

OAP Examples

Example

Implantable Medical Device

Obstructive Sleep Apnea

A prevalent disorder with growing visibility

A sleeping disorder resulting in repeated cessation of breathing

8 Million adults in the U.S. have severe OSA

**Total OSA
28.6 Million**

Implantable Neural Stimulation Solution

IP protected, Class III stimulation system implanted in outpatient setting

Continuously
open airway using

Hypoglossal nerve

“If your device is as effective as CPAP, it will become a top-choice for many patients”

Jed Black, MD, Director, Stanford Sleep Disorders Clinic

Muscles in throat and
tongue are activated

Flat Interface Electrode to sense
and *stimulate* hypoglossal nerve to
keep airway open

Implantable Pulse
Generator

Durand *et al.*, IEEE
Transactions on
Biomedical
Engineering

IP protected by several US patents

Target Customer

Current treatment ineffective

Treated

686,000

Severe
OSA

8 Million

Therapeutic treatment
of OSA growing at
CAGR of 17%

Frost & Sullivan

Untreated

7.4 Million

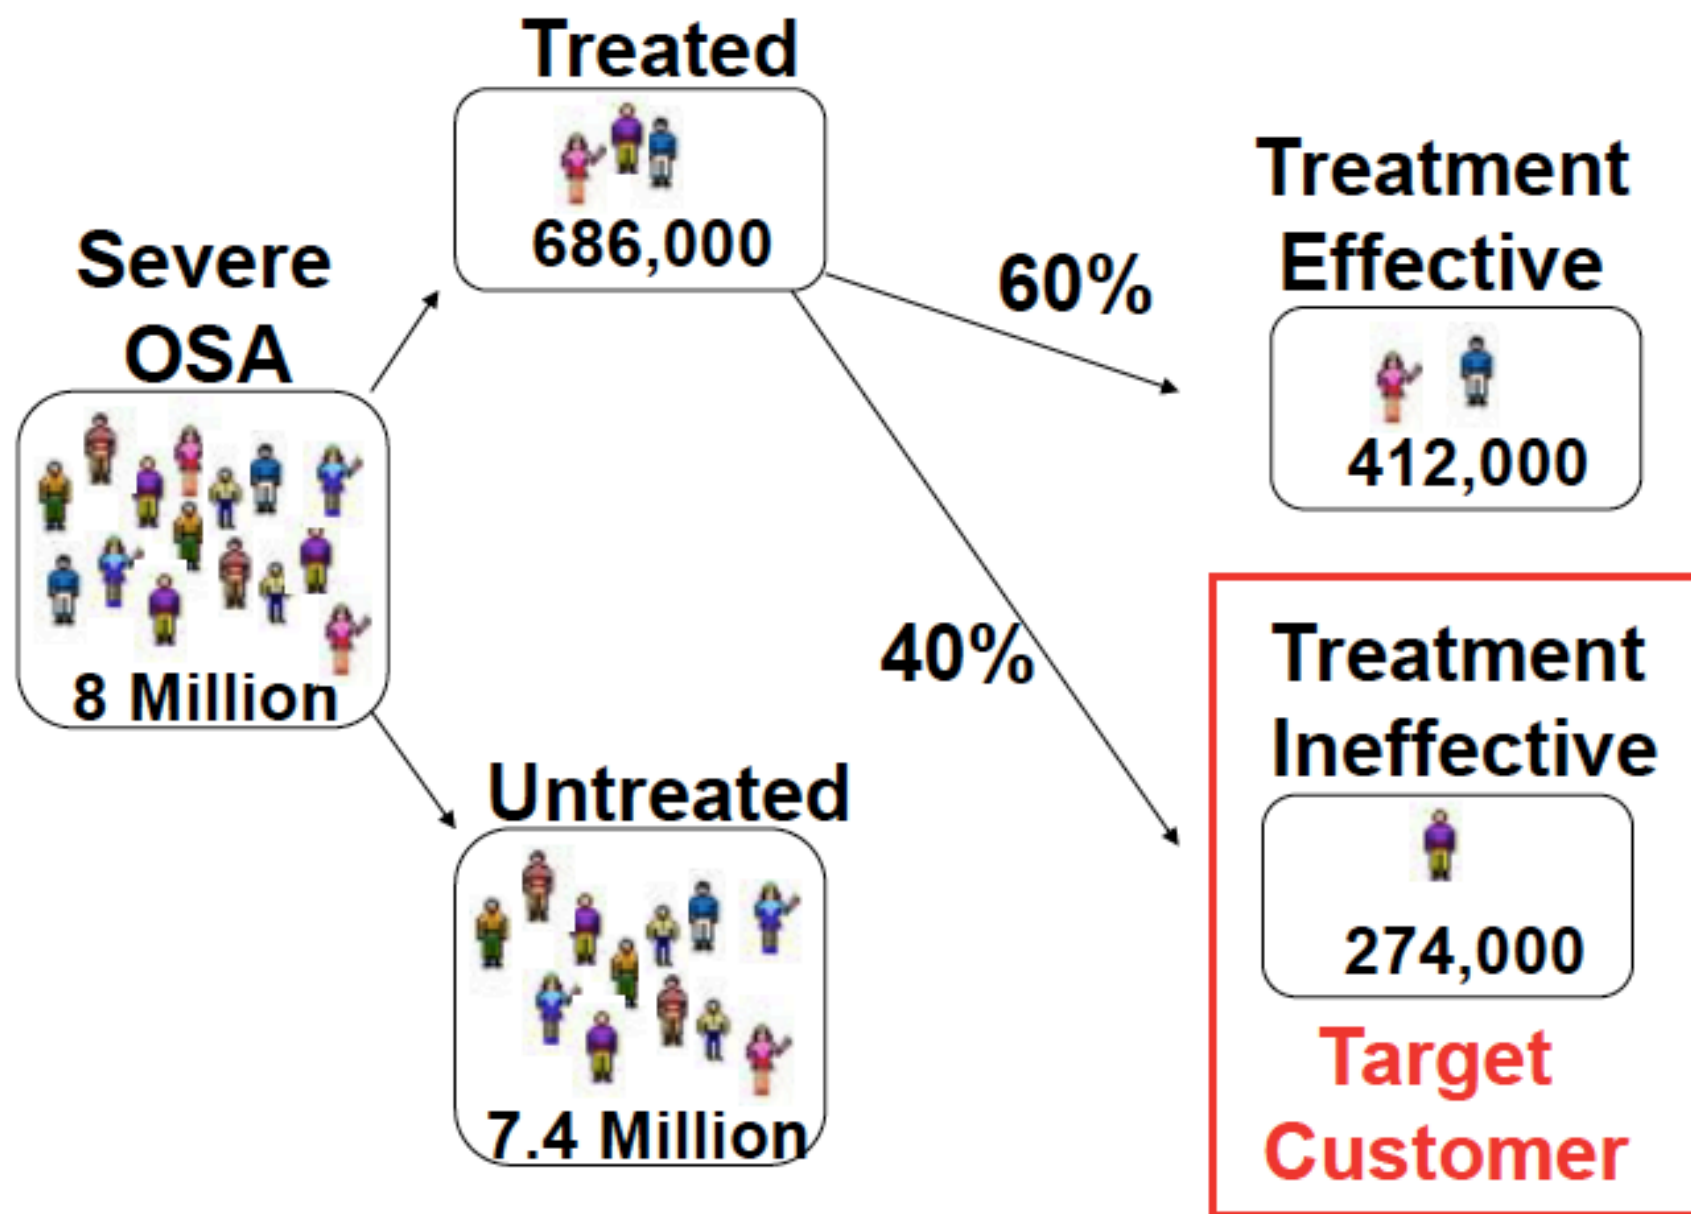

Option #1: CPAP
Continuous Positive
Airway Pressure

Option #2: Surgery
Uvulopalatopharyngoplasty
Maxillomandibular Advancement
Tonsillectomy

