultural foundations of Latin America. GER:DB-Hum
3-4 units, Aut (Brotherston, J)

SPANLIT 178N. From Inside the First World: Women of Color Playwrights Re-mapping the U.S. — (Same as DRAMA 17N.) Stanford Introductory Seminar. Preference to freshmen. From the 60s to the present. Playwrights who create an aesthetic and political space outside the geopolitics of white capitalist patriarchy through social issues including the legacy of slavery and forced immigration, dislocation and relocation, diasporic ties, indigenous inheritance, sexuality, self-censorship, and the war on terror. Students create and perform in public short dramatic pieces informed by the playwrights’ style and subject matter. GER:DB-Hum, EC-AmerCul
3 units, Win (Moraga, C)

PORTLIT 193Q, Spaces and Voices of Brazil through Films — Stanford Introductory Seminar. Preference to sophomores. Brazilian culture through films that portray its five cultural-geographical regions. Focus is on movies and complementary texts on Brazilian culture to understand the forces that shaped the multicultural reality of modern Brazil.
3-4 units, Aut (Wiedemann, L)

LITERATURE, CULTURE, LINGUISTICS, AND THEORY

UNDERGRADUATE
SPANLIT 121, Chicana/o Nations and Cultural Productions — The idea of Aztlán, the mythical place of origin of the Aztec peoples, as paradigm for a Chicana/o nation. Representations of the idea of the nation in literature and film. How writers and filmmakers transform, redefine, or criticize constructions of the Chicana/o nation and U.S. national culture.
3-5 units, Win (Minich, J)

SPANLIT 122, Muslims, Barbarians, and Sexual Deviants: The Self and the Other in Cervantes’ Writings — Cervantes’ Spain as a vast empire with ethnic diversity and cultural creativity. His characters, including transvestites, queers, heretics, war foes, and immigrants. Readings from Don Quixote, Persiles, the Exemplary Novels, theater, and poetry. Comparisons with present-day texts.
3-5 units, Win (Builes, R)

SPANLIT 123, The Struggle for Modernity — Processes of national construction in literature, essays, and paintings of the 19th- and 20th-century democratic tradition of Spanish liberalism. The relationship between modernization and literary practices, art as a means of social intervention, the possibility of capturing in a literary text the interests of the different historical protagonists, the relationship between femininity and modernity, and the emergence of new historical subjects acting as protagonists and authors of works of art.
3-5 units, Spr (Sanjuan-Pastor, M)

3-5 units, Aut (Kenna, C)

SPANLIT 136, Introduction to Modern Peninsular Spanish Literature — Representative works of Spanish literature from 1800-1936, including Moratin, Larra, Esproncede, Bécquer, Galdós, Machado, and García Lorca. Franco’s notion that Spain is different as a point of departure to examine definitions and redefinitions of Spain and Spaniards. In Spanish. GER:DB-Hum
3-5 units, Win (Surwillo, L)

SPANLIT 140, Introduction to Methods of Literary and Cultural Analysis — Focus is on the question of the limits of the literary through textual analysis of dramatic and nonfiction works. Sources include canonical Latin American and peninsular Spanish pieces from 1500 to the present, and culturally significant texts such as the Edict of Expulsion, Civil War materials, and current newspaper essays. In Spanish.
3-5 units, Aut (Surwillo, L)

SPANLIT 160, Survey of Latin American Literature from Pre-Columbian Times to Independence. — Pre-conquest literatures in translation; Spanish chronicles of discovery, voyages, and conquest; the legal, historical, and cultural status of indigenous and African populations; literature of the Baroque; and the literature of creole emancipation. Authors include Netzahualcóyotl, Cristóbal Colón, Bernal Díaz del Castillo, Bartolomé de las Casas, Guamán Poma, Sor Juana Inés de la Cruz, and Simón Bolívar.
3-5 units, Aut (Brotherston, J)

SPANLIT 161, Survey of Latin American Literature after Independence. — Topics include romantic allegories of the nation; modernism and postmodernism; avant garde poetry; regionalism; indigenist literature; magical realism and the literature of the boom; and testimonial narrative. Authors include Andrés Bello, Rubén Darío, Gabriela Mistral, Pablo Neruda, Dulce María Loynaz, Vicente Huidobro, César Vallejo, Nicolás Guillén, Horacio Quiroga, Jorge Luis Borges, José María Arguedas, Gabriel García Márquez, Julio Cortázar, Octavio Paz, Rosario Castellanos, Nancy Morejón, and Rigoberta Menchú. GER:DB-Hum
3-5 units, Win (Schroeder, P)

SPANLIT 167, Latin American Short Stories, 20th Century — (Graduate students register for 267.) A theory of the short story. Authors include Machado de Assis, Jorge Luis Borges, Clarice Lispector, João Guimarães Rosa, and Julio Cortázar.
3-5 units, Win (Hatoum, M)
SPANLIT 180E. Introduction to Chicana/o Studies — (Same as CHICANST 180E, CSRE 180E.) Historical and contemporary experiences that have defined the status of Mexican-origin people living in the U.S. Topics include the U.S./Mexico border and the borderlands; immigration and anti-immigration sentiment; literary and cultural traditions; music; labor; historical perspectives on Mexicans in the U.S. and the Chicanx movement; urban realities; gender relations; political and economic changes; and inter- and intra-group interactions. Sources include social science and humanities scholarship.

5 units, Spr (Yarbro-Bejarano, Y; Palafox, J)

SPANLIT 193. The Cinema of Pedro Almodóvar — One of the most recognizable current auteur directors in Europe: his hybrid and eclectic visual style, blurring of frontiers between mass and high culture, attention to questions of sexuality, and centering of usually marginalized characters. Films from his early work to award-winning recent periods. Prerequisite: ability to understand spoken Spanish.

3-5 units, Spr (Yarbro-Bejarano, Y)

SPANLIT 199. Individual Work — Open only to students in the department, or by consent of instructor.

1-12 units, Aut, Win, Spr, Sun (Staff)

ADVANCED UNDERGRADUATES AND GRADUATE STUDENTS

LANGUAGE, LINGUISTICS, AND THEORY

SPANLIT 205. Spanish Dialectology — Focus is on the major varieties of Spanish as they are spoken in Spain and in the Americas. Introduction to dialect geography and to the study of social and regional variation from a sociolinguistic perspective.

3-5 units, Spr (Valdés, G)

SPANLIT 207. Theory and Issues in the Study of Bilingualism — (Same as EDUC 149/249.) Sociolinguistic perspective. Emphasis is on typologies of bilingualism, the acquisition of bilingual ability, description and measurement, and the nature of societal bilingualism. Prepares students to work with bilingual students and their families and to carry out research in bilingual settings. (SSPEP)

3-5 units, Aut (Valdés, G)

PENINSULAR LITERATURE

3-5 units, Win (Resina, J)

SPANLIT 215. The Novel in the Franco Era — The reassessment of the novel in Spain in the 50s and 60s despite the exile of prestigious writers in 1939 and the dismal quality of works published in the 40s. The recuperation of this genre and formation of an audience. Authors include Camilo José Cela, Ana María Matute, J. Amat-Piniella, Rafael Sánchez Ferlosio, Llorenc Villalonga, Luis Martín Santos, Juan Benet, Maria Aurèlia Capmany, and Juan Goytisolo.

3-5 units, Win (Resina, J)

SPANLIT 218. Spanish Realism: Priests, Prose, and Anticlericalism — The rapid social and cultural changes in which 19th-century novelists wrote: the anti-clerical stance as marker of society’s attempts to modernize. Why were monks and priests reviled by many Spanish novelists? How and why did they re-write Spanish history around these figures? What was the role of the church and religious men in modern society? Questions of individualism, property, and labor in novels by major Iberian prose realists. In Spanish.

3-5 units, Spr (Surwillo, L)

SPANLIT 222. The Problem of Two Spains: Literature and Society in 19th-Century Spain — Representative literary figures including Larra, Espronceda, Zorrilla, Rosalía de Castro, Béquer, and Galdós. Modern lyric poetry and the modern realist novel against the background of Napoleonic invasions, the loss of overseas colonies, two Carlist civil wars, and frustrated attempts to establish the First Spanish Republic.

3-5 units, Aut (Predmore, M)

3-5 units, Win (Predmore, M)

SPANLIT 225E. Theater, Society, and Politics in 20th-Century Spain — Ramón del Valle-Inclán and Federico García Lorca. The avant garde nature of their major plays and their engagement with social and political issues of the times including feudalism, the emerging liberal state, women’s protest, class struggle, and civil war. Symbolism, expressionism, and realism.

3-5 units, Spr (Predmore, M)

SPANLIT 278. Senior Seminar: Contemporary Spanish Women Writers — The speed of change and vitality of contemporary Spain illustrated by literary women. Works by prominent women narrators of Franco’s era such as Matute and Martín Gaite. Novels by new generations of women writers such as Tusquets, Montero, Mayoral, Ortiz, and Etchebarria, who are transforming their experiences, values, and ideologies into literature about relationships among gender, creativity, and social mores. Feminist consciousness, how it has developed, and how it is changing to face challenges. WIM

3-5 units, Win (Haro, P)

LATIN AMERICAN LITERATURE

SPANLIT 240. Brazilian and Spanish American Novellas — (Graduate students register for 340.) The novella as literary genre in contemporary Latin American fiction. Texts by Clarice Lispector, Mario Vargas Llosa, and Adolfo Bioy Casares.

3-5 units, Spr (Hatooum, M)

SPANLIT 255. Magical Realism: Gabriel García Márquez — A complex and confusing term in criticism and literary history: magical realism. Novels, short stories, and film adaptations of Gabriel García Márquez. Topics include the fantastic, real maravilloso, fiction versus reality, and documentary.

3-5 units, Win (Ruffinelli, J)

SPANLIT 257. Chilean Novels and Chronicles: Roberto Bolaño and Pedro Lemebel — (Graduate students register for 358.) Bolaño and Lemebel represent alternative trends in the Chilean narrative of resistance: the exile and gay literature, introducing humor, irony, politics, and bombarding the establishment while simultaneously renewing it.

3-5 units, Spr (Ruffinelli, J)

SPANLIT 267. Latin American Short Stories, 20th Century — (Same as 167; see 167.)

3-5 units, Win (Hatooum, M)

SPANLIT 270. Poetry and Politics in Latin America — Aesthetic and political expression in Latin America during the 20th century. The exclusion of political poetry from the canon, and the need to include it. Poets include Vallejo, Neruda, Cardenal, Gelman, and Vilarino.

3-5 units, Spr (Ruffinelli, J)
SPANLIT 273. Literary and Cultural Criticism in Latin America — A panoramic vision for observers who observe while being observed. Debates about critical and conceptual production from 20th-century Latin America. Writers include: founders of modern criticism such as Pedro Henríquez Ureña, Alfonso Reyes, José Carlos Mariátegui, and Jorge Luis Borges; protagonists of the change of paradigms such as Angel Rama, Antonio Cornejo Polar, Antonio Candido, and Carlos Fuentes; and those who transformed literary into cultural criticism such as Néstor García Canclini, Jesús Martín Barbero, Beatriz Sarlo, and Carlos Monsiváis.
3-5 units, Aut (Rincón, C)

SPANLIT 275. Cuban Cinema after the Revolution — Chronology and analysis of film trends in Cuba since the 1959 Revolution. How the aesthetic and ideological dimensions coincide with or contradict the official cultural policies of the state. Directors include Tomás Gutiérrez Alea, Humberto Solís, Sara Gómez, Julio García Espinosa, Santiago Álvarez, Fernando Pérez, Pastor Vega, and Juan Carlos Tabío.
3-5 units, Aut (Schroeder, P)

SPANLIT 281. Flor y Canto: Poetry Workshop — (Same as DRAMA 179F) Poetry reading and writing. The poet as philosopher and the poet as revolutionary. Texts: the philosophical meditations of pre-Columbian Aztec poetry known as flor y canto, and reflections on the poetry of resistance born out of the nationalist and feminist struggles of Latin America and Aztlán. Required 20-page poetry manuscript. GER:DB-Hum
3-5 units, Spr (Moraga, C)

LATINO/CHICANO LITERATURE
SPANLIT 287. Teatro Americano Workshop: The Theater of Native/Chicano America — (Same as DRAMA 179A) A Chicana feminist and indigenist approach to the theory and practice of performance. Introduction to writing for the stage. Readings include plays, stories, and performance texts by Chicana/o and Native American writers. Public performance. Prerequisite: consent of instructor. GER:DB-Hum
5 units, Spr (Díaz-Sanchez, M)

SPANLIT 289. The Body in Chicana/o Cultural Representations — What cultural representations show about how the body is socially situated, constructed, and interpreted through race, gender, sex, class, and ability. Social meanings of the body as depicted in Chicana/o literature, film, and visual art. The body as: location of knowledge and resistance; target of cultural production, constructed, and interpreted through race, gender, sex, and politics. Sources include critical texts and resources by Chicanx artists and activists such as Pedro Lemebel, Humberto Solís, Sara Gómez, Julio García Espinosa, Santiago Álvarez, Fernando Pérez, Pastor Vega, and Juan Carlos Tabío.
5 units, Win (Yarbro-Bejarano, Y)

INDIVIDUAL WORK
PORTLIT 299. Individual Work — Open to department undergraduates or graduate students by consent of professor. May be repeated for credit.
1-12 units, Aut, Win, Spr, Sum (Staff)

SPANLIT 299. Individual Work — Open to department advanced undergraduates or graduate students by consent of professor. May be repeated for credit.
1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE SEMINARS
Open to undergraduates with consent of instructor.

LINGUISTICS, METHODOLOGY, AND LITERARY THEORY
SPANLIT 300. Issues and Methods in the Teaching of Spanish Languages — (Same as APPLLING 203) Teaching Spanish to students raised in Spanish-speaking homes. Issues include language variation in the Spanish-speaking world, English/Spanish bilingualism in the U.S., and second dialect acquisition. Techniques for teaching in Spanish include strategies for heritage students.
3-5 units, not given this year

PENINSULAR LITERATURE
SPANLIT 320. Spanish Romantic Theater: Romanticism in Canonical and Popular Plays from 1800-1850 — Theater as the space where Spaniards witnessed and represented the cultural, political, and social transformations of the period. Theories of Spanish romanticism. Research, book reviews and the pedagogical challenges of teaching theater to undergraduates. Sources include romantic plays from the first half of the 19th century, including canonical works, translations, and popular pieces that have not received recent critical attention.
3-5 units, Win (Surwillo, L)

SPANLIT 321. Novel of Memory — The relationship between narrative and historical and collective memory; how people and societies imagine themselves in time. How Spaniards since Franco have demanded the recuperation of their historical memory, implying an official sequestration of the past. Memory as a recurrent theme in Spanish literature since the 1950s. Sources include theoretical texts by Halbwachs, Nora, and Ricoeur, and novels by Rodoreda, Vázquez Montalbán, Marsé, Marías, Chacón, and Moncada.
3-5 units, Aut (Resina, J)

SPANLIT 324. Modern Catalan Literature — The modern resurgence of Catalan and cultural production centered in Barcelona. Writers from the 20th-century canon, including Maragall, d’Ors, Pla, Sagrarra, Rodoreda, Espriu, and Benet i Jornet. In Spanish.
3-5 units, Spr (Resina, J)

LATIN AMERICAN LITERATURE
SPANLIT 340. Brazilian and Spanish American Novellas — (Same as 240; see 240.)
3-5 units, Spr (Hatoum, M)

SPANLIT 347. Spanish Colonial Writing and Native Sources — Spanish version of conquest in America as a pillar of Europe’s master narrative, yet challenged by indigenous history and philosophy. The consequent tensions between native sources and works by Motolinía, Gómara, and Sahagún in New Spain, and Ávila, Murúa, and Garcilaso in Peru. In Spanish.
3-5 units, Aut (Brotherston, J)

SPANLIT 348. The Major Works of Gabriel García Márquez — The international genealogies found in his work, and his development as journalist and novel writer. Focus is on his interventions in the traditional economy of realism, national allegory, detective story, historical novel, and romance, as the remaking of literary history, including postcolonial and postmodernist fiction. Sources include his glosses and comments in El Universal in Cartagena, the column La Jirafa in El Heraldo in Barranquilla, Vivir para contarla, and Memoria de mis putas tristes.
3-5 units, Aut (Rincón, C)

SPANLIT 358. Chilean Novels and Chronicles: Roberto Bolaño and Pedro Lemebel — (Same as 257; see 257.)
3-5 units, Spr (Ruffinelli, J)

CHICANO LITERATURE
SPANLIT 389E. Race and Sex in Cultural Representations — The intersections of race, gender, sex, and politics. Sources include critical texts and cultural representations. Emphasis is on young, queer cultural workers of color. How is desire racialized? How is racial difference produced through sex and what is the function of sex in racial formation? How are pleasure and desire reconciled with power structures? How do texts reinforce or contest stereotypes and the ideal bodies of national identity? Is it desirable to envision a bridging of queer communities of color? In English.
3-5 units, Win (Yarbro-Bejarano, Y)
INDIVIDUAL WORK

PORTLIT 399. Individual Work — For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

SPANLIT 399. Individual Work — For Spanish and Portuguese department graduate students only. Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

CHICANST 121C. Chicana/o Film Practices — (Same as CSRE 121C.)
5 units, Aut (Campos, D)

CHICANST 165G. American Dreams: Mexican Americans, Immigration since 1964, and the Middle Class — (Same as CSRE 165G.)
5 units, Win (Valdés, T)

CHICANST 181S. U.S.-Mexico Borderlands in Comparative Perspective — (Same as CSRE 181S.)
5 units, Spr (Palafox, J)

DANCE 42. Dances of Latin America
2 units, Spr (Cashion, S)

DANCE 43. Afro-Peruvian Dance
1 unit, Aut (Staff)

DLCL 377. Topics in Literature and Culture
3-4 units, Aut (Bohrer, K)

DRAMA 177/277. Playwriting
5 units, Win (Moraga, C)

DRAMA 178/278. Intensive Playwriting
5 units, Spr (Moraga, C)

FRENGEN 259. Self-Reflexivity Historicized, or the Emergence of the Second-Order Observer — (Same as COMPLIT 259.)
3-5 units, Win (Gumbrecht, H)

OVERSEAS STUDIES

Courses approved for the Spanish and Portuguese majors and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

SANTIAGO

SPANLIT 164S. Social Heterogeneity in Latin America — (Same as SOC 111S.) GER:DB-SocSci
5 units, Aut (Valdés, T)

SPANLIT 166S. Artistic Expression in Latin America — (Same as LATINAM 118X.)
5 units, Win (Albornoz, C)

SPANLIT 290Z. Modernization and Culture in Latin America — (Same as ANTHSCI 104X.)
5 units, Aut (Subercaseaux, B)

STATISTICS

Emeriti: Theodore W. Anderson, Albert Bowker, M. Vernon Johns, Lincoln E. Moses, Ingram Olkin, Charles Stein

Chair: Trevor J. Hastie

Associate Professor: Guenther Walther

Assistant Professors: Andrea Montanari, Jonathan Taylor

Professor (Teaching): Susan Holmes

Conference Professor: Richard A. Olshen

Conference Associate Professors: Simon Jackman, David Rogosa

Consulting Professor: Charles Chui

Mail Code: 94305-4065

Phone: (650) 723-2620

Web Site: http://www-stat.stanford.edu

Courses given in Statistics have the subject code STATS. For a complete list of subject codes, see Appendix.

The department’s goals are to acquaint students with the role played in science and technology by probabilistic and statistical ideas and methods, to provide instruction in the theory and application of techniques that have been found to be commonly useful, and to train research workers in probability and statistics. There are courses for general students as well as those who plan careers in statistics in business, government, industry, and teaching.

The requirements for a degree in Statistics are flexible, depending on the needs and interests of the students. Some students may be interested in the theory of statistics and/or probability, whereas other students may wish to apply statistical and probabilistic methods to a substantive area. The department has long recognized the relation of statistical theory to applications. It has fostered this by encouraging a liaison with other departments in the form of joint and courtesy faculty appointments: Economics (Anderson), Education (Olkin, Rogosa), Electrical Engineering (Cover), Geological and Environmental Sciences (Switzer), Health Research and Policy (Efron, Hastie, Johnstone, Moses, Olshen, Tibshirani, Wong), Mathematics (Dembo, Diaconis), Political Science (Jackman), and the Stanford Linear Accelerator (Friedman). The research activities of the department reflect an interest in both applied and theoretical statistics, and probability. There are workshops in biology-medicine and in environmental factors in health.

In addition to courses for Statistics majors, the department offers a number of service courses designed for students in other departments. These tend to emphasize the application of statistical techniques rather than their theoretical development.

The Department of Statistics is well equipped for statistical applications and research in computational statistics. Computer facilities include several networked Unix servers and a PC lab for general research and teaching use. The Mathematical Sciences Library serves the department jointly with the departments of Mathematics and Computer Science.

The department has always drawn visitors from other countries and universities. As a consequence, there is usually a wide range of seminars offered by both the visitors and our own faculty.

UNDERGRADUATE PROGRAMS

MAJOR

Students wishing to build a concentration in probability and statistics are encouraged to consider declaring a major in Mathematical and Computational Science. This interdisciplinary program is administered in the Department of Statistics and provides core training in computing, mathematics, operations research, and statistics, with opportunities for further elective work and specialization. See the “Mathematical and Computational Science” section of this bulletin.
MINORS
The undergraduate minor in Statistics is designed to complement major degree programs primarily in the social and natural sciences. Students with an undergraduate Statistics minor should find broadened possibilities for employment. The Statistics minor provides valued preparation for professional degree studies in postgraduate academic programs.

The minor consists of a minimum of six courses with a total of at least 20 units. There are two required courses (8 units) and four qualifying or elective courses (12 or more units). An overall 2.75 grade point average (GPA) is required for courses fulfilling the minor.
1. **Qualifying Courses:** at most, one of these two courses may be counted toward the six course requirement for the minor: MATH 52; STATS 191.
2. **Required Courses:** STATS 116 and 200.
3. **Elective Courses:** at least one of the elective courses should be a STATS 200-level course. The remaining two elective courses may also be 200-level courses. Alternatively, one or two elective courses may be approved courses in other departments. Special topics courses and seminars for undergraduates are offered from time to time by the department and these may be counted toward the course requirement.

Examples of elective course sequences are:

- STATS 202, 203, emphasizing data analysis and applied statistics
- STATS 205, 206, (207), emphasizing statistical methodology
- STATS 206, ECON 160, emphasizing economic optimization
- STATS 206, PSYCH 156, emphasizing psychology modeling and experiments
- STATS 207, EE 264, (279), emphasizing signal processing
- STATS 217, BIOSCI 283, emphasizing genetic and ecologic modeling
- STATS 217, 218, emphasizing probability and its applications
- STATS 240, 250, emphasizing mathematical finance

GRADUATE PROGRAMS
MASTER OF SCIENCE
The department requires that the student take 45 units of work from offerings in the Department of Statistics or from authorized courses in other departments. Ordinarily, four or five quarters are needed to complete all requirements.

Student must fulfill the following requirements for the M.S. degree:

1. **STATS 116, 200, 191, and 217.** Courses previously taken may be waived by the adviser, in which case they must be replaced by other graduate courses offered by the department.
2. **One of MATH 103, 113, 115, 171; and one of CS 106A, 106X, 137.** Substitution of other courses in Mathematics and Computer Science may be made with consent of the adviser.
3. **At least four additional courses from graduate offerings in the department (202-399).** Consent of the adviser is required in order to take more than 6 units of STATS 260A,B,C, 390, or 399.
4. **Additional units to complete the requirements may be chosen from the list available from the department web site.** Other graduate courses (200 or above) may be authorized by the adviser if they provide skills relevant to statistics or deal primarily with an application of statistics or probability and do not overlap courses in the student’s program.

There is sufficient flexibility to accommodate students with interests in applications to business, computing, economics, engineering, health, operations research, and biological and social sciences.

- Students with a strong mathematical background who may wish to go on to a Ph.D. in Statistics should consider applying directly to the Ph.D. program.
- Statistics courses required for the M.S. degree must be taken for letter grades, and an overall 2.75 grade point average (GPA) is required.

DOCTOR OF PHILOSOPHY
The department looks for students who want to prepare for research careers in statistics or probability, either applied or theoretical. Advanced undergraduate or master’s level work in mathematics and statistics provides a good background for the doctoral program. Quantitatively oriented students with degrees in other scientific fields are also encouraged to apply for admission. The program normally takes four years to complete.

Program Summary — STATS 300A,B,C, 305, 306A,B, and 310A,B,C (first-year core program); pass two of three parts of the qualifying examination (beginning of second year); breadth requirement (second or third year); University oral examination (end of third year or beginning of fourth year); dissertation (fourth year).

In addition, students are required to take 9 units of advanced topics courses offered by the department (including at least two of the following: 314, 317, 318, 315A, or 315B, but not including literature, research, or consulting), and 3 units of statistical consulting. All students who have passed the qualifying exam but have not yet passed the University oral examination must take 319 at least once per year.

First-Year Core Courses — STATS 300 systematically surveys the ideas of estimation and of hypothesis testing for parametric and nonparametric models involving small and large samples. 305 is concerned with linear regression and the analysis of variance. 306 surveys a large number of modeling techniques, related to but going beyond the linear models of 305. 310 is a measure-theoretic course in probability theory, beginning with basic concepts of the law of large numbers and martingale theory.

- Students who do not have enough mathematics background can take 310 after their first year but need to have their first-year program approved by the Ph.D. program adviser.

Qualifying Examinations — These are intended to test the student’s level of knowledge when the first-year program, common to all students, has been completed. There are separate examinations in the three core subjects of statistical theory and methods, applied statistics and probability theory, and are typically taken during the summer between the student’s first and second years. Students may take two or three of these examinations and are expected to show acceptable performance in two examinations.

Breadth Requirement — Students are advised to choose an area of concentration in a specific scientific field of statistical applications; this can be realized by taking at least 15 units of course work approved by the Ph.D. program adviser.

Current areas with suggested course options include:

- **Computational Biology and Statistical Genomics** — Students are expected to take 9 units of graduate courses in genetics or neurosciences (imaging), such as GENE 203/BIO SCI 203, as well as 9 units of classes in Statistical Genetics or Bioinformatics, GENE 344A,B, STATS 345, STATS 366, STATS 367.
- **Machine Learning** — Courses can be chosen from the following list:
  - Statistical Learning: STATS 315A and 315B
  - Data Bases: CS 245, 346, 347
  - Probabilistic Methods in AI: CS 221, 354
  - Statistical Learning Theory and Pattern Classification: CS 229
- **Applied Probability** — Students are expected to take 15 units of graduate courses in some of the following areas:
  - Control and Stochastic Calculus: MS&E 322, 351, MATH 237, EE 363
  - Finance: STATS 250, FINANCE 622, MATH 236
  - Information Theory: EE 376A, 376B
  - Monte Carlo: STATS 318, 345, 362, MS&E 323
  - Queuing Theory: GSB 661, 663, MS&E 335
  - Stochastic Processes: STATS 317, MATH 234
- **Earth Science Statistics** — Students are expected to take:
  - STATS 317, 318, 352
  - and three courses from the GES or Geophysics departments, such as GES 144 or GEOPHYS 210.
- **Social and Behavioral Sciences** — Students are expected to take three advanced courses from the department with an applied orientation such as:
  - STATS 261/262, 324, 343, 354
  - and three advanced quantitative courses from departments such as Anthropology, Economics, Political Science, Psychology, and Sociology, and the schools of Education, Business, or Medicine.

University Oral Examination — The University oral examination is taken on the recommendation of the student’s research adviser after the thesis problem has been well defined and some research progress has been made. Usually, this happens early in the student’s fourth year.
examination consists of a 40-minute presentation on the thesis topic, followed by two question periods. The first question period relates directly to the student’s presentation; the second is intended to explore the student’s familiarity with broader statistical topics related to the thesis research.

Financial Support — Students accepted to the Ph.D. program are offered financial support. All tuition expenses are paid and there is a fixed monthly stipend determined to be sufficient to pay living expenses. Financial support can be continued for five years, department resources permitting, for students in good standing. The resources for student financial support derive from funds made available for student teaching and research assistantships. Students receive both a teaching and research assignment each quarter which, together, do not exceed 20 hours. Students are strongly encouraged to apply for outside scholarships, fellowships, and other forms of financial support.

PH.D. MINOR
The Department of Statistics devises individual Ph.D. minor programs, but the department urges all graduate students in other fields who wish to have a subspecialty in statistics to study for an M.S. degree instead. The unit requirement for an M.S. degree is 45 units, whereas the number of units required for a minor averages around 30. This difference of 15 units can be made up by the student by including in the M.S. program courses from his or her own field which are related to statistics or applications of statistics.

COURSES

INTRODUCTORY
Introductory courses for any student with an interest in the problems of descriptive statistics and statistical inferences are STATS 30, 50, 60, and 141. These courses have no mathematical prerequisites. STATS 60 and 141 explain the techniques and methods of statistical inference. STATS 60 emphasizes applications in the social sciences and STATS 141 applications in the biological sciences. STATS 60 and 141 can be followed by STATS 191 which explains more advanced methods and their applications.

STATS 110, 116, 200, 217-218 are introductory but have a calculus prerequisite. STATS 110 covers the most important techniques used in the analysis of experimental data in engineering and science. STATS 110 can be followed by STATS 191. STATS 116 provides a general introduction to the theory of probability. It may be followed by STATS 200, which deals with statistical theory, or by 217 and 218, which deal with stochastic processes. The sequence 116, 200 is a two quarter sequence in basic mathematical statistics; the sequence 116, 217, 218 is a one-year course in basic probability theory.

STATS 43N. Displaying Data: Principles, Computer Graphics, and the Internet — Stanford Introductory Seminar. Principles of displaying data and envisioning information based on literature and historical examples. Application of these principles to media such as computer graphics and the Internet. Student projects. GER:DB-Math

3 units, Win (Walther, G)

3 units, Spr (Cover, T)

STATS 60. Introduction to Statistical Methods: Precalculus — (Graduate students register for 160; same as PSYCH 10.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math

5 units, Aut (Walther, G), Win (Thomas, E), Spr (Switzer, P), Sum (Richards, W)

STATS 10. Statistical Methods in Engineering and the Physical Sciences — Introduction to statistics for engineers and physical scientists. Topics: descriptive statistics, probability, interval estimation, tests of hypotheses, nonparametric methods, linear regression, analysis of variance, elementary experimental design. Prerequisite: one year of calculus. GER:DB-Math

4-5 units, Aut (Srinivasan, B), Sum (Staff)

3-5 units, Aut (Siegmund, D), Spr (Wong, W), Sum (Staff)

3 units, not given this year

STATS 141. Biostatistics — (Same as BIOSCI 141.) Statistical methods for biological data. Describing numerical and graphical data; introduction to probability and statistical inference, including hypothesis tests and confidence intervals. Intermediate statistical methods: comparing groups and analysis of variance; analyzing associations and linear and logistic regression; and methods for categorical data such as contingency tables and odds ratio. Content integrated with statistical computing in R. See http://www-stat.stanford.edu/~rag/stat141. GER:DB-Math

4-5 units, Aut (Rogosa, D), Win (Feldman, M)

STATS 160. Introduction to Statistical Methods: Precalculus — (Same as 60, PSYCH 10; see 60.)

5 units, Aut (Walther, G), Win (Thomas, E), Spr (Switzer, P), Sum (Richards, W)

2-3 units, Win (Srinivasan, B)

STATS 191. Introduction to Applied Statistics — Statistical tools for modern data analysis. Topics include regression and prediction, elements of the analysis of variance, bootstrap, and cross-validation. Emphasis is on conceptual rather than theoretical understanding. Applications to social/biological sciences. Student assignments/projects require use of the software package R. Recommended: 60, 110, or 141. GER:DB-Math

3-4 units, Win (Zhang, N)

STATS 199. Independent Study — For undergraduates.

1-15 units, Aut, Win, Spr, Sum (Staff)
STATS 200. Introduction to Statistical Inference — Modern statistical concepts and procedures derived from a mathematical framework. Statistical inference, decision theory; point and interval estimation, tests of hypotheses; Neyman-Pearson theory. Bayesian analysis; maximum likelihood, large sample theory. Prerequisite: 116.
3 units, Win (Romano, J), Sum (Staff)

STATS 201. Design and Analysis of Experiments — Theory and applications. Factors that affect response. Optimum levels of parameters. How to balance theory and practical design techniques. Prerequisites: basic statistics and probability theory.
3-5 units, Aut (Khaledi, S)

STATS 202. Data Analysis — Data mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in very large databases or through web mining. Topics: decision trees, neural networks, association rules, clustering, case based methods, and data visualization.
3 units, Aut (Staff)

3 units, Spr (Walther, G)

STATS 204. Introduction to Nonparametric Statistics — Nonparametric analogs of the one- and two-sample tests and analysis of variance; the sign test, median test, Wilcoxon’s tests, and the Kruskal-Wallis and Friedman tests, tests of independence. Nonparametric regression and nonparametric density estimation, modern nonparametric techniques, nonparametric confidence interval estimates.
3 units, Spr (Zhang, N)

STATS 205. Introduction to Multivariate Analysis — Introduction to the statistical analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis, canonical correlations, multidimensional scaling, clustering. Pre- or corequisite: 200.
3 units, Win (Olshen, R)

STATS 206. Applied Multivariate Analysis — Introduction to the statistical analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis, canonical correlations, multidimensional scaling, clustering. Pre- or corequisite: 200.
3 units, Win (Olshen, R)

STATS 207. Introduction to the Bootstrap — The bootstrap is a computer-based method for assigning measures of accuracy to statistical estimates. By substituting computation in place of mathematical formulas, it permits the statistical analysis of complicated estimators. Topics: non-parametric assessment of standard errors, biases, and confidence intervals; related resampling methods including the jackknife, cross-validation, and permutation tests. Theory and applications. Prerequisite: course in statistics or probability.
3 units, Win (Efron, B)

STATS 208. Understanding Statistical Models and their Social Science Applications — (Same as EDUC 260X.) Information that statistical modeling can provide in experimental and non-experimental settings emphasizing misconceptions in social science applications such as causal modeling. Text is Statistical Models: Theory and Practice, by David Freedman. See http://www-stat.stanford.edu/~rag/stat209. Prerequisite: intermediate-level statistical methods including multiple regression, logistic regression, and log-linear models.
3 units, Spr (Rogosa, D)

STATS 211. Topics in Quantitative Methods: Meta-Analysis — (Same as EDUC 493B.) Meta-analysis as a quantitative method for combining the results of independent studies enabling researchers to evaluate available evidence. Examples of meta-analysis in medicine, education, and social and behavioral sciences. Statistical methods include nonparametric methods, contingency tables, regression and analysis of variance, and Bayesian methods. Project involving an existing published meta-analysis. Prerequisite: basic sequence in statistics.
1-3 units, Win (Olkin, I)

STATS 212. Applied Statistics with SAS — Data analysis and implementation of statistical tools in SAS. Topics: reading in and describing data, categorical data, dates and longitudinal data, correlation and regression, nonparametric comparisons, ANOVA, multiple regression, multivariate data analysis, using arrays and macros in SAS. Prerequisite: statistical techniques at the level of STATS 191 or 203; knowledge of SAS not required.
3 units, Sum (Staff)

3 units, Win, Sum (Ross, K)

3 units, Spr, Sum (Montanari, A)

3 units, Aut (Ross, K), Win (Dembo, A)

3 units, not given this year

3 units, Sum (Staff)

3 units, Win (Romano, J), Sum (Staff)

3-4 units, Aut (Lai, T)

3 units, Sup (Zhang, N)

STATS 225. Introduction to Statistical Inference — Modern statistical concepts and procedures derived from a mathematical framework. Statistical inference, decision theory; point and interval estimation, tests of hypotheses; Neyman-Pearson theory. Bayesian analysis; maximum likelihood, large sample theory. Prerequisite: 116.
3 units, Win (Romano, J), Sum (Staff)

3 units, Win (Olshen, R)

3 units, not given this year

STATS 228. Introduction to Stochastic Processes — Discrete and continuous time Markov chains, point processes, random walks, branching processes, first passage times, recurrence and transience, stationary distributions.
3 units, Win, Sum (Ross, K)

STATS 229A. Workshop in Quantitative Finance — Topics of current interest.
1 unit, Aut (Lai, T)

3-4 units, Aut (Lai, T)

STATS 231. Applied Statistics with SAS — Data analysis and implementation of statistical tools in SAS. Topics: reading in and describing data, categorical data, dates and longitudinal data, correlation and regression, nonparametric comparisons, ANOVA, multiple regression, multivariate data analysis, using arrays and macros in SAS. Prerequisite: statistical techniques at the level of STATS 191 or 203; knowledge of SAS not required.
3 units, Sum (Staff)

3 units, not given this year

3-4 units, Aut (Lai, T)

3 units, Sup (Zhang, N)

3 units, Win, Sum (Ross, K)

STATS 236. Applied Multivariate Analysis — Introduction to multivariate analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis, canonical correlations, multidimensional scaling, clustering. Pre- or corequisite: 200.
3 units, Win (Olshen, R)

3 units, Win (Romano, J), Sum (Staff)

STATS 238. Applied Multivariate Analysis — Introduction to multivariate analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis, canonical correlations, multidimensional scaling, clustering. Pre- or corequisite: 200.
3 units, Win (Olshen, R)

STATS 239A. Workshop in Quantitative Finance — Topics of current interest.
1 unit, Aut (Lai, T)

3-4 units, Sum (Staff)

3 units, Win (Papanicolaou, G)

STATS 252. Data Mining and Electronic Business — The Internet and related technologies have caused the cost of communication and transaction to plummet, and consequently the amount of potentially relevant data to explode. The underlying principles, statistical issues, and algorithmic approaches to data mining and e-business, with real world examples.

3 units, Spr (Weigend, A)

STATS 260A,B,C. Workshop in Biostatistics — (Same as HRP 260A,B,C.) Applications of statistical techniques to current problems in medical science. Enrollment for more than 2 units of credit involves extra reading or consulting and requires consent of instructor.

1-2 units, A: Aut, B: Win, C: Spr (Staff)

3 units, Win (Cobb, K)

STATS 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis — (Same as HRP 262.) Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.

3 units, Spr (Cobb, K)

STATS 279. Practical Training — For students in the M.S. program in Financial Mathematics only. Students obtain employment in a relevant industrial or research activity to enhance their professional experience. May be repeated for credit. Prerequisite: consent of adviser.

1-3 units, Aut, Win, Spr, Sum (Lai, T)

STATS 298. Industrial Research for Statisticians — Masters-level research as in 299, but must be conducted for an off-campus employer. Final report required. Prerequisite: enrollment in Statistics M.S. or Ph.D. program (prior to candidacy).

1-9 units, Aut, Win, Spr, Sum (Staff)

STATS 299. Independent Study — For Statistics M.S. students only. Reading or research program under the supervision of a Statistics faculty member. May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

PRIMARILY FOR DOCTORAL STUDENTS

Sequences 300A,B,C, 305, 306A,B, and 310A,B,C comprise the fundamental sequence which serves as a general introduction to and prerequisite for further work.

STATS 300. Advanced Topics in Statistics — May be repeated for credit.

3 units, Sum (Staff)

STATS 300A,B,C. Theory of Statistics — Elementary decision theory; loss and risk functions, Bayes estimation; UMVU estimator, shrinkage estimators. Hypothesis testing and confidence intervals; Neyman-Pearson theory; UMP tests and uniformly most accurate confidence intervals; use of unbiasedness and invariance to eliminate nuisance parameters. Large sample theory: basic convergence concepts; robustness; efficiency; contiguity, locally asymptotically normal experiments; convolution theorem; asymptotically UMP and maximin tests. Asymptotic theory of likelihood ratio and score tests. Rank permutation and randomization tests; jackknife, bootstrap, subsampling and other resampling methods. Further topics: sequential analysis, optimal experimental design, empirical processes with applications to statistics, Edgeworth expansions, density estimation, time series.

2-4 units, A: Aut, B: Win (Romano, J), C: Spr (Siegmund, D)

STATS 305. Introduction to Statistical Modeling — The linear model: simple linear regression, polynomial regression, multiple regression, anova models; and with some extensions, orthogonal series regression, wavelets, radial basis functions, and MARS. Topics: normal theory inference (tests, confidence intervals, power), related distributions (t, chi-square, F), numerical methods (QR, SVD), model selection/regularization (Cp, AIC, BIC), diagnostics of model inadequacy, and remedies including bootstrap inference, and cross-validation. Emphasis is on problem sets involving substantial computations with data sets, including developing extensions of existing methods. Prerequisites: consent of instructor, 116, 200, applied statistics course, CS 106A, MATH 114.

2-4 units, Aut (Owen, A)

STATS 306A. Methods for Applied Statistics — Extension of modeling techniques of 305: binary and discrete response data and nonlinear least squares. Topics include regression, Poisson loglinear models, classification methods, clustering. May be repeated for credit. Prerequisite: 305 or equivalent.

2-4 units, Win (Owen, A)

2-4 units, Spr (Tibshirani, R)

STATS 310A. Theory of Probability — Mathematical tools: asymptotics, metric spaces; measure and integration; Lp spaces; some Hilbert spaces theory. Probability: independence, Borel-Cantelli lemmas, almost sure and Lp convergence, weak and strong laws of large numbers. Weak convergence and characteristic functions; central limit theorems; local limit theorems; Poisson convergence. Prerequisites: 116, MATH 171.

2-4 units, Aut (Siegmund, D)

2-4 units, Win (Dembo, A)

2-4 units, Spr (Lai, T)

STATS 314. Advanced Statistical Methods — Topic this year is multiple hypothesis testing. The demand for new methodology for the simultaneous testing of many hypotheses as driven by modern applications in genomics, imaging, astronomy, and finance. High dimensionality: how tests of many hypotheses may be considered simultaneously. Classical techniques, and recent developments. Stepwise methods, generalized error rates such as the false discovery rate, and the role of resampling. May be repeated for credit.

2-3 units, not given this year
STATS 315A,B. Modern Applied Statistics—Three-part sequence. New techniques for predictive and descriptive learning using ideas that bridge gaps among statistics, computer science, and artificial intelligence. Emphasis is on statistical aspects of their application and integration with more standard statistical methodology. Predictive learning refers to estimating models from data with the goal of predicting future outcomes, in particular, regression and classification models. Descriptive learning is used to discover general patterns and relationships in data without a predictive goal, viewed from a statistical perspective as computer automated exploratory analysis of large complex data sets.

A: Learning. 2-3 units, Aut (Hastie, T)
B: Data Mining. 2-3 units, Win (Friedman, J)

2-3 units, Spr (Owen, A)

3 units, Spr (Montanari, A)

STATS 319. Literature of Statistics—Literature study of topics in statistics and probability culminating in oral and written reports. May be repeated for credit.

1-3 units, Aut (Romano, J), Spr (Siegmund, D)

STATS 323. Computational Methods for Geometric Design and Imaging—Multiresolution approximation analysis as a mathematical tool for the construction of wavelets and sub-band coding schemes; modifications and extensions of this have contributed to the advancement in curve/surface design and image manipulation. Computational methods for geometric design and image processing. Curve and surface subdivision schemes, and computational schemes based on the anisotropic diffusion model. The diffusion framework applied to the analysis and visualization of higher dimensional data sets by introducing diffusion kernels and metrics.

2-3 units, Spr (Lange, K)

STATS 327. Software for Data Analysis—Principles and techniques for writing statistical data analysis software using the S language, specifically the R software, as the main medium. Software project. Prerequisite: experience with S.

2-3 units, Win (Chambers, J)

2-3 units, Aut (Wong, W)

STATS 366. Advanced Bioinformatics—(Same as 166, BIOMEDIN 366; see 166.)

2-3 units, Win (Srinivasan, B)

STATS 374. Large Deviations—(Same as MATH 234.) Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer’s and Sanov’s theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: MATH 230A or STATS 310.

3 units, Win (Dembo, A)

1 unit, not given this year

STATS 390. Consulting Workshop—Skills required of practicing statistical consultants, including exposure to statistical applications. Students participate as consultants in the department’s drop-in consulting service, analyze client data, and prepare formal written reports. Seminar provides supervised experience in short term consulting. May be repeated for credit. Prerequisites: course work in applied statistics or data analysis, and consent of instructor.

1-3 units, Aut (Owen, A), Win (Staff), Spr (Olshen, R)

STATS 398. Industrial Research for Statisticians—Doctoral research as in 298, but must be conducted for an off-campus employer. Final report required. May be repeated for credit. Prerequisite: Statistics Ph.D. candidate.

1-9 units, Aut, Win, Spr, Sum (Staff)

STATS 399. Research—Research work as distinguished from independent study of nonresearch character listed in 199. May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

APPPHYS 214. Randomness in the Physical World
3 units, not given this year

EE 376A. Information Theory
3 units, Win (Weissman, I)

EE 376B. Information Theory
3 units, not given this year

MATH 236. Introduction to Stochastic Differential Equations
3 units, Win (Papanicolaou, G)

OVERSEAS STUDIES

Courses taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

PARIS

STATS 30. Statistical Thinking
3 units, Aut (Switzer, P)

STATS 99. Paris by Numbers
2-4 units, Aut (Switzer, P)
PROGRAM IN STRUCTURED LIBERAL EDUCATION

Director and Professor: Mark Mancall (History)
Coordinator: Suzanne Greenberg
Lecturers: Barbara Clayton, Suzanne Greenberg, Margo Horn, Greg Watkins

The Program in Structured Liberal Education (SLE) is designed for first-year students interested in an interdisciplinary approach to the liberal arts. The program emphasizes intellectual rigor and individualized contact between faculty and students. SLE has three basic purposes: to present a coherent program of instruction; to develop a student's ability to ask effective questions of texts, teachers, the culture, and themselves; and to develop intellectual skills in logical reasoning, critical reading, expository writing, and group discussions. SLE stresses inquiry, criticism, and a tolerance for ambiguity. Neither the instructors nor the curriculum provides ready-to-answer questions to the students being dealt with; rather, SLE encourages a sense of intellectual challenge, student initiative, and originality.

Freshmen interested in enrolling in SLE should indicate this preference for their IHUM assignment. SLE is designed as a three-quarter sequence and students should be willing to make a commitment for the entire year.

Correspondence regarding the program should be addressed to Program in Structured Liberal Education, Florence Moore Hall, Stanford University, Stanford, CA 94305.

COURSES

SLE 91, 92, 93. Structured Liberal Education — SLE demands approximately 60 percent of the average academic workload during freshman year. Autumn Quarter focus is on the mythological and cultural foundations of ancient Greece and Israel. Winter Quarter focus is on the religious, ideological, and aesthetic transformations that occurred in Europe, Asia, and the New World as a result of the Middle Ages, Renaissance, Scientific Revolution, and Enlightenment. Spring Quarter focus is on the social, political, and artistic forces that shape the modern world. Completion of the SLE program satisfies the GER: IHUM, DB-Hum, and the University Writing and Rhetoric requirements.

91: 9 units, Aut; 92: 9 units, Win; 93: 10 units, Spr (Staff)

PROGRAM IN SYMBOLIC SYSTEMS

Director: Ivan A. Sag
Program Coordinator: Todd Davies
Program Committee: Lera Boroditsky, Todd Davies, Byron Reeves, Eric Roberts, Ivan A. Sag, Paul Skokowski, Kenneth A. Taylor, Thomas A. Wasow

Undergraduate Advising Fellows: Aurelie Beaufumel, Tina Chen, Marni Gans, Michel Krieger, Benjamin Newman, Gabriel Recchia

Program Faculty:
Art and Art History: Scott Bukatman (Associate Professor)
Applied Physics: Bernardo Huberman (Consulting Professor)
Classics: Reviel Netz (Professor)
Communication: Jeremy Bailenson (Assistant Professor), Clifford Nass (Professor), Byron Reeves (Professor), Frederick Turner (Assistant Professor)
Computer Science: David Dill (Professor), Brian Jeffrey Fogg (Consulting Assistant Professor), Michael Genesereth (Associate Professor), Margaret Johnson (Senior Lecturer), Oussama Khatib (Professor), Scott Klemmer (Assistant Professor), Daphne Koller (Professor), Jean-Claude Latombe (Professor), Marc Levoy (Professor), Christopher Manning (Associate Professor), John McCarthy (Professor Emeritus), Andrew Ng (Assistant Professor), Nils Nilsson (Professor Emeritus), Vaughn Pratt (Professor Emeritus), Eric Roberts (Professor, Teaching), Tim Roughgarden (Assistant Professor), Sebastian Thrun (Associate Professor), Terry Winograd (Professor)
Economics: Muriel Niederle (Assistant Professor)
Education: Raymond P. McDermott (Professor), Roy Pea (Professor), Daniel Schwartz (Associate Professor)
Electrical Engineering: John R. Koza (Consulting Professor), Krishna Shenoy (Assistant Professor)
French and Italian: Jean-Pierre Dupuy (Professor)
Genetics: Russ B. Altman (Professor)
History: Jessica G. Riskin (Associate Professor)
Linguistics: Arto Anttila (Assistant Professor), David Beaver (Associate Professor), Joan Bresnan (Professor), Eve Clark (Professor), Vivienne Fong (Lecturer), Daniel Jurafsky (Associate Professor), Ronald Kaplan (Consulting Professor), Lauri Karttunen (Consulting Professor), Martin Kay (Professor), Beth Levin (Professor), Christopher Manning (Associate Professor), Stanley Peters (Professor), Ivan A. Sag (Professor), Thomas A. Wasow (Professor), Annie Zaenen (Consulting Professor)
Management Science and Engineering: Pamela Hinds (Associate Professor)
Mathematics: Keith Devlin (Consulting Professor), Persi Diaconis (Professor), Solomon Feferman (Professor Emeritus)
Medicine: Russ B. Altman (Professor), John R. Koza (Consulting Professor)
Music: Jonathan Berger (Associate Professor), Christopher Chafe (Professor), Eleanor Selfridge-Field (Consulting Professor), William L. Verplank (Lecturer)
Neurobiology: Ben Barres (Professor), Jennifer Raymond (Assistant Professor)
Philosophy: Michael Bratman (Professor), Mark Crimmins (Associate Professor), John Etchemendy (Professor), Solomon Feferman (Professor Emeritus), Dagfinn Follesdal (Professor), David Israel (Consulting Associate Professor), Krista Lawlor (Assistant Professor), Grigori Mints (Professor), Marc Pauly (Assistant Professor), Raymond Peraul (Consulting Associate Professor), John Perry (Professor), Kenneth Taylor (Professor), Johan van Benthem (Professor), Thomas A. Wasow (Professor)
Psychiatry and Behavioral Sciences: Vinod Menon (Associate Professor)
Psychology: Lera Boroditsky (Assistant Professor), Herbert H. Clark (Professor), Anne Fernald (Associate Professor), Susan Johnson (Assistant Professor), Brian Knutson (Assistant Professor), Ellen Markman (Professor), James McClelland (Professor), Michael
Courses given in the Program in Symbolic Systems have the subject code SYMBSYS. For a complete list of subject codes, see Appendix.

Both human beings and computers can manipulate symbols. This observation lies at the heart of Symbolic Systems, an interdisciplinary program focusing on the relationship between natural and artificial systems that represent, process, and act on information. Computer programs, natural languages, the human mind, and the Internet embody concepts whose study forms the core of the Symbolic Systems curriculum, such as computation, representation, communication, and intelligence. A body of knowledge and theory has developed around these notions, from disciplines like philosophy, computer science, linguistics, psychology, statistics, neurobiology, and communication. Since the invention of computers, researchers have been working across these disciplines to study questions such as: in what ways are computers and computer languages like human beings and their languages; how can the interaction between people and computers be made easier and more beneficial?

The core requirements of the Symbolic Systems Program (SSP) include courses in symbolic logic, the philosophy of mind, formal linguistics, cognitive psychology, programming, the mathematics of computation, statistical theory, artificial intelligence, and interdisciplinary approaches to cognitive science. These courses prepare students with the vocabulary, theoretical background, and technical skills needed for study and research at the advanced undergraduate and graduate levels. Most of the courses in SSP are drawn from affiliated departments. Courses designed specifically for the program are aimed at integrating and supplementing topics covered by the department-based offerings. The curriculum includes humanistic approaches to questions about language and intelligence, as well as training in science and engineering.

SSP offers both B.S. and M.S. degree programs. Both programs require students to master a common core of required courses, and to choose an area of specialization.

**UNDERGRADUATE PROGRAMS**

**BACHELOR OF SCIENCE**

The program leading to a B.S. in Symbolic Systems provides students with a core of concepts and techniques, drawing on faculty and courses from various departments. The curriculum prepares students for advanced training in the interdisciplinary study of language and information, or for postgraduate study in any of the main contributing disciplines. It is also excellent preparation for employment immediately after graduation.

Symbolic Systems majors must complete a core of required courses plus a concentration consisting of six additional courses. All major courses are to be taken for letter grades unless an approved course is offered satisfactory/no credit only. All core courses must be passed with a grade of ‘C-’ or better. Students who receive a grade lower than this in a core course must alert the program of this fact, so that a decision can be made about whether the student should continue in the major.

**CORE REQUIREMENTS**

In order to graduate with a B.S. in Symbolic Systems, a student must complete the following requirements. (Please note that some of these courses have other courses as prerequisites. Students are responsible for completing each course’s prerequisites before they take it.)

1. **Cognitive Science:** either SYMBSYS 100, Introduction to Cognitive Science, or one of the following:
   - LINGUIST 280/CS 224N. Natural Language Processing
   - PSYCH 131. Language and Thought
   - PSYCH 137. Birds to Words: Cognition, Communication, and Language

2. **Computer Programming:**
   a) CS 106A. Programming Methodology, and 106B. Programming Abstractions; or 106X. Programming Methodology and Abstractions (Accelerated); and
   b) CS 107. Programming Paradigms

3. **Discrete Structures:** CS 103B. Discrete Structures; or 103X. Discrete Structures (Accelerated)

4. **Logic:**
   a) PHIL 150. Basic Concepts in Mathematical Logic; or 150X. Basic Concepts in Mathematical Logic, and either CS 103A. Discrete Mathematics for Computer Science, or 103X. Discrete Structures (Accelerated); and
   b) PHIL 151. First-Order Logic

5. **Statistics/Probability:** one of the following:
   - EE 178. Introduction to Probability and Statistics
   - MATH 151. Introduction to Probability Theory
   - MSE 120. Probabilistic Analysis
   - STATS 110. Statistical Methods in Engineering and the Physical Sciences
   - STATS 116. Theory of Probability

6. **Philosophical Foundations:**
   a) an introductory course in Philosophy must be taken prior to the required PHIL 80, from among the following:
      - PHIL 10. God, Self, and World: An Introduction to Philosophy
      - PHIL 20. Introduction to Moral Philosophy
      - PHIL 30. Introduction to Political Philosophy
      - PHIL 60. Introduction to Philosophy of Science
      - PHIL 102. Modern Philosophy, Descartes to Kant
   - IHUM 23A,B. The Fate of Reason and
   b) PHIL 80. Mind, Matter, and Meaning

7. **Cognitive Psychology:** PSYCH 55. Introduction to Cognition and Brain; or PSYCH 40. Introduction to Cognitive Psychology

8. **Formal Linguistics:**
   a) LINGUIST 120. Introduction to Syntax; and one of the following:
      - LINGUIST 130A. Introduction to Linguistic Meaning,
      - LINGUIST 130B. Introduction to Lexical Semantics,
      - LINGUIST 230A. Introduction to Semantics and Pragmatics

9. **Artificial Intelligence:** CS 121. Introduction to Artificial Intelligence; or 221. Artificial Intelligence: Principles and Techniques

10. **Turing Computability:** a) one of the following;†
    - CS 103B. Discrete Structures
    - CS 154. Introduction to Automata and Complexity Theory
    - PHIL 152. Computability and Logic
    - SYMBSYS 100. Introduction to Cognitive Science

11. **Advanced Small Seminar:**† An upper-division, limited-enrollment seminar drawing on material from other courses in the core. Courses listed under Symbolic Systems Program offerings with numbers from SYMBSYS 201 through 209 are acceptable, as are other courses which will be announced at the beginning of each academic year.

---

† A course taken to fulfill one of these requirements can also be counted toward another requirement, as part of either the core or a student’s concentration, but not both (see below).

* CS 103X does not fulfill this requirement.
CONCENTRATION AREAS

In addition to the core requirements listed above, the Symbolic Systems major requires each student to complete a concentration consisting of six courses that are thematically related to each other. Students select concentrations from the list below or design others in consultation with their advisers.

- Applied Logic
- Artificial Intelligence
- Cognitive Science
- Computer Music
- Decision Making and Rationality
- Human-Computer Interaction
- Learning
- Natural Language
- Neurosciences
- Philosophical Foundations

MINORS

Students may minor in Symbolic Systems by completing either item 1 or item 2 below.

1. One course in each of the following core areas (please note that several of these courses have prerequisites):
   a) Cognition: SYMBSYS 100* or PSYCH 40 or 55
   b) Logic and Computation: PHIL 150 or 151, or CS 103B, 103X, or 154
   c) Computer Programming: CS 106B, 106X, or 107
   d) Philosophical Foundations: SYMBSYS 100* or PHIL 80
   e) Formal Linguistics: LINGUIST 120, 130A, or 130B
   f) Artificial Intelligence: CS 121 or 221

2. SYMBSYS 100, plus an interdisciplinary SSP concentration listed on the SSP web site at http://symbsys.stanford.edu. To qualify, the selection of courses used for the minor must be interdisciplinary; i.e., it must either include courses from at least three departments, or include more than one course from each of two departments.

*SYMBSYS 100 may not be counted for both areas ‘a’ and ‘d’.

UNDERGRADUATE RESEARCH

The program strongly encourages all SSP majors to gain experience in directed research by participating in faculty research projects or by pursuing independent study. In addition to the Symbolic Systems Honors Program (see below), the following avenues are offered.

1. **Summer Internships**: students work on SSP-related faculty research projects. Application procedures are announced in the winter quarter for SSP majors.
2. **Research Assistantships**: other opportunities to work on faculty research projects are typically announced to SSP majors as they arise during the academic year.
3. **Independent Study**: under faculty supervision. For course credit, students should enroll in SYMBSYS 196.

Contact SSP for more information on any of these possibilities, or visit the program’s web site at http://www.stanford.edu/dept/symbol. In addition, the Undergraduate Advising and Research office on campus offers numerous grants and scholarships supporting student research projects at all levels; see http://uro.stanford.edu.

HONORS PROGRAM

Seniors in SSP may apply for admission to the Symbolic Systems honors program prior to the beginning of their final year of study. Students who are accepted into the honors program can graduate with honors by completing an honors thesis under the supervision of a faculty member. Course credit for the honors project may be obtained by registering for SYMBSYS 190, Honors Tutorial, for any quarter while a student is working on an honors project. Juniors who are interested in doing an honors project during their senior year are strongly advised to take SYMBSYS 91, Junior Honors Seminar. SYMBSYS 191, Senior Honors Seminar, is recommended for honors students during the senior year. Contact SSP or visit the program’s web site for more information on the honors program, including deadlines and policies.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES

Many SSP majors also complete coterminal M.S. or M.A. degrees in affiliated departments. In addition to the Symbolic Systems M.S. program (see below), the Department of Philosophy offers a special Symbolic Systems track for interdisciplinary graduate level work.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.html#Coterm.

GRADUATE PROGRAMS

The University’s basic requirements for the M.S. and Ph.D. degrees are discussed in the “Graduate Degrees” section of this bulletin.

MASTER OF SCIENCE

The M.S. degree in Symbolic Systems is designed to be completed in the equivalent of one academic year by coterminal students or returning students who already have a B.S. degree in Symbolic Systems. Admission is competitive, providing a limited number of students with the opportunity to pursue course and project work, in consultation with a faculty adviser who is affiliated with the Symbolic Systems Program. The faculty adviser may impose requirements beyond those described here.

Admission to the program as a coterminal student is subject to the policies and deadlines described in the “Undergraduate Degrees” section of this bulletin (see “Coterminal Bachelor’s and Master’s Degrees”). Applicants to the M.S. program are reviewed each quarter during the academic year. Information on deadlines and procedures for applying are available from the program’s student services coordinator in the Linguistics Department office (460-127E).

Requirements

A candidate for the M.S. degree in Symbolic Systems must complete a program of 45 units. At least 36 of these must be graded units, passed with an average grade of 3.0 (B) or better, and any course taken to fulfill requirements A, B, or C below must be taken for a letter grade unless the course is offered S/NC only. The 45 units may include no more than 21 units of courses from those listed below under Requirements A, B, and C. Furthermore, none of the 45 units to be counted toward the M.S. degree may include units counted toward an undergraduate degree at Stanford or elsewhere. Course requirements are waived only if evidence is provided that similar or more advanced courses have been taken, either at Stanford or another institution. Courses that are waived rather than taken may not be counted toward the M.S. degree.

Each candidate for the M.S. degree must fulfill the following requirements:

**Requirement A**

Demonstrated competence in the core requirements for the B.S. degree in Symbolic Systems. Candidates who have gone through the Symbolic Systems undergraduate program satisfy this requirement in the course of the B.S. degree in Symbolic Systems. Other students admitted as candidates for a Symbolic Systems M.S. degree must complete all the Symbolic Systems undergraduate core requirements, with the exception of the advanced small seminar requirement.

