

Dr. Kerry Krutilla

Kerry Krutilla is a professor at the O'Neill School of Public and Environmental Affairs, Indiana University-Bloomington. He specializes in the theory and practice of benefit-cost analysis, with a focus on energy, the environment, and climate change. He recently coauthored a book with John Graham for the Cambridge Core Elements Series in Public economics titled: [The Benefit-Cost Analysis of Air Pollution, Energy, and Climate Regulations \[cambridge.org\]](#). His current research focuses on the theoretical and practical challenges to intergenerational discounting, including work that adapts the Ramsey discounting formula to the structure of non-Ramsey economic growth models.

Professor Krutilla has served as an economic consultant for international and environmental organizations, including the World Bank and the Environmental Defense Fund, and for a variety of U.S federal agencies and private companies, including the Electric Power Research Institute. Internationally, he has advised the Brazilian Ministry of Transportation, the Chamber of Deputies of the Brazilian National Congress, and the Vietnamese Ministry of Planning and Development, among others.

Professor Krutilla has conducted executive trainings on benefit-cost analysis for the World Bank, the Escola Nacional de Administração Pública in Brasília, and the Vietnamese National Academy of Public Administration in Ho Chi Minh City, among other institutions. At the O'Neill School, he offers graduate and undergraduate courses on benefit-cost analysis and environmental economics.