Initial Target Customer

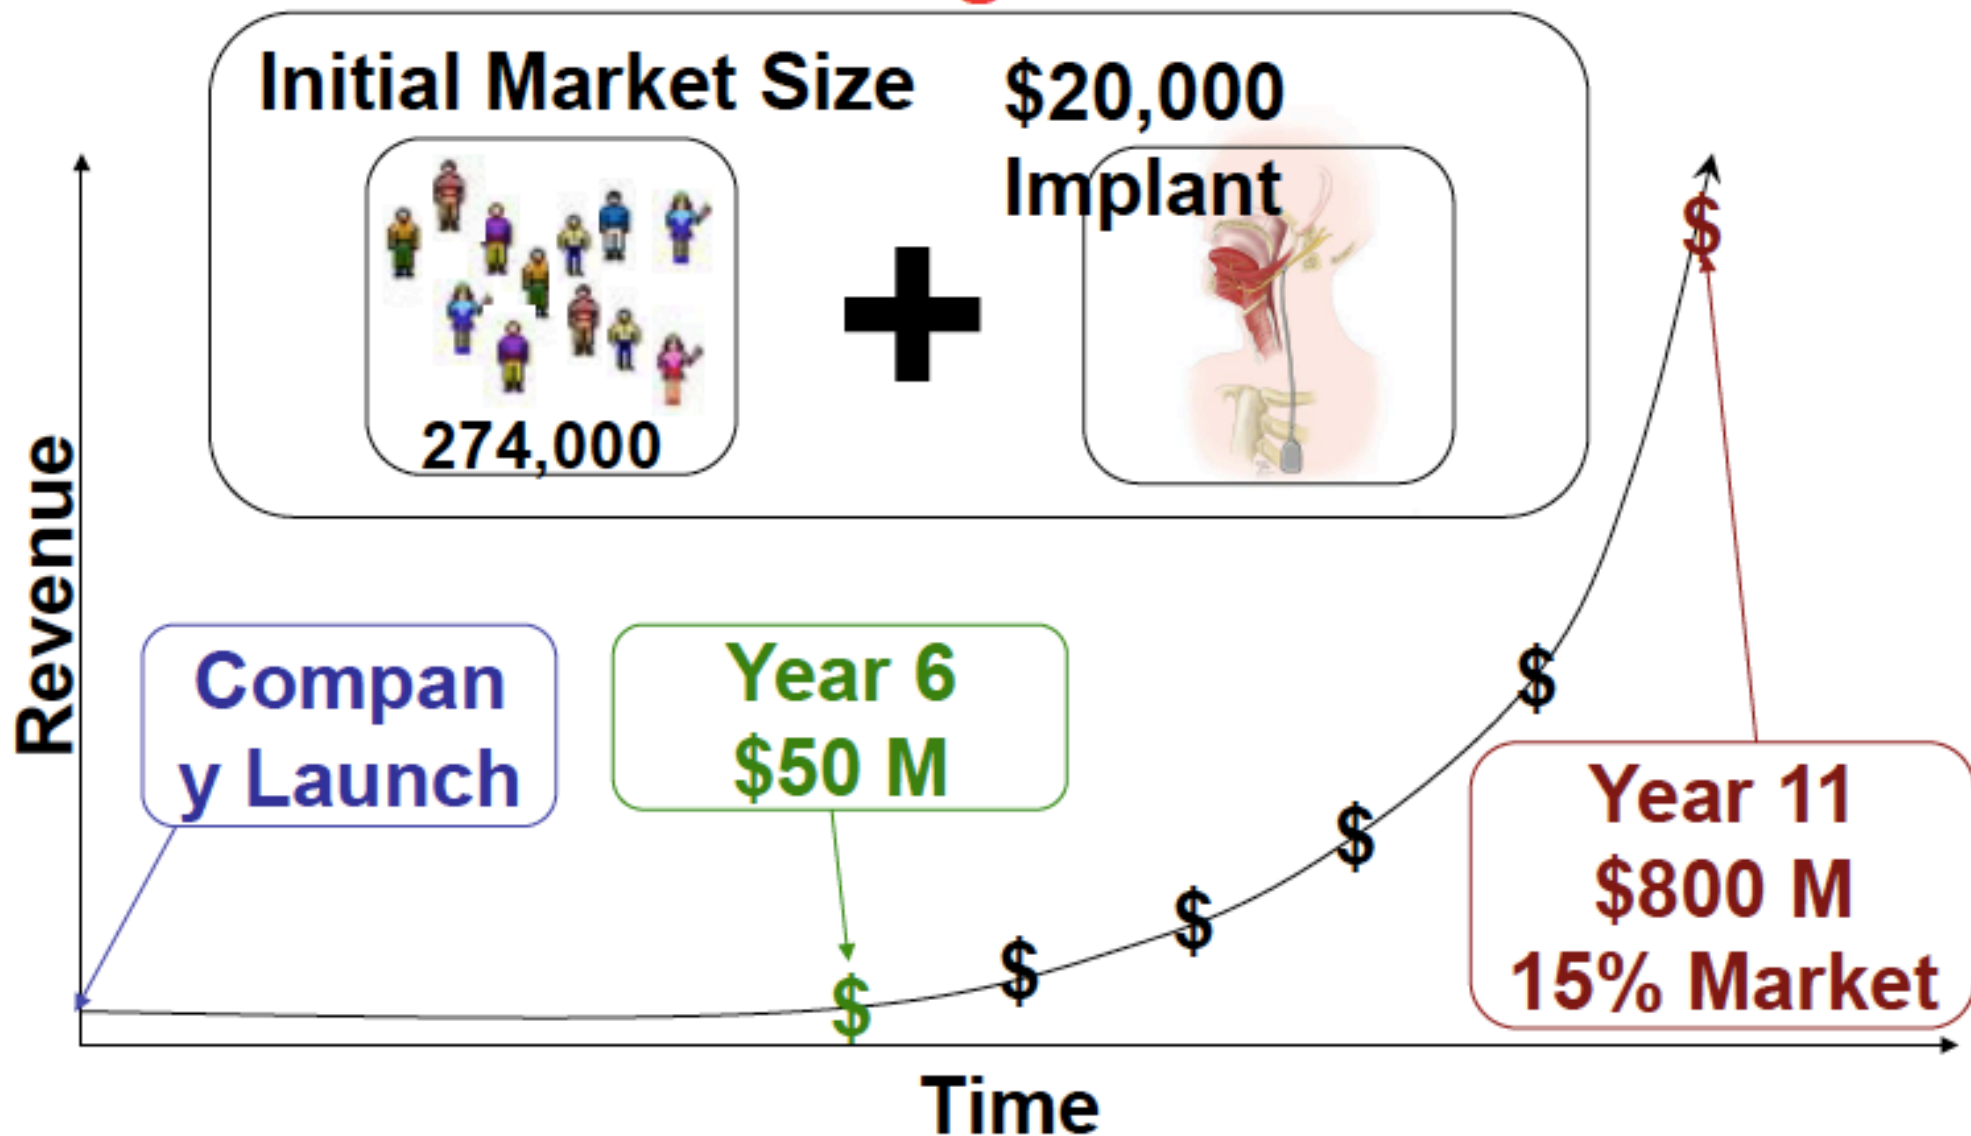

Current treatment ineffective

Market opportunity overview

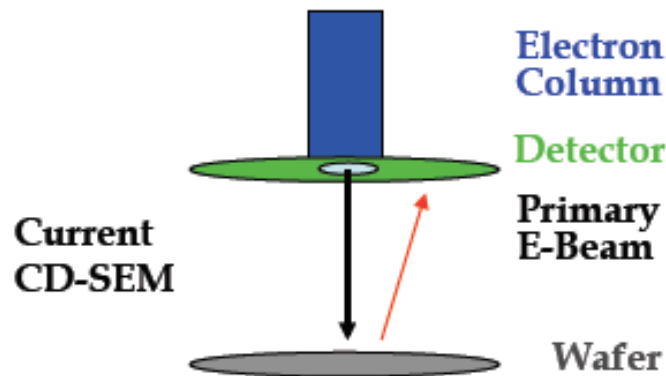

Projected revenue of \$800M and neural stimulation market growing

\$5 Billion Target Market

Opportunity

2D CD metrology will not meet industry needs

Sidewall height and angle critical for 3D chips