**Requirement B**

1. Completion of two additional skill requirements:
   a) **Computer Programming**: CS 108, Object-Oriented Systems Design; and
   b) **Empirical Methods**: one of the following:
      - COMM 206, Communication Research Methods
      - COMM 239, Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives
      - COMM 268/368. Experimental Research in Advanced User Interfaces
      - LINGUIST 280/CS 224N. Natural Language Processing
      - PSYCH 110. Research Methods and Experimental Design
The HCI Core:

- A weekly lecture series,
- Introduction to Formal Universal Grammar
- Lexicalist Foundations of Syntax
- Studies in Universal Grammar
- Phonetics
- Machine Learning
- Multi-Agent Systems
- Knowledge Representation
- Introduction to HCI Design
- Introduction to Databases

2. Completion of three quarters of the Symbolic Systems Program M.S. Seminar (SYMBSYS 291).

REQUIREMENT C

Completion of an approved specialization track. All tracks of the Symbolic Systems M.S. program require students to do a substantial project. The course requirements for each track are designed to prepare a student to undertake such a project. The nature of the project depends on the student’s focus, but may include software development, user testing, or a combination of these. In all cases, a written thesis or paper describing the project is required. The project normally takes three quarters, and work on the project may account for up to 15 units of a student’s program. Each track of the SSP M.S. program has its own core requirements, as well as unit requirements from a set of elective courses. The tracks and their requirements are given below.

The Human-Computer Interaction (HCI) Track — The HCI Core: a course in Computer Science numbered 141-179 (excluding 147), or CS 241-279 (excluding 247A), or CS 295, Software Engineering; and CS 147, Introduction to HCI Design; and CS 247A, Human-Computer Interaction: Interaction Design Studio; and CS 376, Research Topics in Human-Computer Interaction.

The Natural Language Technology (NLT) Track — For the NLT core, in addition to the courses below, students in the NLT track must complete LINGUIST 280/CS 224N, Natural Language Processing, which can be used as the empirical methods course for Requirement B above.

1) An in-depth theory of English grammar course such as LINGUIST 221A, Foundations of English Grammar
2) A graduate-level semantics course (if not already taken as part of Requirement A) such as LINGUIST 232A, Lexical Semantics, or 230B, Semantics and Pragmatics
3) A two-course sequence in Computational Linguistics:
   - LINGUIST 180, Introduction to Computer Speech and Language Processing, and
   - LINGUIST 283, Programming and Algorithms for Natural Language Processing

The NLT Electives (at least 8 units from the following list):

- Introduction to Databases
- Introduction to HCI Design
- Design and Analysis of Algorithms
- Artificial Intelligence: Principles and Techniques
- Knowledge Representation
- Multi-Agent Systems
- Probabilistic Models in Artificial Intelligence
- Machine Learning
- Text Retrieval and Web Search
- Topics in Artificial Intelligence
- Lexicalist Foundations of Syntax
- Introduction to Formal Universal Grammar
- Research Seminar in Syntax
- Semantics and Pragmatics
- Semantics Seminar
- Discourse Analysis
- Finite State Methods in Natural Language Processing
- Human Machine Translation
- Logic, Language, and Information
- Foundations of Cognition
- Psycholinguistics
- Special Topics in Psycholinguistics

The Individually Designed Option — Students wishing to design their own M.S. curriculum in Symbolic Systems must present a project plan as part of their application. This plan must be endorsed by the student’s adviser prior to admission to the Symbolic Systems M.S. program. The application must also specify at least 20 units of coursework that the student will take in support of the project.

Students are admitted under this option only if they present well-developed plans whose interdisciplinary character makes them inappropriate for any departmental master’s program, but appropriate for Symbolic Systems.

COURSES

SYMBSYS 10. Symbolic Systems Forum — A weekly lecture series, featuring different speakers who report on research of general interest to Symbolic Systems students and faculty. Regular attendance required for credit. May be repeated for credit.

SYMBSYS 100. Introduction to Cognitive Science — (Same as LINGUIST 144, PHIL 190, PSYCH 130.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

SYMBSYS 145. Cognition in Interaction Design — Interactive systems from the standpoint of human cognition. Topics include skill acquisition, complex learning, reasoning, language, perception, methods in usability testing, special computational techniques such as intelligent and adaptive interfaces, and design for people with cognitive disabilities. Students conduct analyses of real world problems of their own choosing and redesign/analyze a project of an interactive system. GER:DB-SocSci

SYMBSYS 170/270. Decision Behavior: Theory and Evidence — (Graduate students register for 270.) Introduction to the study of judgment and decision making, relating theory and evidence from disciplines such as psychology, economics, statistics, neuroscience, and philosophy. The development and critique of Homo economicus as a model of human behavior, and more recent theories based on empirical findings. Recommended: background in formal reasoning.

SYMBSYS 205. Systems: Theory, Science, and Metaphor — Systems science explores abstract properties of systems such as network connectivity, complexity, and emergence, with applications in natural, social, and artificial domains. How useful are these theories? Are their claims testable or generalizable? Do they change the way people think and talk? Topics announced during the previous quarter on course web site. Limited enrollment. Prerequisites: Symbolic Systems undergraduate core course in each of philosophy, psychology or linguistics, and computer science.

SYMBSYS 209. Battles Over Bits — The changing nature of information in the Internet age and its relationship to human behavior. Philosophical assumptions underlying practices such as open source software development, file sharing, common carriage, and community wireless networks, contrasted with arguments for protecting private and commercial interests such as software patents, copy protection, copyright infringement lawsuits, and regulatory barriers. Theory and evidence from disciplines including psychology, economics, computer science, law, and political science. Prerequisite: PSYCH 40, 55, 70, or SYMBSYS 202.

3 units, not given this year
RESEARCH

SYMBSYS 91. Junior Honors Seminar — Recommended for juniors doing an honors project during the following year. Defining a topic, choosing an adviser, considering overall goals. Resources at Stanford and some experiences of seniors discussed with guest speakers.
2 units, Win (Davies, T)

SYMBSYS 190. Senior Honors Tutorial — Under the supervision of their faculty honors adviser, students work on their senior honors project. May be repeated for credit.
1-5 units, Aut, Win, Spr, Sum (Staff)

SYMBSYS 191. Senior Honors Seminar — Recommended for seniors doing an honors project. Under the leadership of the Symbolic Systems program coordinator, students meet, discuss, and present their honors project.
2 units, Aut (Davies, T)

SYMBSYS 196. Independent Study — Independent work under the supervision of a faculty member. Can be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

SYMBSYS 198. Master’s Degree Project
1-15 units, Aut, Win, Spr, Sum (Staff)

SYMBSYS 199. Master’s Program Seminar — Enrollment limited to students in the Symbolic Systems M.S. degree program. May be repeated for credit.
1 unit, Aut (Davies, T)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

BIOSCI 20. Introduction to Brain and Behavior — (Same as HUMBIO 21.)
3 units, Aut (Fernald, R), alternate years, not given next year

BIOSCI 150/250. Human Behavioral Biology — (Same as HUMBIO 160.)
6 units, alternate years, not given this year

COMM 106/206. Communication Research Methods
4-5 units, Spr (Staff)

COMM 169/269. Computers and Interfaces
4-5 units, Win (Nass, C)

COMM 172/272. Psychological Processing of Media
4-5 units, Spr (Reeves, B)

CS 103A. Discrete Mathematics for Computer Science
3 units, Aut (Plummer, R), Win (Johnson, M)

CS 103B. Discrete Structures
3 units, Win (Cain, G), Spr (Johnson, M)

CS 103X. Discrete Structures (Accelerated)
3-4 units, Win (Koltun, V)

CS 106A. Programming Methodology — (Same as ENGR 70A.)
3-5 units, Aut (Young, P), Win (Roberts, E), Spr (Young, P), Sum (Staff)

CS 106B. Programming Abstractions — (Same as ENGR 70B.)
3-5 units, Win (Zelenski, J), Spr (Staff)

CS 106X. Programming Methodology and Abstractions (Accelerated) — (Same as ENGR 70X.)
3-5 units, Aut (Zelenski, J), Win (Cain, G), Sum (Staff)

CS 107. Programming Paradigms
3-5 units, Aut, Spr (Cain, G)

CS 108. Object-Oriented Systems Design
3-4 units, Aut, Win (Parlante, N)

CS 121. Introduction to Artificial Intelligence
3 units, Win (Latombe, J), Sum (Staff)

CS 147. Introduction to Human-Computer Interaction Design
3-4 units, Aut (Winograd, T)

CS 154. Introduction to Automata and Complexity Theory
3-4 units, Aut (Dill, D), Spr (Motwani, R), Sum (Staff)

CS 161. Design and Analysis of Algorithms
3-4 units, Aut (Plotkin, S), Win (Roughgarden, T), Sum (Staff)

CS 193D. Professional Software Development with C++
3 units, not given this year

CS 201. Computers, Ethics, and Social Responsibility
3-4 units, not given this year

3 units, Aut (Feddik, R)

CS 221. Artificial Intelligence: Principles and Techniques
3-4 units, Aut (Ng, A)

CS 222. Knowledge Representation
3 units, Spr (Shoham, Y; vanBenthem, J)

CS 223A. Introduction to Robotics
3 units, Win (Khatib, O)

CS 223B. Introduction to Computer Vision
3 units, Win (Thrun, S)

CS 224M. Multi-Agent Systems
3 units, Win (Shoham, Y)

CS 227. Reasoning Methods in Artificial Intelligence
3 units, Spr (Nayak, P)

CS 228. Probabilistic Models in Artificial Intelligence
3 units, Win (Koller, D)

CS 229. Machine Learning
3 units, Aut (Ng, A)

CS 224M. Multi-Agent Systems
3 units, Win (Shoham, Y)

CS 227. Reasoning Methods in Artificial Intelligence
3 units, Spr (Nayak, P)

CS 228. Probabilistic Models in Artificial Intelligence
3 units, Win (Koller, D)

CS 229. Machine Learning
3 units, Aut (Ng, A)

CS 247. Human-Computer Interaction Design Studio
3-4 units, Win (Klemmer, S)

CS 249. Object-Oriented Programming from a Modeling and Simulation Perspective
3-5 units, Aut (Linton, M)

CS 276. Text Retrieval and Web Search
3 units, Aut (Manning, C; Prabhakar, R)

3-4 units, Win (Winograd, T)

ECON 51. Economic Analysis II
5 units, Win, Sum (Staff)

ECON 137. Information and Incentives
5 units, Spr (Lara, Y)

ECON 160. Game Theory and Economic Applications
5 units, Win (Hammond, P)

ECON 178/278. Neuroeconomics — (Same as PSYCH 278.)
5 units, Spr (Staff)

EDUC 218. Topics in Cognition and Learning: Transfer
3 units, Aut (Schwartz, D)

EDUC 298. Online Communities of Learning
3 units, Spr (Pea, R)

EE 178. Probabilistic Systems Analysis
3 units, Win (El Gamal, A)

PROGRAM ON URBAN STUDIES

Director: Doug McAdam (Sociology)
Associate Director: Michael Kahan (Lecturer, History and Urban Studies)
Executive Committee: Albert Camarillo (History), Luis Fraga (Political Science), Karen Cook (Sociology), Milbrey McLaughlin (Education), Walter Scheidell (Classics), Jeff Vachtel (President’s Office)
Affiliated Faculty: Lawrence Bobo (Sociology), Scott Bukatman (Art and Art History), Albert Camarillo (History), Samuel Chiu (Management Science and Engineering), Karen Cook (Sociology), Richard Ford (Law), Luís Fraga (Political Science), Steven Gorelick (Geological and Environmental Sciences), David Grusky (Sociology), Miyako Inoue (Cultural and Social Anthropology), Sarah Jain (Cultural and Social Anthropology), Monica McDermott (Sociology), Raymond McDermott (Education), Daniel McFarland (Education), Milbrey McLaughlin (Education), Leonard Ortoloano (Civil and Environmental Engineering), Rob Reich (Political Science), Michael Rosenfeld (Sociology), Rebecca Sandefur (Sociology), Walter Scheidell (Classics), Karen Seto (Geological and Environmental Sciences), Jennifer Trimble (Classics), Nancy Brandon Tuma (Sociology, Hoover Institution), Paul Turner (Art and Art History), Barbara Voss (Cultural and Social Anthropology)
Lecturers: David Boesch, Melanie Edwards, Radford Hall, Michael Kahan, Michael Kieschnick, Laura Scher, Jackie Schmidt-Posner, Frederic Stout
Visiting Associate Professor: Gerald Gast

Department Offices: Building 120, Room 160
Mail Code: 94305-2048
Phone: (650) 723-3956
Email: urbanstudies@stanford.edu
Web Site: http://www.stanford.edu/dept/URBS

Courses given in the Program on Urban Studies have the subject code URBANST. For a complete list of subject codes, see Appendix.

The Urban Studies program treats urbanism as an interdisciplinary field; it brings together students, faculty, and outside specialists concerned with cities, and the impacts of cities on society and people’s lives. The Urban Studies major encourages students to inquire deeply into the nature of cities and the techniques used to modify urban environments. It prepares students to address urbanization, and gives students a knowledge base and theoretical, analytical, and practical skills to understand urban social systems and effect social change.

A major in Urban Studies prepares students for careers and advanced academic pursuits in fields including architecture, community service, education, environmental planning, real estate development, urban design, and urban planning; many have obtained graduate degrees in architecture, business, law, public policy, urban design, and urban planning from major universities across the country. Information on careers and graduate programs pursued by Urban Studies alumni is available from the Urban Studies program office.

UNDERGRADUATE PROGRAMS

The Urban Studies major requires students to complete four types of courses totaling at least 73 units: 19 units in the core; at least 8 units of skills courses; at least 25 units in an area of concentration; and 10 units in the capstone sequence. If units in these categories total less than 73, the remaining units may be fulfilled by courses in other concentrations or in Urban Studies courses numbered 1000 or higher (except URBANST 198 and 199). Majors must also complete two prerequisites: ECON 1A, Elementary Economics; and SOC 1, Introduction to Sociology; the units for these prerequisite courses do not count toward the 73 units required for the major. URBANST 198, URBANST 199, and prerequisites for required courses and for electives also do not count towards the 73-unit minimum.

Urban Studies students interested in graduate school in business or urban planning are advised to obtain basic quantitative skills by completing MATH 19, 20, and 21, or MATH 41 and 42, preferably before the junior year.

Urban Studies students should consider an internship in an urban organization in the public or private sector. Urban Studies majors may enroll once in URBANST 194 to receive credit for such an internship. Students can consult the Haas Center for Public Service for other courses with internship placements at community organizations.

Urban Studies students are encouraged to spend at least one quarter studying overseas to learn how cities vary across societies. Some Urban Studies core course requirements, as well as electives, can be satisfied at Stanford overseas campuses. Courses offered overseas vary from year to year, and students should check in advance with Overseas Studies and Urban Studies concerning which courses meet Urban Studies requirements. It is often possible to arrange a summer placement relevant to an Urban Studies major at Stanford’s overseas locations.

A minimum grade of ‘C’ is required for courses counted toward the 73-unit graduation requirement for the major. Qualified students may write a senior honors thesis and graduate with honors; see details in “Honors Program” below. Students interested in declaring Urban Studies as a major are required to meet first with one of the program directors; they then declare the Urban Studies major on Axess.

UBERN STUDIES CORE

Urban Studies majors should complete URBANST 110, Introduction to Urban Studies, before Spring Quarter of their junior year. The following courses, totaling 19 units, are required:

- URBANST 110. Introduction to Urban Studies
- URBANST 111. Urban Politics
- URBANST 112. The Urban Underclass
- URBANST 113. Introduction to Urban Design

SKILLS

A minimum of 8 units are required. The following courses may be used to fulfill the skills requirement; consult an adviser to determine if additional courses may be available:

- ARTSTUDI 60. Design I: Fundamental Visual Language
- SOC 180B. Introduction to Sociological Research II

CONCENTRATIONS

Students must complete at least 25 units in one of the following concentrations. Courses may not be double counted. Students should consult an adviser to develop a program that meets their intellectual goals; relevant courses not listed here may be counted toward the concentration with the prior consent of an adviser.

These concentrations are declared to the department; they are not declared on Axess, and they do not appear on the transcript or the diploma.

COMMUNITY ORGANIZATION

Focus is on how community action, philanthropy, and organizations in nonprofit and for-profit sectors address urban social problems. Courses concerned with public service and community organizations provide a foundation for more advanced studies of community conflict and the nonprofit sector. Other courses introduce students to concepts, skills, and aspects of urban planning and design. This concentration prepares students to enter graduate programs concerned with urban affairs and community service, and to work with local governmental agencies and for-profit and nonprofit organizations engaged in community service and development.

Students who wish to pursue a graduate degree in business or city planning are encouraged to take ECON 50, Economic Analysis I.

The following course is required for the community organization concentration:

- POLISCI 133. Ethics and Politics in Public Service

STANFORD BULLETIN, 2006-07 | 637
The following courses may be counted toward the community organization concentration:

CAS 88. Theories of Race and Ethnicity
CAS 115. Race and the American City
EDUC 270A. Learning to Lead in Public Service Organizations
ENGR 150. Social Innovation and Entrepreneurship
HISTORY 260. Race and Ethnicity in the American Metropolis
POLISCI 143. Nongovernmental Organizations and Development in Poor Countries
POLISCI 221T. Politics of Race and Ethnicity in the United States
POLISCI 236. Theories of Civil Society, Philanthropy, and the Nonprofit Sector
PUBLPOL 180. Social Innovation
PUBLPOL 183. Philanthropy and Social Innovation
SOC 118. Social Movements and Collective Action
SOC 137. Homelessness
SOC 140. Introduction to Social Stratification
SOC 141. Controversies About Inequality
SOC 141A. Social Class, Race/Ethnicity, Health
SOC 143. Prejudice, Racism, and Social Change
SOC 144. Race and Crime in America
SOC 145. Race and Ethnic Relations
SOC 147. Crime and Incarceration
SOC 160. Formal Organizations

or

MS&E 180. Organizations: Theory and Management
URBANST 126. Spirituality and Nonviolent Urban and Social Transformation
URBANST 131. Social Innovation and the Social Entrepreneur
URBANST 132. Concepts and Analytic Skills for the Social Sector
URBANST 133. Social Entrepreneurship Collaboratory

URBAN EDUCATION

The purpose of this concentration is to prepare students for a career in educational policy and practice in diverse settings. This concentration is a useful basis for graduate study in educational policy, law, or business, and for students who have been admitted by the School of Education to pursue a coterminal master's degree in the Stanford Teacher Education Program (STEP), the Policy, Organization and Leadership Studies Program (POLS), or the John Gardner Center for Youth and their Communities. Students planning to pursue a coterminal master's degree should take one of the three practicums: EDUC 103A, B, and C (for the STEP elementary coterminous program); EDUC 101X (for the STEP secondary coterminous); or EDUC 270A (for the POLS coterminous). Application and admission to a coterminous degree in these programs occurs during the Autumn Quarter of the junior year and is handled by the School of Education.

Opportunities to obtain teaching and advising experience are available in nearby schools through Upward Bound and other programs administered by the Haas Center for Public Service and through courses offered by the School of Education.

Students who choose this concentration may be eligible for the undergraduate honors program of the School of Education, in which case they should enroll in EDUC 199A, B, or C during their senior year.

The following course is required for the urban education concentration:

EDUC 212X. Urban Education

The following courses may be counted toward the urban education concentration:

EDUC 101X. Undergraduate Teaching Practicum
EDUC 103A. Exploring Elementary Teaching: Seeing a Child through Literacy
EDUC 103B. Race, Ethnicity, and Linguistic Diversity in Classrooms: Sociocultural Theory and Practices
EDUC 103C. Educational Policy, Diversity, and English Learners
EDUC 116X. Service Learning as an Approach to Teaching
EDUC 105. American Education and Public Policy
EDUC 177. Education of Immigrant Students: Psychological Perspectives
EDUC 179. Urban Youth and Their Institutions: Research and Practice
EDUC 179B. Youth Empowerment and Civic Engagement
EDUC 198X. Tutoring with Adolescents: Ravenswood Writes
EDUC 201. History of Education in the United States
EDUC 201A. History of African American Education
EDUC 201B. Education for Liberation
EDUC 202. Introduction to Comparative and International Education
EDUC 204. Introduction to the Philosophy of Education
EDUC 220A. Introduction to the Economics of Education
EDUC 220B. Introduction to the Politics of Education
EDUC 220C. Education and Society
EDUC 220D. History of School Reform: Origins, Policies, Outcomes, and Explanations
EDUC 221A. Policy Analysis in Education
EDUC 287. Culture and Learning
HUMBIO 126. Adolescent Development
PSYCH 60. Developmental Psychology
INTNREL 111. Education for All? Public Policy Making in Africa
POLISCI 34Q. Ethics and Politics of Teaching in the United States
SOC 132. Sociology of Education

URBAN PLANNING AND DESIGN

Focus is on policies and factors that affect planning and design of urbanized areas, and how plans and designs affect social, economic, and political life. Students should take a course applying economics to the solution of urban or regional problems and courses on urban policy making. Because urban and regional planners rely heavily on computers, students should take an introduction to geographic information systems. This concentration provides preparation for graduate programs in fields such as urban and regional planning, urban design, and public policy. Students who may pursue a graduate degree in business or city planning should take ECON 50, Economic Analysis I.

The following course is required for the urban planning and design concentration:

POLISCI 221R. Urban Policy

The following courses may be counted toward the urban planning and design concentration:

ANTHSCI 144. Urbanism in the Prehispanic New World
ARTHIST 3. Introduction to the History of Architecture
ARTHIST 141. The Invention of Modern Architecture
CAS 112. Archaeology of Modern Urbanism
CAS 133. City and Sounds
CAS 137E. Excavation at Catalhoyuk, Turkey
CEE 64. Air Pollution: From Urban Smog to Global Change
CEE 100. Managing Sustainable Building Projects
CEE 131. Architectural Design Process
CEE 142A. Sustainable Development
CEE 171. Environmental Planning Methods
CEE 172. Air Quality Management
ECON 150. Economic Policy Analysis
ECON 155 Environmental Economics and Policy
GES 138. Urbanization, Global Change and Sustainability
GES 142. Remote Sensing of Land Use and Land Cover Change
GES 144. Fundamentals of Geographic Information Systems
HISTORY 252G. Environmental History of Urban America
HISTORY 164. American Spaces: An Introduction to Material Culture and the Built Environment
ME 101. Visual Thinking
ME 120. History and Philosophy of Design
MS&E 196. Transportation Systems and Urban Development
POLISCI 221T. Politics of Race and Ethnicity in the United States
PUBLPOL 185. Managing Public Policy
SOC 137. Homelessness
SOC 147. Crime and Incarceration
SOC 160. Formal Organizations

or

MS&E 180. Organizations: Theory and Management
URBANST 158V. Urbanization and Land Use Change in China
SELF-DESIGNED

Students who wish to concentrate in an area of urban studies other than one of the above concentrations must complete the Urban Studies core, skills, and capstone requirement, and design additional units to bring the total to at least 73 units. The self-designed portion of the major should concentrate on a particular area of urban study, such as urban health care or urban environmental management. Additional units must be approved by both the Director of Urban Studies and an academic adviser who is a member of the Academic Council and has expertise in the particular area of interest to the student. Proposals for courses in the self-designed portion of the concentration should include a list of courses and a description of how each course meets the student’s educational objectives. A proposal for a self-designed concentration must be accompanied by a letter to the Director of Urban Studies indicating that the academic adviser has examined and approved the student’s plan.

Students pursuing a self-designed concentration must submit proposals for approval by the Director of Urban Studies by the middle of the second quarter of the student’s junior year. Applications received after that deadline are not considered. Students interested in designing their own concentration are strongly encouraged to meet with the Director of Urban Studies before the end of their sophomore year.

CAPSTONE

All majors are required to complete a sequence of two seminars, totaling 10 units, in which students design a senior project and write the results of their project. The capstone seminars can be used to satisfy the Writing in the Major requirement and to complete some work on an honors thesis. URBANST 201 or 202 should be taken in the junior year, and URBANST 203 in the senior year.

URBANST 201. Preparation for Senior Project (WIM)
or URBANST 202. Preparation for Honors Thesis (WIM)
URBANST 203. Senior Seminar

MINORS

The minor in Urban Studies is designed to introduce students to several disciplinary approaches to the study of cities, and provides the opportunity to explore one of three specialized options: community organization, urban education, or urban planning and design. Students must declare a minor in Urban Studies no later than the last day of the quarter that is four quarters before degree conferral.

The minor in Urban Studies requires completion of seven courses for a letter grade, including the four core courses, the required course in the student’s chosen concentration area, and two additional courses in that option as listed above.

HONORS PROGRAM

The honors program offers qualified students an opportunity to conduct independent research and to write a thesis summarizing the results. Before being accepted to the honors program in Urban Studies, a student must

1. declare a major in Urban Studies and complete at least 30 of the 73 required units including all prerequisites and core classes
2. complete URBANST 201 or 202 (offered Winter Quarter)
3. have an overall GPA of 3.3 and a GPA of at least 3.5 in Urban Studies
4. submit an application, including a one-page abstract and the signatures of an adviser and, if applicable, a second reader. If the adviser is not a member of Stanford’s Academic Council, the student must have a second reader who is an Academic Council member. The application must be submitted to the program office no later than the last day of classes in Spring Quarter of the junior year, and it must then be approved by the Director of the Urban Studies honors program.

Honors students are expected to complete a portion of their honors work in URBANST 203, Senior Seminar, in Autumn Quarter. Additionally, they must register for 5-10 units total in URBANST 199, Senior Honors Thesis, over the course of their senior year. The units of URBANST 199 do not count towards the 73-unit requirement for graduating with a B.A. in Urban Studies. Honors work is considered to be above and beyond regular graduation standards.

URBANST 201 or 202 should be taken during the junior year. Students who plan to be away during Winter Quarter of their junior year are advised to take URBANST 201 or 202 in the Winter Quarter of their sophomore year. All honors students are required to present their theses at the Senior Colloquium in Spring Quarter of senior year.

To graduate with honors, students must receive a grade of at least ‘A-’ in the honors work and have a GPA of at least 3.5 in courses for the Urban Studies major at the time of graduation.

COTERMINAL PROGRAMS

Undergraduates in Urban Studies may enter coterminal master’s degree programs in a number of departments and schools in the University. In recent years, Urban Studies majors have developed coterminal programs with the departments of Civil and Environmental Engineering, Cultural and Social Anthropology, and Sociology, and with the School of Education. Information and applications for coterminal degree programs are available at Undergraduate Advising and Research. Students should discuss the coterminal program with a program director during their junior year.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

COURSES

Further descriptions and details of current courses offered by the Program on Urban Studies may be obtained from the program office before each quarter.

URBANST 10. The Image of the City in Film, Art, and Popular Culture—How the modern city has been reflected in forms of contemporary popular culture including film, literature, art, music, advertising, and television. How the social and physical conditions of modern urbanism are reproduced and reinterpreted in popular culture; how urban narratives concerning the movement of literary characters from rural to urban settings as they move from innocence to experience, have been used to make sense of the urban experience.

1 unit. Sum (Staff)

URBANST 110. Introduction to Urban Studies—The study of cities and urban civilization. History of urbanization and disciplinary methodologies comprising the field of urban studies including economics, political science, sociology, urban design, urban history, and urban public policy.

GER:DB-SocSci

4 units, Aut, Win (Stout, F), Spr (Kahan, M)

URBANST 111. Urban Politics—(Same as POLISCI 121.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: POLISCI 2 or consent of instructor. GER:DB-SocSci

5 units, Win (Fraga, L)

URBANST 112. The Urban Underclass—(Same as SOC 149/249; graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci

5 units, Aut (Rosenfeld, M)

<tr>
<td>URBANST 113</td>
<td>Introduction to Urban Design</td>
<td>Urban design theory and contemporary practice. Issues in urban development and conservation. Neighborhood livability, central city revitalization, historic preservation, and regional growth through comparative case studies from N. America and abroad. Projects focus on neighborhood, downtown, and regional issues in San Francisco and the Bay Area. Two Saturday field workshops in San Francisco. GER:DB-EngrAppSci</td>
<td>5</td>
<td>Win (Gast, G)</td>
</tr>
<tr>
<td>URBANST 121</td>
<td>Civil Society and the Nonprofit Sector</td>
<td>(Same as POLISCI 232) Development of the idea of civil society from early Enlightenment Europe to the contemporary U.S. Historical and theoretical foundations. Contemporary features of the nonprofit sector including its legal, economic, political, and ethical dimensions. Structure and operation of modern philanthropy and challenges of the 21st century.</td>
<td>2-4</td>
<td>not given this year</td>
</tr>
<tr>
<td>URBANST 123</td>
<td>Introduction to Community-Based Research</td>
<td>Principles and practice of community-based research as a collaborative enterprise between academic researchers and community members. Guest speakers from community organizations, faculty members, and alumni of the Public Service Scholars Program. How experience with community organizations provides a starting point for developing community-based senior theses or independent research projects.</td>
<td>1</td>
<td>unit, Aut (Schmidt-Posner, J)</td>
</tr>
<tr>
<td>URBANST 126</td>
<td>Spirituality and Nonviolent Urban and Social Transformation</td>
<td>A life of engagement in social transformation is often built on a foundation of spiritual and religious commitments. Case studies of nonviolent social change agents including Rosa Parks, César Chávez, and Women in Black; the religious and spiritual underpinnings of their commitments. Theory and principles of nonviolence. Films and readings. A service learning component includes placements in organizations engaged in social transformation. GER:DB-Hum</td>
<td>5</td>
<td>units, not given this year</td>
</tr>
<tr>
<td>URBANST 131</td>
<td>Social Innovation and the Social Entrepreneur</td>
<td>Invited lecture series. Perspectives and endeavors of thought leaders and entrepreneurs who address social needs in the U.S. and internationally through private for-profit and nonprofit organizations, nongovernmental organizations, or public institutions.</td>
<td>1</td>
<td>unit, Aut (Staff)</td>
</tr>
<tr>
<td>URBANST 132</td>
<td>Concepts and Analytic Skills for the Social Sector</td>
<td>Analytical methods, marketing, language, organizational mission, strategy, and finance in the for-profit and nonprofit social sectors. Focus is on the integration of theory and application. Opportunities and limits of methods from the profit sector to meet social goals. Enrollment limited to 20. Prerequisite: ECON 1. GER:DB-SocSci</td>
<td>4</td>
<td>units, Win (Kieschnick, M)</td>
</tr>
<tr>
<td>URBANST 133</td>
<td>Social Entrepreneurship Collaboratory</td>
<td>Interdisciplinary student teams create and develop U.S. and international social entrepreneurship initiatives. Proposed initiatives may be new entities, or innovative projects, partnerships, and/or strategies impacting existing organizations and social issues in the U.S. and internationally. Focus is on each team’s research and on planning documents to further project development. Project development varies with the quarter and the skill set of each team, but should include: issue and needs identification; market research; design and development of an innovative and feasible solution; and drafting of planning documents. In advanced cases, solicitation of funding and implementation of a pilot project. Enrollment limited to 30. May be repeated for credit. Prerequisite: 131, 132 (may be taken concurrently), or consent of instructor.</td>
<td>4</td>
<td>units, Spr (Edwards, M; Scher, L)</td>
</tr>
<tr>
<td>URBANST 144</td>
<td>Dilemmas in Urban Education</td>
<td>Dichotomies such as: large, traditional schools versus small schools; segregation versus integration; and teacher certification versus large-scale testing. Topics: interaction of the city in the school through gang activity or job placement programs; current legal challenges; class size reduction; tracking; and retention and social promotion policies. Students contribute their own experiences. Goal is to explore issues facing education in an urban setting, not to solve problems. GER:DB-SocSci</td>
<td>5</td>
<td>units, not given this year</td>
</tr>
<tr>
<td>URBANST 147</td>
<td>Crime and Incarceration</td>
<td>(Same as SOC 147/247.) The process of criminal justice in the U.S.; major theories of criminal deviance. How individuals and social groups are processed through the criminal court system, historical changes in correctional philosophy and organizational structure; inmate socialization; and changes in the social environment of U.S. prisons. GER:DB-SocSci</td>
<td>5</td>
<td>units, not given this year</td>
</tr>
<tr>
<td>URBANST 161</td>
<td>U.S. Urban History since 1920</td>
<td>Possible topics include: the end of European immigration and its impact on cities; the rise of the automobile; mass culture and consumerism; the Depression and cities; WW II and the martial metropolis; de-industrialization; suburbanization; African American migration; urban renewal; riots, race, and the narrative of urban crisis; the impact of immigration from Asia, Latin America, and Africa; homelessness; the rise of the Sunbelt cities; gentrification; globalization and cities. GER:DB-SocSci</td>
<td>5</td>
<td>units, not given this year</td>
</tr>
<tr>
<td>URBANST 162</td>
<td>Managing Local Governments</td>
<td>In-the-trenches approach. Issues in leading and managing local governments in an era of accelerating and discontinuous change. Focus is on practical strategies related to financing, public services impacted by increasing demand and revenue constraints, the politics of urban planning, private-public partnerships, public sector marketing, entrepreneurial problem solving, promoting a learning and risk-taking organizational culture, and developing careers in local government. Enrollment limited to 25; preference to Urban Studies majors. GER:DB-SocSci</td>
<td>3-4</td>
<td>units, Win (Boesch, D)</td>
</tr>
<tr>
<td>URBANST 163</td>
<td>Land Use Control</td>
<td>Methods of land use control related to the pattern and scale of development and the protection of land and water resources. Emphasis is on the relationship between the desired land use goal and geographical landscape, physical externalities, land use law, and regulatory agencies. Topics include the historical roots of modern land use controls; urban reforms of the 19th century; private ownership of land; zoning; local, state, and federal land use regulation; and land trusts preservation. Smart growth, environmental impact consideration, private property rights, and special purpose agencies are related to current issues. GER:DB-SocSci</td>
<td>4</td>
<td>units, Spr (Hall, R)</td>
</tr>
<tr>
<td>URBANST 164</td>
<td>Utopia and Reality in Modern Urban Planning</td>
<td>(Same as ARTHIST 254.) Primarily for Urban Studies majors. Utopian urbanists such as Ebenezer Howard, Le Corbusier, and Frank Lloyd Wright who established the conceptual groundwork of contemporary urban planning practice. Research paper. GER:DB-Hum, WIM</td>
<td>5</td>
<td>units, Spr (Stout, F; Turner, P)</td>
</tr>
<tr>
<td>URBANST 165</td>
<td>Sustainable Urban and Regional Transportation Planning</td>
<td>Environmental, economic, and equity aspects of urban transportation in 21st-century U.S. Expanded choices in urban and regional mobility that do not diminish resources for future generations. Implications for the global environment and the livability of communities. GER: DB-EngrAppSci</td>
<td>4-5</td>
<td>units, not given this year</td>
</tr>
<tr>
<td>URBANST 168</td>
<td>Politics, Constitutions, and Building America</td>
<td>(Same as POLISCI 225D, PUBLPOPOL 127.) How Americans built their infrastructure; why financing infrastructure has changed. Sources include economic history, political history, public finance theory, and political economy theory.</td>
<td>5</td>
<td>units, Win (Wallis, J)</td>
</tr>
</tbody>
</table>
URBANST 171. Urban Design Studio — The practical application of urban design theory. Projects focus on designing neighborhood and downtown regions to balance livability, revitalization, population growth, and historic preservation.
5 units, not given this year

URBANST 180. Introduction to Social Science Research Methods 5 units, not given this year

URBANST 190. Urban Professions Seminar — Workshop. Contemporary practice of urban design and planning, community development, urban education, public service law, and related fields. Topics depend partly on student interests. Bay Area professionals lecture and respond to questions concerning their day-to-day work, impressions of their field, and the academic background recommended for their work.
1 unit, Win (Kahan, M)

URBANST 194. Internship in Urban Studies — For Urban Studies majors only. Students organize an internship in an office of a government agency, a community organization, or a private firm directly relevant to the major. Reading supplements internship. Paper summarizes internship experience and related readings.
2-4 units, Aut, Win, Spr (Staff)

URBANST 195. Special Projects in Urban Studies 1-5 units, Aut, Win, Spr (Staff)

URBANST 197. Directed Reading 1-5 units, Aut, Win, Spr (Staff)

URBANST 198. Senior Research in Public Service — Limited to seniors approved by their departments for honors thesis, and admitted to the year-round Public Service Scholars Program sponsored by the Haas Center for Public Service. What standards in addition to those expected by the academy apply to research conducted as a form of public and community service? How can communities benefit from research? Theory and practice of research as a form of public service. Readings in research theory and methods of participatory action research; presentations on research as service; workshops on each participant’s thesis work-in-progress; public presentation of completed research; and thesis evaluation by a community-based reader. May be repeated for credit. Corequisite: 199.
1-3 units, Aut, Win, Spr (Schmidt-Posner, J)

URBANST 199. Senior Honors Thesis 1-15 units, Aut, Win, Spr (Staff)

URBANST 200A. Choosing a Topic and Questions for a Senior Project — For juniors and sophomores majoring in Urban Studies or Sociology. Students choose a topic and narrow it to a manageable research question. Preparation for 201 or 202.
1-2 units, Aut (Kahan, M)

URBANST 201. Preparation for Senior Project — (Same as SOC 201.) First part of capstone experience for Urban Studies majors pursuing an internship-based project. Individually arranged internship beginning in Winter Quarter, minimum 5 hours per week. Prospective students must consult with instructor early in Autumn Quarter to plan placement. Reflections and assignments culminate in a research proposal. Internship normally continues in Spring Quarter; research proposed in the final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. WIM
5 units, Win (Kahan, M)

URBANST 202. Preparation for Honors Thesis — (Same as SOC 202.) Primarily for juniors in Sociology or Urban Studies thinking about writing a senior honors thesis; sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. Students write a research prospectus and grant proposal for research funding. WIM
5 units, Win (McAdam, D)

URBANST 203. Senior Seminar — Students write a substantial paper based on research or internship project developed in 201 or 202. Oral presentations.
5 units, Aut (Kahan, M)

OVERSEAS STUDIES
Courses approved for the Urban Studies major and taught overseas can be found in the “Overseas Studies” section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BEIJING
URBANST 158V. Urbanization and Land-Use Change in China — (Same as EARTHSYS 139X, GES 136.)
4 units, Spr (Seto, K)

URBANST 159V. China’s Environment and Prospects for Sustainability — (Same as EARTHSYS 137X, GES 135.)
4 units, Spr (Seto, K)

BERLIN
URBANST 143U. Architecture and the City, 1871-1990: Berlin as a Nucleus of Modernity — (Same as ARTHIST 110Y, HISTORY 229V, STS 119V.) GER:DB-Hum
4 units, Spr (Neckenig, F)

SANTIAGO
URBANST 157V. Traces of Authority: The City of Santiago de Chile—GER:DB-SocSci
5 units, Aut (Fuenzalida, E)

STANFORD IN WASHINGTON

Director: Adrienne Jamieson

Stanford in Washington provides highly-qualified undergraduates with an opportunity to work and study in the nation’s capital. In addition to providing students with an understanding of public policymaking, the program offers an opportunity to take advantage of the city’s unique cultural resources.

Central in the student’s educational experience is an internship. Students serve as interns at such institutions and agencies as the Senate, the House of Representatives, the Office of Management and Budget, the White House, the National Institutes of Health, the Smithsonian Institution, CNN, the departments of State, Justice, Education, and Health and Human Services.

In addition to the internship, students must also complete an academic course of study consisting of small tutorials taught by policy experts (5 units), and weekly policy seminars taught by Stanford faculty members (5 units). Frequently, speakers from the Washington policy community join students and faculty for discussions. Students usually write a major paper related to their internship for 3-5 units of credit. Course and seminar topics vary according to student and faculty interest.

Stanford in Washington offers “stretch quarters” in the Autumn and Spring (early September to mid-December, and late March to the end of June) and a regular quarter in Winter, which focuses on environmental and health policy. The program is designed for students in their junior year or the first quarter of their senior year. Applications must be completed two quarters in advance. For Autumn Quarter, apply early Winter Quarter of the previous year. For Winter Quarter, apply early Spring Quarter of previous year. For Spring Quarter, apply early Autumn Quarter. Students interested in the program may obtain a brochure at the Haas Center for Public Service, or call for information, (650) 725-2870.
As a general rule, students complete a minimum of four major assignments in both PWR 1 and 2. Written assignments vary from 5 to 15 pages in length, and students work intensively on revising each piece of writing. Oral presentations may involve collaborative work as well as multimedia elements. All assignments involve analyzing a range of texts as well as identifying, evaluating, and using multiple sources in support of academic and research-based arguments. In-class work focuses on how to read with an increasingly critical eye and how to identify, evaluate, integrate, and cite sources effectively.

Writing and Rhetoric classes enroll no more than 15 students, and all classes are conducted as seminars in which participation is crucial. In-class activities include close reading of and responding to the writing of peers; these workshops are augmented by a minimum of three individual or small group conferences with the PWR instructor during the quarter.

THE STANFORD WRITING CENTER

The Stanford Writing Center, located in Room 020 of Margaret Jacks Hall (Building 460), supports student writing in the full range of academic and extracurricular contexts. The center emphasizes support for students writing for PWR, Introduction to the Humanities, and Stanford Introductory Seminars, while also serving all Stanford undergraduates through one-to-one and group tutorials, workshops, and seminars. Other events sponsored or hosted by the center include regular Writers’ Nights featuring fiction and poetry readings, the “How I Write” series of dialogues with Stanford faculty, and spoken word performances. For further details on the center, visit the center’s web site at http://swc.stanford.edu.

PWR PEDAGOGY PROGRAM

PWR offers ENGLISH 397A, a pedagogy seminar for all graduate students (TA’s) from English, Modern Thought and Literature, and Comparative Literature who teach PWR courses as part of their graduate studies. Taught in the Autumn Quarter, the pedagogy seminar focuses on syllabus design, developing writing assignments, and responding to student writing. The history of rhetoric and writing supplies a theoretical foundation as well as practical lessons for how to teach writing and research most effectively. In the Winter and Spring, graduate students continue their pedagogical development through a series of workshops and seminars focused on specific issues in the teaching of writing. Elements of the pedagogy program include class visits; group evaluation of writing assignments; workshops and lectures; a handbook on teaching; a library of teaching materials; a program web site with links to other writing program sites; and individual work with mentors and peers.

TRAINING FOR PEER WRITING CONSULTANTS

PWR offers PWR 195, a course on the tutoring of writing for undergraduates selected to serve as peer writing consultants in the Stanford Writing Center and across the campus. PWR 198 serves undergraduates who plan to work as tutors in high school as part of the Ravenswood Writes project.

COURSES

The Writing and Rhetoric requirement approved by the Faculty Senate in May 2001 includes courses at three levels. The first-level course, taken in the first year, can be satisfied by courses in PWR or Structured Liberal Education; the curriculum emphasizes analysis and research-based argument. The second-level course, to be completed by the end of the sophomore year, is a writing and oral/media presentation course taught by the Program in Writing and Rhetoric and by other programs and departments; completion of Structured Liberal Education also satisfies the second-level requirement. The third-level course is a Writing in the Major (WIM) course taught in each major, providing students with systematic opportunities to develop skills for writing in their chosen fields. A list of certified WIM courses may be found in the tables of “Undergraduate Major Unit Requirements” in the “Undergraduate Degrees and Programs” section of this bulletin. WIM course descriptions may be found under individual department and program sections.

The new sequence of required courses provides a coordinated approach responsive to how students mature as writers, researchers, and presenters
during their undergraduate years. At each level, students develop greater sophistication in conducting inquiry and producing scholarly work in progressively more specific disciplinary contexts.

Before the term in which students enroll in the first two levels of the requirement, they review course descriptions on the program web site at http://pwr.stanford.edu. After reviewing the offerings, students submit a list of top choices, and the PWR office assigns students to courses based on these preferences.

**THE WRITING AND RHETORIC 2 REQUIREMENT**

As noted above, the second-level course requirement may be satisfied through completion of courses offered through PWR or by other programs and departments. Before the quarter in which students are assigned to enroll in the second-level course, they will be able to review all available courses that meet the requirement on the program web site at http://pwr.stanford.edu. In addition to PWR 2, designated Center for the Teaching of Learning (CTL) courses and Stanford Introductory Seminars (SIS) satisfy the second-level Writing and Rhetoric requirement (WR 2). SIS courses require an additional application form; see http://introsems.stanford.edu/ and the SIS Winter and Spring supplements for more information.

**COMMUNITY WRITING PROJECT (CWP)**

Students may elect to enroll in a section of PWR 1 or 2 designated as “CWP” on the PWR web site. Students in CWP sections write at least one project during the term (a grant proposal, pamphlet, news article, profile, or web site) for a local community service agency. The Community Writing Project coordinator provides an orientation for each CWP section, including a description of participating agencies. Community Writing Project assignments are then made in consultation with the instructor and the CWP coordinator.

PWR 1. Writing and Rhetoric 1 — Fulfills first level of the writing requirement. Rhetorical and contextual analysis of readings, research, and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Also for students admitted to Stanford prior to Autumn 2003-04 who scored 4 or 5 on the English AP Exam or 6 or 7 on the International Baccalaureate Higher Level Exam.

4 units, Aut, Win, Spr (Staff)

PWR 2. Writing and Rhetoric 2 — Further work in developing skills in argument and research-based writing, with emphasis on oral presentations of research-based arguments. Individual conferences with instructor, and collaborative projects. Prerequisite: PWR 1.

4 units, Aut, Win, Spr (Staff)

PWR 4. Directed Writing — For students who have completed the second level of the writing and rhetoric requirement and want further work on developing their writing. Analysis and research-based argument, writing for a range of audiences and in varied disciplinary contexts. Workshops and individual conferences. May be repeated for credit.

3-4 units, Spr (Reichard, C)

PWR 5. Independent Writing — For students who have completed the first two levels of the writing requirement and wish to work on a specialized writing project with the guidance of a PWR instructor. May be repeated for credit.

1-5 units, Aut, Win, Spr (Diogenes, M)

PWR 6. Writing Workshop

1 unit, Aut (Pellinen-Chavez, T)

PWR 91. Intermediate Writing — For students who have completed the first two levels of the writing requirement and want further work in developing skills in argument and research-based writing, emphasizing discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

3 units, Spr (Staff)

PWR 191. Advanced Writing — Open to undergraduates and graduate students. Crafting nonfiction prose in a range of genres. Tutorials, workshops, discussions. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

3 units, Spr (Diogenes, M)

PWR 192. Projects in Research, Writing, and Rhetoric — Advanced work on research projects, early drafts of theses, expository excursions, manifestos, scripts, first-hand accounts, investigative reports, proposals, comic disputations, and other textual, rhetorical and imaginative explorations. Shared work, discussions, and examination of methods, rhetorics, and styles in all disciplines. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Odenzinger, H)

PWR 193. Writing the Honors Thesis — For students from all majors in the process of writing an honors thesis. Review of key elements of thesis process, including literature reviews, structure, argumentation, style, and documentation. Group and individual workshops.

1-5 units, Win, Spr (Odenzinger, H)

PWR 194. Topics in Writing and Rhetoric — For students who have completed the Writing and Rhetoric requirement and are interested in pursuing further work in theories and practices of rhetoric. Topics may include the intersections of technology with writing and rhetoric, rhetorical practices in different time periods and locations, and major figures in the rhetorical tradition.

4 units, Spr (Staff)

PWR 195. Peer Writing Tutor Training Course — For students selected to serve as peer writing tutors in the Stanford Writing Center and/or at other campus sites. Readings on and reflection about writing processes, the dynamics of writing and tutoring situations, tutoring techniques, learning styles, diversity, and ethics. Observation of tutoring sessions, written responses to readings, and other written work.

3 units, Spr (Moneyhun, C)

PWR 198X. Tutoring with Adolescents: Ravenswood Writes — (Same as EDUC 198X.) Strategies and approaches for teaching writing to students from diverse backgrounds and languages, and cultural and learning styles. Course prepares students to become tutors for Ravenswood Writes. Prerequisites: application and committee approval.

3 units, Spr (Ball, A; Lansford, A; Tinker, J)
The School of Law was established as a department of the University in 1893. Its purpose is to provide a legal education for students who are fitted by their maturity and their previous academic training to pursue professional study under University methods of instruction. The curriculum leading to the first professional degree in law (J.D.) constitutes an adequate preparation for the practice of law in any English-speaking jurisdiction. Graduate work leading to the degrees of Master of Laws, Master of the Science of Law, and Doctor of the Science of Law is also offered. For the full curriculum, see the Stanford University School of Law web site at http://lawreg.stanford.edu. The school is on a two-term academic calendar: Autumn term classes begin for first-year students August 28, 2006 and on September 5, 2006 for all other students and the term ends on December 6, 2006; Spring term classes begin on January 9, 2007, and the term ends on April 25, 2007.

COURSES

GRADUATE

The following courses are open to qualified graduate students in other departments of the University with the consent of the instructor:

**LAW 240. Bankruptcy** — The rights of secured and unsecured creditors under state and federal law; rights of debtors. Topics include methods of collecting judgments, fraudulent conveyances, general assignments, bankruptcy jurisdiction, powers of the trustee, the automatic stay, reorganization under Chapter 11, and policy considerations underlying the bankruptcy code, along with its relationship to other facets of commercial law.

3 semester units, Spr on the Win quarter schedule (Cole, M)

**LAW 243. Bayesian Statistics and Econometrics** — Linear and nonlinear regression, covariance structures, panel data, qualitative variable models, nonparametric and semiparametric methods, time series, Bayesian model averaging, and variable selection. Bayesian methodology including Markov chains, Monte Carlo methods, hierarchical models, model checking, mixture models, empirical Bayesian approaches, approximations, and computational issues.

4 semester units, Spr on the Win quarter schedule (Strnad, J)

**LAW 268. Democracy and the Constitution** — (Same as PHIL 374C, POLISCI 434.) Connections between democratic theory and constitutional theory. Sources include political philosophy, constitutional law, and jurisprudence, and arguments about freedom of expression, campaign finance, legislative apportionment, and privacy. Readings from Scalia, Breyer, Ely, Ackerman, Dahl, Habermas, Dworkin, Przeworski, Riker, and Schumpeter. Non-Law enrollment limited to 10 chosen by lottery.

2 semester units, Spr on the Win quarter schedule (Cohen, J)

**LAW 307. Gender, Law, and Public Policy** — Equal protection standards, employment, reproductive rights, sexual harassment, rape, domestic violence, pornography, sexual orientation, feminist legal theory, and the family. Prerequisite: consent of instructor.

3 semester units, Aut semester (Rhode, D)

**LAW 313. Health Law and Policy I** — (Same as HRP 210.) First of two-course sequence; may be taken separately or in any order. Open to law or medical students and to qualified undergraduates by consent of instructor. The American health care system and its legal and policy problems. Topics: the special characteristics of medical care compared to other goods and services, the difficulties of assuring quality care, the complex patchwork of the financing system, and the ethical problems the system raises.

3 semester units, not give this year (Greely, H)

**LAW 314. Health Law and Policy II** — Second of a two-course sequence; may be taken separately or in any order. For medical students; graduate students admitted by consent of instructor. The American health care system and its legal and policy problems. Focus is on medical ethics issues and public health. Topics include end of life, reproductive rights, research ethics, the Food and Drug Administration, and public health law.

3 semester units, Aut quarter schedule (Greely, H)

**LAW 326. Intellectual Property: Patents** — Patentability, including novelty, nonobviousness, and enablement; infringement; and remedies. Emphasis is on legal principles and policy analysis of the patent system.

3 semester units, Aut quarter schedule (Lemley, M)

**LAW 330. International Human Rights** — Emphasis is on international human rights treaties and agreements, international and regional human rights courts and tribunals, and international human rights organizations,
governmental and nongovernmental. The postwar emergence of civil and political human rights. Normative justifications for enforcing human rights beyond the bounds of national sovereignty, and challenges to these justifications under the forces of globalization.

3 semester units, Spr on the Win quarter schedule (Stacy, H)

**LAW 336. International Jurisprudence** — International law seeks to regulate the behavior of states in accordance with international norms, and encourage states to regulate their citizens pursuant to those norms. Ideas underpinning international law about sovereignty, self-determination, legitimate war, humanitarian intervention, economic aid, and human rights. Sources include writers such as Grotius, Machiavelli, Hobbes, Kant, Marx, Rawls, Sen, and Okin.

3 semester units, Aut quarter schedule (Stacy, H)

**LAW 338. Land Use** — Pragmatic aspects of contemporary land use law and policy. Nuisance as a land use tool and foundation for modern land use law; use and abuse of the police power as the legal basis for land use control; zoning flexibility; vested property rights, development agreements, and takings; redevelopment; growth control; and direct democracy. How land use decisions affect environmental quality and how land use decision making addresses environmental impacts. Balancing legal, political, economic, and public interest considerations in land use advocacy and decision making.

3 semester units, Aut quarter schedule (Caldwell, M; Diamond, S)

**LAW 343. Scientific Evidence and Expert Testimony** — The use of scientific evidence in cases where the science is complicated but not in dispute. Emphasis is on patent infringement litigation. The tasks of expert testimony on: to help litigators determine which legal issues to argue, and to explain the science to judge and jury. Student teams prepare simulations involving direct and rebuttal expert testimony.

3 semester units, Aut semester (Morris, R)

**LAW 360. Terrorism** — (Same as COMPLIT 356, GERGEN 353.) Interdisciplinary seminar. How to define terrorism and distinguish it from legitimate forms of political resistance. Is terrorism political or criminal? How has terrorism altered the perception of permissible restriction of civil liberties? How does terrorism affect societies?

2 semester units, Aut quarter schedule (Eshel, A; Weiner, A)

**LAW 407. International Deal Making** — (Same as GSBGEN 583.) The application of legal and business knowledge to real world transactions in the international context. Deal structuring, identifying and resolving legal and business concerns, negotiations, documentation, and deal closing. Case studies.

2 semester units, Aut quarter schedule (Franklin, L)

**LAW 409. Introduction to Intellectual Property** — Patents, copyrights, trademarks, and trade secrets; key legal issues.

4 semester units, Spr semester (Morris, R)

**LAW 514. California Coast: Science, Policy, and Law** — (Same as CEE 175A/275A, EARTHSYS 175/275.) Interdisciplinary. The legal, science, and policy dimensions of managing California’s coastal resources. Coastal land use and marine resource decision making. The physics, chemistry, and biology of the coastal zone, tools for exploring data from the coastal ocean, and the institutional framework that shapes public and private decision making. Field work: how experts from different disciplines work to resolve coastal policy questions.

3 semester units, Spr on the Win quarter schedule (Caldwell, M; Boehm, A; Sivas, D)

**LAW 538. Sociology of Law** — (Same content as SOC 136/236.) Major issues and debates in the sociology of law. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision-making and morality; cognitive decision-making; crime and deviance; the law in action versus the law on the books; organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement.

3 semester units, Spr on the Win quarter schedule (Dauber, M)

**LAW 604. Environmental Workshop: Land Conservation** — Academics, practitioners, and policy makers discuss their current research or work in the environmental and natural resources field. Students lead in-class discussions.

2 semester units, Spr on the Win quarter schedule (Caldwell, M)

**LAW 605. International Environmental Law: Climate Change** — Legal, political, economic, and organizational issues associated with the formation of international regimes for the environment. The problem of climate change: the Framework Convention on Climate Change, the Kyoto Protocol, and post-Kyoto negotiations. The Montreal Protocol for Ozone Depleting substances and the work of the World Council on Oceans.

2 semester units, Spr on the Win quarter schedule (Heller, T)

**LAW 611. International Conflict Resolution** — (Same as MS&E 459, PSYCH 283.) Sponsored by the Stanford Center on International Conflict and Negotiation (SCICN). Interdisciplinary colloquium. Conflict, negotiation, and dispute resolution emphasizing international dimensions including conflicts involving states, peoples, and political factions. Lectures by SCICN faculty and affiliated scholars, guest lecturers, and practitioners from around the world.

1 semester unit, Spr on the Win quarter schedule (Weiner, A)

**LAW 615. Negotiation** — Tools and concepts for analyzing and preparing for negotiations. Issues of representation, ethics, and the place of negotiation in the legal system.

3 semester units, Spr on the Win quarter schedule (Dickstein, M; Martinez, J)

**LAW 628. Interpersonal Influence and Leadership** — How to build more open and effective working relationships as well as the foundational skills of face-to-face leadership. Improving knowledge and abilities in interpersonal communication is crucial to becoming a more effective leader in today’s complex and highly interdependent organizations. The entire course is about learning from experience, an essential skill for leading organizations through a changing environment.

4 semester units, Spr on the Win quarter schedule (Robin, C)

**NONPROFESSIONAL**

The following courses are open to undergraduates in other departments, and may be counted toward the non-Law degrees depending upon the requirements of a given major, but not toward professional degrees in Law.

**LAW 106. Introduction to American Law** — (Same as AMSTUD 179, POLISCI 122.) For undergraduates. The structure of the American legal system including the courts, American legal culture, the legal profession and its social role, the scope and reach of the legal system, the background and impact of legal regulation, criminal justice, civil rights and civil liberties, and the relationship between the American legal system and American society in general. GER:DB-SocSci

5 quarter units, Aut (Friedman, L)

**LAW 107Q. Legal Craft and Moral Institutions** — (Same as POLISCI 33Q.) Stanford Introductory Seminar. Preference to sophomores. The conflict between translating rules for social interaction into legal practices versus deciding what constitutes impermissible harm-causing, coercion, or discrimination. Approaches to this conflict through cases such as: can government forbid wetland development without compensating property owners; why might private nurses or Playboy bunnies but not flight attendants be selected on the basis of gender; why is gender equality in resource distribution provided for college athletes but not math graduate students? GER:DB-SocSci

4 quarter units, Win (Kelman, M)

**LAW 108Q. The Federalist** — Stanford Introductory Seminar. Preference to sophomores. A series of newspaper essays drafted to help secure passage of the Constitution in 1787-88, and widely considered American’s single greatest contribution to political theory. The authors’ arguments about democratic government, federalism, separation of powers, and constitutionalism.

3 quarter units, Spr (Kramer, L)
SCHOOL OF MEDICINE

Dean: Philip Pizzo
Senior Associate Dean for Medical Education: Julie Parsonnet
Senior Associate Dean for Research: Daria Mochly-Rosen
Senior Associate Dean for Research and Training: Harry B. Greenberg

The School of Medicine offers courses of study leading to the M.S., Ph.D., and M.D. degrees.

UNDERGRADUATE PROGRAMS

At the undergraduate level, a number of the school’s courses are open to any registered Stanford student who has fulfilled the prerequisites, subject to the usual limits of course enrollment and faculty approval. In the classroom, the school offers courses targeted to undergraduates as well as graduate-level courses where advanced undergraduates with a strong background in the life sciences are welcome. Among these offerings are many Stanford Introductory Seminars for freshmen and sophomores; interested students are encouraged to peruse the complete list of these offerings in the “Stanford Introductory Seminars” section of this bulletin or at http://www.stanford.edu/group/introsems/.

GRADUATE PROGRAMS

M.S. AND PH.D. PROGRAMS

The School of Medicine is home to graduate programs covering a broad range of disciplines within biomedical leading to Ph.D. or M.S. degrees. All of these programs focus on interdisciplinary training with in-depth investigation of an original problem of fundamental importance to bioscience. Each degree program sets its own curriculum, but many courses are taught by groups of faculty from multiple programs and departments. Flexibility is a priority to ensure that all students obtain the best possible training for pursuing careers in their areas of interest. Admission is through one of about 15 home programs. These home programs enable students to carry out dissertation research and training with School of Medicine faculty, as well as investigators in the departments of Biological Sciences and Biophysics in the School of Humanities and Sciences. Detailed information on School of Medicine M.S. and Ph.D. programs, curricula, and research can be found at http://med.stanford.edu/ms/ and http://med.stanford.edu/phd/. Application information may be obtained from Graduate Admissions, Office of the University Registrar, Stanford University, 630 Serra Street, Suite 120, Stanford, CA 94305-6032, or at http://gradadmissions.stanford.edu/.

M.D. PROGRAM

The School of Medicine seeks to attract students who are passionate about scholarship and wish to improve the health of the world’s people through research, innovation, and leadership. The Stanford M.D. curriculum provides education in biomedical and clinical sciences along with study and independent research through scholarly concentrations. Emphasis is placed on interdisciplinary learning, with streamlined content and melding of basic science and clinical instruction across the curriculum. Blocks of unscheduled time allow for individual or group study, participation in elective courses, research, and reflection. Alternative pathways through the curriculum include an option of a fifth or sixth year of study as well as opportunities for pursuing a second degree, such as an M.P.H. or Ph.D.

Broad clinical science education occurs throughout the curriculum with exposure to patient care and the practice of medicine beginning on the first day of medical school. Students may begin clinical clerkships as opportunities for pursuing a second degree, such as an M.P.H. or Ph.D.

M.S. AND PH.D. PROGRAMS

The School of Medicine offers courses of study leading to the M.S., Ph.D., and M.D. degrees. All of these programs focus on interdisciplinary training with in-depth investigation of an original problem of fundamental importance to bioscience. Each degree program sets its own curriculum, but many courses are taught by groups of faculty from multiple programs and departments. Flexibility is a priority to ensure that all students obtain the best possible training for pursuing careers in their areas of interest. Admission is through one of about 15 home programs. These home programs enable students to carry out dissertation research and training with School of Medicine faculty, as well as investigators in the departments of Biological Sciences and Biophysics in the School of Humanities and Sciences. Detailed information on School of Medicine M.S. and Ph.D. programs, curricula, and research can be found at http://med.stanford.edu/ms/ and http://med.stanford.edu/phd/. Application information may be obtained from Graduate Admissions, Office of the University Registrar, Stanford University, 630 Serra Street, Suite 120, Stanford, CA 94305-6032, or at http://gradadmissions.stanford.edu/.

