

# Week 2 Tutorial

## *Set Theory and Proofwriting*

# Outline for Today

- ***Tutorial Logistics***
  - Welcome! How do these work?
- ***Set Theory Review***
  - Making sense of a scramble of symbols.
- ***Proofs on Set Theory***
  - How to go from a theorem to a proof.
- ***Words of Caution (ITA)***
  - How not to write a set theory proof.

# General Logistics

- Welcome to your first tutorial session! Here's what to expect each week.
  - Tutorials are one-hour sessions every week.
  - It's best if you choose the same session week to week, but this is not required.
  - We will record one session per week. If you're unable to attend any tutorials, you may make up the exercises by Friday at noon Pacific time.
  - You must attend or make up at least 7/9 tutorials for an A, at least 6/9 for a B, etc. (See the Course Information handout for more details.)
  - Attending and making up are equivalent as far as grade calculations.

# Tutorial Format

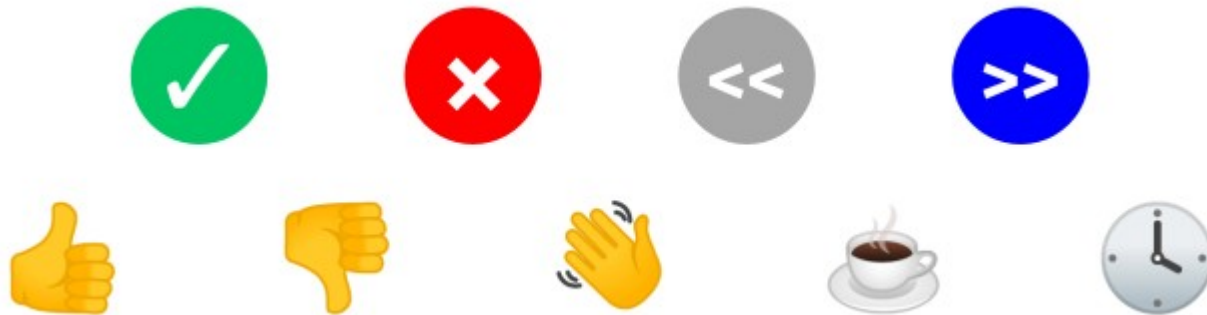

- We'll be walking through some problems designed to solidify the concepts covered in this week's assignment.
  - These will focus on problem-solving techniques rather than teaching new content, so the expectation is that you're caught up on lectures!
- We'll periodically split off into breakout rooms, where you'll get a chance to discuss in smaller groups.

# Tutorial Exercises

- Each tutorial has a corresponding assignment in Gradescope consisting of a few short answer questions.
- During the live tutorial sessions, we'll complete these questions together.
- If you are making up a tutorial, you will be responsible for watching the recording and submitting answers for the exercises on your own.

# Things to Do Right Now

- On Zoom, press the “Participants” button. You should see these nine icons:

- The bottom row may be under the “More...” option.
- We’ll ask you to use these icons for informal polling. To test it, let’s have everyone press the “coffee mug” icon.”

# Things to Do Right Now

- Go to Gradescope ([www.gradescope.com](http://www.gradescope.com)) and pull up “Tutorial Exercises Week 2.”
  - You’ll need this to be able to submit your answers as we go.
- Go to Canvas, select “Files,” choose “Tutorial Sessions,” then pick “Tutorial Week 2 Slides.pdf.”
  - This will help you follow along and will be necessary for breakout sessions.
- Once you’re done, react with .

# ***Introduction:***

How to Approach CS103

# Mental Traps to Avoid

# Mental Traps to Avoid

- “Everyone else has been doing math since before they were born and there is no way I'll ever be as good as them.”

# Mental Traps to Avoid

- “Everyone else has been doing math since before they were born and there is no way I'll ever be as good as them.”
- “A small minority of people are math geniuses and everyone else has no chance at being good at math.”

