

## CONTENTS

<b>Preface</b>	1
<b>I. Multi-phase Flows</b>	
Overview	
J. URZAY	3
Electrically induced suppression of turbophoresis in particle-laden turbulent-channel flows.	
M. DI RENZO, P. L. JOHNSON, M. BASSENNE, L. VILLAFANE AND J. URZAY	5
Confinement, enhancement, extremes and inversions in the mixing and transport of particles by rotating turbulent flows.	
A. D. BRAGG AND R. DHARIWAL	15
Using particle-resolved LES to improve Eulerian-Lagrangian modeling of shock-wave/particle-cloud interactions.	
M. VARTDAL AND A. N. OSNES	25
Turbulent multiphase flow and deposition of ingested sand on high-temperature turbine blades.	
N. JAIN, L. BRAVO, S. T. BOSE, D. KIM, M. MURUGAN, A. GHOSHAL AND A. FLATAU	35
A dual-scale subgrid closure for LES of phase interfaces in turbulent flows.	
M. HERRMANN, D. KEDELTY AND T. ZIEGENHEIN	45
Energy cascade in a homogeneous swarm of bubbles rising in a vertical channel.	
C. C. K. LAI, B. FRAGA, W. R. H. CHAN AND M. S. DODD	55
Emulsions in homogeneous shear turbulence.	
M. E. ROSTI, Z. GE, S. S. JAIN, M. S. DODD AND L. BRANDT	65
Volume-averaged continuum approach for turbulent flows in porous media: An a-priori DNS analysis.	
S. V. APTE, X. HE AND B. D. WOOD	75
<b>II. Numerical Methods</b>	
Overview	
P. MOIN	85
Large-eddy simulation of practical aeronautical flows at stall conditions.	
O. LEHMKUHL, G. I. PARK, S. T. BOSE AND P. MOIN	87

The suitability of hybrid meshes for low-Mach large-eddy simulation. S. P. DOMINO, L. JOFRE AND G. IACCARINO	97
Large-scale space definition for the DG-VMS method based on energy transfer analyses. F. NADDEI, M. DE LA LLAVE PLATA, E. LAMBALLAIS, V. COUAILLIER, M. MASSOT AND M. IHME	107
Analysis of numerical dissipation in entropy-stable schemes for turbulent flows. S. M. MURMAN AND C. FRONTIN	117
Physics-based near-wall turbulence modeling in an enriched discontinuous Galerkin framework. Y. LV, X. I. A. YANG, G. I. PARK AND M. IHME	127
<b>III. Multi-physics and Data-driven Studies</b>	
Overview G. IACCARINO	137
Analysis and prediction of rare events in turbulent flows. P. J. SCHMID, O. T. SCHMIDT, A. TOWNE AND M. J. P. HACK	139
Low-rank modeling of primary atomization. D. J. BODONY, P. SASHITTAL AND A. TOWNE	149
Scalar source tracking in turbulent environments using deep reinforcement learning. V. SPANDAN, P. BHARADWAJ, M. BASSENNE AND L. JOFRE	155
Scalar mixing under shock/turbulence interaction: DNS, statistical and geometric analyses. X. GAO, J. BUCHMEIER, I. BERMEJO-MORENO, J. LARSSON, L. FU AND S. K. LELE	165
Leveraging large-eddy simulations to investigate the influence of temperature non-uniformity on jet noise. P. TAMMY, G. A. BRÈS, A. TOWNE AND S. K. LELE	175
Reducing the cost of shadowing-based adjoint sensitivity analysis for turbulent flows. P. J. BLONIGAN, S. M. MURMAN AND A. TOWNE	185
Toward computing sensitivities of average quantities in turbulent flows. N. CHANDRAMOORTHY, Z. N. WANG, Q. WANG AND P. TUCKER	195

Robust optimization of turbine cascades for Organic Rankine Cycles operating with siloxane MDM. N. RAZAALY, G. GORI, O. LE MAÎTRE, G. IACCARINO AND P. M. CONGEDO	205
<b>IV. Wall Turbulence</b>	
Overview A. LOZANO-DURÁN	215
Reconstructing channel turbulence from wall observations. M. P. ENCINAR, A. LOZANO-DURÁN AND J. JIMÉNEZ	217
Parametric mechanism maintaining Couette flow turbulence is verified in DNS. B. F. FARRELL, P. J. IOANNOU AND M. A. NIKOLAIDIS	227
Modeling electrical currents through an ion-selective membrane in the overlimiting regime. X. I. A. YANG, K. M. WANG, H. H. A. XU AND A. MANI	237
Regularity diagnostics applied to a turbulent boundary layer. H. J. BAE, J. D. GIBBON, R. M. KERR AND A. LOZANO-DURÁN	247
Turbulent-turbulent transition of a transient three-dimensional channel flow. S. HE, A. LOZANO-DURÁN, J. HE AND M. CHO	257
Single-point structure tensors in rough-wall turbulent channel flows. J. YUAN, G. BRERETON, G. IACCARINO, A. A. MISHRA AND M. VARTDAL	267
Virtual origins in turbulent flows over complex surfaces. G. GÓMEZ-DE-SEGURA, A. SHARMA AND R. GARCÍA-MAYORAL	277
Impact of transverse shear on turbomachinery endwall flow. J. LEE, G. XIA, G. MEDIC AND O. SHARMA	287
<b>V. Combustion</b>	
Overview M. IHME	297
Scaling and modeling of heat-release effects on subfilter turbulence in premixed combustion. J. F. MACART AND M. E. MUELLER	299
Observable regularization of two-phase flows and reacting flows. B. ABOULHASANZADEH AND K. MOHSENI	309

Direct numerical simulation, analysis, and modeling of the evaporation of multiple fuel droplets in a hot turbulent flow. C. DUWIG, G. LUPO, A. GRUBER, L. BRANDT, P. B. GOVINDARAJU, T. JARAVEL AND M. IHME	319
Physics-informed data-driven prediction of premixed flame dynamics with data assimilation. H. YU, T. JARAVEL, J. LABAHN, M. IHME, M. P. JUNIPER AND L. MAGRI	329
Generalized chaos expansion of state space models for uncertainty quantification in thermoacoustics. C. F. SILVA, P. PETTERSSON, G. IACCARINO AND M. IHME	339
A-posteriori evaluation of a deep convolutional neural network approach to subgrid-scale flame surface estimation. C. J. LAPEYRE, A. MISDARIIS, N. CAZARDY AND T. POINSOT	349
Characterizing discretization and filter effects on LES via DNS-assisted evaluations. A. K. EDOH AND T. P. GALLAGHER	359
<b>Participants' Countries/Institutions</b>	<b>369</b>
