

## CONTENTS

### I. Fundamental Methods

Overview	
T. JAROSLAWSKI AND B. BORNHOFT	1
Direct numerical simulation benchmarks for the prediction of boundary-layer bypass transition in the narrow sense	
C. A. GONZALEZ, R. AGRAWAL, AND X. WU	3
Can inducing the Crow instability reduce contrail radiative forcing?	
T. FERREIRA, D. G. CAPRACE, R. PAOILI, K. SHARIFF, AND S. K. LELE	13
The role of particulate morphology and chemistry on the nucleation and growth of water and ice in the exhaust plume	
M. YAZDANI, T. FERREIRA, AND S. K. LELE	23
Eulerian techniques for Lagrangian characterization of fluid flow	
I. HAYAT AND G. I. PARK	33
Resolvent analysis of high Reynolds number turbulent boundary layers subjected to pressure gradient histories	
T. PRESKETT, P. JAISWAL, B. GANAPATHISUBRAMANI, T. JAROSLAWSKI, S. R. GOMEZ, S. VIJAY, AND B. J. MCKEON	43
Pressure-gradient-based RANS model for separation in transitional and turbulent flows	
K. P. GRIFFIN, B. LEE, G. VIJAYAKUMAR, B. BORNHOFT, O. B. SHENDE, AND M. P. WHITMORE	53
Thermal coherent structures in a turbulent channel flow with pressure gradient and organized roughness	
E. GARCÍA AND F. HUSSAIN	65
Multifidelity modeling and uncertainty quantification of heterogenous roughness	
E. Y. SHIN, M. CHAN, J. WANG, T. ZAHTILA, C. GORLE, G. IACCARINO, AND M. F. HOWLAND	77
Flow over ice roughness: Part I. Roughness heterogeneity	
X. HU, R. AGRAWAL, F. ZABELATA, B. BORNHOFT, AND X. I. A. YANG	87

## II. Data-Driven Methods

Overview	
S. R. GOMEZ AND D. ROSSINELLI	97
Biglobal resolvent analysis of a self-similar adverse pressure gradient turbulent boundary layer at the verge of separation	
J. SORIA, A. MATAS, S. R. GOMEZ, T. JAROSLAWSKI, AND B. J. MCKEON	99
Data-driven linear analysis of turbulent flows via nonlinearity-subtracted dynamic mode decomposition	
B. HERRMANN, K. CAO, C. A. GONZALEZ, S. L. BRUNTON, AND B. J. MCKEON	111
Data-driven linearization of turbulence	
Z. CHUA KHOO, D. COOPER, Y. BENGANA, AND Y. HWANG	123
Compressive techniques for accelerated flow analysis	
P. J. SCHMID, B. MANTRAVADI, A. GLAZKOV, A. PATIL, AND T. FLINT	133
Combining Bayesian optimization with adjoint-based gradients for efficient control of flow instabilities	
J. S. MÜLLER, J. M. REUMSCHÜSSEL, T. L. KAISER, S. J. KNECHTEL, AND K. OBERLEITHNER	143
Bayesian inference of mean velocity fields and turbulence models from flow MRI	
A. KONTOGIANNIS, P. NAIR, M. LOECHER, D. B. ENNIS, A. MARSDEN AND M. P. JUNIPER	153
Using autoencoders to enhance data-driven turbulence modeling in squircular geometries	
M. S. S. MACEDO, B. P. BRENER, R. L. THOMPSON, T. ZAHTILA, S. MIRJALILI, M. P. WHITMORE, AND G. IACCARINO	163
Proper latent decomposition	
D. KELSHAW AND L. MAGRI	175
A machine learning model for prediction of water film runback flows for aircraft icing applications	
J. WANG, C. LAURENT, S. S. JAIN, AND H. HU	185
Distribution learning for fast generative flow sampling	
D. A. BEZGIN, J. M. WINTER, AND N. A. ADAMS	197
Real-time digital twins of multiphysics and turbulent flows	
A. NÓVOA AND L. MAGRI	207

### III. High-speed Flows

Overview	
D. BROUZET AND T. FLINT	217
Compressibility and vibrational-excitation effects in hypersonic shock-turbulence interaction	
A. CUADRA, C. T. WILLIAMS, M. DI RENZO, AND C. HUETE	219
Impact of non-equilibrium chemical kinetics on communication blackout characterization for a hypersonic entry vehicle	
S. M. JO AND C. T. WILLIAMS	229
Jet noise due to direct radiation of acoustic waves: shear layer radiation and leaking trapped waves	
S. GÖRTZ, L. DE BROECK, O. MARTIN, M. OBERLACK, AND S. K. LELE	239
Spectral proper orthogonal decomposition and resolvent analysis of hypersonic tunnel-wall turbulent boundary layers	
D. ROY, G. STROOT, L. DUAN, B. J. MCKEON	249
Subgrid-scale backscatter in a supersonic combustor shear layer with an oblique shock	
C. M. HELM, D. BROUZET, B. BORNHOFT, T. P. GALLAGHER, AND D. M. PETERSON	261
Improving the scalability of adaptive discrete empirical interpolation methods	
J. HOY, R. MUNIPALLI, D. BROUZET, T. ZAHTILA, AND G. IACCARINO	271

### IV. Multiphase Flows

Overview	
S. S. JAIN AND S. MIRJALILI	281
Energy transfer mechanisms in compressible two-phase turbulent flows	
L. H. HATASHITA, N. TONICELLO, AND S. S. JAIN	283
A spectrally enriched AMR prolongation operator for hybrid LES-DNS of phase interfaces	
N. R. THAKKAR AND M. HERRMANN	295
Toward energy-stable multi-phase flow schemes	
J. NORDSTRÖM, H. COLLIS, M. P. NCHUPANG, AND S. MIRJALILI	305
Ostwald ripening and breakup characteristics of the advective Cahn-Hilliard equation: The role of free energy functionals	
M. F. P. TEN EIKELDER AND M. A. KHANWALE	317

Investigation of Phase-Field models in compressible multiphase flows in a unified high-order and bound-preserving framework	
Z. HUANG, S. MIRJALILI, M. A. KHANWALE, S. S. JAIN, AND E. JOHNSEN	327
Diffuse-interface modeling of multiphase, multicomponent flows with phase change in the nondilute limit: application to melting and devolatilization of plastics	
D. LONG, A. MUKHERJEE, S. SALIMI, L. BROWN, H. COLLIS, S. MIRJALILI, S. S. JAIN, L. BRANDT, AND C. SCHULZE-NETZER	339
Numerical simulations of inertial microbubble collapse at a gel-water interface with finite elasticity and phase change	
M. CARCANA BARBOSA, M. RODRIGUEZ JR., AND J. YANG	349
<b>V. Predictive Methods</b>	
Overview	
S. T. BOSE AND A. LOZANO-DURAN	361
Credibility assessment for WMLES that includes fire-engulfed objects in crosswind	
S. P. DOMINO	363
High-fidelity rotating detonation engine simulation of methane-oxygen using an extended flamelet progress variable approach	
M. SENG, L. SHUNN, A. K. KOKERNAK, D. BROUZET, AND S. T. BOSE	373
Building-block-flow model for LES of high-speed flows	
R. MA, Y. YUAN, G. ARRANZ, Y. LING, R. AGRAWAL, M. P. WHITMORE, A. ELNAHNAS, C. PEDERSON, AND A. LOZANO-DURAN	385
Consistent data-driven subgrid-scale model development for large-eddy simulation	
X. HUANG, S. C. LEUNG, M. P. WHITMORE, A. ELNAHNAS, AND H. J. BAE	395
Sensitivity of numerical simulations of turbulence to lower floating-point precision	
M. KARP, R. STANLY, H. SONG, T. MUKHA, L. GALIMBERTI, S. TOOSI, L. DALCIN, S. REZAEIRSAVESH, M. MÜNSCH, N. JANSSON, S. MARKIDIS, M. PARSANI, S. T. BOSE, S. K. LELE, AND P. SCHLATTER	405
Multiscale interactions within a multistage compressor	
P. J. PRZYTARSKI, M. DELLACASAGRANDE, M. KOZUL, R. AGRAWAL, AND S. T. BOSE	415

Assessing relevant roughness scales for accurate prediction of iced airfoil aerodynamics T. BELLOSTA, A. DONIZETTI, F. ZABALETA, B. BORNHOFT, S. S. JAIN, S. T. BOSE, AND A. GUARDONE	427
<b>VI. Geophysical Fluids</b>	
Overview P. JOHNSON AND H. HWANG	439
Eulerian and Lagrangian analysis of dispersion in an idealized urban geometry P. FRADERA-SOLER, P. L. JOHNSON, A. J. BANKO, P. EDERLE, AND S. BALACHANDAR	441
Diffusion models for optimal sensor placement and sparse reconstruction for simplified urban flows A. VISHWASRAO, S. GUTHA, A. PATIL, K. WIJK, B. J. MCKEON, C. GORLE, H. AZIZPOUR, AND R. VINUESA	451
A force correction scheme for a volume-filtered formulation of flow over a permeable particle bed D. FUST, S. V. APTE, AND S. BALACHANDAR	463
Interscale analysis of sediment clusters amid turbulence W. H. R. CHAN, A. ELNAHHAS, H. HWANG, L. J. BROWN, AND S. BALACHANDAR	473
Gravity currents over mobile sediment beds A. D. LEONELLI, E. MEIBURG, S. BALACHANDAR, J. WANG, AND P. JOHNSON	485
Application of multi-fidelity methods to prediction of gravity currents for uncertainty quantification W. LU, A. OOI, L. THOMAS, T. ZAHTILA, AND G. IACCARINO	495
Large eddy simulation of ocean mesoscale eddies P. PEREZHOGIN, A. BALAKRISHNA, AND R. AGRAWAL	507
High-fidelity simulation of boundary layer flow over waves J. WU AND H. HWANG	517
Pathways to turbulence from internal waves in a stratified horizontally sheared flow S. F. LEWIN, A. BALAKRISHNA, AND M. M. P. COUCHMAN	529
<b>Participants' Countries/Institutions</b>	539