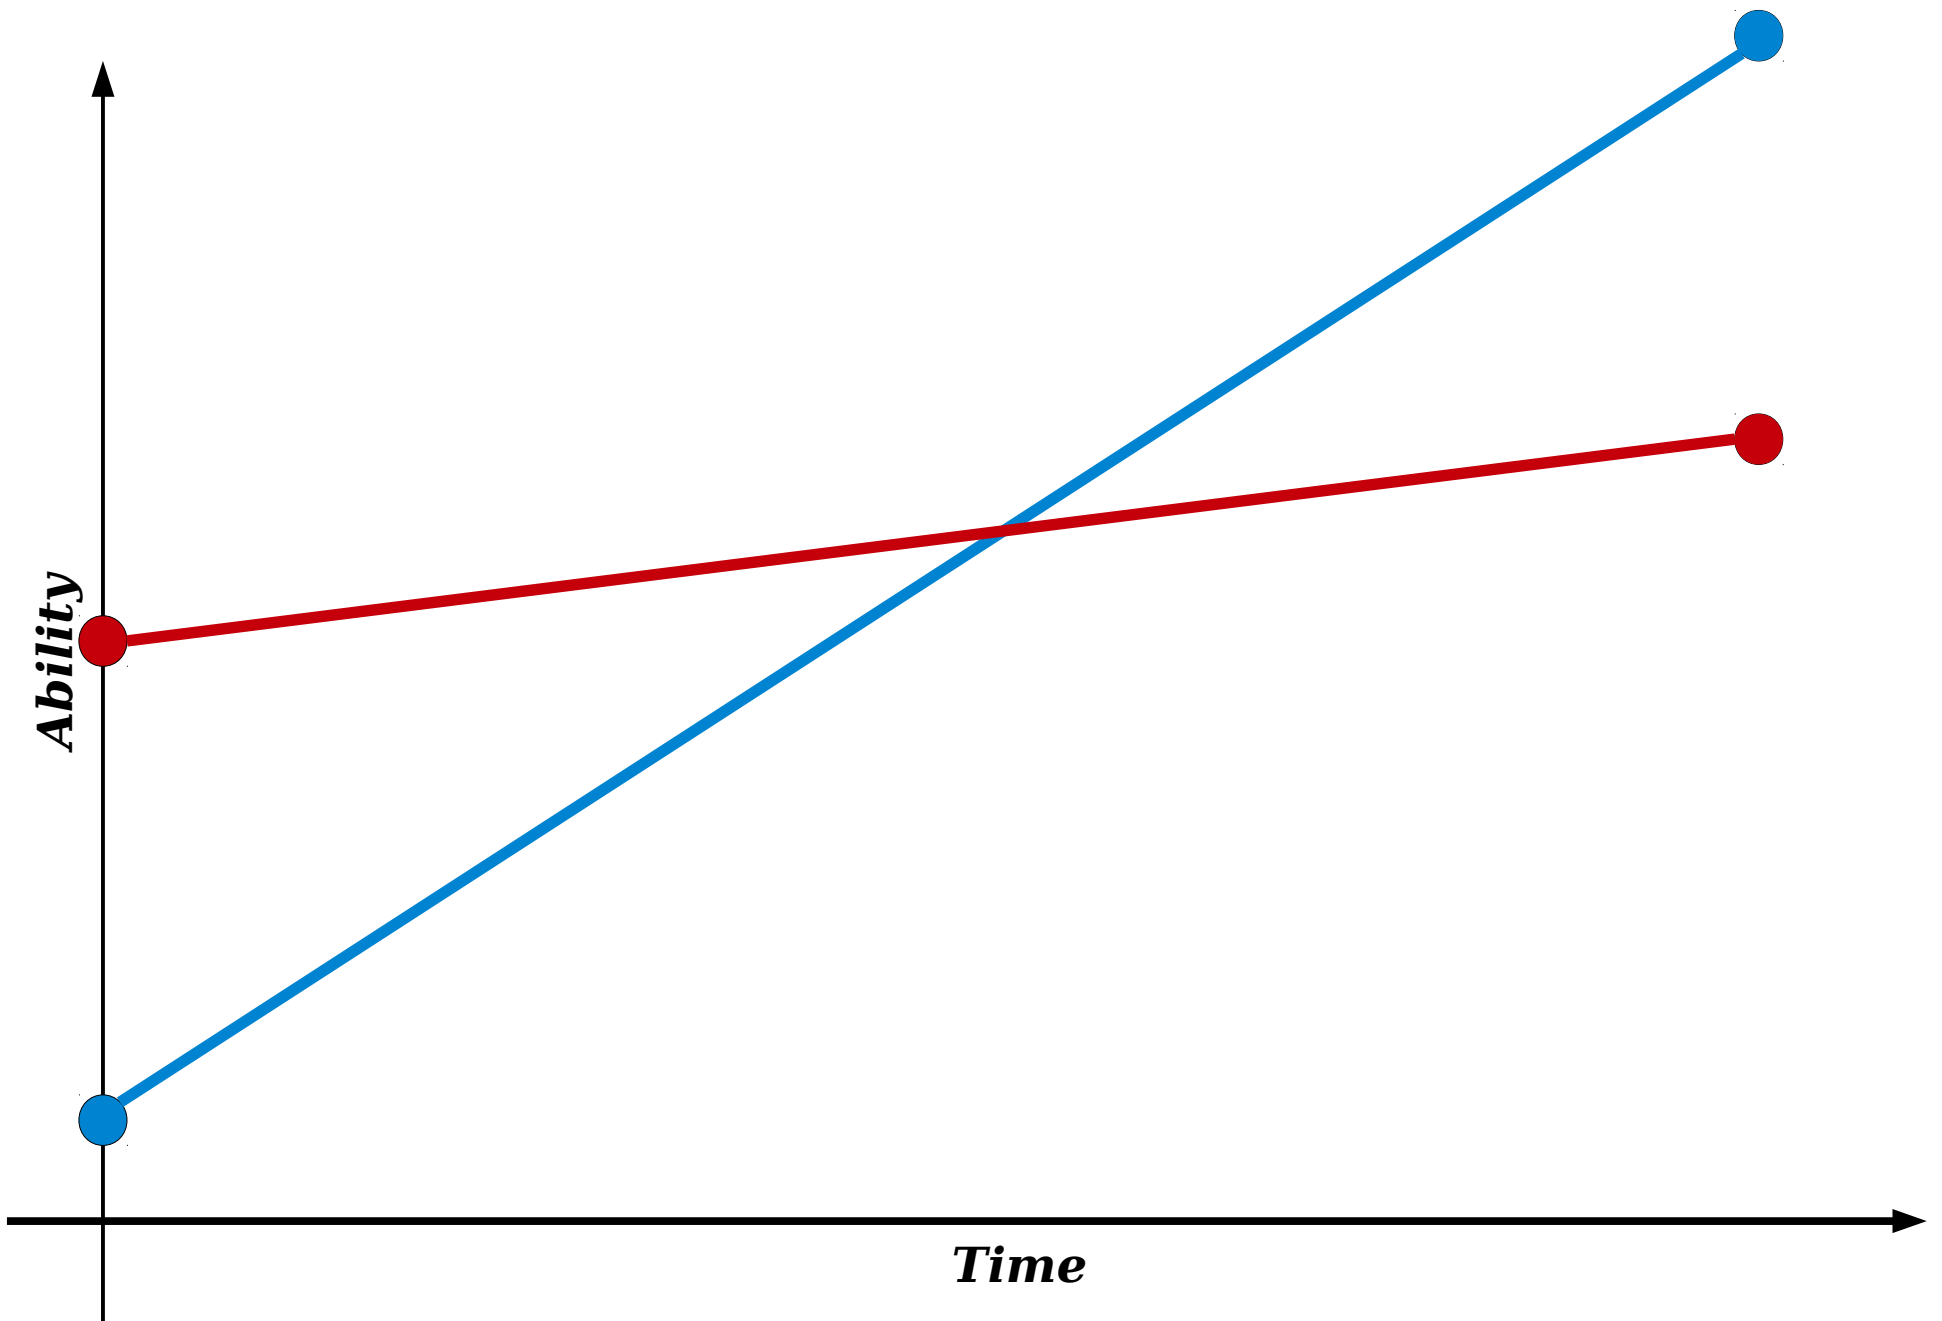

# Mental Traps to Avoid

- “Everyone else has been doing math since before they were born and there is no way I'll ever be as good as them.”
- “A small minority of people are math geniuses and everyone else has no chance at being good at math.”
- “Being good at math means being able to instantly solve any math problem thrown at you.”

# Mental Traps to Avoid

- “Everyone else has been doing math since before they were born and there is no way I'll ever be as good as them.”
- “A small minority of people are math geniuses and everyone else has no chance at being good at math.”

“Being good at math means being able to instantly solve any math problem thrown at you.”

“A little slope makes up for a lot of y-intercept.”  
- John Ousterhout

## ***Fun Math Question***

Suppose you improve at some skill at a rate of 1% per day. How much better at that skill will you be by the end of the year?

## ***Fun Math Question***

Suppose you improve at some skill at a rate of 1% per day. How much better at that skill will you be by the end of the year?

After one day, you're 1.01 times better.

## ***Fun Math Question***

Suppose you improve at some skill at a rate of 1% per day. How much better at that skill will you be by the end of the year?

After one day, you're 1.01 times better.

After two days, you're  $(1.01)^2$  times better.

## ***Fun Math Question***

Suppose you improve at some skill at a rate of 1% per day. How much better at that skill will you be by the end of the year?

After one day, you're 1.01 times better.

After two days, you're  $(1.01)^2$  times better.

After one year, you'll be  $(1.01)^{365} \approx 37.8$  times better!

***Pro Tip:***

Avoid an Ingroup/Outgroup Mindset

# Mental Traps to Avoid

- “Everyone else has been doing math since before they were born and there is no way I'll ever be as good as them.”
- “A small minority of people are math geniuses and everyone else has no chance at being good at math.”
- “Being good at math means being able to instantly solve any math problem thrown at you.”

# Mental Traps to Avoid

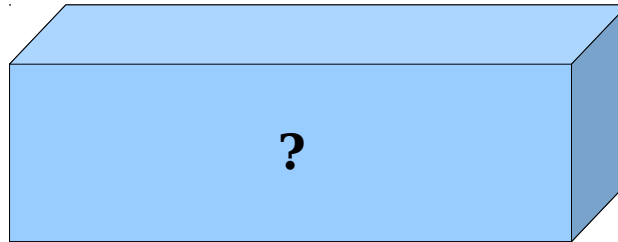

“Everyone else has been doing math since before they were born and there is no way I'll ever be as good as them.”

“A small minority of people are math geniuses and everyone else has no chance at being good at math.”

- “Being good at math means being able to instantly solve any math problem thrown at you.”

# Simple Open Problems

- Math is often driven by seemingly simple problems that no one knows the answer to.
- Example: the ***integer brick problem***:

***Is there a rectangular brick where all lines connecting two corners have integer length?***

- Having open problems like these drives the field forward – it motivates people to find new discoveries and to invent new techniques.

# Getting Good at Math

- It is ***perfectly normal*** to get stuck or be confused when learning math.
- ***Engage with the concepts.*** Work through lots of practice problems. Play around with new terms and definitions on your own time to see how they work.
- ***Ask for help when you need it.*** We're here to help you. We want you to succeed, so let us know what we can do to help!
- ***Work in groups.*** Get help from your problem set partner, the TAs, and your tutorial session buddies.

# Set Theory Warmup

Consider the following sets:

$$A = \{ 0, 1, 2, 3, 4 \}$$

$$B = \{ 2, 2, 2, 1, 4, 0, 3 \}$$

$$C = \{ 1, \{2\}, \{\{3, 4\}\} \}$$

$$D = \{ 1, 3 \}$$

$$E = \mathbb{N}$$

$$F = \{ \mathbb{N} \}$$

1. Answer each of the following questions:

- a) Which pairs of the above sets, if any, are equal to one another?
- b) Is  $D \in A$ ? Is  $D \subseteq A$ ?
- c) What is  $A \cap C$ ? How about  $A \cup C$ ? How about  $A \Delta C$ ?
- d) What is  $A - C$ ? How about  $\{A - C\}$ ? Are those sets equal?
- e) What is  $|B|$ ? What is  $|E|$ ? What is  $|F|$ ?
- f) What is  $E - A$ ? Express your answer in set-builder notation.
- g) Is  $0 \in E$ ? Is  $0 \in F$ ?

