## Divide Ride Dogs Lewis & Clark Trail **Summer 2007 Itinerary Einal** As pedaled

Most mileages are from ACA's book "Bicycling the Lewis & Clark Trail."

There are motel options in many places.

Some commentary from Marianne.

Some information from Cycle Oregon 2005 which followed L&C that year. Alan suggested this resource.Comments about Cycle Oregon, 2005. (Sept. 10-17th)

"I think it's going to be a great route with the whole Lewis and Clark thing, especially going up and over the old Rowena Road (the Historic Columbia Gorge Scenic Highway)," said Kay Weipert of Salem, who will be doing her 11th Cycle Oregon. "These Cycle Oregon things really showcase Oregon — their choices of routes is really good — and the Columbia Gorge is like a masterpiece. It should be one of the Seven Wonders of the World, in my book."

"There's no long hills, but the day we leave Corbett for Champoeg we go through the Bull Run Watershed, and there are a lot of short, steep hills," he said. "That'll be the toughest day."

The unknown factor will be the wind. On hot autumn days it can whistle down the Gorge from the east, providing a tailwind. On cooler days it blows from the west, hence a dreaded headwind.
