CS224n Default Final Project Milestone

For the teams that chose to do the default final project, a write-up is **not** needed for the milestone. The only requirement is that you have trained a baseline model and submitted it to the CodaLab dev set leaderboard. As a proof of your submission, please upload a screenshot of your model on the leaderboard to GradeScope. The deadline for this is **Wednesday, Feb. 28 11:59PM PST**. Note that late days will **not** be accepted for the milestone.