M.D. PROGRAM

The School of Medicine seeks to attract students who are passionate about scholarship and wish to improve the health of the world’s people through research, innovation, and leadership. The Stanford M.D. curriculum provides education in biomedical and clinical sciences along with study and independent research through scholarly concentrations. Emphasis is placed on interdisciplinary learning, with streamlined content and melding of basic science and clinical instruction across the curriculum. Blocks of unscheduled time allow for individual or group study, participation in elective courses, research, and reflection. Alternative pathways through the curriculum include an option of a fifth or sixth year of study as well as opportunities for pursuing a second degree, such as an M.P.H. or Ph.D.

Broad clinical science education occurs throughout the curriculum with exposure to patient care and the practice of medicine beginning on the first day of medical school. Students may begin clinical clerkships as early as May of the second year. All medical students complete formal clinical experiences in medicine, surgery, pediatrics, obstetrics-gynecology, family medicine, psychiatry, neurology, and critical care.

Scholarly concentrations offer opportunities for training in research methodologies that can be applied to a medical field of interest. The scholarly concentrations include bioengineering, biomedical ethics and medical humanities, biomedical informatics, clinical research, community health, health services and policy research, and molecular basis of medicine. Students may pursue a scholarly concentration through the Scholars Track or the Original Research Track. In the Scholars Track, students must complete course work and demonstrate, for example through a term paper, the ability to think critically within the methodological domain. Students in the Original Research Track complete required course work and pursue an independent, faculty-mentored research project, concluding with write-up of the project. Such an original research project typically requires extension of the curriculum beyond the traditional four years. Although students may apply their scholarly concentration methods to any medical field, some School of Medicine multidisciplinary centers are associated with academies that provide opportunities for structured application of scholarly concentration methodologies to a content area. These centers include: the Cancer Center; the Cardiovascular Institute; the Neuroscience Institute; the Institute of Immunity, Transplantation and Infection; and Women’s Health at Stanford. Students may also conduct a traveling scholars project overseas.

Students with interests in medical research as a career are urged to investigate opportunities available under the auspices of the Medical Scientist Training Program (MSTP). Stanford also participates in a joint Master of Public Health program with the University of California, Berkeley, which requires an additional year to complete. Details about these programs may be found at http://med.stanford.edu/admissions/.

Stanford recognizes the diversity of the United States and California populations and is committed to representing this diversity in the medical student class. Provided an applicant to the school has completed the basic courses in physics, chemistry, and biology, the choice of an undergraduate major may reflect other interests, including the arts and humanities. Course work in biochemistry and the behavioral sciences is recommended because of their importance in understanding medicine. Extracurricular activities and breadth of interests and experiences play an important role in the selection of students from among those applicants having superior records.

The M.D. degree requires 13 quarters of full tuition; the joint M.D./Ph.D. degree requires 16 quarters. All additional quarters are charged at the reduced Terminal Medical Registration (TMR) tuition rate, which is $1,990 per quarter in 2006-07. Completion of the M.D. degree must be achieved within six years, unless a petition is granted to extend this time frame. For further details on the M.D. degree, including admission requirements, see http://med.stanford.edu/admissions/.

MULTIPLE-DEGREE PROGRAMS

MEDICAL SCIENTIST TRAINING PROGRAM

The Medical Science Training Program (MSTP) provides medical students with an opportunity to pursue an individualized program of research and course work leading to both the M.D. and Ph.D. degrees. It is designed to equip students for careers in academic investigative medicine, and emphasizes individualization of curricular and research programs for each trainee. Training for a combined M.D./Ph.D. should include the same content encountered by students who pursue each degree separately, but the total training time should be less than the sum of the time normally required for each degree. The flexible curriculum at Stanford University School of Medicine allows each student, in consultation with a preceptor and other advisers, to pursue a plan of study that satisfies the requirements for the M.D. degree and allows performance of doctoral-level research leading to the Ph.D. Students interested in joining MSTP are considered for admission at the time of their application to the School of Medicine M.D. program and are asked to provide supplemental information relevant to their research background. Current Stanford M.D. students may also apply for admission to the MSTP. Further information regarding admission may be obtained from the MSTP administrator; general details about the MSTP may be found at http://mstp.stanford.edu.

MASTER OF SCIENCE IN MEDICINE PROGRAM

The Master of Science in Medicine program admits Ph.D. students who have a commitment to translational research, but are not interested in becoming clinicians. The goal of the program is to train researchers in human biology and disease so they are more able to translate new scientific
discoveries into useful medical advances. Students offered admission into any Ph.D. program at Stanford may apply for admission to the master's program. During their first five quarters, students take basic biomedical science courses with Stanford M.D. students. The School of Medicine M.D. curriculum is presented in a succinct format that allows time for students to concurrently complete their Ph.D. course requirements and lab rotations. By early in their second year, students choose a lab for their Ph.D. thesis research and complete their medical course work. They also elect a clinical mentor to discuss translational research needs and help to arrange a short clinical experience. Upon completion of the Ph.D., participating students receive an M.S. in Medicine. Details about the program can be found at http://msm.stanford.edu.

COURSES

The following courses are open to undergraduates or graduate students. Additional courses may also be available; see http://www.med.stanford.edu/education/ for more information.

STANFORD INTRODUCTORY SEMINARS

MED 70Q. Cancer and the Immune System — Stanford Introductory Seminar. Preference to sophomores. Myths and facts surrounding the idea that the immune system is capable of recognizing malignant cells. The biological basis and function of effector arms of the immune system; how these mechanisms may be used to investigate the biological basis and potential therapy of cancer. How the immune system functions. WRITE-2
3 units, Spr (Negrin, R)

MED 87Q. Women and Aging — (Same as HUMBIO 87Q.) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender
5 units, Win (Winograd, C)

MED 88Q. Dilemmas in Current Medical Practice — Stanford Introductory Seminar. Preference to sophomores. Social, political, scientific, and economic forces influencing medical practice. Spiraling costs, impaired access to health care, and disillusionment toward the health care system. Attempts by government and medical insurers to control costs through managed care and health maintenance organizations. Medical education and how it has affected the practice of medicine. Alternative health care, preventive medicine, and the doctor-patient relationship. The paradox of health in America: why do so many people who are healthy feel unhealthy? Optional observation of instructors in their medical practices.
3 units, Aut (Croke, J; Jones, H)

MED 93Q. The AIDS Epidemic: Biology, Behavior, and Global Responses — Stanford Introductory Seminar. Preference to sophomores. How the discovery of the causative agent and the modes of transmission of HIV fueled a quest for prevention, treatments, and a vaccine. Discoveries in biology, biotechnology, epidemiology, and medicine during the last 20 years. Hypotheses about the origins of HIV as a human disease; the spread of AIDS and HIV; social, political, and economic consequences of the epidemic; and national and global responses.
3 units, Aut (Katzenstein, D)

MED 94Q. Hormones, Health, and Disease — Stanford Introductory Seminar. Preference to sophomores. Hormones’ roles in maintaining health; how abnormalities in hormones cause disease. Topics include: the pituitary, the master gland; thyroid hormones and metabolism; insulin and diabetes; adrenal steroids and hypertension; vitamin D, parathyroid hormone, calcium, and osteoporosis; sex hormones, birth control, pregnancy, and menopause; androgens, erectile dysfunction, and athletic performance; cholesterol, obesity, and cardiovascular risk. Recommended: background in human biology and physiology.
3 units, Win (Feldman, D)

MED 108Q. Human Rights and Health — Stanford Introductory Seminar. Preference to sophomores. History of human-rights law. Topics such as: the health status of refugees and internally displaced persons; child labor; trafficking in women and children; torture; poverty, the environment, and health; access to clean water; domestic violence and sexual assault; and international availability of drugs. International conventions on human rights as background for social and political changes that could improve the health of groups and individuals. Optional opportunities to observe at sites where human rights and health are issues.
3 units, Win (Laws, A)

MED 118Q. Coronary Heart Disease, Pathophysiology, and Treatment — Stanford Introductory Seminar. Preference to sophomores. Known factors promoting the atherosclerotic process, and the pathologic changes that characterize clinical coronary artery disease. The development of arterial disease and the consequences of coronary occlusion, including heart attack, cardiac rhythm disturbance, and congestive heart failure. Treatment modalities such as cardiac medications, coronary surgery, and angioplasty.
3 units, Spr (Stertzer, S)

UNDERGRADUATE AND GRADUATE

INDE 136. Foundations of Bioethics — Classic articles, legal cases, and foundational concepts. Theoretical approaches derived from philosophy. The ethics of medicine and research on human subjects, assisted reproductive technologies, genetics, cloning, and stem cell research. Ethical issues at the end of life.
3 units, not given this year

INDE 245. Women and Health Care — Lecture and seminar series. Topics of interest to women as health care consumers and providers. The historical role of women in health care with current and future changes.
1-2 units, Aut (Grudzen, M; Massion, C; LeBaron, S)

MED 147/247. Community and Clinical Research Skills — (Graduate students register for 247.) Pragmatic skills for the design, implementation, and analysis of structured interviews, focus groups, survey questionnaires, and field observations. Strengths and limitations of study designs. How to construct interview and focus group questions, moderate focus groups, analyze data using qualitative software, design surveys, and interpret commonly used statistical analysis.
2 units, Win (Kiernan, M; Formmann, S)

MED 199. Undergraduate Research — Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MED 207. History of Medicine — Weekly lectures that trace the development of Western medical tradition from Babylonian, Egyptian, and Greek ancient cultures to the present.
1 unit, Win (Camargo, C)

1 unit, Win (Laws, A)

MED 255. The Responsible Conduct of Research — Forum. How to identify and approach ethical dilemmas that commonly arise in biomedical research. Issues in the practice of research such as in publication and interpretation of data, and issues raised by academic/industry ties. Contemporary debates at the interface of biomedical science and society regarding research on stem cells, bioweapons, genetic testing, human subjects, and vertebrate animals. Completion fulfills NIH/ADAMHA requirement for instruction in the ethical conduct of research. Recommended: research experience.
1 unit, Aut, Win, Spr, Sum (Tobin, S)

MED 262. Economics of Health Improvement in Developing Countries — (Same as HUMBIO 121.) Application of economic paradigms and empirical methods to health improvement in developing countries.
Emphasis is on unifying analytic frameworks and evaluation of empirical evidence. How economic views differ from public health, medicine, and epidemiology; analytic paradigms for health and population change; the demand for health; the supply of health; the role of health in international development. Prerequisites: background in economics and statistics, and consent of instructor.

5 units, Win (Miller, N)

MED 272A. Biodesign Innovation: Needs Finding and Concept Creation — (Same as BIOE 374A, OIT 384, ME 374A.) Two quarter sequence. Strategies for interpreting clinical needs, researching literature, and searching patents. Clinical and scientific literature review, techniques of intellectual property analysis and feasibility, basic prototyping, and market assessment. Student entrepreneurial teams create, analyze, and screen medical technology ideas, and select projects for development.
3-4 units, Win (Yock, P; Makower, J; Zenios, S; Milroy, J)

MED 272B. Biodesign Innovation: Concept Development and Implementation — (Same as BIOE 374B, OIT 385, ME 374B.) Two quarter sequence. Concept development and implementation. Early factors for success; how to prototype inventions and refine intellectual property. Lectures, guest medical pioneers, and entrepreneurs about strategic planning, ethical considerations, new venture management, and financing and licensing strategies. Cash requirements; regulatory (FDA), reimbursement, clinical, and legal strategies, and business or research plans.
3-4 units, Spr (Yock, P; Makower, J; Zenios, S; Milroy, J)

MED 276. Careers in Biomedical Technology — Career tracks in biomedical technology for medical, life science, engineering, business, and law students. Industry professionals describe career tracks, current roles, and industry perspectives.
1-2 units, Aut, Spr (Popp, R; Yock, P)

MED 289. Introduction to Bioengineering Research — (Same as BIOE 390.) Preference to medical and bioengineering graduate students. Bioengineering is an interdisciplinary field that leverages the disciplines of biology, medicine, and engineering to understand living systems, and engineer biological systems and improve engineering designs and human and environmental health. Topics include: imaging; molecular, cell, and tissue engineering; biomechanics; biomedical computation; biochemical engineering; biosensors; and medical devices. Limited enrollment.
1-2 units, Aut, Win (Taylor, C)

MED 299. Directed Reading in Medicine — Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MED 399. Graduate Research — Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

BIOCHEMISTRY

Chair: Mark A. Krasnow
Associate Professors: Pehr A. B. Harbury, Julie A. Theriot
Assistant Professor: Aaron F. Straight
Courtesies Professors: Chaitan S. Khosla, Sharon Long
Department Offices: Beckman Center, B400
Mail Code: 94305-5307
Phone: (650) 723-6161
Web Site: http://biochemistry.stanford.edu/

Courses given in Biochemistry have the subject code BIOC. For a complete list of subject codes, see Appendix.

Biochemistry is a department within the School of Medicine, with offices and labs located in the Beckman Center for Molecular and Genetic Medicine at the Stanford Medical Center. Courses offered by the department may be taken by undergraduate, graduate, and medical school students.

Advanced courses are offered in more specialized areas and they emphasize the most recent developments in biochemistry, cell biology, and molecular biology. These courses include the physical and chemical principles of biochemistry, enzyme reaction mechanisms, membrane trafficking and biochemistry, molecular motors and the cytoskeleton, mechanisms and regulation of nucleic acid replication and recombination, the biochemistry of bacterial and animal viruses, the molecular basis of morphogenesis, the molecular and cell biology of yeast, and the structure and function of both eukaryotic and prokaryotic chromosomes.

Opportunities exist for directed reading and research in biochemistry and molecular biology, utilizing the most advanced research facilities, including those for light and electron microscopy, chromatography and electrophoresis, protein and nucleic acid purification, rapid kinetic analysis, synthesis and analysis, single molecule analyses using laser light traps, microarray generation and analysis and computer graphic workstation facilities for protein and nucleic acid structural analysis. Ongoing research utilizes a variety of organisms, from bacteria to animal cells.

GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

Requirements for the M.S. and Ph.D. degrees are described in the “Graduate Degrees” section of this bulletin. The department does not offer undergraduate degrees.

The Department of Biochemistry offers a Ph.D. program which begins in the Autumn Quarter of each year. The program of study is designed to prepare students for productive careers in biochemistry; its emphasis is training in research, and each student works closely with members of the faculty. In addition to the requirement for a Ph.D. dissertation based on original research, students are required to complete six advanced courses in biochemistry and related areas. Selection of these courses is tailored to fit the background and interests of each student. A second requirement involves the submission of two research proposals which are presented by the student to a small committee of departmental faculty members who are also responsible for monitoring the progress of student curricular and research programs, and a journal club presentation. All Ph.D. students are expected to participate actively in the department’s seminar program, and students are encouraged to attend and to present papers at regional and national meetings in cellular biochemistry and molecular biology. Teaching experience is an integral part of the Ph.D. curriculum and is required for the degree.

The Department of Biochemistry offers an M.S. degree only to students already enrolled in the Ph.D. program. Students should contact the Graduate Studies adviser for more details.

Those applying for graduate study should have at least a baccalaureate degree and should have completed work in cell and developmental biology, basic biochemistry and molecular biology, and genetics. Also required are: at least one year of university physics, differential and integral calculus; and analytical, organic, inorganic, and physical chemistry. The department is especially interested in those applicants who have research experience in biology or chemistry. Students must submit an application, including transcripts and letters of recommendation, by December 12.

Applications should be submitted at http://gradadmissions.stanford.edu/. Applicants are notified by March 24 of decisions on their applications. Stanford University requires scores from the Graduate Record Examination (GRE) (verbal, quantitative, and analytical), and applicants are encouraged to submit scores from the GRE Subject Test in either biochemistry, biology, or chemistry. Applicants should take the October GRE exam. All applicants are urged to compete for non-Stanford fellowships or scholarships, and U.S. citizens should complete an application for a National Science Foundation Predoctoral Traineeship. Students are provided with financial support to cover normal living expenses; Stanford tuition costs are paid.
Applicants for admission to the department are considered without regard to race, color, creed, religion, sex, age, national origin, or marital status. Postdoctoral research training is available to graduates who hold a Ph.D. or an M.D. degree. Qualified individuals may write to individual faculty members for further information.

At present, the primary research interests of the department are the structure and function of proteins and nucleic acids, the biochemistry and control of development processes, molecular motors and the cytoskeleton, the trafficking of proteins between membrane-bound organelles, the control and regulation of gene expression, bioinformatic/structure design, and the application of microarrays to problems in human health and disease.

COURSES

1-3 units, Aut (Brown, P; Chu, G; Krasnow, M)

BIOC 199. Undergraduate Research — Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

BIOC 201. Advanced Molecular Biology — Literature-based lectures and discussion on rapidly developing frontiers in chromosome structure and function and modern insights into the control of gene expression. Emphasis on experimental approaches and insights that have lead to breakthroughs. Topics include chromosome organization, novel modes of transcriptional control, RNA based mechanisms for controlling gene expression and emerging translational regulatory mechanisms. Prerequisite: Undergraduate Molecular Biology.
5 units, not given this year

BIOC 202. Metabolic Biochemistry: Structure, Metabolism, and Energetics — (Review course for medical students only). Structure and function of biological molecules, enzyme kinetics and mechanisms, bioenergetics, pathways of intermediary metabolism and their control, and membrane structure and function. Course offered via online lectures and problem sets, with weekly small-group review sessions.
1-3 units, Aut (Brown, P)

BIOC 205. Molecular Foundations of Medicine — Topics include: DNA structure, replication, repair, and recombination; chromosome structure and function; gene expression including mechanisms for regulating transcription and translation; and methods for manipulating DNA, RNA, and proteins. Patient presentations illustrate how molecular biology affects the practice of medicine.
3 units, Aut (Brown, P; Chu, G; Krasnow, M)

BIOC 210. Advanced Topics in Membrane Trafficking — The structure, function, and biosynthesis of cellular membranes and organelles. Current literature. Prerequisite: consent of instructor.
3 units, not given this year

BIOC 214. Physical and Chemical Principles of Enzyme Function — Enzymatic mechanisms, with emphasis on the fundamental behavior of biochemical systems and the properties that emerge due to the complex nature of these systems. Student presentations on specific enzymes based on classic and current literature, developed in consultation with the instructor. Prerequisites: BIOC/SBIO 241 and a course in organic chemistry.
3-5 units, not given this year

BIOC 215. Frontiers in Biological Research — (Same as DBIO 215, GENE 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker’s primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.
1 unit, Aut (Harbury, P; Brunet, A; Kingsley, D), Win (Kingsley, D; Harbury, P; Brunet, A)

BIOC 217. Advanced Tutorial in Special Topics — Readings and tutorial in membrane biochemistry, enzyme mechanisms, chromosome structure, biochemical genetics, bacterial and animal viruses, and nucleic acid enzymology. Conducted by advanced graduate students and postdoctoral fellows.
1-3 units, Aut, Win, Spr (Staff)

BIOC 218. Computational Molecular Biology — For molecular biologists and computer scientists. Major issues, existing methods, and future directions concerning biological sequences and structure. Topics: accessing molecular databases, pattern search, classification of sequence and structure, alignment of sequences, rapid similarity searching, phylogenies, automated pattern learning, representing protein structure, gene expression profiling, clustering expressed genes, and discovering transcription factor binding sites. Lecture/lab. Final project. Via internet; see http://biochem218.stanford.edu. Enrollment limited to 40. Prerequisite: BIOSCI 52 or equivalent, or consent of instructor.
3 units, Win (Brunet, A)

BIOC 220. Chemistry of Biological Processes — (Same as MPHA 220.) The principles of organic and physical chemistry as applied to biomolecules. Goal is a working knowledge of chemical principles that underlie biological processes, and chemical tools used to study and manipulate biological systems. Prerequisites: organic chemistry and biochemistry, or consent of instructor.
4 units, Aut (Wandless, T; Herschlag, D; Chen, J; Bogyo, M)

BIOC 221. The Teaching of Biochemistry — Required for teaching assistants in Biochemistry. Practical experience in teaching on a one-to-one basis, and problem set design and analysis. Familiarization with current lecture and text materials; evaluations of class papers and examinations. Prerequisite: enrollment in the Biochemistry Ph.D. program or consent of instructor.
3 units, Aut, Win, Spr, Sum (Staff)

BIOC 224. Cell Biology of Physiological Processes — (Same as BIOSCI 214.) Mechanisms of membrane and cellular biogenesis in relation to physiological processes. Emphasis is on regulatory and signaling mechanisms involved in coordinating complex cellular phenomena such as cellular organization, function, and differentiation. Topics: cellular compartmentalization, transport and trafficking of macromolecules, organelle biogenesis, cell division, motility and adhesion, and multicellular larity. Prerequisites: Biological Sciences core. Open to graduate and medical students. Undergraduates may enroll with consent of instructor and prerequisites Biological Science core and Biochemistry 205.
2-5 units, Win (Theriot, J; Kopito, R; Straight, A; Nelson, W)

BIOC 230. Molecular Interventions in Human Disease — For M.D. students who intend to declare a concentration in molecular basis of medicine, M.S.T.P. students, and Ph.D. students with a strong interest in medicine. Advanced medical biochemistry focusing on cases where molecular-level research has led to new medical treatments or changes in the understanding of important diseases. The underlying molecular basis of diseases and the reasons for success and failure in molecular approaches to treatment. Studen-led discussions on primary medical and scientific literature.
2-3 units, Aut (Theriot, J; Harbury, P)

BIOC 241. Biological Macromolecules — (Same as BIOPHYS 241, SBIO 241.) The physical and chemical basis of macromolecular function. The forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, and kinetics of enzymatic and diffusion processes, and relationship to their practical application in experimental design and interpretation.
School of Medicine

The Stanford University Center for Biomedical Ethics (SCBE) is dedicated to interdisciplinary research and education, and provides clinical and research ethics consultation. SCBE serves as a scholarly resource on emerging ethical issues raised by medicine and biomedical research.

SCBE offers a scholarly concentration in Biomedical Ethics and Medical Humanities to medical students. This program allows medical students to study in depth the ethical and humanistic dimensions of research and practice. Additional information on requirements for the scholarly concentration, and a comprehensive list of other related courses is available at http://scbe.stanford.edu/education/bemh.html.

COURSES

MEDICINE

INDE 212. The Human Condition: Medicine, Arts, and Humanities — The interdisciplinary field of medical humanities: the use of the arts and humanities to examine medicine in personal, social, and cultural contexts. Topics include the doctor/patient relationship, the patient perspective, the meaning of doctoring, and the meaning of illness. Sources include visual and performing arts, film, and literary genres such as poetry, fiction, and scholarly writing. Designed for medical students in the Biomedical Ethics and Medical Humanities Scholarly Concentration, but all students are welcome.

2 units, Spr (Zaroff, L; Shafer, A)

INDE 226. History of Medicine Online — An inclusive retelling of the history of Western medicine. Eight units cover Ancient Medicine, Egypt and Babylonia, Ancient Greece and Rome, Europe in the Middle Ages and the Renaissance, 18th Century Schools of Thought, and Technological Medicine. Each chapter follows anthropologist Kleinman’s core clinical functions and incorporates text, pictures, hypertext links, and sound clips. A historical case-based multiple-choice quiz follows each unit.

1 unit, Aut, Win, Spr, Sum (Shafer, A)

INDE 238. Current Concepts and Dilemmas in Genetic Testing — (Same as GENET 238.) Issues arising from the translational process from research to commercialization. Diagnostic inventions and applications, community implications, newborn screening, cancer genetics, and pharmacogenomics. Guest experts. For M.D. students and biomedical graduate students. Limited enrollment.

2 units, Spr (Tobin, S; Schrijver, I; Cowan, T; Magnus, D)

MED 250A. Medical Ethics I — Required core course for Scholarly Concentration in Biomedical Ethics and Medical Humanities. The field of bioethics, including theoretical approaches to bioethical problems. Contemporary controversies and clinical cases. Values that arise in different situations and clinical encounters. Issues include: genetics and stem cell research, rationing, ethical issues in care at the end of life, organ transplantation issues.

2 units, Win (Magnus, D)

MED 255. The Responsible Conduct of Research — Forum. How to identify and approach ethical dilemmas that commonly arise in biomedical research. Issues in the practice of research such as in publication and interpretation of data, and issues raised by academic/industry ties. Contemporary debates at the interface of biomedical science and society regarding research on stem cells, bioweapons, genetic testing, human subjects, and vertebrate animals. Completion fulfills NIH/ADAMHA requirement for instruction in the ethical conduct of research. Recommended: research experience.

1 unit, Aut, Win, Spr, Sum (Tobin, S)

COGNATE COURSES

See respective department listings for course description. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

SIBIO 242. Methods in Molecular Biophysics — (Same as BIOPHYS 242.)

3 units, Win (Weis, W; Puglisi, J)

CENTER FOR BIOMEDICAL ETHICS

Director: David C. Magnus
Director Emeritus: Thomas A. Raffin
Associate Director: Mildred K. Cho
Assistant Director: Anne J. Footer

Participating Faculty and Staff: Clarence H. Braddock, Julie A. Collier, LaVera M. Crawley, Maren Grainger-Monsen, Henry Greely, Judy Illes-Van Der Loos, Agnieszka Jaworska, Sandra S. Lee, Jose R. Maldonado, Christopher T. Scott, Audrey Shafer, Sara L. Tobin, Lawrence I. Zaroff

Center Offices: 701 Welch Road, Building A, Suite 1105, Palo Alto, CA 94304-5748

Mail Code: 94304-5748
Phone: (650) 723-5760
Web Site: http://scbe.stanford.edu/

The Stanford University Center for Biomedical Ethics (SCBE) is dedicated to interdisciplinary research and education, and provides clinical and research ethics consultation. SCBE serves as a scholarly resource on emerging ethical issues raised by medicine and biomedical research.

SCBE offers a scholarly concentration in Biomedical Ethics and Medical Humanities to medical students. This program allows medical students to study in depth the ethical and humanistic dimensions of research and practice. Additional information on requirements for the scholarly concentration, and a comprehensive list of other related courses is available at http://scbe.stanford.edu/education/bemh.html.

STANFORD BULLETIN, 2006-07

650
HUMBIO 157. The Stem Cell: Science, Ethics, and Politics
3 units, Win (Nusse, R; Weisman, I; Scott, C)

HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts
4 units, Aut (Zaroff, L)

HUMBIO 175S. The Literature of Health Care: Novels and Theater of Illness

BIOMEDICAL INFORMATICS PROGRAM

Committee: Russ B. Altman (Chair and Program Director); Mark A. Musen (Co-Director); Betty Cheng, Lawrence M. Fagan (Associate Directors); Atul Butte, Amar K. Das, Parvati Dev, Teri E. Klein, David Paik

Participating Faculty and Staff by Department:
Opportunities for research are not limited to the faculty and departments listed.

Anesthesia: David M. Gaba (Professor)
Biochemistry: Douglas L. Brutlag (Professor), Ron Davis (Professor), Julie Theriot (Assistant Professor)
Bioengineering: Scott L. Delp (Associate Professor)
Chemistry: Vijay Pande (Assistant Professor)
Civil and Environmental Engineering: Raymond L. Levitt (Professor)

Computer Science: Serafim Batzoglou (Assistant Professor), Leo Guibas (Professor), Daphne Koller (Associate Professor), Jean-Claude Latombe (Professor), Giora Wiederhold (Professor, Research, emeritus)

Developmental Biology: Stuart Kim (Professor)
Genetics: Russ B. Altman (Professor), Mike Cherry (Associate Professor, Research), Stanley N. Cohen (Professor), Teri E. Klein (Senior Research Scientist), Richard M. Myers (Professor), Gavin Sherlock (Assistant Professor)
Health Research and Policy: Mark A. Hlatky (Professor), Richard A. Olshen (Professor), Robert Tibshirani (Professor)
Management Science and Engineering: Margaret Brandeau (Professor), Ross D. Shachter (Associate Professor)
Mathematics: Samuel Karlin (Professor, emeritus)

Medicine: Russ B. Altman (Professor), Jay Bhattacharya (Assistant Professor), Terrance Blaschke (Professor), Atul Butte (Assistant Professor), Robert W. Carlson (Professor), Amar K. Das (Assistant Professor), Parvati Dev (Senior Research Scientist), Lawrence M. Fagan (Senior Research Scientist), Alan M. Garber (Professor), Mary Goldstein (Professor), Michael Higgins (Consulting Associate Professor), Peter D. Karp (Consulting Assistant Professor), David Katzenstein (Professor, Research), John Koza (Consulting Professor),

Henry Lowe (Associate Professor, Research; Senior Associate Dean for Information Resources and Technology), Mark A. Musen (Professor), Douglas K. Owens (Associate Professor), Robert W. Shafer (Assistant Professor, Research), P.J. Utz (Associate Professor)

Microbiology and Immunology: Karla Kirkegaard (Professor), Garry Nolan (Associate Professor)

Obstetrics and Gynecology: W. LeRoy Heinrichs (Professor, emeritus)

Pathology: Arend Sidow (Assistant Professor)

Pediatrics: Atul Butte (Assistant Professor)

Psychiatry and Behavioral Sciences: Amar K. Das (Assistant Professor)

Radiation Oncology: Arthur L. Boyer (Professor), Lei Xing (Assistant Professor, Research)

Radiology: Sam Gamblin (Professor), Gary H. Glover (Professor), Sandy A. Napel (Professor), David Paik (Assistant Professor), Norbert J. Pelc (Professor), Geoffrey Rubin (Associate Professor)

Statistics: Trevor J. Hastie (Professor), Susan Holmes (Professor), Art Owen (Professor)

Structural Biology: Michael Levitt (Professor)

Surgery: Thomas Krummel (Professor), Charles Taylor (Assistant Professor, Research)

Program Offices: MSOB 215

Mail Code: 94305-5479

Phone: (650) 723-6979

Web Site: http://bmi.stanford.edu

Courses given in Biomedical Informatics Program have the subject code BIOMEDIN. For a complete list of subject codes, see Appendix.

The program in Biomedical Informatics emphasizes research to develop novel computational methods that can advance biomedicine. Students receive training in the investigation of new approaches to conceptual modeling and to development of new algorithms that address challenging problems in the biological sciences and clinical medicine. Students with a primary interest in developing new informatics methods and knowledge are best suited for this program. Students with a primary interest in the biological or medical application of existing informatics techniques may be better suited for training in the application areas themselves.

GRADUATE PROGRAMS

The Biomedical Informatics Program is interdepartmental and offers instruction and research opportunities leading to M.S. and Ph.D. degrees in Biomedical Informatics. All students are required to complete the core curriculum requirements outlined below, and also to elect additional courses to complement both their technical interests and their goals in applying informatics methods to clinical settings, biology, or imaging. Candidates must maintain a 3.0 GPA in each of the five core areas, and an overall GPA of 3.0. If the candidate’s GPA does not meet the minimum requirement, the executive committee may require corrective courses of action. In addition, prior to being formally admitted to candidacy for the Ph.D. degree, the student must demonstrate knowledge of biomedical informatics fundamentals and a potential for research by passing a qualifying exam.

The core curriculum is common to all degrees offered by the program but is adapted or augmented depending on the interests and experience of the student. Deviations from the core curriculum outlined below must be justified in writing and approved by the student’s Biomedical Informatics academic adviser and the chair of the Biomedical Informatics Committee. It should be noted, however, that the program is intended to provide flexibility and to complement other opportunities in applied medical research that exist at Stanford. Although most students are expected to comply with the basic program of study outlined here, special arrangements can be made for those with unusual needs or those simultaneously enrolled in other degree programs within the University. Similarly, students with prior relevant training may have the curriculum adjusted to eliminate requirements met as part of prior training.

CORE CURRICULUM

Students are expected to participate regularly in the Biomedical Informatics Student Seminar (201) and Colloquia (200), regardless of
whether they register for credit in those courses. In addition, all students are expected to fulfill requirements in the following five categories:

1. **Core Biomedical Informatics** (15 units): students are expected to understand current applications of computers in biology and medicine and to develop a broad appreciation for research in the management of biomedical information. Required courses are: BIOMEDIN 200, 201, 210, 211, 212, and 214, all of which should be taken during the first and second year in the program. BIOMEDIN 200 and 201 are required courses but are not counted toward the core or elective units. Students must also take an additional 3 units of Biomedical Informatics course work (which may include crosslisted courses from other departments, but not including BIOMEDIN 200, 201, 299, 302, 303, or 305), selected in consultation with the academic adviser.

2. **Computer Science** (9 units): the student is expected to acquire a knowledge of the use of computers, computer organization, programming, and symbolic systems. It is assumed that students have had by matriculation computing experience at least equivalent to a course introducing the fundamentals of data structures and algorithms such as CS 103A,B, 103X, 106A,B, 106X, or other courses approved by academic adviser or executive committee. Students are required to take a minimum of 9 units of courses in the Department of Computer Science. If similar courses have not been taken previously, these units must include CS 121 or 221, 161, and a course that requires significant programming and knowledge of machine architectures (for example, CS 108, or the CS 193 series). For those who have taken such courses previously, replacement units may be taken from any other course in CS selected by the student and approved by the academic adviser. A course in databases is especially recommended. With the exception of CS 108, all other courses applied to the degree requirements must be numbered 137 or higher.

3. **Probability, Statistics, and Decision Science** (9 units): students are required to take at least three courses that span the following five topics: basic probability theory, Bayesian statistics, decision analysis, machine learning, and experimental-design techniques. Prior courses in statistics at least equivalent to STATS 60 and calculus equivalent to MATH 42 are prerequisites. A prior course in linear algebra equivalent to MATH 103 or 113 is recommended. For the probability requirements, students may, for example, take MS&E 120, STATS 116, or MS&E 221. For the statistics requirements, students should take STATS 141, if they have not had an equivalent class prior to entry to the program. Otherwise, sequences (taken after STATS 116) may include STATS 200 followed by a course in stochastic modeling, machine learning or data mining, such as STATS 202 or 315A,B, or CS 228 or 229. Options for decision analysis include MS&E 152 or 252, or cost effectiveness analysis (BIOMEDIN 432). Specific courses should be chosen in consultation with the student’s academic adviser. Also recommended is a course in the psychology of human problem solving.

4. **Biomedical Domain Knowledge** (9 units): students are expected to acquire an understanding of pertinent life sciences and how to analyze a domain of application interest. Prior courses in biology at least equivalent to BIOSCI 41 and 42 are prerequisites. All students must have completed a course in basic biochemistry, molecular biology, or genetics. Other areas of basic biology may be an acceptable alternative. Exposure to laboratory methods in biology is encouraged. All students without formal health care training must take IMMUNOL 230 (formerly BIOMEDIN 207). First year students are encouraged to enroll in IMMUNOL 230.

5. **Social and Ethical Issues** (3 units for M.S., 6 for Ph.D.): candidates are expected to be familiar with key issues regarding ethics, public policy, financing, organizational behavior, management, and pertinent legal topics. Students may select at least 3 units from suitable courses that include, for example, BIOMEDIN 432; CS 201; MS&E 284, 197; HRP 391, 392; or any other advanced course in policy and social issues proposed by the student and approved by the Biomedical Informatics academic adviser.

The core curriculum generally entails a minimum of 45 units of course work for master’s students and 54 units of course work for Ph.D. students, but can require substantially more or less depending on the courses selected and the previous training of the student. All courses must be taken for a letter grade. Students may request an elective course be taken for a grade of credit/no credit by submitting a petition to the BMI executive committee. BIOMEDIN 299 and BIOMEDIN 802 may be taken for satisfactory/no credit (S/NC). The varying backgrounds of students are well recognized and no one is required to take courses in an area in which he or she has already been adequately trained; under such circumstances, students are permitted to skip courses or substitute more advanced work. Students design appropriate programs for their interests with the assistance and approval of their Biomedical Informatics academic adviser. At least 27 units of formal course work are expected.

**PROGRAM REQUIREMENTS FOR THE ACADEMIC M.S., PROFESSIONAL M.S., AND COTERMINAL DEGREES**

Students enrolled in any of the M.S. degrees must complete the program requirements in order to graduate. Programs of at least 45 units that meet the following guidelines are normally approved:

1. Completion of the core curriculum.
2. A minimum of 6 additional units of courses in Computer Science numbered 135 or higher, courses in Management Science and Engineering or Statistics numbered 200 or higher, PSYCH 256 or 225, or relevant courses in other departments approved by the student’s academic adviser.
3. Electives: additional courses to bring the total to 45 or more units. The University requirements for the M.S. degree are described in the “Graduate Degrees” section of this bulletin.

**MASTER OF SCIENCE (ACADEMIC)**

This degree is designed for individuals who wish to undertake in-depth study of biomedical informatics with research, typically supported with fellowship funding. Normally, a student spends two years in the program and implements and documents a substantial project during the second year. The first year involves acquiring the fundamental concepts and tools through course work and research project involvement. All first- and second-year students are expected to devote 50 percent or more of their time participating in research projects. Research rotations are not required, but can be done with approval of the academic adviser or training program director. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics. This degree requires a written research paper to be approved by two faculty members.

**MASTER OF SCIENCE (HONORS COOPERATIVE PROGRAM)**

This degree is primarily designed for the working professional who already has advanced training in one discipline and wishes to acquire interdisciplinary skills. All classes necessary for the degree are available online. The professional M.S. is offered in conjunction with Stanford Center of Professional Development (SCPD), which establishes the rates of tuition and fees. The program uses the honors cooperative model (HCP), which assumes that the student is working in a corporate setting and is enrolled in the M.S. on a part-time basis. The student has up to five years to complete the program. Research projects are optional and the student must make arrangements with program faculty. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

**MASTER OF SCIENCE (COTERMINAL)**

The coterminal degree program allows undergraduates to study for a master’s degree while completing their bachelor’s degree(s) in the same or a different department. Please refer to the “Coterminal Bachelor’s and Master’s Degrees” section under “Undergraduate Degrees and Programs” in this bulletin for additional information.

The coterminal Master of Science program follows the same program requirements as the Master of Science (Professional), except for the requirement to be employed in a corporate setting. The coterminal degree is only available to current Stanford undergraduates. Coterminal students are enrolled full-time and courses are taken on campus. Research projects are optional and the student must make arrangements with program faculty.
Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

For University coterminal degree program rules and University application forms, see http://registrar.stanford.edu/shared/publications.htm#Coterm.

**DOCTOR OF PHILOSOPHY**

The University’s basic requirements for the doctorate (residence, dissertation, examination, and so on) are discussed in the “Graduate Degrees” section of this bulletin.

Individuals wishing to prepare themselves for careers as independent researchers in biomedical informatics, with applications experience in bioinformatics, clinical informatics, or imaging informatics, should apply for admission to the doctoral program. The following are additional requirements imposed by the Biomedical Informatics Interdisciplinary Committee:

1. A student plans and completes a coherent program of study including the core curriculum and additional requirements for the master’s program. In addition, doctoral candidates are expected to take at least three more advanced courses (see categories under item “2” of the master’s program requirements) and must complete a total of 54 units. In the first year, two or three research rotations are encouraged. The master’s requirements should be completed by the end of the second year in the program (six quarters of study, excluding summers). Doctoral students are generally advanced to Ph.D. candidacy after passing the qualifying exam, which takes place during the end of the second year of training or early in the third year. A student’s academic adviser has primary responsibility for the adequacy of the program, which is regularly reviewed by the Biomedical Informatics executive committee.

2. To remain in the Ph.D. program, each student must attain a grade point average (GPA) of 3.0 (B) in each of the five core areas. The student must fulfill these requirements and apply for admission to candidacy for the Ph.D. by the end of six quarters of study (excluding summers). In addition, reasonable progress in the student’s research activities is expected of all doctoral candidates.

3. During the third year of training, generally in the Winter Quarter, each doctoral student is required to give a preproposal seminar that describes evolving research plans and allows program faculty to assure that the student is making good progress toward the definition of a doctoral dissertation topic.

4. By the end of nine quarters (excluding summers), each student must orally present a written thesis proposal and an oral university defense of this proposal to a dissertation committee that generally includes at least one member of the Biomedical Informatics executive committee. The committee determines whether the student’s general knowledge of the field and the details of the planned thesis are sufficient to justify proceeding with the dissertation.

5. As part of the training for the Ph.D., each student is required to be a teaching assistant for two courses approved by the Biomedical Informatics executive committee; one should be completed in the first two years of study.

6. The most important requirement for the Ph.D. degree is the dissertation. Prior to the oral dissertation proposal and defense, each student must secure the agreement of a member of the program faculty to act as dissertation adviser. The principal adviser need not be an active member of the Biomedical Informatics program faculty, but all committees should include at least one participating BMI faculty member.

7. No official additional oral examination is required upon completion of the dissertation. The oral defense of the dissertation proposal satisfies the University oral examination requirement. At the completion of training, the student should give a final talk describing their results.

8. The student is expected to demonstrate an ability to present scholarly material and research in a lecture at a formal seminar.

9. The student is expected to demonstrate an ability to present scholarly material in concise written form. Each student is required to write a paper suitable for publication, usually discussing his or her doctoral research project. This paper must be approved by the student’s academic adviser as suitable for submission to a refereed journal before the doctoral degree is conferred.

10. The dissertation must be accepted by a reading committee composed of the principal dissertation adviser, a member of the program faculty, and a third faculty member chosen from anywhere within the University.

**COURSES**

**BIOMEDIN 109Q. Genomics: A Technical and Cultural Revolution**—(Same as GENE 109Q.) Stanford Introductory Seminar. For nonscience majors. Concepts of genomics, high-throughput methods of data collection, and computational approaches to analysis of data. The social, ethical, and economic implications of genomic science. Students may focus on computational or social aspects of genomics.

3 units, Win (Altman, R)

**BIOMEDIN 156/256. Economics of Health and Medical Care**—(Same as ECON 248.) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisite: ECON 50 and ECON 102A or equivalent statistics, or consent of instructor. Recommended: ECON 51.

5 units, Aut (Bhattacharya, J)

**BIOMEDIN 200. Biomedical Informatics Colloquium**—Series of colloquia offered by program faculty, students, and occasional guest lecturers. Credit available only to students in a Biomedical Informatics degree program. May be taken no more than three times for credit.

1 unit, Aut, Win, Spr (Musen, M)

**BIOMEDIN 201. Biomedical Informatics Student Seminar**—Participants report on recent articles from the Biomedical Informatics literature or their research projects. Goal is to teach presentation skills. Credit available only to students in a Biomedical Informatics degree program. May be repeated three times for credit.

1 unit, Aut, Win, Spr (Musen, M)

**BIOMEDIN 202. Introductory Biomedical Informatics**—Online. Current research problems and computational approaches to them. Topics include medical security and privacy, electronic medical records, controlled terminologies and biomedical ontologies, electronic retrieval, technology-assisted learning environments, medical decision making and support, sequence analysis, phylogenetics, biological networks and pathways, microarray analysis, natural language processing, and protein structural analysis and prediction. Graduate students in Biomedical Informatics may not take this class for credit.

1 unit, Aut, Win, Spr, Sum (Altman, R; Cheng, B; Fagan, L)

**BIOMEDIN 210. Introduction to Biomedical Informatics: Fundamental Methods**—(Same as CS 270.) Issues in the modeling, design, and implementation of computational systems for use in biomedicine. Topics: basic knowledge representation, controlled terminologies in medicine and biological science, fundamental algorithms, information dissemination and retrieval, knowledge acquisition and ontologies. Emphasis is on the principles of modeling data and knowledge in biomedicine and on translation of resulting models into useful automated systems. Recommended: principles of object-oriented systems.

3 units, Aut (Musen, M)

**BIOMEDIN 211. Introduction to Biomedical Informatics: System Design**—(Same as CS 271.) Focus is on undertaking design and implementation of computational and information systems for life scientists and healthcare providers. Case studies illustrate what design factors lead to success or failure in building systems in complex biomedical environments. Topics: requirements analysis, workflow and organizational factors, functional specification, knowledge modeling, data heterogeneity, component-based architectures, human-computer interaction, and system evaluation. Prerequisite: 210, or consent of instructor.

3 units, Win (Das, A)
BIOMEDIN 212. Introduction to Biomedical Informatics Research Methodology — (Same as CS 272, GENE 212.) Hands-on software building. Student teams conceive, design, specify, implement, evaluate, and report on a software project in the domain of biomedicine. Creating written proposals, peer review, providing status reports, and preparing final reports. Guest lectures from professional biomedical informatics systems builders on issues related to the process of project management. Software engineering basics. Prerequisites: 210, 211 or 214, or consent of instructor.

3 units, Aut (Altman, R; Cheng, B; Klein, T)

BIOMEDIN 214. Representations and Algorithms for Computational Molecular Biology — (Same as CS 274, GENE 214.) Topics: algorithms for alignment of biological sequences and structures, computing with strings, phylogenetic tree construction, hidden Markov models, computing with networks of genes, basic structural computations on proteins, protein structure prediction, protein threading techniques, homology modeling, molecular dynamics and energy minimization, statistical analysis of 3D biological data, integration of data sources, knowledge representation and controlled terminologies for molecular biology, graphical display of biological data, and machine learning (clustering & classification), and natural language text processing. Consent of instructor required for 3 units. Prerequisites: programming skills, interest in biology.

3-4 units, Spr (Altman, R)

1 unit, Spr (Altman, R)

BIOMEDIN 217. Translational Bioinformatics — (Same as CS 275.) Analytic, storage, and interpretive methods to optimize the transformation of genetic, genomic, and biological data into diagnostics and therapeutics for medicine. Topics: access and utility of publicly available data sources; types of genome-scale measurements in molecular biology and genomic medicine; analysis of microarray data; analysis of polymorphisms, proteomics, and protein interactions; linking genome-scale data to clinical data and phenotypes; and new questions in biomedicine using bioinformatics. Case studies. Prerequisites: programming ability at the level of CS 106A and familiarity with statistics and biology.

3-4 units, Win (Butte, A)

3 units, Win (Staff)

BIOMEDIN 234. Biomedical Genomics — How genomics is influencing medical research and health-care delivery, illuminating the genomic discoveries being translated into diagnostic and therapeutic medical applications. Themes: the relevance of human genome project and functional genomics to inherited and acquired diseases, and the role of public databases and computational methods for solving problems in biology. Human genetic variation, SNPs, comparative genomics, computer models of biological processes, microbial genomics, pharmacogenomics, structure-based drug design, gene therapy. Case studies demonstrate the use of information technologies for converting molecular biological data into knowledge that can improve patient care and accelerate the discovery of new therapeutics.

3 units, Win (Shafer, R)

BIOMEDIN 240. Causal Models in Biomedical Informatics — Computational formalisms for encoding causal models in biological and biomedical domains from recent work on modeling genetic networks; also models that arise in medical applications. Readings include papers that describe causal models within a specific representational framework. Associated methods for reasoning over knowledge structures in that paradigm and for inducing such models from data. Goal is to understand how to represent, reason about, and discover biological knowledge in each framework, along with the strengths and weaknesses of that formalism.

3 units, not given this year

BIOMEDIN 251. Outcomes Analysis — Introduction to methods of conducting empirical studies which use large existing medical, survey, and other databases to ask both clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics.

3 units, Spr (Bhattacharya, J)

BIOMEDIN 262. Computational Genomics — (Same as CS 262.) Applications of computer science to genomics, and concepts in genomics from a computer science point of view. Topics: dynamic programming, sequence alignments, hidden Markov models, Gibbs sampling, and probabilistic context-free grammars. Applications of these tools to sequence analysis: comparative genomics, DNA sequencing and assembly, genomic annotation of repeats, genes, and regulatory sequences, microarrays and gene expression, phylogeny and molecular evolution, and RNA structure. Prerequisites: 161 or familiarity with basic algorithmic concepts. Recommended: basic knowledge of genetics.

3 units, Win (Batzoglou, S)

BIOMEDIN 273. Algorithms for Structure and Motion in Biology — (Same as CS 273.) Algorithms motivated by challenges in predicting molecule properties in silico. Topics: geometric and kinematic models of biomolecules (proteins, ligands), conformation spaces, obtention of structure from experimental data, finding sequence and structural similarities, molecular surfaces and shape analysis, energy calculation, detection of steric clashes and proximity computation, conformation sampling, threading, and study folding and binding motions.

3 units, not given this year

BIOMEDIN 299. Directed Reading and Research — For students wishing to receive credit for directed reading or research time. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sun (Staff)

BIOMEDIN 303. Statistics for Research — Statistical methods commonly used in research. Emphasis is on how and when to use the methods rather than on proofs. How to describe data and detect unusual values, compare treatment effects, interpret p-values, detect and quantify trends, detect and measure association and correlation, determine the sample size and power for an experiment, and choose statistical tests and software. Topics include descriptive statistics (mean, median, standard deviation, standard error), probability, paired and unpaired t-tests, analysis of variance, correlation, regression, chi-square, discriminant analysis, and power and sample size. Statistical analysis software including Excel and Statistica.

1 unit, Spr (Staff), alternate years, not given next year

### BIOMEDIN 374. Algorithms in Biology — (Same as CS 374.) Algorithms and computational models applied to molecular biology and genetics. Topics vary annually. Possible topics include biological sequence comparison, annotation of genes and other functional elements, molecular evolution, genome rearrangements, microarrays and gene regulation, protein folding and classification, molecular docking, DNA secondary structure, DNA computing, and self-assembly. May be repeated for credit. Prerequisites: 161, 262 or 274, or BIOCHEM 218, or equivalents.

2-3 units, Aut (Batzoglou, S)

### BIOMEDIN 390A. Curricular Practical Training — Provides educational opportunities in biomedical informatics research. Qualified biomedical informatics students engage in internship work and integrate that work into their academic program. Students register during the quarter they are employed and must complete a research report outlining their work activity, problems investigated, key results, and any follow-up on projects they expect to perform. BIOMEDIN 390A, B, and C may each be taken only once.

1 unit, Aut, Win, Spr, Sum (Staff)

### BIOMEDIN 390B. Curricular Practical Training — Provides educational opportunities in biomedical informatics research. Qualified biomedical informatics students engage in internship work and integrate that work into their academic program. Students register during the quarter they are employed and must complete a research report outlining their work activity, problems investigated, key results, and any follow-up on projects they expect to perform. BIOMEDIN 390A, B, and C may each be taken only once.

1 unit, Aut, Win, Spr, Sum (Staff)

### BIOMEDIN 390C. Curricular Practical Training — Provides educational opportunities in biomedical informatics research. Qualified biomedical informatics students engage in internship work and integrate that work into their academic program. Students register during the quarter they are employed and must complete a research report outlining their work activity, problems investigated, key results, and any follow-up on projects they expect to perform. BIOMEDIN 390A, B, and C may each be taken only once.

1 unit, Aut, Win, Spr, Sum (Staff)

### BIOMEDIN 432. Analysis of Costs, Risks, and Benefits of Health Care — (Same as MGTECON 332, HRP 392.) For graduate students. The principal evaluative techniques for health care, including utility assessment, cost-effectiveness analysis, cost-benefit analysis, and decision analysis. Emphasis is on the practical application of these techniques. Group project presented at end of quarter. Guest lectures by experts from the medical school, pharmaceutical industry, health care plans, and government.

4 units, Aut (Garber, A)

### COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

### BIOC 218. Computational Molecular Biology
3 units, Win (Brutlag, D)

### CS 228. Probabilistic Models in Artificial Intelligence
3 units, Win (Koller, D)

### CS 329. Topics in Artificial Intelligence
3 units, by arrangement

### CS 348B. Computer Graphics: Image Synthesis Techniques
3-4 units, Spr (Hanrahan, P)

### CS 379. Interdisciplinary Topics
3 units, Aut (Staff)

### MS&E 355. Influence Diagrams and Probabilistic Networks
3 units, alternate years, not given this year

### SYMBSYS 216. Biological Knowledge and Symbolic Biocomputing
3 units, not given this year

## CANCER BIOLOGY PROGRAM

### Program Director: Amato Giaccia (Radiation Oncology)

### Committee on Cancer Biology: Nicholas Denko (Radiation Oncology), Howard Chang (Dermatology), Jeffrey Axelrod (Pathology), Katrin Chua (Medicine, Endocrinology), Julian Sage (Pediatrics), Alejandro Sweet-Cordero (Pediatrics), Timothy Stearns (Biological Sciences, Genetics)

### Program Office: Alway Building, 300 Pasteur Drive, Room M105

### Mail Code: 94305-5121

### Phone: (650) 723-6198

### Email: dalima@stanford.edu

### Web Site: http://www.stanford.edu/group/cancerbio/

Courses given in Cancer Biology have the subject code CBIO. For a complete list of subject codes, see Appendix.

Established in 1978, the Cancer Biology Program at Stanford University is an interdisciplinary program leading to the Ph.D. degree. During the past 25 years, understanding of cancer has increased with the discovery of oncogenes, tumor suppressor genes, pathways of DNA damage and repair, cell cycle regulation, angiogenesis and responses to hypoxia, and recent glimpses into the molecular basis of metastasis. In addition, methods of parallel analysis including gene expression arrays, protein arrays, and tissue arrays have begun to refine and redefine the taxonomy of cancer diagnosis. This explosion of basic and clinical science has, in turn, resulted in the first successful cancer chemotherapies and immunotherapies based on knowledge of specific molecular targets. Stanford presents a unique environment to pursue interdisciplinary cancer research because the School of Medicine, the School of Humanities and Sciences, and the School of Engineering are located on a single campus, all within walking distance of one another.

The goal of the Cancer Biology Ph.D. program is to provide students with education and training that enables them to make significant contributions to this field. Course work during the first year is designed to provide a broad understanding of the molecular, genetic, cell biological, and pathobiological aspects of cancer. Students also learn about the current state of the epidemiology, clinical diagnosis, treatment, and prevention of human cancers. Equally important during the first year is a series of three rotations in research laboratories chosen by each student. By the beginning of the second year, each student chooses a research adviser and begins work on the dissertation project. A qualifying examination must be completed by the end of the second year. An annual Cancer Biology conference at Asilomar on the Pacific Ocean provides students with an opportunity to present their research to one another and to faculty. The expected time to degree is four to five years.

Students are not limited to a single department in choosing their research adviser. The Cancer Biology Ph.D. program currently has approximately 60 graduate students located in basic science and clinical departments throughout the School of Medicine and the School of Humanities and Sciences.

### GRADUATE PROGRAM

### DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described under the “Graduate Degrees” section of this bulletin.

A small number of well-qualified applicants are admitted to the program each year. Applicants should have completed an undergraduate major in the biological sciences; applicants with undergraduate majors in physics, chemistry, or mathematics may be admitted if they complete background training in biology during the first two years of study. During
the first year, each student is required to take a minimum of three, one
quarter laboratory rotations. Students must choose a dissertation adviser
prior to the end of Summer Quarter, first year, but not before the end of
Spring Quarter, first year.

The requirements for the Ph.D. degree are as follows:
1. Training in biology equivalent to that of an undergraduate biology
major at Stanford.
2. Completion of the following courses:
   a) CBIO 241. Molecular, Cellular, and Genetic Basis of Cancer
   b) GENE 203. Advanced Genetics
c) MCP 221. Cell Biology of Physiological Processes
d) MPH 210. Signal Transduction Pathways and Networks
e) CBIO 280. Cancer Biology Journal Club; required for first- and
second-year graduate students in Autumn, Winter, and Spring
quarters.
f) MED 255. Responsible Conduct in Research; with permission, may
be audited.
3. At least 6 units of additional cancer biology-related, graduate-level
courses. Course work taken is determined in consultation with the
student’s adviser and/or the Program Director.
4. Presentation of research results at the annual Cancer Biology Conference
on at least three occasions, at least one being an oral presentation.
5. Successful completion of a qualifying examination in Cancer Biology
is required for admission to Ph.D. candidacy. The exam consists of an
NIH-style written grant proposal not to exceed ten pages (excluding
references), and an oral examination. The examining committee consis-
tists of three faculty members from the Cancer Biology Program and
does not include the student’s dissertation adviser. The composition
of this committee is chosen by the student and dissertation adviser
and must be submitted to and approved by the program director prior
to the end of Autumn Quarter, second year. The qualifying examina-
tion must be taken prior to the end of Spring Quarter, second year. If
necessary, one retake is permitted prior to the end of Summer Quarter,
second year. After the qualifying examination has been successfully
completed, the student is required to form a dissertation reading com-
mittee that includes the student’s adviser and three other members
of the Academic Council with appropriate expertise. Each student is
required to arrange annual meetings (more frequently, if necessary) of
the dissertation reading committee, at which time oral presentations
of progress during the past year and a plan of study for the coming year
are presented and discussed. Completion of each annual committee
meeting must be communicated in writing to the Program Director by
the adviser by the end of Spring Quarter each year.
6. The major accomplishment of each successful Ph.D. student is the
presentation of a written dissertation resulting from independent
investigation that contributes to knowledge in the area of cancer biol-
y. An oral examination is also required for the Ph.D. degree. In the
Cancer Biology Program, a public seminar (one hour) is presented by
the Ph.D. candidate, followed by a closed-door oral examination. The
oral examination committee consists of at least four examiners (the
members of the doctoral dissertation reading committee) and a chair.
The oral examination chair may not have a full or joint appointment
in the adviser’s or student’s home department. However, a courtesy
appointment does not affect eligibility. The oral examination chair may
be from the same department as any other member(s) of the examina-
tion committee. All members of the oral examination committee are
normally members of the Academic Council, as the oral examination
chair must be. With the prior approval of the program director or school
dean, one of the examiners may be a person who is not a member of the
Academic Council if that individual contributes expertise not otherwise
available. Official responsibility for selecting the oral examination
chair rests with the program. Cancer Biology delegates this to the
student and dissertation adviser.

COURSES

Course and lab instruction in the Cancer Biology Program conform
to the “Policy on the Use of Vertebrate Animals in Teaching Activities,”
the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-
2.html.

CBIO 101. Cancer Biology — (Same as PATH 101.) Experimental
approaches to understanding the origins, diagnosis, and treatment of
cancer. Focus on key experiments and discoveries with emphasis on ge-
netics, molecular biology, and cell biology. Topics include carcinogens,
tumor virology, oncogenes, tumor suppressor genes, cell cycle regulation,
angiogenesis, invasion and metastasis, cancer genomics, cancer epide-
miology, and cancer therapies. Discussion sections based on primary
research articles that describe key experiments in the field. Prerequisites:
BIOSCI or HUMBIO core.
4 units, Spr (Lipsick, J)

CBIO 241. Molecular, Cellular, and Genetic Basis of Cancer — Core
course required for all first-year Cancer Biology graduate students. Focus is
on key experiments and classic primary research papers in cancer biology.
Letter grade required. Undergraduates require consent of course director.
5 units, Win (Giaccia, A)

CBIO 250. Teaching in Cancer Biology — Credit is given for assisting a
professor in the teaching of a cancer biology course. Prerequisite: consent
of supervising instructor.
1-10 units, Aut, Win, Spr (Staff)

CBIO 280. Cancer Biology Journal Club — Focus is on recent papers
in the literature presented by graduate students. When possible, discussion
of these papers relates to and precedes cancer-related seminars at
Stanford. Attendance at the relevant seminar required. Required for and
limited to all first- and second-year graduate students in the Cancer Biol-
ogy Program.
1 unit, Aut, Win, Spr, Summer (Staff)

CBIO 299. Directed Reading in Cancer Biology — Prerequisite: consent
of instructor.
1-18 units, Aut, Win, Spr, Summer (Staff)

CBIO 399. Graduate Research — Allows for qualified students to un-
dertake investigations sponsored by individual faculty members. Cancer
Biology Ph.D. students must register as soon as they begin dissertation-
related research work.
1-18 units, Aut, Win, Spr, Summer (Staff)

COMPARATIVE MEDICINE

Chair: Linda C. Cork
Professor: Linda C. Cork
Associate Professors: Donna Bouley, Paul Buckmaster, Sherril Green,
Shaul Hestrin, Ravi Tolwani
Assistant Professors: Catherine Beckwith, Corinna Darian-Smith,
Manuel Garcia

Department Offices: Edwards Building, Room R321
Mail Code: 94305-5342
Phone: (650) 498-5080
Web Site: http://med.stanford.edu/compmed/

Courses given in Comparative Medicine have the subject code
COMPMED. For a complete list of subject codes, see Appendix.

The Department of Comparative Medicine is a clinical department that
offers residency training in laboratory animal medicine for veterin-
narians, although it does not offer degrees. Its faculty offer courses at the
undergraduate and graduate level and participate in teaching in other
departments. Both clinical faculty members, who are specialists in a vet-
ery medical specialty, and basic science faculty also accept students to
participate in ongoing research projects within the department and assist
students with special research projects.
The discipline of Comparative Medicine utilizes the differences and similarities among species to understand basic biologic and disease mechanisms. Comparative Medicine incorporates the use of spontaneous or induced disease models as one of several approaches to research. The research interests of faculty members are in neuroscience, infectious diseases, neuropathology, and molecular genetics.

COURSES

Course and lab instruction in the Department of Comparative Medicine conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

COMPMED 81N. Comparative Anatomy and Physiology of Mammals—Stanford Introductory Seminar. Preference to freshmen. Comparative approach to common mammals, laboratory, and domestic species. The unique adaptations of each species in terms of its morphological, anatomical, and behavioral characteristics. How these species interact with humans and the historical relationships between humans and these animal species.

3 units, Win (Bouley, D)

COMPMED 83Q. Horse Medicine—Stanford Introductory Seminar. Preference to sophomores. The most common equine diseases, ranging from colic to lameness. Equine anatomy and physiology relevant to topics in equine medicine. Equine infectious diseases, respiratory disorders, care of the newborn foal, a what’s-your-diagnosis problem series, and emergency first aid strategies.

