

CS101: Paper

Due: Thursday, May 31, at 11:59PM

In this paper, you will discuss a problem in society that is being addressed by artificial intelligence. Your paper should address the following aspects in **3-4 single-spaced pages**. Include a list of works cited at the end. This paper will count for 8% of your grade. **Work submitted late will not be accepted without permission of the instructor and TA.**

Describe the Problem and AI solution

You should give an overview of the societal problem and describe the AI technology used to address it. What kinds of AI are involved? What is the data that is used, and what is the output the AI is predicting? How was the problem addressed in the past without AI?

Benefits of AI

You should discuss how this artificial intelligence is positively impacting society. What are the benefits of this technology? Have there been tangible benefits? Who are the people benefiting most?

Drawbacks of AI

You should also discuss the drawbacks of this artificial intelligence. What are the costs? Who are the people being hurt the most?
