

Remembering Carl Hewitt

January 19, 2023 4PM

Carl Hewitt, an eminent AI researcher, visionary computer scientist, emeritus MIT faculty, and frequent EE380 speaker died December 7th 2022 at his home in Aptos, California. A memorial gathering was held on a rainy Saturday in Santa Cruz on January 14th followed by a well attended Zoom reception.

EE380 for January 18th 4PM will be a lightly moderated open Zope forum to discuss Carl's contributions to Computer Science and Engineering and recognize their significance. Everyone attending is encouraged to participate and share both technical and personal comments. We prefer contributors to be on video and need to have a release for their contribution. [CLICK HERE](#) for a release form.

Here is Carl's published [obituary](#) from the Santa Cruz Sentinel and [his Wikipedia page](#). Carl was a prolific author and published frequently and widely. His work in progress often went to one or another of the open access repositories, for example [Hal](#) or [arXiv](#).

You are invited to join us in honoring the memory of Carl Hewitt and his works at 4PM Pacific on Wednesday January 16. [CLICK HERE](#) to join the meeting. If you want to join the EE380 mailing list, enroll in *su-ee380-announce* at lists.stanford.edu. **Please share this invitation** with anyone who knew Carl or who would like to learn more about his work.