1-2 units, Aut (Green, S)

COMPMED 106. A Primate Perspective on Brain Evolution—How to distinguish primate subgroups; how to place primates among mammals, and humans among primates, with respect to body structure, brain organization, and function. The unique characteristics of primates; what factors contributed to the evolution of primate groups, hominids, and modern human beings. The role of the hand in primate evolution. What extant primates reveal about language acquisition. How these changes are reflected in the sensorimotor organization of the primate brain. Prerequisite: freshman biology.

3 units, not given this year

COMPMED 107/207. Comparative Neuroanatomy—(Graduate students register for 207.) Functional organization and evolution of the vertebrate nervous system. Topics include paleoneurology, cladistic analysis, allometry, mosaic versus concerted evolution, and evolution of brain region structure, connectivity, and neurons. Comparisons between structure and function of vertebrate forebrains including hippocampi. Evolution of the primate visual and sensorimotor central nervous system as related to vocalization, socialization, and intelligence.

4 units, Aut (Buckmaster, P; Durian-Smith, C)

UNDERGRADUATE INDIVIDUAL WORK

COMPMED 198. Directed Reading in Comparative Medicine—May be taken as a prelude to research and may also involve participation in a lab or research group seminar and/or library research.

1-3 units, Aut, Win, Spr, Sum (Staff)

COMPMED 199. Undergraduate Research—Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr, Sum (Staff)

FOR GRADUATE STUDENTS

COMPMED 299. Directed Reading in Comparative Medicine—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

COMPMED 399. Graduate Research—Allows for qualified students to undertake investigations sponsored by individual faculty members. Opportunities are available in comparative medicine and pathology, immunohistochemistry, electron microscopy, molecular genetics, quantitative morphometry, neuroanatomy and neurophysiology of the hippocampus, pathogenesis of intestinal infections, immunopathology, biology of laboratory rodents, anesthesiology of laboratory animals, gene therapy of animal models of neurodegenerative diseases, and development and characterization of transgenic animal models. Enrollment limited to 6. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSE

See respective department listings for course descriptions. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

MCP 215. Synaptic Transmission

5 units, Aut (Staff)

DEVELOPMENTAL BIOLOGY

Emeriti: (Professors) David S. Hogness, A. Dale Kaiser
Chair: Margaret Fuller
Associate Chair: Lucy Shapiro
Professors: Ben Barres, Philip Beachy, Gill Bejerano, Gerald Crabtree, Margaret Fuller, Stuart Kim, David Kingsley, Roeland Nusse, Matthew Scott, Lucy Shapiro, James Spudich, Irving Weissman
Associate Professors: William Talbot, Anne Villeneuve
Assistant Professor: Seung Kim
Associate Professor (Teaching): Ellen Porzig
Associate Professor (Research): Harley McAdams

Courses given in Development Biology have the subject code DBIO. For a complete list of subject codes, see Appendix.

A fundamental problem in biology is the complex set of multicellular structures that characterize the adult animal is generated from the fertilized egg. Advances at the molecular level, particularly with respect to the genetic control of development, have been explosive. These advances represent the beginning of a major movement in the biological sciences toward the understanding of the molecular mechanisms underlying developmental decisions and the resulting morphogenetic processes. This new thrust in developmental biology derives from the extraordinary methodological advances of the past decade in molecular genetics, immunology, and biochemistry. However, it also derives from groundwork laid by the classical developmental studies, the rapid advances in cell biology and animal virology, and from models borrowed from prokaryotic systems. Increasingly, the work is directly related to human diseases, including oncogene function and inherited genetic disease.

The Department of Developmental Biology includes a critical mass of scientists who are leading the thrust in developmental biology and who can train new leaders in the attack on the fundamental problems of development. Department labs work on a wide variety of organisms from microbes to worms, flies, and mice. The dramatic evolutionary conservation of genes that regulate development makes the comparative approach of the research particularly effective. Scientists in the department labs have a very high level of interaction and collaboration. The discipline of developmental biology draws on biochemistry, cell biology, genetics, and molecular biology.

The department is located in the Beckman Center for Molecular and Genetic Medicine within the Stanford University Medical Center.
GRADUATE PROGRAM
MASTER OF SCIENCE

Students in the Ph.D. program in Developmental Biology may apply for an M.S. degree, assuming completion of their course requirements and preparation of a written proposal. The master’s degree awarded by the Department of Developmental Biology does not include the possibility of minors for graduate students enrolled in other departments or programs.

Students are required to take, and satisfactorily complete, at least three lecture courses offered by the department, including 210, Developmental Biology. In addition, students are required to take three courses outside the department. Students are also expected to attend Developmental Biology seminars and journal clubs. In addition, the candidate must complete a research paper proposing a specific experimental approach and background in an area of science relative to developmental biology.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The graduate program in Developmental Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program in which individuals are candidates for both the M.D. and Ph.D. degrees.

Students are required to complete, at least six courses, including Developmental Biology (210); Advanced Genetics (203); Frontiers in Biological Sciences (215); and an advanced molecular biology, biochemistry, or biophysics course. Students are expected to attend Developmental Biology seminars and journal clubs.

Completion of a qualifying examination is required for admission to Ph.D. candidacy. The examination consists of two parts. One proposal is on a subject different from the dissertation research and the other proposal is on the planned subject of the thesis. The final requirements of the program include presentation of a Ph.D. dissertation as the result of independent investigation and constituting a contribution to knowledge in the area of developmental biology. The student must pass the University oral examination, taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the research is presented by the candidate. The oral examination is conducted by a dissertation reading committee.

COURSES

Course and lab instruction in the Department of Developmental Biology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DiK/rph/8-2.html.

DBIO 156. Human Developmental Biology and Medicine —(Same as HUMBIO 141.) The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryonic transfer; gene and cell therapy; gametogenesis; pattern formation in the nervous system and limb development; gene and grand multiple pregnancies; prematurity, inutero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the developmental biology of humans. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.

4 units, not given this year

DBIO 199. Undergraduate Research —Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

DBIO 201. Development and Disease Mechanisms —Mechanisms that direct human development from conception to birth. Conserved molecular and cellular pathways regulate tissue and organ development; errors in these pathways result in congenital anomalies and human diseases. Topics: molecules regulating development, cell induction, developmental gene regulation, cell migration, programmed cell death, pattern formation, stem cells, cell lineage, and development of major organ systems. Emphasis on links between development and clinically significant topics including infertility, assisted reproductive technologies, contraception, prenatal diagnosis, multiparity, teratogenesis, inherited birth defects, fetal therapy, adolescence, cancer, and aging.

4 units, Aut (Staff)

DBIO 202. Assisted Reproductive Technologies —(Same as OBGYN 202.) Primary literature in basic and clinical science, and demonstrations of assisted reproductive technologies (ART). Techniques include in vitro fertilization covering micromanipulation procedures such as intracytoplasmic sperm injection and the culture of blastocysts, using mouse gametes, and pre-embryos. Class only may be taken for 1 unit. 2 units includes papers and attendance at clinical demonstrations. 3 units includes a term paper. Pre-requisite: DBIO 201 recommended, or consent of instructors.

1-3 units, not given this year (Porzig, E)

DBIO 203. Advanced Genetics —(Same as BIOSCI 203, GENE 203.) For graduate students in Bioscience programs; may be appropriate for graduate students in other programs. The genetic toolbox. Examples of analytic methods, genetic manipulation, genome analysis, and human genetics. Emphasis is on use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems. Faculty-led discussion sections with evaluation of papers. Students with minimal experience in genetics should prepare by working out problems in college level textbooks.

4 units, Aut (Stearns, T; Barsh, G; Sidow, A; Kim, S)

DBIO 210. Developmental Biology —Current areas of research in developmental biology. How organismic complexity is generated during embryonic and post-embryonic development. The roles of genetic networks, induction events, cell lineage, maternal inheritance, cell-cell communication, and hormonal control in developmental processes in well-studied organisms such as vertebrates, insects, and nematodes. Team-taught. Students meet with faculty to discuss current papers from the literature. Prerequisite: graduate standing, consent of instructor. Recommended: familiarity with basic techniques and experimental rationales of molecular biology, biochemistry, and genetics.

5 units, Spr (Staff)

DBIO 215. Frontiers in Biological Research —(Same as BIOC 215, GENE 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker’s primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.

1 unit, Aut, Win (Harbury, P; Brunet, A; Kingsley, D)

DBIO 221. Current Issues in Aging —(Same as GENE 221, NENS 221.) Current research literature on genetic mechanisms of aging in animals and human beings. Topics include: mitochondria mutations, insulin-like signaling, sirtuins, aging in flies and worms, stem cells, human progeria, and centenarian studies. Prerequisite: GENE 203.

1-2 units, Win, Spr (Kim, S; Brunet, A; Rando, T)

DBIO 299. Directed Reading in Developmental Biology —Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

DBIO 399. Graduate Research —Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSE

See respective department listings for course descriptions. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

HUMBIO 157. The Stem Cell: Science, Ethics, and Politics

3 units, Win (Nusse, R; Weissman, I; Scott, C)
EPIDEMIOLOGY PROGRAM

Director: Victor W. Henderson (Professor, Health Research and Policy, and Neurology and Neurological Sciences)
Advisory Committee: Stephen P. Fortmann (Professor, Medicine), John R. Huguenard (Associate Professor, Neurology and Neurological Sciences), Charles C. Prober (Professor, Pediatrics, and Microbiology and Immunology), Robert Tibshirani (Professor, Health Research and Policy)
Core Faculty and Academic Teaching Staff: Raymond R. Balise (Lecturer, Health Research and Policy), Kristin L. Cobb (Clinical Assistant Professor, Health Research and Policy), Gary D. Friedman* (Consulting Professor, Health Research and Policy), Victor W. Henderson* (Professor, Health Research and Policy, and Medicine), Philip Lavori (Professor, Health Research and Policy), Yvonne A. Muldano (Associate Professor, Pediatrics), Lorene M. Nelson* (Associate Professor, Health Research and Policy), Julie Parsonnet* (Professor, Medicine, and Health Research and Policy), Rita A. Popat (Instructor, Health Research and Policy), Dee W. West* (Professor, Health Research and Policy), Alice S. Whittemore* (Professor, Health Research and Policy)

* Member of the program steering committee

Program Offices: HRP Redwood Building, Room T213D,
Mail Code: 94305-5405
Phone: (650) 723-5456
Email: epiprogram@med.stanford.edu
Web Site: http://www.stanford.edu/dept/HRP/epidemiology/

MASTER OF SCIENCE

The Graduate Interdisciplinary Program in Epidemiology offers instruction and interdisciplinary research opportunities leading to the M.S. degree in Epidemiology. Most core faculty and academic teaching staff are administratively housed within the Department of Health Research and Policy. Affiliated faculty come from a large number of Stanford University departments and centers, and from notable Bay Area research facilities. The program seeks students with the potential to be future leaders in clinical and translational research, epidemiology, and allied disciplines. The program provides researchers from diverse clinical backgrounds the knowledge and skills to become clinical investigators; it also offers an introduction to epidemiology for individuals with research experience in the behavioral and social sciences and for others without a clinical background. Research strengths include cancer epidemiology, cardiovascular disease epidemiology, infectious disease epidemiology, musculoskeletal disease epidemiology, neuroepidemiology, and aspects of epidemiologic methods, genetic epidemiology, reproductive epidemiology and women’s health, and environmental and occupational epidemiology.

Two academic tracks lead to the M.S. degree; these tracks are not declared on Axess and they do not appear on the transcript or the diploma. The Clinical Epidemiology track, sometimes referred to as the Clinical and Translational Research track, is for physicians and others with specific interests in clinical and translational research. Students in this track receive training in epidemiologic methods, statistical analysis, and other areas essential to patient-oriented clinical research. These students are typically clinical investigators with an M.D. or comparable clinical degree, often during the fellowship stage of their postgraduate training, or in an early stage of faculty development, and are often considering careers in academic medicine. The Traditional Epidemiology track serves students without prior clinical training. One category of such students consists of behavioral and social scientists who wish to bring an epidemiologic orientation to their research. Students pursuing a Ph.D. in these disciplines may wish to consider a concurrent master’s degree in Epidemiology. The traditional track also serves as an introduction to epidemiology for students with baccalaureate degrees who are considering careers in epidemiology or a related discipline.

University requirements for the M.S. degree are described in the “Graduate Degrees” section of this bulletin.

To receive the M.S. degree, students in both instructional tracks are expected to obtain a grounding in epidemiologic methods and applied biostatistics and to demonstrate research skills through the completion of a master’s thesis. Required courses are HRP 225, Design and Conduct of Clinical and Epidemiologic Studies; HRP 226, Advanced Epidemiologic and Clinical Research Methods; HRP 236, Epidemiology Research Seminar, 3 units required; HRP 259, Introduction to Probability and Statistics for Epidemiology; HRP 261, Intermediate Biostatistics; HRP 262, Regression, Prediction, Survival Analysis; and a master’s thesis with 12 or more units. Students in the Clinical Epidemiology track must also complete HRP 251, Design and Conduct of Clinical Trials; and MED 255, Responsible Conduct of Research. Students are required to select at least two other courses in Epidemiology. Students are assigned a methodology mentor, who is usually from the Department of Health Research and Policy, and a research mentor, who may be from another department. For the students in the Clinical Epidemiology track, the research mentor is often an affiliated faculty member from the department of the student’s clinical specialty. Other programmatic requirements are described in Graduate Interdisciplinary Program in Epidemiology, Information and Guidelines, available from the educational coordinator in the Department of Health Research and Policy.

Courses

The course listings of individual departments participating in the Graduate Interdisciplinary Program in Epidemiology should be consulted for complete descriptions.

GENETICS

Emeritus: (Professor) Luca Cavalli-Sforza, Leonard Herzenberg
Chair: Richard M. Myers
Professors: Russ Altman, Gregory Barsh, Stanley Cohen, Ronald Davis, Andrew Fire, Uta Francke, Margaret Fuller, Mark Kay, Stuart Kim, Joseph Lipsick, Richard Myers, John Pringle, Matthew Scott
Associate Professors: Michele Calos, Arend Sidow, Tim Stearns, Anne Villeneuve, Douglas Vollrath
Assistant Professors: Laura Attardi, Julie Baker, Anne Brunet, James Ford, Julien Sage, Joanna Mountain, Man-Wah Tan
Professor (Research): Leonore Herzenberg
Associate Professors (Research): J. Michael Cherry, Zijie Sun
Assistant Professor (Research): Gavin Sherlock
Courtey Professor: Hank Greely
Consulting Professor: David Cox

Mail Code: 94305-5120
Phone: (650) 723-3335
Email: genetics-info@genome.stanford.edu
Web Site: http://genetics.stanford.edu/

Courses given in Genetics have the subject code GENE. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAMS

University requirements for the Ph.D. degree are described in the “Graduate Degrees” section of this bulletin.

The Ph.D. program in the Department of Genetics offers graduate students the opportunity to pursue a discipline that encompasses both a set of tools and a coherent way of thinking about biology and medicine. All major areas of genetics are represented in the department, including human genetics (molecular identification of Mendelian traits and the pathophysiology of genetic disease, gene therapy, genetic epidemiology, analysis of complex traits, genetic anthropology, and human evolution), and application of model organisms such as bacteria, yeast, flies, worms, or mice to basic questions in biomedical research. The department is especially strong in genomic and bioinformatic approaches to genome
biology and evolution, and includes several genome-scale databases such as the Saccharomyces Genome Database (SGD), the Stanford Microarray Database (SMD), and the Pharmacogenetics and Pharmacogenomics Knowledge Base (PharmGKB), the Stanford Human Genome Center (SHGC), and, administered through the Department of Biochemistry, the Stanford Genome Technology Center (STGC).

Exposure to the intellectual scope of the department is provided by laboratory rotations, dissertation research, advanced courses in genetics and other areas of biomedical science, seminar series, journal clubs, and an annual three-day retreat of faculty, students, postdoctoral fellows, and staff scientists. Emphasis is placed on interactions and collaborations among students, postdoctoral students, and faculty within the department and throughout the campus.

During their first year, graduate students in the department take graduate courses and sample areas of research by doing rotations in three or four laboratories. At the end of the first three quarters, students may select a laboratory in which to do their dissertation research. While the dissertation research is generally performed in one laboratory, collaborative projects with more than one faculty member are encouraged. In addition to interacting with their faculty preceptor, graduate students receive advice regularly from other faculty members who serve as members of their dissertation committee. Study for the Ph.D. generally requires between four and five years of graduate work, most of which is focused on dissertation research.

Students are generally enrolled in the program to receive the Ph.D. degree, although a limited number of M.D. candidates can combine research training in genetics with their medical studies. Ph.D. candidates who have passed the qualifying exam in the second year can opt to receive the M.S. degree.

There are opportunities for graduate students to teach in graduate-level and professional-school courses. In addition, students are encouraged to participate in educational outreach activities coordinated by the department, which include opportunities to interact with secondary school students and teachers, lay groups, and local science museums.

Students who have recently received a bachelor’s, master’s, M.D., or Ph.D. degree in related fields may apply for graduate study. Prospective students must have a background in general biology, mathematics, physics, and chemistry. Decisions for admission are based on comparison of the relative merits of all the candidates’ academic abilities and potential for research and the department’s interest in promoting a diverse learning environment. Interviews take place in late February or early March and successful applicants are offered admission by early spring. Students who wish to pursue a combined M.D./Ph.D. degree are considered for admission into the graduate program in the Department of Genetics after they have been admitted to the M.D. program in the School of Medicine.

The Academic Senate has approved an M.S. program in Human Genetics effective for academic year 2007-08.

Students begin graduate studies in Autumn Quarter. Prospective students are encouraged to start the application process early to ensure that they are able to submit a complete application by the December deadline. All students accepted into the Ph.D. program in the Department of Genetics are provided with full tuition and a stipend to cover the cost of living. Two training grants from the National Institutes of Health provide major support for the graduate training program in the department. Other student support is provided by departmental funds and from research grants, both federal and private, of the faculty. In addition, a number of graduate students are funded by fellowships, including those from the National Science Foundation and the Stanford Graduate Fellows program.

**COURSES**

For further information on the availability of courses, consult the quarterly *Time Schedule*, or inquire at the departmental office. Additional courses in or related to genetics are included in the listings of the departments of Biological Sciences, Biochemistry, Developmental Biology, Microbiology and Immunology, Neuroscience, Biomedical Informatics, and Structural Biology.

**GENE 104Q. Law and the Biosciences**—Stanford Introductory Seminar. Preference to sophomores. Focus is on human genetics; also assisted reproduction and neuroscience. Topics include forensic use of DNA, genetic testing, genetic discrimination, eugenics, cloning, pre-implantation genetic diagnosis, neuroscientiffic methods of lie detection, and genetic or neuroscience enhancement. Student presentations on research paper conclusions. 3 units, Spr (Greely, H)

**GENE 106Q. The Heart of the Matter**—(Same as BIOSCI 106Q.) Stanford Introductory Seminar. Preference to sophomores. The molecular and biochemical basis of life. Emphasis is on the methods and scientific logic that lead to advances in knowledge. The human heart and circulatory system is the unifying theme for topics such as the constituents and activities of cells, tissues, and organs; the chemicals and proteins that carry on life processes; the biotechnology revolution; the role of genes in human disease and normal functions; and the Human Genome Project. How scientific knowledge is built up through research; how biology initiates advances in medicine; and how science, engineering, and economics interact in biotechnology. Student presentations, demonstrations, and field trips. GER:DB-NatSci 3 units, Win (Myers, R; Simoni, R)

**GENE 109Q. Genomics: A Technical and Cultural Revolution**—(Same as BIOMEDIN 109Q.) Stanford Introductory Seminar. For nonscience majors. Concepts of genomics, high-throughput methods of data collection, and computational approaches to analysis of data. The social, ethical, and economic implications of genomic science. Students may focus on computational or social aspects of genomics. 3 units, Win (Altman, R)

**GENE 199. Undergraduate Research**—Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor. 1-18 units, Aut, Win, Spr, Sum (Staff)

**GENE 202. Human Genetics**—Theoretical and experimental basis for the genetics of human health and disease. Molecular, chromosomal, biochemical, developmental, cancer, and medical genetics, emphasizing the last. Clinical case discussions. Prerequisites: Biochemistry; basic Genetics. 4 units, Aut (Ford, J; Myers, R)

**GENE 203. Advanced Genetics**—(Same as BIOSCI 203, DBIO 203.) For graduate students in Bioscience programs; may be appropriate for graduate students in other programs. The genetic toolbox. Examples of analytic methods, genetic manipulation, genome analysis, and human genetics. Emphasis is on use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems. Faculty-led discussion sections with evaluation of papers. Students with minimal experience in genetics should prepare by working out problems in college level textbooks. 4 units, Aut (Stearns, T; Barsh, G; Sidow, A; Kim, S)

**GENE 206. Epigenetics**—(Same as PATH 206.) Mechanisms by which phenotypes not determined by the DNA sequence are stably inherited in successive cell divisions. Begins with the discovery of position-effect variegation in Drosophila in the 1920s and proceeds to present-day studies of covalent modifications of histones and DNA methylation. Topics include: position effect, gene silencing, heterochromatin, centromere identity, genomic imprinting, “histone code”, variant histones, and the role of epigenetics in cancer. Open to advanced undergraduates with permission of instructor. 2 units, Win (Lipsick, J)
GENE 211. Genomics—Genome evolution, organization, and function; technical, computational, and experimental approaches; hands-on experience with representative computational tools used in genome science; and a beginning working knowledge of PERL.

3 units, Win (Cherry, J; Myers, R; Sidow, A; Sherlock, G)

GENE 212. Introduction to Biomedical Informatics Research Methodology—(Same as BIOMEDIN 212, CS 272.) Hands-on software building. Student teams conceive, design, specify, implement, evaluate, and report on a software project in the domain of biomedicine. Creating written proposals, peer review, providing status reports, and preparing final reports. Guest lectures from professional biomedical informatics systems builders on issues related to the process of project management. Software engineering basics. Prerequisites: 210, 211 or 214, or consent of instructor.

3 units, Aut (Altmann, R; Cheng, B; Klein, T)

GENE 214. Representations and Algorithms for Computational Molecular Biology—(Same as BIOMEDIN 214, CS 274.) Topics: algorithms for alignment of biological sequences and structures, computing with strings, phylogenetic tree construction, hidden Markov models, computing with networks of genes, basic structural computations on proteins, protein structure prediction, protein threading techniques, homology modeling, molecular dynamics and energy minimization, statistical analysis of 3D biological data, integration of data sources, knowledge representation and controlled terminologies for molecular biology, graphical display of biological data, and machine learning (clustering & classification), and natural language text processing. Consent of instructor required for 3 units. Prerequisites: programming skills, interest in biology.

3-4 units, Spr (Altmann, R)

GENE 215. Frontiers in Biological Research—(Same as BIOC 215, DBIO 215.) Literature discussion in conjunction with the Frontiers in Biological Research seminar series hosted by Biochemistry, Developmental Biology, and Genetics in which distinguished investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker’s primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.

1 unit, Aut, Win (Harbury, P; Brunet, A; Kingsley, D)

GENE 221. Current Issues in Aging—(Same as DBIO 221, NENS 221.) Advanced course considers current research literature on genetic mechanisms of aging in animals and humans. Topics include: mitochondria mutations, insulin-like signaling, sirtuins, aging in flies and worms, stem cells, human progeria, and centenarian studies. Prerequisite: GENE 203.

1-2 units, Win, Spr (Kim, S; Brunet, A; Rando, T)

GENE 222. Method and Logic in Experimental Genetics—For graduate students only. How experimental strategies are applied to biological questions irrespective of discipline boundaries. Examples include purifying activities from complex mixtures, localizing molecules in space and time, discovering macromolecular interactions, inference from sequence similarity, using structure to elucidate function, and applying genomics to biological problems. Weekly discussion of two representative papers selected by faculty and a student presentation of a third paper which illustrate principles of biochemistry and cell and molecular biology, and the historical context of important scientific advances.

3 units, Win (Baker, J; Brunet, A)

GENE 233. The Biology of Small Modulatory RNAs—(Same as MI 233, PATH 233.) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small modulatory RNAs during animal and plant development. Required paper proposing novel research.

2 units, alternate years, not given this year (Fire, A; Chen, C)

GENE 235. C. Elegans Genetics—Genetic approaches to C. elegans, practice in designing experiments and demonstrations of its growth and anatomy. Probable topics include: growth and genetics, genome map and sequence, mutant screens that start with a desired phenotype, reverse genetics and RNAi screens, genetic duplications, uses of null phenotype non-null alleles, genetic interactions and pathway analysis, and embryogenesis and cell lineage. Focus of action, mosaic analysis, and interface with embryological and evolutionary approaches.

2 units, Spr (Fire, A)

GENE 238. Current Concepts and Dilemmas in Genetic Testing—(Same as INDE 238.) Issues arising from the translational process from research to commercialization. Diagnostic inventions and applications, community implications, newborn screening, cancer genetics, and pharmacogenomics. Guest experts. For M.D. students and biomedical graduate students. Limited enrollment.

2 units, Spr (Tobin, S; Schrijver, I; Cowan, T; Magnus, D)

GENE 260. Supervised Study—Genetics graduate student lab research from first quarter to filing of candidacy. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

GENE 262. Advanced Microbial Genetics and Genomics—(Same as BIOSCI 162/262.) Genetic tools for studying the cell biology and behavior of bacteria. Case studies on genetic approaches in combination with biochemistry, microscopy, and genomics to study mechanisms of gene expression, signal transduction, cell cycle regulation, development, and pathogenesis.

4 units, Spr (Tan, M; Burkholder, B)

GENE 299. Directed Reading in Genetics—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

GENE 399. Graduate Research—Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSE

See respective department listings for course descriptions. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

MED 255. The Responsible Conduct of Research
1 unit, Aut, Win, Spr, Sum (Staff)
HEALTH RESEARCH AND POLICY

Emeriti: (Professors) John Farquhar, Victor R. Fuchs, Lincoln E. Moses, Ralph S. Paffenbarger, Jr.
Chair: Phil Lavori
Co-Chair: Robert Tibshirani
Professors: Bradley Efron, Trevor Hastie, Victor W. Henderson, Mark Hlatky, Iain M. Johnstone, Abby C. King, Philip W. Lavori, Richard A. Olshen, Julie Parsonnet, Robert Tibshirani, Alice S. Whitemore, Dee W. West, Wing Wong
Associate Professors: Laurence Baker, Lorene M. Nelson
Assistant Professor: M. Kate Bundorf
Professor (Research): Dan Bloch
Associate Professor (Research): Laura Lazzeroni
Assistant Professors (Clinical): Kristin Cobb, Rita Popat
Senior Lecturer: Irene Corso
Lecturers: Raymond Balise, Ellen Chang, Christina Clarke-Dur, Scarlett Gomez, Laurel Habel, Lisa Herrington, Theresa Keegan, David Lilienfeld, Bang Nguyen, Ingrid Oakley-Girvan, Cynthia O’Malley, Rudy Rull, Caroline Tanner, Stephen Van Den Eeden

Courses given in Health Research and Policy have the subject code HRP. For a complete list of subject codes, see Appendix.

The Department of Health Research and Policy has three principal areas of scholarly interest:

1. **Biostatistics** deals with scientific methodology in the medical sciences, emphasizing the use of statistical techniques.
2. **Epidemiology** is the study of the distribution and determinants of illness and disability in human populations. Epidemiology training provides analytic tools for clinical and translational research, including studies of disease etiology and control.
3. **Health Services Research** is concerned with many aspects of health policy analysis in the public and private sectors.

GRADUATE PROGRAMS

The Program in Epidemiology and the Program in Health Services Research are housed in the Department of Health Research and Policy. These programs, which offer M.S. degrees in Epidemiology and in Health Services Research, are described separately in the relevant sections this bulletin.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T213D, Stanford, California 94305-5405.

COURSES

**HRP89Q. Introduction to Crosscultural Issues in Medicine** — Stanford Introductory Seminar. Preference to sophomores. Crosscultural issues that impact health care delivery such as ethnicity, immigration, language barriers, and service expectations. Focus is on culturally unique and non-English speaking populations and developing interpersonal and communication skills with diverse ethnic groups. GER:EC-AmerCul

3 units, Win (Corso, I)

**HRP 199. Undergraduate Research** — Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of the instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

**HRP 207. Issues and Methods of Health Services and Policy Research** — Primarily for students in the Health Services and Policy Research scholarly track. Topics include health care systems and institutions, health insurance, regulation, cost effectiveness analysis, and medical decision making.

2 units, Aut (Baker, L)

**HRP 208. Issues and Methods of Health Services and Policy Research 2** — Continuation of HRP 207. Provides overview of key issues and methods in health services and policy research, including health care systems and institutions, health insurance, regulation, cost effectiveness analysis, and medical decision- making. Intended primarily for students in the Health Services and Policy Research scholarly track. Prerequisite: HRP 207 recommended.

2 units, Win (Baker, L; McDonald, K)

**HRP 210. Health Law and Policy I** — (Same as LAW 313.) Open to law or medical students and to qualified undergraduates by consent of instructor. Introduction to the American health care system and its legal and policy problems. Topics: the special characteristics of medical care compared to other goods and services, the difficulties of assuring quality care, the complex patchwork of the financing system, and the ethical problems the system raises.

3 units, not given this year

**HRP 211. Law and the Biosciences** — (Same as LAW 368.) For medical students; graduate students by consent of instructor. Legal, social, and ethical issues arising from advances in the biosciences. Focus is on human genetics; also advances in assisted reproduction and neuroscience. Topics include forensic use of DNA, genetic testing, genetic discrimination, eugenics, cloning, pre-implantation genetic diagnosis, neuroscientific methods of lie detection, and genetic or neuroscience enhancement.

3 units, Aut (Staff)

**HRP 212. Crosscultural Medicine** — Interviewing and behavioral skills needed to facilitate culturally relevant health care across all population groups. Explicit and implicit cultural influences operating in formal and informal medical contexts.

3 units, Spr (Corso, I)

**HRP 213. Research Protocol Development for Clinical and Translational Research** — Development of research questions and plans for statistical analysis. Study design, sample size and power calculations, and statistical analysis of study data. Analytic methods to carry out statistical power and sample size calculations. Designed for medical students in the Clinical Research Scholarly Concentration. Open to graduate students; not intended for Epidemiology graduate students. Prerequisites: 225, and 258 or 259, or consent of instructor.

2-3 units, Spr (Popat, R)
HRP 214. Scientific Writing — Step-by-step through the process of writing and publishing a scientific manuscript. How to write effectively, concisely, and clearly. Preparation of an actual scientific manuscript. Students are encouraged to bring a manuscript on which they are currently working to develop and polish throughout the course.  
2-3 units, Win (Cobb, K)

HRP 215. Scientific Writing for Basic and Translational Scientists — Teaches students in the basic sciences how to write clearly, concisely, and effectively. Focuses on the process of writing and publishing a scientific manuscript. Not intended for epidemiology graduate students.  
2-3 units, Aut (Cobb, K)

HRP 223. Epidemiologic Analysis: Data Management and Statistical Programming — The skills required for management and analysis of biomedical data. Topics include importing and exporting data from multiple database systems, visualizing and cleaning data, data management for multicenter projects, and data security. Introduction to applied statistical programming relevant to epidemiologic and clinical research. No previous programming experience required.  
2-3 units, Aut (Balise, R)

HRP 225. Design and Conduct of Clinical and Epidemiologic Studies — Intermediate-level. The skills to design, carry out, and interpret epidemiologic studies, particularly of chronic diseases. Topics: epidemiologic concepts, sources of data, cohort studies, case-control studies, cross-sectional studies, sampling, estimating sample size, questionnaire design, and the effects of measurement error. Prerequisite: 159/259 or equivalent, or consent of instructor.  
3-4 units, Win (Nelson, L)

HRP 226. Advanced Epidemiologic and Clinical Research Methods — The principles of measurement, measures of effect, confounding, effect modification, and strategies for minimizing bias in epidemiologic studies. Prerequisite: 225 or consent of instructor.  
3-4 units, Win (Popat, R)

HRP 229. Chronic Disease Epidemiology — Descriptive epidemiology and sources of incidence and mortality data; biological bases of neurologic, musculoskeletal, cardiovascular, and other chronic diseases except cancer; methodological issues relevant to chronic epidemiologic research; causal inference; major environmental risk factors; genetic susceptibility; and examples of current research and critiques of literature. Prerequisite: 225 or consent of instructor.  
2-3 units, Win (Popat, R), alternate years, not given next year

HRP 230. Cancer Epidemiology — Descriptive epidemiology and sources of incidence/mortality data; the biological basis of carcinogenesis and its implications for epidemiologic research; methodological issues relevant to cancer research; causal inference; major environmental risk factors; genetic susceptibility; cancer control; examples of current research; and critique of the literature. 3 units requires paper or project. Prerequisite: 225, or consent of instructor.  
2-3 units, alternate years, not given this year

HRP 231. Epidemiology of Infectious Diseases — Principles of the transmission of the infectious agents (viruses, bacteria, rickettsiae, mycoplasma, fungi, and protozoan and helminth parasites). The role of vectors, reservoirs, and environmental factors. Pathogen and host characteristics that determine the spectrum of infection and disease. Endemicity, outbreaks, and epidemics of selected infectious diseases. Principles of control and surveillance.  
3 units, Spr (Parsonnet, J; Maldonado, Y), alternate years, not given next year

HRP 234. Foundations of Pharmacoepidemiology — Historical development of pharmacoepidemiology, the drug development process and pharmacoepidemiology role in it, pharmacovigilance/drug safety systems, epidemiology in outcomes research, the role of pharmacoepidemiology in risk management, and classic examples of pharmacoepidemiologic investigations.  
2-3 units, alternate years, not given this year

HRP 236. Epidemiology Research Seminar — Weekly forum for ongoing epidemiologic research by faculty, staff, guests, and students, emphasizing research issues relevant to disease causation, prevention, and treatment. May be repeated for credit.  
1 unit, Aut (Friedman, G), Win (West, D), Spr (Whittemore, A)

HRP 251. Design and Conduct of Clinical Trials — The rationale for phases 1-3 clinical trials, the recruitment of subjects, techniques for randomization, data collection and endpoints, interim monitoring, and reporting of results. Emphasis is on the theoretical underpinnings of clinical research and the practical aspects of conducting clinical trials.  
3 units, Spr (Henderson, V; Lavori, P)

HRP 258. Introduction to Probability and Statistics for Clinical Research — Fundamentals of probability and statistics for clinical researchers. Equips students with the tools to understand and critically evaluate the medical literature. Topics to include: random variables, expectation, variance, probability distributions, the Central Limit Theorem, sampling theory, hypothesis testing, confidence intervals, correlation, regression, analysis of variance, and survival analysis. Open to Medical and graduate students.  
3 units, Spr (Cobb, K)

HRP 259. Introduction to Probability and Statistics for Epidemiology — Topics: random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals. Correlation, regression, analysis of variance, and nonparametric tests. Introduction to least squares and maximum likelihood estimation. Emphasis is on medical applications.  
4-5 units, Aut (Cobb, K)

HRP 260A,B,C. Workshop in Biostatistics — (Same as STATS 260A,B,C.) Applications of statistical techniques to current problems in medical science. Enrollment for more than 2 units of credit involves extra reading or consulting and requires consent of instructor.  
1-2 units, A: Aut, B: Win, C: Spr (Olshen, R)

3 units, Win (Cobb, K)

HRP 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis — (Same as STATS 262.) Methods for analyzing longitudinal data. Topics include Kaplan–Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.  
3 units, Spr (Cobb, K)

HRP 280,281,282. Spanish for Medical Students — (Same as SPAN-LANG 121M,122M,123M.) Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of knowledge.  
3 units, 280: Aut, 281: Win, 282: Spr (Corso, I)

HRP 283. Health Services Research Core Seminar — Presentation of research in progress and tutorials in the field of health services research.  
1 unit, Aut, Win, Spr, Sum (Staff)

HRP 290. Advanced Spanish Conversation — Oral language skills covering pediatric, gynecological, and other specialty exams; patient health education and counseling; and diseases such as diabetes, asthma, and TB. Prerequisite: Spanish proficiency or consent of instructor.  
3 units, Aut, Win, Spr (Corso, I)
HEALTH SERVICES RESEARCH PROGRAM

Director: Mark Hlatky (Professor, Health Research and Policy, and Medicine)

Executive Committee: Laurence Baker (Associate Professor, Health Research and Policy), M. Kate Bundorf (Assistant Professor, Health Research and Policy), Alan Garber (Professor, Medicine), Mary Goldstein (Professor, Medicine), Mark Hlatky (Professor, Health Research and Policy, and Medicine), Douglas Owens (Professor, Medicine)

Participating Faculty and Staff by Department:
Anesthesia: Alex Macario (Professor)
Economics: Thomas Macurdy (Professor), Mark McClellan (Associate Professor, on leave)
Business: Alain Enthoven (Professor, emeritus), Daniel Kessler (Professor)
Health Research and Policy: Laurence Baker (Associate Professor), Paul Barnett (Consulting Associate Professor), M. Kate Bundorf (Assistant Professor), Victor Fuchs (Professor, emeritus), Trevor Hastie (Professor), Mark Hlatky (Professor), Philip Lavori (Professor), Richard Olshen (Professor), Ciaran Phibbs (Consulting Associate Professor), Joseph Selby (Consulting Professor), Robert Tibshirani (Professor)
Law: Henry Greely (Professor)
Management Science and Engineering: Margaret Brandeau (Professor, Medicine): Jay Bhattacharya (Assistant Professor, Alan Garber (Professor), Mary Goldstein (Professor), Michael Gould (Assistant Professor), Paul Heidenreich (Associate Professor), Mark Hlatky (Professor), Mark McClellan (Associate Professor, on leave), Grant Miller (Assistant Professor) Douglas Owens (Professor)
Pediatrics: Paul Wise (Professor)
Psychiatry: Rudolph Moos (Professor)
Sociology: Richard Scott (Professor, emeritus)

Program Offices: HRP Redwood Building, Room T213D
Mail Code: 94305-5405
Phone: (650) 723-5456
Email: hsr-program@med.stanford.edu
Web Site: http://hsr.stanford.edu

GRADUATE PROGRAM
MASTER OF SCIENCE

The Master’s Degree Program in Health Services Research seeks to train students in the quantitative analysis of issues in health and medical care. The program emphasizes an individually designed program of course work and completion of a master’s project under the mentorship of a faculty member. The typical student in the program is either a physician who has completed residency training and is preparing for a research career, or a student with a strong background in policy analysis who wishes to focus on problems in health or medical care. Faculty interests include outcomes research, health economics, health care organization, health care access, quality of care, decision analysis, clinical guidelines, and assessment of patient preferences and quality of life.

To receive the degree, students are expected to demonstrate knowledge of issues in health services research and the quantitative skills necessary for research in this area. Students must take at least 45 units of course work (9 of the units may be double-counted to meet other degree requirements) and write a University thesis. The course work requirements are:

1. At least 8 units from the following group of Health Research and Policy (HRP) core courses: 256, Economics of Health and Medical Care; 391, Political Economy of Health Care in the United States; 392, Analysis of Costs, Risks, and Benefits in Health Care.
2. At least 6 units of graduate-level statistics courses. The sequence of HRP 261 and 262 is strongly recommended.
3. At least 3 units of HRP 283, Health Services Research Core Seminar.
4. At least 15 units of HRP research credit from 299, Directed Reading, or 399, Research.
5. An additional set of approved elective courses to complete the program total of at least 45 units.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T213D, Stanford, California 94305-5405.

**COURSES**

The course listings of individual departments participating in the Health Services Research Program should be consulted for complete descriptions.

**IMMUNOLOGY PROGRAM**

*Chair, Executive Committee for the Immunology Program:* Lawrence Steinman (Professor, Neurology and Neurological Sciences)

*Director for Immunology Program:* K. Christopher Garcia (Associate Professor, Microbiology and Immunology)

*Director for Clinical Immunology Program:* C. Garrison Fathman (Medicine/Immunology and Rheumatology)

**Participating Departments and Faculty:**

**Biological Sciences:** Anthony W. De Tomaso (Assistant Professor), Patricia P. Jones (Professor)

**Chemistry:** Harden M. McConnell (Professor, emeritus)*

**Genetics:** Leonard A. Herzenberg (Professor, emeritus), Lenore A. Herzenberg (Professor, Research), Man-wah Tan (Assistant Professor)

**Medicine/Bone Marrow Transplantation Program:** Robert Negrin (Professor), David Miklos (Assistant Professor), Judith Shizuru (Associate Professor)

**Medicine/Endocrinology:** Ajay Chawla (Assistant Professor)

**Medicine/Hematology:** Calvin Kuo (Assistant Professor), Peter Lee (Associate Professor)

**Medicine/Immunology and Rheumatology:** Garrison Fathman (Professor), Jane R. Parnes (Professor), William Robinson (Assistant Professor), Samuel Strober (Professor), Paul J. Utz (Associate Professor)

**Medicine/Oncology:** Gilbert Chu (Professor, and Biochemistry), Dean Felscher (Assistant Professor), Ronald Levy (Professor), Shoshana Levy (Professor, Research)

**Microbiology and Immunology:** Chang-Zheng Chen (Assistant Professor), Yueh-Hsiu Chien (Professor), Mark M. Davis (Professor), K. Christopher Garcia (Associate Professor, and Structural Biology), Hugh McDevitt (Professor), Garry P. Nolan (Professor, Microbiology and Immunology), David Schneider (Assistant Professor)

**Molecular and Cellular Physiology:** Richard S. Lewis (Professor)

**Neurology and Neurological Sciences:** Lawrence Steinman (Professor, and Pediatrics)

**Pathology:** Eugene C. Butcher (Professor), Michael Cleary (Professor), Gerald R. Crabtree (Professor, and Developmental Biology), Edgar G. Engleman (Professor, and Medicine/Immunology and Rheumatology), Magali Fontaine (Assistant Professor), Joseph S. Lipsick (Professor), Sara Michie (Associate Professor), Raymond A. Sobel (Professor), Irving L. Weissman (Professor, and Developmental Biology)

**Pediatrics:** Ann Arvin (Professor, and Microbiology and Immunology), Christopher Contag (Assistant Professor, Research), Alan M. Krensly (Professor), Carol Clayberger (Professor, Research), David B. Lewis (Professor), Elizabeth Mellins (Associate Professor)

**Structural Biology:** Peter Parham (Professor, and Microbiology and Immunology)

**Surgery:** Sheri Krams (Associate Professor, Research), Olivia Martinez (Associate Professor, Research)

*Recalled to active duty

**GRADUATE PROGRAMS**

**MASTER OF SCIENCE**

Students in the Ph.D. program in Immunology may apply for an M.S. degree in Immunology, assuming completion of appropriate requirements. Students must complete:

1. Three full-tuition quarters of residency as a graduate student at Stanford
2. At least 45 units of academic work, all of which must be in courses at or above the 100 level, 36 units of which must be at or above the 200 level
3. 2-3 quarters of graduate research (IMMUNOL 300), consisting of rotations in the labs of 2-3 faculty members
4. Course work in Immunology as follows: coursework in basic immunology (BIOSCI 230, IMMUNOL 205 or equivalent, advanced Immunology such as IMMUNOL 201, 200, and 203). In addition, the student may take one of four possible elective courses: MPH 210, Signal Transduction Pathways and Networks, SBIO 241, Biological Macromolecules, Cancer Biology, CB 241, or DBIO 210, Developmental Biology. Other required core courses are: Gene 203, Advanced Genetics, IMMUNOL 215, Principles of Biological Technologies, MCP 221, Cell Biology of Physiological Processes.
5. Graduate-level biochemistry and molecular biology (BIOC 187, 200, 201, or equivalents)
6. Course work in IMMUNOL 311, Seminar in Immunology, and IMMUNOL 311A, Seminar Discussion in Immunology
7. Participation in the Immunology journal club (IMMUNOL 305), and attendance at the weekly Immunology seminar and at the annual Stanford Immunology Scientific Conference
8. The qualifying examination in Immunology before admission to Ph.D. candidacy: the written exam, part I, in the last week in June, first year; the thesis proposal, part II, before December 17th, second year; and an oral presentation on the research of one rotation, mid-July, first year.

**DOCTOR OF PHILOSOPHY**

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The interdepartmental Immunology Program offers instruction and research opportunities leading to a Ph.D. in Immunology. The goal of the program is to develop young investigators who have a solid foundation in immunology as well as related sciences and who can carry out innovative research. The program features a flexible selection of courses and seminars to enrich the students’ backgrounds, combined with extensive research training in the laboratories of the participating immunology faculty. Students applying to the program typically have an undergraduate major in biological sciences, but majors in other areas are acceptable if the applicants have had sufficient course work in biology and chemistry. Formal application should be made by December 12. Applications are evaluated by the Immunology predoctoral committee based upon: GRE scores; grades; evidence of research experience; letters of recommendation, including letters from research sponsor(s); and commitment to a career in biomedical research. Applicants are encouraged to take the subject test in either biology, biochemistry, or chemistry, which should be taken by the November test date. Interested Stanford medical students are welcome to apply to the program and should submit a formal application by December 12th.

Students admitted to the program are offered financial support covering tuition, a living stipend, insurance coverage, and an allowance for books/travel. Applicants are urged to apply for independent fellowships such as from the National Science Foundation. Fellowship applications are due in November of the year prior to matriculation in the graduate
program, but Immunology graduate students may continue to apply for outside fellowships after matriculation. Because of the small number of department-funded slots, students who have been awarded an outside fellowship have an improved chance of acceptance into the program. On matriculation, each student is assisted by a first-year advising committee in selecting courses and lab rotations in the first year and in choosing a lab for the dissertation research. Once a dissertation adviser has been selected, a dissertation committee including at least two Immunology faculty, and including the dissertation adviser, is constituted to guide the student during the dissertation research. The student must meet with the dissertation committee at least once a year.

Candidates for Ph.D. degrees at Stanford must satisfactorily complete a three-year program of study that includes 72 units of graduate course work and research. At least 3 units must be taken with each of four different Stanford faculty members.

The requirements for the Ph.D. degree in Immunology include the following:

1. Training in biology and cognate disciplines equivalent to that provided by the undergraduate Biology major at Stanford.
2. Completion of the following courses (or their equivalents from undergraduate work):
   a) Basic Immunology (BIOSCI 230)
   b) Advanced Immunology (IMMUNOL 201, 202, 203)
   c) Biochemistry and Molecular Biology (BIOC 187, 200, or 201)
   d) Advanced Genetics (GENE 203)
   e) Cell Biology of Physiological Processes (MCP 221)
   f) Statistics (BIOSCI 141)
   g) Principles of Biological Technologies (IMMUNOL 215)
   h) One of four possible elective courses: MPHA 210, Signal Transduction Pathways and Networks; SBIO 241, Biological Macromolecules; or CB 241, Cancer Biology; or DBIO 210, Developmental Biology.
   i) Responsible Conduct in Science (MED 255)
3. First-year students are required to take both the IMMUNOL 311, Seminar in Immunology and the companion course, IMMUNOL 311A, Seminar Discussion in Immunology, and participate in IMMUNOL 305, Immunology Journal Club. Students in their second year and above must participate in the IMMUNOL 311, Seminar in Immunology and may opt to take the companion course, IMMUNOL 311A. Students who have not yet achieved TGR status must register for 1 unit for IMMUNOL 311. Students attend the weekly Immunology Seminar Series (4-5 p.m., Tuesdays). Students read the papers of and have dinner with visiting seminar speakers two or three times each quarter, and meet with a faculty member to discuss the material.
4. Elective courses as agreed upon by the student, adviser, and advisory committee. Electives may be chosen from graduate courses and seminars in any of the biomedical science departments and programs.
5. Completion in the first year of two or three one quarter rotations. Two weeks after taking the written portion of the qualifying examination process at the end of June, students, including MSTP and M.D./Ph.D. students, present their lab rotation research projects to the predoctoral committee. Medical students who have declared Immunology as their scholarly concentration major, and who are accepted into the Ph.D. program, must do at least two rotations.
6. Teaching assistantship in two immunology courses. A teaching assistantship requirement may be fulfilled by proposing a graduate student-initiated course IMMUNOL 315, Topics in Immunology. Before fulfilling their teaching assistantships, Immunology graduate students are required to undertake a teaching assistantship workshop offered at the beginning of every quarter by the Center for Teaching and Learning. MSTP students may submit one of their medical school TAships as partial fulfillment of the TA requirement for the Ph.D. in Immunology.
7. For admission to candidacy, completion of two requirements by the end of the Autumn Quarter of the second year: a rotation presentation on one of three lab rotations, and a comprehensive written examination in immunology and related biomedical sciences must be completed satisfactorily by the middle of Summer Quarter of the first year. Finally, students must prepare and defend a research proposal on their dissertation research by December 17, the end of Autumn Quarter of their second year. Administration and evaluation of these requirements is the responsibility of the student’s dissertation committee.
8. Participation (through regular attendance and oral presentation) in the student-run immunology journal clubs for at least the first 2 years (IMMUNOL 305). First- through fourth-year students are also expected to attend the graduate students’ journal club, the Tuesday evening immunology seminars, and the annual Stanford Immunology Scientific Conference at Asilomar. Students are required to give one poster and one scientific presentation at these annual Stanford Immunology scientific conferences.
9. Passing of the University oral examination on the dissertation research, which is to be taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the candidate presents his/her research.
10. Completion of a Ph.D. dissertation, resulting from independent investigation and constituting a contribution to knowledge in the area of immunology.

**COURSES**

Course and lab instruction in the Immunology Program conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

**IMMUNOL 201. Advanced Immunology I** — (Same as MI 211.) For graduate and medical students and advanced undergraduates. Molecules and cells of the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte differentiation and activation; regulation of immune responses; autoimmunity and other problems in clinical immunology. Prerequisites: undergraduate course in Immunology; and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology.

3 units, Win (Chien, Y)

**IMMUNOL 202. Advanced Immunology II** — (Same as MI 212.) Readings of immunological literature. Classic problems and emerging areas based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201/MI 211.

3 units, Spr (Staff)

**IMMUNOL 203. Advanced Immunology III** — (Same as MI 213.) Key experiments and papers in immunology. Student presentations and faculty participation; faculty describe their experimental process and scientific papers. Prerequisite: IMMUNOL 201/MI 211 or IMMUNOL 202/MI 212.

3 units, Sam (Staff)

**IMMUNOL 205. Immunology in Health and Disease** — (Same as MI 205.) Concepts and application of adaptive and innate immunology and the role of the immune system in human diseases. Case presentations of diseases including autoimmune diseases, infectious disease, transplantation, genetic and acquired immunodeficiencies, hypersensitivity reactions, and allergic diseases. Problem sets based on lectures and current clinical literature. Laboratory in inflammation and histology of lymphoid organs.

2-4 units, Win (Lewis, D)

**IMMUNOL 215. Principles of Biological Technologies** — (Same as MI 215.) Required of first-year graduate students in Microbiology and Immunology, and the Immunology program. The principles underlying commonly utilized technical procedures in biological research. Lectures and primary literature critiques on gel electrophoresis, protein purification and stabilization, immunofluorescence microscopy, FACS. Prerequisites: biochemistry, organic chemistry, and physics.

2 units, Spr (Kirkegaard, K)

**IMMUNOL 230. Introduction to Medicine** — For graduate students in biological sciences, bioengineering, and biomedical informatics. Information and approaches used by physicians to understand human disease. Focus is on diabetes. Lectures by medical school and outside faculty. Field
trips, including a biotechnology company, clinics, and the clinical laboratory. Quarter-long, team projects addressing current medical issues.

2-4 units, Spr (Mellins, E)

IMMUNOL 230A. Independent Study in Medical Sciences — For doctoral students who have taken 230. Completion of team projects begun in 230.

1-4 units, Aut, Win, Spr, Sum (Staff)

IMMUNOL 290. Teaching in Immunology — Practical experience in teaching by serving as a teaching assistant in an immunology course.

1-10 units, Aut, Win, Spr, Sum (Staff)

IMMUNOL 299. Directed Reading in Immunology — Prerequisite: consent of instructor.

1-15 units, Aut, Win, Spr, Sum (Staff)

IMMUNOL 305. Immunology Journal Club — Required of first- to fourth-year graduate students. Graduate students present and discuss recent papers in the literature. May be repeated for credit.

1 unit, Aut, Win, Spr (Steinman, L)

IMMUNOL 311. Seminar in Immunology — Enrollment limited to Ph.D., M.D./Ph.D., and medical students whose scholarly concentrations are in immunology. Current research topics.

1 unit, Aut, Win, Spr (Steinman, L; Fathman, C)

IMMUNOL 311A. Discussions in Immunology — Students discuss papers of speakers in 311, and meet with the speakers. Corequisite: 311.

1 unit, Aut, Win, Spr (Steinman, L; Fathman, C)

IMMUNOL 315. Special Topics in Immunology — Graduate student-initiated seminar in journal club style. Previous topics include evolutionary immunology and the principles of vaccine development, cytokines, tumor immunology, and neuroimmunology. May be repeated for credit.

1-4 units, Aut, Win, Spr, Sum (Staff)

IMMUNOL 317. Frontiers in Immunology — Seminar class in journal club style. Readings range from historical development to current research and questions. May be repeated for credit.

1-3 units, Sum (Staff)

IMMUNOL 399. Graduate Research — For Ph.D., M.D./Ph.D. students and medical students whose scholarly concentrations are in immunology.

1-15 units, Aut, Win, Spr, Sum (Staff)

Courses given in Microbiology and Immunology have the subject code MI. For a complete list of subject codes, see Appendix.

The Department of Microbiology and Immunology offers a complete program of training leading to the Ph.D. degree, as well as research training, courses, and seminars for medical students and postdoctoral fellows. Research interests focus on two broad areas, host-parasite interactions, and the function of the immune system. Individual laboratories investigate mechanisms of pathogenesis and the physiology of viruses, bacteria, and protozoan parasites, as well as the lymphocyte function in antigen recognition, immune response, and autoimmunity.

GRADUATE PROGRAMS

MASTER OF SCIENCE

A regular M.S. program is not offered, although this degree is awarded under special circumstances. Candidates for master’s degrees are expected to have completed the preliminary requirements for the B.S. degree, or the equivalent. In addition, the candidate is expected to complete 45 quarter units of work related to microbiology; at least 25 of these units should concern research devoted to a thesis. The thesis must be approved by at least two members of the department faculty.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

Application, Admission, and Financial Aid — Prospective Ph.D. candidates should have completed a bachelor’s degree in a discipline of biology or chemistry, including course work in biochemistry, chemistry, genetics, immunology, microbiology, and molecular biology. The deadline for receipt of applications with all supporting materials is December 12.

Applicants must file a report of scores on the general subject tests of the Graduate Record Examination (GRE). It is strongly recommended that the GRE be taken before October so that scores are available when applications are evaluated.

In the absence of independent fellowship support, entering predoctoral students are fully supported with a stipend and tuition award. Highly qualified applicants may be honored by a nomination for a Stanford fellowship. Successful applicants have been competitive for predoctoral fellowships such as those from the National Science Foundation.

Program for Graduate Study — The Ph.D. degree requires course work and independent research demonstrating an individual’s creative, scholastic, and intellectual abilities. On entering the department, students meet an advisory faculty member and together they design a timetable for completion of the degree requirements. Typically, this consists of first identifying gaps in the student’s undergraduate education and determining courses that should be taken. Then, a tentative plan is made for two to four lab rotations (one rotation per quarter). During the first year of graduate study in the department, each student also takes six or seven upper-level (200-series) courses. Three of these courses are requirements of the department: MI 215, Principles of Biological Techniques; MI 209, Medical Microbiology; and MI 210, Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites. Three courses are part of the core curriculum that is required of many graduate students in Stanford Biosciences: BIOSCI 203/DBIO 203/GENE 203, Advanced Genetics; BIOSCI 230, Molecular and Cellular Immunology; and MCP 221/BIOSCI 214, Cell Biology of Physiological Processes.

In Spring Quarter of the second year, each student defends orally a formal research proposal on a topic outside the intended thesis project. The proposal is due to the graduate program steering committee by May 1. Based on successful performance on this proposal, the student is admitted to candidacy. In the Autumn Quarter of the second year, a research proposal based on the student’s own thesis topic is defended to his or her thesis committee. Teaching experience and training are also part of the graduate curriculum. All graduate students are required to act as teaching assistants for two courses. In addition, first- and second-year graduate students are required to participate in a bi-weekly journal club.

Microbiology and Immunology

Emeriti: (Professors) Esther M. Lederberg, Edward S. Mocarski, Sidney Raffel, Leon T. Rosenberg

Chair: Karla Kirkegaard

Associate Chair: Hugh O. McDevitt

Associate Professors: Christopher Contag, Peter Jackson, Garry Nolan, David Relman, Julie Theirot

Assistant Professors: Matthew Bogyo, Chang-Zheng Chen, David Schneider, Upinder Singh

Associate Professor (Teaching): Robert D. Siegel

Department Offices: D300 Fairchild Building, 299 Campus Drive

Mail Code: 94305-5124

Phone: (650) 725-8541

Email: micro_immuno@lists.stanford.edu

Web Site: http://cmgm.stanford.edu/micro/
COURSES

MI 103. Parasites and Pestilence: Infectious Public Health Challenges — (Same as HUMBIO 153.) Parasitic and other diseases with public health impact. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs in historical context to understand public health policy approaches to halting disease transmission. Focus is on World Health Organization tropical disease research-targeted disease entities including: river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiasis, and intestinal helminthes. Guest lecturers in disease control. Original proposal to solve a current disease.
4 units, Spr (Smith, D)

MI 104. Innate Immunology — (Undergraduate section; see 204.)
3 units, Spr (Schneider, D)

MI 115A. Humans and Viruses — (Same as HUMBIO 155A.) Concepts in biology and the social sciences, focusing on emerging infections, viral classification, transmission and prevention, vaccination and treatment, eradication of disease, viral pathogenesis, mechanisms of virally-induced cancer, and viral evolution. Topics: molecular biology of genetic shift and drift in influenza virus, cellular tropism of HIV, developmental biology of virally-induced birth defects, clinical aspects of infantile diarrhea, social aspects of the common cold, policy issues of blood antibody tests, factors in pathogenesis and transmission of prions. Prerequisites: Human Biology core or consent of instructor.
6 units, alternate years, not given this year

MI 115B. The Vaccine Revolution — (Same as HUMBIO 155B.) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in the area of vaccine development and emerging infections. Journal club format: students select articles from primary scientific literature, write formal summaries, and synthesize it into a literature review on a specific topic. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 10. Prerequisite: 115A.
6 units, Win (Siegel, R)

MI 185. Topics in Microbiology — Topics include diversity, molecular regulation, growth, bioenergetics, and unique metabolic processes. Student papers for presentation on current topics such as antibiotic resistance and molecular approaches to bioremediation. Prerequisites: CHEM 31, 33, 35. Recommended: BIOSCI 31.
3 units, Win (Matin, A)

MI 198. Directed Reading in Microbiology and Immunology — Fields of study are decided in consultation with sponsoring professor. Prerequisite: consent of instructor.
1-15 units, Aut, Win, Spr, Sum (Staff)

MI 199. Undergraduate Research — Students undertake investigations sponsored by individual faculty members. Possible fields: microbial molecular biology and physiology, microbial pathogenicity, immunology, virology, and molecular parasitology. Prerequisite: consent of Instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MI 203. Biological Stress Response — Current literature. Possible topics: the nature and molecular regulation of the stress response; biochemistry and structural biology of molecular chaperones; the role of stress proteins in the pathogenic process; psychoneuroendocrinology; multidrug resistance. Limited enrollment. Prerequisites: Biological Sciences core; upper-division course in molecular biology/genetics or biochemistry.
3 units, not given this year

MI 204. Innate Immunology — (Undergraduates register for 104.) Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora in immunity. How microbes induce and defeat innate immune reactions, including examples from vertebrates, invertebrates, and plants.
3 units, Spr (Schneider, D)

MI 205. Immunology in Health and Disease — (Same as IMMUNOL 205.) Basic concepts of adaptive and innate immunity and the role of the immune system in a variety of human diseases. Emphasis is on application of the fundamental concepts of human immunology. Case presentations of diseases including autoimmune diseases, infectious disease, transplantation, genetic and acquired immunodeficiencies, hypersensitivity reactions, and allergic diseases. Problem sets based on lectures and current clinical literature. Laboratory in inflammation and histology of lymphoid organs. (Medical students enroll in IMMUNOL 205 for the required 4 units.)
2-4 units, Win (Lewis, D)

MI 209. Medical Microbiology — For graduate students and advanced undergraduates; required of first-year graduate students in Microbiology and Immunology. Introduction to the concepts of pathogenesis by bacteria, viruses, and eukaryotic parasites emphasizing mechanisms to establish infection in the host and responses of the host to infection. Current literature. Prerequisite: background in biochemistry and molecular biology.
4 units, Win (Chen, C)

MI 210. Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites — For graduate, medical, and advanced undergraduate students; required for first-year graduate students in Microbiology and Immunology. The molecular mechanisms by which microbial pathogens invade animal and human hosts, express their genomes, interact with macromolecular pathways in the infected host, and induce disease. Current literature.
4 units, Spr (Sarnow, P)

MI 211. Advanced Immunology I — (Same as IMMUNOL 201.) For graduate and medical students and advanced undergraduates. Molecules and cells of the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte differentiation and activation; regulation of immune responses; autoimmunity and other problems in clinical immunology. Prerequisites: undergraduate course in Immunology; and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology.
3 units, Win (Chien, Y)

MI 212. Advanced Immunology II — (Same as IMMUNOL 202.) Readings of immunological literature and specific areas of immunology. Classic problems and emerging areas are covered based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201/MI 211
3 units, Spr (Staff)

MI 213. Advanced Immunology III — (Same as IMMUNOL 203.) Key experiments and papers in immunology. Student presentations and faculty participation; faculty describe their experimental process and scientific papers. Prerequisite: IMMUNOL 201/MI 211 or IMMUNOL 202/MI 212.
3 units, Sum (Staff)

MI 214. Biodfense and Biosecurity — Science and policy behind American and international biosecurity and biodefense. Is the international community prepared to defend against a naturally-occurring disease or a bioterror attack? Topics include the scope of the problem, agent pathogenesis, threat of biological weapons, responding to a biological attack, microbial forensics, international health, the threat of naturally emerging infectious disease, and policy against these threats. Guest lecturers.
2 units, Win (Siegel, R)

MI 215. Principles of Biological Technologies — (Same as IMMUNOL 215.) Required of first-year graduate students in Microbiology and Immunology, and the Immunology program. The principles underlying commonly utilized technical procedures in biological research. Lectures and primary literature critiques on gel electrophoresis, protein purification and stabilization, immunofluorescence microscopy, FACS. Prerequisites: biochemistry, organic chemistry, and physics.
2 units, Spr (Kirkegaard, K)
Molecular and Cellular Physiology

Chair: Richard S. Lewis
Associate Professors: Christopher Garcia, V. Daniel Madison
Assistant Professors: Miriam Goodman, Merritt Maduke
Courtesy Associate Professor: Stefan Heller, John Huguenard, Anson W. Lowe, Tony Ricci
Courtesy Assistant Professor: Richard J. Reimer

Department Offices: Beckman Center, B100
Mail Code: 94305-5345
Phone: (650) 725-7554
Email: schantae@stanford.edu
Web Site: http://mcp.stanford.edu

Courses given in Molecular and Cellular Physiology have the subject code MCP. For a complete list of subject codes, see Appendix.