3D CD Metrology Market in 2010
\$2 Billion (TAM) *

\$500M(SAM)

 NanoPrecision

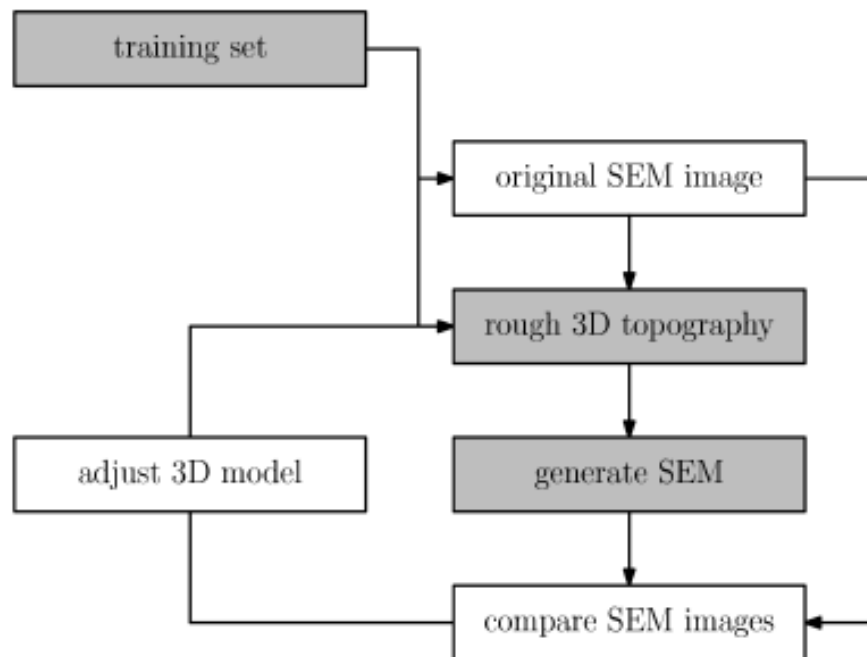

* Adapted from VLSI Research

Our Solution

Computational 3D SEM

Software/Firmware (**Core competence**)

CTO's Research at Stanford with Prof. Fabian Pease

Computational methods for nano-scale 3D reconstruction

Hardware(Context)

