Oracle Release R12: What’s Changing?

In addition to Oracle’s cosmetic color change shown in the screens below, users will see:

**In iProcurement:**

New button for Managing Approval routing lists. Functionality remains the same, allowing users to add/delete approvers and change the routing sequence.

New feature allowing multiple “Favorite” folders in iProcurement Preferences for RPO and Standard items.
New country field required when entering a “one-time” ship to address:

In iOU:
Yes/No field to indicate if expense was incurred outside of U.S for foreign activity tracking.
Travel category example:

Note: When foreign activity is indicated, location fields will appear in expense lines in subsequent screens.
In PCard

Drop-down menu to select country where goods will be used.