***Fill in answer on Gradescope!***

# Proofs on Sets

***Theorem:*** For any sets  $A$ ,  $B$ , and  $C$ ,  
if  $A \cup B \subseteq C$ , then  $A \subseteq C$ .

## ***What I'm Assuming***

$$A \cup B \subseteq C$$

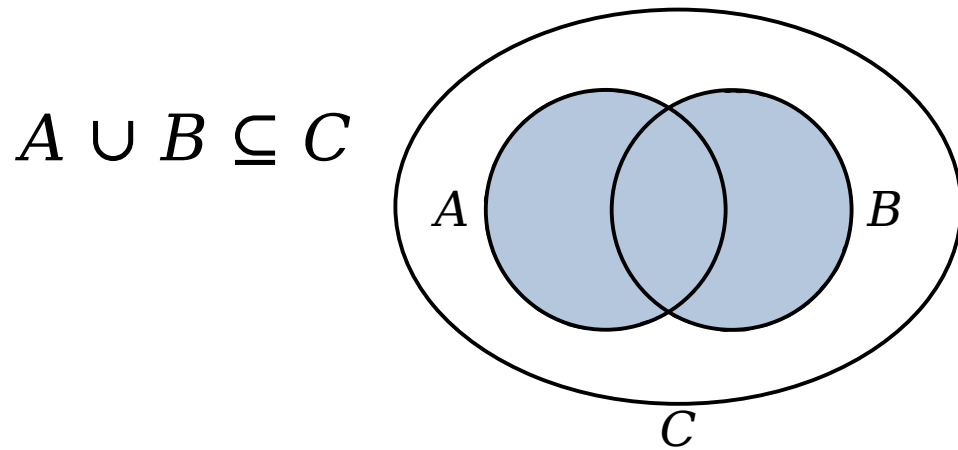

## ***What I Need to Prove***

$$\cancel{A \subseteq C}$$

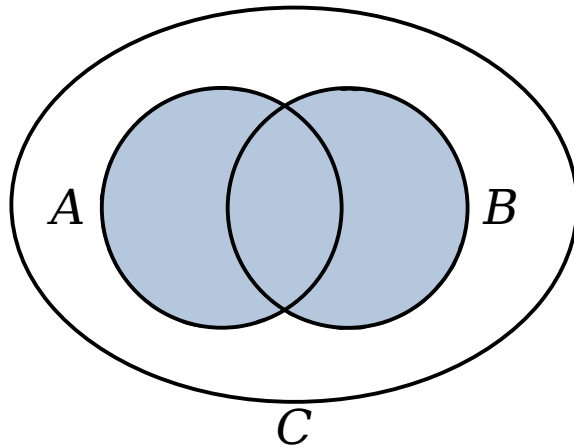

**Theorem:** For any sets  $A$ ,  $B$ , and  $C$ , if  $A \cup B \subseteq C$ , then  $A \subseteq C$ .

**Proof:** Let  $A$ ,  $B$ , and  $C$  be sets where  $A \cup B \subseteq C$ . We want to show that  $A \subseteq C$ . To do so, pick an  $x \in A$ . We will show that  $x \in C$ .

## ***What I'm Assuming***

$$A \cup B \subseteq C$$

$$x \in A$$

## ***What I Need to Prove***

$$~~A \subseteq C~~$$

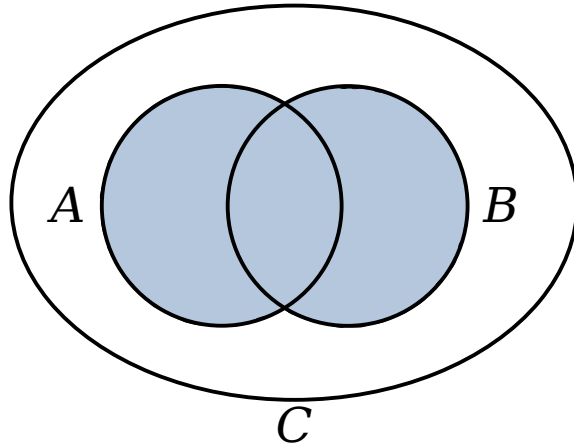

**Theorem:** For any sets  $A$ ,  $B$ , and  $C$ , if  $A \cup B \subseteq C$ , then  $A \subseteq C$ .

**Proof:** Let  $A$ ,  $B$ , and  $C$  be sets where  $A \cup B \subseteq C$ . We want to show that  $A \subseteq C$ . To do so, pick an  $x \in A$ . We will show that  $x \in C$ .

## ***What I'm Assuming***

$$A \cup B \subseteq C$$

$$x \in A$$

## ***What I Need to Prove***

$$\cancel{A \subseteq C}$$

$$x \in C$$

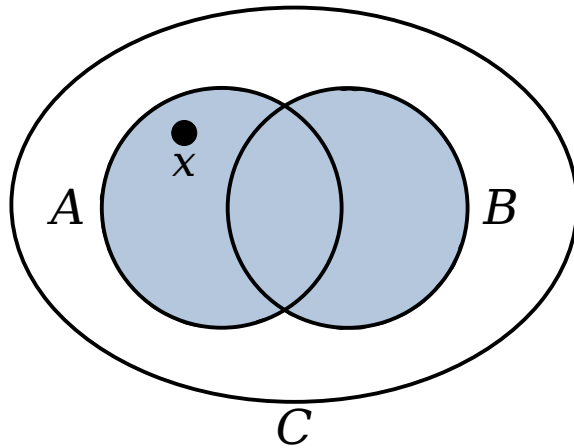

**Theorem:** For any sets  $A$ ,  $B$ , and  $C$ , if  $A \cup B \subseteq C$ , then  $A \subseteq C$ .

**Proof:** Let  $A$ ,  $B$ , and  $C$  be sets where  $A \cup B \subseteq C$ . We want to show that  $A \subseteq C$ . To do so, pick an  $x \in A$ . We will show that  $x \in C$ .

## ***What I'm Assuming***

$$A \cup B \subseteq C$$

$$x \in A$$

## ***What I Need to Prove***

~~$$A \subseteq C$$~~

$$x \in C$$

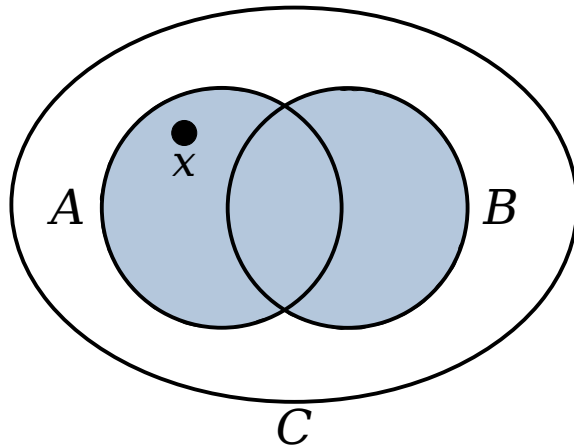

**Theorem:** For any sets  $A$ ,  $B$ , and  $C$ , if  $A \cup B \subseteq C$ , then  $A \subseteq C$ .

**Proof:** Let  $A$ ,  $B$ , and  $C$  be sets where  $A \cup B \subseteq C$ . We want to show that  $A \subseteq C$ . To do so, pick an  $x \in A$ . We will show that  $x \in C$ .

## What I'm Assuming

$$A \cup B \subseteq C$$

$$x \in A$$

## What I Need to Prove

$$\cancel{A \subseteq C}$$

$$x \in C$$

**Theorem:** For any sets  $A$ ,  $B$ , and  $C$ , if  $A \cup B \subseteq C$ , then  $A \subseteq C$ .

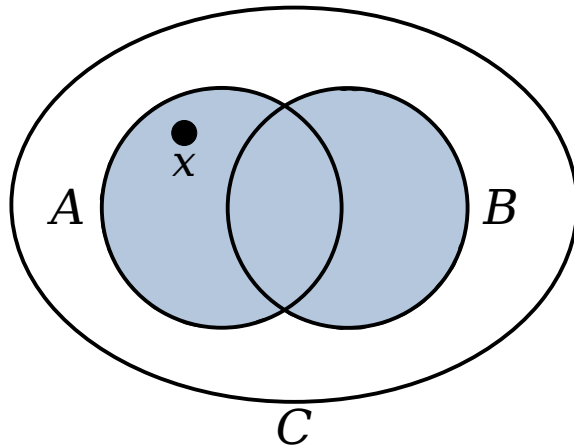

**Proof:** Let  $A$ ,  $B$ , and  $C$  be sets where  $A \cup B \subseteq C$ . We want to show that  $A \subseteq C$ . To do so, pick an  $x \in A$ . We will show that  $x \in C$ .

