

"Final Project Additional Information" Gradescope Item

*Note: if you are a default project team and you have been experiencing CodaLab problems, you can wait until the day after your deadline to complete your test leaderboard submission (see Piazza post 2137) and submit the Final Project Additional Information Gradescope item. We will count late days based on your **writeup** submission time only. However, we need the information below to grade your project, so please get it to us ASAP and absolutely no later than **5pm on Thursday March 22**.*

For the "Final Project Additional Information" Gradescope item, please submit one PDF per team (**make sure to do a group submission**), containing the following information. Ideally submit it at the same time as your writeup.

Information required of all teams:

1. Number of late days used (e.g. if you submit by the 11:59pm Monday March 19 deadline, write 1 late day, regardless of team size).
2. Contribution per team member. If you have a multi-person team, please detail what each person contributed to the project. Write 1-2 sentences per person.

Additional information required of default project teams:

1. CodaLab usernames of all team members.
2. CodaLab submission details. Please provide the following details of your **best test leaderboard** submission. This is the submission which will contribute to your grade.
 - a. F1 score as it appears on the leaderboard.
 - b. EM score as it appears on the leaderboard.
 - c. Timestamp of submission as it appears on the leaderboard (it's OK if this is later than your deadline).
 - d. Submitter as it appears on the leaderboard.
 - e. UUID of the run-bundle you submitted.
 - f. UUID of run-bundle given on the leaderboard when you click on 'success'.
