Welcome to Southern California Edison’s Local Government Partnerships
...Regenerating and restoring the natural environment
... to make where we work and live a much better place...
... and help make Energy Efficiency a way of life.
Partnership activities should:

- Complement local government Partner’s sustainability plans and reduce GHG through DSM efforts
- Position the local government partner as the Energy Leader and change agent in its jurisdiction
- Generate cost-effective energy and demand savings to the benefit of the local government Partner and the Partner’s community while achieving statewide savings goals.
Agreements with local governments to develop and deliver energy efficiency programs.

SCE Local Government Partnerships:

- Help local governments build the capacity to maintain a sustained focus on energy efficiency in their own facilities and in their communities
- Provide a portal to all demand-side management program opportunities
- Leverage Partner’s communications and outreach infrastructure to reach customers more effectively
- Strengthen messaging through co-branding and marketing to communities.
Local Government Partnerships in action...
Community Events
Local small businesses should expect to hear from Southern California Edison in the near future. But don’t worry, it won’t be because of unpaid bills or more expensive costs, it’s because Edison wants you to save money and energy.

Last month, local businesses began receiving letters from Southern California Edison informing them about their habits and how they can save energy.

"Your energy usage is more than 100 kilowatt hours per month. This is more than the average monthly usage for a home."

"San Ysidro's Energy Efficiency Program offers rebates of up to $400 for large or medium businesses completing energy efficiency projects such as LED lighting, insulation and equipment upgrades."

"A recent study showed that by implementing these energy savings measures, San Ysidro businesses are saving an average of $5,100 per year."

"For more information or to sign up for the program, please call the energy efficiency hotline at 888-357-400."

"Only those businesses that sign up for the program by the 15th of the month will receive the rebates."

"Thank you for considering the San Ysidro Energy Efficiency Program. Together, we can make our community greener and more energy efficient."

"Sincerely,

Mark Vasquez
San Ysidro Energy Efficiency Program Manager"
WHEREAS, a suite of programs within Southern California Edison’s Local Government Partnership Program as being consistent with the City of Santa Ana’s sustainability and economic development goals.

WHEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SANTA ANA:

Section 2. That the City of Santa Ana supports the commitment to sustainable practices through energy efficiency, and provides leadership and guidance in promoting, facilitating, and instituting such practices in the community.

Section 3. That the City of Santa Ana supports and endorses the Local Government Partnership as an effective method to help meet long-term community economic and environmental goals.

Section 4. That the City of Santa Ana will provide special recognition to City Agencies and local non-profits that utilize the programs encompassed by Southern California Edison’s Local Government Partnership.

That this Resolution shall be operative from and after November 5th, 2007.

ADOPTED this 5th day of November, 2007.

APPROVED AS TO FORM:
Joseph W. Fletcher, City Attorney

Who are the current Local Government Partners?
Community Energy Partnership
(Santa Monica)
Mammoth Lakes Partnership
Ridgecrest Partnership
San Gabriel Valley Partnership
South Bay Partnership
Bakersfield/Kern County Partnership
In 2009-11 SCE plans to launch its new Energy Leader Partnership Model. These exciting enhancements create greater alignment with Energy Policy and the CLTEESP.

The new model:

- Directs a stronger focus on helping partners lead by example through addressing energy efficiency in their own facilities
- Seeks opportunities to facilitate enhanced compliance with codes and standards, (AB32, LEED, Exceeding Title 24 standards, etc.)
- Is cost-effective and in alignment with CPUC criteria
- Standardizes the offering to Local Governments based on energy savings in municipal facilities.
