

Algorithmic Problems

As promised, here is a set of algorithmic problems that emphasize the problem-solving skills that so many of you had trouble with on the midterm:

1. Chapter 4, exercise 14, page 130
2. Chapter 4, exercise 16, page 131
3. Chapter 5, exercise 11, page 175
4. Chapter 6, exercise 2, page 214
5. Chapter 8, exercise 7, page 287
6. Chapter 9, exercise 10, page 343

These problems are entirely optional, but will help give you practice that will help with both the next couple of assignments and the final exam. We'll make answers to these problems available next week.
