Stanford Introductory Seminars provide opportunities for first- and second-year students to work with faculty in an intimate and focused setting. These courses aim to intensify the intellectual experience of the freshman and sophomore years by allowing students to work with faculty members in a small-group setting; introducing students to the variety and richness of academic topics, methods, and issues which lie at the core of particular disciplines; and fostering a spirit of mentorship between faculty and students. See “Freshman and Sophomore Programs” in the Undergraduate Education section of this bulletin for more information.

COURSES

SOPHOMORE COLLEGE

Sophomore College offers sophomores the opportunity to study intensively in small groups with Stanford faculty for several weeks before the beginning of Autumn Quarter. It is a chance for students to immerse themselves in a subject and collaborate with peers, upper-class sophomores, and faculty in constructing a community of scholars. Students are also encouraged to explore the full range of Stanford’s academic resources in workshops and individually. At its best, Sophomore College is characterized by an atmosphere of intense academic exploration. Each Sophomore College course enrolls 12 to 14 students, who live together in a Stanford residence and receive 2 units of academic credit for the work done in the course. Eligible students have been enrolled for no more than three academic quarters, and have completed at least 36 units of academic work by the end of the Spring Quarter preceding the college, and are sophomores in the Autumn Quarter during which the college is offered, and are in good academic standing. Students must also have an on-campus housing assignment for the ensuing academic year. Transfer students are eligible in a pilot program. Admitted students who are found to have academic standing problems after the completion of Spring Quarter may have their admission revoked. The Sophomore College program fee covers tuition, room, board, books, and class-required travel arranged by the program. Students are also responsible for travel to campus or off-campus site for some off-campus seminars, phone, network activation fees, and other personal expenses. Courses are announced in March; applications are due in April. For more information or to apply, see http://soco.stanford.edu/. September 2006 courses are listed here.

BIOLOGICAL SCIENCES

BIOSCI 10SC. Natural History, Marine Biology, and Research — The biology of Monterey Bay and the coastal mountains and redwood forests of Big Sur. Literary, artistic, and political history. Topics: conservation, sanctuary, and stewardship of the oceans and coastal lands. Meetings with conservationists, authors, environmentalists, politicians, land-use planners, lawyers, scientists, and educators.
2 units, Aut (Thompson, S)

BIOSCI 11SC. The Ecology of Invasions — Introduction to invasion ecology including the animal and plant species which are transforming ecosystems around the world. Ongoing research project in the Jasper Ridge Biological Preserve to investigate why the Argentine ant, once established, eliminates most native ant species, and why a few native species are able to resist.
2 units, Aut (Gordon, D)

CHEMICAL ENGINEERING

CHEMENG 10SC. How Computer Chips Are Made — The fabrication sequence for integrated circuits. Properties of solids. Semiconductors; transistors and their function in an integrated circuit. Transistor fabrication including doping, deposition, etching, and lithography. Future trends such as smaller transistors.
2 units, Aut (Bent, S)

CIVIL AND ENVIRONMENTAL ENGINEERING

CEE 10SC. Green Buildings — What makes a building green. The efficient use of energy, water, and construction materials to provide healthful and enjoyable spaces in which to live and work. Focus is on energy efficiency and architectural features that enable a building to provide a significant fraction of its own heating, cooling, and electrical needs.
2 units, Aut (Masters, G)

COMPARATIVE LITERATURE

COMPLIT 12SC. Ghost Stories: Why the Dead Return and What They Want from Us — Anxiety about mortality and wisdom about the cultural place of the past in the enduring genre of the ghost story from classical literature to popular film. Memory and regret, mourning and forgetting. Classic authors such as Hoffmann, Poe, James, Joyce, and Ibsen, and more recent authors such as Paul Auster, Marie Darrieussecq, Catherine Lim, and Toni Morrison.
2 units, Aut (Berman, R)

DRAMA

DRAMA 10SC. Social Protest Drama and the Politics of Hip Hop Performance — Theater as a social weapon. Focus is on the 60s and 70s. How performances were shaped by their time and whether they transcend their historic context. Chicano and Black social protest theater. Past versus contemporary uses of social protest performance. Potential of Hip Hop performance as mechanism of social protest. Assignments include creating a social protest manifesto and a performance piece.
2 units, Aut (Elam, H)

ECONOMICS

2 units, Aut (Shoven, J)

ELECTRICAL ENGINEERING

EE 10SC. The Intellectual Excitement of Computer Science — Intellectual tradition of computer science. Topics include analysis of algorithms, computability, cryptography, hardware design, and artificial intelligence.
2 units, Aut (Hennessy, J; Koller, D)

