

CONTENTS

Preface	1
Dynamic spectrally-enriched LES subgrid-scale modeling for preferential concentration of inertial particles in turbulence. M. BASSENNE, M. ESMAILY, D. LIVESCU, P. MOIN AND J. URZAY	3
Multi-fidelity uncertainty quantification of irradiated particle-laden turbulence. L. JOFRE, G. GERACI, H. R. FAIRBANKS, A. DOOSTAN AND G. IACCARINO	21
Gas heating by radiation absorbing inertial particles in a turbulent duct flow. L. VILLAFañE, A. BANKO C. ELKINS AND J. K. EATON	35
Investigation of a four-way coupling regime using a corrected point-particle approach. M. ESMAILY AND J. HORWITZ	49
Numerical study of the ignition behavior of a post-discharge kernel in a turbulent stratified crossflow. T. JARAVEL, J. LABAHN, B. SFORZO, J. SEITZMAN AND M. IHME	63
Determining dynamic content of turbulent reacting flow LES using the Lyapunov exponent. J. W. LABAHN, G. NASTAC, L. MAGRI AND M. IHME	77
Characterization of chaotic electroconvection near flat electrodes under oscillatory voltages. J. KIM, S. DAVIDSON AND A. MANI	91
Development of a collision detection algorithm for turbulent two-phase flows. W. H. R. CHAN, J. URZAY AND P. MOIN	103
Interface-capturing methods for two-phase flows: An overview and recent developments. S. MIRJALILI, S. S. JAIN AND M. S. DODD	117

Floquet stability analysis of two-phase flows. W. H. R. CHAN AND P. HACK	137
Optimal disturbances in two-phase shear layers. H. HWANG and M. J. P. HACK	151
On the characterization of transcritical fluid states. D. T. BANUTI, M. RAJU AND M. IHME	165
Structure of wall-bounded flows at transcritical conditions. P. C. MA, X. I. A. YANG AND M. IHME	179
Three-dimensional transient channel flow at moderate Reynolds numbers: Analysis and wall modeling. M. G. GIOMETTO, A. LOZANO-DURÁN, G. I. PARK AND P. MOIN	193
Towards exact subgrid-scale models for explicitly filtered large-eddy simulation of wall-bounded flows. H. J. BAE AND A. LOZANO-DURÁN	207
Dependence of small-scale energetics on large scales in wall-bounded flows. M. F. HOWLAND AND X. I. A. YANG	215
Dynamic wall models for the slip boundary condition. A. LOZANO-DURÁN, H. J. BAE, S. T. BOSE AND P. MOIN	229
Transient disturbance growth in flows over convex surfaces. M. KARP and M. J. P. HACK	243
Convergence of large-eddy simulation in the outer region of wall-bounded turbulence. A. LOZANO-DURÁN AND H. J. BAE	257
On the eddy viscosity formulation in large-eddy simulation wall models. X. I. A. YANG	271
Sensitivity of shock/boundary-layer interactions to upstream geometric perturbations. J. KIM AND J. K. EATON	285
Completing partially known space-time flow statistics: A resolvent-based approach. A. TOWNE	299

Pass-efficient methods for compression of high-dimensional turbulent flow data. A. DUNTON, L. JOFRE, A. DOOSTAN AND G. IACCARINO	313
Uncertainty estimation for turbulence models in aerospace applications. A. A. MISHRA AND G. IACCARINO	327
Uncertainty quantification in RANS constrained by a partial differential equation. W. N. EDELING, G. IACCARINO AND P. CINNELLA	335
An incompressible Eulerian formulation for soft solids in fluids. S. S. JAIN AND A. MANI	349
A continuum treatment of sliding in Eulerian simulations of solid-solid and solid-fluid interfaces. A. SUBRAMANIAM, N. S. GHASAS AND S. K. LELE	363
Evaluation of an Eulerian multi-material mixture formulation based on a single inverse deformation gradient tensor field. N. S. GHASAS, A. SUBRAMANIAM, S. K. LELE AND A. W. COOK	377
Discontinuous Galerkin method for predicting heat transfer in hypersonic environments. E. CHING, Y. LV AND M. IHME	391
Treatment of point-to-point numerical oscillations via local grid refinement. H. H. A. XU AND X. I. A. YANG	405
Roster	421
