News Sites Network

Authors Network

Unifying Fake News Networks

Many datasets of "fake news" sites have been created in recent years. Surprisingly, these datasets do not have significant overlap. We merge datasets from three papers about fake news to create a dataset of 246 fake news web sites that were active in 2016.

Dataset Source | Domains
--- | ---

Unique Fake News Domains | 246
--- | ---

Building Bipartite Author Networks

Collection Statistics:
- Analyzed 152 sites
- Identified 4,966 authors
- Found 6,387 author-domain pairs
