

CURRICULUM VITAE

William Esco (W. E.) Moerner
Harry S. Mosher Professor and Professor, by courtesy, of Applied Physics
Department of Chemistry, Biophysics Program, and Molecular Imaging Program
Stanford University, Stanford, California 94305-5080
650-723-1727 (phone), 650-725-0259 (fax), e-mail: wmoerner@stanford.edu

Education

1975	B.S. Physics (Final Honors) B.S. Electrical Engineering (Final Honors) A.B. Mathematics (summa cum laude)	Washington University St. Louis, Missouri
1978	M.S. (Physics)	Cornell University Ithaca, New York
1982	Ph.D. (Physics)	Cornell University Ithaca, New York

Thesis Topic: Vibrational Relaxation Dynamics of an IR-Laser-Excited
Molecular Impurity Mode in Alkali Halide Lattices
Thesis Advisor: Professor A. J. Sievers

Academic Honors

1963-82	Grade Point Average of All A's (4.0)
1971-75	Alexander S. Langsdorf Engineering Fellow, Washington University
1975	Dean's Award for Unusually Exceptional Academic Achievement
1975	Ethan A. H. Shepley Award for Outstanding Achievement (university-wide)
1975-79	National Science Foundation Graduate Fellow

Career Summary

2005-	Professor, by courtesy, of Applied Physics
2002-	Harry S. Mosher Professor of Chemistry
1998-2002	Professor of Chemistry Department of Chemistry Stanford University

Multidisciplinary education and research program on single-molecule spectroscopy and quantum optics in solids, proteins, and liquids; single-molecule biophysics in cells;

nanophotonics of metallic nanoantennas; and photoactive polymer materials with emphasis on photorefractive polymers. Major milestones include: first room-temperature single-molecule source of single photons, antibunching for a single CdSe/ZnSe nanocrystal, observation of nucleotide-dependent orientational flexibility of single kinesin motors bound to microtubules, single-pair FRET for a dual-GFP sensor of calcium ion concentrations, full characterization of the single-copy properties of DsRed fluorescent proteins, first analysis of diffusion of single MHCII transmembrane protein complexes in cells, discovery of a new class of single-molecule fluorophores and development of these for cellular imaging, direct measurement of local electromagnetic field enhancement for bowtie nanoantennas and their use in surface-enhanced Raman scattering, observation of single GFP fusions in bacteria acting as nanoscale, photoswitchable light sources to show superresolved cellular structures, invention of a new trap for nanoscale objects and single biomolecules in solution, and demonstration of 3D superresolution imaging of single photoactivatable molecules with a double-helix point-spread function. Current research group includes five postdoctoral research associates, eleven graduate students, and one undergraduate.

1995-1998 Distinguished Chair in Physical Chemistry
Department of Chemistry and Biochemistry
University of California San Diego

Multidisciplinary education and research program on single-molecule spectroscopy and quantum optics in solids, proteins, and liquids; single-molecule biophysics, near-field microscopy; and photoactive polymer materials with emphasis on photorefractive polymers. Major milestones include 3-D studies of single molecules diffusing in gels, observation of blinking and switching in single GFP molecules, pumping of single molecules with whispering gallery modes of microspheres, and beam fanning and self-pumped phase conjugation in new extremely high gain photorefractive polymers. Research group included four postdoctoral research associates, three graduate students, and three undergraduates.

1994-95 Research Staff Member and Project Leader
IBM Almaden Research Center
San Jose, California

Multidisciplinary research program on single-molecule spectroscopy, near-field optics, and photorefractive (PR) polymers. Project leader for ARPA contract on PR polymers.

1993-1994 Visiting Guest Professor and IBM Research Staff Member
Laboratory for Physical Chemistry
ETH Zentrum (Swiss Federal Institute of Technology)
Zürich, Switzerland

Research program in single-molecule spectroscopy, spectral hole-burning, and near-field optics. Educated and supervised 4 Ph.D. students and two visiting scientists; lectured on single-molecule laser spectroscopy and photorefractive polymers. Major accomplishments included discovery and imaging of single molecules in Shpol'skii matrices and the first near-field single-molecule spectroscopy. Continued as consultant on IBM project on photorefractive polymer materials research and development.

1989-1993 Research Staff Member and Project Leader
 IBM Almaden Research Center
 San Jose, California

Multidisciplinary research program in Organic Optoelectronic Materials Department with two main thrust areas: (i) precision fundamental spectroscopy of defect centers in solids including single-molecule detection and spectroscopy, statistical fine structure, and spectral hole-burning, and (ii) optical and physical properties of nonlinear materials, including organic photorefractive polymeric materials.