The Department of Molecular and Cellular Physiology is located in the Beckman Center for Molecular and Genetic Medicine.

A central goal of physiology in the post-genomic era is to understand how thousands of encoded proteins serve to bring about the highly coordinated behavior of cells and tissues. Research in the department approaches this goal at many levels of organization, ranging from single molecules and individual cells to multicellular systems and the whole organism. The faculty share common interests in the molecular mechanisms of cell signaling and behavior, with a special focus on structure/function analysis of ion channels and G-protein coupled receptors, and their roles at the cellular, organ, and whole-organism levels; the molecular basis of sensory transduction, synaptic transmission, plasticity and memory; the role of ion channels and calcium in controlling gene expression in neural and immune cells; and the regulation of vesicle trafficking and targeting, cell polarity, and cell-cell interactions in the nervous system and in epithelia. Research programs employ a wide range of approaches, including molecular and cell biology, biochemistry, genetics, biophysics, x-ray crystallography and solution NMR, electrophysiology, and in vitro and in vivo imaging with confocal and multi-photon microscopy.

GRADUATE PROGRAMS

The department offers required and elective courses for students in the School of Medicine and is also open to other qualified students with the consent of the instructor. Training of medical, graduate, and postdoctoral students is available. The program offers a course of study leading to the Ph.D. degree. No B.S. is offered, and an M.S. is offered only in the unusual circumstance where a student completes the course work, rotation, and the written section of the qualifying exam, but is unable to complete the requirements for the Ph.D.

DOCTOR OF PHILOSOPHY

Students with undergraduate or master’s degrees who have completed a year each of college chemistry (including lectures in organic and physical chemistry), physics, calculus, and biology are considered for admission to graduate study. Applicants submit a report of scores from the Graduate Record Examination (verbal, quantitative, analytical, and an advanced subject test in one of the sciences) as part of the application.

Students who do not speak English as their native language must submit scores from TOEFL unless waived by Graduate Admissions, the Registrar’s Office.

Study toward the Ph.D. is expected to occupy five years, including summers. A minimum of six quarter-long courses is required. These include four graduate-level courses (200-300 series) and a choice of two out of these three courses: MCP 221, MCP 255, and MCP 256. Students are also required to take the Molecular and Cellular Physiology seminar/Research In Progress series. Each student presents a talk on research in progress to the department at least every other year, starting their second year. Acceptable grades for all course work must be a minimum of ‘B-‘, and at least two grades equal to ‘A-‘ or above are necessary (but not sufficient) for continuation in the program.

Qualifying Examination — At the end of the second year in residence as a graduate student, each Ph.D. candidate presents a written thesis proposal to be defended at an oral comprehensive examination. The examinations may be taken only after all course work has been completed by the required standard. Students undertake individual research studies as early as possible after consultation with their preceptor. Upon passing this exam, the student is advanced to candidacy for the Ph.D.

Dissertation and University Oral Examination — The results of independent, original work by the students are presented in a dissertation. The oral examination is largely a defense of the dissertation.

Advisers and Advisory Committees — A graduate advisory committee, currently Professors Lewis and Aldrich, advises students during the period before the formation of their qualifying committees.

Financial Aid — Students may be funded by their advisers’ research grants, by training grants, by department funds, or by extramural funds. Students are encouraged to obtain funding from outside sources (e.g., NIH and NSF).

COURSES

Course and lab instruction in the Department of Molecular and Cellular Physiology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/Do/R/R-8.2.html.

MCP 100Q. The Hippocampus as a Window to the Mind — Stanford Introductory Seminar. Electrical physiology of the brain using the hippocampus as a model system. The seminar builds from basic anatomical and electrical principles of brain structure and function, through the electrical properties of individual neurons and simple neuronal circuits, to the nature of behaviors that emerge from these more basic properties. Also discusses other brain regions where the hippocampal model provides insight into specific neuronal functions. Culminates in a discussion of neuronal disorders such as epilepsy, drug addiction, and obsessive-compulsive disorder that can be better understood on a basis of knowledge of the hippocampal model.

3 units, Spr (Madison, V)
MCP 199. Undergraduate Research — Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 200. Cardiovascular Physiology — Offered jointly with the Department of Medicine. Lectures, small group instruction, clinical presentations, and lab demonstrations of normal and disordered human cardiovascular physiology. Prerequisite: understanding of general biochemistry.
5 units, Spr (Kobilka, B)

MCP 213. Special Topics in Molecular and Cellular Physiology — Introductory and advanced physiological topics agreed on by an instructor and students. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 215. Synaptic Transmission — Primarily for graduate students with an interest in synaptic function; interested medical students and advanced undergraduates may enroll. The anatomical, physiological, and biochemical basis of synaptic function in the peripheral and central nervous system. Research papers.
5 units, Aut (Staff)

MCP 216. Genetic Analysis of Behavior — (Same as NBIO 216.) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.
4 units, not given this year

MCP 218. Transmembrane Signal Transduction — The molecular mechanisms of signal transduction for a variety of structurally and functionally different plasma membrane receptors. Topics: the structure of receptors and the interaction of the receptor protein with the lipid bilayer; ligand binding and ligand-mediated changes in receptor structure; and cytosolic, cytoskeletal, and membrane proteins that interact with receptors. Recent research developments and the value of experimental approaches for the study of receptors.
2 units, not given this year

MCP 222. Imaging: Biological Light Microscopy — (Same as BIOSCI 152.) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biological Sciences core.
3 units, Spr (Smith, S)

MCP 232. Advanced Imaging Lab in Biophysics — (Same as BIOSCI 132/232, BIOPHYS 232.) Laboratory and lectures. Microscopy, emphasizing hands-on experience with a range of apparatus and techniques. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Advanced topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, optical trapping, and fiber optic methods. Limited enrollment. Recommended: basic physics, Biological Sciences core or equivalent, and consent of instructor.
4 units, Spr (Block, S; Schnitzer, M; Smith, S; Stearns, T)

MCP 255. Molecular Physiology of Membranes — Recommended for MCP graduate students; open to graduate and medical students; advanced undergraduates with consent of instructor. Structure and mechanisms of the molecules underlying transmembrane processes. Topics include structure of membrane proteins, energetics of membranes, transmembrane signaling (receptors and channels), transport (transporters and pumps), single molecule methods and theory, and membrane complexes. Lectures introduce concepts; student activities and small group discussion emphasize application of concepts to research the literature. Recommended: BIOL/SBIO 214 or equivalent.
4 units, not given this year (Maduke, M)

MCP 256. How Cells Work: Energetics, Compartments, and Coupling in Cell Biology — Dynamic aspects of cell behavior and function, including cellular energetics, homeostasis, heterogeneity of membranes, structure & function of organelles, solute and water transport, signaling and motility. Emphasis on understanding the principles of how coupling of molecular processes gives rise to essential functions at the cellular level. Lectures, discussions, readings, student presentations, and use of mathematical models of cell function. Open to graduate, medical, and advanced undergraduate students.
4 units, Spr (Maduke, M; Lewis, R)

MCP 258. Information and Signaling Mechanisms in Neurons and Circuits — (Same as NBIO 258.) How synapses, cells, and neural circuits process information relevant to a behaving organism. How phenomena of information processing emerge at several levels of complexity in the nervous system, including sensory transduction in molecular cascades, information transmission through axons and synapses, plasticity and feedback in recurrent circuits, and encoding of sensory stimuli in neural circuits.
5 units, Aut (Tien, R; Baccus, S)

MCP 299. Directed Reading in Molecular and Cellular Physiology — Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

MCP 399. Graduate Research — Allows for qualified students to undertake investigations sponsored by individual faculty members. Research fields include endocrinology, neuroendocrinology, and topics in molecular and cellular physiology. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

Molecular Pharmacology

Emeriti: (Professors) Robert H. Dreisbach, Avram Goldstein, Dora B. Goldstein, Tag E. Mansour, James P. Whitlock
Chair: James E. Ferrell, Jr.
Professors: James E. Ferrell, Jr., Oleg Jardetzky, Tobias Meyer, Daria Mochly-Rosen, Richard A. Roth
Assistant Professors: James K. Chen, Karlene A. Cimprich, Thomas J. Wandless
Consulting Professors: Gordon Ringold, Alejandro Zaffaroni
Web Site: http://molepharm.stanford.edu

Courses given in Molecular Pharmacology have the subject code MPHIA. For a complete list of subject codes, see Appendix.

Graduate Programs

Master of Science

Students in the Ph.D. program may apply for an M.S. degree after having satisfactorily completed the course and laboratory requirements of the first two years. The degree also requires a written thesis based on literature or laboratory research. Postdoctoral research training is available to graduates having the Ph.D. or M.D. degree.

Doctor of Philosophy

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The Department of Molecular Pharmacology offers interdisciplinary training to prepare students for independent careers in biomedical science. The main focus of the program is on cell signaling, chemical biology, and systems biology.

The program leading to the Ph.D. degree includes formal and informal study in pharmacology, genetics, biochemistry, and molecular cell biology. First-year students spend one quarter in each of three different laboratories, working closely with other graduate students, a professor, and postdoctoral fellows on various research projects. During the fourth quarter, the student chooses a faculty mentor with whom to undertake thesis research, based on available positions and the student’s interest. During or before the eighth quarter of study, students must pass a qualifying exam
which consists of an oral exam on general knowledge and a defense of a research proposal. Course requirements are fulfilled during the first two years of study; the later years of the four- to six-year program are devoted to full-time dissertation research. Close tutorial contact between students and faculty is stressed throughout the program.

Research opportunities also exist for medical students and undergraduates. The limited size of the labs in the department allows for close tutorial contact between students, postdoctoral fellows, and faculty.

The department participates in the four quarter Health and Human Disease sequence which provides medical students with a comprehensive, systems-based education in physiology, pathology, microbiology, and pharmacology.

**COURSES**

Course and lab instruction in the Department of Molecular Pharmacology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

**MPHA 199. Undergraduate Research** — Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

**ADVANCED**

Open to all University students; instructor’s consent required prior to registration. Students should consult with the instructor about the adequacy of their preparation.

**MPHA 210. Signal Transduction Pathways and Networks** — The molecular mechanisms through which cells receive and respond to external signals. Emphasis is on principles of cell signaling, the systems-level properties of signal transduction modules, and experimental strategies through which cell signaling pathways are being studied. Prerequisite: working knowledge of biochemistry and genetics.

4 units, Win (Ferrrell, J, Meyer, T)

**MPHA 220. Chemistry of Biological Processes** — (Same as BIOC 220.) The principles of organic and physical chemistry as applied to biomolecules. Goal is a working knowledge of chemical principles that underlie biological processes, and chemical tools used to study and manipulate biological systems. Prerequisites: organic chemistry and biochemistry, or consent of instructor.

4 units, Aut (Wandless, T; Herschlag, D; Chen, J; Bogoy, M)

**MPHA 240. Drug Discovery** — The scientific principles and technologies involved in making the transition from a basic biological observation to the creation of a new drug emphasizing molecular and genetic issues. Prerequisite: biochemistry, chemistry, or bioengineering.

4 units, Spr (Mochly-Rosen, D)

**MPHA 260. Quantitative Chemical Biology** — Current topics including protein and small molecule engineering, cell signaling sensors and modulators, molecular imaging, chemical genetics, combinatorial chemistry, in vitro evolution, and signaling network modeling. Prerequisites: undergraduate organic chemistry, and biochemistry or cell biology.

4 units, alternate years, not given this year

**MPHA 270. Research Seminar** — Weekly seminars by outside speakers on current research in pharmacology. Seminars are reviewed and discussed in a separate conference with a member of the faculty.

1-2 units, Spr (Staff)

**MPHA 299. Directed Reading in Molecular Pharmacology** — Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

**MPHA 399. Graduate Research** — Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

**NEUROBIOLOGY**

**Emeritus:** Denis Baylor, Eric Shooter, Lubert Stryer
**Chair:** William T. Newsome
**Professors:** Ben Barres, Eric I. Knudsen, Uel J. McMahan, William T. Newsome
**Assistant Professors:** Stephen Baccus, Thomas Clandinin, Ricardo Dolmetsch, Tirin Moore, Jennifer Raymond
**Department Offices:** Fairchild Building, Second Floor
**Mail Code:** 94305-5125
**Web Site:** http://www.stanford.edu/dept/nbio/

Courses given in Neurobiology have the subject code NBIO. For a complete list of subject codes, see Appendix.

**GRADUATE PROGRAM**

Graduate students in the Department of Neurobiology obtain the Ph.D. degree through the interdepartmental Neurosciences Ph.D. program. Accepted students receive funding for tuition and a living stipend. Applicants should familiarize themselves with the research interests of the faculty and, if possible, indicate their preference on the application form which is submitted directly to the Neurosciences Program.

Medical students also are encouraged to enroll in the Ph.D. program. The requirements of the Ph.D. program are fitted to the interests and time schedules of the student. Postdoctoral training is available to graduates holding Ph.D. or M.D. degrees, and further information is obtained directly from the faculty member concerned.

Research interests of the department include: mechanisms of visual transduction and information transmission in vertebrate retina; structure, function, and development of auditory and visual systems; integrative mechanisms and regeneration in the central and peripheral nervous system; mechanisms of ion channel function; and neuronal growth and differentiation.

**COURSES**

Course and lab instruction in the Department of Neurobiology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

The department offers a one quarter course (NBIO 200) on the structure and function of the nervous system, which is open to medical and graduate students and advanced undergraduates. Advanced courses are open to students who have completed the basic course.

**NBIO 198. Directed Reading in Neurobiology** — Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

**NBIO 199. Undergraduate Research** — Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

**NBIO 206. The Nervous System** — Introduction to the structure and function of the nervous system, including neuroanatomy, neurophysiology, and systems neurobiology. Topics include the properties of neurons and the mechanisms and organization underlying higher functions. Framework for general work in neurology, neuropathology, clinical medicine, and for more advanced work in neurobiology. Lecture and lab components must be taken together.

7-8 units, Win (Clandinin, T)

**NBIO 216. Genetic Analysis of Behavior** — (Same as MCP 216.) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.

4 units, not given this year
NBIO 218. Neural Basis of Behavior — Advanced seminar. The principles of information processing in the vertebrate central nervous system, and the relationship of functional properties of neural systems with perception and behavior. Emphasis is on the visual and auditory systems. Original papers; student presentations. Prerequisite: 206 or consent of instructor.

4 units, alternate years, not given this year

2-4 units, Aut (Moore, T; Newsome, W)

NBIO 221. Frontiers in Translational Medicine — Small group course for first year MSTP and M.D./Ph.D. students only. Pathways for combining science and medicine during graduate and postdoctoral training and in one’s career. Practical aspects of translational medicine. Guest lecturers are physician-scientists who have advanced the frontiers of translational medicine, including Drs. Gilbert Chu, Jamie Topper, Irv Weissman, Ching Wang, Linda Giudice, Geoff Duyk, William Mobley, Judy Shizuru, and David Cox. Prerequisite: consent of instructor.

1 unit, Spr (Barres, B)

NBIO 227. Understanding Techniques in Neuroscience — This student-organized and student-taught course examines and discusses a wide spectrum of methods commonly used in the field of neuroscience. Techniques discussed range from molecular/genetic to electrophysiology and whole brain imaging. Prepares students to understand common techniques used in any neuroscience paper, seminar, or poster. Each class includes an overview lecture, brief presentations by senior graduate students who practice these techniques, and relevant examples from the literature. Optional laboratory demonstrations outside of class are provided.

2 units, Aut (Newsome, W)

NBIO 228. Mathematical Tools for Neuroscience — Student-instructed. For students with no math background beyond basic calculus, or as a review for more advanced students. Techniques useful for analysis of neural data including linear algebra, Fourier transforms, probability and statistics, signal detection, Bayesian inference, and information theory.

1-3 units, Aut (Corrado, G; Cohen, M)

NBIO 254. Molecular and Cellular Neurobiology — (Same as BIOSCI 154/254.) For advanced undergraduates and graduate students. Cellular and molecular mechanisms in the organization and functions of the nervous system. Topics: wiring of the neuronal circuit, synapse structure and synaptic transmission, signal transduction in the nervous system, sensory systems, molecular basis of behavior including learning and memory, molecular pathogenesis of neurological diseases. Prerequisite for undergraduates: Biological Sciences core or equivalent, or consent of instructors.

4-5 units, Aut (Luo, L; Shen, K; Clandinin, T; Dolmetsch, R), alternate years, not given next year

NBIO 258. Information and Signaling Mechanisms in Neurons and Circuits — (Same as MCP 258.) How synapses, cells, and neural circuits process information relevant to a behaving organism. How phenomena of information processing emerge at several levels of complexity in the nervous system, including sensory transduction in molecular cascades, information transmission through axons and synapses, plasticity and feedback in recurrent circuits, and encoding of sensory stimuli in neural circuits.

5 units, Aut (Tsien, R; Baccus, S)

NBIO 299. Directed Reading in Neurobiology — Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

NBIO 300. Professional Development and Integrity in Neuroscience — Required of Neurosciences Ph.D. students every quarter. Develops professional skills in critical assessment and oral presentation of findings from current neuroscience literature in the visual presentation of quantitative data and writing research grants. The role of animals in lab research, fraud in science, the responsibility of authors and reviewers, science in a multicultural environment, and the relationship between student and mentor. Student and faculty presentations and discussions.

1-2 units, Aut, Win, Spr (Dolmetsch, R)

NBIO 399. Graduate Research — Allows for qualified students to undertake research sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

MCP 215. Synaptic Transmission

5 units, Aut (Staff)

PSYCH 204A. Computational Neuroimaging

1-3 units, Spr (Wandell, B)

PSYCH 250. High-level Vision

1-3 units, alternate years, not given this year

NEUROSCIENCES PROGRAM

Director: John R. Huguenard (Associate Professor, Neurology and Neurological Sciences)

Committee: Richard Aldrich, Corinna Darian-Smith, Craig Garner, Miriam Goodman, Shaul Hestrin, John R. Huguenard, Jennifer Raymond, Kang Shen, Krishna Shenoy, Anthony Wagner

Participating Faculty:

Anesthesia: Rona Giffard (Professor), M. Bruce MacIver (Associate Professor, Research), Sean Mackey (Assistant Professor), David Yeomans (Associate Professor)

Applied Physics: Mark Schnitzer (Assistant Professor)

Bioengineering: Kwabena Boahen (Associate Professor), Karl Deisseroth (Assistant Professor)

Biological Sciences: Bruce Baker (Professor), Russell D. Fernald (Professor), William F. Gill (Professor), H. Craig Heller (Professor), Ron Kopito (Professor), Liqun Luo (Professor), Susan McConnell (Professor), Robert M. Sapolsky (Professor), Mark Schnitzer (Assistant Professor), Kang Shen (Assistant Professor), Stuart Thompson (Professor)

Comparative Medicine: Paul S. Buckmaster (Professor), Linda C. Cork (Professor), Corinna Darian-Smith (Assistant Professor), Shaul Hestrin (Associate Professor)

Developmental Biology: Ben Barres (Professor), Matthew P. Scott (Professor)

Electrical Engineering: Krishna Shenoy (Assistant Professor)

Genetics: Anne Brunet (Assistant Professor), David R. Cox (Professor)

Microbiology and Immunology: Helen Blau (Professor)

Molecular and Cellular Physiology: Richard Aldrich (Professor), Miriam B. Goodman (Assistant Professor), Brian Kobilka (Professor), Richard S. Lewis (Professor), V. Daniel Madison (Assistant Professor), Merritt C. Maduke (Assistant Professor), Stephen Smith (Professor), Richard Tsen (Professor)

Molecular Pharmacology: Tobias Meyer (Professor), Daria Mochly-Rosen (Professor)

Neurobiology: Stephen Baccus (Assistant Professor), Ben Barres (Professor), Tom Cladinin (Assistant Professor), Ricardo Dolmetsch (Assistant Professor), Eric I. Knudsen (Professor), U. J. McMahen (Professor), Titar Moore (Assistant Professor), William T. Newsome (Professor), Jennifer Raymond (Assistant Professor)

Neurology and Neurological Sciences: Ben Barres (Professor), Paul Buckmaster (Professor), Robert S. Fisher (Professor), Ting-Ting Huang (Assistant Professor, Research), John A. Huguenard
GRADUATE PROGRAM

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The interdepartmental Neurosciences Program offers instruction and research opportunities leading to a Ph.D. in Neurosciences. The requirements for a Ph.D. degree follow those of the University and in addition are tailored to fit the background and interests of the student. Accepted students receive an award covering tuition, a basic health plan, and a living stipend. Qualified applicants should, where possible, apply for the predoctoral fellowships in open competition, especially those from the National Science Foundation. December 16 is the deadline for receipt in the Neurosciences Program office of applications with all supporting material.

Applicants should familiarize themselves with the research interests of the faculty and indicate their preferences clearly on the application form.

Since students enter with differing backgrounds, and the labs in which they may elect to work cover several different disciplines, the specific program for each student is developed individually with an advisory committee. All students are required to complete the basic introduction to neurobiology (NBIO 206 or equivalent). Students must also take five advanced courses, four of which must be distributed among the following core areas: systems and behavioral neuroscience, molecular and cellular neuroscience, developmental neuroscience, clinical neuroscience, and computational neuroscience. The fifth advanced course is chosen by the student in an area related to the student’s research interest, and may be selected from outside the Neurosciences core with prior approval from the student’s advisory committee.

The interdepartmental Neurosciences Program offers instruction and research opportunities leading to a Ph.D. in Neurosciences. The requirements for a Ph.D. degree follow those of the University and in addition are tailored to fit the background and interests of the student. Accepted students receive an award covering tuition, a basic health plan, and a living stipend. Qualified applicants should, where possible, apply for the predoctoral fellowships in open competition, especially those from the National Science Foundation. December 16 is the deadline for receipt in the Neurosciences Program office of applications with all supporting material.

Courses given in the Neurosciences Program have the subject code NEPR. For a complete list of subject codes, see Appendix.

NEPR 299. Directed Reading in Neurosciences—Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

NEPR 399. Graduate Research—Allows for qualified students to undertake research sponsored by individual faculty members.
1-18 units, Aut, Win, Spr, Sum (Staff)

OBSTETRICS AND GYNECOLOGY

Chair: Jonathan S. Berek

Courses given in Gynecology have the subject code OBGYN. For a complete list of subject codes, see Appendix.

The Department of Obstetrics and Gynecology does not offer degrees; however, qualified medical, graduate, or undergraduate students with an interest in basic research in reproductive biology may apply to arrange individual projects under the supervision of the faculty. The focus for the Division of Reproductive Biology is the study of the molecular and cellular biology of male and female reproductive organs.

COURSES

OBGYN 199. Undergraduate Research—Allows qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

OBGYN 202. Assisted Reproductive Technologies—(Same as DBIO 202.) Primary literature in basic and clinical science, and demonstrations of assisted reproductive technologies (ART). Techniques include in vitro fertilization covering micromanipulation procedures such as intracytoplasmic sperm injection and the culture of blastocysts, using mouse gametes, and pre-embryos. Class only may be taken for 1 unit. 2 units includes papers and attendance at clinical demonstrations. 3 units includes a term paper. Pre-requisite: DBIO 201 recommended, or consent of instructors.
1-3 units, Win (Porzig, E)

OBGYN 399. Graduate Research—Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)
PATHOLOGY

Emeriti: (Professor) Richard L. Kempson; (Professor, Clinical) P. Joanne Cornbleet, Lawrence F. Eng, Luis Fajardo, Heinz Furthmayr, F. Carl Grunet

Chair: Stephen J. Galli

Associate Professors: Jeffrey D. Axelrod, Athena M. Cherry, Tina Cowan, James D. Faix, Susan A. Gable, Sharon M. Geaghan, Peter K. Jackson, Teri A. Longacre, Sara A. Michie, Bruce Patterson, Donald P. Regula, Arend Sidow, Hannes Vogel, James L. Zehnder

Assistant professors: Matthew Boggyo, David Cassarino. Andrew Connolly, Sohel Dasdars, Dean Felscher, Magali Fontaine, Tracy George, John P. Higgins, Neeraja Kambham, Christina Kong, Kristin Jensen, Bingwei Lu, Yasodha Natkunam, Jonathan R. Pollack, Iris Schrijver, Erich Schwartz, Uma Sundaram, Robert West

Courtesy Professor: Lucy Tompkins

Courtesy Associate Professors: Donna Bouley, Robert Shafer

Clinician Educators: Susan Atwater, David Bingham, Barbara Egbert, Terri Haddix, Melanie Manning, Dorothy Nguyen, Michael Petzar, Run Shi, Maureen Viele

Instructors: Mihoko Kai, Daniel Kraft, Norman Lehman, Michaela Liedkte, Christopher Park, Brent Tan

Adjunct Clinical Faculty: Robert Archibald, Jerome S. Burke, Stephen Shi-Hua Chen, Seth Haber, Maile K. Herrick, Paul W. Herrmann, Simon Hirschl, Charles Lombard, John E. McNeal, Judy Melinek, Lawrence Naiman, Joseph O’Hara, Mahendra Ranchod, Thomas W. Rogers, William Ruehl, Joshua Sichel, Sharon Von Meter

Department Offices: Medical Center, Lane Building, I-235

Mail Code: 94305-5324

Phone: (650) 723-5255

Web Site: http://pathology.stanford.edu

Courses given in Pathology have the subject code PATH. For a complete list of subject codes, see Appendix.

PROGRAMS OF STUDY

The Department of Pathology offers advanced courses in aspects of pathology. The department does not offer advanced degrees in pathology, and is concerned with the application of advances in the basic biological sciences, both to the diagnosis of human disease and the development of treatment modalities and techniques for solid tumors, lymphomas, HIV, and genetic diseases. Research training in all of these areas is available for qualified medical and graduate students by individual arrangement with the appropriate faculty member. A summary of the research interests of the department faculty is available at http://pathology.stanford.edu.

COURSES

Course and lab instruction in the Department of Pathology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/PHP/8-2.html.

PATH 101. Cancer Biology — (Same as CBIO 101.) Experimental approaches to understanding the origins, diagnosis, and treatment of cancer. Focus on key experiments and discoveries with emphasis on genetics, molecular biology, and cell biology. Topics include carcinogens, tumor virology, oncogenes, tumor suppressor genes, cell cycle regulation, angiogenesis, invasion and metastasis, cancer genomics, cancer epidemiology, and cancer therapies. Discussion sections based on primary research articles that describe key experiments in the field. Prerequisites: BIOSCI or HUMBIO core.

4 units, Spring

PATH 103Q. Leukocyte Migration — Stanford Introductory Seminar. Preference to sophomores. How lymphocytes leave the blood stream and enter tissues to participate in immune surveillance and the development of inflammation. Cellular mechanisms involved in lymphocyte migration, including lymphocyte adhesion molecules that interact with their counter-receptors on endothelial cells, and molecules, including cytokines and chemokines, that attract or activate lymphocytes. The role of these molecules in the development of human diseases such as asthma, type 1 diabetes, and multiple sclerosis.

1 unit, Autumn

PATH 105Q. Final Analysis: The Autopsy as a Tool of Medical Inquiry — Stanford Introductory Seminar. Preference to sophomores. Based on review of patient medical histories and examination of formalin-fixed and unfixed tissues from autopsy. Student-directed problem-solving; students develop learning objectives for each case, and present findings. The effect of disease on normal structure and function, ethics of patient care, allocation of medical resources, efficiency of therapy, and medical error. Prerequisite: hepatitis-B vaccination; free vaccinations during the winter for accepted students.

3 units, Spring

PATH 199. Undergraduate Research — Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Autumn, Winter, Spr, Summer

PATH 206. Epigenetics — (Same as GENE 206.) Mechanisms by which phenotypes not determined by the DNA sequence are stably inherited in successive cell divisions. Begins with the discovery of position-effect variegation in Drosophila in the 1920s and proceeds to present-day studies of covalent modifications of histones and DNA methylation. Topics include: position effect, gene silencing, heterochromatin, centromere identity, genomic imprinting, “histone code”, variant histones, and the role of epigenetics in cancer. Open to advanced undergraduates with permission of instructor.

2 units, Winter

PATH 218. Computational Analysis of Biological Images — Physical and computational tools for acquisition, processing, interpretation, and archiving of biological images. Emphasis is on digital microscopy.

2 units, Autumn

PATH 233. The Biology of Small Modulatory RNAs — (Same as GENE 233, MBL 233) Open to graduate and medical students. How recent discoveries of miRNA, RNA interference, and short interfering RNAs reveal potentially widespread gene regulatory mechanisms mediated by small
Radiology

Radiation Oncology

Emeriti: Malcolm A. Bagshaw, Peter Fessenden, Don R. Goffinet, George M. Hahn, Kendric Smith
Chair: Richard T. Hoppe
Professors: J. Martin Brown, Sarah S. Donaldson, Amato J. Giaccia, Steven L. Hancock, Richard T. Hoppe, Daniel S. Kapp, Steven A. Liebel
Associate Professors: Paul Keall, Susan J. Knox, Quynh-Thu Le, Gary Luxton, Melanie C. Smitt, Lei Xing
Assistant Professors: Laura Attardi, Nicholas Denko, Iris C. Gibbs, Edward Graves, Christopher R. King, Albert C. Koong, Todd Pawlicki
Consulting Professor: Robert M. Sutherland

Courses given in Radiation Oncology have the subject code RADO. For a complete list of subject codes, see Appendix.

Radiation Oncology focuses on the use of radiation for cancer therapy and research. The department does not offer degrees; however, its faculty teach courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisees for study and research. Graduate students in Biophysics and Cancer Biology may perform their thesis research in the department. Undergraduates may arrange individual research projects under supervision of faculty.

At the present time, the major areas of basic research investigation in the department include: DNA repair in mammalian cells after ionizing irradiation; studies of the mechanism of tumor hypoxia in animal tumors; development of new anti-cancer drugs to exploit tumor hypoxia; cytogenetic and molecular methods of predicting the sensitivity of individual tumors to cancer therapy; radiolabeled monoclonal antibodies for cancer detection and treatment; studies of oxygen levels in human tumors using polarographic electrodes; clinical trials of a new hypoxic cytotoxic agent (tirapazamine); studies of the late effects of cancer therapy; and techniques of conformal and intensity modulated radiation therapy.

Courses

Course and lab instruction in the Department of Radiation Oncology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

The following are open to undergraduates and graduate students.

RADO 299. Directed Reading in Radiation Oncology — Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

RADO 399. Graduate Research — Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

Radiology

Chair: Gary M. Glazer
Associate Professors: Patrick D. Barnes, Francis Blankenberg, Bruce Daniel, Terry Desser, Huy M. Do, Nancy Fischbein, Garry E. Gold, Lawrence Hoffman, Debra M. Ikeda, Beverly Newman, Eric W. Olcott, Daniel M. Spielman, Daniel Y. Sze
Associate Professors (Research): Kim Butts Pauly, Craig Levin, Sylvia Plevritis
Assistant Professors: Sandip Biswal, Frandics P. Chan, Dominik Fleischmann, Joan Frisoli, Andrew Quon, Kathryn J. Stevens
Assistant Professors (Research): Roland Hammer, Xiaoyuan Chen, Rebecca Fahrig, Samira Guccione, Brian Hargreaves, David Paik
Web Site: http://www-radiology.stanford.edu/

Courses given in Radiology have the subject code RAD. For a complete list of subject codes, see Appendix.

The Department of Radiology does not offer degrees; however, its faculty teach courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisees for study and research. Undergraduates may also arrange individual research projects under the supervision of the department’s faculty. This discipline focuses on the use of radiation, ultrasound, and magnetic resonance as diagnostic, therapeutic, and research tools. The fundamental and applied research within the department reflects this broad spectrum as it relates to anatomy, pathology, physiology, and interventional procedures. Original research and development of new clinical applications in medical imaging is supported within the Radiological Sciences Laboratory.

Courses

The following courses are open to undergraduates and graduate students.

RAD 101. Readings in Radiology Research
1-18 units, Aut, Win, Spr, Sum (Staff)

RAD 199. Undergraduate Research — Allows for qualified students to undertake investigations sponsored by individual faculty members.
1-18 units, Aut, Win, Spr, Sum (Staff)

RAD 208. Experimental Nuclear Medicine — Computer applications in medicine, particularly in the use of radioisotopes as tracers. Recommended: some knowledge of physiology and calculus.
2 units, Win, Sum (Goris, M)

RAD 220. Introduction to Imaging and Image-Based Human Anatomy — (Same as BIOE 220.) The physics of medical imaging and human anatomy through medical images. Emphasis is on normal anatomy, contrast mechanisms, and the relative strengths of each imaging modality. Labs reinforce imaging techniques and anatomy. Recommended: basic biology, physics, and math.
3 units, Win (Gold, G; Butts Pauly, R)
The emphasis of research in the department is on understanding fundamental cellular processes in terms of the structure and function of biological macromolecules and their assemblies. Techniques used include standard methods of biochemistry, cell culture, single-molecule fluorescence spectroscopy, genetic engineering, and three dimensional structure determination by x-ray diffraction, nuclear magnetic resonance spectroscopy and electron microscopy, coupled with the development of computational methods.

**GRADUATE PROGRAMS**

**DOCTOR OF PHILOSOPHY**

University requirements for the Ph.D. are described in the “Graduate Degrees” section of this bulletin.

The graduate program in Structural Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program in which individuals are candidates for both Ph.D. and M.D. degrees.

The graduate program is intended to prepare students for careers as independent investigators in cell and molecular biology. The principal requirement of a Ph.D. degree is the completion of research constituting an original and significant contribution to the advancement of knowledge. The requirements and recommendations for the Ph.D. degree include:

1. Training in physics or chemistry equivalent to that of an undergraduate major at Stanford.
2. Completion of the following background courses or their equivalents at other institutions:
   a) CHEM 131, 171, 173, and 175
   b) BIOC 200, 201
3. Completion of the following courses or their equivalents:
   a) SBIO 241 and 242
   b) At least four additional graduate-level courses in physical or biological science
   c) MED 255

4. Opportunities for teaching are available during the first nine quarters at the discretion of the advising committee.
5. The student must prepare a dissertation proposal defining the research to be undertaken including methods of procedure. This proposal should be submitted by Winter Quarter of the third year, and it must be approved by a committee of at least three members including the principal research adviser and at least one member from the Department of Structural Biology. The candidate must defend the dissertation proposal in an oral examination. The dissertation reading committee normally evolves from the dissertation proposal review committee.
6. The student must present a Ph.D. dissertation as the result of independent investigation and expressing a contribution to knowledge in the field of structural biology.
7. The student must pass the University oral examination, taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the research is presented by the candidate.

Applicants to the program should have a bachelor’s degree and should have completed at least a year of course work in biology, mathematics, organic chemistry, physical chemistry, and physics. Application forms must be received by the department before December 15 for notification by April 15. Application to the National Science Foundation for fellowship support is also encouraged. Remission of fees and a personal stipend are available to graduate students in the department. Prospective applicants should contact the Department of Structural Biology for further information.

Current topics of research in the department lie in the areas of gene expression; theoretical, crystallographic, and genetic analysis of protein structure; and cell-cell interaction. See http://www.med.stanford.edu/school/structuralbio/ for further information.
**COURSES**

Course and lab instruction in the Department of Structural Biology conforms to the “Policy on the Use of Vertebrate Animals in Teaching Activities,” the text of which is available at http://www.stanford.edu/dept/DoR/rph/8-2.html.

**SBIO 199. Undergraduate Research** — Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

**SBIO 228. Computational Structural Biology** — (Same as BIOPHYS 228.) Interatomic forces and interactions such as electrostatics and hydrophobicity, and protein structure in terms of amino acid properties, local chain conformation, secondary structure, domains, and families of folds. How protein motion can be simulated. Bioinformatics introduced in terms of methods that compare proteins via their amino acid sequences and their three-dimensional structures. Structure prediction via simple comparative modeling. How to detect and model remote homologues. Predicting the structure of a protein from knowledge of its amino acid sequence. Via Internet.

3 units, Aut, Spr (Levitt, M)

**SBIO 229. The Eukaryote Chromosome** — The principles of chromosome structure and function including the structure, dynamics, and topological forms of DNA; units and hierarchies of DNA coiling in chromosomes; centromeres, telomeres, and basis of chromosome maintenance and sorting in mitosis; mechanism of gene activation with particular regard to enhancer, promoter, and terminator sequences; basis of sequence-specific protein-DNA interaction; and organization and assembly of the cell nucleus. Prerequisite: knowledge of basic biochemistry and cell biology.

3 units, Spr (Staff)

**SBIO 241. Biological Macromolecules** — (Same as BIOC 241, BIOPHYS 241.) The physical and chemical basis of macromolecular function. The forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies. Prerequisites: introductory biochemistry and physical chemistry or consent of instructor.

3-5 units, Aut (Herschlag, D; Puglisi, J; McKay, D; Garcia, KC; Ferrell, J; Block, S; Pande, V; Weis, W)

**SBIO 242. Methods in Molecular Biophysics** — (Same as BIOPHYS 242.) The potential utility of physical approaches to research, and how to evaluate literature that incorporates these methods. Experimental methods in molecular biophysics from theoretical and practical standpoints. Emphasis is on X-ray diffraction and nuclear magnetic resonance spectroscopy. Additional topics include fluorescence spectroscopy, circular dichroism, calorimetry, and separation methods. Prerequisite: physical chemistry or consent of instructor.

3 units, Win (Weis, W; Puglisi, J)

**SBIO 274. Topics in Nucleic Acid Structure and Function** — Principles of nucleic acid structure and function. Methods for investigating nucleic acid structure. Limited to graduate students and postdoctoral fellows in structural biology. Prerequisite: consent of instructor.

2 units, Spr (Puglisi, J)

**SBIO 299. Directed Reading in Structural Biology** — Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

**SBIO 399. Graduate Research** — Allows for qualified students to undertake investigations sponsored by individual faculty members.

1-18 units, Aut, Win, Spr, Sum (Staff)

**Cognate Courses**

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

**MI 211. Advanced Immunology I** — (Same as IMMUNOL 201.)

3 units, Win (Chien, Y)

**SURGERY**

**Chair:** Thomas M. Krummel

**Division Heads:** Craig Albanese (Pediatric General Surgery), James Chang (Plastic and Reconstrucive Surgery), Ronald Dalman (Vascular Surgery), Carlos Esquivel (Transplant Surgery), Ralph Greco (General Surgery), Michael Longaker (Research), Lawrence Mathers (Human Anatomy), Robert Norris (Emergency Medicine)

**Department Office:** 701B Welch Road, Suite 225

**Mail Code:** 94305-5784

**Phone:** (650) 498-4292

**Website:** http://surgery.stanford.edu

Courses given in Surgery have the subject code SURG. For a complete list of subject codes, see Appendix.

**Courses**

The following courses are open to undergraduates. For graduate and Medical School course offerings, see http://med.stanford.edu/.

**SURG 68Q. Current Concepts in Transplantation** — Stanford Introductory Seminar. Preference to sophomores. Can tissues and organs be grown in a laboratory for transplantation to humans? Biological aspects of cell and organ transplantation, including issues that arise in the media. Diseases for which transplantation is a treatment, the state of the art in human transplantation, transplantation of animal tissue into humans (xenotransplantation), development of new tissue and organs in the laboratory (tissue engineering and cloning), and development of drugs and biological strategies to promote long-term survival of the tissue or organ (tolerance). WRITE-2

3 units, Spr (Martinez, O; Krams, S)

**SURG 69Q. It's All in the Head: Understanding Diversity, Development, and Deforrmities of the Face** — Stanford Introductory Seminar. Preference to sophomores. How the face conveys moods and emotions, and elicits reactions when disease or genetic disorders leave behind disfigurement. New work by evolutionary and molecular biologists concerning how variations in facial form are elicited; how tissues and molecules interact to form the face. How differences in facial anatomy affect an individual’s self-perception and their acceptance in our beauty-conscious society.

3-4 units, Win (Helms, J)

**SURG 101. Regional Study of Human Structure** — Lectures in regional anatomy, dissection of the human body. The anatomy of the area through the dissection process.

5 units, Win (Staff)

**SURG 199. Undergraduate Research** — Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)
STANFORD INTRODUCTORY SEMINARS

Introduction to invasion biology

BIOSCI 10SC. Natural History, Marine Biology, and Research — The biology of Monterey Bay and the coastal mountains and redwood forests of Big Sur. Literary, artistic, and political history. Topics: conservation, sanctuary, and stewardship of the oceans and coastal lands. Meetings with conservationists, authors, environmentalists, politicians, land-use planners, lawyers, scientists, and educators.

2 units, Aut (Thompson, S)

BIOSCI 11SC. The Ecology of Invasions — Introduction to invasion ecology including the animal and plant species which are transforming ecosystems around the world. Ongoing research project in the Jasper Ridge Biological Preserve to investigate why the Argentine ant, once established, eliminates most native ant species, and why a few native species are able to resist.

2 units, Aut (Gordon, D)

CHEMICAL ENGINEERING

CHEMENG 10SC. How Computer Chips Are Made — The fabrication sequence for integrated circuits. Properties of solids. Semiconductors; transistors and their function in an integrated circuit. Transistor fabrication including doping, deposition, etching, and lithography. Future trends such as smaller transistors.

2 units, Aut (Bent, S)

CIVIL AND ENVIRONMENTAL ENGINEERING

CEE 10SC. Green Buildings — What makes a building green. The efficient use of energy, water, and construction materials to provide healthful and enjoyable spaces in which to live and work. Focus is on energy efficiency and architectural features that enable a building to provide a significant fraction of its own heating, cooling, and electrical needs.

2 units, Aut (Masters, G)

COMPARATIVE LITERATURE

COMPLIT 12SC. Ghost Stories: Why the Dead Return and What They Want from Us — Anxiety about mortality and wisdom about the cultural place of the past in the enduring genre of the ghost story from classical literature to popular film. Memory and regret, mourning and forgetting. Classic authors such as Hoffmann, Poe, James, Joyce, and Ibsen, and more recent authors such as Paul Auster, Marie Darrieussecq, Catherine Lim, and Toni Morrison.

2 units, Aut (Berman, R)

DRAMA

DRAMA 10SC. Social Protest Drama and the Politics of Hip Hop Performance — Theater as a social weapon. Focus is on the 60s and 70s. How performances were shaped by their time and whether they transcend their historic context. Chicano and Black social protest theater. Past versus contemporary uses of social protest performance. Potential of Hip Hop performance as mechanism of social protest. Assignments include creating a social protest manifesto and a performance piece.

2 units, Aut (Elam, H)

ECONOMICS

2 units, Aut (Shoven, J)

ELECTRICAL ENGINEERING

EE 10SC. The Intellectual Excitement of Computer Science — Intellectual tradition of computer science. Topics include analysis of algorithms, computability, cryptography, hardware design, and artificial intelligence.

2 units, Aut (Hennessy, J; Koller, D)
ENGLISH
ENGLISH 15SC. Mixed Race in the New Millennium — Current controversies over mixed race identification. Political and aesthetic implications. Literary and pop cultural images in literature, performance, the Internet, and visual media. Legal leverage and national recognition gained in the last decade. Organizations, web sites, and affinity and advocacy groups, and their rhetoric and graphics.
2 units, Aut (Elam, M)

ETHICS IN SOCIETY
ETHICSOC 10SC. The Meaning of Life: Moral and Spiritual Inquiry through Literature — Short novels and plays as the basis for reflection on ethical values and the purpose of life. Why are people here? How do they find meaningful work? What can death teach about life? What is the meaning of success? What is the nature of true love? How can one find balance between work and personal life? How free are people to seek their own destinies? What obligations does one have to others?
2 units, Aut (Michenman, W)

FILM AND MEDIA STUDIES
FILMSTUD 10SC. International Documentary Film — Historical, aesthetic, and formal elements of documentary through classic and contemporary international nonfiction films. Evolution of technology. How digital tools allow new filmmakers to emerge from underrepresented populations. Students create a web site with documentary photo essays of a Bay Area international community.
2 units, Aut (Samuelson, K)

GEOLOGICAL AND ENVIRONMENTAL SCIENCES
GES 12SC. Environmental and Geological Field Studies in the Rocky Mountains — Geologic origin from three billion years ago, paleoclimatology and glacial history, long- and short-term carbon cycle and global climate change, and environmental issues related to changing land-use patterns and increased demand for natural resources. Small groups analyze data to prepare reports and maps.
2 units, Aut (Chamberlain, P)

MUSIC
MUSIC 10SC. Sound, Digital Sound, and Massive Sound Media — Principles of sound production, hearing, and digital audio. Given the use of audio streaming and compression, and reliance on loudspeakers for the consumption of sound, are all aspects of sound being preserved? Team assignments in sound analysis, music recording, and instrument, and an individual topic for a web-based report.
2 units, Aut (Chafe, C)

2 units, Aut (Hadlock, H)

POLITICAL SCIENCE
POLISCI 10SC. American Foreign Policy in the 21st Century — The substance of U.S. foreign policy, and the political considerations that influence the making and conduct of American diplomacy. Topics include the prospects for conflict and cooperation among the great powers, regional security, peacekeeping and peacemaking, international terrorism, the proliferation of weapons of mass destruction, the global economy, and the domestic politics of U.S. foreign policy.
2 units, Aut (Blacker, C)

POLISCI 12SC. Race, Ethnicity, and the Future of California — California is now the most racially and ethnically diverse state in the nation. The challenges facing Californians in light of population trends. How has public policy responded? Focus is on population growth, education, immigration, political participation, and economic growth. Preparation of a policy proposal to the California governor.
2 units, Aut (Fraga, L)

POLISCI 16SC. How European Empires Shaped the Modern World — How today’s postcolonial world is influenced by European occupation. Why were Europeans so extroverted? How did Europe govern so many overseas territories for so long? The movement to political independence. Moral evaluation of the European colonial project. Readings include primary documents, historical overviews, and works analyzing imperialism, colonialism, and nationalism.
2 units, Aut (Abernethy, D)

POLISCI 17SC. What’s the Matter with California? — Historical origins, evolution, and current status of California’s political system. Chronic budget volatility, legislative paralysis, and the initiative process to make law. Deteriorating educational, transportation, and energy infrastructures, demographic and economic transformations unaccompanied by commensurate political adaptations, and failure to effect political change. The executive and legislative branches. Changing characteristics of the electorate. Role of political parties. Politics of redistricting, education, transportation, energy, and the environment. Discussion with policy makers and elected officials in Sacramento.
2 units, Aut (Brady, D; Kennedy, D; Noll, R)

RELIGIOUS STUDIES
RELIGST 11SC. Religion in Science Fiction and Fantasy — How the literature of science fiction and fantasy explores current conceptions about religion. Religious themes such as free will and determinism, immortality, apocalypse, and redemption. How religion figures in the contemporary imagination.
2 units, Aut (Gelber, H)

SYMBOLIC SYSTEMS
SYMBSYS 10SC. The University as a Local and Global Citizen — How Stanford impacts communities locally and globally. Focus is on opportunities for students, faculty, staff, and the institution to serve the world. Local history and tensions between Stanford and neighbors. Faculty and student involvement in local communities. Homelessness and the disparities of wealth. Environmental problems such as air pollution, traffic, and loss of open space. Involvement in work that serves the public.
2 units, Aut (Wasow, T; Davies, T)
FRESHMAN SEMINARS AND SOPHOMORE SEMINARS AND DIALOGUES

Freshman and Sophomore Seminars and Dialogues are offered in many disciplines throughout the academic year. Freshman preference seminars are given for 3-4 units to a maximum of 16 students, and generally meet twice weekly. Although preference for enrollment is given to freshmen, sophomores and first-year transfer students may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars and dialogues, similarly, give preference to sophomores and first-year transfer students, but freshmen may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars are given for 3-5 units to a maximum of 14 students, while sophomore preference dialogues take the form of a directed reading, and are given for 1-2 units to a maximum of 5 students.

All seminars require a brief application. See the Time Schedule, the Stanford Introductory Seminars course catalogue published each September, or http://introsems.stanford.edu/. Due dates for 2006-07 applications for both freshman and sophomore preference courses are: Autumn Quarter, 5 p.m., September 22; Winter Quarter, noon, December 8; Spring Quarter, noon, March 16.

For course descriptions, see course listings in the teaching department section of this bulletin.

F = preference to freshmen; S = preference to sophomores; Dial = dialogue; Sem = Seminar.

AERONAUTICS AND ASTRONAUTICS

AA 113N. Structures: Why Things Don’t (and Sometimes Do) Fall Down — (S, Sem) GER:DB-EngrAppSci 3 units, Win (Springer, G)

AA 115N. The Global Positioning System: Where on Earth are We, and What Time is It? — (F, Sem) GER:DB-EngrAppSci 3 units, Spr (Enge, P)

AMERICAN STUDIES

AMSTUD 68N. Mark Twain and American Culture — (Same as ENGLISH 68N.) (F, Sem) GER:DB-Hum 4 units, Aut (Fishkin, S)

AMSTUD 114N. Visions of the 1960s — (S, Sem) GER:DB-Hum, EC-AmerCul 5 units, Aut (Gillam, R)

APPLIED PHYSICS

APPHYS 79Q. Energy Choices for the 21st Century — (S, Sem) 3 units, Aut (Fox, J; Geballe, T)

BIOCHEMISTRY

BIOC 118Q. Genomics and Medicine — (S, Sem) GER:DB-EngrAppSci 3 units, Spr (Brutlag, D)

BIOENGINEERING

BIOE 70Q. Medical Device Innovation — (S, Sem) 3 units, Spr (Doshi, R)

BIOMEDICAL INFORMATICS

BIOMEDIN 109Q. Genomics: A Technical and Cultural Revolution — (Same as GENE 109Q.) (S, Sem) 3 units, Win (Altman, R)

BIOLOGICAL SCIENCES

BIOSCI 11N. Biotechnology in Everyday Life — (F, Sem) GER:DB-NatSci 3 units, Aut (Walbot, V)

BIOSCI 13N. Environmental Problems and Solutions — (F, Sem) GER:DB-NatSci 3 units, Spr (Ehrlich, P)

BIOSCI 14N. Plants and Civilization — (F, Sem) GER:DB-NatSci 3 units, Spr (Mooney, H)

BIOSCI 15N. Environmental Literacy — (F, Sem) GER:DB-NatSci, WRITE-2 3 units, Win (Schneider, S)

BIOSCI 21N. Evolutionary Basis of Animal Sexual Behaviors — (F, Sem) GER:DB-NatSci 3 units, Spr (Baker, B)

BIOSCI 25N. Biogeography of Disease — (F, Sem) 3 units, Aut (Hadly, E)

BIOSCI 25Q. The Molecular Basis of Genetic Disease — (S, Sem) GER:DB-NatSci 3 units, Spr (Kopito, R)

CHEMICAL ENGINEERING

CHEMENG 60Q. Environmental Regulation and Policy — (S, Sem) GER:DB-EngrAppSci 3 units, Aut (Robertson, C; Libicki, S)

CHEMENG 70Q. Masters of Disaster — (S, Sem) GER:DB-EngrAppSci 3 units, Aut (Robertson, C; Moalli, J)

CHEMENG 80Q. Art, Chemistry, and Madness — (S, Sem) 3 units, Spr (Frank, C; Loesch-Frank, S)

CHEMISTRY

CHEM 22N. Naturally Dangerous — (F, Sem) 2 units, Aut (Collman, J), Spr (Collman, J)

CHEM 24N. Nutrition and History — (F, Sem) 2 units, Spr (Huestis, W)

CHEM 25N. Science in the News — (F, Sem) 3 units, Aut (Andersen, H)

CHEM 27N. Lasers: The Light Fantastic — (F, Sem) GER:DB-NatSci 3 units, Win (Moerner, W)

CHINESE GENERAL

CHINGEN 74Q. What is Modern Chinese? — (S, Dial) 1-2 units, Spr (Sun, C)

CIVIL AND ENVIRONMENTAL ENGINEERING

CEE 31Q. Accessing Architecture through Drawing — (S, Sem) GER:DB-EngrAppSci 4 units, Aut (Walters, P)

CEE 46Q. Fail Your Way to Success — (S, Sem) GER:DB-EngrAppSci 3 units, Spr (Clough, R)

CEE 48Q. Designing Organizations to Execute Global Projects — (S, Sem) 4 units, Win (Levitt, R)

CEE 80N. The Art of Structural Engineering — (F, Sem) GER:DB-EngrAppSci 4 units, Win (Billington, S)
CLASSICS ART/ARCHAEOLOGY
CLASSART 21Q. Eight Great Archaeological Sites in Europe — (S,Sem) GER:DB-Hum, WRITE-2
3-5 units, Aut (Shanks, M)

CLASSICS GENERAL
CLASSGEN 6N. Antigone: From Ancient Democracy to Contemporary Dissent — (Same as DRAMA 12N.) (F,Sem) GER:DB-Hum, EC-Gender
3-5 units, Aut (Rehm, R)
CLASSGEN 17N. Odysseus of Many Turnings — (F,Sem) GER:DB-Hum
4-5 units, Aut (Martin, R)
CLASSGEN 20N. Mapping the Mediterranean — (F,Sem) GER:DB-Hum
4-5 units, Aut (Parker, G)
CLASSGEN 24N. Sappho: Erotic Poetess of Lesbos — (F,Sem)
3-5 units, Win (Peponi, A)
CLASSGEN 53N. Are We Our Bodies? — (Same as COMPLIT 53N.) (F,Sem)
3-4 units, Spr (Nightingale, A)

CLASSICS/HISTORY
CLASSHIS 22N. Ancient and Modern Slavery — (F,Sem) GER:DB-Hum
3-5 units, Spr (Scheidel, W)
CLASSHIS 50Q. Rome, Europe, and China: Convergence and Divergence — (S,Dial)
1-2 units, Win (Scheidel, W)

COMMUNICATION
COMM 118Q. Theories of Film Practice — (S,Sem) WRITE-2
4 units, Win (Breitrose, H)

COMPARATIVE LITERATURE
COMPLIT 10N. Shakespeare and Performance — (F,Sem) GER:DB-Hum, EC-Gender
3 units, Spr (Parker, P)
COMPLIT 11Q. Shakespeare, Playing, Gender — (S,Sem) GER:DB-Hum, EC-Gender
3 units, Win (Parker, P)
COMPLIT 18N. Thomas Mann’s Death in Venice — (Same as GERGEN 18N.) (F,Sem)
4 units, Aut (Berman, R)
COMPLIT 40N. Reading Across Literature — (F,Sem) GER:DB-Hum
5 units, Spr (Palumbo-Liu, D)
COMPLIT 41Q. Ethnicity and Literature — (S,Sem) GER:DB-Hum, EC-AmerCul
3-5 units, Aut (Palumbo-Liu, D)
COMPLIT 53N. Are We Our Bodies? — (Same as CLASSGEN 53N.) (F,Sem)
3-4 units, Spr (Nightingale, A)

COMPARATIVE MEDICINE
COMPMED 81N. Comparative Anatomy and Physiology of Mammals — (F,Sem)
3 units, Win (Bouley, D)
COMPMED 83Q. Horse Medicine — (S,Dial)
1-2 units, Aut (Green, S)

COMPUTER SCIENCE
CS 20N. The Role of Information Technology in Global Conflict Resolution — (F,Sem)
3 units, Spr (Shoham, Y)
CS 26N. Motion Planning for Robots, Digital Actors, and Other Moving Objects — (F,Sem) GER:DB-EngrAppSci
3 units, Spr (Latombe, J)
CS 48N. The Science of Art — (F,Sem) GER:DB-EngrAppSci
3 units, Win (Levy, M)
CS 73N. Business on the Information Highways — (F,Sem) WRITE-2
3 units, Spr (Wiederhold, G; Barr, A; Tessler, S)
CS 74N. Digital Dilemmas — (F,Sem) GER:DB-EngrAppSci
3 units, Aut (Dill, D)

CULTURAL AND SOCIAL ANTHROPOLOGY
CASA 8N. The Anthropology of Globalization — (F,Sem) GER:DB-SocSci
3-4 units, Aut (Ebron, P)
CASA 9N. Anthropology of Food — (F,Sem)
3-4 units, Spr (Gupta, A)
CASA 100Q. Ethnographies of North America: An Introduction to Cultural and Social Anthropology — (S,Sem) GER:DB-SocSci
3-4 units, Win (Wilcox, M)

DRAMA
DRAMA 12N. Antigone: From Ancient Democracy to Contemporary Dissent — (Same as CLASSGEN 6N.) (F,Sem) GER:DB-Hum, EC-Gender
4 units, Aut (Rehm, R)
DRAMA 13N. Hamlet(s) — (F,Sem) GER:DB-Hum
4 units, Win (Rayner, A)
DRAMA 16N. Beauty or the Beast? Kitsch and Contemporary Culture — (F,Sem)
4 units, Aut (Jakovljevic, B)
DRAMA 17N. From Inside the First World: Women of Color Playwrights Re-mapping the U.S. — (Same as SPANLIT 178N.) (F,Sem) GER:DB-Hum, EC-AmerCul
3 units, Win (Moraga, C)
DRAMA 18N. American Performance Traditions — (F,Sem) GER:DB-Hum
4 units, Spr (FORDYCE, E)
DRAMA 180Q. Noam Chomsky: The Drama of Resistance — (S,Sem) GER:DB-Hum
3 units, Aut (Rehm, R)
DRAMA 184Q. The Dancing Couple as a Lens on American Culture, 1890-1950 — (S,Sem) GER:DB-Hum
4 units, Spr (Ross, J; Powers, R)
DRAMA 188Q. From Brecht to MLLER: German Theater and Performance since World War II — (S,Dial)
1-2 units, Aut (Weber, C)
DRAMA 189Q. Mapping and Wrapping the Body — (S,Sem) GER:DB-Hum
3 units, Aut (Eddelman, W)

EARTH SYSTEMS
EARTHSYS 45N. Powering the Rim: Energy Issues for the Pacific — (Same as GES 45N.) (F,Sem)
3 units, Win (Howell, D; Graham, S)

ECONOMICS
ECON 11N. Understanding the Welfare System — (S,Sem)
2 units, Aut (Macurdy, T)
ECON 93Q. Global Capital Markets — (S,Dial)
2 units, Win (Marotta, G)
EDUCATION
EDUC 92Q. Leadership, Ethics, and the Law — (S,Sem)
3-5 units, Aut (Davis, S)

EDUC 94Q. Catastrophe as Curriculum: Teaching and Representing the Holocaust — (S,Dial)
1-2 units, Spr (Wineburg, S)

EDUC 115Q. Identities, Race, and Culture in Urban Schools — (S,Sem)
3 units, Spr (Nasir, N)

EDUCATIONAL ENGINEERING
EE 10N. How Musical Instruments Work — (F,Sem) GER:DB-EngrAppSci
3 units, Spr (Miller, D)

EE 18N. Pi and Other Physical Constants in Math, Physics, and Engineering — (F,Sem)
3 units, Spr (McKeown, N)

EE 19N. How the Internet Works — (F,Sem)
3 units, Win (Tobagi, F)

EE 20N. Hacking Stuff — (F,Sem)
3 units, Win (Peumans, P)

EE 21N. What is Nanotechnology? — (F,Sem)
3 units, Aut (Wong, P)

EE 60Q. Man versus Nature: Coping with Disasters Using Space Technology — (Same as GEOPHYS 60Q.) (S,Sem) GER:DB-EngrAppSci
3 units, Aut (Zebker, H)

ENGLISH
ENGLISH 52N. Top Ten Books — (F,Sem)
3 units, Win (Jones, G)

ENGLISH 53N. Winners of the Nobel Prize in Literature — (F,Sem)
3 units, Win (Shloss, C)

ENGLISH 62N. Eros in Modern American Poetry — (F,Sem) GER:DB-Hum
3 units, Win (Fields, K)

ENGLISH 64N. Growing Up in America — (F,Sem) GER:DB-Hum
3 units, Aut (Moya, P)

ENGLISH 66N. Homage: The Art of Influence — (S,Sem)
3 units, Spr (Tallent, E)

