

BuddyBuilder

Access BuddyBuilder here: [Link to BuddyBuilder](#)

Introduction:

BuddyBuilder is a workout generator app which analyzes and creates custom workout plans for athletes participating in niche sports. BuddyBuilder is currently a prototype with interactions built in Figma. Users are able to access BuddyBuilder from a browser window, desktop app, mobile browser, or mobile app.

Operation Instructions:

1. Open prototype on Figma app or Figma website
2. Use mouse controls to interact with the prototype using clicks or the bottom arrow buttons at the bottom
 - a. If on mobile app, then use tap controls to control the prototype

Prototype Limitations:

1. Some UI elements get covered up when scrolling on the Figma prototype
2. Video analysis and workout generation interactions are WoZ interactions with no AI components in the Figma prototype
3. Chatbot interactions are WoZ interactions with no AI components in the Figma prototype
4. Active workout only shows the first exercise in the workout with no way to progress further in the workout
5. Not all interactions are supported and some buttons do not have corresponding interactions
