Vela

Amy  
Lo

Leilenah  
Mamea

## ***Problem***

Many people struggle to connect with their **emotions** on a **deep** and **meaningful** level.

## **Problem**

“My **sadness** was getting in the way of me doing things.”

– *an Interviewee*

## **Problem**

Many of our interviewees turn to **music** to attempt to deal with their **emotions**, even though it **doesn't always work**.

## Problem

“After I had my son, and I was kind of going through **postpartum depression**...I really dove into **music** at that time.”

– *an Interviewee*

## Problem

“I listen to certain **playlists** when I need to **calm down.**”

– *an Interviewee*

## **Problem**

We asked ourselves,  
“How might we use  
**music** to help people  
**analyze** and **reflect**  
upon their own  
**emotions?**”

*Solution*

*record*

---

Value Proposition

Analyze your Emotions  
Using Music

*Solution*

*record*

---

Slogan

We listen – and so do you.

# How it Works

- 1) User records a journal entry
- 2) We perform sentiment analysis
- 3) We select a song that aligns with the user's emotions
- 4) We provide the user with the song, as well as other metrics about their emotional history

# Primary User

- Enjoys listening to **music**
- Has **internet** access
- Has access to **smart devices**
- Is comfortable **interacting** with smart devices
- Is interested in gaining insight into their **emotions**
- Is technologically **adventurous**

**Competitor #1**  
**Vent**

*Emotion-forward  
social network*

- *Create posts & tag with feeling*
- *View trends in your feelings*
- *Share feelings with friends*
- *Join groups*
- *Digital Diary (actually just a feed of private posts)*

**Competitor #2**  
**Mood Music**

*Social Network for  
sharing feelings  
with music*

- *Embed songs in posts*
- *Set daily emotion to get song recs*
- *Create playlists based on emotion*
- *Join groups*

**Competitor #3**  
**Journal**  
Apple's new  
journaling app  
(iOS 17)

- *Uses ML to sort/ incorporate media from other apps*
- *Prompts journaling through suggestions*

**Competitor #4**

**AI Diary**

*Digital diary that  
analyzes entries*

- *Analyzes mood*
- *Conversational*
- *Analyzes grammar*
- *Summarizes entries*
- *Generates poems*
- *Suggests topics*
- *Smart search*

# Competitor Comparison

Features	 Vent	 Mood Music	 Journal	 AI Diary	record
Sentiment Analysis	✗	✗	✗	✓	✓
Music integration	✗	✓	✓	✗	✓
Analyze trends	✓	✗	✗	✓	✓
Digital Diary	?	✗	✓	✓	✓

# Stakeholders

## Direct Stakeholders

- Anyone who **inputs a journal entry** into our product.

## Indirect Stakeholders

- Musicians
- Anyone close to the user
- Mental Health Workers
- Hardware Manufacturers – e.g. Apple
- Software Manufacturers – e.g. Spotify, OpenAI

# Ethical Implications

## The Siren

**What would using your product “too much” look like?**

**How does it encourage people to engage, and how does it make it easy to disconnect?**

**How does it respect people’s boundaries and other parts of their lives?**

**In what situations might it be inappropriate or distracting to use?**

Stewing in negative emotions;  
Over-interpreting suggestions e.g. as a diagnostic tool

Provides personalized music suggestions, but allows exporting them out of the app

Doesn’t import media from unauthorized sources or force users to reply to specific prompts

In times of extreme distress or as a replacement for professional help

# Ethical Implications

## The Scandal

**What's the worst headline about your product you can imagine?**

**What about your business model would concern users most?**

**In what scenarios could your product cause harm or endanger people?**

**If your product was used entirely opposite of how it's intended, what does that look like?**

Security breach

Privacy, security, and encryption with sensitive personal information

If private thoughts are accessed by others, or if users use the app in place of seeking help

Knowing which songs a person was recommended and attempting to piece together their journal entries