Because  $x \in A$ , we know that  $x \in A \cup B$ . Then, since  $x \in A \cup B$  and  $A \cup B \subseteq C$ , we learn that  $x \in C$ , which is what we needed to show. ■

## What I'm Assuming

$$A \cup B \subseteq C$$

$$x \in A$$

## What I Need to Prove

~~$$A \subseteq C$$~~

$$x \in C$$

**Theorem:** For any sets  $A$ ,  $B$ , and  $C$ , if  $A \cup B \subseteq C$ , then  $A \subseteq C$ .

**Proof:** Let  $A$ ,  $B$ , and  $C$  be sets where  $A \cup B \subseteq C$ . We want to show that  $A \subseteq C$ . To do so, pick an  $x \in A$ . We will show that  $x \in C$ .

Because  $x \in A$ , we know that  $x \in A \cup B$ . Then, since  $x \in A \cup B$  and  $A \cup B \subseteq C$ , we learn that  $x \in C$ , which is what we needed to show. ■

**Theorem:** For any sets  $A$ ,  $B$ , and  $C$ , if  $A \cup B \subseteq C$ , then  $A \subseteq C$ .

**Proof:** Let  $A$ ,  $B$ , and  $C$  be sets where  $A \cup B \subseteq C$ . We want to show that  $A \subseteq C$ . To do so, pick an  $x \in A$ . We will show that  $x \in C$ .

Because  $x \in A$ , we know that  $x \in A \cup B$ . Then, since  $x \in A \cup B$  and  $A \cup B \subseteq C$ , we learn that  $x \in C$ , which is what we needed to show. ■

Why Write Things This Way?

***Claim:*** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  
 $C \subseteq A$  or  $C \subseteq B$  (or both).

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Incorrect! Proof:** Consider arbitrary sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ .

This means that every element of  $C$  is in either  $A$  or  $B$ . If all elements of  $C$  are in  $A$ , then  $C \subseteq A$ . Alternately, if everything in  $C$  is in  $B$ , then  $C \subseteq B$ . In either case, everything inside of  $C$  has to be contained in at least one of these sets, so the theorem is true. ■

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Incorrect! Proof:** Consider arbitrary sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ .

This means that every element of  $C$  is in either  $A$  or  $B$ . If all elements of  $C$  are in  $A$ , then  $C \subseteq A$ . Alternately, if everything in  $C$  is in  $B$ , then  $C \subseteq B$ . In either case, everything inside of  $C$  has to be contained in at least one of these sets, so the theorem is true. ■

3. What's wrong with this proof?

**Fill in answer on Gradescope!**

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Incorrect! Proof:** Consider arbitrary sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ .

This means that every element of  $C$  is in either  $A$  or  $B$ . If all elements of  $C$  are in  $A$ , then  $C \subseteq A$ .

Alternately, if everything in  $C$  is in  $B$ , then  $C \subseteq B$ .

In either case, everything inside of  $C$  has to be contained in at least one of these sets, so the theorem is true. ■

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Incorrect! Proof:** Consider arbitrary sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ .

This means that every element of  $C$  is in either  $A$  or  $B$ . If all elements of  $C$  are in  $A$ , then  $C \subseteq A$ .  
Alternately, if everything in  $C$  is in  $B$ , then  $C \subseteq B$ .  
In either case, everything inside of  $C$  has to be contained in at least one of these sets, so the theorem is true. ■

This is just repeating definitions and not making specific claims about specific variables.

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Incorrect! Proof:** Consider arbitrary sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ .

This means that every element of  $C$  is in either  $A$  or  $B$ . If all elements of  $C$  are in  $A$ , then  $C \subseteq A$ . Alternately, if everything in  $C$  is in  $B$ , then  $C \subseteq B$ . In either case, everything inside of  $C$  has to be contained in at least one of these sets, so the theorem is true. ■

Why is this bad?

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Incorrect! Proof:** Consider arbitrary sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ .

This means that every element of  $C$  is in either  $A$  or  $B$ . If all elements of  $C$  are in  $A$ , then  $C \subseteq A$ . Alternately, if everything in  $C$  is in  $B$ , then  $C \subseteq B$ . In either case, everything inside of  $C$  has to be contained in at least one of these sets, so the theorem is true. ■

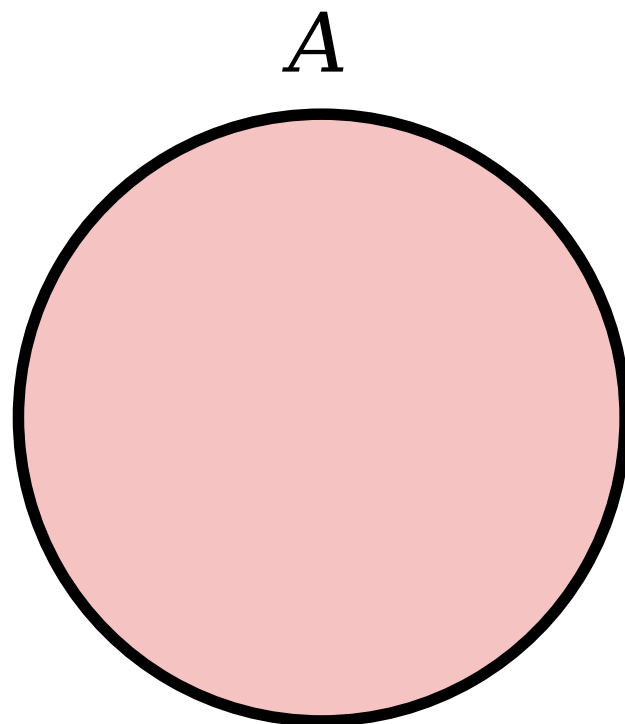

Did we cover every possible case?

# Let's Draw Some Pictures!

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  
 $C \subseteq A$  or  $C \subseteq B$  (or both).

