IN MEMORIAM PER ENGE

* Per Enge

- Vance and Arlene Coffman Professor of Engineering
- Director of the Center for Position Navigation and Time
- Member of the National Academy of Engineering
- Wide Area Augmentation System (WAAS)

JAMES & ANNA MARIE SPILKER
ENGINEERING & APPLIED SCIENCES BUILDING

IN MEMORIAM PER ENGE

I have not worked with Per nor am I an expert in geolocation technologies, but my colleagues and I followed his work and research, were inspired by all the presentations he gave to our group, and in my discussions with him, he always had a brilliant idea or advice. Everyone, and virtually every company nowadays uses or is dependent on Per's brainchildren – the modern GPS, the WAAS and LAAS systems. He is one of the greatest contributors to the advancement of navigation technology ever. Every flight is safer today, and we can be more often on time in this world because of Per!

Dragos Margineantu, Ph.D.
Ai Chief Scientist, Technical Fellow
