# Talk Outline

01. Problem/Solution Overview
02. Heuristic Eval Insights
03. UI/Product Revisions
04. Implementation Status
05. Prototype Preview/Demo

# THE PROBLEM

The fitness space can be inaccessible and intimidating. Many express that **a focus on numeric metrics** in their fitness goals and workouts leads them to **physical and mental discomfort**.

# OUR SOLUTION

With eMotion, we aim to make fitness empowering, instead of mentally distressing, by allowing users to **form and complete workouts based on feeling**, encouraging reflection and understanding each step of the way.

# Heuristic Evaluation Results

- 11 severity 3 violations, 1 severity 4 violation
- Many of severity 3 violations were related to customization limitations
  - Specific limitation: users choose their own colors during setup, so accessibility issues related to color deficiencies will be mitigated
- Eliminated body reflection - antithetical to our goal
- Simplified screens
- Movement is now a day, not a workout

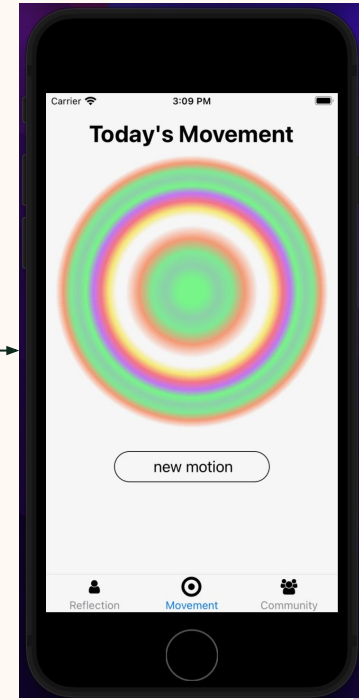

The background features several large, overlapping, organic shapes in muted colors: a light blue shape on the left, a light orange shape at the top, a light yellow shape on the right, and a light purple shape at the bottom. A thin, wavy grey line is visible near the bottom left.