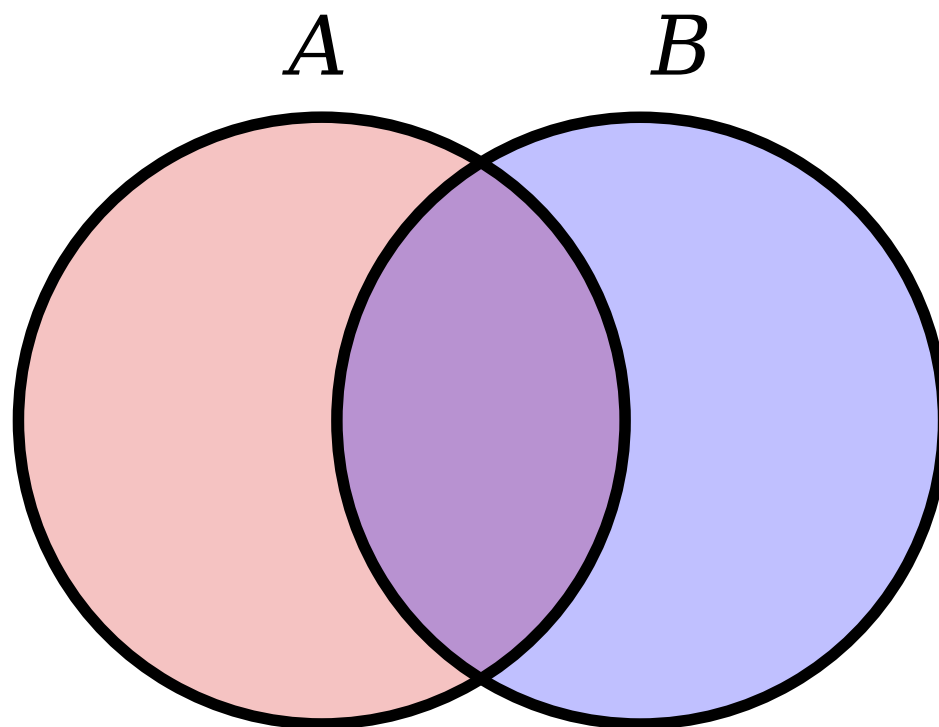

# Let's Draw Some Pictures!

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

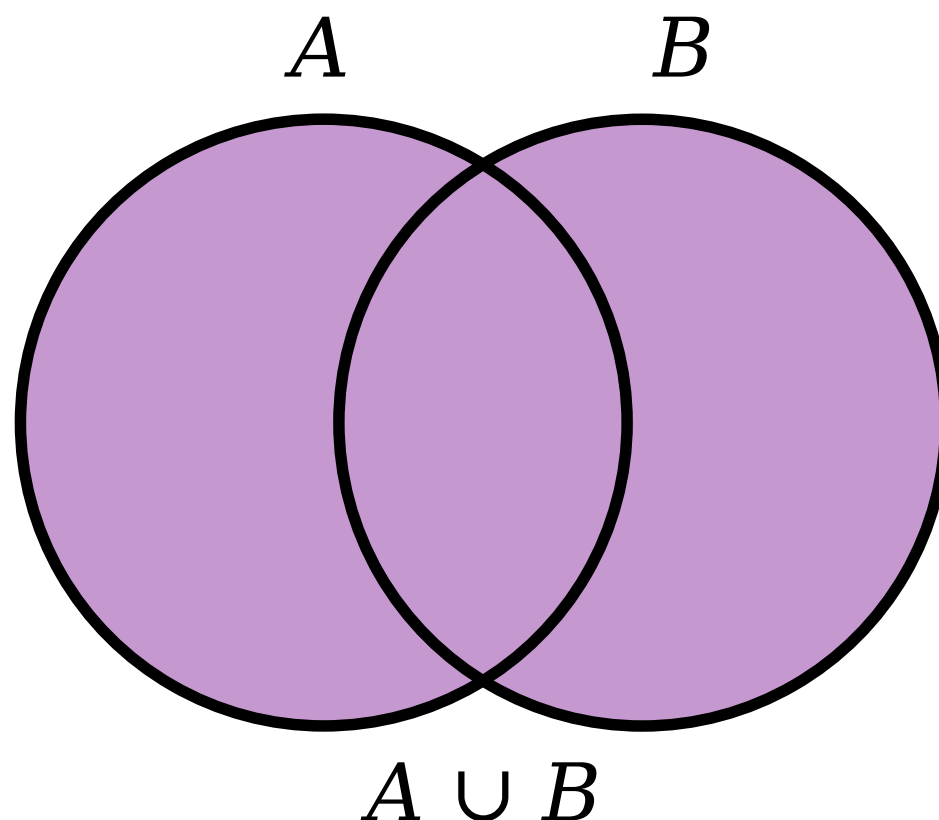

# Let's Draw Some Pictures!

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

# Let's Draw Some Pictures!

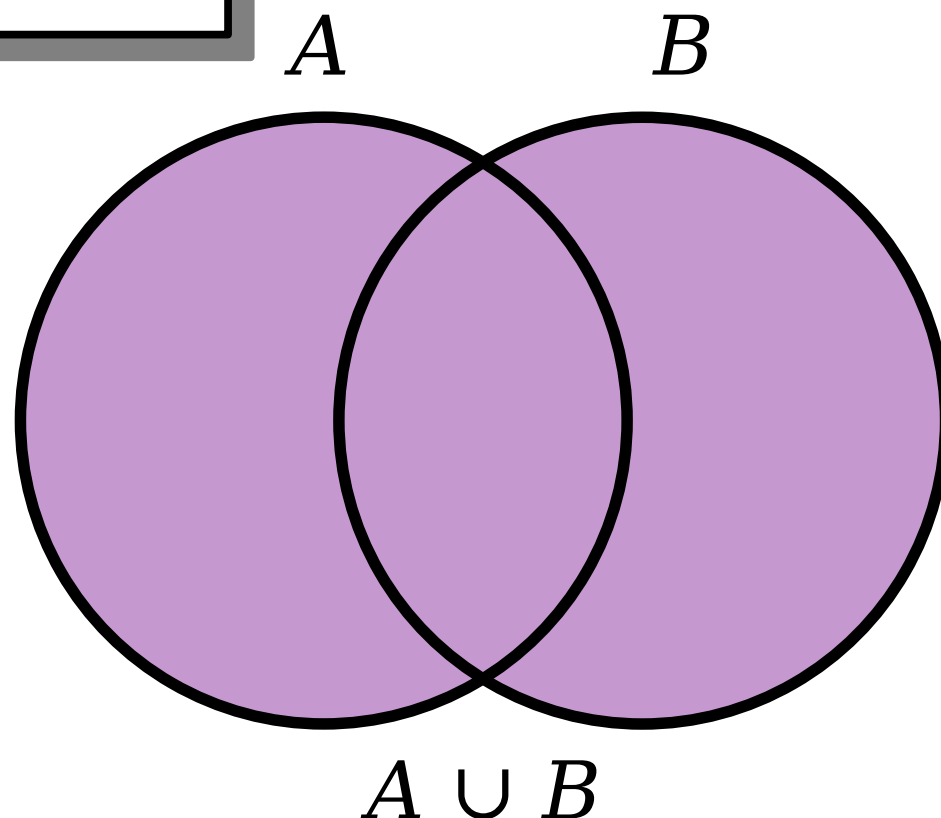

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

# Let's Draw Some Pictures!

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

Recall the intuition of a subset being "something I can circle"

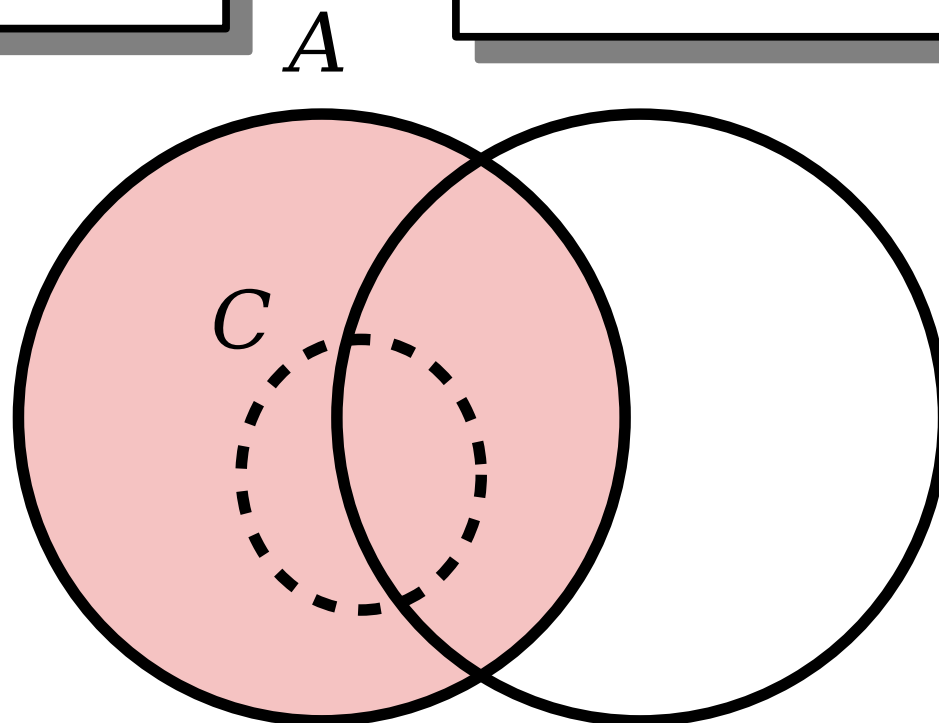

# Let's Draw Some Pictures!

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

Recall the intuition of a subset being "something I can circle"

so  $C \subseteq A$  would mean that  $C$  is something I can circle in this region.

