

FIGURE 5-22  
 Plate loaded in longitudinal tension with a crack at the edge; for the solid curve there are no constraints to bending; the dashed curve was obtained with bending constraints added.

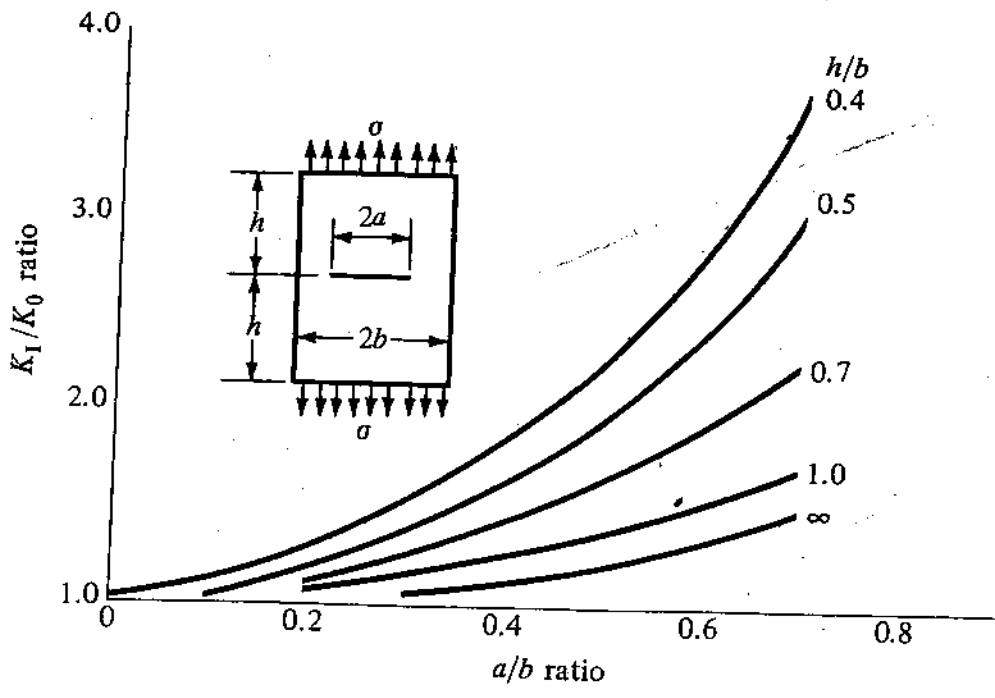

FIGURE 5-19  
 ...ing a central crack longitudinal tension.

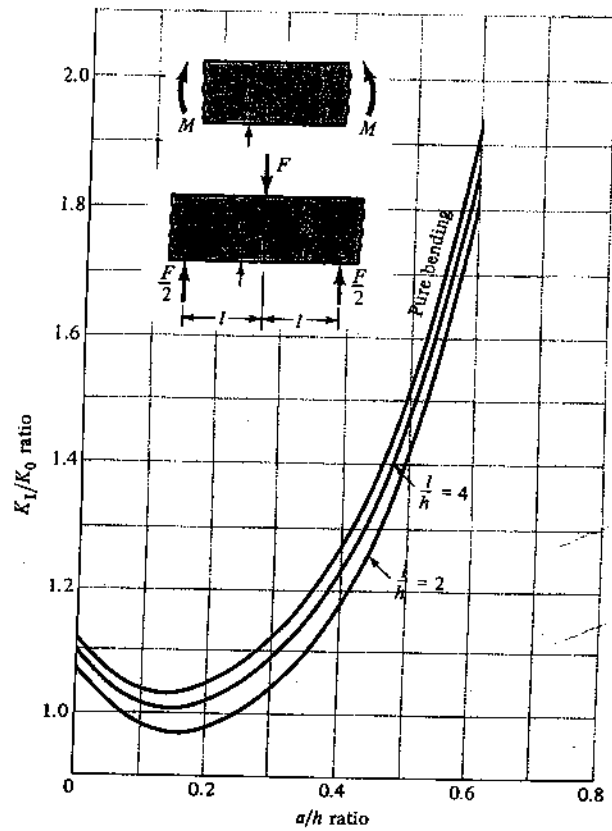

FIGURE 5-23  
Beams of rectangular cross section having an edge crack.

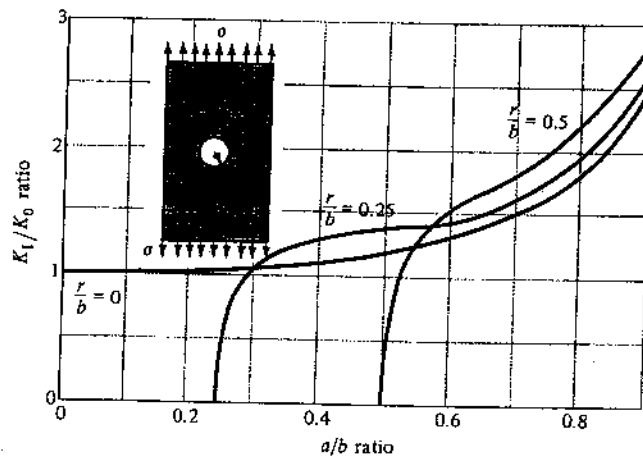

FIGURE 5-24  
Plate in tension containing a circular hole with two cracks.