# Ethical Implications

## The Backstabber

**What could cause people to lose trust in your product?**

**What could make people feel unsafe or exposed?**

**What mechanisms are in place for listening to your users?**

**How will you recognize larger patterns in feedback so that action can be taken?**

Security breaches, lack of passwords/two factor authentication, poor recommendations

Lack of security, passwords, or account management

We can implement a thumbs up/down rating for song selections

We can give songs scores based on whether the genre, mood, or lyrics match, and use that to improve matching for individual users

## ***Simple Task:***

*Write a new  
journal entry &  
listen to music*

Because writing & listening are the interactions that are most core to our app, **it should be the most streamlined.**

## **Moderate Task:**

*Import media (e.g. songs) from external sources*

Selecting **what to import** and **where to place it** in a journal entry necessitates multiple steps, so it's more complex than writing a new entry. But it should be as simple as possible since it's part of the writing process.

## ***Complex Task:***

*Review trends  
across history of  
previous entries*

We want users' stats to be **personalized and highly customizable**, so reviewing them will involve more complexity than other tasks.

# *Storyboard*

Shot + movement  
audio  
simulated screen images

birds eye view  
top of desk  
putting headphones on  
white noise that goes away  
when they're on

white noise could be  
record player noise

open journal  
voice over "dear diary..." + ?

start writing date  
siri voice recommending sad song (1)  
song appear

Song 1 continues  
bed with chocolate, love letters + photo  
take a tissue out

Song 1 continues  
tissues on floor  
one falls next to trash can

Song 1 continues  
eating chocolate in bed  
wrappers everywhere

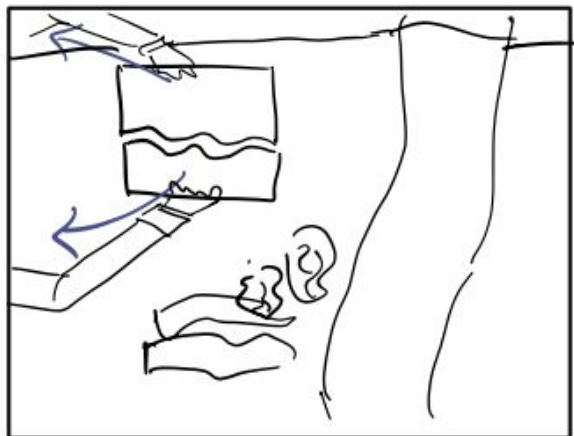

open diary again?  
Same as other shot but  
somewhere else (still dark)  
new date  
"dear diary" + ? ?  
sini again + song 2 (angry)

Song 2 continues  
tear up in bed

Song 2 continues  
crumple + drop

Song 2 continues  
start zoomed in  
pulling petals off flowers

Song 2 continues  
Zoom out, keep petals in shot  
smash flowers

Song 2 continues  
throw them onto the table

open diary again?  
Same as other shot but  
somewhere else (brighter)  
new date  
"dear diary" + ? ?  
sini again + song 3 (moving on)

Alaska - Maggie Rogers?  
Song 3 continues  
move lyrics + appear on left  
page  
move hand right to left

page  
move hand right to left

Song 2 continues  
open shade + let the sun in

Song 3 continues  
brewing a cup of tea

Song 3 continues  
hang up ? inspirational  
quote or something

open diary again?  
Same as other shot  
new date  
"dear diary" + ? ?  
siri again + song4 (happy)

song 4 continues  
side view unrolling a yoga mat

song 4 continues  
step onto yoga mat

song 4 continues  
placing flowers in a vase  
\*moved to outside

audio?  
flip through pages  
album art fades in/out

put journal down &  
close it  
audio stops

words appear

put headphones down  
words appear  
white noise resumes?

fade to black  
silence

# *Appendix*

# Product Ideation

# Task Ideation

Description	Votes	Task difficulty
Make a beat to describe how you feel	▼	Complex ▼
Annotate a song as you listen	▼	Complex ▼
Analyze your emotions from your entry by reviewing the output of our app	▼	Complex ▼
Import text into your journal from an external source	▼	Complex ▼
Generate music from single words/sentences	▼	Complex ▼
Text -> playlist and playlist -> text (sentiment analysis)	▼	Complex ▼
Create the "soundtrack to your life"	▼	Complex ▼
Create a musical mood board of sounds, beats, etc	▼	Complex ▼
Create a seasonal soundscape	▼	Complex ▼
Audio journal entries	▼	Complex ▼
Create a musical time capsule	▼	Complex ▼
Generate a song for an entry/sentence	▼	Complex ▼
Look at how your entries have changed over time	▼	Complex ▼
Collaborative music/diary entries	▼	Complex ▼
Input your mood of the day	▼	Moderate ▼
Adjust music while you journal	▼	Moderate ▼
Dictate your journal entry directly into the app	▼	Moderate ▼
Create a daily emotions playlist	▼	Moderate ▼
Annotate songs	▼	Moderate ▼
Decide what to write using song lyric cue provided by app	▼	Moderate ▼
import lyric quotes to entries	▼	Moderate ▼
Save songs/playlists with their entries	▼	Moderate ▼
Create a highlight reel/playlist of your week	▼	Moderate ▼
Time-stamped playlists - add memories to a song	▼	Moderate ▼
Sound experiments recording	▼	Moderate ▼
Track your mood over time	▼	Moderate ▼
Revise something you wrote earlier and refresh app output	▼	Moderate ▼
sound diaries while traveling	▼	Moderate ▼
Change your mood with music	▼	Moderate ▼
Listen to music while you journal	▼	Simple ▼
Open up the device you use to journal	▼	Simple ▼
Write your journal entry into the device	▼	Simple ▼
See a history of your entries	▼	Simple ▼
Click a button to indicate that you're done writing your entry	▼	Simple ▼
Leave an annotation on a point in a song	▼	Simple ▼
Write a journal entry	▼	Simple ▼
Open a previously-written entry	▼	Simple ▼
Search through entries for specific keywords	▼	Simple ▼
Create musical impressions - sketch/draw how you feel to songs	▼	Simple ▼

# Concept video script

## Script

### DIARY ENTRY #1

May 7th, 2023

How could Tim dump me for Rachel? I've never been more devastated in my entire life.

### SIRI VOICE

"Based on your journal entry, the song Never Felt So Alone by Labrinth matches your current mood."  
<Never Felt So Alone by Labrinth plays>

---

### DIARY ENTRY #2

May 23rd, 2023

How dare Tim betray me this way. He is human garbage.

### SIRI VOICE

"Based on your journal entry, the song Kill Bill by SZA matches your current mood."  
<Kill Bill by SZA plays>

---

### DIARY ENTRY #3

June 14th, 2023

FaceTimed with mom today, that was nice. Might go to yoga later.

### SIRI VOICE

"Based on your journal entry, the song Alaska by Maggie Rogers matches your current mood."  
<Alaska by Maggie Rogers plays>

---

### DIARY ENTRY #4

July 24th, 2023

Woke up happy today. Starting to feel like things are getting better (:

### SIRI VOICE

"Based on your journal entry, the song Green & Gold by Lianne La Havas matches your current mood."  
<Green & Gold by Lianne La Havas plays>

## Actors

Sophia – a young college-aged woman.

## Context

Sophia is sitting in her dorm room journaling about a recent breakup. As time passes, she continues to journal about her evolving emotions.

## Conflict / Resolution

**Conflict:** Sophia is grappling with the negative emotions associated with a breakup.

**Resolution:** Sophia overcomes her breakup-induced sadness over time by journaling in Record – a music-based journaling tool that aids people in reflecting upon their emotions.

## Brainstorming

- Color in black and white until we introduce *record*, then switch to color
- No music before *record*
  - Perhaps white noise, heartbeat, steady kick drum, cafe ambience, city ambience
- Before: user is failing to journal, shots of blank pages, frustration with self and writers' block
- After: ideas flow freely, user feels excited to journal
- User starts in cramped, uncomfortable room, but is transported to wide-open location when they start using *record*

## Ethical considerations

- Can't make it look like a healing or therapy app
  - Solution: show time clearly passing
