

## CONTENTS

<b>Preface</b>	1
Characteristic regimes of subgrid-scale coupling in LES of particle-laden turbulent flows. J. URZAY, M. BASSENNE, G. I. PARK AND P. MOIN	3
Comparison between Lagrangian and Eulerian methods for the simulation of particle-laden flows subject to radiative heating. A. VIÉ, H. POURANSARI, R. ZAMANSKY AND A. MANI	15
Numerical simulation of a turbulent hydraulic jump: Characterization of the free interface and large bubble structure. M. MORTAZAVI, V. LE CHENADEC AND A. MANI	29
Numerical study of turbulent two-phase Couette flow. A.Y. OVSYANNIKOV, D. KIM, A. MANI AND P. MOIN	41
Accurate interface normal and curvature estimates on three-dimensional unstructured non-convex polyhedral meshes. C. B. IVEY AND P. MOIN	53
Multirate time-stepping least squares shadowing method. H. J. BAE AND P. MOIN	69
Assesment of commercial software for simulation of chaotic electrokinetic phenomena. E. KARATAY, C. L. DRUZGALSKI AND A. MANI	77
High-order numerical methods for LES of turbulent flows with shocks. D. KOTOV, H. C. YEE, A. HADJADJ, A. WRAY AND B. SJÖGREEN	89
On LES of low-speed flows by high-order shock-capturing schemes with flow sensors D. KOTOV, H. C. YEE, A. WRAY AND B. SJÖGREEN	99
Taming nonlinear instability for discontinuous Galerkin scheme with artificial viscosity. Y. LV AND M. IHME	109
Visualizing turbulence anisotropy in the spatial domain with componentality contours. M. EMORY AND G. IACCARINO	123

Decomposing high-order statistics for sensitivity analysis. G. GERACI, P. M. CONGEDO AND G. IACCARINO	139
Wall modeled large-eddy simulation of shock wave/turbulent boundary layer interaction with separation. I. BERMEJO-MORENO, J. LARSSON AND J. BODART	155
Space-time characteristics of wall-pressure fluctuations in wall-modeled large eddy simulation. G. I. PARK AND P. MOIN	169
Time-resolved stereo PIV investigation of the NASA Common Research Model in the NASA Ames Fluid Mechanics Laboratory 32- by 48-in indraft wind tunnel. D. S. CANTRAK, L. K. KUSHNER AND J. T. HEINECK	179
Componentality-based wall-blocking for RANS models. M. EMORY AND G. IACCARINO	193
Detailed simulation of turbulent flow within a suction and oscillatory blowing fluidic actuator. J. KIM AND P. MOIN	209
Accounting for strain-rate effect in soot modeling of turbulent flames. B. FRANZELLI, A. CUOCI, A. STAGNI, C. SAGGESE, A. FRASSOLDATI, T. FARAVELLI AND M. IHME	219
Linear analysis of engine core noise using a hybrid modeling approach. J. KIM, J. O'BRIEN AND M. IHME	235
An adaptive combustion framework. Y. C. SEE, H. WU, Q. WANG AND M. IHME	249
Characterizing the regimes of spray flame-vortex interactions: A spray spectral diagram for extinction. B. FRANZELLI, A. VIÉ AND M. IHME	265
A spray-flamelet formulation using an effective composition-space variable. B. FRANZELLI, A. VIÉ AND M. IHME	277
<b>Roster</b>	<b>289</b>
