PD CLINICAL DATA SHEET PART I

Step 1, Inclusion criteria

	Yes	No	Unknown
1) Does the subject have bradykinesia?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
2) Does subject have muscular rigidity?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Does subject have 4-6 Hz rest tremor?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Does subject have postural instability?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Postural instability must not be caused by primary visual, vestibular, cerebellar, or proprioceptive dysfunction.

Step 2, Exclusion criteria

3) Does the subject have any of the following: Yes No
(if yes, STOP, does not meet criteria)

- History of repeated strokes with stepwise progression of parkinsonian features
- History of repeated head injury
- History of definite encephalitis
- Oculogyric crises
- Neuroleptic treatment at onset of symptoms
- Sustained remission
- Strictly unilateral features after 3 years
- Supranuclear gaze palsy (other than restriction of upward gaze)
- Cerebellar signs
- Early severe autonomic involvement
- Early severe dementia with disturbances of memory, language, and praxis
- Babinski sign
- Presence of cerebral tumor or communicating hydrocephalus on CT scan
- Negative response to large doses of levodopa (if malabsorption excluded)
- MPTP exposure

**Step 3, Supportive prospective positive criteria for Parkinson's disease
(Three or more required to be eligible for study)**

4) Unilateral Onset Yes No Unknown

5) Rest tremor present Yes No Unknown

6) Progressive disorder Yes No Unknown

7) Persistent asymmetry affecting side of onset most Yes No Unknown

8) Excellent response (70-100%) to levodopa (or DA) Yes No Inadequate/No Trial

9) Severe levodopa-induced chorea Yes No Unknown

10) Levodopa response for 5 years or more Yes No Unknown

11) clinical course of 10 years or more Yes No Unknown

Subject meets UKPDSBB Clinical Diagnostic Criteria
