

EE 267W Virtual Reality: WIM Assignment 3

Due: 04/30/2026, 11:59pm

Instructions

This week's WIM assignment is a writing assignment. You will revise and finalize your course project proposal.

For this purpose, we will send you the comments of your peers and comments of the instructors. Read these comments and suggestions carefully and revise your project proposal. As you already noticed in last week's reading assignment, we evaluate proposals based on several criteria: impact and significance of the idea, feasibility of the idea (e.g., based on proposed milestones), quality of a resulting demo, clarity of the specific project goals and outcomes, quality and completeness of the references. While reviewing your peers' proposals last week, you probably had ideas for how to improve your own proposal already. Go ahead and revise your proposal, taking into consideration the feedback you received and the evaluation criteria outlined above.

Submit your revised project proposal by uploading it directly to gradescope, as required for the class.
