

CONTENTS

Preface	1
Wall-modeled large-eddy simulation of aircraft in landing configuration. K. GOC, S. T. BOSE AND P. MOIN	3
Wall-modeled large-eddy simulation of non-equilibrium turbulent boundary layers. M. CHO, G. I. PARK, A. LOZANO-DURÁN AND P. MOIN	15
An a priori study of the accuracy of an equilibrium wall model for dissociating air in supersonic channel flows. M. DI RENZO AND J. URZAY	29
Turbulence statistics in a high Mach number boundary layer downstream of an incident shock wave. L. FU, M. KARP, S. T. BOSE, P. MOIN AND J. URZAY	41
Toward large-eddy simulations of twin supersonic rectangular jets including screech. J. JEUN, G. J. WU AND S. K. LELE	55
Instabilities of supersonic jets. M. KARP AND M. J. P. HACK	67
Boundary conditions and discrete consistency of adjoint eigenvalue problems. T. FLINT AND M. J. P. HACK	79
Well-posed spatial marching of perturbations in viscous shear flows. S. R. HARRIS AND M. J. P. HACK	93
Optimization of the interface distortion of a round liquid jet. H. HWANG AND M. J. P. HACK	107
Locality in the turbulent bubble breakup cascade. W. H. R. CHAN AND P. L. JOHNSON	121
Scalar transport modeling for two-phase flows with a diffuse-interface method. S. S. JAIN AND A. MANI	137

A novel energy balance approach for a verifiable and accurate solution of radiation extinction in particle clouds. I. PAUL AND A. MANI	153
Dimension reduction of thermo-fluid mechanisms in irradiated particle-laden turbulence. L. JOFRE, Z. R. DEL ROSARIO AND G. IACCARINO	167
A frame-invariant definition of the Q -criterion. A. J. BANKO AND J. K. EATON	181
Inter-scale energy transfer in turbulence from the viewpoint of subfilter scales. J. I. CARDESA AND A. LOZANO-DURÁN	195
On the evolution of the velocity gradient tensor in transitional boundary layers. A. ELNAHHAS, P. L. JOHNSON, A. LOZANO-DURÁN AND P. MOIN	211
Toward evaluating contributions to skin friction enhancement by transition and turbulence in boundary layer flows. P. L. JOHNSON	223
Dissipation events in wall-bounded turbulence. M. J. P. HACK AND O. T. SCHMIDT	237
A minimal flow unit of the logarithmic layer in the absence of near-wall eddies and large scales. H. J. BAE AND A. LOZANO-DURÁN	247
Strain-hardening framework for Eulerian simulations of multi-material elasto-plastic deformation. M. C. ADLER AND S. K. LELE	257
Entropy-bounded discontinuous-Galerkin simulation of trans- and supercritical fluid flows. K. MAEDA AND M. IHME	273
Quantifying structural uncertainty in the BHR model for variable-density flows. Z. HUANG, J. HAYES AND G. IACCARINO	287
Estimated aleatoric uncertainty from initial and inlet conditions for variable density mixing. J. F. HEYSE, Z. HUANG AND G. IACCARINO	299

On the core-noise analysis coupling of a model gas-turbine combustor and nozzle. C. X. SHAO, K. MAEDA AND M. IHME	311
On the extension of the Pareto-efficient combustion method for autoignition prediction in turbulent flows using LES. Q. DOUASBIN AND M. IHME	321
On AC electrokinetics in the regime of high voltage and high ion diffusivity ratio. A. BALAJI, S. MIRJALILI AND A. MANI	333
Investigation of quantum algorithms for direct numerical simulation of the Navier-Stokes equations. K. P. GRIFFIN, S. S. JAIN, T. J. FLINT AND W. H. R. CHAN	347
Towards model discovery with reinforcement learning. A. LOZANO-DURÁN AND M. BASSENNE	365
Solution of the Orr-Sommerfeld equation on a calculator. M. J. P. HACK	377
Roster	387