ENGLISH

ENGLISH 15SC. Mixed Race in the New Millennium — Current controversies over mixed race identification. Political and aesthetic implications. Literary and pop cultural images in literature, performance, the Internet, and visual media. Legal leverage and national recognition gained in the last decade. Organizations, web sites, and affinity and advocacy groups, and their rhetoric and graphics.
2 units, Aut (Elam, M)
ETHICS IN SOCIETY

ETHICSSOC 10SC. The Meaning of Life: Moral and Spiritual Inquiry through Literature — Short novels and plays as the basis for reflection on ethical values and the purpose of life. Why are people here? How do they find meaningful work? What can death teach about life? What is the meaning of success? What is the nature of true love? How can one find balance between work and personal life? How free are people to seek their own destinies? What obligations does one have to others?
2 units, Aut (McLennan, W)

FILM AND MEDIA STUDIES

FILMSTUD 10SC. International Documentary Film — Historical, aesthetic, and formal elements of documentary through classic and contemporary international nonfiction films. Evolution of technology. How digital tools allow new filmmakers to emerge from underrepresented populations. Students create class website with documentary photo essays of a Bay Area international community.
2 units, Aut (Samuelsion, K)

GEOLOGICAL AND ENVIRONMENTAL SCIENCES

GES 12SC. Environmental and Geological Field Studies in the Rocky Mountains — Geologic origin from three billion years ago, paleoclimatology and glacial history, long- and short-term carbon cycle and global climate change, and environmental issues related to changing land-use patterns and increased demand for natural resources. Small groups analyze data to prepare reports and maps.
2 units, Aut (Chamberlain, P)

MUSIC

MUSIC 10SC. Sound, Digital Sound, and Massive Sound Media — Principles of sound production, hearing, and digital audio. Given the use of audio streaming and compression, and reliance on loudspeakers for the consumption of sound, are all aspects of sound being preserved? Team assignments in sound analysis, music recording, and instrument, and an individual topic for a web-based report.
2 units, Aut (Chafe, C)

2 units, Aut (Hadlock, H)

POLITICAL SCIENCE

POLisci 10SC. American Foreign Policy in the 21st Century — The substance of U.S. foreign policy, and the political considerations that influence the making and conduct of American diplomacy. Topics include the prospects for conflict and cooperation among the great powers, regional security, peacekeeping and peacemaking, international terrorism, the proliferation of weapons of mass destruction, the global economy, and the domestic politics of U.S. foreign policy.
2 units, Aut (Blacker, C)

POLisci 12SC. Race, Ethnicity, and the Future of California — California is now the most racially and ethnically diverse state in the nation. The challenges facing Californians in light of population trends. How has public policy responded? Focus is on population growth, education, immigration, political participation, and economic growth. Preparation of a policy proposal to the California governor.
2 units, Aut (Fraga, L)

POLisci 16SC. How European Empires Shaped the Modern World — How today’s postcolonial world is influenced by European occupation. Why were Europeans so exorted? How did Europe govern so many overseas territories for so long? The movement to political independence. Moral evaluation of the European colonial project. Readings include primary documents, historical overviews, and works analyzing imperialism, colonialism, and nationalism.
2 units, Aut (Abernethy, D)

POLisci 17SC. What’s the Matter with California? — Historical origins, evolution, and current status of California’s political system. Chronic budget volatility, legislative paralysis, and the initiative process to make law. Deteriorating educational, transportation, and energy infrastructure, demographic and economic transformations unaccompanied by commensurate political adaptations, and failure to effect political change. The executive and legislative branches. Changing characteristics of the electorate. Role of political parties. Politics of redistricting, education, transportation, energy, and the environment. Discussion with policy makers and elected officials in Sacramento.
2 units, Aut (Brady, D; Kennedy, D; Noll, R)

RELIGIOUS STUDIES

RELIGST 11SC. Religion in Science Fiction and Fantasy — How the literature of science fiction and fantasy explores current conceptions about religion. Religious themes such as free will and determinism, immortality, apocalypse, and redemption. How religion figures in the contemporary imagination.
2 units, Aut (Gelber, H)

SYMBOLIC SYSTEMS

SYMBSYS 10SC. The University as a Local and Global Citizen — How Stanford impacts communities locally and globally. Focus is on opportunities for students, faculty, staff, and the institution to serve the world. Local history and tensions between Stanford and neighbors. Faculty and student involvement in local communities. Homelessness and the disparities of wealth. Environmental problems such as air pollution, traffic, and loss of open space. Involvement in work that serves the public.
2 units, Aut (Wasow, T; Davies, T)

FRESHMAN SEMINARS AND SOPHOMORE SEMINARS AND DIALOGUES

Freshman and Sophomore Seminars and Dialogues are offered in many disciplines throughout the academic year. Freshman preference seminars are given for 3-4 units to a maximum of 16 students, and generally meet twice weekly. Although preference for enrollment is given to freshmen, sophomores and first-year transfer students may participate on a space-available basis and with the consent of the instructor. Sophomore preference seminars and dialogues, similarly, give preference to sophomores and first-year transfer students, but freshmen may participate on a space-available basis and with the consent of the instructor. Senior preference seminars are given for 3-5 units to a maximum of 14 students, while sophomore preference dialogues take the form of a directed reading, and are given for 1-2 units to a maximum of 5 students.

