Nano Science & Engineering Education and Outreach

PI: David Goldhaber-Gordon, Nicholas A. Melosh
NSF NSEC Grant PHY-0830228
Center for Probing the Nanoscale, Stanford University

In an effort to help our researchers improve their technical presentations and ability to inspire the general public about science, CPN coordinated two Science Communication Workshops. The first on visual strategies was presented by renowned science photographer, author, and MIT research scientist Felice Frankel. The second, complementary workshop on oral strategies was presented by Doree Allen, Ph.D., Director of the Oral Communication Program at the Stanford Center for Teaching and Learning. Both workshops were well attended and highly rated by participants, and prepared our students and postdocs to do effective science outreach at several events. In particular, 22 Stanford students, post-docs and staff scientists volunteered at NanoDays 2013 for Techbridge girls.
