

CONTENTS

Preface	1
II. Modeling Turbulence and Transition Using Data-Driven Approaches	
Overview	
A. LOZANO-DURÁN	3
Wall-modeled large-eddy simulation based on building-block flows.	
Y. LING, G. ARRANZ, E. WILLIAMS, K. GOC, K. GRIFFIN AND A. LOZANO-DURÁN	5
POD-mode-augmented wall model and its applications to flows at non-equilibrium conditions.	
C. HANSEN, M. P. WHITMORE, M. ABKAR AND X. I. A. YANG	15
Multi-agent reinforcement learning for wall modeling in LES of flow over periodic hills.	
BY D. ZHOU, M. P. WHITMORE, K. P. GRIFFIN AND H. J. BAE	25
Investigation and prediction of roughness-induced high-speed boundary-layer transition using machine learning.	
O. MARXEN, A. T. MARGARITIS, P. J. SCHMID, T. J. FLINT AND G. IACCARINO	35
Fast Macroscopic Forcing Method.	
S. H. BRYNGELSON, F. SCHÄFER, J. LIU AND A. MANI	45
I. Data-Driven Methods	
Overview	
C. T. WILLIAMS	55
Data-driven reduction of lookup libraries for the simulation of non-equilibrium effects in hypersonic flows.	
C. SCHERDING, T. SAYADI, C. WILLIAMS, M. DI RENZO, G. RIGAS AND P. J. SCHMID	57
Data-driven closure of the harmonic-balanced Navier-Stokes equations in the frequency domain.	
G. RIGAS, P. J. SCHMID	67
Investigating nonlinearity in wall turbulence: regenerative versus parametric mechanisms.	
B. F. FARRELL, E. KIM, H. J. BAE, M.-A. NIKOLAIDIS AND P. J. IOANNOU	77

Adaptive resolvent analysis with application to high-enthalpy flows. S. GOMEZ, C. WILLIAMS, M. DI RENZO, P. SCHMID AND B. MCKEON	87
Convolutional autoencoded echo state network for the prediction of extreme events in turbulence. N. A. K. DOAN, A. RACCA AND L. MAGRI	97
On interpretability and proper latent decomposition of autoencoders. L. MAGRI AND N. A. K. DOAN	107

III. Multiphase and Particle-Laden Flows

Overview S. MIRJALILI AND S. JAIN	117
A zonal advection-diffusion-reaction model for self-disturbance correction in point-particle computations. S. V. APTE	121
Effect of interpolation kernels and grid refinement on two waycoupled point-particle simulations. S. V. APTE, N. KEANE, S. S. JAIN AND M. A. KHANWALE	133
Multiresolution analysis of inertial particle tessellations for clustering dynamics. K. MATSUDA, K. SCHNEIDER, T. OUJIA, J. WEST, S. S. JAIN AND K. MAEDA	143
Neural networks for synthesizing preferential concentration of particles in isotropic turbulence. T. OUJIA, S. S. JAIN, K. MATSUDA, K. SCHNEIDER, J. WEST AND K. MAEDA	153
Divergence and curl of the inertial particle velocity in a four-way coupled turbulent channel flow. J. R. WEST, T. OUJIA, K. MATSUDA, K. SCHNEIDER, S. S. JAIN AND K. MAEDA	163
Improving volume-averaged particle-laden flow models using resolved simulations of particle diffusers. M. VARTDAL AND S. S. JAIN	173
Lagrangian subgrid-scale modeling applied to evolving firebrand particle transport. I. D. SANTOS, B. MAHATO, B. BORNHOFT, S. S. JAIN AND N. YAGHOUBIAN	185
A mass-conserving pressure-based method for two-phase flows with phase change.	