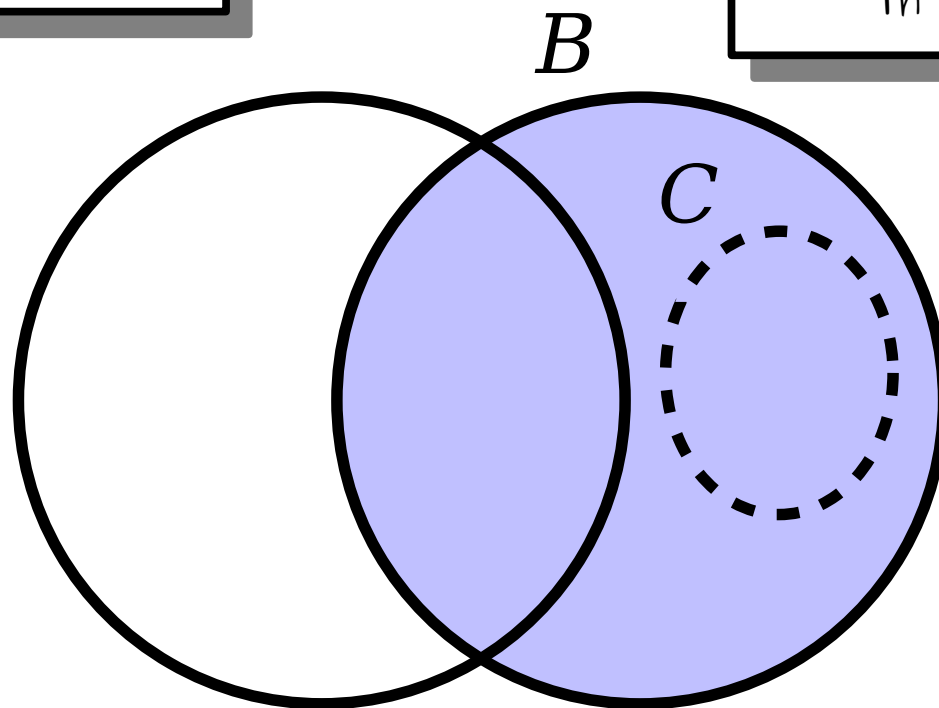

# Let's Draw Some Pictures!

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

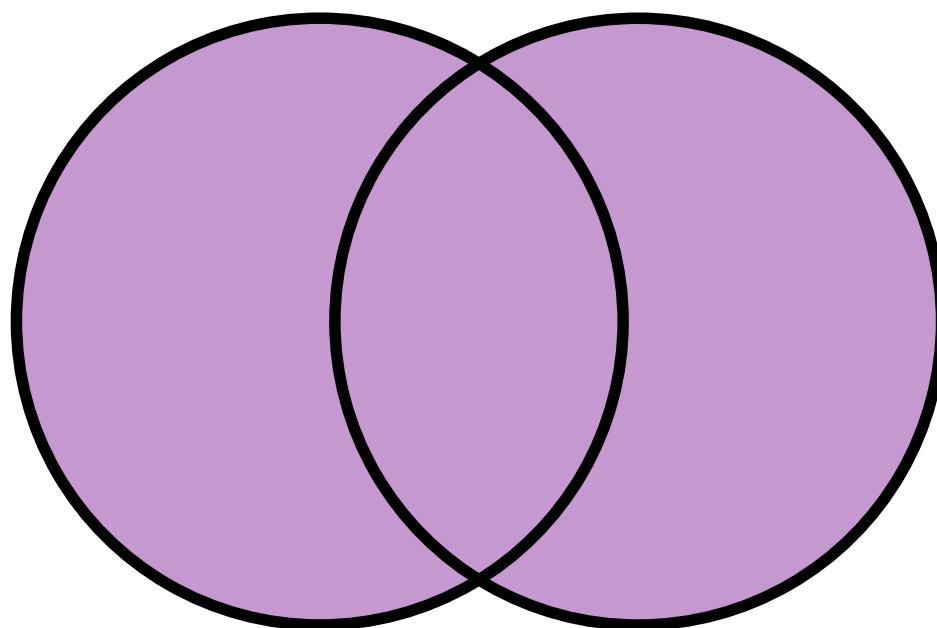

Recall the intuition of a subset being "something I can circle"

Likewise,  $C \subseteq B$  would mean that  $C$  is something I can circle in this region.

# Let's Draw Some Pictures!

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

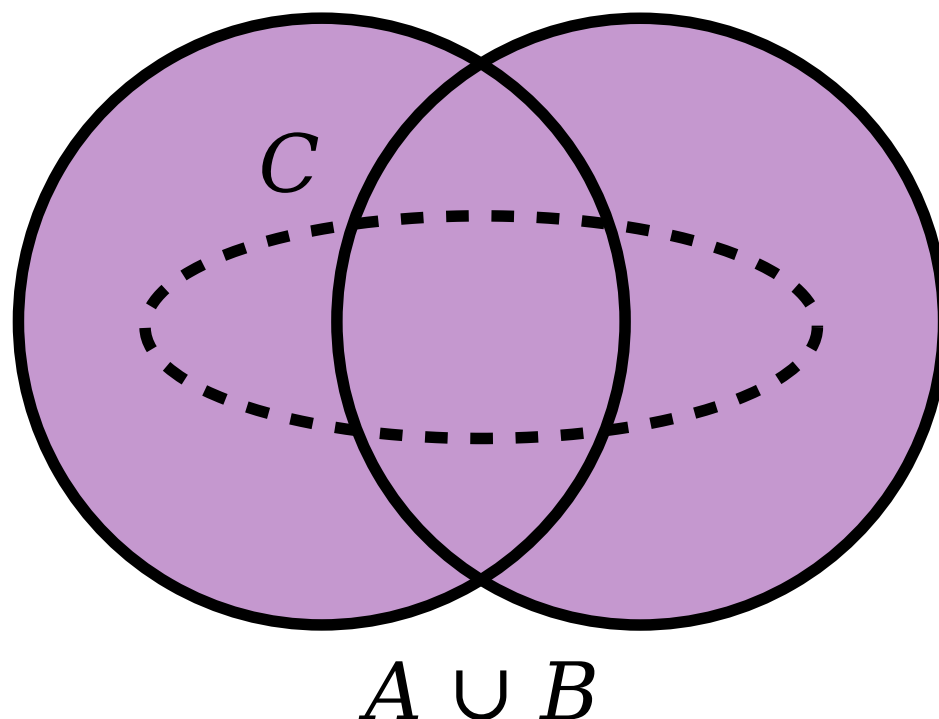

$A \cup B$

# Let's Draw Some Pictures!

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

But when I look at  $A \cup B$ , I can draw  $C$  as a circle containing elements from both  $A$  and  $B$

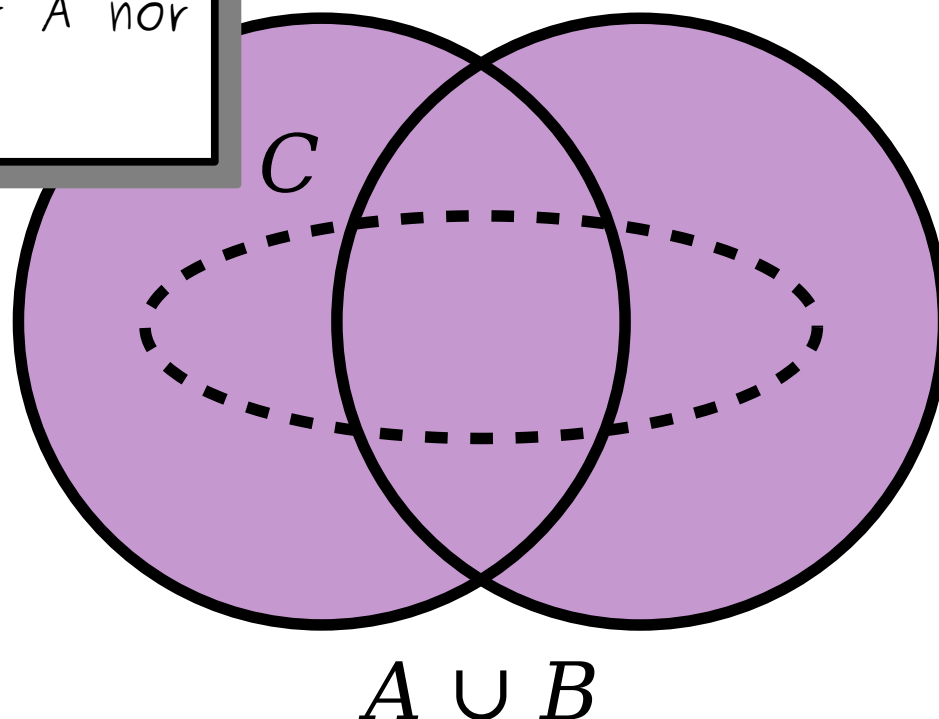

# Let's Draw Some Pictures!

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

But when I look at  $A \cup B$ , I can draw  $C$  as a circle containing elements from both  $A$  and  $B$

Do you see why this circle is in neither  $A$  nor  $B$ ?

