CONTENTS

Preface 1

Turbulence closure modeling near rigid boundaries. P. DURBIN 3

Compressible turbulent flows: modeling and similarity considerations. O. ZEMAN 11

Single and double point modeling of homogeneous turbulence. C. CAMBON 23

Large-eddy simulation of compressible turbulence. K. SQUIRES 39

Progress in understanding the renormalization group skewness and $\mathcal{K} - \mathcal{E}$ models. L. M. SMITH and W. C. REYNOLDS 51

Recursive renormalization group theory based subgrid modeling. Y. ZHOU 59

Investigations of turbulent scalar fields using probability density function approach. F. GAO 65

Modeling turbulent boundary layers in adverse pressure gradients. S. E. BELCHER 73

Modeling hypersonic boundary-layer flows with second-moment closure. P. G. HUANG 77

Direct simulation of turbulent combustion. T. J. POINSOT 91

Simulation of flame-turbulence interactions in premixed combustion. A. TROUVÉ 109

A dynamical systems analysis of the kinematics of time-periodic vortex shedding past a circular cylinder. J. M. OTTINO 121

Direct numerical simulation of turbulent plane Couette flow. M. J. LEE 133

Automated pattern eduction from turbulent flow diagnostics. D. D. STRETCH 145

On the origin of the streak spacing in turbulent shear flows. F. WALEFFE 159

Fractal interfaces and product generation in the two dimensional mixing layer. J. JIMÉNEZ and C. MARTEL 169

Studies of supersonic mixing. N. T. CLEMENS and M. G. MUNGAL 187

An experimental study of curved mixing layers: flow visualization using volume rendering. P. S. KARASSO and M. G. MUNGAL 195

An experimental study of the effects of rapid rotation on turbulence. S. V. VEERAVALLI 203

Phase-averaged measurements of perturbations introduced into boundary layers. J. H. WATMUFF 221

Effect of initial conditions on secondary vortex structure in mixing layers. J. H. BELL 237

Characterization of length and velocity scales of free stream turbulence and investigation of their effects on surface heat transfer. S. YAVUZKURT 253

Dual spectra and mixed energy cascade of turbulence in the wavelet representation. C. MENEVEAU 263

Stationary turbulent closure via the Hopf functional equation. H. H. SHEN 277

The interaction of superfluid vortex filaments with a normal fluid channel flow. D. C. SAMUELS 295

Simulations of curved turbulent boundary layers: a progress report. P. ORLANDI 301

Methods for direct simulation of transition in hypersonic boundary layers. J. J. W. VAN DER VEGT and J. H. FERZIGER 309

Effect of heat release on the stability of compressible reacting mixing layer. D. S. SHIN and J. H. FERZIGER 327

Numerical simulations of turbulent thermal convection with differential rotation. W. CABOT 339

Direct simulations of compressible wall-bounded turbulence. J. C. BUELL 347

Appendix: Center for Turbulence Research 1990 Roster 357