Novel accomplishments:

Single-Molecule Spectroscopy and Spectral Hole-Burning:

Phase-sensitive, time-resolved study of ballistic phonon propagation in a solid; direct observation of spectral diffusion in a solid using a single-molecule probe; observation of lifetime-limited linewidths, dephasing, and nonlinear saturation for a single molecule; observation of hole-burning and spectral diffusion for a single molecule in a polymer; observation of photoinduced reaction kinetics for a single molecule; observation of photon antibunching for a single molecule in a solid; measurement of vibrationally dispersed fluorescence from a single molecule in a crystal and in a polymer; and magnetic resonance of a single molecular spin.

Organic Nonlinear Materials:

Intracavity second harmonic generation in an organic crystal; observation of photorefractivity in a polymer; demonstration of two-beam coupling in a photorefractive polymer; subsecond photorefractive response in a polymer; sensitization of a photorefractive polymer with C₆₀; development of photorefractive polymers with net gain and efficiency sufficient to surpass some conventional inorganic crystals; and image storage in a photorefractive polymer.

1988-1989 Manager, Laser-Materials Interactions
 IBM Almaden Research Center
 San Jose, California

Managed Research Staff Members in Laser-Materials Interactions Project which concentrated on laser spectroscopy of solids and quantum optics. Continued research on statistical properties of inhomogeneously broadened lines and on mechanisms of the photorefractive effect in electro-optic crystals. Major accomplishment: first optical detection and spectroscopy of a single impurity molecule in a solid.

1981-1988 Research Staff Member
 IBM Almaden Research Center
 San Jose, California

Performed individual research on materials and mechanisms for frequency domain optical storage using high resolution, low temperature laser spectroscopy and photochemical and nonphotochemical hole-burning spectroscopy. Developed high sensitivity measurement

techniques such as laser frequency modulation, optical normalization, and ultrasonic modulation to measure extremely small changes in optical absorption.

Novel accomplishments:

Photochemical hole burning at GaAs laser wavelengths, observation of high efficiency photochemistry for an infrared color center; observation of two-photon absorption for linear polyenes in crystals using cw lasers; detailed studies of hole-burning bottlenecks for organic and inorganic systems; use of the quantum-limited sensitivity of FM spectroscopy to measure the stimulated Raman gain in deuterium; use of high resolution ultrasonic modulation to detect photochemical holes; observation of photochemical hole production in 100 ns; complete analysis of coupled reading-writing constraints for single-photon hole-burning materials leading to the need for photon-gating; observation of photon-gated hole-burning in an organic system; development of photon-gating via a donor-acceptor electron transfer mechanism, which allowed fast (30 ns) hole formation in small focused laser spots; and observation of statistical fine structure in an inhomogeneously broadened spectral line.

1975-1981 Graduate Research Assistant and NSF Graduate Fellow
Laboratory for Atomic and Solid State Physics,
Cornell University, Ithaca, New York

Performed basic research on the vibrational relaxation dynamics of molecular impurities in alkali halides. Principal techniques included low temperature laser saturation, high resolution spectral hole burning, and coherent transient spectroscopy with CO₂ and PbSnTe diode lasers. Major accomplishments were the first measurements of T₁ and T₂ for ReO₄⁻ molecules in a variety of alkali halide hosts, and the discovery of persistent nonphotochemical spectral hole burning for a molecular vibrational mode in a crystalline lattice.

1972-1975 Research Assistant
Department of Physics
Washington University, St. Louis, Missouri

Performed experiments, computer simulations, and theory to develop more accurate formulae for the determination of ultrasonic propagation velocity and dispersion in composite resonators. Assisted in ultrasonic studies of the magnetoelastic properties of single crystal Co and Ni.