ENGLISH 68N. Mark Twain and American Culture — (Same as AMSTUD 68N.) (F,Sem) GER:DB-Hum
4 units, Aut (Fishkin, S)

ENGLISH 69Q. Sources of Global Challenges Today, Possibilities for Global Solutions: A Literary Exploration — (S,Sem)
3-5 units, Aut (Drake, S)

ENGLISH 77N. Living in the Past: Italy in the Anglo-American Imagination — (F,Sem) GER:DB-Hum
3 units, Aut (Evans, M)

ENGLISH 82Q. Shakespeare’s Plays — (S,Sem) GER:DB-Hum
5 units, Win (Rebholz, R)

ENGLISH 83Q. Playwriting: A Workshop in Craft — (S,Sem)
4 units, Aut (DiPirro, K)

ENGLISH 84N. Workshop in Shakespeare and Performance — (S,Sem) GER:DB-Hum
3 units, Win (Friedlander, J)

ENGINEERING
ENGR 159Q. Japanese Companies and Japanese Society — (Same as MATSCI 159Q.) (S,Sem) GER:DB-SocSci
3 units, Spr (Sinclair, R)

FEMINIST STUDIES
FEMIST 188N. Imagining Women: Writers in Print and in Person — (S,Sem)
4-5 units, Aut (Miner, V)

FRENCH GENERAL
FRENGEN 48N. Machiavelli and Sons — (F,Sem)
5 units, Aut (Edelstein, D)

FRENGEN 190Q. Parisian Cultures of the 19th and Early 20th Centuries — (S,Sem) GER:DB-Hum
4 units, Spr (Bertrand, M)

GENETICS
GENE 104Q. Law and the Biosciences — (S,Sem) WRITE-2
3 units, Spr (Greely, H)

GENE 106Q. The Heart of the Matter — (S,Sem) GER:DB-NatSci
3 units, Win (Myers, R)

GENE 109Q. Genomics: A Technical and Cultural Revolution — (Same as BIOMEDIN 109Q.) (S,Sem)
3 units, Win (Alman, R)

GEOLOGICAL AND ENVIRONMENTAL SCIENCES
GES 42N. Earthquakes, Faults, and Mountains of the Bay Area — (F,Sem)
5 units, Aut (Hilley, G)

GES 43N. Environmental Problems — (F,Sem) GER:DB-NatSci
3 units, Win (Loague, K)

GES 45N. Powering the Rim: Energy Issues for the Pacific — (Same as EARTHSYS 45N.) (F,Sem)
3 units, Win (Howell, D; Graham, S)

GES 49N. Field Trip to Death Valley and Owens Valley — (F,Sem) GER:DB-NatSci
3 units, Win (Mahood, G)

GES 50Q. The Coastal Zone Environment — (S,Sem) GER:DB-NatSci
3 units, Win (Ingle, J)

GES 54Q. California Landforms and Plate Tectonics — (S,Sem) GER:DB-NatSci
3 units, Aut (Miller, E)

3 units, Spr (Bird, D)

GES 57Q. How to Critically Read and Discuss Scientific Literature — (S,Sem) GER:DB-NatSci WRITE-2
3 units, Win (Paytan, A)

GEOPHYSICS
GEOPHYS 5Q. Earthquakes and Archaeology — (S,Dial)
2 units, Win (Kovach, R)

GEOPHYS 20Q. Predicting Volcanic Eruptions — (S,Sem)
3 units, Spr (Segall, P)

GEOPHYS 60Q. Man versus Nature: Coping with Disasters Using Space Technology — (Same as EE 60Q.) (S,Sem) GER:DB-EngrAppSci
3 units, Aut (Zebker, H)

NEUROLOGY AND NEUROLOGICAL SCIENCES
NENS 66Q. The Diseased Brain: Multiple Sclerosis as a Model of Neurological Illness — (S,Sem) Introduction to medical neuroscience through multiple sclerosis. Examination of gross and microscopic specimens of normal and diseased human brains; diagnostic test procedures; diagnostic reasoning processes leading to identification of illnesses; and the medical, social, and psychological dimensions of living with chronic illness and disability. Patient interviews and demonstrations of neurodiagnostic procedures such as electroencephalography (EEG), electromyography (EMG), cerebrospinal fluid analysis, and magnetic resonance imaging (MRI). Recommended: background in biological sciences.
  3 units, Win (Dorfman, L)

NEUROSURGERY
NSUR 61Q. Biocomputation and Design — (S,Sem) Research and development in computerized medical technology, and applications from patient-monitoring devices and two-dimensional image-based diagnostics to robotic surgery and volumetric image-based surgical navigation. Research at Stanford in biomedical computation and biomedical design. Requirements for effective use of robotics, three-dimensional imaging, and medical informatics. Common denominators for biomedical computation and design. Usability requirements for designing software or instrumentation for clinicians and healthcare systems. Recommended: math and computer background.
  4 units, Spr (Shahidi, R)

ORTHOPEDIC SURGERY
ORTHO 95Q. Human Performance: Its Measurement and Analysis — (S,Sem) Lab-based. Measuring and interpreting human performance data. Clinical problems using the following types of tests: VO2 max, anaerobic power and endurance, flexibility, muscular strength and endurance, lactate threshold, exercise ECG and echocardiography, bone density, gait analysis, joint motion analysis, and nutritional analysis.
  3 units, Win (Matheson, G)
ORTH 97Q, Sport, Exercise, and Health: Exploring Sports Medicine — (Same as HUMBIO 97Q.) (S,Sem) 3 units, Spr (Matheson, G)

PATHOLOGY
PATH 103Q. Leukocyte Migration — (S,Dial) 1 unit, Aut (Michie, S)
PATH 105Q. Final Analysis: The Autopsy as a Tool of Medical Inquiry — (S,Sem) 3 units, Spr (Regula, D)

PEDIATRICS
PEDES 104Q. Medicine’s Greatest Discoveries — (S,Sem) Anatomy, circulation, bacteria, vaccination, anesthesia, x-ray, tissue culture, cholesterol, antibiotics, and DNA. The history of these discoveries; lives of the discoverers, including Vesalius, Harvey, Leeuwenhoek, Jenner, Roentgen, and Fleming; and trials they faced in their personal and professional journeys. Guest lectures from Medical school faculty. 3 units, Win (Prober, C)
PEDES 111Q. Issues of Race and Ethnicity in the Health of Children — (S,Sem) Medicine and pediatrics from a public-health, evidence-based perspective. How research methods unmask health issues for at-risk racial and ethnic groups of children. Determinants of health with regard to race and ethnicity and ideas for changes in public policy. Students identify an area of interest and proposed intervention. 3-4 units, Aut (Burgos, A)

PHILOSOPHY
PHIL 11N. Skepticism — (F,Sem) GER:DB-Hum 3 units, Aut (De Pierris, G)
PHIL 13N. What is Truth? — (F,Sem) GER:DB-Hum 3 units, Win (Mints, G)
PHIL 14N. Belief — (F,Sem) GER:DB-Hum 3 units, Spr (Lawlor, K)
PHIL 16N. Values and Objectivity — (F,Sem) GER:DB-Hum 3 units, Aut (Ryckman, T)

PHYSICS
PHYSICS 11N. The Basic Rules of Nature — (F,Sem) GER:DB-NatSci 3 units, Spr (Shenker, S)
PHYSICS 18N. Revolutions in Concepts of the Cosmos — (F,Sem) GER:DB-NatSci 2 units, Win (Abel, T)
PHYSICS 41N. Mechanics, Insights, Applications, and Advances — (F,Sem) 3 units, Win (Burchat, P)
PHYSICS 45N. Advanced Topics in Light and Heat — (F,Sem) 1 unit, Aut (Romani, R)
PHYSICS 61N. Applications of Electromagnetism — (F,Sem) 1 unit, Aut (Gratta, G)
PHYSICS 80N. The Technical Aspects of Photography — (F,Sem) 3 units, Win (Osheroff, D)
PHYSICS 83N. Physics in the 21st Century — (F,Sem) GER:DB-NatSci 3 units, Aut (Dimopoulos, S)
PHYSICS 87N. The Physics of One: Nanoscale Science and Technology — (F,Sem) 3 units, Aut (Manoharan, H)

POLITICAL ECONOMY (GSB)
POLECON 111Q. Game Theory and Mathematical Models in Politics — (S,Sem) Rational choice methodology in political science. Why have third-party candidates been unsuccessful in the U.S. when other countries often have numerous political parties? Does racial gerrymandering contribute to Republican control of the House of Representatives? Why do people vote, despite the slim chance that a single vote determines an election? Is there a difference between policy outcomes under unified government versus divided government. 5 units, Win (Shotts, K)

POLITICAL SCIENCE
POLISCI 21N. The Evolution of Voting Rights in the U.S. — (F,Sem) GER:DB-SocSci 5 units, Win (Fraga, L)
POLISCI 33Q. Legal Craft and Moral Intuitions — (Same as LAW 107Q.) (S,Sem) 4 units, Win (Kelman, M)
POLISCI 35Q. Food and Politics — (S,Dial) 2 units, Win (Reich, R)
POLISCI 41Q. Building Democracy after Conflict: Iraq in Comparative Perspective — (S,Sem) 5 units, Spr (Diamond, J)
POLISCI 46N. Contemporary African Politics — (F,Sem) GER:DB-SocSci, EC-GlobalCom 5 units, Aut (Weinstein, J)

PORTUGUESE LITERATURE
PORTLIT 193Q. Spaces and Voices of Brazil through Films — (S,Sem) 3-4 units, Aut (Wiedemann, L)

PSYCHIATRY
PSYC 76Q. Neurobiology of Mood, Temperament, and Creativity — (S,Sem) Current neurobiological and psychological research on mood, temperament, and creativity; the evolving field of neuroscience; and how new technologies are helping to illuminate these previously obscure processes. Methods to assess mood, temperament, and creativity. WRITE-2 4 units, Win (Ketter, T)
PSYC 78Q. Mental Health in Women Athletes — (S,Sem) Developmental, social, and performance issues in women’s team sports. Topics include transition to Stanford, time management, coping with injuries, and preparing for the future. Case studies. 3 units, Aut (Steiner, H; Denny, K)
PSYC 111Q. Madness and the Womb: Mental Illness in Women through the Centuries — (S,Sem) Historical and current concepts of mental illness in women. Premenstrual dysphoric disorder (PMS), postpartum depression, menopausal mood disorders, and eating disorders. Historical biopsychosocial approach. Readings include women’s diaries and advice books, physicians’ casebooks, and 19th- and 20th-century medical texts. Guest speakers from art and literature departments. Literary and artistic images, and the social and cultural contexts of these disorders during the last 300 years. 3 units, Win (Rasgon, N; Williams, K; Reynolds, M)

PSYCHOLOGY
PSYCH 7Q. Language Acquisition — (S,Sem) 3 units, Aut (Fernald, A)
PSYCH 12Q. Self Theories — (S,Dial) 2 units, Win (Gross, J)
PSYCH 13N. Culture and Social Relationships — (F,Sem) GER:DB-SocSci 3 units, Win (Tsai, J)
PSYCH 16N. Amines and Affect — (F, Sem) GER: DB-SocSci
  3 units, Win (Knutson, B)

PSYCH 17N. Language and Society: How Languages Shape Lives —
  (F, Sem) GER: DB-SocSci
  3 units, Aut (Boroditsky, L)

PSYCH 21N. Conflict, Dispute, Resolution, and the Pursuit of
  Justice — (S, Sem)
  3 units, Spr (Ross, L)

PSYCH 22N. The Psychology of Everyday Morality — (F, Sem)
  4 units, Spr (Monin, B)

RELIIGIOUS STUDIES
RELIGST 4N. The Creation of Woman — (F, Sem) GER: DB-Hum,
  EC-Gender
  3 units, Aut (Fonrobert, C)

RELIGST 6N. The Life of the Buddha — (F, Sem) GER: DB-Hum,
  EC-GlobalCom
  3 units, Win (Zimmermann, M)

RELIGST 7N. The Divine Good: Secular Ethics and Its Discon-
  tents — (F, Sem)
  4 units, Spr (Sockness, B)

SCIENCE, TECHNOLOGY, AND SOCIETY
STS 101Q. Technology in Contemporary Society — (S, Sem) GER:
  DB-SocSci
  4 units, Aut (McGinn, R)

SLAVIC GENERAL
SLAVGEN 13N. Russia and the Russian Experience — (F, Sem) GER:
  DB-Hum
  3-4 units, Win (Schupbach, R)

SLAVGEN 77Q. Russia’s Weird Classic: Nikolai Gogol — (S, Sem)
  GER: DB-Hum
  3 units, Aut (Fleishman, L)

SOCIOLOGY
SOC 15N. The Transformation of Socialist Societies — (F, Sem)
  3 units, Win (Tuma, N)

SOC 22N. The Roots of Social Protest — (F, Sem)
  3 units, Spr (Olzak, S)

SOC 26N. The Changing American Family — (F, Sem)
  3 units, Aut (Rosenfeld, M)

SOC 32N. Law in Society — (F, Sem) GER: DB-SocSci
  3 units, Spr (Sandefur, R)

SOC 46N. Race, Ethnic, and National Identities: Imagined Com-
  munities — (F, Sem)
  3 units, Spr (Rosenfeld, M)

SPANISH LITERATURE
SPANLIT 107N. Latin American Women: Novels and Films —
  (F, Sem)
  3-5 units, Win (Ruffinelli, J)

SPANLIT 114N. Lyric Poetry — (F, Sem)
  3-5 units, Spr (Predmore, M)

SPANLIT 115N. Growing up Bilingual — (F, Sem) GER: EC-AmerCul
  3-5 units, Spr (Valdés, G)

SPANLIT 116N. New World Creation Narratives — (F, Sem) GER:
  DB-Hum
  3-4 units, Aut (Brotherston, J)

SPANLIT 178N. From Inside the First World: Women of Color
  Playwrights Re-mapping the U.S. — (Same as DRAMA 17N.) (F, Sem)
  GER: DB-Hum, EC-AmerCul
  3 units, Win (Moraga, C)

SPECIAL LANGUAGE PROGRAM
SPECLANG 198Q. Modern Greece in Film and Literature — (S, Sem)
  3-5 units, Aut (Prionas, E)

STATISTICS
STATS 43N. Displaying Data: Principles, Computer Graphics, and
  the Internet — (F, Sem) GER: DB-Math
  3 units, Win (Walther, G)

SURGERY
SURG 68Q. Current Concepts in Transplantation — (S, Sem) WRITE-2
  3 units, Spr (Martinez, O; Krams, S)

SURG 69Q. It’s All in the Head: Understanding Diversity, Develop-
  ment, and Deformities of the Face — (S, Sem)
  3-4 units, Win (Helms, J)
ACADEMIC PROGRAMS
AND CENTERS, AND
INDEPENDENT
RESEARCH
LABORATORIES, CENTERS, AND INSTITUTES

Vice Provost and Dean of Research and Dean of the Independent Laboratories, Centers, and Institutes: Ann M. Arvin
Associate Dean of Graduate Policy: Gail Mahood

Independent Research Laboratories, Centers, and Institutes perform multidisciplinary research that extends beyond the scope of any one of the University’s organized schools.

The following laboratories, centers, and institutes report to the Vice Provost and Dean of Research and Graduate Policy:

- Stanford Institute for Economic Policy Research
- Geballe Laboratory for Advanced Materials
- Edward L. Ginzton Laboratory
- Global Climate and Energy Program
- W. W. Hansen Experimental Physics Laboratory
- Stanford Humanities Center
- Stanford Center for Innovations in Learning
- Freeman Spogli Institute for International Studies
- Kavli Institute for Particle Astrophysics and Cosmology
- Center for the Study of Language and Information
- Stanford Program for Bioengineering, Biomedicine, and Biosciences (BioX)
- Stanford Institute for the Quantitative Study of Society
- Woods Institute for the Environment

The Hoover Institution on War, Revolution and Peace and the Stanford Linear Accelerator Center (SLAC) report to the President and Provost. SLAC is independently operated under a contract with the Department of Energy.

Following is a description of the activities of these organizations and other academic programs and centers, including research activities, and where applicable, courses offered.

STANFORD INSTITUTE FOR ECONOMIC POLICY RESEARCH

Director: John B. Shoven
Deputy Director: Gregory Rosston
Institute Office: 579 Serra Mall
Phone: (650) 725-1874
Web Site: http://siepr.stanford.edu

The primary mission of the Stanford Institute for Economic Policy Research (SIEPR) is to encourage and support research on economic policy issues in areas such as economic growth, technology policies, environmental and telecommunication regulation, tax reform, international trade, and monetary policy. SIEPR pursues four interrelated goals in support of this mission: (1) facilitating graduate student and faculty research on economic policy issues; (2) building a community of scholars conducting policy research; (3) disseminating research findings broadly; and (4) linking academics at Stanford with decision makers in business and government.

SIEPR is a University-wide research institute, involving economists from the schools of Business, Engineering, Law, Humanities and Sciences, as well as the Hoover Institution and the Institute for International Studies. Affiliated faculty and students maintain appointments in their home departments while working on SIEPR projects. In addition, scholars visiting from other institutions may apply for affiliation with SIEPR.

Much of the research at SIEPR takes place in its three research centers and six programs. The Stanford Center for International Development (SCID; Roger G. Noll, Director) fosters research on the economic problems of developing economies and economies in transition, as well as analyzing the political aspects of economic policy reform and historical episodes of reform. For more information about this center call (650) 725-8730. The Center on Employment and Economic Growth (CEEG; Tim Bresnahan, Director) is focusing on the relationship between long-term economic growth, the economic success of individuals and families in their jobs and careers, and the role played by higher education and how it can supply workers and technology in the work force. The program on regulation is part of this center. The Center for Public and Private Finance (CPPF; John B. Shoven and Michael J. Boskin, co-Directors) encompasses work on macroeconomics and monetary policy, tax and budget policy, and finance.

Separate research programs within SIEPR and their directors are the California Policy Program (Thomas McCurdy); the Energy, Natural Resources, and the Environment Program (James L. Sweeney); the Knowledge Networks and Institutions for Innovation Program (Paul A. David); the Program on the Japanese Economy (Masahiko Aoki); and the Program on Market Design (Susan Athey and Paul Milgrom).

GEBALE LABORATORY FOR ADVANCED MATERIALS

Director: Zhi-Xun Shen
Deputy Director: Paul McIntyre
Web Site: http://www-lam.stanford.edu

The Geballe Laboratory for Advanced Materials (GLAM) is an Independent Laboratory that reports to the Dean of Research. The Laboratory supports the research activities of more than 20 faculty members from the departments of Applied Physics, Chemical Engineering, Chemistry, Electrical Engineering, Materials Science and Engineering, Mechanical Engineering, and Physics. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for a broad spectrum of scientific research areas including high temperature superconducting materials and devices, mesoscopic devices, magnetic recording and storage media materials, electronic materials, opto-electronic materials, nanoscale materials and phenomena, nanoprobe devices, highly correlated electronic systems, computational materials science, condensed matter theory and physics, polymeric and biological materials, crystal growth, and thin film synthesis of complex oxides.

GLAM also has a newly remodeled Stanford Nanocharacterization Laboratory which provides advanced materials characterization and synthesis facilities for its members as well as for the Stanford materials research community at large. The instruments include a focused ion beam (FIB), scanning electron microscopy (SEM), scanning probe microscopy (SPM), transmission electron microscopy (TEM), x-ray diffraction analysis (XRD), and x-ray photoelectron spectroscopy (XPS) for characterization and thin film deposition capabilities for synthesis of materials. These facilities are managed by professional staff who also conduct research and development of new tools and techniques in areas...
related to advanced materials synthesis and characterization. GLAM is also home to the Center for Probing the Nanoscale, a nanoscale science and engineering center sponsored by the National Science Foundation, and to the Stanford Center for Magnetic Nanotechnology. GLAM also maintains a strong link to the X-ray Laboratory for Advanced Materials at the Stanford Synchrotron Radiation Laboratory.

The Geballe Laboratory for Advanced Materials is housed in the Moore Materials Research Building and McCullough Building complex.

EDWARD L. GINZTON LABORATORY

Director: Robert L. Byer
Web Site: http://www-hoover.stanford.edu/group/ginzton/

The Ginzton Laboratory houses the research activities of a number of faculty members from the departments of Applied Physics, Electrical Engineering, and Mechanical Engineering. The multidisciplinary foundations of faculty, students, and research provide a dynamic academic environment for scientific research in the fields of photonic science and engineering, quantum science and engineering, and nanoscience and engineering, including fiber optics, laser physics and applications, mesoscopic devices, microelectromechanical and microacoustic devices and systems, optoelectronic devices and systems, photonics, nanophotonics and photonic crystals, scanning optical microscopy, quantum cryptography and computing, tunneling and force microscopy, and ultrafast and nonlinear optics.

W. W. HANSEN EXPERIMENTAL PHYSICS LABORATORY (HEPL)

Director: Robert L. Byer
Web Site: http://hepl.stanford.edu/

HEPL is an independent laboratory celebrating over 50 years of fundamental science and engineering research. HEPL faculty and students are engaged in research in accelerator physics, astrophysics, dark matter in the universe, free electron lasers, fundamental tests of relativity in space, gamma ray observations, gravitational wave detection, quantum condensed matter, and space based solar physics studies. Many of the programs involve satellite-based studies in fundamental physics and engineering.

HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

Director: John Raisian
Web Site: http://www-hoover.stanford.edu/

The Hoover Institution, founded in 1919 by Stanford alumnus Herbert Hoover, is a public policy research center devoted to the advanced study of politics, economics, and political economy, both domestic and foreign, as well as international affairs. Hoover fellows are the foundation of the research program. This varied and distinguished community of scholars strives to conceive and disseminate ideas defining a free society within the framework of three programs:

American Institutions and Economic Performance focusing on interrelationships of U.S. political and legal institutions and economic activity, often referred to as political economy.

Democracy and Free Markets focusing on political economy in countries around the world.

International Rivalries and Global Cooperation focusing on interrelationships among countries by examining issues of foreign policy, security, and trade.

By collecting knowledge, generating ideas, and disseminating both, the Institution seeks to secure and safeguard peace, improve the human condition, and limit government intrusion into the lives of individuals, all of which are consistent with three prominent values: peace, personal freedom, and the safeguards of the American system.

STANFORD HUMANITIES CENTER

Director: John Bender
Associate Director: Matthew Tiews
External Faculty Fellows: Hilde De Weerdt (History, University of Tennessee), Christine Guth (Art History, Independent Scholar), Christian Henriot (Digital Humanities, Institut D’Asie Orientale, Lyon, France), Troy Jollimore (Philosophy, California State University at Chico), Konstantin Pollok (Philosophy, Philipps-Universität Marburg, Germany), Eric Porter (American Studies, University of California, Santa Cruz), William Tronzo (Visual Arts, University of California, San Diego), Linda Zerilli (Political Science, Northwestern University)

Humanities and International Studies Fellows: Boris Lanin (Philology, Russian Academy of Education, Moscow), Martina Winkler (History, Humboldt-Universität, Berlin, Germany)

Internal Faculty: Matthew Jockers (English, Academic Computing), Carolyn Lougee Chappell (History), David Riggs (English), Matthew Sommer (History), Kären Wigen (History), Jonah Willihnganz (Program in Writing and Rhetoric)

Geballe Dissertation Graduate Student Fellows: Margaret Butler (Classics), Sabrina Ferri (French and Italian), Marisa Galvez (Comparative Literature), Christy Pichichero (French and Italian), Karen Rapp (Art and Art History), Na’auma Rokem (Comparative Literature), Amy Tang (English), Hans Thomalla (Music)

Web Site: http://shc.stanford.edu/

The Stanford Humanities Center promotes research and education in the humanities at Stanford and nationwide. In particular, it stresses work of an interdisciplinary nature, accomplished through the following programs: one-year residential fellowships for Stanford faculty, faculty members from other institutions, and Stanford graduate and undergraduate students; public presentations such as lectures, conferences, and publications; and a research workshop program that brings faculty and graduate students together regularly to advance ongoing research on topics of interdisciplinary interest.

Fellows are selected on the basis of an open competition. They pursue their own research and participate in a weekly seminar at the center throughout the year. Faculty fellows also contribute to the intellectual life of the Stanford community through activities such as giving departmental courses, participating in ongoing research workshops, or organizing conferences.
STANFORD CENTER FOR INNOVATIONS IN LEARNING

Directors: Stig Hagstrom, Roy Pea
Center Offices: Wallenberg Hall (Building 160)
Web Site: http://scil.stanford.edu

The Stanford Center for Innovations in Learning (SCIL) conducts scholarly research to advance the science, technology, and practice of learning and teaching from early childhood through postsecondary education. The Center brings together teachers, scholars, and students from around the world to study how to improve formal and informal learning across cultural boundaries.

Established in 2002, SCIL is housed in the renovated Wallenberg Hall, a state-of-the-art testing ground for technology applications in the classroom. With the support of SCIL technical and advisory staff, more than 70 professors and instructors have taught courses in Wallenberg Hall.

SCIL provides an environment for conducting research and testing applications at the intersection of learning sciences, design, and technology. SCIL researchers focus on issues in learning and teaching, and on the ways in which innovative uses of technology can address those issues. Research projects typically involve collaboration among faculty, senior staff members, students from multiple disciplines, and scholars from other institutions and countries.

SCIL programs are multidisciplinary and collaborative in nature and include the recently launched LIFE Center (Learning in Informal and Formal Environments), a research endeavor funded by the National Science Foundation in 2004. Researchers in the LIFE Center are working toward the development of an integrated multidisciplinary science of learning. Engaging more than 40 faculty members and researchers from the learning sciences, psychology, education, communications, computer science, and developmental, cognitive, and social neuroscience, LIFE is a collaboration with the University of Washington and SRI International.

Media X, the industry-affiliates program that SCIL jointly sponsors with the Center for the Study of Language and Information (CSLI), brings together University faculty conducting interactive technology research with organizations committed to technical advancement and innovation.

In addition to its research work, SCIL provides year-round technical and advisory support to University instructors.

CENTER FOR THE INTERDISCIPLINARY STUDY OF SCIENCE AND TECHNOLOGY

Center Director: Michael Friedman
STS Undergraduate Director: Robert McGinn
HPST Graduate Director: Paula Findlen
Executive Committee: Keith Baker, Paula Findlen, Michael Friedman, Robert McGinn, Eric Roberts
Phone: (650) 725-0119; 725-0714
Web Site: http://cisst.stanford.edu

The Center for the Interdisciplinary Study of Science and Technology (CISST) brings together faculty, undergraduate and graduate programs, and research initiatives concerned with understanding science and technology in an interdisciplinary context. It is concerned equally with the historical, philosophical, and cultural study of science, technology, and medicine, and with critical analysis of issues raised by scientific and technological innovations in contemporary society. CISST houses two major programs: HPST (History and Philosophy of Science and Technology) and STS (Science, Technology, and Society); see their respective sections in this bulletin for their programs. CISST also sponsors visiting scholars, postdoctoral researchers, workshops, and speakers, providing a bridge between the humanities and social sciences, and the sciences and engineering.

At the undergraduate level, CISST houses STS, an undergraduate major that grants both B.A. and B.S. degrees. The STS major is designed to foster understanding of issues raised by the natures, consequences, and social shaping of technology and science in the contemporary world. To this end, the STS curriculum combines interdisciplinary, humanistic, and social scientific studies of science and technology in society with attainment of either technical literacy or fundamental understanding in some area of engineering or science. CISST also offers an honors program in STS that is open not only to STS majors but also to students in other majors who wish to pursue a senior honors project that addresses a research question arising from the relations among science, technology and society. Prospective majors or honors students should consult the STS section in this bulletin.

CISST also publishes a selection of undergraduate research papers in STS in our electronic undergraduate journal, *Techne* (http://www.stanford.edu/group/STS/techne).

At the graduate level, CISST houses an interdisciplinary graduate program, the Program in History and Philosophy of Science and Technology (HPST), jointly administered by the History and Philosophy departments; it involves faculty and students in these and other departments in the humanities. Prospective students interested in applying to the graduate program should consult the “History and Philosophy of Science and Technology” section of this bulletin, and the admissions requirements of the department in which they wish to apply for a M.A. or a Ph.D.

FREEMAN SPOGLOI INSTITUTE FOR INTERNATIONAL STUDIES

Director: Coit D. Blacker
Deputy Director: Michael A. McFaul
Institute office: Encina Hall, 616 Serra Street
Phone: (650) 723-4581
Web Site: http://fsi.stanford.edu

The Freeman Spogli Institute for International Studies (FSI) is Stanford University’s primary forum for interdisciplinary research on contemporary international issues and challenges. Working in partnership with the seven schools at Stanford and the Hoover Institution, FSI undertakes collaborative research and teaching which transcend disciplinary, school, and national boundaries. Priority areas of research include: efforts to prevent nuclear proliferation and ensure effective responses to acts of biological or chemical terrorism; linkages among democracy, development, and the rule of law; trade-offs between energy, food security, and environmental degradation; global healthcare delivery and outcomes; political, economic, and social change in the Asia-Pacific region; and national, regional, and multilateral security concerns in the region.

Opportunities for undergraduate research include the Goldman Internschol Honors Program in Environmental Science, Technology, and Policy, and the CISAC Interschool Honors Program in International Security. The institute manages 10 undergraduate and graduate fellowship programs.

Constituent centers and programs within FSI include: the Center on Democracy, Development, and the Rule of Law; the Center for Environmental Science and Policy; the Center for Health Policy/Center for Primary Care and Outcomes Research; the Center for International Security and Cooperation; and the Walter H. Shorenstein Asia-Pacific Research Center.
FSEI administers the following programs: the European Forum; the Initiative on Distance Learning; the Inter-University Center for Japanese Language Studies; the Program on Energy and Sustainable Development; the Stanford Japan Center—Research; and the Stanford Program on International and Cross-Cultural Education.

For more information about particular SIIS centers and programs, contact the center or program directly (area code 650):
- Center for Environmental Science and Policy (CESP), 725-2606, http://cesp.stanford.edu/, Walter P. Falcon, Stephen Schneider, Co-Directors
- Center for Health Policy/Center for Primary Care and Outcomes Research (CHP/PCOR), 723-1020, http://chppcor.stanford.edu/, Alan M. Garber, M.D., Director

UNDERGRADUATE PROGRAMS

GOLDMAN INTERSCHOOL HONORS PROGRAM IN ENVIRONMENTAL SCIENCE, TECHNOLOGY, AND POLICY

The Center for Environmental Science and Policy (CESP) coordinates a University-wide interschool honors program in environmental science, technology, and policy. Undergraduates planning to participate in the honors program are required to pursue studies in environmental science, technology, and policy, with a concentration in a single discipline. After completion of the prerequisite units, students join small group honors seminars to work with specific faculty members in the environmental field on an honors thesis that incorporates both scientific principles and the policy aspects of selected environmental issues.

Courses in environmental studies appear under the course listings of the schools of Earth Sciences, Engineering, and Humanities and Sciences. Information about and applications to this program may be obtained from the Center for Environmental Science and Policy, E401 Encina Hall East; telephone (650) 723-5697.

COURSES

IIS 199. Interschool Honors Program in Environmental Science, Technology, and Policy — Students from the schools of Humanities and Sciences, Engineering, and Earth Sciences analyze important problems in a year-long small group seminar. Combines research methods, oral presentations, preparation of an honors thesis by each student, and where relevant, field study. May be repeated for credit.
1-9 units, Aut, Win, Spr (Naylor, Falcon, Vitousek, Freyberg)

INTERSCHOOL HONORS PROGRAM IN INTERNATIONAL SECURITY

The Center for International Security and Cooperation (CISAC) coordinates a University-wide interschool honors program in international security studies. Students selected for the honors program fulfill individual department course requirements, attend a year-long seminar on international security research, intern at a security-related organization, and produce an honors thesis with policy implications. In order to qualify for the program, students must demonstrate sufficient depth and breadth of international security course work. Ideally, applicants to the program should have taken POLISCI 114S, International Security in a Changing World; MS&E 193, Technology and National Security; and at least one related course such as ECON 150/PUBLPOL 104, Economic Policy Analysis; STS 110/MS&E 197/PUBLPOL 103B, Ethics and Public Policy; SOC 160, Formal Organizations; PUBLPOL 102/SOC 166, Organizations and Public Policy; POLISCI 110B, Strategy, War, and Politics; and POLISCI 114T, Major Issues in International Conflict Management.

Information about and applications to this program may be obtained from the Center for International Security and Cooperation, E223 Encina Hall East, telephone (650) 723-9626, or http://cisac.stanford.edu.

COURSES

IIS 199. Interschool Honors Program in International Security Studies — Students from different schools meet in a year-long seminar to discuss, analyze, and conduct research on international security. Combines research methods, policy evaluation, oral presentation, and preparation of an honors thesis by each student. May be repeated for credit.
10-15 units, Aut, Win, Spr (Stedman)

CENTER FOR THE STUDY OF LANGUAGE AND INFORMATION

Director: Byron Reeves
Executive Director: Keith Devlin
Center Offices: Cordura Hall
Mail Code: 94305-4115
Web Site: http://www-csli.stanford.edu/

CSLI supports research at the intersection of the social and computing sciences. It is an interdisciplinary endeavor, bringing researchers together from academe and industry in the fields of artificial intelligence, computer science, engineering, linguistics, logic, education, philosophy, and psychology. CSLI’s researchers are united by a common interest in communication and information processing that ties together people and interactive technology.

The technologies of interest at CSLI are at the cutting edge of the information revolution. They include natural language processing, voice user interfaces, ubiquitous computing, collaborative work environments, handheld devices, information appliances, automatic language translation, conversational interfaces, machine learning, intelligent agents, electronic customer relationship management, and distance learning applications.

A primary goal of CSLI is to have a substantial and long-term intellectual impact on the academic and business communities involved with interactive technology. Our industry research partners and sponsors have a broad and facilitated access to ideas, faculty, students, and laboratories. Partners can share in the intellectual property of CSLI, and in the governance committees of the Center that establish research directions and funding priorities. CSLI accelerates knowledge transfer to products and services by involving executives and researchers in Stanford classrooms. CSLI partners can meet Stanford students studying in over 20 different degree programs across campus.

Course work related to the research at CSLI can be found in the “Program in Symbolic Systems” section of this bulletin.
**STANFORD INSTITUTE FOR THE QUANTITATIVE STUDY OF SOCIETY**

*Director:* Norman H. Nie  
*Center Offices:* 417 Galvez Mall, Encina Hall West, first floor  
*Mail Code:* 94305-6048  
*Phone:* (650) 723-7242  
*Web Site:* http://www.stanford.edu/group/siqss  

Founded in 1998, the Stanford Institute for the Quantitative Study of Society (SIQSS) is a multidisciplinary research institute affiliated with Stanford University’s Office of Research and Graduate Policy. The Institute is devoted to producing and sponsoring high-quality empirical social science research about the nature of society and social change.

The central mission of SIQSS is to provide social knowledge for the larger society and to develop the empirical social sciences as a primary tool for understanding social reality. SIQSS seeks to fulfill this mission by undertaking large-scale, socially relevant, theoretically important, and methodologically sound social research. Examples of projects under way include unintended consequences of information and technology in society; education and its social outcomes; conducting the 2000 census under adversity; and an online scholarly journal, *IT & Society* at http://www.stanford.edu/group/siqss/itandsociety/.

Scholars participating in SIQSS research programs and activities are drawn from diverse disciplines throughout Stanford University and from other academic institutions. SIQSS currently supports quantitative research through the following: long-term institute-initiated research programs, Stanford faculty research grants and student research assistantships, Stanford faculty fellows, interdisciplinary seminars, and the American Empirical Series.

**MICHELLE R. CLAYMAN INSTITUTE FOR GENDER RESEARCH**

*Director:* Londa Schiebinger  
*Associate Director:* Michelle Cale  
*Research Director:* Andrea Henderson  
*Artist in Residence:* Valerie Miner  
*Phone:* 650-723-1994  
*Web Site:* http://gender.stanford.edu  

Formerly the Institute for Research on Women and Gender, the Clayman Institute aims to be a leader in gender research, leveraging its findings to influence decision making in universities, business, communities, and government, nationally and internationally.

The institute focuses on women and gender issues in science, technology, and mathematics. It brings together faculty and students in interdisciplinary seminars, and organizes guest lectures and conferences open to the general public. It has two in-house research projects, due to be completed in 2008: on dual career academic couples; and on why women leave technical jobs in Silicon Valley. The institute also offers a number of prizes and awards to students and faculty, including seven graduate dissertation fellowships, and it is developing its residential research fellow program to bring leading gender scholars from other universities and countries to Stanford.

**SOCIAL SCIENCE HISTORY INSTITUTE**

*Co-Directors:* David Brady, Stephen Haber  
*Institute Office:* Building 200, Room 10  
*Mail Code:* 94305-2024  
*Phone:* (650) 723-1466  
*Email:* toney@stanford.edu  
*Web Site:* http://sshi.stanford.edu  

The goal of Social Science History Institute (SSHI) is to re-engineer the manner in which students in social science departments learn about historical institutions and data, and the manner in which students in history and related disciplines are trained in social science methods. Historians and social scientists share many of the same substantive interests (for example, the development of economies, political systems, and social structures), but they approach them with different and complementary methods and bodies of evidence. There is, however, a great deal of potential for historians and social scientists to draw on the strengths of each other’s methods to improve their own work and to foster increased interaction among the various disciplines that employ history as a laboratory to operationalize social science theories. The Social Science History Institute seeks to realize this potential by transplanting state-of-the-art research methods from classics, economics, history, political science, and sociology across the boundaries of each discipline. Toward this end, SSHI offers conferences and research support for faculty and graduate students.

**STANFORD LINEAR ACCELERATOR CENTER**

*Director:* Jonathan Dorfan  
*Web Site:* http://www.slac.stanford.edu/  

The Stanford Linear Accelerator Center (SLAC) has two academic departments. The Particle and Particle Astrophysics Department includes several areas of research: theoretical and experimental elementary particle physics, particle astrophysics, cosmology, accelerator and beam physics, and detector instrumentation. The Photon Science Department includes all areas of science done at the Stanford Synchrotron Radiation Laboratory (SSRL), the Photon Ultrafast Laser Science and Engineering Center (PULSE), and Linac Coherent Light Source, currently under construction to become a state-of-the-art X-ray laser research facility. See home.slac.stanford.edu/photonscience.html

SLAC is located on 425 acres of Stanford property west of the main campus and is operated under a contract with the United States Department of Energy. The Kavli Institute for Particle Astrophysics and Cosmology is located on the SLAC campus. SLAC is operated by Stanford as a national facility allowing qualified scientists from Stanford and other universities and research centers worldwide to participate in the research programs. Graduate students at Stanford may carry out Ph.D. research with members of the SLAC faculty; graduate students from other universities also participate in the research programs of visiting groups.

Research assistantships are available for qualified Stanford students by arrangement with individual faculty members. There are also opportunities for summer employment in the research groups at the center. Students interested in research in the areas of high energy physics, particle astrophysics, and accelerator physics should first contact Professor Rafe H. Schindler at the SLAC Graduate Studies Office. Students interested in research opportunities in photon science and SPEAR 3 should contact a member of the SSRL faculty, or other members of the Stanford faculty who use SSRL in their research programs; see www.slac.stanford.edu/faculty/.
The Ward W. and Priscilla B. Woods Institute for the Environment serves as a catalyst and hub for interdisciplinary research, teaching, and problem solving. It draws on the experience and expertise of faculty, students, and staff from all seven Stanford schools, and other institutes, centers, and independent labs. The institute’s mission is to promote environmental sustainability, and to help societies learn to meet their resource demands without undermining the ability of the planet to provide for future generations. The Woods Institute is at the core of the campus-wide Initiative on the Environment and Sustainability which leverages Stanford’s historic strengths in research, teaching, outreach, and technology transfer, and carries out its mission by seeking solutions to major challenges through innovative research, educating and training environmental leaders, and moving ideas into action by collaborating directly with decision makers. The institute also encourages innovation by funding collaborative faculty research and student projects. The Woods Institute currently concentrates its work in four focus areas: energy and global climate systems; freshwater; land use and conservation; and oceans and estuaries.
The J. Henry Meyer Memorial Library houses the East Asia Library as well as the Academic Computing group of SULAIR and provides instructional support services. In addition, Meyer Library houses the University’s Digital Language Lab, computer clusters, technology enhanced classrooms, an Academic Technology Lab, an Assistive Learning Technology Center, and the central offices of Residential Computing and Academic Computing.

BRANCH LIBRARIES

Humanities and Social Sciences Branch Libraries include the Art and Architecture Library, Cubberley Education Library, East Asia Library, Music Library, and Archive of Recorded Sound.

COORDINATE LIBRARIES

J. Hugh Jackson Library, Graduate School of Business  
Director: Kathy Long

Lane Medical Library  
Director: Debra Ketchell

Crown Law Library  
Director: Paul Lomio

Stanford Linear Accelerator Center Library  
Director of Technical Information Services: Patricia Kreitz

HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

Director: John Raisian  
Web Site: http://www-hoover.stanford.edu/hila/

Since its founding by Herbert Hoover in 1919 as a special collection dealing with the causes and consequences of World War I, the Hoover Institution has become an international center for documentation, research, and publication on political, economic, social, and educational change in the 20th and 21st centuries.

The Hoover Library and Archives include one of the largest private archives in the world and contain outstanding area collections on Africa, East Asia, Eastern Europe, Russia and the former Soviet Union, Latin America, the Middle East, North America, and Western Europe.

Holdings include government documents, files of newspapers and serials, manuscripts, memoirs, diaries, and personal papers of men and women who have played significant roles in the events of these centuries, the publications of societies and of resistance and underground movements, and the publications and records of national and international bodies, both official and unofficial, as well as books and pamphlets, many of them rare and irreplaceable. The materials are open to all Stanford students, faculty, and staff, to scholars from outside the University, and to the public at large.

INFORMATION TECHNOLOGY SERVICES (IT SERVICES)

Web Site: http://it-services.stanford.edu

Information Technology Services provides computing and communication infrastructure and support for the teaching, learning, research, and business activities of the University, including networking, telecommunications, data center, email, web services, remote computing, data storage and backup, software licensing, help desk, computer support, departmental consulting, and training.

To learn about the variety of information technology resources available at Stanford, see http://computing.stanford.edu. For assistance with technology services at Stanford, contact the Stanford IT Help Desk by phoning (650) 725-HELP (5-4357) or submit a request through http://helpsu.stanford.edu. For more information about Information Technology Services, see http://it-services.stanford.edu.
THE CONTINUING STUDIES PROGRAM

Dean and Associate Provost: Charles Junkerman
Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 725-2650; Fax: (650) 725-4248
Email: continuingstudies@stanford.edu
Web Site: http://continuingstudies.stanford.edu

The Continuing Studies Program provides adults from Stanford and surrounding communities the opportunity to take classes on a part-time basis for intellectual enrichment, both personal and professional. Courses and events are offered in all four academic quarters, with over 350 courses planned for the 2006-07 academic year.

The faculty are primarily drawn from the ranks of the University’s professoriate. The program presents a wide variety of courses, with a central concentration in the liberal arts, including literature, history, art and architecture, and music.

Tuition discounts are available to University employees, Stanford students and faculty, Stanford Alumni Association members, educators, and those over age 65.

For a course catalogue, contact the Continuing Studies Program by mail, phone, or email as above. The Continuing Studies Program also administers the Master of Liberal Arts Program and Summer Session.

MASTER OF LIBERAL ARTS PROGRAM

Associate Dean and Director: Linda Paulson
Participating Faculty: David Abernethy (Political Science), Clifford Barnett (Anthropology), Russell Berman (Comparative Literature and German), Marc Bertrand (French, emeritus), Eavan Boland (English), John Bravman (Material Sciences and Engineering), Bliss Carnochan (English), Clayborn Carson (History), Wanda Corn, (Art and Art History), George Dekker (English), Carol Delaney (Anthropology, emeritus), Gerry Dorfman (Hoover Institute and Political Science), Arnold Eisen (Religious Studies), Michele Elam (English), Martin Evans (English), Anne Fernald (Psychology), Paula Findlen (History), Luis Fraga (Political Science), John Freccero (French and Italian), Larry Friedlander (English), Kenneth Fields (English), Hester Gelber (Religious Studies), Albert Gelpi (English), Barbara Gelpi (English), Monika Greenleaf (Slavic Languages), Robert Gregg (Religious Studies), Tom Grey (Music), Hans Ulrich Gumbrecht (French and Italian), Van Harvey (Religious Studies), Stephen Hinton (Music), Charles Junkerman (Continuing Studies Program), Nancy Kollmann (History), Marsh McCall (Classics), Robert McGinn (Management Science and Engineering, and Science, Technology, and Society), Mark Mancall (History), Joseph Manning (Classics), Diane Middlebrook (English, emeritus), Thomas Moser (English), David Palumbo-Liu (Comparative Literature), Linda Paulson (English), Dennis Phillips (Education, and, by courtesy, Philosophy), Jack Rakove (History), Ronald Rehholz (English), Rush Rehm (Drama), John Rick (Anthropological Sciences), John Rickford (Linguistics), Paul Robinson (History), Ramón Saldívar (English), Paul Seaver (History), Thomas Sheehan (Religious Studies), Robert Siegel (Microbiology and Immunology), Stephen Stedman (Freeman Spogli Institute for International Studies, and, by courtesy, Political Science), Thomas Wasow (Linguistics), Lee Yearley (Religious Studies), Emrê Young (Center for Biomedical Ethics), Steven Zipperstein (History)

Program Offices: 482 Galvez Mall
Mail Code: 94305-6079
Phone: (650) 725-0061
Email: mlaprogram@stanford.edu
Web Site: http://mla.stanford.edu

Program Description — The Master of Liberal Arts (MLA) program aims to provide a flexible, interdisciplinary program for returning adult students who seek a broad education in the liberal arts. The underlying premise of the MLA program is that knowledge gained through an interdisciplinary course of study leads to intellectual independence and satisfaction not always found in discipline-based programs of study. The goals of the MLA program are to develop advanced critical thinking, to foster intellectual range and flexibility, and to cultivate an individual’s ability to find the connections among different areas of human thought: art, history, literature, music, philosophy, political science, science, and theology.

The program is designed with part-time students in mind: seminars meet in the evening, and students complete the degree in 4-5 years. All master’s seminars are taught by members of the Stanford faculty. Seminar size is limited to 20 students.

Degree Requirements — Candidates for the MLA degree must complete a minimum of 50 units of course work with at least a grade point average of 3.3 (B+). These units must include a three quarter foundation course (equal to 12 units total), one 4-unit core introductory seminar for second-year students, at least seven 4-unit MLA seminars, and a 4-unit master’s thesis. The remaining 2 units of required courses may be fulfilled by additional MLA seminars, relevant Continuing Studies Program course offerings, or by a summer session at Oxford. Students must also fulfill distribution requirements by taking at least 2 units of credit in each of the following areas: humanities; social science or social policy; and science, engineering, or medicine.

Foundation Course — During the Autumn, Winter, and Spring following admission to the program, there is a three quarter foundation course required of all students. The purpose of this course is to lay the groundwork for the interdisciplinary, intercultural studies the student will shortly undertake. The foundation course will introduce students to the broad framework of history, literature, philosophy, political science, and art.

Core Seminar — During the first quarter of the second year, new students take the core introductory seminar, The Plague: An Introduction to Interdisciplinary Graduate Study. This seminar aims to prepare students for interdisciplinary graduate work at Stanford. Students concentrate on writing a critical graduate paper, conducting library research, presenting the results of their research, and productively participating in a collaborative seminar.

MLA Seminars — Students are required to take at least seven MLA seminars of four units each. Each year, at least nine seminars are offered in the MLA program. Each MLA course requires a substantial seminar paper. Students are encouraged to use these papers as a way to investigate new fields of interest, as well as a way to develop different perspectives on issues in which they have an ongoing interest.

Master’s Thesis — The MLA program culminates in the master’s thesis. Students approaching the end of the program write a thesis, approximately 75-100 pages in length, that evolves out of work they have pursued during their MLA studies. The thesis is undertaken with the prior approval of the MLA program, and under the supervision of a Stanford faculty member. During the process of writing the thesis, students are members of a work-in-progress group, which meets regularly to provide peer critiques, motivation, and advice. Each student presents the penultimate draft of the thesis to a colloquium of MLA faculty and students, in preparation for revising and submitting the final draft to the advisor and to the MLA program.

Enrollment Requirements — MLA students must enroll for each academic year from the time of original matriculation until conferral of the degree. To remain active, students must either: (a) complete a minimum of two courses (eight units) in one academic year, defined as from the beginning of Autumn Quarter through the end of the following Summer Quarter, or (b) be actively working on their theses and regularly attend
a minimum of three-quarters of the work-in-progress meetings from the time the student enrolls in work-in-progress through graduation.

**Timeline for completion** — All requirements for the Master of Liberal Arts degree must be completed within five years after the student’s first term of enrollment in the program. If extraordinary circumstances prevent completion within five years, a student may submit a written petition for a maximum one-year extension to the Associate Dean and Director. This petition is reviewed by a committee which makes a recommendation to the Director; the final decision is at the discretion of the Director. To be considered, the petition must be submitted on or before May 1 of the student’s fifth year in the program.

**Registration** — Master of Liberal Arts students register for courses online through the Continuing Studies web site.

### COURSES

101A. Foundations I — Required for first-year MLA students.
   4 units, Aut (Steidle)
101B. Foundations II — Required for first-year MLA students.
   4 units, Win (Steidle)
101C. Foundations III — Required for first-year MLA students.
   4 units, Spr (Berman)
102. The Plague: An Introduction to Interdisciplinary Graduate Study
   4 units, Aut (Paulson)
209. Reason and Reality
   4 units, Aut (Bobonich)
235. Clash of Civilizations? Islam and the West Today
   4 units, Aut (Berman)
236. Imagining Rome
   4 units, Win (Gelpi, Gelpi)
237. Belief and Doubt in the British Enlightenment
   4 units, Win (Bertrand)
238. Nazi Culture and California Exile
   4 units, Win (Berman)
239. Slave Narratives
   4 units, Win (Elam)
240. Family Fictions
   4 units, Spr (Palumbo-Liu)
241. Shakespeare and Music
   4 units, Spr (Chang)
242. Eccentric Concord: New England Laboratory of American Liberalism
   4 units, Spr (Junkerman)
243. Negotiating for the UN
   4 units, Spr (Stedman)
244. Love and Death in the Middle Ages
   4 units, Sum (Gelber)
245. Shakespeare through Performance IX
   4 units, Sum (Friedlander)

### SUMMER SESSION

**Associate Dean:** Patricia Brandt  
**Director of Admission and Student Services:** Teresa Nishikawa  
**Program Offices:** 482 Galvez Mall  
**Mail Code:** 94305-6079  
**Phone:** (650) 723-3109; Fax: (650) 725-6080  
**Email:** summersession@stanford.edu  
**Web Site:** http://summer.stanford.edu

Students attending Stanford Summer Session are enrolled in either a regular degree program, the Summer Visitor Program, or the Summer College program for High School Students.

The regular degree program is for students who are candidates for a Stanford degree and who are continuing their academic work in Summer Quarter. Degree-seeking Stanford students should indicate on Axess during Spring Quarter that they intend to register for Summer Quarter. Separate application is not required.

The Summer Visitor Program is for students who are not presently candidates for a Stanford degree. It is open to students who are currently enrolled in or have graduated from another college or university. Qualified high school students who have completed at least their sophomore year may apply to the Summer College program.

Students in Summer Session, in general, enjoy the privileges of students in the regular degree programs except that work completed cannot be applied toward a Stanford degree or credential until the student has been admitted to regular standing. Admission as a summer visitor does not imply later admission to matriculated status. However, should the visitor matriculate at a later date through normal admission procedures, the summer work may be applied toward the requirements for a Stanford degree or credential at the discretion of the University or academic department.

For more information, contact Summer Session by email, mail, phone, or fax using the listings above. Information is updated annually in January and may also be found online at http://summer.stanford.edu.
UNDERGRADUATE EDUCATION

Vice Provost for Undergraduate Education: John Bravman
Web Site: http://undergrad.stanford.edu/

As the chief academic officer for undergraduate education, the Vice Provost initiates policies and programs, assesses and manages continuing programs, oversees curricular innovation, and coordinates the undergraduate activities of the three Schools (Humanities and Sciences, Earth Sciences, and Engineering) which offer undergraduate majors and minors. The Center for Teaching and Learning, Diversity Outreach, Freshman and Sophomore Programs, the Freshman Dean’s Office, Introduction to Humanities, New Student Orientation/Approaching Stanford, Program in Writing and Rhetoric, Stanford Writing Center, Undergraduate Advising and Research, and Writing in the Major report to the Vice Provost of Undergraduate Education.

CENTER FOR TEACHING AND LEARNING

Associate Vice Provost for Undergraduate Education and Director: Michele Marincovich
Senior Associate Director (Science and Engineering): Robyn Wright Dunbar
Associate Director (Humanities): Mariatte Denman
Associate Director (Social Sciences and Technology): Marcelo Clerici-Arias
Academic Technology Specialist: Jeremy Sabol
Assistant Director for Academic Support: Adina Glickman
Tutor Coordinator: Amy Chambers
Administrators: Joanne David, Cristen Osborne, Linda Salser
Oral Communication Program Director and Senior Lecturer: Dorcee Allen
Oral Communication Specialist: Jennifer Hennings
Lecturers: Thomas Freeland, Joyce Moser, Marianne Neuwirth, Leslie Townsend, James Wagstaffe, Randall A. Williams

Department Offices: Sweet Hall, 4th floor
Oral Communication Program: Meyer Library 123
Mail Code: 94305-3087
Center Phone: (650) 723-1326
Email: TeachingCenter@stanford.edu
Web Site: http://ctl.stanford.edu

The Center for Teaching and Learning is a university-wide resource on effective teaching and public speaking for faculty, lecturers, and teaching assistants and on both effective learning and public speaking for undergraduates and graduate students.

SERVICES TO UNDERGRADUATES AND GRADUATE STUDENTS

CTL provides resources for students who want to enhance their study approaches and clarify their learning strategies. Through courses, individual counseling, and workshops, CTL helps students build skills that are the foundation for continuous improvement and lifelong learning.

Free tutoring is available to undergraduates in several subjects; see http://tutoring.stanford.edu for details on where and when tutors can be found. Students qualified for tutoring may apply to be tutors and, if accepted, may take CTL’s course on tutoring; the application process takes place in February.

SERVICES TO FACULTY, LECTURERS, AND TEACHING ASSISTANTS

CTL provides the Stanford community with services and resources on effective teaching. Our goals are: to identify and involve successful teachers who are willing to share their talents with others; to provide those who are seeking to improve their teaching with the means to do so; to acquaint the Stanford community with important innovations and new technologies for teaching; to prepare new teachers for their responsibilities; to contribute to the professional development of teaching assistants; to expand awareness of the role of teaching at research universities; and to increase the rewards for superior teaching.

CTL also has responsibility for helping teaching assistants (TAs) with their preparation for and effectiveness in teaching, and for helping departments with designing effective TA training programs. Programs include: videotaping, microteaching, and consultation; small group and other forms of mid-quarter evaluation; workshops and lectures; a handbook on teaching and a library of teaching materials; quarterly teaching orientations; an informative quarterly newsletter; and work with individuals, groups, and departments on their specific needs. For further details, see CTL’s teaching handbook or the CTL brochure, both available by calling (650) 723-1326, or see http://ctl.stanford.edu.

For questions or requests, email TeachingCenter@stanford.edu.

ORAL COMMUNICATION PROGRAM

The Oral Communication Program at CTL provides opportunities for undergraduates and graduate students to develop or improve their oral communication skills. Courses and workshops offer a comprehensive approach to speech communication, including training in the fundamental principles of public speaking and the effective delivery of oral presentations. The goal is to enhance students’ general facility and confidence in oral expression. The program also provides innovative, discipline-based instruction to help students refine their personal speaking styles in small groups and classroom settings. Those interested in individualized instruction or independent study are invited to visit the program’s central office in Meyer Library, room 123, where trained student tutors, multimedia, and instructional resource materials are available on an ongoing basis. To schedule an appointment, see http://speakinghelp.stanford.edu. For further details, call (650) 725-4149 or 723-1326 or see http://ctl.stanford.edu.

COURSES

All courses listed with CTL promote acquisition of public speaking skills and/or teaching excellence.

CTL 53. Working Smarter — College-level strategies and skills in time management, reading, speaking, writing, and test preparation. Students explore learning preferences to develop strategies in different academic settings.
2 units, Sum (Staff)

CTL 56. Building a Successful Academic Career — For freshmen in expanded advising programs. Techniques for honing academic skills for college, and applying those skills to better define intellectual identity in academic pursuits. May be repeated for credit.
1 unit, Aut, Win (Williams, R)

CTL 60/160. Investigating Stanford’s Treasures — Private tours of some of Stanford’s greatest resources led by Stanford experts; students interview the experts and introduce them to the class at the site. One hour of class discussion per week. Tours may include Jasper Ridge Biological Reserve, Memorial Church, Special Collections, and the Martin Luther King, Jr., Papers Project.
1-2 units, Aut (Moser, J)

2 units, alternate years, not given this year

CTL 115/215. Voice Workshop — Focus is on breath, voice production, expansion of vocal range and stamina, and clarity of articulation. Geared
toward public speaking including presentations, lectures, and job talks. May be taken in conjunction with CTL 117.

1-2 units, Aut, Win, Spr (Freeland, T)

CTL 116A. The Language of Film Noir: From Bogart to Pulp Fiction—The quintessential American film genre which combined femmes fatales, anti-heroes, lost dreams, violence, and a distinct style of expression. Film viewings, student oral presentations, and analyses of films.

1-2 units, alternate years, not given this year

CTL 116B. Screwballs and the Language of Laughter: American Comic Film from Chaplin to Present—A sampling of American comic masterpieces including silent movies, 30s screwball films, and works by Billy Wilder, Woody Allen, and contemporary film makers. Film viewings, student oral presentations, and analyses of films.

1-2 units, Win (Moser, J)

CTL 117/217. The Art of Effective Speaking—The principles and practice of effective oral communication. Through formal and informal speaking activities, students develop skills framing and articulating ideas through speech. Strategies for speaking extemporaneously, preparing and delivering multimedia presentations, formulating persuasive arguments, refining critical clarity of thought, and enhancing general facility and confidence in oral self-expression.

3 units, Aut (Carr, J), Win (Allen, D)

CTL 118. Public Speaking: Romancing the Room—A practical approach to the art of public speaking. Emphasis is on developing skills in speech types including impromptu, personal experience, interviewing, demonstration, persuasive, and special occasion. Materials include videotape, texts of famous speeches, and a final dinner program of speeches. Students evaluate presentations by others. $55 materials fee.

3 units, Sum (Wagstaffe, J)

CTL 119. Oral Communication Tutor Teaching Practicum—Seminar. For students with a strong background in public speaking who wish to train as public speaking tutors for CTL’s Oral Communication Program. Readings, exercises, and supervised teaching refine speaking skills. Preparation to serve as a peer tutor in a variety of academic disciplines. Prerequisite: consent of instructor.

1-3 units, Aut (Allen, D; Hennings, J), Spr (Hennings, J)

CTL 120. Peer Tutor Training—Goal is to help students become effective peer tutors for course material already mastered by articulating aims; developing practical tutoring skills including strategies for drop-in sessions; observing experienced tutors; discussing reading assignments; role playing; and reflecting on experiences as a peer tutor intern. Prerequisite: consent of instructor.

1 unit, Aut (Glickman, A)

CTL 125. From the Page to the Stage: The Performance of Literature—The oral interpretation of literature as performance art and mode of literary analysis. Focus is on contemporary and local expression including topics such as the Spoken Word Collective at Stanford, the ensemble performance of short works of fiction by San Francisco’s Word for Word Performing Arts Company, and the storytelling art of Awele Makeba which combines theater, oral history, and music. No performance experience necessary.

3 units, alternate years, not given this year

CTL 130. Beyond Stereotype Threat: Claiming a Rightful Place in an Academic Community—(Same as PSYCH 125.) Stereotype threat as mitigating the quality of a student’s test performance; its impact on academic success at Stanford. How to reduce the impact of stereotype threat on Stanford students.

2-3 units, Win (Glickman, A)

CTL 175. Intertextuality, Interpretation, and Performance—Literary and performance theories from the late 20th century to the present. The performative link between writing and speech. Students apply theories in critical writings, performances, and intertextual assemblies. How to find and refine one’s own voices in writing and vocality.

4 units, not given this year

CTL 177. Performance of Power: Oratory and Authority from the Ancient World to the Postmodern—Speech as action has long been seen as essential to leadership. Theories and examples of oratory, from Aristotle to George W. Bush, assessing each as model of voice-activated authority. The impact of mass media technologies as they transform the public space of oratory.

4 units, Win (Freeland, T)

CTL 199/299. Independent Study—Special study under lecturer direction, usually leading to a written report or an oral presentation. Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr, Sum (Staff)

CTL 201. Science Course Design—(Same as GES 201.) For students interested in an academic career and who anticipate designing science courses at the undergraduate or graduate level. Goal is to apply research on science learning to the design of effective course materials. Topics include syllabus design, course content and format decisions, assessment planning and grading, and strategies for teaching improvement.

2-3 units, Aut (Wright-Dunbar, R)

CTL 219. Oral Communication for Graduate Students—Graduate student speaking activities such as teaching (delivering lectures, guiding discussion, and facilitating small groups), professional presentations and conference papers, and preparing for oral exams and defenses. In-class projects, discussion, and individual evaluation of student development and improvement in effective speaking and communication.

