Introduction to Urban Politics
POLISCI 121 (also URBANST 111 and AMSTUD 121Z)
Tuesdays and Thursdays 10:00-11:50 a.m., Building 300 Room 303 (Main Quad)

Instructor: Prof. Clayton Nall, Department of Political Science, email: nall@stanford.edu
Office Hours: Tuesdays 12-2 pm

TAs:
Julia Payson, Ph.D. Student, Political Science, email: jpayson@stanford.edu
Erik Peterson, Ph.D. Student, Political Science, email: erik.peterson@stanford.edu

Course Overview
In this course, we will develop answers to “big questions” in American urban politics.

Why should we study the politics of cities? In a global economy, cities appear to have decreasing control over their own affairs and seem to be at the mercy of economic change. Cities find themselves in competition for citizens, industries, and resources. Somehow, though, they manage to provide for densely settled populations even as they cope with their often deserved reputations for vice, dangerous streets, and public disorder. In recent decades, they have relied on aggressive (even desperate) policy initiatives ranging from slum clearance to school reform to corporate welfare to stadium construction to attract and retain desired businesses and residents. The city described here, the “limited city,” appears to play second fiddle in American politics while all the important decisions are made at the state and federal level.

Yet municipal governments, not national or state governments, are the ones with which citizens interact the most, and that have the biggest day-to-day influence on routine life. They have substantial power in areas including education, public safety, and public works, to name only a few. Cities operate at the level of basic needs: making sure water runs, sewers flow, streets are clear, and people are safe from crime and life-threatening injury. So, cities have power in a important set of issue domains. But how do they use it? How do they control their streets (and their citizens), maintain public order, shape buildings and infrastructure, and make themselves attractive to the middle class residents that drive local economies? Are their efforts working? If so, why, and if not, why not?

Each class session will be built around answering one of these big questions about cities and their role in American politics. While we will read some of the classic research in American urban politics, we will build much of our class discussion around recent debates over the proper role of local governments, approaching these controversies with knowledge gleaned from the social sciences. The readings cover ongoing debates over the drug war, police militarization, urban development projects, and suburban sprawl. Students will get direct experience dealing with these issues through four short field research projects conducted in cities in Silicon Valley.
Learning Objectives
By the end of this class, you should have an improved understanding of the place of local government in American politics, and will have learned to approach major questions about cities and their role from a social-science perspective. You will have gained direct experience in survey research, obtaining information from government bureaucracies, and converting social observations into usable data for social science analysis.

Prerequisites
While the course catalog lists POLISCI 2 as a prerequisite, I am happy to waive that requirement. However, equivalent knowledge of American politics and social science research is highly recommended.

Grading Criteria
The grading criteria are intended to place approximately equal emphasis on course readings and research. The course will appear to be heavy on quizzes and exams, but these are designed to ensure continual focus on the class while. The semi-“pop” quizzes will cover only material taught since the previous quiz.

40% Field Research (4 group projects, distributed throughout quarter)
25% Five quizzes on readings and lectures (5% each, unscheduled but announced at end of previous class)
25% Final Exam
10% In-Class Participation (5% determined by two random roll calls in discussion section during quarter, 5% by TA evaluation of section participation)

We will use the standard Stanford numerical grading scale for all assignments, quizzes, and exams. Quiz and exam grades will be “curved up” at Professor Nall’s discretion, never curved down.

Assigned Books

Students with Documented Disabilities: Students who may need an academic accommodation based on the impact of a disability must initiate the request with the Office of Accessible Education (OAE). Professional staff will evaluate the request with required documentation, recommend reasonable accommodations, and prepare an Accommodation Letter for faculty dated in the current quarter in which the request is made. Students should contact the OAE as soon as possible since timely notice is needed to coordinate accommodations. The OAE is located at 563 Salvatierra Walk (phone: 723-1066, URL: http://studentaffairs.stanford.edu/oae).
Class Schedule

Week 1. January 7 and 9
What are cities for, and what powers do they have? (Part I: The Limited City)

Judd and Swanstrom, Ch. 2

Field Research Project: Documenting the Local Governments of Silicon Valley. Assigned January 9, due at start of class January 16.

Week 2. January 14 and 16
What are cities for, and what powers do they have? (Part II: The Powers of Cities)

James Scott (1998). *Seeing Like a State*, Ch. 2. [Coursework]

Elaine Sharp (2005). Morality Politics in American Cities, Ch. 5 [Coursework]

Radley Balko (2013). “‘Why Did You Shoot Me? I Was Reading a Book’: The New Warrior Cop is Out of Control.” *Salon* (July 7) [Coursework]

http://www.theguardian.com/world/2013/may/25/the-wire-creator-us-drug-laws
Week 3 - 4. January 21 and 23; January 28
Who governs cities? (Part I: Machine Politics and Governing Coalitions)

Judd and Swanstrom, Ch. 3

Jessica Trounstine (2008). Political Monopolies in American Cities, Ch. 1. [Coursework]

Clarence Stone, “Urban Regimes,” in Judd and Kantor, pp. 20-34.

Week 4 – 5. January 30; February 4
Who governs cities? (Part II: Reform and Its Consequences)

Judd and Swanstrom, Ch. 4

**Week 5. February 6**

**How do cities deliver services?**

Judd and Swanstrom Ch. 12 (pp. 320 – 321; 331 – 336)

**Week 6. February 11 and 13**

**Why are cities so invested in big development projects, and what do they achieve?**

View the PBS documentary, American Experience, *The World that Moses Built*. Currently available on Youtube. Also available for in-library use at Green Library.

Part I: http://www.youtube.com/watch?v=lUml6mUzSH8
Part II: http://www.youtube.com/watch?v=mtU-2KZJzRQ
Part III: http://www.youtube.com/watch?v=r7UIM-AgIOg
Part IV: http://www.youtube.com/watch?v=QiEd5KnGE6w
Part V: http://www.youtube.com/watch?v=22JdtAhX4oU
Part VI: http://www.youtube.com/watch?v=qJtq9sdNuaU
Part VII: http://www.youtube.com/watch?v=o11VJ002Mjc

**Week 7. February 18 and 20**

*How do the rules of the game shape city elections? Can local elections be made more “fair”?*

Lance Williams (2011). “Critics aim to end ranked-choice voting after SF mayoral race.” California Watch, 15 November. [Coursework]

**Week 8. February 25 and 27**

*How does racial diversity shape city politics?*

J. Eric Oliver, “Paradoxes of Integration,” in Judd and Kantor, pp. 198-213.

**Week 9. March 4 and 6**
How do citizens decide where to live, and what are the consequences for cities?

Ryan Avent (2012). *The Gated City* (Kindle Single) [Sold for $1.99 on Amazon.com and readable using Kindle or various Kindle apps.]

*Field Research Project: Topic TBD. Assigned March 4, due March 13.*

**Week 10. March 11 and 13**
Are suburbs and cities in conflict?

Judd and Swanstrom, Chs. 6-7.

*Final Exam: Thursday, March 20, 2014, 7:00 p.m.-10:00 p.m.*