Honors and Awards

Irving Langmuir Prize in Chemical Physics, 2009
Wolf Prize in Chemistry, 2008
Member, National Academy of Sciences, 2007
Fellow, American Association for the Advancement of Science, 2004
Geoffrey Frew Fellow, Australian Academy of Sciences, 2003
Harry Stone Mosher Professor of Chemistry, Stanford University, 2002
Fellow, American Academy of Arts and Sciences, 2001
Earle K. Plyler Prize for Molecular Spectroscopy, American Physical Society, 2001

Robert Burns Woodward Visiting Professor, Department of Chemistry, Harvard University, 1997-1998
First holder of Distinguished Professorship in Physical Chemistry, Department of Chemistry and Biochemistry, University of California, San Diego, 1995-1998.
Visiting Guest Professor of Physical Chemistry, Swiss Federal Institute of Technology (ETH-Zürich), 1993-1994
IBM Outstanding Technical Achievement Award for Single-Molecule Detection and Spectroscopy, November 22, 1992
Fellow, American Physical Society, November 16, 1992
Fellow, Optical Society of America, May 28, 1992
Senior Member, IEEE, June 17, 1988
IBM Outstanding Technical Achievement Award (with R. M. Macfarlane and R. M. Shelby) for Photon-Gated Spectral Hole-Burning, July 11, 1988
National Winner of the Roger I. Wilkinson Outstanding Young Electrical Engineer Award for 1984, from the electrical engineering honorary society, Eta Kappa Nu, April 22, 1985

Lectureships

William Lloyd Evans Lecturer, Department of Chemistry, The Ohio State University, 2009
Karl Friedrich Bonhoeffer Lecturer, Max Planck Institute for Biophysical Chemistry, Göttingen, Germany, 2009
Neil Gordon Frontiers in Chemistry Lecturer, Department of Chemistry, Wayne State University, 2009
A. S. Noyes Lecturer, Department of Chemistry and Biochemistry, University of Texas at Austin, 2009
DuPont-Marshall Lecturer, Department of Chemistry, University of Pennsylvania, 2008
Herbert H. King Lecturer, Department of Chemistry, Kansas State University, 2006
Edwin Yunker Lecturer, Department of Physics, Oregon State University, 2006
A. R. Gordon Distinguished Lecturer, Department of Chemistry, University of Toronto, 2006
Lecturer, Summer School on Visualization, Manipulation, and Modeling of Single Biomolecules, ENS Paris, France, 2005
Geoffrey Frew Fellowship Lecturer, Australian Academy of Sciences (University of Queensland, Australian National University, Swinburne Institute of Technology, University of Melbourne), 2003
International Invited Lecturer (Basel, Berne, Lausanne, Geneva): Conference Universitaire de Suisse Occidentale du 3ème Cycle en Chimie, 2003
Moses Gomberg Lecturer, Department of Chemistry, University of Michigan, 2001
William Draper Harkins Lecturer, Department of Chemistry, University of Chicago, 2001
Guest Lecturer in Frontiers in Spectroscopy, Ohio State University, 1999
Arthur D. Little Lecturer, Department of Chemistry, Massachusetts Institute of Technology, 1995
Ehrenfest Colloquium Lecturer, University of Leiden, The Netherlands, March 1994
Samuel M. McElvain Lecturer, Department of Chemistry, University of Wisconsin, 1993

Patents

- U. S. Patent 4,614,116: "Phase Sensitive Ultrasonic Modulation Method for the Detection of Strain-Sensitive Spectral Features", September 30, 1986.
- U. S. Patent 5,064,264: "Photorefractive Materials", November 12, 1991.
- U. S. Patent 5,361,148: "Apparatus for Photorefractive Two-Beam Coupling," November 1, 1994.
- U. S. Patent 5,460,907: "Photorefractive Materials", October 24, 1995.
- U. S. Patent 5,607,799: "Optical Photorefractive Article," March 4, 1997.
- U. S. Patent 6,046,925: "Photochromic Fluorescent Proteins and Optical Memory Storage Devices Based on Fluorescent Proteins," April 4, 2000.
- U. S. Patent 6,280,884: "Process for Photorefractive Index Grating Formation," August 28, 2001.
- U. S. Patent 7,068,698 "Room-Temperature Source of Single Photons Based on a Single Molecule in a Condensed Matter Host," June 27, 2006.
- Application: "Improved Homodyne Interferometer and Method of Sensing Material," March 12, 1999.
- Application: "Fluorophores for Biological Imaging," June 8, 2003; filed January 19, 2007
- Application: "Method and Apparatus for Trapping Nanoscale Objects in Solution," July 14, 2004; Filed August 16, 2005.
- Application: "Fluorogenic Compounds and Their Use in Biological Systems," Provisional filed May 23, 2008.
- Application: "Three-dimensional superresolution optical imaging," Provisional filed December 17, 2008.

Ten additional published disclosures in optics, frequency domain optical storage, single-molecule applications, and photorefractive materials.

