Several users have asked for an easily accessible way to gather information that formerly was available in the ReportMart3 167 report. In response, we have added columns for salary and hours/FTEs to the Labor Schedule Details report (found on the Labor Schedule tab). These new columns provide information on FTEs, annual salary, and standard hours per week corresponding to any defined pay period.

Note that the new columns are labeled “Historical Job Annual Rate” and “Historical Job Standard Hours/Week.” The information provided by the report will correspond to the timeline that you specify in Selection Criteria.

To see FTE information on the report, right-click while hovering your cursor over the column heading:
