I. Concept Sketches →

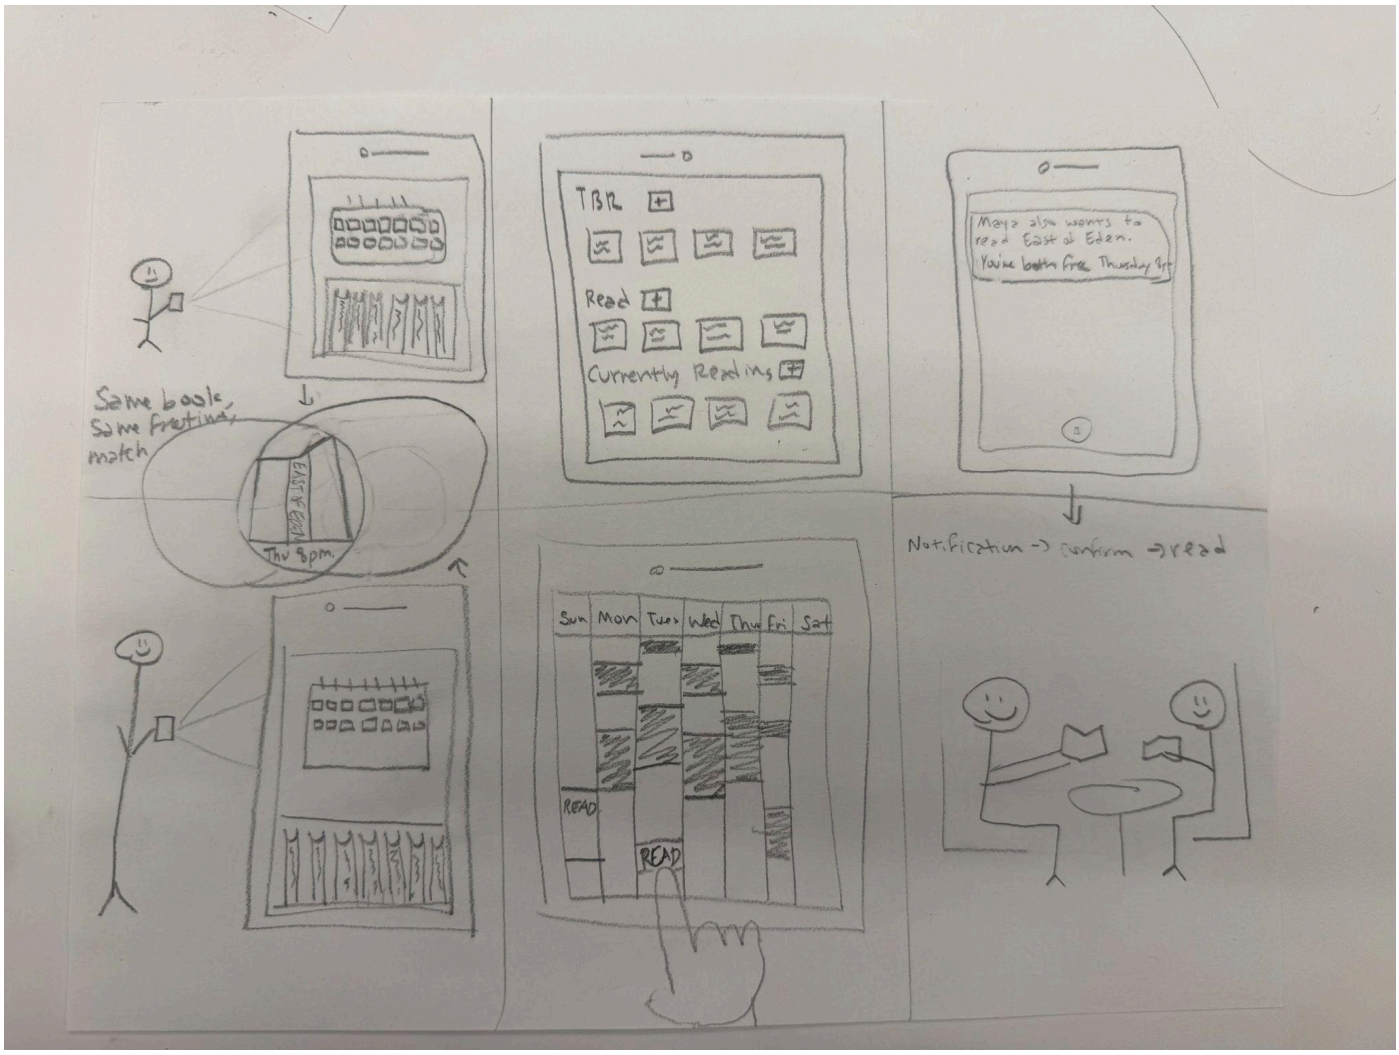

The image shows four concept sketches of an **Apple Watch interface**. Each sketch features annotations on potential actions the user can execute and the purpose of each proposed icon on the screen.

The image shows three concept sketches of an **Augmented Reality interface**. Each sketch features annotations on potential actions the user can execute and the purpose of each proposed icon on the screen.

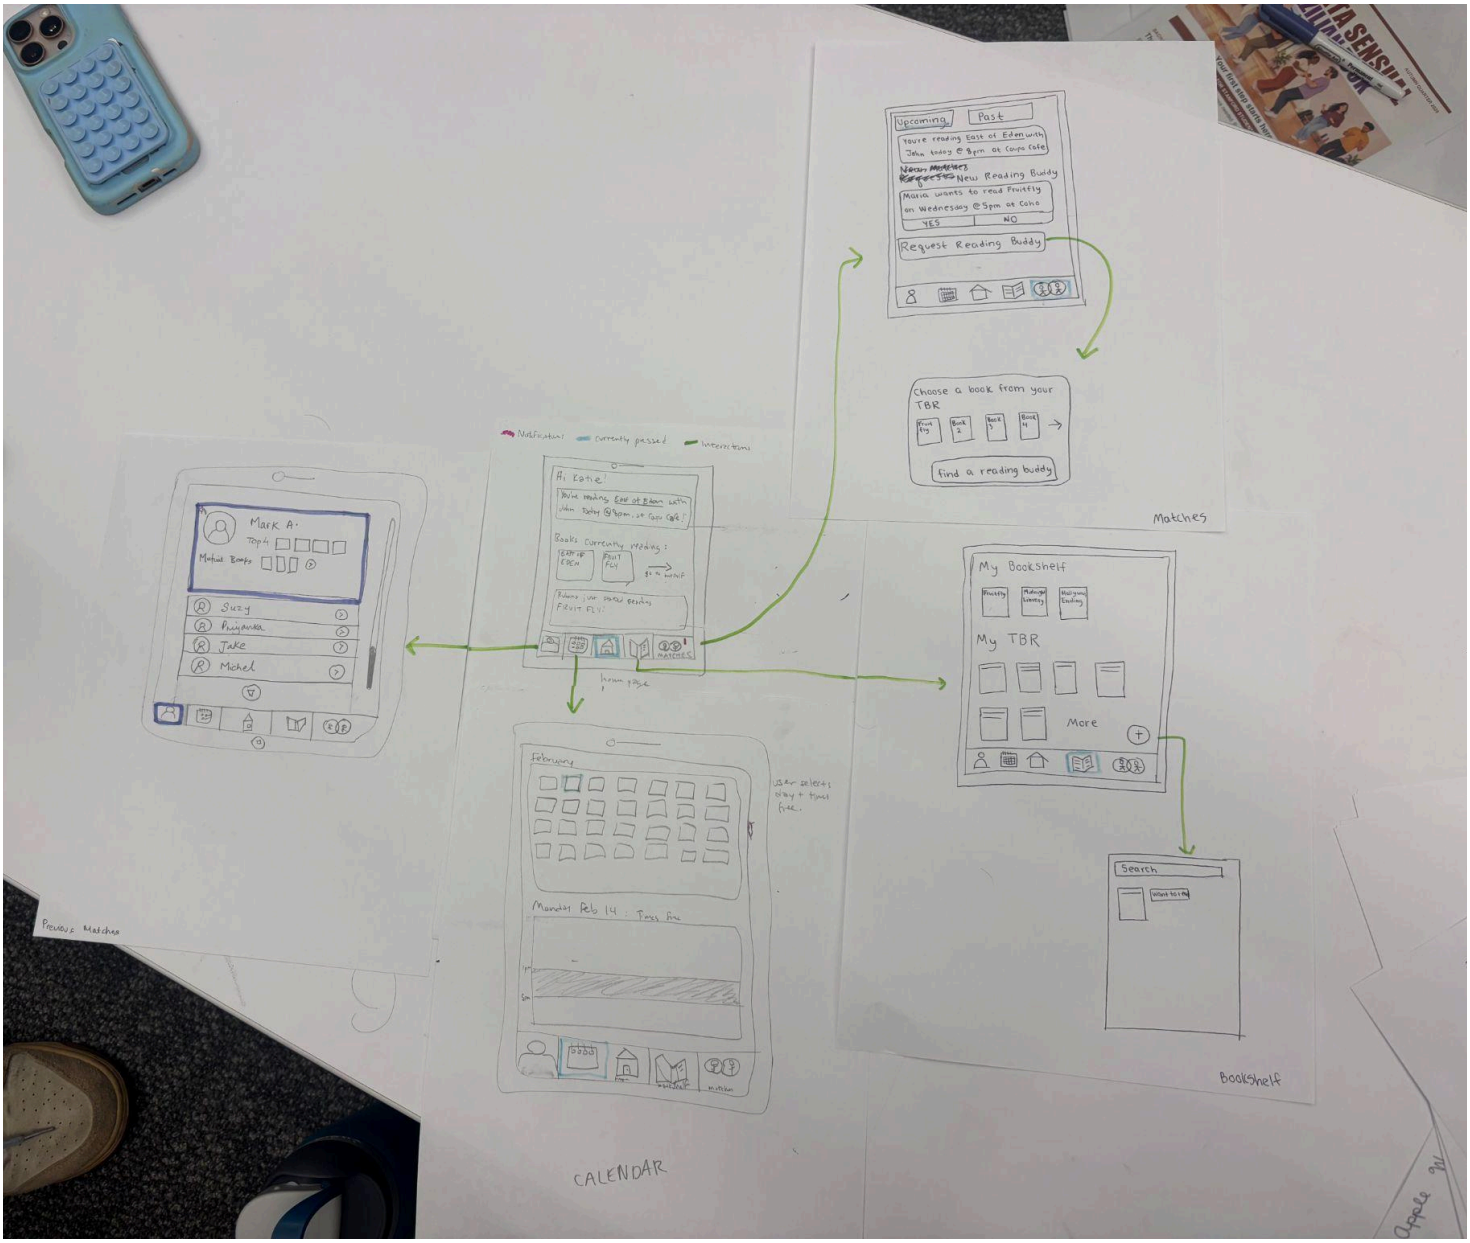

The image shows five concept sketches of a **Mobile App interface**. Each sketch features annotations on potential actions the user can execute and the purpose of each proposed icon on the screen.

