

## CS 448 Final Project Plan

### A list of the parts of the implementation that needs to be done:

- Data cleanup and formatting (Chinmayi)
- Design of layout and view (Filippa)
- Draw and implement the radial tree layout (Filippa)
- Algorithm for connecting nodes and finding connections (Chinmayi)
- Events on the visualization (mouseover, click etc.) (Filippa)
- Interconnections between nodes (Chinmayi)
- Put it all together (both or depending on progress)

### Implementation milestones:

- Having all the preprocessing and layouts of graph done by Thurs 26/5
- Be ready to put it together Tues 31/5