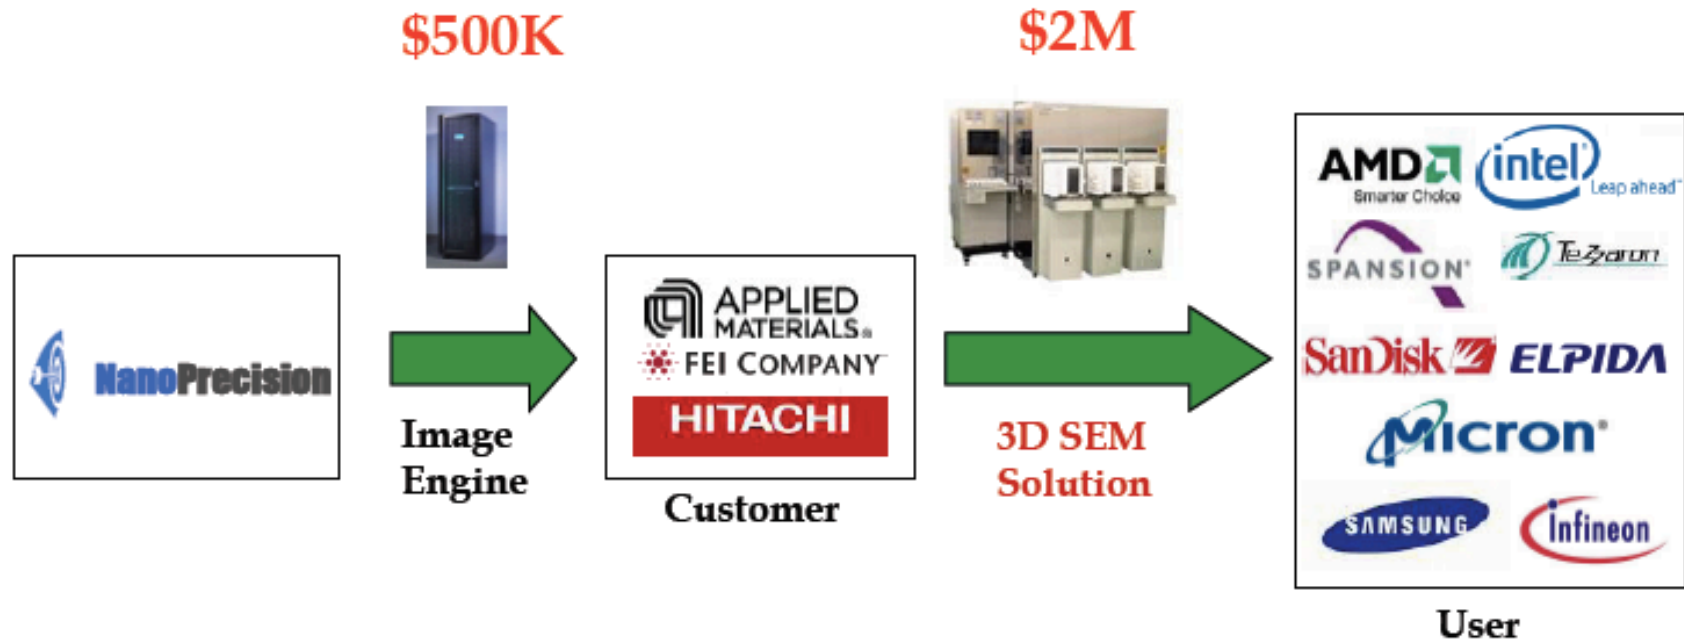

Patents Pending

- 3D Reconstruction
- Calibration Targets

Business Model

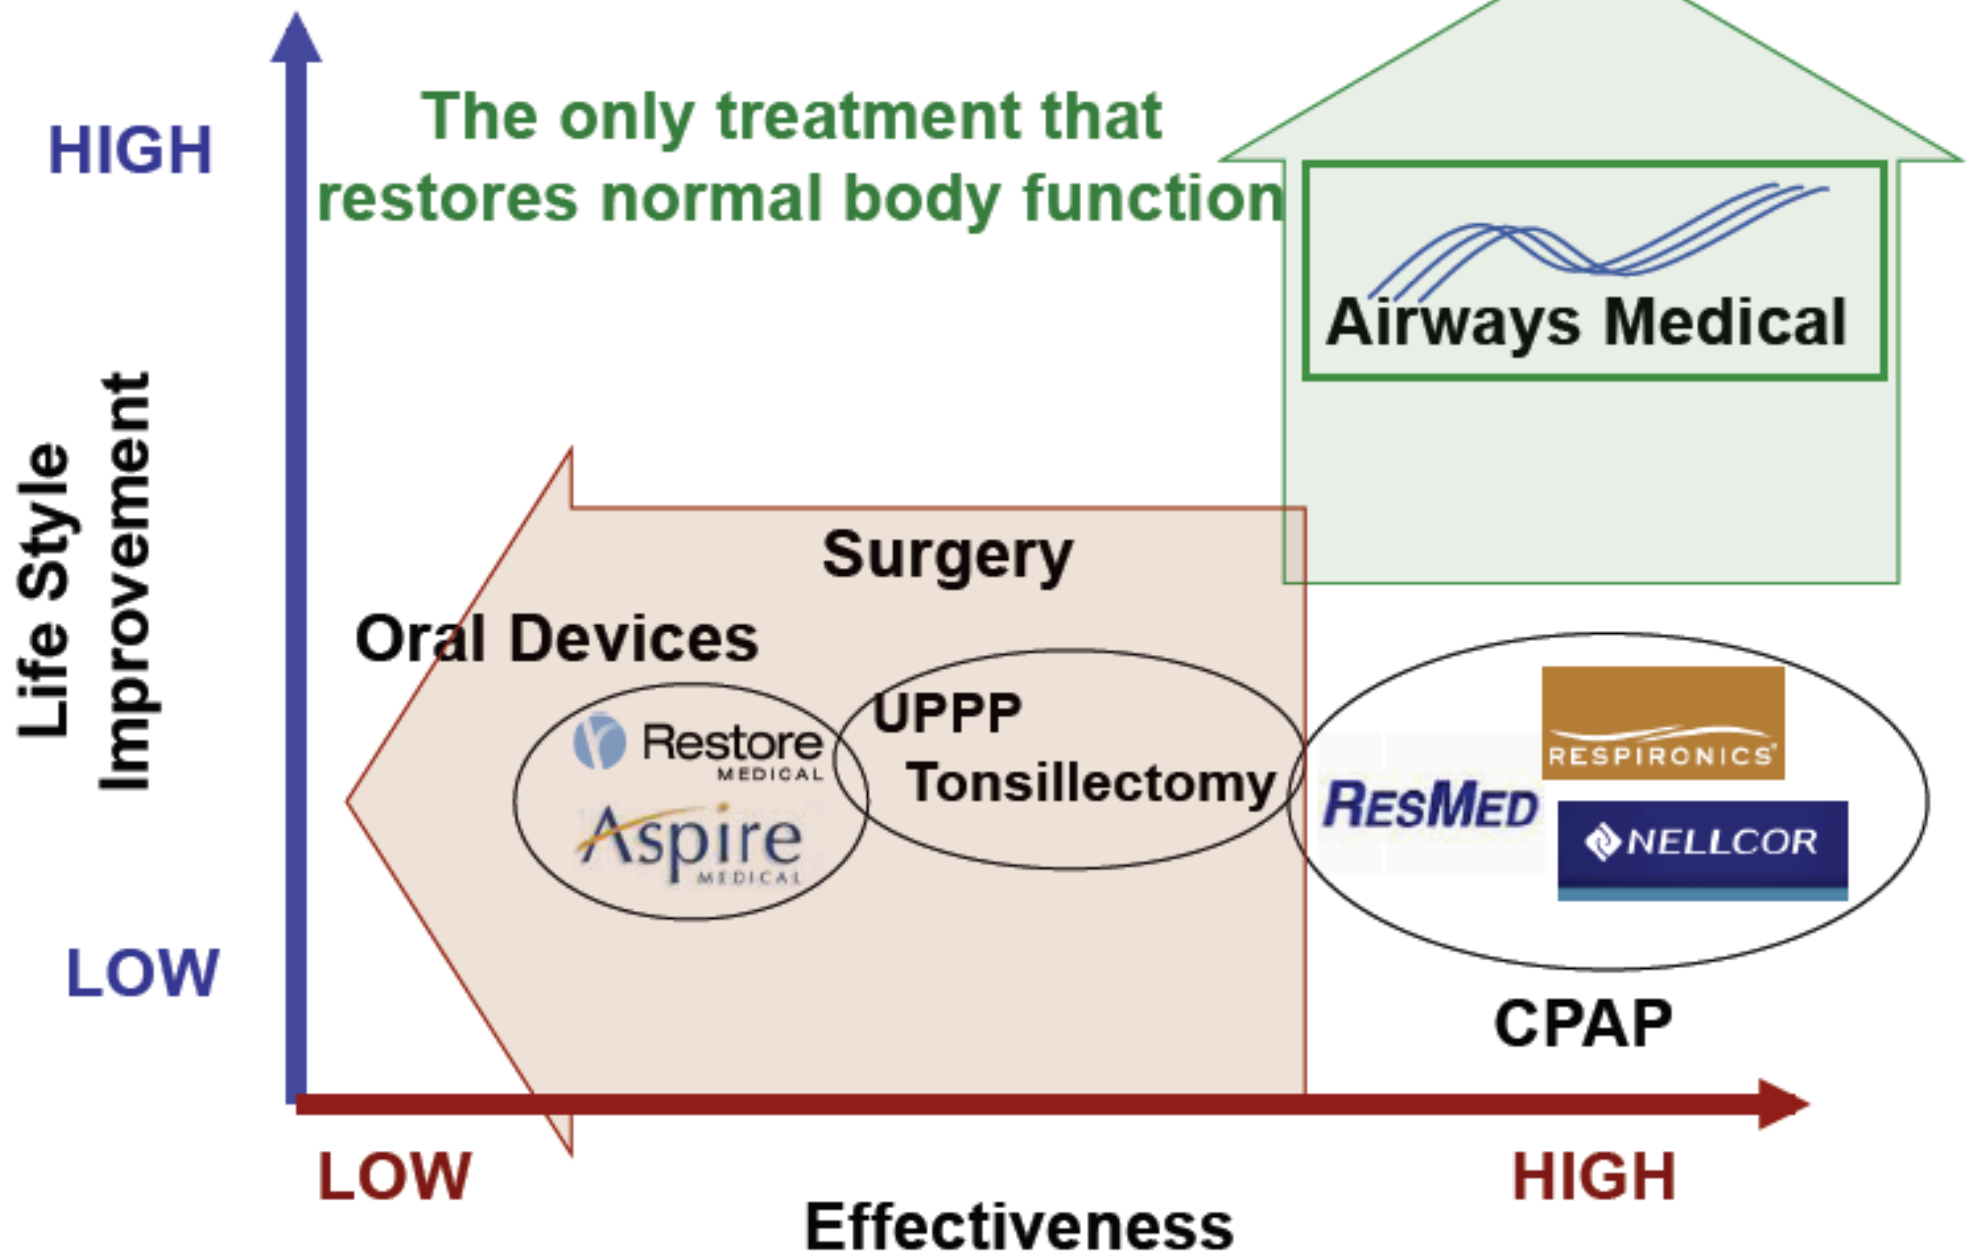

OEM Image Processing Engine to SEM manufacturers

Support subcontract for Image engine is \$50K/year for 4 years

Severe OSA Competitive Landscape

Current treatments fail to develop complete solution

Our Technology

Novel electrode material

- Lower cost than platinum
- Properties enable greater efficiency
- More robust (no catalyst poisoning)

Ultra-thin materials processing

- Atomic layer deposition (ALD)
- 100s μm \rightarrow 100s nm (1000X thinner)
- Smaller diffusion distance

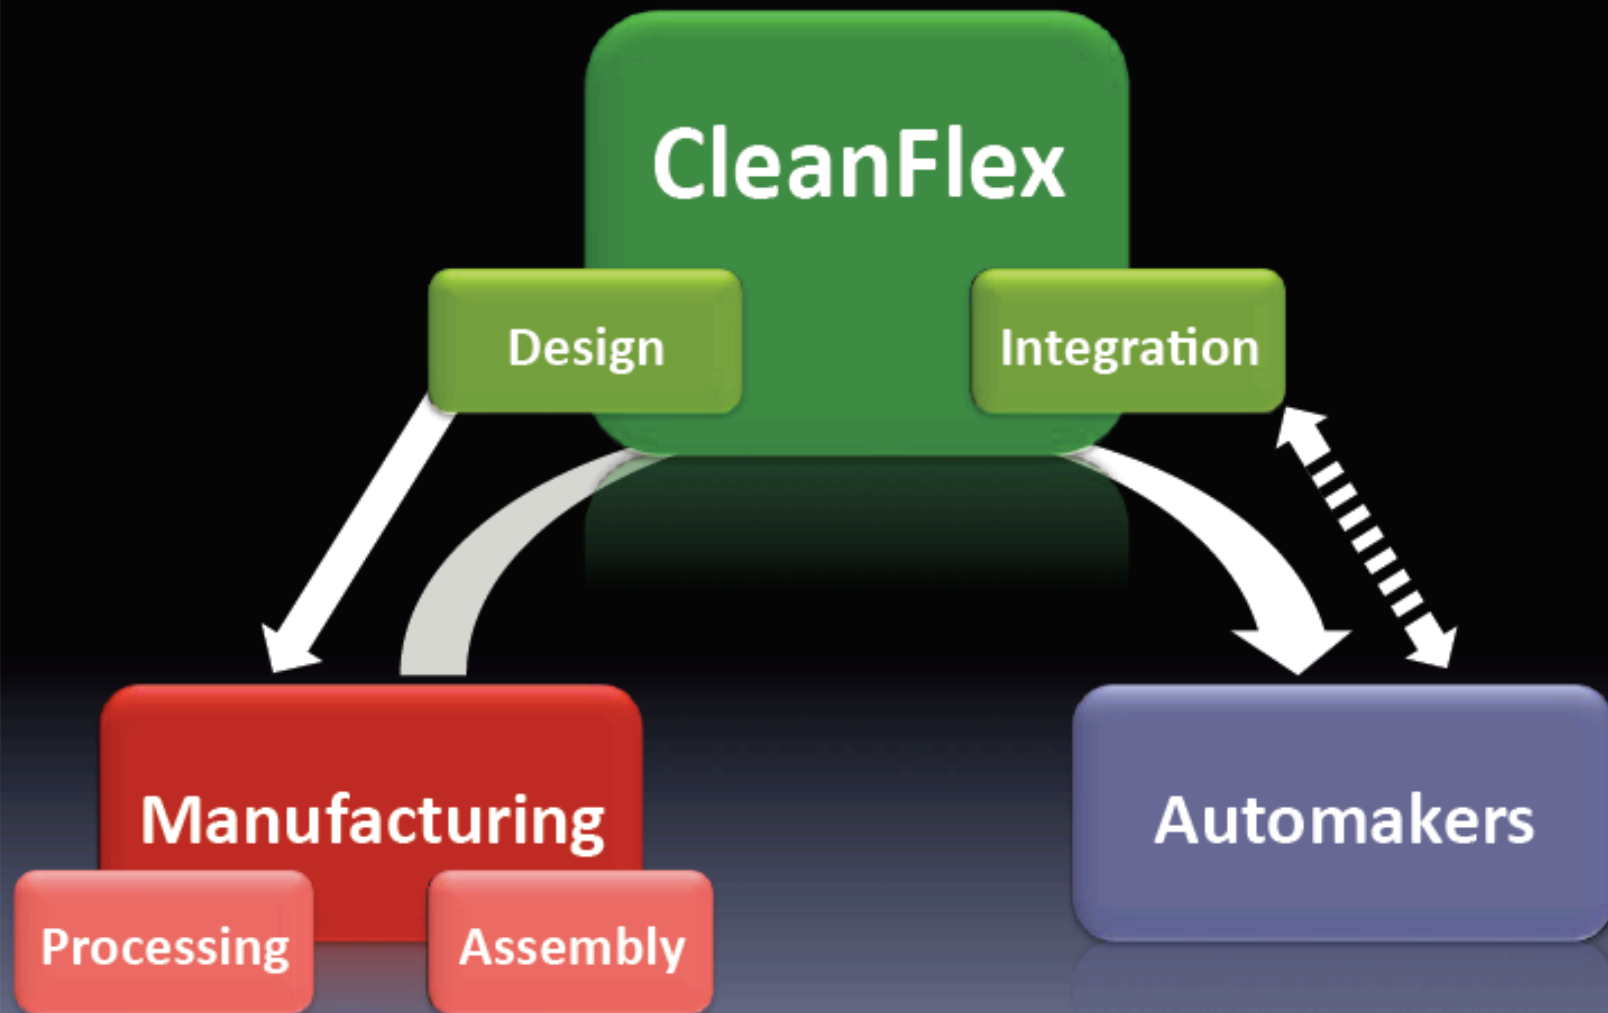

Nanowire template

- Grow nanowires, deposit on top
- More surface area \rightarrow more power

Our Business

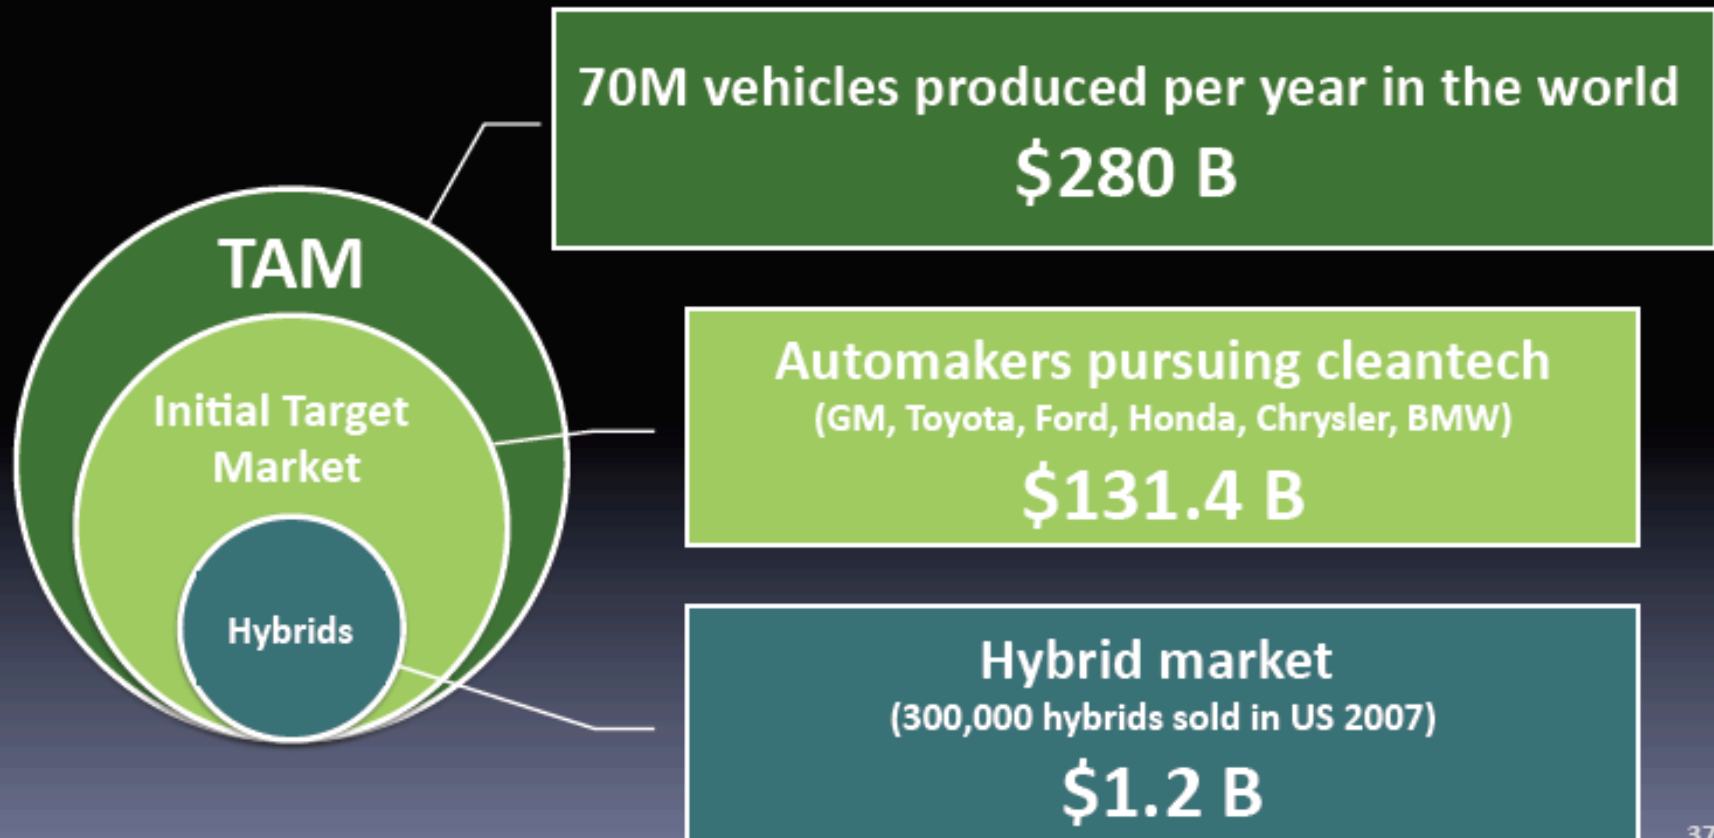

Market Size

\$4,000 / unit

DOE target

We believe consumers would be willing to pay a 10% premium over the Prius for a fuel cell vehicle.

Bob Wimmer, Toyota National Manager Technical and Regulatory Affairs, Environment

Key Business Assumptions

SALES	Direct sales to automakers																				
TECHNOLOGY ADOPTION RATE	Similar to hybrid vehicles																				
PRICE POINT	\$4,000 / unit (@ 0.5M units annually, DOE target)																				
COGS	\$2,500 / unit <table border="1"><tr><td colspan="2">Fuel Cell Stack</td></tr><tr><td>Materials</td><td>\$ 151</td></tr><tr><td>Support Structure</td><td>\$ 100</td></tr><tr><td>Insulation</td><td>\$ 80</td></tr><tr><td>Power Conditioner</td><td>\$1250</td></tr><tr><td>Assembly</td><td>\$ 200</td></tr><tr><td>Labor</td><td>\$ 200</td></tr><tr><td>Shipping</td><td>\$ 200</td></tr><tr><td>Overhead</td><td>\$ 300</td></tr><tr><td>TOTAL COGS</td><td>\$2,481</td></tr></table>	Fuel Cell Stack		Materials	\$ 151	Support Structure	\$ 100	Insulation	\$ 80	Power Conditioner	\$1250	Assembly	\$ 200	Labor	\$ 200	Shipping	\$ 200	Overhead	\$ 300	TOTAL COGS	\$2,481
Fuel Cell Stack																					
Materials	\$ 151																				
Support Structure	\$ 100																				
Insulation	\$ 80																				
Power Conditioner	\$1250																				
Assembly	\$ 200																				
Labor	\$ 200																				
Shipping	\$ 200																				
Overhead	\$ 300																				
TOTAL COGS	\$2,481																				

Example
UAV Software

The Market Opportunity

Unmanned Aerial Vehicles: High endurance robots for dangerous missions

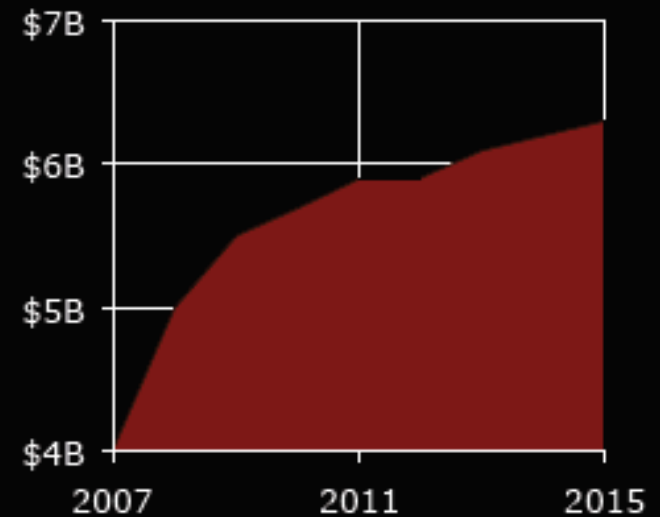

A Potential Six Billion Dollar Market:

With the right blend of autonomy

*Moiré Inc., US UAV Market Forecast, Feb. 2005**

Annual Market Value*

Reconnaissance | Search & Rescue | Fighting Wildfires | Aerial Mapping | Border Patrol

Competitive Landscape

What are the barriers to entry?

Market Landscape

What is our slice?

2013 Market Opportunity

Source: Moiré Inc., US UAV Market Forecast, Feb. 2005

2007 US UAV Market: \$4B

• Defense CAGR: 20%

2013 US UAV Market: \$6B

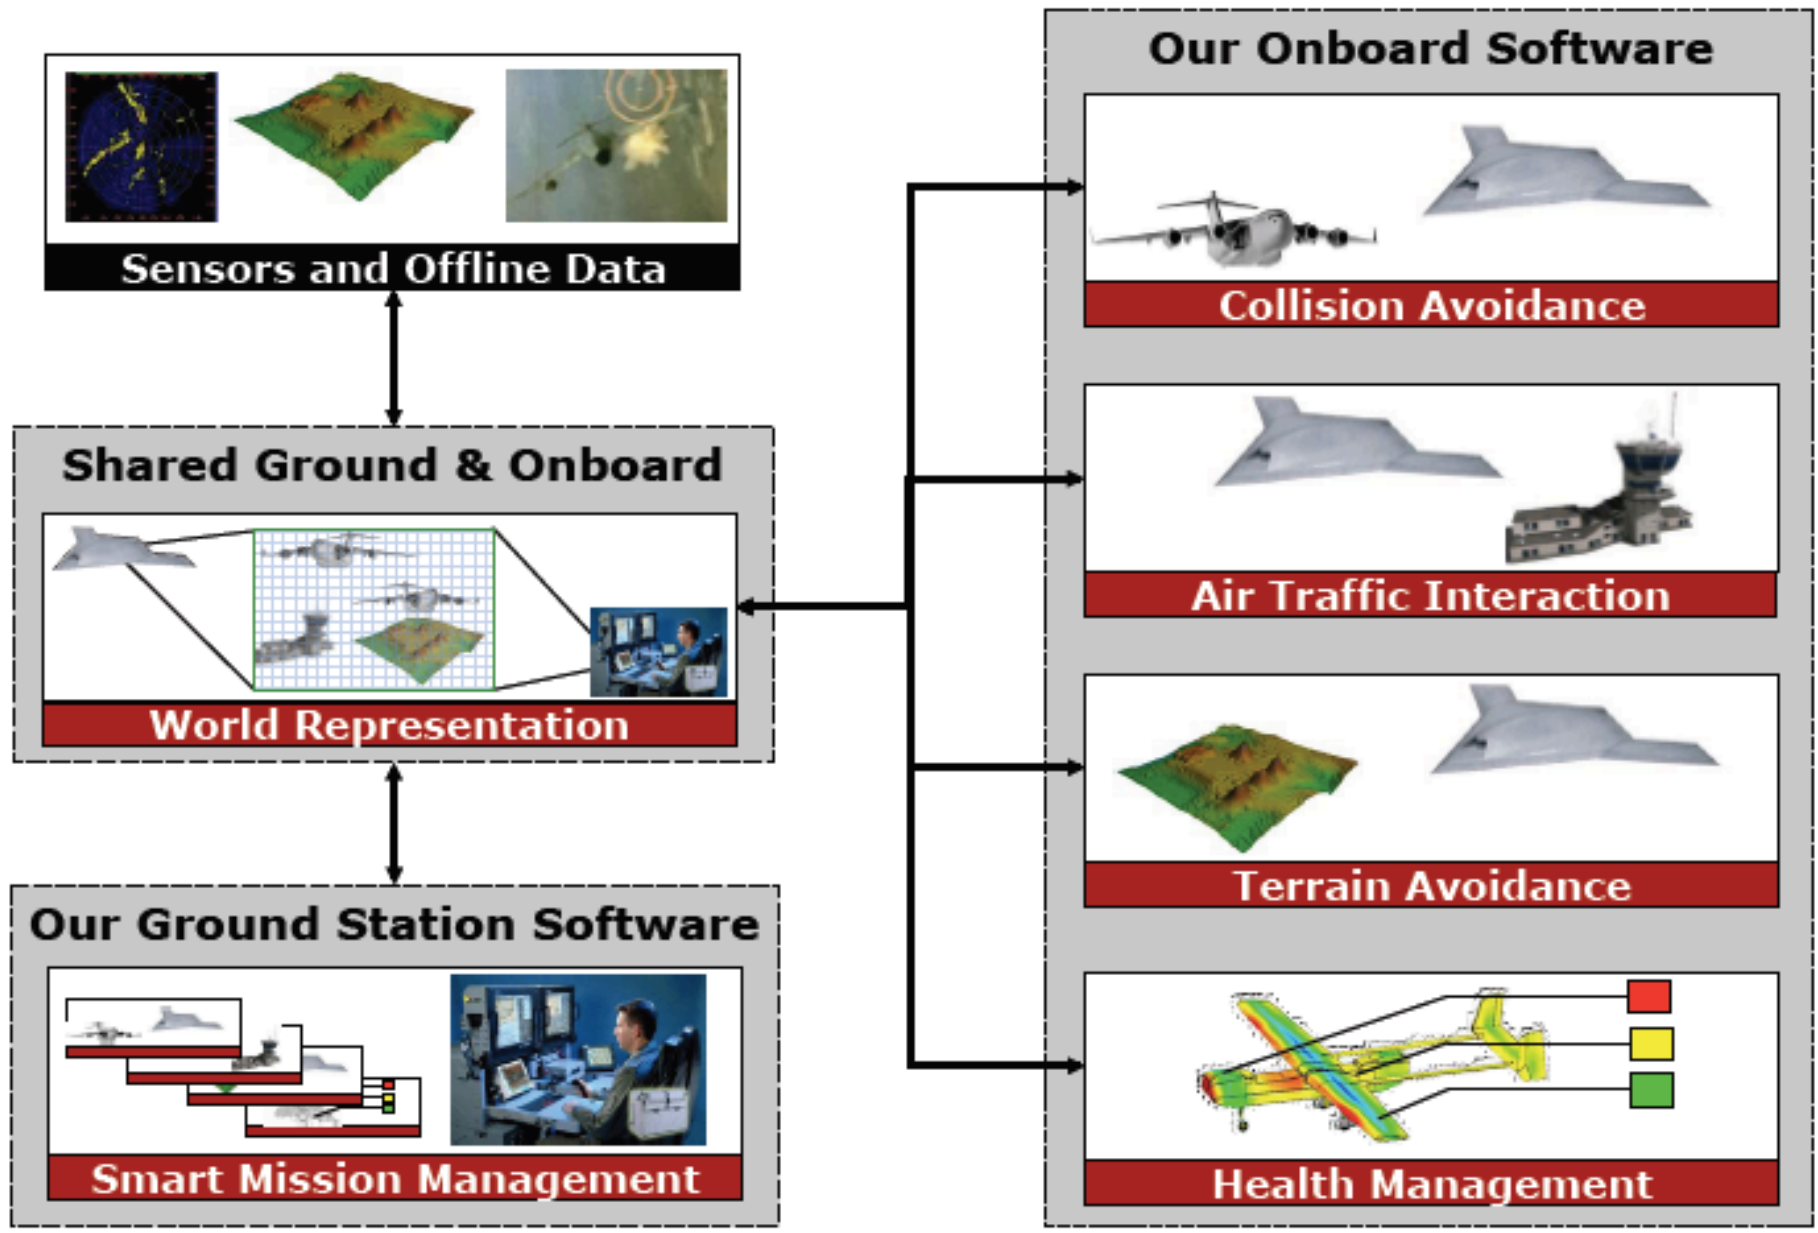

• Civil/Private CAGR: 22%

■ Defense ■ Civil / Private

Our Solution

Modular, adaptable software in a unified framework

Business Model

Who are the customers and how do we fit in *their* value chain?

Our company provides software and services to the UAV industry

- We use a B2B model to sell directly to our customers

Our Customers: UAV Systems Integrator

UAV Cost (45%)			Support Services (55%)
Software (40%)	Payload (40%)	Airframe (20%)	
Cost of Goods (Software, Hardware)	Profit, SG&A, R&D	Customer Discounts	

End User

Practical Autonomy

Sales Strategy

What is the market structure?

We target our customers by weight class