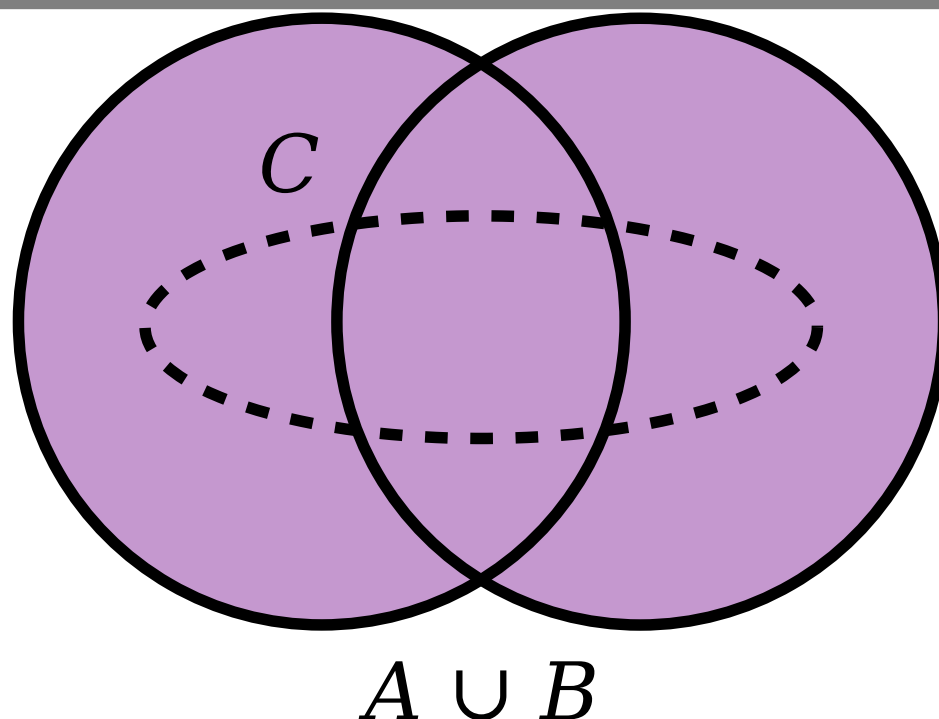

# Let's Draw Some Pictures!

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

4. Using this visual intuition, come up with a counterexample to this claim and write it up as a disproof.

***Fill in answer on Gradescope!***

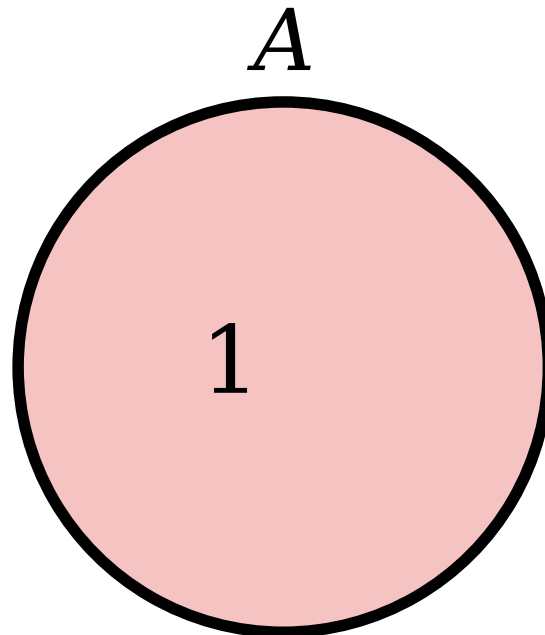

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Disproof:** We will show that there are sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ , but  $C \not\subseteq A$  and  $C \not\subseteq B$ .

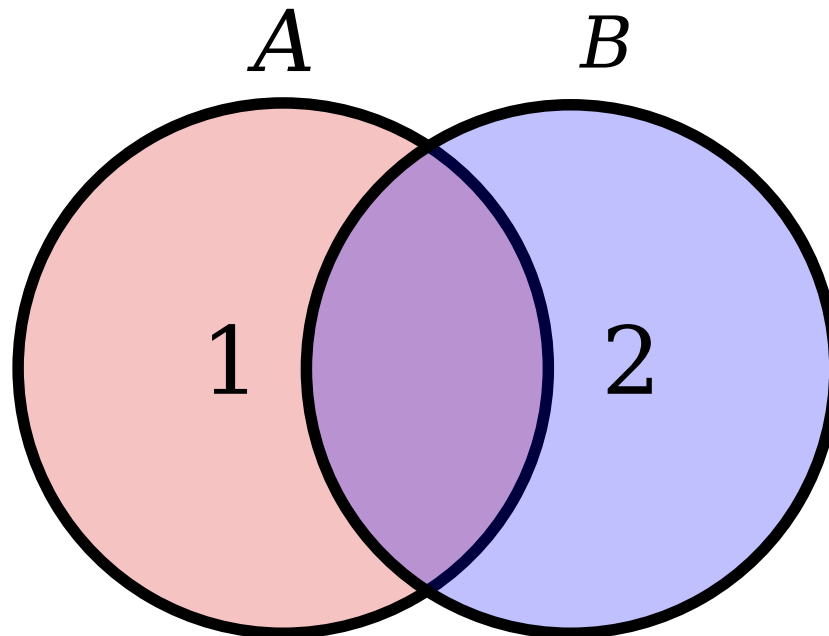

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Disproof:** We will show that there are sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ , but  $C \not\subseteq A$  and  $C \not\subseteq B$ . Consider the sets  $A = \{1\}$

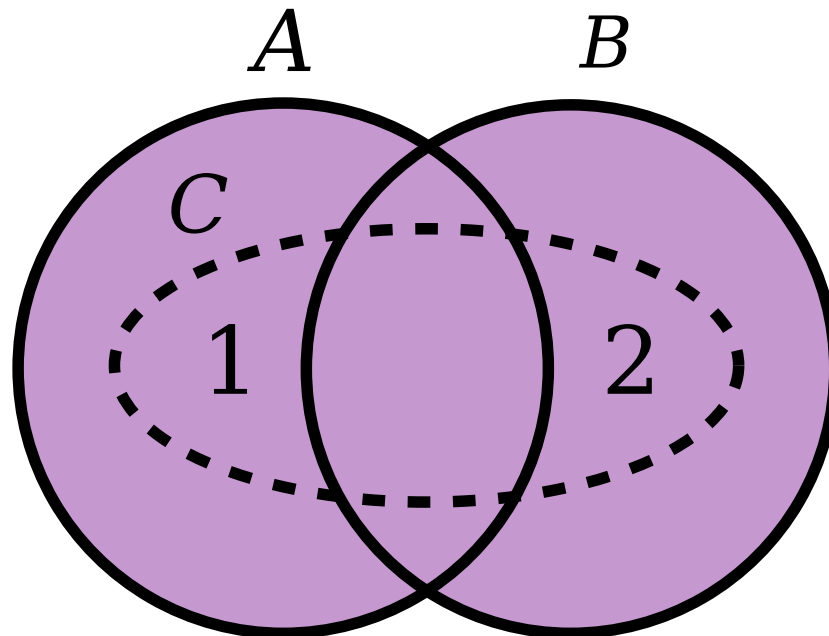

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Disproof:** We will show that there are sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ , but  $C \not\subseteq A$  and  $C \not\subseteq B$ . Consider the sets  $A = \{1\}$ ,  $B = \{2\}$

