Has the participant had DBS for Parkinson's disease?

 Yes  NoHas the participant had an ablative procedure for  
Parkinson's disease? Yes  No

If the participant had brain surgery or other procedure for Parkinson's disease, complete items below:

In instances that the participant has had a repeated surgery/procedure after the first intervention, if the first target site is the same as the second site (e.g., re-implantation of DBS at the same target), only the date of the first surgery/procedure needs to be entered. If the first target site is different from the second site (e.g., cryoablation thalamotomy followed by STN DBS), enter the dates of both surgeries/procedures.

Deep Brain Stimulation (DBS) location:

- Subthalamic nucleus (STN)  
 Globus pallidus interna (GPi)  
 Ventral Intermediate nucleus (Vim)  
 Unknown location

Right or Left?

 Right  Left  both

Right

---

(MM/DD/YYYY or MM/YYYY or YYYY or unknown)

Left

---

(MM/DD/YYYY or MM/YYYY or YYYY or unknown)

Ablative procedure location:

- focused ultrasound
- gamma knife radiosurgery
- cryoablation

- Thalamotomy  
 Pallidotomy
