

CONTENTS

Behind the logarithmic growth of inner-scaled wall-pressure variance J. M. O. MASSEY, J. C. KLEWICKI AND B. J. MCKEON	1
Dynamic properties of attached eddies in transitioning boundary layers and developed turbulence A. ELNAHHAS, A. LOZANO-DURÁN, P. MOIN AND J. M. WALLACE	15
Toward determining the Fife similarity parameter in turbulent pipe and channel flow J. C. KLEWICKI	31
A detailed derivation of energy conservation within a triadic set of spatiotemporal modes M. C. Y. COIMBRA AND B. J. MCKEON	43
Wall-shear-stress measurement and characterization at high Reynolds numbers T. M. JAROSLAWSKI, F. CABRERA-BOOMAN, J. M. O. MASSEY AND B. J. MCKEON	51
Thermal footprint of a boundary layer with a step change in roughness S. VIJAY AND B. J. MCKEON	61
Digital enhancement of experimental pipelines D. ROSSINELLI, J. HU, L. MARSHALL JR., N. KOZAK, T. ZAHTILA, D. BROUZET, M. CUTFORTH, M. G. MUNGAL AND G. IACCARINO	73
High-fidelity modeling of shadowgraphy and schlieren imaging D. ROSSINELLI, G. LI, A. VOCI, L. MARSHALL JR., J. HU, D. BROUZET, T. FAN, C. WILLIAMS, O. MARTIN, M. KHANWALE, G. VIGNAT, T. ZAHTILA, M. CUTFORTH AND G. IACCARINO	89
Development of Görtler vortices in serpentine diffuser A. NEKKANTI, R. AGRAWAL, S. T. BOSE AND P. MOIN	105
Flutter prediction of the benchmark supercritical wing H. YU, S. BOSE AND P. MOIN	117
Large-eddy simulations of droplet impingement on iced airfoils F. ZABALETA, S. T. BOSE AND P. MOIN	129
Multishot simulations of rime ice accretion F. ZABALETA, H. YU AND P. MOIN	143
Dynamic contact angle modeling for simulations of drop impingement L. BROWN, D. ROSSINELLI AND P. MOIN	157

Assessment of the ghost fluid method for sharp-interface multiphase flow simulations	
H. HWANG	171
Mating of active particles in turbulent flows	
R. CHANG AND R. CHAJWA	185
Scaling of an optimal slip wall model for LES of non-equilibrium turbulent boundary layers	
M. P. WHITMORE, S. T. BOSE AND P. MOIN	197
On the importance of wall transpiration in wall modeled LES of non-equilibrium flows	
T. SALOMONE, M. P. WHITMORE AND S. T. BOSE	207
Wind–wave interaction over a sloped beach: Turbulence and wave breaking	
J. WANG, H. HWANG AND C. GORLÉ	217
Wave-cloud dynamics in the atmospheric boundary layer	
A. BALAKRISHNA, H. FU, P. MOIN AND M. E. O’NEILL	231
Sensitivity analysis of initial conditions for contrail formation with ground-based camera imagery	
T. FERREIRA, R. QUIBÉN FIGUEROA, M. SOLER ARNEDO AND C. GORLÉ	243
Nondissipative variable density turbulence: routes toward statistical equilibrium	
N. PETROPOULOS	257
Variation of convective heat flux imbalance with Prandtl number	
M. PATHAK, L. SHARMA, H. TIWARI AND M. K. VERMA	263
Assessment of nonlinear flux assembly using central finite-difference methods in hyperbolic conservation laws	
H. SONG, H. HWANG AND P. MOIN	275
A coupled Lloyd–Poisson framework for metric-based Voronoi mesh adaptation	
A. STOCK	287
The PSE-sponge method for simulating natural transition in WMLES	
C. A. GONZALEZ, S. R. HARRIS AND P. MOIN	297
Global stability analysis for multidimensional flow using an augmented state vector formulation	
S. LEE, H. SONG AND S. K. LELE	313

Approximating derivatives on nonuniform grids using polynomial fitting for receptivity computations of hypersonic flows	325
T. J. FLINT AND P. MOIN	
A resolvent analysis approach for the identification of dissipative scales in turbulent flows	333
E. BALLOUZ	
Topology-aware permeability modeling in structured porous media for passive flow control	351
S. LEE AND S. VIJAY	
Crafting software in HPC: A quantitative approach	363
D. ROSSINELLI, T. TRABACCHIN, A. VOCI, L. BROWN, H. COLLIS, M. KHANWALE, T. ZAHTILA, D. BROUZET AND G. IACCARINO	
Direct simulation of gas–surface interaction in a turbulent reacting hypersonic boundary layer	381
C. T. WILLIAMS, M. DI RENZO, M. PANESI AND P. MOIN	
Kovaszny mode-preserving and entropy-stable numerical methods	395
A. CICCHINO AND P. MOIN	
A physically motivated L_2 -norm for compressible flow	409
S. R. GOMEZ	
State prediction of freely propagating flames using Fourier neural operators	423
F. RIOS TASCÓN, R. F. JOHNSON, D. D. ORTIZ, P. J. SCHMID AND B. J. MCKEON	
OptiMARL: an optimal latent space–based multiagent reinforcement learning method for subgrid-scale model discovery in compressible flows	433
D. BROUZET	
Early experiences in transfer learning between quiescent and reacting combustion chambers	447
T. ZAHTILA, E. SAETTA, N. KOZAK, D. ROSSINELLI, G. IACCARINO AND G. GERACI	
Roster	461
