Preservation for a Safer World

Hong-Eng Koh
Senior Director (Global Lead)
Justice & Public Safety
A Very Fragmented World with…

One Disaster, One Pandemic, One Crime, One Terror Act, One Traveler, One Cargo

Many Agencies
Massive Records Needed for a Safer World
Future Environment Must Support All Types of Data

Automated Case Files

Investigative Reports & Evidence . . .

Wiretaps & Surveillance

Forensics: Blood, Fingerprints, DNA, etc

Legacy Data Bases

Immigration Records

Open Sources & Web Products

DEA & ATF Data

Local Law Enforcement, Arrest Reports, DMV, Vehicle Registrations, Etc…

Intelligence Data

Financial Data: Bank Records, Credit Card Transactions, Hotel, Airlines, etc.

Terrorist Watch Lists

Data includes: Documents, electronic files, images, audio, Graphics, Multimedia, databases, Web products, etc…

Law Enforcement is an Information Intensive Business
Future Environment Must Support All Types of Data
Oracle Smart Policing Solution
Finnish Police

Involved parties
- Citizens
- Legal Representative
- Trusted 3rd parties
- Police Staff

Channels
- SunRay, Portal, Oracle Self Service, Contact Center Anywhere, WebCenter

Policing Operational Capabilities
- Incident Mgt

Business Intelligence
- Oracle Business Intelligence Suite, Hyperion, EPM, GRC

Information Management
- Storage, Server, Database, Clustering, IDAM, Spatial, MDM

National & Local Police/Law Enforcement
OVERVIEW
• The Labor Superior Court of Brazil evaluates employment issues and labor relations action in accordance with Brazilian Labor Laws
• Employees: More than 30,000

CHALLENGES/OPPORTUNITY
• Provide data integration between the Labor Superior Court and its 24 regional labor courts
• Standardize legacy database platforms in those courts
• Develop an IT environment that supports the high volume of information referring to court proceedings, hearing minutes, judgment sessions, and other judicial issues

SOLUTIONS
• Oracle Database
• Oracle Real Application Clusters
• Oracle Enterprise Manager
• Oracle Developer Suite
• Oracle Application Server
• Oracle Portal
• Oracle Discoverer
• Oracle SQL Developer

CUSTOMER PERSPECTIVE
“Oracle Database with Real Application Clusters increased IT performance, scalability, savings, and security in the Labor Superior Court, facilitating the integration of several labor courts.”
– Eduardo Antonini, IT Coordinator

RESULTS
• Implemented Oracle Database to organize information and processes; integrated courts with different and disconnected platforms
• Centralized information from several courts on Oracle Database and organized the data so it could be accessed by citizens via Web
• Adopted Oracle Database with Real Application Clusters to enhance IT performance, scalability, and security
• Used Oracle Developer Suite to create basic systems to control the interaction between the database and other operational systems
COMPANY OVERVIEW

- Within the Ministry of Justice, the National Offender Management Service (NOMS) manages offenders in England and Wales throughout their entire sentence
- Industry: Public Sector
- Employees: 77,000
- Revenue: US$13.9 Billion

CHALLENGES/OPPORTUNITIES

- Improve performance within the Offender Data Evaluation and Analysis Team (O-DEAT) database
- Ensure that the O-DEAT database is able to comfortably handle an expected growth of 750,000 assessments year-over-year
- Enable a team of criminologists, forensic psychologists, and researchers to produce relevant, up-to-date reports
- Strengthen database security to protect more than 3 million offender assessments from 42 probation areas and 132 prisons

CUSTOMER PERSPECTIVE

“Upgrading to Oracle Database 11g Enterprise Edition and deploying Oracle’s advanced database management tools has improved performance and security in addition to mitigating risk from this key system holding highly sensitive data.”

Robin Moore, Senior Research Officer, National Offender Management Service

RESULTS

- Improved access times to key offender tables by 30%
- Saved one day per month in IT administration time via automation
- Increased productivity through better availability and performance of the database
PUBLIC SAFETY & EMERGENCY MANAGEMENT

ORACLE
• Automate straight through processing for lower risk cases, e.g. visitor visas
• Manage complicated cases with workflow engine, e.g. asylum, immigration, citizenship
• Checks including criminal history, ‘blacklists’, ‘passenger and crew’ lists
• Access a combined view of immigrants, visitors, refugees, workers across agencies

Video Surveillance
Prague International Airport

- 2,600 cameras, 8 control centers, 62 monitoring stations
- Integrated with:
  - Automatic Number Plate Recognition
  - Abandoned object detection
  - Face recognition
- Video is stored:
  - 200 cameras 25fps for 60 days
  - 150 cameras 8fps for 60 days
  - 150 cameras 8fps for 30 days
  - 700 cameras 12fps for 15 days
- Storage:
  - 50 TB primary disk storage array
  - 50 TB secondary disk storage array
  - 600 TB available on tape library
