Format - new aspect each week

Variety of presenters

Faculty, students

Contrast practice - state of art will help other courses

Some things need >1 week - seems superficial

Don't know tools without HTML
New student orientation to SW

Help organize multiple tools on 1 project

Watch other students & can understand practice & challenges

Learn what's available in program

Learn what to avoid
△

Presenter Demos were missing & not clear
Helpful when present

Put SW tutorial on night before Labs

Too much work to figure out how to use tools

Assignment expectations

Lost students
Class not clear @ start
- YouTube video summary would help
Visio boxes room not good time
Test case specification
(initially very vague)

- REQUIRED DESIGN

  Class about analysis & models

  Content overlaps other classes, e.g., 240.1.2

  => Avoid overlaps