1-3 units, Sum (Allen, D)

CTL 225. Teaching Development Series—Teaching and academic career topics from CTL’s workshops series. Documented participation in a minimum of 10 hours required for credit. Offerings vary quarterly. See http://ctl.stanford.edu for current information. May be repeated for credit. Prerequisite: consent of instructor.

1 unit, Aut, Win, Spr (Staff)

FRESHMAN AND SOPHOMORE PROGRAMS

Assistant Vice Provost and Program Director: Sharon Palmer
Associate Director and Academic Technology Specialist: Dena DeBry
Academic Technology Specialist: Carlos Seligo
Oral Communication Lecturer: Joyce Moser
College Programs Associate: LaCona Woltmon
Administrators: Gari Gene, Mona Kitasoe, Jasmine Lu, Gary Matsumura

Department Offices: Sweet Hall, 4th floor
Phone: (650) 723-4338
Fax: (650) 736-2797
Email: fsp@vpue.stanford.edu
Web Site: http://fsp.stanford.edu/

Freshman and Sophomore Programs (FSP), a division of the office of the Vice Provost for Undergraduate Education, sponsors and supports Freshman-Sophomore and Potter Colleges, as well as Stanford Introductory Seminars, including Freshman Seminars, Sophomore Seminars and Dialogues, and Sophomore College. FSP also coordinates initiatives that encourage faculty and students to build on relationships formed in introductory seminars by forming on-going mentoring and research partnerships based on their shared intellectual interests. FSP is located on the fourth floor of Sweet Hall. For detailed information, see the web site or contact the office.

FRESHMAN-SOPHOMORE COLLEGE AND POTTER COLLEGE

The Freshman-Sophomore College at Sterling Quadr is a residence for approximately 180 freshmen and sophomores interested in broad intellectual exploration of the liberal arts and sciences. Potter College is
designed to create an interdisciplinary community of upper-class students engaged in intellectual exploration with a focus on writing, public speaking, honors, and research.

**STANFORD INTRODUCTORY SEMINARS**

Stanford Introductory Seminars (SIS) provide opportunities for first- and second-year students to work closely with faculty in an intimate and focused setting. These courses aim to intensify the intellectual experience of the freshman and sophomore years by allowing students to work with faculty members in a small group setting; introducing students to the variety and richness of academic topics, methods, and issues which lie at the core of particular disciplines; and fostering a spirit of mentorship between faculty and students. Over 200 faculty from more than 60 departments take part in the introductory seminars programs. The courses are given department credit and most count towards an eventual major in the field. Most also fulfill General Education Requirements (GERs).

Some faculty who have taught Freshman Seminars or Sophomore College volunteer to continue working with their students through a formal advising relationship during the students’ sophomore year.

**FRESHMAN SEMINARS AND SOPHOMORE SEMINARS AND DIALOGUES**

Freshman Seminars and Sophomore Seminars and Dialogues are offered in many disciplines throughout the academic year. Freshman preference seminars are typically given for 3-4 units to a maximum of 16 students, and generally meet twice weekly. Although preference for enrollment is given to freshmen, sophomores and first-year transfer students may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars and dialogues give preference to sophomores and first-year transfer students, but freshmen may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars are given for 3-5 units to a maximum of 14 students, while sophomore preference dialogues take the form of a directed reading, and are given for 1-2 units to a maximum of 5 students. All seminars require a brief application. For a list of introductory seminars offered in 2006-07, see the “Stanford Introductory Seminars” section of this bulletin. For an application or more information see the SIS annual course catalogue, published each September, or http://introsems.stanford.edu/.

**SOPHOMORE COLLEGE**

Sophomore College offers sophomores the opportunity to study intensively in small groups with Stanford faculty for several weeks before the beginning of Autumn Quarter. Students immerse themselves in a subject and collaborate with peers, upper-class sophomore assistants, and faculty in constructing a community of scholars. They are also encouraged to explore the full range of Stanford’s academic resources in workshops and individually. At its best, Sophomore College is characterized by an atmosphere of intense academic exploration. Each Sophomore College course enrolls twelve to fourteen students, who live together in a Stanford residence and receive two units of academic credit. Eligible students will have been enrolled for no more than three academic quarters; be sophomores in the Autumn Quarter during which the college is offered; be in good academic standing; and have completed at least 36 units of academic work by the end of the Spring Quarter preceding the college. Students must also have an on-campus housing assignment for the ensuing academic year. Admitted students who are found to have academic standing problems after the completion of Spring Quarter may have their admission revoked. The Sophomore College program fee covers tuition, room, board, books, and class-required travel. The total fee is $1300, but all students automatically receive an $800 scholarship. Each student pays the remaining $500, which is included in the University Bill. Students are also responsible for travel to campus (or to another site for some off-campus seminars), phone, network activation fees, and other personal expenses. Courses are announced in March, and applications are due in April. For a list of Sophomore College Seminars offered in 2006-07, see the courses in the “Stanford Introductory Seminars” section of this bulletin. For more information or to apply, see http://soco.stanford.edu/.

**FRESHMAN DEAN’S OFFICE**

Assistant Vice Provost and Dean of Freshmen and Transfer Students: Julie Lythcott-Haims

**OFFICES:** Sweet Hall, 1st floor and basement

**Phone for freshmen and transfer students:** (650) 723-7674

**Phone for parents:** (650) 725-0649

**Email:** frosh@stanford.edu

**Web Site:** http://frosh.stanford.edu/

The Freshman Dean’s Office welcomes and integrates freshmen into Stanford by providing programs, services, and assistance from acceptance of admission through the end of the first undergraduate year. It addresses students’ individual transitional needs, connects students to resources and opportunities, and cultivates an understanding of Stanford’s history and traditions. The office is also a resource for transfer students and parents.

**UNDERGRADUATE ADVISING AND RESEARCH**

**Director:** D. E. Lorraine Sterritt

**Managing Director:** Susie Brubaker-Cole

**Senior Associate Directors:** Renee Courrey, Brian Thomas

**Program Offices:** Sweet Hall, first and fourth floors

**Phones:** (650) 723-2426; (650) 724-7562

**Web Site:** Advising: http://uap.stanford.edu; Research: http://urp.stanford.edu

The Office of Undergraduate Advising and Research (UAR) coordinates advising for students who have not declared a major, and helps all students, freshmen through seniors, develop their scholarly interests, including their participation in the creation of new knowledge at Stanford.

**FRESHMAN AND SOPHOMORE ADVISING**

The UAR helps students develop their scholarly interests through broad academic explorations and the declaration of a major. Freshmen are assigned to academic advisers according to their preliminary academic interest and their residence. Some freshmen receive enhanced academic support through participation in Expanded Advising Programs (EAP). Most sophomores who are undecided about their majors continue to work with their advisers from the first year. Some sophomores participate in the Sophomore Mentoring Program (SMP), which matches faculty mentors with students who have shared intellectual interests through a freshman seminar or sophomore college class. By the end of the sophomore year, undergraduates must declare a major. In junior and senior years, students are advised by faculty from the major department or program.

The UAR coordinates with faculty, staff, and students (peer mentoring staff) to address students’ intellectual and developmental goals. The UAR staff includes professional advisers in Sweet Hall, Florence Moore, Stern, and Wilbur residence halls, and the Arillaga Family Recreation Center who meet with students individually to set academic goals and to devise strategies for achieving those goals. Because students’ academic plans vary considerably, UAR advising focuses on extended one-on-one interactions between students and their advisers. UAR works with students to review their academic performance, help them identify additional opportunities, and overcome obstacles to academic success. The staff also coordinates a comprehensive array of academic advising programs and services designed to support and supplement the undergraduate curriculum.

**FOUR-YEAR ADVISING**

The UAR staff provides advising to all students, freshmen through seniors. These UAR advisers offer students help when the academic adviser is unavailable or when additional advice is needed. The UAR professional staff work closely with academic departments to identify and support students who are seeking outlets for excellence, as well as those with potential
academic difficulty or who do not meet requirements for good academic standing. UAR staff work with any student to identify and overcome obstacles to academic success. Other UAR services include: assistance with curriculum planning; help with choosing a major; information on designing an individually designed major (IDM); advice on integrating research into an undergraduate program of study; academic and personal advising related to academic performance; and referrals to tutoring and learning skills, the Office of Accessible Education, and Counseling and Psychological Services. Reference guides to graduate and professional schools are available.

**SUPPORT FOR STUDENTS APPLYING FOR MERIT-BASED SCHOLARSHIPS AND FELLOWSHIPS, AND POST-BACCALAUREATE STUDIES**

UAR staff provide practical advice to Stanford undergraduates and recent graduates on how to prepare and apply for master’s and doctoral programs, and professional schools. Along with the Overseas Resource Center, UAR staff help students to compete for merit scholarships and post-baccalaureate fellowships. The UAR offers workshops and individual consultations on choosing a graduate or professional school and fellowship program such as in law or the health professions, writing personal statements, soliciting letters of recommendation, and speaking in interviews. The UAR also administers campus nomination competitions for the Goldwater, Udall, Beinecke, Center for the Study of the Presidency, Jack Kent Cooke, Carnegie, and Truman scholarships.

**UNDERGRADUATE RESEARCH**

The UAR sponsors and supports programs that encourage undergraduates to work closely and individually with faculty on research, advanced scholarship, and creative projects. Programs are designed to serve students who are new to research, as well as those with considerable research experience who are able to take on advanced, independent projects.

**STUDENT GRANT PROGRAMS**

The UAR offers research grants to registered Stanford undergraduates. Grants support faculty-mentored research projects, and are typically used to pay for the research supplies, travel, and room and board. For the 2006-07 academic year, students have access to five grant programs:

- **Quarterly Grants** provide for student projects that explore a topic of interest or contribute to the development of future intellectual pursuits. They are often used for smaller projects, preliminary research, and follow-up expenses associated with larger projects. Applications are considered in Autumn, Winter, and Spring quarters, and are usually due the fourth week of each quarter.

- **Major Grants** support larger projects that will normally span several quarters. Funded projects typically culminate in an honors thesis or some other substantial capstone product that demonstrates a focused and intellectually rigorous perspective on the topic of interest. Major Grant proposals are subjected to an intensive review process that includes critical input from faculty in the appropriate departments. Applications are considered only in the spring, and are usually due the first week of the spring quarter.

- **Chappell Lougee Scholarships** are available to sophomores pursuing projects in the humanities and social sciences. In addition to receiving a grant, recipients become members of a research and mentoring community that includes special events, preparation for a capstone project or honors, and fellowships and graduate school advising. Applications are usually due in the last week of classes in the Autumn Quarter.

- **Angel Grants** assist students in producing a finished public creative work such as an art exhibit, film, stage production, or concert. There is no deadline; applications are accepted on a revolving basis.

- **Conference Travel Grants** support students who have been invited to present their research at a professional or scholarly conference. The grants fund travel expenses to and from the conference, and normal conference registration. Students demonstrating financial need may also include conference-associated food and lodging in their budget. These applications are accepted on a revolving basis.

The application for any student grant consists of (1) a student-authored project proposal, including a line-item budget, and (2) a letter of support written by a qualifying member of the Stanford faculty. UAR may also consult student transcripts as well as outside faculty reviewers. Proposals are judged on intellectual significance, rigor and feasibility of project design, and evidence of student preparedness.

Major Grant and Chappell Lougee Scholarship recipients may include a stipend within their budget if they are dedicating full-time to their project over the Summer Quarter. These students may also request additional funding to help meet the Financial Aid Office’s expected student contribution.

UAR also provides advising support for students considering a research grant. UAR staff members offer proposal writing and project design consultation as well as advice on administrative policies. Students can view sample proposals at the UAR office. For more information see the web site.

**DEPARTMENTAL AND FACULTY SPONSORED RESEARCH OPPORTUNITIES**

Departments, interdisciplinary programs, and Stanford research centers may apply through the UAR office for VPUE Departmental Grants for Undergraduate Research to support programs that provide undergraduates with close mentorship and training in scholarship and research. Typically, departments pair students with a faculty member or faculty-led research group according to their mutual scholarly interests. Students conduct substantive, directed research on a particular aspect of the faculty’s research project, and they meet frequently with their faculty mentors to discuss progress and future directions for the project. The official request for proposals may be found on the faculty resources section of the UAR web pages. Students should check with UAR staff to determine which departments and centers currently sponsor research programs.

Individual faculty members may also apply through the UAR office for VPUE Faculty Grants for Undergraduate Research. Faculty Grants provide funding for undergraduates to work closely with faculty on a directed research project. Typical student research activities include conducting literature reviews, developing and conducting research surveys, collecting and analyzing data, aiding in the development of course materials, and conducting laboratory experiments. Faculty determine student participation in this program, so students should contact departments and faculty for more information. Faculty may obtain the official request for proposals on the faculty resources section of the UAR web site.

**SUMMER RESEARCH COLLEGE**

Summer Research College (SRC) is a residential program directed by UAR for students engaged in faculty-mentored research endeavors on campus over the summer.

SRC aims to foster close intellectual and social contact among students and faculty in an interdisciplinary residential community. During the day, students work with their faculty advisors or research groups campus-wide. In the evenings and on weekends, they have opportunities to share in research discussions, dinners with faculty guests, social and cultural activities, and other informal gatherings with fellow researchers.

SRC is not a source of funding for student research; it is a residential program intended to enrich undergraduates’ summer research experience. Residents of SRC obtain funding through UAR and non-UAR funding programs. For more information about SRC, including registration procedures and college policies, see the UAR web site at http://urp.stanford.edu.

**BING HONORS COLLEGE**

The Bing Honors College brings students who are writing honors theses to campus in September before the start of the regular school year for a program of group and major-based activities. By concentrating solely on the thesis for nearly three weeks, the college participants begin the senior year with a commitment to independent scholarship in an atmosphere of shared intellectual purpose. The college sponsors crossdisciplinary forums, such as writing workshops and methodology panels, as well as residential activities, such as cultural and social outings, and a celebratory concluding event to which students invite their research advisors. Students participating in the college receive room and board, and access to computers.
STUDENT AFFAIRS

Vice Provost for Student Affairs: Greg Boardman
Web Site: http://www.stanford.edu/dept/vpsa/

Student Affairs supports the academic mission of the University by fostering a climate conducive to living and learning in a diverse community. The division encompasses programs and services for undergraduates and graduate students which include the Office of Residential Education, the University Registrar, the Vaden Health Center, the Career Development Center, the Office of Accessible Education, the Graduate Life Office, Judicial Affairs, Bechtel International Center, Asian American Activities Center, Black Community Services Center, El Centro Chicano, LGBT Community Resources Center, Native American Cultural Center, Women’s Community Center, and the Office of Student Activities. The Vice Provost for Student Affairs reports directly to the Provost and is responsible for providing leadership, policy direction, administrative support for budget, personnel, facilities, and development, as well as oversight of the efficiency and effectiveness of each of the division’s units. The Vice Provost interacts with the President, the Provost, the University Cabinet, faculty, schools, department representatives, students, and parents. The Vice Provost also serves as an ex officio member of the Senate of the Academic Council.

OFFICE OF ACCESSIBLE EDUCATION (OAE)

Offices: 563 Salvatierra Walk
Phone: (650) 723-1066; TDD (650) 723-1067
Web Site: http://www.stanford.edu/group/OAE/

The Office of Accessible Education provides services and resources to students with disabilities through its four primary centers.

STUDENT DISABILITY RESOURCE CENTER (SDRC)

The SDRC coordinates academic and other accommodations for undergraduates and graduate students who have disabilities including mobility impairments, chronic illness, sensory disabilities, learning disabilities, and psychological disabilities. The center’s goal is to enable students with disabilities to participate fully in the educational experience at Stanford while meeting the academic standards maintained by the university.

In accordance with the provisions of the Americans with Disabilities Act of 1990 and Section 504 of the Rehabilitation Act of 1973, the SDRC offers an array of accommodations and auxiliary aids and services to students with documented disabilities. Direct support services include, but are not limited to, notetaking, Braille, oral or sign language interpretation, stenocaptioning, books on tape or electronic text, examination accommodations, and special housing arrangements. During the academic year, the SDRC runs a golf cart service called DisGo Cart for use by students who have temporary and permanent mobility impairments or who use a wheelchair. To arrange for an on-campus ride call 725-2484 (5-CHUG).

ASSISTIVE LEARNING TECHNOLOGY CENTER (ALTEC)

ALTeC is the technology arm of the OAE. It provides resources to make information technology and education more accessible for those with disabilities, such as accessible PC and Mac computer workstations, speech recognition and screen reading software, alternative input devices, and numerous non-computer accommodations.

SCHWAB LEARNING CENTER

The Schwab Learning Center offers enhanced services specifically for students with learning differences (LD) and attention deficit hyperactivity disorder (ADHD). Among these services are screening assessments for learning differences, individual learning strategy sessions, and tutoring in various academic disciplines.

CENTER FOR UNIVERSAL DESIGN IN EDUCATION

Application of the principles of universal design for instruction (UDI) represents a new approach to teaching that promotes proactive design and use of inclusive instructional practices that benefit all students. The center seeks to advance the development of instructional methods, tools, and strategies that are flexible, customizable, and accessible to students from different backgrounds, learning styles, abilities, and disabilities in a variety of learning contexts.

CAREER DEVELOPMENT CENTER

Center Office: 563 Salvatierra Walk
Web Site: http://cardinalcareers.stanford.edu

Counseling Services—Monday, Tuesday, Wednesday, and Friday, 9 a.m. to 12 noon, 1 p.m. to 5 p.m., Thursday, 9 a.m. to 12 noon, 1 p.m. to 6 p.m.; (650) 725-1789.

Employment Services—Monday to Friday, 8:15 a.m. to 4:30 p.m.; (650) 723-9014.

Reference File Services—Monday to Friday, 9 a.m. to 12 noon, 1 p.m. to 3 p.m.; (650) 723-1548.

The Career Development Center (CDC) offers a wide range of services from counseling, workshops, and presentations to on-campus recruiting, job/internship databases, reference file services, library resources, and alumni networking, to help students make informed decisions and to plan for life after Stanford.

Services are open to undergraduates and graduate students, and all students are encouraged to visit in person or via the web. Programs and services are free to students; limited services are available to alumni and student spouses and domestic partners.

The following suggestions may assist in using the CDC to best benefit:

• Visit early in a Stanford career.
• Gather general career information through the career resource library, job/internship database, handouts, and alumni network.
• Inquire about individual counseling for all stages of career planning and development.
• Participate in workshops and other programs to clarify career goals.
• Use the Cardinal Recruiting Program as a convenient way to interview with employers; or use the Reference File Service to ease the management of applications for graduate school or employment.

COMMUNITY CENTERS

There are six ethnic and community centers that support students who seek services associated with a particular group or community. Each center has its own site and professional staff who advise and counsel students.

In addition, the centers sponsor programs throughout the year that foster intellectual, personal, and cultural growth. Detailed information is available on the following web sites:

• Asian American Activities Center: http://www.stanford.edu/group/a3c/
• Black Community Services Center: http://www.stanford.edu/dept/BCSC/
• El Centro Chicano: http://www.stanford.edu/dept/elcentro/
• LGBT Community Resources Center: http://www.stanford.edu/QR/
• Native American Cultural Program: http://www.stanford.edu/dept/nace/
• Women’s Center: http://www.stanford.edu/group/womenscntr/
GRADUATE LIFE OFFICE

The Graduate Life Office (GLO) works with students on and off campus and with student groups, including Community Associates (student residence staff), the Graduate Student Programming Board, and the Graduate Student Council, to create an inclusive environment through programs in the residences and campus-wide. The recently constructed Graduate Community Center (GCC) serves as a centrally-located focal point for meetings and activities in the graduate community.

The GLO staff also works with individual students who need information and support or who may be experiencing personal difficulties. Staff members are knowledgeable about and have access to support and resources available throughout the University.

HAAS CENTER FOR PUBLIC SERVICE

The Haas Center for Public Service connects academic study with community and public service to strengthen communities and develop effective public leaders. The Center aspires to develop aware, engaged, and thoughtful citizens who contribute to the realization of a more just and humane world.

To accomplish these objectives, the center collaborates with associated units at Stanford to implement programs in five areas of work. Through the center’s fellowship programs, undergraduates perform summer internships in nonprofit organizations, foundations and government agencies locally, nationally, and internationally. Postgraduate fellowships allow graduating seniors to work with a mentor in a nonprofit or public agency for a year.

With support from the center, Stanford faculty members have created service-learning courses that involve Stanford students in providing direct service and community-based research efforts in collaboration with local schools and other partner agencies. The center’s Public Service Scholars Program supports seniors writing honors theses that combine academic and thoughtful citizens who contribute to the realization of a more just and humane world.

STUDENT CONDUCT

Students at Stanford are expected to know, understand, and abide by the Fundamental Standard, which is the University’s basic statement on behavioral expectations articulated in 1896 by Stanford’s first President, David Starr Jordan, as follows:

THE FUNDAMENTAL STANDARD

Judicial Affairs and Student Conduct
“Students are expected to show both within and without the University such respect for order, morality, personal honor, and the rights of others as is demanded of good citizens. Failure to do this will be sufficient cause for removal from the University.”

Actions that have been found to be in violation of the Fundamental Standard include:

- Physical Assault
- Property Damage
- Forgery
- Theft
- Sexual harassment or other sexual misconduct
- Misrepresentation in seeking financial aid, University housing, University meals, or other University benefits
- Driving on campus while under the influence of alcohol
- Misuse of computer equipment or email
- Sending threatening or obscene messages

There is no standard penalty which applies to violations of the Fundamental Standard. Penalties range from a formal warning to expulsion. Each case is fact specific; considerations include the nature and seriousness of the offense, the motivation underlying the offense, and precedent in similar cases.

THE HONOR CODE

The Honor Code is the University’s statement on academic integrity. It is essentially the application of the Fundamental Standard to academic matters. Provisions of the Honor Code date from 1921, when the honor system was established by the Academic Council of the University Faculty at the request of the student body and with the approval of the President. The Honor Code reads:

“A. The Honor Code is an undertaking of the students, individually and collectively:

1) that they will not give or receive aid in examinations; that they will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading;

2) that they will do their share and take an active part in seeing to it that others as well as themselves uphold the spirit and letter of the Honor Code.

B. The faculty on its part manifests its confidence in the honor of its students by refraining from proctoring examinations and from taking unusual and unreasonable precautions to prevent the forms of dishonesty mentioned above. The faculty will also avoid, as far as practicable, academic procedures that create temptations to violate the Honor Code.

C. While the faculty alone has the right and obligation to set academic requirements, the students and faculty will work together to establish optimal conditions for honorable academic work.”

Examples of conduct that have been found to be in violation of the Honor Code include:

- Copying from another’s examination paper or allowing another to copy from one’s own paper
- Unpermitted collaboration
- Plagiarism
- Revising and resubmitting a quiz or exam for regrading without the instructor’s knowledge and consent
- Representing as one’s own work the work of another
- Giving or receiving aid on an academic assignment under circumstances in which a reasonable person should have known that such aid was not permitted

For more information, see the Interpretations and Applications of the Honor Code at http://www.stanford.edu/dept/vpsa/judicialaffairs/guiding/honorcode.int.htm. The standard penalty for a first offense is a one quarter suspension from the University and 40 hours of community service. In addition, many faculty members issue a “No Pass” for the course in which the violation occurred.

OFFICE OF RESIDENTIAL EDUCATION

Web Site: http://www.stanford.edu/dept/resed/

The Office of Residential Education is responsible for developing the policies, programs, and staffing which support the intellectual, educational, and community-building activities in student residences. The Residential Education program provides Stanford undergraduates with a small community experience within a large research university. Programs extend the classroom into the residences and complement the academic curriculum with activities and experiences essential to students’ preparation for life in a global society. An extensive network of staff, including many that live in the residence halls, supports students during their undergraduate careers.

OFFICE OF STUDENT ACTIVITIES

Web site: http://www.stanford.edu/dept/OSA/

The Office of Student Activities supports student activities, nearly 600 student organizations, the ASSU, and sororities and fraternities through such as publications, workshops, one-on-one consultation, and major event planning support. The OSA also provides fundraising expertise for student groups and leadership opportunities for students.

VOLUNTARY STUDENT ORGANIZATIONS

At its March 1963 meeting, the Board of Trustees adopted the following policy:

“Students are encouraged to study, discuss, debate, and become knowledgeable about contemporary affairs. Expressing opinions or taking positions with respect to these matters is up to the individual students or to volunteer groups of students so constituted that they are authorized to speak for their members. This is not a function of student government at Stanford.

“All students are required to become members of the Associated Students of Stanford University, which represents them with respect to student affairs on the Stanford campus. The student government, under this policy, is not authorized to speak for students on other matters.

“Under such regulations as may be established from time to time by the President of the University, students may form voluntary organizations constituted to speak for their members with respect to matters outside the scope of student government, provided such organizations clearly identify themselves and, in any public statements, make it clear that they do not represent or speak for the University or the Associated Students.

“Any questions concerning the interpretation and application of this policy shall be resolved by the President of the University.”

Voluntary student organizations are those organizations: (1) in which membership is not mandatory and is nondiscriminatory, (2) in which membership is both open and limited to current Stanford students registered in a degree-granting program, (3) in which students make all organizational decisions, and (4) whose purposes and procedures are consistent with the goals and standards of the University. In order to use University facilities, the Stanford name, or to receive ASSU funding, all voluntary student organizations must register with the University through the Office of Student Activities on the second floor of Tresidder Memorial Union.

As a condition of registration, each voluntary student organization must file and have approved each of the following:

1. A statement of purpose and organizational constitution.
2. A statement about membership eligibility.
3. Clear procedures for officer elections.
4. Identification of the authorized representative of the group, who must be a currently registered student, and at least five active members in the organization who are currently registered students.
Each voluntary student organization must renew its registration with the University annually, early in Autumn Quarter, by submitting new registration materials.

If a voluntary student organization that is registered with the University seeks to use University facilities for meetings open to more than its own members and to specifically invited guests, such meetings shall be subject to the regulations of the Committee on Public Events. All organization events held in University facilities must receive event approval from the Office of Student Activities and Stanford Events.

A voluntary student religious organization may hold open meetings in University facilities only with the approval of the Dean of the Chapel.

A registered voluntary student organization may advocate publicly a position on a public issue, provided the organization clearly identifies itself, and provided such an organization in any public statement makes clear it does not represent or speak for the University or for the Associated Students.

No student group may use University space or facilities or receive other University support for purposes of supporting candidates for public office. Groups may use public places such as White Plaza for tables, speeches, and similar activities; may have intermittent use of on-campus meeting rooms; and may request to reserve auditoriums and similar space for public events including speeches by political candidates as long as all University guidelines are followed.

**TRESIDDER MEMORIAL UNION**

Tresidder Memorial Union (TMU) is a center of community activity on the Stanford campus. It houses a variety of food services; meeting rooms for special occasions; a ticket office, a campus information center; branch offices and ATMs for the Stanford Federal Credit Union, and Wells Fargo; ATMs for Bank of America; a fitness center; and a hair styling shop. Tresidder Express carries groceries, magazines, and sundries.

TMU is also the home of the Associated Students of Stanford University (ASSU), the Dean of Students Affairs Office, Judicial Affairs, and the Office of Student Activities.

**VADEN HEALTH CENTER**

*Center Office*: 866 Campus Drive  
*Web Site*: http://vaden.stanford.edu

The Allene G. Vaden Health Center strictly protects the confidentiality of information obtained in medical care and counseling.

**MEDICAL SERVICES**

Medical Services (650-498-2336, ext. 1) is the first stop for diagnosis and treatment of illness, injury, and ongoing conditions, as well as preventive counseling and education. Services (without charge) include:

- Medical appointments in general medicine and sports medicine.
- Medical advice for routine concerns throughout the day. When Medical Services is closed, advice for urgent conditions is available from our on-call physician.
- Referral to specialists, primarily at Stanford Hospital and Clinics and Menlo Medical Clinic.
- Additional services (fees may apply): allergy injections, immunizations, travel services, physical exams for employment and scholarships, HIV testing, laboratory, X-rays, pediatric immunizations (academic year only), drug screening (academic year only).
- Pharmacy (650-498-2336, ext. 3) and physical therapy (650-723-3195) are available on site.

**COUNSELING AND PSYCHOLOGICAL SERVICES (CAPS)**

CAPS (650-723-3785) helps students who experience a wide variety of personal, academic, and relationship concerns. Services (without charge) include:

- Evaluation and brief counseling, including personal, couples and group therapy. Students requesting or requiring longer, ongoing therapy incur fees.
- Workshops and groups that focus on students’ social, personal and academic effectiveness.
- Crisis counseling for urgent situations 24 hours a day.
- Consultation and outreach to faculty, staff, and student organizations.

**YWCA SEXUAL ASSAULT CENTER AT STANFORD**

The YWCA Sexual Assault Center at Stanford assists students, staff, faculty and other Stanford campus affiliates who are victims of sexual assault. Located on the first floor of Vaden Health Center, it is open by appointment or drop-in office hours, Monday and Wednesday, 2:00-4:00 PM, and Tuesday and Thursday, 3:00-5:00 PM. The center also can be reached at its 24-hour campus telephone line (650) 725-9955.

**HEALTH PROMOTION SERVICES**

Health Promotion Services (650-723-0821) educates and supports students to help them make informed, healthy decisions about their lifestyle. Services include:

- Individual preventive counseling and resource referral concerning nutrition, weight management, eating and body image, alcohol, tobacco and other drug use, sexual assault and harassment, relationships, intimacy and gender issues, and sexual health.
- Health education speakers, programs, and events and workshops at student residences, community centers, student organizations, and for new students (such as Real World: Stanford).
- Academic courses and internships.
- Student groups and volunteer opportunities including Peer Health Educators, HIV Peer Anonymous Counseling and Testing (HiV LAPCT), Sexual Health Peer Resource Center (SHPRC), and CPR/First Aid classes.

**HEALTH INSURANCE**

All registered students are required to have health insurance. Call (650) 723-2135 for more information. Cardinal Care, a University-sponsored plan for students, fulfills this requirement. Insured by The Chickering Group, an Aetna Company (medical), and ValueOptions (mental health). Cardinal Care features comprehensive, worldwide coverage, services by referral at Stanford University Medical Center and Menlo Medical Clinic, and lowest costs when one initiates care at Vaden Health Center. Stanford does not sponsor a health insurance plan for dependents; for available options, see [http://vaden.stanford.edu/resources.html](http://vaden.stanford.edu/resources.html). Options for voluntary dental insurance are also offered.
Community Service Officers (CSOs)

The Stanford Department of Public Safety is a full service police department that operates 24 hours a day, 7 days a week. For police, fire, or ambulance response, dial 9-1-1, or 9-9-1-1 from a University phone. Emergency assistance can also be obtained by using one of the nearly 100 Blue Emergency Phone Towers strategically placed around campus.

The department is comprised of the following divisions:

The Field Services Division consists of sworn and non-sworn officers who patrol the campus and respond to calls for service. Sworn officers receive their police powers through the Santa Clara County Sheriff’s Office. Sworn officers have the legal authority to stop vehicles, make arrests, and enforce all laws. Non-sworn officers assist the sworn officers with security patrols, evidence collection, crime prevention presentations, and other assigned tasks.

Community Service Division: Community Service Officers (CSOs) enforce the parking rules and regulations on campus, and provide traffic control at special events, construction zones, and accident scenes. CSOs also provide building security during emergency or critical incidents.

The Support Services Division provides logistical, technical, and accounting support to the department. Special events are handled through this division as well. Special Events Personnel (SEPs) provide security at

OTHER SERVICES AND PROGRAMS

BOOKSTORE

Web Site: http://www.stanfordbookstore.com

Organized in 1897, Stanford Bookstore, (650) 329-1217, located at 519 Lasuen Mall, provides a diverse selection of books, course materials, and supplies to the students, faculty, staff, and community in and surrounding Stanford. The bookstore carries over 130,000 titles, including a wide selection of books written by Stanford authors, making it one of the largest bookstores in the nation. The bookstore also carries a complete selection of Stanford logo apparel, gifts and souvenirs, periodicals, and a café that provides an enhanced shopping experience. The Computer Store, in the main branch, sells academically priced computer hardware and software. Other services include shipping of purchases, gift cards, book buyback, fax service, postage stamp sales, an ATM, and Enterprise Rent-A-Car hotline.

There are five branches in addition to the Stanford Bookstore that also serve the community: the Stanford Professional Bookstore Palo Alto, (650) 614-0280, which carries medical and technical books, supplies, stationery, medical instruments, bestsellers, computers, gifts, and clothing; the Track House Sports Shop, (650) 327-8870, at the corner of Campus Drive and Galvez Street, is the headquarters for Stanford Athletic Gear; Tresidder Express convenience store in Tresidder Union; the Stanford Shop, (650) 614-0295, at the Stanford Shopping Center, provides Stanford apparel; and the Bookshop, (650) 725-2775, at the Cantor Center for the Arts, carries books on the arts, fine gifts, apparel, and jewelry.

STANFORD CONFERENCE SERVICES

Phone: (650) 723-3126
Email: conferenceinquiries@stanford.edu
Web Site: http://conference.stanford.edu

A conference is defined as any student or adult group that convenes for part of a day (including a luncheon), overnight, or for several days, outside the regular or summer academic sessions for registered students. Policies concerning conferences are the responsibility of the offices of the President and the Provost.

To make arrangements for holding a new summer conference during the mid-June through Labor Day time frame, contact Stanford Conference Services by phone or email as listed above. For conferences occurring immediately after Labor Day through early June, contact non-academic facilities scheduling in the Office of the University Registrar, (650) 723-6755, or email reg-events@stanford.edu.

External organizations interested in meeting at Stanford must obtain sponsorship from a University department. Conferences initiated by University departments or external organizations must demonstrate consistency with the University’s academic mission. For summer conferences, the sponsoring department submits its proposal to the Director of Stanford Conference Services for review in terms of available facilities and for the approval of the President’s Office. At least half of the participants in any summer conference at Stanford hosted by an external organization must be housed in Stanford’s campus residences and participate in daily meal plans provided by Stanford Dining. On-campus residential housing and dining services are normally available from the Sunday following Commencement through Labor Day.

Stanford Conference Services provides online and on-site conference registration services for University departments on a year-round basis.

Summer conference groups should contact Stanford Conference Services concerning arrangements for tables, chairs, audiovisual aids, signage, and other equipment. During the academic year, housing arrangements for University-sponsored visitors can be made through the SLAC Guest House; see http://slacgghost.stanford.edu or phone (650) 926-2800.

OMBUDS

Stanford University Ombuds: David Rasch
Ombuds Office: Mariposa House, 585 Capistrano Walk
Phone: (650) 723-3682
Mail Code: 94305-8200
Email: rasch@stanford.edu
Web Site: http://www.stanford.edu/dept/ocr/ombuds/

School of Medicine Ombuds: Martha McKee
Email: martha.mckee@stanford.edu

The charge to the Ombuds office at Stanford is: “The Ombudsperson’s task is to protect the interests and rights of members of the Stanford community from injustices or abuses of discretion, from gross inefficiency, from unnecessary delay and complication in the administration of University rules and regulations, and from inconsistency, unfairness, unresponsiveness, and prejudice in the individual’s experience with University activities. The Ombudsperson’s office exists to receive, examine, and channel the complaints and grievances of members of the Stanford community, and to secure expeditious and impartial redress.”

Any troublesome matter in the University community may be discussed in confidence with the University Ombuds. Services of the office are available to students, staff, and faculty.

Although possessing no decision making authority, the Ombuds has wide powers of inquiry. The Ombuds refers matters to the proper person or office expeditiously and also provides conflict resolution services. For the role of the office of the Ombuds in cases of sexual harassment, see the “Non-Academic Regulations” section of this bulletin.

POLICE SERVICES

Department Office: Corner of Campus Drive and Serra Street
Phone: (650) 723-9633
Web Site: http://police.stanford.edu

The Stanford Department of Public Safety is a full service police department that operates 24 hours a day, 7 days a week. For police, fire, or ambulance response, dial 9-1-1, or 9-9-1-1 from a University phone. Emergency assistance can also be obtained by using one of the nearly 100 Blue Emergency Phone Towers strategically placed around campus.

The department is comprised of the following divisions:

The Field Services Division consists of sworn and non-sworn officers who patrol the campus and respond to calls for service. Sworn officers receive their police powers through the Santa Clara County Sheriff’s Office. Sworn officers have the legal authority to stop vehicles, make arrests, and enforce all laws. Non-sworn officers assist the sworn officers with security patrols, evidence collection, crime prevention presentations, and other assigned tasks.

Community Service Division: Community Service Officers (CSOs) enforce the parking rules and regulations on campus, and provide traffic control at special events, construction zones, and accident scenes. CSOs also provide building security during emergency or critical incidents.

The Support Services Division provides logistical, technical, and accounting support to the department. Special events are handled through this division as well. Special Events Personnel (SEPs) provide security at
campus events including athletic events, concerts, student-sponsored events, and dignitary visits. SEPs are available for hire by groups needing security at their University events. Contact the special events office at (650) 723-4924, or email event_security@stanford.edu, for more information.

The Administrative Support Division supports the department through training, recruiting, payroll, human resources, and other business functions.

For additional safety information or to view the yearly crime statistics, see the Stanford Safety and Security Almanac, available free from Public Safety, or see http://police.stanford.edu.

OFFICE FOR RELIGIOUS LIFE

Office: Memorial Church
Phone: (650) 723-1762
Web Site: http://religiouslife.stanford.edu

The mission of the Office for Religious Life is to guide and enhance spiritual, religious, and ethical life within the Stanford University community. Multifaith exploration and dialogue, central in Stanford’s history from its founding, is a vital part of both its ethos and education.

The Deans for Religious Life oversee and provide support for Stanford Associated Religions (S.A.R.), approximately thirty religious organizations invited to offer their spiritual services to the campus. The deans are committed to welcoming students of all genders and sexual identities, all religious and non-religious traditions, and all cultural backgrounds. They strive to ensure that students, faculty, and staff have access to honest and supportive contexts in which to pursue their spiritual journeys on the Stanford campus.

STANFORD ALUMNI ASSOCIATION

Web Site: http://www.stanfordalumni.org
Phone: (800) 786-2586 or (650) 723-2021

The Stanford Alumni Association seeks to serve all Stanford alumni and students by offering programs and services such as reunions, regional events, Stanford magazine, online services, volunteer and learning opportunities, and the alumni directory.

The Stanford Alumni Association Student Outreach department provides students with networking forums, celebratory and social events, and special programs to assist in meeting the needs of college life and transitions after graduation. Student Outreach also seeks to foster classmate and student/alumni connections and develop programs that leverage a community of 200,000 students, alumni, and faculty worldwide. Networking programs include Student-Alumni Connection Lunches and Dinners that take place at alumni homes and businesses. An alumni speaker series for undergraduates and graduate students also brings alumni to campus for conversations about how Stanford has impacted their lives. Special recognition programs include: the J.E. Wallace Sterling Award which recognizes a graduating senior who has demonstrated service to the University and potential for continued service to the University; the Robert L. Pierce Memorial Award which provides funding to a student or student group for a creative project that serves the student community; and Cardinal Class Core, a program for graduating seniors who have demonstrated outstanding leadership and involvement as students and who intend to become active alumni volunteers. Celebratory events include a homecoming tailgate for current students and senior-only events such as Senior Send-Off, Dinner on the Quad, and a graduation party. Seniors, graduate students, and their families are also invited to A Salute to Stanford Graduates, a class day lecture, and a graduation picnic. For more information on student programs and services, see http://www.stanfordalumni.org.students.

STANFORD EVENTS

Stanford Events supports the mission and goals of Stanford University through open engagement of the campus community and the worldwide public. The department has three divisions: Public Events, Stanford Lively Arts, and the Stanford Ticket Office.

Public Events oversees, advises, and produces University events and ceremonies as designated by the President’s office such as: Commencement, Baccalaureate, the University President’s inaugurations, New Student Orientation Convocation, Community Day/Founders’ Celebration, and other high-profile university events. This division also serves in an advisory capacity to the schools, departments, and student groups on campus, and oversees University policy and procedure regarding campus events. The Public Events office has final approval authority of Stanford facility and open space use for non-academic public events on campus. For information about University event planning, policies, procedures, and University facilities, see http://stanfordevents.stanford.edu, or call (650) 723-2551.

Stanford Lively Arts, the University’s presenting program, annually brings to campus a full season of music, dance, and theater by world-famous artists and exceptional newcomers. It furthers research and creativity through world premieres, collaborations, and commissions. In addition to on-stage performances, Lively Arts extends and supplements the academic life of the University through master classes, extended residencies, workshops, lectures and demonstrations, and group discussions. Internationally acclaimed artists perform serious work with Stanford students in classrooms as well as in residence halls. Discounts on performances are available for faculty, staff, and students. For tickets and more information, see http://livelyarts.stanford.edu, or call (650) 725-ARTS (2787).

Stanford Ticket Office provides ticketing services for the arts and entertainment events of Stanford University. Tickets for Stanford Lively Arts, Stanford music and drama departments, Stanford Jazz Workshop/Festival, and the ASSU Concert Network are among the event tickets that are available through this office. For more information, see http://tickets.stanford.edu, or call (650) 725-ARTS (2787).

AWARDS AND HONORS

FACULTY AND STAFF AWARDS

KENNETH M. CUTHBERTSON AWARD

The Kenneth M. Cuthbertson Award was established in 1981 to recognize of exceptional service to Stanford University. It was established by members of the faculty who wish to remain anonymous. All members of the Stanford community are eligible for the award; the sole criterion is the quality of the contribution that the recipients have made to the University. The award provides a way of honoring members of the staff and faculty for their efforts on behalf of the University.

Ordinarily, one award is made each year. The award was first presented in 1981 to the person for whom it is named. Kenneth M. Cuthbertson was one of the early architects of Stanford’s long-term financial planning and fundraising program. His service to Stanford set an enduring standard for those who will come after him. The award is made annually at the University Commencement Ceremony.

LOYD W. DINKELSPIEL AWARDS

The Lloyd W. Dinkelspiel Awards recognize distinctive and exceptional contributions to undergraduate education at Stanford University. The two principal awards are made to the faculty or staff members adjudged to have made the most distinctive contribution to the development and enrichment of undergraduate education in its broadest sense. Two awards are also made to graduating seniors who combine academic achievement with effective contributions to undergraduate student life. Preference is given to service in the School of Humanities and Sciences in the area of liberal education. The awards are made from an endowment fund established in memory of Lloyd W. Dinkelspiel, a Stanford alumnus and trustee. The awards are made annually at the University Commencement Ceremony.
WALTER J. GORES AWARDS

The Walter J. Gores Faculty Achievement Awards for excellence in teaching were established by bequest of Walter J. Gores, Stanford Alumnus of the Class of 1917 and a professor at the University of Michigan for 30 years. Teaching is understood in its broadest sense and includes, in particular, lecturing, leading discussions, tutoring, and advising at the undergraduate or graduate levels. Any member of the teaching staff of the University is eligible for an award, including all faculty of professorial rank, instructors, lecturers, teaching fellows, and teaching and course assistants. Ordinarily, awards are made to a senior faculty member (associate or full professor) or senior lecturer; a junior faculty member or member of the teaching staff; and a teaching assistant (graduate or undergraduate student). The awards are made annually at the University Commencement Ceremony.

ALLAN COX MEDAL FOR FACULTY EXCELLENCE FOSTERING UNDERGRADUATE RESEARCH

The Allan Cox Medal for Faculty Excellence Fostering Undergraduate Research is awarded annually to a faculty member who has established a record of excellence directing undergraduate research over a number of years. It may also go to a faculty member who has done an especially outstanding job with just one or two undergraduates who have demonstrated superior work. The medal was established in memory of the former professor of Geophysics and Dean of the School of Earth Sciences, a strong supporter of faculty-student research collaboration.

HERBERT HOOVER MEDAL FOR DISTINGUISHED SERVICE

David Starr Jordan’s firm belief that every academic degree should represent work actually done in or under the direction of the institution granting it has meant that, since its founding, Stanford has awarded no honorary degrees. As a means of recognizing extraordinary individuals who deserve special acknowledgment, the Stanford Alumni Association in 1962 voted to establish the Herbert Hoover Medal for Distinguished Service. The name pays tribute to the former President’s example of service to his University, to his country, and to the cause of world humanitarianism. Indeed, Mr. Hoover was the first award recipient. The gold medal is presented following selection by an anonymous committee appointed by the Chair of the Board of Directors of the Alumni Association.

STUDENT AWARDS

BOOTHE PRIZE FOR EXCELLENCE IN WRITING

Awarded during the freshman year, the Boothe Prize recognizes excellence in writing. Students are selected for this honor on the basis of essays written for courses fulfilling the Introduction to the Humanities or Writing and Rhetoric requirements. The prize is named for Mr. and Mrs. D. Power Boothe, Jr., whose gifts to the University reflect their interest in the humanities.

PRESIDENT’S AWARD FOR ACADEMIC EXCELLENCE IN THE FRESHMAN YEAR

The President’s Award honors students who have exceptionally distinguished academic records that exemplify a strong program of study in the freshman year. Students eligible for the award normally have completed Writing and Rhetoric and Introduction to the Humanities requirements during their first year at Stanford.

DEANS’ AWARD FOR ACADEMIC ACHIEVEMENT

The Deans of Earth Sciences, Engineering, and Humanities and Sciences recognize from five to ten undergraduate students each year for their academic endeavors. Honorees are cited for noteworthy accomplishments which represent more than a high grade point average or success in course work. Faculty nominate students who have exceptional tangible achievements in classes or independent research, national academic competitions, a presentation or publication for a regional or national audience, or exceptional performance in the creative arts.

FIRESTONE MEDAL FOR EXCELLENCE IN RESEARCH

The Firestone Medal is awarded to seniors in recognition of excellence in undergraduate research. Departments in the School of Humanities and Sciences nominate students who have completed outstanding honors projects in the social, physical, and natural sciences.

ROBERT M. GOLDEN MEDAL FOR EXCELLENCE IN THE HUMANITIES AND CREATIVE ARTS

The Golden Medal recognizes outstanding achievement in the humanities and the creative arts. Seniors receive these medals upon nomination by their major department.

HOEFER PRIZE FOR EXCELLENCE IN UNDERGRADUATE WRITING

The Hoefer Prize recognizes students and faculty for their work in courses that meet the University Writing Requirement for writing in the major. Prizes are awarded in each of the five areas of the undergraduate curriculum: humanities, social sciences, natural sciences, engineering, and earth sciences.

FREDERICK EMMONS TERMAN ENGINEERING SCHOLASTIC AWARD

The School of Engineering annually presents the Terman Award to seniors for outstanding academic achievement. The awardees share their award with a high school teacher of their nomination.

PHI BETA KAPPA

Phi Beta Kappa is a nationwide society honoring students for the excellence and breadth of their undergraduate scholarly accomplishments. Membership in the Stanford Chapter (Beta of California) is open to undergraduates of all majors. To be elected to Phi Beta Kappa at Stanford, a student must achieve academic distinction in the major as well as in courses across a broad range of fields.

Approximately a tenth of the members of a graduating class are elected to Phi Beta Kappa. Of this number, about one fifth are chosen in their junior year, the remainder in their senior year. The chapter’s election guidelines define breadth of study as excellence beyond the major field. To be considered for election, a student must have taken at least three courses of 3 units or more at Stanford by the time elections are held early in the Spring Quarter with a letter grade of ‘B-’ or better in each of the following three major domains of knowledge: humanities; science, engineering, and math; and social sciences. Students who transfer in their junior year must have taken at least two courses at Stanford in two of the major domains and at least one course in the third domain, and must have completed a minimum of 75 units of academic work at Stanford by the end of Winter Quarter. Students who transfer in their sophomore year must have taken at least two courses at Stanford in each of the major domains.

There is no direct correlation between Stanford University General Education Requirements (GER) and Phi Beta Kappa breadth requirements. The elections committee analyzes the content of individual courses to determine which major domain requirement they may satisfy. I-HUM, PWR, and first-year language courses do not satisfy the PBK breadth criterion.

A grade of ‘+’ or ‘CR’ is not considered a sign of distinction. Minimally satisfying the breadth criterion is not considered a sign of distinction.

The academic records of eligible students are automatically reviewed, so no special action is required for students wishing to be considered for membership. Anonymity in the election process is ensured by removal of the students’ names from their academic records before consideration. Students who desire that their records not be made available for consideration by the Stanford chapter of Phi Beta Kappa should inform the Registrar, 630 Serra Street, Suite 120, Stanford, CA 94305-6032.
EXCHANGE PROGRAMS AND CROSS-ENROLLMENT AGREEMENTS

Stanford has exchange programs and cross-enrollment agreements with a number of other colleges and universities. The purpose of these programs and agreements is to offer Stanford students courses and training that are not available in the Stanford curriculum.

EXCHANGE PROGRAMS UNDERGRADUATE

Stanford has exchange programs with four colleges and universities that allow students to exchange schools for a quarter/semester or for a year, depending on the school. These programs are best suited to students in their junior year, when the major area of study has been determined. Stanford students register for zero units at Stanford during the quarter(s) in which they are attending another college or university and pay the regular Stanford tuition. Courses taken at the other institution are treated as transfer credit back to Stanford. Students should contact the External Credit Evaluation section of the Office of the University Registrar to determine whether the courses taken through an exchange program may qualify for credit toward a Stanford degree. Only the number of units accepted in transfer, not the course titles or the grades received, are recorded on the Stanford transcript.

Exchange programs are currently available at three historically black institutions: Howard University in Washington D.C.; and Morehouse College and Spelman College in Atlanta, Georgia. The exchange program at Dartmouth College in Hanover, New Hampshire, focuses on Native American Studies. Further information is available at the Undergraduate Advising and Research Center.

GRADUATE

The Exchange Scholar Program is open to doctoral students in the fields of humanities, social sciences, and sciences who have completed one full year of study at one of the participating institutions. These students may apply to study at Stanford for a maximum of one academic year (Autumn, Winter, and Spring quarters) to take advantage of particular educational opportunities not available on the home campus. The participating institutions are Brown University, University of Chicago, Columbia University, Cornell University, Harvard University, Massachusetts Institute of Technology, Princeton University, University of Pennsylvania, and Yale University. Further information on the program may be obtained from the Office of the University Registrar, or the graduate dean’s office at participating institutions. Some institutions may place restrictions on specific departments.

Stanford also has separate exchange programs with the University of California, Berkeley, and the University of California, San Francisco. Further information may be obtained at the Office of the University Registrar.

CROSS-ENROLLMENT AGREEMENTS FOR ROTC

Stanford has cross-enrollment agreements for the Reserve Officers’ Training Corps (ROTC) with the Navy and Marine Corps ROTC program at the University of California at Berkeley, the Army ROTC program at Santa Clara University, and the Air Force ROTC program at San Jose State University. The purpose of these agreements is to allow Stanford students to engage in military training while working on their degrees from Stanford. Courses taken in ROTC programs are offered by and through UC Berkeley, Santa Clara, and San Jose State. The courses do not qualify to be used towards the 12-unit requirement for full-time registration status or satisfactory academic progress requirements for Stanford undergraduates. Certain ROTC courses may be eligible to be used as transfer credit if they qualify under Stanford’s transfer credit practices.

Normally, students who participate in ROTC training complete a four-year course of instruction at the respective institution that consists of two years of basic courses during the freshmen and sophomore years, and an advanced course of instruction during the junior and senior years. Students who accept ROTC scholarships are generally subject to a service obligation, depending on the regulation of the particular service.

Stanford students who are enrolled in ROTC programs under the cross-enrollment agreements are eligible to compete for scholarships to include full tuition and a monthly stipend (Navy and Air Force), or other varying amounts (Army). Students normally compete for national scholarships as high school seniors, although current Stanford students may be eligible to enroll in ROTC on a non-scholarship basis. Non-scholarship ROTC students are eligible to compete for scholarships, and individual services may offer additional scholarship programs to current qualifying undergraduate and graduate students. Interested students should contact the appropriate military professor at the host institution to obtain information on these programs and to initiate application procedures (see below).

Students who satisfactorily complete an ROTC program and are awarded a Stanford degree qualify for a commission as a Second Lieutenant in the U.S. Army, an Ensign in the U.S. Navy, a Second Lieutenant in the U.S. Marines, or a Second Lieutenant in the U.S. Air Force.

For questions concerning the ROTC programs, Stanford students should consult one of the following: Air Force ROTC, San Jose State University, San Jose, CA 95192-0051, telephone (408) 924-2960; Army ROTC, Department of Military Science, Santa Clara University, Santa Clara, CA 95053, telephone (408) 554-6836; Naval ROTC, 152 Hearst Gym, University of California, Berkeley, CA 94720-3640, telephone (510) 642-7602.

COURSES

AIR FORCE ROTC

The following are offered by San Jose State University:

AS 001A,B. The Foundation of the United States Air Force — Freshman year. Introduces students to the Air Force and AFROTC. The characteristics, missions, and organization of the Air Force. Officership and professionalism, career opportunities, military customs and courtesies, and communication skills. Required leadership lab.

AS 002A,B. The Evolution of the United States Air and Space Power — Sophomore year. Air and space power through historical study and analysis. The capabilities, function, and doctrinal employment of aerospace forces. Emphasis is on oral and written communication skills. Required leadership lab.

AS 131A,B. Air Force Leadership Studies — Junior year. Leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills. Application-level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion. Required leadership lab. Prerequisites: AS 001A,B, AS 002A,B, or as determined by department chair.

AS 141A. National Security Affairs — Senior year. The national security process, international and regional relations, advanced leadership ethics, and Air Force doctrine with focus on the military as a profession, officership, military justice, civilian control of the military, and current issues affecting military professionalism. Required leadership lab. Pre- or corequisites: AS 131A, or as determined by department chair.

AS 141B. Preparation for Active Duty — Senior year. The role of the Air Force officer in contemporary society emphasizing skills to facilitate a smooth transition from civilian to military life. Required leadership lab. Pre- or corequisites: AS 131A,B, or as determined by department chair.

Leadership Laboratory (L.LAB) — Mandatory. Hands-on. Drill and ceremony; Air Force customs and courtesies; leadership and followership skills. Guest speakers.
ARMY ROTC
FRESHMAN YEAR

MILS 11. Leadership and Personal Development — Taught on Stanford campus. Personal challenges and competencies for effective leadership. How life skills such as goal setting, time management, physical fitness, and stress management relate to leadership and officership. Development of a personal fitness program under the guidance of an Army master fitness trainer. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One four-day weekend field exercise away from the University.

MILS 12. Foundations in Leadership I — Taught on Stanford Campus. Leadership fundamentals such as setting direction, problem solving, listening, presenting briefs, providing feedback, and effective writing skills. Leadership dimensions and values. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One evening military formal dinner.

MILS 13. Foundations in Leadership II — Taught on Stanford Campus. Leadership framework; practical applications in fundamentals such as problem solving, listening, presenting briefs, and effective writing skills. Values, attributes, skills, and actions in the context of practical and interactive exercises. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One four-day weekend field training exercise away from the University.

SOPHOMORE YEAR

MILS 21. Innovative Leadership — Taught on Stanford Campus. Creative and innovative leadership strategies and styles through historical cases and interactive exercises. Personal motivation and team building through team exercises. Focus is on leadership values and attributes through organizational customs and courtesies. Leadership case studies; individual creeds and organizational ethos. Two 60-minute classes per week. Weekly 3-hour labs required. One evening military formal dinner.

MILS 23. Team Leading Procedures — Taught on Stanford campus. Plans and orders that enable small units to complete assigned tasks and the decision making process. Planning techniques to develop orders, briefing plans, and decisions. Two 60-minute classes per week. Five 3-hour labs per quarter. One four-day field training exercise away from the University.

JUNIOR YEAR

MILS 131. Adaptive Team Leadership — Taught at Santa Clara University. Adaptive leadership skills and the demands of the ROTC Leader Development Assessment Course (LDAC). Scenarios related to small-unit tactical operations to develop self awareness and thinking skills. Feedback on student leadership abilities. Two 90-minute classes per week. Weekly 3-hour labs required. One mandatory four-day field training exercise away from the University. Prerequisites: MILS 11, 12, 13, 21, 22, and 23, or consent of department chair.

MILS 132. Situational Leadership I — Taught at Santa Clara University. Skills in leading small units, including decision making, persuading, and motivating team members when under fire. Two 90 minute classes per week. Weekly 3-hour labs required. One evening military formal dinner. Prerequisite: MILS 131, or consent of department chair.

MILS 133. Situational Leadership II — Taught at Santa Clara University. Applications of situational leadership challenges in decision making, persuading, and motivating team members when under fire. Preparation for ROTC Leader Development Assessment Course (LDAC). Two 90-minute classes per week. Weekly 3-hour labs required. One mandatory four-day field training exercise away from the University. Prerequisite: MILS 132, or consent of department chair.

SENIOR YEAR

MILS 141. Developing Adaptive Leaders — Taught at Santa Clara University. Planning, executing, and assessing complex operations, functioning as a member of staff, and providing leadership performance feedback to subordinates. Situational opportunities to assess risk, make ethical decisions, and provide coaching to fellow ROTC students. Responsibilities of key staff. Two 90-minute seminars per week. Weekly 3-hour labs required. One mandatory four-day weekend field training exercise away from the University. Prerequisite: MILS 133, or consent of department chair.

MILS 142. Leadership in a Complex World I — Taught at Santa Clara University. Differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. Interacting with nongovernmental organizations, civilians on the battlefield, and host nation support. Two 90-minute seminars per week. Weekly 3-hour labs required. One evening military formal dinner. Prerequisite: MILS 141.

MILS 143. Leadership in a Complex World II — Taught at Santa Clara University. Preparation for first unit of assignment and transition to Lieutenant. Case studies, scenarios, and exercises to prepare for complex ethical and practical demands as commissioned officers in the U.S. Army. Two 90-minute seminars per week. Weekly 3-hour labs required. One mandatory four-day weekend field training exercise away from the University. Prerequisite: MILS 142.

MILITARY HISTORY

MILS 199. Dynamics of Leadership in Military History — Taught at Santa Clara University. Dynamics that drive decisions made by history’s military leaders and followers. Wars and battles from 1861 to present. Techniques and innovations in military training, weapon systems, political timing, and their effect they have on strategies. Combined arms experiences.

NAVAL ROTC

The Department of Naval Science at UC Berkeley offers programs of instruction for men and women leading to active duty reserve commissions in the U.S. Navy or U.S. Marine Corps. Navy option students enrolled in either the four- or two-year program normally complete the following courses during their first two years. Students should consult http://navsci.berkeley.edu/ for more information and changes to course offerings.

NS 1. Introduction to Naval Science — Freshman year.

NS 2. Sea Power — Freshman year.

NS 3. Leadership and Management — Sophomore year.

Navy option students enrolled in either the four- or two-year program normally complete the following courses during their junior and senior years.

NS 12A. Navigation and Naval Operations I — Junior year.

NS 12B. Navigation and Naval Operations II — Junior year.

NS 401. Naval Ship Systems — Senior year.

NS 412. Leadership and Ethics — Senior year.

In addition to the above courses, Navy option ROTC students are required to participate in weekly professional development laboratories (drill) at UC Berkeley and complete a number of other courses at Stanford including one year of calculus, physics, and English, and one quarter of computer science, and military history or national security policy.

In lieu of NS 401, NS 10, NS 12A and NS 12B, Marine option students participate in Marine Seminars and complete MA 154, History of Littoral Warfare, and MA 20, Evolution of Warfare, or a designated equivalent course. Marine option students also participate in the weekly professional development laboratories.
NONACADEMIC REGULATIONS

STATEMENT OF NONDISCRIMINATORY POLICY

Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. It prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, national and ethnic origin, and any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, athletic and other University-administered programs. The following person has been designated to handle inquiries regarding this policy: the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).

AMERICANS WITH DISABILITIES ACT/REHABILITATION ACT GRIEVANCE PROCEDURE

For information concerning policies and procedures for students with disabilities, see http://www.stanford.edu/dept/ocr/access/student.html, or the ADA Section 504 Compliance Officer, Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford CA, 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax); see also the Student Disability Resource Center at http://www.stanford.edu/group/DRC/.

POLICY

The following is quoted from the policy:

I. Policy

Stanford University, in compliance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973 (Section 504), does not discriminate on the basis of disability in administration of its education-related programs and activities, and has an institutional commitment to provide equal educational opportunities for disabled students who are otherwise qualified.

Students who believe they have been subjected to discrimination on the basis of disability, or have been denied access to services or accommodations required by law, have the right to use this grievance procedure.

II. Applicability

The grievance procedure set forth below is applicable to undergraduate and graduate students of the University. In general, it is designed to address disputes concerning the following:

A. Disagreements regarding a requested service, accommodation, or modification of a University practice or requirement;
B. Inaccessibility of a program or activity;
C. Harassment or discrimination on the basis of disability;
D. Violation of privacy in the context of disability.

For disputes regarding certain specific academic accommodations or modification of academic requirements (such as reduction in the number of academic course units taken quarterly or yearly, requests for substitution of courses, or issues relating to academic standing), the alternate procedure set forth in Section V (C) of the Stanford University Policy and Procedure for Student Requests for Services and Accommodations should be followed. For questions regarding which procedure is applicable, contact the Compliance Officer at the Diversity and Access Office.

These two sets of procedures supplant the Statement on Student Academic Grievance Procedures (set forth in the Stanford Bulletin) for disability-related grievances.

III. Compliance Officers

Stanford University’s Compliance Officers are responsible for administering this grievance procedure as well as ensuring compliance with applicable laws. The Director of the Diversity and Access Office is the designated ADA/Section 504 Compliance Officer. The office is located in Mariposa House, 585 Capistrano Way, Stanford, CA 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).

Additional Compliance Officers may be designated from time to time by the Provost from those faculty and staff members knowledgeable concerning disability issues and the legal mandates of state and federal disability statutes.

IV. Informal Resolution

Prior to initiating the formal complaint procedure set forth below, the student should, in general, first discuss the matter orally or in writing with the individual(s) most directly responsible. If no resolution results, or if direct contact is inappropriate under the circumstances, the student should then consult with the Compliance Officer at the Diversity and Access Office who will attempt to facilitate a resolution.

If the Compliance Officer is not successful in quickly achieving a satisfactory resolution (that is, generally within seven calendar days), the Compliance Officer will inform the student of his or her efforts and the student’s right to file a formal complaint.

V. Formal Complaint

If the procedure set forth above for informal resolution does not yield a successful resolution, then the student may file a formal complaint in the following manner:

A. When to File Complaint: Complaints shall be filed as soon as possible, but in no event later than 10 days after the end of the quarter in which the concern arose.

B. What to File: a complaint must be in writing and include the following:
   1. The grievant’s name, address, email address, and phone number
   2. A full description of the problem
   3. A description of what efforts have been made to resolve the issue informally
   4. A statement of the remedy requested

C. Where to File Complaint: the complaint shall be filed with the Compliance Officer at the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford CA, 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).

D. Notice of Receipt: upon receipt of the complaint, the Compliance Officer reviews the complaint for timeliness and appropriateness for this grievance procedure, and provides the grievant with written notice acknowledging its receipt.

E. Investigation: the Compliance Officer or his or her designee (hereafter collectively referred to as the “grievance officer”) shall promptly initiate an investigation. In undertaking the investigation, the grievance officer may interview, consult with and/or request a written response to the issues raised in the grievance from any individual the grievance officer may interview, consult with and/or request a written response to the issues raised in the grievance from any individual the grievance officer believes to have relevant information, including faculty, staff, and students.

F. Representation: the grievant and the party against whom the grievance is directed shall have the right to have a representative. The party shall indicate whether he or she is to be assisted by a representative and, if so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.

G. Findings and Notification: upon completion of the investigation, the grievance officer will prepare and transmit to the student, and to the party against whom the grievance is directed, a final report containing a summary of the investigation, written findings, and a proposed disposition. This transmission will be expected within 45 calendar days of the filing of the formal complaint. The deadline may be extended by the Compliance Officer for good cause. The final report shall also be provided, where appropriate, to any University officer whose authority will be needed to carry out the proposed disposition or to determine whether any personnel action is appropriate.
H. Final Disposition: the disposition proposed by the grievance officer shall be put into effect promptly. The grievant or any party against whom the grievance or the proposed disposition is directed may appeal. The appeal to the Provost (as set forth below) will not suspend the implementation of the disposition proposed by the grievance officer, except in those circumstances where the Provost decides that good cause exists making the suspension of implementation appropriate.

VI. Urgent Matters
Whenever the application of any of the time deadlines or procedures set forth in this grievance procedure creates a problem due to the nature of the complaint, the urgency of the matter, or the proximity of the upcoming event, the Compliance Officer will, at the request of the grievant, determine whether an appropriate expedited procedure can be fashioned.

VII. Remedies
Possible remedies under this grievance procedure include corrective steps, actions to reverse the effects of discrimination or to end harassment, and measures to provide a reasonable accommodation or proper ongoing treatment. As stated above, a copy of the grievance officer’s report may, where appropriate, be sent to University officer(s) to determine whether any personnel action should be pursued.

VIII. Appeal
Within ten calendar days of the issuance of the final report, the grievant or the party against whom the grievance is directed may appeal to the Provost the grievance officer’s determination.

An appeal is taken by filing a written request for review with the Compliance Officer at the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).

The written request for review must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the proposed disposition. Furthermore, the appeal must be directed only to issues raised in the formal complaint as filed or to procedural errors in the conduct of the grievance procedure itself, and not to new issues.

The Compliance Officer shall forward the appeal to the Provost, and also provide copies to the other party or parties. If the grievance involves a decision that is being challenged, the review by the Provost or his or her designee usually will be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
3. Given the proper facts, criteria, and procedures, was the decision a reasonable one?

A copy of the Provost’s written decision will be expected within 30 calendar days of the filing of the appeal and shall be sent to the parties, the Compliance Officer and, if appropriate, to the University officer whose authority will be needed to carry out the disposition. The deadline may be extended by the Provost for good cause. The decision of the Provost on the appeal is final.

TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

It is the policy of Stanford University to comply with Title IX of the Education Amendments of 1972 and its regulations, which prohibit discrimination on the basis of sex. The Title IX Compliance Officer is the Special Counselor to the President for Campus Relations and has been appointed to coordinate the University’s efforts to comply with the law. Anyone who believes that, in some respect, Stanford is not in compliance with Title IX and its regulations should contact the Title IX Compliance Officer, the Special Counselor to the President for Campus Relations, Building 170, Main Quad, Stanford University, Stanford, CA 94305-2100; (650) 725-8395 (voice), (650) 723-1216 (TTY), (650) 725-3577 (fax). Grievance procedures to address complaints of discrimination on the basis of sex are set forth in the “Student Non-Academic Grievance section” below.

STUDENT GRIEVANCES

A Stanford undergraduate or graduate student who believes that he or she has been subject to an improper decision on an academic matter may file a grievance pursuant to the Statement on Academic Grievance Procedures (see the “Academic Policies and Statements” section of this bulletin). For other types of grievances, students should review the section that follows on the Student Non-Academic Grievance Procedure, and consult concerning applicable procedures with the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax).

STUDENT NON-ACADEMIC GRIEVANCE PROCEDURE

POLICY

The following is the policy:

1. Applicability
   a. It is perhaps inevitable in any university that some students may at times feel improperly treated, and that concerns about unfairness (including potential discrimination and harassment) may also at times arise.

   In this regard (and although this grievance procedure is not limited to concerns of discrimination), Stanford University’s Statement of Non-Discriminatory Policy provides in part: “Stanford University admits students of either sex and any race, color, religion, sexual orientation, or national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. It prohibits discrimination, including harassment, against students on the basis of sex, race, age, color, disability, religion, sexual orientation, national and ethnic origin, and any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarships and loan programs, and athletic and other University-administered programs.”

   b. At Stanford, there are a number of grievance procedures through which students can raise and seek redress for what they believe to be unfair, improper or discriminatory decisions, actions, or treatment. For example:

   1. If the matter involves an academic decision, the Student Academic Grievance Procedure may be the applicable procedure.

   2. If the matter involves a disability-related concern, the Student ADA/Section 504 Grievance Procedure may be applicable.

   3. If the matter involves a student-athlete and his or her sport, the Student-Athlete Grievance Procedure may be applicable.

   c. The purpose of the Student Non-Academic Grievance Procedure is to provide a process for students to seek resolution of disputes and grievances that may not fall within the scope of one of the other grievance processes, including those which may arise in a student’s capacity as a student-employee.

   d. This procedure is available to undergraduate and graduate students at Stanford University. It is designed to address individual decisions or individual actions that affect the grievant personally in his or her capacity as a student. This is not a grievance procedure to address the concerns of student groups. Similarly and as a general proposition, dissatisfaction with a departmental, school or University policy or practice of broad or general application is not grounds for a grievance under this procedure; the Director of the Diversity and Access Office (hereafter “the Director”) may, in his or her discretion, entertain an appeal in exceptional circumstances, such as where (for example) the policy or practice is alleged to be contrary to law.

   e. The Director is responsible for administering this Student Non-Academic Grievance Procedure.

1. The Director may be contacted at: Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax); http://www.stanford.edu/dept/ocr/.
2. The Director in his or her sole discretion can decide whether to refer a grievance brought under this procedure to another grievance process. In cases involving allegations of sexual harassment in particular, the Director may wish to consult with the Director of the Sexual Harassment Policy Office as to the most appropriate way to proceed; see Section 5.d below. In cases involving student employment, the Director may wish to consult with the University’s Department of Human Resources.

2. Informal Resolution
   a. As a general proposition (and although particular circumstances may warrant an exception), the student should first discuss the problem and seek a solution with the individual(s) most directly involved.
   b. If no resolution results (or if circumstances make discussion inappropriate with the person most directly involved), the student should then consult with the individual at the next (higher) administrative level in the department, school, residence or University administrative unit. Serious efforts should be made to resolve the issue locally at an informal level without resort to a formal grievance; such efforts may continue even after the formal process is underway.

3. Formal Grievance
   a. If informal means of resolution prove inadequate, the student should set forth in writing the substance of the complaint, the grounds for it and the evidence on which it is based, and the efforts taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.
   b. The grievance document should be submitted to the Director. A grievance should be filed in a timely fashion, i.e., normally within thirty days of the end of the academic quarter in which the action that is the subject of the grievance occurred. A delay in filing a grievance may be grounds for rejection of that grievance.
   c. The Director shall promptly initiate a review, which should normally be completed within sixty days. The Director may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Director directs. The Director may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
   d. In undertaking this review, either the Director, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.
   e. The Director (or his or her designee) shall issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any). Conduct merits discipline shall be brought to the attention of the appropriate disciplinary process.

4. Appeal
   a. If the student is dissatisfied with the disposition by the Director (or his or her designee), he or she may appeal to the Provost (Office of the President and Provost, Building 10, Stanford, CA 94305-2061; phone (650) 725-4074; fax (650) 725-1347). The appeal should be filed within thirty days of the issuance of the decision by the Director (or his or her designee). A delay in filing the appeal may be grounds for rejection of that appeal.
   b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost’s discretion. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
   c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within thirty days. That decision is final.

5. General Provisions
   a. Time Guidelines—The time frames set forth herein are guidelines. They may be extended by the Director or Provost, as applicable, in his or her discretion for good cause.

   b. Advisers—A student initiating or participating in a grievance under this procedure may be accompanied by an adviser in any discussion with the Director, the Provost or their designees, or a grievance or grievance appeal officer under this procedure; any adviser must be a current Stanford faculty, staff member or student.
   c. Ombuds—Students should be aware that the University Ombuds (http://www.stanford.edu/dept/ocr/ombuds/) and the School of Medicine’s Ombuds (http://www.med.stanford.edu/ombuds) are available to discuss and advise on any matters of University concern and frequently help expedite resolution of such matters. Although they have no decision making authority, the Ombuds’ Offices have wide powers of inquiry.
   d. Sexual Harassment—For further information and resources concerning sexual harassment, students should refer to the web page of the Sexual Harassment Policy Office at http://harass.stanford.edu.
   e. No retaliation—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.

OWNERSHIP AND USE OF STANFORD NAME AND TRADEMARKS

Stanford registered marks, as well as other names, seals, logos, and other symbols and marks that are representative of Stanford, may be used solely with permission of Stanford University. Merchandise bearing Stanford’s names and marks, such as t-shirts, glassware, and notebooks, must be licensed. For complete text of the currently applicable policy, including the University officers authorized to grant permission to use the Stanford name and marks, see Administrative Guide Memo 15.5, Ownership and Use of Stanford Name and Trademarks at http://adminguide.stanford.edu/15_5.pdf.

COPYRIGHT

Copyright laws protect original works of authorship and give the owners of copyrights the exclusive right to do and to authorize others to do certain things in regard to a copyrighted work, including: make copies, distribute the work, display or perform the work publicly, and create derivative works. Copyright laws apply to nearly all forms of captured content, including traditional works like books, photographs, music, drama and sculpture. The laws also adapt to changes in technologies, and include in their scope modern forms of works like motion pictures, electronic media, software, multimedia works and some databases. Registration is not required to obtain a copyright, so if in doubt, assume a copyright applies.

Unless an exception to the copyright owner’s exclusive rights applies, you must obtain permission from the copyright owner to copy, distribute, display or perform a copyrighted work in any medium for any purpose. Be especially mindful of copyright principles when using the Internet. Just because a work is posted on the Internet does not mean that the owner of the copyright has given you permission to use it. And, you should not be posting material onto the Internet without copyright clearance.

Stanford University Libraries have licenses with many publishers, which permit copying of materials in accordance with the educational, research or administrative functions of the University. In addition, there are four major exceptions to the copyright owner’s exclusive rights, which permit copying without permission under limited circumstances. These are: the fair use exception, the library exception, the face-to-face teaching exception, and the distance-learning exception. For a more detailed explanation of these exceptions, the copyright laws and Stanford’s copyright policies, please review the Provost’s Copyright Reminder, http://www.stanford.edu/dept/ocomm/provost/copyright_reminder.html. It is each person’s responsibility to be aware of and abide by copyright law; violation may result in civil or criminal liability, and constitutes grounds for University discipline, up to and including discharge, dismissal and expulsion.
PEER-TO-PEER FILE SHARING

The use of file-sharing networks and software to download and share copyrighted works like software, music, movies, television programs, and books can violate copyright laws. Both the person who makes an illegal copy of a copyrighted work available and the person who receives or downloads an illegal copy have violated the law and Stanford policies. Under the Digital Millennium Copyright Act (DMCA), copyright owners are entitled to notify Internet service providers, such as Stanford, that IP addresses linked to the Stanford network are sharing copies of music, movies, or other content without authorization. The law requires the University to respond to such complaints by eliminating access to the infringing materials, and may further require Stanford to identify students, faculty, staff, or others who have violated copyright laws. The University will terminate access and provide information as required by law. Furthermore, the University also will suspend or terminate computer access to the Stanford network, including termination of the SUNet ID, to members of the community who continue to violate copyright laws. Finally, the University will take action through the student, employee, or faculty disciplinary processes if necessary. For more information about file-sharing, please refer to Residential Computing’s online resource, File-Sharing and Copyright Law at http://rescomp.stanford.edu/info/dmca/.

DOMESTIC PARTNERS

In October 1990, Stanford University adopted a domestic partners policy. This policy, which implements the University’s nondiscrimination policy, makes services that have historically been available to married students available on an equal basis to students with same-sex or opposite-sex domestic partners. These services include access to student housing, a courtesy card that provides access to University facilities, and the ability to purchase medical care at Vaden Health Service. A domestic partnership is defined as an established long-term partnership with an exclusive mutual commitment in which the partners share the necessities of life and ongoing responsibility for their common welfare.

SEXUAL HARASSMENT AND CONSENSUAL SEXUAL OR ROMANTIC RELATIONSHIPS

SUMMARY

Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

POLICY

The following is quoted from the policy:

1. In General
   a. Applicability and Sanctions for Policy Violations—This policy applies to all students, faculty and staff of Stanford University, as well as to others who participate in Stanford programs and activities. Its application includes Stanford programs and activities both on and off-campus, including overseas programs. Individuals who violate this policy are subject to discipline up to and including discharge, expulsion, and/or other appropriate sanction or action.
   b. Respect for Each Other—Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. It is expected that students, faculty, staff and other individuals covered by this policy will treat one another with respect.
   c. Prompt Attention—Reports of sexual harassment are taken seriously and will be dealt with promptly. The specific action taken in any particular case depends on the nature and gravity of the conduct reported, and may include intervention, mediation, investigation and the initiation of grievance and disciplinary processes as discussed more fully below. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.
   d. Confidentiality—The University recognizes that confidentiality is important. Sexual harassment advisers and others responsible to implement this policy will respect the confidentiality and privacy of individuals reporting or accused of sexual harassment to the extent reasonably possible. Examples of situations where confidentiality cannot be maintained include circumstances when the University is required by law to disclose information (such as in response to legal process) and when disclosure is required by the University’s outweighing interest in protecting the rights of others.
   e. Protection Against Retaliation—Retaliation and/or reprisals against an individual who in good faith reports or provides information in an investigation about behavior that may violate this policy are against the law and will not be tolerated. Intentionally making a false report or providing false information, however, is grounds for discipline.
   f. Relationship to Freedom of Expression—Stanford is committed to the principles of free inquiry and free expression. Vigorous discussion and debate are fundamental to the University, and this policy is not intended to stifle teaching methods or freedom of expression generally, nor will it be permitted to do so. Sexual harassment, however, is neither legally protected expression nor the proper exercise of academic freedom; it compromises the integrity of the University, its tradition of intellectual freedom and the trust placed in its members.

2. What Is Sexual Harassment?

Unwelcome sexual advances, requests for sexual favors, and other visual, verbal or physical conduct of a sexual nature constitute sexual harassment when:
   a. It is implicitly or explicitly suggested that submission to or rejection of the conduct will be a factor in academic or employment decisions or evaluations, or permission to participate in a University activity; or
   b. The conduct has the purpose or effect of unreasonably interfering with an individual’s academic or work performance or creating an intimidating or hostile academic, work or student living environment.

Determining what constitutes sexual harassment depends upon the specific facts and the context in which the conduct occurs. Sexual harassment may take many forms—subtle and indirect, or blatant and overt. For example,
   • It may be conduct toward an individual of the opposite sex or the same sex.
   • It may occur between peers or between individuals in a hierarchical relationship.
   • It may be aimed at coercing an individual to participate in an unwanted sexual relationship or it may have the effect of causing an individual to change behavior or work performance.
   • It may consist of repeated actions or may even arise from a single incident if sufficiently egregious.

The University’s Policy on Sexual Assault (see Guide Memo 23.3, Sexual Assault, http://admin-guide.stanford.edu/23_3.pdf) may also apply when sexual harassment involves physical contact.

3. What To Do About Sexual Harassment

Individuals seeking further information are directed to the following resources:
   • The Sexual Harassment Policy Office (Main Quad, Bldg. 310, Room 101; (650) 723-1583 or 327-8259; email: harass@stanford.edu for information, consultation, advice, or to lodge a complaint. Note that anonymous inquiries can be made to the SHPO by phone during business hours.

712 | Stanford Bulletin, 2006-07
The following are the primary methods for dealing with sexual harassment at Stanford. They are not required to be followed in any specific order. However, early informal methods are often effective in correcting questionable behavior.

a. Consultation — Consultation about sexual harassment is available from the Sexual Harassment Policy Office, Sexual Harassment Advisers (including residence deans), human resources officers, employee relations specialists, counselors at Counseling and Psychological Services (CAPS) or the Help Center, chaplains at Memorial Church, ombudspersons and others. A current list of Sexual Harassment Advisers is available from the Sexual Harassment Policy Office and at http://harass.stanford.edu/SHAdvisers.html. Consultation is available for anyone who wants to discuss issues related to sexual harassment, whether or not “harassment” actually has occurred, and whether the person seeking information is a complainant, a person who believes his or her own actions may be the subject of criticism (even if unwarranted), or a third party.

Often there is a desire that a consultation be confidential or “off the record.” This can usually be achieved when individuals discuss concerns about sexual harassment without identifying the other persons involved, and sometimes even without identifying themselves. Confidential consultations about sexual harassment also may be available from persons who, by law, have special professional status, such as:
- Counselors at Counseling and Psychological Services (CAPS), http://caps.stanford.edu/
- Counselors at the Help Center, http://www.stanford.edu/dept/helpcenter/
- Chaplains at Memorial Church
- The University Ombudsperson, http://www.stanford.edu/dept/ombuds/
- The Medical Center Ombudsperson, http://www.med.stanford.edu/ombuds/

In these latter cases, the level of confidentiality depends on what legal protections are held by the specific persons receiving the information and should be addressed with them before specific facts are disclosed. For more information see http://harass.stanford.edu/confidential.html.

For further information on confidentiality, see Section 1(d) above.

b. Direct Communication — An individual may act on concerns about sexual harassment directly, by addressing the other party in person or writing a letter describing the unwelcome behavior and its effect and stating that the behavior must stop. A Sexual Harassment Adviser can help the individual plan what to say or write, and likewise can counsel persons who receive such communications. Reprisals against an individual who in good faith initiates such a communication violate this policy.

c. Third Party Intervention — Depending on the circumstances, third party intervention in the workplace, student residence or academic setting may be attempted. Third party intervenors may be the Sexual Harassment Advisers, human resources professionals, the ombudspersons, other faculty or staff, or sometimes mediators unrelated to the University.

When third party intervention is used, typically the third party (or third parties) will meet privately with each of the persons involved, try to clarify their perceptions and attempt to develop a mutually acceptable understanding that can insure that the parties are comfortable with their future interactions. Other processes, such as a mediated discussion among the parties or with a supervisor, may also be explored in appropriate cases.

Possible outcomes of third party intervention include explicit agreements about future conduct, changes in workplace assign-ments, substitution of one class for another, or other relief, where appropriate.

d. Formal Grievance, Appeal, and Disciplinary Processes — Grievance, appeal, or disciplinary processes may be pursued as applicable.

1. Grievances and Appeals — The applicable procedure depends on the circumstances and the status of the person bringing the charge and the person against whom the charge is brought. Generally, the process consists of the individual’s submission of a written statement, a process of fact-finding or investigation by a University representative, followed by a decision and, in some cases, the possibility of one or more appeals, usually to Stanford administrative officers at higher levels. The relevant procedure (see below) should be read carefully, since the procedures vary considerably.

If the identified University fact-finder or grievance officer has a conflict of interest, an alternate will be arranged, and the Director of the Sexual Harassment Policy Office or the Director of Employee and Labor Relations can help assure that this occurs.

In most cases, grievances and appeals must be brought within a specified time after the action complained of. While informal resolution efforts will not automatically extend the time limits for filing a grievance or appeal, in appropriate circumstances the complainant and the other relevant parties may mutually agree in writing to extend the time for filing a grievance or appeal.

A list of the established grievance and appeal procedures is located at http://hrweb.stanford.edu/elr/policies/list_grievance_procedures.html. Copies may also be obtained from the Sexual Harassment Policy Office, http://www.stanford.edu/group/SexHarass.

Copies of the following may be obtained from Employee and Labor Relations, 651 Serra Street:
- “Solving Workplace Problems at Stanford: Understanding the Staff Dispute Resolution Policy” (also at http://hrweb.stanford.edu/forms/staffresolution.pdf)
- “Solving Workplace Problems at Stanford: Information for Academic Staff – Librarians and Academic Staff – Research Associates”
- “The Dispute Resolution Process (A User’s Guide)”

2. Disciplinary Procedures — In appropriate cases, disciplinary procedures may be initiated. The applicable disciplinary procedure depends on the status of the individual whose conduct is in question. For example, faculty are subject to the Statement on Faculty Discipline http://www.stanford.edu/dept/provost/faculty/policies/handbook/ch4.html#statemontonfacultydiscipline and students to the Fundamental Standard. For additional information related to student judicial affairs, see http://www.stanford.edu/dept/vpsa/judicialaffairs

The individuals referenced in this section are available to discuss these options and differing methods for dealing with sexual harassment.

4. Procedural Matters

a. Investigations — If significant facts are contested, an investigation may be undertaken. The investigation will be conducted in a way that respects, to the extent possible, the privacy of all of the persons involved. In appropriate cases, professional investigators may be asked to assist in the investigation. The results of the investigation may be used in the third party intervention process or in a grievance or disciplinary action.

b. Recordkeeping — The Sexual Harassment Policy Office will track reports of sexual harassment for statistical purposes and report at least annually to the University President concerning their number, nature and disposition.

The Sexual Harassment Policy Office may keep confidential records of reports of sexual harassment and the actions taken in response to those reports, and use them for purposes such as to identify individuals or departments likely to benefit from training so that training priorities can be established. No identifying information
will be retained in cases where the individual accused was not informed that there was a complaint.

c. **Indemnification and Costs**—The question sometimes arises as to whether the University will defend and indemnify a Stanford employee accused of sexual harassment. California law provides, in part, “An employer shall indemnify [its] employee for all that the employee necessarily expends or loses in direct consequence of the discharge of his [or her] duties as such . . . .” The issue of indemnification depends on the facts and circumstances of each situation. Individuals who violate this policy, however, should be aware that they and/or their schools, institutes, or other units may be required to pay or contribute to any judgments, costs and expenses incurred as a result of behavior that is wrongful and/or contrary to the discharge of the employee’s duties. In general, see Administrative Guide Memo 15.7 (http://adminguide.stanford.edu/15_7.pdf).

5. **Resources for Dealing with Sexual Harassment**

a. **Advice**—Persons who have concerns about sexual harassment should contact the Sexual Harassment Policy Office, any Sexual Harassment Adviser at http://harass.stanford.edu/SHadvisers.html or one of the other individuals listed below. Reports should be made as soon as possible: the earlier the report, the easier it is to investigate and take appropriate remedial action. When reports are long delayed, the University will try to act to the extent it is reasonable to do so, but it may be impossible to achieve a satisfactory result after much time has passed.

 Likewise, anyone who receives a report or a grievance involving sexual harassment should promptly consult with the Sexual Harassment Policy Office or with a Sexual Harassment Adviser. There are a number of individuals specially trained and charged with specific responsibilities in the area of sexual harassment. In brief, they are:

- **Sexual Harassment Advisers** (http://harass.stanford.edu/SHadvisers.html) serve as resources to individuals who wish to discuss issues of sexual harassment, whether because they have been harassed or because they want information about the University’s policy and procedures. There is usually at least one Adviser assigned to each of the schools at the University and to each large work unit; most of the residence deans also have been appointed as Sexual Harassment Advisers. Advisers are also authorized to receive complaints.

- **The Director of the Sexual Harassment Policy Office** is responsible for the implementation of this policy. The Director’s Office also provides advice and consultation to individuals when requested; receives complaints and coordinates their handling; supervises the other Advisers; encourages and assists prevention education for students, faculty and staff; keeps records showing the disposition of complaints; and generally coordinates matters arising under this policy. Because education and awareness are the best ways to prevent sexual harassment, developing awareness, education and training programs and publishing informational material are among the most important functions of the Sexual Harassment Policy Office (http://harass.stanford.edu).

As stated above, individuals with concerns about sexual harassment may also discuss their concerns informally with psychological counselors (for example through CAPS or the HELP Center), chaplains (through the Memorial Chapel), or University or Medical School ombudspersons. For more information, see http://harass.stanford.edu/resources.html.

b. **External Reporting**—Sexual harassment is prohibited by state and federal law. In addition to the internal resources described above, individuals may pursue complaints directly with the government agencies that deal with unlawful harassment and discrimination claims, e.g., the U.S. Equal Employment Opportunity Commission (EEOC), the Office for Civil Rights (OCR) of the U.S. Department of Education, and the State of California Department of Fair Employment and Housing (DFEH). These agencies are listed in the Government section of the telephone book. A violation of this policy may exist even where the conduct in question does not violate the law.

6. **Consensual Sexual or Romantic Relationships**

a. **In General**—There are special risks in any sexual or romantic relationship between individuals in inherently unequal positions, and parties in such a relationship assume those risks. In the University context, such positions include (but are not limited to) teacher and student, supervisor and employee, senior faculty and junior faculty, mentor and trainee, adviser and advisee, teaching assistant and student, coach and athlete, and the individuals who supervise the day-to-day student living environment and student residents. Because of the potential for conflict of interest, exploitation, favoritism, and bias, such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the teacher-student context. They may, moreover, be less consensual than the individual whose position confers power or authority believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

Moreover, such relationships may harm or injure others in the academic or work environment. Relationships in which one party is in a position to review the work or influence the career of the other may provide grounds for complaint by third parties when that relationship gives undue access or advantage, restricts opportunities, or creates a perception of these problems. Furthermore, circumstances may change, and conduct that was previously welcome may become unwelcome. Even when both parties have consented at the outset to a romantic involvement, this past consent does not remove grounds for a charge based upon subsequent unwelcome conduct.

Where such a relationship exists, the person in the position of greater authority or power will bear the primary burden of accountability, and must ensure that he or she—and this is particularly important for teachers—does not exercise any supervisory or evaluative function over the other person in the relationship. Where such recusal is required, the recusing party must also notify his or her supervisor, department chair or dean, so that such chair, dean or supervisor can exercise his or her responsibility to evaluate the adequacy of the alternative supervisory or evaluative arrangements to be put in place. Staff members may notify their local human resources officers. To reiterate, the responsibility for recusal and notification rests with the person in the position of greater authority or power. Failure to comply with these recusal and notification requirements is a violation of this policy, and therefore grounds for discipline. The University has the option to take any action necessary to insure compliance with the spirit of this recusal policy, including transferring either or both employees in order to minimize disruption of the work group. In those extraordinarily rare situations where it is programmatically infeasible to provide alternative supervision or evaluation, the cognizant Dean or Director must approve all evaluative and compensation actions.

b. **With Students**—At a university, the role of the teacher is multifaceted, including serving as intellectual guide, counselor, mentor and advisor; the teacher’s influence and authority extend far beyond the classroom. Consequently and as a general proposition, the University believes that a sexual or romantic relationship between a teacher and a student, even where consensual and whether or not the student would otherwise be subject to supervision or evaluation by the teacher, is inconsistent with the proper role of the teacher, and should be avoided. The University therefore very strongly discourages such relationships.

7. **Policy Review and Evaluation**

This policy went into effect on October 6, 1993, and was amended on November 30, 1995, and on May 30, 2002. It is subject to periodic review, and any comments or suggestions should be forwarded to the Director of the Sexual Harassment Policy Office.
RESOURCES

The following is a summary of resources concerning sexual harassment available to members of the Stanford Community:

A brochure containing the policy, a list of current sexual harassment advisers, confidential resources, and other helpful information is available online at http://harass.stanford.edu, and in printed form from the Sexual Harassment Policy Office at (650) 723-1583, Building 310, Main Quad, Room 101, MC: 2100. Copies of the University policy on sexual assault, which complements this sexual harassment policy, as well as all other documents mentioned in this section, are also available at the Sexual Harassment Policy Office.

All faculty, staff, and students who have questions regarding this policy and its enforcement can consult with a Sexual Harassment Adviser or can be directed to the local Personnel Officer or Regional Human Resources Manager. Faculty members should contact their dean or department chair, and students should contact the Director of the Sexual Harassment Policy Office or the Dean of Student Affairs.

Sexual Harassment Policy Office — telephone: (650) 723-1583; email: Haras@stanford.edu.

Director: Laraine Zappert (Clinical Professor, Psychiatry and Behavioral Sciences)

Assistant Director: Nanette Andrews

SEXUAL ASSAULT

SUMMARY

The following summarizes the policy on Sexual Assault and provides information on resources available to members of the Stanford community.

Background — This policy has been enacted by Stanford University in accordance with California State Law, Assembly Bill 3098, Postsecondary Education: Student Safety, July, 1990.

Definition — For the purposes of the policy, “sexual assault” includes, but is not limited to, rape, forced sodomy, forced oral copulation, rape by a foreign object, sexual battery, or threat of sexual assault. Sexual assault can occur either forcibly or when a person is incapable of giving consent. A person is incapable of giving consent when under 18; if intoxicated by drugs and/or alcohol; if developmentally disabled; or if temporarily or permanently mentally or physically unable to do so.

Policy — Sexual assault is absolutely unacceptable at Stanford University. Any member of the Stanford community who commits sexual assault at or on the grounds of the University, or at any of the University’s off-campus facilities or activities, or at the facilities or activities of any affiliated student organization, will face maximal institutional sanctions, in addition to any prosecutions external authorities may undertake. Stanford University is committed to providing information on services, resources, and treatment available to victims of sexual assault.

Notification — With the consent of the victim, charges of sexual assault received by University offices or personnel shall be communicated promptly to the Department of Public Safety, 711 Serra Street, telephone 9-911 for emergency response or (650) 723-9633 during normal business hours, or, in the case of a student, to the sexual assault response team at YWCA Sexual Assault Center at Stanford at Vaden Health Service, 866 Campus Drive, telephone 725-9955.

Legal Reporting Requirements — Health care professionals are expected to fulfill legally mandated reporting requirements.

Emergency Services Available to Victims — Victims of sexual assault are urged to seek immediate attention from emergency police, medical, and counseling services. On the Stanford campus and in the immediate vicinity, the following provide 24-hour response and will arrange for police assistance, medical assistance, emotional support services, and advocacy and support:

POLITICAL ACTIVITIES

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 15.1, Political Activities, available at http://admin-guide.stanford.edu/15_1.pdf.

SUMMARY

The following summarizes the policy on Political Activities:

Stanford University, as a charitable entity, is subject to federal, state, and local laws and regulations regarding political activities: campaign activities, lobbying, and the giving of gifts to public officials.

While all members of the University community are naturally free to express their political opinions and engage in political activities to whatever extent they wish, it is very important that they do so only in their individual capacities and avoid even the appearance that they are speaking or acting for the University in political matters.

In the limited circumstances where individuals must speak or act on behalf of the University in the political arena, they must do so in accordance with the provisions of this Guide Memo.

POLICY

The following is quoted from the policy:

1. Summary of Legal Requirements and Restrictions

a. Campaign Activities: contributions of money, goods, or services to candidates for political office and in support of or opposition to ballot measure campaigns are subject to a wide variety of political laws. Depending on the jurisdiction and the campaign, political contributions may be prohibited or limited and, in nearly all cases, are subject to a complicated series of disclosure rules. Because of the University’s tax-exempt status, the University is legally
prohibited from endorsing candidates for political office or making any contribution of money, goods, or services to candidates. It is important, therefore, that no person inadvertently cause the University to make such a contribution.

b. **Lobbying:** lobbying can generally be described as any attempt to influence the action of any legislative body (for example, Congress, state legislatures, county boards, city councils, and their staffs) or any federal, state, or local government agency. Laws regulating lobbying exist at the federal, state, and local levels but can differ widely in scope, depending on the jurisdiction. Some laws, for example, only regulate lobbying of the legislative branch. Others, however, also cover lobbying of administrative agencies and officers in the executive branch (for example, lobbying for federally-funded grants). To one degree or another, however, most lobbying laws require registration and reporting by individuals engaged in attempts to influence governmental action.

Tax-exempt organizations are permitted to lobby, and the University engages in lobbying on a limited number of issues, mostly those affecting education, research, and related activities. There is usually some threshold of time or money spent on lobbying that triggers registration and reporting requirements. Regardless of thresholds, however, no University employee — other than the following individuals, on matters under their jurisdiction — may lobby on behalf of the University without specific authorization:

- President
- Provost
- Deans of the Seven Schools
- Vice Provost and Dean of Research
- Vice President for Business Affairs and Chief Financial Officer
- Executive Director of Human Resources
- Director of the Stanford Linear Accelerator Center
- Director of the Hoover Institution
- General Counsel
- Vice President for Public Affairs

The Vice Provost and Dean of Research may grant permission to faculty members to lobby on behalf of the University for specific purposes. The Director of Government and Community Relations may grant permission to staff members to lobby on behalf of the University for specific purposes. All lobbying on behalf of the University should be coordinated with the Director of Government and Community Relations.

c. **Giving of Gifts to Public Officials and Staff:** almost all jurisdictions have strict rules on the extent to which gifts and honoraria may be given to public officials (both elected and non-elected officials and, often, staff). In some cases gifts and honoraria are prohibited; in others they are limited; and in most cases they are subject to detailed disclosure. In addition, in some jurisdictions such as California, gifts to both state and local public officials can result in a public official’s disqualification from participation in any governmental action affecting the interests of the donor. Meals, travel, and entertainment are the most common types of gifts, but gift rules can also apply in cases where public officials attend a reception or receive tickets to sporting or other events.

As a non-profit organization, the University generally does not give gifts to public officials and, in those limited cases where it does give such gifts, it must do so in accordance with all applicable laws and regulations. Therefore, any University employee who, on behalf of the University, wishes to make a gift to a public official must receive prior approval from the Director of Government and Community Relations before making such a gift.

d. **Reporting of Political Activities:** the University must report most of its political activities above certain thresholds. Therefore, any University employee engaging in such activities on behalf of the University should carefully review the remainder of this Guide Memo and should discuss the relevant activities in advance with the Director of Government and Community Relations.

### 2. Prohibited and Restricted Political Activities

#### a. In General:

1. No person may, on behalf of the University, engage in any political activity in support of or opposition to any candidate for elective public office (including giving or receiving funds or endorsements), nor shall any University resources be used for such purpose.

2. No person may, on behalf of the University, lobby (or use University resources to lobby) any federal, state, or local legislative or administrative official or staff member unless specifically authorized to do so. Any lobbying activity, even when authorized, must be conducted in compliance with this Guide Memo, other applicable University policies, and applicable law.

3. No person may, on behalf of the University, give a gift (or use any University resources to give a gift) to any federal, state, or local official or staff member, except in compliance with this Guide Memo, other applicable University policies, and applicable law.

4. No person supporting candidates for public office or engaging in other political activities may use University space or facilities or receive University support, except in the limited ways described in section 3A, below.

5. No person may use for lobbying activities federally-funded contract or grant money received by the University.

Even the foregoing activities that are only restricted, rather than prohibited, may be subject to limitations imposed by law. Therefore, any person engaging in the activity, or contemplating doing so, should consult with the Director of Government and Community Relations.

b. **Guidelines for Avoiding Prohibited Partisan Political Activities:** the following guidelines should assist in preventing the involvement or apparent involvement of the University in political activities in support of or opposition to any candidate for elective public office, that is, partisan political activities. Except in the limited circumstances set forth in section 3b., below:

1. **Use of Name and Seal:** neither the name nor seal of the University or of any of its schools, departments, or institutions should be used on letters or other materials intended for partisan political purposes.

2. **Use of Address and Telephones:** no University office should be used as a return mailing address for partisan political mailings, and telephone service that is paid by the University, likewise, should not be used for partisan political purposes. (Obviously, a student’s dormitory room and telephone service that are personal to the student may be used for these purposes.)

3. **Use of Title:** the University title of a faculty or staff member or other person should be used only for identification and should be accompanied by a statement that the person is speaking as an individual and not as a representative of the University.

4. **Use of Services and Equipment:** University services, such as Interdepartmental Mail; equipment, such as duplicating machines, computers, and telephones; and supplies should not be used for partisan political purposes.

5. **Use of Personnel:** no University employee may, as part of his or her job, be requested to perform tasks in any way related to partisan political purposes.

#### 3. Permissible Activities

**a. In General:** as noted above, the federal, state, and local laws which limit the partisan political activities that can take place in University facilities and with University support in no way inhibit the expression of personal political views by any individual in the University community. Nor do they forbid faculty, students, or staff from joining with others in support of candidates for office or in furtherance of political causes. There is no restriction on discussion of political issues or teaching of political techniques. Academic endeavors which address public policy issues are in no way affected.

Because the University encourages freedom of expression, political activities which do not reasonably imply University in-

---
volvement or identification may be undertaken so long as regular University procedures are followed for use of facilities. Examples of permissible activities are:

1. Use of areas, such as White Plaza, for tables, speeches, and similar activities.
2. Use of auditoriums for speeches by political candidates, but subject to rules of the Internal Revenue Service, the Federal Election Commission, and the California Fair Political Practices Commission, and other applicable laws. Arrangements must be made with University Events and Services. (See also Guide Memo 82.1, Public Events, for more information.)

To reiterate, because tax and political compliance laws impose restrictions, and even prohibitions, on certain political activities and on the use of buildings and equipment at a non-profit institution such as the University, any such activities must be in compliance with these legal requirements. Individuals taking political positions for themselves or groups with which they are associated, but not as representatives of the University, should clearly indicate, by words and actions, that their positions are not those of the University and are not being taken in an official capacity on behalf of the University.

b. Limited University Political Activities: limited activities relating to specific federal, state, or local legislation or ballot initiatives are permissible where (1) the subject matter is directly related to core interests of the University’s activities; (2) the President has determined that the University should take a position; and (3) the individuals who speak or write on the University’s behalf are specifically authorized to do so.

4. Responsibility for Interpretation: the Director of Government and Community Relations, in consultation with the General Counsel, is the administrative officer responsible for interpretation and application of the above guidelines. Questions on whether planned student activities are consistent with the University’s obligations should be directed to the Dean of Students, who will consult with the Director of Government and Community Relations and/or the General Counsel. All other questions on whether planned activities are consistent with the University’s obligations should be addressed directly to the Director of Government and Community Relations or the General Counsel.

CAMPUS DISRUPTIONS

The University’s policy on campus disruption applies to students, faculty, and staff. It is published in its complete form on the Judicial Affairs Office website at http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html.

POLICY

The following is quoted from the policy:

Because the rights of free speech and peaceable assembly are fundamental to the democratic process, Stanford firmly supports the rights of all faculty, staff, and students to express their views or to protest against actions and opinions with which they disagree.

All members of the University also share a concurrent obligation to maintain on the campus an atmosphere conducive to scholarly pursuits, to preserve the dignity and seriousness of University ceremonies and public exercises, and to respect the rights of all individuals.

The following regulations are intended to reconcile these objectives.

It is a violation of University policy for a member of the faculty, staff, or student body to:

1. Prevent or disrupt the effective carrying out of a University function or approved activity, such as lectures, meetings, interviews, ceremonies, the conduct of University business in a University office, and public events.
2. Obstruct the legitimate movement of any person about the campus or in any University building or facility.

Members of the faculty, staff, and student body have an obligation to leave a University building or facility when asked to do so in the furtherance of the above regulations by a member of the University community acting in an official role and identifying himself or herself as such; members of the faculty, staff, or student body also have an obligation to identify themselves, when requested to do so by such a member of the University community who has reasonable grounds to believe that the person(s) has violated section (1) or (2) of this policy and who has so informed the person(s).

APPLICATION

The following are examples to illustrate the policy:

The policy has been applied to the following actions: refusal to leave a building which has been declared closed; obstructing the passage into or out of buildings by sitting in front of doorways; preventing University employees from entering their workplace; preventing members of a class from hearing a lecture or taking an examination, or preventing the instructor from giving a lecture, by means of shouts, interruptions, or chants; preventing others from hearing a scheduled speaker by means of shouts, interruptions, or chants; refusing to leave a closed meeting when unauthorized to attend; and intruding upon or refusing to leave a private interview.

It should be understood that while the above are examples of extraordinary disruptive behavior, the application of the policy also takes situational factors into consideration. Thus, for example, conduct appropriate at a political rally might constitute a violation of the Policy on Campus Disruption if it occurred within a classroom.

There is no “ordinary” penalty which attaches to violations of the Policy on Campus Disruption. Each case is fact-specific; considerations would include: the gravity of the offense, and prior similar misconduct. As a general rule, the more serious the offense, the less it matters that the violation had otherwise not done wrong.

USE OF THE MAIN QUADRANGLE AND MEMORIAL COURT

POLICY

The following is quoted from the policy:

The Main Quadrangle and Memorial Court are part of Stanford University’s academic preserve due to their locations at the heart of the campus. To protect and enhance their historic status, University policy limits activities primarily to established or traditional ceremonies and events. Unscheduled events or activities are prohibited.

Requests for waivers to this policy must be submitted in writing to the Director of Public Events. Exceptions may be granted only in extraordinary cases.

RESOURCES

The following is a summary of resources available:

For instructions on use of the Main Quadrangle/Memorial Court, contact the Director of University Public Events at (650) 723-2551, http://stanfordevents.stanford.edu/. Note that other venues on campus (such as White Plaza) are made available for events other than scheduled “established or traditional ceremonies and events” including those that may involve amplified sound. For further information on the use of such other venues, contact the Office of Student Activities at (650) 723-2733, http://www.stanford.edu/dept/OSA/.

NOISE AND AMPLIFIED SOUND

POLICY

The following is quoted from the policy:

Stanford is not only an academic institution but a residential community as well. It is the responsibility of all faculty, students, and staff to moderate noise especially during an event or activity held on campus. Supporting the mission of the University and respecting those who are studying, researching, or otherwise carrying out academic-related activities is a Stanford priority. The campus must require a conducive atmosphere to ensure these endeavors are accomplished and supported. Disturbing noise in or around a residence or other campus buildings which infringe on the rights of other residents or members of the University community is considered a violation of this policy. As part of the event planning process, the event sponsor must obtain all appropriate approvals regarding the use of amplified sound during an event or activity.
NONACADEMIC REGULATIONS

Information regarding whether and how the use of amplified sound is permitted is available from the following sources, which must be consulted for prior approval:

a. The Office of Student Activities; phone: 723-2733, or see http://osa.stanford.edu/publications/soh/2002-2003/

b. Registrar’s Scheduling Office; phone: (650) 723-6755, or see http://registrar.stanford.edu/event/.

PROHIBITION OF THE POSSESSION OF DANGEROUS WEAPONS ON CAMPUS

The University’s policy prohibiting weapons on campus is published in its complete form on the Judicial Affairs Office web site http://stanford.edu/dept/vpsa.judicialaffairs/index.html.

POLICY

The following is quoted from the policy:

Except for authorized academic purposes, the knowing possession by any student on any Stanford campus of the following is prohibited: firearms, explosives, or any instrument or weapon of the kind commonly known as blackjack, slingshot, billy club, sandclub, sandbag, or metal knuckles.

Notwithstanding the paragraph above, a student who is a resident of a Stanford campus may store a weapon on such campus if both of the following conditions are met:

1. The student has complied with all state and federal regulations regarding the use and possession of said weapon, or, in the case of a foreign campus, with the laws of the country in which the campus is located.

2. The student stores such weapons with the Stanford Department of Public Safety (SDPS) or, in the case of a foreign campus, in a facility provided by the director of such campus.

Students may remove their weapons from storage only in accordance with regulations established by the SDPS or by the director of the foreign campus at which the weapon is stored. A student who is a resident of a Stanford campus may bring any of the above weapons on campus for purposes of storage only if the student has previously notified the SDPS of the intention to do so, but in no event more than six hours after arrival on the campus. When the student removes the weapon from storage, it must be taken off campus as soon as is practicable, but in no event more than one hour after such removal.

The term “Stanford campus” shall include all the lands and facilities of Leland Stanford Junior University, whether owned or leased, and whether located in the United States or abroad.

CONTROLLED SUBSTANCES AND ALCOHOL

STUDENT CONDUCT

Student conduct is guided by the Fundamental Standard. Implicit in the Standard is the understanding that students are responsible for making their own decisions and accepting the consequences of those decisions.

In order to make informed decisions about alcohol and other drug use, students should educate themselves about the health and safety risks associated with their use, as well as about state and local laws on possessing, serving, and consuming alcohol. It is widely recognized that the misuse and abuse of drugs (“controlled substances”) and the abuse of alcohol are major contributors to serious health problems, as well as to social and civic concerns. Among the health risks associated with the use of illicit drugs and the abuse of alcohol are various deleterious physical and mental consequences including dependency, severe disability, and death. Information concerning the known effects of alcohol and specific drugs is available from the Alcohol and Other Drug Abuse Prevention Program at Vaden Student Health Service.

The goal of this University’s policy is to reduce the abuse and illegal use of alcohol and other drugs, and the human and material costs associated with it. The University, as an educational institution, approaches student conduct issues from a perspective that places emphasis on individual responsibility and development. Education about and prevention of alcohol and other drug-related problems will continue to be the primary emphasis and goal. However, the University expects students, as individuals and as members of groups, to conduct themselves in accordance with this and all other University policies governing student conduct.

* Controlled substances are those defined in 21 U.S.C. 812; they include, but are not limited to, such substances as marijuana, heroin, cocaine, and amphetamines.

POLICY

The following is quoted from the policy:

It is the policy of the University to maintain a drug-free workplace and campus. The unlawful manufacture, distribution, dispensation, possession, and/or use of controlled substances or the unlawful possession, use, or distribution of alcohol is prohibited on the Stanford campus, in the workplace, or as part of any of the University’s activities. The workplace and campus are presumed to include all Stanford premises where the activities of the University are conducted. Violation of this policy may result in disciplinary sanctions up to and including termination of employment or expulsion of students. Violations may also be referred to the appropriate authorities for prosecution.

This policy will be reviewed at least biennially.

APPLICATIONS

The following are examples to illustrate the policy:

No University funds or funds collected by the University may be used in a way that violates the alcohol policy. In student residences, house funds (funds collected by the University Bursar or other University offices) may not be used to buy alcohol because the majority of undergraduates are under the legal drinking age of 21. The decision to use student-collected funds to buy alcohol should be made lawfully, thoughtfully, fairly, and in a way that respects the views of all students. Students must not be required to contribute to a student-collected fund for the purposes of purchasing alcohol. No alcoholic beverages may be served at all-freshman house events in common area spaces (e.g., lounges, hallways, patios/outdoor areas).

Party planners are responsible for planning and carrying out events in compliance with this policy. At least one house or organization officer must assume responsibility for an event’s compliance with the policy, and their names must be made available to Stanford’s Department of Public Safety and the University upon request.

CONSEQUENCES OF VIOLATION

Educational and rehabilitative measures will be the preferred response to infractions of the Policy unaccompanied by more egregious misconduct. Penalties are calibrated according to the severity of the violation. Misbehavior associated with drug or alcohol use and abuse may result in one or more of the following University consequences:

Individuals who violate the University Residence Agreement may lose their University student housing privileges and/or be reported to the Judicial Affairs Office.

Individuals who violate the University’s terms and conditions for student organization recognition as defined in the Student Organization Handbook may be subject to expulsion from the student organization.

Student groups which violate the Policy may face suspension of social privileges, as well as the loss of University recognition, meeting space, and housing or other related privileges.

Students should understand that inebriation is never an excuse for misconduct, that the careless or willful reduction, through the use of alcohol or other intoxicants, of their own ability to think clearly, exercise
good judgment, and respond to rational intervention may invoke more stringent penalties than otherwise might be levied.

Penalties will be imposed according to the facts and circumstances of each case. They can be imposed singly or in combination by the Office of Residential Education/Graduate Residences, the Office of Student Activities, the Dean of Students Office, and the Office of Judicial Affairs.

CIVIL LIABILITY

While the law regarding civil liability is complex, it is important to know that under some circumstances party hosts, sponsors, bartenders, or others might be held legally liable for the consequences of serving alcohol to underage drinkers or to obviously intoxicated persons. Social hosts or party planners could be sued and found personally responsible for damages to the injured party(ies) including:

Specific damages. These are damages which are measurable. For example, when bodily injury results in medical expenses or lost wages.

General damages. These are damages which cannot be specifically measured in terms of dollar amount. For example, pain and suffering resulting from bodily injury.

Punitive damages. These are damages which are intended to serve as an example to others and to discourage behavior which is deemed highly undesirable to society.

CRIMINAL LIABILITY

Stanford University is not a sanctuary from the enforcement of state and local laws. Students and others on campus who violate the law may be and have been arrested and prosecuted. Primary responsibility for law enforcement, including that related to alcohol, rests with law enforcement agencies, primarily the Stanford University Department of Public Safety. Uniformed officers who patrol the campus and respond to calls are deputized by the Sheriff of Santa Clara County and are fully empowered and authorized to stop vehicles, make arrests, and enforce all laws. Laws are subject to change; consequently, the following information is illustrative but must not be relied on as a complete and current citing of relevant laws. More information is available at the Stanford Department of Public Safety, 711 Serra Street. Generally, it is a criminal offense:

1. To provide any alcoholic beverage to a person under 21.
2. To provide any alcoholic beverage to an obviously intoxicated person.
3. For any person under age 21 to purchase alcohol.
4. To be under the influence of alcohol in a public place
5. To possess an open container of alcohol in a public place or any place open to the public (for example, public places in student residences).
6. To operate a motor vehicle while under the influence of alcohol or any other drug. Presumed to be driving under the influence (DUI) with a blood alcohol level (BAL) of 0.08% or higher.
7. To ride a bicycle while under the influence of alcohol, drugs, or both.
8. To have an open container of alcohol in a motor vehicle; and, for persons under 21 to drive a vehicle carrying alcohol or to possess alcohol while in a motor vehicle.
9. To have in one’s possession, or to use, false evidence of age and identity to purchase alcohol.
10. To possess an open container of alcohol in a public place or any place open to the public. Applies in Palo Alto jurisdiction.
11. To be in possession of an unregistered keg. All kegs sold must be on all kegs in order to allow kegs to be traced if the contents are used in violation of the law.

WHERE TO GET HELP

In the event of a life-threatening emergencies call 9-911 from on-campus and 911 from off-campus.

Campus Resources—(Area Code 650) Counseling and Psychological Services, 24 hours (723-3785); The Alcohol and Other Drug Abuse Prevention Program (723-3429); Stanford Alcohol and Drug Treatment Center (723-6682); Vaden Health Service’s Medical Advice Line, 24 hours (723-4841); The Bridge, 24-hour Peer Counseling (723-3392).

The Alcohol and Other Drug Abuse Prevention Program at Vaden Health Service: provides information and referral, educational trainings and workshops, and non-clinical consultations for groups and individuals. The program utilizes a harm reduction approach to prevent problems associated with the use of alcohol, tobacco, and other drugs (723-3429).

The Office of Student Activities at Tresidder Memorial Union: provides workshops and training, publications, and party planning consultations. Web site: http://www-leland.stanford.edu/dept/OA/party/ (723-2733).

Community Resources—Alcoholics Anonymous (650) 592-2364, Alanon (650) 873-2356 or (408) 379-1051.

HAZING POLICY

Hazing, as defined by California Education Code sections 32050 and 32051, is not permitted at Stanford University. No individual, recognized student organization, club, team, or any other Stanford-affiliated student group shall plan, engage in, or condone hazing activities, on or off the Stanford campus.

DEFINITION OF HAZING

Education Code section 32050 states: “‘hazing’ includes any method of initiation or preinitiation into a student organization or any pastime or amusement engaged in with respect to such an organization which causes, or is likely to cause, bodily danger, physical harm, or personal degradation or disgrace resulting in physical or mental harm, to any student or other person attending any … college, university, or other education institution in this state; but the term ‘hazing’ does not include customary athletic events or other similar contests or competitions.”

Education Code section 32051 states: “No student, or other person in attendance at any … private … educational institution, shall conspire to engage in hazing, participate in hazing, or commit any act that causes or is likely to cause bodily danger, physical harm, or personal degradation or disgrace resulting in physical or mental harm to any fellow student or person attending the institution. The violation of this section is a misdemeanor, punishable by a fine of not less than one hundred dollars ($100), nor more than five thousand dollars ($5,000), or imprisonment in the county jail for not more than one year, or both.”

CONSEQUENCES OF A VIOLATION

Stanford University expects its students to conduct themselves in socially responsible and respectful ways. Thus, participation in hazing, either as an individual or as part of any student group, may result in disciplinary action up to and including expulsion, permanent loss of organizational recognition, or loss of eligibility to remain a member of any club, team, or other Stanford-affiliated student group. Consent, implied or expressed, is not a defense to any complaint or charge alleging a hazing violation.

One or more of the following may take institutional disciplinary action: the Organizational Conduct Board; Judicial Affairs; or another University office, such as the Vice Provost for Student Affairs. Institutional action may proceed whether or not a police investigation is undertaken or a criminal charge for hazing is filed by the District Attorney’s Office.

APPLICATIONS

Stanford’s hazing policy is not intended to prohibit student recruitment or new (or continuing) member activities that are positive and educational in nature, designed to instill a group ethos or unity. Its intent is to deter those behaviors that cause or are likely to cause harm to another student.

Some examples of hazing activities or events may be found online at http://osa.stanford.edu/publications/. See sections on hazing in the 2006-07 Student Organization Handbook (http://osa.stanford.edu/publications/solu/) or the Greek Guide (http://osa.stanford.edu/greek/). Questions should be directed to the Office of Student Activities, (650) 723-2733.

SMOKE-FREE ENVIRONMENT

Applicability—This policy applies to all academic and administrative units of Stanford University, including SLAC, and all campus student housing. This policy does not supersede more restrictive policies which may be in force in compliance with federal, state, or local laws or ordinances.

POLICY

The following is quoted from the policy:

1. Policy

It is the policy of Stanford University that the smoking of tobacco products in enclosed buildings and facilities and during indoor or outdoor events (and the selling of tobacco products) on the campus is prohibited.

2. Guidelines

a. Smoking-Prohibited Areas—Specifically, smoking is prohibited in classrooms and offices, all enclosed buildings and facilities, in covered walkways, in University vehicles, during indoor and outdoor athletic events, and during other University sponsored or designated indoor or outdoor events.
   - Ashtrays will not be provided in any enclosed University building or facility.
   - “Smoking Prohibited” signs will be posted.

b. Outdoor Smoking Areas—Smoking is permitted in outdoor areas, except during organized events. Outdoor smoking areas should be located far enough away from doorways, open windows, covered walkways, and ventilation systems to prevent smoke from entering enclosed buildings and facilities. To accommodate faculty, staff, and students who smoke, Vice Presidents, Vice Provosts, and Deans may designate certain areas of existing courtyards and patios as smoking areas in which case ashtrays must be provided. Costs associated with providing designated smoking areas and ashtrays will be absorbed by the specific academic or administrative unit(s).

3. Enforcement—This policy relies on the consideration and cooperation of smokers and non-smokers. It is the responsibility of all members of the University community to observe and follow this policy and its guidelines.
   a. Smoking Cessation Information—Smoking cessation programs are available for faculty and staff through the Center for Research in Disease Prevention, and the Health Improvement Program (HIP). Students may contact the Health Promotion Program (HPP) through the Student Health Center for smoking cessation information or programs.
   b. Repeated Violations—Faculty, staff, and students repeatedly violating this policy may be subject to appropriate action to correct any violation(s) and prevent future occurrences.

4. Implementation and Distribution—Copies of this policy will be disseminated by the Manager of HR Policy/Staff and Labor Relations and the Vice Provost for Student Affairs to all faculty, staff, and students, and to all new members of the University community.

UNIVERSITY STATEMENT ON PRIVACY

Stanford University has an interest in ensuring that the privacy of its students, faculty, and staff is respected, and that no activities interfere with education, research, or residential life.

The University is private property; however, some areas of the campus typically are open to visitors. These areas include White Plaza, public eating areas (such as those at Tresidder Union), outdoor touring areas, and locations to which the public has been invited by advertised notice (such as for public educational, cultural, or athletic events). Even in these locations, visitors must not interfere with the privacy of students, faculty, and staff, or with educational, research, and residential activities. The University may revoke at any time permission to be present in these, or any other areas. Visitors should not be in academic or residential areas unless they have been invited for appropriate business or social purposes by the responsible faculty member, student, or staff member.

Commercial activity, including taking photos or similar audio or visual recordings that are sold to others or otherwise used for commercial purposes, may occur on the campus without the University’s permission. Requests for permission should be submitted to the Director of University Communications or, as appropriate, the Dean of Students, the Department of Athletics, or the Office of Public Events. Recognized student groups and official units of the University will be granted such permission so long as they do not violate privacy or property interests of others; so long as any sale of their products is predominantly on campus to students, faculty, and staff; and so long as they comply with applicable University policies and procedures.

Violators of this policy may be subject to criminal and/or civil liability, as well as University disciplinary action.

COMPUTER AND NETWORK USAGE

POLICY

The following is quoted from the policy:

Users of Stanford network and computer resources have a responsibility not to abuse the network and resources. This policy provides guidelines for the appropriate and inappropriate use of information technologies.

SUMMARY

The following summarizes the policy on Computer and Network Usage:

In particular, the policy provides that users of University information resources must respect software copyrights and licenses, respect the integrity of computer-based information resources, refrain from seeking to gain or permitting others to gain unauthorized access, including by sharing passwords, and respect the rights of other computer users.

This policy covers appropriate use of computers, networks, and information contained therein. As to political, personal and commercial use, the University is a non-profit, tax-exempt organization and, as such, is subject to specific federal, state, and local laws regarding sources of income, political activities, use of property, and similar matters. It also is a contractor with government and other entities, and thus must assure proper use of property under its control and allocation of overhead and similar costs. For these reasons, University information resources must not be used for partisan political activities where prohibited by federal, state, or other applicable laws, and may be used for other political activities only when in compliance with federal, state, and other laws, and in compliance with applicable University policies. Similarly, University information resources should not be used for personal activities not related to appropriate University functions, except in a purely incidental manner. In addition, University information resources should not be used for commercial purposes, except in a purely incidental manner or except as permitted under other written policies of the University or with the written approval of a University officer having the authority to give such approval. Any such commercial use should be properly related to University activities, take into account proper cost allocations for government and other overhead determinations, and provide for appropriate reimbursement to the University for taxes and other costs the University may incur by reason of the commercial use. Users also are reminded that the .edu domain on the Internet has rules restricting or prohibiting commercial use, and thus activities not appropriately within the .edu domain and which otherwise are permissible within the University computing resources should use one or more other domains, as appropriate.

The University’s Information Security Officer is authorized in appropriate circumstances to inspect or monitor private data (including email), such as when there is a reasonable cause to suspect improper use of computer or network resources.

For further information on the topic of peer-to-peer file sharing, see the section above on Copyright.
CHAT ROOMS, BLOGS, AND OTHER FORUMS USING STANFORD DOMAINS OR COMPUTER SERVICES

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 66, Chat Rooms and Other Forums Using Stanford Domains or Computer Services, available at http://adminguide.stanford.edu/66.pdf.

POLICY

The following is quoted from the policy:

1. Definition

From time to time, University departments, faculty, students and others may host electronic communication forums, such as chat rooms, newsgroups, bulletin boards, blogs, or web sites, whereby various parties may contribute their thoughts on various subjects and where such communication is made available for others to read and comment upon. For purposes of this policy, these sites are collectively referred to as forums.

2. Establishment of Forums

a. Connection with University Activities—Forums that either use the Stanford.edu, Stanford.org, or other Stanford domains, or use University computing facilities, should be established only in connection with legitimate activities of the University.

b. University Role—Unless specifically sponsored by an academic administrative unit of the University, the University’s role in connection with these forums will be solely as a passive Internet service provider.

c. Terms of Use—In all cases, as a condition to establishing a forum, forum homepages (where they exist) and each individual forum page should contain a header that states: Subject to Terms of Use and all pages should include a link to the page maintained by the University entitled “Terms of Use.” The URL is http://www.stanford.edu/home/atoz/terms.html.

3. Operation of Forums

All forums shall be operated in compliance with the Terms of Use, as modified from time to time, and the University’s various policies regarding computer facilities and services.
