

Peer reviews of project proposal

- Each student reviews one other project anonymously
- One person-projects will typically receive one review, two-person-projects two reviews etc.
- Peer reviews will be graded and forwarded to the project team
- Expect to also review the final project report of the same project
- Submit two versions as pdf, one with and one without your name
- 300-400 words
- Deadline: **Wednesday, May 2, midnight**

Preparing the proposal review

- Read the proposal and consult the references
- Judge the project presentation
 - How readable is the proposal, is it written in proper English, using the adequate technical terms?
 - How structured, consistent, logical is the presentation?
 - Does it adequately discuss motivation, state-of-the-art, and workplan?
- Judge the intellectual merit of the proposed work
 - Is the proposed work technically sound?
 - What do you think of the selected references?
 - How clear, achievable, and meaningful are the goals?
 - How original and creative is the work? What parts are new, what parts are simply a repetition of what is already known?
 - To what extent might the work lead to further interesting research questions? What questions?
- Make constructive suggestions to the project team
- Be specific, avoid generic statements, always state the reasons for your opinion