# Major UI and Product Revisions

# Movement (Session -> Day)

- Traditional workout session

- Destructured workout throughout day

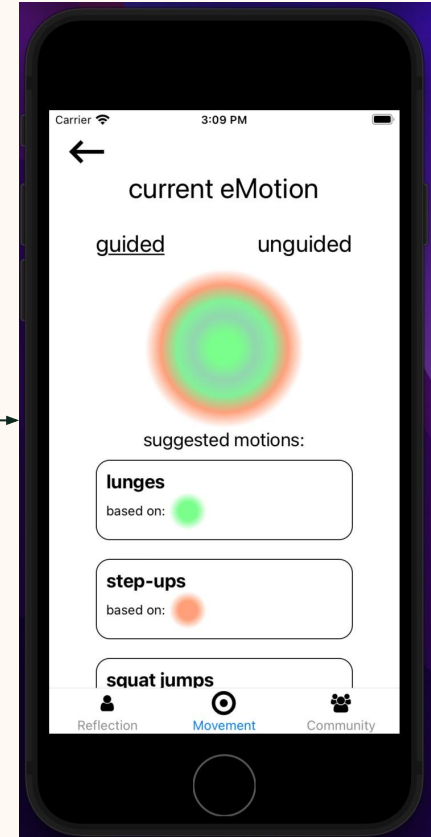

# Editing Current Emotion

- Restricted to during an exercise

- Available whenever user wants

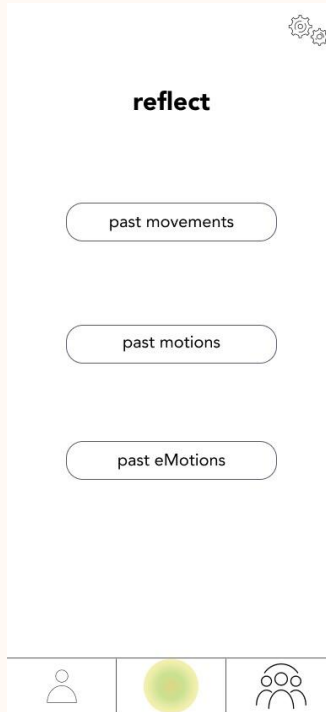

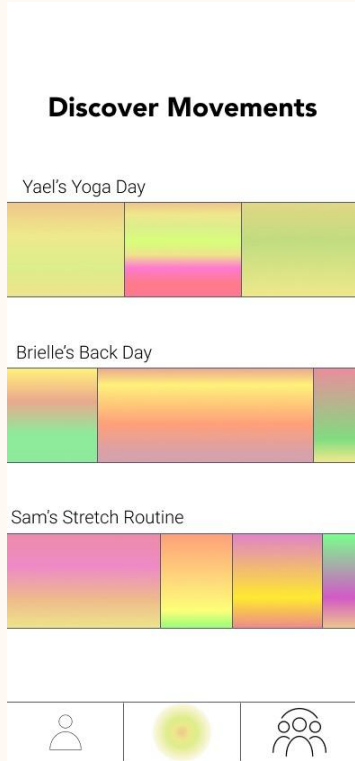

# Reflection Screen

- Redundant data and confusing options

- Calendar of Movements

# Community Screen

# Tools Used

ReactNative

Expo

Visual Studio Code

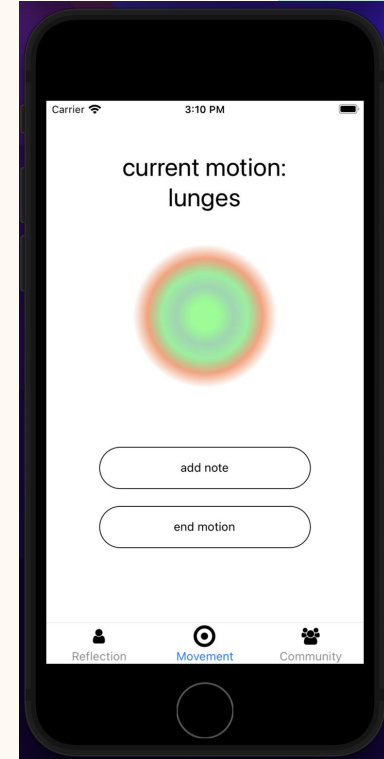

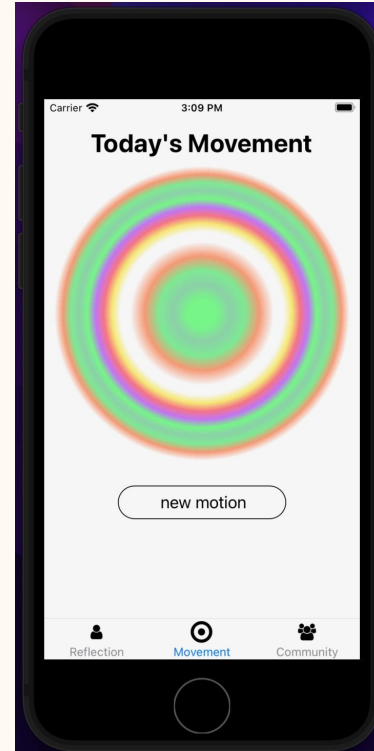

GitHub

# Implemented Features

## Task 1: Complete a Movement

- eMotion logging
- Tracking feeling over time
- Exercise search and suggestions

# Implemented Features

## Tab Navigation Bar

- Reflection, Movement, and Community tabs navigate
- Reflection and Community currently in progress

# Wizard of Oz Techniques

- Sharing a Movement / accessing shared Movements

# Hard Coded Features

- Motion data
- Past Movement data
- Community data

The background features several large, overlapping, rounded shapes in muted colors: a light blue shape on the left, a light orange shape at the top, a light yellow shape on the right, and a light purple shape at the bottom. A thin, wavy grey line is positioned near the bottom left, connecting the blue and purple shapes.

**Demo!**