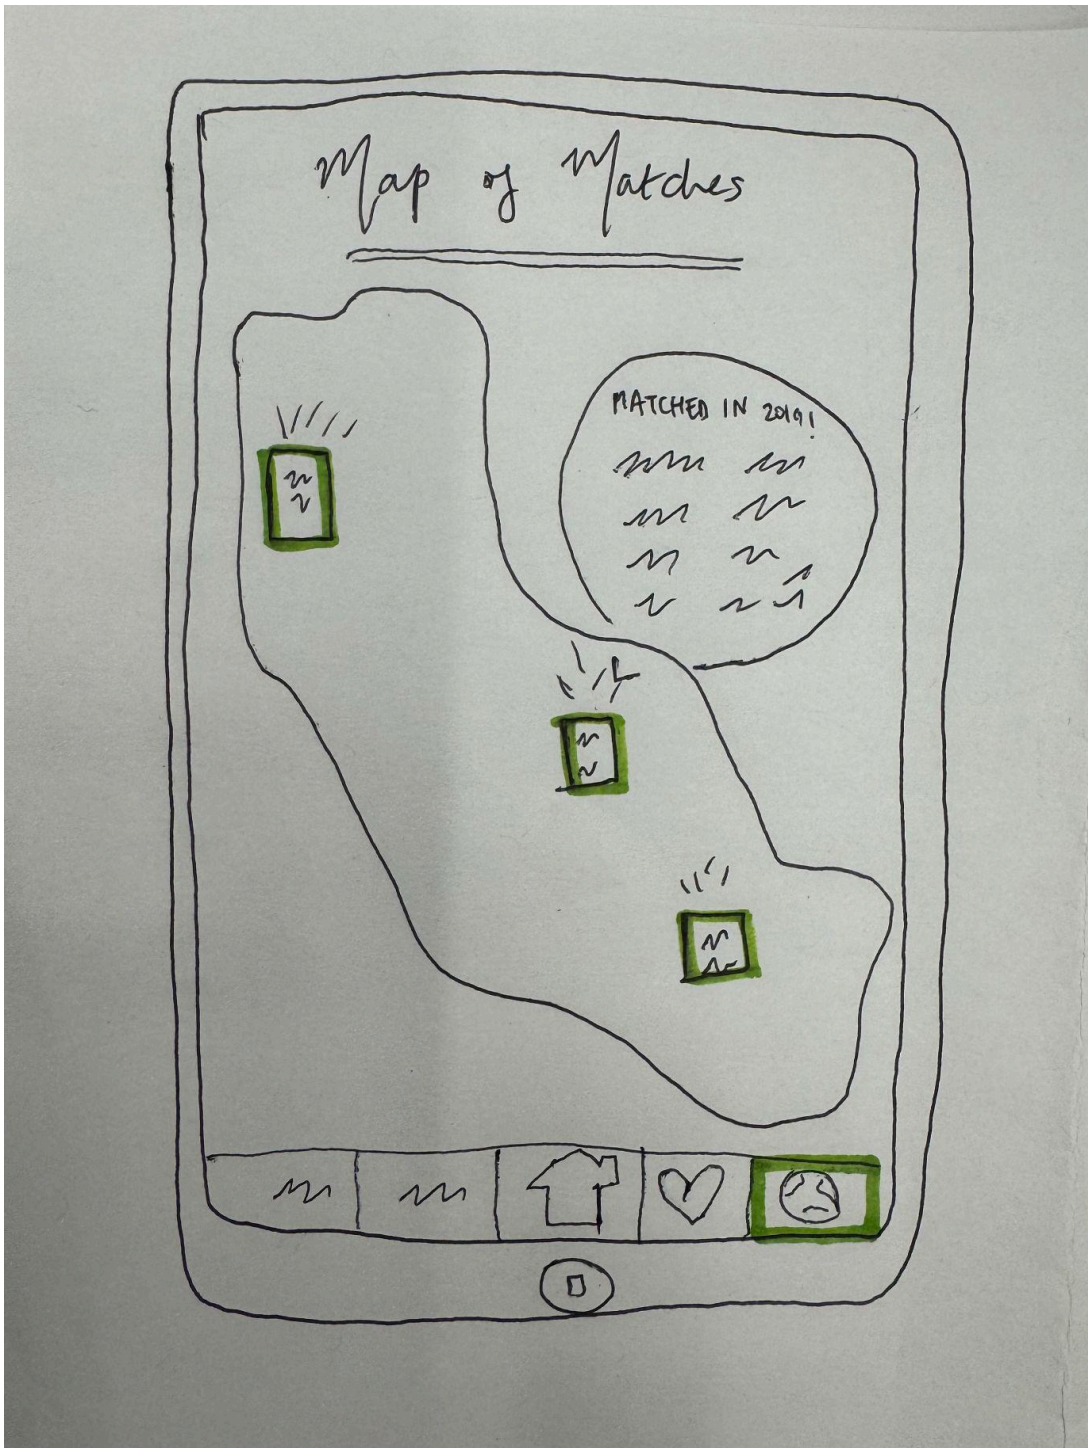

II. Two Selected Realizations →

Using a **mobile app** (fleshed-out workflow):

Adding free time taskflow →

Screen 1 → Can be accessed through the calendar icon in the footer. Click the arrow icon.
Screen 2 → The user can see a weekly calendar that separates all hours of the day into half-hour chunks.
Screen 3 → Users can mark the times they are free using green-colored tabs (to simulate dragging motion on interface).
