<ul style="list-style-type: none"> • Very intense course in a short period of time. But I really liked it. The topics were relevant to our lives. I didn't expect ethics to play such a big role in using these analytics tools! • Dan makes AI and ML interesting. I really love this course. I'm learning python after this course and want to apply some of the tools he taught in class.

<ul style="list-style-type: none"> • Maybe a shame there arent more courses with the professor. It was just superb experience! • 1.the colab design is great, however I find it hard to understand. It's better to lead us through it. 2. the last session was a bit rush, but it is quite important and interesting. I wish to have less practice on the last session but to hear more about your lecture.

<ul style="list-style-type: none"> • One of the best courses and professors at INSEAD. The attention he gives to each student while moving just at the right pace is amazing. INSEAD should consider giving Dan tenured position. • This course is very very very interesting for me. I've had operation optimization and econometrics lessons before, but I always thought that was boring. In this class, Dan ignited my interest in it. and I started to connect dots in my learning structure. Thank you Dan.