All seminars require a brief application. See the Time Schedule, the Stanford Introductory Seminars course catalogue published each September, or http://introsems.stanford.edu/. Due dates for 2006-07 applications for both freshman and sophomore preference courses are: Autumn Quarter, 5 p.m., September 22; Winter Quarter, noon, December 8; Spring Quarter, noon, March 16.

For course descriptions, see course listings in the teaching department section of this bulletin.
F = preference to freshmen; S = preference to sophomores; Dial = dialogue; Sem = Seminar.

  3 units, Spr (Madison, V)

NEUROLOGY AND NEUROLOGICAL SCIENCES
NENS 66Q. The Diseased Brain: Multiple Sclerosis as a Model of Neurological Illness — (S,Sem) Introduction to medical neuroscience through multiple sclerosis. Examination of gross and microscopic specimens of normal and diseased human brains; diagnostic test procedures; diagnostic reasoning processes leading to identification of illnesses; and the medical, social, and psychological dimensions of living with chronic illness and disability. Patient interviews and demonstrations of neurodiagnostic procedures such as electroencephalography (EEG), electromyography (EMG), cerebrospinal fluid analysis, and magnetic resonance imaging (MRI). Recommended: background in biological sciences.
  3 units, Win (Dorfman, L)

NEUROSURGERY
NSUR 61Q. Bio computation and Design — (S,Sem) Research and development in computerized medical technology, and applications from patient-monitoring devices and two-dimensional image-based diagnostics to robotic surgery and volumetric image-based surgical navigation. Research at Stanford in biomedical computation and biomedical design. Requirements for effective use of robotics, three-dimensional imaging, and medical informatics. Common denominators for biomedical computation and design. Usability requirements for designing software or instrumentation for clinicians and healthcare systems. Recommended: math and computer background.
  4 units, Spring (Shahidi, R)

ORTHOPEDIC SURGERY
ORTHO 95Q. Human Performance: Its Measurement and Analysis — (S,Sem) Lab-based. Measuring and interpreting human performance data. Clinical problems using the following types of tests: VO2 max, anaerobic power and endurance, flexibility, muscular strength and endurance, lactate threshold, exercise ECG and echocardiography, bone density, gait analysis, joint motion analysis, and nutritional analysis.
  3 units, Win (Matheson, G)

PATHOLOGY
PATH 103Q. Leukocyte Migration — (S,Dial)
  1 unit, Aut (Michie, S)

PATH 105Q. Final Analysis: The Autopsy as a Tool of Medical Inquiry — (S,Sem)
  3 units, Spr (Regula, D)

PEDIATRICS
PEDS 104Q. Medicine’s Greatest Discoveries — (S,Sem) Anatomy, circulation, bacteria, vaccination, anesthesia, x-ray, tissue culture, cholesterol, antibiotics, and DNA. The history of these discoveries; lives of the discoverers, including Vesalius, Harvey, Leeuwenhoek, Jenner, Roentgen, and Fleming; and trials they faced in their personal and professional journeys. Guest lectures from Medical school faculty.
  3 units, Win (Prober, C)

PEDS 111Q. Issues of Race and Ethnicity in the Health of Children — (S,Sem) Medicine and pediatrics from a public-health, evidence-based perspective. How research methods unmask health issues for at-risk racial and ethnic groups of children. Determinants of health with regard to race and ethnicity and ideas for changes in public policy. Students identify an area of interest and proposed intervention.

PHYSICS 87N. The Physics of One: Nanoscale Science and Technology — (F, Sem)
  3 units, Aut (Manoharan, H)

POLITICAL ECONOMY (GSB)
POLIECON 111Q. Game Theory and Mathematical Models in Politics — (S, Sem) Rational choice methodology in political science.
  Why have third-party candidates been unsuccessful in the U.S. when other countries often have numerous political parties? Does racial gerrymandering contribute to Republican control of the House of Representatives? Why do people vote, despite the slim chance that a single vote determines an election? Is there a difference between policy outcomes under unified government versus divided government.