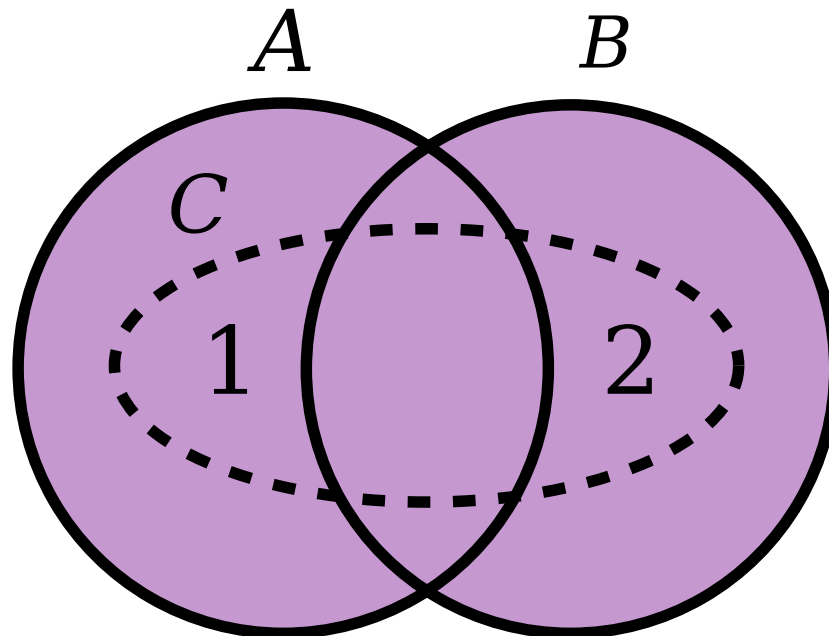

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Disproof:** We will show that there are sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ , but  $C \not\subseteq A$  and  $C \not\subseteq B$ . Consider the sets  $A = \{1\}$ ,  $B = \{2\}$ , and  $C = \{1, 2\}$ .

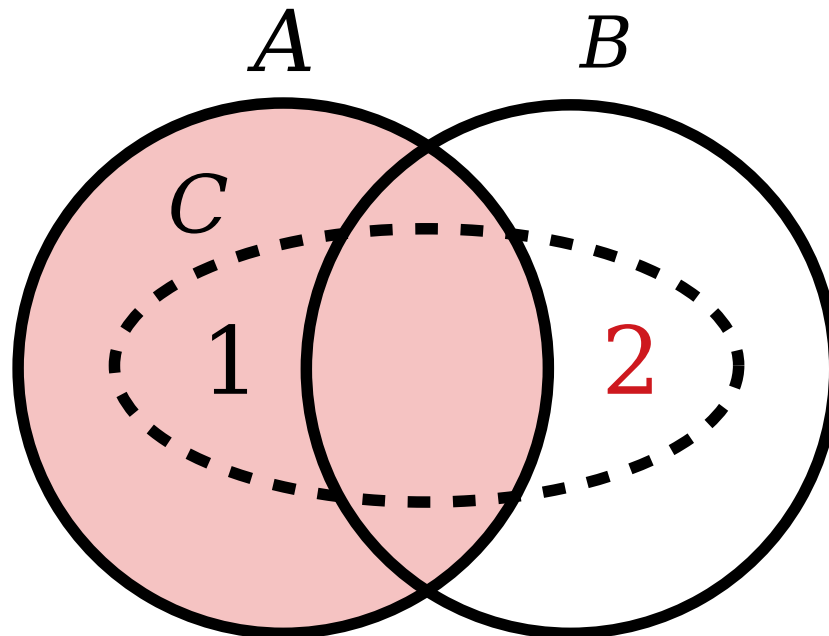

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Disproof:** We will show that there are sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ , but  $C \not\subseteq A$  and  $C \not\subseteq B$ . Consider the sets  $A = \{1\}$ ,  $B = \{2\}$ , and  $C = \{1, 2\}$ . Now notice that  $\{1, 2\} \subseteq A \cup B$  so  $C \subseteq A \cup B$

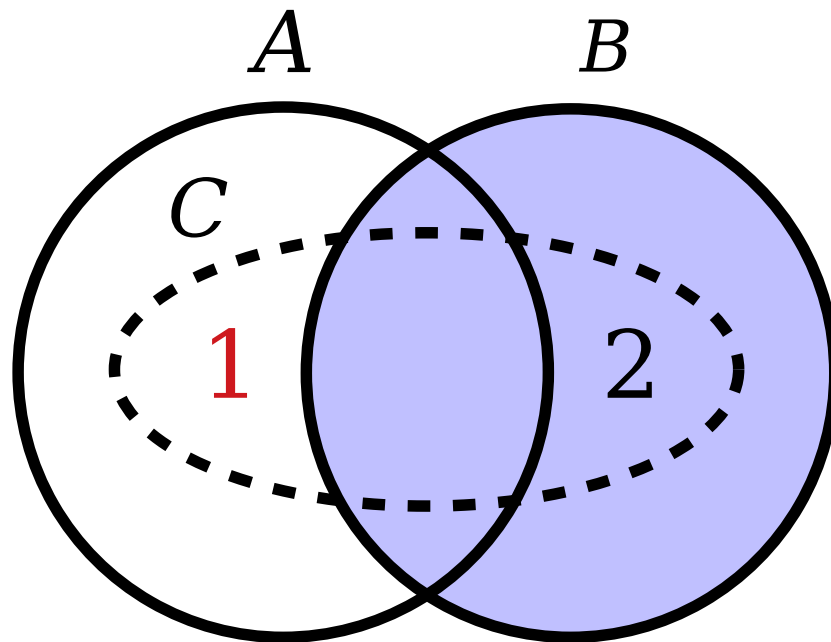

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Disproof:** We will show that there are sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ , but  $C \not\subseteq A$  and  $C \not\subseteq B$ . Consider the sets  $A = \{1\}$ ,  $B = \{2\}$ , and  $C = \{1, 2\}$ . Now notice that  $\{1, 2\} \subseteq A \cup B$  so  $C \subseteq A \cup B$ , but  $C \not\subseteq A$  because  $2 \in C$  but  $2 \notin A$

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Disproof:** We will show that there are sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ , but  $C \not\subseteq A$  and  $C \not\subseteq B$ . Consider the sets  $A = \{1\}$ ,  $B = \{2\}$ , and  $C = \{1, 2\}$ . Now notice that  $\{1, 2\} \subseteq A \cup B$  so  $C \subseteq A \cup B$ , but  $C \not\subseteq A$  because  $2 \in C$  but  $2 \notin A$ , and  $C \not\subseteq B$  because  $1 \in C$  but  $1 \notin B$ .

**Claim:** If  $A$ ,  $B$ , and  $C$  are sets and  $C \subseteq A \cup B$ , then  $C \subseteq A$  or  $C \subseteq B$  (or both).

**Disproof:** We will show that there are sets  $A$ ,  $B$ , and  $C$  where  $C \subseteq A \cup B$ , but  $C \not\subseteq A$  and  $C \not\subseteq B$ . Consider the sets  $A = \{1\}$ ,  $B = \{2\}$ , and  $C = \{1, 2\}$ . Now notice that  $\{1, 2\} \subseteq A \cup B$  so  $C \subseteq A \cup B$ , but  $C \not\subseteq A$  because  $2 \in C$  but  $2 \notin A$ , and  $C \not\subseteq B$  because  $1 \in C$  but  $1 \notin B$ .

Thus we've found a set  $C$  which is a subset of  $A \cup B$  but is not a subset of either  $A$  or  $B$ , which is what we needed to show. ■

# Proofwriting Advice

- Be *very wary* of proofs that speak generally about “all objects” of a particular type.
  - As you’ve just seen, it’s easy to accidentally prove a false statement at this level of detail.
  - Making broad, high-level claims often indicates deeper logic errors or conceptual misunderstanding (like *code smell* but for proofs!)

# Proofwriting Advice

- ***Good Idea***: After you've written a draft of a proof, run through all of the points on the Proofwriting Checklist.
  - This is a *great* exercise that you can do with a partner!
- In particular, focus on items like “make specific claims about specific variables” and “scope and properly introduce your variables.”

# Proofwriting Strategies

- ***Articulate a Clear Start and End Point***
  - What are you assuming? What are you trying to prove?
  - Much of this can be determined from the structure of the theorem to prove.
- ***Write Down Relevant Terms and Definitions***
  - The interplay of definitions, intuitions, and conventions gets you your final answer. Knowing the definitions is the first step!

***Thanks for Calling In!***
