

## CONTENTS

<b>Preface</b>	<b>1</b>
Optimal feedback control of turbulent channel flow. T. BEWLEY, H. CHOI, R. TEMAM, and P. MOIN	3
Drag reduction at a plane wall. D. C. HILL	15
Boundary layer receptivity and control. D. C. HILL	21
Toward modeling wingtip vortices. O. ZEMAN	31
New concepts for Reynolds stress transport equation modeling of in- homogeneous flows. J. B. PEROT and P. MOIN	41
Turbulence modeling for non-equilibrium flows. P. A. DURBIN	67
Computation of turbulent flows over backward and forward-facing steps using a near-wall Reynolds stress model. S. H. KO	75
Large eddy simulation of a boundary layer with concave streamwise curvature. T. LUND	91
Large-eddy simulation of flow in a plane, asymmetric diffuser. H.-J. KALTENBACH	101
On the large eddy simulation of turbulent flows in complex geometry. S. GHOSAL	111
Dynamic localization and second-order subgrid-scale models in large eddy simulations of channel flow. W. CABOT	129
Toward large eddy simulation of turbulent flow over an airfoil. H. CHOI	145
Unstructured grid large eddy simulation of wall bounded turbulent flows. K. JANSEN	151
Investigation of the asymptotic state of rotating turbulence using large-eddy simulation. K. D. SQUIRES, J. R. CHASNOV, N. N. MANSOUR, and C. CAMBON	157
Energy transfer and constrained simulations in isotropic turbulence. J. JIMÉNEZ	171
A large eddy simulation scheme for turbulent reacting flows. F. GAO	187
The combustion program at CTR. T. POINSOT	195
Stretch-induced quenching in flame-vortex interactions. J.-M. SAMANIEGO	205
A transport equation for the scalar dissipation in reacting flows with variable density: first results. T. MANTEL	219

The production of premixed flame surface area in turbulent shear flow. A. TROUVÉ	229
On streak spacing in wall-bounded turbulent flows. J. M. HAMILTON and J. KIM	249
Numerical simulation of non-Newtonian free shear flows. G. M. HOMSY and J. AZAIEZ	259
Transition to turbulence in an elliptic vortex. T. S. LUNDGREN and N. N. MANSOUR	269
Vortical structure in a forced plane mixing layer. R. L. LEBOEUF	285
Sound radiation due to boundary layer transition. M. WANG	299
Direct simulation of isothermal-wall supersonic channel flow. G. N. COLEMAN	313
Effects of shock strength on shock turbulence interaction. S. LEE	329
Local isotropy in strained turbulent boundary layers at high Reynolds number. S. G. SADDUGHI	347
Computation of large-scale statistics in decaying isotropic turbulence. J. R. CHASNOV	365
On the dynamics of approximating schemes for dissipative nonlinear equations. D. JONES	373
Tensoral for post-processing users and simulation authors. E. DRESSELHAUS	387
<b>Appendix: Center for Turbulence Research 1993 Roster</b>	<b>395</b>