Professional Societies and Positions

Advisory Editor, *Chemical Physics Letters* 1998-
Advisory Editor, *ChemPhysChem* 2004-
Advisory Editor, *Single Molecules* 2000-2002

American Academy of Arts and Sciences

American Association for the Advancement of Science

American Chemical Society

Program Committee, Symposium on Optical Properties of Polymers, August 1996

Single-Molecule Symposium Organizer, Physical Chemistry Division, April 1997

Co-Editor, Special Issue of *Accounts of Chemical Research* on Single Molecules and Ions, December 1996

American Physical Society

Chair, Herbert P. Broida Prize Committee 2000

Member, Earle K. Plyler Prize Committee 2001

Symposium Organizer for Laser Science Topical Group, 1992 March Meeting

Symposium Organizer for Laser Science Topical Group, 1993 March Meeting

Institute of Electrical and Electronic Engineers, Lasers and Electro-Optics Society

Assistant Treasurer, 1988 Annual Meeting

Treasurer and Program Committee Member, 1989 Annual Meeting
Symposium Organizer, LEOS 1989 Annual Meeting on Optical Memory and
Storage

Materials Research Society

National Academy of Sciences

Optical Society of America

Chair, Fundamental and Applied Spectroscopy Technical Group, 1992-1994

General Chair and Founder, OSA Topical Conference on Persistent Spectral
Hole-Burning Science and Applications, 1991

Co-Editor, 2 Special Issues of J. Opt. Soc. America B on Persistent Spectral
Hole-Burning

Advisory Chair and Program Committee Member, Topical Meeting on Spectral
Hole-Burning and Luminescence, 1993-1994

Assistant Chair, Fundamental and Applied Spectroscopy Technical Group,
1992

Society of Photo-Optical Instrumentation Engineers

Program Co-Chair, Symposium on Organic Photorefractive Materials, 1996, 1997, 1998
Program Committee, 1999-2003

Conference on Quantum Electronics and Laser Science

Program Committee, 1992 and 1993

Conference on Lasers and Electro-Optics

Program Committee, 1999

International Conference on Hole-Burning and Single-Molecule Spectroscopies

Program Committee, 1996, 1999, 2003

Gordon Research Conference on Single-Molecule Approaches to Biology,

Co-Vice Chair, 2008; Co-Chair, 2010.

Task Forces and Major University Committees

Chairman, IBM Task Force on Frequency Domain Optical Storage, 1984.

Physics and Mechanisms Member, IBM Task Force on Holographic Optical Storage, 1986.

Co-Chair, Systems and Applications, IBM Optical Storage Initiative, 1988.

Member, Appointments and Promotions Committee, Division of Humanities and Sciences,
Stanford University, 2002-2004.

Member, Nanoinitiative Committee, Stanford University, Winter 2006

Member, NSF Center for Probing the Nanoscale Executive Committee, Fall 2007

Member, Stanford University Committee on Health and Safety, 2007-2008

Chair, Stanford University Committee on Health and Safety, 2008-2009

Study Panels

Member, NSF SBIR Study Panel, September, 1996.

Member, NIH Bioengineering Symposium Panel on Imaging at the Molecular and Cellular
Levels, February 27-28, 1998.

Co-Chair, Toward Molecular Scale Devices Subgroup, NSF Integrating Themes Workshop
for Physical Chemists, September 18-20, 1998, Keystone, Colorado.

Member, NIH Review Panel, November 1999; September 2000.

Member, FAMOS Update Panel, National Research Council, 1999-2002.

Member, NIH-NIGMS Workshop on Single Molecule Detection and Manipulation, 2000
Member, NSF-Intelligence Community Workshop on Approaches to Combat Terrorism, 2002.
Subgroup Chair, NIH-NIDA Workshop on Emerging Technologies: Analysis of Endogeneous Biomaterials and Single-Molecule Studies, 2002.
Member, International Review Committee for the Institute of Atomic and Molecular Sciences (IAMS) of Academia Sinica, Taiwan, 2003.
Member, NIH-BST Molecular Imaging Study Section, 2004.
Member, Pacific Northwest National Laboratory DOE-BES Review Panel, 2005.
Member, DOE Workshop on Single-Molecule Research in the New Millenium, 2005.
Member, Advisory Board, Institute of Atomic and Molecular Sciences (IAMS) of Academia Sinica, Taiwan, 2005-
Session Chair: NIH Frontiers in Live Cell Imaging Conference, April 19-21, 2006
Member, NIH-NHGRI Study Section, July, 2006.
