PEOPLE AND THE LAND

People and the Land takes viewers into the universe of the occupied people of Palestine, unreeling images of a new form of apartheid based on ethnicity. Challenging US foreign policy, this film examines the concrete realities of Israel's conduct in the West Bank and Gaza, the level of US support for that conduct through foreign aid, and the human cost of that aid in Palestine and the US. The result is a powerful and compelling portrayal of the situation that highlights the human rights violations against the Palestinian community. (VHS, 57 minutes, 1997)