N. SCAPIN, A. SHAHMARDI, W. H. R. CHAN, S. S. JAIN, S. MIRJALILI, M. PELANTI AND L. BRANDT	195
A dual-scale sub-grid closure for LES of phase interfaces with phase change. A. GOODRICH, D. KEDELTY AND M. HERRMANN	205
Flow physics characterization of microconfined high-pressure transcritical fluids turbulence. M. BERNADES, F. CAPUANO, K. MAEDA AND L. JOFRE	215
Investigation of a novel numerical scheme for high-pressure supercritical fluids turbulence. M. BERNADES, L. JOFRE AND F. CAPUANO	225
Spectral analysis of multidimensional current-driven plasma instabilities and turbulence in hollow cathode plumes. W. H. R. CHAN, K. HARA, J. M. WANG, S. S. JAIN, S. MIRJALILI AND I. D. BOYD	235

IV. Combustion

Overview K. MAEDA	245
Development of large-Eddy simulation combustion models for thermodiffusive instabilities in turbulent hydrogen flames. L. BERGER , A. ATTILI J. WANG, K. MAEDA AND H. PITSCH	247
Characteristics and NO _x formation mechanism of thermodiffusively unstable premixed hydrogen flames. X. WEN, L. BERGER, K. MAEDA, J. WANG, A. PARENTE AND H. PITSCH	257
Introducing thermodiffusive effects in large-eddy simulation of turbulent combustion for lean hydrogen-air flames. A. ANIELLO, D. LAERA, L. BERGER, A. ATTILIK AND T. POINSOT	267
A Local criterion for distinguishing detonation and deflagration for pressure gain combustion. H. A. ELASRAG, J. HOKE, B. RANKIN AND S. A. SCHUMAKER	279
Investigation of the effect of conjugate heat transfer on the adiabatic effectiveness of an annular gas turbine engine combustor. M. CUI AND S. BOSE	289
Modeling turbulence interaction with reacting iron particles. S. GUHATHAKURTA, S. S. HEMAMALINI, A. RAVI, J. A. VAN OIJEN, B. CUENOT, J. WANG, K. MAEDA, H. WANG AND X. C. MI	299

V. Analysis of Turbulent Boundary Layers

Overview	
P. L. JOHNSON	309
Characterizing mean and turbulent structures of hurricane winds via large-eddy simulations.	
F. SABET, Y. R. YI, L. THOMAS AND M. MOMEN	311
Geometrical comparison of the Reynolds shear stress within boundary layer transition and fully developed turbulence.	
A. ELNAHHAS, A. LOZANO-DURÁN AND J. WALLACE	323
A universal velocity transformation for boundary layers with pressure gradients.	
X. I. A. YANG, P. E. S. CHEN, W. WU AND K. P. GRIFFIN	335
A framework for studying turbulent boundary layer interaction with anisotropic compliant surface.	
A. SHAHRIAR AND K. SHOELE	347
An angular momentum integral equation for high-speed boundary layers.	
A. KIANFAR, M. DI RENZO, C. WILLIAMS, A. ELNAHHAS AND P. L. JOHNSON	357
Stagnation enthalpy effects on turbulent compression corner flow at Mach 5.	
M. DI RENZO, C. T. WILLIAMS, J. URZAY AND S. PIROZZOLI	367

VI. High-Fidelity Simulations and Applications

Overview	
R. AGRAWAL AND D. BODONY	377
Influence of Miura-origami shapes on drag in turbulent flows.	
T. ZAHTILA, L. CHAN, A. OOI, K. LIU, M. BENJAMIN AND G. IACCARINO	379
Temporal stability analysis of high Mach number boundary layers over cooled impedance walls.	
L. DE BROECK, S. GÖRTZ, T. FLINT, C. GONZALEZ, M. OBERLACK AND S. LELE	391
Adjoint-based sensitivity of shock-laden flows.	
D. J. BODONY AND A. FIKL	401
A new approach to large-eddy simulations of wall-bounded turbulence using a fixed-width filter.	
S. GHOSAL, R. AGRAWAL, A. ELNAHHAS AND P. JOHNSON	409

Airfoil trailing-edge noise source identification using large-eddy simulation and wavelet transform. S. LEE, D. KANG, D. BROUZET AND S. K. LELE	419
Rotor performance and turbulent wake simulations of a scaled helicopter rotor in hover using wall-modeled large-eddy simulations. Z.T. STRATTON, S.T. BOSE AND J. SVORCAN	431
Participants' Countries/Institutions	441
